NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2017 (Unaudited)

1. Principles of Consolidation and Presentation

The accompanying consolidated financial statements include the accounts of Commerce Bancshares, Inc. and all majority-owned subsidiaries (the Company). Most of the Company's operations are conducted by its subsidiary bank, Commerce Bank (the Bank). The consolidated financial statements in this report have not been audited by an independent registered public accounting firm, but in the opinion of management, all adjustments necessary to present fairly the financial position and the results of operations for the interim periods have been made. All such adjustments are of a normal recurring nature. All significant intercompany accounts and transactions have been eliminated. Certain reclassifications were made to 2016 data to conform to current year presentation. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ significantly from those estimates. Management has evaluated subsequent events for potential recognition or disclosure. The results of operations for the three and six month periods ended June 30, 2017 are not necessarily indicative of results to be attained for the full year or any other interim period.

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and with the instructions to Form 10-Q adopted by the Securities and Exchange Commission. Accordingly, the financial statements do not include all of the information and footnotes required by GAAP for complete financial statements and should be read in conjunction with the Company's most recent Annual Report on Form 10-K, containing the latest audited consolidated financial statements and notes thereto.

2. Loans and Allowance for Loan Losses

Major classifications within the Company's held for investment loan portfolio at June 30, 2017 and December 31, 2016 are as follows:

(In thousands)	June 30, 2017	December 31, 2016
Commercial:		
Business	\$4,852,408	\$4,776,365
Real estate – construction and land	848,152	791,236
Real estate – business	2,727,349	2,643,374
Personal Banking:		
Real estate – personal	2,009,203	2,010,397
Consumer	2,038,514	1,990,801
Revolving home equity	403,387	413,634
Consumer credit card	740,865	776,465
Overdrafts	6,714	10,464
Total loans	\$13,626,592	\$13,412,736

At June 30, 2017, loans of \$3.9 billion were pledged at the Federal Home Loan Bank as collateral for borrowings and letters of credit obtained to secure public deposits. Additional loans of \$1.6 billion were pledged at the Federal Reserve Bank as collateral for discount window borrowings.

Table of Contents

Allowance for loan losses

A summary of the activity in the allowance for loan losses during the three and six months ended June 30, 2017 and 2016, respectively, follows:

(In thousands)	For the Three Months Ended June 30			For the Six Months Ended June 30

Less recoveries on loans	2,263	2,866	5,129	3,566	6,014	9,580
Net loan charge-offs (recoveries)	(1,602)	9,118	7,516	(1,392)	17,747	16,355
Balance June 30, 2016	\$89,198	\$64,634	\$153,832	\$89,198	\$64,634	\$153,832

The following table shows the balance in the allowance for loan losses and the related loan balance at June 30, 2017 and December 31, 2016, disaggregated on the basis of impairment methodology. Impaired loans evaluated under ASC 310-10-35 include loans on non-accrual status, which are individually evaluated for impairment, and other impaired loans discussed below, which are deemed to have similar risk characteristics and are collectively evaluated. All other loans are collectively evaluated for impairment under ASC 450-20.

(In thousands)	Impaired Loans		All Other Loans	
	Allowance for Loan Losses	Loans Outstanding	Allowance for Loan Losses	Loans Outstanding
June 30, 2017				

Commercial	\$1,454	\$ 44,937	\$91,285	\$ 8,382,972
Personal Banking	1,433	20,221	63,660	5,178,462
Total	\$2,887	\$ 65,158	\$ 154,945	\$13,561,434
December 31, 2016				
Commercial	\$1,817	\$ 44,795	\$89,544	\$ 8,166,180
Personal Banking	1,292	19,737	63,279	5,182,024
Total	\$3,109	\$ 64,532	\$ 152,823	\$13,348,204

Impaired loans

The table below shows the Company's investment in impaired loans at June 30, 2017 and December 31, 2016. These loans consist of all loans on non-accrual status and other restructured loans whose terms have been modified and classified as troubled debt restructurings. These restructured loans are performing in accordance with their modified terms, and because the Company believes it probable that all amounts due under the modified terms of the agreements will be collected, interest on these loans is being recognized on an accrual basis. They are discussed further in the "Troubled debt restructurings" section on page 14.

(In thousands)	June 30, Dec. 31,	
	2017	2016
Non-accrual loans	\$13,362	\$14,283
Restructured loans (accruing)	51,796	50,249

Credit quality

The following table provides information about the credit quality of the Commercial loan portfolio, using the Company's internal rating system as an indicator. The internal rating system is a series of grades reflecting management's risk assessment, based on its analysis of the borrower's financial condition. The "pass" category consists of a range of loan grades that reflect increasing, though still acceptable, risk. Movement of risk through the various grade levels in the "pass" category is monitored for early identification of credit deterioration. The "special mention" rating is applied to loans where the borrower exhibits negative financial trends due to borrower specific or systemic conditions that, if left uncorrected, threaten its capacity to meet its debt obligations. The borrower is believed to have sufficient financial flexibility to react to and resolve its negative financial situation. It is a transitional grade that is closely monitored for improvement or deterioration. The "substandard" rating is applied to loans where the borrower exhibits well-defined weaknesses that jeopardize its continued performance and are of a severity that the distinct possibility of default exists. Loans are placed on "non-accrual" when management does not expect to collect payments consistent with acceptable and agreed upon terms of repayment.

The credit quality of Personal Banking loans is monitored primarily on the basis of aging/delinquency, and this information is provided in the table in the above "Delinquent and non-accrual loans" section. In addition, FICO scores are obtained and updated on a quarterly basis for most of the loans in the Personal Banking portfolio. This is a published credit score designed to measure the risk of default by taking into account various factors from a borrower's financial history. The Bank normally obtains a FICO score at the loan's origination and renewal dates, and updates are obtained on a quarterly basis. Excluded from the table below are certain Personal Banking loans for which FICO scores are not obtained because they generally pertain to commercial customer activities and are often underwritten with other collateral considerations. At June 30, 2017, these were comprised of \$227.4 million in personal real estate loans, or 4.4% of the Personal Banking portfolio, compared to \$237.2 million at December 31, 2016. For the remainder of loans in the Personal Banking portfolio, the table below shows the percentage of balances outstanding at June 30, 2017 and December 31, 2016 by FICO score.

Personal Banking Loans

Table of Contents

Troubled debt restructurings

As mentioned previously, the Company's impaired loans include loans which have been classified as troubled debt restructurings. Total restructured loans amounted to \$59.2 million at June 30, 2017. Restructured loans are those extended to borrowers who are experiencing financial difficulty and who have been granted a concession. Restructured loans are placed on non-accrual status if the Company does not believe it probable that amounts due under the contractual terms will be collected, and those non-accrual loans totaled \$7.4 million at June 30, 2017. Other performing restructured loans totaled \$51.8 million at June 30, 2017. These include certain business, construction and business real estate loans classified as substandard. Upon maturity, the loans renewed at interest rates judged not to be market rates for new debt with similar risk and as a result the loans were classified as troubled debt restructurings. These commercial loans totaled \$36.8 million at June 30, 2017. These restructured loans are performing in accordance with their modified terms, and because the Company believes it probable that all amounts due under the modified terms of the agreements will be collected, interest on these loans is being recognized on an accrual basis. Troubled debt restructurings also include certain credit card loans under various debt management and assistance programs, which totaled \$7.1 million at June 30, 2017. Modifications to credit card loans generally involve removing the available line of credit, placing loans on amortizing status, and lowering the contractual interest rate. The Company has classified additional loans as troubled debt restructurings because they were not reaffirmed by the borrower in bankruptcy proceedings. At June 30, 2017, these loans totaled \$7.6 million in personal real estate, revolving home equity, and consumer loans. Interest on these loans is being recognized on an accrual basis, as the borrowers are continuing to make payments under the terms of the loan agreements.

The following table shows the outstanding balances of loans classified as troubled debt restructurings at June 30, 2017, in addition to the outstanding balances of these restructured loans which the Company considers to have been in default at any time during the past twelve months. For purposes of this disclosure, the Company considers "default" to mean 90 days or more past due as to interest or principal.

(In thousands)	Balance 90 days past due at any time during previous 12 months
Commercial:	
Business	\$34,088\$ —
Real estate - construction and land	537 —
Real estate - business	7,710 —
Personal Banking:	
Real estate - personal	3,995 353
Consumer	5,149 50
Revolving home equity	582 47
Consumer credit card	7,111 649
Total restructured loans	\$59,172\$ 1,099

For those loans on non-accrual status also classified as restructured, the modification did not create any further financial effect on the Company as those loans were already recorded at net realizable value. For those performing commercial loans classified as restructured, there were no concessions involving forgiveness of principal or interest and, therefore, there was no financial impact to the Company as a result of modification to these loans. No financial impact resulted from those performing loans where the debt was not reaffirmed in bankruptcy, as no changes to loan

terms occurred in that process. The effects of modifications to consumer credit card loans were estimated to decrease interest income by approximately \$862 thousand on an annual, pre-tax basis, compared to amounts contractually owed.

The allowance for loan losses related to troubled debt restructurings on non-accrual status is determined by individual evaluation, including collateral adequacy, using the same process as loans on non-accrual status which are not classified as troubled debt restructurings. Those performing loans classified as troubled debt restructurings are accruing loans which management expects to collect under contractual terms. Performing commercial loans have had no other concessions granted other than being renewed at an interest rate judged not to be market. As such, they have similar risk characteristics as non-troubled debt commercial loans and are collectively evaluated based on internal risk rating, loan type, delinquency, historical experience and current economic factors. Performing personal banking loans classified as troubled debt restructurings resulted from the borrower not reaffirming the debt during bankruptcy and have had no other concession granted, other than the Bank's future limitations on collecting payment deficiencies or in pursuing foreclosure actions. As such, they have similar risk characteristics as non-troubled debt personal banking loans and are evaluated collectively based on loan type, delinquency, historical experience and current economic factors.

If a troubled debt restructuring defaults and is already on non-accrual status, the allowance for loan losses continues to be based on individual evaluation, using discounted expected cash flows or the fair value of collateral. If an accruing troubled debt

Table of Contents

restructuring defaults, the loan's risk rating is downgraded to non-accrual status and the loan's related allowance for loan losses is determined based on individual evaluation, or if necessary, the loan is charged off and collection efforts begun.

The Company had commitments of \$3.6 million at June 30, 2017 to lend additional funds to borrowers with restructured loans.

Loans held for sale

The Company designates certain long-term fixed rate personal real estate loans as held for sale, and the Company has elected the fair value option for these loans. The election of the fair value option aligns the accounting for these loans with the related economic hedges discussed in Note 10. The loans are primarily sold to FNMA, FHLMC, and GNMA. At June 30, 2017, the fair value of these loans was \$14.1 million, and the unpaid principal balance was \$13.6 million.

The Company also designates student loan originations as held for sale. The borrowers are credit-worthy students who are attending colleges and universities. The loans are intended to be sold in the secondary market, and the Company maintains contracts with Sallie Mae to sell the loans within 210 days after the last disbursement to the student. These loans are carried at lower of cost or fair value, which at June 30, 2017 totaled \$7.9 million.

At June 30, 2017, none of the loans held for sale were on non-accrual status or 90 days past due and still accruing.

Foreclosed real estate/repossessed assets

The Company's holdings of foreclosed real estate totaled \$515 thousand and \$366 thousand at June 30, 2017 and December 31, 2016, respectively. Personal property acquired in repossession, generally autos and marine and recreational vehicles, totaled \$2.4 million and \$2.2 million at June 30, 2017 and December 31, 2016, respectively. Upon acquisition, these assets are recorded at fair value less estimated selling costs at the date of foreclosure, establishing a new cost basis. They are subsequently carried at the lower of this cost basis or fair value less estimated selling costs.

3. Investment Securities

Investment securities, at fair value, consisted of the following at June 30, 2017 and December 31, 2016.

	June 30, 2017	December 31, 2016
(In thousands)		
Available for sale	\$9,439,701	\$9,649,203
Trading	22,291	22,225
Non-marketable	102,388	99,558
Total investment securities	\$9,564,380	\$9,770,986

Most of the Company's investment securities are classified as available for sale, and this portfolio is discussed in more detail below. The available for sale and the trading portfolios are carried at fair value. Securities which are classified as non-marketable include Federal Home Loan Bank (FHLB) stock and Federal Reserve Bank stock held for debt and regulatory purposes, which totaled \$47.1 million at June 30, 2017 and \$46.9 million at December 31, 2016.

Investment in Federal Reserve Bank stock is based on the capital structure of the investing bank, and investment in FHLB stock is tied to the level of borrowings from the FHLB. These holdings are carried at cost. Non-marketable securities also include private equity investments, which amounted to \$55.0 million at June 30, 2017 and \$52.3 million at December 31, 2016. In the absence of readily ascertainable market values, these securities are carried at estimated fair value.

Table of Contents

A summary of the available for sale investment securities by maturity groupings as of June 30, 2017 is shown below. The investment portfolio includes agency mortgage-backed securities, which are guaranteed by agencies such as the FHLMC, FNMA, GNMA and FDIC, in addition to non-agency mortgage-backed securities, which have no guarantee but are collateralized by residential mortgages. Also included are certain other asset-backed securities, which are primarily collateralized by credit cards, automobiles, student loans, and commercial loans. These securities differ from traditional debt securities primarily in that they may have uncertain maturity dates and are priced based on estimated prepayment rates on the underlying collateral.

(In thousands)	Amortized Cost	Fair Value
U.S. government and federal agency obligations:		
Within 1 year	\$58,665	\$58,829
After 1 but within 5 years	499,601	502,990
After 5 but within 10 years	318,318	318,212

Other debt securities:		
Within 1 year	13,387	13,389
After 1 but within 5 years	176,199	177,812
After 5 but within 10 years	125,910	126,503
Total other debt securities	315,496	317,704
Equity securities	5,463	47,847
Total available for sale investment securities	\$9,341,771	\$9,439,701

Investments in U.S. government and federal agency obligations include U.S. Treasury inflation-protected securities, which totaled \$432.0 million, at fair value, at June 30, 2017. Interest paid on these securities increases with inflation and decreases with deflation, as measured by the Consumer Price Index. Included in state and municipal obligations are \$16.8 million, at fair value, of auction rate securities, which were purchased from bank customers in 2008. Interest on these bonds is currently being paid at the maximum failed auction rates. Included in equity securities is common and preferred stock held by the holding company, Commerce Bancshares, Inc. (the Parent), with a fair value of \$47.7 million at June 30, 2017.

Table of Contents

For securities classified as available for sale, the following table shows the unrealized gains and losses (pre-tax) in accumulated other comprehensive income, by security type.

