Flexion Therapeutics, Inc.

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Overview and Nature of the Business

Flexion Therapeutics, Inc. (“Flexion” or the “Company”) was incorporated under the laws of the state of Delaware on November 5, 2007. Flexion is a specialty pharmaceutical company focused on the development and commercialization of novel, local pain therapies for the treatment of patients with musculoskeletal conditions, beginning with osteoarthritis (“OA”), a type of degenerative arthritis. The Company’s lead product candidate, Zilretta™ (also known as FX006), is a late-stage, injectable, sustained-release, intra-articular, or IA, meaning “in the joint,” investigational steroid that is being developed as a treatment for patients with moderate to severe knee OA pain.

The Company is subject to risks and uncertainties common to companies in the biopharmaceutical industry, including, but not limited to, new technological innovations, dependence on key personnel, protection of proprietary technology, compliance with government regulations, and ability to secure additional capital to fund operations. Product candidates currently under development will require significant additional research and development efforts, including extensive preclinical and clinical testing and regulatory approval prior to commercialization. These efforts require significant amounts of additional capital, adequate personnel infrastructure and extensive compliance reporting capabilities. The Company’s product candidates are all in the development stage. There can be no assurance that development efforts, including clinical trials, will be successful. Even if the Company’s product development efforts are successful, it is uncertain when, if ever, the Company will realize significant revenue from product sales.

2. Financing Activities

On June 13, 2016, the Company completed a follow-on public offering of its common stock, which resulted in the sale of 5,500,000 shares of the Company’s common stock at a price to the public of \$14.00 per share. On June 21, 2016, the Company completed the sale of an additional 400,000 shares of its common stock at the public offering price pursuant to the underwriters’ exercise of its option to purchase additional shares. The Company received aggregate net proceeds from the follow-on financing of \$77.6 million after deducting underwriting discounts, commissions, and offering costs paid by the Company.

The Company’s total issued common stock as of June 30, 2016 was 27,521,070.

3. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying condensed consolidated financial statements as of June 30, 2016, and for the three and six months ended June 30, 2016 and June 30, 2015, have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (the "SEC") and Generally Accepted Accounting Principles ("GAAP") for consolidated financial information including the accounts of the Company and its wholly-owned subsidiary after elimination of all significant intercompany accounts and transactions. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, these condensed consolidated financial statements reflect all adjustments which are necessary for a fair statement of the Company's financial position and results of its operations, as of and for the periods presented. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto contained in the Company's Annual Report on Form 10-K filed with the SEC on March 11, 2016.

The information presented in the condensed consolidated financial statements and related notes as of June 30, 2016, and for the three and six months ended June 30, 2016 and June 30, 2015, is unaudited. The December 31, 2015 consolidated balance sheet included herein was derived from the audited financial statements as of that date, but does not include all disclosures, including notes, required by GAAP for complete financial statements.

Interim results for the three and six months ended June 30, 2016 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2016, or any future period.

The accompanying condensed consolidated financial statements have been prepared on a basis which assumes that the Company will continue as a going concern and which contemplates the realization of assets and satisfaction of liabilities and commitments in the normal course of business. The Company has incurred recurring losses and negative cash flows from operations. As of June 30, 2016 and December 31, 2015, the Company had cash, cash equivalents, marketable securities, and long-term investments of \$163,261,000 and \$118,604,000, respectively. Management believes that current cash, cash equivalents and marketable securities on hand at

June 30, 2016 should be sufficient to fund operations for at least the next twelve months. The future viability of the Company is dependent on its ability to raise additional capital to finance its operations and to fund increased research and development costs in order to seek approval for commercialization of its product candidates. The Company's failure to raise capital as and when needed would have a negative impact on its financial condition and its ability to pursue its business strategies as this capital is necessary for the Company to perform the research and development activities required to develop and seek approval for commercialization of the Company's product candidates and to establish a commercial infrastructure in order to generate future revenue streams.

In April 2015, the FASB released Accounting Standards Update ("ASU") 2015-05, Customers Accounting for Fees Paid in a Cloud Computing Arrangement ("CCA"). Previously, there was no specific U.S. GAAP guidance on accounting for such fees from the customer's perspective. Under the new standard, customers apply the same criteria as vendors to determine whether a CCA contains a software license or is solely a service contract. For public companies, the new standard is effective for annual periods, including interim periods, beginning after December 15, 2015 with early adoption allowed. The Company adopted this guidance as of January 1, 2016 and applied it to new internally used software acquired during the quarterly period ended June 30, 2016.

In November 2015, the FASB issued ASU 2015-17, Income Taxes (Topic 740), to simplify the presentation of deferred income taxes. Under the new standard, both deferred tax liabilities and assets are required to be classified as noncurrent in a classified balance sheet. ASU 2015-17 will become effective for fiscal years, and the interim periods within those years, beginning after December 15, 2016, with early adoption allowed. The Company is currently evaluating the potential impact that the adoption of this guidance may have on the Company's financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases ("ASU 2016-02"), to increase transparency and comparability among organizations by recognizing lease assets and liabilities, including for operating leases, on the balance sheet and disclosing key information about leasing arrangements. ASU 2016-02 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company is currently evaluating the impact that the adoption of this guidance may have on the Company's financial statements.

On March 30, 2016, the FASB released ASU 2016-09, which amends ASC Topic 718, Compensation-Stock Compensation, to require changes to several areas of employee share-based payment accounting in an effort to simplify share-based reporting. The update revises requirements in the following areas: minimum statutory withholding, accounting for income taxes, forfeitures, and intrinsic value accounting for private entities. For public companies, the new rules will become effective for annual reporting periods beginning after December 15, 2016, and interim reporting periods within such annual period. The Company is currently evaluating the impact that the adoption of this guidance may have on the Company's financial statements.

Consolidation

The accompanying condensed consolidated financial statements include the Company and its wholly-owned subsidiary, Flexion Securities Corporation, Inc. The Company has eliminated all intercompany transactions for the three and six months ended June 30, 2016 and the year ended December 31, 2015, the year Flexion Securities Corporation, Inc. was established.

U.S. Government Grant

The Company has performed research and development for the U.S. Department of Defense under a cost reimbursable grant for a Phase 2 clinical trial investigating Zilretta in active military and medically retired veterans with post-traumatic knee OA. Due to the challenges of enrolling military personnel with post-traumatic knee OA, the Company has discontinued the trial and terminated the grant. The related costs incurred under the grant prior to the

termination have been included in research and development expense in the statement of operations. The Company is reimbursed and has offset research and development expenses in the statement of operations when invoices for allowable costs have been prepared and submitted to the U.S. Department of Defense. Payments under cost reimbursable grants with agencies of the U.S. government are provisional payments subject to adjustment upon audit by the U.S. government. When the final determination of the allowable costs for any year has been made, research and development expenses may be adjusted accordingly.

