The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and therefore do not include all of the information and financial statement disclosures necessary for a fair presentation of consolidated financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America. In the opinion of management, the information furnished herein includes all adjustments necessary to reflect a fair statement of the interim periods reported. All adjustments are of a normal and recurring nature. The December 25, 2004 consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America.

The Company has adopted a 52 or 53 week fiscal year ending the last Saturday in December. The results of operations for the three and six months ended June 25, 2005 and June 26, 2004 are for 13 and 26 week periods, respectively.

NOTE 2 - INVENTORIES

Inventories, which are stated at the lower of cost or market with cost determined using the first-in, first-out method, consist of the following:

 	 	 	 	 	 	 	 	 	
 	 	 	 	 	June 25,	 	 	December 25,	
 	 	 	 	 	2005	 	 	2004	

 	 	 	 	 	 	 	 	 	
 	Raw materials	 	 	\$	27,014,563	 	\$	26,390,350	
 	Work-in-progress	 	 	 	7,543,292	 	 	9,795,961	
 	Finished goods	 	 	 	11,340,270	 	 	9,254,878	
 	 	 	 	\$	45,898,125	 	\$	45,441,189	

 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	

 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	

 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	

 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	

 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	
 	 	 	 	 	 	 	 	 	

The valuation of raw materials, work-in-progress and finished goods inventories at interim dates is based upon a gross profit percentage method and bills of materials. The Company has historically had favorable and unfavorable adjustments resulting from physical inventories. The Company continues to refine its costing procedures for valuation of interim inventories in an effort to minimize book to physical inventory adjustments.

NOTE 4 - STOCK-BASED COMPENSATION

The Company has adopted the disclosure-only provisions of Statement of Financial Accounting Standards ("SFAS") No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure," and, accordingly, accounts for its stock option plans using the intrinsic value method of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees."

NOTE 5 - COMMON STOCK

The Company paid a three and one-half cent (\$.035) per share cash dividend to all Class A and Class B common stockholders each of the quarters ended June 25, 2005 and June 26, 2004. Additionally, the Company paid a three and one-half cent (\$.035) share and a three cent (\$.03) per share cash dividend to all Class A and Class B common stockholders during the quarters ended March 26, 2005 and March 27, 2004, respectively.

On June 6, 2005, the Company's Board of Directors declared a nine and one-half cent (\$.095) per share cash dividend payable August 1, 2005 to all Class A and Class B common stockholders of record on July 25, 2005. Accrued cash dividend payable on

\$1,190,557 is included in other current liabilities as of June 25, 2005.

NOTE 6 - LEASE COMMITMENTS

On April 14, 2005, the Company entered into a third extension of an existing lease agreement with a related party. The third extension extends the lease term for certain of the Company's leased facilities in Goshen, Indiana and Griffin, Georgia for an additional five years, with a new expiration date of July 2010. Monthly rental payments under the related party lease agreement are \$54,108 and increase in July of each successive year by an escalator defined in the lease agreement. All other terms and conditions of the existing lease agreement remain unchanged.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

Net sales for the three months ended June 25, 2005 increased \$4.5 million or 5.0% to \$95.2 million from \$90.7 million for the three months ended June 26, 2004. Net sales for the six months ended June 25, 2005 increased \$21.3 million or 13.0% to \$185.5 million from \$164.2 million for the six months ended June 26, 2004. The Company completed two large fleet contracts during the first half of 2005 resulting in a majority of the increase in net sales. The higher fleet sales were a combination of a larger quantity of unit shipments along with price increases implemented in response to the significant raw material cost escalation experienced throughout 2005.

Despite the additional revenues resulting from higher fleet sales and price increases, overhead remained relatively constant as a percentage of net sales for the three and six month periods. The Company has experienced significant escalating group health insurance claim costs during 2005, particularly during the second quarter. Group health insurance expense increased \$561 thousand and \$738 thousand for the three and six month periods in 2005 compared to the 2004 comparative periods. In addition, depreciation expense has increased \$171 thousand and \$328 thousand for the 2005 three and six month periods compared to the 2004 comparative periods as a result of the \$9.7 million of capital expenditures incurred since June 26, 2004.

