

JPMORGAN CHASE & CO

Form 424B2

January 17, 2019

January 15, 2019 Registration Statement Nos. 333-222672 and 333-222672-01; Rule 424(b)(2)

JPMorgan Chase Financial Company LLC

Structured Investments

\$1,000,000

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc. due April 18, 2019

Fully and Unconditionally Guaranteed by JPMorgan Chase & Co.

The notes are designed for investors who seek a higher interest rate than the yield on a conventional debt security with the same maturity issued by us. The notes will pay 2.25% interest over the term of the notes, payable at a rate of 0.75% per month.

The notes are also designed for investors who seek a Contingent Digital Payment of \$10.00 per \$1,000 principal amount note at maturity, in addition to the principal amount of their notes and the final Interest Payment, if the Final Value of the Reference Stock is greater than or equal to the Strike Value.

Investors in the notes should be willing to accept the risk of losing some or all of their principal and be willing to forgo dividend payments, in exchange for Interest Payments over the term of the notes and the potential to receive a Contingent Digital Payment at maturity.

The notes are unsecured and unsubordinated obligations of JPMorgan Chase Financial Company LLC, which we refer to as JPMorgan Financial, the payment on which is fully and unconditionally guaranteed by JPMorgan Chase & Co. **Any payment on the notes is subject to the credit risk of JPMorgan Financial, as issuer of the notes, and the credit risk of JPMorgan Chase & Co., as guarantor of the notes.**

Minimum denominations of \$1,000 and integral multiples thereof

The notes priced on January 15, 2019 (the "Pricing Date") and are expected to settle on or about January 17, 2019. **The Strike Value has been determined by reference to certain intraday trades in the Reference Stock that occurred on January 14, 2019 and not by reference to the closing price of one share of the Reference Stock on the Pricing Date.**

CUSIP: 48130WSR3

Investing in the notes involves a number of risks. See "Risk Factors" beginning on page PS-10 of the accompanying product supplement and "Selected Risk Considerations" beginning on page PS-3 of this pricing supplement.

Neither the Securities and Exchange Commission (the "SEC") nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this pricing supplement or the accompanying product supplement, prospectus supplement and prospectus. Any representation to the contrary is a criminal offense.

	Price to Public (1) Fees and Commissions (2)	Proceeds to Issuer
Per note \$1,000	\$8	\$992
Total \$1,000,000	\$8,000	\$992,000

(1) See "Supplemental Use of Proceeds" in this pricing supplement for information about the components of the price to public of the notes.

(2) J.P. Morgan Securities LLC, which we refer to as JPMS, acting as agent for JPMorgan Financial, will pay all of the selling commissions of

\$8.00 per \$1,000 principal amount note it receives from us to other affiliated or unaffiliated dealers. See “Plan of Distribution (Conflicts of Interest)” in the accompanying product supplement.

The estimated value of the notes, when the terms of the notes were set, was \$985.10 per \$1,000 principal amount note. See “The Estimated Value of the Notes” in this pricing supplement for additional information.

The notes are not bank deposits, are not insured by the Federal Deposit Insurance Corporation or any other governmental agency and are not obligations of, or guaranteed by, a bank.

Pricing supplement to product supplement no. 4-I dated April 5, 2018
and the prospectus and prospectus supplement, each dated April 5, 2018

Key Terms

Issuer: JPMorgan Chase Financial Company LLC, Payment at Maturity: an indirect, wholly owned finance subsidiary of JPMorgan Chase & Co.

If the Final Value is greater than or equal to the Strike Value, you will receive a cash payment at maturity, for each \$1,000 principal amount note, equal to (a) \$1,000 *plus* (b) the Contingent Digital Payment *plus* (C) the Interest Payment applicable to the Maturity Date.

Guarantor: JPMorgan Chase & Co.