(In thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Total	\$9,600,330	\$ 109,815	\$(60,942)	\$9,649,203

The Company's impairment policy requires a review of all securities for which fair value is less than amortized cost. Special emphasis and analysis is placed on securities whose credit rating has fallen below A3 (Moody's) or A- (Standard & Poor's), whose fair values have fallen more than 20% below purchase price for an extended period of time, or have been identified based on management's judgment. These securities are placed on a watch list, and for all such securities, cash flow analyses are prepared. For more complex analyses, detailed cash flow models are prepared which use inputs specific to each security. Inputs to these models include factors such as cash flow received, contractual payments required, and various other information related to the underlying collateral (including current delinquencies), collateral loss severity rates (including loan to values), expected delinquency rates, credit support from other tranches, and prepayment speeds. Stress tests are performed at varying levels of delinquency rates, prepayment speeds and loss severities in order to gauge probable ranges of credit loss. At June 30, 2017, the fair value of securities on this watch list was \$68.9 million compared to \$79.6 million at December 31, 2016.

As of June 30, 2017, the Company had recorded other-than-temporary impairment (OTTI) on certain non-agency mortgage-backed securities, part of the watch list mentioned above, which had an aggregate fair value of \$30.3 million. The cumulative credit-related portion of the impairment on these securities, which was recorded in earnings, totaled \$14.3 million. The Company does not intend to sell these securities and believes it is not likely that it will be required to sell the securities before the recovery of their amortized cost.

The credit-related portion of the loss on these securities was based on the cash flows projected to be received over the estimated life of the securities, discounted to present value, and compared to the current amortized cost bases of the securities. Significant inputs to the cash flow models used to calculate the credit losses on these securities at June 30, 2017 included the following:

Significant Inputs	Range
Prepayment CPR	4% -25%
Projected cumulative default	14%-51%
Credit support	0% -38%
Loss severity	16%-63%

Table of Contents

The following table presents a rollforward of the cumulative OTTI credit losses recognized in earnings on all available for sale debt securities.

(In thousands)	For the Six Months Ended June 30	
	2017	2016
Cumulative OTTI credit losses at January 1	\$ 14,080	\$ 14,129
Credit losses on debt securities for which impairment was not previously recognized	46	—
Credit losses on debt securities for which impairment was previously recognized	274	270
Increase in expected cash flows that are recognized over remaining life of security	(146)	(37)
Cumulative OTTI credit losses at June 30	\$ 14,254	\$ 14,362

Securities with unrealized losses recorded in accumulated other comprehensive income are shown in the table below, along with the length of the impairment period.

(In thousands)	Less than 12 months		12 months or longer		Total Fair Value	Unrealized Losses

The Company's holdings of state and municipal obligations included gross unrealized losses of \$2.0 million at June 30, 2017, of which \$230 thousand related to auction rate securities. This portfolio totaled \$1.8 billion at fair value, or 18.8% of total available for sale securities. The average credit quality of the portfolio, excluding auction rate securities, is Aa2 as rated by Moody's. The portfolio is diversified in order to reduce risk, and the Company has processes and procedures in place to monitor its holdings, identify signs of financial distress and, if necessary, exit its positions in a timely manner.

Table of Contents

The following tables present proceeds from sales of securities and the components of investment securities gains and losses which have been recognized in earnings.

(In thousands)	For the Six Months Ended June 30	
	2017	2016
Proceeds from sales of securities:		
Available for sale	\$4,972	\$—
Non-marketable	1,580	2,071

Losses realized on called bonds	\$(254)	\$—
Losses realized on sales	(22)	—
Gains realized on donations	4,315	—
Other-than-temporary impairment recognized on debt securities	(320)	(270)
Non-marketable:		
Gains realized on sales	642	2,260
Losses realized on sales	(652)	—
Fair value adjustments, net	(2,830)	(3,729)
Total gains (losses), net	\$879	\$(1,739)

At June 30, 2017, securities totaling \$3.9 billion in fair value were pledged to secure public fund deposits, securities sold under agreements to repurchase, trust funds, and borrowings at the Federal Reserve Bank and FHLB. Securities pledged under agreements pursuant to which the collateral may be sold or re-pledged by the secured parties approximated \$719.8 million, while the remaining securities were pledged under agreements pursuant to which the secured parties may not sell or re-pledge the collateral. Except for obligations of various government-sponsored enterprises such as FNMA, FHLB and FHLMC, no investment in a single issuer exceeded 10% of stockholders' equity.

Table of Contents

4. Goodwill and Other Intangible Assets

The following table presents information about the Company's intangible assets which have estimable useful lives.

(In thousands)	June 30, 2017				December 31, 2016			
	Gross Carrying Amount	Accumulated Amortization	Valuation Allowance	Net Amount	Gross Carrying Amount	Accumulated Amortization	Valuation Allowance	Net Amount
Amortizable intangible assets:								
Core deposit premium	\$31,270	\$ (27,914)	\$ —	\$ 3,356	\$31,270	\$ (27,429)	\$ —	\$ 3,841
Mortgage servicing rights	6,637	(2,975)	(16)	3,646	5,672	(2,782)	(22)	2,868
Total	\$37,907	\$ (30,889)	\$ (16)	\$ 7,002	\$36,942	\$ (30,211)	\$ (22)	\$ 6,709

Aggregate amortization expense on intangible assets was \$330 thousand and \$399 thousand for the three month periods ended June 30, 2017 and 2016, respectively, and \$678 thousand and \$794 thousand for the six month periods ended June 30, 2017 and 2016, respectively. The following table shows the estimated annual amortization expense for the next five fiscal years. This expense is based on existing asset balances and the interest rate environment as of June 30, 2017. The Company's actual amortization expense in any given period may be different from the estimated amounts depending upon the acquisition of intangible assets, changes in mortgage interest rates, prepayment rates and other market conditions.

(In thousands)	
2017	\$1,141
2018	1,091
2019	917
2020	765
2021	651

Changes in the carrying amount of goodwill and net other intangible assets for the six month period ended June 30, 2017 is as follows:

(In thousands)	Goodwill	Core Deposit Premium	Mortgage Servicing Rights
Balance January 1, 2017	\$138,921	\$ 3,841	\$ 2,868
Originations	—	—	965

Impairment reversal	—	—	6
Balance June 30, 2017	\$138,921	\$ 3,356	\$ 3,646

Goodwill allocated to the Company's operating segments at June 30, 2017 and December 31, 2016 is shown below.

(In thousands)	
Consumer segment	\$70,721
Commercial segment	67,454
Wealth segment	746
Total goodwill	\$138,921

5. Guarantees

The Company, as a provider of financial services, routinely issues financial guarantees in the form of financial and performance standby letters of credit. Standby letters of credit are contingent commitments issued by the Company generally to guarantee the payment or performance obligation of a customer to a third party. While these represent a potential outlay by the Company, a significant amount of the commitments may expire without being drawn upon. The Company has recourse against the customer for any amount it is required to pay to a third party under a standby letter of credit. The letters of credit are subject to the same credit policies, underwriting standards and approval process as loans made by the Company. Most of the standby letters of credit are secured, and in the event of nonperformance by customers, the Company has rights to the underlying collateral, which could include commercial real estate, physical plant and property, inventory, receivables, cash and marketable securities.

Table of Contents

Upon issuance of standby letters of credit, the Company recognizes a liability for the fair value of the obligation undertaken, which is estimated to be equivalent to the amount of fees received from the customer over the life of the agreement. At June 30, 2017, that net liability was \$2.1 million, which will be accreted into income over the remaining life of the respective commitments. The contractual amount of these letters of credit, which represents the maximum potential future payments guaranteed by the Company, was \$338.8 million at June 30, 2017.

The Company periodically enters into credit risk participation agreements (RPAs) as a guarantor to other financial institutions, in order to mitigate those institutions' credit risk associated with interest rate swaps with third parties. The RPA stipulates that, in the event of default by the third party on the interest rate swap, the Company will reimburse a portion of the loss borne by the financial institution. These interest rate swaps are normally collateralized (generally with real property, inventories and equipment) by the third party, which limits the credit risk associated with the Company's RPAs. The third parties usually have other borrowing relationships with the Company. The Company monitors overall borrower collateral and at June 30, 2017, believes sufficient collateral is available to cover potential swap losses. The RPAs are carried at fair value throughout their term with all changes in fair value, including those due to a change in the third party's creditworthiness, recorded in current earnings. The terms of the RPAs, which correspond to the terms of the underlying swaps, range from 3 to 11 years. At June 30, 2017, the fair value of the Company's guarantee liabilities for RPAs was \$139 thousand, and the notional amount of the underlying swaps was \$75.3 million. The maximum potential future payment guaranteed by the Company cannot be readily estimated but is dependent upon the fair value of the interest rate swaps at the time of default.

6. Pension

The amount of net pension cost is shown in the table below:

	For the Three Months Ended June 30		For the Six Months Ended June 30	
(In thousands)	2017	2016	2017	2016
Service cost - benefits earned during the period	\$ 128	\$ 138	\$ 257	\$ 271
Interest cost on projected benefit obligation	973	1,005	1,946	1,972
Expected return on plan assets	(1,438)	(1,439)	(2,876)	(2,876)
Amortization of prior service cost	(68)	(67)	(136)	(135)
Amortization of unrecognized net loss	617	642	1,234	1,293
Net periodic pension cost	\$ 212	\$ 279	\$ 425	\$ 525

Substantially all benefits accrued under the Company's defined benefit pension plan were frozen effective January 1, 2005, and the remaining benefits were frozen effective January 1, 2011. During the first six months of 2017, the Company made no funding contributions to its defined benefit pension plan and made minimal funding contributions to a supplemental executive retirement plan (the CERP), which carries no segregated assets. The Company has no plans to make any further contributions, other than those related to the CERP, during the remainder of 2017.

Table of Contents

7. Common Stock *

Presented below is a summary of the components used to calculate basic and diluted income per share. The Company applies the two-class method of computing income per share, as nonvested share-based awards that contain nonforfeitable rights to dividends are considered securities which participate in undistributed earnings with common stock. The two-class method requires the calculation of separate income per share amounts for the nonvested share-based awards and for common stock. Income per share attributable to common stock is shown in the table below. Nonvested share-based awards are further discussed in Note 12.

	For the Three Months Ended June 30		For the Six Months Ended June 30	
	2017	2016	2017	2016
(In thousands, except per share data)				
Basic income per common share:				
Net income attributable to Commerce Bancshares, Inc.	\$78,960	\$69,893	\$150,464	\$135,267
Less preferred stock dividends	2,250	2,250	4,500	4,500
Net income available to common shareholders	\$76,710	\$67,643	145,964	130,767
Less income allocated to nonvested restricted stock	943	940	1,888	1,834
Net income allocated to common stock	\$75,767	\$66,703	\$144,076	\$128,933
Weighted average common shares outstanding	100,555	100,151	100,463	100,247
Basic income per common share	\$.75	\$.67	\$1.43	\$1.29
Diluted income per common share:				
Net income available to common shareholders	\$76,710	\$67,643	\$145,964	\$130,767
Less income allocated to nonvested restricted stock	941	938	1,883	1,831
Net income allocated to common stock	\$75,769	\$66,705	\$144,081	\$128,936
Weighted average common shares outstanding	100,555	100,151	100,463	100,247
Net effect of the assumed exercise of stock-based awards - based on the treasury stock method using the average market price for the respective periods	344	261	370	245
Weighted average diluted common shares outstanding	100,899	100,412	100,833	100,492
Diluted income per common share	\$.75	\$.66	\$1.43	\$1.28

Unexercised stock appreciation rights of 126 thousand and 208 thousand were excluded in the computation of diluted income per common share for the six month periods ended June 30, 2017 and 2016, respectively, because their inclusion would have been anti-dilutive.

* All prior year share and per share amounts in this note have been restated for the 5% common stock dividend distributed in December 2016.

Table of Contents

8. Accumulated Other Comprehensive Income

The table below shows the activity and accumulated balances for components of other comprehensive income. The largest component is the unrealized holding gains and losses on available for sale securities. Unrealized gains and losses on debt securities for which an other-than-temporary impairment (OTTI) has been recorded in current earnings are shown separately below. The other component is the amortization from other comprehensive income of losses associated with pension benefits, which occurs as the losses are included in current net periodic pension cost.

(In thousands)	Unrealized Gains (Losses) on Securities (1)		Pension Loss (2)	Total Accumulated Other Comprehensive Income
	OTTI	Other		
Balance January 1, 2017	\$2,975	\$27,328	\$(19,328)	\$ 10,975

Income tax expense	(105))18,536)417)19,058
Current period other comprehensive income, net of tax	171	30,243	681	31,095
Transfer of unrealized gain on securities for which impairment was not previously recognized	24	(24))—	—
Balance June 30, 2017	\$3,170	\$57,547	\$(18,647)	\$ 42,070
Balance January 1, 2016	\$3,316	\$49,750	\$(20,596)	\$ 32,470
Other comprehensive income (loss) before reclassifications	(911))163,925	—	163,014
Amounts reclassified from accumulated other comprehensive income	270	—	1,158	1,428
Current period other comprehensive income (loss), before tax	(641))163,925	1,158	164,442
Income tax (expense) benefit	243	(62,291))440)62,488
Current period other comprehensive income (loss), net of tax	(398))101,634	718	101,954
Balance June 30, 2016	\$2,918	\$151,384	\$(19,878)	\$ 134,424

(1) The pre-tax amounts reclassified from accumulated other comprehensive income are included in "investment securities gains (losses), net" in the consolidated statements of income.

(2) The pre-tax amounts reclassified from accumulated other comprehensive income are included in the computation of net periodic pension cost as "amortization of prior service cost" and "amortization of unrecognized net loss" (see Note 6), for inclusion in the consolidated statements of income.

9. Segments

The Company segregates financial information for use in assessing its performance and allocating resources among three operating segments: Consumer, Commercial and Wealth. The Consumer segment consists of various consumer loan and deposit products offered through its retail branch network of approximately 180 locations. This segment also includes indirect and other consumer loan financing businesses, along with debit and credit card loan and fee businesses. Residential mortgage origination, sales and servicing functions are included in this consumer segment, but residential mortgage loans retained by the Company are not considered part of this segment. The Commercial segment provides corporate lending, leasing, and international services, along with business and governmental deposit products and commercial cash management services. This segment includes both merchant and commercial bank card products. It also includes the Capital Markets Group which sells fixed income securities and provides safekeeping and accounting services to its business and correspondent bank customers. The Wealth segment provides traditional trust and estate planning, advisory and discretionary investment management, and brokerage services. This segment also provides various loan and deposit related services to its private banking customers.

Table of Contents

The following table presents selected financial information by segment and reconciliations of combined segment totals to consolidated totals. There were no material intersegment revenues among the three segments. Management periodically makes changes to methods of assigning costs and income to its business segments to better reflect operating results. If appropriate, these change are reflected in prior year information presented below.

