FORWARD-LOOKING STATEMENTS

This Quarterly Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact included in this report, including, without limitation, statements regarding our financial position, business strategy and other plans and objectives for our future operations, are forward-looking statements. These statements include declarations regarding our management's beliefs and current expectations. In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "could," "intend," "consider," "expect," "plan," "anticipate," "believe," "estimate," "predict" or "continue" or the negative of such terms or other comparable terminology. Forward-looking statements by their nature address matters that are, to different degrees, uncertain. Our business has been undergoing substantial change, which has magnified such uncertainties. Readers should bear these factors in mind when considering such statements and should not place undue reliance on such statements. Forward-looking statements involve a number of assumptions, risks and uncertainties that could cause actual results to differ materially from those suggested by such statements. In the past, actual results have differed from those suggested by forward-looking statements and this may happen again. Important factors that could cause actual results to differ include, but are not limited to, the risks discussed in "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2015 and the following:

- adverse effects on our business as a result of regulatory settlements;
- reactions to the announcement of such settlements by key counterparties;
- increased regulatory scrutiny and media attention;
- uncertainty related to claims, litigation and investigations brought by government agencies and private parties regarding our servicing, foreclosure, modification, origination and other practices, including uncertainty related to past, present or future investigations and settlements with state regulators, the Consumer Financial Protection Bureau (CFPB), State Attorneys General, the Securities and Exchange Commission (SEC), Department of Justice or the Department of Housing and Urban Development (HUD) and actions brought under the False Claims Act by private parties on behalf of the United States of America regarding incentive and other payments made by governmental entities;
- any adverse developments in existing legal proceedings or the initiation of new legal proceedings;
- our ability to effectively manage our regulatory and contractual compliance obligations;
- the adequacy of our financial resources, including our sources of liquidity and ability to sell, fund and recover advances, repay borrowings and comply with our debt agreements, including the financial and other covenants contained in them;
- our servicer and credit ratings as well as other actions from various rating agencies, including the impact of recent or future downgrades of our servicer and credit ratings;
- volatility in our stock price;
- the characteristics of our servicing portfolio, including prepayment speeds along with delinquency and advance rates;
- our ability to contain and reduce our operating costs, including our ability to successfully execute on our cost improvement initiative;
- our ability to successfully modify delinquent loans, manage foreclosures and sell foreclosed properties;
- uncertainty related to legislation, regulations, regulatory agency actions, regulatory examinations, government programs and policies, industry initiatives and evolving best servicing practices;
- our dependence on New Residential Investment Corp. (NRZ) for a substantial portion of our advance funding for non-Agency mortgage servicing rights;
- uncertainties related to our long-term relationship with NRZ;
- the loss of the services of our senior managers;
- uncertainty related to general economic and market conditions, delinquency rates, home prices and disposition timelines on foreclosed properties;
- uncertainty related to the actions of loan owners and guarantors, including mortgage-backed securities investors, the Government National Mortgage Association, trustees and government sponsored entities (GSEs), regarding loan put-backs, penalties and legal actions;

- our ability to comply with our servicing agreements, including our ability to comply with our seller/servicer agreements with GSEs and maintain our status as an approved seller/servicer;
- uncertainty related to the GSEs substantially curtailing or ceasing to purchase our conforming loan originations or the Federal Housing Authority of the Department of Housing and Urban Development or Department of Veterans Affairs ceasing to provide insurance;
- uncertainty related to the processes for judicial and non-judicial foreclosure proceedings, including potential additional costs or delays or moratoria in the future or claims pertaining to past practices;
- our reserves, valuations, provisions and anticipated realization on assets;

- uncertainty related to the ability of third-party obligors and financing sources to fund servicing advances on a timely basis on loans serviced by us;
- uncertainty related to the ability of our technology vendors to adequately maintain and support our systems, including our servicing systems, loan originations and financial reporting systems;
- our ability to effectively manage our exposure to interest rate changes and foreign exchange fluctuations;
- uncertainty related to our ability to adapt and grow our business;
- our ability to integrate the systems, procedures and personnel of acquired assets and businesses;
- our ability to maintain our technology systems and our ability to adapt such systems for future operating environments;
- failure of our internal security measures or breach of our privacy protections;
- and
- uncertainty related to the political or economic stability of foreign countries in which we have operations.

Further information on the risks specific to our business is detailed within this report and our other reports and filings with the SEC including our Annual Report on Form 10-K for the year ended December 31, 2015 and our Current Reports on Form 8-K since such date. Forward-looking statements speak only as of the date they were made and we disclaim any obligation to update or revise forward-looking statements whether as a result of new information, future events or otherwise.

OCWEN FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2016

(Dollars in thousands, except per share data and unless otherwise indicated)

Note 1 – Organization, Business Environment and Basis of Presentation

Organization

Ocwen Financial Corporation (NYSE: OCN) (Ocwen, we, us and our) is a financial services holding company which, through its subsidiaries, originates and services loans. We are headquartered in West Palm Beach, Florida with offices located throughout the United States (U.S.) and in the United States Virgin Islands (USVI) and operations in India and the Philippines. Ocwen is a Florida corporation organized in February 1988.

Ocwen owns all of the common stock of its primary operating subsidiary, Ocwen Mortgage Servicing, Inc. (OMS), and directly or indirectly owns all of the outstanding stock of its other primary operating subsidiaries: Ocwen Loan Servicing, LLC (OLS), Ocwen Financial Solutions Private Limited (OFSPL), Homeward Residential, Inc. (Homeward), and Liberty Home Equity Solutions, Inc. (Liberty).

We perform primary and master servicer activities on behalf of investors and other servicers, including the Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) (collectively, the GSEs), the Government National Mortgage Association (Ginnie Mae) and private-label securitizations (non-Agency). As primary servicer, we may be required to make certain payments of property taxes and insurance premiums, default and property maintenance payments, as well as advances of principal and interest payments before collecting them from borrowers. As master servicer, we collect mortgage payments from primary servicers and distribute the funds to investors in the mortgage-backed securities. To the extent the primary servicer does not advance the scheduled principal and interest, as master servicer we are responsible for advancing the shortfall subject to certain limitations.

We primarily originate, purchase, sell and securitize conventional (conforming to the underwriting standards of Fannie Mae or Freddie Mac; collectively referred to as Agency loans) and government-insured (Federal Housing Authority (FHA) or Department of Veterans Affairs (VA)) forward and reverse mortgages. The GSEs or Ginnie Mae guarantee these mortgage securitizations.

Business, Liquidity, Financing Activities and Management's Plans

We are facing certain challenges and uncertainties that could have significant adverse effects on our business, liquidity and financing activities.

We have faced, and expect to continue to face, increased regulatory and public scrutiny as well as stricter and more comprehensive regulation of our business. We have entered into a number of regulatory settlements, which subject us to ongoing monitoring or reporting and which have significantly impacted our ability to grow our servicing portfolio. See Note 17 – Regulatory Requirements and Note 19 – Contingencies for further information regarding regulatory requirements, regulatory settlements and regulatory-related contingencies.

To the extent that an examination, monitorship, audit or other regulatory engagement results in an alleged failure by us to comply with applicable law, regulation or licensing requirement, or if allegations are made that we have failed to comply with the commitments we have made in connection with our regulatory settlements, or if other regulatory actions are taken in the future against us of a similar or different nature, this could lead to (i) loss of our licenses and approvals to engage in our servicing and lending businesses, (ii) governmental investigations and enforcement actions, (iii) administrative fines and penalties and litigation, (iv) civil and criminal liability, including class action lawsuits, (v) breaches of covenants and representations under our servicing, debt or other agreements, (vi) inability to raise capital and (vii) inability to execute on our business strategy. Any of these occurrences could increase our operating expenses and reduce our revenues, hamper our ability to grow or otherwise materially and adversely affect our business, reputation, financial condition and results of operations.

Given the intense regulatory scrutiny and the subsequent investments Ocwen has made in its risk and compliance infrastructure, we believe the underlying economics of our Servicing business have likely been changed for the foreseeable future. We believe it is unlikely Ocwen will achieve meaningful profitability in its Servicing business in

the near term unless there is a significant, structural change in the business model. While we believe such structural change is probably unlikely in the current regulatory environment, we are nonetheless intensely focused on improving our operations to enhance borrower experiences and improve efficiencies, both of which we believe will drive stronger financial performance through lower overall costs.

We are also investing in our forward and reverse lending businesses and will continue to evaluate new adjacent market opportunities that are consistent with our strategic goals, such as providing secured floor plan lending to used car dealerships through our Automotive Capital Services (ACS) venture and providing financing to investors to purchase single family homes and apartments for lease through our Liberty Rental Finance venture. Our new ventures involve risks and uncertainties, including potential difficulties integrating new lines of business into our current infrastructure, the inability to achieve the expected financial results in a reasonable time frame, implementing and maintaining consistent standards, controls, policies and information systems, and diversion of management's attention from other business matters. Further, our strategic initiatives could be impacted by factors beyond our control, such as general economic conditions and increased competition. The diversion of management's attention and any delays or difficulties encountered in implementing our new strategic initiatives could negatively impact our business and results of operations. Further, the economic benefits that we anticipate from these strategic initiatives may not develop. There can be no assurance that we will be successful in returning to profitability. Our success will depend on market conditions and other factors outside of our control as well as successful operational execution. If we continue to experience losses, our share price, business, reputation, financial condition and results of operations could be materially and adversely affected.

New Residential Investment Corp. (NRZ) is an important business partner to which we have sold rights to receive servicing fees, excluding ancillary income (other than net income on custodial and escrow accounts), with respect to certain non-Agency mortgage servicing rights (MSRs), which we refer to as Rights to MSRs. As of March 31, 2016, these Rights to MSRs relate to approximately \$132.7 billion in unpaid principal balance (UPB) of our non-Agency MSRs. A level of future uncertainty exists regarding our relationship with NRZ, including with respect to the impact of our Standard & Poor's Ratings Services (S&P) servicer rating under our agreements with NRZ beginning April 7, 2017. Under the Master Servicing Rights Purchase Agreement and Sale Supplements with NRZ, if a termination event related to our servicer rating exists with respect to any servicing agreement, NRZ will have the right to direct the transfer of servicing with respect to any affected servicing agreement to a licensed replacement servicer that obtains all required third-party consents. As of March 31, 2016, a termination event exists because our servicer rating from S&P is below Average. If our servicer rating from S&P is not upgraded to Average or better prior to April 7, 2017, NRZ will have the right to direct the transfer of any affected servicing agreements to a successor licensed servicer that obtains all required third-party consents. Following any such transfer, we would no longer be entitled to receive future servicing fee revenue with respect to any transferred servicing agreement. See Note 4 — Sales of Advances and MSRs for further information regarding our relationship with NRZ.

If we fail to comply with our debt agreements and are unable to avoid, remedy or secure a waiver of any resulting default, we may be subject to adverse action by our lenders, including termination of further funding, acceleration of outstanding obligations, enforcement of liens against the assets securing or otherwise supporting our obligations and other legal remedies. Our lenders can waive their contractual rights in the event of a default. Effective March 28, 2016 we entered into an amendment to our Senior Secured Term Loan (SSTL) which, among other things, removes in their entirety (including the consolidated total debt to consolidated tangible net worth ratio) or amends for the remaining term of the SSTL certain financial covenants and requires prepayments of \$6.3 million on each of May 31, 2016, July 29, 2016 and September 30, 2016. As a result of this amendment, we project we will maintain compliance with our financial covenants during 2016. In order to avoid an event of default arising from a covenant breach, we could repay or refinance debt, among other actions. See Note 11 – Borrowings for further information regarding our debt agreements.

Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in conformity with the instructions of the Securities and Exchange Commission (SEC) to Form 10-Q and SEC Regulation S-X, Article 10, Rule 10-01 for interim financial statements. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America (GAAP) for complete financial statements. In our opinion, the accompanying unaudited consolidated financial statements contain all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation. The results of operations and other data for the three months ended March 31, 2016 are not necessarily indicative of the results that may be expected for any other

interim period or for the year ending December 31, 2016. The unaudited consolidated financial statements presented herein should be read in conjunction with the audited consolidated financial statements and related notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2015.

Reclassifications

As a result of our retrospective adoption on January 1, 2016 of FASB Accounting Standards Update (ASU) 2015-03, Interest—Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs, and ASU 2015-15, Interest—Imputation of Interest: Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements—Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting, unamortized debt issuance costs that are not related to revolving line-of-credit arrangements have been reclassified from other assets to other secured

borrowings and senior unsecured notes on the consolidated balance sheets, resulting in a reduction to the Company's assets and liabilities of \$23.5 million and \$24.5 million at March 31, 2016 and December 31, 2015, respectively.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with GAAP requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, the reported amounts of revenues and expenses during the reporting period and the related disclosures in the accompanying notes. Such estimates and assumptions include, but are not limited to, those that relate to fair value measurements, the provision for potential losses that may arise from litigation proceedings, and representation and warranty and other indemnification obligations. In developing estimates and assumptions, management uses all available information; however, actual results could materially differ from those estimates and assumptions.

Recently Issued Accounting Standards

Leases (ASU 2016-02)

In February 2016, the FASB issued ASU 2016-02 to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key qualitative and quantitative information about leasing arrangements. A lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months, regardless of whether the lease is classified as a finance or operating lease. Additional disclosures will help investors and financial statement users better understand the amount, timing and uncertainty of cash flows arising from leases. ASU 2016-02 will be effective for us on January 1, 2019, with early application permitted. We are currently evaluating the effect of adopting this standard.

Derivatives and Hedging: Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships (ASU 2016-05)

In March 2016, the FASB issued ASU 2016-05 to clarify that a change in the counterparty to a derivative instrument that has been designated as a hedging instrument under FASB Accounting Standards Codification (ASC) Topic 815, Derivatives and Hedging, does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. ASU 2016-05 will be effective for us on January 1, 2017, with early adoption permitted, including adoption in an interim period. We do not anticipate that our adoption of this standard will have a material impact on our consolidated financial statements.

Derivatives and Hedging: Contingent Put and Call Options in Debt Instruments (ASU 2016-06)

In March 2016, the FASB issued ASU 2016-06 to clarify that in assessing whether embedded contingent put or call options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts, an entity is required to apply only the four-step decision sequence in FASB ASC 815-15-25-42 (as amended by this ASU). An entity does not have to separately assess whether the event that triggers its ability to exercise the contingent option is itself indexed only to interest rates or credit risk. ASU 2016-06 will be effective for us on January 1, 2017, with early adoption permitted, including adoption in an interim period. We are currently evaluating the effect of adopting this standard.

Investments - Equity Method and Joint Ventures: Simplifying the Transition to the Equity Method of Accounting (ASU 2016-07)

In March 2016, the FASB issued ASU 2016-07 to simplify the transition to the equity method of accounting as part of its simplification initiative to reduce cost and complexity in accounting standards while maintaining or improving the usefulness of the information provided to the users of financial statements. This standard requires that an equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment qualifies for equity method accounting, rather than adjusting the investment retroactively. This standard also requires that an entity that has an available-for-sale equity security that qualifies for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment qualifies for use of the equity method. ASU 2016-07 will be effective for us on January 1, 2017, with early application permitted.

We are currently evaluating the effect of adopting this standard.

Revenue from Contracts with Customers: Principal versus Agent Considerations (ASU 2016-08)

In March 2016, the FASB issued ASU 2016-08 to clarify the implementation guidance included in FASB ASC Topic 606, Revenue from Contracts with Customers, related to principal versus agent considerations and add illustrative examples to assist in the application of the guidance. When another party is involved in providing goods or services to a customer, an entity is required to determine whether the nature of its promise is that of a principal -- providing the specified good or service itself, or that of an agent -- arranging for that good or service to be provided by the other party. An entity is a principal if it controls the

specified good or service before that good or service is transferred to a customer. ASU 2016-08 will be effective for us on January 1, 2018, with early application permitted. We are currently evaluating the effect of adopting this standard. Compensation - Stock Compensation: Improvements to Employee Shared-Based Payment Accounting (ASU 2016-09) In March 2016, the FASB issued ASU 2016-09 to improve the accounting for employee share-based payments. This standard simplifies several aspects of the accounting for share-based payment award transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows, as part of FASB's simplification initiative to reduce cost and complexity in accounting standards while maintaining or improving the usefulness of the information provided to the users of financial statements. ASU 2016-09 will be effective for us on January 1, 2017, with early adoption permitted. We are currently evaluating the effect of adopting this standard.

Note 2 – Securitizations and Variable Interest Entities

We securitize, sell and service forward and reverse residential mortgage loans and regularly transfer financial assets in connection with asset-backed financing arrangements. We have aggregated these securitizations and asset-backed financing arrangements into two groups: (1) securitizations of residential mortgage loans and (2) financings of advances on loans serviced for others.

We have determined that the special purpose entities (SPEs) created in connection with our match funded advance financing facilities are variable interest entities (VIEs) for which we are the primary beneficiary.

Securitizations of Residential Mortgage Loans

Currently, we securitize forward and reverse residential mortgage loans involving the GSEs and Ginnie Mae and loans insured by the FHA or VA. We retain the right to service these loans and receive servicing fees based upon the securitized loan balances and certain ancillary fees, all of which are reported in Servicing and subservicing fees in the Unaudited Consolidated Statements of Operations.

Transfers of Forward Loans

We sell or securitize forward loans that we originate or that we purchase from third parties, generally in the form of mortgage-backed securities guaranteed by the GSEs or Ginnie Mae. Securitization usually occurs within 30 days of loan closing or purchase. We retain the servicing rights associated with the transferred loans and receive a servicing fee for services provided. We act only as a fiduciary and do not have a variable interest in the securitization trusts. As a result, we account for these transactions as sales upon transfer.

We report the gain or loss on the transfer of the loans held for sale in Gain on loans held for sale, net in the Unaudited Consolidated Statements of Operations along with the changes in fair value of the loans and the gain or loss on any related derivatives. We include all changes in loans held for sale and related derivative balances in operating activities in the Unaudited Consolidated Statements of Cash Flows.

The following table presents a summary of cash flows received from and paid to securitization trusts related to transfers accounted for as sales that were outstanding during the three months ended March 31:

	2016	2015
Proceeds received from securitizations	\$1,009,264	\$1,070,772
Servicing fees collected	3,124	347
Purchases of previously transferred assets, net of claims reimbursed	(13)	500
	\$1,012,375	\$1,071,619

In connection with these transfers, we retained MSR of \$7.2 million and \$8.5 million during the three months ended March 31, 2016 and 2015, respectively.

Certain obligations arise from the agreements associated with our transfers of loans. Under these agreements, we may be obligated to repurchase the loans, or otherwise indemnify or reimburse the investor or insurer for losses incurred due to material breach of contractual representations and warranties.

The following table presents the carrying amounts of our assets that relate to our continuing involvement with forward loans that we have transferred with servicing rights retained as well as our maximum exposure to loss including the UPB of the transferred loans at the dates indicated:

	March 31, 2016	December 31, 2015
Carrying value of assets:		
Mortgage servicing rights, at amortized cost	\$57,553	\$ 54,729
Mortgage servicing rights, at fair value	200	236
Advances and match funded advances	26,789	26,968
UPB of loans transferred	8,101,276	7,471,025
Maximum exposure to loss	\$8,185,818	\$ 7,552,958

At March 31, 2016 and December 31, 2015, 7.4% and 8.2%, respectively, of the transferred residential loans that we service were 60 days or more past due.

Transfers of Reverse Mortgages

We are an approved issuer of Ginnie Mae Home Equity Conversion Mortgage-Backed Securities (HMBS) that are guaranteed by Ginnie Mae. We originate Home Equity Conversion Mortgages (HECM, or reverse mortgages) that are insured by the FHA. We then pool the loans into HMBS that we sell into the secondary market with servicing rights retained. We have determined that loan transfers in the HMBS program do not meet the definition of a participating interest because of the servicing requirements in the product that require the issuer/servicer to absorb some level of interest rate risk, cash flow timing risk and incidental credit risk. As a result, the transfers of the HECM loans do not qualify for sale accounting, and therefore, we account for these transfers as financings. Under this accounting treatment, the HECM loans are classified as Loans held for investment - reverse mortgages, at fair value, on our Unaudited Consolidated Balance Sheets. We record the proceeds from the transfer of assets as secured borrowings (HMBS-related borrowings) in Financing liabilities and recognize no gain or loss on the transfer. Holders of participating interests in the HMBS have no recourse against the assets of Ocwen, except with respect to standard representations and warranties and our contractual obligation to service the HECM loans and the HMBS.

We have elected to measure the HECM loans and HMBS-related borrowings at fair value. The changes in fair value of the HECM loans and HMBS-related borrowings are included in Other revenues in our Unaudited Consolidated Statements of Operations. Included in net fair value gains on the HECM loans and related HMBS borrowings are the interest income that we expect to be collected on the HECM loans and the interest expense that we expect to be paid on the HMBS-related borrowings. We report originations and collections of HECM loans in investing activities in the Unaudited Consolidated Statements of Cash Flows. We report net fair value gains on HECM loans and the related HMBS borrowings as an adjustment to the net cash provided by or used in operating activities in the Unaudited Consolidated Statements of Cash Flows. Proceeds from securitizations of HECM loans and payments on HMBS-related borrowings are included in financing activities in the Unaudited Consolidated Statements of Cash Flows.

At March 31, 2016 and December 31, 2015, we had HMBS-related borrowings of \$2.6 billion and \$2.4 billion, respectively. HECM loans pledged as collateral to the pools were \$2.8 billion and \$2.5 billion at March 31, 2016 and December 31, 2015, respectively.

Financings of Advances on Loans Serviced for Others

Match funded advances on loans serviced for others result from our transfers of residential loan servicing advances to SPEs in exchange for cash. We consolidate these SPEs because we have determined that Ocwen is the primary beneficiary of the SPE. These SPEs issue debt supported by collections on the transferred advances, and we refer to this debt as Match funded liabilities.

We make the transfers to these SPEs under the terms of our advance financing facility agreements. We classify the transferred advances on our Unaudited Consolidated Balance Sheets as Match funded advances and the related liabilities as Match funded liabilities. The SPEs use collections of the pledged advances to repay principal and interest and to pay the expenses of the SPE. Holders of the debt issued by these entities have recourse only to the assets of the SPE for satisfaction of the debt. The assets and liabilities of the advance financing SPEs are comprised solely of

Match funded advances, Debt service accounts, Match funded liabilities and amounts due to affiliates. Amounts due to affiliates are eliminated in consolidation in our Unaudited Consolidated Balance Sheets.

Note 3 – Fair Value

Fair value is estimated based on a hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels whereby the highest priority is given to Level 1 inputs and the lowest to Level 3 inputs.