Accounts Receivable

Accounts receivable represents allowable costs under the Company's U.S. Government agency grant for which the Company has not yet received reimbursement. The Company invoices the government on a quarterly basis for reimbursable costs under the grant. Reimbursable costs that have not been invoiced on the last day of the quarter are recorded as unbilled accounts receivable. As of June 30, 2016 and December 31, 2015, there were unbilled accounts receivable of \$47,000 and \$95,000, respectively.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and judgments that may affect the reported amounts of assets and liabilities, expenses and related disclosures. The Company bases estimates and judgments on historical experience and on various other factors that it believes to be reasonable under the circumstances. The most significant estimates in these condensed consolidated financial statements include useful lives with respect to long-lived assets, such as property and equipment and leasehold improvements, accounting for stock-based compensation, and accrued expenses, including clinical research costs. The Company's actual results may differ from these estimates under different assumptions or conditions. The Company evaluates its estimates on an ongoing basis. Changes in estimates are reflected in reported results in the period in which they become known by the Company's management.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Depreciation and amortization expense is recognized using the straight-line method over the following estimated useful lives:

| | Estimated Useful Life (Years) |
|--|--|
| Computers, office equipment, and minor computer software | 3 |
| Computer software | 7 |
| Manufacturing equipment | 7-10 |
| Furniture and fixtures | 5 |

Leasehold improvements are amortized over the shorter of the lease term or the estimated useful life of the related asset. Costs of major additions and improvements are capitalized and depreciated on a straight-line basis over their useful lives. Repairs and maintenance costs are expensed as incurred. Upon retirement or sale, the cost of assets disposed of and the related accumulated depreciation are removed from the accounts and any resulting gain or loss is credited or charged to income. Property and equipment includes construction-in-progress that is not yet in service.

Foreign Currencies

The Company maintains a bank account designated in British Pounds. All foreign currency payables and cash balances are measured at the applicable exchange rate at the end of the reporting period. All associated gains and losses from foreign currency transactions are reflected in the consolidated statements of operations within other income and expenses, and were not significant in any period.

4. Fair Value of Financial Assets and Liabilities

Edgar Filing: Flexion Therapeutics Inc - Form 10-Q

The following tables present information about the Company's assets that are measured at fair value on a recurring basis as of June 30, 2016 and December 31, 2015 and indicate the level of the fair value hierarchy utilized to determine such fair value:

| (In thousands) | Fair Value Measurements as of June 30, 2016 Using: | | | |
|-----------------------|---|-----------|---------|-----------|
| | Level 1 | | Level 3 | |
| | Level 2 | 3 | Total | |
| Assets: | | | | |
| Cash equivalents | \$— | \$94,907 | \$ — | \$94,907 |
| Marketable securities | — | 44,251 | — | 44,251 |
| | \$— | \$139,158 | \$ — | \$139,158 |

| (In thousands) | Fair Value Measurements as of December 31, 2015 Using: | | | |
|-----------------------|---|-----------|---------|-----------|
| | Level 1 | | Level 3 | |
| | Level 2 | 3 | Total | |
| Assets: | | | | |
| Cash equivalents | \$— | \$61,534 | \$ — | \$61,534 |
| Marketable securities | — | 55,660 | — | 55,660 |
| | \$— | \$117,194 | \$ — | \$117,194 |

As of June 30, 2016 and December 31, 2015, the Company's cash equivalents and marketable securities that are invested in money market funds are valued based on Level 2 inputs. The Company measures the fair value of marketable securities using Level 2

inputs and primarily relies on quoted prices in active markets for similar marketable securities. During the six months ended June 30, 2016 and year ended December 31, 2015, there were no transfers between Level 1, Level 2, and Level 3.

The carrying values of accounts receivable, accounts payable and accrued expenses approximate their fair value due to the short-term nature of these balances.

Under the Company's 2015 credit facility with MidCap Financial Funding XIII Trust and Silicon Valley Bank (the "2015 term loan"), the amount outstanding is reported at its carrying value in the accompanying balance sheet. The Company determined the fair value of the 2015 term loan using an income approach that utilizes a discounted cash flow analysis based on current market interest rates for debt issuances with similar remaining years to maturity, adjusted for credit risk. The 2015 term loan was valued using Level 2 inputs as of June 30, 2016 and December 31, 2015. The result of the calculation yielded a fair value that approximates its carrying value.

5. Marketable Securities

As of June 30, 2016 and December 31, 2015 the fair value of available-for-sale marketable securities by type of security was as follows:

| June 30, 2016 | | | | |
|-----------------------------|------------------|-------|------------------|------------|
| | Gross Unrealized | | Gross Unrealized | |
| (In thousands) | Amortized Cost | Gains | Losses | Fair Value |
| U.S. Government obligations | \$8,009 | \$ 12 | \$ — | \$ 8,021 |
| Corporate bonds | 36,231 | 5 | (6) | 36,230 |
| | \$44,240 | \$ 17 | \$ (6) | \$ 44,251 |

| December 31, 2015 | | | | |
|-------------------|------------------|-------|------------------|------------|
| | Gross Unrealized | | Gross Unrealized | |
| (In thousands) | Amortized Cost | Gains | Losses | Fair Value |
| Corporate Bonds | \$55,757 | \$ 4 | \$ (101) | \$ 55,660 |
| | \$55,757 | \$ 4 | \$ (101) | \$ 55,660 |

At June 30, 2016, all marketable securities consisted of investments that mature within twelve months. At December 31, 2015, marketable securities consisted of \$48,303,000 of investments that mature within twelve months and \$7,357,000 of investments that mature within fifteen months.

6. Property and Equipment, Net

Property and equipment as of June 30, 2016 and December 31, 2015 consisted of the following:

| | June 30, December 31, | |
|--|-----------------------|----------|
| (In thousands) | 2016 | 2015 |
| Manufacturing equipment | \$9,796 | \$ 2,534 |
| Construction—in progress | 697 | 4,134 |
| Computers, office equipment, and minor computer software | 549 | 393 |
| Software | 323 | 342 |
| Furniture and fixtures | 258 | 290 |
| Leasehold improvements | 193 | 239 |
| | 11,816 | 7,932 |
| Less: Accumulated depreciation | (530) | (490) |
| Total property and equipment, net | \$11,286 | \$ 7,442 |

Depreciation expense for the six months ended June 30, 2016 and 2015 was \$269,000 and \$82,000, respectively. During the six months ended June 30, 2016, \$2,630,000 of property and equipment was disposed of, resulting in a loss of \$2,278,000. Of the \$2,630,000 disposed of during the six months ended June 30, 2016, \$2,265,000 was related to manufacturing equipment that will no longer be used due to the Company's decision to not utilize Evonik for supplies of clinical or commercial Zilretta finished drug product, resulting in a loss of \$2,180,000. Construction-in progress is primarily comprised of amounts related to the construction of new manufacturing equipment for use by the Company's contract manufacturer, Patheon.

No property and equipment was disposed of during the six months ended June 30, 2015.

7. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consisted of the following:

| | June 30, | December 31, |
|---|----------------|-----------------|
| (In thousands) | 2016 | 2015 |
| Clinical research | \$36 | \$ 552 |
| Contract manufacturing services | 821 | 1,444 |
| Payroll and other employee-related expenses | 1,336 | 1,648 |
| Regulatory services | 61 | 64 |
| Consultant fees and expenses | 76 | 70 |
| Professional services fees | 488 | 434 |
| Interest expense | 78 | 81 |
| Other | 156 | 74 |
| Total accrued expenses and other current liabilities | \$3,052 | \$ 4,367 |

8. Stock-Based Compensation

Stock Option Valuation

The fair value of each of the Company's stock option grants is estimated on the date of grant using the Black-Scholes option-pricing model. The Company currently estimates its expected stock volatility based on the historical volatility of its publicly-traded peer companies and expects to continue to do so until such time as it has adequate historical data regarding the volatility of its own traded stock price. The expected term of the Company's stock options has been determined utilizing the "simplified" method for awards that qualify as "plain vanilla" options. The expected term of stock options granted to non-employees is equal to the contractual term of the option award. The risk-free interest rate is determined by reference to the U.S. Treasury yield curve in effect at the time of grant of the award for time periods approximately equal to the expected term of the award. Expected dividend yield is based on the fact that the Company has never paid cash dividends and does not expect to pay any cash dividends in the foreseeable future. The relevant data used to determine the value of the stock option grants for the six months ended June 30, 2016 and 2015 are as follows:

Edgar Filing: Flexion Therapeutics Inc - Form 10-Q

Six months ended

| | June 30, | |
|--------------------------|------------|------------|
| | 2016 | 2015 |
| Risk-free interest rates | 1.08-1.90% | 1.91-1.92% |
| Expected dividend yield | 0.00% | 0.00% |
| Expected term (in years) | 6.0 | 6.0 |
| Expected volatility | 79.8-87.9% | 76.4-81.4% |

The following table summarizes stock option activity for the six months ended June 30, 2016:

| | Shares Issuable | Weighted Average |
|--|-----------------|------------------|
| (In thousands, except per share amounts and years) | Under Options | Exercise Price |
| Outstanding as of December 31, 2015 | 1,657 | \$ 14.28 |
| Granted | 719 | 16.73 |
| Exercised | (24) | 2.34 |
| Cancelled | (52) | 18.55 |
| Outstanding as of June 30, 2016 | 2,300 | \$ 15.07 |
| Options vested and expected to vest at June 30, 2016 | 1,979 | \$ 14.61 |
| Options exercisable at June 30, 2016 | 990 | \$ 11.72 |

In addition to the approximately 719,000 common stock options granted, approximately 194,000 restricted stock units (RSUs) were also granted, of which approximately 5,000 RSUs were cancelled, during the six months ended June 30, 2016. The RSUs are performance based awards which will begin vesting upon the achievement of a corporate performance based milestone. No outstanding performance awards were vested as of June 30, 2016.

The aggregate intrinsic value of options is calculated as the difference between the exercise price of the options and the fair value of the Company's common stock for those options that had exercise prices lower than the fair value of the Company's common stock. A total of approximately 24,000 options, with an aggregate intrinsic value of \$235,000, were exercised during the six months ended June 30, 2016.

At June 30, 2016 and 2015, there were options for the purchase of approximately 2,300,000 and 1,723,000 shares of the Company's common stock outstanding, respectively, with a weighted average remaining contractual term of 8.1 and 8.3 years, respectively, and with a weighted average exercise price of \$15.07 and \$14.23 per share, respectively.

The weighted average grant date fair value of options granted during the six months ended June 30, 2016 and 2015 was \$11.85 and \$15.67, respectively.

Stock-based Compensation

The Company recorded stock-based compensation expense related to stock options for the three and six months ended June 30, 2016 is as follows:

| | Three months ended | | Six months ended | |
|----------------------------|--------------------|-------|------------------|---------|
| | June 30, | | June 30, | |
| (In thousands) | 2016 | 2015 | 2016 | 2015 |
| Research and development | \$576 | \$287 | \$1,113 | \$609 |
| General and administrative | 1,043 | 683 | 2,147 | 1,369 |
| | \$1,619 | \$970 | \$3,260 | \$1,978 |

As of June 30, 2016 unrecognized stock-based compensation expense for stock options outstanding was \$10,836,000, which was expected to be recognized over a weighted average period of 2.7 years. As of June 30, 2015, unrecognized stock-based compensation expense for stock options outstanding was \$13,912,000, which was expected to be recognized over a weighted average period of 2.9 years.

Restricted Stock Units

On January 4, 2016, the Company granted restricted common stock units with performance and time-based vesting conditions to certain executives. The restricted stock units vest, and the underlying shares of common stock become deliverable, in the event the Company receives approval from the U.S. Food and Drug Administration ("FDA") of a new drug application ("NDA") for Zilretta (the "Milestone"). Depending on when and if the Milestone is achieved, the maximum aggregate number of shares of the Company's common stock available to be earned under the awards is 189,300 with an approximate value of \$3,445,000 as of the grant date. The amount of earned shares decreases the closer that the Milestone date is to the termination date of the award. If the Milestone is not achieved prior to July 1, 2018, the termination date of the awards, the awards will not vest, will be forfeited in their entirety and no shares of common stock will be delivered. Since it is not possible for the Company to determine the probability of the performance condition being achieved, no compensation costs will be recorded until the Milestone is achieved. If the Milestone is achieved prior to the termination date, compensation costs will be recognized over the remaining requisite service period of the awards.

9. Net Loss per Share

Basic and diluted net loss per share was calculated as follows for the three and six months ended June 30, 2016:

| (In thousands) | For the three months ended | | For the six months ended | |
|--|----------------------------|---------------|--------------------------|---------------|
| | June 30, 2016 | 2015 | June 30, 2016 | 2015 |
| Numerator: | | | | |
| Net loss | \$ (14,185) | \$ (12,436) | \$ (31,000) | \$ (21,610) |
| Net loss: | \$ (14,185) | \$ (12,436) | \$ (31,000) | \$ (21,610) |
| Denominator: | | | | |
| Weighted average common shares outstanding, basic and | | | | |
| diluted | 22,666 | 21,475 | 22,115 | 21,463 |
| Net loss per share, basic and diluted | \$ (0.63) | \$ (0.58) | \$ (1.40) | \$ (1.01) |

Stock options and restricted stock units for the purchase of 2,436,000 and 1,670,000 weighted average shares of common stock were excluded from the computation of diluted net loss per share for the three months ended June 30, 2016 and 2015, respectively, and 2,397,000 and 1,629,000 weighted average shares of common stock were excluded from the computation of diluted net loss per share attributable to common shareholders for the six months ended June 30, 2016 and 2015, respectively. These options were excluded from the computations because the options had an anti-dilutive impact due to the net loss incurred for those periods.

