LETTER TO SHAREHOLDERS

Dear Shareholders,

We are very honored to be SMIC's newly appointed Chairman and Chief Executive Officer. One of our major priorities is to ensure that the board, management, and all employees are working together cohesively and effectively in best serving our valued customers and maximizing shareholder value. Our primary target remains unchanged, which is to achieve sustainable profitability while maintaining our momentum in technology development.

On behalf of the Board, we would like to express sorrow for the loss of our former Chairman Jiang Shang Zhou and sincere gratitude for his dedication to SMIC. We are also happy to welcome Professor Lawrence Juen-Yee Lau and Mr. Frank Meng to our Board.

During the first half of 2011, China Investment Corporation (or "CIC") invested \$250 million in SMIC, becoming our second largest shareholder. Following this announcement, Datang, our largest shareholder, also supported us by expressing their intention to exercise its pre-emptive right by investing additional \$58 million for convertible preferred shares and pre-emptive warrants. We welcome our new and existing shareholders and greatly appreciate their confidence in our future execution. These capital injections will further help SMIC to expand its technology roadmap and strengthen our foothold as one of the leading foundries globally.

We are aware that some investors may have experienced uncertainty or anxiety due to recent events, and we sincerely apologize on behalf of the Board, but we also want to reassure you that none of our operations were interrupted. In addition, the management has been working vigorously in collaborating and in communicating with our customers, suppliers, banks, and investors. We are working to rebuild shareholder value by focusing on our value-added strengths and opportunities.

Given its crucial role in China's semiconductor industry with its advanced node foundry capability, SMIC's position in China provides ample opportunities, meanwhile, it remains independent and international to capture market share globally, and to grow its value.

We recognize the recent macroeconomic turmoil and the need to be equipped for the worst, so we are preparing for a long industry downturn. We will work to implement cost reduction and speed up technology and new product development, and we will pay special attention to refining our mature processes and products. We are determined to achieve company-wide unity and to focus on growth and development; putting in full effort and solid performance to create concrete results, in order to quickly create a new phase of stability, harmony, and progress.

We appreciate your continued support and trust, as we continue to execute for shareholder value.

Chairman of the Board and Executive Director

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended June 30, 2011 and 2010
(unaudited, in US\$ thousands, except share data and those specified)

1. BASIS OF PRESENTATION

The accompanying condensed consolidated financial statements include the results of Semiconductor Manufacturing International Corporation and subsidiaries (the “Company”). All inter-company accounts and transactions have been eliminated in consolidation. The interim condensed consolidated financial statements have been prepared using the same accounting policies as those used in the preparation of the annual consolidated financial statements. The interim condensed consolidated financial statements included herein are unaudited and have been prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP and applicable rules and regulations of the Securities and Exchange Commission, regarding interim financial reporting and Appendix 16, “Disclosure of financial information,” of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. They do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. Accordingly, these interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and accompanying notes thereto contained in the Company’s Annual Report for the year ended December 31, 2010 dated on March 30, 2011. The December 31, 2010 condensed consolidated balance sheet included herein was derived from the audited financial statements as of that date, but does not include all other statements and disclosures required by GAAP. In the opinion of management, these interim condensed consolidated financial statements reflect all adjustments of a normal recurring nature necessary to present fairly the Company’s results for the interim periods. The preparation of financial statements in conformity with GAAP requires management to make certain estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amount of revenue and expenses during the reporting periods. Actual results could differ from those estimates. In addition, the Company’s operating results for the six months ended June 30, 2011 may not be indicative of the operating results for the full fiscal year or any other future period.

Certain items from prior period have been reclassified to conform to current year presentation.

2. FAIR VALUE

The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, we consider the principal or most advantageous market in which we would transact and we consider assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of non-performance.