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

We classify assets in their entirety based on the lowest level of input that is significant to the fair value measurement. The carrying amounts and the estimated fair values of our financial instruments and certain of our nonfinancial assets measured at fair value on a recurring or non-recurring basis or disclosed, but not carried, at fair value are as follows at the dates indicated:

		March 31, 2016		December 31, 2015	
	Level	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:					
Loans held for sale:					
Loans held for sale, at fair value (a)	2	\$321,739	\$321,739	\$309,054	\$309,054
Loans held for sale, at lower of cost or fair value (b)	3	87,070	87,070	104,992	104,992
Total Loans held for sale		\$408,809	\$408,809	\$414,046	\$414,046
Loans held for investment - Reverse mortgages, at fair value (a)	3	\$2,771,242	\$2,771,242	\$2,488,253	\$2,488,253
Advances and match funded advances (c)	3	2,038,245	2,038,245	2,151,066	2,151,066
Receivables, net (c)	3	237,583	237,583	286,981	286,981
Mortgage-backed securities, at fair value (a)	3	8,386	8,386	7,985	7,985
Financial liabilities:					
Match funded liabilities (c)	3	\$1,537,096	\$1,537,611	\$1,584,049	\$1,581,786
Financing liabilities:					
HMBS-related borrowings, at fair value (a)	3	\$2,648,100	\$2,648,100	\$2,391,362	\$2,391,362
Financing liability - MSRs pledged (a)	3	523,503	523,503	541,704	541,704
Other (c)	3	148,043	106,857	156,189	131,940
Total Financing liabilities		\$3,319,646	\$3,278,460	\$3,089,255	\$3,065,006
Other secured borrowings:					
Senior secured term loan (c)(d)	2	\$359,428	\$382,508	\$377,091	\$397,956
Other (c)	3	359,402	359,402	385,320	385,320
Total Other secured borrowings		\$718,830	\$741,910	\$762,411	\$783,276
Senior unsecured notes (c)(d)	2	\$345,847	\$294,350	\$345,511	\$318,063

		March 31, 2016		December 31, 2015	
	Level	Carrying Value	Fair Value	Carrying Value	Fair Value
Derivative financial instruments assets (liabilities) (a):					
Interest rate lock commitments	2	\$13,545	\$13,545	\$6,080	\$6,080
Forward mortgage-backed securities trades	1	(5,291)	(5,291)	295	295
Interest rate caps	3	570	570	2,042	2,042
Mortgage servicing rights:					
Mortgage servicing rights, at fair value (a)	3	\$732,174	\$732,174	\$761,190	\$761,190
Mortgage servicing rights, at amortized cost (c)(e)	3	346,039	390,970	377,379	461,555
Total Mortgage servicing rights		\$1,078,213	\$1,123,144	\$1,138,569	\$1,222,745

(a) Measured at fair value on a recurring basis.

(b) Measured at fair value on a non-recurring basis.

(c) Disclosed, but not carried, at fair value.

(d) The carrying values are net of unamortized debt issuance costs and discount. See Note 11 – Borrowings for additional information.

The net carrying value at March 31, 2016 and December 31, 2015 is net of the valuation allowance on the impaired government-insured stratum of our amortization method MSR, which is measured at fair value on a non-recurring basis. Before applying the valuation allowance of \$47.3 million, the carrying value of this stratum at March 31, 2016 was \$146.7 million. At December 31, 2015, the carrying value of this stratum was \$146.5 million before applying the valuation allowance of \$17.3 million.

The following tables present a reconciliation of the changes in fair value of Level 3 assets and liabilities that we measure at fair value on a recurring basis:

	Loans Held for Investment - Reverse Mortgages	HMBS-Related Borrowings	Mortgage-Backed Securities	Financing Liability - MSR Pledged	Derivatives	MSRs	Total
Three months ended March 31, 2016							
Beginning balance	\$2,488,253	\$(2,391,362)	\$ 7,985	\$(541,704)	\$ 2,042	\$761,190	\$326,404
Purchases, issuances, sales and settlements:							
Purchases	—	—	—	—	—	419	419
Issuances	304,058	(233,174)	—	—	—	—	70,884

Ending balance	\$1,808,141	\$(1,702,397)	\$ 7,701	\$(594,495)	\$ 203	\$897,797	\$416,950

In the event of a transfer to another party of servicing related to Rights to MSRs, we are required to reimburse NRZ (1) at predetermined contractual rates for the loss of servicing revenues. Settlements for Financing liability - MSRs pledged for the three months ended March 31, 2015 includes \$2.2 million of such reimbursements.

Total losses attributable to derivative financial instruments still held at March 31, 2016 and March 31, 2015 were (2) \$1.5 million and \$0.4 million for the three months ended March 31, 2016 and 2015, respectively. Total losses attributable to MSRs still held at March 31, 2016 and March 31, 2015 were \$29.1 million and \$31.7 million for the three months ended March 31, 2016 and 2015, respectively.

The methodologies that we use and key assumptions that we make to estimate the fair value of financial instruments and other assets and liabilities measured at fair value on a recurring or non-recurring basis and those disclosed, but not carried, at fair value are described below.

Loans Held for Sale

We originate and purchase residential mortgage loans that we intend to sell to the GSEs. We also own residential mortgage loans that are not eligible to be sold to the GSEs due to delinquency or other factors. Residential forward and reverse mortgage loans that we intend to sell to the GSEs are carried at fair value as a result of a fair value election. Such loans are subject to changes in fair value due to fluctuations in interest rates from the closing date through the date of the sale of the loan into the secondary market. These loans are classified within Level 2 of the valuation hierarchy because the primary component of the price is obtained from observable values of mortgage forwards for loans of similar terms and characteristics. We have the ability to access this market, and it is the market into which conventional and government-insured mortgage loans are typically sold.

We repurchase certain loans from Ginnie Mae guaranteed securitizations in connection with loan modifications and loan resolution activity as part of our contractual obligations as the servicer of the loans. These loans are classified as loans held for sale at the lower of cost or fair value, in the case of modified loans, as we expect to redeliver (sell) the

loans to new Ginnie Mae guaranteed securitizations. The fair value of these loans is estimated using published forward Ginnie Mae prices. Loans repurchased in connection with loan resolution activities are modified or otherwise remediated through loss mitigation activities or are reclassified to receivables. Because these loans are insured or guaranteed by the FHA or VA, the fair value of these loans represents the net recovery value taking into consideration the insured or guaranteed claim.

For all other loans held for sale, which we report at the lower of cost or fair value, market illiquidity has reduced the availability of observable pricing data. When we enter into an agreement to sell a loan or pool of loans to an investor at a set price, we value the loan or loans at the commitment price. We base the fair value of uncommitted loans on the expected future cash flows discounted at a rate commensurate with the risk of the estimated cash flows.

Loans Held for Investment – Reverse Mortgages

We have elected to measure these loans at fair value. For transferred reverse mortgage loans that do not qualify as sales for accounting purposes, we base the fair value on the expected future cash flows discounted over the expected life of the loans at a rate commensurate with the risk of the estimated cash flows. Significant assumptions include expected prepayment and delinquency rates and cumulative loss curves. The discount rate assumption for these assets is primarily based on an assessment of current market yields on newly originated reverse mortgage loans, expected duration of the asset and current market interest rates.

The more significant assumptions used in the March 31, 2016 valuation include:

• Life in years ranging from 5.96 to 9.46 (weighted average of 6.52);

• Conditional repayment rate ranging from 4.92% to 53.75% (weighted average of 19.70%); and

• Discount rate of 2.74%.

Significant increases or decreases in any of these assumptions in isolation could result in a significantly lower or higher fair value, respectively. The effects of changes in the assumptions used to value the loans held for investment are largely offset by the effects of changes in the assumptions used to value the HMBS-related borrowings that are associated with these loans.

Mortgage Servicing Rights

The significant components of the estimated future cash inflows for MSRs include servicing fees, late fees, float earnings and other ancillary fees. Significant cash outflows include the cost of servicing, the cost of financing servicing advances and compensating interest payments.

Third-party valuation experts generally utilize: (a) transactions involving instruments with similar collateral and risk profiles, adjusted as necessary based on specific characteristics of the asset or liability being valued; and/or (b) industry-standard modeling, such as a discounted cash flow model, in arriving at their estimate of fair value. The prices provided by the valuation experts reflect their observations and assumptions related to market activity, including risk premiums and liquidity adjustments. The models and related assumptions used by the valuation experts are owned and managed by them and, in many cases, the significant inputs used in the valuation techniques are not reasonably available to us. However, we have an internal understanding of the processes and assumptions used to develop the prices based on our ongoing due diligence, which includes regular discussions with the valuation experts. We believe that the procedures executed by the valuation experts, supported by our internal verification and analytical procedures, provide reasonable assurance that the prices used in our Unaudited Consolidated Financial Statements comply with the accounting guidance for fair value measurements and disclosures and reflect the assumptions that a market participant would use.

We evaluate the reasonableness of our third-party experts' assumptions using historical experience adjusted for prevailing market conditions. Assumptions used in the valuation of MSRs include:

• Mortgage prepayment speeds • Interest rate used for computing the cost of financing servicing advances

• Cost of servicing • Interest rate used for computing float earnings

• Discount rate • Compensating interest expense

• Delinquency rates • Collection rate of other ancillary fees

Amortized Cost MSRs

We estimate the fair value of MSRs carried at amortized cost using a process that involves either actual sale prices obtained or the use of independent third-party valuation experts, supported by commercially available discounted cash flow models and analysis of current market data. To provide greater price transparency to investors, we disclose actual Ocwen sale prices for orderly transactions where available in lieu of third-party valuations.

The more significant assumptions used in the March 31, 2016 valuation include:

Weighted average prepayment speed	12.11 %
Weighted average delinquency rate	12.32 %
Advance financing cost	5-year swap
Interest rate for computing float earnings	5-year swap
Weighted average discount rate	9.33 %
Weighted average cost to service (in dollars)	\$ 111

We perform an impairment analysis based on the difference between the carrying amount and fair value after grouping the underlying loans into the applicable strata. Our strata are defined as conventional and government-insured.

Fair Value MSRs

MSRs carried at fair value are classified within Level 3 of the valuation hierarchy. The fair value is equal to the mid-point of the range of prices provided by third-party valuation experts, without adjustment, except in the event we have a potential or completed Ocwen sale, including transactions where we have executed letters of intent, in which case the fair value of the MSRs is carried at the estimated sale price. Fair value reflects actual Ocwen sale prices for orderly transactions where available in lieu of independent third-party valuations. Our valuation process includes discussions of bid pricing with the third-party valuation experts and presumably are contemplated along with other market-based transactions in their model validation.

A change in the valuation inputs utilized by the valuation experts might result in a significantly higher or lower fair value measurement. Changes in market interest rates tend to impact the fair value for Agency MSRs via prepayment speeds by altering the borrower refinance incentive, and for Non-Agency MSRs via a market rate indexed cost of advance funding. Other key assumptions used in the valuation of these MSRs include delinquency rates and discount rates.

The primary assumptions used in the March 31, 2016 valuation include:

	Agency	Non Agency
Weighted average prepayment speed	13.27%	16.83 %
Weighted average delinquency rate	0.99 %	27.42 %
Advance financing cost	5-year swap	1ML plus 3.5%
Interest rate for computing float earnings	5-year swap	1ML
Weighted average discount rate	9.00 %	14.68 %
Weighted average cost to service (in dollars)	\$ 74	\$ 313

Advances

We value advances at their net realizable value, which generally approximates fair value, because advances have no stated maturity, are generally realized within a relatively short period of time and do not bear interest.

Receivables

The carrying value of receivables generally approximates fair value because of the relatively short period of time between their origination and realization.

Mortgage-Backed Securities (MBS)

Our subordinate and residual securities are not actively traded, and therefore, we estimate the fair value of these securities based on the present value of expected future cash flows from the underlying mortgage pools. We use our best estimate of the key assumptions we believe are used by market participants. We calibrate our internally developed discounted cash flow models for trading activity when appropriate to do so in light of market liquidity levels. Key inputs include expected prepayment rates, delinquency and cumulative loss curves and discount rates commensurate with the risks. Where possible, we use observable inputs in the valuation of our securities. However,

the subordinate and residual securities in which we have invested trade infrequently and therefore have few or no observable inputs and little price transparency. Additionally, during periods of market dislocation, the observability of inputs is further reduced. Changes in the fair value of our investment in subordinate and residual securities are recognized in Other, net in the Unaudited Consolidated Statements of Operations.

Discount rates for the subordinate and residual securities are determined based upon an assessment of prevailing market conditions and prices for similar assets. We project the delinquency, loss and prepayment assumptions based on a comparison to actual historical performance curves adjusted for prevailing market conditions.

Match Funded Liabilities

For match funded liabilities that bear interest at a rate that is adjusted regularly based on a market index, the carrying value approximates fair value. For match funded liabilities that bear interest at a fixed rate, we determine fair value by discounting the future principal and interest repayments at a market rate commensurate with the risk of the estimated cash flows. We estimate principal repayments of match funded liabilities during the amortization period based on our historical advance collection rates and taking into consideration any plans to refinance the notes.

Financing Liabilities

HMBS-Related Borrowings

We have elected to measure these borrowings at fair value. We recognize the proceeds from the transfer of reverse mortgages as a secured borrowing that we account for at fair value. These borrowings are not actively traded, and therefore, quoted market prices are not available. We determine fair value by discounting the future principal and interest repayments over the estimated life of the borrowing at a market rate commensurate with the risk of the estimated cash flows. Significant assumptions include prepayments, discount rate and borrower mortality rates for reverse mortgages. The discount rate assumption for these liabilities is based on an assessment of current market yields for newly issued HMBS, expected duration and current market interest rates.

The more significant assumptions used in the March 31, 2016 valuation include:

- Life in years ranging from 4.74 to 9.46 (weighted average of 5.40);
- Conditional repayment rate ranging from 4.92% to 53.75% (weighted average of 19.70%); and
- Discount rate of 2.17%.

Significant increases or decreases in any of these assumptions in isolation would result in a significantly higher or lower fair value.

MSRs Pledged

We periodically sell Rights to MSRs and the related servicing advances. Because we have retained legal title to the MSRs, the sales of Rights to MSRs are accounted for as financings. We initially establish the value of the Financing Liability - MSRs Pledged based on the price at which the Rights to MSRs are sold. Thereafter, the carrying value of the Financing Liability - MSRs pledged is adjusted to fair value at each reporting date. We determine fair value by applying the price of the underlying MSRs to the remaining principal balance related to the underlying MSRs. Since we have elected fair value for our portfolio of non-Agency MSRs, future fair value changes in the Financing Liability - MSRs Pledged will be largely offset by changes in the fair value of the related MSRs.

The more significant assumptions used in determination of the price of the underlying MSRs at March 31, 2016 include:

Weighted average prepayment speed	17.35 %
Weighted average delinquency rate	29.21 %
	1 ML
Advance financing cost	plus
	3.5%
Interest rate for computing float earnings	1ML
Weighted average discount rate	14.54 %
Weighted average cost to service (in dollars)	\$318

Significant increases or decreases in these assumptions in isolation would result in a significantly higher or lower fair value

Secured Notes

We issued Ocwen Asset Servicing Income Series (OASIS), Series 2014-1 Notes secured by Ocwen-owned MSRs relating to Freddie Mac mortgages. We accounted for this transaction as a financing. We determine the fair value based on bid prices provided by third parties involved in the issuance and placement of the notes.

Other Secured Borrowings

The carrying value of secured borrowings that bear interest at a rate that is adjusted regularly based on a market index approximates fair value. For other secured borrowings that bear interest at a fixed rate, we determine fair value by discounting

the future principal and interest repayments at a market rate commensurate with the risk of the estimated cash flows. For the SSTL, we based the fair value on quoted prices in a market with limited trading activity.

Senior Unsecured Notes

We base the fair value on quoted prices in a market with limited trading activity.

Derivative Financial Instruments

Interest rate lock commitments (IRLCs) represent an agreement to purchase loans from a third-party originator or an agreement to extend credit to a mortgage applicant (locked pipeline), whereby the interest rate is set prior to funding. IRLCs are classified within Level 2 of the valuation hierarchy as the primary component of the price is obtained from observable values of mortgage forwards for loans of similar terms and characteristics. Fair value amounts of IRLCs are adjusted for expected “fallout” (locked pipeline loans not expected to close) using models that consider cumulative historical fallout rates and other factors.

We enter into forward MBS trades to provide an economic hedge against changes in the fair value of residential forward and reverse mortgage loans held for sale that we carry at fair value. Forward MBS trades are primarily used to fix the forward sales price that will be realized upon the sale of mortgage loans into the secondary market. Forward contracts are actively traded in the market and we obtain unadjusted market quotes for these derivatives, thus they are classified within Level 1 of the valuation hierarchy.

In addition, we may use interest rate caps to minimize future interest rate exposure on variable rate debt issued on servicing advance financing facilities from increases in one-month LIBOR interest rates. The fair value for interest rate caps is based on counterparty market prices and adjusted for counterparty credit risk.

Note 4 — Sales of Advances and MSRs

In order to efficiently finance our assets, streamline our operations and generate liquidity, we sell MSRs, Rights to MSRs and servicing advances to market participants. We may retain the right to subservice loans when we sell MSRs. In connection with sales of Rights to MSRs, we retain legal ownership of the MSRs and continue to service the related mortgage loans until such time as all necessary consents to a transfer of the MSRs are received. During the three months ended March 31, 2016 and 2015, we sold MSRs relating to loans with a UPB of \$34.5 million (non-Agency) and \$9.1 billion (Agency), respectively.

The following table provides a summary of the MSRs and advances sold during the three months ended March 31:

	2016		2015	
	MSRs	Advances and Match Funded Advances	MSRs	Advances and Match Funded Advances
Sales price of assets sold and adjustments:				
Accounted for as a sale	\$1,162	\$ 261	\$97,530	\$ 1,765
Amount due from purchaser at March 31 (1)	—	—	(48,065)	—
Amounts received from purchaser for items outstanding at the end of the previous year	14,143	40,742	—	—
Total net cash received	\$15,305	\$41,003	\$49,465	\$ 1,765

There were no amounts due from purchaser at March 31, 2016 related to assets sold during the three months ended (1) March 31, 2016. The total amount due at March 31, 2016 on sales of MSRs and advances, which consists only of amounts due on sales completed in 2015, is \$39.7 million.

In 2012 and 2013, we sold Rights to MSRs and the related servicing advances to Home Loan Servicing Solutions, Ltd. (HLSS). On April 6, 2015, HLSS closed on the sale of substantially all of its assets to NRZ. References to NRZ in these unaudited consolidated financial statements include HLSS for periods prior to April 6, 2015 because, following HLSS’ sale of substantially all of its assets on April 6, 2015, NRZ, through its subsidiaries, is the owner of the Rights to MSRs and has assumed all rights and obligations under the associated agreements. We refer to the sale of Rights to MSRs and the related servicing advances as the NRZ/HLSS Transactions.

Pursuant to our agreements with NRZ, NRZ has assumed the obligation to fund new servicing advances with respect to the Rights to MSRs. We continue to service the loans for which the Rights to MSRs have been sold to NRZ. Accordingly, in the event NRZ were unable to fulfill its advance funding obligations, as the servicer under our servicing agreements with the residential mortgage backed securitization trusts, we would be contractually obligated to fund such advances under those

servicing agreements. At March 31, 2016, NRZ had outstanding advances of approximately \$4.9 billion in connection with the Rights to MSRs.

The servicing fees payable under the servicing agreements underlying the Rights to MSRs are apportioned between NRZ and us as provided in our agreements with NRZ. NRZ retains a fee based on the UPB of the loans serviced, and OLS receives certain fees, including a performance fee based on servicing fees actually paid less an amount calculated based on the amount of servicing advances and cost of financing those advances. After the earlier of April 30, 2020 or eight years after the closing date of the sale of each tranche of Rights to MSRs to NRZ, the apportionment of these fees with respect to such tranche is subject to re-negotiation.

Beginning April 7, 2017, we are obligated to transfer legal ownership of the MSRs to NRZ if and when NRZ obtains all required third-party consents and licenses. If and when such transfer of legal ownership occurs, OLS will subservice the loans pursuant to a subservicing agreement, as amended, with NRZ. NRZ has agreed not to direct our replacement as servicer before April 6, 2017 except under certain limited circumstances.

Beginning April 7, 2017, under the Master Servicing Rights Purchase Agreement and Sale Supplements with NRZ, if a termination event related to a servicer rating downgrade exists with respect to any servicing agreement, NRZ will have the right to direct the transfer of servicing with respect to any affected servicing agreement to a replacement servicer that obtains all required third-party consents and licenses. As of March 31, 2016, a termination event relating to a servicer rating downgrade exists because our servicer rating from S&P is below "Average." If our servicer rating from S&P is not upgraded to "Average" or better prior to April 7, 2017, NRZ will have the right to direct the transfer of any affected servicing agreements to a successor servicer that obtains all required third-party consents and licenses. Following any such transfer of an affected servicing agreement, we would no longer be entitled to receive future servicing fee revenue with respect to the transferred servicing agreement.

To the extent servicing agreements underlying Rights to MSRs are terminated as a result of a termination event, NRZ is entitled to payment of an amount equal to an amortized percentage of NRZ's purchase price for the related Rights to MSRs. We paid NRZ \$2.2 million during the three months ended March 31, 2015 in connection with the termination of four servicing agreements underlying the Rights to MSRs.

Our agreements with NRZ provide that, if S&P downgrades our servicer rating to below "Average" (which it has), we will compensate NRZ for certain increased costs associated with its servicing advance financing facilities, including increased costs of funding, to the extent such costs are the direct result of such downgrade. Any such compensation will continue for a maximum of 12 months and will not exceed \$3.0 million for any calendar month or \$36.0 million in the aggregate. In such circumstances, NRZ must use commercially reasonable efforts to assist us in curing any potential cost increases by obtaining amendments to the relevant financing agreements. We incurred \$6.2 million during the three months ended March 31, 2016 in connection with this agreement, and will continue to incur costs through June 2016. Actual future payments in connection with this agreement will vary based on NRZ's outstanding borrowings and movements in applicable floating interest rates.

The NRZ/HLSS Transactions are accounted for as financings. If and when transfer of legal ownership of the underlying MSRs occurs upon receipt of third-party consents, we would derecognize the related MSRs. Upon derecognition, any resulting gain or loss is deferred and amortized over the expected life of the related subservicing agreement. Until derecognition, we continue to recognize the full amount of servicing revenue and amortization of the MSRs.

The sales of advances in connection with MSR sales, including the NRZ/HLSS Transactions, meet the requirements for sale accounting, and the advances are derecognized from our consolidated financial statements at the servicing transfer date, or, in the case of advances sold in connection with the sale of Rights to MSRs, at the time of the sale. In 2014, Ocwen sold advances related to certain FHA-insured mortgage loans to subsidiaries of NRZ. These advance sales did not qualify for sales treatment and were accounted for as financings (Financing liability - Advances pledged).

Note 5 – Loans Held for Sale

Loans Held for Sale - Fair Value

Loans held for sale, at fair value, represent residential mortgage loans originated or purchased and held until sold to secondary market investors, such as the GSEs or other third parties. The following table summarizes the activity in the balance during the three months ended March 31:

	2016	2015
Beginning balance	\$309,054	\$401,120
Originations and purchases	789,180	922,254
Proceeds from sales	(783,187)	(990,634)
Principal collections	(3,280)	(2,667)
Gain on sale of loans	7,646	15,265
Other (1)	2,326	(5,830)
Ending balance	\$321,739	\$339,508

(1) Other includes the increase (decrease) in fair value of \$1.8 million and \$(6.9) million for the three months ended March 31, 2016 and 2015, respectively.

At March 31, 2016, loans held for sale, at fair value with a UPB of \$285.1 million were pledged to secure warehouse lines of credit in our Lending segment.

Loans Held for Sale - Lower of Cost or Fair Value

Loans held for sale, at lower of cost or fair value, include residential loans that we do not intend to hold to maturity.