Delivery expenses remained relatively unchanged as a percentage of net sales despite higher fuel costs. These higher fuel costs were offset by the increased number of fleet units invoiced in the first six months of 2005. Such products are generally not delivered by the Company but are picked up by the customers.

Selling, general and administrative expenses were 7.7% and 7.4% of net sales for the three and six months ended June 25, 2005 compared to 7.1% and 7.3% of net sales for the three and six months ended June 26, 2004. Selling expenses increased as a percentage of net sales primarily due to a reduction in cooperative marketing funds the Company received from chassis manufacturers in the first six months of 2005 versus the first six months of 2004. These funds, which are used to offset marketing and promotional expenses, were reduced by the chassis manufacturers due to their improving business conditions. Additionally, the Company experienced higher sales commission expense as a result of the additional revenues recorded in the first six months of 2005 compared to the first six months of 2004. General and administrative expenses increased primarily as a result of additional compensation expense related to the Company's incentive bonus plans which are based on pretax earnings.

Interest expense for the three and six months ended June 25, 2005 was \$.6 million and \$1.1 million compared to \$.2 million and \$.4 million for the three and six months ended June 26, 2004. The increase in interest expense was attributable to higher levels of borrowings to finance working capital and capital expenditures, and the rise in short-term interest rates.

The Company's effective income tax rate was 36.0% for the first six months of 2005 compared to 38.1% for the first six months of 2004. The decrease in the Company's effective tax rate is attributable to additional tax deductions allowed manufacturers by the 2004 American Jobs Creation Act and certain tax benefits resulting from the formation of a captive insurance company. The manufacturer's deduction will lower the Company's effective tax rate by approximately one percent. In late 2004, after a review of insurance risk management alternatives, the Company restructured certain of its legal entities and formed a wholly owned captive insurance company which resulted in a further reduction in the Company's effective tax rate.

Results of Operations, Concluded

Net income for the three and six months ended June 25, 2005 was \$2.9 million and \$6.0 million compared to \$1.9 million and \$2.9 million for the three and six months ended June 26, 2004. Basic earnings per share were \$.23 and \$.49 for the three and six months ended June 25, 2005 compared to \$.16 and \$.24 per share for the three and six

months ended June 26, 2004. Diluted earnings per share were \$.23 and \$.47 for the three and six months ended June 25, 2005 compared to \$.15 and \$.23 per share for the three and six months ended June 26, 2004

 												
 	 	 	 	 	 	 	 	 	 	 	 	

Liquidity and Capital Resources

The Company's revolving line of credit, net income and depreciation were the major sources of cash flows during the six months ended June 25, 2005. As a result of the higher levels of trade accounts receivable and inventories related to two large fleet contracts there was extensive use of our revolving line of credit during the first quarter of 2005. These contracts were completed during the second quarter, resulting in a reduction in trade accounts receivable of \$9.0 million and a reduction in inventories of \$7.4 million from the amounts of the end of the first quarter. These cash resources, along with cash flow from operations, were utilized to reduce trade accounts payable by \$6.4 million and to reduce long-term debt obligations by \$14.4 million during the second quarter of 2005.

Capital expenditures for the six months ended June 25, 2005 were \$2.9 million. During the second quarter the Company completed the construction of an additional manufacturing facility at its Griffin, Georgia location and expended \$1.4 million on this building project during the first six months. Our Jonestown, Pennsylvania location expended \$.5 million in capital expenditures to continue improving operations at its recently acquired manufacturing plant adjacent to our other facilities. We expect our 2005 capital expenditures to approximate our 2005 depreciation expense of \$4.0 million.

The Company believes that cash flow generated from operations and funds available under the Company's revolving line of credit will be sufficient to meet the Company's cash needs during the next twelve months.

Contractual Obligations

Our fixed, noncancelable obligations as of June 25, 2005 were as follows:

Critical Accounting Policies and Estimates

Management's discussion and analysis of its financial position and results of operations are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. The Company's significant accounting policies are discussed in Note 1 of the Notes to Consolidated Financial Statements included in the Annual Report on Form 10-K for the year ended December 25, 2004. In management's opinion, the Company's critical accounting policies include allowance for doubtful accounts, and obsolete inventories, inventory relief, accrued insurance and accrued warranty.

Allowance for Doubtful Accounts - The Company maintains an allowance for doubtful accounts for estimated losses resulting from the inability of customers to make required payments. If the financial condition of customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required which would affect future operating results.