(In thousands)	Consumer	Commercial	Wealth	Segment Totals	Other/Elimination	Consolidated Totals
Three Months Ended June 30, 2017

The information presented above was derived from the internal profitability reporting system used by management to monitor and manage the financial performance of the Company. This information is based on internal management accounting procedures and methods, which have been developed to reflect the underlying economics of the businesses. The methodologies are applied in connection with funds transfer pricing and assignment of overhead costs among segments. Funds transfer pricing was used in the determination of net interest income by assigning a standard cost (credit) for funds used (provided) by assets and liabilities based on their maturity, prepayment and/or repricing characteristics.

The segment activity, as shown above, includes both direct and allocated items. Amounts in the “Other/Elimination” column include activity not related to the segments, such as that relating to administrative functions, the investment securities portfolio, and the effect of certain expense allocations to the segments. The provision for loan losses in this category contains the difference between net loan charge-offs assigned directly to the segments and the recorded provision for loan loss expense. Included in this category’s net interest income are earnings of the investment portfolio, which are not allocated to a segment.

The performance measurement of the operating segments is based on the management structure of the Company and is not necessarily comparable with similar information for any other financial institution. The information is also not necessarily indicative of the segments' financial condition and results of operations if they were independent entities.

Table of Contents

10. Derivative Instruments

The notional amounts of the Company's derivative instruments are shown in the table below. These contractual amounts, along with other terms of the derivative, are used to determine amounts to be exchanged between counterparties and are not a measure of loss exposure. The Company's derivative instruments are accounted for as free-standing derivatives, and changes in their fair value are recorded in current earnings.

	June 30,	December 31,
(In thousands)	2017	2016
Interest rate swaps	\$ 1,693,637	\$ 1,685,099
Interest rate caps	32,890	59,379
Credit risk participation agreements	118,081	121,514
Foreign exchange contracts	5,556	4,046
Mortgage loan commitments	29,429	12,429
Mortgage loan forward sale contracts	1,026	6,626
Forward TBA contracts	43,000	15,000
Total notional amount	\$ 1,923,619	\$ 1,904,093

The largest group of notional amounts relate to interest rate swap contracts sold to commercial customers who wish to modify their interest rate sensitivity. These swaps are offset by matching contracts purchased by the Company from other financial dealer institutions. Contracts with dealers that require central clearing are novated to a regulated clearing organization who becomes the Company's legal counterparty. Because of the matching terms of the offsetting contracts, in addition to collateral provisions which mitigate the impact of non-performance risk, changes in fair value subsequent to initial recognition have a minimal effect on earnings.

Many of the Company's interest rate swap contracts with large financial institutions contain contingent features relating to debt ratings or capitalization levels. Under these provisions, if the Company's debt rating falls below investment grade or if the Company ceases to be "well-capitalized" under risk-based capital guidelines, certain counterparties can require immediate and ongoing collateralization on interest rate swaps in net liability positions or instant settlement of the contracts. The Company maintains debt ratings and capital well above these minimum requirements.

The Company also contracts with other financial institutions, as a guarantor or beneficiary, to share credit risk associated with certain interest rate swaps through risk participation agreements. The Company's risks and responsibilities as guarantor are further discussed in Note 5 on Guarantees. In addition, the Company enters into foreign exchange contracts, which are mainly comprised of contracts to purchase or deliver foreign currencies for customers at specific future dates.

Under its program to sell residential mortgage loans in the secondary market, the Company designates certain newly-originated residential mortgage loans as held for sale. Derivative instruments arising from this activity include mortgage loan commitments and forward loan sale commitments. Changes in the fair values of the loan commitments and funded loans prior to sale that are due to changes in interest rates are economically hedged with forward contracts to sell residential mortgage-backed securities in the to-be-announced (TBA) market. These forward TBA contracts are also considered to be derivatives and are settled in cash at the security settlement date.

Table of Contents

The fair values of the Company's derivative instruments, whose notional amounts are listed above, are shown in the table below. Derivative instruments with a positive fair value (asset derivatives) are reported in other assets in the consolidated balance sheets, while derivative instruments with a negative fair value (liability derivatives) are reported in other liabilities in the consolidated balance sheets. Information about the valuation methods used to determine fair value is provided in Note 13 on Fair Value Measurements.

(In thousands)	Asset		Liability	
	Derivatives		Derivatives	
	June 30, 2017	Dec. 31, 2016	June 30, 2017	Dec. 31, 2016
	Fair Value		Fair Value	
Derivative instruments:				
Interest rate swaps	\$10,887	\$12,987	\$(5,987)	\$(12,987)
Interest rate caps	34	78	(34)	(78)
Credit risk participation agreements	58	65	(139)	(156)
Foreign exchange contracts	39	66	(53)	(4)
Mortgage loan commitments	872	355	—	(6)
Mortgage loan forward sale contracts	—	—	—	(63)
Forward TBA contracts	137	15	(34)	(45)
Total	\$12,027	\$13,566	\$(6,247)	\$(13,339)

Due to rule changes by the Company's clearing counterparty effective January 2017, collateral previously recorded in "other assets" has been reclassified and offset against the fair values of cleared swaps, such that at June 30, 2017, the positive fair values of cleared swaps were reduced by \$2.4 million and the negative fair values of cleared swaps were reduced by \$7.3 million, as reflected in the table above.

The effects of derivative instruments on the consolidated statements of income are shown in the table below.

(In thousands)	Location of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain or (Loss) Recognized in Income on Derivatives			
		For the Three Months Ended June 30		For the Six Months Ended June 30	
		2017	2016	2017	2016
Derivative instruments:					
Interest rate swaps	Other non-interest income	\$456	\$769	\$599	\$2,995
Credit risk participation agreements	Other non-interest income	1	(23)	11	(58)
Foreign exchange contracts	Other non-interest income	(55)	57	(75)	8

Forward TBA contracts	Loan fees and sales	(160)	(397)	(258)	(726)
Total		\$206	\$426	\$861	\$2,746

The following table shows the extent to which assets and liabilities relating to derivative instruments have been offset in the consolidated balance sheets. It also provides information about these instruments which are subject to an enforceable master netting arrangement, irrespective of whether they are offset, and the extent to which the

instruments could potentially be offset. Also shown is collateral received or pledged in the form of other financial instruments, which is generally cash or marketable securities. The collateral amounts in this table are limited to the outstanding balances of the related asset or liability (after netting is applied); thus amounts of excess collateral are not shown. Most of the derivatives in the following table were transacted under master netting arrangements that contain a conditional right of offset, such as close-out netting, upon default.

Table of Contents

The Company is party to master netting arrangements with most of its swap derivative counterparties; however, the Company does not offset derivative assets and liabilities under these arrangements on its consolidated balance sheet. Collateral, usually in the form of marketable securities, is exchanged between the Company and dealer bank counterparties and is generally subject to thresholds and transfer minimums. By contract, it may be sold or re-pledged by the secured party until recalled at a subsequent valuation date by the pledging party. For those swap transactions requiring central clearing, the Company posts cash and securities to its clearing agent. Collateral positions are valued daily, and adjustments to amounts received and pledged by the Company are made as appropriate to maintain proper collateralization for these transactions. Swap derivative transactions with customers are generally secured by rights to non-financial collateral, such as real and personal property, which is not shown in the table below.

(In thousands)	Gross Amount Recognized	Gross Amounts Not Offset in the Balance Sheet				Net Amount
		Gross Amounts Offset in the Balance Sheet	Net Amounts Presented in the Balance Sheet	Financial Instruments Available for Offset	Collateral Received/Pledged	
June 30, 2017

11. Resale and Repurchase Agreements

The following table shows the extent to which assets and liabilities relating to securities purchased under agreements to resell (resale agreements) and securities sold under agreements to repurchase (repurchase agreements) have been offset in the consolidated balance sheets, in addition to the extent to which they could potentially be offset. Also shown is collateral received or pledged, which consists of marketable securities. The collateral amounts in the table are limited to the outstanding balances of the related asset or liability (after netting is applied); thus amounts of excess collateral are not shown. The agreements in the following table were transacted under master netting arrangements that contain a conditional right of offset, such as close-out netting, upon default.

Resale and repurchase agreements are agreements to purchase/sell securities subject to an obligation to resell/repurchase the same or similar securities. They are accounted for as collateralized financing transactions, not as sales and purchases of the securities portfolio. The securities collateral accepted or pledged in resale and repurchase agreements with other financial institutions also may be sold or re-pledged by the secured party, but is usually delivered to and held by third party trustees. The Company generally retains custody of securities pledged for repurchase agreements with customers.

Table of Contents

The Company is party to several agreements commonly known as collateral swaps. These agreements involve the exchange of collateral under simultaneous repurchase and resale agreements with the same financial institution counterparty. These repurchase and resale agreements have the same principal amounts, inception dates, and maturity dates and have been offset against each other in the consolidated balance sheets, as permitted under the netting provisions of ASC 210-20-45. The collateral swaps totaled \$700.0 million at June 30, 2017 and \$550.0 million at December 31, 2016. At June 30, 2017, the Company had posted collateral of \$718.1 million in marketable securities, consisting of agency mortgage-backed bonds and treasuries, and had accepted \$724.4 million in investment grade asset-backed, commercial mortgage-backed, and corporate bonds.

(In thousands)	Gross Amount Recognized	Gross Amounts Offset in the Balance Sheet	Net Amounts Presented in the Balance Sheet	Gross Amounts Not Offset in the Balance Sheet		Net Amount

Government-sponsored enterprise obligations	147,694	—	3,237	150,931
Agency mortgage-backed securities	693,851	24,380	252,473	970,704

Asset-backed securities	474,830	30,000	—	504,830
Total repurchase agreements, gross amount recognized	\$1,610,975	\$54,380	\$555,710	\$2,221,065

12. Stock-Based Compensation

The Company issues stock-based compensation in the form of nonvested restricted stock and stock appreciation rights (SARs). Most of the awards are issued during the first quarter of each year. The stock-based compensation expense that has been charged against income was \$3.1 million and \$2.9 million in the three months ended June 30, 2017 and 2016, respectively, and \$6.2 million and \$6.3 million in the six months ended June 30, 2017 and 2016, respectively.

The Company adopted ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting," on January 1, 2017. The Company elected to change its method of accounting for forfeitures, as allowed by this guidance. In 2016 and prior years, accruals of compensation cost were reduced by an estimate of awards not expected to vest and further adjusted when actual forfeitures occurred. In 2017 and subsequent years, forfeitures will be accounted for when they occur and recognized in

Table of Contents

compensation cost at that time. The effect of this change, which was recognized as a cumulative-effect adjustment on January 1, 2017, increased equity and increased deferred tax assets by approximately \$1.3 million. ASU 2016-09 also changed the classification of excess tax benefits and deficiencies arising from stock-based payment transactions, resulting in reductions in income tax expense of \$4.5 million in the first quarter of 2017 and \$1.6 million in the second quarter of 2017.

Nonvested stock awards generally vest in 4 to 7 years and contain restrictions as to transferability, sale, pledging, or assigning, among others, prior to the end of the vesting period. Dividend and voting rights are conferred upon grant. A summary of the status of the Company's nonvested share awards as of June 30, 2017, and changes during the six month period then ended, is presented below.

	Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2017	1,392,451	\$34.67
Granted	233,520	57.32
Vested	(394,130)	30.79
Forfeited	(9,388)	38.78
Nonvested at June 30, 2017	1,222,453	\$40.22

SARs are granted with exercise prices equal to the market price of the Company's stock at the date of grant. SARs vest ratably over 4 years of continuous service and have 10-year contractual terms. All SARs must be settled in stock under provisions of the plan. In determining compensation cost, the Black-Scholes option-pricing model is used to estimate the fair value of SARs on date of grant. The current year per share average fair value and the model assumptions are shown in the table below.

Weighted per share average fair value at grant date \$12.54

Assumptions:

Dividend yield	1.6	%
Volatility	21.1	%
Risk-free interest rate	2.4	%
Expected term	7.0	years

A summary of SAR activity during the first six months of 2017 is presented below.

(Dollars in thousands, except per share data)	Rights	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2017	1,324,954	\$34.53		
Granted	165,592	57.53		
Forfeited	(4,182)	42.82		
Expired	(797)	36.22		
Exercised	(263,503)	30.58		
Outstanding at June 30, 2017	1,222,064	\$38.47	6.5 years	\$ 22,583

Table of Contents

13. Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain financial and nonfinancial assets and liabilities and to determine fair value disclosures. Various financial instruments such as available for sale and trading securities, certain non-marketable securities relating to private equity activities, and derivatives are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets and liabilities on a nonrecurring basis, such as mortgage servicing rights and certain other investment securities. These nonrecurring fair value adjustments typically involve lower of cost or fair value accounting or write-downs of individual assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Depending on the nature of the asset or liability, the Company uses various valuation techniques and assumptions when estimating fair value. For accounting disclosure purposes, a three-level valuation hierarchy of fair value measurements has been established. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

Level 1 – inputs to the valuation methodology are quoted prices for identical assets or liabilities in active markets.
Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, and inputs that are observable for the assets or liabilities, either directly or indirectly (such as interest rates, yield curves, and prepayment speeds).
Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value. These may be internally developed, using the Company's best information and assumptions that a market participant would consider. The valuation methodologies for assets and liabilities measured at fair value on a recurring and non-recurring basis are described in the Fair Value Measurements note in the Company's 2016 Annual Report on Form 10-K. There have been no significant changes in these methodologies since then, except for a change in the valuation of cleared interest rate swaps as discussed in Note 10.

Table of Contents

Instruments Measured at Fair Value on a Recurring Basis

The table below presents the June 30, 2017 and December 31, 2016 carrying values of assets and liabilities measured at fair value on a recurring basis. There were no transfers among levels during the first six months of 2017 or the year ended December 31, 2016.

(In thousands)	Total Fair Value	Fair Value Measurements Using

Total gains or losses included in earnings	\$527	\$ (58)	\$ (3,724)	\$(3,255)
Change in unrealized gains or losses relating to assets still held at June 30, 2016	\$790	\$ (58)	\$ (3,724)	\$(2,992)

Level 3 Inputs

The Company's significant Level 3 measurements which employ unobservable inputs that are readily quantifiable pertain to auction rate securities (ARS) held by the Bank, investments in portfolio concerns held by the Company's private equity subsidiaries, and held for sale residential mortgage loan commitments. ARS are included in state and municipal securities and totaled \$16.8 million at June 30, 2017, while private equity investments, included in non-marketable securities, totaled \$53.6 million.

Information about these inputs is presented in the table and discussions below.