The following table summarizes the activity in the net balance during the three months ended March 31:

	2016	2015
Beginning balance	\$104,992	\$87,492
Purchases	421,896	113,896
Proceeds from sales	(372,583)	(140,948)
Principal collections	(6,453)	(13,863)
Transfers to accounts receivable	(61,212)	(16,572)
Transfers to real estate owned	(1,224)	(2,296)
Gain on sale of loans	5,010	17,271
Decrease (increase) in valuation allowance	(3,335)	19,728
Other	(21)	3,781
Ending balance (1)	\$87,070	\$68,489

(1) At March 31, 2016 and March 31, 2015, the balances include \$55.5 million and \$43.9 million, respectively, of loans that we were required to repurchase from Ginnie Mae guaranteed securitizations as part of our servicing obligations. Repurchased loans are modified or otherwise remediated through loss mitigation activities or are reclassified to receivables.

The change in the valuation allowance during the three months ended March 31 is as follows:

	2016	2015
Beginning balance	\$14,658	\$49,676
Provision	2,597	1,104
Transfer from liability for indemnification obligations	1,030	664
Sales of loans	—	(22,488)
Other	(292)	992
Ending balance	\$17,993	\$29,948

At March 31, 2016, Loans held for sale, at lower of cost or fair value with a UPB of \$37.1 million were pledged to secure a warehouse line of credit in our Servicing segment.

In March 2015, we recognized a gain of \$12.9 million on sales of loans with a total UPB of \$42.7 million to an unrelated third party. We had repurchased these loans under the representation and warranty provisions of our contractual obligations to the GSEs as primary servicer of the loans.

Gain on Loans Held for Sale, Net

The following table summarizes the activity in Gain on loans held for sale, net, during the three months ended March 31:

	2016	2015
Gain on sales of loans	\$17,939	\$51,400
Change in fair value of IRLCs	7,465	(2,233)
Change in fair value of loans held for sale	3,521	(4,008)
Loss on economic hedge instruments	(13,202)	(427)
Other	(151)	(228)
	\$15,572	\$44,504

Gain on loans held for sale, net include \$6.5 million and \$8.5 million for the three months ended March 31, 2016 and 2015, respectively, representing the value assigned to MSRs retained on transfers of forward loans.

Also included in Gains on loans held for sale, net are gains of \$5.0 million and \$4.3 million recorded during the three months ended March 31, 2016 and 2015, respectively, on sales of repurchased Ginnie Mae loans, which are carried at the lower of cost or fair value.

Fair value gains recognized in connection with transfers of reverse mortgages into Ginnie Mae guaranteed securitizations are also included in Gains on loans held for sale, net and amounted to \$8.0 million and \$25.6 million for the three months ended March 31, 2016 and 2015, respectively.

Note 6 – Advances

Advances, net, which represent payments made on behalf of borrowers or on foreclosed properties, consisted of the following at the dates indicated:

	March 31, 2016	December 31, 2015
Principal and interest	\$58,290	\$ 81,681
Taxes and insurance	233,202	278,487
Foreclosures, bankruptcy and other	68,379	126,031
	359,871	486,199
Allowance for losses	(42,523)	(41,901)
	\$317,348	\$ 444,298

Advances at March 31, 2016 include \$79.6 million of previously sold advances that did not qualify for sales accounting.

The following table summarizes the activity in net advances for the three months ended March 31:

	2016	2015
Beginning balance	\$444,298	\$893,914
Sales of advances	(261)	(1,765)
New advances (collections of advances), net	(126,067)	52,217
Increase in allowance for losses	(622)	(1,828)
Ending balance	\$317,348	\$942,538

The change in the allowance for losses during the three months ended March 31 is as follows:

	2016	2015
Beginning balance	\$41,901	\$70,034
Provision	3,483	4,960
Charge-offs and other	(2,861)	(3,132)
Ending balance	\$42,523	\$71,862

Note 7 – Match Funded Advances

Match funded advances on residential loans we service for others are comprised of the following at the dates indicated:

	March 31, 2016	December 31, 2015
Principal and interest	\$879,242	\$ 948,376
Taxes and insurance	620,795	608,404
Foreclosures, bankruptcy, real estate and other	220,860	149,988
	\$1,720,897	\$ 1,706,768

The following table summarizes the activity in match funded advances for the three months ended March 31:

	2016	2015
Beginning balance	\$1,706,768	\$2,409,442
New advances (collections of pledged advances), net	14,129	(156,475)
Ending balance	\$1,720,897	\$2,252,967

Note 8 – Mortgage Servicing

Mortgage Servicing Rights – Amortization Method

Servicing Assets. The following table summarizes the activity in the carrying value of amortization method servicing assets for the three months ended March 31. Amortization of mortgage servicing rights is reported net of the amortization of any servicing liabilities and includes the amount of charges we recognized to increase servicing liability obligations, if any.

	2016	2015
Beginning balance	\$377,379	\$1,820,091
Fair value election - transfer of MSR's carried at fair value (1)	—	(787,142)
Additions recognized in connection with asset acquisitions	4,263	3,267
Additions recognized on the sale of mortgage loans	7,156	8,528
Sales	—	(65,627)
	388,798	979,117
Amortization	(12,806)	(38,494)
Increase in impairment valuation allowance (2)	(29,953)	(17,769)
Ending balance	\$346,039	\$922,854

Estimated fair value at end of period \$390,970 \$1,064,134

Effective January 1, 2015, we elected fair value accounting for a newly-created class of non-Agency MSR's, which were previously accounted for using the amortization method, based on a different strategy for managing the risks of the underlying portfolio compared to our other MSR classes. This irrevocable election applies to all subsequently acquired or originated servicing assets and liabilities that have characteristics consistent with this class. We recorded a cumulative-effect adjustment of \$52.0 million (before deferred income taxes of \$9.2 million) to retained earnings as of January 1, 2015 to reflect the excess of the fair value of these MSR's over their carrying amount. At December 31, 2014, the UPB of the loans related to the non-Agency MSR's for which the fair value election was made was \$195.3 billion.

(1) Impairment of MSR's is recognized in Servicing and origination expense in the Unaudited Consolidated Statements of Operations.

Servicing Liabilities. Servicing liabilities, if any, are included in Other liabilities.

Mortgage Servicing Rights – Fair Value Measurement Method

This portfolio comprises servicing rights for which we elected the fair value option and includes Agency residential mortgage loans for which we previously hedged the related market risks and a new class of non-Agency residential mortgage loans for which we elected fair value as of January 1, 2015.

The following table summarizes the activity related to fair value servicing assets for the three months ended March 31:

	2016			2015		
	Agency	Non-Agency	Total	Agency	Non-Agency	Total
Beginning balance	\$15,071	\$ 746,119	\$761,190	\$93,901	\$—	\$93,901
Fair value election - transfer of MSRs carried at amortized cost	—	—	—	—	787,142	787,142
Cumulative effect of fair value election	—	—	—	—	52,015	52,015
Sales	—	(142)	(142)	—	(947)	(947)
Servicing transfers and adjustments	—	419	419	—	(1,139)	(1,139)
Changes in fair value (1):						
Changes in valuation inputs or other assumptions	(2,709)	(3,671)	(6,380)	(6,110)	—	(6,110)
Realization of expected future cash flows and other changes	(351)	(22,562)	(22,913)	(3,276)	(23,789)	(27,065)
Ending balance	\$12,011	\$ 720,163	\$732,174	\$84,515	\$ 813,282	\$897,797

(1) Changes in fair value are recognized in Servicing and origination expense in the Unaudited Consolidated Statements of Operations.

Because the mortgages underlying these MSRs permit the borrowers to prepay the loans, the value of the MSRs generally tends to diminish in periods of declining interest rates, an improving housing market or expanded product availability (as prepayments increase) and increase in periods of rising interest rates, a deteriorating housing market or reduced product availability (as prepayments decrease). The following table summarizes the estimated change in the value of the MSRs that we carry at fair value as of March 31, 2016 given hypothetical shifts in lifetime prepayments and yield assumptions:

	Adverse change in fair value	
	10%	20%
Weighted average prepayment speeds	\$(77,665)	\$(150,075)
Discount rate (option-adjusted spread)	\$(17,894)	\$(34,728)

The sensitivity analysis measures the potential impact on fair values based on hypothetical changes, which in the case of our portfolio at March 31, 2016 are increased prepayment speeds and a decrease in the yield assumption.

Portfolio of Assets Serviced

The following table presents the composition of our primary servicing and subservicing portfolios by type of property serviced as measured by UPB. The servicing portfolio represents loans for which we own the servicing rights while subservicing represents all other loans. The UPB of assets serviced for others are not included on our Unaudited Consolidated Balance Sheets.

	Residential	Commercial	Total
UPB at March 31, 2016			
Servicing	\$223,731,371	\$ —	\$223,731,371
Subservicing	13,349,665	136,473	13,486,138
	\$237,081,036	\$ 136,473	\$237,217,509
UPB at December 31, 2015			
Servicing	\$230,132,729	\$ —	\$230,132,729
Subservicing	20,833,383	105,268	20,938,651
	\$250,966,112	\$ 105,268	\$251,071,380
UPB at March 31, 2015			
Servicing	\$337,125,187	\$ —	\$337,125,187
Subservicing	45,088,815	161,887	45,250,702
	\$382,214,002	\$ 161,887	\$382,375,889

UPB serviced at March 31, 2016, December 31, 2015 and March 31, 2015 includes \$132.7 billion, \$137.1 billion and \$156.3 billion, respectively, for which the Rights to MSRs have been sold to NRZ.

Residential assets serviced includes foreclosed real estate. Residential assets serviced also includes small-balance commercial assets with a UPB of \$1.7 billion, \$1.8 billion and \$2.1 billion at March 31, 2016, December 31, 2015 and March 31, 2015, respectively. Commercial assets consist of large-balance foreclosed real estate.

A significant portion of the servicing agreements for our non-Agency servicing portfolio contain provisions where we could be terminated as servicer without compensation upon the failure of the serviced loans to meet certain portfolio delinquency or cumulative loss thresholds. As a result of the economic downturn of recent years, the portfolio delinquency and/or cumulative loss threshold provisions have been breached by many private-label securitizations in our non-Agency servicing portfolio. To date, terminations as servicer as a result of a breach of any of these provisions have been minimal.

Certain of our servicing agreements require that we maintain specified servicer ratings from rating agencies such as Moody's Investors Service, Inc. (Moody's) and S&P. Out of approximately 3,908 non-Agency servicing agreements, approximately 735 with approximately \$38.1 billion of UPB as of March 31, 2016 have minimum servicer ratings criteria. As a result of downgrades in our servicer ratings, termination rights have been triggered in 651 of these non-Agency servicing agreements. This represents approximately \$32.4 billion in UPB as of March 31, 2016, or approximately 18% of our total non-Agency servicing portfolio. Under 272 of the 651 triggered agreements, trustees and master servicers have sent notices to investors indicating that they did not currently intend to take action relating to the termination rights. In addition, in connection with 69 of the triggered agreements, the trustee or master servicer sent solicitation notices to investors asking whether or not the investor wanted to direct the trustee or master servicer to terminate Ocwen as servicer. The trustee or master servicer has announced results for 47 of the solicitations: 43 resulted in no direction to terminate and four resulted in the termination of Ocwen as servicer in early 2015 due to rating downgrades. The 272 notices regarding no action at this time and the 43 solicitations resulting in no direction to terminate Ocwen as servicer represent approximately \$19.3 billion in UPB as of March 31, 2016, or approximately 59.6% of the UPB of the non-Agency servicing agreements with triggered termination rights. As noted above, in early 2015, we received notices terminating us as the servicer under four of our non-Agency servicing agreements due to rating downgrades. Pursuant to our servicing agreements, generally we are entitled to payment of accrued and unpaid servicing fees through termination as well as all advances and certain other previously unreimbursed amounts, although we lose the future servicing fee revenue. While the financial impact of the termination of servicing under these four servicing agreements was immaterial to our overall financial condition, as it represented only 0.17% of our overall servicing portfolio as of the time of transfer of servicing, we could be subject to further terminations either as a result of recent servicer ratings downgrades or future adverse actions by ratings agencies, which could have an adverse

effect on our business, financing activities, financial condition and results of operations.

Downgrades in servicer ratings could adversely affect our ability to finance servicing advances and maintain our status as an approved servicer by Fannie Mae and Freddie Mac. The servicer rating requirements of Fannie Mae do not necessarily require or imply immediate action, as Fannie Mae has discretion with respect to whether we are in compliance with their

requirements and what actions it deems appropriate under the circumstances in the event that we fall below their desired servicer ratings.

Servicing Revenue

The following table presents the components of servicing and subservicing fees for the three months ended March 31:

	2016	2015
Loan servicing and subservicing fees:		
Servicing	\$238,638	\$332,201
Subservicing	7,239	18,341
	245,877	350,542
Home Affordable Modification Program (HAMP) fees	22,618	35,176
Late charges	18,603	24,122
Loan collection fees	7,129	9,563
Other	3,269	27,138
	\$297,496	\$446,541

Float balances (balances in custodial accounts, which represent collections of principal and interest that we receive from borrowers), are held in escrow by an unaffiliated bank and are excluded from our Unaudited Consolidated Balance Sheets. Float balances amounted to \$2.3 billion and \$4.0 billion at March 31, 2016 and March 31, 2015, respectively.

Note 9 – Receivables

Receivables, net consisted of the following at the dates indicated:

	March 31, 2016	December 31, 2015
Servicing:		
Amount due on sales of mortgage servicing rights and advances	\$39,744	\$94,629
Government-insured loan claims (1)	67,950	71,405
Due from custodial accounts	20,798	13,800
Reimbursable expenses	28,400	29,856
Other servicing receivables	48,195	32,879
	205,087	242,569
Income taxes receivable	50,384	53,519
Other receivables	20,882	29,818
	276,353	325,906
Allowance for losses (1)	(38,770)	(38,925)
	\$237,583	\$286,981

At March 31, 2016 and December 31, 2015, the total allowance for losses related to receivables of our Servicing business. Allowance for losses related to defaulted FHA or VA insured loans repurchased from Ginnie Mae (1) guaranteed securitizations (government-insured loan claims) at March 31, 2016 and December 31, 2015 were \$21.5 million and \$20.6 million, respectively.

Note 10 – Other Assets

Other assets consisted of the following at the dates indicated:

	March 31, December 31,	
	2016	2015
Contingent loan repurchase asset (1)	\$316,002	\$ 346,984
Prepaid expenses (2)	58,992	69,805
Debt service accounts (3)	56,946	87,328
Real estate	18,607	20,489
Derivatives, at fair value	14,115	6,367
Prepaid lender fees and debt issuance costs, net	14,903	19,496
Prepaid income taxes	10,910	11,749
Mortgage backed securities, at fair value	8,386	7,985
Other	21,321	16,292
	\$520,182	\$ 586,495

In connection with the Ginnie Mae early buy-out (EBO) program, our agreements provide either that: (a) we have the right, but not the obligation, to repurchase previously transferred mortgage loans under certain conditions, including the mortgage loans becoming eligible for pooling under a program sponsored by Ginnie Mae; or (b) we have the obligation to repurchase previously transferred mortgage loans that have been subject to a successful trial modification before any permanent modification is made. Once these conditions are met, we have effectively regained control over the mortgage loan(s), and under GAAP, must re-recognize the loans on our consolidated balance sheets and establish a corresponding repurchase liability. With respect to those loans that we have the right, but not the obligation, to repurchase under the applicable agreement, this requirement applies regardless of whether we have any intention to repurchase the loan. We re-recognized mortgage loans in Other assets and a corresponding liability in Other liabilities.

In connection with the sale of Agency MSR in 2015, we placed \$52.9 million in escrow for the payment of representation, warranty and indemnification claims associated with the underlying loans. Prepaid expenses at March 31, 2016 and December 31, 2015 includes the remaining balance of \$39.3 million and \$41.3 million, respectively.

Under our advance funding financing facilities, we are contractually required to remit collections on pledged advances to the trustee within two days of receipt. The collected funds are not applied to reduce the related match funded debt until the payment dates specified in the indenture. The balances also include amounts that have been set aside from the proceeds of our match funded advance facilities to provide for possible shortfalls in the funds available to pay certain expenses and interest, as well as amounts set aside as required by our warehouse facilities as security for our obligations under the related agreements. The funds are held in interest earning accounts and those amounts related to match funded facilities are held in the name of the SPE created in connection with the facility.

The amortization date of our facilities is the date on which the revolving period ends under each advance facility note and repayment of the outstanding balance must begin if the note is not renewed or extended. The maturity date is the date on which all outstanding balances must be repaid. In all of our advance facilities, there are multiple notes outstanding. For each note, after the amortization date, all collections that represent the repayment of advances pledged to the facility must be applied to reduce the balance of the note outstanding, and any new advances are ineligible to be financed.

Borrowing capacity is available to us provided that we have additional eligible collateral to pledge. Collateral may (2)only be pledged to one facility. At March 31, 2016, none of the available borrowing capacity could be used based on the amount of eligible collateral that had been pledged.

(3) 1-Month LIBOR was 0.44% and 0.43% at March 31, 2016 and December 31, 2015, respectively.

(4) There is a ceiling of 75 bps for 1 ML in determining the interest rate for these variable rate notes.

Under the terms of the agreement, we must continue to borrow the full amount of the Series 2015-T1, T2 and T3 (5) Notes until the amortization date. If there is insufficient collateral to support the level of borrowing, the excess cash proceeds are not distributed to Ocwen but are held by the trustee, and interest expense continues to be based on the full amount of the term notes.

(6) On March 31, 2016, the maximum borrowing under the OSART III facility was increased to \$90.0 million.

(7) On March 31, 2016, the combined borrowing capacity of the Series 2015-VF1 Notes was increased to \$160.0 million.

Pursuant to our agreements with NRZ, NRZ has assumed the obligation to fund new servicing advances with respect to the Rights to MSRs. We are dependent upon NRZ for financing of the servicing advance obligations for Rights to MSRs where we are the servicer. NRZ currently uses advance financing facilities in order to fund a substantial portion of the servicing advances that they are contractually obligated to make pursuant to our agreements with them. As of March 31, 2016, we were the servicer on Rights to MSRs sold to NRZ pertaining to approximately \$132.7 billion in UPB and the associated outstanding servicing advances as of such date were approximately \$4.9 billion. Should NRZ's advance financing facilities fail to perform as envisaged or should NRZ otherwise be unable to meet its advance financing obligations, our liquidity, financial condition and business could be materially and adversely affected. As the servicer, we are contractually required under our servicing agreements to make the relevant servicing advances even if NRZ does not perform its contractual obligations to fund those advances.

In addition, although we are not an obligor or guarantor under NRZ's advance financing facilities, we are a party to certain of the facility documents as the servicer of the underlying loans on which advances are being financed. As the servicer, we make certain representations, warranties and covenants, including representations and warranties in connection with our sale of advances to NRZ.

Financing Liabilities

Financing liabilities are comprised of the following at the dates indicated:

Borrowings	Collateral	Interest Rate	Maturity	March 31, 2016	December 31, 2015
Servicing:					
Financing liability – MSRs pledged	MSRs	(1)	(1)	\$523,503	\$541,704
Secured Notes, Ocwen Asset Servicing Income Series, Series 2014-1 (2)	MSRs	(2)	Feb. 2028	93,217	96,546
Financing liability – Advances pledged (3)	Advances on loans	(3)	(3)	54,826	59,643
				671,546	697,893

Lending:

HMBS-related borrowings (4)	Loans held for investment	1ML + 248 bps	(4)	2,648,100	2,391,362
-----------------------------	---------------------------	---------------	-----	-----------	-----------

\$3,319,646 \$3,089,255

This financing liability arose in connection with the NRZ/HLSS Transactions and has no contractual maturity or (1) repayment schedule. The balance of the liability is adjusted each reporting period to its fair value based on the present value of the estimated future cash flows underlying the related MSRs.

(2) OASIS noteholders are entitled to receive a monthly payment amount equal to the sum of: (a) the designated servicing fee amount (21 basis points of the UPB of the reference pool of Freddie Mac mortgages); (b) any termination payment amounts; (c) any excess refinance amounts; and (d) the note redemption amounts, each as

defined in the indenture supplement for the notes. The notes have a final stated maturity of February 2028. We accounted for this transaction as a financing. Monthly amortization of the liability is estimated using the proportion of monthly projected service fees on the underlying MSRs as a percentage of lifetime projected fees, adjusted for the term of the security.

- (3) Certain sales of advances in 2014 did not qualify for sales accounting treatment and were accounted for as a financing.

(4) Represents amounts due to the holders of beneficial interests in Ginnie Mae guaranteed HMBS. The beneficial interests have no maturity dates, and the borrowings mature as the related loans are repaid.

Other Secured Borrowings

Other secured borrowings are comprised of the following at the dates indicated:

Borrowings	Collateral	Interest Rate	Maturity	Available Borrowing Capacity	March 31, 2016	December 31, 2015
Servicing:						
SSTL (1)	(1)	1-Month Euro-dollar rate + 425 bps with a Eurodollar floor of 125 bps (1)	Feb. 2018	\$ —	\$ 379,895	\$ 398,454

Discount - SSTL				—	(1,146)	(1,351)
				\$ 134,529	\$ 718,830	\$ 762,411

Weighted average interest rate 4.46 % 4.38 %

The borrowings are secured by a first priority security interest in substantially all of the assets of Ocwen.

Borrowings bear interest, at the election of Ocwen, at a rate per annum equal to either (a) the base rate (the greatest of (i) the prime rate in effect on such day, (ii) the federal funds rate in effect on such day plus 0.50% and (iii) the one-month Eurodollar rate (1-Month LIBOR)), plus a margin of 3.25% and subject to a base rate floor of 2.25% or (b) the one month Eurodollar rate, plus a margin of 4.25% and subject to a one month Eurodollar floor of 1.25%.

To date we have elected option (b) to determine the interest rate.

We entered into Amendment No. 5 to Senior Secured Term Loan Facility Agreement (the Amendment) effective as of March 28, 2016. The Amendment, among other things:

• permanently removes the consolidated total debt to consolidated tangible net worth ratio, corporate leverage ratio and interest coverage ratio financial covenants;

• maintains the loan-to-value ratio covenant at its current 40% level throughout the remaining term of the SSTL;

• limits the repurchase of Ocwen's common stock or options to an amount not to exceed the sum of (i) \$20 million plus (ii) an amount equal to (x) \$20 million times (y) the aggregate amount of prepayments on the

SSTL made after March 28, 2016 divided by \$50 million;

limits the repurchase of Ocwen's 6.625% Senior Notes (the Senior Unsecured Notes) due 2019 to an amount not to exceed the sum of (i) \$30 million plus (ii) an amount equal to (x) \$30 million times (y) the aggregate amount of prepayments on the SSTL made after March 28, 2016 divided by \$50 million; requires that we make a prepayment on the SSTL in an amount equal to \$6.3 million (for a total of \$19.0 million) on each of May 31, 2016, July 29, 2016 and September 30, 2016; and provides for a fee payable to the consenting lenders equal to 1.0% of the aggregate amount of such consenting lenders' SSTL loans outstanding.

The maximum borrowing under this facility is limited to the lesser of \$100.0 million or \$550.0 million less the (2) lender's current lending to Ocwen under advance funding facilities. Fifty percent of the maximum borrowing is available on a committed basis and fifty percent is available at the discretion of the lender.

(3) Under this repurchase agreement, the lender provides financing on a committed basis for \$200.0 million.

Under this participation agreement, the lender provides financing for \$100.0 million at the discretion of the lender.

