Item 4.02 Non-Reliance on Previously Issued Financial Statements or a Related  
Audit Report or Completed Interim Review

(a)

During the preparation of our 2004 year-end financial statements and more specifically the inter-company profit eliminations associated with demonstration inventory equipment amounts, Data I/O Corporation ("Data I/O") identified elimination calculation omission errors that had resulted in the understatement

## Edgar Filing: DATA I/O CORP - Form 8-K

of inter-company expense eliminations on foreign subsidiary demonstration inventory equipment depreciation, with a corresponding overstatement of demonstration inventory equipment accumulated depreciation. The errors, which had occurred over a period of more than five years, overstated depreciation (international selling) expense associated with demonstration inventory equipment in service in the Company's foreign subsidiaries. Therefore, our annual report filed on Form 10K for the period ended December 31, 2003 should no longer be relied upon.

The errors resulted in a cumulative overstatement of demonstration inventory equipment accumulated depreciation and a corresponding overstatement of depreciation (international selling) expense of approximately \$112,000 through December 31, 2004. The cumulative impact of this error as of December 31, 2003, including the related income tax effect, resulted in a \$112,000 overstatement of demonstration inventory equipment accumulated depreciation reserve and a \$112,000 understatement of depreciation (international selling) expense. The income tax effects from the cumulative effect of this error had no impact on income tax expense and just impacted the related disclosure of net operating losses in carry forward and the related valuation allowances.

The impact of the errors on 2003 and prior periods are as follows:

2003	\$ 65,000	Reduction in expense
2002		No impact to record due to immateriality
2001		No impact to record due to immateriality
2000	\$ 47,000	Increase to ending retained earnings related to the cumulative effect from periods prior to 2001
Total	<u>\$112,000</u>	

For 2003, the quarterly breakdown of the reduction of expense should have been as follows: 4th Quarter \$39,000; 3rd Quarter \$12,000; 2nd Quarter \$13,000; and 1st Quarter \$1,000. Data I/O has determined that the adjustments to the quarters other than the fourth quarter are immaterial and that the entire 2003 adjustment will be reflected as a correction to the 4th quarter of 2003 of \$65,000 in the restated Form 10-K and that accordingly no restatement is necessary for the interim quarterly Form 10-Q filings.

While Data I/O believes the impacts of these elimination errors are not material to any previously issued financial statement, Data I/O determined, on February 8, 2005, that the cumulative adjustment required to correct these errors was material to record in 2004, and that the calculation errors were most appropriately corrected through restatement of previously issued financial statements for the fiscal years ended December 31, 2003. Data I/O advised its independent registered public accounting firm, Grant Thornton LLP ("Grant Thornton"), of Data I/O's determination.

On February 8, 2005 Data I/O Corporation's Audit Committee discussed the matters disclosed in this Item 4.02(a) with management and Grant Thornton. Grant Thornton informed the Audit Committee that it concurs with Data I/O's conclusion described above.

Data I/O's decision to restate previously issued financial statements was based on the impact of a cumulative correction on the 2004 financial statements, rather than the impact on any previously issued financial statement. Data I/O expects to file the restated audited financial statements and related auditors' report by amending its Form 10-K for the fiscal year ended December 31, 2003. Data I/O expects to make these filings before filing its Form 10-K for the fiscal year ended December 31, 2004 in March 2005.

A summary of the impacts of the matters described above on the indicated financial statements is attached hereto as Exhibit 99.1 and incorporated herein by reference.

### Exhibit 99.1

Data I/O Corporation ("Data I/O") identified elimination calculation omission errors that had resulted in the understatement of inter-company expense eliminations on foreign subsidiary demonstration inventory equipment depreciation, with a corresponding overstatement of demonstration inventory equipment accumulated depreciation reserve. A summary of the impacts related to the restatement of the indicated financial statements is provided below.

### Consolidated Balance Sheet (in thousands)

At December 31, 2003	As Previously Reported	Adjustment
Property, plant and equipment-net	1,151	112