Quantitative Information about Level 3 Fair Value Measurements

	Valuation Technique	Unobservable Input	Range	Weighted Average
Auction rate securities	Discounted cash flow	Estimated market recovery period	5 years	
		Estimated market rate	2.8% -3.1%	
Private equity investments	Market comparable companies	EBITDA multiple	4.0 -5.8	
Mortgage loan commitments	Discounted cash flow	Probability of funding	53.0%-99.3%	80.2%
		Embedded servicing value	(.2)% -2.2%	1.0%

Table of Contents

Instruments Measured at Fair Value on a Nonrecurring Basis

For assets measured at fair value on a nonrecurring basis during the first six months of 2017 and 2016, and still held as of June 30, 2017 and 2016, the following table provides the adjustments to fair value recognized during the respective periods, the level of valuation inputs used to determine each adjustment, and the carrying value of the related individual assets or portfolios at June 30, 2017 and 2016.

(In thousands)	Fair Value	Fair Value Measurements Using		Total Gains (Losses) Recognized During the Six Months Ended June 30	
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)		Significant Unobservable Inputs (Level 3)
June 30, 2017					
Collateral dependent impaired loans	\$2,044	\$ —	—	—\$ 2,044	\$ (550)
Mortgage servicing rights	3,646	—	—	3,646	6
Foreclosed assets	75	—	—	75	(58)
Long-lived assets	1,834	—	—	1,834	(343)
June 30, 2016					
Collateral dependent impaired loans	\$5,001	\$ —	—	—\$ 5,001	\$ (1,491)
Mortgage servicing rights	2,191	—	—	2,191	(2)

14. Fair Value of Financial Instruments

The carrying amounts and estimated fair values of financial instruments held by the Company are set forth below. Fair value estimates are made at a specific point in time based on relevant market information. They do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for many of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, risk characteristics and economic conditions. These estimates are subjective, involve uncertainties, and cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

The methods and inputs used in the estimation of fair value for the financial instruments in the table below are discussed in the Fair Value Measurements and the Fair Value of Financial Instruments notes in the Company's 2016 Annual Report on Form 10-K. There have been no significant changes in these methods and inputs since December 31, 2016, except as mentioned in Note 10 on Derivatives.

Table of Contents

The estimated fair values of the Company's financial instruments and the classification of their fair value measurement within the valuation hierarchy are as follows:

(In thousands)	Fair Value Hierarchy Level	June 30, 2017		December 31, 2016	
		Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial Assets					
Loans:					
Business	Level 3	\$4,852,408	\$4,866,125	\$4,776,365	\$4,787,469

15. Legal and Regulatory Proceedings

On August 15, 2014, a customer filed a class action complaint against the Bank in the Circuit Court, Jackson County, Missouri. The case is Cassandra Warren, et al v. Commerce Bank (Case No. 1416-CV19197). In the case, the customer alleges violation of the Missouri usury statute in connection with the Bank charging overdraft fees in

connection with point-of-sale/debit and automated-teller machine cards. The class was certified and consists of Missouri customers of the Bank who may have been similarly affected. The case has been stayed pending the final outcome of a similar case in which a ruling has been made in favor of the bank defendant. The Company believes that the stay will remain in effect until any appeals in the similar case have run their course. The Company believes the Warren complaint lacks merit and will defend itself vigorously. The amount of any ultimate exposure cannot be determined with certainty at this time.

The Company has been in ongoing discussions with the U.S. Department of Labor concerning an investigation involving ERISA regulations related to a managed trust account. The investigation concluded in a non-material settlement between the Company and the U.S. Department of Labor during July 2017.

Table of Contents

The Company has various other legal proceedings pending at June 30, 2017, arising in the normal course of business. While some matters pending against the Company specify damages claimed by plaintiffs, others do not seek a specified amount of damages or are at very early stages of the legal process. The Company records a loss accrual for all legal and regulatory matters for which it deems a loss is probable and can be reasonably estimated. Some matters, which are in the early stages, have not yet progressed to the point where a loss amount can be determined to be probable and estimable.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with the consolidated financial statements and related notes and with the statistical information and financial data appearing in this report as well as the Company's 2016 Annual Report on Form 10-K. Results of operations for the three and six month periods ended June 30, 2017 are not necessarily indicative of results to be attained for any other period.

Forward-Looking Information

This report may contain "forward-looking statements" that are subject to risks and uncertainties and include information about possible or assumed future results of operations. Many possible events or factors could affect the future financial results and performance of the Company. This could cause results or performance to differ materially from those expressed in the forward-looking statements. Words such as "expects", "anticipates", "believes", "estimates", variations of such words and other similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Therefore, actual outcomes and results may differ materially from what is expressed or forecasted in, or implied by, such forward-looking statements. Readers should not rely solely on the forward-looking statements and should consider all uncertainties and risks discussed throughout this report. Forward-looking statements speak only as of the date they are made. The Company does not undertake to update forward-looking statements to reflect circumstances or events that occur after the date the forward-looking statements are made or to reflect the occurrence of unanticipated events. Such possible events or factors include: changes in economic conditions in the Company's market area, changes in policies by regulatory agencies, governmental legislation and regulation, fluctuations in interest rates, changes in liquidity requirements, demand for loans in the Company's market area, changes in accounting and tax principles, estimates made on income taxes, competition with other entities that offer financial services, and such other factors as discussed in Part I Item 1A - "Risk Factors" and Part II Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's 2016 Annual Report on Form 10-K.

Critical Accounting Policies

The Company has identified several policies as being critical because they require management to make particularly difficult, subjective and/or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different conditions or using different assumptions. These policies relate to the allowance for loan losses, the valuation of certain investment securities, and accounting for income taxes. A discussion of these policies can be found in the sections captioned "Critical Accounting Policies" and "Allowance for Loan Losses" in Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's 2016 Annual Report on Form 10-K. There have been no changes in the Company's application of critical accounting policies since December 31, 2016.

* Restated for the 5% stock dividend distributed in December 2016.

(1) Includes loans held for sale.

(2) Revenue includes net interest income and non-interest income.

(3) The efficiency ratio is calculated as non-interest expense (excluding intangibles amortization) as a percent of revenue.

(4) The tangible common equity to tangible assets ratio is a measurement which management believes is a useful indicator of capital adequacy and utilization. It provides a meaningful basis for period to period and company to company comparisons, and also assists regulators, investors and analysts in analyzing the financial position of the Company. Tangible common equity and tangible assets are non-GAAP measures and should not be viewed as substitutes for, or superior to, data prepared in accordance with GAAP.

The following table is a reconciliation of the GAAP financial measures of total equity and total assets to the non-GAAP measures of total tangible common equity and total tangible assets.

Net income available to common shareholders	\$76,710	\$67,643	13.4 %	\$145,964	\$130,767	11.6 %

For the quarter ended June 30, 2017, net income attributable to Commerce Bancshares, Inc. (net income) amounted to \$79.0 million, an increase of \$9.1 million, or 13.0%, compared to the second quarter of the previous year. For the current quarter, the annualized return on average assets was 1.26%, the annualized return on average common equity was 12.48% and the efficiency ratio was 60.24%. Diluted earnings per common share was \$.75, an increase of 13.6% compared to \$.66 per share in the second quarter of 2016 and an increase of 10.3% compared to \$.68 per share in the previous quarter.

Compared to the second quarter of last year, net interest income increased \$11.0 million, or 6.4%, mainly due to growth of \$13.1 million in interest income on loans, partly offset by an increase of \$2.6 million in deposits and borrowings interest expense. The provision for loan losses totaled \$10.8 million for the current quarter, representing an increase of \$1.5 million over the second quarter of 2016. Non-interest income increased \$6.5 million, or 5.6%, compared to the second quarter of 2016, mainly due to combined growth of \$5.3 million in trust, deposit and loan fee income, in addition to current quarter gains of \$1.7 million on sales of branch properties and equipment leased by customers. Non-interest expense increased \$7.5 million, or 4.2%, over the second quarter of 2016 primarily due to increases in salaries and benefits and the contribution of \$2.3 million in appreciated securities to a related foundation. A \$2.2 million securities gain was recorded on the transaction, resulting in a pre-tax loss of \$97 thousand and tax benefits of \$873 thousand. The Company made a similar contribution to the foundation in the first quarter of 2017 and intends to make similar contributions in subsequent quarters this year.

Net investment securities gains totaled \$1.7 million in the current quarter and \$879 thousand in the first six months of 2017. Gains resulting from the securities donations were \$2.2 million in both the first and second quarters of 2017, partly offset by losses in fair value on private equity securities of \$2.8 million in the six month period.

Net income for the first six months of 2017 was \$150.5 million, an increase of \$15.2 million, or 11.2%, over the same period last year. Diluted earnings per common share was \$1.43, an increase of 11.7% compared to \$1.28 per share in the same period last year. For the first six months of 2017, the annualized return on average assets was 1.21%, the annualized return on average common equity was 12.12%, and the efficiency ratio was 61.67%. Net interest income increased \$25.5 million, or 7.6%, over the same period last year. This growth was largely due to increases of \$22.1 million in loan interest income and \$6.7 million in investment securities interest income, offset by a \$3.9 million increase in deposits and borrowings interest expense. The provision for loan losses was \$21.9 million for the first six months of 2017, up \$3.2 million over the same period last year. Non-interest income increased \$4.6 million, or 1.9%, over the first six months of last year due to growth in trust, deposit and loan fees. Non-interest expense increased

\$16.9 million, or 4.8%, due to higher salaries and benefits expense of \$9.5 million, in addition to securities contributions of \$4.5 million, as mentioned above.

Table of Contents

Net Interest Income

The following table summarizes the changes in net interest income on a fully taxable equivalent basis, by major category of interest earning assets and interest bearing liabilities, identifying changes related to volumes and rates. Changes not solely due to volume or rate changes are allocated to rate.

Analysis of Changes in Net Interest Income

Net interest income, tax equivalent basis	\$6,347	\$4,926	\$11,273	\$14,436	\$12,734	\$27,170

Net interest income in the second quarter of 2017 was \$182.8 million, an increase of \$11.0 million over the second quarter of 2016. On a tax equivalent (T/E) basis, net interest income totaled \$190.9 million in the second quarter of 2017, up \$11.3 million over the same period last year and up \$3.5 million over the previous quarter. The increase in net interest income compared to the second quarter of 2016 was mainly due to higher interest income on loans (T/E) of \$13.3 million. The increase in interest on loans was a result of higher loan yields on nearly all loan products, especially commercial loans, many of which have variable rates.

Table of Contents

Interest income on investment securities (T/E) increased \$370 thousand over the second quarter of 2016, mainly due to higher interest income earned on mortgage-backed and asset-backed securities. Securities interest also includes inflation-related interest on the Company's holdings of U.S. Treasury inflation-protected securities (TIPS), which is tied to the Consumer Price Index. Interest income related to TIPS increased \$2.5 million in the first six months of 2017 compared to the same period in 2016, and totaled \$2.9 million in the current quarter and \$3.7 million in the second quarter of 2016. The Company's net yield on earning assets (T/E) was 3.19% in the current quarter compared to 3.11% in the second quarter of 2016.

Total interest income (T/E) increased \$13.8 million over the second quarter of 2016. Interest income on loans (T/E) was \$136.8 million during the second quarter of 2017, and increased \$13.3 million, or 10.8%, over the same quarter last year. The increase was due to growth of \$669.4 million, or 5.2%, in average loan balances, and an increase of 20 basis points in average rates earned. Most of the increase in interest income occurred in the business, construction, and business real estate loan categories. The largest increase to interest income occurred in business loan interest, which grew \$4.7 million due to higher average balances of \$136.0 million, or 2.9%, coupled with a 31 basis point increase in the average rate earned. Construction loan interest grew \$2.5 million, as average balances increased \$73.2 million, or 9.3%, and the average rate earned increased 84 basis points. Business real estate loan interest increased \$3.3 million due to an increase in average balances of \$312.0 million, or 13.1%, with an increase of five basis points in the average rate earned. Interest on consumer loans increased \$1.4 million over the same period last year as the average rate increased 14 basis points, coupled with a \$69.8 million increase in average balances.

Interest income on investment securities (T/E) was \$60.5 million during the second quarter of 2017, which was an increase of \$370 thousand over the same quarter last year. The increase resulted mainly from increased earnings on mortgage-backed and asset-backed securities, partly offset by lower TIPS interest of \$869 thousand and lower interest earned on government-sponsored enterprise obligations. Higher interest on mortgage-backed securities of \$1.8 million resulted from an increase of \$313.7 million in average balances. Interest income on asset-backed securities grew \$1.4 million mainly due to a 27 basis point increase in the average rate earned. Partly offsetting these increases was a \$3.2 million decline in interest income on government-sponsored enterprise obligations, which was partly the result of early maturity calls on certain securities in the second quarter of 2016. The average balance of government-sponsored enterprise obligations decreased \$216.0 million and the average rate earned decreased 144 basis points. During the current quarter and the same quarter last year, adjustments to premium amortization expense, due to changes in prepayment speeds on various mortgage and asset-backed securities, were not significant. The average balance of the total investment portfolio (excluding unrealized fair value adjustments) was \$9.6 billion in the second quarter of 2017, compared to \$9.4 billion in the second quarter of 2016.

Interest income on long-term securities purchased under agreements to resell increased \$330 thousand over the second quarter of 2016, due to an increase in the average rate earned of 58 basis points, partly offset by lower balances invested of \$159.3 million.

The average tax equivalent yield on total interest earning assets was 3.37% in the second quarter of 2017, up from 3.25% in the second quarter of 2016.

Total interest expense increased \$2.6 million compared to the second quarter of 2016, due to a \$1.2 million increase in interest expense on interest bearing deposits and a \$1.3 million increase in interest expense on borrowings. The increase in deposit expense resulted mainly from an increase of three basis points in the overall average rate paid on deposits. Interest expense on C.D.'s of \$100,000 and over rose \$475 thousand due to a 17 basis point increase in average rates paid, but was partly offset by lower average balances of \$125.9 million. In addition, interest expense on interest checking and money market accounts increased \$778 thousand, as average balances increased \$379.1 million and average rates paid rose slightly. Interest expense on borrowings increased due to higher rates paid on customer repurchase agreements and overnight federal funds purchased. The overall average rate incurred on all interest bearing

liabilities was .29% and .22% in the second quarters of 2017 and 2016, respectively.

Net interest income (T/E) for the first six months of 2017 was \$378.2 million compared to \$351.0 million for the same period in 2016. For the first six months of 2017, the net interest margin was 3.16% compared to 3.03% for the first six months of 2016.