The participation agreement allows the lender to acquire a 100% beneficial interest in the underlying mortgage loans. The transaction does not qualify for sale accounting treatment and is accounted for as a secured borrowing.

(4) The lender earns the stated interest rate of the underlying mortgage loans while the loans are financed under the participation agreement. On April 11, 2016, we negotiated an extension of this agreement to May 15, 2016 and reduced the maximum borrowing to \$75.0 million.

Under this participation agreement, the lender provides financing for \$150.0 million at the discretion of the lender.

The participation agreement allows the lender to acquire a 100% beneficial interest in the underlying mortgage loans. The transaction does not qualify for sale accounting treatment and is accounted for as a secured borrowing.

(5) The lender earns the stated interest rate of the underlying mortgage loans while the loans are financed under the participation agreement. On April 11, 2016, we negotiated an extension of this agreement to May 15, 2016 and increased the maximum borrowing to \$175.0 million.

(6) Borrowing capacity of \$100.0 million under this facility is available at the discretion of the lender.

(7) We entered into this agreement on January 5, 2016. The lender provides financing on a committed basis for \$100.0 million.

Senior Unsecured Notes

On May 12, 2014, Ocwen completed the issuance and sale of \$350.0 million of its Senior Unsecured Notes in a private offering. The Senior Unsecured Notes are general senior unsecured obligations of Ocwen and will mature on May 15, 2019. Interest is payable semi-annually on May 15th and November 15th. The Senior Unsecured Notes are not guaranteed by any of Ocwen's subsidiaries.

In connection with our issuance of the Senior Unsecured Notes, we incurred certain costs that we capitalized and are amortizing over the period from the date of issuance to May 15, 2019. The balances of Senior Unsecured Notes as reported on our Unaudited Consolidated Balance Sheets are net of unamortized debt issuance costs of \$4.2 million and \$4.5 million at March 31, 2016 and December 31, 2015, respectively.

Covenants

Under the terms of our debt agreements, we are subject to various qualitative and quantitative covenants. Collectively, these covenants include:

Financial covenants;

• Covenants to operate in material compliance with applicable laws;

• Restrictions on our ability to engage in various activities, including but not limited to incurring additional debt, paying dividends, repurchasing or redeeming capital stock, transferring assets or making loans, investments or acquisitions;

• Monitoring and reporting of various specified transactions or events, including specific reporting on defined events affecting collateral underlying certain debt agreements; and

• Requirements to provide audited financial statements within specified timeframes, including a requirement under our SSTL that Ocwen's financial statements and the related audit report be unqualified as to going concern.

Financial covenants in our debt agreements require that we maintain, among other things:

• a specified loan to collateral value ratio, as defined under our SSTL; and

• specified levels of tangible net worth and liquidity at the consolidated and OLS levels.

As a result of the Amendment of our SSTL in March 2016, the interest coverage ratio, corporate leverage ratio and consolidated total debt to consolidated tangible net worth financial covenants have been removed.

As of March 31, 2016, the most restrictive consolidated tangible net worth requirements were for a minimum of \$1.1 billion at OLS under our match funded debt agreements and a repurchase agreement (Servicing) and \$600.0 million at Ocwen under a master repurchase agreement (Lending).

As a result of the covenants to which we are subject, we may be limited in the manner in which we conduct our business and may be limited in our ability to engage in favorable business activities or raise additional capital to finance future operations or satisfy future liquidity needs. In addition, breaches or events that may result in a default under our debt agreements include, among other things, noncompliance with our covenants, nonpayment of principal or interest, material misrepresentations, the occurrence of a material adverse change, insolvency, bankruptcy, certain material judgments and changes of control. Covenants and default provisions of this type are commonly found in debt agreements such as ours. Certain of these covenants and default provisions are open to subjective interpretation and, if our interpretation were contested by a lender, a court may ultimately be required to determine compliance or lack thereof. In addition, our debt agreements generally include cross default provisions such that a default under one agreement could trigger defaults under other agreements. If we fail to comply with our debt agreements and are unable to avoid, remedy or secure a waiver of any resulting default, we may be subject to adverse action by our lenders, including termination of further funding, acceleration of outstanding obligations, enforcement of liens against the assets securing or otherwise supporting our obligations and other legal remedies. Our lenders can waive their contractual rights in the event of a default.

We believe that we are in compliance with all of the qualitative and quantitative covenants in our debt agreements as of the date of these financial statements.

Note 12 – Other Liabilities

Other liabilities were comprised of the following at the dates indicated:

	March 31, December 31,	
	2016	2015
Contingent loan repurchase liability (1)	\$ 316,002	\$ 346,984
Accrued expenses	178,046	188,856
Liability for uncertain tax positions	48,328	44,751
Liability for indemnification obligations	32,329	36,615
Payable to loan servicing and subservicing investors	26,290	15,941
Checks held for escheat	15,131	14,301
Accrued interest payable	9,496	3,667
Derivatives, at fair value	5,291	—
Other	116,310	93,329
	\$ 747,223	\$ 744,444

(1) In connection with the Ginnie Mae EBO Transactions, we have re-recognized certain loans on our consolidated balance sheets and establish a corresponding repurchase liability regardless of our intention to repurchase the loan.

Note 13 – Derivative Financial Instruments and Hedging Activities

Because many of our current derivative agreements are not exchange-traded, we are exposed to credit loss in the event of nonperformance by the counterparty to the agreements. We manage counterparty credit risk by entering into financial instrument transactions through national exchanges, primary dealers or approved counterparties and the use of mutual margining agreements whenever possible to limit potential exposure. We regularly evaluate the financial position and creditworthiness of our counterparties. The notional amount of our contracts does not represent our exposure to credit loss.

The following table summarizes the changes in the notional balances of our holdings of derivatives during the three months ended March 31, 2016:

	IRLCs	Forward MBS Trades	Interest Rate Caps
Beginning notional balance	\$278,317	\$632,720	\$2,110,000
Additions	1,460,093	1,100,531	25,000
Amortization	—	—	(400,000)
Maturities	(1,017,006)	(392,398)	—
Terminations	(241,099)	(514,460)	(50,000)
Ending notional balance	\$480,305	\$826,393	\$1,685,000

Fair value of derivative assets (liabilities) at:

March 31, 2016	\$13,545	\$(5,291)	\$570
December 31, 2015	\$6,080	\$295	\$2,042

	Apr. 2016		Nov. 2016 -
Maturity	- Jun. 2016	June 2016	Dec. 2017

As loans are originated and sold or as loan commitments expire, our forward MBS trade positions mature and are replaced by new positions based upon new loan originations and commitments and expected time to sell.

Foreign Currency Exchange Rate Risk Management

Our operations in India and the Philippines expose us to foreign currency exchange rate risk, but we currently consider this risk to be insignificant.

Interest Rate Management

Match Funded Liabilities

As required by certain of our advance financing arrangements, we have purchased interest rate caps to minimize future interest rate exposure from increases in the interest on our variable rate debt as a result of increases in the index, such as 1ML, that is used in determining the interest rate on the debt. We currently do not hedge our fixed rate debt.

Loans Held for Sale, at Fair Value

The mortgage loans held for sale that we carry at fair value are subject to interest rate and price risk from the loan funding date until the date the loan is sold into the secondary market. Generally, the fair value of a loan will decline in value when interest rates increase and will rise in value when interest rates decrease. To mitigate this risk, we enter into forward MBS trades to provide an economic hedge against those changes in fair value on mortgage loans held for sale. Forward MBS trades are primarily used to fix the forward sales price that will be realized upon the sale of mortgage loans into the secondary market.

Interest Rate Lock Commitments

A loan commitment binds us (subject to the loan approval process) to fund the loan at the specified rate, regardless of whether interest rates have changed between the commitment date and the loan funding date. As such, outstanding IRLCs are subject to interest rate risk and related price risk during the period from the date of the commitment through the loan funding date or expiration date. The borrower is not obligated to obtain the loan, thus we are subject to fallout risk related to IRLCs, which is realized if approved borrowers choose not to close on the loans within the terms of the IRLCs. Our interest rate exposure on these derivative loan commitments is hedged with freestanding derivatives such as forward contracts. We enter into forward contracts with respect to both fixed and variable rate loan commitments.

The following summarizes our open derivative positions at March 31, 2016 and the gains (losses) on all derivatives used in each of the identified hedging programs for the period then ended. None of the derivatives was designated as a hedge for accounting purposes at March 31, 2016:

Purpose	Expiration Date	Notional Amount	Fair Value (1)	Gains / (Losses)	Consolidated Statements of Operations Caption
Interest rate risk of borrowings					
Interest rate caps (2)	Nov. 2016 - Dec. 2017	\$ 1,685,000	\$570	\$(1,391)	Other, net
Interest rate risk of mortgage loans held for sale and of IRLCs					
Forward MBS trades	June 2016	826,393	(5,291)	(13,202)	Gain on loans held for sale, net
IRLCs	Apr. 2016 - Jun. 2016	480,305	13,545	7,465	Gain on loans held for sale, net
Total derivatives			\$8,824	\$(7,128)	

(1) Derivatives are reported at fair value in Other assets or in Other liabilities on our Unaudited Consolidated Balance Sheets.

(2) To hedge the effect of changes in 1ML on advance funding facilities.

Included in Accumulated other comprehensive loss (AOCL) at March 31, 2016 and 2015, respectively, were \$1.6 million and \$8.3 million of deferred unrealized losses, before taxes of \$0.1 million and \$0.5 million, respectively, on interest rate swaps that we designated as cash flow hedges. Changes in AOCL during the three months ended March 31 were as follows:

	2016	2015
Beginning balance	\$1,763	\$8,413
Losses on terminated hedging relationships amortized to earnings	(105)	(443)
Decrease in deferred taxes on accumulated losses on cash flow hedges	—	25
Decrease in accumulated losses on cash flow hedges, net of taxes	(105)	(418)
Ending balance	\$1,658	\$7,995

As of March 31, 2016, amortization of accumulated losses on cash flow hedges from AOCL to Other income (expense), net is projected to be \$0.3 million during the next twelve months. To the extent we sell the MSRs to which the accumulated losses on cash flow hedges applied, a proportionate amount of the remaining unamortized accumulated losses associated with the MSRs sold is recognized in earnings at that time.

Other income (expense), net, includes the following related to derivative financial instruments for the three months ended March 31:

	2016	2015
Losses on economic hedges	\$(1,391)	\$(710)
Write-off of losses in AOCL for a discontinued hedge relationship	(105)	(443)
	\$(1,496)	\$(1,153)

Note 14 – Interest Expense

The following table presents the components of interest expense for the three months ended March 31:

	2016	2015
Financing liabilities (1) (2)	\$67,707	\$73,824
Match funded liabilities	18,174	14,280
Other secured borrowings	12,713	22,916
6.625% Senior unsecured notes	6,208	6,129
Other	1,287	2,247
	\$106,089	\$119,396

(1) Includes interest expense related to financing liabilities recorded in connection with the NRZ/HLSS Transactions as indicated in the table below.

	2016	2015
Servicing fees collected on behalf of NRZ/HLSS	\$162,129	\$180,297
Less: Subservicing fee retained by Ocwen	84,370	91,214
Net servicing fees remitted to NRZ/HLSS	77,759	89,083
Less: Reduction in financing liability	18,201	17,723
Interest expense on NRZ/HLSS financing liability	\$59,558	\$71,360

The reduction in the financing liability does not include reimbursements to NRZ/HLSS for the loss of servicing revenues when we were terminated as servicer and where the related Rights to MSRs had been sold to HLSS.

Includes \$6.2 million of fees incurred during the three months ended March 31, 2016 in connection with our (2) agreement to compensate NRZ/HLSS for certain increased costs associated with its servicing advance financing facilities that are the direct result of a downgrade of our S&P servicer rating.

Interest expense that we expect to be paid on the HMBS-related borrowings is included with net fair value gains in Other revenues.

Note 15 – Basic and Diluted Earnings per Share

Basic earnings per share excludes common stock equivalents and is calculated by dividing net income attributable to Ocwen common stockholders by the weighted average number of common shares outstanding during the year. We calculate diluted earnings per share by dividing net income attributable to Ocwen by the weighted average number of common shares outstanding, including the potential dilutive common shares related to outstanding stock options and restricted stock awards. The following is a reconciliation of the calculation of basic earnings per share to diluted earnings per share for the three months ended March 31:

	2016	2015
Basic earnings per share:		
Net income (loss) attributable to Ocwen common stockholders	\$(111,331)	\$ 34,355
Weighted average shares of common stock	124,093,339	125,272,228
Basic earnings (loss) per share	\$(0.90)	\$ 0.27
Diluted earnings (loss) per share (1):		
Net income (loss) attributable to Ocwen common stockholders	\$(111,331)	\$ 34,355
Weighted average shares of common stock	124,093,339	125,272,228
Effect of dilutive elements (1):		
Stock options	—	1,725,280
Common stock awards	—	2,154
Dilutive weighted average shares of common stock	124,093,339	126,999,662
Diluted earnings (loss) per share	\$(0.90)	\$ 0.27
Stock options and common stock awards excluded from the computation of diluted earnings per share:		
Anti-dilutive (2)	6,985,914	2,010,902
Market-based (3)	2,080,938	851,263

For the three months ended March 31, 2016, we have excluded the effect of stock options and common stock (1) awards from the computation of diluted earnings per share because of the anti-dilutive effect of our reported net loss.

(2) These stock options were anti-dilutive because their exercise price was greater than the average market price of our stock.

(3) Shares that are issuable upon the achievement of certain performance criteria related to Ocwen's stock price.

Note 16 – Business Segment Reporting

Our business segments reflect the internal reporting that we use to evaluate operating performance of services and to assess the allocation of our resources. A brief description of our current business segments is as follows:

Servicing. This segment is primarily comprised of our core residential servicing business. We provide residential and commercial mortgage loan servicing, special servicing and asset management services. We earn fees for providing these services to owners of the mortgage loans and foreclosed real estate. In most cases, we provide these services either because we purchased the MSR from the owner of the mortgage, retained the MSR on the sale of residential mortgage loans or because we entered into a subservicing or special servicing agreement with the entity that owns the MSR. Our residential servicing portfolio includes conventional, government-insured and non-Agency loans.

Non-Agency loans include subprime loans, which represent residential loans that generally did not qualify under GSE guidelines or have subsequently become delinquent.

Lending. The Lending segment is focused on originating and purchasing conventional and government-insured residential forward and reverse mortgage loans mainly through our correspondent lending arrangements, broker relationships and directly with mortgage customers. The loans are typically sold shortly after origination into a liquid market on a servicing retained basis.

Corporate Items and Other. Corporate Items and Other includes revenues and expenses that are not directly related to other reportable segments, business activities that are individually insignificant, interest income on short-term investments of cash, interest expense on corporate debt and certain corporate expenses. New business activities that are currently insignificant include providing secured floor plan lending to used car dealerships and providing financing to investors to purchase single-family homes and apartments for lease. Business activities not currently considered to be of continuing significance include residential subprime non-Agency loans held for sale (at lower of cost or fair value), investments in residential mortgage-backed securities and affordable housing investment activities. We allocate interest income and expense to each business segment for funds raised or for funding of investments made, including interest earned on cash balances and short-term investments and interest incurred on corporate debt. We also allocate expenses generated by corporate support services to each business segment.

Financial information for our segments is as follows:

	Servicing	Lending	Corporate Items and Other	Corporate Eliminations	Business Segments Consolidated
Results of Operations					
Three months ended March 31, 2016					
Revenue (1)	\$307,427	\$23,285	\$45	\$ —	\$ 330,757
Expenses (1) (2)	276,896	21,799	29,962	—	328,657
Other income (expense):					
Interest income	(147)	3,611	726	—	4,190
Interest expense	(96,474)	(3,448)	(6,167)	—	(106,089)
Gain on sale of mortgage servicing rights, net	1,175	—	—	—	1,175
Other (1)	(3,343)	351	(509)	—	(3,501)
Other income (expense), net	(98,789)	514	(5,950)	—	(104,225)
Income (loss) before income taxes	\$(68,258)	\$2,000	\$(35,867)	\$ —	\$ (102,125)
Three months ended March 31, 2015					
Revenue (1)	\$471,125	\$37,746	\$1,608	\$ (35)	\$ 510,444
Expenses (1) (2)	337,911	23,785	16,697	(35)	378,358
Other income (expense):					
Interest income	1,371	3,596	608	—	5,575
Interest expense	(110,629)	(2,639)	(6,128)	—	(119,396)
Gain on sale of mortgage servicing rights, net	26,406	—	—	—	26,406
Other (1)	(3,640)	1,065	733	—	(1,842)
Other income (expense), net	(86,492)	2,022	(4,787)	—	(89,257)
Income (loss) before income taxes	\$46,722	\$15,983	\$(19,876)	\$ —	\$ 42,829

	Servicing	Lending	Corporate Items and Other	Corporate Eliminations	Business Segments Consolidated
Total Assets					
March 31, 2016	\$3,807,685	\$3,116,531	\$482,894	\$	—\$ 7,407,110
December 31, 2015	\$4,089,064	\$2,811,154	\$480,090	\$	—\$ 7,380,308
March 31, 2015	\$5,706,301	\$2,165,742	\$481,919	\$	—\$ 8,353,962

(1) Intersegment billings for services rendered to other segments are recorded as revenues, as contra-expense or as other income, depending on the type of service that is rendered.

(2) Depreciation and amortization expense are as follows:

	Servicing	Lending	Corporate Items and Other	Business Segments Consolidated
For the three months ended March 31, 2016				
Depreciation expense	\$ 1,135	\$ 72	\$ 3,832	\$ 5,039
Amortization of mortgage servicing rights	12,725	81	—	12,806
Amortization of debt discount	206	—	—	206
Amortization of debt issuance costs	2,933	—	344	3,277

For the three months ended March 31, 2015

Depreciation expense	\$ 529	\$ 104	\$ 3,711	\$ 4,344
Amortization of mortgage servicing rights	38,405	89	—	38,494
Amortization of debt discount	356	—	—	356
Amortization of debt issuance costs	3,423	—	332	3,755

Note 17 – Regulatory Requirements

Our business is subject to extensive regulation by federal, state and local governmental authorities, including the Consumer Financial Protection Bureau (CFPB), the Department of Housing and Urban Development (HUD), the SEC and various state agencies that license, audit and conduct examinations of our loan servicing, origination and collection activities. In addition, we operate under a number of regulatory settlements that subject us to ongoing monitoring or reporting. From time to time, we also receive requests from federal, state and local agencies for records, documents and information relating to the policies, procedures and practices of our loan servicing, origination and collection activities. The GSEs and their conservator, the Federal Housing Finance Authority (FHFA), Ginnie Mae, the United States Treasury Department, various investors, non-Agency securitization trustees and others also subject us to periodic reviews and audits.

In the current regulatory environment, we have faced and expect to continue to face increased regulatory and public scrutiny as an organization as well as stricter and more comprehensive regulation of the entire mortgage sector. We continue to work diligently to assess and understand the implications of the regulatory environment in which we operate and to meet the requirements of the changing environment in which we operate. We devote substantial resources to regulatory compliance, while, at the same time, striving to meet the needs and expectations of our customers, clients and other stakeholders. Our failure to comply with applicable federal, state and local laws, regulations and licensing requirements could lead to any of the following (i) loss of our licenses and approvals to engage in our servicing and lending businesses, (ii) governmental investigations and enforcement actions, (iii) administrative fines and penalties and litigation, (iv) civil and criminal liability, including class action lawsuits and actions to recover incentive and other payments made by governmental entities, (v) breaches of covenants and representations under our servicing, debt or other agreements, (vi) damage to our reputation, (vii) inability to raise capital or (viii) inability to execute on our business strategy.

We must comply with a large number of federal, state and local consumer protection laws including, among others, the Gramm-Leach-Bliley Act, the Fair Debt Collection Practices Act, the Real Estate Settlement Procedures Act (RESPA), the Truth in Lending Act (TILA), the Fair Credit Reporting Act, the Servicemembers Civil Relief Act, the Homeowners Protection Act, the Federal Trade Commission Act, the Telephone Consumer Protection Act, the Equal Credit Opportunity Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act and state foreclosure laws. These statutes apply to many facets of our

business, including loan origination, default servicing and collections, use of credit reports, safeguarding of non-public personally identifiable information about our customers, foreclosure and claims handling, investment of and interest payments on escrow balances and escrow payment features, and mandate certain disclosures and notices to borrowers. These requirements can and do change as statutes and regulations are enacted, promulgated, amended, interpreted and enforced. The recent trend among federal, state and local lawmakers and regulators has been toward increasing laws, regulations and investigative proceedings with regard to residential real estate lenders and servicers. The CFPB directly affects the regulation of residential mortgage servicing in a number of ways. First, the CFPB has rule making authority with respect to many of the federal consumer protection laws applicable to mortgage servicers, including TILA and RESPA, as reflected in the new rules for servicing and origination that went into effect in 2014. Second, the CFPB has supervision, examination and enforcement authority over consumer financial products and services offered by certain non-depository institutions and large insured depository institutions. The CFPB's jurisdiction includes those persons originating, brokering or servicing residential mortgage loans and those persons performing loan modification or foreclosure relief services in connection with such loans. Accordingly, we are subject to supervision, examination and enforcement by the CFPB. Ocwen is currently in receipt of several Civil Investigative Demands or investigative subpoenas from the CFPB seeking information about our servicing practices. If the CFPB were to bring an enforcement action against us, the resolutions of such action could have a material adverse impact on our business, reputation, financial condition and results of operations.

We expect to continue to invest significantly in our operational platform and risk and compliance management systems in order to comply with these laws and regulations. Furthermore, there may be additional federal or state laws enacted that place additional obligations on servicers and originators of residential mortgage loans.

Our OLS, Homeward and Liberty subsidiaries are licensed to originate and/or service forward and reverse mortgage loans in the jurisdictions in which they operate. Our licensed entities are required to renew their licenses, typically on an annual basis, and to do so they must satisfy the license renewal requirements of each jurisdiction, which in some cases include the requirement to provide audited financial statements as well as other financial and non-financial requirements. Our licensed entities are also subject to minimum net worth requirements in connection with these licenses. These minimum net worth requirements are unique to each state and type of license. Failure to meet these minimum net worth requirements or to satisfy any of the other requirements to which our licensed subsidiaries are subject could result in a variety of regulatory actions ranging from a fine, a directive requiring a certain step to be taken, a suspension or ultimately a revocation of a license, any of which could have an adverse impact on our results of operations and financial condition. The most restrictive of these net worth requirements is based on the outstanding UPB of the owned and subserviced portfolio of OLS and was \$513.1 million at March 31, 2016. We believe our licensed subsidiaries are currently in compliance with all of their capital requirements.

OLS, Homeward and Liberty are also parties to seller/servicer agreements and/or subject to guidelines and regulations (collectively, seller/servicer obligations) with one or more of the GSEs, HUD, FHA, VA and Ginnie Mae. These seller/servicer obligations include financial covenants that include capital requirements related to tangible net worth, as defined by the applicable agency, an obligation to provide audited consolidated financial statements within 90 days of the applicable entity's fiscal year end as well as extensive requirements regarding servicing, selling and other matters. To the extent that these requirements are not met or waived, the applicable agency may, at its option, utilize a variety of remedies including requirements to deposit funds as security for our obligations, sanctions, suspension or even termination of approved seller/servicer status, which would prohibit future originations or securitizations of forward or reverse mortgage loans or servicing for the applicable agency. To date, none of these counterparties has communicated any material sanction, suspension or prohibition in connection with our seller/servicer obligations. We believe we were in compliance with the related net worth requirements at March 31, 2016. Our non-Agency servicing agreements also contain requirements regarding servicing practices and other matters, and a failure to comply with these requirements could have an adverse impact on our business.