The Company utilizes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Observable inputs are obtained from independent sources and can be validated by a third party, whereas unobservable inputs reflect assumptions regarding what a third party would use in pricing an asset or liability. A financial instrument’s categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The Company establishes three levels of inputs that may be used to measure fair value that gives the highest priority to observable inputs and the lowest priority to unobservable inputs as follows:

Level 1	—	Quoted prices in active markets for identical assets or liabilities.
Level 2	—	Inputs other than quoted market prices in active markets that are observable, either directly or indirectly.
Level 3	—	Unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities.

2. FAIR VALUE (Continued)

The Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. The Company performs a thorough analysis of its assets and liabilities that are subject to fair value measurements and disclosures to determine the appropriate level based on the observability of the inputs used in the valuation techniques. Assets and liabilities carried at fair value are classified in the categories described above based on the lowest level input that is significant to the fair value measurement in its entirety.

Assets/Liabilities measured at fair value on a recurring basis

Assets and liabilities measured on the Company's balance sheet at fair value on a recurring basis subsequent to initial recognition consisted of the following:

3. DISCONTINUED OPERATIONS

On March 1, 2011, the Company sold its majority ownership interest in Semiconductor Manufacturing International (AT) Corporation (“AT”) and deconsolidated the entity. As a result, all previously issued preferred securities by AT were cancelled. The Company retained a 10% interest in AT and will account for such investment under the cost method in future periods as it no longer has a controlling financial interest nor significant influence over AT. The Company reported the results of the AT as a discontinued operations in the condensed consolidated statement of operations. No cash or other consideration was received by the Company in conjunction with the disposition.

The Company recorded a gain of \$17,103 on the deconsolidation of AT equal to the difference between (i) the sum of (a) the fair value of the retained noncontrolling investments in AT, and (b) the carrying amount of the aforementioned noncontrolling interest in AT, and (ii) the carrying amount of AT’s assets and liabilities. Income from discontinued operations of \$14,741 represents both the results of operations of AT for the period from January 1, 2011 to the date it was deconsolidated and the gain on deconsolidation of AT.

4. REVENUE RECOGNITION

The Company manufactures semiconductor wafers for its customers based on the customers’ designs and specifications pursuant to manufacturing agreements and/or purchase orders. The Company also sells certain semiconductor standard products to customers. Revenue is recognized when persuasive evidence of an arrangement exists, service has been performed, the fee is fixed or determinable and collectability is reasonably assured. Sales to customers are recognized upon shipment and title transfer, if all other criteria have been met. The Company also provides certain services, such as mask making, testing and probing. Revenue is recognized when the services are completed or upon shipment of semiconductor products, if all other criteria have been met.

Customers have the right of return within one year pursuant to warranty and sales return provisions. The Company typically performs tests of its products prior to shipment to identify yield rate per wafer. Occasionally, product tests performed after shipment identify yields below the level agreed with the customer. In those circumstances, the customer arrangement may provide for a reduction to the price paid by the customer or for the costs to return products and to ship replacement products to the customer. The Company estimates the amount of sales returns and the cost of replacement products based on the historical trend of returns and warranty replacements relative to sales as well as a consideration of any current information regarding specific known product defects that may exceed historical trends.

The Company provides management services to certain government-owned foundries. Service revenue is recognized when persuasive evidence of an arrangement exists, service has been performed, the fee is fixed or determinable, and collectability is reasonably assured.

This two-year bank facility was used to finance future expansion for SMIC Shanghai's 12-inch fab. As of June 30, 2011, SMIC Shanghai had drawn down US\$12 million, on this loan facility. The principal amount is repayable in June 2013. The interest rate on this loan facility was 4.40%, for the six months ended June 30, 2011. This five-year bank loan will be used to expand the capacity of SMIC Beijing's fabs. The facility is secured by the manufacturing equipment located in the SMIC Beijing 12-inch fabs. The Company has guaranteed SMIC Beijing's obligations under this facility. As of June 30, 2011, SMIC Beijing had repaid US\$319.9 million according to the repayment schedule. On June 26, 2009, SMIC Beijing amended the syndicated loan agreement to defer the commencement of the three remaining semi-annual payments to December 28, 2011. The amendment includes a provision for mandatory early repayment of a portion of the outstanding balance if SMIC Beijing's financial performance exceeds certain pre-determined benchmarks. The interest rate on this loan facility ranged from 2.60% to 2.66%, for the six months ended June 30, 2011. Any of the following in respect of SMIC Beijing would constitute an event of default during the term of the loan agreement:

1. Where $\text{Net profit} + \text{depreciation} + \text{amortization} + \text{financial expenses} - (\text{increase of accounts receivable and advanced payments} + \text{increase of inventory} - \text{increase in accounts payable and advanced receipts}) / \text{financial expenses} < 1$; and
2. $(\text{Total liability} - \text{borrowings from shareholders, including principal and interest}) / \text{Total assets} > 60\%$ (when SMIC Beijing's capacity is less than 20,000 12-inch wafers per month); and $(\text{Total liability} - \text{borrowings from shareholders, including principal and interest}) / \text{Total assets} > 50\%$ (when SMIC Beijing's capacity exceeds 20,000 12-inch wafers per month).

In June 2011, the syndicate of banks agreed on an amendment of covenant regarding item 2 above as below:

$(\text{Total liability} - \text{borrowings from shareholders, including principal and interest}) / \text{Total assets} > 70\%$

Such amendment will remain in effect from January 1, 2011 to June 30, 2012.

SMIC Beijing has complied with these covenants as of June 30, 2011.

2005 EUR Loan Facility. On December 15, 2005, the Company entered into a EUR denominated long-term loan facility agreement in the aggregate principal amount of EUR 85 million with ABN Amro Bank N.V. Each draw down made under the facility shall be repaid in full by us in ten equal semi-annual installments. SMIC Tianjin had drawn down in 2006 and SMIC Shanghai had drawn down in 2007 and 2008.

The interest rate on this loan facility ranged from 2.52% to 4.56%, for the six months ended June 30, 2011. The interest expense incurred for the six months ended June 30, 2011 and 2010 was US\$0.4 million and US\$0.2 million of which US\$0.1 million and US\$0.05 million was capitalized additions to assets under construction for the six months ended June 30, 2011 and 2010, respectively.

2006 Loan Facility (SMIC Tianjin). In May 2006, SMIC Tianjin entered into a loan facility in the aggregate principal amount of US\$300.0 million from a consortium of international and Chinese banks. This facility is secured by the manufacturing equipment located in our Tianjin fab, except for the manufacturing equipment purchased using the EUR denominated loan. The Company has guaranteed SMIC Tianjin’s obligations under this facility. As of June 30, 2011, SMIC Tianjin had drawn down US\$259.0 million on this loan facility. The principal amount is repayable starting from February 2010 in six semi-annual installments. As of June 30, 2011, SMIC Tianjin had repaid US\$215.9 million. Any of the following in respect of SMIC Tianjin would constitute an event of default during the term of the facility:

1. Net profit + depreciation + amortization + financial expenses – (increase of accounts receivable and advanced payments + increase of inventory – increase in accounts payable and advanced receipts)/ financial expenses < 1; and
2. The ratio of total debt to total assets is more than 60% during the ramp up period of SMIC Tianjin and more than 40% after the facility is at full capacity.

The outstanding borrowings under the credit agreements are unsecured, except for the amount of US\$50.6 million, which is secured by term deposits.

The interest expense incurred for the six months ended June 30, 2011 and 2010 were US\$9.7 million and US\$5.7 million, respectively. The interest rate on the loans ranged from 1.75% to 5.84%, for the six months ended June 30, 2011.