Total interest income (T/E) for the first six months of 2017 increased \$31.1 million over the same period last year, due to higher interest income on loans and investment securities. Loan interest income (T/E) rose \$22.5 million due to an \$803.8 million, or 6.3%, increase in total average loan balances and a 12 basis point increase in the average rate earned. Most of the increase in loan interest occurred in the business, business real estate and construction loan categories. The growth in interest income of \$7.9 million on investment securities (T/E) was mainly due to a \$163.4 million increase in average balances coupled with a 13 basis point increase in the average rate earned. Increased earnings were recorded for U.S. government and federal agency securities due to higher TIPS interest of \$2.5 million, while interest earned on non-marketable investments rose \$3.8 million partly due to one-time interest receipts of \$2.7 million on a private equity investment in the first quarter of 2017. Other increases in interest income occurred in mortgage-backed and asset-backed securities, which grew \$3.1 million and \$2.1 million, respectively. These increases were partly offset by lower interest earned on government-sponsored enterprise obligations of \$5.2 million, which saw

Table of Contents

declines in average balances and rates earned. Interest income on long-term resell agreements grew \$648 thousand due to higher average rates earned, partly offset by lower average balances.

Total interest expense for the first six months of 2017 increased \$3.9 million compared to last year. Interest expense on interest bearing deposits increased \$2.3 million, mainly due to a three basis point increase in the overall average rate paid. The overall rate increase included an increase of 15 basis points in rates paid on C.D.'s of \$100,000 and over, in addition to a slight increase in rates paid on interest checking and money market account balances. Interest expense on borrowings also increased \$1.6 million, mainly due to higher rates paid on federal funds purchased and repurchase agreements. Interest expense on FHLB borrowings declined \$404 thousand, mainly due to lower average balances, partly offset by higher rates paid. The overall cost of total interest bearing liabilities increased to .27% compared to .22% in the same period last year.

Summaries of average assets and liabilities and the corresponding average rates earned/paid appear on the last page of this discussion.

Non-Interest Income

(Dollars in thousands)	Three Months Ended June 30			Six Months Ended June 30		
	2017	2016	% change	2017	2016	% change

Total non-interest income	\$123,084	\$116,570	5.6 %	\$240,150	\$235,594	1.9 %
Non-interest income as a % of total revenue*	40.2	%40.4	%	39.9	%41.2	%

* Total revenue includes net interest income and non-interest income.

For the second quarter of 2017, total non-interest income amounted to \$123.1 million compared with \$116.6 million in the same quarter last year, which was an increase of \$6.5 million, or 5.6%. The increase was mainly due to growth in trust, deposit and loan fee income, coupled with gains on sales of several branch properties and equipment leased to customers.

Bank card transaction fees for the current quarter decreased slightly from the same quarter last year, mainly due to a decline in merchant fees of \$614 thousand, offset by growth of 2.9% in both debit and credit card fees. Commercial card fees increased slightly over the same quarter last year. The table below is a summary of bank card transaction fees for the three and six month periods ended June 30, 2017 and 2016.

(Dollars in thousands)	Three Months Ended June 30			Six Months Ended June 30		
	2017	2016	% change	2017	2016	% change
Debit card fees	\$10,326	\$10,032	2.9 %	\$19,967	\$19,417	2.8 %
Credit card fees	6,482	6,302	2.9	12,223	11,947	2.3
Merchant fees	6,297	6,911	(8.9)	12,139	14,029	(13.5)
Corporate card fees	21,894	21,820	.3	43,874	44,142	(.6)
Total bank card transaction fees	\$44,999	\$45,065	(.1)%	\$88,203	\$89,535	(1.5)%

Trust fees for the quarter increased \$2.9 million, or 9.5%, over the same quarter last year, resulting mainly from continued growth in private client trust fees, which were up \$2.0 million, or 9.0%. Deposit account fees increased \$1.5 million, or 7.2%, over the same quarter last year, as deposit account service charges increased \$895 thousand, or 17.8%, while overdraft and return item fees and corporate cash management fees increased 4.8% and 3.3%, respectively. Consumer brokerage fees grew \$235 thousand, while capital market fees declined \$344 thousand on lower sales demand. Loan fees and sales increased \$895 thousand, or 28.0%, this quarter mainly due to higher mortgage banking revenue related to the Company's fixed rate residential mortgage sale program. Other non-interest income increased \$1.4 million compared to the same quarter last year. This increase was mainly the result of current quarter gains of \$860 thousand on sales of several branch properties, in addition to gains of \$824 thousand recorded on sales of several leased assets to customers upon lease termination. Fees from the sales of tax credits grew \$521 thousand this quarter compared with the same quarter last year, while letter of credit fees were higher by \$294 thousand. These increases were partly offset by a decline of \$289 thousand in fees on interest rate swap sales, and income of \$897 thousand recorded in the second quarter of last year for a trust-related settlement, which did not reoccur in the current period.

Table of Contents

Non-interest income for the first six months of 2017 was \$240.2 million compared to \$235.6 million in the first six months of 2016, resulting in an increase of \$4.6 million, or 1.9%. Bank card fees decreased \$1.3 million, or 1.5%, as a result of a decline in merchant fees of \$1.9 million, or 13.5%, partly offset by increases of \$550 thousand in debit card fees and \$276 thousand in credit card fees. Trust fee income increased \$5.7 million, or 9.5%, as a result of growth in private client and institutional trust fees. Deposit account fees increased \$2.8 million, or 6.6%, mainly due to growth of \$1.6 million in deposit account service charges and \$766 thousand in overdraft and return item fees. Loan fees and sales increased \$1.6 million, or 27.2%, due to higher mortgage banking revenue. Consumer brokerage fees rose \$375 thousand due to higher mutual fund and advisory fee income, while capital market fees decreased \$727 thousand, or 13.9%, due to continued lower sales volume. Other non-interest income decreased \$3.7 million, or 14.1%, mainly due to lower gains on sales of branch properties, lower fees from sales of interest rate swaps, and the prior year trust settlement mentioned above.

Investment Securities Gains (Losses), Net

(In thousands)	Three Months		Six Months	
	Ended June 30 2017	2016	Ended June 30 2017	2016
Available for sale	\$1,671	\$(147)	\$3,719	\$(270)
Non-marketable	(20)	(597)	(2,840)	(1,469)
Total investment securities gains (losses), net	\$1,651	\$(744)	\$879	\$(1,739)

Net gains and losses on investment securities which were recognized in earnings during the three and six months ended June 30, 2017 and 2016 are shown in the table above. Net securities gains amounted to \$1.7 million in the second quarter of 2017 and \$879 thousand in the first six months of 2017. Included in these gains and losses are credit-related impairment losses on certain non-agency guaranteed mortgage-backed securities which have been identified as other-than-temporarily impaired. These identified securities had a total fair value of \$30.3 million at June 30, 2017. During the first six months of 2017, credit-related impairment losses of \$320 thousand were recorded, compared to \$270 thousand in the same period last year. The current period also included gains on donations of appreciated common stock to a related charitable foundation, which were \$2.2 million in both the first and the second quarters of 2017.

Gains and losses on non-marketable investment securities include those relating to private equity investments, which are primarily held by the Parent's majority-owned private equity subsidiaries. These gains and losses include fair value adjustments and gains and losses realized upon disposition. During the first six months of 2017, net losses in fair value of \$2.8 million were recorded, compared to similar losses of \$3.7 million in the same period in 2016. A gain of \$1.8 million was also recorded in 2016 resulting from the Parent's withdrawal from a private equity fund, as required under the Volcker Rule investment prohibitions. The portion of the private equity activity attributable to minority interests is reported as non-controlling interest in the consolidated statements of income and resulted in income of \$654 thousand during the first six months of 2017 and \$379 thousand during the first six months of 2016.

Non-Interest Expense

(Dollars in thousands)	Three Months Ended June 30			Six Months Ended June 30		
	2017	2016	% change	2017	2016	% change

Data processing and software	23,356	22,770	2.6	46,453	45,669	1.7

Edgar Filing: COMMERCE BANCSHARES INC /MO/ - Form 10-Q

Marketing	4,488	4,389	2.3	7,712	8,202	(6.0)
Deposit insurance	3,592	3,143	14.3	7,063	6,308	12.0
Other	22,677	20,413	11.1	45,585	38,384	18.8
Total non-interest expense	\$184,594	\$177,089	4.2 %	\$371,424	\$354,562	4.8 %

Non-interest expense for the second quarter of 2017 amounted to \$184.6 million, an increase of \$7.5 million, or 4.2%, compared with \$177.1 million in the second quarter of last year. Salaries expense increased \$4.0 million, or 4.5%, mainly due to higher full-time salaries and incentive compensation costs. Employee benefits expense totaled \$15.8 million, slightly higher than in the same period last year as increases in payroll taxes and 401(k) expense were offset by lower medical costs. Growth in salaries expense resulted partly from higher staffing costs, mainly in the areas of commercial and consumer banking, commercial payments, residential lending and information technology business units. Full-time equivalent employees totaled 4,805 at June 30, 2017

Table of Contents

compared to 4,779 at June 30, 2016. Occupancy costs increased \$338 thousand, or 3.0%, mostly due to higher branch maintenance costs, while supplies and communication, marketing and equipment costs were well controlled. Data processing expense increased \$586 thousand, or 2.6%, mainly due to higher online subscription service expense. FDIC insurance costs increased \$449 thousand, or 14.3%, due to higher insurance rates that were effective July 1, 2016. Other non-interest expense increased \$2.3 million, or 11.1%, compared to the same period in the previous year. This increase was mainly due to the donation of \$2.3 million in appreciated securities to a related charitable foundation, as previously mentioned. In addition, lower deferred loan origination costs and higher professional fees expense were recorded. Excluding the donation expense, total non-interest expense grew 3.0% over the same period in 2016.

For the first six months of 2017, non-interest expense amounted to \$371.4 million, an increase of \$16.9 million, or 4.8%, compared with \$354.6 million in the same period last year. Salaries and benefits increased \$9.5 million, or 4.5%, mainly due to higher full-time salaries and incentives expense. Supplies and communication expense decreased \$1.4 million, or 10.9%. This decrease was mainly the result of higher chip card reissue costs last year that have now declined. Marketing costs were down \$490 thousand, or 6.0%, due to lower spending in the first quarter of 2017, but are expected to increase in subsequent quarters this year. FDIC insurance costs grew \$755 thousand while data processing costs grew \$784 thousand, both due to the trends mentioned above. Other non-interest expense increased \$7.2 million, or 18.8%, mainly due to donations of \$4.5 million in appreciated securities in the current period. Higher costs were also recorded in professional fees, bank card rewards and royalty fees expense, in addition to lower deferred loan origination costs. Excluding the donation expense, total non-interest expense grew 3.5% over the prior year.

* as a percentage of average loans (excluding loans held for sale)

The Company has an established process to determine the amount of the allowance for loan losses, which assesses the risks and losses inherent in its portfolio. This process provides an allowance consisting of a specific allowance component based on certain individually evaluated loans and a general component based on estimates of allowances for pools of loans. The Company's policies and processes for determining the allowance for loan losses are discussed in Note 1 to the consolidated financial statements and in the Allowance for Loan Losses discussion in Item 7 of the 2016 Annual Report on Form 10-K.

Net loan charge-offs in the second quarter of 2017 amounted to \$10.8 million, compared with \$9.2 million in the prior quarter and \$7.5 million in the second quarter of last year. The increase in current quarter net charge-offs over the previous quarter was mainly due to increases in consumer credit card, consumer, and business net loan charge-offs of \$602 thousand, \$546 thousand, and \$221 thousand, respectively. The increase in net loan charge-offs was also driven by lower net recoveries on construction loans, which totaled \$207 thousand in the second quarter of 2017, compared to net recoveries of \$535 thousand in the prior quarter. These increases in net loan charge-offs were partially offset by decreases of \$150 thousand and \$143 thousand in net charge-offs on personal real estate loans and overdrafts, respectively.

For the three months ended June 30, 2017, annualized net loan charge-offs on average consumer credit card loans totaled 4.25%, compared with 3.88% in the previous quarter and 3.62% in the same period last year. Consumer loan annualized net charge-offs in the current quarter amounted to .53%, compared to .43% in the prior quarter and .37% in the same period last year. Annualized net charge-offs on personal real estate loans also remained low this quarter. In the second quarter of 2017, total annualized net loan charge-offs were .32%, compared to .28% in the previous quarter and .24% in the same period last year.

In the current quarter, the provision for loan losses totaled \$10.8 million and matched net loan charge-offs. In the prior quarter, the provision for loan losses totaled \$11.1 million and exceeded net loan charge-offs by \$1.9 million, and in the same period last year, the provision for loan losses totaled \$9.2 million and exceeded net loan charge-offs by \$1.7 million. The provision for loan losses in the current quarter decreased by \$370 thousand compared to the previous quarter.

For the six months ended June 30, 2017, net loan charge-offs totaled \$20.0 million, compared to \$16.4 million in 2016. The increase in net loan charge-offs resulted mainly from an increase in consumer credit card net loan charge-offs, which increased \$2.3 million, and fewer recoveries on business real estate loans, which declined \$1.2 million. The provision for loan losses for the first six months of 2017 was \$21.9 million and increased \$3.2 million compared to the previous year. The increase in provision expense was the result of higher net loan losses during the six months ended June 30, 2017 compared to the same period in the prior year.

At June 30, 2017, the allowance for loan losses amounted to \$157.8 million and was 1.16% of total loans and more than ten times total non-accrual loans. At December 31, 2016, the allowance for loan losses amounted to \$155.9 million and was 1.16% of total loans and over ten times total non-accrual loans.

Table of Contents

Risk Elements of Loan Portfolio

The following table presents non-performing assets and loans which are past due 90 days and still accruing interest. Non-performing assets include non-accruing loans and foreclosed real estate. Loans are placed on non-accrual status when management does not expect to collect payments consistent with acceptable and agreed upon terms of repayment. Loans that are 90 days past due as to principal and/or interest payments are generally placed on non-accrual, unless they are both well-secured and in the process of collection, or they are personal banking loans that are exempt under regulatory rules from being classified as non-accrual.

(Dollars in thousands)	June 30, 2017	December 31, 2016	
Non-accrual loans	\$13,362	\$ 14,283	
Foreclosed real estate	515	366	
Total non-performing assets	\$13,877	\$ 14,649	
Non-performing assets as a percentage of total loans	.10	%.11	%
Non-performing assets as a percentage of total assets	.06	%.06	%
Total loans past due 90 days and still accruing interest	\$14,630	\$ 16,396	

Non-accrual loans, which are also classified as impaired, totaled \$13.4 million at June 30, 2017, and decreased \$921 thousand from balances at December 31, 2016. The decrease occurred mainly in business loans, which decreased \$2.4 million, partly offset by an increase of \$1.2 million in consumer loans. At June 30, 2017, non-accrual loans were comprised mainly of business (47.4%), personal real estate (26.2%), and business real estate (13.7%) loans.