Excess and Obsolete Inventories - The Company must make estimates regarding the future use of products and provides a provision for obsolete or slow-moving inventories. If actual product life-cycles, product demand or market conditions are less favorable than those projected by management, additional inventory write-downs may be required which would affect future operating results.

Inventory Relief - For monthly and quarterly financial reporting, cost of sales is recorded and inventories are relieved by the use of standard bills of material. Because of the customized nature of the Company's products, it is difficult to place full reliance on the use of bills of material for accurate relief of inventories. Although the Company continues to refine the process of creating accurate bills of material, manual adjustments, which are based on estimates, are necessary to assure correct relief of inventories for products. The estimate calculations consider the customized nature of products, historical inventory relief percentages, scrap variances and other factors which could impact inventory relief. The accuracy of the inventory relief is not known until the annual physical inventories are completed and it is not practical to consider more frequent physical inventories because of the sales order backlog and the costs associated with ceasing production for the purpose of conducting physical inventories. If the annual physical inventories result in significant favorable or unfavorable adjustments, such adjustments will affect future operating results.

Accrued Insurance - The Company has a self-insured retention against product liability claims with insurance coverage over and above the retention. The Company is also self-insured for a portion of its employee medical benefits and workers' compensation. Product liability claims are routinely reviewed by the Company's insurance carrier and management routinely reviews other self-insurance risks for purposes of establishing ultimate loss estimates. In addition, management must determine estimated liabilities for claims incurred but not reported. Such estimates and any subsequent changes in estimates may result in adjustments to the Company's operating results in the future.

Critical Accounting Policies and Estimates, Concluded

Accrued Warranty - The Company provides limited warranties for periods of up to five years from the date of retail sales. Estimated warranty costs are provided for at the time of sale and are based upon historical experience.

Forward-Looking Statements

This report contains forward-looking statements (within the meaning of the Private Securities Litigation Reform Act of 1995), which are not historical facts, which reflect the view of the Company's management with respect to future events. When used in this report, words such as "believe," "expect," "anticipate," "estimate," "intend," and similar expressions, as they relate to the Company or its plans or operations, identify forward-looking statements. Such forward-looking statements are based on assumptions made by management based on information currently available to the Company's management. Although management believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations are reasonable, and it can give no assurance that such expectations will prove to have been correct. Important factors that could cause actual results to differ materially from such expectations include, without limitation, limitations on the availability of chassis on which the Company's product is dependent, availability of raw materials, raw material cost increases, and severe interest rate increases. Furthermore, the Company can provide no assurance that such raw material cost increases can be passed on to its customers through implementation of price increases for the Company's products. The forward-looking statements contained herein reflect the current views of the Company's management with respect to future events and are subject to those factors and other risks, uncertainties and assumptions relating to the operations, results of operations, cash flows and financial position of the Company. The Company assumes no obligation to update the forward-looking statements or to update the reasons actual results could differ from those contemplated by such forward-looking statements.

Issues and Uncertainties

Business and Economic Cycles - The broad spectrum of industries that create demand for our products makes our business particularly sensitive to general economic conditions, including corporate profitability, interest rates, fuel costs, and consumer preference and spending patterns. Because of the replacement-nature of our products, an economic downturn could cause our customers to delay purchase of our products and adversely affect our ability to remain profitable.

There has been no material change from the information provided in the Company's Annual Report on Form 10-K for the year ended December 25, 2004.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures - The Company's chief executive officer and its chief financial officer, after carrying out an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Securities Exchange Act Rules 13a-15(e) and 15(e)) as of the date of this quarterly report (the "Evaluation Date") have concluded that as of the Evaluation Date, the Company's disclosure controls and procedures were adequate and effective to provide reasonable assurance that the material information relating to the Company and its consolidated subsidiaries that is required to be in this quarterly report would be made known to them on a timely basis.

Controls and Procedures, Concluded.

Changes in Internal Controls - There were no significant changes in the Company's internal controls or in other factors that could significantly affect the Company's disclosure controls and procedures during the Company's fiscal quarter, nor any significant deficiencies or material weaknesses in such disclosure controls and procedures requiring corrective actions. As a result, no corrective actions were taken.