Reference Stock: The common stock of Stamps.com Inc., par value \$0.001 per share (Bloomberg ticker: STMP). We refer to Stamps.com Inc. as “Stamps.com.”

If (i) the Final Value is less than the Strike Value and (ii) a Trigger Event has not occurred, you will receive a cash payment at maturity, for each \$1,000 principal amount note, equal to (a) \$1,000 *plus* (b) the Interest Payment applicable to the Maturity Date.

Interest Payments:

You will receive on each Interest Payment Date for each \$1,000 principal amount note an Interest Payment equal to \$7.50 (equivalent to an Interest Rate of 2.25% over the term of the notes, payable at a rate of 0.75% per month).

If (i) the Final Value is less than the Strike Value and (ii) a Trigger Event has occurred, your cash payment at maturity per \$1,000 principal amount note, in addition to the Interest Payment applicable to the Maturity Date, will be calculated as follows:

Interest Rate: 2.25% over the term of the notes, payable at a rate of 0.75% per month

$\$1,000 + (\$1,000 \times \text{Stock Return})$

Contingent Digital Payment: \$10.00

If (i) the Final Value is less than the Strike Value and (ii) a Trigger Event has occurred, you will lose some or all of your principal amount at maturity.

Trigger Value: \$89.87, which is approximately 52.62942% of the Strike Value

Trigger Event: A Trigger Event occurs if, on any day during the Monitoring Period, the closing price of one share of the Reference Stock is less than the Trigger Value.

Strike Date: January 14, 2019

Pricing Date: January 15, 2019

Monitoring Period: The period from but excluding the Strike Date to and including the Observation Date

Original Issue Date (Settlement Date): On or about January 17, 2019

Stock Return:

Interest Payment Dates*: February 14, 2019, March 14, 2019 and the Maturity Date

$\frac{\text{Final Value} - \text{Strike Value}}{\text{Strike Value}}$

Observation Date*: April 15, 2019

Strike Value: \$170.76, determined on the Strike Date based on certain intraday trades in the Reference Stock that occurred on the Strike Date in the sole discretion of the calculation agent. The Strike Value is *not* the closing price of one share of the Reference Stock on the Pricing Date. See “Selected Risk Considerations — Potential Conflicts” in this pricing supplement.

Maturity Date*: April 18, 2019

* Subject to postponement in the event of a market disruption event and as described under “General Terms of Notes — Postponement of a Determination Date — Notes Linked to a Single Underlying — Notes Linked to a Single Underlying (Other Than a Commodity Index)” and “General Terms of Notes — Postponement of a Payment Date” in the

Final Value: The closing price of one share of the Reference Stock on the Observation Date

accompanying product supplement

Stock Adjustment Factor: The Stock Adjustment Factor is referenced in determining the closing price of one share of the Reference Stock and is set equal to 1.0 on the Strike Date. The Stock Adjustment Factor is subject to adjustment upon the occurrence of certain corporate events affecting the Reference Stock. See “The Underlyings — Reference Stocks — Anti-Dilution Adjustments” and “The Underlyings — Reference Stocks — Reorganization Events” in the accompanying product supplement for further information.

PS-1 | Structured Investments

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc.

How the Notes Work

Payment at Maturity

Total Interest Payments

The total Interest Payments per \$1,000 principal amount note over the term of the notes based on the Interest Rate of 2.25% over the term of the notes is \$22.50.

Hypothetical Payout Examples

The following examples illustrate payments on the notes linked to a hypothetical Reference Stock, assuming a range of performances for the hypothetical Reference Stock on the Observation Date. The hypothetical payments set forth below assume the following:

- a Strike Value of \$100.00;
- a Trigger Value of \$52.62942 (equal to 52.62942% of the hypothetical Strike Value);
- an Interest Rate of 2.25% over the term of the notes (payable at a rate of 0.75% per month); and
- a Contingent Digital Payment of \$10.00.