CAPITALIZED INTEREST

Interest cost incurred on funds used to construct plant and equipment during the active construction period is capitalized, net of government subsidies received. The interest capitalized is determined by applying the borrowing interest rate to the average amount of accumulated capital expenditures for the assets under construction during the period. Capitalized interest is added to the cost of the underlying assets and is amortized over the useful life of the assets. Capitalized interest of US\$8.7 million and US\$3.1 million have been added to the cost of the underlying assets during the six months ended June 30, 2011 and June 30, 2010, respectively, and is amortized over the respective useful life of the assets. For the six months ended June 30, 2011 and June 30, 2010, the Company recorded amortization expenses relating to the capitalized interest of US\$3.4 million and US\$3.6 million, respectively.

COMMITMENTS

As of June 30, 2011, the Company had commitments of US\$83 million for facilities construction obligations in Beijing, Tianjin, Shanghai and Wuhan Living Quarter and US\$537 million to purchase machinery and equipment mainly for the Beijing, Tianjin and Shanghai fabs in the coming 18 months.

DEBT TO EQUITY RATIO

As of June 30, 2011, the Company's debt to equity ratio was 47.1% calculated by dividing the sum of the short-term borrowings, current portion of long-term debt, and long-term debt by total shareholders' equity.

CONTINGENT LIABILITIES

The Company recorded a contingent liability in relation to claims from an unrelated semiconductor manufacturer based on its best estimate of the probable amount of its liability as of December 31, 2010. For the six months ended June 30, 2011, the Company believes that the recorded amount still reflects its best estimate of the probable amount of the liability.

FOREIGN EXCHANGE RATE FLUCTUATION RISK

The Company's revenues, expenses, and capital expenditure are primarily transacted in United States Dollars. However, since the Company has operations consisting of manufacturing, sales activities and capital purchasing conducted in currencies other than U.S. dollar, the Company is primarily exposed to changes in exchange rates for the EURO, Japanese Yen, and Chinese Renminbi.

To minimize these risks, the Company purchases foreign-currency forward exchange contracts with contract terms normally lasting less than twelve months to protect against the adverse effect that exchange rate fluctuations may have on foreign currency denominated activities. These forward exchange contracts are principally denominated in Chinese Renminbi, Japanese Yen or EURO and do not qualify for hedge accounting in accordance with ASC 815. As of June 30, 2011, the Company had outstanding foreign currency forward exchange contracts with a notional amount of US\$274 million all of which matured before Jun 2012. Notional amounts are stated in U.S. dollar equivalent spot market exchange rates, as of the respective dates.

As of June 30, 2011, the fair value of foreign currency forward exchange contracts was a gain of approximately US\$0.23 million. The Company does not enter into foreign currency exchange contracts for speculative purposes.

CROSS CURRENCY SWAP FLUCTUATION RISK

At June 30, 2011, the Company had a long-term loan facility agreement outstanding in the aggregate principal amount of EUR5.7 million. The company is primarily exposed to changes in exchange rate for the EURO.

To minimize the risk, the company entered into a cross currency swap contract with contract terms fully matching the repayment schedule of the long-term loan to protect against the adverse effect of exchange rate fluctuations arising from the foreign-currency denominated loan. The cross currency swap contract does not qualify for hedge accounting in accordance with ASC 815.

As of June 30, 2011, the Company had outstanding cross currency swap contracts with a notional amount of US\$8.2 million all of which will mature before May 2012. Notional amounts are stated in U.S. dollar equivalent spot market exchange rates, as of the respective dates.

As of June 30, 2011, the fair value of foreign currency forward exchange contracts was a loss of approximately US\$0.12 million. The Company does not enter into foreign currency exchange contracts for speculative purposes.

INTEREST RATE RISK

The Company's exposure to interest rate risks relates primarily to the Company's long-term debt obligations, which the Company generally assumes to fund capital expenditures and working capital requirements. The Company's long-term debt obligations are all subject to variable interest rates. The interest rates on the Company's U.S. dollar-denominated loans are linked to the LIBOR. The interest on the Company's EURO denominated loans are linked to the EURIBOR. As a result, the interest on the Company's loans are subject to fluctuations in the underlying interest rates to which they are linked.