Transfers of mortgage servicing are subject to regulation under federal consumer finance laws, including CFPB rules implementing RESPA that require servicers to, among other things, maintain policies and procedures that are reasonably designed to facilitate the transfer of accurate information and documents during mortgage servicing transfers and properly evaluate loss mitigation applications that are in process at the time of transfer. The CFPB has

advised mortgage servicers that its examiners will be carefully reviewing servicers' compliance with these and other regulations applicable to servicing transfers, and state mortgage regulators have supervisory power over any licensed institutions involved in a transaction. Accordingly, we will be required to devote time and resources to ensuring compliance and engaging with such regulators in connection with any future transfers of mortgage servicing, including in connection with our announced asset sales.

There are a number of foreign laws and regulations that are applicable to our operations in India and the Philippines, including acts that govern licensing, employment, safety, taxes, insurance and the laws and regulations that govern the creation, continuation and the winding up of companies as well as the relationships between shareholders, our corporate entities, the public and the government in these countries. Non-compliance with the laws and regulations of India or the Philippines could result in (i) restrictions on our operations in these countries, (ii) fines, penalties or sanctions or (iii) reputational damage.

Note 18 — Commitments

Unfunded Lending Commitments

We have originated floating-rate reverse mortgage loans under which the borrowers have additional borrowing capacity of \$986.5 million at March 31, 2016. This additional borrowing capacity is available on a scheduled or unscheduled payment basis. We also had short-term commitments to lend \$471.2 million and \$9.2 million in connection with our forward and reverse mortgage loan interest rate lock commitments, respectively, outstanding at March 31, 2016.

Long Term Contracts

Our business is currently dependent on many of the services and products provided by Altisource Portfolio Solutions, S.A. (Altisource) under long-term agreements, many of which include renewal provisions. Our servicing platform runs on an information technology system that we license from Altisource. If Altisource were to fail to fulfill its contractual obligations to us, including through a failure to provide services at the required level to maintain and support our systems, or if Altisource were to become unable to fulfill such obligations (for example, because it entered bankruptcy), our business and operations would suffer. In addition, if Altisource fails to develop and maintain its technology so as to provide us with a competitive platform, our business could suffer.

Ocwen and OMS are parties to a Services Agreement, a Technology Products Services Agreement, an Intellectual Property Agreement and a Data Center and Disaster Recovery Services Agreement with Altisource. Under the Services Agreements, Altisource provides various business process outsourcing services, such as valuation services and property preservation and inspection services, among other things. Altisource provides certain technology products and support services under the Technology Products Services Agreements and the Data Center and Disaster Recovery Services Agreements. These agreements expire August 31, 2025. Ocwen and Altisource have also entered into a Master Services Agreement pursuant to which Altisource provides certain loan origination services to Homeward and Liberty, and a General Referral Fee agreement pursuant to which Ocwen receives referral fees which are paid out of the commission that would otherwise be paid to Altisource as the selling broker in connection with real estate sales services provided by Altisource. A Data Access and Services Agreement under which we agreed to make available to Altisource certain data from Ocwen's servicing portfolio in exchange for a per asset fee was terminated on March 31, 2015.

Certain services provided by Altisource under these agreements are charged to the borrower and/or mortgage loan investor. Accordingly, such services, while derived from our loan servicing portfolio, are not reported as expenses by Ocwen. These services include residential property valuation, residential property preservation and inspection services, title services and real estate sales. Similar to other vendors, in the event that Altisource's activities do not comply with the applicable servicing criteria, we could be exposed to liability as the servicer and it could negatively impact our relationships with our servicing clients, borrowers or regulators, among others.

We have also entered into Support Services Agreements with Altisource setting forth certain services that Altisource and Ocwen may provide to each other in such areas as human resources, corporate services, Six Sigma, quality assurance, quantitative analytics, treasury, accounting, tax matters and strategic planning. These Support Services Agreements run through October 2017 and September 2018, respectively, with automatic one-year renewals thereafter. During 2014, we began reducing the amount of services provided to us under the Support Services Agreement. Beginning April 1, 2015, the only services that are regularly provided under these Support Services Agreements are corporate services such as vendor procurement for technology and facilities management services. As of January 2016, Altisource no longer provides facility management services to Ocwen. We anticipate that we will cease all corporate services by the end of 2016.

On December 21, 2012, we entered into a 15-year servicing agreement with Altisource Residential, L.P., the operating partnership of Altisource Residential Corporation (Residential), pursuant to which Ocwen will service residential mortgage loans acquired by Residential and provide loan modification, assisted deed-in-lieu, assisted deed-for-lease and other loss mitigation programs.

Note 19 – Contingencies

When we become aware of a matter involving uncertainty for which we may incur a loss, we assess the likelihood of any loss. If a loss contingency is probable and the amount of the loss can be reasonably estimated, we record an

accrual for the loss. In such cases, there may be an exposure to potential loss in excess of the amount accrued. Where a loss is not probable but is reasonably possible or where a loss in excess of the amount accrued is reasonably possible, we disclose an estimate of the amount of the loss or range of possible losses for the claim if a reasonable estimate can be made, unless the amount of such reasonably possible loss is not material to our financial position, results of operations or cash flows. If a reasonable estimate of loss cannot be made, we do not accrue for any loss or disclose any estimate of exposure to potential loss. An assessment regarding the ultimate outcome of any such matter involves judgments about future events, actions and circumstances that are

inherently uncertain. The actual outcome could differ materially. Where we have retained external legal counsel or other professional advisers, such advisers assist us in making such assessments.

Litigation

In the ordinary course of business, we are routinely a defendant in, or a party or potential party to, many threatened and pending legal proceedings, including proceedings brought on behalf of various classes of claimants, those brought derivatively on behalf of Ocwen against certain current or former officers and directors, and those brought under the False Claims Act by private citizens on behalf of the United States of America.

These proceedings are generally based on alleged violations of federal, state and local laws and regulations governing our mortgage servicing and lending activities, including wrongful foreclosure and eviction actions, allegations of wrongdoing in connection with lender-placed insurance arrangements, claims relating to our pre-foreclosure property preservation activities, claims relating to our written and telephonic communications with our borrowers, claims related to our payment and other processing operations, and claims regarding certifications of our legal compliance related to our participation in certain government programs. In some of these proceedings, claims for substantial monetary damages are asserted against us. To address the claims in the small number of proceedings brought derivatively by purported shareholders, the independent directors of the Board have established a Special Litigation Committee to investigate the shareholders' allegations.

In view of the inherent difficulty of predicting the outcome of any threatened or pending legal proceedings, particularly where the claimants seek very large or indeterminate damages or where the matters present novel legal theories or involve a large number of parties, we generally cannot predict what the eventual outcome of such proceedings will be, what the timing of the ultimate resolution will be, or what the eventual loss, if any, will be. Any material adverse resolution could materially and adversely affect our business, reputation, financial condition and results of operations.

Where we determine that a loss contingency is probable in connection with a pending or threatened legal proceeding and the amount of our losses can be reasonably estimated, we record an accrual for the losses. Excluding expenses of internal or external legal counsel, we have accrued \$39.5 million as of March 31, 2016 for losses relating to threatened and pending litigation pertaining to our mortgage servicing practices that we believe are probable and reasonably estimable based on current information regarding these matters. Where we determine that a loss is not probable but is reasonably possible or where a loss in excess of the amount accrued is reasonably possible, we disclose an estimate of the amount of the loss or range of possible losses for the claim if a reasonable estimate can be made, unless the amount of such reasonably possible loss is not material to our financial position, results of operations or cash flows. It is possible that we will incur losses relating to threatened and pending litigation pertaining to our mortgage servicing practices that materially exceed the amount accrued. We cannot currently estimate the amount, if any, of reasonably possible losses above amounts that have been recorded at March 31, 2016.

Following our announcement in August 2014 that we intended to restate our financial statements for the fiscal year ended December 31, 2013 and the quarter ended March 31, 2014, and amend our Annual Report on Form 10-K for the fiscal year ended December 31, 2013 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2014, putative securities fraud class action lawsuits were filed against Ocwen and certain of its officers and directors regarding such restatements and amendments. Those lawsuits have been consolidated and are pending in federal court in Florida. After Ocwen signed a Consent Order with the NYDFS in December 2014, the consolidated securities fraud class action complaint was amended to include allegations relating to that Consent Order and other matters. In January 2015, Ocwen was named as a defendant in a separate consolidated securities fraud class action that has been brought on behalf of a putative class of shareholders of Altisource Portfolio Solutions, S.A. (Altisource). In September 2015, the presiding federal court dismissed both of the above-referenced consolidated securities fraud class actions. Both of those actions have since been re-filed in federal court. On December 22, 2015, the presiding federal court dismissed the claims against Ocwen with prejudice in the above-referenced matter brought by the putative class of Altisource shareholders. On that same day, the presiding federal court dismissed in part the above-referenced matter brought by the putative class of Ocwen shareholders. In January 2016, Ocwen was named as a defendant in a separate securities action brought on behalf of certain putative shareholders of Ocwen. Additional lawsuits may be filed and, at this time, Ocwen is unable to predict the outcome of these lawsuits, the possible loss or range of loss, if any, associated with the

resolution of these lawsuits or any potential impact they may have on us or our operations. Ocwen and the other defendants intend to vigorously defend against these lawsuits. If our efforts to defend these lawsuits are not successful, our business, financial condition and results of operations could be adversely affected.

OFC, OLS, and Homeward are defendants in two qui tam actions pending in the United States District Court for the Eastern District of Texas, brought by private citizens on behalf of the United States under the False Claims Act (FCA): U.S. Ex rel. Fisher v. Homeward Residential, Inc., et al and U.S. Ex rel. Fisher v. Ocwen Loan Servicing, LLC, et al. On April 2, 2014, the United States declined to intervene in these actions, and the complaints were unsealed shortly thereafter. The complaints allege in substance that Homeward and OLS violated the FCA by falsely certifying their compliance with applicable laws and regulations in connection with their respective participation in the United States Treasury's HAMP and FHA insurance programs, thus rendering all HAMP incentive and FHA insurance payments on OLS- or Homeward-serviced loans false claims.

The complaints seek damages including (i) an award equal to three times the total HAMP incentive and FHA insurance payments made by the United States on OLS- or Homeward-serviced loans and (ii) statutory penalties of between \$5,500 and \$11,000 per alleged false claim. Discovery is ongoing, and the parties have each filed motions for summary judgment. Trial in the OLS action is scheduled for June 27, 2016 and trial in the Homeward action is scheduled for November 14, 2016. At this time, we are unable to predict the outcome of these lawsuits, the possible loss or range of loss, if any, associated with resolving these lawsuits or any potential impact they may have on us or our operations. OFC, OLS and Homeward intend to vigorously defend against these lawsuits. If our efforts to defend these lawsuits are not successful, our business, financial condition, liquidity and results of operations could be materially and adversely affected.

In several recent court actions, mortgage loan sellers against whom repurchase claims have been asserted based on alleged breaches of representations and warranties are defending on various grounds including the expiration of statutes of limitation, lack of notice and opportunity to cure, and vitiation of the obligation to repurchase as a result of foreclosure or charge-off of the loan. We have entered into tolling agreements with respect to our role as servicer for a small number of securitizations and may enter into additional tolling agreements in the future. Other court actions have been filed against certain RMBS trustees alleging that the trustees breached their contractual and statutory duties by, among other things, failing to require the loan servicers to abide by the servicers' obligations and failing to declare that certain alleged servicing events of default under the applicable contracts occurred.

Ocwen is a third-party defendant in certain of these actions, is the servicer for certain securitizations involved in other such actions and is the servicer for other securitizations as to which actions have been threatened by certificate holders. We intend to vigorously defend ourselves in the lawsuits to which we have been named a party. Should Ocwen be made a party to other similar actions or should Ocwen be asked to indemnify any parties to such actions, we may need to defend allegations that we failed to service loans in accordance with applicable agreements and that such failures prejudiced the rights of repurchase claimants against loan sellers or otherwise diminished the value of the trust collateral. At this time, we are unable to predict the ultimate outcome of these lawsuits, the possible loss or range of loss, if any, associated with the resolution of these lawsuits or any potential impact they may have on us or our operations. If, however, we were required to compensate claimants for losses related to the alleged loan servicing breaches, then our business, financial condition and results of operations could be adversely affected.

In addition, a number of RMBS trustees have received notices of default alleging material failures by servicers to comply with applicable servicing agreements. For example, certain investors claiming to hold at least 25% ownership interest in 119 RMBS trusts serviced by Ocwen have submitted to the respective trustees of those trusts a Notice of Non-Performance, alleging that we have materially breached our obligations under the servicing agreements in those trusts. The Notice further alleged that our conduct, if not timely cured, would give rise to events of default under the applicable servicing agreements, on the basis of which we could potentially be terminated as servicer for the 119 Trusts. Ocwen denies the allegations in the Notice and intends to vigorously rebut them. Since the Notice was issued, Ocwen has been directed by the trustee for two of the trusts to transfer its servicing to another loan servicing company based on ratings downgrades. There is a risk that Ocwen could be replaced as servicer on the remaining trusts at issue in the Notice, that the trustees could take legal action on behalf of the trust certificateholders, or, under certain circumstances, that the investors who issued the Notice could seek to press their allegations against Ocwen, independent of the trustees. We are unable at this time to predict what, if any, actions the trustees will take in response to the Notice, nor can we predict at this time the potential loss or range of loss, if any, associated with the resolution of the Notice or the potential impact on our operations. If Ocwen were to be terminated as servicer, or other related legal actions were pursued against Ocwen, it could have an adverse effect on Ocwen's business, financing activities, financial condition and results of operations.

Regulatory

We are subject to a number of ongoing federal and state regulatory examinations, consent orders, inquiries, requests for information and other actions.

New York Department of Financial Services

In December 2012, we entered into a consent order with the New York Department of Financial Services (NY DFS) in which we agreed to the appointment of a Monitor to oversee our compliance with an Agreement on Servicing

Practices that we had entered into with the NY DFS in September 2011. After the Monitor began its work in 2013, the NY DFS began an investigation into Ocwen's compliance with the servicing requirements specified in the Agreement on Servicing Practices as well as New York State laws and regulations relating to the servicing of residential mortgages.

In December 2014, Ocwen reached a settlement with the NY DFS related to this investigation and entered into a consent order (the NY Consent Order) with the NY DFS to reflect such settlement. The settlement contained monetary and non-monetary provisions including the payment of a civil monetary penalty of \$100.0 million and restitution in the amount of \$50.0 million to certain New York borrowers and the appointment of an independent Operations Monitor. We must pay all reasonable and necessary costs of the Operations Monitor.

We continue to work with the Operations Monitor. If we are found to have breached the terms of the NY Consent Order or if the NY DFS or the Operations Monitor were to allege non-compliance with New York laws or regulations, we could become subject to financial penalties or other regulatory action could be taken against us. The Operations Monitor also makes recommendations to Ocwen on various operational and governance matters. If we do not address such recommendations in a manner deemed satisfactory by the Operations Monitor and the NY DFS, we could be subject to additional scrutiny by the Operations Monitor or the NY DFS or other regulatory action could be taken against us.

California Department of Business Oversight

In January 2015, OLS reached an agreement with the California Department of Business Oversight (CA DBO) relating to Ocwen's failure to produce certain information and documents during a routine licensing examination, which resulted in the CA DBO withdrawing its notice of hearing to suspend OLS' license in California. OLS and the CA DBO entered into a Consent Order pursuant to the California Residential Mortgage Lending Act (the CA Consent Order) with the CA DBO to reflect such settlement. The CA Consent Order addresses and resolves the examination disputes between the CA DBO and OLS, and does not involve any accusation or admission of wrongdoing with regard to OLS' servicing practices.

Under the terms of the CA Consent Order, OLS paid the CA DBO a penalty of \$2.5 million plus costs associated with the examination. OLS also agreed to cease acquiring any additional MSRs for loans secured in California until the CA DBO is satisfied that OLS can satisfactorily respond to the requests for information and documentation made in the course of a regulatory exam.

In addition, the CA DBO has selected an independent third-party auditor (the CA Auditor) to assess OLS' compliance with laws and regulations impacting California borrowers for an initial term of two years, extendable for one year at the discretion of the CA DBO. OLS must pay all reasonable and necessary costs of the CA Auditor. The CA Auditor will report periodically on its findings and progress and OLS must submit to the CA DBO a written plan to address and implement corrective measures and address any deficiencies identified by the CA Auditor.

We continue to work cooperatively with the CA Auditor. As part of the CA Auditor's work, from time to time the CA Auditor and the CA DBO have made observations regarding our compliance with various regulations and legal requirements, including the Consent Order. At this time, we believe that we will be able to resolve all matters related to such observations in a constructive manner with the CA DBO, and we are not aware of any issue that we believe will have a material impact on our financial condition. As part of these observations, the CA DBO has informed us of its position that certain onboarding activities relating to new California originations in 2015 were prohibited by the Consent Order and represent a material breach of the agreement. We disagree with this position. Given that we have already made adjustments to our processes for California originations, the CA DBO has not asked us to make any additional changes to such processes at this time. The CA DBO has also raised similar concerns related to our on-boarding of loans subject to subservicing agreements. The CA DBO is still evaluating this activity as it relates to the Consent Order. The CA DBO has not asked us to cease any subservicing activities, and these activities are not material to our overall operations. However, it is possible that the CA DBO could determine to take action against us, which could subject us to financial penalties or other regulatory action, and it is possible that the CA Auditor or the CA DBO could allege that other activities do not comply with California laws or regulations, which could also result in regulatory action against us.

National Mortgage Settlement

In February 2014, the Ocwen National Mortgage Settlement involving the CFPB and various state attorneys general and other state agencies that regulate the mortgage servicing industry (NMS Regulators), relating to various allegations regarding deficient mortgage servicing practices, including those with respect to foreclosures, was memorialized by a consent order entered by the United States District Court for the District of Columbia (District Court).

We are tested on a quarterly basis on various metrics to ensure compliance with the Ocwen National Mortgage Settlement. These metrics relate to various aspects of our servicing business, and each has a proscribed error threshold. These metrics are tested by a dedicated group of Ocwen employees who do not report to the servicing business and are referred to as the Internal Review Group (IRG). The IRG tests these metrics, and reports their

findings to the professional firms employed by the Office of Mortgage Settlement Oversight (OMSO). OM SO has ultimate authority to accept or reject the IRG's findings, and OM SO reports its findings to the District Court. Exceeding the metric error rate threshold for the first time does not result in a violation of the settlement, but rather it is deemed a "potential violation" which then is subject to a cure period. Any potential violation requires us to submit a corrective action plan (CAP) to OM SO for approval and review, and all testing for that metric is suspended until the CAP is completed. Following the completion of the CAP, testing on that metric resumes by the IRG and any further fails in the cure period or the quarter following that cure period would subject us to financial penalties. These penalties start at an amount of not more than \$1.0 million for the first uncured violation and increase to an amount of not more than \$5.0 million for the second uncured violation.

To date, OMSO's reports have found six metrics where our testing has exceeded the applicable error rate threshold. Each of those metrics has been the subject of an agreed-upon CAP, and one of those potential fails have been deemed "cured" by OMSO as subsequent testing has not exceeded the metric error rate threshold. The remainder of the metrics are either still under CAPs or the post-cure testing has yet to be validated by OMSO. Moreover, we agreed with OMSO to deem an additional five metrics as having failed due to the letter-dating issues that were raised by the NY DFS in 2014, as the testing of those metrics could have been affected by that issue. Those metrics are subject to a "global CAP" that covers all letter-dating issues under the Ocwen National Mortgage Settlement, in addition to any metric-specific CAP plan. It is also possible that if we are found to have caused borrower harm, we would be subject to costs to remediate that harm. In addition, in the event that there were widespread metric failures, it is possible that OMSO or the District Court could determine that we were generally violating the settlement and seek to impose a broader range of financial, injunctive or other penalties on us.

In December 2014, OMSO identified two issues involving our compliance with the Ocwen National Mortgage Settlement. The first concerned the adequacy and independence of our IRG, which is responsible for reporting on our compliance with the settlement. The second concerned the letter dating issues discussed above. OMSO's reports since then have identified the steps we have taken to remediate these issues and acknowledged Ocwen's cooperation. OMSO has recently reported that Ocwen's IRG appears to be operating in conformity with the National Mortgage Settlement, and noted that the letter-dating issues are subject to the global CAP discussed above.

We continue to work with OMSO on ongoing testing and CAPs. While, to date, these issues have not resulted in financial or other penalties, if we are found to have breached the Ocwen National Mortgage Settlement, we could become subject to financial penalties or other regulatory action could be taken against us.

Securities and Exchange Commission

In April 2014, we received a letter from the staff of the New York Regional Office of the SEC (the Staff) informing us that it was conducting an investigation relating to Ocwen and making a request for voluntary production of documents and information relating to the April 2014 surrender of certain options to purchase our common stock by Mr. Erbey, our former Executive Chairman. In June 2014, we received a subpoena from the SEC requesting production of various documents relating to our business dealings with Altisource, HLSS, AAMC and Residential and the interests of our directors and executive officers in these companies. Following our announcement in August 2014 that we intended to amend our Annual Report on Form 10-K for the fiscal year ended December 31, 2013 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2014, we received an additional subpoena in September 2014 in relation to such amendments. In addition, we received a further subpoena in November 2014 requesting certain documents related to Ocwen's agreement with Southwest Business Corporation, and related to Mr. Erbey's approvals for specifically enumerated board actions. We cooperated with the SEC in its investigation.

On January 20, 2016, the SEC entered an administrative order resolving its investigation, which required Ocwen to pay, without admitting or denying liability, a \$2.0 million civil money penalty and consent to the entry of an administrative order requiring that we cease and desist from any violations of Sections 13(a), 13(b)(2)(A), and 13(b)(2)(B) of the Exchange Act and certain related SEC rules promulgated thereunder. We had previously disclosed in our Form 10-Q for the quarter ended September 30, 2015 that we had reached this resolution in principle with the SEC staff and that we accrued \$2.0 million as of September 30, 2015 as we believed this loss was probable and reasonably estimable based on current information.

Separately, in February 2015, we received a letter from the Staff informing us that it was conducting an investigation relating to the use of collection agents by mortgage loan servicers. The letter requested that we voluntarily produce documents and information. We believe that the February 2015 letter was also sent to other companies in the industry. On February 11, 2016, we received a letter from the Staff informing us that it was conducting an investigation relating to fees and expenses incurred in connection with liquidated loans and REO properties held in non-agency RMBS trusts. The letter requested that we voluntarily produce documents and information. We are cooperating with the Staff on these matters.

General

In addition to the above matters, our loan origination and servicing businesses require one or more licenses in the various jurisdictions in which we operate. Our licensed entities are required to renew their licenses, typically on an

annual basis, and to do so they must satisfy the license renewal requirements of each jurisdiction, which in some cases include the requirement to provide audited financial statements.