10. Long-term Debt

On August 4, 2015, the Company entered into a credit and security agreement with MidCap Financial Trust, as agent, and MidCap Financial Funding XIII Trust and Silicon Valley Bank, as lenders, (the “Lenders”), to borrow up to \$30,000,000 in term loans, (the “2015 term loan”). The Company concurrently borrowed an initial term loan of \$15,000,000 under the facility. The Company granted the Lenders a security interest in substantially all of its personal property, rights and assets, other than intellectual property, to secure the payment of all amounts owed under the credit facility. The Company also agreed not to encumber any of its intellectual property without the Lenders’ prior written consent. The Company must maintain a balance in cash or cash equivalents at Silicon Valley Bank equal to the principal balance of the loan plus 5 percent for so long as the Company maintains any cash or cash equivalents in non-secured bank accounts. The credit and security agreement also contains certain representations, warranties, and covenants of the Company as well as a material adverse event clause. As of June 30, 2016, the Company was compliant with all covenants.

Borrowings under the credit facility accrue interest monthly at a fixed interest rate of 6.25 % per annum. Following an interest-only period of 19 months, principal will be due in 36 equal monthly installments commencing March 1, 2017 and ending February 1, 2020 (the “maturity date”). Upon the maturity date, the Company will be obligated to pay a final payment equal to 9% of the total principal amounts borrowed under the facility. The final payment amount is being accreted to the carrying value of the debt using the effective interest rate method. As of June 30, 2016, the carrying value of the term loan was \$15,154,000, of which \$1,634,000 was due within 12 months and \$13,520,000 was due in greater than 12 months.

In connection with the credit and security agreement, the Company incurred debt issuance costs totaling \$150,000. These costs will be amortized over the estimated term of the debt using the straight-line method which approximates the effective interest method. The Company elected the early adoption of ASU 2015-03, Interest – Imputation of Interest, and accordingly deducted the debt issuance costs from the carrying amount of the debt as of June 30, 2016 and December 31, 2015.

As of June 30, 2016, annual principal and interest payments due under the Company’s 2015 term loan are as follows (in thousands):

| | Aggregate |
|------|-----------|
| | Minimum |
| Year | Payments |

| | |
|-----------------------------|-----------|
| 2016 (remaining six months) | \$ 477 |
| 2017 | 5,018 |
| 2018 | 5,541 |
| 2019 | 5,224 |
| 2020 | 2,190 |
| Total | \$ 18,450 |
| Less interest | (1,946) |
| Less final payment | (1,350) |
| Total | \$ 15,154 |

11. Subsequent Events

On July 22, 2016, the Company drew down the remaining \$15,000,000 under the credit and security agreement with MidCap Financial Trust, as agent, MidCap Financial Funding XIII Trust and Silicon Valley Bank, as lenders, in the form of a second term loan after receiving positive Phase 3 Zilretta clinical trial data meeting the trial's preliminary endpoint and which is sufficient to file an NDA for Zilretta. The second term loan is subject to the same credit terms as the initial term loan under the facility.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our financial statements and accompanying notes included in this Quarterly Report on Form 10-Q and the financial statements and accompanying notes thereto for the fiscal year ended December 31, 2015 and the related Management's Discussion and Analysis of Financial Condition and Results of Operations, both of which are contained in our Annual Report on Form 10-K filed by us with the Securities and Exchange Commission, or SEC, on March 11, 2016.

Forward-Looking Statements

This discussion contains "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Such forward looking statements, which represent our intent, belief, or current expectations, involve risks and uncertainties. We use words such as "may," "will," "expect," "anticipate," "estimate," "intend," "plan," "predict," "believe," "should" and similar expressions to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Although we believe the expectations reflected in these forward-looking statements are reasonable, such statements are inherently subject to risk and we can give no assurances that our expectations will prove to be correct. You should not place undue reliance on these forward-looking statements, which apply only as of the date of this Quarterly Report on Form 10-Q. As a result of many factors, including without limitation those set forth under "Risk Factors" in our Annual Report on Form 10-K and subsequent Quarterly Reports on Form 10-Q, and elsewhere in this Quarterly Report on Form 10-Q, our actual results may differ materially from those anticipated in these forward-looking statements. We undertake no obligation to update these forward-looking statements to reflect events or circumstances after the date of this report or to reflect actual outcomes.

Overview

We are a specialty pharmaceutical company focused on the development and commercialization of novel, local therapies for the treatment of patients with musculoskeletal conditions, beginning with osteoarthritis or OA, a type of degenerative arthritis. We retain the exclusive worldwide rights to our lead product candidate, Zilretta, a late-stage, sustained-release, intra-articular investigational steroid that we are developing for the treatment of OA knee pain.

We were incorporated in Delaware in November 2007, and to date we have devoted substantially all of our resources to our development efforts relating to our product candidates, including conducting clinical trials with our product candidates, providing general and administrative support for these operations and protecting our intellectual property. We do not have any products approved for sale and have not generated any revenue from product sales. From our inception through June 30, 2016, we have funded our operations primarily through the sale of our common stock and convertible preferred stock and, to a lesser extent, debt financing. From our inception through June 30, 2016, we have raised \$336.8 million from such transactions, including from our initial and follow-on public offerings. Until such time, if ever, as we can generate substantial product revenue, we expect to finance our cash needs through a combination of equity offerings, debt financings, government or third-party funding, and licensing or collaboration arrangements.

Product Candidates and Recent Developments

Zilretta—Late Stage Candidate for Intra-articular Therapy for Patients with Moderate to Severe OA Pain

Our lead product candidate, Zilretta, is a late-stage, injectable, sustained-release, intra-articular, or IA, meaning "in the joint," investigational steroid that we are developing as a treatment for patients with moderate to severe OA pain. We

specifically designed Zilretta to combine a commonly administered steroid, triamcinolone acetonide, or TCA, with poly lactic-co-glycolic acid, referred to as PLGA, with the goal of providing sustained therapeutic concentrations in the joint and persistent analgesic effect. Zilretta is intended to address the limitations of current IA therapies by providing long-lasting, local analgesia while avoiding systemic side effects, which are effects that occur throughout the body as a result of drug that is released from the site of injection into circulating blood. To date, we have completed five clinical trials in which a total of approximately 600 patients with OA of the knee were treated with Zilretta. The overall frequency of treatment-related adverse events in these trials has been similar to those observed with placebo and no serious adverse events have been assessed as related to Zilretta in those trials. Both the magnitude and duration of pain relief provided by Zilretta in clinical trials have been shown to be clinically meaningful with the magnitude of pain relief amongst the largest reported to date in OA clinical trials.