As of June 30, 2011, the Company had outstanding interest rate swap contracts with a notional amount of US\$72 million all of which will mature before December 2012.

EMPLOYEES EQUITY INCENTIVE PLAN

Pursuant to the shareholders' approval obtained at the annual general meeting held on June 3, 2010, the number of shares reserved for issuance under the 2004 Equity Incentive Plan was increased by an additional 560,522,395 (representing 2.5% of the issued share capital as at March 31, 2010) to a new limit of 1,015,931,725 ordinary shares of the Company.

Save as disclosed in this interim report, there is no material change to the information disclosed in the 2010 annual report of the Company in relation to the number and remuneration of employees, remuneration policies, bonus and share option schemes of employees.

PROSPECTS AND FUTURE PLANS

Looking into the second half of 2011, the Company remains cautious on the overall industry outlook and has revised down its full year capital expenditure for 2011 from the originally stated \$1 billion to \$800 million. We expect third quarter 2011 revenue to decline by -14% to -17% compared to second quarter of 2011. This decline was in part due to our customer transition to 65nm and 45nm, and largely due to unexpected changes in some of our customers' programs. The overall demand from both international and domestic customers is weaker than expected due to relatively soft end-market consumption and high inventory, in addition to sudden customer product changes. Despite these changes, we continue to have new tape outs for 65nm and customers committed to working with us on their 45/40nm products, which will likely contribute meaningful revenue next year.

REPURCHASE, SALE OR REDEMPTION OF SECURITIES

The Company has not repurchased, sold or redeemed any of its securities during the six months ended June 30, 2011.

CORPORATE GOVERNANCE PRACTICES

The HKSE's Code on Corporate Governance Practices (the "CG Code") as set out in Appendix 14 of the Listing Rules, which contains code provisions to which an issuer, such as the Company, is expected to comply or advise as to reasons for deviations (the "Code Provisions") and recommended best practices to which an issuer is encouraged to comply (the "Recommended Practices"). The Corporate Governance Policy of the Company came into effect on January 25, 2005 after approval by the Board (and was subsequently updated by the Board on July 26, 2005 and April 24, 2009, respectively) (the "CG Policy"). The CG Policy, a copy of which can be obtained on the Company's website at www.smics.com under "Investor Relations" > "Corporate Governance", incorporates all of the Code Provisions of the CG Code except for paragraph E.1.3 which relates to the notice period for general meetings of the Company, and many of the Recommended Practices.

In addition, the Company has adopted or put in place various policies, procedures, and practices in compliance with the provisions of the CG Policy.

Save as disclosed below, none of the Directors is aware of any information which would reasonably indicate that the Company is not, or was not, during the financial period from January 1, 2011 to June 30, 2011, in compliance with the CG Code.

(a) Code Provision A.2.1

Code Provision A.2.1 provides that "the roles of chairman and chief executive officer should be separate and should not be performed by the same individual". On July 13, 2011, Dr. David N.K. Wang resigned from his position as the Chief Executive Officer of the Company. Subsequently, Mr. Zhang Wenyi was appointed as the Chairman of the Board and the Acting Chief Executive Officer with effect from July 15, 2011. Mr. Zhang ceased to be the Acting Chief Executive Officer when Dr. Tzu-Yin Chiu was appointed as the Chief Executive Officer on August 5, 2011. As a result, the Company did not meet the requirement under Code Provision A.2.1 for the interim period from July 15, 2011 to August 4, 2011.

(b) Code Provision E.1.2

Code provision E.1.2 of the CG Code provides that "the chairman of the board should attend the annual general meeting". Following the passing away of Mr. Jiang Shang Zhou, former Chairman of the Board, on June 27, 2011, the chairman position was vacated until being filled by Mr. Zhang Wenyi on July 15, 2011. As a result, no chairman of the Board attended the 2011 AGM which was held on June 29, 2011.