The same agencies that issue licenses to us engage in regular supervisory examinations of the licensable activities. We are also subject to supervision by the CFPB at the federal level, and it similarly has the authority to conduct regulatory examinations, in addition to its enforcement and investigatory powers. These examinations are part of our ordinary course business activities, and the mere existence of an examination is not typically indicative of anything unusual or material as to that business. The GSEs (and their conservator, FHFA), HUD, FHA, VA, Ginnie Mae, the United States Treasury Department, and others also subject us to periodic reviews and audits. We also receive information requests and other inquiries, both formal

and informal in nature, from these agencies as part of their general regulatory or other oversight of our origination and servicing businesses.

We also have regular engagements with not only our state financial regulators, but also the attorneys general in the various states and the CFPB to address individual borrower complaints that they bring to our attention, or to respond to information requests and other inquiries. On occasion, we also engage with U.S. attorneys. Many of these matters are brought to our attention as a complaint that the entity is investigating, although some are formal investigations or proceedings. Ocwen is currently in receipt of several Civil Investigative Demands from the CFPB, one Civil Investigative Demand from the Massachusetts Attorney's General Office and two subpoenas from the Office of the United States Attorney for the District of Massachusetts seeking information about our servicing practices.

To the extent that an examination, monitorship, audit or other regulatory engagement results in an alleged failure by us to comply with applicable law, regulation or licensing requirement, or if allegations are made that we have failed to comply with the commitments we have made in connection with our regulatory settlements or if other regulatory actions of a similar or different nature are taken in the future against us, this could lead to (i) loss of our licenses and approvals to engage in our servicing and lending businesses, (ii) governmental investigations and enforcement actions, (iii) administrative fines and penalties and litigation, (iv) civil and criminal liability, including class action lawsuits and actions to recover incentive and other payments made by governmental entities, (v) breaches of covenants and representations under our servicing, debt or other agreements, (vi) damage to our reputation, (vii) inability to raise capital and (viii) inability to execute on our business strategy. Any of these occurrences could increase our operating expenses and reduce our revenues, hamper our ability to grow or otherwise materially and adversely affect our business, reputation, financial condition and results of operations.

Loan Put-Back and Related Contingencies

We have exposure to origination representation, warranty and indemnification obligations because of our lending, sales and securitization activities and in connection with our servicing practices. At March 31, 2016 and March 31, 2015, we had outstanding representation and warranty repurchase demands of \$81.9 million UPB (408 loans) and \$134.6 million (696 loans), respectively. We review each demand and monitor through resolution, primarily through rescission, loan repurchase or make-whole payment.

The following table presents the changes in our liability for representation and warranty obligations, compensatory fees for foreclosures that may ultimately exceed investor timelines and similar indemnification obligations for the three months ended March 31:

	2016	2015
Beginning balance	\$36,615	\$132,918
Provision for representation and warranty obligations	(840)	(3,975)
New production reserves	152	228
Charge-offs and other (1)	(3,598)	(9,989)
Ending balance	\$32,329	\$119,182

(1) Includes principal and interest losses realized in connection with repurchased loans, make-whole, indemnification and fee payments and settlements net of recoveries, if any.

We believe that it is reasonably possible that losses beyond amounts currently recorded for potential representation and warranty obligations and other claims described above could occur, and such losses could have an adverse impact on our results of operations, financial condition or cash flows. However, based on currently available information, we are unable to estimate a range of reasonably possible losses above amounts that have been recorded at March 31, 2016.

Other

OLS, on its own behalf and on behalf of various investors, has been engaged in a variety of activities to seek payments from mortgage insurers for unpaid claims, including claims where the mortgage insurers paid less than the full claim amount. Ocwen believes that many of the actions by mortgage insurers were in violation of the applicable insurance policies and insurance law. Ocwen is in the process of settlement discussions with certain mortgage insurers. In some cases, Ocwen has entered into tolling agreements, initiated arbitration or litigation, or taken other similar actions. While we expect the ultimate outcome to result in recovery of some unpaid mortgage insurance claims, we cannot

quantify the likely amount at this time.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF

2. OPERATIONS (Dollars in thousands, except per share amounts and unless otherwise indicated)

47

The following Management's Discussion and Analysis of Financial Condition and Results of Operations, as well as other portions of this Form 10-Q, may contain certain statements that constitute forward-looking statements within the meaning of the federal securities laws. You can identify forward-looking statements by terminology such as "may," "will," "should," "could," "intend," "consider," "expect," "plan," "anticipate," "believe," "estimate," "predict" or "continue" or the negative of these terms or other comparable terminology. Forward-looking statements by their nature address matters that are, to different degrees, uncertain. Our business has been undergoing substantial change, which has magnified such uncertainties. You should bear these factors in mind when considering such statements and should not place undue reliance on such statements. Forward-looking statements involve a number of assumptions, risks and uncertainties that could cause actual results to differ materially from those suggested by such statements. In the past, actual results have differed from those suggested by forward looking statements, and this may happen again. You should consider all uncertainties and risks discussed or referenced in this report, including those under "Forward-Looking Statements" and Item 1A, Risk Factors, as well as those discussed in our other reports and filings with the SEC, including those in our Annual Report on Form 10-K for the year ended December 31, 2015 and our Current Reports on Form 8-K since such date.

OVERVIEW

We are a financial services company that services and originates loans.

We are a leader in the servicing industry in foreclosure prevention and loss mitigation, which helps families stay in their homes and improves financial outcomes for loan investors. Our leadership in the industry is evidenced by our high cure rate for delinquent loans and above average rate of continuing performance by homeowners whose loans we have modified. Ocwen has provided more loan modifications under the Federal Government's Home Affordable Modification Program (HAMP) than any other mortgage servicer and 47% more than the next highest servicer, according to data published in the U.S. Treasury's Making Home Affordable Fourth Quarter 2015 Program Performance Report. Overall, Ocwen completed over 660,000 loan modifications from January 1, 2008 through March 31, 2016, including over 55,000 modifications under Ocwen's own Shared Appreciation Modification (SAM) program.

We primarily originate, purchase, sell and securitize conventional and government-insured forward mortgage loans and reverse mortgages.

As discussed in further detail under "Operations Summary" and "Segment Results of Operations" below, the key driver of our operating results for the three months ended March 31, 2016, as compared to the three months ended March 31, 2015, was lower servicing revenue, resulting from a decrease in the total UPB of our residential servicing portfolio from \$382.2 billion as of March 31, 2015 to \$237.1 billion as of March 31, 2016, driven largely by the execution of our strategy to sell certain of our Agency MSRs and portfolio runoff, that was not accompanied by a corresponding decrease in expenses.

In order to be profitable, we will need to decrease our expenses so that they are more appropriately aligned with our reduced revenue profile. Pursuant to the cost improvement initiative that we announced in 2015, we are focused on reducing our servicing costs in line with our reduced residential servicing portfolio through productivity improvements and other expense reductions. Initiatives include further rationalization of our U.S. based headcount, where we expect further reductions as we shift activities to our lower cost off-shore locations, continuing reductions in servicing advance and receivable charge-offs as we simplify our operations and implement process improvements, reducing our reliance on third-party facilities, technology infrastructure and support services providers and optimizing our purchased services spend. We anticipate that rightsizing our servicing operations will lag the reductions in our servicing portfolio as workforce and servicing operations adjustments require time to implement properly, and we have certain post-sale support obligations in connection with our Agency MSR sales. In addition, we take our commitments to enhancing the borrower experience, strengthening our risk and compliance infrastructure and delivering strong loss mitigation results very seriously and, accordingly, we will continue to make appropriate investments in those important areas at the same time we enhance our cost structure through productivity improvements and other initiatives.

We will seek to increase our revenue through growing our lending business by reinvesting cash flows generated by our servicing business in asset generation businesses - namely businesses where we can not only originate new loans

profitably but also potentially retain the servicing rights as well as the customer relationship. We are investing in our forward lending business to build competitive advantages around processes and technology, and we believe the reverse mortgage business is a substantially under-developed market relative to its potential. We will continue to evaluate new adjacent market opportunities that are consistent with our strategic goals where we believe we can capture competitive advantages and achieve attractive returns for our shareholders. These would include sustainable new opportunities that align with long-term macro trends; opportunities that can contribute meaningfully to our long-term growth and return on equity; and, generally, businesses where we feel we can capture and maintain a long-term competitive advantage (e.g., advantages related to operating efficiencies, our cost of capital or our tax structure).

With respect to our servicing business, our recent regulatory settlements have significantly limited our ability to grow our servicing portfolio, which naturally decreases over time through portfolio runoff. In order to grow our servicing portfolio

through acquisitions, we will need to satisfy the conditions set forth in our consent orders with the NY DFS and CA DBO. At this time, it is not clear that there is a significant market for non-Agency MSR acquisitions, even if we were to be given the requisite approvals from the NY DFS and CA DBO to resume those types of transactions. Nonetheless, we believe our significant investments in our servicing operations, risk and compliance infrastructure over recent years will position us favorably relative to our peers should such transactions become available.

Our business continues to be impacted by our recent regulatory settlements and the current regulatory environment.

We have faced, and expect to continue to face, regulatory and public scrutiny as an organization as well as stricter and more comprehensive regulation of the entire mortgage sector. We continue to work diligently to assess the implications of the regulatory environment in which we operate and to meet the requirements of the current environment. We devote substantial resources to regulatory compliance, while, at the same time, striving to meet the needs and expectations of our customers, clients and other stakeholders.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our unaudited consolidated financial statements and the related notes thereto appearing elsewhere in this Quarterly Report on Form 10-Q and with our consolidated financial statements and notes thereto and management's discussion and analysis of financial condition and results of operation appearing in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Operations Summary

The following table summarizes our consolidated operating results for the three months ended March 31:

	2016	2015	% Change
Revenue:			
Servicing and subservicing fees	\$297,496	\$446,541	(33)%
Gain on loans held for sale, net	15,572	44,504	(65)
Other revenues	17,689	19,399	(9)
Total revenue	330,757	510,444	(35)
Expenses	328,657	378,358	(13)
Other income (expense):			
Interest expense	(106,089)	(119,396)	(11)
Gain on sale of mortgage servicing rights, net	1,175	26,406	(96)
Other, net	689	3,733	(82)
Total other expense, net	(104,225)	(89,257)	17
Income (loss) before income taxes	(102,125)	42,829	(338)
Income tax expense	9,076	8,440	8
Net income (loss)	(111,201)	34,389	(423)
Net income attributable to non-controlling interests	(130)	(34)	282
Net income (loss) attributable to Ocwen stockholders	\$(111,331)	\$34,355	(424)
Segment income (loss) before income taxes:			
Servicing	\$(68,258)	\$46,722	(246)%
Lending	2,000	15,983	(87)
Corporate Items and Other	(35,867)	(19,876)	80
	\$(102,125)	\$42,829	(338)%

Three Months Ended March 31, 2016 versus 2015

Servicing and subservicing fees for the first quarter of 2016 were \$149.0 million or 33% lower than the first quarter of 2015, primarily as a result of executing on our strategy in 2015 to sell certain of our Agency MSRs, portfolio runoff

and a decline in modifications. During the first quarter of 2015, we recognized \$26.4 million in net gains on the sale of MSR's relating to loans with a UPB of \$9.1 billion. For the full year ended December 31, 2015, we sold MSR's relating to loans with a combined UPB of \$87.6 billion.

Gain on loans held for sale for the first quarter of 2016 was \$28.9 million or 65% lower than the first quarter of 2015. Gains from our lending operations decreased \$12.9 million primarily due to a decline in forward lending origination volume, in part due to the sale of our Agency MSRs, and lower margins in both the forward and reverse lending operations. In our servicing business, gains on sales of loans declined by \$15.7 million. We recognized a gain of \$12.9 million in the first quarter of 2015 in connection with the sale of \$42.7 million UPB of loans repurchased in connection with representation and warranty obligations.

Expenses, excluding MSR amortization and valuation adjustments and monitor expenses, were \$53.3 million or 19% lower in the first quarter of 2016 as compared to the first quarter of 2015. This decline reflects the progress to date in implementing our cost improvement initiatives. Average headcount in our Servicing business declined by 16%, including a 29% reduction in U.S. based headcount.

MSR amortization and valuation adjustments and monitor expenses increased \$3.6 million. MSR amortization and valuation adjustments, including both fair value adjustments and impairment charges, decreased \$17.4 million primarily due to the effects of portfolio runoff and MSR sales which were partially offset by an increase in impairment charges related to our government insured MSRs driven by lower mortgage rates. Monitor expenses increased \$21.0 million primarily as a result of costs related to the CA Auditor.

Interest expense for the first quarter of 2016 decreased \$13.3 million or 11% as compared to the first quarter of 2015 primarily as a result of changes in the value of the NRZ financing liability and lower SSTL borrowings as a result of principal prepayments, including voluntary prepayments and required prepayments from proceeds of sales of MSR during 2015.

We recognized income tax expense of \$9.1 million for the three months ended March 31, 2016 primarily as a result of pre-tax earnings in higher tax rate jurisdictions and losses in lower tax rate jurisdictions. In addition, we recognized income tax expense related to uncertain tax positions.

Financial Condition Summary

The following table summarizes our consolidated balance sheets at the dates indicated.

	March 31, 2016	December 31, 2015	% Change
Cash	\$280,513	\$ 257,272	9 %
Mortgage servicing rights (\$732,174 and \$761,190 carried at fair value)	1,078,213	1,138,569	(5)

Changes in the composition and balance of our assets and liabilities during the three months ended March 31, 2016 are primarily attributable to Loans held for investment and Financing liabilities which increased as a result of our reverse mortgage securitizations accounted for as secured financings.

SEGMENT RESULTS OF OPERATIONS

Our activities are organized into two reportable business segments that reflect our primary lines of business - Servicing, Lending, and a Corporate Items and Other segment.

Servicing

Our Servicing business is primarily comprised of our core residential mortgage servicing business and currently accounts for the majority of our total revenues. Our servicing clients include some of the largest financial institutions in the U.S., including Fannie Mae, Freddie Mac and Ginnie Mae, and non-Agency residential mortgage-backed securities (RMBS) trusts.

Servicing involves the collection and remittance of principal and interest payments received from borrowers, the administration of mortgage escrow accounts, the collection of insurance claims, the management of loans that are delinquent or in foreclosure or bankruptcy, which includes making servicing advances, evaluating loans for modification and other loss mitigation activities and, if necessary, foreclosure referrals and the sale of the underlying property following foreclosure (real estate owned or REO) on behalf of investors or other servicers. Master servicing involves primary servicing oversight, the collection of payments from servicers and the distribution of funds to investors in mortgage and asset-backed securities (or to their respective trustee or administrator) and, in some cases, making servicing advances. We earn contractual monthly servicing fees (which are typically calculated as a percentage of UPB) as well as other ancillary fees in connection with our servicing activities.

We also earn fees under both subservicing and special servicing arrangements with banks and other institutions that own the MSR. The owners of MSRs may choose to hire Ocwen as a subservicer or special servicer instead of servicing the MSRs themselves for a variety of reasons, including not having a servicing platform or not having the necessary capacity or expertise to service some or all of their MSRs. In a subservicing context, where Ocwen does not own the MSRs, we may be engaged to perform all of the servicing functions previously described or it could be a limited engagement (e.g., subservicing only non-defaulted mortgage loans). As a subservicer, we may be obligated to make servicing advances, though most subservicing agreements provide for more rapid reimbursement of any advances from the owner of the servicing rights than if we were the servicer. Special servicing engagements typically involve portfolios of delinquent or defaulted mortgage loans, which require more specialized work than better-performing mortgage loans and may involve one or more loss mitigation strategies or taking properties through the foreclosure process. We typically earn subservicing and special servicing fees either as a percentage of UPB or on a per loan basis.

Servicing advances are amounts that we, as servicer, are required to advance to or on behalf of our servicing clients if we do not receive such amounts from borrowers. These amounts include principal and interest payments, property taxes and insurance premiums and amounts to maintain, repair and market real estate properties on behalf of our servicing clients. Most of our advances have the highest reimbursement priority and are “top of the waterfall” so that we are entitled to repayment from respective loan or REO liquidation proceeds before most other claims on these proceeds, and in the majority of cases, advances in excess of respective loan or REO liquidation proceeds may be recovered from pool level proceeds. The costs incurred in meeting these obligations consist principally of the interest expense incurred in financing the servicing advances and the costs of arranging such financing.

Reducing delinquencies is important to our business because it enables us to recover advances and recognize additional ancillary income, such as late fees, which we do not recognize on delinquent loans until they are brought current. Performing loans also require less work and are thus generally less costly to service. While increasing borrower participation in loan modification programs is a critical component of our ability to reduce delinquencies, assisting those borrowers in remaining current is also an important factor.

We recognize servicing fees as revenue when the fees are earned, which is generally when the borrower makes a payment or when a delinquent loan is resolved through modification, repayment plan, payoff or, if there are no allowable solutions that would permit the borrower to stay in their home, through the sale of the underlying mortgaged property following foreclosure. Therefore, our revenue recognition is generally a function of UPB, the number of payments received and delinquent or defaulted loans that resolve.

Similar to other servicers, we are the subject of mortgage servicer ratings or rankings (collectively, ratings) issued and revised from time to time by rating agencies including Moody’s Investors Services, Inc. (Moody’s), Morningstar, Inc. (Morningstar), Standard & Poor’s Rating Services (S&P) and Fitch Ratings Inc. (Fitch). Favorable ratings from these agencies are important to the conduct of our loan servicing and lending businesses.

The following table summarizes our key ratings by these rating agencies:

	Moody's	Morningstar	S&P	Fitch
Residential Prime Servicer	SQ3-	MOR RS3	Below Average	RPS3-
Residential Subprime Servicer	SQ3-	MOR RS3	Below Average	RPS3-
Residential Special Servicer	SQ3-	MOR RS3	Below Average	RSS3-
Residential Second/Subordinate Lien Servicer	SQ3-	—	Below Average	RPS3-
Residential Home Equity Servicer	—	—	—	RPS3-
Residential Alt A Servicer	—	—	—	RPS3-
Master Servicing	SQ3	—	Below Average	RMS3-
Ratings Outlook	(1)	Negative	Stable	Stable

Date of last action	September 8, 2015	February 6, 2015	September 29, 2015	February 9, 2016
---------------------	----------------------	------------------	-----------------------	---------------------

(1) Removed from review for downgrade in June 2015.

In addition to servicer ratings, each of the rating agencies will from time to time assign an outlook (or a ratings watch such as Moody's review status) to a mortgage servicer's rating status. A negative outlook is generally used to indicate that a rating "may be lowered," while a positive outlook is generally used to indicate a rating "may be raised."

Failure to maintain minimum servicer ratings could adversely affect our ability to sell or fund servicing advances going forward, could affect the terms or availability of debt financing facilities that we may seek in the future, and could impair our ability to consummate future servicing transactions or adversely affect our dealings with lenders, other contractual counterparties, and regulators, including our ability to maintain our status as an approved servicer by Fannie Mae and Freddie Mac.

The following table presents selected results of operations of our Servicing segment for the three months ended March 31. The amounts presented are before the elimination of balances and transactions with our other segments:

Collections on loans serviced for others \$9,653,475 \$18,563,992 (48)%

Performing loans include those loans that are current (less than 90 days past due) and those loans for which (1) borrowers are making scheduled payments under loan modification, forbearance or bankruptcy plans. We consider all other loans to be non-performing.

(2) Includes 629,566 and 702,948 subprime loans with a UPB of \$101.8 billion and \$117.1 billion at March 31, 2016 and March 31, 2015, respectively.

(3) Includes 191,455 and 228,799 prime loans with a UPB of \$36.9 billion and \$46.6 billion at March 31, 2016 and March 31, 2015, respectively, that we service or subservice.

(4) The effective average interest rates include the amortization of facility costs.

The effective average interest rate on the financing liability that we recognized in connection with the sales of Rights to MSRs to NRZ is 49.31% and 46.95% for the three months ended March 31, 2016 and 2015, respectively.

(5) Interest expense on financing liabilities for the three months ended March 31, 2016 includes \$6.2 million of fees incurred in connection with our agreement to compensate NRZ for certain increased costs associated with its servicing advance financing facilities that are the direct result of a downgrade of our S&P servicer rating.

The following table provides information regarding the changes in our portfolio of residential assets serviced:

	Amount of UPB		Count	
	2016	2015	2016	2015
Portfolio at January 1	\$250,966,112	\$398,727,727	1,624,762	2,486,038
Additions	1,531,715	2,246,103	7,969	10,864
Sales (1)	(34,643)	—	(126)	—
Servicing transfers	(6,745,819)	(3,267,861)	(34,506)	(27,980)
Runoff	(8,636,329)	(15,491,967)	(47,132)	(78,148)
Portfolio at March 31	\$237,081,036	\$382,214,002	1,550,967	2,390,774

On March 31, 2015, we completed the sale of Agency MSRs on a portfolio consisting of 76,000 loans with a UPB (1) of \$9.1 billion. We continued to subservice these loans until the servicing transfer was completed on April 16, 2015. See Note 4 — Sales of Advances and MSRs and Note 8 – Mortgage Servicing to the Unaudited Consolidated Financial Statements.

Three Months Ended March 31, 2016 versus 2015

The key driver of our servicing segment operating results, as compared to the first quarter of 2015, was a \$163.7 million decrease in total Servicing revenue, resulting from a 38% decline in the average UPB and a 35% decline in the average number of assets in our residential servicing and subservicing portfolio due to MSR sales and portfolio runoff that was not accompanied by an equally significant decline in operating expenses. In order to return to profitability, we will need to decrease our expenses to a level more appropriately aligned with our reduced revenue profile.

Revenue associated with delinquent loan resolution strategies declined in line with the 34% decline in completed modifications. The portion of modifications completed under HAMP as a percentage of total modifications decreased to 46% for the first quarter of 2016 as compared to 48% in the first quarter of 2015. The HAMP program expires on December 31, 2016, with borrowers who have requested assistance or to whom an offer of assistance has been extended as of that date having until September 30, 2017 to finalize their modification. We recognized revenue of \$42.0 million and \$64.4 million during the first quarter of 2016 and 2015, respectively, in connection with loan modifications.

We estimate the balance of deferred servicing fees related to delinquent borrower payments was \$442.2 million at March 31, 2016 compared to \$511.4 million at March 31, 2015. We are contractually obligated to remit to NRZ all

deferred servicing fees collected in connection with MSRs underlying Rights to MSRs. However, in addition to base servicing fees, we are entitled to performance fees that increase to the extent we collect deferred servicing fees. As such, the majority of the

deferred servicing fees collected are recognized by us as additional revenue without a corresponding increase in interest expense related to the NRZ financing liability.

We recognized a gain on loans held for sale in the first quarter of 2015 of \$12.9 million in connection with the sale of \$42.7 million UPB of loans repurchased under representation and warranty obligations.

Expenses, excluding MSR amortization and valuation adjustments, decreased by \$43.6 million, or 18%. This decline reflects the progress to date in implementing our cost improvement initiatives. A 29% reduction in average U.S. based headcount and the migration of certain operations offshore, where we believe we realize cost efficiencies while maintaining operational effectiveness, enabled reductions in compensation and benefits of \$14.4 million and servicing-related outsourcing expenses of \$1.2 million. We continue to review the efficiency of our servicing operations to take advantage of additional cost improvement strategies aimed at restoring the Servicing business to profitability and improving the borrower experience. Excluding MSR valuation adjustments, we were able to reduce Servicing and origination expense by \$14.9 million in the first quarter of 2016 through the execution of process improvements and simplification of our operations in connection with the sale of Agency MSRs. Costs charged through corporate overhead allocations declined \$14.6 million (excluding a \$7.4 million increase in technology allocations that was offset by the \$8.5 million decline in Technology and communication costs). Corporate overhead allocations in the first quarter of 2015 reflected investments made to expand our risk and compliance functions. Professional services increased by \$4.7 million compared to the first quarter of 2015 due primarily to the costs of defending ourselves in proceedings alleging violations of federal, state and local laws and regulations governing our servicing activities, including proceedings relating to our lender placed insurance arrangements and proceedings brought under the False Claims Act by private citizens.

MSR amortization and valuation adjustments, including both fair value adjustments and impairment charges, decreased \$17.4 million due to the effects of portfolio runoff and MSR sales offset by an increase in impairment charges related to our government insured MSRs driven by lower mortgage rates. Declining interest rates typically result in increased prepayment activity for MSRs, which generally reduces the value of our MSRs as the underlying loans prepay faster. The fair value of our government-insured MSRs fell below their carrying value by \$30.0 million as of March 31, 2016, resulting in the recognition of an impairment charge in the first quarter of 2016. In the first quarter of 2015, we recognized an impairment charge of \$17.8 million on our government-insured MSRs.

Interest expense declined by \$14.2 million, or 13%, in the first quarter of 2016 compared to the first quarter of 2015 due principally to an \$11.8 million decrease in interest on the NRZ financing liabilities (net of an increase of \$6.2 million due to additional payments to NRZ in connection with downgrades to our S&P servicer rating). In addition, interest expense on the SSTL decreased \$11.2 million as a result of prepayments totaling \$18.6 million during the three months ended March 31, 2016 and \$865.8 million during the year ended December 31, 2015. The effect of the decreases in average borrowings on interest expense was partially offset by an increase in 1-Month LIBOR, an increase in the margins on the interest rate indexes of our borrowings, higher rates on the match funded term notes as compared to the adjustable rates on the variable funding notes and an increase in facility costs included in interest expense.

Under the agreements associated with the NRZ/HLSS Transactions, we remit servicing fees collected on the underlying MSRs, except for the ancillary fees (other than float earnings). The servicing fees that we remit, net of the subservicing and performance fees that we receive, are accounted for as a reduction of the NRZ financing liability and as interest expense. Changes in the fair value of the MSRs underlying the financing liability are also included in the amount reported as interest expense.

During the first quarter of 2016, we recognized net gains of \$1.2 million in Other income on the sale of non-Agency MSRs relating to loans with a UPB of \$34.5 million. Other income for the first quarter of 2015 includes net gains of \$26.4 million recognized on the sale of Agency MSRs relating to loans with a UPB of \$9.1 billion.

Lending

We originate and purchase conventional (conforming to the underwriting standards of the GSEs, collectively Agency loans) and government-insured (insured by the FHA or VA) forward mortgage loans through our forward lending operations. Loans are acquired through three primary channels: correspondent lender relationships, broker relationships (wholesale) and directly with mortgage customers (retail). Per-loan margins vary by channel, with

correspondent typically being the lowest margin and retail the highest margin. After origination, we generally package and sell the loans in the secondary mortgage market, through GSE securitizations and whole loan transactions. We typically retain the associated MSR as we view this as a low cost means to acquire MSR with solid return profiles. Lending revenues include interest income earned for the period the loans are held by us, gain on sale revenue which represents the difference between the origination value and the sale value of the loan, and fee income earned at origination.

Reverse mortgages are originated and purchased through our reverse lending operations under the guidelines of the HECM reverse mortgage insurance program of HUD. Loans originated under this program are guaranteed by the FHA, which provides

investors with protection against risk of borrower default. We retain the servicing rights to reverse loans securitized through the Ginnie Mae HMBS program. The reverse channel provides both current period and future period gain on sale revenue from new originations as a result of subsequent tail draws taken by the borrower. We have originated variable rate HECM loans under which the borrowers have additional borrowing capacity of \$986.5 million at March 31, 2016. These draws are funded by the servicer and can be subsequently securitized or sold (Future Value). We do not incur any substantive underwriting, marketing or compensation costs in connection with these future draws. We recognize this Future Value over time as future draws are securitized or sold. At March 31, 2016, unrecognized Future Value is estimated to be \$73.7 million. We use a third-party valuation expert to determine Future Value based on the net present value of the estimated future cash flows of the loans and utilizing a discount rate of 12% and projected performance assumptions in line with historical experience and industry benchmarks. We are working to increase the scale and breadth of our Lending business. Although the slowing of the Home Affordable Refinance Program (HARP) and the sale of Agency MSR's (which decreases loans available to re-finance) present challenges, we are focused on increasing conversion rates (i.e., recapture) on our existing servicing portfolio and expanding our correspondent channel through growing our third-party origination businesses. Additionally we are exploring offering different products we believe we can originate profitably and with acceptable levels of risk. We believe our experience in servicing difficult loans will also allow us to help borrowers obtain loans that are more challenging to originate. Building the sales and operations capacity to meet this need is a goal for the business, as well as investment in the development of our LOS (Loan Operating System) and the continued use of process improvements to drive productivity.

The UPB of our loan production, by channel, is as follows:

	Correspondent	Wholesale	Retail	Total
Three months ended March 31, 2016				
Forward loans	\$ 352,473	\$ 355,880	\$ 79,779	\$ 788,132

Total	\$ 424,178	\$ 403,418	\$ 284,706	\$ 1,112,302

The following table presents the results of operations of the Lending segment for the three months ended March 31. The amounts presented are before the elimination of balances and transactions with our other segments:

	2016	2015	% Change
Revenue			
Gain on loans held for sale, net			
Forward loans	\$13,059	\$20,258	(36)%
Reverse loans	3,444	9,152	(62)
	16,503	29,410	(44)
Other	6,782	8,336	(19)
Total revenue	23,285	37,746	(38)
Expenses			
Compensation and benefits	14,613	13,246	10
Amortization of mortgage servicing rights	81	89	(9)
Servicing and origination	2,207	1,608	37
Technology and communications	1,002	1,314	(24)
Professional services	169	498	(66)
Occupancy and equipment	1,036	1,061	(2)
Other	2,691	5,969	(55)
Total expenses	21,799	23,785	(8)
Other income (expense)			
Interest income	3,611	3,596	—
Interest expense	(3,448)	(2,639)	31
Other, net	351	1,065	(67)
Other income, net	514	2,022	(75)

Income before income taxes \$2,000 \$15,983 (87)

Three Months Ended March 31, 2016 versus 2015

Lending pre-tax income declined by \$14.0 million, or 87%, in first quarter of 2016 as compared to the first quarter of 2015 due to a \$9.4 million decrease in pre-tax income of the forward lending operations and a \$4.6 million decrease in pre-tax income of the reverse mortgage operations. Our forward lending operations generated \$5.3 million of pre-tax income for the three months ended March 31, 2016 while our reverse lending operations incurred a pre-tax loss of \$3.3 million. Total funding decreased by \$133.0 million, or 12%, due to a \$132.4 million decrease in forward lending origination volume. Gains on loans held for sale, net decreased \$12.9 million, or 44%, primarily due to the decline in forward lending origination volume and lower margins in both the forward and reverse lending operations.

Expenses related to the lending platforms are driven largely by production volume, with direct acquisition costs offset by origination fee income that is included in Other revenue.

Interest income consists primarily of interest earned on newly originated and purchased loans prior to sale to investors. Interest income is offset by interest expense incurred to finance the mortgage loans. We finance originated and purchased forward and reverse mortgage loans with repurchase and participation agreements, commonly referred to as warehouse lines.

Forward lending revenues decreased by \$10.1 million, or 42%, from first quarter of 2015 levels to a total of \$14.3 million. The decrease in revenue was driven by a \$161.9 million decline in origination volume in the higher yielding retail channel. Total forward mortgage originations decreased to \$788.1 million, which was \$132.4 million, or 14%, lower than originations in the first quarter of 2015. Forward lending Other revenue declined by \$2.9 million principally as a result of the decline in origination volume. Forward lending expenses of \$9.2 million represented a decrease of \$2.2 million, or 18%, from the first quarter of 2015, principally because of a reduction in indemnification

expense, partially offset by an increase in compensation and benefits due primarily to increased staffing for retail channel expansion, systems development and the migration of certain functions in-house to reduce costs previously paid to third parties.

Reverse lending revenues of \$9.0 million decreased by \$4.3 million, or 32%. Total expenses declined slightly in the first quarter of 2016. The decrease in revenue was primarily due to lower margin driven by \$11.4 million lower volume in the higher yielding retail channel and margin compression across all three reverse channels due to lower market gain rates and increased price competition in the wholesale and correspondent channel. Total funded reverse mortgage volume of \$191.2 million declined \$0.7 million from the first quarter of 2015.

Corporate Items and Other

Corporate Items and Other includes revenues and expenses that are not directly related to other reportable segments, business activities that are individually insignificant, interest income on short-term investments of cash, interest expense on unsecured corporate debt and certain corporate expenses. Our cash balances are included in Corporate Items and Other.

New business activities that are currently insignificant include providing short-term inventory-secured loans to independent used car dealerships through our Automotive Capital Services (ACS) venture and providing mortgage loans to investors to purchase foreclosed properties or refinance existing rental properties through our Liberty Rental Finance venture. Business activities that are not considered to be of continuing significance include residential subprime non-Agency loans held for sale (at lower of cost or fair value), investments in residential mortgage-backed securities and affordable housing investment activities.

Portions of interest income and interest expense are allocated to the Servicing and Lending segments, including interest earned on cash balances and short-term investments and interest incurred on corporate debt. Expenses incurred by corporate support services are also allocated to the Servicing and Lending segments.

The following table presents selected results of operations of Corporate Items and Other for the three months ended March 31. The amounts presented are before the elimination of balances and transactions with our other segments:

	2016	2015	% Change
Revenue	\$45	\$1,608	(97)%
Expenses			
Compensation and benefits	34,468	30,372	13

Other	(509)	733	(169)%
Other expense, net	(5,950)	(4,787)	24 %
Loss before income taxes	\$(35,867)	\$(19,876)	80 %

Three Months Ended March 31, 2016 versus 2015

Total expenses increased by \$13.3 million in the first quarter of 2016 as compared to the first quarter of 2015.

Professional services increased by \$9.6 million primarily due to a \$21.0 million increase in regulatory monitoring

costs, offset in part by \$8.4 million of strategic advisor costs incurred in the first quarter of 2015 and lower audit and accounting fees of \$2.1 million. The expenses we incurred for the three monitoring firms under our NY DFS, CA DBO and Ocwen National Mortgage

settlements increased from \$9.0 million in first quarter of 2015 to \$30.0 million in first quarter of 2016. Compensation and benefits increased by \$4.1 million due to increases in headcount driven by the ongoing in-sourcing of our technology infrastructure and facilities functions, as well as the continued investment in our ACS and Liberty Rental Finance ventures. Technology and communications decreased by \$4.1 million due largely to exiting the legacy ResCap servicing platform during 2015.

LIQUIDITY AND CAPITAL RESOURCES

Overview

At March 31, 2016, our cash position was \$280.5 million compared to \$257.3 million at December 31, 2015. We invest cash that is in excess of our immediate operating needs primarily in money market deposit accounts. Our priorities for deployment of excess cash are: (1) supporting our core servicing and lending businesses and investing in these core assets, (2) reducing corporate leverage, (3) reducing revolving lines of credit in order to reduce interest expense, (4) expanding into similar or complementary businesses that meet our return on capital requirements and (5) repurchasing shares of our common stock.

Sources of Funds

Our primary sources of funds for near-term liquidity are:

- Collections of servicing fees and ancillary revenues;
- Proceeds from match funded liabilities;
- Proceeds from other borrowings, including warehouse facilities;
- Proceeds from sales of MSRs and related servicing advances; and
- Proceeds from sales of originated loans and repurchased loans.

Our ability to finance servicing advances is a significant factor that affects our liquidity. Our use of advance financing facilities is integral to our servicing advance financing strategy. The revolving notes issued by our advance funding facilities generally have a 364-day revolving period, although we issue term notes with one- and two-year maturities. The revolving periods for variable funding notes with a total borrowing capacity of \$850.0 million as well as the terms of \$500.0 million of our one-year term notes end in 2016.

Borrowings under our advance financing facilities are incurred by special purpose entities (SPEs) that we consolidate because we have determined that Ocwen is the primary beneficiary of the SPE. We transfer the financed advances to the SPEs, and the SPEs issue debt supported by collections on the transferred advances. Holders of the debt issued by the SPEs have recourse only to the assets of the SPEs for satisfaction of the debt. In connection with our sale of servicing advances to these advance financing SPEs and to NRZ in connection with the Rights to MSRs, we make certain representations, warranties and covenants primarily focused on the nature of the transferred advance receivables and on our servicing practices.

Advances and match funded advances comprised 28% of total assets at March 31, 2016. Our borrowings under our advance funding facilities are secured by pledges of servicing advances that are sold to the related SPE and by cash held in debt service accounts. Since December 31, 2015, we have increased the maximum borrowing capacity of our advance funding facilities by \$25.0 million to \$1.8 billion. This increase was the result of:

- The increase in the borrowing capacity of our OFAF advance financing facility from \$150.0 million to \$160.0 million; and
- The increase in the borrowing capacity of our OSART III advance financing facility from \$75.0 million to \$90.0 million.

During 2015, our investment in advances and match funded advances declined by \$1.2 billion, principally as a result of sales of MSRs, which allowed us to negotiate reductions in the maximum borrowing capacity of our advance funding facilities of \$700.0 million from \$2.4 billion at December 31, 2014.

Our unused advance borrowing capacity increased by \$72.0 million to \$212.9 million at March 31, 2016 as compared to December 31, 2015, principally because of a decrease in borrowing, as total advances and match funded advances declined by \$112.2 million (before allowance for losses) during the same period. Our ability to continue to pledge collateral under each advance financing facility depends on the performance of the collateral, among other factors. At March 31, 2016, none of the available borrowing capacity could be used based on the amount of available collateral.

We use mortgage loan warehouse facilities to fund newly originated loans on a short-term basis until they are sold to secondary market investors, including GSEs or other third-party investors. These warehouse facilities are structured as repurchase agreements or participation agreements under which ownership of the loans is temporarily transferred to a lender. The loans are transferred at a discount or “haircut” which serves as the primary credit enhancement for the lender. Currently, all of our master repurchase and participation agreements for financing new loan originations have 364-day terms. The funds are

repaid using the proceeds from the sale of the loans to the secondary market investors, usually within 30 days. At March 31, 2016, we had total borrowing capacity under our warehouse facilities of \$650.0 million. Of the borrowing capacity extended on a committed basis, \$119.0 million was available at March 31, 2016, including our warehouse facilities for reverse mortgages. Of the borrowing capacity extended on an uncommitted basis or at the discretion of the lender, \$206.1 million remained available at March 31, 2016. See Note 11 – Borrowings to the Unaudited Consolidated Financial Statements for additional details.

We also rely on the secondary mortgage market as a source of long-term capital to support our lending operations. Substantially all of the mortgage loans that we produce are sold in the secondary mortgage market in the form of residential mortgage backed securities guaranteed by Fannie Mae or Freddie Mac and, in the case of mortgage backed securities guaranteed by Ginnie Mae, are mortgage loans insured or guaranteed by the FHA or VA.

Our debt agreements contain various qualitative and quantitative covenants including financial covenants, covenants to operate in material compliance with applicable laws, monitoring and reporting obligations and restrictions on our ability to engage in various activities, including but not limited to incurring additional debt, paying dividends, repurchasing or redeeming capital stock, transferring assets or making loans, investments or acquisitions. As a result of the covenants to which we are subject, we may be limited in the manner in which we conduct our business and may be limited in our ability to engage in favorable business activities or raise additional capital to finance future operations or satisfy future liquidity needs. In addition, breaches or events that may result in a default under our debt agreements include noncompliance with our covenants, nonpayment of principal or interest, material misrepresentations, the occurrence of a material adverse change, insolvency, bankruptcy, certain material judgments and litigation and changes of control. Covenants and default provisions of this type are commonly found in debt agreements such as ours. Certain of these covenants and default provisions are open to subjective interpretation and, if our interpretation were contested by a lender, a court may ultimately be required to determine compliance or lack thereof. In addition, our debt agreements generally include cross default provisions such that a default under one agreement could trigger defaults under other agreements. If we fail to comply with our debt agreements and are unable to avoid, remedy or secure a waiver of any resulting default, we may be subject to adverse action by our lenders, including termination of further funding, acceleration of outstanding obligations, enforcement of liens against the assets securing or otherwise supporting our obligations, and other legal remedies.

Use of Funds

Our primary uses of funds are:

- Payments for advances in excess of collections on existing servicing portfolios;
- Payment of interest and operating costs;
- Funding of originated and repurchased loans;
- Repayments of borrowings, including match funded liabilities and warehouse facilities; and
- Working capital and other general corporate purposes.

Under the terms of our SSTL facility agreement, we are required to prepay the SSTL with 100% of the net sales proceeds from certain permitted asset sales, which generally include our announced Agency MSR sales. During the year ended December 31, 2015, we prepaid \$865.8 million of the SSTL facility, including \$585.8 million of prepayments from the net proceeds from the sales of MSRs and \$280.0 million of voluntary prepayments. During the three months ended March 31, 2016, we prepaid an additional \$15.3 million of the SSTL facility, all of which were from the net proceeds from the sales of MSRs.

On October 31, 2013, we announced that our board of directors had authorized a share repurchase program for an aggregate of up to \$500.0 million of our issued and outstanding shares of common stock. The purpose of this program is to provide a tax efficient way to return cash to shareholders when management believes the shares are attractively priced. During the three months ended March 31, 2016, we completed the repurchase of 991,985 shares of common stock under this program for a total purchase price of \$5.9 million. As of March 31, 2016, the approximate remaining value of shares that may be repurchased under the program was \$119.7 million. The share repurchase program expires on the earlier of the repurchase of the \$500.0 million amount or July 31, 2016.

Outlook

We closely monitor our liquidity position and ongoing funding requirements, and we regularly monitor and project cash flow by period to minimize liquidity risk.

In assessing our liquidity outlook, our primary focus is on six measures:

• Business financial projections for revenues, costs and net income;

• Requirements for maturing liabilities compared to amounts generated from maturing assets and operating cash flow;

• Projected future sales of MSRs and servicing advances;

- The change in advances and match funded advances compared to the change in match funded liabilities and available borrowing capacity;

Projected future originations and purchases of forward and reverse mortgage loans; and

Projected funding requirements of new business initiatives.

We have considered the impact of financial projections on our liquidity analysis and have evaluated the appropriateness of the key assumptions in our forecast such as revenues, overhead expenses, costs and sales of MSRs and other assets. We have analyzed our cash requirements and financial obligations. Based upon these evaluations and analyses, we believe that we have ample liquidity to meet our obligations and fund our operations for the next twelve months.

Generally, the notes issued by our advance funding facilities have a 364-day revolving period. The revolving periods end in 2016 for variable funding notes with a total borrowing capacity of \$850.0 million and \$637.1 million of outstanding borrowings at March 31, 2016. In the event we are unable to renew, replace or extend the revolving period of one or more of these advance funding facilities, monthly amortization of the outstanding balance must generally begin at the end of the respective 364-day revolving period. In addition, we would be required to begin repaying \$500.0 million of our one-year term notes if we do not renew, replace or extend these notes in 2016.

Similarly, all of our master repurchase and participation agreements for financing new loan originations have 364-day terms. At March 31, 2016, we had \$325.0 million outstanding under these financing arrangements, of which \$273.7 million is outstanding under agreements maturing in 2016. We currently expect that we will be able to renew, replace or extend our debt agreements as they become due, consistent with our historical experience.

We remain actively engaged with our lenders, and recent financing developments include the following:

• On January 5, 2016, we entered into a new one-year \$100.0 million mortgage loan warehouse facility to fund the origination of reverse mortgages.

• On March 31, 2016, we increased the borrowing capacity of our OFAF advance financing facility from \$150.0 million to \$160.0 million.

• On March 31, 2016, we increased the borrowing capacity of our OSART III advance financing facility from \$75.0 million to \$90.0 million.

Our liquidity forecast requires management to use judgment and estimates and includes factors that may be beyond our control. Additionally our actual results could differ materially from our estimates. If we were to default under any of our debt agreements, it could become very difficult for us to renew, replace or extend our debt agreements. Challenges to our liquidity position could have a material adverse effect on our operating results and financial condition and could cause us to take actions that would be outside the normal course of our operations to generate additional liquidity.

Credit Ratings

Credit ratings are intended to be an indicator of the creditworthiness of a particular company, security or obligation. Lower ratings generally result in higher borrowing costs and reduced access to capital markets. The following table summarizes our current ratings and outlook by the respective nationally recognized rating agencies. A securities rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time.

Rating Agency	Long-term Corporate Rating	Review Status / Outlook	Date of last action
Moody's	B2	Under Review	Mar. 16, 2016
S&P	B	Stable	Dec. 23, 2015
Fitch	B-	Stable	Jun. 24, 2015
Kroll Bond Rating Agency	B+	Stable	Jan. 4, 2016

Moody's placed our corporate ratings on review on March 16, 2016. On December 23, 2015, S&P changed its outlook from negative to stable. On June 24, 2015, Fitch affirmed our corporate rating and changed its outlook from negative to stable. On January 4, 2016, Kroll Bond Ratings initiated its corporate bond rating at B+ with a stable outlook. It is possible that additional actions by credit rating agencies could have a material adverse impact on our liquidity and funding position, including materially changing the terms on which we may be able to borrow money.

Cash Flows

Our operating cash flow is primarily impacted by the receipt of servicing fees, changes in our servicing advance balances, operating losses, the level of new loan production and the timing of sales and securitizations of forward mortgage loans. To the

extent we sell MSRs related to delinquent loans, we accelerate the recovery of the related advances. We also receive any outstanding deferred servicing fees upon termination of a servicing agreement. We classify proceeds from the sale of servicing advances, including advances sold in connection with the sale of MSRs, as investing activity in the statement of cash flows.

Cash flows for the three months ended March 31, 2016

Our operating activities provided \$140.9 million of cash largely due to \$109.1 million of net collections of servicing advances. Net cash paid on loans held for sale was \$45.6 million for the three months ended March 31, 2016.

Our investing activities used \$183.0 million of cash. Investing activities include cash outflows in connection with our reverse mortgage originations of \$304.1 million and additions to premises and equipment of \$19.8 million. Cash inflows include the receipt of \$15.3 million of net proceeds from the sale of Agency MSRs, \$41.0 million of proceeds from the sale of advances and \$87.2 million of collections on reverse mortgages.

Our financing activities provided \$65.3 million of cash. Cash inflows include \$233.2 million received in connection with our reverse mortgage securitizations, which are accounted for as secured financings. Cash outflows were primarily comprised of \$47.0 million of net repayments on match funded liabilities from net advance recoveries, \$18.6 million of repayments on the SSTL, including \$15.3 million of prepayments in connection with MSR sales, and a \$17.4 million net reduction in borrowings under mortgage warehouse facilities used to fund originated forward loans. Cash outflows for the three months ended March 31, 2016 also include the repurchase of 991,985 shares of common stock under our stock repurchase program for \$5.9 million and the payment of \$2.2 million of costs incurred in connection with amendments to the SSTL.

Cash flows for the three months ended March 31, 2015

Our operating activities provided \$325.0 million of cash largely due to net income, adjusted for MSR amortization and valuation-related losses and other non-cash items, \$104.3 million of net collections of servicing advances and \$106.1 million of net proceeds from sales and collections of loans held for sale.

Our investing activities used \$164.8 million of cash. Investing activities include cash outflows in connection with our reverse mortgage originations of \$235.3 million. Cash inflows for the three months ended March 31, 2015 include the receipt of \$49.5 million of the \$95.6 million proceeds from the sale of Agency MSRs on March 31, 2015, and \$26.2 million of collections on reverse mortgages.

Our financing activities used \$47.4 million of cash. Cash outflows were primarily comprised of \$89.6 million of net repayments on match funded liabilities from net advance recoveries, \$77.1 million of repayments on the SSTL (including a \$73.8 million prepayment in connection with MSR sales) and a \$55.5 million net reduction in borrowings under mortgage warehouse facilities used to fund loan originations. Cash outflows for the first quarter of 2015 also include \$12.6 million of costs incurred in connection with amendments to the SSTL. These cash outflows were offset by \$238.6 million received in connection with our reverse mortgage securitizations, which are accounted for as secured financings.

CONTRACTUAL OBLIGATIONS AND OFF BALANCE SHEET ARRANGEMENTS

Contractual Obligations

We believe that we have adequate resources to fund all unfunded commitments to the extent required and meet all contractual obligations as they come due. At March 31, 2016, such contractual obligations were primarily comprised of secured and unsecured borrowings, interest payments, operating leases and commitments to originate or purchase loans. There were no significant changes to our contractual obligations during the three months ended March 31, 2016.

Off-Balance Sheet Arrangements

In the normal course of business, we engage in transactions with a variety of financial institutions and other companies that are not reflected on our balance sheet. We are subject to potential financial loss if the counterparties to our off-balance sheet transactions are unable to complete an agreed upon transaction. We manage counterparty credit risk by entering into financial instrument transactions through national exchanges, primary dealers or approved counterparties and the use of mutual margining agreements whenever possible to limit potential exposure. We regularly evaluate the financial position and creditworthiness of our counterparties. We have also entered into non-cancelable operating leases principally for our office facilities.

Derivatives. We record all derivative transactions at fair value on our consolidated balance sheets. We use these derivatives primarily to manage our interest rate risk. The notional amounts of our derivative contracts do not reflect our exposure to credit loss. See Note 13 – Derivative Financial Instruments and Hedging Activities to the Unaudited Consolidated Financial Statements for additional information.

Involvement with SPEs. We use SPEs for a variety of purposes but principally in the financing of our servicing advances and in the securitization of mortgage loans. We consolidate the servicing advance financing SPEs.

We generally use match funded securitization facilities to finance our servicing advances. The SPEs to which the receivables for servicing advances are transferred in the securitization transaction are included in our consolidated financial statements either because we have the majority equity interest in the SPE or because we are the primary beneficiary where the SPE is a variable interest entity (VIE). Holders of the debt issued by the SPEs have recourse only to the assets of the SPEs for satisfaction of the debt.

VIEs. If we determine that we are the primary beneficiary of a VIE, we include the VIE in our consolidated financial statements. We have interests in VIEs that we do not consolidate because we have determined that we are not the primary beneficiary of the VIEs. In addition, we have transferred forward and reverse mortgage loans in transactions accounted for as sales or as secured borrowings for which we retain the obligation for servicing and for standard representations and warranties on the loans. See Note 2 – Securitizations and Variable Interest Entities to the Unaudited Consolidated Financial Statements for additional information.

Mortgage Loan Repurchase and Indemnification Liabilities. We have exposure to representation, warranty and indemnification obligations in our capacity as a loan originator and servicer. We recognize the fair value of representation and warranty obligations in connection with originations upon sale of the loan or upon completion of an acquisition. Thereafter, the estimation of the liability considers probable future obligations based on industry data of loans of similar type segregated by year of origination and estimated loss severity based on current loss rates for similar loans. Our historical loss severity considers the historical loss experience that we incur upon sale or liquidation of a repurchased loan as well as current market conditions.

The underlying trends for loan repurchases and indemnifications are volatile, and there is significant uncertainty regarding our expectations of future loan repurchases and indemnifications and related loss severities. Due to the significant uncertainties surrounding estimates related to future repurchase and indemnification requests by investors and insurers as well as uncertainties surrounding home prices, it is possible that our exposure could exceed our recorded mortgage loan repurchase and indemnification liability. Our estimate of the mortgage loan repurchase and indemnification liability considers the current macro-economic environment and recent repurchase trends; however, if we experience a prolonged period of higher repurchase and indemnification activity or a decline in home values, then our realized losses from loan repurchases and indemnifications may ultimately be in excess of our recorded liability.

Given the levels of realized losses in recent periods, there is a reasonable possibility that future losses may be in excess of our recorded liability. See Note 2 – Securitizations and Variable Interest Entities, Note 12 – Other Liabilities and Note 19 – Contingencies to the Unaudited Consolidated Financial Statements for additional information.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our ability to measure and report our financial position and operating results is influenced by the need to estimate the impact or outcome of future events on the basis of information available at the time of the financial statements. An accounting estimate is considered critical if it requires that management make assumptions about matters that were highly uncertain at the time the accounting estimate was made. If actual results differ from our judgments and assumptions, then it may have an adverse impact on the results of operations and cash flows. We have processes in place to monitor these judgments and assumptions, and management is required to review critical accounting policies with the Audit Committee of the Board of Directors. Our significant accounting policies and critical accounting estimates are disclosed in our Annual Report on Form 10-K for the year ended December 31, 2015 in Note 1 to the Consolidated Financial Statements and in Management’s Discussion and Analysis of Financial Condition and Results of Operations under “Critical Accounting Policies and Estimates.”

Fair Value Measurements

We use fair value measurements to record fair value adjustments to certain instruments and to determine fair value disclosures. Refer to Note 3 – Fair Value to the Unaudited Consolidated Financial Statements for the fair value hierarchy, descriptions of valuation methodologies used to measure significant assets and liabilities at fair value and details of the valuation models, key inputs to those models, and significant assumptions utilized. We follow the fair value hierarchy in order to prioritize the inputs utilized to measure fair value. We review and modify, as necessary, our fair value hierarchy classifications on a quarterly basis. As such, there may be reclassifications between hierarchy levels.

The following table summarizes assets and liabilities measured at fair value on a recurring and nonrecurring basis and the amounts measured using Level 3 inputs at the dates indicated:

	March 31, 2016	December 31, 2015
Loans held for sale	\$408,809	\$414,046
Loans held for investment - Reverse mortgages	2,771,242	2,488,253
MSRs - recurring basis	732,174	761,190
MSRs - nonrecurring basis, net (1)	99,388	129,120
Derivative assets	14,115	8,417
Mortgage-backed securities	8,386	7,985
Assets at fair value	\$4,034,114	\$3,809,011
As a percentage of total assets	54	% 52
Financing liabilities	\$3,171,603	\$2,933,066
Derivative liabilities	5,291	—
Liabilities at fair value	\$3,176,894	\$2,933,066
As a percentage of total liabilities	48	% 45
Assets at fair value using Level 3 inputs	\$3,698,830	\$3,493,582
As a percentage of assets at fair value	92	% 92
Liabilities at fair value using Level 3 inputs	\$3,176,894	\$2,933,066
As a percentage of liabilities at fair value	100	% 100

The balance represents our impaired government-insured stratum of amortization method MSRs, which is (1) measured at fair value on a nonrecurring basis. The carrying value of this stratum is net of a valuation allowance of \$47.3 million and \$17.3 million at March 31, 2016 and December 31, 2015, respectively.

Assets at fair value using Level 3 inputs increased during the three months ended March 31, 2016 primarily due to reverse mortgage originations. Liabilities at fair value using Level 3 inputs increased primarily in connection with reverse mortgage securitizations, which we account for as secured financings. Our net economic exposure to Loans held for investment - Reverse mortgages and the related Financing liabilities (HMBS-related borrowings) is limited to the residual value we retain. Changes in inputs used to value the loans held for investment are largely offset by changes in the value of the related secured financing.

We have numerous internal controls in place to ensure the appropriateness of fair value measurements. Significant fair value measures are subject to analysis and management review and approval. Additionally, we utilize a number of operational controls to ensure the results are reasonable, including comparison, or “back testing,” of model results against actual performance and monitoring the market for recent trades, including our own price discovery in connection with potential and completed sales, and other market information that can be used to benchmark inputs or outputs. Considerable judgment is used in forming conclusions about Level 3 inputs such as interest rate movements, prepayment speeds, delinquencies, credit losses and discount rates. Changes to these inputs could have a significant effect on fair value measurements.

Valuation and Amortization of MSRs

For MSRs accounted for using the amortization measurement method, we assess servicing assets or liabilities for impairment or increased obligation based on fair value on a quarterly basis. We group our MSRs by stratum for impairment testing based on the predominant risk characteristics of the underlying mortgage loans. During the first quarter of 2016, we recognized a \$30.0 million impairment charge on our government-insured MSRs, as the fair value for this stratum was less than its carrying value. This impairment was primarily due to lower interest rates. The carrying value of this stratum at March 31, 2016 was \$99.4 million, net of the valuation allowance of \$47.3 million. The impairment charge is recognized in Servicing and origination expense in the Unaudited Consolidated Statements of Operations.

Effective January 1, 2015, we elected fair value accounting for a newly-created class of non-Agency MSRs, which were previously accounted for using the amortization method. This irrevocable election applies to all subsequently acquired or originated servicing assets and liabilities that have characteristics consistent with this class. We recorded a

cumulative-effect adjustment of \$52.0 million (before deferred income taxes of \$9.2 million) to retained earnings as of January 1, 2015 to reflect the excess of the fair value of these MSR's over their carrying amount. At December 31, 2014, the UPB of the related loans and the carrying value of the non-Agency MSR's for which the fair value election was made was \$195.3 billion and \$787.1 million, respectively.

The determination of the fair value of MSRs requires management judgment due to the number of assumptions that underlie the valuation. We estimate the fair value of our MSRs by using a process that is based on the use of independent third-party valuation experts, and supported by commercially available discounted cash flow models and analysis of current market data to arrive at an estimate of fair value. The key assumptions used in the valuation of these MSRs include prepayment speeds, loan delinquency and discount rates.

Income Taxes

We record a tax provision for the anticipated tax consequences of the reported results of operations. We compute the provision for income taxes using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. We measure deferred tax assets and liabilities using the currently enacted tax rates in each jurisdiction that applies to taxable income in effect for the years in which those tax assets are expected to be realized or settled. We record a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

We recognize tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

We conduct periodic evaluations of positive and negative evidence to determine whether it is more likely than not that the deferred tax asset can be realized in future periods. In these evaluations, we gave more significant weight to objective evidence, such as our actual financial condition and historical results of operations, as compared to subjective evidence, such as projections of future taxable income or losses.

As a result of these evaluations, as of December 31, 2015, we recorded a full valuation allowance for the \$84.5 million of U.S. net deferred tax assets and for the \$17.4 million of USVI net deferred tax assets as the U.S. and USVI jurisdictional deferred tax assets are not considered to be more likely than not realizable based on all available positive and negative evidence. We intend to continue maintaining a full valuation allowance on our deferred tax assets in both the U.S. and USVI until there is sufficient evidence to support the reversal of all or some portion of these allowances.

Indemnification Obligations

We have exposure to representation, warranty and indemnification obligations because of our lending, sales and securitization activities, our acquisitions to the extent we assume one or more of these obligations, and in connection with our servicing practices. We initially recognize these obligations at fair value. Thereafter, the estimation of the liability considers probable future obligations based on industry data of loans of similar type segregated by year of origination, to the extent applicable, and estimated loss severity based on current loss rates for similar loans, our historical rescission rates and the current pipeline of unresolved demands. Our historical loss severity considers the historical loss experience that we incur upon sale or liquidation of a repurchased loan as well as current market conditions. We monitor the adequacy of the overall liability and make adjustments, as necessary, after consideration of other qualitative factors including ongoing dialogue and experience with our counterparties.

Litigation

We monitor our litigation matters, including advice from external legal counsel, and regularly perform assessments of these matters for potential loss accrual and disclosure. We establish liabilities for settlements, judgments on appeal and filed and/or threatened claims for which we believe it is probable that a loss has been or will be incurred and the amount can be reasonably estimated.

RECENT ACCOUNTING DEVELOPMENTS

Recent Accounting Pronouncements

We adopted each recent Accounting Standards Update (ASU) listed below on January 1, 2016. Our adoption of these standards did not have a material impact on our Unaudited Consolidated Financial Statements.

• Consolidation: Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity (ASU 2014-13)

• Income Statement—Extraordinary and Unusual Items: Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items (ASU 2015-01)

Consolidation—Amendments to the Consolidation Analysis (ASU 2015-02)

Interest—Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs (ASU 2015-03)

Intangibles—Goodwill and Other—Internal-Use Software: Customer’s Accounting for Fees Paid in a Cloud Computing Arrangement (ASU 2015-05)

Interest—Imputation of Interest: Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements—Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting (ASU 2015-15)

We are also evaluating the impact of recently issued ASUs not yet adopted that are not effective for us until on or after January 1, 2017. We do not anticipate that our adoption of these ASUs will have a material impact on our consolidated financial statements.

ITEM QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Dollars in thousands
3. unless otherwise indicated)

Our principal market exposure is to interest rate risk due to the impact on our mortgage-related assets and commitments, including mortgage loans held for sale, IRLCs and MSR. Changes in interest rates could materially and adversely affect our volume of mortgage loan originations or reduce the value of our MSR. We also have exposure to the effects of changes in interest rates on our borrowings, including advance financing facilities. Interest rate risk is a function of (i) the timing of re-pricing and (ii) the dollar amount of assets and liabilities that re-price at various times. We are exposed to interest rate risk to the extent that our interest rate sensitive liabilities mature or re-price at different speeds, or on different bases, than interest-earning assets.

Our Market Risk Committee establishes and maintains policies that govern our hedging program, including such factors as our target hedge ratio, the hedge instruments that we are permitted to use in our hedging activities and the counterparties with whom we are permitted to enter into hedging transactions. See Note 13 – Derivative Financial Instruments and Hedging Activities to the Unaudited Consolidated Financial Statements for additional information regarding our use of derivatives.

Match Funded Liabilities

We monitor the effect of increases in interest rates on the interest paid on our variable rate advance financing debt. Earnings on cash and float balances are a partial offset to our exposure to changes in interest expense. To the extent the projected excess of our variable rate debt over cash and float balances require, we would consider hedging this exposure with interest rate swaps or other derivative instruments. We may purchase interest rate caps as economic hedges (not designated as a hedge for accounting purposes) as required by certain of our advance financing arrangements.

IRLCs and Loans Held for Sale

IRLCs represent an agreement to purchase loans from a third-party originator or an agreement to extend credit to a mortgage loan applicant, whereby the interest rate on the loan is set prior to funding. In our lending business, mortgage loans held for sale and IRLCs are subject to the effects of changes in mortgage interest rates from the date of the commitment through the sale of the loan into the secondary market. As a result, we are exposed to interest rate risk and related price risk during the period from the date of the lock commitment through (i) the lock commitment cancellation or expiration date or (ii) through the date of sale of the resulting loan into the secondary mortgage market. Loan commitments for forward loans range from 5 to 90 days, but the majority of our commitments are for 15 days (in the correspondent and broker channels) or 60 days (for the retail channel). Our holding period for mortgage loans from funding to sale is typically less than 30 days. Our interest rate exposure on these derivative loan commitments is hedged with freestanding derivatives such as forward contracts. We enter into forward contracts with respect to both fixed and variable rate loan commitments.

For loans held for sale that we have elected to carry at fair value, we manage the associated interest rate risk through an active hedging program overseen by our Investment Committee. Our hedging policy determines the hedging instruments to be used in the mortgage loan hedging program, which include forward sales of agency “to be announced” securities (TBAs), whole loan forward sales, Eurodollar futures and interest rate options. Forward mortgage backed securities (MBS) trades are primarily used to fix the forward sales price that will be realized upon the sale of mortgage loans into the secondary market. Our hedging policy also stipulates the hedge ratio we must maintain in managing this interest rate risk, which is also monitored by our Investment Committee.

Fair Value MSR

We have elected to account for two classes of MSR's at fair value. The first is a class of Agency MSR's, principally originated during 2012, for which we hedged the interest rate risk because the mortgage notes underlying the MSR's permit the borrowers to prepay the loans. Effective April 1, 2013, we modified our strategy for managing the risks of the portfolio of loans underlying this class of fair value MSR's and closed out the remaining economic hedge positions associated with this class. We terminated these hedges because we determined that they were ineffective for large movements in interest rates and only assured losses in substantial increasing-rate environments. The second class of MSR's at fair value was designated on January 1,

2015, when we elected fair value accounting for a newly created class of non-Agency MSRs that we previously accounted for using the amortization method.

Interest Rate Sensitive Financial Instruments

The tables below present the notional amounts of our financial instruments that are sensitive to changes in interest rates and the related fair value of these instruments at the dates indicated. We use certain assumptions to estimate the fair value of these instruments. See Note 3 – Fair Value to the Unaudited Consolidated Financial Statements for additional information regarding fair value of financial instruments.

	March 31, 2016		December 31, 2015	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Rate-Sensitive Assets:				
Interest-earning cash	\$64,283	\$64,283	\$67,001	\$67,001
Loans held for sale, at fair value	321,739	321,739	309,054	309,054
Loans held for sale, at lower of cost or fair value (1)	87,070	87,070	104,992	104,992
Loans held for investment - Reverse mortgages, at fair value	2,771,242	2,771,242	2,488,253	2,488,253
Interest-earning collateral and debt service accounts	56,946	56,946	87,328	87,328
Total rate-sensitive assets	\$3,301,280	\$3,301,280	\$3,056,628	\$3,056,628
Rate-Sensitive Liabilities:				
Match funded liabilities	\$1,537,096	\$1,537,611	\$1,584,049	\$1,581,786
HMBS-related borrowings	2,648,100	2,648,100	2,391,362	2,391,362
Other secured borrowings (2)	718,830	741,910	762,411	783,276
Senior unsecured notes (2)	345,847	294,350	345,511	318,063
Total rate-sensitive liabilities	\$5,249,873	\$5,221,971	\$5,083,333	\$5,074,487

	March 31, 2016		December 31, 2015	
	Notional Balance	Fair Value	Notional Balance	Fair Value

Rate-Sensitive Derivative Financial Instruments:

Derivative assets (liabilities):

Interest rate caps	\$1,685,000	\$570	\$2,110,000	\$2,042
IRLCs	480,305	13,545	278,317	6,080
Forward MBS trades	826,393	(5,291)	632,720	295
Derivatives, net		\$8,824		\$8,417

(1) Net of market valuation allowances and including non-performing loans.

(2) Net of unamortized debt issuance costs and discount.

Sensitivity Analysis

Fair Value MSR, Loans Held for Sale and Related Derivatives

The following table summarizes the estimated change in the fair value of our MSR and loans held for sale that we have elected to carry at fair value as well as any related derivatives at March 31, 2016, given hypothetical instantaneous parallel shifts in the yield curve. We used March 31, 2016 market rates to perform the sensitivity analysis. The estimates are based on the market risk sensitive portfolios described in the preceding paragraphs and assume instantaneous, parallel shifts in interest rate yield curves. These sensitivities are hypothetical and presented for illustrative purposes only. Changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship to the change in fair value may not be linear.

	Change in Fair Value	
	Down 25 bps	Up 25 bps
Loans held for sale	\$3,041	\$(3,904)
Forward MBS trades	(3,149)	3,939
Total loans held for sale and related derivatives	(108)	35
Fair value MSR (1)	(2,322)	1,466
MSRs, embedded in pipeline	(95)	64
Total fair value MSR	(2,417)	1,530
Total, net	\$(2,525)	\$1,565

This change in fair value reflects the impact of market rate changes on projected prepayments on the Agency MSR portfolio carried at fair value. Additionally, non-Agency MSR carried at fair value can exhibit cash flow sensitivity for advance financing costs and / or float earnings indexed to a market rate. However, we believe the (1) pricing levels on aged non-Agency MSR should remain stable despite the recent rise in LIBOR rates, given the lack of market transactions supporting any pricing change, and the general industry approach to conservatively valuing such assets. As such, we have assumed zero sensitivity to a 25 bps change in market rates for the non-Agency MSR portfolio.

Borrowings

The debt used to finance much of our operations is exposed to interest rate fluctuations. We may purchase interest rate swaps and interest rate caps to minimize future interest rate exposure from increases in one-month LIBOR interest rates.

Based on March 31, 2016 balances, if interest rates were to increase by 1% on our variable rate debt and interest earning cash and float balances, we estimate a net positive impact of approximately \$20.7 million resulting from an increase of \$25.5 million in annual interest income and an increase of \$4.8 million in annual interest expense. The increase in interest expense reflects the effect of our hedging activities, which would offset \$6.4 million of the increase in interest on our variable rate debt.

ITEM 4. CONTROLS AND PROCEDURES

Our management, under the supervision of and with the participation of our Chief Executive Officer and our Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act), as of March 31, 2016.

Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of March 31, 2016, our disclosure controls and procedures (1) were designed and functioning effectively to ensure that material information relating to Ocwen, including its consolidated subsidiaries, is made known to our Chief Executive Officer and Chief Financial Officer by others within those entities, particularly during the period in which this report was being prepared and (2) were operating effectively in that they provided reasonable assurance that information

required to be disclosed by Ocwen in the reports that it files or submits under the Securities Exchange Act of 1934 (i) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to management, including the Chief Executive Officer or Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There have not been any changes in our internal control over financial reporting during the fiscal quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

See Note 19 – Contingencies to the Unaudited Consolidated Financial Statements. That information is incorporated into this item by reference.

ITEM 1A. RISK FACTORS

An investment in our common stock involves significant risk. We describe the most significant risks that management believes affect or could affect us under Part I to our Annual Report on Form 10-K for the year ended December 31, 2015. Understanding these risks is important to understanding any statement in such Annual Report and in this Form 10-Q and to evaluating an investment in our common stock. You should carefully read and consider the risks and uncertainties described therein together with all of the other information included or incorporated by reference in such Annual Report and our subsequent SEC filings before you make any decision regarding an investment in our common stock. You should also consider the information set forth under “Forward-Looking Statements.” If any of the risks actually occur, our business, financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of our common stock could significantly decline, and you could lose some or all of your investment.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**Purchases of Equity Securities by the Issuer and Affiliates**

On October 31, 2013, we announced that our board of directors had authorized a share repurchase program for an aggregate of up to \$500.0 million of our issued and outstanding shares of common stock. As of March 31, 2016, the approximate remaining value of shares that may be repurchased under the program was \$119.7 million. Unless we amend the share repurchase program or repurchase the full \$500.0 million amount by an earlier date, the share repurchase program will continue through July 31, 2016. We may use SEC Rule 10b5-1 plans in connection with our share repurchase program. No assurances can be given as to the amount of shares, if any, that we may repurchase in any given period.

Information regarding repurchases of our common stock during the first quarter of 2016 is as follows:

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of a publicly announced repurchase program	Approximate dollar value of shares that may yet be purchased under the repurchase program
January 1 - January 31	665,317	\$6.2501	665,317	\$121.4 million
February 1 - February 29	326,668	\$5.3015	326,668	\$119.7 million
March 1 - March 31	—	\$—	—	\$119.7 million
Total	991,985	\$5.9377	991,985