The hypothetical Strike Value of \$100.00 has been chosen for illustrative purposes only and does not represent the actual Strike Value. The actual Strike Value has been determined on the Strike Date in the sole discretion of the calculation agent and is specified under “Key Terms — Strike Value” in this pricing supplement. For historical data regarding the actual closing prices of one share of the Reference Stock, please see the historical information set forth under “The Reference Stock” in this pricing supplement.

Each hypothetical payment set forth below is for illustrative purposes only and may not be the actual payment applicable to a purchaser of the notes. The numbers appearing in the following examples have been rounded for ease of analysis.

Example 1 — The Final Value is greater than or equal to the Strike Value and a Trigger Event has occurred.

Date	Closing Price
Observation Date	\$105.00
	Final Value is greater than Strike Value
	Total Payment \$1,032.50 (3.25% return)

Because the Final Value is greater than or equal to the Strike Value, regardless of whether a Trigger Event has occurred, the payment at maturity, for each \$1,000 principal amount note, will be \$1,017.50 (or \$1,000 *plus* the Contingent Digital Payment *plus* the Interest Payment applicable to the Maturity Date). When added to the Interest Payments received with respect to the prior Interest Payment Dates, the total amount paid, for each \$1,000 principal amount note, is \$1,032.50.

PS-2 | Structured Investments

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc.

Example 2 — The Final Value is less than the Strike Value and a Trigger Event has NOT occurred.

Date	Closing Price	
Observation Date	\$70.00	Final Value is less than Strike Value
		Total Payment \$1,022.50 (2.25% return)

Because a Trigger Event has not occurred, even though the Final Value is less than the Strike Value, the payment at maturity, for each \$1,000 principal amount note, will be \$1,007.50 (or \$1,000 *plus* the Interest Payment applicable to the Maturity Date). When added to the Interest Payments received with respect to the prior Interest Payment Dates, the total amount paid, for each \$1,000 principal amount note, is \$1,022.50.

Example 3 — The Final Value is less than the Strike Value and a Trigger Event has occurred.

Date	Closing Price	
Observation Date	\$50.00	Final Value is less than Strike Value
		Total Payment \$522.50 (-47.75% return)

Because the Final Value is less than the Strike Value, a Trigger Event has occurred and the Stock Return is -50.00%, the payment at maturity will be \$507.50 per \$1,000 principal amount note, calculated as follows:

$$\$1,000 + [\$1,000 \times (-50.00\%)] + \$7.50 = \$507.50$$

When added to the Interest Payments received with respect to the prior Interest Payment Dates, the total amount paid, for each \$1,000 principal amount note, is \$522.50.

The hypothetical returns and hypothetical payments on the notes shown above apply **only if you hold the notes for their entire term**. These hypotheticals do not reflect the fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns and hypothetical payments shown above would likely be lower.

Selected Risk Considerations

An investment in the notes involves significant risks. These risks are explained in more detail in the “Risk Factors” section of the accompanying product supplement.

YOUR INVESTMENT IN THE NOTES MAY RESULT IN A LOSS —

The notes do not guarantee any return of principal. If (i) the Final Value is less than the Strike Value and (ii) a Trigger Event has occurred, you will lose 1% of the principal amount of your notes for every 1% that the Final Value is less than the Strike Value. Accordingly, under these circumstances, you will lose some or all of your principal amount at maturity.

CREDIT RISKS OF JPMORGAN FINANCIAL AND JPMORGAN CHASE & CO. —

Investors are dependent on our and JPMorgan Chase & Co.’s ability to pay all amounts due on the notes. Any actual or potential change in our or JPMorgan Chase & Co.’s creditworthiness or credit spreads, as determined by the market for taking that credit risk, is likely to adversely affect the value of the notes. If we and JPMorgan Chase & Co. were to default on our payment obligations, you may not receive any amounts owed to you under the notes and you could lose your entire investment.