MODEL CODE FOR SECURITIES TRANSACTIONS BY DIRECTORS OF LISTED ISSUERS

The Company has adopted an Insider Trading Compliance Program (the "Insider Trading Policy") which encompasses the requirements of the Model Code as set out in Appendix 10 of the Listing Rules (the "Model Code"). The Company, having made specific enquiry of all Directors, confirms that all members of the Board have complied with the Insider Trading Policy and the Model Code throughout the six months ended June 30, 2011. The senior management of the Company as well as all officers, Directors, and employees of the Company and its subsidiaries are also required to comply with the provisions of the Insider Trading Policy.

The Board has a duty to the Company's shareholders to direct and oversee the affairs of the Company in order to maximize shareholder value. The Board acting itself and through the various committees of the Board, actively participates in and is responsible for the determination of the overall strategy of the Company, the establishment and monitoring of the achievement of corporate goals and objectives, the oversight of the Company's financial performance and the preparation of the accounts, the establishment of corporate governance practices and policies, and the review of the Company's system of internal controls. The management of the Company is responsible for the implementation of the overall strategy of the Company and its daily operations and administration. The Board has access to the senior management of the Company to discuss enquiries on management information.

The Board consists of nine Directors as at the date of this announcement. Directors may be elected to hold office until the expiration of their respective terms upon a resolution passed at a duly convened shareholders' meeting by holders of a majority of the Company's issued shares being entitled to vote in person or by proxy at such meeting. The Board is divided into three classes with one class of directors eligible for re-election at each annual general meeting of shareholders.

Each class of Director will serve a term of three years. The Class I Directors were re-elected for a term of three years at the 2011 AGM (except Dr. David N.K. Wang who was not re-elected at that AGM, and Mr. Zhang Wenyi and Dr. Tzu-Yin Chiu whose appointment as Directors took effect on June 30, 2011 and August 5, 2011 respectively) to hold office until the 2014 annual general meeting of the Company. The Class II Directors were re-elected for a term of three years at the 2009 annual general meeting (except Dr. Chen Shanzhi who was elected at that annual general meeting, and Mr. Frank Meng whose appointment as Director took effect from August 23, 2011) to hold office until the 2012 annual general meeting of the Company. The Class III Directors were re-elected at the 2010 annual general meeting (except Professor Lawrence Juen-Yee Lau whose appointment as Director took effect from June 30, 2011) for a term of three years to hold office until the 2013 annual general meeting of the Company.

Following the passing away of Mr. Jiang Shang Zhou on June 27, 2011, the Company only had two independent non-executive directors ("INEDs"), namely, Mr. Tsuyoshi Kawanishi and Mr. Lip-Bu Tan, until the appointment of Mr. Zhang Wenyi as INED took effect on June 30, 2011. Subsequently on July 2, 2011, Mr. Zhang Wenyi was redesignated as executive director, following which the position of the third INED of the Company as required by Rule 3.10(1) of the Listing Rules was vacated. On August 23, 2011, Mr. Frank Meng was appointed as the third INED. Following the appointment of Mr. Meng, the Company complies with the minimum number requirement under Rule 3.10(1).

Save as disclosed above, for the six months ended June 30, 2011, the Board has complied with the minimum requirements of the Listing Rules relating to the appointment of at least three INEDs on the Board, and complied with the requirement that these should include one such director with appropriate professional qualifications or accounting or related financial management expertise.

As of the date of this announcement, the roles of the chairman and chief executive officer are segregated and such roles are exercised by Mr. Zhang Wenyi and Dr. Tzu-Yin Chiu respectively.

The following table sets forth the names, classes and categories of the directors as at the date of this report:

The relevant papers for the Board meetings were dispatched to Board members in accordance with the CG Code. Directors may include matters for discussion in the agenda if the need arises. Upon the conclusion of the Board meeting, minutes

are circulated to all Directors for their comment and review prior to their approval of the minutes at the following or subsequent Board meeting.
