-

Item 8.01. Other Events.

On February 13, 2014, Noranda Aluminum Holding Corporation (NYSE: NOR) announced that its wholly-owned subsidiary Noranda Aluminum, Inc. (together referred to as “Noranda” or “the Company”) has filed with the Missouri Public Service Commission (“the Commission”) a request to change the rate design for Ameren Missouri customers. The filing is supported by testimony of the United Steelworkers Union, community organizations and legislators. The filing is also supported by the Missouri Retailers Association, which includes large commercial consumers, and the Missouri Industrial Energy Consumers, representing large industrial consumers. The filing requests a rate design change that would reduce electricity costs at the Company’s aluminum smelter in New Madrid, Missouri (“New Madrid”).

The Company’s filing requests an initial rate of \$30 per megawatt hour (“Mwh”) for New Madrid. Under the proposed ten-year rate structure, New Madrid’s power rate would not be subject to fuel adjustment charges, but would share in future rate increases granted to Ameren Missouri by the Commission, subject to a two percent cap for each general rate case.

Although the Company has requested that the Commission approve the reduced rate with an effective date of August 1, 2014, there can be no assurance that the Commission will make a ruling favorable to the Company or make a decision within the time period requested by the Company, if at all.

A copy of the press release related to the announcement is filed with this Form 8-K as Exhibit 99.1.