AS A FINANCE SUBSIDIARY, JPMORGAN FINANCIAL HAS NO INDEPENDENT OPERATIONS AND HAS LIMITED ASSETS —

As a finance subsidiary of JPMorgan Chase & Co., we have no independent operations beyond the issuance and administration of our securities. Aside from the initial capital contribution from JPMorgan Chase & Co., substantially all of our assets relate to obligations of our affiliates to make payments under loans made by us or other intercompany agreements. As a result, we are dependent upon payments from our affiliates to meet our obligations under the notes. If these affiliates do not make payments to us and we fail to make payments on the notes, you may have to seek payment under the related guarantee by JPMorgan Chase & Co., and that guarantee will rank *pari passu* with all other unsecured and unsubordinated obligations of JPMorgan Chase & Co.

THE APPRECIATION POTENTIAL OF THE NOTES IS LIMITED TO THE SUM OF THE INTEREST PAYMENTS PAID OVER THE TERM OF THE NOTES, PLUS THE CONTINGENT DIGITAL PAYMENT, IF ANY,

regardless of any appreciation of the Reference Stock, which may be significant. You will not participate in any appreciation of the Reference Stock.

PS-3 | Structured Investments

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc.

YOUR ABILITY TO RECEIVE THE CONTINGENT DIGITAL PAYMENT MAY TERMINATE ON THE OBSERVATION DATE —

If the Final Value is less than the Strike Value, you will not be entitled to receive the Contingent Digital Payment at maturity.

POTENTIAL CONFLICTS —

We and our affiliates play a variety of roles in connection with the notes. In performing these duties, our and JPMorgan Chase & Co.'s economic interests are potentially adverse to your interests as an investor in the notes. It is possible that hedging or trading activities of ours or our affiliates in connection with the notes could result in substantial returns for us or our affiliates while the value of the notes declines. Please refer to "Risk Factors — Risks Relating to Conflicts of Interest" in the accompanying product supplement.

In addition, although the calculation agent has made all determinations and has taken all actions in relation to the establishment of the Strike Value in good faith, it should be noted that such discretion could have an impact (positive or negative) on the value of your notes. The calculation agent is under no obligation to consider your interests as a holder of the notes in taking any actions, including the determination of the Strike Value, that may affect the value of your notes.

THE BENEFIT PROVIDED BY THE TRIGGER VALUE MAY TERMINATE ON ANY DAY DURING THE MONITORING PERIOD —

If, on any day during the Monitoring Period, the closing price of one share of the Reference Stock is less than the Trigger Value (*i.e.*, a Trigger Event occurs), the benefit provided by the Trigger Value will terminate and you will be fully exposed to any depreciation in the closing price of one share of the Reference Stock. You will be subject to this potential loss of principal even if the Reference Stock subsequently recovers such that the closing price of one share of the Reference Stock is greater than or equal to the Trigger Value.

YOU WILL NOT RECEIVE DIVIDENDS ON THE REFERENCE STOCK OR HAVE ANY RIGHTS WITH RESPECT TO THE REFERENCE STOCK.

NO AFFILIATION WITH THE REFERENCE STOCK ISSUER —

We have not independently verified any of the information about the Reference Stock issuer contained in this pricing supplement. You should undertake your own investigation into the Reference Stock and its issuer. We are not responsible for the Reference Stock issuer's public disclosure of information, whether contained in SEC filings or otherwise.

THE ANTI-DILUTION PROTECTION FOR THE REFERENCE STOCK IS LIMITED AND MAY BE DISCRETIONARY —

The calculation agent will not make an adjustment in response to all events that could affect the Reference Stock. The calculation agent may make adjustments in response to events that are not described in the accompanying product supplement to account for any diluting or concentrative effect, but the calculation agent is under no obligation to do so or to consider your interests as a holder of the notes in making these determinations.