Foreclosed real estate totaled \$515 thousand at June 30, 2017, an increase of \$149 thousand when compared to December 31, 2016. Total loans past due 90 days or more and still accruing interest were \$14.6 million as of June 30, 2017, a decrease of \$1.8 million when compared to December 31, 2016. Balances by class for non-accrual loans and loans past due 90 days and still accruing interest are shown in the "Delinquent and non-accrual loans" section in Note 2 to the consolidated financial statements.

In addition to the non-performing and past due loans mentioned above, the Company also has identified loans for which management has concerns about the ability of the borrowers to meet existing repayment terms. They are classified as substandard under the Company's internal rating system. The loans are generally secured by either real estate or other borrower assets, reducing the potential for loss should they become non-performing. Although these loans are generally identified as potential problem loans, they may never become non-performing. Such loans totaled \$107.8 million at June 30, 2017 compared with \$99.5 million at December 31, 2016, resulting in an increase of \$8.3 million, or 8.3%.

(In thousands)	June 30, 2017	December 31, 2016
Potential problem loans:		
Business	\$47,860	\$ 43,438
Real estate – construction and land	2,703	1,172
Real estate – business	51,693	52,913
Real estate – personal	5,507	1,955
Total potential problem loans	\$107,763	\$ 99,478

At June 30, 2017, the Company had \$59.2 million of loans whose terms have been modified or restructured under a troubled debt restructuring. These loans have been extended to borrowers who are experiencing financial difficulty and who have been granted a concession, as defined by accounting guidance, and are further discussed in the "Troubled debt restructurings" section in Note 2 to the consolidated financial statements. This balance includes certain commercial loans totaling \$36.8 million which are classified as substandard and included in the table above because

of this classification.

Loans with Special Risk Characteristics

Management relies primarily on an internal risk rating system, in addition to delinquency status, to assess risk in the loan portfolio, and these statistics are presented in Note 2 to the consolidated financial statements. However, certain types of loans are considered at high risk of loss due to their terms, location, or special conditions. Additional information about the major types of loans in these categories and their risk features are provided below. Information based on loan-to-value (LTV) ratios was generally calculated with valuations at loan origination date. The Company normally obtains an updated appraisal or valuation at the time a loan is renewed or modified, or if the loan becomes significantly delinquent or is in the process of being foreclosed upon.

Table of Contents

Real Estate – Construction and Land Loans

The Company's portfolio of construction and land loans, as shown in the table below, amounted to 6.2% of total loans outstanding at June 30, 2017. The largest component of construction and land loans was commercial construction, which grew \$77.7 million during the six months ended June 30, 2017. At June 30, 2017, multi-family residential construction loans totaled approximately \$218.6 million, or 37.6%, of the commercial construction loan portfolio.

(Dollars in thousands)	June 30, 2017	% of Total	% of Total Loans	December 31, 2016	% of Total	% of Total Loans

Real Estate – Business Loans

Total business real estate loans were \$2.7 billion at June 30, 2017 and comprised 20.0% of the Company's total loan portfolio. These loans include properties such as manufacturing and warehouse buildings, small office and medical buildings, churches, hotels and motels, shopping centers, and other commercial properties. At June 30, 2017, 36.8% of business real estate loans were for owner-occupied real estate properties, which present lower risk profiles.

(Dollars in thousands)	June 30, 2017	% of Total	% of Total Loans	December 31, 2016	% of Total	% of Total Loans

Real Estate – Personal Loans

The Company's \$2.0 billion personal real estate loan portfolio is composed mainly of residential first mortgage real estate loans. As shown on page 44, recent loss rates have remained low, and at June 30, 2017, loans past due over 30 days decreased \$3.2 million; however, non-accrual loans increased \$101 thousand compared to December 31, 2016. Also, as shown in Note 2, only 3.9% of this portfolio has FICO scores of less than 660. Approximately \$21.9 million, or 1.1%, of personal real estate loans were structured with interest only payments. These loans are typically made to high net-worth borrowers and generally have low LTV ratios at origination or have additional collateral pledged to secure the loan. Therefore, they are not perceived to represent above normal credit risk. Loans originated with interest only payments were not made to "qualify" the borrower for a lower payment amount. At June 30, 2017, loans with no mortgage insurance and an original LTV higher than 80% totaled \$165.6 million compared to \$158.8 million at December 31, 2016.

Revolving Home Equity Loans

The Company had \$403.4 million in revolving home equity loans at June 30, 2017 that were generally collateralized by residential real estate. Most of these loans (92.9%) are written with terms requiring interest only monthly

payments. These loans are offered in three main product lines: LTV up to 80%, 80% to 90%, and 90% to 100%. As of June 30, 2017, the outstanding principal of loans with an original LTV higher than 80% was \$54.0 million, or 13.4% of the portfolio, compared to \$55.1 million as of December 31, 2016. Total revolving home equity loan balances over 30 days past due or on non-accrual status were \$3.1 million at June 30, 2017 compared to \$2.2 million at December 31, 2016. The weighted average FICO score for the total current portfolio balance is 793. At maturity, the accounts are re-underwritten, and if they qualify under the Company's credit, collateral and capacity policies, the borrower is given the option to renew the line of credit or convert the outstanding balance to an amortizing loan. If criteria are not met, amortization is required, or the borrower may pay off the loan. During the remainder of 2017 through 2019, approximately 18% of the Company's current outstanding balances are expected to mature. Of these balances, approximately

Table of Contents

81% have a FICO score of 700 or higher. The Company does not expect a significant increase in losses as these loans mature, due to their high FICO scores, low LTVs, and low historical loss levels.

Other Consumer Loans

Within the consumer loan portfolio are several direct and indirect product lines, which include loans for the purchase of automobiles, marine and RVs. Outstanding balances for auto loans were \$993.3 million and \$972.5 million at June 30, 2017 and December 31, 2016, respectively. The balances over 30 days past due amounted to \$12.7 million at June 30, 2017 compared to \$13.8 million at the end of 2016, and comprised 1.3% and 1.4% of the outstanding balances of these loans at June 30, 2017 and December 31, 2016, respectively. For the six months ended June 30, 2017, \$239.7 million of new auto loans were originated, compared to \$431.0 million during the full year of 2016. At June 30, 2017, the automobile loan portfolio had a weighted average FICO score of 747.

The Company's balance of marine and RV loans totaled \$85.2 million at June 30, 2017, compared to \$102.4 million at December 31, 2016, and the balances over 30 days past due amounted to \$2.8 million at June 30, 2017 compared to \$4.3 million at the end of 2016. The net charge-offs on marine and RV loans increased slightly from \$691 thousand in the first six months of 2016 to \$741 thousand in the first six months of the current year.

Additionally, the Company offers low promotional rates on selected consumer credit card products. Out of a portfolio at June 30, 2017 of \$740.9 million in consumer credit card loans outstanding, approximately \$155.1 million, or 20.9%, carried a low promotional rate. Within the next six months, \$43.7 million of these loans are scheduled to convert to the ongoing higher contractual rate. To mitigate some of the risk involved with this credit card product, the Company performs credit checks and detailed analysis of the customer borrowing profile before approving the loan application. Management believes that the risks in the consumer loan portfolio are reasonable and the anticipated loss ratios are within acceptable parameters.

Energy Lending

The Company's energy lending portfolio was comprised of lending to the petroleum and natural gas sectors and totaled \$140.8 million at June 30, 2017, as shown in the table below. As of June 30, 2017, there were \$6.9 million of energy loans, or 4.9%, of the energy portfolio, with a "substandard" rating or on non-accrual status, compared to \$8.0 million, or 4.6% of the energy portfolio, at December 31, 2016. Included in these amounts were non-accrual loans of zero at June 30, 2017, compared to \$847 thousand at December 31, 2016. There were no energy loans 90 days past due and still accruing interest at June 30, 2017 or December 31, 2016.

(In thousands)			Unfunded
	June 30, 2017	December 31, 2016	commitments at June 30, 2017
Extraction	\$87,935	\$ 103,011	\$ 38,761
Mid-stream shipping and storage	7,904	22,985	61,800
Downstream distribution and refining	30,900	30,231	18,033
Support activities	14,028	15,296	21,832
Total energy lending portfolio	\$ 140,767	\$ 171,523	\$ 140,426

Shared National Credits

The Company participates in credits of large, publicly traded companies which are defined by regulation as shared national credits, or SNCs. Regulations define SNCs as loans exceeding \$20 million that are shared by three or more financial institutions. The Company typically participates in these loans when business operations are maintained in the local communities or regional markets and opportunities to provide other banking services are present. The balance of SNC loans totaled \$892.4 million at June 30, 2017, compared to \$836.1 million at December 31, 2016. Additional unfunded commitments at June 30, 2017 totaled \$1.3 billion.

Table of Contents

Income Taxes

Income tax expense was \$33.2 million in the second quarter of 2017, compared to \$24.9 million in the first quarter of 2017 and \$31.5 million in the second quarter of 2016. The Company's effective tax rate, including the effect of non-controlling interest, was 29.6% in the second quarter of 2017, compared to 25.8% in the first quarter of 2017 and 31.1% in the second quarter of 2016. The lower effective tax rate for the first quarter of 2017 was primarily due to the adoption of ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting" on January 1, 2017. The ASU requires all excess tax benefits and tax deficiencies arising from share-based award payments to be recognized as income tax expense or benefit in the income statement, while in previous periods these benefits and deficiencies were recognized in equity. The amount of excess tax benefits (net of tax deficiencies) recognized as a reduction to income tax expense was \$4.5 million in the first quarter of 2017 and \$1.6 million in the second quarter of 2017. These tax benefits are expected to be seasonally higher in the first quarter of each year when the majority of the Company's equity compensation vests.

The decrease in the Company's effective tax rate for the three months ended June 30, 2017 compared to the same period in the prior year was due to tax benefits related to the donation of appreciated securities to a charitable foundation lowering the effective tax rate in the current quarter, as mentioned previously.

Financial Condition

Balance Sheet

Total assets of the Company were \$25.1 billion at June 30, 2017 and \$25.6 billion at December 31, 2016. Earning assets (excluding the allowance for loan losses and fair value adjustments on investment securities) amounted to \$23.8 billion at June 30, 2017 and \$24.2 billion at December 31, 2016, and consisted of 57% in loans and 40% in investment securities.

At June 30, 2017, total loans increased \$213.9 million, or 1.6%, compared with balances at December 31, 2016. On an overall basis, the largest contributions to loan growth occurred in business loans and business real estate loans, which increased \$76.0 million and \$84.0 million, respectively, over year end balances. The increase in business loans primarily resulted from growth in commercial and industrial loans, commercial credit card loans, and tax-free loans. Business real estate loans increased largely because of growth in multi-family residential loans. Consumer loans, which includes automobile, marine and RV, fixed rate home equity, and other consumer loans, increased \$47.7 million during the first six months of the year. Higher demand for automobile and other consumer loans grew loan balances \$71.0 million. However, fixed rate home equity loans decreased by \$6.1 million and marine and RV loans continued to run off during the period by \$17.2 million. Construction loans increased \$56.9 million during the first six months of the year primarily due to commercial construction projects. Personal real estate loan balances were largely unchanged from year end balances; however, the Company originated and sold \$87.7 million of longer-term fixed rate loans during the first six months of 2017 compared to \$64.5 million in the same period of 2016. Declines in consumer credit card (down \$35.6 million) and revolving home equity loans (down \$10.2 million) partially offset growth throughout the year.

Available for sale investment securities, excluding fair value adjustments, decreased by \$258.6 million at June 30, 2017 compared to December 31, 2016. Purchases of securities during this period totaled \$672.4 million, offset by sales, maturities, and pay downs of \$912.0 million. The largest decreases in outstanding balances occurred in asset-backed securities, agency mortgage-backed securities, and state and municipal obligations, which decreased \$139.8 million, \$70.7 million, and \$33.6 million, respectively. At June 30, 2017, the duration of the investment portfolio was 2.8 years, and maturities and pay downs of approximately \$1.6 billion are expected to occur during the next 12 months.

Total deposits at June 30, 2017 amounted to \$20.8 billion and decreased \$275.4 million compared to deposit balances at December 31, 2016. The decline in deposits was driven by decreases in certificates of deposit of \$157.4 million, or 7.0%, mainly in jumbo accounts, and interest checking deposits of \$106.3 million, or 8.3%. These decreases were offset by growth in money market deposits of \$42.6 million, or .5%, and savings accounts of \$60.6 million, or 7.8%. Non-interest bearing deposits also declined \$114.9 million, or 1.5%, mainly due to a reduction of \$164.4 million in business accounts, partially offset by an increase of \$66.3 million in personal accounts.

Total borrowings were \$1.4 billion at June 30, 2017 compared to \$1.8 billion at December 31, 2016. Short-term borrowings of federal funds purchased and customer repurchase agreements totaled \$1.3 billion at June 30, 2017, a decrease of \$467.5 million from balances of \$1.7 billion at December 31, 2016. The overall decrease in these balances was due to a decrease of \$668.1 million in customer repurchase agreements, offset by an increase of \$200.7 million in federal funds purchased.

Table of Contents

Liquidity and Capital Resources

Liquidity Management

The Company's most liquid assets are comprised of available for sale investment securities, federal funds sold, securities purchased under agreements to resell (resale agreements), and balances at the Federal Reserve Bank, as follows:

(In thousands)	June 30, 2017	March 31, 2017	December 31, 2016
Liquid assets:			
Available for sale investment securities	\$9,439,701	\$9,671,975	\$9,649,203
Federal funds sold	16,520	2,205	15,470
Long-term securities purchased under agreements to resell	625,000	725,000	725,000
Balances at the Federal Reserve Bank	80,860	120,234	272,275
Total	\$10,162,081	\$10,519,414	\$10,661,948

Federal funds sold, which are funds lent to the Company's correspondent bank customers with overnight maturities, totaled \$16.5 million as of June 30, 2017. Long-term resale agreements, maturing through 2018, totaled \$625.0 million at June 30, 2017. Under these agreements, the Company lends funds to upstream financial institutions and holds marketable securities, safe-kept by a third-party custodian, as collateral. This collateral totaled \$653.4 million in fair value at June 30, 2017. Interest earning balances at the Federal Reserve Bank, which have overnight maturities and are used for general liquidity purposes, totaled \$80.9 million at June 30, 2017. The fair value of the available for sale investment portfolio was \$9.4 billion at June 30, 2017 and included an unrealized net gain in fair value of \$97.9 million. The total net unrealized gain included net gains of \$19.6 million on mortgage-backed securities, \$32.7 million on state and municipal obligations, and \$42.3 million on common and preferred stock held by the Parent.