Based on the strength of our pivotal and other clinical trials, we believe that Zilretta has the potential to address a significant unmet medical need for OA pain management by providing safe, more effective and sustained pain relief. We believe the following attributes uniquely distinguish Zilretta:

- An injectable, IA, non-opioid, sustained-release investigational treatment for patients with moderate to severe OA pain that has demonstrated the following in clinical trials to date:
- statistically significant, durable and clinically meaningful improvements in validated OA specific measures compared to the current injectable standard of care,
- statistically significant, durable and clinically meaningful pain relief compared to placebo,
- persistent therapeutic concentrations of drug in the joint and durable efficacy, and
- limited systemic exposures and the potential for fewer serious side effects compared to oral treatment options for OA pain.
- Amongst the largest analgesic effects reported in OA clinical trials.
- Strong proprietary position through a combination of patents, trade secrets and proprietary know-how, as well as eligibility for marketing exclusivity.
- Well-defined Section 505(b)(2) of the Federal Food Drug and Cosmetic Act, regulatory pathway seeking approval for a novel formulation of the same dose and administration route of the already approved immediate-release steroid used by orthopedists and rheumatologists.
- Familiarity of orthopedists and rheumatologists with IA injections utilizing the same steroid at the same dose.
- Fast Track designation from the FDA.

In April 2016, we initiated a double-blind, randomized, parallel group, single dose Phase 2 clinical trial of Zilretta in patients with OA of the knee who also have type 2 (adult) diabetes. Approximately 36 patients will be randomized, and blood glucose levels will be monitored for a total of three weeks (one week prior to injection and two weeks post injection) using a continuous glucose monitoring device. Approximately 20% of patients with knee OA have diabetes and clinical trial data demonstrate that these patients, when treated with IA injections of immediate-release TCA (as well as other corticosteroids) can experience substantial elevations in blood glucose levels in the days post injection. These increases in blood glucose coincide with peak plasma concentrations of the injected steroid and are thought to reflect the anti-insulin effects of such drugs. Since Zilretta has demonstrated in clinical trials lower post-injection plasma concentrations than those seen with immediate-release TCA, we believe that administration of Zilretta may avoid elevated blood glucose levels. The primary endpoint of this trial is the average blood glucose levels over time from baseline through 72 hours post injection for patients receiving Zilretta compared to patients receiving immediate-release TCA.

In April 2015, we announced that the U.S. Department of Defense awarded us a grant worth approximately \$2.0 million to conduct a Phase 2 clinical trial investigating Zilretta for the management of OA pain in active military and medically retired veterans with post-traumatic OA of the knee. In April 2016, due to the challenges of enrolling military personnel with post-traumatic knee OA, we discontinued the Phase 2 trial and terminated the grant.

Based upon the results of our pivotal clinical trials and the written responses from the FDA to questions we submitted in advance of a pre-NDA meeting with the FDA regarding Zilretta, we anticipate submitting our Zilretta NDA for single-dose administration to the FDA during the fourth quarter of 2016.

Financial Overview

Revenue

We have not generated any revenue since our inception. We do not have any products approved for sale, and we do not expect to generate any revenue from the sale of products in the near future. In the future, if our research and development efforts result in clinical success and regulatory approval, we may generate revenue from the sales of our

product candidates, including Zilretta, or we may generate revenue from licensing rights to our product candidates to third parties. If we fail to complete the development of Zilretta or other product candidates, our ability to generate future revenue, and our results of operations and financial position will be adversely affected.

Operating Expenses

The majority of our operating expenses to date have been related to the development activities of Zilretta.

Research and Development Expenses

Since our inception, we have focused our resources on our development activities, including: preclinical studies, clinical trials, and chemistry, manufacturing, and controls, or CMC. Our development expenses consist primarily of:

- expenses incurred under agreements with consultants, contract research organizations, or CROs, and investigative sites that conduct our preclinical studies and clinical trials;
- costs of acquiring, developing and manufacturing clinical trial materials, as well as scale-up for potential commercial supply;
- personnel costs, including salaries, benefits, stock-based compensation and travel expenses for employees engaged in scientific research and development functions;
- costs related to compliance with regulatory requirements;
- expenses related to the in-license of certain technologies from pharmaceutical companies; and
- allocated expenses for rent and maintenance of facilities, insurance and other general overhead.

We expense research and development costs as incurred. Our direct research and development expenses consist primarily of external-based costs, such as fees paid to investigators, consultants, investigative sites, CROs and companies that manufacture our clinical trial materials and anticipated future commercial supplies, and are tracked on a program-by-program basis. We do not allocate personnel costs, facilities or other indirect expenses to specific research and development programs. These indirect expenses are included within the amounts designated as “Personnel and other costs” in the table below.

The following table summarizes our research and development expenses for the periods presented:

| (In thousands) | Three Months Ended | | Six Months Ended | |
|--|--------------------|----------|------------------|-----------|
| | June 30, 2016 | 2015 | June 30, 2016 | 2015 |
| Direct research and development expenses by program: | | | | |
| Zilretta | \$ 5,322 | \$ 6,750 | \$ 13,430 | \$ 10,263 |
| FX007 | 47 | 164 | 252 | 280 |
| Portfolio expansion | 73 | — | 170 | — |
| Other | 3 | 20 | 141 | 163 |
| Total direct research and development expenses | 5,445 | 6,934 | 13,993 | 10,706 |
| Personnel and other costs | 3,460 | 2,706 | 6,893 | 5,189 |
| Total research and development expenses | \$ 8,905 | \$ 9,640 | \$ 20,886 | \$ 15,895 |

Related costs incurred under the grant from the U.S. Department of Defense for the Phase 2 clinical trial that was investigating Zilretta in active military and medically retired veterans with post-traumatic knee OA are included in research and development expenses. Reimbursements are recorded as an offset to research and development expenses when invoices for allowable costs have been prepared and submitted to the U.S. Department of Defense. Due to the challenges of enrolling military personnel with post-traumatic knee OA, we discontinued this Phase 2 trial and terminated the grant. Payments under cost reimbursable grants with agencies of the U.S. government are provisional

payments subject to adjustment upon audit by the U.S. government. To date we have been reimbursed for approximately \$656,000 under the grant. When the final determination of the allowable costs for any year has been made, research and development expenses may be adjusted accordingly.

Our research and development expenses are expected to increase in the foreseeable future. Specifically, our costs associated with Zilretta will increase as we conduct additional clinical trials, make initial investments for commercial product supply, and further the manufacturing process in anticipation of validation and commercialization, including the costs for the build-out of the portion of the dedicated manufacturing facility with our contract manufacturer, Patheon UK Limited. Evonik Corporation, or Evonik, our supplier of PLGA for Zilretta, had previously manufactured finished drug product for our Zilretta clinical trial materials; however, in early 2016 we decided to use Patheon as our sole supplier of Zilretta finished drug product for clinical trials and commercial supply. To that end, we expect to incur wind down costs of approximately \$726,000 related to the technology transfer from Evonik to Patheon, the removal of our manufacturing equipment from the Evonik manufacturing facility, and the satisfaction of our remaining

contractual obligations with Evonik. As of June 30, 2016 approximately \$82,000 of wind down costs were paid and are included in contract manufacturing expense for the six months ended June 30, 2016, and the remaining \$644,000 of costs were included in accrued expenses as of June 30, 2016. In addition, we have impaired approximately \$2,265,000 in manufacturing equipment located at the Evonik facility, resulting in a loss of \$2,180,000 which was recorded in research and development expenses for the six months ended June 30, 2016.

We cannot determine with certainty the duration of and completion costs associated with future clinical trials of Zilretta or the regulatory approval process. The duration, costs and timing associated with the development and commercialization of Zilretta will depend on a variety of factors, including uncertainties associated with the results of our clinical trials and our ability to obtain regulatory approval. As a result of these uncertainties, we are currently unable to estimate with any precision our future research and development expenses, when or if we will achieve regulatory approval, generate revenue from sales or achieve a positive cash flow position.

General and Administrative Expenses

General and administrative expenses consist primarily of personnel costs, including salaries, related benefits, travel expenses and stock-based compensation of our executive, finance, business development, commercial, information technology, legal and human resources functions. Other general and administrative expenses include an allocation of facility-related costs, patent filing expenses, and professional fees for legal, consulting, auditing and tax services.

We anticipate that our general and administrative expenses will increase in the future as we continue to build our corporate and commercial infrastructure to support the continued development and potential launch of Zilretta or any other product candidates. Additionally, we anticipate increased expenses related to the audit, legal and compliance, regulatory, investor relations and tax-related services associated with maintaining compliance with the SEC and Nasdaq requirements and healthcare laws and compliance requirements, director and officer insurance premiums and other costs associated with operating as a publicly-traded company.

Other Income (Expense)

Interest income. Interest income consists of interest earned on our cash and cash equivalents balances and our marketable securities. The primary objective of our investment policy is capital preservation.

Interest expense. We have borrowed \$15.0 million under our credit facility with MidCap Financial Funding XIII Trust and Silicon Valley Bank, and we incur interest related to this borrowing at a fixed rate of 6.25% per annum. We expect to incur future interest expense related to this borrowing until February 1, 2020.

Other expense. Other expense consists of the net amortization of premiums and discounts related to our marketable securities, and our realized gains (losses) on redemptions of our marketable securities. We will continue to incur expenses related to net amortization of premiums on marketable securities for as long as we hold these investments.

Critical Accounting Policies and Significant Judgments and Estimates

Our management's discussion and analysis of our financial condition and results of operations is based on our financial statements, which we have prepared in accordance with generally accepted accounting principles in the United States, or GAAP. The preparation of our financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of our financial statements, and the reported revenue and expenses during the reported periods. We evaluate these estimates and judgments, including those described below, on an ongoing basis. We base our estimates on historical experience, known trends and events, contractual milestones and various other factors that we believe are reasonable under the

circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe that the estimates, assumptions and judgments involved in the accounting policies described in Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2015 have the greatest potential impact on our financial statements, so we consider them to be our critical accounting policies and estimates. There were no material changes to our critical accounting policies and estimates during the six months ended June 30, 2016.

RESULTS OF OPERATIONS

Comparison of the three and six months ended June 30, 2016 and 2015

The following tables summarize our results of operations for the three and six months ended June 30, 2016 (certain items may not sum correctly due to rounding):

| | Three Months Ended June 30, | | | % Increase/ | |
|------------------------------|-----------------------------|------------|-----------|-------------|---|
| (In thousands) | 2016 | 2015 | Change | (Decrease) | |
| Revenue | \$— | \$— | \$— | — | |
| Operating expenses: | | | | | |
| Research and development | 8,905 | 9,640 | (735) | (7.6) | % |
| General and administrative | 5,215 | 2,904 | 2,311 | 79.6 | % |
| Total operating expenses | 14,120 | 12,544 | 1,576 | 12.6 | % |
| Loss from operations | (14,120) | (12,544) | (1,576) | 12.6 | % |

|--|---------------------------|----------|---------|------------------------|
| | 2016 | 2015 | Change | (Decrease) % Increase/ |
| Direct research and development expenses by program: | | | | |
| Zilretta | \$13,430 | \$10,263 | \$3,167 | 30.9% |
| FX007 | 252 | 280 | (28) | (10.0)% |
| Portfolio expansion | 170 | — | 170 | 100.0% |
| Other | 141 | 163 | (22) | (13.5)% |
| Total direct research and development expenses | 13,993 | 10,706 | 3,287 | 30.7% |
| Personnel and other costs | 6,893 | 5,189 | 1,704 | 32.8% |
| Total research and development expenses | \$20,886 | \$15,895 | \$4,991 | 31.4% |

Research and development expenses were \$8.9 million and \$9.6 million for the three months ended June 30, 2016 and 2015, respectively. The decrease in research and development expenses year over year of \$0.7 million was primarily due to a \$1.4 million decrease in clinical expenses as a result of completion of the Phase 3 clinical trial for Zilretta in the first quarter of 2016. Additionally, there was a partially offsetting increase of \$0.8 million in personnel and other costs primarily related to employee-related costs for additional headcount and stock compensation expense.

Research and development expenses were \$20.9 million and \$15.9 million for the six months ended June 30, 2016 and 2015, respectively. The increase in research and development expenses year over year of \$5.0 million was primarily due to a \$2.2 million loss on the disposal of manufacturing equipment used in the production of Zilretta, a \$0.6 million year-to-date increase in Zilretta program expenses related to the recently completed Phase 3 clinical trial, and a \$1.7 million increase in personnel and other costs, primarily related to employee related costs for additional headcount and stock compensation expense.

General and Administrative Expenses

General and administrative expenses were \$5.2 million and \$2.9 million for the three months ended June 30, 2016 and 2015, respectively. The increase in general and administrative expenses of \$2.3 million was primarily due to salary and related costs associated with additional headcount and stock compensation expense.

General and administrative expenses were \$9.9 million and \$5.7 million for the six months ended June 30, 2016 and 2015, respectively. The increase in general and administrative expenses of \$4.2 million was primarily due to salary and related costs associated with additional headcount and stock compensation expense.

Other Income (Expense)

Interest income was \$0.3 million and \$0.4 million for the three months ended June 30, 2016 and 2015, respectively. Interest income was \$0.6 million for the six months ended June 30, 2016 and 2015. The decrease in interest income was primarily due to a decrease in average investment balance yield during 2016.

Interest expense was \$0.2 million and zero for the three months ended June 30, 2016 and 2015, respectively, and \$0.5 million and \$0.2 million for the six months ended June 30, 2016 and 2015, respectively. The increase in interest expense for the three and six months ended June 30, 2016 was primarily due to interest incurred on the initial \$15.0 million borrowed under our credit facility with MidCap Financial Funding XIII Trust and Silicon Valley Bank which we entered into on August 4, 2015.

Liquidity and Capital Resources

To date, we have not generated any revenue and have incurred losses since our inception in 2007. As of June 30, 2016, we had an accumulated deficit of \$170.8 million. We anticipate that we will continue to incur losses for the foreseeable future. We expect that our research and development and general and administrative expenses will continue to increase and, as a result, we will need additional capital to fund our operations, which we may seek to obtain through one or more equity offerings, debt financings, government or other third-party funding, and licensing or collaboration arrangements.

Since our inception through June 30, 2016, we have funded our operations primarily through the sale of our common stock and convertible preferred stock and, to a lesser extent, debt financing. From our inception through June 30, 2016, we have raised \$336.8 million from such transactions, including amounts from our initial and follow-on public offerings during 2014 and 2016. As of June 30, 2016, we had cash and cash equivalents of \$119.0 million and marketable securities of \$44.3 million. Based on our current operating plan we anticipate that our existing cash, cash equivalents and marketable securities will fund our operations for at least the next twelve months. Cash in excess of immediate requirements is invested in accordance with our investment policy, primarily with a view to capital preservation.

The following table shows a summary of our cash flows for each of the six months ended June 30, 2016 and 2015:

| (In thousands) | Six Months Ended | |
|---|------------------|------------|
| | June 30, | |
| | 2016 | 2015 |
| Cash flows used in operating activities | \$(25,316) | \$(19,037) |
| Cash flows provided by (used in) investing activities | 3,515 | (52,347) |
| Cash flows provided by (used in) financing activities | 77,867 | (3,374) |
| Net increase (decrease) in cash and cash equivalents | \$56,066 | \$(74,758) |

Net Cash Used in Operating Activities

Operating activities used \$25.3 million of cash in the six months ended June 30, 2016. The cash flow used in operating activities resulted primarily from our net loss of \$31.0 million for the period and cash used for changes in our operating assets and liabilities of \$0.5 million, partially offset by non-cash charges of \$6.1 million. Our non-cash charges consisted primarily of \$3.3 million of stock-based compensation expense and \$2.3 million of loss related to the disposal of our fixed assets, and \$0.6 million of depreciation and amortization. Net cash used for changes in our operating assets and liabilities consisted primarily of a \$0.4 million increase in our prepaid expenses and other current assets due to insurance costs and a decrease of \$0.1 million in accounts payable and accrued expenses.

Operating activities used \$19.0 million of cash in the six months ended June 30, 2015. The cash flow used in operating activities resulted primarily from our net loss of \$21.6 million for the period and cash used for changes in our operating assets, offset by non-cash charges of \$2.5 million. Net cash used for changes in our operating assets and liabilities consisted primarily of a \$0.7 million increase in our prepaid expenses and other current assets due primarily to insurance costs, an increase in accounts receivable of \$0.2 million and a decrease in our accounts payable of \$0.2 million. These changes were partially offset by an increase in accrued expenses and other current liabilities of \$1.3 million, due to a decrease in vendor invoices received and processed to accounts payable prior to June 30, 2015, as compared to the previous year. Our non-cash charges consisted primarily of \$2.0 million of stock-based compensation

expense and \$0.5 million in depreciation expense and amortization and accretion related to our investments.

Net Cash Provided by (Used in) Investing Activities

Net cash provided by investing activities was \$3.5 million in the six months ended June 30, 2016. Net cash provided by investing activities consisted primarily of cash received for the redemption of marketable securities of \$22.0 million, partially offset by cash used for the purchase of marketable securities of \$10.8 million. In addition, \$7.7 million of cash was used to purchase manufacturing equipment.

Net cash used in investing activities was \$52.3 million in the six months ended June 30, 2015. Net cash used in investing activities consisted primarily of cash used for the purchase of marketable securities of \$99.5 million, partially offset by cash received from the redemption of marketable securities of \$48.5 million. In addition, \$1.4 million of cash was used to purchase manufacturing equipment.

Net Cash Provided by (Used in) Financing Activities

Financing activities provided \$77.9 million for the six months ended June 30, 2016 six months ended June 30, 2015. Net cash provided by financing activities in the six months ended June 30, 2016 consisted of \$77.4 million in net proceeds from a follow-on public offering and \$0.3 million related to the exercises of stock options and employee stock purchases through our employee stock purchase plan.

Net cash used in financing activities in the six months ended June 30, 2015 was \$3.4 million and consisted of \$3.5 million paid to satisfy our initial term loan obligation to MidCap and \$0.2 million in financing costs associated with our follow-on financing in late 2014, partially offset by \$0.4 million in proceeds received from the exercise of stock options and the issuance of common stock related to our employee stock purchase plan.

Contractual Obligations

In July 2015, we amended the lease for our primary office space which increased the size of our leased premises and extended the lease term through October 31, 2019. In September 2015, we exercised our option to lease an additional space under this amended lease. The total cash obligation for the base rent from inception through the lease termination date for the office space committed to under the lease, as amended, is approximately \$2.9 million.

Also in July, 2015, we and Patheon U.K. Limited, or Patheon, entered into a Manufacturing and Supply Agreement (the “Manufacturing Agreement”) and Technical Transfer and Service Agreement (the “Technical Transfer Agreement”) for the manufacture of Zilretta.

Under the terms of the Technical Transfer Agreement, Patheon has agreed to undertake certain technical transfer activities and construction services needed to prepare its United Kingdom facility for the manufacture of Zilretta in dedicated manufacturing suites. This agreement will remain in effect unless and until it expires or is terminated. Upon termination of this agreement (other than termination by us in the event that Patheon does not meet the construction and manufacturing milestones or for a breach by Patheon), we will pay for the wind down costs related to the removal of our manufacturing equipment and for Patheon’s termination costs up to a capped amount.

Under the terms of the Manufacturing and Supply Agreement, following the FDA approval date of the suites, we have agreed to purchase finished, packaged or un packaged product from Patheon. In addition, we will pay a monthly base fee to Patheon for the operation of the manufacturing suites, and will reimburse Patheon for purchases of raw materials and equipment made on our behalf, certain nominal expenses and additional services. We estimate that the aggregate monthly base fees and reimbursement costs for equipment will be approximately 100 million British Pounds over the entire term of the Manufacturing Agreement. Unless earlier terminated, this agreement will expire on the 10th anniversary of the FDA approval date for the initial manufacturing suite.

Future expenditures associated with the purchase of finished product from Patheon are primarily driven by the potential commercial requirements and demand for our products which cannot be fully determined at this time.

Off-Balance Sheet Arrangements

During the periods presented, we did not have, nor do we currently have, any off-balance sheet arrangements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our primary exposure to market risk is interest income sensitivity, which is affected by changes in the general level of U.S. interest rates. Due to the short-term duration of a majority of our investment portfolio and the low risk profile of

our investments, an immediate 10.0% change in interest rates would not have a material effect on the fair market value of our portfolio. Accordingly, we would not expect our operating results or cash flows to be affected to any significant degree by a sudden change in market interest rates on our investment portfolio.

Our 2015 term loan carries a fixed interest rate and, thus, we are subject to limited interest rate risk.

We do not believe that our cash, cash equivalents and marketable securities have significant risk of default or illiquidity. While we believe our cash and cash equivalents and marketable securities are invested with the goal of capital preservation, we cannot provide absolute assurance that in the future our investments will not be subject to adverse changes in market value. In addition, we maintain significant amounts of cash and cash equivalents at one or more financial institutions that are in excess of federally insured limits.

Most of our transactions are conducted in the U.S. dollar. We do have certain agreements with vendors located outside the United States, which have transactions conducted primarily in British Pounds and Euros. As of June 30, 2016 we had approximately \$0.2 million in payables to vendors denominated in currencies other than the U.S. dollar. A hypothetical 10% change in foreign exchange rates would not have a material effect on the value of our liability. As of June 30, 2016, we also had approximately \$13.5 million in cash denominated in British pounds. A hypothetical 10% change in foreign exchange rates would result in either a \$1.1 million increase, in the event the U.S. dollar strengthens relative to the British pound, or a \$0.9 million decrease, in the event the U.S. dollar weakens relative to the British pound, of cash denominated in British pounds.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We are responsible for maintaining disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act. Disclosure controls and procedures are controls and other procedures designed to ensure that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Based on our management's evaluation (with the participation of our principal executive officer and our principal financial officer) of our disclosure controls and procedures as required by Rule 13a-15 under the Exchange Act, our principal executive officer and our principal financial officer have concluded that our disclosure controls and procedures were effective to achieve their stated purpose as of June 30, 2016, the end of the period covered by this report.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended June 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not currently a party to any material legal proceedings.

ITEM 1A. RISK FACTORS

You should carefully consider the risk factors included in Item 1A of our Annual Report on Form 10-K, as updated by the risk factors included in Exhibit 99.1 to our Current Report on Form 8-K filed on June 7, 2016, which are incorporated herein by reference and are further updated by the following risk factors, as well as the other information in this report, before deciding whether to purchase, hold or sell shares of our common stock. The occurrence of any of these risks could harm our business, financial condition, results of operations and/or growth prospects or cause our actual results to differ materially from those contained in forward-looking statements we have made in this report and those we may make from time to time. In these circumstances, the market price of our common stock would likely decline. You should consider all of the factors described in Item 1A of our Annual Report on Form 10-K, the risk factors included in Exhibit 99.1 to our Current Report on Form 8-K filed on June 7, 2016, and the following risk factors, when evaluating our business. Other than the changes to the risk factors included in Exhibit 99.1 to our Current Report on Form 8-K filed on June 7, 2016 and in the following risk factors, there have been no material changes to the risk factors included in Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Risks Related to Our Financial Condition and Need for Additional Capital

If we fail to obtain additional financing, we would be forced to delay, reduce or eliminate our product development programs and planned commercialization activities.

Developing and commercializing pharmaceutical products, including conducting preclinical studies and clinical trials, and building and maintaining sales and marketing capabilities, is expensive. We expect our expenses to substantially increase in connection with our ongoing activities, particularly as we advance our clinical programs, including our on-going and planned clinical trials for Zilretta, continue our manufacturing scale-up activities and build a sales and marketing organization to commercialize Zilretta.

As of June 30, 2016, we had cash, cash equivalents and marketable securities of \$163.3 million and working capital of \$156.3 million. Based upon our current operating plan, we believe that our existing cash, cash equivalents and marketable securities will enable us to fund our operating expenses and capital requirements for at least the next twelve months, including through the submission of an NDA for Zilretta. Regardless of our expectations as to how long our cash, cash equivalents and marketable securities will fund our operations, changing circumstances beyond our control may cause us to consume capital more rapidly than we currently anticipate. For example, our clinical trials may encounter technical, enrollment or other difficulties that could increase our development costs more than we expect or the FDA could impose additional or different clinical development requirements on us prior to or following our submission of an NDA for Zilretta. In any event, we may require additional capital prior to commercializing Zilretta or any of our other product candidates.

Attempting to secure additional financing may divert our management from our day-to-day activities, which may adversely affect our ability to develop and commercialize our product candidates. In addition, we cannot guarantee that future financing will be available in sufficient amounts or on terms acceptable to us, if at all. If we are unable to raise additional capital when required or on acceptable terms, we may be required to:

- significantly delay, scale back or discontinue the development or commercialization of our product candidates;
- seek corporate partners for our product candidates at an earlier stage than otherwise would be desirable or on terms that are less favorable than might otherwise be available;
- relinquish or license on unfavorable terms, our rights to technologies or product candidates that we otherwise would seek to develop or commercialize ourselves; or
- significantly curtail, or cease, operations.

If we are unable to raise additional capital in sufficient amounts or on terms acceptable to us, we will be prevented from pursuing development and commercialization efforts, which will have a material adverse effect on our business, operating results and prospects.

Our credit and security agreement with MidCap Financial Trust, or MidCap, and Silicon Valley Bank contains restrictions that limit our flexibility in operating our business. We may be required to make a prepayment or repay the outstanding indebtedness earlier than we expect under our credit and security agreement if a prepayment event or an event of default occurs, including a material adverse change with respect to us, which could have a materially adverse effect on our business.

On August 4, 2015, we entered into a credit and security agreement with MidCap, as administrative agent, and MidCap Funding XIII Trust and Silicon Valley Bank, as lenders, to borrow up to \$30.0 million. We have since drawn down the full \$30.0 million under the credit facility. The agreement contains various covenants that limit our ability to engage in specified types of transactions. These covenants limit our ability to, among other things:

- incur or assume certain debt;
- merge or consolidate or acquire all or substantially all of the capital stock or property of another entity;
 - enter into any transaction or series of related transactions that would be deemed to result in a change in control of us under the terms of the agreement;
- change the nature of our business;
- change our organizational structure or type;
- amend, modify or waive any of our organizational documents;
- license, transfer or dispose of certain assets;
- grant certain types of liens on our assets;
- make certain investments;
- pay cash dividends;
- enter into material transactions with affiliates; and
- amend or waive provisions of material agreements in certain manners.

The restrictive covenants of the agreement could cause us to be unable to pursue business opportunities that we or our stockholders may consider beneficial.

A breach of any of these covenants could result in an event of default under the agreement. As of June 30, 2016 we were in compliance with these covenants. An event of default will also occur if, among other things, a material adverse change in our business, operations or condition occurs, which could potentially include negative results in our future clinical trials or unfavorable determinations by the FDA with respect to the potential approval of Zilretta, or a material impairment of the prospect of our repayment of any portion of the amounts we owe under the agreement occurs. In the case of a continuing event of default under the agreement, the lenders could elect to declare all amounts outstanding to be immediately due and payable, proceed against the collateral in which we granted the lenders a security interest under the agreement, or otherwise exercise the rights of a secured creditor. Amounts outstanding under the agreement are secured by all of our existing and future assets, excluding intellectual property, which is subject to a negative pledge arrangement.

We may not have enough available cash or be able to raise additional funds on satisfactory terms, if at all, through equity or debt financings to repay our indebtedness at the time any such repayment is required. In such an event, we may be required to delay, limit, reduce or terminate our product development or commercialization efforts or grant to others rights to develop and market product candidates that we would otherwise prefer to develop and market ourselves. Our business, financial condition and results of operations could be materially adversely affected as a result.