THE RISK OF THE CLOSING PRICE OF ONE SHARE OF THE REFERENCE STOCK FALLING BELOW THE TRIGGER VALUE IS GREATER IF THE PRICE OF ONE SHARE OF THE REFERENCE STOCK IS VOLATILE.

LACK OF LIQUIDITY —

The notes will not be listed on any securities exchange. Accordingly, the price at which you may be able to trade your notes is likely to depend on the price, if any, at which JPMS is willing to buy the notes. You may not be able to sell your notes. The notes are not designed to be short-term trading instruments. Accordingly, you should be able and willing to hold your notes to maturity.

THE ESTIMATED VALUE OF THE NOTES IS LOWER THAN THE ORIGINAL ISSUE PRICE (PRICE TO PUBLIC) OF THE NOTES —

The estimated value of the notes is only an estimate determined by reference to several factors. The original issue price of the notes exceeds the estimated value of the notes because costs associated with selling, structuring and hedging the notes are included in the original issue price of the notes. These costs include the selling commissions, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes and the estimated cost of hedging our obligations under the notes. See “The Estimated Value of the Notes” in this pricing supplement.

THE ESTIMATED VALUE OF THE NOTES DOES NOT REPRESENT FUTURE VALUES OF THE NOTES AND MAY DIFFER FROM OTHERS’ ESTIMATES —

See “The Estimated Value of the Notes” in this pricing supplement.

PS-4 | Structured Investments

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc.

THE ESTIMATED VALUE OF THE NOTES IS DERIVED BY REFERENCE TO AN INTERNAL FUNDING RATE —

The internal funding rate used in the determination of the estimated value of the notes is based on, among other things, our and our affiliates' view of the funding value of the notes as well as the higher issuance, operational and ongoing liability management costs of the notes in comparison to those costs for the conventional fixed-rate debt of JPMorgan Chase & Co. The use of an internal funding rate and any potential changes to that rate may have an adverse effect on the terms of the notes and any secondary market prices of the notes. See "The Estimated Value of the Notes" in this pricing supplement.

THE VALUE OF THE NOTES AS PUBLISHED BY JPMS (AND WHICH MAY BE REFLECTED ON CUSTOMER ACCOUNT STATEMENTS) MAY BE HIGHER THAN THE THEN-CURRENT ESTIMATED VALUE OF THE NOTES FOR A LIMITED TIME PERIOD —

We generally expect that some of the costs included in the original issue price of the notes will be partially paid back to you in connection with any repurchases of your notes by JPMS in an amount that will decline to zero over an initial predetermined period. See "Secondary Market Prices of the Notes" in this pricing supplement for additional information relating to this initial period. Accordingly, the estimated value of your notes during this initial period may be lower than the value of the notes as published by JPMS (and which may be shown on your customer account statements).

SECONDARY MARKET PRICES OF THE NOTES WILL LIKELY BE LOWER THAN THE ORIGINAL ISSUE PRICE OF THE NOTES —

Any secondary market prices of the notes will likely be lower than the original issue price of the notes because, among other things, secondary market prices take into account our internal secondary market funding rates for structured debt issuances and, also, because secondary market prices (a) exclude selling commissions and (b) may exclude projected hedging profits, if any, and estimated hedging costs that are included in the original issue price of the notes. As a result, the price, if any, at which JPMS will be willing to buy the notes from you in secondary market transactions, if at all, is likely to be lower than the original issue price. Any sale by you prior to the Maturity Date could result in a substantial loss to you.

SECONDARY MARKET PRICES OF THE NOTES WILL BE IMPACTED BY MANY ECONOMIC AND MARKET FACTORS —

The secondary market price of the notes during their term will be impacted by a number of economic and market factors, which may either offset or magnify each other, aside from the selling commissions, projected hedging profits, if any, estimated hedging costs and the price of one share of the Reference Stock. Additionally, independent pricing vendors and/or third party broker-dealers may publish a price for the notes, which may also be reflected on customer account statements. This price may be different (higher or lower) than the price of the notes, if any, at which JPMS may be willing to purchase your notes in the secondary market. See "Risk Factors — Risks Relating to the Estimated Value and Secondary Market Prices of the Notes — Secondary market prices of the notes will be impacted by many economic and market factors" in the accompanying product supplement.