Approximately \$1.6 billion of the available for sale investment portfolio is expected to mature or pay down during the next 12 months, and these funds offer substantial resources to meet new loan demand or help offset reductions in the Company's deposit funding base. The Company pledges portions of its investment securities portfolio to secure public fund deposits, securities sold under agreements to repurchase, trust funds, letters of credit issued by the FHLB, and borrowing capacity at the Federal Reserve Bank. Total investment securities pledged for these purposes were as follows:

(In thousands)	June 30, 2017	March 31, 2017	December 31, 2016
Investment securities pledged for the purpose of securing:			
Federal Reserve Bank borrowings	\$99,541	\$108,240	\$115,858
FHLB borrowings and letters of credit	15,560	16,743	17,781
Securities sold under agreements to repurchase *	1,747,101	1,726,909	2,447,835
Other deposits and swaps	2,032,334	1,956,791	1,773,017
Total pledged securities	3,894,536	3,808,683	4,354,491
Unpledged and available for pledging	3,718,231	4,071,649	3,516,648
Ineligible for pledging	1,826,934	1,791,643	1,778,064
Total available for sale securities, at fair value	\$9,439,701	\$9,671,975	\$9,649,203

* Includes securities pledged for collateral swaps, as discussed in Note 11 to the consolidated financial statements.

Liquidity is also available from the Company's large base of core customer deposits, defined as non-interest bearing, interest checking, savings, and money market deposit accounts. At June 30, 2017, such deposits totaled \$18.7 billion and represented 90.0% of total deposits. These core deposits are normally less volatile, as they are often with customer relationships tied to other products offered by the Company, promoting long lasting relationships and stable funding sources. Time open and certificates of deposit of \$100,000 and over totaled \$1.4 billion at June 30, 2017. These

accounts are normally considered more volatile and higher costing and comprised 6.7% of total deposits at June 30, 2017.

(In thousands)	June 30, 2017	March 31, 2017	December 31, 2016
Core deposit base:			
Non-interest bearing	\$7,314,506	\$7,237,815	\$7,429,398
Interest checking	1,169,605	1,146,600	1,275,899
Savings and money market	10,258,010	10,292,478	10,154,890
Total	\$18,742,121	\$18,676,893	\$18,860,187

Table of Contents

Other important components of liquidity are the level of borrowings from third party sources and the availability of future credit. The Company's outside borrowings are mainly comprised of federal funds purchased, securities sold under agreements to repurchase, and advances from the FHLB, as follows:

(In thousands)	June 30, 2017	March 31, 2017	December 31, 2016
Borrowings:			
Federal funds purchased	\$253,510	\$340,195	\$ 52,840
Securities sold under agreements to repurchase	1,002,934	980,954	1,671,065
FHLB advances	100,000	100,000	100,000
Other debt	1,903	1,975	2,049
Total	\$1,358,347	\$1,423,124	\$ 1,825,954

Federal funds purchased are unsecured overnight borrowings obtained mainly from upstream correspondent banks with which the Company maintains approved lines of credit. Securities sold under agreements to repurchase are secured by a portion of the Company's investment portfolio and are comprised of non-insured customer funds totaling \$1.0 billion, which generally mature overnight. The Company also borrows on a secured basis through advances from the FHLB, which totaled \$100.0 million at June 30, 2017. These advances have fixed interest rates and mature in the fourth quarter of 2017.

The Company pledges certain assets, including loans and investment securities, to both the Federal Reserve Bank and the FHLB as security to establish lines of credit and borrow from these entities. Based on the amount and type of collateral pledged, the FHLB establishes a collateral value from which the Company may draw advances against the collateral. Also, this collateral is used to enable the FHLB to issue letters of credit in favor of public fund depositors of the Company. The Federal Reserve Bank also establishes a collateral value of assets pledged to support borrowings from the discount window. The following table reflects the collateral value of assets pledged, borrowings, and letters of credit outstanding, in addition to the estimated future funding capacity available to the Company at June 30, 2017.

(In thousands)	June 30, 2017		
	FHLB	Federal Reserve	Total
Collateral value pledged	\$2,734,323	\$1,272,837	\$4,007,160
Advances outstanding	(100,000)	—	(100,000)
Letters of credit issued	(555,957)	—	(555,957)
Available for future advances	\$2,078,366	\$1,272,837	\$3,351,203

In addition to those mentioned above, several other sources of liquidity are available. No commercial paper has been issued or outstanding during the past ten years. The Company has no subordinated debt or hybrid instruments which could affect future borrowing capacity. Because of its lack of significant long-term debt, the Company believes that it could generate additional liquidity through its Capital Markets Group from sources such as jumbo certificates of deposit or privately placed corporate debt. The Company receives strong outside rankings from both Standard & Poor's and Moody's on both the consolidated company level and its subsidiary bank, Commerce Bank, which would support future financing efforts, should the need arise. These ratings are as follows:

	Standard & Poor's	Moody's
Commerce Bancshares, Inc.		
Issuer rating	A-	
Rating outlook	Stable	Stable
Preferred stock	BBB-	Baa1
Commerce Bank		
Issuer rating	A	A2
Rating outlook	Stable	Stable

Baseline credit assessment		a1
Short-term rating	A-1	P-1

The cash flows from the operating, investing and financing activities of the Company resulted in a net decrease in cash and cash equivalents of \$251.3 million during the first six months of 2017, as reported in the consolidated statements of cash flows in this report. Operating activities, consisting mainly of net income adjusted for certain non-cash items, provided cash flow of

50

Table of Contents

\$212.0 million and has historically been a stable source of funds. Investing activities, which occur mainly in the loan and investment securities portfolios, provided cash of \$145.0 million. Activity in the investment securities portfolio provided cash of \$291.0 million from sales, maturities and pay downs (net of purchases), and repayments of long-term securities purchased under agreements to resell provided cash of \$100.0 million. These cash inflows were partly offset by a net increase in loans of \$234.4 million. Financing activities used cash of \$608.4 million, largely resulting from a net decrease in borrowings of federal funds purchased and securities sold under agreements to repurchase of \$467.5 million. In addition, deposits decreased \$79.8 million, and cash was used to fund dividends paid on common and preferred stock of \$50.3 million. Future short-term liquidity needs arising from daily operations are not expected to vary significantly, and the Company believes it will be able to meet these cash flow needs.

Capital Management

The Company met all capital adequacy requirements and had regulatory capital ratios in excess of the levels established for well-capitalized institutions at June 30, 2017 and December 31, 2016, as shown in the following table.

(Dollars in thousands)	June 30, 2017	December 31, 2016	Minimum Ratios under Capital Adequacy Guidelines		
			Minimum Ratios for Well-Capitalized Banks **		
Risk-adjusted assets	\$18,766,184	\$18,994,730			
Tier I common risk-based capital	2,304,532	2,207,370

* as of the fully phased-in date of Jan. 1, 2019, including capital conservation buffer

**under Prompt Corrective Action requirements

The Company maintains a treasury stock buyback program under authorizations by its Board of Directors and normally purchases stock in the open market. The Company purchased 188,348 shares at an average price of \$56.43 during the six months ended June 30, 2017, which was related to stock-based compensation transactions. At June 30, 2017, 3,570,327 shares remained available for purchase under the current Board authorization.

The Company's common stock dividend policy reflects its earnings outlook, desired payout ratios, the need to maintain adequate capital and liquidity levels, and alternative investment options. The Company paid a \$.225 per share cash dividend on its common stock in both the first and second quarters of 2017, which was a 5% increase compared to its 2016 quarterly dividend.

Commitments, Off-Balance Sheet Arrangements and Contingencies

In the normal course of business, various commitments and contingent liabilities arise which are not required to be recorded on the balance sheet. The most significant of these are loan commitments, which at June 30, 2017 totaled \$10.4 billion (including approximately \$5.0 billion in unused approved credit card lines). In addition, the Company enters into standby and commercial letters of credit. These contracts totaled \$338.8 million and \$13.3 million,

respectively, at June 30, 2017. As many commitments expire unused or only partially used, these totals do not necessarily reflect future cash requirements. The carrying value of the guarantee obligations associated with the standby letters of credit, which has been recorded as a liability on the consolidated balance sheet, amounted to \$2.1 million at June 30, 2017.

The Company regularly purchases various state tax credits arising from third-party property redevelopment. These credits are either resold to third parties at a profit or retained for use by the Company. During the first six months of 2017, purchases and sales of tax credits amounted to \$42.0 million and \$31.7 million, respectively. Fees from sales of tax credits were \$1.9 million for the six months ended June 30, 2017, compared to \$1.7 million in the same period last year. At June 30, 2017, the Company expected to fund outstanding purchase commitments of \$79.2 million during the remainder of 2017.

Table of Contents

Segment Results

The table below is a summary of segment pre-tax income results for the first six months of 2017 and 2016.

(Dollars in thousands)	Consumer	Commercial	Wealth	Segment Totals	Other/ Elimination	Consolidated Totals

Percent	(6.7)%	(2.4)%	13.3	%(.3)%	192.7	% 6.4

Consumer

For the six months ended June 30, 2017, income before income taxes for the Consumer segment decreased \$2.6 million, or 6.7%, compared to the first six months of 2016. This decrease in income before taxes was mainly due to higher non-interest expense of \$5.6 million, or 4.0%, and an increase in the provision for loan losses of \$3.0 million, or 16.9%. These increases in expense were partly offset by growth in non-interest income of \$3.1 million, or 4.9%, and net interest income of \$2.8 million, or 2.1%. Net interest income increased due to a \$4.3 million increase in net allocated funding credits assigned to the Consumer segment's loan and deposit portfolios, partly offset by a decline of \$1.5 million in loan interest income. Non-interest income increased mainly due to growth in deposit fees (mainly deposit account service fees and overdraft and return item fees), bank card fees, and mortgage banking revenue. Non-interest expense increased over the same period in the previous year due to higher allocated support costs, mainly administrative, online banking and information technology. In addition, salaries, bank card rewards, and royalty fees expense increased over the previous year, while supplies and communication expense decreased due to higher chip card reissue costs last year that have now declined. The provision for loan losses totaled \$20.5 million, a \$3.0 million increase over the first six months of 2016, which was mainly due to higher credit card loan net charge-offs.

Commercial

For the six months ended June 30, 2017, income before income taxes for the Commercial segment decreased \$2.7 million, or 2.4%, compared to the same period in the previous year. This decrease was mainly due to lower non-interest income, higher non-interest expense and an increase in the provision for loan losses and was partially offset by growth in net interest income. Net interest income increased \$8.2 million, or 5.4%, due to an increase in loan interest income, partly offset by a decline in net allocated funding credits and higher deposit interest expense. Non-interest income decreased \$2.5 million, or 2.5%, from the previous year due to lower swap fees, bank card fees, and capital market fees. These decreases were partly offset by growth in deposit account fees. Non-interest expense

increased \$7.6 million, or 5.4%, mainly due to increases in salaries and benefits expense and allocated service and support costs. The provision for loan losses increased \$863 thousand over the same period last year, due to lower net recoveries on business real estate loans.

Table of Contents

Wealth

Wealth segment pre-tax profitability for the six months ended June 30, 2017 increased \$4.8 million, or 13.3%, over the same period in the previous year. Net interest income increased \$1.9 million, or 8.9%, mainly due to an increase in loan interest income. Non-interest income increased \$5.5 million, or 7.8%, over the prior year largely due to higher private client and institutional trust fees, brokerage fees and cash sweep fees. These increases were partly offset by a trust related settlement received in the second quarter of 2016. Non-interest expense increased \$2.9 million, or 5.0%, mainly due to higher salary and benefit costs, professional fees and allocated support costs. The provision for loan losses decreased \$116 thousand, mainly due to lower revolving home equity loan net charge-offs.

The Other/Elimination category in the preceding table includes the activity of various support and overhead operating units of the Company, in addition to the investment securities portfolio and other items not allocated to the segments. In accordance with the Company's transfer pricing procedures, the difference between the total provision and total net charge-offs/recoveries is not allocated to a business segment and is included in this category. The pre-tax profitability of this category was higher than in the same period last year by \$13.2 million. This increase was mainly due to higher unallocated net interest income of \$12.5 million, offset by lower non-interest income of \$1.5 million and higher non-interest expense of \$822 thousand. Unallocated securities gains were \$879 thousand in the first six months of 2017 compared to losses of \$1.7 million in 2016. Also, the unallocated loan loss provision decreased \$480 thousand, as the provision was \$1.9 million in excess of charge-offs in the first six months of 2017 compared to \$2.3 million in excess of charge-offs in the first six months of 2016.

Regulatory Changes Affecting the Banking Industry

In accordance with the Dodd-Frank Act, the Company began submitting its stress test results to the Federal Reserve in March 2014 and publicly disclosed the results of its stress testing for the first time in June 2015. In 2017, the Company submitted its stress test report to the Federal Reserve in July and expects to publicly disclose the results in October.

The Volcker Rule of the Dodd-Frank Act, effective on April 1, 2014, places trading restrictions on financial institutions and separates investment banking, private equity and proprietary trading (hedge fund) sections of financial institutions from their consumer lending arms. Key provisions restrict banks from simultaneously entering into advisory and creditor roles with their clients, such as with private equity firms. The Volcker Rule also restricts financial institutions from investing in and sponsoring certain types of investments, which must be divested by July 21, 2017. In 2016, the Company withdrew from a private equity fund investment to comply with the Volcker Rule requirement and holds no other significant investments requiring disposal.

Impact of Recently Issued Accounting Standards

Derivatives In March 2016, the FASB issued ASU 2016-05, "Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships", which clarifies that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria continue to be met. The amendments were effective January 1, 2017 and did not have a significant effect on the Company's consolidated financial statements.

The FASB issued ASU 2016-06, "Contingent Put and Call Options in Debt Instruments", in March 2016. The ASU clarifies the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. Under the new guidance, the embedded options should be assessed solely in accordance with a four-step decision sequence, with no additional assessment of whether the triggering event is indexed to interest rates or credit risk. The amendments were effective

January 1, 2017 and did not have a significant effect on the Company's consolidated financial statements.

Investments The FASB issued ASU 2016-07, "Equity Method and Joint Ventures", in March 2016, which eliminates the requirement that an entity retroactively adopt the equity method of accounting if an investment qualifies for use of the equity method as a result of an increase in ownership or influence. Instead, the cost of acquiring the additional interest should be added to the current basis of the previously held interest, and equity method accounting applied prospectively. The amendments were effective January 1, 2017 and did not have a significant effect on the Company's consolidated financial statements.