The Reference Stock

All information contained herein on the Reference Stock and on Stamps.com is derived from publicly available sources, without independent verification. According to its publicly available filings with the SEC, Stamps.com is a provider of Internet-based mailing and shipping solutions in the United States. The common stock of Stamps.com, par value \$0.001 per share (Bloomberg ticker: STMP), is registered under the Securities Exchange Act of 1934, as amended, which we refer to as the Exchange Act, and is listed on The NASDAQ Stock Market, which we refer to as the relevant exchange for purposes of Stamps.com in the accompanying product supplement. Information provided to or filed with the SEC by Stamps.com pursuant to the Exchange Act can be located by reference to SEC file number 000-26427, and can be accessed through www.sec.gov. We do not make any representation that these publicly available documents are accurate or complete.

Historical Information

The following graph sets forth the historical performance of the Reference Stock based on the weekly historical closing prices of one share of the Reference Stock from January 3, 2014 through January 11, 2019. The closing price of one share of the Reference Stock on January 15, 2019 was \$172.51. We obtained the closing prices above and below from the Bloomberg Professional® service (“Bloomberg”), without independent verification. The closing prices below may have been adjusted by Bloomberg for corporate actions, such as stock splits, public offerings, mergers and acquisitions, spin-offs, delistings and bankruptcy.

The historical closing prices of one share of the Reference Stock should not be taken as an indication of future performance, and no assurance can be given as to the closing price of one share of the Reference Stock on the Observation Date. There can be no assurance that the performance of the Reference Stock will result in the return of any of your principal amount.

Tax Treatment

You should review carefully the section entitled “Material U.S. Federal Income Tax Consequences” in the accompanying product supplement no. 4-I. The following discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel, Davis Polk & Wardwell LLP, regarding the material U.S. federal income tax consequences of owning and disposing of notes.

Based on current market conditions, in the opinion of our special tax counsel it is reasonable to treat (i) the notes for U.S. federal income tax purposes as prepaid forward contracts with associated coupons and (ii) any Interest Payments as ordinary income. You should review the discussion in “Material U.S. Federal Income Tax Consequences — Tax Consequences to U.S. Holders — Notes Treated as Prepaid Forward Contracts with Associated Contingent Coupons” in the accompanying product supplement, reading all references therein to “Contingent Interest Payments” and “Associated Contingent Coupons” as references to “Interest Payments” and “Associated Coupons.” However, the IRS or a court may not respect this treatment, in which case the timing and character of any income or loss on the notes could be materially and adversely affected. For example, any gain recognized at maturity might be treated as ordinary income. Assuming the treatment of “prepaid forward contracts with associated coupons” is respected, the gain or loss on your notes should be treated as short-term capital gain or loss, whether or not you are an initial purchaser of notes at the issue price. It

PS-6 | Structured Investments

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc.

is likely that proceeds received from the sale or exchange of your note prior to an Interest Payment Date but that can be attributed to an expected interest payment will be treated as ordinary income.

In addition, in 2007 Treasury and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require investors in these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether investors in short-term instruments should be required to accrue income. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially affect the tax consequences of an investment in the notes, possibly with retroactive effect. The discussions above and in the accompanying product supplement do not address the consequences to taxpayers subject to special tax accounting rules under Section 451(b) of the Code. You should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the notes, including possible alternative treatments and the issues presented by the notice described above.

Non-U.S. Holders — Tax Considerations. The U.S. federal income tax treatment of Interest Payments is uncertain, and a withholding agent may withhold on these payments (generally at a rate of 30%, subject to the possible reduction of that rate under an applicable income tax treaty), unless income from your notes is effectively connected with your conduct of a trade or business in the United States (and, if an applicable treaty so requires, attributable to a permanent establishment in the United States). If you are not a United States person, you are urged to consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the notes in light of your particular circumstances.

Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% withholding tax (unless an income tax treaty applies) on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities. Section 871(m) provides certain exceptions to this withholding regime, including for instruments linked to certain broad-based indices that meet requirements set forth in the applicable Treasury regulations (such as an index, a “Qualified Index”). Additionally, a recent IRS notice excludes from the scope of Section 871(m) instruments issued prior to January 1, 2021 that do not have a delta of one with respect to underlying securities that could pay U.S.-source dividends for U.S. federal income tax purposes (each an “Underlying Security”). Based on certain determinations made by us, our special tax counsel is of the opinion that Section 871(m) should not apply to the notes with regard to Non-U.S. Holders. Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. You should consult your tax adviser regarding the potential application of Section 871(m) to the notes.

FATCA. Withholding under legislation commonly referred to as “FATCA” could apply to payments with respect to the notes that are treated as U.S.-source “fixed or determinable annual or periodical” income (“FDAP Income”) for U.S. federal income tax purposes (such as interest, if the notes are recharacterized, in whole or in part, as debt instruments, or Interest Payments if they are treated as FDAP Income). If the notes are recharacterized, in whole or in part, as debt instruments, withholding could also apply to payments of gross proceeds of a taxable disposition, including redemption at maturity, although under recently proposed regulations (the preamble to which specifies that taxpayers are permitted to rely on them pending finalization), no withholding will apply to payments of gross proceeds (other than any amount treated as FDAP Income). You should consult your tax adviser regarding the potential application of FATCA to the notes.

In the event of any withholding on the notes, we will not be required to pay any additional amounts with respect to amounts so withheld.

The Estimated Value of the Notes

The estimated value of the notes set forth on the cover of this pricing supplement is equal to the sum of the values of the following hypothetical components: (1) a fixed-income debt component with the same maturity as the notes, valued using the internal funding rate described below, and (2) the derivative or derivatives underlying the economic terms of the notes. The estimated value of the notes does not represent a minimum price at which JPMS would be willing to buy your notes in any secondary market (if any exists) at any time. The internal funding rate used in the determination of the estimated value of the notes is based on, among other things, our and our affiliates' view of the funding value of the notes as well as the higher issuance, operational and ongoing liability management costs of the notes in comparison to those costs for the conventional fixed-rate debt of JPMorgan Chase & Co. For additional information, see "Selected Risk Considerations — The Estimated Value of the Notes Is Derived by Reference to an Internal Funding Rate" in this pricing supplement.

PS-7 | Structured Investments

Yield Notes, with Contingent Digital Payment, Linked to the Common Stock of Stamps.com Inc.

The value of the derivative or derivatives underlying the economic terms of the notes is derived from internal pricing models of our affiliates. These models are dependent on inputs such as the traded market prices of comparable derivative instruments and on various other inputs, some of which are market-observable, and which can include volatility, dividend rates, interest rates and other factors, as well as assumptions about future market events and/or environments. Accordingly, the estimated value of the notes is determined when the terms of the notes are set based on market conditions and other relevant factors and assumptions existing at that time.

The estimated value of the notes does not represent future values of the notes and may differ from others' estimates. Different pricing models and assumptions could provide valuations for the notes that are greater than or less than the estimated value of the notes. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect. On future dates, the value of the notes could change significantly based on, among other things, changes in market conditions, our or JPMorgan Chase & Co.'s creditworthiness, interest rate movements and other relevant factors, which may impact the price, if any, at which JPMS would be willing to buy notes from you in secondary market transactions.