Stock Compensation The FASB issued ASU 2016-09, "Improvements to Employee Share-Based Payment Accounting", in March 2016, in order to reduce complexity in this area and improve the usefulness of information provided to users. Amendments which will affect public companies include the recognition of excess tax benefits and deficiencies in income tax expense or benefit in the income statement, guidance as to the classification of excess tax benefits on the statement of cash flows, an election to

Table of Contents

account for award forfeitures as they occur, and the ability to withhold taxes up to the maximum statutory rate in the applicable jurisdictions without triggering liability classification of the award. The amendments were effective January 1, 2017. As further discussed in Note 12 to the consolidated financial statements, the Company elected to account for forfeitures as they occur.

Consolidation The FASB issued ASU 2016-17, "Interests Held through Related Parties That Are under Common Control", in October 2016. The ASU amends current guidance on how a reporting entity that is the single decision maker of a variable interest entity (VIE) should treat indirect interests in the entity held through related parties that are under common control with the reporting entity when determining whether it is the primary beneficiary of that VIE. Current GAAP requires a single decision maker to attribute indirect interests held by certain of its related parties entirely to itself, while the amendments require inclusion of those interests on a proportionate basis consistent with indirect interests held through other related parties. The amendments were effective January 1, 2017 and did not have a significant effect on the Company's consolidated financial statements.

Revenue from Contracts with Customers The FASB issued ASU 2014-09, "Revenue from Contracts with Customers", in May 2014, which has been followed by additional clarifying guidance on specified implementation issues. The ASU supersedes revenue recognition requirements in Topic 605, Revenue Recognition, including most industry specific revenue recognition guidance in the FASB Accounting Standards Codification. The core principle of the new guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance identifies specific steps that entities should apply in order to achieve this principle. Under the ASU and related amendments, the guidance is effective for interim and annual periods beginning January 1, 2018 and must be applied retrospectively, whether through a full restatement of prior periods or a cumulative adjustment upon adoption of the ASU.

Approximately 60% of the Company's revenue is comprised of net interest income on financial assets and financial liabilities, and is explicitly out of scope of the guidance. The Company has identified the primary contracts in scope as those relating to brokerage commissions, trust fees, deposit account fees, real estate sales, and credit card revenues. Over the last twelve months, significant discussions have been held with representatives of the business lines associated with the revenues described above and documentation has been accumulated and reviewed. The Company is currently in the process of contract sampling, which should be completed early in the fourth quarter. The Company's analysis to date suggests that adoption of this ASU should not alter the way in which revenue for these significant areas is determined currently, but could possibly net certain revenues against expense or certain expenses against revenue. Final conclusions are anticipated to be reached later this year. The Company plans to adopt this ASU on January 1, 2018 with a cumulative effect adjustment to opening retained earnings, if such adjustment is deemed to be significant.

Liabilities The FASB issued ASU 2016-04, "Recognition of Breakage for Certain Prepaid Stored-Value Products", in March 2016, in order to address current and potential future diversity in practice related to the derecognition of a prepaid stored-value product liability. Such products include prepaid gift cards issued on a specific payment network and redeemable at network-accepting merchant locations, prepaid telecommunication cards, and traveler's checks. The amendments require that the portion of the dollar value of prepaid stored-value products that is ultimately unredeemed (that is, the breakage) be accounted for consistent with the breakage guidance for stored-value product transactions provided in ASC Topic 606 - Revenue from Contracts with Customers. These amendments are effective for interim and annual periods beginning January 1, 2018. The Company is in the process of evaluating the impact of the ASU's adoption on the Company's consolidated financial statements.

Income Taxes The FASB issued ASU 2016-16, "Intra-Entity Transfers of Assets Other Than Inventory", in October 2016. Current GAAP prohibits the recognition of current and deferred income taxes for an intra-entity asset transfer

until the asset has been sold to an outside party. The amendments require the recognition of income tax consequences of an intra-entity transfer of an asset (other than inventory) when the transfer occurs. This change removes the current exception to the principle of comprehensive recognition of current and deferred income taxes in GAAP (except for inventory). These amendments are effective for reporting periods beginning January 1, 2018 and are not expected to have a significant effect on the Company's consolidated financial statements.

Financial Instruments The FASB issued ASU 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities", in January 2016. The amendments require all equity investments to be measured at fair value with changes in the fair value recognized through net income, other than those accounted for under the equity method of accounting or those that result in the consolidation of the investee. Additionally, these amendments require presentation in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk for those liabilities measured at fair value. The amendments also require use of the exit price notion when measuring the fair value of financial instruments for disclosure purposes. These amendments are effective for interim and annual periods beginning January 1, 2018. The Company has formed a working group to evaluate the changes required as a result of the adoption of this ASU and

Table of Contents

has also engaged outside consultants to assist with data collection and calculation of fair value information, particularly for fair value disclosures of the Company's loan portfolio.

Statement of Cash Flows The FASB issued ASU 2016-15, "Classification of Certain Cash Receipts and Cash Payments", in August 2016. The ASU addresses the presentation and classification in the Statement of Cash Flows of several specific cash flow issues. These include cash payments for debt prepayment or extinguishment costs, settlement of zero-coupon debt instruments, distributions received from equity method investees, and separately identifiable cash flows and application of the predominance principle. The amendments are effective January 1, 2018 and are not expected to have a significant effect on the Company's consolidated financial statements.

The FASB issued ASU 2016-18, "Restricted Cash", in November 2016. The ASU addresses the current diversity in the classification and presentation of changes in restricted cash on the statement of cash flows. The ASU requires that amounts described as restricted cash and restricted cash equivalents be included with cash and cash equivalents when reconciling the beginning and end of period amounts shown on the statement of cash flows. Disclosures are to be provided on the nature of restrictions on cash and cash equivalents. When presented in more than one line item within the statement of financial position, the entity shall disclose the amounts, disaggregated by line item, of cash, cash equivalents, restricted cash, and restricted cash equivalents reported within the statement of financial position. The amendments are effective January 1, 2018 and are not expected to have a significant effect on the Company's consolidated financial statements.

Retirement Benefits The FASB issued ASU 2017-07, "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost", in March 2017. Under current guidance, the different components comprising net benefit cost are aggregated for reporting in the financial statements. Because these components are heterogeneous, the current presentation reduces the transparency and usefulness of the financial statements. The ASU requires that an employer report the service cost component of net benefit cost in the same line item as other compensation costs arising from services rendered during the period. The other components of net benefit cost are required to be presented separately from the servicing cost component. Only service cost is eligible for capitalization when applicable. The amendments are effective January 1, 2018 and are not expected to have a significant effect on the Company's consolidated financial statements.

Leases In February 2016, the FASB issued ASU 2016-02, "Leases", in order to increase transparency and comparability by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. The ASU primarily affects lessee accounting, which requires the lessee to recognize a right-of-use asset and a liability to make lease payments for those leases classified as operating leases under previous GAAP. For leases with a term of 12 months or less, an election by class of underlying asset not to recognize lease assets and lease liabilities is permitted. The ASU also provides additional guidance as to the definition of a lease, identification of lease components, and sale and leaseback transactions. The amendments in the ASU are effective for interim and annual periods beginning January 1, 2019. The Company is the lessee in approximately 200 lease agreements that are subject to this ASU. The Company has formed a working group to assess the changes required and is actively working with its current software vendor to acquire a new module designed to comply with the new accounting requirements.

Premium Amortization The FASB issued ASU 2017-08, "Premium Amortization on Purchased Callable Debt Securities", in March 2017. Under current guidance, many entities amortize the premium on purchased callable debt securities over the contractual life of the instrument. As a result, upon the exercise of a call on a callable debt security held at a premium, the unamortized premium is recorded as a loss in earnings. The amendments in this ASU shorten the amortization period for certain callable debt securities held at a premium to the earliest call date, and more closely align the amortization period to expectations incorporated in market pricing of the instrument. The amendments are effective January 1, 2019 and are not expected to have a significant effect on the Company's consolidated financial

statements.

Financial Instruments ASU 2016-13, "Measurement of Credit Losses on Financial Instruments", was issued in June 2016. Its implementation will result in a new loan loss accounting framework, also known as the current expected credit loss (CECL) model. CECL requires credit losses expected throughout the life of the asset portfolio on loans and held-to-maturity securities to be recorded at the time of origination. Under the current incurred loss model, losses are recorded when it is probable that a loss event has occurred. The new standard will require significant operational changes, especially in data collection and analysis. The ASU is effective for interim and annual periods beginning January 1, 2020, and is expected to increase the allowance upon adoption. The Company has formed a working group to assess the standard and has begun assessing the data needs required. In the second quarter of 2017, the Company contracted with a software supplier to assist in the data collection and calculation of the allowance for loan losses under the new model, to allow for pro-forma calculations to begin by mid-2018.

Intangible Assets The FASB issued ASU 2017-04, "Simplifying the Test for Goodwill Impairment", in January 2017. Under current guidance, a goodwill impairment loss is measured by comparing the implied fair value of a reporting unit's goodwill with

55

Table of Contents

the carrying amount of that goodwill by following procedures that would be required in determining the fair value of assets acquired and liabilities assumed in a business combination. Under the new amendments, the goodwill impairment test compares the fair value of a reporting unit with its carrying amount and an impairment charge is measured as the amount by which the carrying amount exceeds the reporting unit's fair value. The amendments are effective for impairment tests beginning January 1, 2020 and are not expected to have a significant effect on the Company's consolidated financial statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest rate risk management focuses on maintaining consistent growth in net interest income within Board-approved policy limits. The Company primarily uses earnings simulation models to analyze net interest sensitivity to movement in interest rates. The Company performs monthly simulations which model interest rate movements and risk in accordance with changes to its balance sheet composition. For further discussion of the Company's market risk, see the Interest Rate Sensitivity section of Management's Discussion and Analysis of Financial Condition and Results of Operations included in the Company's 2016 Annual Report on Form 10-K.

The tables below compute the effects of gradual rising interest rates over a twelve month period on the Company's net interest income, assuming a static balance sheet with the exception of deposit attrition. The difference between the two simulations is the amount of deposit attrition incorporated, which is shown in the tables below. In both simulations, three rising rate scenarios were selected as shown in the tables, and net interest income was calculated and compared to a base scenario in which assets, liabilities and rates remained constant over a twelve month period. For each of the simulations, interest rates applicable to each interest earning asset or interest bearing liability were ratably increased during the year (by either 100, 200 or 300 basis points). The balances contained in the balance sheet were assumed not to change over the twelve month period, except that as presented in the tables below, it was assumed certain non-maturity type deposit attrition would occur, as a result of higher interest rates, and would be replaced with short-term federal funds borrowings.

The simulations reflect two different assumptions related to deposit attrition. The Company utilizes these simulations both for monitoring interest rate risk and for liquidity planning purposes. While the future effects of rising rates on deposit balances cannot be known, the Company maintains a practice of running multiple rate scenarios to better understand interest rate risk and its effect on the Company's performance. The Company believes that its approach to interest rate risk has appropriately considered its susceptibility to both rising rates and falling rates and has adopted strategies which minimize impacts to overall interest rate risk.

Simulation A	June 30, 2017			March 31, 2017		
	\$	%	Assumed	\$	%	Assumed
(Dollars in millions)	Change in Net Interest Income	Change in Net Interest Income	Deposit Attrition	Change in Net Interest Income	Change in Net Interest Income	Deposit Attrition
300 basis points rising	\$15.12	0.09 %	\$(368.0)	\$18.12	2.54 %	\$(379.4)
200 basis points rising	14.3	1.99	(256.2)	16.6	2.33	(266.7)
100 basis points rising	9.1	1.26	(131.4)	10.8	1.52	(140.0)

Simulation B	June 30, 2017			March 31, 2017		
	\$	%	Assumed	\$	%	Assumed
(Dollars in millions)	Change in Net Interest Income	Change in Net Interest Income	Deposit Attrition	Change in Net Interest Income	Change in Net Interest Income	Deposit Attrition
300 basis points rising	\$(5.6)	(.78)%	\$(1,181.4)	\$(3.3)	(.45)%	\$(1,269.4)
200 basis points rising	(3.2)	(.44)	(1,072.5)	(1.3)	(.19)	(1,161.5)
100 basis points rising	(5.1)	(.71)	(952.4)	(3.6)	(.51)	(1,042.3)

The difference in these two simulations is the degree in which deposits are modeled to decline as noted in the above table. Both simulations assume that a decline in deposits would be offset by increased short-term borrowings, which are more rate sensitive and can result in higher interest costs in a rising rate environment. Under Simulation A, a gradual increase in interest rates of 100 basis points is expected to increase net interest income from the base calculation by \$9.1 million, while a gradual increase in rates of 200 basis points would increase net interest income by \$14.3 million. An increase in rates of 300 basis points would result in an increase in net interest income of \$15.1 million. The change in net interest income from the base calculation at June 30, 2017 was lower than projections made at March 31, 2017 largely due to a Federal Reserve rate increase during the second quarter of 2017 and higher rates paid on certificates of deposit, partly offset lower balances. Higher rates and balances of repurchase agreements, as well as higher balances of interest checking and money market deposits, also increased interest expense this quarter, lowering net interest income projections for the second quarter of 2017 compared to the prior quarter. Under Simulation B, the same assumptions utilized in Simulation A were applied. However, in Simulation B, deposit attrition was accelerated to consider the effects that large deposit outflows might have on net interest income and liquidity planning purposes. The effect of higher deposit attrition was that greater reliance was placed on short-term borrowings at higher rates, which are more

Table of Contents

rate sensitive. As shown in the table, under these assumptions, net interest income in Simulation B was significantly lower than in Simulation A, reflecting higher costs for short-term borrowings.

Projecting deposit activity in a historically low interest rate environment is difficult, and the Company cannot predict how deposits will react to rising rates. The comparison provided above provides insight into potential effects of changes in rates and deposit levels on net interest income.

Item 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of June 30, 2017. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective. There were no changes in the Company's internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II: OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

The information required by this item is set forth in Part I, Item 1 under Note 15, Legal and Regulatory Proceedings.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table sets forth information about the Company's purchases of its \$5 par value common stock, its only class of common stock registered pursuant to Section 12 of the Securities Exchange Act of 1934, as amended.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as part of Publicly Announced Program	Maximum Number that May Yet Be Purchased Under the Program
April 1 — 30, 2015	3,468	\$ 54.05	53,468	3,578,470
May 1 — 31, 2015	5,501	\$ 55.19	5,501	3,572,969
June 1 — 30, 2017	2,642	\$ 56.91	2,642	3,570,327
Total	61,611	\$ 54.27	61,611	3,570,327

The Company's stock purchases shown above were made under authorizations by the Board of Directors. Under the most recent authorization in October 2015 of 5,000,000 shares, 3,570,327 shares remained available for purchase at June 30, 2017.

Item 6. EXHIBITS

See Index to Exhibits.