The estimated value of the notes is lower than the original issue price of the notes because costs associated with selling, structuring and hedging the notes are included in the original issue price of the notes. These costs include the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, the projected profits, if any, that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes and the estimated cost of hedging our obligations under the notes. Because hedging our obligations entails risk and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or it may result in a loss. A portion of the profits, if any, realized in hedging our obligations under the notes may be allowed to other affiliated or unaffiliated dealers, and we or one or more of our affiliates will retain any remaining hedging profits. See "Selected Risk Considerations — The Estimated Value of the Notes Is Lower Than the Original Issue Price (Price to Public) of the Notes" in this pricing supplement.

Secondary Market Prices of the Notes

For information about factors that will impact any secondary market prices of the notes, see "Risk Factors — Risks Relating to the Estimated Value and Secondary Market Prices of the Notes — Secondary market prices of the notes will be impacted by many economic and market factors" in the accompanying product supplement. In addition, we generally expect that some of the costs included in the original issue price of the notes will be partially paid back to you in connection with any repurchases of your notes by JPMS in an amount that will decline to zero over an initial predetermined period. These costs can include projected hedging profits, if any, and, in some circumstances, estimated hedging costs and our internal secondary market funding rates for structured debt issuances. This initial predetermined time period is intended to be the shorter of six months and one-half of the stated term of the notes. The length of any such initial period reflects the structure of the notes, whether our affiliates expect to earn a profit in connection with our hedging activities, the estimated costs of hedging the notes and when these costs are incurred, as determined by our affiliates. See "Selected Risk Considerations — The Value of the Notes as Published by JPMS (and Which May Be Reflected on Customer Account Statements) May Be Higher Than the Then-Current Estimated Value of the Notes for a Limited Time Period" in this pricing supplement.

Supplemental Use of Proceeds

The notes are offered to meet investor demand for products that reflect the risk-return profile and market exposure provided by the notes. See "How the Notes Work" and "Hypothetical Payout Examples" in this pricing supplement for an illustration of the risk-return profile of the notes and "The Reference Stock" in this pricing supplement for a description of the market exposure provided by the notes.

The original issue price of the notes is equal to the estimated value of the notes plus the selling commissions paid to JPMS and other affiliated or unaffiliated dealers, plus (minus) the projected profits (losses) that our affiliates expect to realize for assuming risks inherent in hedging our obligations under the notes, plus the estimated cost of hedging our obligations under the notes.

Validity of the Notes and the Guarantee

In the opinion of Davis Polk & Wardwell LLP, as special products counsel to JPMorgan Financial and JPMorgan Chase & Co., when the notes offered by this pricing supplement have been executed and issued by JPMorgan Financial and authenticated by the trustee pursuant to the indenture, and delivered against payment as contemplated herein, such notes will be valid and binding obligations of JPMorgan Financial and the related guarantee will constitute a valid and binding obligation of JPMorgan Chase & Co., enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and

the lack of bad faith), *provided* that such counsel expresses no opinion as to (i) the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above or (ii) any provision of the indenture that purports to avoid the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law by limiting the amount of JPMorgan Chase & Co.'s obligation under the related guarantee. This opinion is given as of the date hereof and is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the indenture and its authentication of the notes and the validity, binding nature and enforceability of the indenture with respect to the trustee, all as stated in the letter of such counsel dated March 8, 2018, which was filed as an exhibit to the Registration Statement on Form S-3 by JPMorgan Financial and JPMorgan Chase & Co. on March 8, 2018.

Additional Terms Specific to the Notes

You should read this pricing supplement together with the accompanying prospectus, as supplemented by the accompanying prospectus supplement, relating to our Series A medium-term notes of which these notes are a part, and the more detailed information contained in the accompanying product supplement. This pricing supplement, together with the documents listed below, contains the terms of the notes and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, fact sheets, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in the "Risk Factors" section of the accompanying product supplement, as the notes involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisers before you invest in the notes.

You may access these documents on the SEC website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

Product supplement no. 4-I dated April 5, 2018:
