

BANK OF AMERICA CORP /DE/
Form 10-Q
October 30, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q
(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the Quarterly Period Ended September 30, 2013

or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number:
1-6523

Exact Name of Registrant as Specified in its Charter:

Bank of America Corporation

State or Other Jurisdiction of Incorporation or Organization:

Delaware

IRS Employer Identification Number:

56-0906609

Address of Principal Executive Offices:

Bank of America Corporate Center

100 N. Tryon Street

Charlotte, North Carolina 28255

Registrant's telephone number, including area code:

(704) 386-5681

Former name, former address and former fiscal year, if changed since last report:

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (check one).

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>	Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
				(do not check if a smaller reporting company)			

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).

Yes No

On October 29, 2013, there were 10,666,133,943 shares of Bank of America Corporation Common Stock outstanding.

Bank of America Corporation

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report on Form 10-Q, the documents that it incorporates by reference and the documents into which it may be incorporated by reference may contain, and from time to time Bank of America Corporation (collectively with its subsidiaries, the Corporation) and its management may make certain statements that constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as "expects," "anticipates," "believes," "estimates," "targets," "intends," "plans," "goal" and other similar expressions or future or conditional verbs such as "will," "may," "might," "should," "would" and "could." The forward-looking statements made represent the current expectations, plans or forecasts of the Corporation regarding the Corporation's future results and revenues, and future business and economic conditions more generally, including statements concerning: expectations regarding the pace of international economic growth; the expectation that, if the economy and home prices continue to improve, there will be additional reductions in the allowance for credit losses in future periods, although at a lower level than the third quarter; expectations regarding the anticipated transfers of mortgage servicing rights and their impact on the Corporation; expectations regarding incremental credit provision due to borrower assistance programs; expectations regarding future levels of net charge-offs; expectations of achieving cost savings as a result of Project New BAC of \$8 billion per year on an annualized basis, or \$2 billion per quarter, by mid-2015, with \$1.5 billion in quarterly cost savings achieved by the fourth quarter of 2013; the possibility that the Corporation may conduct additional redemptions, tender offers, exercises and other transactions in the future depending on market conditions, capital, liquidity and other factors; the expectation that the Corporation will continue to streamline processes and achieve cost savings; expectations that, in the fourth quarter of 2013, noninterest expense in Legacy Assets & Servicing (excluding litigation expense) will be below \$2.0 billion and the number of 60 days or more past due residential mortgage loans in the Legacy and Non-Legacy Residential Mortgage Serviced Portfolios will decline below 375,000; expectations regarding representations and warranties repurchase and other claims, including levels of unresolved repurchase claims related to private-label securitizations and the possibility of additional settlements in the future; the belief that there will likely be additional requests for loan files in the future leading to repurchase claims; the possibility that the Corporation may purchase common stock, preferred stock and outstanding debt instruments in various transactions depending on prevailing market conditions, liquidity and other factors; the possibility that the Corporation will need to register additional entities as swap dealers and major swap participants; the possibility that the Corporation will be required to restructure certain businesses as a result of final derivatives regulations and this may negatively impact our results of operations; expectations regarding the timing, content and impact of final regulatory capital rules, including the Corporation's ability to meet the final Basel 3 liquidity standards within regulatory timelines and the approval of the Corporation's analytical models for capital measurement under Basel 3 by U.S. regulatory agencies; expectations regarding the impact of the Financial Reform Act on the Corporation; expectations regarding whether the Corporation's issued and outstanding Qualifying Trust Preferred Securities will be classified as Tier 1 or Tier 2 capital beginning in 2016; expectations regarding the Standardized Approach as compared to the Advanced Approach; expectations related to reimbursement of delinquent FHA-insured loans; expectations regarding benefits to be obtained from the Corporation's centralized funding strategy; estimates concerning the Corporation's additional capital requirements as a global systemically important financial institution; the belief that default-related servicing costs peaked in late 2012 and have continued to decline in 2013; the Corporation's belief that it can quickly obtain cash for certain securities, even in stressed market conditions, through repurchase agreements or outright sales; the Corporation's belief that a portion of structured liability obligations will remain outstanding beyond the earliest put or redemption date; the Corporation's anticipation that debt levels will decline due to maturities through 2013; the estimation that lifetime losses on loans originated after 2008 will be significantly less than the losses experienced with respect to vintages prior to 2009; expectations regarding loans in the pay option portfolio; the belief that the Corporation's current market capitalization does not reflect the aggregate fair value of its individual reporting units; effects of the ongoing debt crisis in certain European countries, including the expectation of continued market volatility, the expectation that the Corporation will continue to support

client activities in the region and that exposures may vary over time as the Corporation monitors the situation and manages its risk profile; the expectation that net losses on derivative instruments that qualify as cash flow hedges will be reclassified into earnings; the expectation that the maximum potential exposure for chargebacks would not exceed the total amount of merchant transactions processed through Visa and MasterCard for the last six months; and other matters relating to the Corporation and the securities that it may offer from time to time or steps it may take to manage the risk of these securities. The foregoing is not an exclusive list of all forward-looking statements the Corporation makes. These statements are not guarantees of future results or performance and involve certain risks, uncertainties and assumptions that are difficult to predict and are often beyond the Corporation's control. Actual outcomes and results may differ materially from those expressed in, or implied by, any of these forward-looking statements.

Table of Contents

You should not place undue reliance on any forward-looking statement and should consider the following uncertainties and risks, as well as the risks and uncertainties more fully discussed elsewhere in this report, under Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K, and in any of the Corporation's subsequent Securities and Exchange Commission filings: The potential impact of the recent and any future government shutdown and/or debt ceiling impasse; the Corporation's ability to resolve representations and warranties repurchase claims made by monolines and private-label and other investors, including as a result of any adverse court rulings, and the chance that the Corporation could face related servicing, securities, fraud, indemnity or other claims from one or more of the government-sponsored enterprises, monolines or private-label and other investors; the possibility that future representations and warranties losses may occur in excess of the Corporation's recorded liability and estimated range of possible loss for its representations and warranties exposures; the possibility that the Corporation may not collect mortgage insurance claims; the possible impact of a future FASB standard on accounting for credit losses; uncertainties about the financial stability of several countries in the Eurozone, the risk that those countries may default on their sovereign debt or exit the Eurozone and related stresses on financial markets, the Euro and the Eurozone and the Corporation's exposures to such risks, including direct, indirect and operational; uncertainties related to the timing and pace of Federal Reserve tapering of quantitative easing, and the impact on global interest rates, currency exchange rates, and economic conditions in a number of countries; the possibility of future inquiries or investigations regarding pending or completed foreclosure activities; the negative impact of the Financial Reform Act on the Corporation's businesses and earnings, including as a result of additional regulatory interpretation and rulemaking and the success of the Corporation's actions to mitigate such impacts; the potential impact on debit card interchange fee revenue in connection with the U.S. District Court for the District of Columbia's ruling on July 31, 2013 regarding the Federal Reserve's rules implementing the Financial Reform Act's Durbin Amendment; adverse changes to the Corporation's credit ratings from the major credit rating agencies; estimates of the fair value of certain of the Corporation's assets and liabilities; the possibility that the European Commission will impose remedial measures in relation to its investigation of the Corporation's competitive practices; the impact of continued refund payments to customers and potential regulatory enforcement action relating to optional identity theft protection services; the impact of potential regulatory enforcement action relating to certain optional credit card debt cancellation products; unexpected claims, damages, penalties and fines resulting from pending or future litigation and regulatory proceedings including proceedings instituted by members of the Financial Fraud Enforcement Task Force; the Corporation's ability to fully realize the cost savings and other anticipated benefits from Project New BAC, including in accordance with currently anticipated timeframes; the impact on the Corporation's business, financial condition and results of operations of a potential higher interest rate environment; and other similar matters.

Forward-looking statements speak only as of the date they are made, and the Corporation undertakes no obligation to update any forward-looking statement to reflect the impact of circumstances or events that arise after the date the forward-looking statement was made.

Notes to the Consolidated Financial Statements referred to in the Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) are incorporated by reference into the MD&A. Certain prior-period amounts have been reclassified to conform to current period presentation. Throughout the MD&A, the Corporation uses certain acronyms and abbreviations which are defined in the Glossary.

Executive Summary

Business Overview

The Corporation is a Delaware corporation, a bank holding company and a financial holding company. When used in this report, "the Corporation" may refer to Bank of America Corporation individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates. Our principal executive offices are located in Charlotte, North Carolina. Through our banking and various nonbanking subsidiaries throughout

the U.S. and in international markets, we provide a diversified range of banking and nonbanking financial services and products through five business segments: Consumer & Business Banking (CBB), Consumer Real Estate Services (CRES), Global Banking, Global Markets and Global Wealth & Investment Management (GWIM), with the remaining operations recorded in All Other. We operate our banking activities primarily under two national bank charters: Bank of America, National Association (Bank of America, N.A. or BANA) and FIA Card Services, National Association (FIA Card Services, N.A. or FIA). On October 1, 2013, we completed the merger of our Merrill Lynch & Co., Inc. subsidiary into Bank of America Corporation. This merger has no effect on the Merrill Lynch name and brand and will have no impact on customers or clients. At September 30, 2013, the Corporation had approximately \$2.1 trillion in assets and approximately 248,000 full-time equivalent employees.

As of September 30, 2013, we operated in all 50 states, the District of Columbia and more than 40 countries. Our retail banking footprint covers approximately 80 percent of the U.S. population and we serve approximately 51 million consumer and small business relationships with approximately 5,200 banking centers, 16,200 ATMs, nationwide call centers, and leading online and mobile banking platforms. We offer industry-leading support to more than three million small business owners. We are a global leader in corporate and investment banking and trading across a broad range of asset classes serving corporations, governments, institutions and individuals around the world.

Table of Contents

Table 1 provides selected consolidated financial data for the three and nine months ended September 30, 2013 and 2012, and at September 30, 2013 and December 31, 2012.

Total deposits			1,110,118	1,105,261
Total common shareholders' equity			218,967	218,188

Total shareholders' equity	232,282		236,956	
Capital ratios ⁽⁵⁾				
Tier 1 common capital	11.08	%	11.06	%
Tier 1 capital	12.33		12.89	
Total capital	15.36		16.31	
Tier 1 leverage	7.79		7.37	

Fully taxable-equivalent (FTE) basis, return on average tangible shareholders' equity and the efficiency ratio are non-GAAP financial measures. Other companies may define or calculate these measures differently. For more information on these measures and ratios, and a corresponding reconciliation to GAAP financial measures, see Supplemental Financial Data on page 18.

Due to a net loss applicable to common shareholders for the three months ended September 30, 2012, the impact of antidilutive equity instruments was excluded from diluted earnings (loss) per share and average diluted common shares.

Balances and ratios do not include loans accounted for under the fair value option. For additional exclusions from nonperforming loans, leases and foreclosed properties, see Consumer Portfolio Credit Risk Management – Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 104 and corresponding Table 42, and Commercial Portfolio Credit Risk Management – Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity on page 113 and corresponding Table 51.

Net charge-offs exclude \$443 million and \$1.6 billion of write-offs in the purchased credit-impaired loan portfolio for the three and nine months ended September 30, 2013 compared to \$1.7 billion for both of the same periods in 2012. These write-offs decreased the purchased credit-impaired valuation allowance included as part of the allowance for loan and lease losses. For more information on purchased credit-impaired write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

Presents capital ratios in accordance with the Basel 1 – 2013 Rules, which include the Market Risk Final Rule at September 30, 2013. Basel 1 did not include the Basel 1 – 2013 Rules at December 31, 2012.

Table of Contents

Third Quarter 2013 Economic and Business Environment

In the U.S., economic growth continued at a modest pace in the third quarter of 2013, led by retail sales and a continued recovery in the housing market. However, the economy was adversely affected by weak service spending gains and the continued impact of lower federal government expenditures. Modest employment gains continued during the quarter, with minor declines in the unemployment rate. Core inflation fell, ending the quarter near one percent on an annual basis, below the longer-term inflation target of two percent set by the Board of Governors of the Federal Reserve System (Federal Reserve).

The Federal Reserve announced during the quarter its decision to await more evidence that economic progress will be sustained before adjusting the pace of its securities purchases of agency mortgage-backed securities (MBS) and long-term U.S. Treasury securities, and maintained its forward guidance on interest rates expressed in terms of economic thresholds which began in December 2012. Sequestration remained in effect at quarter-end. Despite ongoing fiscal uncertainties and international economic difficulties, U.S. equities posted gains during the third quarter. As the third quarter ended, uncertainty increased surrounding the extension of the federal government's budget and an extension of the debt ceiling. However, both issues were temporarily resolved on October 16, 2013 with the extension of the federal government's budget until January 15, 2014 and the extension of the debt ceiling until February 7, 2014, setting the stage for potential further uncertainty.

Internationally, most key European and Asian economies demonstrated economic growth, with particularly robust economic growth in the U.K. and Japan. The Eurozone continued to demonstrate a reduced level of financial anxiety as its recession ended with a return to economic growth. China also demonstrated signs of economic stability, though a now slower pace of growth seems likely to prevail. For more information on our international exposure, see Non-U.S. Portfolio on page 119.

Recent Events

Basel 3 Rules

Basel 3 Regulatory Capital Rules

In July 2013, U.S. banking regulators approved final Basel 3 Regulatory Capital rules (Basel 3). The Basel 3 rules will be effective January 1, 2014; however, various aspects of Basel 3 will be subject to multi-year transition periods ending December 31, 2018. Basel 3 generally continues to be subject to interpretation by the U.S. banking regulators. Basel 3 will materially change our Tier 1 common, Tier 1 and Total capital calculations. It introduces new minimum capital ratios and buffer requirements, proposes a supplementary leverage ratio, changes the composition of regulatory capital, expands and modifies the calculation of risk-weighted assets for credit and market risk (the Advanced Approach), revises the adequately capitalized minimum requirements under the Prompt Corrective Action framework and introduces a Standardized Approach for the calculation of risk-weighted assets, which will replace the current rules (Basel 1 – 2013 Rules) effective January 1, 2015. Under Basel 3, we will be required to calculate regulatory capital ratios and risk-weighted assets under both the Standardized and Advanced Approaches. The approach that yields the lower ratios is to be used to assess capital adequacy under the Prompt Corrective Action framework. The Prompt Corrective Action framework establishes categories of capitalization, including "well capitalized," based on regulatory ratio requirements. The Basel 3 Advanced Approach requires approval by the U.S. regulatory agencies of analytical models used as part of capital measurement. If these models are not approved, it would likely lead to an increase in our risk-weighted assets, which in some cases could be significant. While we continue to evaluate the impact of both the Standardized and Advanced Approaches, we generally expect that initially the Standardized Approach will yield the lower ratios. For additional information, see Capital Management – Regulatory Capital Changes on page 74.

Proposed Supplementary Leverage Ratio

In July 2013, U.S. banking regulators issued a notice of proposed rulemaking (NPR) to modify the supplementary leverage ratio minimum requirements under Basel 3 effective in 2018. Under the proposed rule, the largest bank holding companies (BHCs), including the Corporation, would be required to maintain a minimum supplementary leverage ratio of three percent, plus a supplementary leverage buffer of two percent, for a total of five percent. If the Corporation's supplementary leverage buffer is not greater than or equal to two percent, then the Corporation would be subject to mandatory limits on its ability to make distributions of capital to shareholders, whether through dividends, stock repurchases or otherwise. In addition, the insured depository institutions of such BHCs, which for the Corporation would include primarily BANA and FIA, would be required to maintain a minimum six percent leverage ratio to be considered "well capitalized." The proposal is not yet final and, when finalized, could have provisions significantly different from those currently proposed. For additional information, see Capital Management – Regulatory Capital Changes on page 74.

Table of Contents

Liquidity Standards

The Basel Committee on Banking Supervision (the Basel Committee) has issued two liquidity risk-related standards that are considered part of the Basel 3 liquidity standards: the Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR). For additional information, see Liquidity Risk – Basel 3 Liquidity Standards on page 82.

Sale of China Construction Bank Corporation Shares

In the third quarter of 2013, we sold our remaining equity investment in China Construction Bank Corporation (CCB), representing two billion shares, or approximately one percent of all CCB shares outstanding. The sale resulted in a pre-tax gain of \$753 million.

The strategic assistance agreement (SAA) between the Corporation and CCB, which was recently extended to 2016, will continue. Under the SAA, the Corporation provides advice and assistance to CCB in specified business areas, focusing on processes and systems including customer service and sales models.

Common Stock Repurchases and Liability Management Actions

As disclosed in prior filings, the capital plan that the Corporation submitted to the Federal Reserve in January 2013 as part of our 2013 Comprehensive Capital Analysis and Review (CCAR) included a request to repurchase up to \$5.0 billion of common stock and redeem \$5.5 billion in preferred stock over four quarters beginning in the second quarter of 2013, and continue the quarterly common stock dividend at \$0.01 per share. During the three months ended September 30, 2013, we repurchased and retired 60.0 million common shares for an aggregate purchase price of approximately \$866 million. During the nine months ended September 30, 2013, we repurchased and retired 139.6 million common shares for an aggregate purchase price of approximately \$1.9 billion and redeemed our Series H and 8 preferred stock for \$5.5 billion.

In addition to the CCAR actions, during the three months ended September 30, 2013, we redeemed \$951 million of the Corporation's 7.25% Non-Cumulative Preferred Stock, Series J. During the nine months ended September 30, 2013, we redeemed \$76 million of our Non-Cumulative Preferred Stock, Series 6 and 7 and issued \$1.0 billion of our Fixed-to-Floating Rate Semi-annual Non-Cumulative Preferred Stock, Series U. For additional information, see Capital Management – Regulatory Capital on page 71 and Note 12 – Shareholders' Equity to the Consolidated Financial Statements.

During the nine months ended September 30, 2013, we repurchased certain of our debt and trust preferred securities with an aggregate carrying value of \$6.1 billion for \$6.2 billion in cash. The majority of this activity occurred during the third quarter of 2013. In addition, on October 17, 2013, we announced a \$4.0 billion cash tender offer for certain senior notes maturing in 2014. As of the October 30, 2013 early tender deadline, more than \$4.0 billion in senior notes had been tendered. We may conduct additional redemptions, tender offers, exercises and other transactions in the future depending on prevailing market conditions, capital, liquidity and other factors.

Impact of U.K. Corporate Income Tax Rate Reduction

On July 17, 2013, the United Kingdom (U.K.) 2013 Finance Act was enacted, which reduced the U.K. corporate income tax rate by three percent to 20 percent. Two percent of the reduction will become effective on April 1, 2014 and the additional one percent reduction on April 1, 2015. These reductions, which represented the final in a series of announced reductions, will favorably affect income tax expense on future U.K. earnings but also required the Corporation to remeasure, in the three months ended September 30, 2013, its U.K. net deferred tax assets using the lower tax rates. This resulted in a charge to income tax expense of approximately \$1.1 billion in aggregate for these

reductions. Because our deferred tax assets in excess of a certain amount are disallowed in calculating regulatory capital, this charge did not impact our capital ratios.

7

Table of Contents

Performance Overview

Net income was \$2.5 billion, or \$0.20 per diluted share and \$8.0 billion, or \$0.62 per diluted share for the three and nine months ended September 30, 2013 compared to \$340 million, or \$0.00 and \$3.5 billion, or \$0.22 for the same periods in 2012. The results for the three and nine months ended September 30, 2013 reflect our efforts to stabilize revenue, decrease costs, strengthen the balance sheet and improve credit quality. The following highlights the most significant changes from the prior-year periods.

Net interest income on a fully taxable-equivalent (FTE) basis increased \$312 million to \$10.5 billion, and \$1.1 billion to \$32.1 billion for the three and nine months ended September 30, 2013. For more information on the significant drivers of net interest income, see Financial Highlights on page 9.

Noninterest income increased \$774 million to \$11.3 billion, and \$1.6 billion to \$36.0 billion for the three and nine months ended September 30, 2013. The significant drivers for the increase in the three-month period were higher equity investment income primarily related to the gain on the sale of the company's remaining CCB shares in the current quarter, partially offset by lower mortgage banking income. Also impacting results were negative fair value adjustments on structured liabilities of \$152 million for the three months ended September 30, 2013 compared to a negative \$1.3 billion for the same period in 2012 and debit valuation adjustment (DVA) losses on derivatives, net of hedges, of \$292 million compared to losses of \$583 million.

The significant drivers for the increase in noninterest income for the nine-month period were increases in equity investment income, investment banking income and investment and brokerage services income, partially offset by lower mortgage banking income and lower gains on sales of debt securities. Also impacting results were negative fair value adjustments on structured liabilities of \$232 million for the nine months ended September 30, 2013 compared to a negative \$4.7 billion for the same period in 2012 and DVA losses on derivatives, net of hedges, of \$307 million compared to losses of \$2.2 billion. The year-ago period included gains of \$1.7 billion related to liability management actions.

The provision for credit losses decreased \$1.5 billion to \$296 million, and \$2.7 billion to \$3.2 billion for the three and nine months ended September 30, 2013 due to continued improvement in the home loans portfolio primarily as a result of increased home prices, and improvement in credit card portfolios.

Noninterest expense decreased \$1.2 billion to \$16.4 billion, and \$1.8 billion to \$51.9 billion for the three and nine months ended September 30, 2013. The decrease for the three-month period was driven by a \$889 million decrease in other general operating expense primarily due to lower litigation expense, a decrease in professional fees due in part to reduced Legacy Assets & Servicing expenses, and a decrease in personnel expense as we have continued to streamline processes and achieve cost savings. The decrease for the nine-month period was driven by decreases in personnel expense and professional fees due to the same factors as described in the three-month discussion above. Also contributing to the nine-month decrease was a \$540 million decrease in other general operating expense as a result of lower Federal Deposit Insurance Corporation (FDIC) expense and lower default-related servicing expenses, partially offset by higher litigation expense. Litigation expense was \$1.1 billion and \$3.8 billion for the three and nine months ended September 30, 2013 compared to \$1.6 billion and \$3.3 billion for the same periods in 2012.

Income tax expense was \$2.3 billion on \$4.8 billion of pre-tax income and \$4.3 billion on \$12.3 billion of pre-tax income, resulting in effective tax rates of 48.5 percent and 35.2 percent for the three and nine months ended September 30, 2013. This was compared to \$770 million on \$1.1 billion of pre-tax income and \$1.5 billion on \$5.0 billion of pre-tax income that resulted in effective tax rates of 69.4 percent and 30.5 percent for the same periods in 2012. The effective tax rates for the three and nine months ended September 30, 2013 were primarily driven by the \$1.1 billion impact of the U.K. corporate income tax rate reduction compared to \$788 million for the same periods in

2012.

For additional summary information on the Corporation's results, see Financial Highlights on page 9.

Financial Highlights

Net Interest Income

Net interest income on a FTE basis increased \$312 million to \$10.5 billion, and \$1.1 billion to \$32.1 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. The increases were primarily due to reductions in long-term debt balances, higher yields on debt securities including the impact of market-related premium amortization expense, lower rates paid on deposits, higher commercial loan balances and increased trading-related net interest income, partially offset by lower consumer loan balances as well as lower asset yields driven by the low rate environment. The net interest yield on a FTE basis increased 12 basis points (bps) and nine bps to 2.44 percent for both the three and nine months ended September 30, 2013 compared to the same periods in 2012 due to the same factors as described above.

9

Table of Contents

Noninterest income increased \$774 million to \$11.3 billion, and \$1.6 billion to \$36.0 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. The following highlights the significant changes.

- Card income decreased \$94 million and \$250 million primarily driven by lower revenue as a result of our exit of consumer protection products.

- Investment and brokerage services increased \$214 million and \$661 million primarily driven by the impact of long-term assets under management (AUM) inflows, higher market levels and increased transactional activity.

Investment banking income decreased \$39 million for the three months ended September 30, 2013 driven by declines in debt underwriting fees, and increased \$689 million for the nine months ended September 30, 2013 primarily due to an increase in debt and equity underwriting fees.

- Equity investment income increased \$946 million and \$1.1 billion primarily due to a \$753 million gain on the sale of our remaining investment in CCB and gains on the sales of a portion of an equity investment in the three and nine months ended September 30, 2013, partially offset by gains on the sales of an investment in Global Markets in the nine months ended September 30, 2012.

Trading account profits increased \$27 million and \$1.1 billion. Net DVA losses on derivatives were \$292 million and \$307 million for the three and nine months ended September 30, 2013 compared to losses of \$583 million and \$2.2 billion in the year-ago periods. Excluding net DVA, trading account profits decreased \$264 million and \$778 million primarily due to decreases in our fixed income, currencies and commodities (FICC) businesses driven by unfavorable market conditions.

Mortgage banking income decreased \$1.4 billion and \$2.3 billion for the three and nine months ended September 30, 2013 primarily driven by a decrease in servicing income due to a smaller servicing portfolio as a result of mortgage servicing rights (MSR) sales and portfolio runoff, less favorable MSR net-of-hedge performance and the divestiture of an ancillary servicing business in the prior year. Also contributing to the decreases were declines in production income. The decrease for the three months ended September 30, 2013 was due to lower volumes combined with continued industry-wide margin compression, and the decrease for the nine months ended September 30, 2013 was primarily driven by lower margins.

Other income (loss) increased \$1.2 billion to \$260 million, and \$1.5 billion to \$72 million for the three and nine months ended September 30, 2013. Negative fair value adjustments on structured liabilities were \$152 million and \$232 million for the three and nine months ended September 30, 2013 compared to negative adjustments of \$1.3 billion and \$4.7 billion in the year-ago periods. The nine months ended September 30, 2013 included a \$450 million write-down of a receivable. The nine months ended September 30, 2012 included gains related to liability management actions of \$1.7 billion.

Provision for Credit Losses

The provision for credit losses decreased \$1.5 billion to \$296 million, and \$2.7 billion to \$3.2 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. For the three and nine months ended September 30, 2013, the provision for credit losses was \$1.4 billion and \$3.1 billion lower than net charge-offs, resulting in a reduction in the allowance for credit losses due to continued improvement in the home loans and credit card portfolios. This compared to reductions of \$2.3 billion and \$5.8 billion in the allowance for credit losses for the three and nine months ended September 30, 2012. If the economy and home prices continue to improve, we anticipate additional reductions in the allowance for credit losses in future periods, although at a lower level than the third

quarter.

Net charge-offs totaled \$1.7 billion, or 0.73 percent, and \$6.3 billion, or 0.93 percent of average loans and leases for the three and nine months ended September 30, 2013 compared to \$4.1 billion, or 1.86 percent, and \$11.8 billion, or 1.77 percent for the same periods in 2012. The decrease in net charge-offs was primarily driven by credit quality improvement across nearly all major portfolios. Also, the prior-year periods included charge-offs associated with the National Mortgage Settlement and loans discharged in Chapter 7 bankruptcy due to the implementation of regulatory guidance. Given improving trends in delinquencies and the Home Price Index, absent any unexpected changes in the economy, we expect net charge-offs to decline again in the fourth quarter of 2013 and stabilize sometime in 2014 at approximately \$1.5 billion per quarter. For more information on the provision for credit losses, see Provision for Credit Losses on page 123.

Table of Contents

Noninterest Expense

Table 4

Noninterest Expense

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2013	2012	2013	2012
Personnel	\$8,310	\$8,431	\$26,732	\$27,348
Occupancy	1,096	1,160	3,359	3,419
Equipment	538	561	1,620	1,718
Marketing	511	479	1,377	1,393
Professional fees	702	873	2,045	2,578
Amortization of intangibles	270	315	820	955
Data processing	779	640	2,370	2,188
Telecommunications	397	410	1,217	1,227
Other general operating	3,786	4,675	12,367	12,907
Total noninterest expense	\$16,389	\$17,544	\$51,907	\$53,733

Noninterest expense decreased \$1.2 billion to \$16.4 billion, and \$1.8 billion to \$51.9 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. The decrease for the three months ended September 30, 2013 was driven by a \$889 million decrease in other general operating expense primarily due to a \$450 million decrease in litigation expense, a \$171 million decrease in professional fees due in part to reduced default management activities in Legacy Assets & Servicing, and a \$121 million decrease in personnel expense as we continue to streamline processes and achieve cost savings. The decrease for the nine months ended September 30, 2013 was driven by a \$616 million decrease in personnel expense and a \$533 million decrease in professional fees as a result of the same factors as described in the three-month discussion above. Also contributing to the nine-month decrease was a \$540 million decrease in other general operating expense as a result of lower FDIC expense and lower default-related servicing expenses, partially offset by a \$494 million increase in litigation expense.

In connection with Project New BAC, which was first announced in the third quarter of 2011, we continue to achieve cost savings in certain noninterest expense categories as we further streamline workflows, simplify processes and align expenses with our overall strategic plan and operating principles. We expect total cost savings from Project New BAC to reach \$8 billion per year on an annualized basis, or \$2 billion per quarter, by mid-2015. We expect to achieve approximately \$1.5 billion in quarterly cost savings by the fourth quarter of 2013, representing 75 percent of the quarterly target.

Income Tax Expense

Income tax expense was \$2.3 billion on pre-tax income of \$4.8 billion for the three months ended September 30, 2013 compared to \$770 million on pre-tax income of \$1.1 billion for the same period in 2012 and resulted in effective tax rates of 48.5 percent and 69.4 percent. Income tax expense was \$4.3 billion on pre-tax income of \$12.3 billion for the nine months ended September 30, 2013 compared to \$1.5 billion on pre-tax income of \$5.0 billion for the same period in 2012 and resulted in effective tax rates of 35.2 percent and 30.5 percent.

The effective tax rate for the three months ended September 30, 2013 included the \$1.1 billion impact of the U.K. corporate income tax rate reduction enacted in July 2013, partially offset by our recurring tax preference items. The effective tax rate for the three months ended September 30, 2012 included the \$788 million impact of the U.K. corporate income tax rate reduction that was enacted in July 2012, partially offset by our recurring tax preference items and by tax benefits related to certain non-U.S. jurisdictions, including an increase in our accumulated earnings presumed to be permanently reinvested offshore.

The effective tax rates for the nine months ended September 30, 2013 and 2012 were driven by the same factors as described in the three-month discussion above. The effective tax rate for the nine months ended September 30, 2013 also included the impact of increased tax benefits from the 2012 non-U.S. restructurings as compared to amounts previously recognized.

On July 17, 2013, the U.K. 2013 Finance Act was enacted, which reduced the U.K. corporate income tax rate by three percent to 20 percent. Two percent of the reduction will become effective on April 1, 2014 and the additional one percent reduction on April 1, 2015. These reductions, which represented the final in a series of announced reductions, will favorably affect future U.K. earnings but also required us to remeasure, in the period of enactment, our U.K. net deferred tax assets using the lower tax rates. As a result, in the three months ended September 30, 2013, we recorded a charge to income tax expense of \$1.1 billion in aggregate for these reductions. Because our deferred tax assets in excess of a certain amount are disallowed in calculating regulatory capital, this charge did not impact our capital ratios.

Total liabilities and shareholders' equity	\$ 2,126,653	\$ 2,209,974	\$ 2,123,430	\$ 2,173,312	\$ 2,173,164	\$ 2,184,974

Period-end balance sheet amounts may vary from average balance sheet amounts due to liquidity and balance sheet management activities, primarily involving our portfolios of highly liquid assets. These portfolios are designed to ensure the adequacy of capital while enhancing our ability to manage liquidity requirements for the Corporation and our customers, and to position the balance sheet in accordance with the Corporation's risk appetite. The execution of these activities requires the use of balance sheet and capital-related limits including spot, average and risk-weighted asset limits, particularly within the market-making activities of our trading businesses. One of our key regulatory metrics, Tier 1 leverage ratio, is calculated based on adjusted quarterly average total assets.

Assets

At September 30, 2013, total assets were approximately \$2.1 trillion, a decrease of \$83.3 billion, or four percent, from December 31, 2012. The decrease over the nine months was driven by lower debt securities due to net sales of U.S. Treasuries, paydowns and decreases in the fair value of available-for-sale (AFS) debt securities resulting from the impact of higher interest rates, lower trading account assets due to a reduction in U.S. government and agency securities, a decline in consumer loan balances driven by continued run-off in certain portfolios as well as paydowns and charge-offs outpacing originations, and a decline in securities borrowed or purchased under agreements to resell

due to lower matched-book activity. These decreases were partially offset by higher commercial loan balances.

Average total assets decreased \$49.9 billion and \$11.8 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. The decreases were driven by a decline in consumer loan balances driven by continued run-off in certain portfolios as well as paydowns and charge-offs outpacing originations, lower debt securities due to net sales of U.S. Treasuries, paydowns and decreases in the fair value of AFS debt securities resulting from the impact of higher interest rates, a decline in securities borrowed or purchased under agreements to resell due to lower matched-book activity, and reductions in all other assets primarily due to lower derivative dealer assets and cash and cash equivalents. These declines were partially offset by higher commercial loan balances and the nine-month comparison was also impacted by higher trading account assets due to increased securities inventory and client-based activity.

Table of Contents

Liabilities and Shareholders' Equity

At September 30, 2013, total liabilities were approximately \$1.9 trillion, a decrease of \$78.6 billion, or four percent, from December 31, 2012 primarily driven by decreases in securities loaned or sold under agreements to repurchase due to lower matched-book activity and trading inventory, and reductions in long-term debt. These decreases were partially offset by higher short-term borrowings due to an increase in advances from the Federal Home Loan Bank (FHLB), an increase in trading account liabilities, and growth in deposits.

Average total liabilities decreased \$44.2 billion and \$11.2 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. The decreases were primarily driven by a decline in securities loaned or sold under agreements to repurchase due to lower matched-book activity, and reductions in long-term debt, partially offset by growth in deposits.

At September 30, 2013, shareholders' equity was \$232.3 billion, a decrease of \$4.7 billion from December 31, 2012 driven by net preferred stock redemptions, common stock repurchases and a decrease in the fair value of AFS debt securities resulting from the impact of higher interest rates, which is recorded in accumulated other comprehensive income (OCI). These decreases were partially offset by earnings and the positive impact of a remeasurement of pension plan assets and liabilities.

Average shareholders' equity decreased \$5.6 billion for the three months ended September 30, 2013 compared to the same period in 2012 primarily driven by net preferred stock redemptions and common stock repurchases, partially offset by earnings.

Average shareholders' equity remained relatively unchanged for the nine months ended September 30, 2013 compared to the same period in 2012 as net preferred stock redemptions and common stock repurchases were offset by earnings.

(1) Due to a net loss applicable to common shareholders for the third quarter of 2012, the impact of antidilutive equity instruments was excluded from diluted earnings per share and average diluted common shares.

(2) Calculated as total net income for four consecutive quarters divided by annualized average assets for four consecutive quarters.

Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures.

(3) Other companies may define or calculate these measures differently. For more information on these ratios and for corresponding reconciliations to GAAP financial measures, see Supplemental Financial Data on page 18.

(4) For more information on the impact of the purchased credit-impaired loan portfolio on asset quality, see Consumer Portfolio Credit Risk Management on page 87.

- (5) Includes the allowance for loan and lease losses and the reserve for unfunded lending commitments. Balances and ratios do not include loans accounted for under the fair value option. For additional exclusions from nonperforming loans, leases and foreclosed properties, see Consumer Portfolio Credit Risk Management – Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 104 and corresponding Table 42, and Commercial Portfolio Credit Risk Management – Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity on page 113 and corresponding Table 51.
- (6) Primarily includes amounts allocated to the U.S. credit card and unsecured consumer lending portfolios in CBB, purchased credit-impaired loans and the non-U.S. credit card portfolio in All Other. Net charge-offs exclude \$443 million, \$313 million, \$839 million, \$1.1 billion and \$1.7 billion of write-offs in the purchased credit-impaired loan portfolio for the third, second and first quarters of 2013 and the fourth and third quarters of 2012. These write-offs decreased the purchased credit-impaired valuation allowance included as part of the allowance for loan and lease losses. For more information on purchased credit-impaired write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.
- (7) Presents capital ratios in accordance with the Basel 1 – 2013 Rules, which include the Market Risk Final Rule at September 30, 2013. Basel 1 did not include the Basel 1 – 2013 Rules at December 31, 2012.

n/m = not meaningful

Low closing	11.03	5.80
Market capitalization	\$147,429	\$95,163

Tangible equity ratios and tangible book value per share of common stock are non-GAAP financial measures.

(1) Other companies may define or calculate these measures differently. For more information on these ratios and for corresponding reconciliations to GAAP financial measures, see Supplemental Financial Data on page 18.

(2) For more information on the impact of the purchased credit-impaired loan portfolio on asset quality, see Consumer Portfolio Credit Risk Management on page 87.

(3) Includes the allowance for loan and lease losses and the reserve for unfunded lending commitments.

Balances and ratios do not include loans accounted for under the fair value option. For additional exclusions from nonperforming loans, leases and foreclosed properties, see Consumer Portfolio Credit Risk Management –

(4) Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 104 and corresponding Table 42, and Commercial Portfolio Credit Risk Management – Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity on page 113 and corresponding Table 51.

(5) Primarily includes amounts allocated to the U.S. credit card and unsecured consumer lending portfolios in CBB, purchased credit-impaired loans and the non-U.S. credit card portfolio in All Other.

Net charge-offs exclude \$1.6 billion and \$1.7 billion of write-offs in the purchased credit-impaired loan portfolio for the nine months ended September 30, 2013 and 2012. These write-offs decreased the purchased credit-impaired valuation allowance included as part of the allowance for loan and lease losses. For more information on purchased credit-impaired write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

Supplemental Financial Data

We view net interest income and related ratios and analyses on a FTE basis, which when presented on a consolidated basis, are non-GAAP financial measures. We believe managing the business with net interest income on a FTE basis provides a more accurate picture of the interest margin for comparative purposes. To derive the FTE basis, net interest income is adjusted to reflect tax-exempt income on an equivalent before-tax basis with a corresponding increase in income tax expense. For purposes of this calculation, we use the federal statutory tax rate of 35 percent. This measure ensures comparability of net interest income arising from taxable and tax-exempt sources.

Certain performance measures including the efficiency ratio and net interest yield utilize net interest income (and thus total revenue) on a FTE basis. The efficiency ratio measures the costs expended to generate a dollar of revenue, and net interest yield measures the bps we earn over the cost of funds.

We also evaluate our business based on certain ratios that utilize tangible equity, a non-GAAP financial measure. Tangible equity represents an adjusted shareholders' equity or common shareholders' equity amount which has been reduced by goodwill and intangible assets (excluding MSRs), net of related deferred tax liabilities. These measures are used to evaluate our use of equity. In addition, profitability, relationship and investment models all use return on average tangible shareholders' equity (ROTE) as key measures to support our overall growth goals. These ratios are as follows:

Return on average tangible common shareholders' equity measures our earnings contribution as a percentage of adjusted common shareholders' equity. The tangible common equity ratio represents adjusted ending common shareholders' equity divided by total assets less goodwill and intangible assets (excluding MSRs), net of related deferred tax liabilities.

ROTE measures our earnings contribution as a percentage of adjusted average total shareholders' equity. The tangible equity ratio represents adjusted ending shareholders' equity divided by total assets less goodwill and intangible assets (excluding MSRs), net of related deferred tax liabilities.

Tangible book value per common share represents adjusted ending common shareholders' equity divided by ending common shares outstanding.

The aforementioned supplemental data and performance measures are presented in Tables 6 and 7.

We evaluate our business segment results based on measures that utilize return on average allocated capital, and prior to January 1, 2013, the return on average economic capital, both of which represent non-GAAP financial measures. These ratios are calculated as net income adjusted for cost of funds and earnings credits and certain expenses related to intangibles, divided by average allocated capital or average economic capital, as applicable. In addition, for purposes of goodwill impairment testing, the Corporation utilizes allocated equity as a proxy for the carrying value of its reporting units. Allocated equity for the business segments is comprised of allocated capital (or economic capital prior to 2013) plus capital for the portion of goodwill and intangibles specifically assigned to the business segment. For additional information, see Business Segment Operations on page 30 and Note 9 – Goodwill and Intangible Assets to the Consolidated Financial Statements.

Tables 8, 9 and 10 provide reconciliations of these non-GAAP financial measures to GAAP financial measures. We believe the use of these non-GAAP financial measures provides additional clarity in assessing the results of the Corporation and our segments. Other companies may define or calculate these measures and ratios differently.

Table 8

Quarterly Supplemental Financial Data and Reconciliations to GAAP Financial Measures

⁽¹⁾ There are no adjustments to reported net income (loss) or average allocated equity for CRES.

⁽²⁾ Represents cost of funds, earnings credits and certain expenses related to intangibles.

⁽³⁾ Average allocated equity is comprised of average allocated capital (or economic capital prior to 2013) plus capital for the portion of goodwill and intangibles specifically assigned to the business segment. For more information on

allocated capital and economic capital, see Business Segment Operations on page 30 and Note 9 – Goodwill and Intangible Assets to the Consolidated Financial Statements.

Table of Contents

Net Interest Income Excluding Trading-related Net Interest Income

We manage net interest income on a FTE basis and excluding the impact of trading-related activities. As discussed in Global Markets on page 49, we evaluate our sales and trading results and strategies on a total market-based revenue approach by combining net interest income and noninterest income for Global Markets. An analysis of net interest income, average earning assets and net interest yield on earning assets, all of which adjust for the impact of trading-related net interest income from reported net interest income on a FTE basis, is shown below. We believe the use of this non-GAAP presentation in Table 11 provides additional clarity in assessing our results.

Table 11

Net Interest Income Excluding Trading-related Net Interest Income

Net interest yield on earning assets excluding trading-related activities ⁽²⁾	3.02	% 2.85	% 3.05	% 2.89	%

Net interest income and net interest yield include fees earned on overnight deposits placed with the Federal

⁽¹⁾ Reserve and, beginning in the third quarter of 2012, fees earned on deposits, primarily overnight, placed with certain non-U.S. central banks, of \$50 million and \$123 million for the three and nine months ended September 30, 2013 and \$48 million and \$147 million for the three and nine months ended September 30, 2012.

⁽²⁾ Represents a non-GAAP financial measure.

⁽³⁾ Calculated on an annualized basis.

For the three and nine months ended September 30, 2013, net interest income excluding trading-related net interest income increased \$271 million to \$9.6 billion, and \$602 million to \$29.3 billion compared to the same periods in 2012. The increases were primarily due to reductions in long-term debt balances, higher yields on debt securities including the impact of market-related premium amortization expense, lower rates paid on deposits and higher commercial loan balances, partially offset by lower consumer loan balances as well as lower asset yields driven by the low rate environment. For more information on the impacts of interest rates, see Interest Rate Risk Management for Nontrading Activities on page 133.

Average earning assets excluding trading-related earning assets for the three and nine months ended September 30, 2013 decreased \$38.9 billion to \$1,264.5 billion, and \$41.9 billion to \$1,283.0 billion compared to the same periods in 2012. The decreases were primarily due to declines in consumer loans and debt securities, partially offset by an increase in commercial loans.

For the three and nine months ended September 30, 2013, net interest yield on earning assets excluding trading-related activities increased 17 bps to 3.02 percent, and 16 bps to 3.05 percent compared to the same periods in 2012 due to the same factors as described above.

Other assets, less allowance for loan and lease losses	299,681			310,788		
Total assets	\$2,123,430			\$2,184,610		

For this presentation, fees earned on overnight deposits placed with the Federal Reserve are included in the cash and cash equivalents line, consistent with the Consolidated Balance Sheet presentation of these deposits. In addition, beginning in the third quarter of 2012, fees earned on deposits, primarily overnight, placed with certain non-U.S. central banks, which are included in the time deposits placed and other short-term investments line in prior periods, have been included in the cash and cash equivalents line. Net interest income and net interest yield are calculated excluding these fees.

⁽²⁾ Yields on debt securities carried at fair value are calculated based on fair value rather than the cost basis. The use of fair value does not have a material impact on net interest yield.

⁽³⁾ Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis. PCI loans were recorded at fair value upon acquisition and accrete interest income over the remaining life of the loan.

⁽⁴⁾ Includes non-U.S. residential mortgage loans of \$83 million, \$86 million and \$90 million in the third, second and first quarters of 2013, and \$93 million and \$92 million in the fourth and third quarters of 2012, respectively.

⁽⁵⁾ Includes non-U.S. consumer loans of \$6.7 billion, \$7.5 billion and \$7.7 billion in the third, second and first quarters of 2013, and \$8.1 billion and \$7.8 billion in the fourth and third quarters of 2012, respectively.

⁽⁶⁾ Includes consumer finance loans of \$1.3 billion, \$1.3 billion and \$1.4 billion in the third, second and first quarters of 2013, and \$1.4 billion and \$1.5 billion in the fourth and third quarters of 2012, respectively; consumer leases of

\$422 million, \$291 million and \$138 million in the third, second and first quarters of 2013, and \$3 million and none in fourth and third quarters of 2012, respectively; other non-U.S. consumer loans of \$5 million for each of the three quarters of 2013, and \$4 million and \$997 million in the fourth and third quarters of 2012, respectively; and consumer overdrafts of \$172 million, \$136 million and \$142 million in the third, second and first quarters of 2013, and \$156 million and \$158 million in the fourth and third quarters of 2012, respectively.

(7) Includes U.S. commercial real estate loans of \$41.5 billion, \$39.1 billion and \$37.7 billion in the third, second and first quarters of 2013, and \$36.7 billion and \$35.4 billion in the fourth and third quarters of 2012, respectively; and non-U.S. commercial real estate loans of \$1.7 billion, \$1.5 billion and \$1.5 billion in the third, second and first quarters of 2013, and \$1.5 billion in both the fourth and third quarters of 2012, respectively.

(8) Interest income includes the impact of interest rate risk management contracts, which decreased interest income on the underlying assets by \$1 million, \$63 million and \$141 million in the third, second and first quarters of 2013, and \$146 million and \$136 million in the fourth and third quarters of 2012, respectively. Interest expense includes the impact of interest rate risk management contracts, which decreased interest expense on the underlying liabilities by \$556 million, \$660 million and \$618 million in the third, second and first quarters of 2013, and \$598 million and \$454 million in the fourth and third quarters of 2012, respectively. For more information on interest rate contracts, see Interest Rate Risk Management for Nontrading Activities on page 133.

Other earning assets	81,920	2,123	3.46		87,260	2,199	3.37
Total earning assets ⁽⁸⁾	1,759,939	41,831	3.17		1,763,600	43,952	3.33
Cash and cash equivalents ⁽¹⁾	103,539	123			117,105	147	
Other assets, less allowance for loan and lease losses	309,686				304,269		
Total assets	\$ 2,173,164				\$ 2,184,974		

For this presentation, fees earned on overnight deposits placed with the Federal Reserve are included in the cash and cash equivalents line, consistent with the Consolidated Balance Sheet presentation of these deposits. In addition, beginning in the third quarter of 2012, fees earned on deposits, primarily overnight, placed with certain non-U.S. central banks, which are included in the time deposits placed and other short-term investments line in prior periods, have been included in the cash and cash equivalents line. Net interest income and net interest yield are calculated excluding these fees.

⁽¹⁾ Yields on debt securities carried at fair value are calculated based on fair value rather than the cost basis. The use of fair value does not have a material impact on net interest yield.

⁽²⁾ Nonperforming loans are included in the respective average loan balances. Income on these nonperforming loans is generally recognized on a cost recovery basis. PCI loans were recorded at fair value upon acquisition and accrete interest income over the remaining life of the loan.

⁽³⁾ Includes non-U.S. residential mortgage loans of \$86 million and \$89 million for the nine months ended September 30, 2013 and 2012.

⁽⁴⁾ Includes non-U.S. consumer loans of \$7.3 billion and \$7.7 billion for the nine months ended September 30, 2013 and 2012.

⁽⁵⁾

Includes consumer finance loans of \$1.3 billion and \$1.6 billion, consumer leases of \$285 million and none, other non-U.S. consumer loans of \$5 million and \$932 million, and consumer overdrafts of \$150 million and \$119 million for the nine months ended September 30, 2013 and 2012.

- (7) Includes U.S. commercial real estate loans of \$39.4 billion and \$36.3 billion, and non-U.S. commercial real estate loans of \$1.6 billion and \$1.7 billion for the nine months ended September 30, 2013 and 2012.

Interest income includes the impact of interest rate risk management contracts, which decreased interest income on the underlying assets by \$205 million and \$608 million for the nine months ended September 30, 2013 and 2012.

- (8) Interest expense includes the impact of interest rate risk management contracts, which decreased interest expense on the underlying liabilities by \$1.8 billion and \$1.7 billion for the nine months ended September 30, 2013 and 2012. For more information on interest rate contracts, see Interest Rate Risk Management for Nontrading Activities on page 133.

Business Segment Operations

Segment Description and Basis of Presentation

We report the results of our operations through five business segments: CBB, CRES, Global Banking, Global Markets and GWIM, with the remaining operations recorded in All Other. We prepare and evaluate segment results using certain non-GAAP financial measures. For additional information, see Supplemental Financial Data on page 18. Table 14 provides selected summary financial data for our business segments and All Other for the three and nine months ended September 30, 2013 compared to the same periods in 2012. For additional detailed information on these results, see the business segment and All Other discussions which follow.

⁽¹⁾ Total revenue is net of interest expense and is on a FTE basis which for consolidated revenue is a non-GAAP financial measure. For more information on this measure and for a corresponding reconciliation to a GAAP financial measure, see Supplemental Financial Data on page 18.

The management accounting and reporting process derives segment and business results by utilizing allocation methodologies for revenue and expense. The net income derived for the businesses is dependent upon revenue and cost allocations using an activity-based costing model, funds transfer pricing, and other methodologies and assumptions management believes are appropriate to reflect the results of the business.

Total revenue, net of interest expense, includes net interest income on a FTE basis and noninterest income. The adjustment of net interest income to a FTE basis results in a corresponding increase in income tax expense. The segment results also reflect certain revenue and expense methodologies that are utilized to determine net income. The net interest income of the businesses includes the results of a funds transfer pricing process that matches assets and liabilities with similar interest rate sensitivity and maturity characteristics. For presentation purposes, in segments where the total of liabilities and equity exceeds assets, which are generally deposit-taking segments, we allocate assets to match liabilities. Net interest income of the business segments also includes an allocation of net interest income generated by certain of our asset and liability management (ALM) activities.

Table of Contents

Our ALM activities include an overall interest rate risk management strategy that incorporates the use of various derivatives and cash instruments to manage fluctuations in earnings and capital that are caused by interest rate volatility. Our goal is to manage interest rate sensitivity so that movements in interest rates do not significantly adversely affect earnings and capital. The results of a majority of our ALM activities are allocated to the business segments and fluctuate based on the performance of the ALM activities. ALM activities include external product pricing decisions including deposit pricing strategies, the effects of our internal funds transfer pricing process and the net effects of other ALM activities.

Certain expenses not directly attributable to a specific business segment are allocated to the segments. The most significant of these expenses include data and item processing costs and certain centralized or shared functions. Data processing costs are allocated to the segments based on equipment usage. Item processing costs are allocated to the segments based on the volume of items processed for each segment. The costs of certain other centralized or shared functions are allocated based on methodologies that reflect utilization.

Effective January 1, 2013, on a prospective basis, we adjusted the amount of capital being allocated to our business segments. The adjustment reflects a refinement to the prior-year methodology (economic capital) which focused solely on internal risk-based economic capital models. The refined methodology (allocated capital) now also considers the effect of regulatory capital requirements in addition to internal risk-based economic capital models. The Corporation's internal risk-based capital models use a risk-adjusted methodology incorporating each segment's credit, market, interest rate, business and operational risk components. For more information on the nature of these risks, see Managing Risk and Strategic Risk Management on page 70. The capital allocated to the business segments is currently referred to as allocated capital and, prior to January 1, 2013, was referred to as economic capital, both of which represent non-GAAP financial measures. Allocated capital in the business segments is subject to change over time.

For purposes of goodwill impairment testing, the Corporation utilizes allocated equity as a proxy for the carrying value of its reporting units. For additional information, see Note 9 – Goodwill and Intangible Assets to the Consolidated Financial Statements.

For more information on the business segments and reconciliations to consolidated total revenue, net income (loss) and period-end total assets, see Note 20 – Business Segment Information to the Consolidated Financial Statements.

Economic capital ⁽¹⁾	—	13,436	—	10,835	—	24,271	n/m

Effective January 1, 2013, we revised, on a prospective basis, the methodology for allocating capital to the business ⁽¹⁾segments. In connection with the change in methodology, we updated the applicable terminology in the above table to allocated capital from economic capital as reported in prior periods. For additional information, see Business Segment Operations on page 30.

⁽²⁾For presentation purposes, in segments and businesses where the total of liabilities and equity exceeds assets, we allocate assets from All Other to match the segments' and businesses' liabilities and allocated shareholders' equity.

As a result, total earning assets and total assets of the businesses may not equal total CBB.

n/m = not meaningful

CBB, which is comprised of Deposits and Consumer Lending, offers a diversified range of credit, banking and investment products and services to consumers and businesses. Our customers and clients have access to a franchise

network that stretches coast to coast through 31 states and the District of Columbia. The franchise network includes approximately 5,200 banking centers, 16,200 ATMs, nationwide call centers, and online and mobile platforms. During the first quarter of 2013, Business Banking results were moved into Deposits as we continue to integrate these businesses. During the second quarter of 2013, consumer Dealer Financial Services (DFS) results were moved into CBB from Global Banking to align this business more closely with our consumer lending activity and better serve the needs of our customers. As a result, Card Services was renamed Consumer Lending. Prior periods were reclassified to conform to current period presentation.

Table of Contents

CBB Results

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income for CBB increased \$428 million to \$1.8 billion primarily due to higher revenue, lower provision for credit losses and lower noninterest expense. Net interest income increased \$232 million to \$5.1 billion driven by higher deposit balances, partially offset by compressed deposit spreads due to the continued low rate environment and the impact of lower average loan balances. Noninterest income of \$2.5 billion remained relatively unchanged as the net impact of consumer protection products, primarily due to charges in the prior-year period, was offset by the allocation of certain card revenue to GWIM for its clients with a credit card.

The provision for credit losses decreased \$245 million to \$761 million primarily as a result of improvements in delinquencies. Noninterest expense decreased \$131 million to \$4.0 billion primarily due to lower personnel and FDIC expenses.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for CBB increased \$520 million to \$4.6 billion primarily driven by lower noninterest expense and lower provision for credit losses. Net interest income of \$15.1 billion remained relatively unchanged. Noninterest income of \$7.3 billion remained relatively unchanged as the allocation of certain card revenue to GWIM for its clients with a credit card and lower deposit service charges were offset by the net impact of consumer protection products, primarily due to charges in the prior-year period.

The provision for credit losses decreased \$389 million to \$2.7 billion due to the same factor as described in the three-month discussion above. Noninterest expense decreased \$506 million to \$12.3 billion driven by lower operating, personnel, litigation and FDIC expenses.

Deposits

Deposits includes the results of consumer deposit activities which consist of a comprehensive range of products provided to consumers and small businesses. Our deposit products include traditional savings accounts, money market savings accounts, CDs and IRAs, noninterest- and interest-bearing checking accounts, as well as investment accounts and products. The revenue is allocated to the deposit products using our funds transfer pricing process that matches assets and liabilities with similar interest rate sensitivity and maturity characteristics. Deposits generates fees such as account service fees, non-sufficient funds fees, overdraft charges and ATM fees, as well as investment and brokerage fees from Merrill Edge accounts. Merrill Edge is an integrated investing and banking service targeted at customers with less than \$250,000 in investable assets. Merrill Edge provides investment advice and guidance, brokerage services, a self-directed online investing platform and key banking capabilities including access to the Corporation's network of banking centers and ATMs.

Business Banking within Deposits provides a wide range of lending-related products and services, integrated working capital management and treasury solutions to clients through our network of offices and client relationship teams along with various product partners. Our clients include U.S.-based companies generally with annual sales of \$1 million to \$50 million. Our lending products and services include commercial loans, lines of credit and real estate lending. Our capital management and treasury solutions include treasury management, foreign exchange and short-term investing options. Deposits also includes the results of our merchant services joint venture.

Deposits includes the net impact of migrating customers and their related deposit balances between Deposits and GWIM as well as other client-managed businesses. For more information on the migration of customer balances to or

from GWIM, see GWIM on page 52.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income for Deposits increased \$281 million to \$572 million primarily due to higher revenue, lower noninterest expense and lower provision for credit losses. Net interest income increased \$293 million to \$2.5 billion driven by higher deposit balances, a customer shift to higher spread liquid products and continued pricing discipline, partially offset by compressed deposit spreads due to the continued low rate environment. Noninterest income of \$1.2 billion remained relatively unchanged.

The provision for credit losses decreased \$38 million to \$96 million due to improvements in credit quality. Noninterest expense decreased \$105 million to \$2.7 billion primarily due to lower personnel and FDIC expenses.

Average loans decreased \$736 million to \$22.4 billion primarily driven by continued run-off of non-core portfolios. Average deposits increased \$43.7 billion to \$521.5 billion driven by a customer shift to more liquid products in the low rate environment. Additionally, \$17.4 billion of the increase in average deposits was due to net transfers of deposits from other businesses, largely GWIM. Growth in checking, traditional savings and money market savings of \$49.6 billion was partially offset by a decline in time deposits of \$5.9 billion. As a result of our continued pricing discipline and the shift in the mix of deposits, the rate paid on average deposits declined by nine bps to 10 bps.

Table of Contents

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for Deposits increased \$526 million to \$1.5 billion driven by higher revenue, lower provision for credit losses and a decrease in noninterest expense. Net interest income increased \$482 million to \$7.3 billion and the provision for credit losses decreased \$218 million to \$194 million driven by the same factors as described in the three-month discussion. Noninterest income of \$3.5 billion remained relatively unchanged. Noninterest expense decreased \$211 million to \$8.3 billion due to lower operating, personnel and FDIC expenses, partially offset by higher litigation expense.

Average loans decreased \$1.1 billion to \$22.5 billion and average deposits increased \$43.3 billion to \$515.2 billion driven by the same factors as described in the three-month discussion. Of the increase in average deposits, \$14.0 billion was due to net transfers of deposits from other businesses, largely GWIM.

Period end					
Client brokerage assets (in millions)			\$89,517	\$75,852	
Online banking active accounts (units in thousands)			30,197	29,809	
Mobile banking active accounts (units in thousands)			13,967	11,097	
Banking centers			5,243	5,540	
ATMs			16,201	16,253	

Mobile banking customers increased 2.9 million reflecting continuing changes in our customers' banking preferences. The number of banking centers declined by 297 and ATMs declined by 52 as we continue to optimize our consumer banking network and improve our cost-to-serve.

Consumer Lending

Consumer Lending is one of the leading issuers of credit and debit cards to consumers and small businesses in the U.S. Our lending products and services also include direct and indirect consumer loans such as automotive, marine, aircraft, recreational vehicle and consumer personal loans. In addition to earning net interest spread revenue on its lending activities, Consumer Lending generates interchange revenue from credit and debit card transactions as well as annual credit card fees and other miscellaneous fees.

On July 31, 2013, the U.S. District Court for the District of Columbia issued a ruling regarding the Federal Reserve's rules implementing the Dodd-Frank Wall Street Reform and Consumer Protection Act's (Financial Reform Act) Durbin Amendment. The ruling requires the Federal Reserve to reconsider the current \$0.21 per transaction cap on debit card interchange fees. The Federal Reserve is appealing the ruling and final resolution is expected in the first half of 2014. If the Federal Reserve, upon final resolution, implements a lower per transaction cap than the initial range, it may have a significant adverse impact on our debit card interchange fee revenue in future periods.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income for Consumer Lending increased \$147 million to \$1.2 billion primarily driven by lower provision for credit losses and lower noninterest expense, partially offset by a decline in revenue. Net interest income decreased \$61

million to \$2.6 billion driven by the impact of lower average loan balances. Noninterest income increased \$34 million to \$1.3 billion driven by the net impact of consumer protection products, primarily due to charges in the prior-year period, partially offset by the allocation of certain card revenue to GWIM for its clients with a credit card.

The provision for credit losses decreased \$207 million to \$665 million due to improvements in delinquencies. Noninterest expense decreased \$26 million to \$1.3 billion primarily due to lower operating expense.

Average loans decreased \$2.6 billion to \$143.3 billion primarily driven by charge-offs and continued run-off of non-core portfolios.

Table of Contents

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for Consumer Lending of \$3.2 billion remained relatively unchanged as a decline in revenue was offset by lower noninterest expense and lower provision for credit losses. Net interest income decreased \$363 million to \$7.8 billion driven by the same factor as described in the three-month discussion. The net interest yield increased 13 bps to 7.28 percent primarily due to lower funding costs. Noninterest income decreased \$77 million to \$3.8 billion driven by lower card income primarily from the allocation of certain card revenue to GWIM for its clients with a credit card and the net impact of portfolio sales, partially offset by the net impact of consumer protection products, primarily due to charges in the prior-year period.

The provision for credit losses decreased \$171 million to \$2.5 billion driven by the same factor as described in the three-month discussion. Noninterest expense decreased \$295 million to \$4.0 billion driven by lower litigation and operating expenses.

Average loans decreased \$8.8 billion to \$142.6 billion primarily driven by the same factors as described in the three-month discussion.

Key Statistics

(Dollars in millions)	Three Months Ended September 30		Nine Months Ended September 30		
	2013	2012	2013	2012	
U.S. credit card					
Gross interest yield	9.82	% 10.04	% 9.85	% 10.02	%
Risk-adjusted margin	8.37	7.66	8.29	7.23	
New accounts (in thousands)	1,048	857	2,912	2,421	
Purchase volumes	\$52,823	\$48,189	\$151,400	\$141,872	
Debit card purchase volumes	\$66,712	\$64,121	\$199,087	\$192,146	

During the three and nine months ended September 30, 2013, the U.S. credit card risk-adjusted margin increased 71 bps and 106 bps compared to the same periods in 2012 due to a decrease in net charge-offs driven by an improvement in credit quality. U.S. credit card purchase volumes increased \$4.6 billion to \$52.8 billion, and \$9.5 billion to \$151.4 billion and debit card purchase volumes increased \$2.6 billion to \$66.7 billion, and \$6.9 billion to \$199.1 billion compared to the same periods in 2012, reflecting higher levels of consumer spending.

CRES operations include Home Loans and Legacy Assets & Servicing. Home Loans is responsible for ongoing loan production activities and the CRES home equity loan portfolio not selected for inclusion in the Legacy Assets & Servicing owned portfolio. Legacy Assets & Servicing is responsible for all of our mortgage servicing activities related to loans serviced for others and loans held by the Corporation, including loans that have been designated as the Legacy Assets & Servicing Portfolios. The Legacy Assets & Servicing Portfolios (both owned and serviced), herein referred to as the Legacy Owned and Legacy Serviced Portfolios, respectively (together, the Legacy Portfolios), and as further defined below, include those loans originated prior to January 1, 2011 that would not have been originated under our established underwriting standards as of December 31, 2010. For more information on our Legacy

Portfolios, see page 40. In addition, Legacy Assets & Servicing is responsible for managing legacy exposures related to CRES (e.g., representations and warranties). This alignment allows CRES management to lead the ongoing Home Loans business while also providing focus on legacy mortgage issues and servicing activities.

CRES, primarily through Home Loans operations, generates revenue by providing an extensive line of consumer real estate products and services to customers nationwide. CRES products offered by Home Loans include fixed- and adjustable-rate first-lien mortgage loans for home purchase and refinancing needs, home equity lines of credit (HELOCs) and home equity loans. First mortgage products are generally either sold into the secondary mortgage market to investors, while we retain MSRs (which are on the balance sheet of Legacy Assets & Servicing) and the Bank of America customer relationships, or are held on the balance sheet in All Other for ALM purposes. Home Loans is compensated for loans held for ALM purposes on a management accounting basis with the corresponding offset in All Other. Newly originated HELOCs and home equity loans are retained on the CRES balance sheet in Home Loans.

CRES includes the impact of migrating customers and their related loan balances between GWIM and CRES. For more information on the transfer of customer balances, see GWIM on page 52.

Table of Contents

CRES Results

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

The net loss for CRES increased \$143 million to \$1.0 billion primarily driven by lower mortgage banking income, partially offset by lower provision for credit losses and lower noninterest expense. Mortgage banking income decreased \$1.4 billion due to both lower servicing income and lower core production income. The provision for credit losses decreased \$571 million to a benefit of \$308 million due to improving portfolio trends. Noninterest expense decreased \$761 million primarily due to lower expenses in Legacy Assets & Servicing, partially offset by higher loan production costs in Home Loans.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

The net loss for CRES increased \$1.4 billion to \$4.1 billion primarily driven by lower mortgage banking income and higher noninterest expense, partially offset by lower provision for credit losses. Mortgage banking income decreased \$2.2 billion driven by the same factors as described in the three-month discussion above. The provision for credit losses decreased \$639 million to \$318 million due to improving portfolio trends. Noninterest expense increased \$636 million primarily due to higher litigation expense and higher loan production costs.

Home Loans

Home Loans products are available to our customers through our retail network of approximately 5,200 banking centers, mortgage loan officers in approximately 320 locations and a sales force offering our customers direct telephone and online access to our products.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income for Home Loans decreased \$359 million to a loss of \$99 million primarily driven by a decrease in noninterest income and an increase in noninterest expense. Noninterest income decreased \$463 million primarily due to a decline in core production revenue in mortgage banking income as a result of a lower loan application volumes combined with continued industry-wide margin compression. The provision for credit losses increased \$12 million reflecting a slower rate of credit quality improvement than the prior-year period. Noninterest expense increased \$90 million primarily due to higher production costs. The higher production costs were primarily personnel-related as we had added mortgage loan officers earlier in 2013, primarily in banking centers, and other employees in sales and fulfillment areas in order to expand capacity and enhance customer service.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for Home Loans decreased \$610 million to a loss of \$10 million primarily driven by a decrease in noninterest income, higher provision for credit losses and an increase in noninterest expense. Noninterest income decreased \$707 million due to lower mortgage banking income driven by a decline in core production revenue as a result of continued industry-wide margin compression as well as higher representations and warranties provision. The provision for credit losses increased \$150 million and noninterest expense increased \$117 million driven by the same factors as described in the three-month discussion above.

Legacy Assets & Servicing

Legacy Assets & Servicing is responsible for all of our servicing activities related to the residential mortgage and home equity loan portfolios, including owned loans and loans serviced for others (collectively, the mortgage serviced

portfolio). A portion of this portfolio has been designated as the Legacy Serviced Portfolio, which represented 33 percent and 40 percent of the total mortgage serviced portfolio, as measured by unpaid principal balance, at September 30, 2013 and 2012.

Legacy Assets & Servicing results reflect the net cost of legacy exposures that are included in the results of CRES, including representations and warranties provision, litigation costs, financial results of the CRES home equity portfolio selected as part of the Legacy Owned Portfolio, the financial results of the servicing operations and the results of MSR activities, including net hedge results. The financial results of the servicing operations reflect certain revenues and expenses on loans serviced for others, including owned loans serviced for Home Loans, GWIM and All Other.

Table of Contents

Servicing activities include collecting cash for principal, interest and escrow payments from borrowers, and disbursing customer draws for lines of credit and accounting for and remitting principal and interest payments to investors and escrow payments to third parties along with responding to customer inquiries. Our home retention efforts, including single point of contact resources, are also part of our servicing activities, along with supervising foreclosures and property dispositions. In an effort to help our customers avoid foreclosure, Legacy Assets & Servicing evaluates various workout options prior to foreclosure sales which, combined with ongoing foreclosure delays in states where foreclosure requires a court order following a legal proceeding (judicial states), has resulted in elongated default timelines. Although we have resumed foreclosure proceedings in all states, there continues to be significant inventory levels in certain judicial states. For more information on our servicing activities, including the impact of foreclosure delays, see Off-Balance Sheet Arrangements and Contractual Obligations – Other Mortgage-related Matters on page 61 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

The net loss for Legacy Assets & Servicing improved \$216 million to \$901 million primarily driven by a decline in noninterest expense and lower provision for credit losses, partially offset by a decrease in noninterest income. Noninterest income decreased \$1.1 billion primarily due to lower servicing income primarily driven by a decline in the servicing portfolio, less favorable MSR net-of-hedge performance and the divestiture of an ancillary servicing business in 2012. The provision for credit losses improved \$583 million to a benefit of \$297 million due to continued improvement in portfolio trends including increased home prices and the impact of loans discharged in Chapter 7 bankruptcy due to the implementation of regulatory guidance in the prior-year period.

Noninterest expense decreased \$851 million primarily due to a \$562 million decrease in default-related staffing and other default-related servicing expenses, a \$175 million decrease due to the divestiture of an ancillary servicing business in 2012 and a \$114 million decline in litigation expense. We expect that noninterest expense in Legacy Assets & Servicing, excluding litigation costs, will be below \$2.0 billion in the fourth quarter of 2013.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

The net loss for Legacy Assets & Servicing increased \$749 million to \$4.1 billion primarily driven by a decrease in noninterest income and an increase in noninterest expense, partially offset by a decrease in the provision for credit losses. Noninterest income decreased \$1.5 billion due to lower servicing income driven by the same factors as described in the three-month discussion above. The provision for credit losses decreased \$789 million driven by the same factors as described in the three-month discussion above and an improved home price outlook in the purchased credit-impaired (PCI) home equity loan portfolio.

Noninterest expense increased \$519 million primarily due to a \$1.6 billion increase in litigation expense driven in large part by the settlement with MBIA Inc. and certain of its affiliates (MBIA), partially offset by a \$698 million decline in default-related staffing and other default-related servicing expenses as well as a \$428 million decline as a result of the divestiture of an ancillary servicing business in 2012.

Legacy Portfolios

The Legacy Portfolios (both owned and serviced) include those loans originated prior to January 1, 2011 that would not have been originated under our established underwriting standards in place as of December 31, 2010. The PCI portfolios as well as certain loans that met a pre-defined delinquency status or probability of default threshold as of January 1, 2011 are also included in the Legacy Portfolios. Since determining the pool of loans to be included in the Legacy Portfolios as of January 1, 2011, the criteria have not changed for these portfolios, but will continue to be evaluated over time.

Legacy Owned Portfolio

The Legacy Owned Portfolio includes those loans that met the criteria as described above and are on the balance sheet of the Corporation. The home equity loan portfolio is held on the balance sheet of Legacy Assets & Servicing and the residential mortgage loan portfolio is held on the balance sheet of All Other. The financial results of the on-balance sheet loans are reported in the segment that owns the loans or in All Other. Total loans in the Legacy Owned Portfolio decreased \$12.0 billion during the nine months ended September 30, 2013 to \$119.1 billion, of which \$40.7 billion was held on the Legacy Assets & Servicing balance sheet and the remainder was held on the balance sheet of All Other. The decrease was primarily related to payoffs, paydowns, charge-offs and PCI write-offs, largely offset by the addition of loans repurchased in connection with the Fannie Mae (FNMA) Settlement. For more information on the loans repurchased in connection with the FNMA Settlement, see Consumer Portfolio Credit Risk Management on page 87.

Table of Contents

Legacy Serviced Portfolio

The Legacy Serviced Portfolio includes the Legacy Owned Portfolio and those loans serviced for outside investors that met the criteria as described on page 40. The table below summarizes the balances of the residential mortgage loans included in the Legacy Serviced Portfolio (the Legacy Residential Mortgage Serviced Portfolio) representing 32 percent and 38 percent of the total residential mortgage serviced portfolio of \$796.0 billion and \$1.3 trillion at September 30, 2013 and 2012, as measured by unpaid principal balance. The decline in the Legacy Residential Mortgage Serviced Portfolio was primarily related to servicing transfers, paydowns and payoffs. We expect that by the end of the fourth quarter of 2013, the number of 60 days or more past due residential mortgage loans in the Legacy and Non-Legacy Residential Mortgage Serviced Portfolios will decline below 375,000 from 398,000 at September 30, 2013.

Legacy Residential Mortgage Serviced Portfolio, a subset of the Residential Mortgage Serviced Portfolio ^(1, 2)

(Dollars in billions)	September 30

Residential mortgage loans		
Total	1,290	2,810
60 days or more past due	327	808

(1) Excludes loans for which servicing transferred to third parties as of September 30, 2013, with an effective MSR sale date of October 1, 2013, totaling \$282 million of unpaid principal balance.

(2) Excludes \$41 billion and \$79 billion of home equity loans and HELOCs at September 30, 2013 and 2012.

Non-Legacy Portfolio

As previously discussed, Legacy Assets & Servicing is responsible for all of our servicing activities. The table below summarizes the balances of the residential mortgage loans that are not included in the Legacy Serviced Portfolio (the Non-Legacy Residential Mortgage Serviced Portfolio) representing 68 percent and 62 percent of the total residential mortgage serviced portfolio at September 30, 2013 and 2012, as measured by unpaid principal balance. The decline in the Non-Legacy Residential Mortgage Serviced Portfolio was primarily related to servicing transfers, paydowns and payoffs.

- (1) Excludes loans for which servicing transferred to third parties as of September 30, 2013, with an effective MSR sale date of October 1, 2013, totaling \$224 million of unpaid principal balance.
- (2) Excludes \$53 billion and \$85 billion of home equity loans and HELOCs at September 30, 2013 and 2012.

Table of Contents

Mortgage Banking Income

CRES mortgage banking income is categorized into production and servicing income. Core production income is comprised primarily of revenue from the fair value gains and losses recognized on our interest rate lock commitments (IRLCs) and loans held-for-sale (LHFS), the related secondary market execution, costs related to representations and warranties in the sales transactions along with other obligations incurred in the sales of mortgage loans and revenues earned in production-related ancillary businesses. Ongoing costs related to representations and warranties and other obligations that were incurred in the sales of mortgage loans in prior periods are also included in production income.

Servicing income includes income earned in connection with servicing activities and MSR valuation adjustments, net of results from risk management activities used to hedge certain market risks of the MSRs. The costs associated with our servicing activities are included in noninterest expense.

The table below summarizes the components of mortgage banking income.

Mortgage Banking Income

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2013	2012	2013	2012
Production income:				
Core production revenue	\$465	\$944	\$2,140	\$2,774
Representations and warranties provision	(323)	(307)	(770)	(984)
Total production income	142	637	1,370	1,790
Servicing income:				
Servicing fees	699	1,089	2,400	3,634
Amortization of expected cash flows ⁽¹⁾	(240)	(346)	(814)	(1,149)
Fair value changes of MSRs, net of risk management activities used to hedge certain market risks ⁽²⁾	167	560	693	939
Other servicing-related revenue	6	248	23	622
Total net servicing income	632	1,551	2,302	4,046
Total CRES mortgage banking income	774	2,188	3,672	5,836
Eliminations ⁽³⁾	(189)	(169)	(646)	(546)
Total consolidated mortgage banking income	\$585	\$2,019	\$3,026	\$5,290

⁽¹⁾ Represents the net change in fair value of the MSR asset due to the recognition of modeled cash flows.

⁽²⁾ Includes gains (losses) on sales of MSRs.

⁽³⁾ Includes the effect of transfers of mortgage loans from CRES to the ALM portfolio in All Other.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

CRES first mortgage loan originations increased \$2.3 billion, or 15 percent, reflecting an increase in our estimated retail market share. Our increase in market share was due to expanded fulfillment capacity which allowed us to reduce the outstanding pipeline of applications. Core production revenue decreased \$479 million due to lower loan application volumes combined with continued industry-wide margin compression. During the three months ended September 30, 2013, 78 percent of our first mortgage production volume was for refinance originations and 22 percent was for purchase originations compared to 83 percent and 17 percent for the same period in 2012. Home Affordable Refinance Program (HARP) refinance originations were 17 percent of all refinance originations, down from 35 percent for the same period in 2012 primarily due to the sales of MSRs. Making Home Affordable non-HARP refinance originations were 17 percent of all refinance originations as compared to 11 percent for the same period in 2012. The remaining 66 percent of refinance originations were conventional refinances as compared to 54 percent for

the same period in 2012.

The representations and warranties provision increased \$16 million to \$323 million. Net servicing income decreased \$919 million driven by lower servicing fees due to a smaller servicing portfolio, less favorable MSR net-of-hedge performance and lower ancillary income due to the divestiture of an ancillary servicing business in 2012. The decline in the size of our servicing portfolio was driven by strategic sales of MSRs as well as loan prepayment activity, which exceeded new originations primarily due to our exit from non-retail channels, including the correspondent lending channel in late 2011. For more information on sales of MSRs, see Mortgage Servicing Rights – Sales of Mortgage Servicing Rights on page 44.

42

Table of Contents

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

CRES first mortgage loan originations increased \$15.7 billion, or 37 percent, while core production revenue decreased \$634 million predominantly due to continued industry-wide margin compression. During the nine months ended September 30, 2013, 84 percent of our first mortgage production volume was for refinance originations and 16 percent was for purchase originations compared to 83 percent and 17 percent for the same period in 2012. HARP refinance originations were 24 percent of all refinance originations compared to 31 percent for the same period in 2012. Making Home Affordable non-HARP refinance originations were 19 percent of all refinance originations as compared to 11 percent for the same period in 2012. The remaining 57 percent of refinance originations were conventional refinances and remained relatively unchanged from the same period in 2012.

The representations and warranties provision decreased \$214 million to \$770 million. Net servicing income decreased \$1.7 billion driven by lower servicing fees, partially offset by a decline in amortization of expected cash flows and lower ancillary income due to the same factors as described in the three-month discussion.

Key Statistics

(Dollars in millions, except as noted)	Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012
Loan production				
Total Corporation ⁽¹⁾ :				
First mortgage	\$22,601	\$20,315	\$71,797	\$53,558
Home equity	1,828	933	4,440	2,623
CRES:				
First mortgage	\$17,833	\$15,566	\$57,611	\$41,957
Home equity	1,599	746	3,824	2,067
Period end			September 30 2013	December 31 2012
Mortgage serviced portfolio (in billions) ^(2, 3)			\$889	\$1,332
Mortgage loans serviced for investors (in billions)			616	1,045
Mortgage servicing rights:				
Balance			5,058	5,716
Capitalized mortgage servicing rights (% of loans serviced for investors)			82	55
			bps	bps

⁽¹⁾ In addition to loan production in CRES, the remaining first mortgage and home equity loan production is primarily in GWIM.

⁽²⁾ Servicing of residential mortgage loans, HELOCs and home equity loans.

⁽³⁾ Excludes loans for which servicing transferred to third parties as of September 30, 2013, with an effective MSR sale date of October 1, 2013, totaling \$506 million.

Retail first mortgage loan originations for the total Corporation were \$22.6 billion and \$71.8 billion for the three and nine months ended September 30, 2013 compared to \$20.3 billion and \$53.6 billion for the same periods in 2012. The increases of \$2.3 billion for the three-month period and \$18.2 billion for the nine-month period were primarily driven by increased market share due to increased fulfillment capacity. Given the increase in interest rates, the overall mortgage market has declined which has had an adverse impact on our mortgage loan applications, particularly for refinance mortgage loans, and will have an adverse impact on our mortgage loan originations. Our pipeline of mortgage applications decreased 59 percent at September 30, 2013 compared to June 30, 2013 due in large part to a decline in applications for refinance transactions.

Home equity production was \$1.8 billion and \$4.4 billion for the three and nine months ended September 30, 2013 compared to \$933 million and \$2.6 billion for the same periods in 2012 with the increase due to a higher demand in the market based on improving housing trends, and increased market share driven by improved banking center engagement with customers and more competitive pricing.

43

Table of Contents

Mortgage Servicing Rights

At September 30, 2013, the consumer MSR balance was \$5.1 billion, which represented 82 bps of the related unpaid principal balance compared to \$5.7 billion, or 55 bps of the related unpaid principal balance at December 31, 2012. The consumer MSR balance decreased \$658 million in the nine months ended September 30, 2013 primarily driven by MSR sales and the recognition of modeled cash flows. These declines were partially offset by the increase in value driven by higher mortgage rates, which resulted in lower forecasted prepayment speeds. For more information on our servicing activities, see Off-Balance Sheet Arrangements and Contractual Obligations – Servicing, Foreclosure and Other Mortgage Matters on page 65. For more information on MSRs, see Note 19 – Mortgage Servicing Rights to the Consolidated Financial Statements.

Sales of Mortgage Servicing Rights

As previously disclosed, during 2013, we entered into definitive agreements with certain counterparties to sell the servicing rights on certain residential mortgage loans serviced for others, with an aggregate unpaid principal balance of approximately \$308 billion. The sales involve approximately 2 million loans serviced by us as of the applicable contract dates, including approximately 186,000 residential mortgage loans and 14,500 home equity loans that were 60 days or more past due based upon current estimates.

The transfers of servicing rights have occurred in stages throughout 2013 and 92 percent of the servicing had been transferred as of September 30, 2013. These sales have led to a reduction in servicing revenue of approximately \$150 million per quarter compared to the fourth quarter of 2012.

During the second quarter of 2013, the results of consumer Dealer Financial Services, previously reported in

⁽¹⁾ Global Banking, were moved to CBB. Prior periods have been reclassified to conform to current period presentation.

⁽²⁾ Effective January 1, 2013, we revised, on a prospective basis, the methodology for allocating capital to the business segments. In connection with the change in methodology, we updated the applicable terminology in the above table to allocated capital from economic capital as reported in prior periods. For additional information, see Business Segment Operations on page 30.

n/m = not meaningful

Global Banking, which includes Global Corporate and Global Commercial Banking, and Investment Banking, provides a wide range of lending-related products and services, integrated working capital management and treasury solutions to clients, and underwriting and advisory services through our network of offices and client relationship teams. Our lending products and services include commercial loans, leases, commitment facilities, trade finance, real estate lending and asset-based lending. Our treasury solutions business includes treasury management, foreign exchange and short-term investing options. We also work with our clients to provide investment banking products such as debt and equity underwriting and distribution, and merger-related and other advisory services. Underwriting debt and equity issuances, fixed-income and equity research, and certain market-based activities are executed through our global broker/dealer

45

Table of Contents

affiliates which are our primary dealers in several countries. Within Global Banking, Global Commercial Banking clients generally include middle-market companies, commercial real estate firms, auto dealerships and not-for-profit companies. Global Corporate Banking includes large global corporations, financial institutions and leasing clients.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income for Global Banking remained relatively unchanged as an increase in revenue was offset by higher provision for credit losses. Revenue increased \$223 million to \$4.0 billion primarily driven by higher net interest income due to commercial loan growth.

The provision for credit losses increased \$299 million to \$322 million primarily to build reserves as a result of commercial loan growth.

Noninterest expense remained relatively unchanged as lower personnel expense as well as technology and support costs were largely offset by higher litigation expense.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for Global Banking decreased \$245 million to \$3.7 billion primarily driven by an increase in the provision for credit losses, partially offset by higher revenue and lower noninterest expense. Revenue increased \$455 million to \$12.2 billion as higher net interest income due to loan growth and higher investment banking fees were partially offset by lower other income due to gains on liquidation of certain portfolios in the prior-year period.

The provision for credit losses increased \$1.0 billion to \$634 million from a benefit of \$404 million primarily driven by the same factor as described in the three-month discussion above and stabilization of portfolio credit quality.

Noninterest expense decreased \$239 million to \$5.6 billion primarily due to lower personnel expense as we continue to streamline our business operations and achieve cost savings.

Table of Contents

Global Corporate and Global Commercial Banking

Global Corporate and Global Commercial Banking each include Business Lending and Treasury Services activities. Business Lending includes various lending-related products and services including commercial loans, leases, commitment facilities, trade finance, real estate lending and asset-based lending. Treasury Services includes deposits, treasury management, credit card, foreign exchange, and short-term investment and custody solutions to corporate and commercial banking clients. The table below presents a summary of Global Corporate and Global Commercial Banking results.

Global Corporate and Global Commercial Banking

Total deposits	149,095	122,553	113,983	112,314	263,078	234,867

Global Corporate and Global Commercial Banking revenue increased \$216 million and \$444 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012 due to higher revenue in both Business Lending and Treasury Services.

Business Lending revenue in Global Corporate Banking increased \$119 million and \$128 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012 driven by growth in loan balances, partially offset by lower accretion on acquired portfolios and gains on liquidation of certain portfolios in the prior-year

periods. Business Lending revenue in Global Commercial Banking increased \$44 million and \$244 million driven by loan growth in commercial and industrial, and commercial real estate portfolios, as well as higher accretion on acquired portfolios.

Treasury Services revenue increased \$53 million and \$72 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012 driven by growth in U.S. and non-U.S. deposit balances, partially offset by the impact of the low rate environment.

Table of Contents

Average loans and leases in Global Corporate and Global Commercial Banking increased 18 percent and 15 percent for the three and nine months ended September 30, 2013 compared to the same periods in 2012 driven by growth in commercial and industrial, and commercial real estate portfolios from higher client demand. Average deposits in Global Corporate and Global Commercial Banking increased five percent and six percent for the three and nine months ended September 30, 2013 compared to the same periods in 2012 due to client liquidity, international growth and limited alternative investment options.

Investment Banking

Client teams and product specialists underwrite and distribute debt, equity and other loan products, and provide advisory services and tailored risk management solutions. The economics of most investment banking and underwriting activities are shared primarily between Global Banking and Global Markets based on the contribution by and involvement of each segment. To provide a complete discussion of our consolidated investment banking fees, the table below presents total Corporation investment banking fees as well as the portion attributable to Global Banking.

Investment Banking Fees

	Three Months Ended September 30				Nine Months Ended September 30			
	Global Banking		Total Corporation		Global Banking		Total Corporation	
(Dollars in millions)	2013	2012	2013	2012	2013	2012	2013	2012
Products								
Advisory	\$226	\$207	\$256	\$221	\$699	\$710	\$775	\$764
Debt issuance	343	341	810	865	1,177	941	2,819	2,285
Equity issuance	125	114	329	279	400	300	1,008	776
Gross investment banking fees	694	662	1,395	1,365	2,276	1,951	4,602	3,825
Self-led	(28)	(5)	(98)	(29)	(63)	(31)	(214)	(126)
Total investment banking fees	\$666	\$657	\$1,297	\$1,336	\$2,213	\$1,920	\$4,388	\$3,699

Total Corporation investment banking fees of \$1.3 billion, excluding self-led deals, included within Global Banking and Global Markets, decreased three percent for the three months ended September 30, 2013 compared to the same period in 2012 due to a decline in leveraged finance underwriting fees, partially offset by an increase in investment grade and equity underwriting activity, and advisory fees. Total Corporation investment banking fees of \$4.4 billion, excluding self-led deals, included within Global Banking and Global Markets, increased 19 percent for the nine months ended September 30, 2013 compared to the same period in 2012 due to strong debt underwriting performance, primarily within leveraged finance and investment grade, and strong equity underwriting performance due to significant increases in global initial public offering markets.

(1) Effective January 1, 2013, we revised, on a prospective basis, the methodology for allocating capital to the business segments. In connection with the change in methodology, we updated the applicable terminology in the above table to allocated capital from economic capital as reported in prior periods. For additional information, see Business Segment Operations on page 30.

(2) Trading-related assets include derivative assets, which are considered non-earning assets.

n/m = not meaningful

Global Markets offers sales and trading services, including research, to institutional clients across fixed-income, credit, currency, commodity and equity businesses. Global Markets product coverage includes securities and

derivative products in both the primary and secondary markets. Global Markets provides market-making, financing, securities clearing, settlement and custody services globally to our institutional investor clients in support of their investing and trading activities. We also work with our commercial and corporate clients to provide risk management products using interest rate, equity, credit, currency and commodity derivatives, foreign exchange, fixed-income and mortgage-related products. As a result of our market-making activities in these products, we may be required to manage risk in government securities, equity and equity-linked securities, high-grade and high-yield corporate debt securities, MBS, commodities and asset-backed securities (ABS). In addition, the economics of most investment banking and underwriting activities are shared primarily between Global Markets and Global Banking based on the activities performed by each segment. Global Banking originates certain deal-related transactions with our corporate and commercial clients that are executed and distributed by Global Markets. For more information on investment banking fees on a consolidated basis, see page 48.

Table of Contents

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

The net loss for Global Markets increased \$502 million to \$778 million. Excluding net DVA and charges related to the U.K. corporate income tax rate reduction, net income decreased \$341 million to \$531 million primarily driven by lower FICC revenue due to unfavorable market conditions and higher noninterest expense, partially offset by an increase in equities revenue. Net DVA losses on derivatives were \$291 million compared to losses of \$582 million in the prior-year period. The U.K. corporate income tax rate reduction enacted in the third quarter resulted in a \$1.1 billion charge to income tax expense for the remeasurement of certain deferred tax assets compared to a similar charge of \$781 million in the prior-year period. Noninterest expense increased \$309 million to \$2.9 billion due to increases in litigation expense.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for Global Markets increased \$300 million to \$1.3 billion. Excluding net DVA and charges related to the U.K. corporate income tax rate reduction, net income decreased \$529 million to \$2.7 billion. Net DVA losses on derivatives were \$308 million compared to losses of \$2.2 billion in the prior-year period. Noninterest expense remained relatively unchanged. These period-over-period changes were due to the same factors as described in the three-month discussion above.

Average earning assets increased \$38.5 billion to \$489.1 billion largely driven by increased client financing activity in the equities business.

Sales and Trading Revenue

Sales and trading revenue includes unrealized and realized gains and losses on trading and other assets, net interest income, and fees primarily from commissions on equity securities. Sales and trading revenue is segregated into fixed income (government debt obligations, investment and non-investment grade corporate debt obligations, commercial mortgage-backed securities, residential mortgage-backed securities (RMBS), collateralized debt obligations (CDOs), interest rate and credit derivative contracts), currencies (interest rate and foreign exchange contracts), commodities (primarily futures, forwards, swaps and options) and equities (equity-linked derivatives and cash equity activity). The table below and related discussion present sales and trading revenue, substantially all of which is in Global Markets with the remainder in Global Banking. In addition, the table below and related discussion present sales and trading revenue excluding DVA, which is a non-GAAP financial measure. We believe the use of this non-GAAP financial measure provides clarity in assessing the underlying performance of these businesses.

Sales and Trading Revenue ^(1, 2)

(Dollars in millions)	Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012

Equities	945	667	3,303	2,340
Total sales and trading revenue	\$2,712	\$2,667	\$10,298	\$9,601
Sales and trading revenue, excluding net DVA ⁽³⁾				
Fixed income, currencies and commodities	\$2,033	\$2,534	\$7,293	\$9,219
Equities	970	715	3,313	2,554
Total sales and trading revenue, excluding net DVA	\$3,003	\$3,249	\$10,606	\$11,773

(1)

Includes FTE adjustments of \$44 million and \$134 million for the three and nine months ended September 30, 2013 compared to \$56 million and \$164 million for the same periods in 2012. For more information on sales and trading revenue, see Note 3 – Derivatives to the Consolidated Financial Statements.

- (2) Includes Global Banking sales and trading revenue of \$109 million and \$319 million for the three and nine months ended September 30, 2013 compared to \$111 million and \$473 million for the same periods in 2012.

For this presentation, sales and trading revenue excludes the impact of credit spreads on DVA, which represents a non-GAAP financial measure. Net DVA losses of \$266 million and \$298 million were included in FICC revenue,

- (3) and net DVA losses of \$25 million and \$10 million were included in equities revenue for the three and nine months ended September 30, 2013 compared to net DVA losses of \$534 million and \$2.0 billion, and \$48 million and \$214 million for the same periods in 2012.

Table of Contents

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

FICC revenue, including net DVA, decreased \$233 million to \$1.8 billion. Excluding net DVA, FICC revenue decreased \$501 million to \$2.0 billion driven by unfavorable market conditions arising from investor concerns around the Federal Reserve's position on economic stimulus, and political uncertainty both domestically and abroad. Equities revenue, including net DVA, increased \$278 million to \$945 million. Excluding net DVA, equities revenue increased \$255 million to \$970 million primarily due to continued gains in market share, higher market volumes, improved performance in equity derivatives as well as increased client financing balances. Sales and trading revenue included total commissions and brokerage fee revenue of \$480 million compared to \$428 million, substantially all from equities, with the \$52 million increase due to a higher market share in equities and increased market volumes.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

FICC revenue, including net DVA, decreased \$266 million to \$7.0 billion. Excluding the impact of credit spreads on net DVA, FICC revenue decreased \$1.9 billion to \$7.3 billion primarily driven by the same factors as described in the three-month discussion above as well as the write-down of a receivable related to the MBIA Settlement in the first quarter of 2013. For more information on the MBIA Settlement, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements. Equities revenue, including net DVA, increased \$963 million to \$3.3 billion. Excluding the impact of credit spreads on net DVA, equities revenue increased \$759 million to \$3.3 billion due to the same factors as described in the three-month discussion above. Sales and trading revenue included total commissions and brokerage fee revenue of \$1.6 billion compared to \$1.4 billion, substantially all from equities, with the \$168 million increase due to the same factors as described in the three-month discussion above.

(1) Effective January 1, 2013, we revised, on a prospective basis, the methodology for allocating capital to the business segments. In connection with the change in methodology, we updated the applicable terminology in the above table to allocated capital from economic capital as reported in prior periods. For additional information, see Business Segment Operations on page 30.

n/m = not meaningful

GWIM consists of two primary businesses: Merrill Lynch Global Wealth Management (MLGWM) and U.S. Trust, Bank of America Private Wealth Management (U.S. Trust).

MLGWM's advisory business provides a high-touch client experience through a network of financial advisors focused on clients with over \$250,000 in total investable assets. MLGWM provides tailored solutions to meet our clients' needs through a full set of brokerage, banking and retirement products.

U.S. Trust, together with MLGWM's Private Banking & Investments Group, provides comprehensive wealth management solutions targeted to wealthy and ultra-wealthy clients with investable assets of more than \$5 million, as well as customized solutions to meet clients' wealth structuring, investment management, trust and banking needs, including specialty asset management services.

52

Table of Contents

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income increased \$148 million to \$719 million driven by higher revenue and lower provision for credit losses, partially offset by higher noninterest expense. Revenue increased \$307 million to \$4.4 billion primarily driven by higher asset management fees related to long-term AUM inflows and higher market levels as well as higher net interest income. The provision for credit losses decreased \$38 million to \$23 million driven by continued credit quality improvement in the home equity portfolio. Noninterest expense increased \$133 million to \$3.2 billion driven by higher support costs and volume-driven expenses.

Revenue from MLGWM was \$3.6 billion, up seven percent, and revenue from U.S. Trust was \$730 million, up 11 percent, both driven by higher noninterest income and net interest income.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income increased \$528 million to \$2.2 billion driven by higher revenue and lower provision for credit losses, partially offset by higher noninterest expense. Revenue increased \$986 million to \$13.3 billion. The provision for credit losses decreased \$124 million to \$30 million. Noninterest expense increased \$249 million to \$9.8 billion. These changes were driven by the same factors as described in the three-month discussion above.

Revenue from MLGWM was \$11.1 billion, up eight percent, and revenue from U.S. Trust was \$2.2 billion, up nine percent, both driven by the same factors as described in the three-month discussion above.

Net Migration Summary

GWIM results are impacted by the net migration of clients and their related deposit and loan balances to or from CBB, CRES and the ALM portfolio, as presented in the table below. We move clients between business segments to better meet the needs of our clients. The table below includes the first quarter transfer whereby GWIM identified and transferred deposit balances of approximately \$19 billion to CBB. Additionally, beginning in 2013, the revenue and expense associated with GWIM clients that hold credit cards is included in GWIM. Revenue and expense for prior periods are in CBB.

Net Migration Summary

(Dollars in millions)	Three Months Ended September 30		Nine Months Ended September 30

Table of Contents

Client Balances

The table below presents client balances which consist of AUM, brokerage assets, assets in custody, deposits, and loans and leases.

Client Balances by Type

(Dollars in millions)	September 30 2013	December 31 2012
Assets under management	\$ 779,614	\$ 698,095
Brokerage assets	1,013,688	960,351
Assets in custody	131,386	117,686
Deposits	241,553	266,188
Loans and leases ⁽¹⁾	117,195	109,305
Total client balances	\$ 2,283,436	\$ 2,151,625

⁽¹⁾ Includes margin receivables which are classified in customer and other receivables on the Consolidated Balance Sheet.

The increase of \$131.8 billion, or six percent, in client balances was driven by higher market levels and post-merger record long-term AUM inflows, partially offset by the deposit balance transfer of approximately \$17.3 billion to CBB as described on page 53.

For presentation purposes, in segments where the total of liabilities and equity exceeds assets, which are generally deposit-taking segments, we allocate assets from All Other to those segments to match liabilities (i.e., deposits) and ⁽¹⁾ allocated shareholders' equity. Such allocated assets were \$541.0 billion and \$531.0 billion for the three and nine months ended September 30, 2013 compared to \$514.4 billion and \$496.7 billion for the same periods in 2012, and \$558.0 billion and \$537.6 billion at September 30, 2013 and December 31, 2012.

n/m = not meaningful

All Other consists of ALM activities, equity investments, the international consumer card business, liquidating businesses, residual expense allocations and other. ALM activities encompass the whole-loan residential mortgage

portfolio and investment securities, interest rate and foreign currency risk management activities including the residual net interest income allocation, gains/losses on structured liabilities, the impact of certain allocation methodologies and accounting hedge ineffectiveness. The results of certain ALM activities are allocated to our business segments. For more information on our ALM activities, see Interest Rate Risk Management for Nontrading Activities on page 133. Equity investments include Global Principal Investments (GPI) which is comprised of a portfolio of equity, real estate and other alternative investments. These investments are made either directly in a company or held through a fund with related income recorded in equity investment income. Equity investments included our investment in CCB which was sold during the three

Table of Contents

months ended September 30, 2013, and certain other investments. Additionally, All Other includes certain residential mortgage loans that are managed by Legacy Assets & Servicing.

In January 2013, in connection with the FNMA Settlement, we repurchased certain residential mortgage loans, all of which are held in All Other. For additional information, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

Net income for All Other increased \$2.2 billion to \$643 million primarily due to negative fair value adjustments on structured liabilities of \$152 million related to the improvement in our credit spreads compared to a negative \$1.3 billion in the same period in 2012, an increase of \$949 million in equity investment income driven by the \$753 million gain on the sale of CCB shares, and a portion of an equity investment, a \$939 million reduction in the provision for credit losses, and a decrease in noninterest expense of \$697 million.

The provision for credit losses improved \$939 million to a benefit of \$549 million primarily driven by continued improvement in portfolio trends including increased home prices in the residential mortgage portfolio, as well as improvements in credit quality in the non-U.S. credit card portfolio.

Noninterest expense decreased \$697 million to \$930 million primarily due to lower litigation expense and personnel expense. The income tax benefit was \$157 million compared to a benefit of \$1.3 billion. The decrease was primarily attributable to the change in pre-tax income (loss) in All Other as well as the impact of residual income tax allocation.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

Net income for All Other increased \$4.8 billion to \$213 million primarily due to negative fair value adjustments on structured liabilities of \$232 million related to the improvement in our credit spreads compared to a negative \$4.7 billion in the same period in 2012, a \$2.7 billion reduction in the provision for credit losses, a decrease in noninterest expense of \$2.0 billion and an increase in equity investment income of \$1.7 billion, primarily due to gains on the sales of CCB shares and a portion of an equity investment. Partially offsetting these items were \$1.7 billion in gains related to liability management actions in the prior-year period and a decrease of \$527 million in gains on sales of debt securities.

The provision for credit losses improved \$2.7 billion to a benefit of \$478 million primarily driven by the same factors as described in the three-month discussion above.

Noninterest expense decreased \$2.0 billion to \$3.2 billion due to lower litigation and personnel expenses. The income tax benefit was \$1.2 billion compared to a benefit of \$3.5 billion, with the decrease primarily attributable to the same factors as described in the three-month discussion above, as well as increased benefits from the 2012 non-U.S. restructurings.

Table of Contents

Equity Investment Activity

The tables below present the components of equity investments included in All Other at September 30, 2013 and December 31, 2012, and also a reconciliation to the total consolidated equity investment income for the three and nine months ended September 30, 2013 and 2012. During the three months ended September 30, 2013, the Corporation sold its remaining 2.0 billion common shares of CCB and recorded a pre-tax gain of \$753 million.

Equity Investments

(Dollars in millions)	September 30 2013	December 31 2012
Global Principal Investments	\$1,932	\$3,470
Strategic and other investments	693	2,038
Total equity investments included in All Other	\$2,625	\$5,508

Equity Investment Income

(Dollars in millions)	Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012
Global Principal Investments	\$122	\$156	\$278	\$422
Strategic and other investments	999	16	1,939	144
Total equity investment income included in All Other	1,121	172	2,217	566
Total equity investment income included in the business segments	63	66	210	805
Total consolidated equity investment income	\$1,184	\$238	\$2,427	\$1,371

Equity investments included in All Other decreased \$2.9 billion to \$2.6 billion at September 30, 2013 compared to December 31, 2012, with the decrease due to sales in the GPI and Strategic investments portfolios. GPI had unfunded equity commitments of \$155 million at September 30, 2013 compared to \$224 million at December 31, 2012.

Equity investment income included in All Other was \$1.1 billion and \$2.2 billion in the three and nine months ended September 30, 2013, an increase of \$949 million and \$1.7 billion from the same periods in 2012. The increases in the three and nine months ended September 30, 2013 were primarily due to gains on the sales of CCB shares and a portion of an equity investment. Total Corporation equity investment income was \$1.2 billion and \$2.4 billion in the three and nine months ended September 30, 2013, an increase of \$946 million and \$1.1 billion from the same periods in 2012, due to the same factors as described for All Other, partially offset by gains in the prior-year periods on the sales of an equity investment in Global Markets.

Table of Contents

Off-Balance Sheet Arrangements and Contractual Obligations

We have contractual obligations to make future payments on debt and lease agreements. Additionally, in the normal course of business, we enter into contractual arrangements whereby we commit to future purchases of products or services from unaffiliated parties. For more information on our obligations and commitments, see Note 11 – Commitments and Contingencies to the Consolidated Financial Statements, Off-Balance Sheet Arrangements and Contractual Obligations on page 54 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K, as well as Note 12 – Long-term Debt and Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Representations and Warranties

We securitize first-lien residential mortgage loans generally in the form of MBS guaranteed by the government-sponsored enterprises (GSEs) or by the Government National Mortgage Association (GNMA) in the case of Federal Housing Administration (FHA)-insured, U.S. Department of Veterans Affairs (VA)-guaranteed and Rural Housing Service-guaranteed mortgage loans. In addition, in prior years, legacy companies and certain subsidiaries sold pools of first-lien residential mortgage loans and home equity loans as private-label securitizations (in certain of these securitizations, monolines or financial guarantee providers insured all or some of the securities) or in the form of whole loans. In connection with these transactions, we or certain of our subsidiaries or legacy companies make or have made various representations and warranties. Breaches of these representations and warranties may result in the requirement to repurchase mortgage loans or to otherwise make whole or provide other remedies to the GSEs, U.S. Department of Housing and Urban Development (HUD) with respect to FHA-insured loans, VA, whole-loan investors, securitization trusts, monoline insurers or other financial guarantors (collectively, repurchases). In all such cases, we would be exposed to any credit loss on the repurchased mortgage loans after accounting for any mortgage insurance (MI) rescissions or mortgage guarantee payments that we may receive.

Subject to the requirements and limitations of the applicable sales and securitization agreements, these representations and warranties can be enforced by the GSEs, HUD, VA, the whole-loan investor, the securitization trustee or others as governed by the applicable agreement or, in certain first-lien and home equity securitizations where monoline insurers or other financial guarantee providers have insured all or some of the securities issued, by the monoline insurer or other financial guarantor, where the contract so provides. In the case of private-label securitizations, the applicable agreements may permit investors, which may include the GSEs, with contractually sufficient holdings to direct or influence action by the securitization trustee. In the case of loans sold to parties other than the GSEs or GNMA, the contractual liability to repurchase typically arises only if there is a breach of the representations and warranties that materially and adversely affects the interest of the investor, or investors, or of the monoline insurer or other financial guarantor (as applicable) in the loan. Contracts with the GSEs do not contain equivalent language, while GNMA generally limits repurchases to loans that are not insured or guaranteed as required.

For more information on accounting for representations and warranties and our representations and warranties repurchase claims and exposures, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees and Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K and Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K.

Representations and Warranties Bulk Settlement Actions

We have settled, or entered into agreements to settle, certain bulk representations and warranties claims (1) with each of the GSEs in 2010 (2010 GSE Agreements), (2) with a trustee (the Trustee) for certain Countrywide Financial Corporation (Countrywide) private-label securitization trusts in 2011 (the BNY Mellon Settlement), (3) with three monoline insurers, Assured Guaranty Ltd. and subsidiaries in 2011 (the Assured Guaranty Settlement), Syncora

Guarantee Inc. and Syncora Holdings, Ltd. in 2012 (the Syncora Settlement) and MBIA in May 2013 (the MBIA Settlement), and (4) with FNMA in January 2013 (the FNMA Settlement).

We have vigorously contested any request for repurchase when we conclude that a valid basis for repurchase does not exist and will continue to do so in the future. However, in an effort to resolve these legacy mortgage-related issues, we have reached bulk settlements, or agreements for bulk settlements, including settlement amounts which have been material, with the above-referenced counterparties in lieu of a loan-by-loan review process. For instance, in the first quarter of 2013, we entered into the FNMA Settlement to resolve substantially all outstanding and potential repurchase and certain other claims relating to the origination, sale and delivery of residential mortgage loans originated from January 1, 2000 through December 31, 2008 and sold directly to FNMA by entities related to Countrywide and BANA. We may reach other settlements in the future if opportunities arise on terms we believe to be advantageous. However, there can be no assurance that we will reach future settlements or, if we do, that the terms of past settlements can be relied upon to predict the terms of future settlements. For a summary of the larger bulk settlement actions and the related impact on the representations and warranties provision and liability, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees herein and Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. These

Table of Contents

bulk settlements generally did not cover all transactions with the relevant counterparties or all potential claims that may arise, including in some instances securities law, fraud and servicing claims, and our liability in connection with the transactions and claims not covered by these settlements could be material.

BNY Mellon Settlement

The BNY Mellon Settlement, entered into in June 2011, is subject to final court approval and certain other conditions. The court approval hearing on the settlement began on June 3, 2013 in the New York Supreme Court, New York County, and additional hearing days and closing arguments are scheduled to take place in November 2013. Although we are not a party to the proceeding, certain of our rights and obligations under the settlement agreement are conditioned on final court approval of the settlement.

There can be no assurance that final court approval of the BNY Mellon Settlement will be obtained, that all conditions to the BNY Mellon Settlement will be satisfied or, if certain conditions to the BNY Mellon Settlement permitting withdrawal are met, that we and Countrywide will not withdraw from the settlement. If final court approval is not obtained or if we and Countrywide withdraw from the BNY Mellon Settlement in accordance with its terms, our future representations and warranties losses could be substantially different than existing accruals and the estimated range of possible loss over existing accruals. For more information about the risks associated with the BNY Mellon Settlement, see Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K.

Unresolved Claims Status

Unresolved Repurchase Claims

During the three months ended September 30, 2013, we received \$1.8 billion in new repurchase claims, including \$642 million submitted by the GSEs for both Countrywide and legacy Bank of America originations not covered by the bulk settlements with the GSEs, \$1.0 billion submitted by private-label securitization trustees, \$174 million submitted by whole-loan investors and \$5 million submitted by monoline insurers. During the three months ended September 30, 2013, \$822 million in claims were resolved, primarily with the GSEs. Of the claims that were resolved, \$536 million were resolved through rescissions and \$286 million were resolved through mortgage repurchases and make-whole payments.

During the nine months ended September 30, 2013, we received \$5.1 billion in new repurchase claims, including \$1.6 billion submitted by the GSEs for both Countrywide and legacy Bank of America originations not covered by the bulk settlements with the GSEs, \$3.0 billion submitted by private-label securitization trustees, \$442 million submitted by whole-loan investors and \$49 million submitted by monoline insurers. During the nine months ended September 30, 2013, \$15.6 billion in claims were resolved, primarily with the GSEs, including \$12.2 billion in GSE claims resolved through the FNMA Settlement and \$945 million resolved through the MBIA Settlement. Of the remaining claims that were resolved, \$1.5 billion were resolved through rescissions and \$962 million were resolved through mortgage repurchases and make-whole payments, primarily with the GSEs. For more information on unresolved repurchase claims from the GSEs, monoline insurers, private-label securitization trustees, whole-loan investors and others, and the resolution of such claims, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

At September 30, 2013, the total notional amount of our unresolved representations and warranties repurchase claims was \$17.7 billion compared to \$28.3 billion at December 31, 2012. These repurchase claims do not include any repurchase claims related to the trusts covered by the BNY Mellon Settlement. Unresolved repurchase claims represent the notional amount of repurchase claims made by counterparties, typically the outstanding principal balance or the unpaid principal balance at the time of default. In the case of first-lien mortgages, the claim amount is often

significantly greater than the expected loss amount due to the benefit of collateral and, in some cases, MI or mortgage guarantee payments. Claims received from a counterparty remain outstanding until the underlying loan is repurchased, the claim is rescinded by the counterparty, or the claim is otherwise resolved. When a claim is denied and we do not receive a response from the counterparty, the claim remains in the unresolved repurchase claims balance until resolution.

The notional amount of unresolved GSE repurchase claims totaled \$1.2 billion at September 30, 2013 compared to \$13.5 billion at December 31, 2012. As a result of the FNMA Settlement, \$12.2 billion of GSE repurchase claims outstanding at December 31, 2012 were resolved in January 2013.

The notional amount of unresolved monoline repurchase claims totaled \$1.5 billion at September 30, 2013 compared to \$2.4 billion at December 31, 2012. We have had limited loan-level repurchase claims experience with the remaining monoline insurers due to ongoing litigation. In our experience, the monolines have been generally unwilling to withdraw repurchase claims, regardless of whether and what evidence was offered to refute a claim. Substantially all of the unresolved monoline claims pertain to second-lien loans and are currently the subject of litigation. As a result of the MBIA Settlement, \$945 million of monoline repurchase claims outstanding at December 31, 2012 were resolved in May 2013.

Table of Contents

The notional amount of unresolved repurchase claims from private-label securitization trustees, whole-loan investors, including third-party securitization sponsors, and others totaled \$14.9 billion at September 30, 2013 compared to \$12.3 billion at December 31, 2012. The increase in the notional amount of unresolved repurchase claims is primarily due to continued submission of claims by private-label securitization trustees; the level of detail, support and analysis which impacts overall claim quality and, therefore, claims resolution; and the lack of an established process to resolve disputes related to these claims. We expect unresolved repurchase claims related to private-label securitizations to continue to increase as claims continue to be submitted by private-label securitization trustees and there is not an established process for the ultimate resolution of claims on which there is a disagreement.

In addition to, and not included in, the total unresolved repurchase claims of \$17.7 billion at September 30, 2013, we have received repurchase demands from private-label securitization investors and a master servicer where we believe the claimants have not satisfied the contractual thresholds to direct the securitization trustee to take action and/or that these demands are otherwise procedurally or substantively invalid. The total amounts outstanding of such demands were \$1.4 billion, comprised of \$1.1 billion of demands received during 2012 and approximately \$300 million of demands related to trusts covered by the BNY Mellon Settlement at September 30, 2013 compared to \$1.6 billion at December 31, 2012. We do not believe that the \$1.4 billion of demands outstanding at September 30, 2013 represents valid repurchase claims and, therefore, it is not possible to predict the resolution with respect to such demands.

Open Mortgage Insurance Rescission Notices

In addition to repurchase claims, we receive notices from mortgage insurance companies of claim denials, cancellations or coverage rescission (collectively, MI rescission notices). Although the number of such notices has remained elevated, they have decreased over the last several quarters as the resolution of open notices exceeded new notices. At September 30, 2013, we had approximately 105,000 open MI rescission notices compared to 110,000 at December 31, 2012. Open MI rescission notices at September 30, 2013 included 43,000 pertaining principally to first-lien mortgages serviced for others, 11,000 pertaining to loans held-for-investment (HFI) and 51,000 pertaining to ongoing litigation for second-lien mortgages. Approximately 24,000 of the open MI rescission notices pertaining to first-lien mortgages serviced for others are related to loans sold to FNMA. As of September 30, 2013, 39 percent of the MI rescission notices received have been resolved. Of those resolved, 18 percent were resolved through our acceptance of the MI rescission, 62 percent were resolved through reinstatement of coverage or payment of the claim by the mortgage insurance company, and 20 percent were resolved on an aggregate basis through settlement, policy commutation or similar arrangement. As of September 30, 2013, 61 percent of the MI rescission notices we have received have not yet been resolved. Of those not yet resolved, 49 percent are implicated by ongoing litigation where no loan-level review is currently contemplated or required to preserve our legal rights. In this litigation, the litigating mortgage insurance companies are also seeking bulk rescission of certain policies, separate and apart from loan-by-loan denials or rescissions. We are in the process of reviewing nine percent of the remaining open MI rescission notices, and we have reviewed and are contesting the MI rescission with respect to 91 percent of these remaining open MI rescission notices. Of the remaining open MI rescission notices, 45 percent are also the subject of ongoing litigation; although, at present, these MI rescissions are being processed in a manner generally consistent with those not affected by litigation.

Although the FNMA Settlement did not resolve underlying MI rescission notices, the FNMA Settlement resolved significant representations and warranties exposures, including unresolved and potential repurchase claims from FNMA resulting solely from MI rescission notices relating to loans covered by the FNMA Settlement. Our pipeline of unresolved repurchase claims from the GSEs resulting solely from MI rescission notices was \$443 million at September 30, 2013 compared to \$2.3 billion at December 31, 2012. The FNMA Settlement resolved approximately \$1.9 billion of such unresolved repurchase claims that were outstanding at December 31, 2012. Many of these claims represent repurchase claims on loans for which we received a MI rescission notice that is included in the 24,000 open MI rescission notices referenced in the paragraph above. In addition, the FNMA Settlement clarified the parties'

obligations with respect to MI rescission notices including establishing timeframes for certain payments and other actions, setting parameters for potential bulk settlements and providing for cooperation in future dealings with mortgage insurers. As a result, we are required to pay the amount of certain MI coverage to FNMA as a result of MI claims rescissions in advance of collection from the mortgage insurance companies and have remitted the amounts required under the agreement related to the 24,000 open MI rescission notices. In certain cases, we may not ultimately collect all such amounts from the mortgage insurance companies. For additional information, see Off-Balance Sheet Arrangements and Contractual Obligations – Unresolved Claims Status – Open Mortgage Insurance Rescission Notices on page 57 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Representations and Warranties Liability

The liability for representations and warranties and corporate guarantees is included in accrued expenses and other liabilities on the Consolidated Balance Sheet and the related provision is included in mortgage banking income in the Consolidated Statement of Income.

The liability for representations and warranties exposures and the corresponding estimated range of possible loss do not consider any losses related to litigation matters, including litigation brought by monoline insurers, nor do they include any separate foreclosure costs and related costs, assessments and compensatory fees or any other possible losses related to potential claims for breaches of performance of servicing obligations, except as such losses are included as potential costs of the BNY Mellon Settlement, potential

Table of Contents

securities law or fraud claims or potential indemnity or other claims against us, including claims related to loans insured by the FHA. We are not able to reasonably estimate the amount of any possible loss with respect to any such servicing, securities law, fraud or other claims against us, except to the extent reflected in the estimated range of possible loss for litigation and regulatory matters disclosed in Note 11 – Commitments and Contingencies to the Consolidated Financial Statements; however, such loss could be material.

At September 30, 2013 and December 31, 2012, the liability for representations and warranties and corporate guarantees was \$14.1 billion and \$19.0 billion, with the decrease primarily driven by the payment and repurchase of loans related to the FNMA Settlement. For the three and nine months ended September 30, 2013, the representations and warranties and corporate guarantees provision was \$323 million and \$770 million compared to \$307 million and \$984 million for the same periods in 2012. The provision for the three- and nine-month periods ended September 30, 2013 was driven by our obligations related to MI rescissions and our remaining GSE exposures, with MI rescission being the primary driver for the three-month period and GSE exposures for the nine-month period.

Estimated Range of Possible Loss

Our estimated liability at September 30, 2013 for obligations under representations and warranties is necessarily dependent on, and limited by, a number of factors, including for private-label securitizations, the implied repurchase experience based on the BNY Mellon Settlement, as well as certain other assumptions and judgmental factors. Accordingly, future provisions associated with obligations under representations and warranties may be materially impacted if actual experiences are different from historical experience or our understandings, interpretations or assumptions.

In the case of non-GSE exposures, including private-label securitizations, our estimate of the representations and warranties liability and the corresponding estimated range of possible loss considers, among other things, repurchase experience based on the BNY Mellon Settlement, adjusted to reflect differences between the trusts covered by the BNY Mellon Settlement (Covered Trusts) and the remainder of the population of private-label securitizations, and assumes that the conditions to the BNY Mellon Settlement will be met. Where relevant, we also take into account more recent experience, such as increased claim activity, our experience with various counterparties and other facts and circumstances, such as bulk settlements, as we believe appropriate.

The representations and warranties liability represents our best estimate of probable incurred losses as of September 30, 2013. However, it is reasonably possible that future representations and warranties losses may occur in excess of the amounts recorded for these exposures. In addition, we have not recorded any representations and warranties liability for certain potential private-label securitization and whole-loan exposures where we have little to no claim activity. We currently estimate that the range of possible loss for representations and warranties exposures could be up to \$4 billion over accruals at September 30, 2013. The estimated range of possible loss reflects principally non-GSE exposures. The estimated range of possible loss related to these representations and warranties exposures does not represent a probable loss, and is based on currently available information, significant judgment and a number of assumptions that are subject to change. Our estimated range of possible loss related to representations and warranties exposures does not include possible losses related to monoline insurers.

Future provisions and/or ranges of possible loss for representations and warranties may be significantly impacted if actual experiences are different from our assumptions in our predictive models, including, without limitation, ultimate resolution of the BNY Mellon Settlement, estimated repurchase rates, estimated MI rescission rates, economic conditions, estimated home prices, consumer and counterparty behavior, and a variety of other judgmental factors. Adverse developments with respect to one or more of the assumptions underlying the liability for representations and warranties and the corresponding estimated range of possible loss could result in significant increases to future provisions and/or the estimated range of possible loss. For example, an appellate court, in the context of claims

brought by a monoline insurer, disagreed with our interpretation that a loan must be in default in order to satisfy the underlying agreements' requirement that a breach have a material and adverse effect. If that decision is extended to non-monoline contexts, it could significantly impact our provision and/or the estimated range of possible loss. Additionally, if court rulings related to monoline litigation, including one related to us, that have allowed sampling of loan files instead of requiring a loan-by-loan review to determine if a representations and warranties breach has occurred, are followed generally by the courts in future monoline litigation, private-label securitization counterparties may view litigation as a more attractive alternative compared to a loan-by-loan review. Finally, although we believe that the representations and warranties typically given in non-GSE transactions are less rigorous and actionable than those given in GSE transactions, we do not have significant experience resolving loan-level claims in non-GSE transactions to measure the impact of these differences on the probability that a loan will be required to be repurchased.

For more information about the methodology used to estimate the representations and warranties liability and the corresponding estimated range of possible loss for representations and warranties exposures, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements and, for more information related to the sensitivity of the assumptions used to estimate our liability for obligations under representations and warranties, see Complex Accounting Estimates – Representations and Warranties on page 143.

Table of Contents

Experience with Government-sponsored Enterprises

As a result of the FNMA Settlement and earlier bulk settlements with the GSEs, our exposure to repurchase claims from the GSEs for vintages prior to 2009 has been significantly reduced. After these settlements, our exposure to representations and warranties liability for loans originated prior to 2009 and sold to the GSEs is limited to loans with an original principal balance of \$106.5 billion, sold primarily to Freddie Mac (FHLMC), and loans with certain defects excluded from the settlements that we do not believe will be material, such as title defects and certain specified violations of FNMA's charter. As of September 30, 2013, of the \$106.5 billion, approximately \$72.7 billion in principal has been paid, \$10.2 billion in principal has defaulted or was severely delinquent and the notional amount of unresolved repurchase claims submitted by the GSEs was \$1.1 billion related to these vintages. We have performed an initial review with respect to \$742 million of these claims and do not believe a valid basis for repurchase has been established by the claimant and are still in the process of reviewing the remaining \$361 million of these claims.

The FNMA Settlement and earlier bulk settlements did not address loans originated after 2008. However, we believe that changes made to our operations and underwriting policies have reduced our exposure to the GSEs related to loans originated after 2008. In addition, we estimate that lifetime losses on these vintages will be significantly less than the losses we have experienced with respect to vintages prior to 2009. We have sold \$525.7 billion of loans originated after 2008 to the GSEs. As of September 30, 2013, approximately \$251.1 billion in principal has been paid, \$4.6 billion in principal has defaulted or was severely delinquent and the notional amount of unresolved repurchase claims submitted by the GSEs was \$105 million related to these vintages. We have performed an initial review with respect to \$83 million of these claims and do not believe a valid basis for repurchase has been established by the claimant and are still in the process of reviewing the remaining \$22 million of these claims.

Experience with Investors Other than Government-sponsored Enterprises

In prior years, legacy companies and certain subsidiaries sold pools of first-lien residential mortgage loans and home equity loans as private-label securitizations or in the form of whole loans originated from 2004 through 2008 with an original principal balance of \$965 billion to investors other than GSEs (although the GSEs are investors in certain private-label securitizations), of which \$547 billion in principal has been paid, \$189 billion in principal has defaulted, \$56 billion in principal was severely delinquent and \$173 billion in principal was current or less than 180 days past due at September 30, 2013.

Table of Contents

Table 15 details the population of loans originated between 2004 and 2008 and the population of loans sold as whole loans or in non-agency securitizations by entity and product together with the defaulted and severely delinquent loans stratified by the number of payments the borrower made prior to default or becoming severely delinquent as of September 30, 2013. We believe many of the defaults observed in these securitizations have been, and continue to be, driven by external factors like the substantial depreciation in home prices, persistently high unemployment and other negative economic trends, diminishing the likelihood that any loan defect (assuming one exists at all) was the cause of a loan's default. As of September 30, 2013, approximately 25 percent of the loans sold to non-GSEs that were originated between 2004 and 2008 have defaulted or are severely delinquent. Of the original principal balance for Countrywide, \$409 billion is included in the BNY Mellon Settlement and, of this amount, \$109 billion was defaulted or severely delinquent at September 30, 2013.

Table 15
Overview of Non-Agency Securitization and Whole Loan Balances

(Dollars in billions)	Principal Balance		Defaulted or Severely Delinquent						
	Original Principal Balance	Outstanding Principal Balance September 30 2013	Outstanding Principal Balance 180 Days or More Past Due	Defaulted Principal Balance	Defaulted or Severely Delinquent	Borrower Made Less than 13 Payments	Borrower Made 13 to 24 Payments	Borrower Made 25 to 36 Payments	Borrower Made More than 36 Payments
By Entity

(1) Excludes transactions sponsored by Bank of America and Merrill Lynch where no representations or warranties were made.

(2) Includes exposures on third-party sponsored transactions related to legacy entity originations.

Monoline Insurers

Legacy companies sold \$184.5 billion of loans originated between 2004 and 2008 into monoline-insured securitizations, which are included in Table 15, including \$103.9 billion of first-lien mortgages and \$80.6 billion of second-lien mortgages. Of these balances, \$49.3 billion of the first-lien mortgages and \$53.4 billion of the second-lien mortgages have been paid in full, and \$35.4 billion of the first-lien mortgages and \$17.2 billion of the second-lien mortgages have defaulted or were severely delinquent at September 30, 2013. At least 25 payments have been made on approximately 61 percent of the defaulted and severely delinquent loans. Of the first-lien mortgages sold, \$39.1

billion, or 38 percent, were sold as whole loans to other institutions which subsequently included these loans with those of other originators in private-label securitization transactions in which the monolines insured one or more securities. During the three and nine months ended September 30, 2013, there was minimal repurchase claim activity with the monolines.

At September 30, 2013, for loans originated between 2004 and 2008, the unpaid principal balance of loans related to unresolved monoline repurchase claims was \$1.5 billion compared to \$2.4 billion at December 31, 2012. At September 30, 2013, the unpaid principal balance of loans in these vintages for which the monolines had requested loan files for review but for which no repurchase claim had been received was \$2.7 billion, excluding loans that had been paid in full or resolved through settlements. Of these file requests, \$1.4 billion are aged and subject to ongoing litigation. While no such file requests have been received since 2012, there may be additional requests for loan files in the future leading to repurchase claims. In addition, we have received claims from private-label securitization trustees and a third-party securitization sponsor related to first-lien third-party sponsored securitizations that include monoline insurance.

Table of Contents

The MBIA Settlement resolved outstanding and potential claims between the parties to the settlement involving 31 first- and 17 second-lien RMBS trusts for which MBIA provided financial guarantee insurance, including \$945 million of monoline repurchase claims outstanding at December 31, 2012. In addition, this settlement covered loans with an unpaid principal balance of \$2.6 billion for which we have received file requests but for which no repurchase claims were received as of December 31, 2012. The first- and second-lien mortgages in the covered RMBS trusts had an original principal balance of \$29.3 billion and \$25.5 billion, and an unpaid principal balance of \$9.8 billion and \$9.3 billion at the time of the settlement.

For additional information, see Off-Balance Sheet Arrangements and Contractual Obligations – Experience with Investors Other than Government-sponsored Enterprises on page 59 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Whole Loans and Private-label Securitizations

Legacy entities, and to a lesser extent Bank of America, sold loans to investors as whole loans or via private-label securitizations. The majority of the loans sold were included in private-label securitizations, including third-party sponsored transactions. We provided representations and warranties to the whole-loan investors and these investors may retain those rights even when the whole loans were aggregated with other collateral into private-label securitizations sponsored by the whole-loan investors. The loans sold with an original total principal balance of \$780.5 billion, included in Table 15, were originated between 2004 and 2008, of which \$444.3 billion have been paid in full and \$192.4 billion were defaulted or severely delinquent at September 30, 2013. At least 25 payments have been made on approximately 64 percent of the defaulted and severely delinquent loans. We have received approximately \$22.9 billion of representations and warranties repurchase claims from whole-loan investors, including third-party sponsors, and private-label securitization investors and trustees related to these vintages, including \$13.6 billion from private-label securitization trustees, \$8.5 billion from whole-loan investors and \$809 million from one private-label securitization counterparty. In private-label securitizations, certain presentation thresholds need to be met in order for investors to direct a trustee to assert repurchase claims. Continued high levels of new private-label claims are primarily related to repurchase requests received from trustees and third-party sponsors for private-label securitization transactions not included in the BNY Mellon Settlement, including claims related to first-lien third-party sponsored securitizations that include monoline insurance. Over time, there has been an increase in requests for loan files from certain private-label securitization trustees, as well as requests for tolling agreements to toll the applicable statute of limitations relating to representations and warranties repurchase claims, and we believe it is likely that these requests will lead to an increase in repurchase claims from private-label securitization trustees with standing to bring such claims. In addition, private-label securitization trustees may have obtained loan files through other means, including litigation and administrative subpoenas.

We have resolved \$8.0 billion of the claims received from whole-loan investors and private-label securitization investors and trustees with losses of \$1.8 billion. The majority of these resolved claims were from third-party whole-loan investors. Approximately \$3.2 billion of these claims were resolved through repurchase or indemnification and \$4.8 billion were rescinded by the investor. At September 30, 2013, for loans originated between 2004 and 2008, the notional amount of unresolved repurchase claims submitted by private-label securitization trustees and whole-loan investors was \$14.8 billion. We have performed an initial review with respect to \$13.9 billion of these claims and do not believe a valid basis for repurchase has been established by the claimant and are still in the process of reviewing the remaining \$911 million of these claims.

Certain whole-loan investors have engaged with us in a consistent repurchase process and we have used that and other experience to record a liability related to existing and future claims from such counterparties. The BNY Mellon Settlement and subsequent activity with certain counterparties led to the determination that we had sufficient experience to record a liability related to our exposure on certain private-label securitizations but did not provide

sufficient experience related to certain private-label securitizations sponsored by third-party whole-loan investors. As it relates to the other private-label securitizations sponsored by third-party whole-loan investors and certain other whole loan sales, it is not possible to determine whether a loss has occurred or is probable and, therefore, no representations and warranties liability has been recorded in connection with these transactions. Until we receive a repurchase claim, we generally do not review loan files related to private-label securitizations sponsored by third-party whole-loan investors (and are not required by the governing documents to do so). Our estimated range of possible loss related to representations and warranties exposures as of September 30, 2013 included possible losses related to these whole loan sales and private-label securitizations sponsored by third-party whole-loan investors.

Private-label securitization investors generally do not have the contractual right to demand repurchase of loans directly or the right to access loan files. We have received repurchase demands totaling \$1.4 billion from private-label securitization investors and a master servicer where in each case we believe the claimant has not satisfied the contractual thresholds to direct the securitization trustee to take action and/or that the demands are otherwise procedurally or substantively invalid.

Table of Contents

Servicing, Foreclosure and Other Mortgage Matters

We service a large portion of the loans we or our subsidiaries have securitized and also service loans on behalf of third-party securitization vehicles and other investors. Our servicing obligations are set forth in servicing agreements with the applicable counterparty. These obligations may include, but are not limited to, loan repurchase requirements in certain circumstances, indemnifications, payment of fees, advances for foreclosure costs that are not reimbursable, or responsibility for losses in excess of partial guarantees for VA loans.

Servicing agreements with the GSEs generally provide the GSEs with broader rights relative to the servicer than are found in servicing agreements with private investors. For example, each GSE typically claims the right to demand that the servicer repurchase loans that breach the seller's representations and warranties made in connection with the initial sale of the loans even if the servicer was not the seller. The GSEs claim that they have the contractual right to demand indemnification or loan repurchase for certain servicing breaches. In addition, the GSEs' first-lien mortgage seller/servicer guides provide for timelines to resolve delinquent loans through workout efforts or liquidation, if necessary, and purport to require the imposition of compensatory fees if those deadlines are not satisfied except for reasons beyond the control of the servicer, although we believe that the governing contracts, our course of dealing, and collective past practices and understandings should inform resolution of these matters. In addition, many non-agency RMBS and whole-loan servicing agreements state that the servicer may be liable for failure to perform its servicing obligations in keeping with industry standards or for acts or omissions that involve willful malfeasance, bad faith or gross negligence in the performance of, or reckless disregard of, the servicer's duties.

It is not possible to reasonably estimate our liability with respect to certain potential servicing-related claims. While we have recorded certain accruals for servicing-related claims, the amount of potential liability in excess of existing accruals could be material. For additional information, see Off-Balance Sheet Arrangements and Contractual Obligations – Servicing Matters and Foreclosure Processes on page 61 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

2013 IFR Acceleration Agreement

On January 7, 2013, Bank of America and other mortgage servicing institutions entered into an agreement in principle with the Office of the Comptroller of the Currency (OCC) and the Federal Reserve to cease the Independent Foreclosure Review (IFR) that had commenced pursuant to consent orders entered into by Bank of America with the Federal Reserve (2011 FRB Consent Order) and by BANA with the OCC on April 13, 2011 (2011 OCC Consent Order) and replaced it with an accelerated remediation process (2013 IFR Acceleration Agreement). This agreement in principle was memorialized in amendments to the 2011 FRB Consent Order and the 2011 OCC Consent Order on February 28, 2013. The 2013 IFR Acceleration Agreement requires us to provide \$1.8 billion of borrower assistance in the form of loan modifications and other foreclosure prevention actions, and in addition, we made a cash payment of \$1.1 billion into a qualified settlement fund in the first quarter of 2013, which was fully reserved at December 31, 2012. The borrower assistance program is not expected to result in any incremental credit provision, as we believe that the existing allowance for credit losses is adequate to absorb any costs that have not already been recorded as charge-offs.

National Mortgage Settlement

In March 2012, we entered into settlement agreements (collectively, the National Mortgage Settlement) with (1) the U.S. Department of Justice, various federal regulatory agencies and 49 state Attorneys General to resolve federal and state investigations into certain residential mortgage origination, servicing and foreclosure practices, (2) HUD to resolve certain claims relating to the origination of FHA-insured mortgage loans, primarily originated by Countrywide prior to and for a period following our acquisition of that lender, and (3) each of the Federal Reserve and the OCC

regarding civil monetary penalties related to conduct that was the subject of consent orders entered into with the banking regulators in April 2011. The National Mortgage Settlement was entered by the court as a consent judgment on April 5, 2012. The National Mortgage Settlement provided for the establishment of certain uniform servicing standards, upfront cash payments of approximately \$1.9 billion to the state and federal governments and for borrower restitution, approximately \$7.6 billion in borrower assistance in the form of, among other things, credits earned for principal reduction, short sales, deeds-in-lieu of foreclosure and approximately \$1.0 billion of credits earned for interest rate reduction modifications. In addition, the settlement with HUD provided for an upfront cash payment of \$500 million to settle certain claims related to FHA-insured loans. We will also be obligated to provide additional cash payments of up to \$850 million if we fail to earn an additional \$850 million of credits stemming from incremental first-lien principal reductions and satisfy certain solicitation requirements over a three-year period.

We also entered into agreements with several states under which we committed to perform certain minimum levels of principal reduction and related activities within those states in connection with the National Mortgage Settlement, and under which we could be required to make additional payments if we fail to meet such minimum levels.

Table of Contents

Subject to confirmation by the independent monitor appointed as a result of the National Mortgage Settlement to review and certify compliance with its provisions, we believe we have substantially fulfilled all borrower assistance, rate reduction modification and principal reduction commitments and, therefore, do not expect to be required to make additional cash payments. The monitor has validated that through December 2012 we have earned nearly \$7.8 billion in credits towards our total obligation. The borrower assistance program did not result in any incremental credit losses as of the settlement date, as the existing allowance for credit losses was adequate to absorb any losses that had not already been charged-off. Under the interest rate reduction program, modifications of approximately 24,000 loans with an aggregate unpaid principal balance of \$6.4 billion have been completed as of September 30, 2013, including approximately 600 modifications that were completed during the third quarter. These modifications, which are not accounted for as troubled debt restructurings (TDRs), provided for an average interest rate reduction of approximately two percent, resulting in an estimated decrease in fair value of the modified loans of approximately \$740 million and a reduction in annual interest income of approximately \$120 million.

Under the terms of the National Mortgage Settlement, the federal and participating state governments agreed to release us from further liability for certain alleged residential mortgage origination, servicing and foreclosure deficiencies. In settling origination issues related to FHA-guaranteed loans originated on or before April 30, 2009, we received a release from further liability for all origination claims with respect to such loans if an insurance claim had been submitted to the FHA prior to January 1, 2012 and a release of multiple damages and penalties, but not single damages, if no such claim had been submitted. In addition, provided we meet our assistance and remediation commitments, the OCC agreed not to assess, and we will not be obligated to pay to the Federal Reserve, any civil monetary penalties.

The National Mortgage Settlement does not cover certain claims arising out of origination, securitization (including representations made to investors with respect to MBS), criminal claims, private claims by borrowers, claims by certain states for injunctive relief or actual economic damages to borrowers related to the Mortgage Electronic Registration Systems, Inc. (MERS), and claims by the GSEs (including repurchase demands), among other items. For more information on MERS, see Off-Balance Sheet Arrangements and Contractual Obligations – Mortgage Electronic Registration Systems, Inc. on page 63 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Impact of Foreclosure Delays

Foreclosure delays impact our default-related servicing costs. We believe default-related servicing costs peaked in late 2012 and these costs declined in 2013. Default-related servicing costs include costs related to resources needed for implementing new servicing standards mandated for the industry, including as part of the National Mortgage Settlement, other operational changes and operational costs due to delayed foreclosures, and do not include mortgage-related assessments, waivers and similar costs related to foreclosure delays.

Other areas of our operations are also impacted by foreclosure delays. In the nine months ended September 30, 2013, we recorded \$459 million of mortgage-related assessments, waivers and similar costs related to foreclosure delays compared to \$530 million for the same period in 2012. It is also possible that the delays in foreclosure sales may result in additional costs and expenses, including costs associated with the maintenance of properties or possible home price declines while foreclosures are delayed. Finally, the time to complete foreclosure sales may continue to be protracted, which may result in a greater number of nonperforming loans and increased servicing advances, and may impact the collectability of such advances and the value of our MSR asset, MBS and real estate owned properties. Accordingly, the ultimate resolution of disagreements with counterparties, delays in foreclosure sales beyond those currently anticipated, and any issues that may arise out of alleged irregularities in our foreclosure process could significantly increase the costs associated with our mortgage operations.

Other Mortgage-related Matters

We continue to be subject to additional borrower and non-borrower litigation and governmental and regulatory scrutiny related to our past and current origination, servicing, transfer of servicing and servicing rights, and foreclosure activities, including those claims not covered by the National Mortgage Settlement. This scrutiny may extend beyond our pending foreclosure matters to issues arising out of alleged irregularities with respect to previously completed foreclosure activities. We are also subject to inquiries, investigations, actions and claims from regulators, trustees, investors and other third parties relating to other mortgage-related activities such as the purchase, sale, pooling, and origination and securitization of loans, as well as structuring, marketing, underwriting and issuance of MBS and other securities, including claims relating to the adequacy and accuracy of disclosures in offering documents and representations and warranties made in connection with whole-loan sales or securitizations. The current environment of heightened scrutiny may subject us to governmental or regulatory inquiries, investigations, actions, penalties and fines, including by the RMBS Working Group of the Financial Fraud Enforcement Task Force, or by other regulators or government agencies that could significantly adversely affect our reputation and result in material costs to us in excess of current reserves and management's estimate of the aggregate range of possible loss for litigation matters. For more information on management's estimate of the aggregate range of possible loss and regulatory investigations, see Note 11 – Commitments and Contingencies to the Consolidated Financial Statements.

Table of Contents

Mortgage-related Settlements – Servicing Matters

In connection with the BNY Mellon Settlement, BANA has agreed to implement certain servicing changes. The Trustee and BANA have agreed to clarify and conform certain servicing standards related to loss mitigation. In particular, the BNY Mellon Settlement clarifies that it is permissible to apply the same loss mitigation strategies to the Covered Trusts as are applied to BANA affiliates' HFI portfolios. This portion of the agreement was effective in the second quarter of 2011 and is not conditioned on final court approval.

BANA also agreed to transfer the servicing rights related to certain high-risk loans to qualified subservicers on a schedule that began with the signing of the BNY Mellon Settlement. This servicing transfer protocol will reduce the servicing fees payable to BANA in the future. Upon final court approval of the BNY Mellon Settlement, failure to meet the established benchmarking standards for loans not in subservicing arrangements can trigger the payment of agreed-upon fees. Additionally, we and Countrywide have agreed to work to resolve with the Trustee certain mortgage documentation issues related to the enforceability of mortgages in foreclosure and to reimburse the related Covered Trust for any loss if BANA is unable to foreclose on the mortgage and the Covered Trust is not made whole by a title policy because of these issues. These agreements will terminate if final court approval of the BNY Mellon Settlement is not obtained, although we could still have exposure under the pooling and servicing agreements related to the mortgages in the Covered Trusts for these issues.

In connection with the National Mortgage Settlement, BANA has agreed to implement certain additional servicing changes. The uniform servicing standards established under the National Mortgage Settlement are broadly consistent with the residential mortgage servicing practices imposed by the 2011 OCC Consent Order; however, they are more prescriptive and cover a broader range of our residential mortgage servicing activities. These standards are intended to strengthen procedural safeguards and documentation requirements associated with foreclosure, bankruptcy and loss mitigation activities, as well as addressing the imposition of fees and the integrity of documentation, with a goal of ensuring greater transparency for borrowers. These uniform servicing standards also obligate us to implement compliance processes reasonably designed to provide assurance of the achievement of these objectives. Compliance with the uniform servicing standards is being assessed by a monitor based on the measurement of outcomes with respect to these objectives. Implementation of these uniform servicing standards has contributed to elevated costs associated with the servicing process, but is not expected to result in material delays or dislocation in the performance of our mortgage servicing obligations, including the completion of foreclosures. For additional information, see Off-Balance Sheet Arrangements and Contractual Obligations – Mortgage-related Settlements – Servicing Matters on page 63 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Regulatory Matters

Financial Reform Act

The Financial Reform Act, which was signed into law on July 21, 2010, enacted sweeping financial regulatory reform and has altered and will continue to alter the way in which we conduct certain businesses, increase our costs and reduce our revenues. Many aspects of the Financial Reform Act remain subject to final rulemaking which will take effect over several years, making it difficult to anticipate the precise impact on the Corporation, our customers or the financial services industry.

Credit Risk Retention

On August 28, 2013, federal regulators jointly issued a re-proposal of a rule regarding credit risk retention (Credit Risk Retention Rule) that would, among other things, require sponsors to retain at least five percent of the credit risk of the assets underlying certain ABS and MBS securitizations and would limit sponsors' ability to transfer or hedge that credit risk. The proposed rule, as currently written, would likely have some adverse impacts on our ability to engage in many types of MBS and ABS securitizations and resecuritizations, impose additional operational and compliance costs, and negatively influence the value, liquidity and transferability of ABS or MBS, loans and other assets. However, it remains unclear what requirements will be included in the final rule and what the ultimate impact will be on our results of operations.

Derivatives

Pursuant to the Financial Reform Act and subsequent Commodity Futures Trading Commission (CFTC) rulemaking, we have registered BANA and certain other subsidiaries as swap dealers with the CFTC and we will need to register additional entities as swap dealers or major swap participants as a result of the CFTC's July 2013 final cross-border guidance. Upon registration, swap dealers and major swap participants become subject to certain CFTC rules, including measures regarding clearing and exchange trading of certain derivatives, new capital and margin requirements, additional reporting, external and internal business conduct, swap documentation, portfolio compression and reconciliation requirements for derivatives. Most of these requirements, with the exception of margin, capital and exchange/swap execution facility trading, have gone into effect for us, except with respect to swaps between our non-U.S. swap dealers and non-U.S. branches of BANA with certain non-U.S. counterparties. Some CFTC swap requirements began to apply to portions of our non-U.S. swap activity in October 2013. Swap dealers are now required to clear certain interest rate and index credit derivative transactions when facing all counterparty types unless either counterparty qualifies for the "end-user exception" to the clearing mandate. These products will also become subject to exchange/swap execution facility trading requirements beginning in the first quarter of 2014. The timing for margin implementation remains unknown. The Financial Reform Act and subsequent OCC rulemaking also require BANA to "push out" certain derivatives activity to one or more non-bank affiliates by July 2015.

On July 12, 2013, the CFTC provided temporary exemptive relief from application of derivatives requirements of the Financial Reform Act for certain non-U.S. derivatives activity and adopted a final cross-border framework to apply CFTC requirements outside the U.S. Europe and various G-20 jurisdictions are also enacting their own derivatives regulation, although the overall pace of non-U.S. reform is behind that of the U.S. The ultimate impact on us of the derivatives regulations and the time it will take us to comply remain uncertain. Final regulations will impose additional operational and compliance costs on us, may require us to restructure certain businesses and may negatively impact our results of operations.

Mortgage

The Consumer Financial Protection Bureau (CFPB) has promulgated several proposed and final rules that will affect our consumer businesses. Among these initiatives is a final rule implementing sections of the Financial Reform Act establishing "ability to repay" and "qualified mortgage" standards under the Truth in Lending Act (TILA). The FHA, FNMA and FHLMC have issued proposed guidance which will require additional technical and process changes to meet specific definitions of "qualified mortgage." In addition, the CFPB issued a final rule establishing mortgage loan servicing standards through amendments to the Real Estate Settlement Procedures Act (RESPA). The CFPB has also finalized rules addressing items such as remittance transfer services, appraisal requirements and loan originator compensation requirements. The CFPB expects, in the near term, to finalize the TILA and RESPA rules, which will transform the process and disclosure of information about mortgage loan terms. Additionally, several federal agencies have jointly re-proposed the "qualified residential mortgage" rule, which imposes credit risk retention requirements on lenders originating certain mortgage loans. The Corporation is evaluating the various rules and proposals and devoting substantial compliance, legal and operational business resources to facilitate compliance with these rules by their respective effective dates.

Table of Contents

Resolution Planning

The Federal Reserve and the FDIC require that the Corporation and other BHCs with assets of \$50 billion or more, as well as companies designated as systemically important by the Financial Stability Oversight Council, submit annually their plans for a rapid and orderly resolution in the event of material financial distress or failure.

A resolution plan is intended to be a detailed roadmap for the orderly resolution of the BHC and material entities pursuant to the U.S. Bankruptcy Code and other applicable resolution regimes under one or more hypothetical scenarios assuming no extraordinary government assistance. If the Federal Reserve and the FDIC determine that our (or any other BHC's) plan is not credible and we fail to cure the deficiencies in a timely manner, the Federal Reserve and the FDIC may jointly impose more stringent capital, leverage or liquidity requirements or restrictions on growth, activities or operations of the Corporation. We submitted our initial plan in 2012 and a subsequent plan in the third quarter of 2013. The plan is to be updated annually.

Similarly, in the U.K., the Prudential Regulation Authority (PRA) has issued proposed rules requiring the submission of significant information about certain U.K.-incorporated subsidiaries and other financial institutions, as well as branches of non-U.K. banks located in the U.K. (including information on intra-group dependencies, legal entity separation and barriers to resolution) to allow the PRA to develop resolution plans. As a result of the PRA review, we could be required to take certain actions over the next several years which could impose operational costs and potentially result in the restructuring of certain business and subsidiaries.

For more information on other significant regulatory matters, see Capital Management – Regulatory Capital on page 71, Note 11 – Commitments and Contingencies to the Consolidated Financial Statements herein, Regulatory Matters on page 64 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K, and Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Managing Risk

Overview

Risk is inherent in every material business activity that we undertake. Our business exposes us to strategic, credit, market, liquidity, compliance, operational and reputational risks. We must manage these risks to maximize our long-term results by ensuring the integrity of our assets and the quality of our earnings.

We take a comprehensive approach to risk management. We have a defined risk framework and articulated risk appetite which was approved on January 23, 2013 by the Corporation's Board of Directors (the Board). Risk management planning is integrated with strategic, financial and customer/client planning so that goals and responsibilities are aligned across the organization. Risk is managed in a systematic manner by focusing on the Corporation as a whole as well as managing risk across the enterprise and within individual business units, products, services and transactions, and across all geographic locations. We maintain a governance structure that delineates the responsibilities for risk management activities, as well as governance and oversight of those activities.

Enterprise-wide Stress Testing

As a part of our core risk management practices, we conduct enterprise-wide stress tests on a periodic basis to better understand balance sheet, earnings, capital and liquidity sensitivities to certain economic and business scenarios, including economic and market conditions that are more severe than anticipated. These enterprise-wide stress tests provide illustrative hypothetical potential impacts from our risk profile on our balance sheet, earnings, capital and liquidity and serve as a key component of our capital, liquidity and risk management practices. Scenarios are recommended by the Asset Liability and Market Risk Committee (ALMRC) and approved by the Chief Financial Officer and the Chief Risk Officer. Impacts to each business from each scenario are then determined and analyzed, primarily by leveraging the models and processes utilized in everyday management routines. Impacts are assessed along with potential mitigating actions that may be taken. Analysis from such stress scenarios is compiled for and reviewed through our Chief Financial Officer Risk Committee, ALMRC and the Board's Enterprise Risk Committee. For a more detailed discussion of our risk management activities, see pages 66 through 121 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Strategic Risk Management

Strategic risk is embedded in every business and is one of the major risk categories along with credit, market, liquidity, compliance, operational and reputational risks. It is the risk that results from adverse business decisions, ineffective or inappropriate business plans, or failure to respond to changes in the macroeconomic environment, such as business cycles, competitor actions, changing customer preferences, product obsolescence, technology developments and regulatory environment. We face significant strategic risk due to the changing regulatory environment and the fast-paced development of new products and technologies in the financial services industries. Our appetite for strategic risk is assessed based on the strategic plan, with strategic risks selectively and carefully considered against the backdrop of the evolving marketplace. Strategic risk is managed in the context of our overall financial condition, risk appetite and stress results, among other considerations. The Chief Executive Officer and executive management team manage and act on significant strategic actions, such as material acquisitions or capital actions subsequent to required review and approval by the Board.

For more information on our Strategic Risk Management activities, see page 70 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Capital Management

The Corporation manages its capital position to maintain sufficient capital to support its business activities and maintain capital, risk and risk appetite commensurate with one another. Additionally, we seek to maintain safety and soundness at all times including under adverse conditions, take advantage of organic growth opportunities, maintain ready access to financial markets, continue to serve as a credit intermediary, remain a source of strength for our subsidiaries, and satisfy current and future regulatory capital requirements.

To determine the appropriate level of capital, we assess the results of our Internal Capital Adequacy Assessment Process (ICAAP), the current economic and market environment, and feedback from key stakeholders including investors, rating agencies and regulators. Based upon this analysis, we set goals for capital ratios to maintain an adequate capital position, including in severe adverse economic scenarios.

The ICAAP incorporates capital forecasts, stress test results, economic capital (which is a component of allocated capital), qualitative risk assessments and consideration of regulatory changes. Throughout the year, we generate regulatory capital and economic capital forecasts that are aligned to the most recent earnings, balance sheet and risk forecasts. We utilize quarterly stress tests to assess the potential impacts to our balance sheet, earnings, capital and liquidity under a variety of stress scenarios. We perform qualitative risk assessments to identify and assess material risks not fully captured in the forecasts, stress tests or economic capital. We regularly assess the capital impacts of proposed changes to regulatory capital requirements. Management regularly assesses ICAAP results and provides documented quarterly assessments of the adequacy of the capital guidelines and capital position to the Board or its committees.

Capital management is integrated into our risk and governance processes, as capital is a key consideration in the development of the strategic plan, risk appetite and risk limits. Effective January 1, 2013, on a prospective basis, we adjusted the amount of capital being allocated to our business segments. The adjustment reflects a refinement to the prior-year methodology (economic capital) which focused solely on internal risk-based economic capital models. The refined methodology (allocated capital) now also considers the effect of regulatory capital requirements in addition to internal risk-based economic capital models. The Corporation's internal risk-based capital models use a risk-adjusted methodology incorporating each segment's credit, market, interest rate, business and operational risk components. For more information on the nature of these risks, see *Managing Risk and Strategic Risk Management* on page 70. The capital allocated to the business segments is currently referred to as allocated capital and, prior to January 1, 2013, was referred to as economic capital, both of which represent non-GAAP financial measures. Allocated capital in the business segments is subject to change over time. For more information on the refined methodology, see *Business Segment Operations* on page 30.

Regulatory Capital

As a financial services holding company, we are subject to the general risk-based capital rules issued by federal banking regulators which was Basel 1 through December 31, 2012. On January 1, 2013, Basel 1 was amended prospectively, introducing changes to the measurement of risk-weighted assets for exposures subject to market risk (Market Risk Final Rule) and is referred to herein as the Basel 1 – 2013 Rules. Under these rules, the Corporation and its affiliated banking entities, BANA and FIA, measure capital adequacy based on Tier 1 common, Tier 1 and Total capital (Tier 1 plus Tier 2 capital). Capital ratios are calculated by dividing each capital amount by risk-weighted assets. Additionally, Tier 1 capital is divided by adjusted quarterly average total assets to derive the Tier 1 leverage ratio. For more information on the Market Risk Final Rule, see *Capital Management – Regulatory Capital Changes* on page 74.

The Federal Reserve requires BHCs to submit a capital plan and requests for capital actions on an annual basis, consistent with the rules governing the CCAR. The CCAR is the central element to the Federal Reserve's approach to ensuring that large BHCs have adequate capital and robust processes for managing their capital. In January 2013, we submitted our 2013 capital plan, and received results on March 14, 2013. The Federal Reserve's stress scenario projections for the Corporation, based on the 2013 capital plan, estimated a Basel 1 – 2013 minimum Tier 1 common capital ratio of 6.0 percent under severe adverse economic conditions with all proposed capital actions through the end of 2014, exceeding the five percent reference rate for all institutions involved in the CCAR. The capital plan submitted by the Corporation included a request to repurchase up to \$5.0 billion of common stock and redeem \$5.5 billion in preferred stock over four quarters beginning in the second quarter of 2013, and continue the quarterly common stock dividend at \$0.01 per share. As of September 30, 2013, in connection with the CCAR capital plan, we have repurchased and retired 139.6 million common shares for an aggregate purchase price of approximately \$1.9 billion and we redeemed \$5.5 billion of preferred stock consisting of Series H and 8.

The timing and amount of common stock repurchases have been and will continue to be consistent with the Corporation's 2013 capital plan and will be subject to various factors, including the Corporation's capital position, liquidity, applicable legal considerations, financial performance and alternative uses of capital, stock trading price, and general market conditions, and may be suspended at any time. The remaining common stock repurchases may be effected through open market purchases or privately negotiated transactions, including repurchase plans that satisfy the conditions of Rule 10b5-1 of the Securities Exchange Act of 1934.

Table of Contents

For additional information, see Capital Management – Regulatory Capital on page 70 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K and Note 17 – Regulatory Requirements and Restrictions to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Capital Composition and Ratios

Tier 1 common capital under the Basel 1 – 2013 Rules was \$142.8 billion at September 30, 2013, an increase of \$9.4 billion compared to \$133.4 billion under Basel 1 at December 31, 2012. The increase was due to earnings eligible to be included in capital, partially offset by the impact of the common stock repurchases. For comparative purposes, we have also provided pro-forma Tier 1 common capital and the related ratio as of December 31, 2012 as if the Basel 1 – 2013 Rules had been in effect at that time. At December 31, 2012, the pro-forma Tier 1 common capital of \$133.4 billion was unchanged and the difference between the pro-forma Tier 1 common capital ratio of 10.38 percent compared to 11.06 percent on an as-reported basis was the result of additional risk-weighted assets of \$78.8 billion as measured under the Basel 1 – 2013 Rules. At September 30, 2013, the Tier 1 common capital ratio was 11.08 percent, a 70 bps increase from the pro-forma Tier 1 common capital ratio of 10.38 percent at December 31, 2012 driven by the increase in Tier 1 common capital, partially offset by a modest increase in risk-weighted assets. During the nine months ended September 30, 2013, total capital increased \$1.3 billion primarily driven by the increase in Tier 1 common capital and the portion of the allowance for loan and lease losses eligible to be included in capital, partially offset by decreases in qualifying preferred stock, term subordinated debt and qualifying trust preferred securities (Trust Securities). For additional information, see Tables 16 and 18.

Table 16 presents Bank of America Corporation's capital ratios and related information in accordance with the Basel 1 – 2013 Rules as measured at September 30, 2013 and Basel 1 at December 31, 2012.

Table 16

Bank of America Corporation Regulatory Capital – Actual and Pro-Forma

(Dollars in millions)	September 30, 2013			December 31, 2012		
	Ratio	Amount	Minimum Required (1)	Ratio	Amount	Minimum Required (1)
Tier 1 common capital	11.08	% \$142,825	n/a	11.06	% \$ 133,403	n/a
Tier 1 common capital (pro-forma) (2)	n/a	n/a	n/a	10.38	133,403	n/a
Tier 1 capital	12.33	159,008	\$77,367	12.89	155,461	\$ 72,359
Total capital	15.36	198,001	128,944	16.31	196,680	120,598
Tier 1 leverage	7.79	159,008	81,631	7.37	155,461	84,429
					September 30 2013	December 31 2012
Risk-weighted assets (in billions)					\$ 1,289	\$ 1,206
Adjusted quarterly average total assets (in billions) (3)					2,041	2,111

(1) Dollar amount required to meet guidelines to be considered well-capitalized.

Pro-forma Tier 1 common capital ratio at December 31, 2012 includes the estimated impact of the Basel 1 – 2013 Rules. Represents a non-GAAP financial measure. On a pro-forma basis, risk-weighted assets would have been approximately \$1,285 billion with the inclusion of \$78.8 billion in pro-forma risk-weighted assets.

(3) Reflects adjusted average total assets for the three months ended September 30, 2013 and December 31, 2012.

n/a = not applicable

At September 30, 2013, in order to increase or decrease our Tier 1 common, Tier 1 or Total capital ratios by one bp, we would need an additional \$129 million of Tier 1 common, Tier 1 or Total capital. We could also increase our Tier 1 common, Tier 1 or Total capital ratios by one bp on such date by a reduction in risk-weighted assets of \$1.2 billion, \$1.0 billion or \$839 million, respectively. To increase our Tier 1 leverage ratio by one bp on such date, we would need \$204 million of additional Tier 1 capital or a reduction of \$2.6 billion in adjusted average assets.

Risk-weighted assets increased \$83.5 billion during the nine months ended September 30, 2013 to \$1,289 billion. This increase adversely impacted Tier 1 common, Tier 1 and Total capital ratios by 74 bps, 84 bps and 106 bps, respectively. The increase was primarily due to the net impact of the Basel 1 – 2013 Rules which added approximately \$87 billion in risk-weighted assets and reduced the Tier 1 common capital ratio by approximately 77 bps. The Tier 1 leverage ratio increased 42 bps during the nine months ended September 30, 2013 primarily driven by a reduction in adjusted quarterly average total assets and the increase in Tier 1 capital.

Table of Contents

Table 17 presents Bank of America Corporation's risk-weighted assets activity for the nine months ended September 30, 2013.

Table 17

Risk-weighted Assets Activity

(Dollars in billions)	Nine Months Ended September 30, 2013
Risk-weighted assets, January 1	\$ 1,206
Changes to risk-weighted assets	
Increase related to Comprehensive Risk Measure ⁽¹⁾	22
Increase related to Incremental Risk Charge ⁽¹⁾	7
Increase related to market risk regulatory VaR	21
Standard specific risk ⁽²⁾	28
Increase due to items no longer eligible to be included in market risk	9
Increases related to implementation of Basel 1 – 2013 Rules	87
Decrease related to trading and banking book exposures	(10)
Other changes	6
Total risk-weighted assets, September 30	\$ 1,289

⁽¹⁾For additional information, see Capital Management – Regulatory Capital Changes on page 74.

⁽²⁾ A measure of the risk of loss on a position that could result from factors other than broad market movements.

Table 18 presents capital composition in accordance with the Basel 1 – 2013 Rules as measured at September 30, 2013 and Basel 1 at December 31, 2012.

Table 18

Capital Composition

(Dollars in millions)	September 30 2013	December 31 2012
Total common shareholders' equity	\$ 218,967	\$ 218,188
Goodwill	(69,891)	(69,976)
Nonqualifying intangible assets (includes core deposit intangibles, affinity relationships, customer relationships and other intangibles)	(4,441)	(4,994)
Net unrealized (gains) losses on AFS debt and marketable equity securities and net losses on derivatives recorded in accumulated OCI, net-of-tax	3,369	(2,036)
Unamortized net periodic benefit costs recorded in accumulated OCI, net-of-tax	2,943	4,456
Fair value adjustments related to structured liabilities ⁽¹⁾	4,227	4,084
Disallowed deferred tax asset	(13,939)	(17,940)
Other	1,590	1,621
Total Tier 1 common capital	142,825	133,403
Qualifying preferred stock	10,397	15,851
Trust preferred securities	5,786	6,207
Total Tier 1 capital	159,008	155,461
Long-term debt qualifying as Tier 2 capital	21,417	24,287
Allowance for loan and lease losses	19,432	24,179
Reserve for unfunded lending commitments	480	513
Allowance for loan and lease losses exceeding 1.25 percent of risk-weighted assets	(3,709)	(9,459)
45 percent of the pre-tax net unrealized gains (losses) on AFS marketable equity securities	(2)	329

Other	1,375	1,370
Total capital	\$ 198,001	\$ 196,680

(1) Represents loss on structured liabilities, net-of-tax, that is excluded from Tier 1 common capital, Tier 1 capital and Total capital for regulatory capital purposes.

Table of Contents

Regulatory Capital Changes

Market Risk Final Rule

At September 30, 2013, we measured and reported our capital ratios and related information in accordance with the Basel 1 – 2013 Rules, which introduced new measures of market risk including a charge related to stressed Value-at-Risk (VaR), an incremental risk charge and the comprehensive risk measure (CRM), as well as other technical modifications, all of which were effective January 1, 2013. The CRM is used to determine the risk-weighted assets for correlation trading positions. With approval from U.S. banking regulators, but not sooner than one year following compliance with the Market Risk Final Rule, we may remove a surcharge applicable to the CRM. This benefit is not yet included in our reported results. The implementation of the Basel 1 – 2013 Rules was the primary driver of the changes in total risk-weighted assets, and the Tier 1, Tier 1 common and Total capital ratios from December 31, 2012. We manage regulatory capital to adhere to internal capital guidelines and regulatory standards of capital adequacy based on our current understanding of the rules and the application of such rules to our business as currently conducted.

Basel 3 Regulatory Capital Rules

In July 2013, U.S. banking regulators approved the final Basel 3 Regulatory Capital rules (Basel 3) which will be effective January 1, 2014. Various aspects of Basel 3 will be subject to multi-year transition periods ending December 31, 2018 and Basel 3 generally continues to be subject to interpretation by the U.S. banking regulators. Basel 3 will materially change our Tier 1 common, Tier 1 and Total capital calculations. Basel 3 introduces new minimum capital ratios and buffer requirements, proposes a supplementary leverage ratio, changes the composition of regulatory capital, revises the adequately capitalized minimum requirements under the Prompt Corrective Action framework, expands and modifies the calculation of risk-weighted assets for credit and market risk (the Advanced Approach), and introduces a Standardized Approach for the calculation of risk-weighted assets. This will replace the Basel 1 – 2013 Rules effective January 1, 2015. For more information on the Standardized Approach, see page 75.

Under Basel 3, we will be required to calculate regulatory capital ratios and risk-weighted assets under both the Standardized Approach and, upon formal notification of approval by U.S. banking regulators anytime on or after January 1, 2014, the Advanced Approach. From January 1, 2014 through December 31, 2014, the Standardized Approach measures risk-weighted assets under the Basel 1 – 2013 Rules and uses Basel 3 capital in the determination of the Basel 3 Standardized Approach capital ratios. For more information on the Standardized Approach, see Table 19 and page 75. The approach that yields the lower ratio is to be used to assess capital adequacy including under the Prompt Corrective Action framework. Prior to receipt of formal notification of approval, we are required to assess our capital adequacy under the Standardized Approach only. The Prompt Corrective Action framework establishes categories of capitalization, including “well capitalized,” based on regulatory ratio requirements. U.S. banking regulators are required to take certain mandatory actions depending on the category of capitalization, with no mandatory actions required for “well-capitalized” banking entities. While we continue to evaluate the impact of both the Standardized and Advanced Approaches, we generally expect that initially the Standardized Approach will yield the lower ratios.

In 2011, the Basel Committee issued proposed guidance on capital requirements for global systemically important financial institutions, including the methodology for measuring systemic importance, the additional capital required (the SIFI buffer), and the arrangements by which the guidance will be phased in (the 2011 G-SIFI Proposal). Under this proposal, the SIFI buffer would increase minimum capital requirements for Tier 1 common capital from one percent to 2.5 percent, and in certain circumstances, 3.5 percent. As of September 30, 2013, we estimate our SIFI buffer would be 1.5 percent, in line with the Financial Stability Board’s report, “Update of Group of Global Systemically Important Banks,” issued on November 1, 2012 and based on the 2011 G-SIFI Proposal. Subsequently, in

July 2013, the Basel Committee issued a new proposal that updates and replaces the 2011 G-SIFI Proposal. This new proposal modifies and recalibrates the assessment methodology and introduces public disclosure requirements. U.S. banking regulators have not yet issued proposed or final rules related to the SIFI buffer or disclosure requirements.

Regulatory Capital Adjustments and Deductions

Important differences in determining the composition of regulatory capital between Basel 1 – 2013 Rules and Basel 3 include changes in capital deductions related to our MSRs, deferred tax assets and defined benefit pension assets, and the inclusion of unrealized gains and losses on AFS debt and certain marketable equity securities recorded in accumulated OCI, each of which will be impacted by future changes in interest rates, overall earnings performance or other corporate actions.

Changes to the composition of regulatory capital under Basel 3, such as recognizing the impact of unrealized gains or losses on AFS debt securities on Tier 1 common capital, are subject to a transition period where the impact is recognized in 20 percent annual increments. The transition period for these regulatory capital adjustments and deductions extends from the effective date through December 31, 2017. The phase-in period for the new minimum capital ratio requirements and related buffers under Basel 3 will occur from January 1, 2014 through December 31, 2018. When presented on a fully phased-in basis, the capital ratio, capital and risk-weighted assets assume all

Table of Contents

regulatory capital adjustments and deductions are fully recognized. Table 19 summarizes how certain regulatory capital deductions and adjustments will be transitioned from 2014 through 2018 for Tier 1 common and Tier 1 capital.

Table 19

Summary of Basel 3 Regulatory Capital Transition Provisions

Beginning on January 1 of each year	2014	2015	2016	2017	2018
Tier 1 common capital					
Percent of total amount deducted from Tier 1 common capital includes:	20%	40%	60%	80%	100%
Deferred tax assets arising from net operating loss and tax credit carryforwards; intangibles, other than mortgage servicing rights and goodwill; defined benefit pension fund net assets; net gains (losses) related to changes in own credit risk on liabilities, including derivatives, measured at fair value; direct and indirect investments in own Tier 1 common capital instruments; amount exceeding 10 percent and 15 percent thresholds					
Percent of total amount used to adjust Tier 1 common capital includes ⁽¹⁾ :	80%	60%	40%	20%	0%
Net unrealized gains (losses) on AFS debt and certain marketable equity securities recorded in accumulated OCI; employee benefit plan adjustments recorded in accumulated OCI					
Tier 1 capital					
Percent of total amount deducted from Tier 1 capital includes:	80%	60%	40%	20%	0%
Deferred tax assets arising from net operating loss and tax credit carryforwards; defined benefit pension fund net assets; net gains (losses) related to changes in own credit risk on liabilities, including derivatives, measured at fair value					

⁽¹⁾Represents the phase-out percentage of the exclusion by year.

In addition, Basel 3 revised the regulatory capital treatment for Trust Securities, requiring that Trust Securities be: (1) partially transitioned from Tier 1 capital into Tier 2 capital in 2014 and 2015, until fully excluded from Tier 1 capital in 2016; and (2) partially transitioned and excluded from Tier 2 capital beginning in 2016. The exclusion from Tier 2 capital starts at 40 percent on January 1, 2016, increasing 10 percent each year until the full amount of Trust Securities is excluded from Tier 2 capital beginning on January 1, 2022. Our previously issued and outstanding Trust Securities in the aggregate qualifying amount of \$5.8 billion (approximately 45 bps of Tier 1 capital) at September 30, 2013 will no longer qualify as Tier 1 capital or Tier 2 capital beginning in 2016.

Standardized Approach

The Basel 3 Standardized Approach measures risk-weighted assets primarily for market risk and credit risk exposures. Exposures subject to market risk, as defined under the rules, are measured on the same basis as the Market Risk Final Rule, described previously. Credit risk exposures are measured by applying fixed risk weights to the exposure, determined based on the characteristics of the exposure, such as type of obligor, Organization for Economic Cooperation and Development (OECD) country risk code and maturity, among others. Under the Standardized Approach, no distinction is made for variations in credit quality for corporate exposures, and the economic benefit of collateral is restricted to a limited list of eligible securities and cash. Some key differences between the Standardized and Advanced Approaches are that the Advanced Approach includes a measure of operational risk and a credit valuation adjustment (CVA) capital charge in credit risk and relies on internal analytical models to measure credit risk-weighted assets, as more fully described below. Under the Basel 3 Standardized Approach, we estimate our Tier 1 common capital ratio, on a fully phased-in basis, to be just above nine percent at September 30, 2013.

Advanced Approach

Under the Basel 3 Advanced Approach, risk-weighted assets are determined primarily for market risk, credit risk and operational risk. Market risk capital measurements are consistent with the Standardized Approach, except for securitization exposures, where the Supervisory Formula Approach is also permitted, and certain differences arising

from the inclusion of the CVA capital charge in the credit risk capital measurement. Credit risk exposures are measured using advanced internal ratings-based models to determine the applicable risk weight by estimating the probability of default, loss-given default (LGD) and, in certain instances, exposure at default (EAD). The analytical models primarily rely on internal historical default and loss experience. Operational risk is measured using advanced internal models which rely on both internal and external operational loss experience and data. The Basel 3 Advanced Approach requires approval by the U.S. regulatory agencies of our internal analytical models used to calculate risk-weighted assets. If these models are not approved, it would likely lead to an increase in our risk-weighted assets, which in some cases could be significant.

Prior to calculating and assessing capital adequacy and reporting regulatory capital ratios using Basel 3 Advanced Approach risk-weighted assets, we must receive formal notification of approval to do so from the U.S banking regulators. Under the Basel 3 Advanced Approach, we estimated our Tier 1 common capital ratio, on a fully phased-in basis, to be 9.94 percent at September 30, 2013. As of September 30, 2013, we estimated that our Tier 1 common capital would be \$131.8 billion and total risk-weighted assets would be \$1,327 billion, on a fully phased-in basis. This assumes approval by U.S. banking regulators of our internal analytical models, but does not

Table of Contents

include the benefit of the removal of the surcharge applicable to the CRM. The calculations under Basel 3 require management to make estimates, assumptions and interpretations, including the probability of future events based on historical experience. Realized results could differ from those estimates and assumptions.

Basel 3 regulatory capital metrics are considered non-GAAP financial measures until January 1, 2014 when they are fully adopted and required by U.S. banking regulators. Table 20 presents a reconciliation of our Tier 1 common capital and risk-weighted assets in accordance with the Basel 1 – 2013 Rules to our Basel 3 fully phased-in estimates at September 30, 2013 and Basel 1 to Basel 3 fully phased-in estimates at December 31, 2012. Our estimates under the Basel 3 Advanced Approach may be refined over time as a result of further rulemaking or clarification by U.S. banking regulators or as our understanding and interpretation of the rules evolve.

Table 20

Basel 1 to Basel 3 (fully phased-in) Reconciliation ⁽¹⁾

(Dollars in millions)	September 30 2013	December 31 2012	
Regulatory capital – Basel 1 to Basel 3 (fully phased-in)			
Basel 1 Tier 1 capital	\$ 159,008	\$ 155,461	
Deduction of qualifying preferred stock and trust preferred securities	(16,183)	(22,058)	
Basel 1 Tier 1 common capital	142,825	133,403	
Deduction of defined benefit pension assets	(935)	(737)	
Deferred tax assets and threshold deductions (deferred tax asset temporary differences, MSRs and significant investments)	(4,758)	(3,020)	
Other deductions, net	(5,319)	(1,020)	
Basel 3 Advanced Approach (fully phased-in) Tier 1 common capital	\$ 131,813	\$ 128,626	
Risk-weighted assets – Basel 1 to Basel 3 (fully phased-in)			
Basel 1 risk-weighted assets	\$ 1,289,444	\$ 1,205,976	
Credit and other risk-weighted assets	37,140	103,085	
Increase due to Market Risk Final Rule ⁽²⁾	—	81,811	
Basel 3 Advanced Approach (fully phased-in) risk-weighted assets	\$ 1,326,584	\$ 1,390,872	
Tier 1 common capital ratios			
Basel 1	11.08	% 11.06	%
Basel 3 Advanced Approach (fully phased-in)	9.94	9.25	

⁽¹⁾ Includes the Market Risk Final Rule at September 30, 2013. Basel 1 did not include the Market Risk Final Rule at December 31, 2012.

Excludes the benefit of certain hedges at December 31, 2012. Including these hedges, the increase due to the

⁽²⁾ Market Risk Final Rule would have been \$78.8 billion. For additional information, see Capital Management – Capital Composition and Ratios on page 72.

In Table 20, the other deductions, net at September 30, 2013 of \$5.3 billion included net unrealized losses in accumulated OCI on AFS debt and marketable equity securities and employee benefit plans. The change of \$4.3 billion in other deductions, net from December 31, 2012 to September 30, 2013 was primarily driven by net unrealized losses in accumulated OCI on AFS debt securities, partially offset by net unrealized gains in accumulated OCI on employee benefit plans. We merged certain pension plans into the Bank of America Pension Plan during the third quarter of 2013, which required a remeasurement of the qualified pension obligations and plan assets at fair value as of the merger date. The remeasurement, which was accelerated from the required December 31 remeasurement, resulted in an increase in accumulated OCI of \$1.4 billion which benefited our Tier 1 common capital under Basel 3. For more information on the plan merger, see Note 15 – Pension, Postretirement and Certain

Compensation Plans to the Consolidated Financial Statements.

76

Table of Contents

Supplementary Leverage Ratio

Basel 3 also will require us to calculate a supplementary leverage ratio, determined by dividing Tier 1 capital by total leverage exposure for each month-end during the quarter, and then calculating the simple average for the quarter. Total leverage exposure is comprised of all on-balance sheet assets, plus a measure of certain off-balance sheet exposures, including, among others, lending commitments, letters of credit, over-the-counter (OTC) derivatives, repo-style transactions and margin loans. The minimum supplementary leverage ratio requirement of three percent is not effective until January 1, 2018. We will be required to disclose our supplementary leverage ratio effective January 1, 2015.

In July 2013, U.S. banking regulators issued a NPR to modify the supplementary leverage ratio minimum requirements under Basel 3 effective in 2018. This proposal would only be applicable to BHCs with more than \$700 billion in total assets or more than \$10 trillion in total assets under custody. If adopted, it would require the Corporation to maintain a minimum supplementary leverage ratio of three percent, plus a supplementary leverage buffer of two percent, for a total of five percent. If the Corporation's supplementary leverage buffer is not greater than or equal to two percent, then the Corporation would be subject to mandatory limits on its ability to make distributions of capital to shareholders, whether through dividends, stock repurchases or otherwise. In addition, the insured depository institutions of such BHCs, which for the Corporation would include primarily BANA and FIA, would be required to maintain a minimum six percent leverage ratio to be considered "well capitalized." As of September 30, 2013, we estimate the Corporation's supplementary leverage ratio to be in excess of five percent based on these proposed requirements, and our primary bank subsidiaries, BANA and FIA, to be in excess of the six percent minimum proposed requirement. The proposal is not yet final and, when finalized, could have provisions significantly different from those currently proposed. The provisions of the NPR on the supplementary leverage ratio, if finalized as currently proposed, could have an impact on certain of our businesses. We continue to evaluate the impact of the proposed NPR on us.

In June 2013, the Basel Committee issued a consultative document proposing changes to the method of calculating total leverage exposure. Under this proposal the total leverage exposure would increase, primarily due to the inclusion of repo-style transactions, OTC and centrally-cleared derivatives on a gross basis and a change to measure written credit derivative exposure using a notional-based approach with only limited netting permitted. U.S. banking regulators are not expected to issue any proposed rulemaking until after the Basel Committee issues a final rule.

Additional Proposals

On December 20, 2011, the Federal Reserve issued proposed rules to implement enhanced supervisory and prudential requirements, and the early remediation requirements established under the Financial Reform Act. The enhanced standards include liquidity standards, requirements for overall risk management, single-counterparty credit limits, stress test requirements and a debt-to-equity limit for certain companies determined to pose a threat to financial stability. The final rules, when adopted and fully implemented, are likely to influence our regulatory capital and liquidity planning process, and may impose additional operational and compliance costs on us.

For more information regarding Basel 3 and other proposed regulatory capital changes, see Note 17 – Regulatory Requirements and Restrictions to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Bank of America, N.A.	9.25	125,825	68,050	8.59	118,431	68,957
FIA Card Services, N.A.	11.83	18,711	7,908	13.67	22,061	8,067

BANA regulatory capital information included the Basel 1 – 2013 Rules at September 30, 2013. At December 31, ⁽¹⁾ 2012, BANA regulatory capital information did not include the Basel 1 – 2013 Rules. FIA is not impacted by the Basel 1 – 2013 Rules.

⁽²⁾ Dollar amount required to meet guidelines for well-capitalized institutions.

BANA's Tier 1 capital ratio decreased two bps to 12.42 percent and the Total capital ratio decreased 79 bps to 13.97 percent at September 30, 2013 compared to December 31, 2012. The Tier 1 leverage ratio increased 66 bps to 9.25 percent at September 30, 2013 compared to December 31, 2012. The decrease in the Tier 1 capital ratio was driven by an increase in risk-weighted assets of \$61.6 billion compared to December 31, 2012, returns of capital and dividends paid to the Corporation of \$2.0 billion and \$7.2 billion for the three and nine months ended September 30, 2013, partially offset by earnings eligible to be included in capital of \$3.9 billion and \$12.9 billion. The decrease in the Total capital ratio was driven by the same factors as discussed for the Tier 1 capital ratio as well as a \$2.0 billion and \$6.9 billion decrease in qualifying subordinated debt for the three and nine months ended September 30, 2013. The increase in the Tier 1 leverage ratio was driven by an increase in Tier 1 capital and a decrease in adjusted quarterly average total assets of \$18.2 billion. The increase in risk-weighted assets was primarily due to the impact of implementing the Basel 1 – 2013 Rules and an increase in loans.

FIA's Tier 1 capital ratio decreased 163 bps to 15.71 percent and the Total capital ratio decreased 164 bps to 17.00 percent at September 30, 2013 compared to December 31, 2012. The Tier 1 leverage ratio decreased 184 bps to 11.83 percent at September 30, 2013 compared to December 31, 2012. The decrease in the Tier 1 capital and Total capital ratios was driven by returns of capital of \$2.6 billion and \$6.5 billion to the Corporation, partially offset by earnings eligible to be included in capital of \$1.1 billion and \$3.0 billion for the three and nine months ended September 30, 2013 and a decrease in risk-weighted assets of \$8.1 billion compared to December 31, 2012, primarily due to a decrease in loans. The decrease in the Tier 1 leverage ratio was driven by the decrease in Tier 1 capital, partially offset by a decrease in adjusted quarterly average total assets of \$3.2 billion. FIA was not impacted by the implementation of the Basel 1 – 2013 Rules.

Broker/Dealer Regulatory Capital

The Corporation's principal U.S. broker/dealer subsidiaries are Merrill Lynch, Pierce, Fenner & Smith (MLPF&S) and Merrill Lynch Professional Clearing Corp (MLPCC). MLPCC is a fully-guaranteed subsidiary of MLPF&S and provides clearing and settlement services. Both entities are subject to the net capital requirements of Securities and Exchange Commission (SEC) Rule 15c3-1. Both entities are also registered as futures commission merchants and are subject to the Commodity Futures Trading Commission Regulation 1.17.

MLPF&S has elected to compute the minimum capital requirement in accordance with the Alternative Net Capital Requirement as permitted by SEC Rule 15c3-1. At September 30, 2013, MLPF&S's regulatory net capital as defined by Rule 15c3-1 was \$12.0 billion and exceeded the minimum requirement of \$901 million by \$11.1 billion. MLPCC's net capital of \$1.9 billion exceeded the minimum requirement of \$328 million by \$1.6 billion. In accordance with the Alternative Net Capital Requirements, MLPF&S is required to maintain tentative net capital in excess of \$1.0 billion, net capital in excess of \$500 million and notify the SEC in the event its tentative net capital is less than \$5.0 billion. At September 30, 2013, MLPF&S had tentative net capital and net capital in excess of the minimum and notification requirements.

Table of Contents

Common and Preferred Stock Dividends

For a summary of our declared quarterly cash dividends on common stock during the third quarter of 2013 and through October 30, 2013, see Note 12 – Shareholders' Equity to the Consolidated Financial Statements.

Table 22 is a summary of our cash dividend declarations on preferred stock during the third quarter of 2013 and through October 30, 2013. During the third quarter of 2013, preferred dividends were \$279 million, including \$255 million in dividends declared during the third quarter plus approximately \$24 million, representing the difference between the redemption price at par and the carrying value of securities redeemed in the third quarter. For more information on preferred stock, see Note 14 – Shareholders' Equity to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Liquidity Risk

Funding and Liquidity Risk Management

We define liquidity risk as the potential inability to meet our contractual and contingent financial obligations, on- or off-balance sheet, as they come due. Our primary liquidity objective is to provide adequate funding for our businesses throughout market cycles, including periods of financial stress. To achieve that objective, we analyze and monitor our liquidity risk, maintain excess liquidity and access diverse funding sources including our stable deposit base. We define excess liquidity as readily available assets, limited to cash and high-quality, liquid, unencumbered securities that we can use to meet our funding requirements as those obligations arise.

Global funding and liquidity risk management activities are centralized within Corporate Treasury. We believe that a centralized approach to funding and liquidity risk management enhances our ability to monitor liquidity requirements, maximizes access to funding sources, minimizes borrowing costs and facilitates timely responses to liquidity events. For more information regarding global funding and liquidity risk management, see Liquidity Risk – Funding and Liquidity Risk Management on page 75 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Global Excess Liquidity Sources and Other Unencumbered Assets

We maintain excess liquidity available to Bank of America Corporation, or the parent company and selected subsidiaries in the form of cash and high-quality, liquid, unencumbered securities. These assets, which we call our Global Excess Liquidity Sources, serve as our primary means of liquidity risk mitigation. Our cash is primarily on deposit with the Federal Reserve and central banks outside of the U.S. We limit the composition of high-quality, liquid, unencumbered securities to U.S. government securities, U.S. agency securities, U.S. agency MBS and a select group of non-U.S. government and supranational securities. We believe we can quickly obtain cash for these

securities, even in stressed market conditions, through repurchase agreements or outright sales. We hold our Global Excess Liquidity Sources in entities that allow us to meet the liquidity requirements of our global businesses, and we consider the impact of potential regulatory, tax, legal and other restrictions that could limit the transferability of funds among entities.

Table of Contents

Our Global Excess Liquidity Sources were \$359 billion and \$372 billion at September 30, 2013 and December 31, 2012 and were maintained as presented in Table 23.

Table 23

Global Excess Liquidity Sources

(Dollars in billions)	September 30 2013	December 31 2012	Average for Three Months Ended September 30, 2013
Parent company	\$ 95	\$ 103	\$90
Bank subsidiaries	236	247	236
Broker/dealers	28	22	28
Total global excess liquidity sources	\$ 359	\$ 372	\$354

Beginning in third quarter of 2013, certain amounts required to collateralize affiliate transactions with our U.S. banks were excluded from parent company liquidity and included in bank liquidity. This change did not have an impact on the Corporation's total Global Excess Liquidity Sources or Time to Required Funding. For further details on Time to Required Funding, see page 82. As shown in Table 23, parent company Global Excess Liquidity Sources totaled \$95 billion and \$103 billion at September 30, 2013 and December 31, 2012. The decrease in parent company liquidity was primarily due to debt maturities and capital actions, partially offset by capital repayments from subsidiaries and debt issuances. Typically, parent company cash is deposited overnight with BANA.

Global Excess Liquidity Sources available to our bank subsidiaries totaled \$236 billion and \$247 billion at September 30, 2013 and December 31, 2012. The decrease in bank subsidiaries' liquidity was primarily due to loan growth and a decrease in the fair value of debt securities, partially offset by an increase in short-term borrowings and deposit growth. Liquidity amounts are distinct from the cash deposited by the parent company. In addition to their Global Excess Liquidity Sources, our bank subsidiaries hold other unencumbered investment-grade securities that we believe could also be used to generate liquidity. Our bank subsidiaries can also generate incremental liquidity by pledging a range of other unencumbered loans and securities to certain FHLBs and the Federal Reserve Discount Window. The cash we could have obtained by borrowing against this pool of specifically-identified eligible assets was approximately \$212 billion and \$194 billion at September 30, 2013 and December 31, 2012. We have established operational procedures to enable us to borrow against these assets, including regularly monitoring our total pool of eligible loans and securities collateral. Eligibility is defined by guidelines outlined by the FHLBs and the Federal Reserve and is subject to change at their discretion. Due to regulatory restrictions, liquidity generated by the bank subsidiaries can only be used to fund obligations within the bank subsidiaries and can only be transferred to the parent company or nonbank subsidiaries with prior regulatory approval.

Global Excess Liquidity Sources available to our broker/dealer subsidiaries totaled \$28 billion and \$22 billion at September 30, 2013 and December 31, 2012. Our broker/dealers also held other unencumbered investment-grade securities and equities that we believe could be used to generate additional liquidity. Liquidity held in a broker/dealer subsidiary is available to meet the obligations of that entity and can only be transferred to the parent company or to any other subsidiary with prior regulatory approval due to regulatory restrictions and minimum requirements.

Table 24 presents the composition of Global Excess Liquidity Sources at September 30, 2013 and December 31, 2012.

Table 24

Global Excess Liquidity Sources Composition

(Dollars in billions)

	September 30 2013	December 31 2012
Cash on deposit	\$ 76	\$ 65
U.S. Treasuries	10	21
U.S. agency securities and mortgage-backed securities	255	271
Non-U.S. government and supranational securities	18	15
Total global excess liquidity sources	\$ 359	\$ 372

81

Table of Contents

Time to Required Funding and Stress Modeling

We use a variety of metrics to determine the appropriate amounts of excess liquidity to maintain at the parent company and our bank and broker/dealer subsidiaries. One metric we use to evaluate the appropriate level of excess liquidity at the parent company is "Time to Required Funding." This debt coverage measure indicates the number of months that the parent company can continue to meet its unsecured contractual obligations as they come due using only its Global Excess Liquidity Sources without issuing any new debt or accessing any additional liquidity sources. We define unsecured contractual obligations for purposes of this metric as maturities of senior or subordinated debt issued or guaranteed by Bank of America Corporation or Merrill Lynch. These include certain unsecured debt instruments, primarily structured liabilities, which we may be required to settle for cash prior to maturity. Our Time to Required Funding was 35 months at September 30, 2013, which is above the Corporation's target minimum of 21 months. For purposes of calculating Time to Required Funding, at September 30, 2013, we have included in the amount of unsecured contractual obligations the \$8.6 billion liability related to the BNY Mellon Settlement. The BNY Mellon Settlement is subject to final court approval and certain other conditions, and the timing of payment is not certain. The merger of Merrill Lynch & Co., Inc. into Bank of America Corporation on October 1, 2013 had no impact on the unsecured contractual obligations included in this metric.

We utilize liquidity stress models to assist us in determining the appropriate amounts of excess liquidity to maintain at the parent company and our bank and broker/dealer subsidiaries. These models are risk sensitive and have become increasingly important in analyzing our potential contractual and contingent cash outflows beyond those outflows considered in the Time to Required Funding analysis. We evaluate the liquidity requirements under a range of scenarios with varying levels of severity and time horizons. The scenarios we consider and utilize incorporate market-wide and Corporation-specific events, including potential credit rating downgrades for the parent company and our subsidiaries, and are based on historical experience, regulatory guidance, and both expected and unexpected future events.

The types of potential contractual and contingent cash outflows we consider in our scenarios may include, but are not limited to, upcoming contractual maturities of unsecured debt and reductions in new debt issuance; diminished access to secured financing markets; potential deposit withdrawals; increased draws on loan commitments, liquidity facilities and letters of credit, including Variable Rate Demand Notes; additional collateral that counterparties could call if our credit ratings were downgraded; collateral and margin requirements arising from market value changes; and potential liquidity required to maintain businesses and finance customer activities. Changes in certain market factors, including, but not limited to, credit rating downgrades, could negatively impact potential contractual and contingent outflows and the related financial instruments, and in some cases these impacts could be material to our financial results.

We consider all sources of funds that we could access during each stress scenario and focus particularly on matching available sources with corresponding liquidity requirements by legal entity. We also use the stress modeling results to manage our asset-liability profile and establish limits and guidelines on certain funding sources and businesses.

Basel 3 Liquidity Standards

The Basel Committee has issued two liquidity risk-related standards that are considered part of the Basel 3 liquidity standards: the LCR and the NSFR. The LCR is calculated as the amount of a financial institution's unencumbered, high-quality, liquid assets relative to the net cash outflows the institution could encounter under a 30-day period of significant liquidity stress, expressed as a percentage. The Basel Committee's liquidity risk-related standards do not directly apply to U.S. financial institutions currently, and would only apply once U.S. rules are finalized by the U.S. banking regulators.

On October 24, 2013, the U.S. banking regulators jointly proposed regulations that would implement LCR requirements for the largest U.S. financial institutions on a consolidated basis and for their subsidiary depository institutions with total assets greater than \$10 billion. Under the proposal, an initial minimum LCR requirement of 80 percent would be required in January 2015, and would thereafter increase in 10 percentage point increments annually through January 2017. These minimum requirements would be applicable to the Corporation on a consolidated basis and at our insured depository institutions, including BANA, FIA and Bank of America California, N.A. We are currently evaluating the proposal and its potential impact on our businesses; however, we expect to meet or exceed the final LCR requirement within the regulatory timelines.

The NSFR measures the amount of a financial institution's longer-term, stable sources of funding relative to the liquidity profiles of the assets funded, as well as the potential for contingent calls on funding liquidity arising from off-balance sheet commitments and obligations over a one-year period. The Basel Committee is currently reviewing the NSFR requirement and announced that it intends to implement the requirement by January 2018, following an observation period that is currently underway. We continue to monitor the development and the potential impact of the NSFR. Assuming adoption by U.S. banking regulators, we expect to meet the final NSFR requirement within the regulatory timelines.

Table of Contents

Diversified Funding Sources

We fund our assets primarily with a mix of deposits and secured and unsecured liabilities through a centralized, globally coordinated funding strategy. We diversify our funding globally across products, programs, markets, currencies and investor groups.

The primary benefits expected from our centralized funding strategy include greater control, reduced funding costs, wider name recognition by investors and greater flexibility to meet the variable funding requirements of subsidiaries. Where regulations, time zone differences or other business considerations make parent company funding impractical, certain other subsidiaries may issue their own debt.

We fund a substantial portion of our lending activities through our deposits, which were \$1.11 trillion at both September 30, 2013 and December 31, 2012. Deposits are primarily generated by our CBB, GWIM and Global Banking segments. These deposits are diversified by clients, product type and geography, and the majority of our U.S. deposits are insured by the FDIC. We consider a substantial portion of our deposits to be a stable, low-cost and consistent source of funding. We believe this deposit funding is generally less sensitive to interest rate changes, market volatility or changes in our credit ratings than wholesale funding sources. Our lending activities may also be financed through secured borrowings, including securitizations with GSEs, the FHA and private-label investors, as well as FHLB loans.

Our trading activities in broker/dealer subsidiaries are primarily funded on a secured basis through securities lending and repurchase agreements and these amounts will vary based on customer activity and market conditions. We believe funding these activities in the secured financing markets is more cost-efficient and less sensitive to changes in our credit ratings than unsecured financing. Repurchase agreements are generally short-term and often overnight. Disruptions in secured financing markets for financial institutions have occurred in prior market cycles which resulted in adverse changes in terms or significant reductions in the availability of such financing. We manage the liquidity risks arising from secured funding by sourcing funding globally from a diverse group of counterparties, providing a range of securities collateral and pursuing longer durations, when appropriate.

We issue the majority of our long-term unsecured debt at the parent company. During the three and nine months ended September 30, 2013, we issued \$6.4 billion and \$22.5 billion of long-term unsecured debt, including structured liabilities of \$2.5 billion and \$5.7 billion. We may also issue long-term unsecured debt through BANA in a variety of maturities and currencies to achieve cost-efficient funding and to maintain an appropriate maturity profile, although there were no new issuances through BANA during the nine months ended September 30, 2013. While the cost and availability of unsecured funding may be negatively impacted by general market conditions or by matters specific to the financial services industry or the Corporation, we seek to mitigate refinancing risk by actively managing the amount of our borrowings that we anticipate will mature within any month or quarter.

On October 17, 2013, we announced a \$4.0 billion cash tender offer for certain senior notes maturing in 2014. As of the October 30, 2013 early tender deadline, more than \$4.0 billion in senior notes had been tendered. In addition, we issued \$2.5 billion of 2.6% notes due January 2019 and \$500 million of floating-rate notes due January 2019. During the three months ended September 30, 2013, we paid \$5.0 billion for certain senior notes maturing in 2014. In addition, we issued \$2.0 billion of 4.1% notes due July 2023 and €1.5 billion of 2.5% notes due July 2020. Substantially all of this newly issued fixed-rate debt has been converted to floating-rate debt with derivative transactions.

Table 25 presents the carrying value of aggregate annual contractual maturities of long-term debt at September 30, 2013.

Table 25

Long-term Debt By Maturity

(Dollars in millions)

	2013	2014	2015	2016	2017	Thereafter	Total
Bank of America Corporation	\$1,208	\$17,359	\$17,579	\$22,613	\$19,631	\$57,332	\$135,722
Merrill Lynch & Co., Inc. ⁽¹⁾	4,483	16,917	3,794	2,867	5,683	26,284	60,028

Other debt	1,825	1,469	1,521	1,478	17	449	6,759
Total long-term debt excluding consolidated VIEs	8,002	39,639	24,967	29,974	33,873	94,395	230,850
Long-term debt of consolidated VIEs	3,836	9,732	1,313	1,872	1,583	6,145	24,481
Total long-term debt	\$11,838	\$49,371	\$26,280	\$31,846	\$35,456	\$100,540	\$255,331

⁽¹⁾ On October 1, 2013, the merger of Merrill Lynch & Co., Inc. into Bank of America Corporation was completed. Effective with this merger, Bank of America Corporation assumed outstanding Merrill Lynch & Co., Inc. debt.

Table of Contents

Table 26 presents our long-term debt by major currency at September 30, 2013 and December 31, 2012.

Table 26

Long-term Debt By Major Currency

(Dollars in millions)	September 30 2013	December 31 2012
U.S. Dollar	\$ 176,530	\$ 180,329
Euro	49,778	58,985
Japanese Yen	10,072	12,749
British Pound	9,255	11,126
Canadian Dollar	3,026	3,560
Australian Dollar	1,970	2,760
Swiss Franc	1,576	1,917
Other	3,124	4,159
Total long-term debt	\$ 255,331	\$ 275,585

Total long-term debt decreased \$20.3 billion, or seven percent, during the nine months ended September 30, 2013, primarily driven by maturities outpacing new issuances. We anticipate that debt levels will continue to decline due to maturities through the remainder of 2013, reflecting our ongoing initiative to reduce our debt balances over time. We may, from time to time, purchase outstanding debt instruments in various transactions, depending on prevailing market conditions, liquidity and other factors. In addition, our broker/dealer subsidiaries may make markets in our debt instruments to provide liquidity for investors. For more information on long-term debt funding, see Note 12 – Long-term Debt to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K and for more information regarding funding and liquidity risk management, see page 75 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

We use derivative transactions to manage the duration, interest rate and currency risks of our borrowings, considering the characteristics of the assets they are funding. For further details on our ALM activities, see Interest Rate Risk Management for Nontrading Activities on page 133.

We also diversify our unsecured funding sources by issuing various types of debt instruments including structured liabilities, which are debt obligations that pay investors returns linked to other debt or equity securities, indices, currencies or commodities. We typically hedge the returns we are obligated to pay on these liabilities with derivative positions and/or investments in the underlying instruments, so that from a funding perspective, the cost is similar to our other unsecured long-term debt. We could be required to settle certain structured liability obligations for cash or other securities prior to maturity under certain circumstances, which we consider for liquidity planning purposes. We believe, however, that a portion of such borrowings will remain outstanding beyond the earliest put or redemption date. We had outstanding structured liabilities with a carrying value of \$48.4 billion and \$51.7 billion at September 30, 2013 and December 31, 2012.

Substantially all of our senior and subordinated debt obligations contain no provisions that could trigger a requirement for an early repayment, require additional collateral support, result in changes to terms, accelerate maturity or create additional financial obligations upon an adverse change in our credit ratings, financial ratios, earnings, cash flows or stock price.

Contingency Planning

We maintain contingency funding plans that outline our potential responses to liquidity stress events at various levels of severity. These policies and plans are based on stress scenarios and include potential funding strategies and

communication and notification procedures that we would implement in the event we experienced stressed liquidity conditions. We periodically review and test the contingency funding plans to validate efficacy and assess readiness.

Our U.S. bank subsidiaries can access contingency funding through the Federal Reserve Discount Window. Certain non-U.S. subsidiaries have access to central bank facilities in the jurisdictions in which they operate. While we do not rely on these sources in our liquidity modeling, we maintain the policies, procedures and governance processes that would enable us to access these sources if necessary.

Table of Contents

Credit Ratings

Our borrowing costs and ability to raise funds are impacted by our credit ratings. In addition, credit ratings may be important to customers or counterparties when we compete in certain markets and when we seek to engage in certain transactions, including OTC derivatives. Thus, it is our objective to maintain high-quality credit ratings.

Credit ratings and outlooks are opinions expressed by rating agencies on our creditworthiness and that of our obligations or securities, including long-term debt, short-term borrowings, preferred stock and other securities, including asset securitizations. Our credit ratings are subject to ongoing review by the rating agencies which consider a number of factors, including our own financial strength, performance, prospects and operations as well as factors not under our control. The rating agencies could make adjustments to our ratings at any time and they provide no assurances that they will maintain our ratings at current levels.

Other factors that influence our credit ratings include changes to the rating agencies' methodologies for our industry or certain security types, the rating agencies' assessment of the general operating environment for financial services companies, our mortgage exposures (including litigation), our relative positions in the markets in which we compete, reputation, liquidity position, diversity of funding sources, funding costs, the level and volatility of earnings, corporate governance and risk management policies, capital position, capital management practices, and current or future regulatory and legislative initiatives.

The major rating agencies have each indicated that, as a systemically important financial institution, our credit ratings currently reflect their expectation that, if necessary, we would receive significant support from the U.S. government, and that they will continue to assess such support in the context of sovereign financial strength and regulatory and legislative developments.

On August 22, 2013, Moody's Investors Service, Inc. (Moody's) initiated a review of systemically important U.S. BHCs, including BAC, as the agency considers whether to reduce or eliminate the one to two notches of uplift for government support incorporated into its ratings for those companies. Moody's also noted that it had concurrently placed the Corporation's stand-alone ratings on review for upgrade, citing a number of positive developments at Bank of America. As a result of these two factors, the long-term debt ratings of the Corporation were placed on review direction uncertain, the Corporation's short-term credit ratings were placed on review for downgrade, and BANA's senior debt ratings were placed on review for upgrade. Moody's expects to complete its review by the end of 2013. On June 11, 2013, Standard & Poor's Ratings Services (S&P) published a report that affirmed all its current ratings for Bank of America Corporation and seven other BHCs that the agency views as having high systemic importance. That report also indicated that S&P is reconsidering, and may remove, the uplift for government support in its holding company ratings for those companies. As a result, the agency maintained its negative outlook on the Corporation's holding company ratings. S&P also maintained its negative outlook on the Corporation's operating company ratings, citing company-specific factors. On May 16, 2013, Fitch Ratings (Fitch) announced the results of its periodic review of its ratings for 12 large, complex securities trading and universal banks, including Bank of America Corporation. As part of this action, Fitch affirmed the Corporation's senior credit ratings and upgraded the rating of its stand-alone creditworthiness, as well as the ratings for its subordinated debt, trust preferred and preferred stock issuances, each by one notch.

Currently, the Corporation's long-term/short-term senior debt ratings and outlooks expressed by the rating agencies are as follows: Baa2/P-2 (review direction uncertain for long-term rating, review for downgrade for short-term rating) by Moody's, A-/A-2 (negative) by S&P, and A/F1 (stable) by Fitch. BANA's long-term/short-term senior debt ratings and outlooks are as follows: A3/P-2 (review for upgrade) by Moody's, A/A-1 (negative) by S&P, and A/F1 (stable) by Fitch. MLPF&S's long-term/short-term senior debt ratings and outlooks are A/A-1 (negative) by S&P and A/F1 (stable) by Fitch. Merrill Lynch International's long-term/short-term senior debt ratings are A/A-1 (negative) by S&P

and A/F-1 (stable) by Fitch.

A reduction in certain of our credit ratings or the ratings of certain asset-backed securitizations may have a material adverse effect on our liquidity, potential loss of access to credit markets, the related cost of funds, our businesses and on certain trading revenues, particularly in those businesses where counterparty creditworthiness is critical. In addition, under the terms of certain OTC derivative contracts and other trading agreements, in the event of downgrades of our or our rated subsidiaries' credit ratings, the counterparties to those agreements may require us to provide additional collateral, or to terminate these contracts or agreements, which could cause us to sustain losses and/or adversely impact our liquidity. If the short-term credit ratings of our parent company, bank or broker/dealer subsidiaries were downgraded by one or more levels, the potential loss of access to short-term funding sources such as repo financing and the effect on our incremental cost of funds could be material.

At September 30, 2013, if the rating agencies had downgraded their long-term senior debt ratings for the Corporation or certain subsidiaries by one incremental notch, the amount of additional collateral contractually required by derivative contracts and other trading agreements would have been approximately \$3.4 billion, including \$3.0 billion for BANA. If the rating agencies had downgraded their long-term senior debt ratings for these entities by an additional second incremental notch, approximately \$4.4 billion in additional incremental collateral, including \$300 million for BANA, would have been required.

Table of Contents

Also, if the rating agencies had downgraded their long-term senior debt ratings for the Corporation or certain subsidiaries by one incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of September 30, 2013 was \$2.3 billion, against which \$1.9 billion of collateral has been posted. If the rating agencies had downgraded their long-term senior debt ratings for the Corporation and certain subsidiaries by a second incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of September 30, 2013 was an incremental \$1.2 billion, against which \$800 million of collateral has been posted.

While certain potential impacts are contractual and quantifiable, the full scope of consequences of a credit ratings downgrade to a financial institution is inherently uncertain, as it depends upon numerous dynamic, complex and inter-related factors and assumptions, including whether any downgrade of a firm's long-term credit ratings precipitates downgrades to its short-term credit ratings, and assumptions about the potential behaviors of various customers, investors and counterparties. For more information on potential impacts of credit rating downgrades, see Liquidity Risk – Time to Required Funding and Stress Modeling on page 82.

For more information on the additional collateral and termination payments that could be required in connection with certain OTC derivative contracts and other trading agreements as a result of such a credit rating downgrade, see Note 3 – Derivatives to the Consolidated Financial Statements and Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K.

On October 15, 2013, Fitch placed its AAA long-term and F1+ short-term sovereign credit rating on the U.S. government on rating watch negative. On July 18, 2013, Moody's revised its outlook on the U.S. government to stable from negative and affirmed its Aaa long-term sovereign credit rating on the U.S. government. On June 10, 2013, S&P affirmed its AA+ long-term and A-1+ short-term sovereign credit rating on the U.S. government, as the outlook on the long-term credit rating was revised to stable from negative.

Credit Risk Management

Credit quality continued to improve during the third quarter of 2013 due in part to improving economic conditions. In addition, our proactive credit risk management activities positively impacted the credit portfolio as charge-offs and delinquencies continued to improve, primarily in the consumer portfolios and risk ratings improved in the commercial portfolios. For additional information, see Executive Summary – Third Quarter 2013 Economic and Business Environment on page 6.

We proactively refine our underwriting and credit management practices as well as credit standards to meet the changing economic environment. To actively mitigate losses and enhance customer support in our consumer businesses, we have in place collection programs and loan modification and customer assistance infrastructures. We utilize a number of actions to mitigate losses in the commercial businesses including increasing the frequency and intensity of portfolio monitoring, hedging activity and our practice of transferring management of deteriorating commercial exposures to independent special asset officers as credits enter criticized categories.

Certain European countries, including Greece, Ireland, Italy, Portugal and Spain, have experienced varying degrees of financial stress. For more information on our exposures and related risks in non-U.S. countries, see Non-U.S. Portfolio on page 119 and Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K.

For more information on our Credit Risk Management activities, see Consumer Portfolio Credit Risk Management on page 87, Commercial Portfolio Credit Risk Management on page 107, Non-U.S. Portfolio on page 119, Provision for Credit Losses and Allowance for Credit Losses both on page 123, and Note 5 – Outstanding Loans and Leases and Note 6 – Allowance for Credit Losses to the Consolidated Financial Statements.

Table of Contents

Consumer Portfolio Credit Risk Management

Credit risk management for the consumer portfolio begins with initial underwriting and continues throughout a borrower's credit cycle. Statistical techniques in conjunction with experiential judgment are used in all aspects of portfolio management including underwriting, product pricing, risk appetite, setting credit limits, and establishing operating processes and metrics to quantify and balance risks and returns. Statistical models are built using detailed behavioral information from external sources such as credit bureaus and/or internal historical experience. These models are a component of our consumer credit risk management process and are used in part to help make both new and ongoing credit decisions, as well as portfolio management strategies, including authorizations and line management, collection practices and strategies, determination of the allowance for loan and lease losses, and allocated capital for credit risk.

Since January 2008, and through the third quarter of 2013, Bank of America and Countrywide have completed approximately 1.3 million loan modifications with customers. During the third quarter of 2013, we completed more than 40,000 customer loan modifications with a total unpaid principal balance of approximately \$8 billion, including approximately 18,500 permanent modifications under the government's Making Home Affordable Program. Of the loan modifications completed during the third quarter of 2013, in terms of both the volume of modifications and the unpaid principal balance associated with the underlying loans, most were in the portfolio serviced for investors and were not on our balance sheet. The most common types of modifications include a combination of rate reduction and/or capitalization of past due amounts which represented 67 percent of the volume of modifications completed during the quarter, while principal reductions and forgiveness represented 14 percent, principal forbearance represented 11 percent and capitalization of past due amounts represented seven percent. For modified loans on our balance sheet, these modification types are generally considered TDRs. For more information on TDRs and portfolio impacts, see Consumer Portfolio Credit Risk Management – Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity on page 104 and Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements.

Consumer Credit Portfolio

Improvement in the U.S. economy, labor markets and home prices continued during the three and nine months ended September 30, 2013 resulting in lower credit losses across nearly all major consumer portfolios compared to the same periods in 2012. Although home prices have shown steady improvement since the beginning of 2012, they have not fully recovered from their 2006 levels.

Improved credit quality across the consumer portfolio drove a \$5.1 billion decrease in the consumer allowance for loan and lease losses during the nine months ended September 30, 2013. For additional information, see Allowance for Credit Losses on page 123.

In January 2013, we entered into the FNMA Settlement to resolve substantially all outstanding and potential repurchase and certain other claims relating to the origination, sale and delivery of residential mortgage loans originated and sold directly to FNMA from January 1, 2000 through December 31, 2008 by entities related to Countrywide and BANA. In connection with the FNMA Settlement, we repurchased certain loans from FNMA and, as of September 30, 2013, these loans had an unpaid principal balance of \$5.9 billion and a carrying value of \$5.0 billion of which \$5.6 billion of unpaid principal balance and \$4.7 billion of carrying value were classified as PCI loans. All of these loans are included in the Legacy Assets & Servicing portfolio in Table 30. For more information on PCI loans, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98 and Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements. For more information on the FNMA Settlement, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

For more information on our accounting policies regarding delinquencies, nonperforming status, charge-offs and TDRs for the consumer portfolio, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Table 27 presents our outstanding consumer loans, leases and the PCI loan portfolio. In addition to being included in the "Outstandings" columns in Table 27, PCI loans are also shown separately, net of purchase accounting adjustments, in the "Purchased Credit-impaired Loan Portfolio" columns. For additional information, see Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements. The impact of the PCI loan portfolio on certain credit statistics is reported where appropriate. For additional information, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98. In addition, given the continued run-off of our discontinued real estate portfolio, effective January 1, 2013, the pay option loans previously included in discontinued real estate loans are now included as part of our residential mortgage and home equity portfolios. The majority of these loans were considered credit-impaired and were written down to fair value upon acquisition. Prior periods were reclassified to conform to current period presentation. For more information on pay option loans, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Residential Mortgage Loan Portfolio on page 100.

Table 27
Consumer Loans and Leases

(Dollars in millions)	Outstandings		Purchased Credit-impaired Loan Portfolio	
	September 30 2013	December 31 2012	September 30 2013	December 31 2012
Residential mortgage ⁽¹⁾	\$253,496	\$ 252,929	\$20,064	\$ 17,451
Home equity	96,653	108,140	7,104	8,667
U.S. credit card	90,280	94,835	n/a	n/a
Non-U.S. credit card	11,083	11,697	n/a	n/a
Direct/Indirect consumer ⁽²⁾	84,035	83,205	n/a	n/a
Other consumer ⁽³⁾	1,913	1,628	n/a	n/a
Consumer loans excluding loans accounted for under the fair value option	537,460	552,434	27,168	26,118
Loans accounted for under the fair value option ⁽⁴⁾	2,186	1,005	n/a	n/a
Total consumer loans and leases	\$539,646	\$ 553,439	\$27,168	\$ 26,118

Outstandings include pay option loans of \$5.2 billion and \$6.7 billion and non-U.S. residential mortgage loans of \$87 million and \$93 million at September 30, 2013 and December 31, 2012. We no longer originate pay option loans.

Outstandings include dealer financial services loans of \$39.5 billion and \$35.9 billion, consumer lending loans of \$3.1 billion and \$4.7 billion, U.S. securities-based lending loans of \$30.4 billion and \$28.3 billion, non-U.S. consumer loans of \$5.7 billion and \$8.3 billion, student loans of \$4.3 billion and \$4.8 billion and other consumer loans of \$1.0 billion and \$1.2 billion at September 30, 2013 and December 31, 2012.

Outstandings include consumer finance loans of \$1.2 billion and \$1.4 billion, consumer leases of \$492 million and \$34 million, consumer overdrafts of \$175 million and \$177 million and other non-U.S. consumer loans of \$5 million at both September 30, 2013 and December 31, 2012.

Consumer loans accounted for under the fair value option represent residential mortgage loans at both September 30, 2013 and December 31, 2012. For more information on the fair value option, see Consumer Portfolio Credit Risk Management – Consumer Loans Accounted for Under the Fair Value Option on page 103 and Note 17 – Fair Value Option to the Consolidated Financial Statements.

n/a = not applicable

Table of Contents

Table 28 presents consumer nonperforming loans and accruing consumer loans past due 90 days or more. Nonperforming loans do not include past due consumer credit card loans, other unsecured loans and in general, consumer non-real estate-secured loans (loans discharged in Chapter 7 bankruptcy are included) as these loans are typically charged off no later than the end of the month in which the loan becomes 180 days past due. Real estate-secured past due consumer loans that are insured by the FHA or individually insured under long-term stand-by agreements with FNMA and FHLMC (collectively, the fully-insured loan portfolio) are reported as accruing as opposed to nonperforming since the principal repayment is insured. Fully-insured loans included in accruing past due 90 days or more are primarily from our repurchases of delinquent FHA loans pursuant to our servicing agreements with GNMA. Additionally, nonperforming loans and accruing balances past due 90 days or more do not include the PCI loan portfolio or loans accounted for under the fair value option even though the customer may be contractually past due.

Table 28
Consumer Credit Quality

(Dollars in millions)	Nonperforming		Accruing Past Due 90 Days or More		
	September 30 2013	December 31 2012	September 30 2013	December 31 2012	
Residential mortgage ⁽¹⁾	\$13,328	\$15,055	\$17,960	\$22,157	
Home equity	4,176	4,282	—	—	
U.S. credit card	n/a	n/a	1,049	1,437	
Non-U.S. credit card	n/a	n/a	142	212	
Direct/Indirect consumer	59	92	437	545	
Other consumer	18	2	1	2	
Total ⁽²⁾	\$17,581	\$19,431	\$19,589	\$24,353	
Consumer loans and leases as a percentage of outstanding consumer loans and leases ⁽²⁾	3.27	% 3.52	% 3.64	% 4.41	%
Consumer loans and leases as a percentage of outstanding loans and leases, excluding PCI and fully-insured loan portfolios ⁽²⁾	4.17	4.46	0.39	0.50	

Residential mortgage loans accruing past due 90 days or more are fully-insured loans. At September 30, 2013 and ⁽¹⁾ December 31, 2012, residential mortgage included \$13.9 billion and \$17.8 billion of loans on which interest has been curtailed by the FHA, and therefore are no longer accruing interest, although principal is still insured, and \$4.1 billion and \$4.4 billion of loans on which interest was still accruing.

Balances exclude consumer loans accounted for under the fair value option. At September 30, 2013 and ⁽²⁾ December 31, 2012, \$465 million and \$391 million of loans accounted for under the fair value option were past due 90 days or more and not accruing interest.

Total	\$1,527	\$3,770	\$5,744	\$10,708	1.12	2.64	1.41	2.46		

Net charge-offs exclude write-offs in the PCI loan portfolios of \$92 million and \$947 million for home equity and \$351 million and \$648 million for residential mortgage for the three and nine months ended September 30, 2013 compared to \$1.7 billion for home equity for both of the same periods in 2012. These write-offs decreased the PCI valuation allowance included as part of the allowance for loan and lease losses. For more information on PCI write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

(2) Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans and leases excluding loans accounted for under the fair value option.

Net charge-off ratios, excluding the PCI and fully-insured loan portfolios, were 0.60 percent and 0.80 percent for residential mortgage, 1.31 percent and 2.09 percent for home equity, and 1.43 percent and 1.80 percent for the total consumer portfolio for the three and nine months ended September 30, 2013, respectively. Net charge-off ratios, excluding the PCI and fully-insured loan portfolios, were 1.90 percent and 2.07 percent for residential mortgage, 6.13 percent and 4.29 percent for home equity, and 3.35 percent and 3.12 percent for the total consumer portfolio for the three and nine months ended September 30, 2012, respectively. These are the only product classifications that include PCI and fully-insured loans for these periods.

Net charge-offs exclude write-offs in the PCI loan portfolios of \$92 million and \$947 million in home equity and \$351 million and \$648 million in residential mortgage for the three and nine months ended September 30, 2013, respectively. This compared to \$1.7 billion in home equity for both of the same periods in 2012. These write-offs decreased the PCI valuation allowance included as part of the allowance for loan and lease losses. Net charge-off ratios including the PCI write-offs were 1.59 percent and 3.17 percent for home equity and 0.89 percent and 0.79 percent for residential mortgage for the three and nine months ended September 30, 2013, respectively. The net charge-off ratios including the PCI write-offs were 11.38 percent and 5.78 percent for home equity for the same periods in 2012. For more information on PCI write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

(1) Net charge-offs exclude write-offs in the PCI loan portfolios of \$92 million and \$947 million for home equity and \$351 million and \$648 million for residential mortgage for the three and nine months ended September 30, 2013, which are included in the Legacy Assets & Servicing portfolio, compared to \$1.7 billion for home equity for both of the same periods in 2012. Write-offs in the PCI loan portfolio decrease the PCI valuation allowance included as part of the allowance for loan and lease losses. For more information on PCI write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

(2) Outstandings and nonperforming amounts exclude loans accounted for under the fair value option. There were \$2.2 billion and \$1.0 billion of residential mortgage loans accounted for under the fair value option at September 30, 2013 and December 31, 2012. For more information on the fair value option, see Consumer Portfolio Credit Risk Management – Consumer Loans Accounted for Under the Fair Value Option on page 103 and Note 17 – Fair Value Option to the Consolidated Financial Statements.

Table of Contents

We believe that the presentation of information adjusted to exclude the impact of the PCI loan portfolio, the fully-insured loan portfolio and loans accounted for under the fair value option is more representative of the ongoing operations and credit quality of the business. As a result, in the following discussions of the residential mortgage and home equity portfolios, we provide information that excludes the impact of the PCI loan portfolio, the fully-insured loan portfolio and loans accounted for under the fair value option in certain credit quality statistics. We separately disclose information on the PCI loan portfolio on page 98.

Residential Mortgage

The residential mortgage portfolio makes up the largest percentage of our consumer loan portfolio at 47 percent of consumer loans and leases at September 30, 2013. Approximately 18 percent of the residential mortgage portfolio is in GWIM and represents residential mortgages that are originated for the home purchase and refinancing needs of our wealth management clients. The remaining portion of the portfolio is primarily in All Other and is comprised of originated loans, purchased loans used in our overall ALM activities, loans repurchased in connection with the FNMA Settlement, delinquent FHA loans repurchased pursuant to our servicing agreements with GNMA as well as loans repurchased related to our representations and warranties.

Outstanding balances in the residential mortgage portfolio, excluding loans accounted for under the fair value option, increased \$567 million during the nine months ended September 30, 2013 as new origination volume retained on our balance sheet, loans repurchased as part of the FNMA Settlement and transfers from the held-for-sale portfolio in connection with the decision to retain the loans were partially offset by paydowns and charge-offs.

At September 30, 2013 and December 31, 2012, the residential mortgage portfolio included \$88.9 billion and \$90.9 billion of outstanding fully-insured loans. On this portion of the residential mortgage portfolio, we are protected against principal loss as a result of either FHA insurance or long-term stand-by agreements with FNMA and FHLMC. At September 30, 2013 and December 31, 2012, \$61.3 billion and \$66.6 billion had FHA insurance with the remainder protected by long-term stand-by agreements. All of these loans are individually insured and therefore the Corporation does not record a significant allowance for credit losses with respect to these loans.

At September 30, 2013 and December 31, 2012, \$23.7 billion and \$25.5 billion of the FHA-insured loan population were repurchases of delinquent FHA loans pursuant to our servicing agreements with GNMA.

In addition to the long-term stand-by agreements with FNMA and FHLMC, we have mitigated a portion of our credit risk on the residential mortgage portfolio through the use of synthetic securitization vehicles as described in Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements. At September 30, 2013 and December 31, 2012, the synthetic securitization vehicles referenced principal balances of \$13.5 billion and \$17.6 billion of residential mortgage loans and provided loss protection up to \$376 million and \$500 million. At September 30, 2013 and December 31, 2012, the Corporation had a receivable of \$206 million and \$305 million from these vehicles for reimbursement of losses. The Corporation records an allowance for credit losses on loans referenced by the synthetic securitization vehicles. The reported net charge-offs for the residential mortgage portfolio do not include the benefit of amounts reimbursable from these vehicles. Adjusting for the benefit of the credit protection from the synthetic securitizations, the residential mortgage net charge-off ratio, excluding the PCI and fully-insured loan portfolios, for the three and nine months ended September 30, 2013 would have been reduced by one bp and three bps compared to eight bps for both of the same periods in 2012.

The long-term stand-by agreements with FNMA and FHLMC and to a lesser extent the synthetic securitizations together reduce our regulatory risk-weighted assets due to the transfer of a portion of our credit risk to unaffiliated parties. At September 30, 2013 and December 31, 2012, these programs had the cumulative effect of reducing our risk-weighted assets by \$8.2 billion and \$7.2 billion, increasing our Tier 1 capital ratio by eight bps and increasing our

Tier 1 common capital ratio by seven bps.

92

Table of Contents

Table 31 presents certain residential mortgage key credit statistics on both a reported basis excluding loans accounted for under the fair value option, and excluding the PCI loan portfolio, fully-insured loan portfolio and loans accounted for under the fair value option. Additionally, in the table below (in the "Reported Basis" columns) accruing balances past due and nonperforming loans do not include the PCI loan portfolio even though the customer may be contractually past due. We believe the presentation of information adjusted to exclude these loan portfolios is more representative of the credit risk in the residential mortgage loan portfolio. As such, the following discussion presents the residential mortgage portfolio excluding the PCI loan portfolio, the fully-insured loan portfolio and loans accounted for under the fair value option. For more information on the PCI loan portfolio, see page 98.

Table 31
Residential Mortgage – Key Credit Statistics

(Dollars in millions)	Reported Basis ⁽¹⁾		Excluding Purchased Credit-impaired and Fully-insured Loans	
	September 30 2013	December 31 2012	September 30 2013	December 31 2012

Accruing past due 30 days or more	24,239	28,815	2,442	3,117
Accruing past due 90 days or more	17,960	22,157	—	—
Nonperforming loans	13,328	15,055	13,328	15,055
Percent of portfolio				
Refreshed LTV greater than 90 but less than or equal to 100	15	% 15	% 8	% 10
Refreshed LTV greater than 100	17	28	13	20
Refreshed FICO below 620	22	23	12	14
2006 and 2007 vintages ⁽²⁾	22	25	29	34

	Reported Basis				Excluding Purchased Credit-impaired and Fully-insured Loans			
	Three Months Ended September 30		Nine Months Ended September 30		Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012	2013	2012	2013	2012
Net charge-off ratio ⁽³⁾	0.35	% 1.10	% 0.46	% 1.20	% 0.60	% 1.90	% 0.80	% 2.07

Outstandings, accruing past due, nonperforming loans and percentages of portfolio exclude loans accounted for under the fair value option. There were \$2.2 billion and \$1.0 billion of residential mortgage loans accounted for

⁽¹⁾ under the fair value option at September 30, 2013 and December 31, 2012. For more information on the fair value option, see Consumer Portfolio Credit Risk Management – Consumer Loans Accounted for Under the Fair Value Option on page 103 and Note 17 – Fair Value Option to the Consolidated Financial Statements.

These vintages of loans account for 55 percent and 61 percent of nonperforming residential mortgage loans at ⁽²⁾ September 30, 2013 and December 31, 2012, and 60 percent and 64 percent of residential mortgage net charge-offs for the three and nine months ended September 30, 2013, and 69 percent and 71 percent for the three and nine months ended September 30, 2012.

⁽³⁾

Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans excluding loans accounted for under the fair value option.

Nonperforming residential mortgage loans decreased \$1.7 billion during the nine months ended September 30, 2013 as paydowns, returns to performing status, charge-offs and transfers to foreclosed properties outpaced new inflows. Also impacting the decrease during the nine months ended September 30, 2013 were sales of nonperforming residential mortgage loans of \$799 million and \$326 million of loans that had been transferred to held-for-sale. At September 30, 2013, borrowers were current on contractual payments with respect to \$4.2 billion, or 31 percent of nonperforming residential mortgage loans, and \$6.9 billion, or 52 percent of nonperforming residential mortgage loans were 180 days or more past due and had been written down to the estimated fair value of the collateral less costs to sell. Accruing loans past due 30 days or more decreased \$675 million during the nine months ended September 30, 2013.

Net charge-offs decreased \$499 million to \$221 million for the three months ended September 30, 2013, or 0.60 percent of total average residential mortgage loans, compared to \$720 million, or 1.90 percent for the same period in 2012. Net charge-offs decreased \$1.5 billion to \$875 million for the nine months ended September 30, 2013, or 0.80 percent of total average residential mortgage loans, compared to \$2.4 billion, or 2.07 percent for the same period in 2012. These decreases in net charge-offs for the three- and nine-month periods were primarily driven by favorable portfolio trends and decreased write-downs on loans greater than 180 days past due which were written down to the estimated fair value of the collateral less costs to sell, due in part to improvement in home prices and the U.S. economy.

Table of Contents

Loans in the residential mortgage portfolio with certain characteristics have greater risk of loss than others. These characteristics include loans with a high refreshed loan-to-value (LTV), loans originated at the peak of home prices in 2006 and 2007, interest-only loans and loans to borrowers located in California and Florida where we have concentrations and where significant declines in home prices have been experienced. Although the disclosures in this section address each of these risk characteristics separately, there is significant overlap in loans with these characteristics, which contributed to a disproportionate share of the losses in the portfolio. The residential mortgage loans with all of these higher risk characteristics comprised two percent and four percent of the residential mortgage portfolio at September 30, 2013 and December 31, 2012, and accounted for six percent and 13 percent of the residential mortgage net charge-offs during the three and nine months ended September 30, 2013 compared to 21 percent for both of the same periods in 2012.

Residential mortgage loans with a greater than 90 percent but less than or equal to 100 percent refreshed LTV represented eight percent and 10 percent of the residential mortgage portfolio at September 30, 2013 and December 31, 2012. Loans with a refreshed LTV greater than 100 percent represented 13 percent and 20 percent of the residential mortgage loan portfolio at September 30, 2013 and December 31, 2012. Of the loans with a refreshed LTV greater than 100 percent, 93 percent and 92 percent were performing at September 30, 2013 and December 31, 2012. Loans with a refreshed LTV greater than 100 percent reflect loans where the outstanding carrying value of the loan is greater than the most recent valuation of the property securing the loan. The majority of these loans have a refreshed LTV greater than 100 percent primarily due to home price deterioration since 2006, somewhat mitigated by recent appreciation. Loans to borrowers with refreshed FICO scores below 620 represented 12 percent and 14 percent of the residential mortgage portfolio at September 30, 2013 and December 31, 2012.

Of the \$144.6 billion in total residential mortgage loans outstanding at both September 30, 2013 and December 31, 2012, as shown in Table 32, 40 percent were originated as interest-only loans. The outstanding balance of interest-only residential mortgage loans that have entered the amortization period was \$16.0 billion, or 28 percent at September 30, 2013. Residential mortgage loans that have entered the amortization period generally have experienced a higher rate of early stage delinquencies and nonperforming status compared to the residential mortgage portfolio as a whole. At September 30, 2013, \$325 million, or two percent of outstanding interest-only residential mortgages that had entered the amortization period were accruing past due 30 days or more compared to \$2.4 billion, or two percent of accruing past due 30 days or more for the entire residential mortgage portfolio. In addition, at September 30, 2013, \$2.8 billion, or 17 percent of outstanding interest-only residential mortgages that had entered the amortization period were nonperforming compared to \$13.3 billion, or nine percent of nonperforming loans for the entire residential mortgage portfolio. Loans in our interest-only residential mortgage portfolio have an interest-only period of three to ten years and more than 90 percent of these loans will not be required to make a fully-amortizing payment until 2015 or later.

Table of Contents

Table 32 presents outstandings, nonperforming loans and net charge-offs by certain state concentrations for the residential mortgage portfolio. The Los Angeles-Long Beach-Santa Ana Metropolitan Statistical Area (MSA) within California represented 12 percent of outstandings at both September 30, 2013 and December 31, 2012. Loans within this MSA comprised only one percent and four percent of charge-offs for the three and nine months ended September 30, 2013 and nine percent of net charge-offs for both of the same periods in 2012. In the New York area, the New York-Northern New Jersey-Long Island MSA made up 10 percent of outstandings at both September 30, 2013 and December 31, 2012. Loans within this MSA comprised 12 percent and nine percent of net charge-offs for the three and nine months ended September 30, 2013 and five percent of net charge-offs for both of the same periods in 2012.

Table 32

Residential Mortgage State Concentrations

	Outstandings ⁽¹⁾		Nonperforming ⁽¹⁾		Net Charge-offs ⁽²⁾			
	September 30 2013	December 31 2012	September 30 2013	December 31 2012	Three Months Ended September 30		Nine Months Ended September 30	
					2013	2012	2013	2012
(Dollars in millions)								
California	\$48,481	\$ 48,671	\$3,862	\$ 4,580	\$10	\$285	\$167	\$876
New York ⁽³⁾	11,818	11,290	895	972	12	18	42	59

Virginia	4,894	5,096	405	410	8	13	22	41
Other U.S./Non-U.S.	61,405	61,539	6,141	6,822	165	319	535	1,087
Residential mortgage loans ⁽⁴⁾	\$144,558	\$ 144,624	\$13,328	\$ 15,055	\$221	\$720	\$875	\$2,382
Fully-insured loan portfolio	88,874	90,854						
Purchased credit-impaired residential mortgage loan portfolio	20,064	17,451						
Total residential mortgage loan portfolio	\$253,496	\$ 252,929						

Outstandings and nonperforming amounts exclude loans accounted for under the fair value option. There were \$2.2 billion and \$1.0 billion of residential mortgage loans accounted for under the fair value option at September 30,

⁽¹⁾ 2013 and December 31, 2012. For more information on the fair value option, see Consumer Portfolio Credit Risk Management – Consumer Loans Accounted for Under the Fair Value Option on page 103 and Note 17 – Fair Value Option to the Consolidated Financial Statements.

Net charge-offs exclude \$351 million and \$648 million of write-offs in the residential mortgage PCI loan portfolio for the three and nine months ended September 30, 2013 compared to none for the same periods in 2012. These

⁽²⁾ write-offs decreased the PCI valuation allowance included as part of the allowance for loan and lease losses. For more information on PCI write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

⁽³⁾ In these states, foreclosure requires a court order following a legal proceeding (judicial states).

⁽⁴⁾ Amount excludes the PCI residential mortgage and fully-insured loan portfolios.

The Community Reinvestment Act (CRA) encourages banks to meet the credit needs of their communities for housing and other purposes, particularly in neighborhoods with low or moderate incomes. Our CRA portfolio was \$11.1 billion and \$11.3 billion at September 30, 2013 and December 31, 2012, or eight percent of the residential mortgage loan balances. The CRA portfolio included \$2.1 billion and \$2.5 billion of nonperforming loans at September 30,

2013 and December 31, 2012 representing 16 percent of total nonperforming residential mortgage loans. Net charge-offs related to the CRA portfolio were \$68 million and \$167 million for the three months ended September 30, 2013 and 2012, or 31 percent and 23 percent of total net charge-offs for the residential mortgage portfolio. Net charge-offs related to the CRA portfolio were \$216 million and \$487 million for the nine months ended September 30, 2013 and 2012, or 25 percent and 20 percent of total net charge-offs for the residential mortgage portfolio.

Home Equity

The home equity portfolio makes up 18 percent of the consumer portfolio and is comprised of HELOCs, home equity loans and reverse mortgages. At September 30, 2013, our HELOC portfolio had an outstanding balance of \$82.3 billion, or 85 percent of the total home equity portfolio. HELOCs generally have an initial draw period of 10 years. During the initial draw period, the borrowers are only required to pay the interest due on the loans on a monthly basis. After the initial draw period ends, the loans generally convert to 15-year amortizing loans.

At September 30, 2013, our home equity loan portfolio had an outstanding balance of \$12.8 billion, or 13 percent of the total home equity portfolio. Home equity loans are almost all fixed-rate loans with amortizing payment terms of 10 to 30 years and 51 percent of these loans have 25- to 30-year terms.

Table of Contents

At September 30, 2013, our reverse mortgage portfolio had an outstanding balance of \$1.5 billion, or two percent of the total home equity portfolio. We no longer originate these products.

At September 30, 2013, approximately 86 percent of the home equity portfolio was included in CRES while the remainder of the portfolio was primarily in GWIM. Outstanding balances in the home equity portfolio decreased \$11.5 billion during the nine months ended September 30, 2013 primarily due to paydowns and charge-offs outpacing new originations and draws on existing lines. Of the total home equity portfolio at September 30, 2013 and December 31, 2012, \$23.5 billion and \$24.7 billion, or 24 percent and 23 percent, were in first-lien positions (26 percent and 25 percent excluding the PCI home equity portfolio at September 30, 2013 and December 31, 2012). At September 30, 2013, outstanding balances in the home equity portfolio that were in a second-lien or more junior-lien position and where we also held the first-lien loan totaled \$19.7 billion, or 22 percent of our total home equity portfolio excluding the PCI loan portfolio.

Unused HELOCs totaled \$56.7 billion at September 30, 2013 compared to \$60.9 billion at December 31, 2012. This decrease was primarily due to customers choosing to close accounts as well as line management initiatives on deteriorating accounts, which more than offset new production. The HELOC utilization rate was 59 percent at September 30, 2013 compared to 60 percent at December 31, 2012.

Table 33 presents certain home equity portfolio key credit statistics on both a reported basis as well as excluding the PCI loan portfolio. Additionally, in the table below (in the "Reported Basis" columns) accruing balances past due 30 days or more and nonperforming loans do not include the PCI loan portfolio even though the customer may be contractually past due. We believe the presentation of information adjusted to exclude the impact of the PCI loan portfolio is more representative of the credit risk in this portfolio.

Table 33
Home Equity – Key Credit Statistics

(Dollars in millions)	Reported Basis		Excluding Purchased Credit-impaired Loans	
	September 30 2013	December 31 2012	September 30 2013	December 31 2012

2006 and 2007 vintages ⁽²⁾	48	48	45	46

	Reported Basis				Excluding Purchased Credit-impaired Loans				
	Three Months Ended		Nine Months Ended		Three Months Ended		Nine Months Ended		
	September 30 2013	2012	September 30 2013	2012	September 30 2013	2012	September 30 2013	2012	
Net charge-off ratio ⁽³⁾	1.22	% 5.55	% 1.93	% 3.88	% 1.31	% 6.13	% 2.09	% 4.29	%

⁽¹⁾ Accruing past due 30 days or more included \$159 million and \$321 million and nonperforming loans included \$493 million and \$824 million of loans where we serviced the underlying first-lien at September 30, 2013 and

December 31, 2012.

(2) These vintages of loans have higher refreshed combined LTV ratios and accounted for 50 percent and 51 percent of nonperforming home equity loans at September 30, 2013 and December 31, 2012, and accounted for 67 percent and 62 percent of net charge-offs for the three and nine months ended September 30, 2013, and 55 percent and 60 percent for the three and nine months ended September 30, 2012.

(3) Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans.

The following discussion presents the home equity portfolio excluding the PCI loan portfolio.

Nonperforming outstanding balances in the home equity portfolio decreased \$106 million during the nine months ended September 30, 2013 due to charge-offs and returns to performing status outpacing new inflows.

At September 30, 2013, on \$2.0 billion, or 49 percent of nonperforming home equity loans, the borrowers were current on contractual payments. At September 30, 2013, \$1.4 billion, or 33 percent of nonperforming home equity loans were 180 days or more past due and had been written down to the estimated fair value of the collateral less costs to sell. Outstanding balances accruing past due 30 days or more decreased \$282 million during the nine months ended September 30, 2013.

Table of Contents

In some cases, the junior-lien home equity outstanding balance that we hold is performing, but the underlying first-lien is not. For outstanding balances in the home equity portfolio on which we service the first-lien loan, we are able to track whether the first-lien loan is in default. For loans where the first-lien is serviced by a third party, we utilize credit bureau data to estimate the delinquency status of the first-lien. Given that the credit bureau database we use does not include a property address for the mortgages, we are unable to identify with certainty whether a reported delinquent first-lien mortgage pertains to the same property for which we hold a junior-lien loan. At September 30, 2013, we estimate that \$2.2 billion of current and \$348 million of 30 to 89 days past due junior-lien loans were behind a delinquent first-lien loan. We service the first-lien loans on \$544 million of these combined amounts, with the remaining \$2.0 billion serviced by third parties. Of the \$2.6 billion of current to 89 days past due junior-lien loans, based on available credit bureau data and our own internal servicing data, we estimate that approximately \$1.3 billion had first-lien loans that were 90 days or more past due.

Net charge-offs decreased \$1.3 billion to \$302 million, or 1.31 percent of the total average home equity portfolio for the three months ended September 30, 2013 compared to \$1.6 billion, or 6.13 percent for the same period in 2012. Net charge-offs decreased \$2.0 billion to \$1.5 billion, or 2.09 percent of the total average home equity portfolio for the nine months ended September 30, 2013 compared to \$3.5 billion, or 4.29 percent for the same period in 2012. These decreases in net charge-offs for the three- and nine-month periods were primarily driven by favorable portfolio trends due in part to improvement in home prices and the U.S. economy. Also, the prior-year period included charge-offs associated with the National Mortgage Settlement and loans discharged in Chapter 7 bankruptcy due to the implementation of regulatory guidance in 2012. Net charge-off ratios for the current-year periods were also impacted by lower outstanding balances primarily as a result of paydowns and charge-offs outpacing new originations and draws on existing lines. For more information on the implementation of regulatory guidance in 2012 and the National Mortgage Settlement, see Consumer Portfolio Credit Risk Management on page 80 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

There are certain characteristics of the home equity portfolio that have contributed to higher losses including those loans with a high refreshed combined loan-to-value (CLTV), loans that were originated at the peak of home prices in 2006 and 2007, and loans in geographic areas that have experienced the most significant declines in home prices. Although we have seen some recent home price appreciation, home price declines since 2006 coupled with the fact that most home equity outstandings are secured by second-lien positions have significantly reduced and, in some cases, eliminated all collateral value after consideration of the first-lien position. Although the disclosures in this section address each of these risk characteristics separately, there is significant overlap in outstanding balances with these characteristics, which has contributed to a disproportionate share of losses in the portfolio. Outstanding balances in the home equity portfolio with all of these higher risk characteristics comprised six percent and eight percent of the total home equity portfolio at September 30, 2013 and December 31, 2012, and accounted for 21 percent of the home equity net charge-offs for both the three and nine months ended September 30, 2013 compared to 25 percent for both of the same periods in 2012.

Outstanding balances in the home equity portfolio with greater than 90 percent but less than or equal to 100 percent refreshed CLTVs comprised 10 percent of the home equity portfolio at both September 30, 2013 and December 31, 2012. Outstanding balances with refreshed CLTVs greater than 100 percent comprised 23 percent and 29 percent of the home equity portfolio at September 30, 2013 and December 31, 2012. Outstanding balances in the home equity portfolio with a refreshed CLTV greater than 100 percent reflect loans where the carrying value and available line of credit of the combined loans are equal to or greater than the most recent valuation of the property securing the loan. Depending on the value of the property, there may be collateral in excess of the first-lien that is available to reduce the severity of loss on the second-lien. Home price deterioration since 2006, somewhat mitigated by recent appreciation, has contributed to an increase in CLTV ratios. Of those outstanding balances with a refreshed CLTV greater than 100 percent, 96 percent of the customers were current on their home equity loan and 92 percent of second-lien loans with a refreshed CLTV greater than 100 percent were current on both their second-lien and underlying first-lien loans at

September 30, 2013. Outstanding balances in the home equity portfolio to borrowers with a refreshed FICO score below 620 represented eight percent of the home equity portfolio at both September 30, 2013 and December 31, 2012.

Of the \$89.5 billion and \$99.5 billion in total home equity portfolio outstandings at September 30, 2013 and December 31, 2012, 75 percent and 74 percent were interest-only loans, almost all of which were HELOCs. The outstanding balance of HELOCs that have entered the amortization period was \$2.3 billion, or three percent of total HELOCs at September 30, 2013. The HELOCs that have entered the amortization period have experienced a higher percentage of early stage delinquencies and nonperforming status when compared to the HELOC portfolio as a whole. At September 30, 2013, \$69 million, or three percent of outstanding HELOCs that had entered the amortization period were accruing past due 30 days or more compared to \$733 million, or one percent of outstanding accruing past due 30 days or more for the entire HELOC portfolio. In addition, at September 30, 2013, \$201 million, or nine percent of outstanding HELOCs that had entered the amortization period were nonperforming compared to \$3.7 billion, or four percent of outstandings that were nonperforming for the entire HELOC portfolio. Loans in our HELOC portfolio generally have an initial draw period of 10 years and more than 85 percent of these loans will not be required to make a fully-amortizing payment until 2015 or later.

Table of Contents

Although we do not actively track how many of our home equity customers pay only the minimum amount due on their home equity loans and lines, we can infer some of this information through a review of our HELOC portfolio that we service and that is still in its revolving period (i.e., customers may draw on and repay their line of credit, but are generally only required to pay interest on a monthly basis). During the three months ended September 30, 2013, approximately 63 percent of these customers did not pay any principal on their HELOCs.

Table 34 presents outstandings, nonperforming balances and net charge-offs by certain state concentrations for the home equity portfolio. In the New York area, the New York-Northern New Jersey-Long Island MSA made up 12 percent and 11 percent of the outstanding home equity portfolio at September 30, 2013 and December 31, 2012. Loans within this MSA comprised seven percent and nine percent of net charge-offs for the three and nine months ended September 30, 2013 and eight percent of net charge-offs for both of the same periods in 2012. The Los Angeles-Long Beach-Santa Ana MSA within California made up 12 percent of the outstanding home equity portfolio at both September 30, 2013 and December 31, 2012. Loans within this MSA comprised eight percent and nine percent of net charge-offs for the three and nine months ended September 30, 2013 and 11 percent for both of the same periods in 2012.

For more information on representations and warranties related to our home equity portfolio, see Off-Balance Sheet Arrangements and Contractual Obligations – Representations and Warranties on page 58 and Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

Net charge-offs exclude \$92 million and \$947 million of write-offs in the home equity PCI loan portfolio for the three and nine months ended September 30, 2013 compared to \$1.7 billion for both of the same periods in 2012.

⁽¹⁾ These write-offs decreased the PCI valuation allowance included as part of the allowance for loan and lease losses.

For more information on PCI write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

⁽²⁾ In these states, foreclosure requires a court order following a legal proceeding (judicial states).

⁽³⁾ Amount excludes the PCI home equity portfolio.

Purchased Credit-impaired Loan Portfolio

Loans acquired with evidence of credit quality deterioration since origination and for which it is probable at purchase that we will be unable to collect all contractually required payments are accounted for under the accounting guidance for PCI loans, which addresses accounting for differences between contractual and expected cash flows to be collected from the purchaser's initial investment in loans if those differences are attributable, at least in part, to credit quality. Evidence of credit quality deterioration as of the acquisition date may include statistics such as past due status, refreshed FICO scores and refreshed LTVs. PCI loans are recorded at fair value upon acquisition and the applicable accounting guidance prohibits carrying over or recording a valuation allowance in the initial accounting.

PCI loans that have similar risk characteristics, primarily credit risk, collateral type and interest rate risk, are pooled and accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. Once a pool is assembled, it is treated as if it were one loan for purposes of applying the accounting guidance for PCI loans. An individual loan is removed from a PCI loan pool if it is sold, foreclosed, forgiven or the expectation of any future proceeds is remote. When a loan is removed from a PCI loan pool and the foreclosure or recovery value of the loan is less than the loan's carrying value, the difference is first applied against the PCI pool's nonaccretable difference. If the nonaccretable difference has been fully utilized, only then is the PCI pool's basis applicable to that loan written-off against its valuation reserve; however, the integrity of the pool is maintained and it continues to be accounted for as if it were one loan.

Table of Contents

In January 2013, in connection with the FNMA Settlement, we repurchased certain residential mortgage loans that had previously been sold to FNMA, which we have valued at less than the purchase price. As of September 30, 2013, loans repurchased in connection with the FNMA Settlement that we classified as PCI had an unpaid principal balance of \$5.6 billion and a carrying value of \$4.7 billion. For additional information, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

Table 35 presents the unpaid principal balance, carrying value, related valuation allowance and the net carrying value as a percentage of the unpaid principal balance for the PCI loan portfolio.

Table 35

Purchased Credit-impaired Loan Portfolio

(Dollars in millions)	September 30, 2013					Percent of Unpaid Principal Balance
	Unpaid Principal Balance	Carrying Value	Related Valuation Allowance	Carrying Value Net of Valuation Allowance		
Residential mortgage	\$21,077	\$20,064	\$1,883	\$18,181	86.26	%
Home equity	6,922	7,104	1,351	5,753	83.11	
Total purchased credit-impaired loan portfolio	\$27,999	\$27,168	\$3,234	\$23,934	85.48	
	December 31, 2012					
Residential mortgage	\$18,069	\$17,451	\$3,108	\$14,343	79.38	%
Home equity	8,434	8,667	2,428	6,239	73.97	
Total purchased credit-impaired loan portfolio	\$26,503	\$26,118	\$5,536	\$20,582	77.66	

The total PCI unpaid principal balance increased \$1.5 billion, or six percent, during the nine months ended September 30, 2013 primarily due to the \$5.6 billion of loans repurchased in connection with the FNMA Settlement. Excluding the \$5.6 billion of loans repurchased, the total PCI unpaid principal balance decreased \$4.1 billion primarily driven by liquidations, payoffs, paydowns and write-offs.

Of the unpaid principal balance of \$28.0 billion at September 30, 2013, \$6.1 billion was 180 days or more past due, including \$5.9 billion of first-lien mortgages and \$228 million of home equity loans. Of the \$21.9 billion that was less than 180 days past due, \$18.8 billion, or 86 percent of the total unpaid principal balance, was current based on the contractual terms while \$2.0 billion, or nine percent, was in early stage delinquency.

During the three months ended September 30, 2013, we recorded a provision benefit of \$248 million for the PCI loan portfolio including a provision benefit of \$156 million for residential mortgage and a provision benefit of \$92 million for home equity. This compared to a provision benefit of \$166 million for the three months ended September 30, 2012. During the nine months ended September 30, 2013, we recorded a provision benefit of \$707 million for the PCI loan portfolio including a provision benefit of \$552 million for residential mortgage and a provision benefit of \$155 million for home equity. This compared to total provision expense of \$327 million for the nine months ended September 30, 2012. The provision benefit for the three and nine months ended September 30, 2013 was primarily driven by an improvement in our home price outlook.

The PCI valuation allowance declined \$2.3 billion during the nine months ended September 30, 2013 due to \$947 million and \$648 million of write-offs in the home equity and residential mortgage PCI loan portfolios, and a provision benefit of \$707 million for the PCI loan portfolio. Write-offs during the nine months ended September 30, 2013 included certain home equity PCI loans that were ineligible for the National Mortgage Settlement, but had

similar characteristics as the eligible loans and the expectation of future cash proceeds was considered remote.

Additional information on the PCI residential mortgage and home equity portfolios is provided in the following sections.

Table of Contents

Purchased Credit-impaired Residential Mortgage Loan Portfolio

The PCI residential mortgage loan portfolio represented 74 percent of the total PCI loan portfolio at September 30, 2013. Those loans to borrowers with a refreshed FICO score below 620 represented 54 percent of the PCI residential mortgage loan portfolio at September 30, 2013. Loans with a refreshed LTV greater than 90 percent, after consideration of purchase accounting adjustments and the related valuation allowance, represented 46 percent of the PCI residential mortgage loan portfolio and 61 percent based on the unpaid principal balance at September 30, 2013. Table 36 presents outstandings net of purchase accounting adjustments and before the related valuation allowance, by certain state concentrations.

Table 36

(Dollars in millions)	September 30	December 31
	2013	2012
California	\$ 8,886	\$ 9,238
Florida ⁽¹⁾	1,922	1,797
Virginia	796	715
Maryland	770	417
Texas	460	192
Other U.S./Non-U.S.	7,230	5,092
Total	\$ 20,064	\$ 17,451

⁽¹⁾ In this state, foreclosure requires a court order following a legal proceeding (judicial state).

Pay option adjustable-rate mortgages (ARMs), which are included in the residential mortgage portfolio, have interest rates that adjust monthly and minimum required payments that adjust annually, subject to resetting if minimum payments are made and deferred interest limits are reached. Annual payment adjustments are subject to a 7.5 percent maximum change. To ensure that contractual loan payments are adequate to repay a loan, the fully-amortizing loan payment amount is re-established after the initial five- or ten-year period and again every five years thereafter. These payment adjustments are not subject to the 7.5 percent limit and may be substantial due to changes in interest rates and the addition of unpaid interest to the loan balance. Payment advantage ARMs have interest rates that are fixed for an initial period of five years. Payments are subject to reset if the minimum payments are made and deferred interest limits are reached. If interest deferrals cause a loan's principal balance to reach a certain level within the first 10 years of the life of the loan, the payment is reset to the interest-only payment; then at the 10-year point, the fully-amortizing payment is required.

The difference between the frequency of changes in a loan's interest rates and payments along with a limitation on changes in the minimum monthly payments of 7.5 percent per year can result in payments that are not sufficient to pay all of the monthly interest charges (i.e., negative amortization). Unpaid interest is added to the loan balance until the loan balance increases to a specified limit, which can be no more than 115 percent of the original loan amount, at which time a new monthly payment amount adequate to repay the loan over its remaining contractual life is established.

At September 30, 2013, the unpaid principal balance of pay option loans was \$5.3 billion, with a carrying value of \$5.2 billion, including \$4.7 billion of loans that were credit-impaired upon acquisition, and accordingly, the reserve is based on a life-of-loan loss estimate. The total unpaid principal balance of pay option loans with accumulated negative amortization was \$2.9 billion including \$183 million of negative amortization. For those borrowers who are making payments in accordance with their contractual terms, nine percent and 10 percent at September 30, 2013 and December 31, 2012 elected to make only the minimum payment on pay option ARMs. We believe the majority of borrowers are now making scheduled payments primarily because the low rate environment has caused the fully

indexed rates to be affordable to more borrowers. We continue to evaluate our exposure to payment resets on the acquired negative-amortizing loans including the PCI pay option loan portfolio and have taken into consideration in the evaluation several assumptions regarding this evaluation including prepayment and default rates. Of the loans in the pay option portfolio at September 30, 2013 that have not already experienced a payment reset, less than one percent are expected to reset before 2016, 22 percent are expected to reset in 2016 and nine percent are expected to reset thereafter. In addition, eight percent are expected to prepay and approximately 60 percent are expected to default prior to being reset, most of which were severely delinquent as of September 30, 2013.

Table of Contents

Purchased Credit-impaired Home Equity Loan Portfolio

The PCI home equity portfolio represented 26 percent of the total PCI loan portfolio at September 30, 2013. Those loans with a refreshed FICO score below 620 represented 18 percent of the PCI home equity portfolio at September 30, 2013. Loans with a refreshed CLTV greater than 90 percent, after consideration of purchase accounting adjustments and the related valuation allowance, represented 72 percent of the PCI home equity portfolio and 73 percent based on the unpaid principal balance at September 30, 2013. Table 37 presents outstandings net of purchase accounting adjustments and before the related valuation allowance, by certain state concentrations.

U.S. Credit Card

The U.S. credit card portfolio is managed in CBB. Outstandings in the U.S. credit card portfolio decreased \$4.6 billion during the nine months ended September 30, 2013 due to a seasonal decline in retail transaction volume. For the three and nine months ended September 30, 2013, net charge-offs decreased \$291 million to \$788 million, and \$1.0 billion to \$2.7 billion compared to the same periods in 2012 due to improvements in delinquencies and bankruptcies as a result of an improved economic environment, account management on higher risk accounts and the impact of higher credit quality originations. U.S. credit card loans 30 days or more past due and still accruing interest decreased \$636 million while loans 90 days or more past due and still accruing interest declined \$388 million during the nine months ended September 30, 2013 as a result of the factors mentioned above that contributed to lower net charge-offs.

Table 38 presents certain key credit statistics for the consumer U.S. credit card portfolio.

Table 38

U.S. Credit Card – Key Credit Statistics

Non-U.S. Credit Card

Outstandings in the non-U.S. credit card portfolio, which are recorded in All Other, decreased \$614 million during the nine months ended September 30, 2013 due to a seasonal decline in retail transaction volume. For the three and nine months ended September 30, 2013, net charge-offs decreased \$35 million to \$89 million, and \$157 million to \$305 million compared to the same periods in 2012 due primarily to improvement in delinquencies as a result of higher credit quality originations, and portfolio sales.

Unused lines of credit for non-U.S. credit card totaled \$30.3 billion at September 30, 2013 compared to \$32.2 billion at December 31, 2012. The \$1.9 billion decrease was driven by closure of inactive accounts.

Table 40 presents certain key credit statistics for the non-U.S. credit card portfolio.

Table of Contents

Direct/Indirect Consumer

At September 30, 2013, approximately 51 percent of the direct/indirect portfolio was included in CBB (consumer dealer financial services - automotive, marine, aircraft, recreational vehicle loans and consumer personal loans), 41 percent was included in GWIM (principally securities-based lending loans and other personal loans) and the remainder was primarily in All Other (the GWIM International Wealth Management (IWM) businesses based outside of the U.S. and student loans).

Outstanding loans and leases increased \$830 million during the nine months ended September 30, 2013 as growth within the consumer dealer financial services auto portfolio and securities-based lending portfolio was largely offset by a loan sale within the securities-based lending portfolio in connection with the Corporation's agreement to sell the IWM businesses as well as lower outstandings in the unsecured consumer lending portfolio. For the three and nine months ended September 30, 2013, net charge-offs decreased \$99 million to \$62 million, and \$296 million to \$272 million, or 0.30 percent and 0.44 percent of total average direct/indirect loans compared to 0.78 percent and 0.89 percent for the same periods in 2012. These decreases were primarily driven by improvements in delinquencies and bankruptcies in the unsecured consumer lending portfolio as a result of an improved economic environment as well as reduced outstandings in this portfolio.

For the three and nine months ended September 30, 2013, net charge-offs in the unsecured consumer lending portfolio decreased \$71 million to \$37 million, and \$238 million to \$161 million, or 4.48 percent and 5.58 percent of total average unsecured consumer lending loans compared to 7.25 percent and 7.90 percent for the same periods in 2012. During the nine months ended September 30, 2013, direct/indirect loans that were past due 30 days or more and still accruing interest declined \$330 million to \$1.0 billion due to improvements in the unsecured consumer lending, dealer financial services and student lending portfolios.

Table 41 presents certain state concentrations for the direct/indirect consumer loan portfolio.

Table 41

Direct/Indirect State Concentrations

	Outstandings		Accruing Past Due 90 Days or More		Net Charge-offs

Total direct/indirect loan portfolio	\$84,035	\$83,205	\$437	\$545	\$62	\$161	\$272	\$568

Other Consumer

At September 30, 2013, approximately 65 percent of the \$1.9 billion other consumer portfolio was associated with certain consumer finance businesses that we previously exited. The remainder is primarily leases within the consumer dealer financial services portfolio included in CBB.

Consumer Loans Accounted for Under the Fair Value Option

Outstanding consumer loans accounted for under the fair value option totaled \$2.2 billion at September 30, 2013 and were comprised of residential mortgage loans that were previously classified as held-for-sale and residential mortgage loans held in consolidated variable interest entities (VIEs). The loans that were previously classified as held-for-sale were transferred to the residential mortgage portfolio in connection with the decision to retain the loans. The fair value option had been elected at the time of origination and the loans will continue to be measured at fair value after the reclassification. During the three and nine months ended September 30, 2013, we recorded net losses of \$48 million and \$1 million resulting from changes in the fair value of these loans, including gains of \$6 million and \$53 million on loans held in consolidated VIEs that were offset by losses recorded on the related long-term debt.

Table of Contents

Nonperforming Consumer Loans, Leases and Foreclosed Properties Activity

Table 42 presents nonperforming consumer loans, leases and foreclosed properties activity for the three and nine months ended September 30, 2013 and 2012. Nonperforming LHFS are excluded from nonperforming loans as they are recorded at either fair value or the lower of cost or fair value. Nonperforming loans do not include past due consumer credit card loans, other unsecured loans and in general, consumer non-real estate-secured loans (loans discharged in Chapter 7 bankruptcy are included) as these loans are typically charged off no later than the end of the month in which the loan becomes 180 days past due. The charge-offs on these loans have no impact on nonperforming activity and accordingly are excluded from Table 42. The fully-insured loan portfolio is not reported as nonperforming as principal repayment is insured. Additionally, nonperforming loans do not include the PCI loan portfolio or loans accounted for under the fair value option. For more information on nonperforming loans, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. Nonperforming loans decreased \$959 million and \$1.9 billion during the three and nine months ended September 30, 2013 as outflows, including the impact of loan sales, outpaced new inflows which continued to improve due to favorable delinquency trends.

The outstanding balance of a real estate-secured loan that is in excess of the estimated property value less costs to sell is charged off no later than the end of the month in which the loan becomes 180 days past due unless repayment of the loan is fully insured. At September 30, 2013, \$8.9 billion, or 49 percent of nonperforming consumer real estate loans and foreclosed properties had been written down to their estimated property value less costs to sell, including \$8.3 billion of nonperforming loans 180 days or more past due and \$546 million of foreclosed properties. In addition, at September 30, 2013, \$6.2 billion, or 35 percent, of nonperforming consumer loans were modified and are now current after successful trial periods, or are current loans classified as nonperforming loans due to the implementation of regulatory guidance in 2012. For more information on the implementation of regulatory guidance in 2012, see Consumer Portfolio Credit Risk Management on page 80 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

During the three and nine months ended September 30, 2013, foreclosed properties increased \$38 million as additions to foreclosed properties outpaced liquidations, and decreased \$104 million as liquidations outpaced additions. PCI loans are excluded from nonperforming loans as these loans were written down to fair value at the acquisition date; however, once the underlying real estate is acquired by the Corporation upon foreclosure of the delinquent PCI loan, it is included in foreclosed properties. PCI-related foreclosed properties increased \$47 million and \$120 million during the three and nine months ended September 30, 2013. Not included in foreclosed properties at September 30, 2013 was \$1.6 billion of real estate that was acquired upon foreclosure of delinquent FHA-insured loans. We hold this real estate on our balance sheet until we convey these properties to the FHA. We exclude these amounts from our nonperforming loans and foreclosed properties activity as we expect we will be reimbursed once the property is conveyed to the FHA for principal and, up to certain limits, costs incurred during the foreclosure process and interest incurred during the holding period. For more information on the review of our foreclosure processes, see Off-Balance Sheet Arrangements and Contractual Obligations – Servicing, Foreclosure and Other Mortgage Matters on page 65.

Restructured Loans

Nonperforming loans also include certain loans that have been modified in TDRs where economic concessions have been granted to borrowers experiencing financial difficulties. These concessions typically result from the Corporation's loss mitigation activities and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. Certain TDRs are classified as nonperforming at the time of restructuring and may only be returned to performing status after considering the borrower's sustained repayment performance for a reasonable period, generally six months. Nonperforming TDRs, excluding those modified loans in the PCI loan portfolio, are included in Table 42.

Nonperforming consumer loans and leases as a percentage of outstanding consumer loans and leases ⁽⁷⁾	3.27	% 3.52	%	
Nonperforming consumer loans, leases and foreclosed properties as a percentage of outstanding consumer loans, leases and foreclosed properties ⁽⁷⁾	3.37	3.66		

Balances do not include nonperforming LHFS of \$697 million and \$639 million and nonaccruing TDRs removed from the PCI loan portfolio prior to January 1, 2010 of \$356 million and \$540 million at September 30, 2013 and 2012 as well as loans accruing past due 90 days or more as presented in Table 28 and Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements.

As a result of the implementation of regulatory guidance in 2012 on loans discharged in Chapter 7 bankruptcy, we added \$1.1 billion to nonperforming loans. As a result of the implementation of regulatory interagency guidance in 2012, we reclassified \$1.9 billion of performing home equity loans (of which \$1.6 billion were current) to nonperforming. For more information on the implementation of regulatory guidance on loans discharged in Chapter 7 bankruptcy and interagency guidance, see Consumer Portfolio Credit Risk Management on page 80 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Consumer loans may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected, or when the loan otherwise becomes well-secured and is in the process of collection.

- New foreclosed properties represents transfers of nonperforming loans to foreclosed properties net of charge-offs taken during the first 90 days after transfer of a loan to foreclosed properties. New foreclosed properties also includes properties obtained upon foreclosure of delinquent PCI loans, properties repurchased due to representations and warranties exposure and properties acquired with newly consolidated subsidiaries.
- (4) At September 30, 2013, 48 percent of nonperforming loans were 180 days or more past due and were written down through charge-offs to 64 percent of their unpaid principal balance.
 - (5) Foreclosed property balances do not include loans that are insured by the FHA and have entered foreclosure of \$1.6 billion and \$2.4 billion at September 30, 2013 and 2012.
 - (6) Outstanding consumer loans exclude loans accounted for under the fair value option.
 - (7) n/a = not applicable

Our policy is to record any losses in the value of foreclosed properties as a reduction in the allowance for loan and lease losses during the first 90 days after transfer of a loan to foreclosed properties. Thereafter, further losses in value as well as gains and losses on sale are recorded in noninterest expense. New foreclosed properties included in Table 42 are net of \$45 million and \$133 million of charge-offs for the three and nine months ended September 30, 2013 compared to \$30 million and \$231 million for the same periods in 2012, recorded during the first 90 days after transfer.

Table of Contents

In accordance with regulatory guidance, we classify consumer real estate loans that have been discharged in Chapter 7 bankruptcy and not reaffirmed by the borrower as TDRs, irrespective of payment history or delinquency status, even if the repayment terms for the loan have not been otherwise modified. We continue to have a lien on the underlying collateral. At September 30, 2013, \$3.7 billion of loans discharged in Chapter 7 bankruptcy with no change in repayment terms at the time of discharge were included in TDRs, of which \$1.9 billion were classified as nonperforming and \$1.8 billion were loans fully-insured by the FHA. Of the \$3.7 billion of TDRs, approximately 21 percent, 33 percent and 46 percent were discharged in Chapter 7 bankruptcy in the nine months ended September 30, 2013, in the year ended December 31, 2012 and in years prior to 2012, respectively. In addition, at September 30, 2013, of the \$1.9 billion of nonperforming loans discharged in Chapter 7 bankruptcy, \$1.0 billion were current on their contractual payments while \$742 million were 90 days or more past due. Of the contractually current nonperforming loans, more than 70 percent were discharged in Chapter 7 bankruptcy more than 12 months ago, and nearly 50 percent were discharged 24 months or more ago. As subsequent cash payments are received, the interest component of the payments is generally recorded as interest income on a cash basis and the principal component is recorded as a reduction in the carrying value of the loan. For more information on the impacts to consumer home loan TDRs, see Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements.

In accordance with bank regulatory interagency guidance, we classify junior-lien home equity loans as nonperforming when the first-lien loan becomes 90 days past due even if the junior-lien loan is performing. At September 30, 2013 and December 31, 2012, \$1.3 billion and \$1.5 billion of such loans were included in nonperforming loans.

Table 43 presents TDRs for the home loans portfolio. Performing TDR balances are excluded from nonperforming loans and leases in Table 42.

Table 43

Home Loans Troubled Debt Restructurings

(Dollars in millions)	September 30, 2013			December 31, 2012		
	Total	Nonperforming	Performing	Total	Nonperforming	Performing
Residential mortgage ^(1, 2)	\$30,392	\$ 8,656	\$21,736	\$28,125	\$ 9,040	\$19,085
Home equity ⁽³⁾	2,214	1,386	828	2,125	1,242	883
Total home loans troubled debt restructurings	\$32,606	\$ 10,042	\$22,564	\$30,250	\$ 10,282	\$19,968

Residential mortgage TDRs deemed collateral dependent totaled \$9.1 billion and \$9.4 billion, and included \$6.5 billion and \$6.4 billion of loans classified as nonperforming and \$2.6 billion and \$3.0 billion of loans classified as performing at September 30, 2013 and December 31, 2012.

⁽²⁾ Residential mortgage performing TDRs included \$14.2 billion and \$11.9 billion of loans that were fully-insured at September 30, 2013 and December 31, 2012.

Home equity TDRs deemed collateral dependent totaled \$1.5 billion and \$1.4 billion, and included \$1.2 billion and \$1.0 billion of loans classified as nonperforming and \$294 million and \$348 million of loans classified as performing at September 30, 2013 and December 31, 2012.

We work with customers that are experiencing financial difficulty by modifying credit card and other consumer loans, while complying with Federal Financial Institutions Examination Council guidelines. Credit card and other consumer loan modifications generally involve a reduction in the consumer's interest rate on the account and placing the customer on a fixed payment plan not exceeding 60 months, all of which are considered TDRs (the renegotiated TDR portfolio). In addition, non-U.S. credit card modifications may involve reducing the interest rate on the account without placing the customer on a fixed payment plan, and these are also considered TDRs (also a part of the renegotiated TDR portfolio). We make modifications primarily through internal renegotiation programs utilizing direct customer contact, but may also utilize external renegotiation programs. The renegotiated TDR portfolio is excluded in large part from Table 42 as substantially all of the loans remain on accrual status until either charged off

or paid in full. At September 30, 2013 and December 31, 2012, our renegotiated TDR portfolio was \$2.4 billion and \$3.9 billion, of which \$1.9 billion and \$3.1 billion were current or less than 30 days past due under the modified terms. The decline in the renegotiated TDR portfolio was primarily driven by paydowns and charge-offs as well as lower program enrollments. For more information on the renegotiated TDR portfolio, see Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements.

Table of Contents

Commercial Portfolio Credit Risk Management

Commercial credit risk is evaluated and managed with the goal that concentrations of credit exposure do not result in undesirable levels of risk. We review, measure and manage concentrations of credit exposure by industry, product, geography, customer relationship and loan size. We also review, measure and manage commercial real estate loans by geographic location and property type. In addition, within our non-U.S. portfolio, we evaluate exposures by region and by country. Tables 48, 53, 60 and 61 summarize our concentrations. We also utilize syndications of exposure to third parties, loan sales, hedging and other risk mitigation techniques to manage the size and risk profile of the commercial credit portfolio.

For more information on our accounting policies regarding delinquencies, nonperforming status and net charge-offs for the commercial portfolio, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Commercial Credit Portfolio

During the three and nine months ended September 30, 2013, credit quality in the commercial loan portfolio continued to show improvement. Reservable criticized balances and nonperforming loans, leases and foreclosed property balances declined during the nine months ended September 30, 2013, with the declines primarily in both the residential and non-residential commercial real estate portfolios. Most other credit quality indicators across the remaining commercial portfolios also improved. The allowance for loan and lease losses for the commercial portfolio increased \$383 million to \$3.5 billion at September 30, 2013 compared to December 31, 2012 as continued improvement in credit quality was offset by loan growth across the core commercial portfolio (total commercial products excluding U.S. small business). For additional information, see Allowance for Credit Losses on page 123.

Table 44 presents our commercial loans and leases, and related credit quality information at September 30, 2013 and December 31, 2012.

Table 44
Commercial Loans and Leases

(Dollars in millions)	Outstandings		Nonperforming		Accruing Past Due 90 Days or More	
	September 30 2013	December 31 2012	September 30 2013	December 31 2012	September 30 2013	December 31 2012

Commercial loans excluding loans accounted for under the fair value option	386,736	346,383	1,785	3,224	285	229
Loans accounted for under the fair value option ⁽³⁾	8,010	7,997	2	11	—	—
Total commercial loans and leases	\$394,746	\$ 354,380	\$1,787	\$ 3,235	\$285	\$ 229

⁽¹⁾ Includes U.S. commercial real estate loans of \$43.5 billion and \$37.2 billion and non-U.S. commercial real estate loans of \$1.4 billion and \$1.5 billion at September 30, 2013 and December 31, 2012.

⁽²⁾ Includes card-related products.

- (3) Commercial loans accounted for under the fair value option include U.S. commercial loans of \$1.8 billion and \$2.3 billion and non-U.S. commercial loans of \$6.2 billion and \$5.7 billion at September 30, 2013 and December 31, 2012. For more information on the fair value option, see Note 17 – Fair Value Option to the Consolidated Financial Statements.

Outstanding commercial loans and leases increased \$40.4 billion during the nine months ended September 30, 2013 primarily in the non-U.S. commercial and U.S. commercial product types. Nonperforming commercial loans and leases as a percentage of outstanding commercial loans and leases improved during the nine months ended September 30, 2013 to 0.45 percent from 0.91 percent (0.46 percent and 0.93 percent excluding loans accounted for under the fair value option) at December 31, 2012.

Table of Contents

Table 45 presents net charge-offs and related ratios for our commercial loans and leases for the three and nine months ended September 30, 2013 and 2012. Improving trends across the portfolio drove lower charge-offs.

Table 45

Commercial Net Charge-offs and Related Ratios

	Net Charge-offs				Net Charge-off Ratios ⁽¹⁾			
	Three Months Ended		Nine Months Ended		Three Months Ended		Nine Months Ended

Total commercial	\$160	\$352	\$571	\$1,096	0.17	0.45	0.21	0.47

(1) Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans and leases excluding loans accounted for under the fair value option.

Table 46 presents commercial credit exposure by type for utilized, unfunded and total binding committed credit exposure. Commercial utilized credit exposure includes standby letters of credit (SBLCs) and financial guarantees, bankers' acceptances and commercial letters of credit for which we are legally bound to advance funds under prescribed conditions, during a specified period. Although funds have not yet been advanced, these exposure types are considered utilized for credit risk management purposes. Total commercial committed credit exposure increased \$63.2 billion during the nine months ended September 30, 2013 primarily driven by increases in loans and leases.

Total commercial utilized credit exposure increased \$40.3 billion during the nine months ended September 30, 2013 primarily driven by increases in loans and leases. The utilization rate for loans and leases, SBLCs and financial guarantees, commercial letters of credit and bankers' acceptances was 58 percent at both September 30, 2013 and December 31, 2012.

Table 46

Commercial Credit Exposure by Type

	Commercial Utilized ⁽¹⁾		Commercial Unfunded ^(2, 3)		Total Commercial Committed

Total	\$512,016	\$471,727	\$318,178	\$295,278	\$830,194	\$767,005

(1)

Total commercial utilized exposure includes loans and issued letters of credit accounted for under the fair value option and is comprised of loans outstanding of \$8.0 billion for both periods and letters of credit with a notional amount of \$577 million and \$672 million at September 30, 2013 and December 31, 2012.

- (2) Total commercial unfunded exposure includes loan commitments accounted for under the fair value option with a notional amount of \$14.1 billion and \$17.6 billion at September 30, 2013 and December 31, 2012.
- (3) Excludes unused business card lines which are not legally binding.
Derivative assets are carried at fair value, reflect the effects of legally enforceable master netting agreements and
- (4) have been reduced by cash collateral of \$47.3 billion and \$58.1 billion at September 30, 2013 and December 31, 2012. Not reflected in utilized and committed exposure is additional derivative collateral held of \$18.6 billion and \$18.7 billion which consists primarily of other marketable securities.
- (5) The net monoline exposure of \$1.3 billion at December 31, 2012 was settled during 2013.

Table of Contents

Table 47 presents commercial utilized reservable criticized exposure by product type. Criticized exposure corresponds to the Special Mention, Substandard and Doubtful asset categories as defined by regulatory authorities. Total commercial utilized reservable criticized exposure decreased \$1.9 billion, or 12 percent, during the nine months ended September 30, 2013 primarily in the commercial real estate portfolio driven largely by continued paydowns, upgrades, charge-offs and sales outpacing downgrades. At September 30, 2013, approximately 85 percent of commercial utilized reservable criticized exposure was secured compared to 82 percent at December 31, 2012.

Table 47

Commercial Utilized Reservable Criticized Exposure

(Dollars in millions)	September 30, 2013		December 31, 2012	
	Amount (1)	Percent (2)	Amount (1)	Percent (2)
U.S. commercial	\$8,814	3.64 %	\$8,631	3.72 %
Commercial real estate	1,887	4.02	3,782	9.24
Commercial lease financing	1,088	4.43	969	4.06
Non-U.S. commercial	1,610	1.62	1,614	2.02
	13,399	3.24	14,996	3.98
U.S. small business commercial	687	5.22	940	7.45
Total commercial utilized reservable criticized exposure	\$14,086	3.31	\$15,936	4.10

Total commercial utilized reservable criticized exposure includes loans and leases of \$12.6 billion and \$14.6

(1) billion and commercial letters of credit of \$1.4 billion and \$1.3 billion at September 30, 2013 and December 31, 2012.

(2) Percentages are calculated as commercial utilized reservable criticized exposure divided by total commercial utilized reservable exposure for each exposure category.

U.S. Commercial

At September 30, 2013, 62 percent of the U.S. commercial loan portfolio, excluding small business, was managed in Global Banking, 18 percent in Global Markets, nine percent in GWIM (business-purpose loans for wealthy clients) and the remainder primarily in CBB. U.S. commercial loans, excluding loans accounted for under the fair value option, increased \$14.0 billion, or seven percent, during the nine months ended September 30, 2013 due to increased client financing activity and growth across the majority of core commercial portfolios. Nonperforming loans and leases decreased \$425 million during the nine months ended September 30, 2013. Net charge-offs decreased \$59 million for the nine months ended September 30, 2013 compared to the same period in 2012. The declines were broad-based with respect to clients and industries, driven by improved client credit profiles and liquidity.

Commercial Real Estate

The commercial real estate portfolio is predominantly managed in Global Banking and consists of loans made primarily to public and private developers, and commercial real estate firms. Outstanding loans increased \$6.3 billion, or 16 percent, during the nine months ended September 30, 2013 due to new originations in major metropolitan markets.

The portfolio remains diversified across property types and geographic regions. California represented the largest state concentration at 22 percent and 23 percent of commercial real estate loans and leases at September 30, 2013 and December 31, 2012.

For the three and nine months ended September 30, 2013, we continued to see improvements in the credit quality in both the residential and non-residential portfolios. We use a number of proactive risk mitigation initiatives to reduce

utilized and potential exposure in the commercial real estate portfolios including ongoing refinement of our credit standards, additional transfers of deteriorating exposures to management by independent special asset officers and the pursuit of loan restructurings or asset sales to achieve the best results for our customers and the Corporation.

Nonperforming commercial real estate loans and foreclosed properties decreased \$1.2 billion, or 66 percent, and reservable criticized balances decreased \$1.9 billion, or 50 percent, during the nine months ended September 30, 2013. Net charge-offs decreased \$80 million and \$152 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012. These improvements were primarily in the non-residential portfolio.

Table of Contents

Table 48 presents outstanding commercial real estate loans by geographic region, based on the geographic location of the collateral, and by property type. Commercial real estate primarily includes commercial loans and leases secured by non-owner-occupied real estate and is dependent on the sale or lease of the real estate as the primary source of repayment.

Table 48

⁽¹⁾ Includes unsecured loans to real estate investment trusts and national home builders whose portfolios of properties span multiple geographic regions and properties in the states of Colorado, Utah, Hawaii, Wyoming and Montana.

Table of Contents

Tables 49 and 50 present commercial real estate credit quality data by non-residential and residential property types. The residential portfolio presented in Tables 48, 49 and 50 includes condominiums and other residential real estate. Other property types in Tables 48, 49 and 50 primarily include special purpose, nursing/retirement homes, medical facilities and restaurants, as well as unsecured loans to borrowers whose primary business is commercial real estate.

⁽¹⁾ Net charge-off ratios are calculated as annualized net charge-offs divided by average outstanding loans excluding loans accounted for under the fair value option.

At September 30, 2013, total committed non-residential exposure was \$63.6 billion compared to \$54.5 billion at December 31, 2012, of which \$43.4 billion and \$37.0 billion were funded secured loans. Non-residential nonperforming loans and foreclosed properties declined \$902 million, or 66 percent, to \$468 million at September 30, 2013 compared to \$1.4 billion at December 31, 2012, which represented 1.08 percent and 3.68 percent of total non-residential loans and foreclosed properties. The decline in nonperforming loans and foreclosed properties in the non-residential portfolio was driven by decreases across all property types. Non-residential utilized reservable criticized exposure decreased \$1.6 billion, or 48 percent, to \$1.7 billion at September 30, 2013 compared to \$3.2 billion at December 31, 2012, which represented 3.73 percent and 8.27 percent of non-residential utilized reservable exposure, with the decrease primarily due to continued resolution of legacy criticized exposure. The decrease in reservable criticized exposure was driven by decreases

Table of Contents

across all property types. Non-residential portfolio net charge-offs decreased \$77 million and \$124 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012 primarily due to lower overall levels of criticized and nonperforming assets, as well as higher recoveries of prior charge-offs.

Total committed residential exposure of \$3.1 billion remained relatively unchanged compared to December 31, 2012 with \$1.6 billion of funded secured loans at both September 30, 2013 and December 31, 2012. Residential nonperforming loans and foreclosed properties decreased \$257 million, or 65 percent, during the nine months ended September 30, 2013 due to repayments, sales and loan restructuring. Residential utilized reservable criticized exposure decreased \$337 million, or 63 percent, during the nine months ended September 30, 2013 due to continued resolution of criticized exposure. The nonperforming loans, leases and foreclosed properties and the utilized reservable criticized ratios for the residential portfolio were 8.72 percent and 12.19 percent at September 30, 2013 compared to 23.33 percent and 31.56 percent at December 31, 2012. Residential portfolio net charge-offs decreased \$3 million and \$28 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012.

At September 30, 2013 and December 31, 2012, the commercial real estate loan portfolio included \$7.0 billion and \$6.7 billion of funded construction and land development loans that were originated to fund the construction and/or rehabilitation of commercial properties. Reservable criticized construction and land development loans totaled \$593 million and \$1.5 billion, and nonperforming construction and land development loans and foreclosed properties totaled \$120 million and \$730 million at September 30, 2013 and December 31, 2012. During a property's construction phase, interest income is typically paid from interest reserves that are established at the inception of the loan. As construction is completed and the property is put into service, these interest reserves are depleted and interest payments from operating cash flows begin. We do not recognize interest income on nonperforming loans regardless of the existence of an interest reserve.

Non-U.S. Commercial

At September 30, 2013, 70 percent of the non-U.S. commercial loan portfolio was managed in Global Banking and 30 percent in Global Markets. Outstanding loans, excluding loans accounted for under the fair value option, increased \$18.8 billion during the nine months ended September 30, 2013 primarily due to increased corporate client demand and client financing activity. Net charge-offs decreased \$11 million and \$12 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012. For more information on the non-U.S. commercial portfolio, see Non-U.S. Portfolio on page 119.

U.S. Small Business Commercial

The U.S. small business commercial loan portfolio is comprised of small business card loans and small business loans managed in CBB. Card-related products were 44 percent and 45 percent of the U.S. small business commercial portfolio at September 30, 2013 and December 31, 2012. Net charge-offs decreased \$118 million and \$286 million to \$91 million and \$291 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012 driven by lower delinquencies and bankruptcies resulting from an improvement in credit quality within the small business loan portfolio, an improved economic environment, a reduction in higher risk vintages and the impact of higher credit quality originations. Of the U.S. small business commercial net charge-offs, 68 percent and 72 percent were credit card-related products for the three and nine months ended September 30, 2013 compared to 46 percent and 57 percent for the same periods in 2012.

Commercial Loans Accounted for Under the Fair Value Option

The portfolio of commercial loans accounted for under the fair value option is managed primarily in Global Banking. Outstanding commercial loans accounted for under the fair value option increased \$13 million to an aggregate fair

value of \$8.0 billion at September 30, 2013 compared to December 31, 2012 primarily due to increased corporate borrowings under bank credit facilities. We recorded net gains of \$8 million and \$54 million during the three and nine months ended September 30, 2013 compared to net gains of \$98 million and \$173 million for the same periods in 2012 resulting from changes in the fair value of the loan portfolio. These amounts were primarily attributable to changes in instrument-specific credit risk, were recorded in other income (loss) and do not reflect the results of hedging activities.

In addition, unfunded lending commitments and letters of credit accounted for under the fair value option had an aggregate fair value of \$412 million and \$528 million at September 30, 2013 and December 31, 2012 which was recorded in accrued expenses and other liabilities. The associated aggregate notional amount of unfunded lending commitments and letters of credit accounted for under the fair value option was \$14.7 billion and \$18.3 billion at September 30, 2013 and December 31, 2012. We recorded net gains of \$76 million and \$122 million from changes in the fair value of commitments and letters of credit during the three and nine months ended September 30, 2013 compared to net gains of \$313 million and \$605 million for the same periods in 2012 resulting from maturities and terminations at par value and changes in the fair value of the loan portfolio. These amounts were primarily attributable to changes in instrument-specific credit risk, were recorded in other income (loss) and do not reflect the results of hedging activities.

Table of Contents

Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity

Table 51 presents the nonperforming commercial loans, leases and foreclosed properties activity during the three and nine months ended September 30, 2013 and 2012. Nonperforming loans do not include loans accounted for under the fair value option. During the three and nine months ended September 30, 2013, nonperforming commercial loans and leases decreased \$318 million and \$1.4 billion to \$1.8 billion driven by paydowns, returns to performing status, charge-offs and sales outpacing new nonperforming loans. Approximately 89 percent of commercial nonperforming loans, leases and foreclosed properties were secured and approximately 53 percent were contractually current. Commercial nonperforming loans were carried at approximately 74 percent of their unpaid principal balance before consideration of the allowance for loan and lease losses as the carrying value of these loans has been reduced to the estimated property value less costs to sell.

Table 51

Nonperforming Commercial Loans, Leases and Foreclosed Properties Activity ^(1, 2)

Nonperforming commercial loans, leases and foreclosed properties, September 30	\$1,901	\$4,373	\$1,901	\$4,373
Nonperforming commercial loans and leases as a percentage of outstanding commercial loans and leases ⁽⁵⁾	0.46	% 1.22	%	
Nonperforming commercial loans, leases and foreclosed properties as a percentage of outstanding commercial loans, leases and foreclosed properties ⁽⁵⁾	0.49	1.35		

⁽¹⁾ Balances do not include nonperforming LHFS of \$275 million and \$758 million at September 30, 2013 and 2012.

⁽²⁾ Includes U.S. small business commercial activity. Small business card loans are excluded as they are not classified as nonperforming.

- Commercial loans and leases may be returned to performing status when all principal and interest is current and full repayment of the remaining contractual principal and interest is expected or when the loan otherwise becomes well-secured and is in the process of collection. TDRs are generally classified as performing after a sustained period of demonstrated payment performance.
- (3) New foreclosed properties represents transfers of nonperforming loans to foreclosed properties net of charge-offs recorded during the first 90 days after transfer of a loan to foreclosed properties.
 - (4) Outstanding commercial loans exclude loans accounted for under the fair value option.
 - (5)

Table of Contents

Table 52 presents our commercial TDRs by product type and performing status. U.S. small business commercial TDRs are comprised of renegotiated small business card loans and are not classified as nonperforming as they are charged off no later than the end of the month in which the loan becomes 180 days past due. For more information on TDRs, see Note 5 – Outstanding Loans and Leases to the Consolidated Financial Statements.

Industry Concentrations

Table 53 presents commercial committed and utilized credit exposure by industry and the total net credit default protection purchased to cover the funded and unfunded portions of certain credit exposures. Our commercial credit exposure is diversified across a broad range of industries. Total committed commercial credit exposure increased \$63.2 billion, or eight percent, during the nine months ended September 30, 2013 to \$830.2 billion. The increase in commercial committed exposure was concentrated in diversified financials, banking, real estate and retailing, partially offset by lower exposure in food, beverage and tobacco.

Industry limits are used internally to manage industry concentrations and are based on committed exposures and capital usage that are allocated on an industry-by-industry basis. A risk management framework is in place to set and approve industry limits as well as to provide ongoing monitoring. Management's Credit Risk Committee (CRC) oversees industry limit governance.

Diversified financials, our largest industry concentration, experienced an increase in committed exposure of \$22.7 billion, or 23 percent, during the nine months ended September 30, 2013. The increase was driven by higher funded loans and derivative exposure.

Real estate, our second largest industry concentration, experienced an increase in committed exposure of \$6.6 billion, or 10 percent, during the nine months ended September 30, 2013 primarily due to new originations and renewals outpacing paydowns and sales. Real estate construction and land development exposure represented 15 percent and 14 percent of the total real estate industry committed exposure at September 30, 2013 and December 31, 2012. For more information on commercial real estate and related portfolios, see Commercial Portfolio Credit Risk Management – Commercial Real Estate on page 109.

Retailing, our third largest industry concentration, experienced an increase in committed exposure of \$6.8 billion, or 14 percent, during the nine months ended September 30, 2013 driven by loans to auto dealers and wholesalers, and general merchandise stores. Committed exposure to the food, beverage and tobacco industry decreased \$6.0 billion, or 16 percent, during the nine months ended September 30, 2013. The decrease was primarily related to commitment reductions and paydowns. Banking committed exposure increased \$5.1 billion, or 11 percent, during the nine months ended September 30, 2013 driven by loans to mortgage banking companies. Energy committed exposure increased \$4.8 billion, or 12 percent, during the nine months ended September 30, 2013 reflecting higher non-U.S. refining and marketing exposure. Telecommunication services committed exposure increased \$4.0 billion, or 39 percent, during the

nine months ended September 30, 2013 primarily related to short-term acquisition financing.

Our committed state and municipal exposure of \$35.9 billion at September 30, 2013 consisted of \$29.1 billion of commercial utilized exposure (including \$17.7 billion of funded loans, \$7.4 billion of SBLCs and \$2.1 billion of derivative assets) and unfunded commercial exposure of \$6.8 billion (primarily unfunded loan commitments and letters of credit) and is reported in the government and public education industry in Table 53. While the economic recovery continues to pressure budgets, most state and local governments have implemented offsetting fiscal adjustments and continue to honor debt obligations as agreed. While historical default rates have been low, as part of our overall and ongoing risk management processes, we continually monitor these exposures through a rigorous review process. Additionally, internal communications are regularly circulated such that exposure levels are maintained in compliance with established concentration guidelines.

Net credit default protection purchased on total commitments ⁽³⁾			\$(11,204)	\$(14,657)

⁽¹⁾ Includes U.S. small business commercial exposure.

Industries are viewed from a variety of perspectives to best isolate the perceived risks. For purposes of this table,

⁽²⁾ the real estate industry is defined based on the borrowers' or counterparties' primary business activity using operating cash flows and primary source of repayment as key factors.

⁽³⁾ Represents net notional credit protection purchased. For additional information, see Commercial Portfolio Credit Risk Management – Risk Mitigation on page 116.

Monoline Exposure

Monoline exposure is reported in the insurance industry and managed under insurance portfolio industry limits. We have indirect exposure to monolines primarily in the form of guarantees supporting our loans, investment portfolios, securitizations and credit-enhanced securities as part of our public finance business and other selected products. Such indirect exposure exists when we purchase credit protection from monolines to hedge all or a portion of the credit risk on certain credit exposures including loans and CDOs. We underwrite our public finance exposure by evaluating the underlying securities.

We also have indirect exposure to monolines in the form of guarantees supporting our mortgage and other loan sales. Indirect exposure may exist when credit protection was purchased from monolines to hedge all or a portion of the credit risk on certain mortgage and other loan exposures. A loss may occur when we are required to repurchase a loan and the market value of the loan has declined, or we are required to indemnify or provide recourse for a guarantor's loss. For more information regarding our exposure to representations and warranties, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

Table of Contents

Table 54 presents the notional amount of our monoline derivative credit exposure, mark-to-market adjustment and the counterparty credit valuation adjustment. The notional amount of monoline exposure decreased \$1.1 billion during the nine months ended September 30, 2013 due to terminations, paydowns and maturities of monoline contracts.

Risk Mitigation

We purchase credit protection to cover the funded portion as well as the unfunded portion of certain credit exposures. To lower the cost of obtaining our desired credit protection levels, we may add credit exposure within an industry, borrower or counterparty group by selling protection.

At September 30, 2013 and December 31, 2012, net notional credit default protection purchased in our credit derivatives portfolio to hedge our funded and unfunded exposures for which we elected the fair value option, as well as certain other credit exposures, was \$11.2 billion and \$14.7 billion. The mark-to-market effects resulted in net losses of \$109 million and \$238 million for the three and nine months ended September 30, 2013 compared to net losses of \$417 million and \$786 million for the same periods in 2012. The gains and losses on these instruments were offset by gains and losses on the exposures. Table 55 presents the average VaR for these derivatives. See Trading Risk Management on page 129 for a description of our VaR calculation for the market-based trading portfolio.

(3) Represents net credit default protection (purchased) sold.

(4) NR is comprised of index positions held and any names that have not been rated.

In addition to our net notional credit default protection purchased to cover the funded and unfunded portion of certain credit exposures, credit derivatives are used for market-making activities for clients and establishing positions intended to profit from directional or relative value changes. We execute the majority of our credit derivative trades in the OTC market with large, multinational financial institutions, including broker/dealers and, to a lesser degree, with a variety of other investors. Because these transactions are executed in the OTC market, we are subject to settlement risk. We are also subject to credit risk in the event that these counterparties fail to perform under the terms of these contracts. In most cases, credit derivative transactions are executed on a daily margin basis. Therefore, events such as a credit downgrade, depending on the ultimate rating level, or a breach of credit covenants would typically require an increase in the amount of collateral required by the counterparty, where applicable, and/or allow us to take additional protective measures such as early termination of all trades.

Table of Contents

Table 58 presents the total contract/notional amount of credit derivatives outstanding and includes both purchased and written credit derivatives. The credit risk amounts are measured as net asset exposure by counterparty, taking into consideration all contracts with that counterparty. For more information on our written credit derivatives, see Note 3 – Derivatives to the Consolidated Financial Statements.

The credit risk amounts discussed above and presented in Table 58 take into consideration the effects of legally enforceable master netting agreements while amounts disclosed in Note 3 – Derivatives to the Consolidated Financial Statements are shown on a gross basis. Credit risk reflects the potential benefit from offsetting exposure to non-credit derivative products with the same counterparties that may be netted upon the occurrence of certain events, thereby reducing our overall exposure.

Table 58
Credit Derivatives

(Dollars in millions)	September 30, 2013		December 31, 2012	
	Contract/ Notional	Credit Risk	Contract/ Notional	Credit Risk
Purchased credit derivatives:				
Credit default swaps	\$1,441,696	\$7,813	\$1,559,472	\$8,987
Total return swaps/other	47,399	566	43,489	402
Total purchased credit derivatives	\$1,489,095	\$8,379	\$1,602,961	\$9,389
Written credit derivatives:				
Credit default swaps	\$1,417,896	n/a	\$1,531,504	n/a
Total return swaps/other	77,527	n/a	68,811	n/a
Total written credit derivatives	\$1,495,423	n/a	\$1,600,315	n/a

n/a = not applicable

Counterparty Credit Risk Valuation Adjustments

We record counterparty credit risk valuation adjustments on certain derivative assets, including our credit default protection purchased, in order to properly reflect the credit risk of the counterparty. We calculate CVA based on a modeled expected exposure that incorporates current market risk factors including changes in market spreads and non-credit related market factors that affect the value of a derivative. The exposure also takes into consideration credit mitigants such as legally enforceable master netting agreements and collateral. For additional information, see Note 3 – Derivatives to the Consolidated Financial Statements.

Table of Contents

Non-U.S. Portfolio

Our non-U.S. credit and trading portfolios are subject to country risk. We define country risk as the risk of loss from unfavorable economic and political conditions, currency fluctuations, social instability and changes in government policies. A risk management framework is in place to measure, monitor and manage non-U.S. risk and exposures. Management oversight of country risk, including cross-border risk, is provided by the Country Credit Risk Committee, a subcommittee of the CRC. In addition to the direct risk of doing business in a country, we also are exposed to indirect country risks (e.g., related to the collateral received on secured financing transactions or related to client clearing activities). These indirect exposures are managed in the normal course of business through credit, market and operational risk governance, rather than through country risk governance.

Non-U.S. exposure is presented on an internal risk management basis and includes sovereign and non-sovereign credit exposure, securities and other investments issued by or domiciled in countries other than the U.S. The risk assignments by country can be adjusted for external guarantees and certain collateral types. Exposures that are subject to external guarantees are reported under the country of the guarantor. Exposures with tangible collateral are reflected in the country where the collateral is held. For securities received, other than cross-border resale agreements, outstandings are assigned to the domicile of the issuer of the securities.

Funded loans and loan equivalents include loans, leases, and other extensions of credit and funds, including letters of credit and due from placements, which have not been reduced by collateral, hedges or credit default protection. Funded loans and loan equivalents are reported net of charge-offs but prior to any allowance for loan and lease losses. Unfunded commitments are the undrawn portion of legally binding commitments related to loans and loan equivalents.

Net counterparty exposure includes the fair value of derivatives, including the counterparty risk associated with credit default swaps (CDS), and secured financing transactions. Derivative exposures are presented net of collateral, which is predominantly cash, pledged under legally enforceable master netting agreements. Secured financing transaction exposures are presented net of eligible cash or securities pledged as collateral.

Securities and other investments are carried at fair value and long securities exposures are netted against short exposures with the same underlying issuer to, but not below, zero (i.e., negative issuer exposures are reported as zero). Other investments include our GPI portfolio and strategic investments.

Net country exposure represents country exposure less hedges and credit default protection purchased, net of credit default protection sold. We hedge certain of our country exposures with credit default protection primarily in the form of single-name, as well as indexed and tranching CDS. The exposures associated with these hedges represent the amount that would be realized upon the isolated default of an individual issuer in the relevant country assuming a zero recovery rate for that individual issuer, and are calculated based on the CDS notional amount less any fair value receivable or payable. Changes in the assumption of an isolated default can produce different results in a particular tranche.

Table of Contents

Table 60 presents our 20 largest, non-U.S. country exposures. These exposures accounted for 88 percent and 89 percent of our total non-U.S. exposure at September 30, 2013 and December 31, 2012. Net country exposure for these 20 countries decreased \$20.4 billion from December 31, 2012 driven by a decrease in funded loans and loan equivalents in Japan resulting from a decrease in central bank deposits and a reduction in unfunded loan commitments in Singapore.

Certain European countries, including Greece, Ireland, Italy, Portugal and Spain, have experienced varying degrees of financial stress in recent years. Risks from the ongoing debt crisis in these countries could continue to disrupt the financial markets which could have a detrimental impact on global economic conditions and sovereign and non-sovereign debt in these countries. Market volatility is expected to continue as policymakers address the fundamental challenges of competitiveness, growth and fiscal solvency. We expect to continue to support client activities in the region and our exposures may vary over time as we monitor the situation and manage our risk profile.

Table of Contents

Table 61 presents our direct sovereign and non-sovereign exposures in these countries at September 30, 2013. Our total sovereign and non-sovereign exposure to these countries was \$16.5 billion at September 30, 2013 compared to \$14.5 billion at December 31, 2012. The total exposure to these countries, net of all hedges, was \$10.8 billion at September 30, 2013 compared to \$9.5 billion at December 31, 2012. At September 30, 2013 and December 31, 2012, hedges and credit default protection purchased, net of credit default protection sold, was \$5.6 billion and \$5.1 billion. Net country exposure increased \$1.4 billion from December 31, 2012 driven by increased funded loan and loan equivalents with financial institutions in Spain and Italy and an increase in sovereign securities in Italy, partially offset by a decrease in corporate exposures across all countries.

Net counterparty exposure includes the fair value of derivatives, including the counterparty risk associated with CDS, and secured financing transactions. Derivative exposures are presented net of \$1.7 billion in collateral, which (1) is predominantly cash, pledged under legally enforceable master netting agreements. Secured financing transaction exposures are presented net of eligible cash or securities pledged as collateral. The notional amount of reverse repurchase transactions was \$4.6 billion. Counterparty exposure is not presented net of hedges or credit default protection.

Long securities exposures are netted on a single-name basis to, but not below, zero by short exposures of \$5.6 (2) billion and net CDS purchased of \$652 million, consisting of \$492 million of net single-name CDS purchased and \$160 million of net indexed and tranching CDS purchased.

Represents credit default protection purchased, net of credit default protection sold, which is used to mitigate the Corporation's risk to country exposures as listed, including \$3.5 billion, consisting of \$2.7 billion in net (3) single-name CDS purchased and \$759 million in net indexed and tranching CDS purchased, to hedge loans and securities, \$2.0 billion in additional credit default protection purchased to hedge derivative assets and \$166 million in other short exposures.

Table of Contents

The majority of our CDS contracts on reference assets in Greece, Ireland, Italy, Portugal and Spain are with highly-rated financial institutions primarily outside of the Eurozone and we work to limit or eliminate correlated CDS. Due to our engagement in market-making activities, our CDS portfolio contains contracts with various maturities to a diverse set of counterparties. We work to limit mismatches in maturities between our exposures and the CDS we use to hedge them. However, there may be instances where the protection purchased has a different maturity than the exposure for which the protection was purchased, in which case, those exposures and hedges are subject to more active monitoring and management.

Table 62 presents the notional amount and fair value of single-name CDS purchased and sold on reference assets in Greece, Ireland, Italy, Portugal and Spain. Table 62 includes only single-name CDS netted at the counterparty level, whereas, Table 61 includes single-name, indexed and tranching CDS exposures netted by the reference asset that they are intended to hedge; therefore, CDS purchased and sold information is not comparable between tables.

Table 62

Single-Name CDS with Reference Assets in Greece, Ireland, Italy, Portugal and Spain ⁽¹⁾

(Dollars in billions)	September 30, 2013		Fair Value

After netting ⁽²⁾	3.7	3.8	0.1	0.1

⁽¹⁾ The majority of our CDS contracts on reference assets in Greece, Ireland, Italy, Portugal and Spain are primarily with non-Eurozone counterparties.

⁽²⁾ Amounts listed are after consideration of legally enforceable counterparty master netting agreements.

Losses could result even if there is credit default protection purchased because the purchased credit protection contracts may only pay out under certain scenarios and thus not all losses may be covered by the credit protection contracts. The effectiveness of our CDS protection as a hedge of these risks is influenced by a number of factors, including the contractual terms of the CDS. Generally, only the occurrence of a credit event as defined by the CDS terms (which may include, among other events, the failure to pay by, or restructuring of, the reference entity) results in a payment under the purchased credit protection contracts. The determination as to whether a credit event has occurred is made by the relevant International Swaps and Derivatives Association, Inc. (ISDA) Determination Committee (comprised of various ISDA member firms) based on the terms of the CDS and facts and circumstances for the event. Accordingly, uncertainties exist as to whether any particular strategy or policy action for addressing the European debt crisis would constitute a credit event under the CDS. A voluntary restructuring may not trigger a credit event under CDS terms and consequently may not trigger a payment under the CDS contract.

In addition to our direct sovereign and non-sovereign exposures, a significant deterioration of the European debt crisis could result in material reductions in the value of sovereign debt and other asset classes posted as collateral, disruptions in capital markets, widening of credit spreads of U.S. and non-U.S. financial institutions, loss of investor confidence in the financial services industry, a slowdown in global economic activity and other adverse developments. For more information on the debt crisis in Europe, see Item 1A. Risk Factors of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Provision for Credit Losses

The provision for credit losses decreased \$1.5 billion to \$296 million, and decreased \$2.7 billion to \$3.2 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012. The provision for credit losses was \$1.4 billion and \$3.1 billion lower than net charge-offs for the three and nine months ended September 30, 2013, resulting in reductions in the allowance for credit losses due to continued improvement in the home loans and credit card portfolios. This compared to reductions of \$2.3 billion and \$5.8 billion in the allowance for credit losses for the three and nine months ended September 30, 2012. If the economy and home prices continue to improve, we anticipate additional reductions in the allowance for credit losses in future periods, although at a lower level than the third quarter.

The provision for credit losses for the consumer portfolio decreased \$1.8 billion to a benefit of \$191 million, and decreased \$3.7 billion to \$2.3 billion for the three and nine months ended September 30, 2013 compared to the same periods in 2012 due to continued improvement in the home loans portfolio primarily as a result of increased home prices, and improvement in the credit card portfolios. The provision for credit losses related to the PCI loan portfolios was a benefit of \$248 million and a benefit of \$707 million for the three and nine months ended September 30, 2013 primarily due to improvement in our home price outlook compared to a benefit of \$166 million and an expense of \$327 million for the same periods in 2012.

The provision for credit losses for the commercial portfolio, including unfunded lending commitments, increased \$290 million to \$487 million, and increased \$925 million to \$936 million for the three and nine months ended September 30, 2013 compared to the same periods in 2012 due to stabilization of credit quality, loan growth and a higher volume of loan resolutions in the prior year within the core commercial portfolio, partially offset by a decrease in the U.S. small business portfolio as a result of improvement in credit quality.

Allowance for Credit Losses

Allowance for Loan and Lease Losses

The allowance for loan and lease losses is comprised of two components. The first component covers nonperforming commercial loans and TDRs. The second component covers loans and leases on which there are incurred losses that are not yet individually identifiable, as well as incurred losses that may not be represented in the loss forecast models. We evaluate the adequacy of the allowance for loan and lease losses based on the total of these two components, each of which is described in more detail below. The allowance for loan and lease losses excludes LHFS and loans accounted for under the fair value option as the fair value reflects a credit risk component.

The first component of the allowance for loan and lease losses covers both nonperforming commercial loans and all TDRs within the consumer and commercial portfolios. These loans are subject to impairment measurement based on the present value of projected future cash flows discounted at the loan's original effective interest rate, or in certain circumstances, impairment may also be based upon the collateral value or the loan's observable market price if available. Impairment measurement for the renegotiated credit card, unsecured consumer and small business TDR portfolios is based on the present value of projected cash flows discounted using the average portfolio contractual interest rate, excluding promotionally priced loans, in effect prior to restructuring. For purposes of computing this specific loss component of the allowance, larger impaired loans are evaluated individually and smaller impaired loans are evaluated as a pool using historical loss experience for the respective product types and risk ratings of the loans.

The second component of the allowance for loan and lease losses covers the remaining consumer and commercial loans and leases that have incurred losses which are not yet individually identifiable. The allowance for consumer and certain homogeneous commercial loan and lease products is based on aggregated portfolio evaluations, generally by

product type. Loss forecast models are utilized that consider a variety of factors including, but not limited to, historical loss experience, estimated defaults or foreclosures based on portfolio trends, delinquencies, economic trends and credit scores. Our consumer real estate loss forecast model estimates the portion of loans that will default based on individual loan attributes, the most significant of which are refreshed LTV or CLTV, and borrower credit score as well as vintage and geography, all of which are further broken down into current delinquency status. Additionally, we incorporate the delinquency status of underlying first-lien loans on our junior-lien home equity portfolio in our allowance process. Incorporating refreshed LTV and CLTV into our probability of default allows us to factor the impact of changes in home prices into our allowance for loan and lease losses. These loss forecast models are updated on a quarterly basis to incorporate information reflecting the current economic environment. As of September 30, 2013, the loss forecast process resulted in reductions in the allowance for all major consumer portfolios.

The allowance for commercial loan and lease losses is established by product type after analyzing historical loss experience, internal risk rating, current economic conditions, industry performance trends, geographic and obligor concentrations within each portfolio and any other pertinent information. The statistical models for commercial loans are generally updated annually and utilize our historical database of actual defaults and other data. The loan risk ratings and composition of the commercial portfolios used to calculate the allowance are updated at least quarterly to incorporate the most recent data reflecting the current economic environment. For risk-rated

Table of Contents

commercial loans, we estimate the probability of default and the LGD based on our historical experience of defaults and credit losses. Factors considered when assessing the internal risk rating include the value of the underlying collateral, if applicable, the industry in which the obligor operates, the obligor's liquidity and other financial indicators, and other quantitative and qualitative factors relevant to the obligor's credit risk. As of September 30, 2013, changes in portfolio size and composition resulted in an increase in the allowance for all major commercial portfolios.

Also included within the second component of the allowance for loan and lease losses are reserves to cover losses that are incurred but, in our assessment, may not be adequately represented in the historical loss data used in the loss forecast models. For example, factors that we consider include, among others, changes in lending policies and procedures, changes in economic and business conditions, changes in the nature and size of the portfolio, changes in the volume and severity of past due loans and nonaccrual loans, the effect of external factors such as competition, and legal and regulatory requirements. We also consider factors that are applicable to unique portfolio segments. For example, we consider the risk of uncertainty in our loss forecasting models related to junior-lien home equity loans that are current, but have first-lien loans that we do not service that are 30 days or more past due. In addition, we consider the inherent uncertainty in mathematical models that are built upon historical data.

During the three and nine months ended September 30, 2013, the factors that impacted the allowance for loan and lease losses included significant overall improvements in the credit quality of the portfolios driven by improvements in the U.S. economy and housing and labor markets, continuing proactive credit risk management initiatives and the impact of recent higher credit quality originations. Additionally, the resolution of uncertainties through current recognition of net charge-offs has impacted the amount of reserve needed in certain portfolios. Evidencing the improvements in the U.S. economy and housing and labor markets are modest growth in consumer spending, improvements in unemployment levels, a decrease in the absolute level and our share of national consumer bankruptcy filings, and a rise in both residential building activity and overall home prices. In addition to these improvements, paydowns, charge-offs, returns to performing status and upgrades out of criticized continued to outpace new nonaccrual consumer loans and reservable criticized commercial loans, but such loans remained elevated relative to levels experienced prior to the financial crisis.

We monitor differences between estimated and actual incurred loan and lease losses. This monitoring process includes periodic assessments by senior management of loan and lease portfolios and the models used to estimate incurred losses in those portfolios.

Additions to, or reductions of, the allowance for loan and lease losses generally are recorded through charges or credits to the provision for credit losses. Credit exposures deemed to be uncollectible are charged against the allowance for loan and lease losses. Recoveries of previously charged off amounts are credited to the allowance for loan and lease losses.

The allowance for loan and lease losses for the consumer portfolio, as presented in Table 64, was \$15.9 billion at September 30, 2013, a decrease of \$5.1 billion from December 31, 2012. The decrease was primarily driven by the home equity and residential mortgage portfolios due to improved delinquencies and home prices as evidenced by improving LTV statistics as presented in Tables 31 and 33. In addition, the home equity and residential mortgage allowance declined due to write-offs in our PCI loan portfolio. These write-offs decreased the PCI valuation allowance included as part of the allowance for loan and lease losses.

The decrease in the allowance related to the credit card and unsecured consumer lending portfolios in CBB was primarily due to improvement in delinquencies and bankruptcies. For example, in the U.S. credit card portfolio, accruing loans 30 days or more past due decreased to \$2.1 billion at September 30, 2013 from \$2.7 billion (to 2.34 percent from 2.90 percent of outstanding U.S. credit card loans) at December 31, 2012, and accruing loans 90 days or more past due declined to \$1.0 billion at September 30, 2013 from \$1.4 billion (to 1.16 percent from 1.52 percent of

outstanding U.S. credit card loans) at December 31, 2012. See Tables 28, 29, 38 and 40 for additional details on key credit statistics for the credit card and other unsecured consumer lending portfolios.

The allowance for loan and lease losses for the commercial portfolio, as presented in Table 64, was \$3.5 billion at September 30, 2013, a \$383 million increase from December 31, 2012, as continued improvement in credit quality was offset by loan growth across the commercial portfolio. The commercial utilized reservable criticized exposure decreased to \$14.1 billion at September 30, 2013 from \$15.9 billion (to 3.31 percent from 4.10 percent of total commercial utilized reservable exposure) at December 31, 2012. Similarly, nonperforming commercial loans declined to \$1.8 billion at September 30, 2013 from \$3.2 billion (to 0.46 percent from 0.93 percent of outstanding commercial loans) at December 31, 2012. See Tables 44, 45 and 47 for additional details on key commercial credit statistics.

The allowance for loan and lease losses as a percentage of total loans and leases outstanding was 2.10 percent at September 30, 2013 compared to 2.69 percent at December 31, 2012. The decrease in the ratio was primarily due to improved credit quality driven by improved economic conditions and write-offs in the home equity and residential mortgage PCI loan portfolios which led to the reduction in the allowance for credit losses discussed above. The September 30, 2013 and December 31, 2012 ratios above include the PCI loan portfolio. Excluding the PCI loan portfolio, the allowance for loan and lease losses as a percentage of total loans and leases outstanding was 1.81 percent at September 30, 2013 compared to 2.14 percent at December 31, 2012.

Table of Contents

Table 63 presents a rollforward of the allowance for credit losses, which includes the allowance for loan and lease losses and the reserve for unfunded lending commitments, for the three and nine months ended September 30, 2013 and 2012.

Table 63

Annualized net charge-offs and PCI write-offs as a percentage of average loans and leases outstanding ⁽⁵⁾	0.92	2.63	1.17	2.02	
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases at September 30 ^(5, 9)	100	111	100	111	
Ratio of the allowance for loan and lease losses at September 30 to annualized net charge-offs ⁽⁸⁾	2.90	1.60	2.30	1.66	
Ratio of the allowance for loan and lease losses at September 30 to annualized net charge-offs and PCI write-offs	2.30	1.13	1.84	1.46	
Amounts included in allowance for loan and lease losses that are excluded from nonperforming loans and leases at September 30 ⁽¹⁰⁾	\$8,972	\$13,978	\$8,972	\$13,978	
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases, excluding amounts included in the allowance for loan and lease losses that are excluded from nonperforming loans and leases at September 30 ⁽¹⁰⁾	54	% 52	% 54	% 52	%
Loan and allowance ratios excluding PCI loans and the related valuation allowance: ⁽¹¹⁾					
Allowance for loan and lease losses as a percentage of total loans and leases outstanding at September 30 ⁽⁵⁾	1.81	% 2.23	% 1.81	% 2.23	%
Consumer allowance for loan and lease losses as a percentage of total consumer loans and leases outstanding at September 30 ⁽⁶⁾	2.49	3.00	2.49	3.00	
Annualized net charge-offs as a percentage of average loans and leases outstanding ⁽⁵⁾	0.75	1.93	0.96	1.83	
Allowance for loan and lease losses as a percentage of total nonperforming loans and leases at September 30 ^(5, 9)	84	81	84	81	
Ratio of the allowance for loan and lease losses at September 30 to annualized net charge-offs ⁽⁵⁾	2.42	1.17	1.92	1.21	

Outstanding loan and lease balances and ratios do not include loans accounted for under the fair value option.

Loans accounted for under the fair value option were \$10.2 billion and \$7.6 billion at September 30, 2013 and 2012. Average loans accounted for under the fair value option were \$9.8 billion and \$9.2 billion for the three and nine months ended September 30, 2013 compared to \$8.1 billion and \$8.5 billion for the same periods in 2012.

(6) Excludes consumer loans accounted for under the fair value option of \$2.2 billion and \$1.2 billion at September 30, 2013 and 2012.

(7) Excludes commercial loans accounted for under the fair value option of \$8.0 billion and \$6.4 billion at September 30, 2013 and 2012.

Net charge-offs exclude \$443 million and \$1.6 billion of write-offs in the PCI loan portfolio for the three and nine months ended September 30, 2013 compared to \$1.7 billion for both of the same periods in 2012. These write-offs

(8) decreased the PCI valuation allowance included as part of the allowance for loan and lease losses. For more information on PCI write-offs, see Consumer Portfolio Credit Risk Management – Purchased Credit-impaired Loan Portfolio on page 98.

(9) For more information on our definition of nonperforming loans, see pages 104 and 113.

(10) Primarily includes amounts allocated to U.S. credit card and unsecured consumer lending portfolios in CBB, PCI loans and the non-U.S. credit card portfolio in All Other.

(11) For more information on the PCI loan portfolio and the valuation allowance for PCI loans, see Note 5 – Outstanding Loans and Leases and Note 6 – Allowance for Credit Losses to the Consolidated Financial Statements.

Table of Contents

For reporting purposes, we allocate the allowance for credit losses across products. However, the allowance is generally available to absorb any credit losses without restriction. Table 64 presents our allocation by product type.

Table 64

Allocation of the Allowance for Credit Losses by Product Type

(Dollars in millions)	September 30, 2013			December 31, 2012		
	Amount	Percent of Total	Percent of Loans and Leases Outstanding ⁽¹⁾	Amount	Percent of Total	Percent of Loans and Leases Outstanding ⁽¹⁾
Allowance for loan and lease losses						
Residential mortgage	\$4,895	25.19	% 1.93	% \$7,088	29.31	% 2.80
Home equity	5,618	28.91	5.81	7,845	32.45	7.26
U.S. credit card	4,296	22.11	4.76	4,718	19.51	4.97
Non-U.S. credit card	488	2.51	4.40	600	2.48	5.13
Direct/Indirect consumer	546	2.81	0.65	718	2.97	0.86
Other consumer	100	0.52	5.21	104	0.43	6.40
Total consumer	15,943	82.05	2.97	21,073	87.15	3.81
U.S. commercial ⁽²⁾	2,012	10.35	0.90	1,885	7.80	0.90
Commercial real estate	895	4.61	1.99	846	3.50	2.19
Commercial lease financing	98	0.50	0.40	78	0.32	0.33
Non-U.S. commercial	484	2.49	0.52	297	1.23	0.40
Total commercial ⁽³⁾	3,489	17.95	0.90	3,106	12.85	0.90
Allowance for loan and lease losses	19,432	100.00	% 2.10	24,179	100.00	% 2.69
Reserve for unfunded lending commitments	480			513		
Allowance for credit losses ⁽⁴⁾	\$19,912			\$24,692		

Ratios are calculated as allowance for loan and lease losses as a percentage of loans and leases outstanding excluding loans accounted for under the fair value option. Consumer loans accounted for under the fair value option included residential mortgage loans of \$2.2 billion and \$1.0 billion at September 30, 2013 and December 31, 2012. Commercial loans accounted for under the fair value option included U.S. commercial loans of \$1.8 billion and \$2.3 billion and non-U.S. commercial loans of \$6.2 billion and \$5.7 billion at September 30, 2013 and December 31, 2012.

⁽²⁾ Includes allowance for loan and lease losses for U.S. small business commercial loans of \$510 million and \$642 million at September 30, 2013 and December 31, 2012.

⁽³⁾ Includes allowance for loan and lease losses for impaired commercial loans of \$286 million and \$475 million at September 30, 2013 and December 31, 2012.

⁽⁴⁾ Includes \$3.2 billion and \$5.5 billion of valuation allowance presented with the allowance for credit losses related to PCI loans at September 30, 2013 and December 31, 2012.

Reserve for Unfunded Lending Commitments

In addition to the allowance for loan and lease losses, we also estimate probable losses related to unfunded lending commitments such as letters of credit, financial guarantees, unfunded bankers' acceptances and binding loan commitments, excluding commitments accounted for under the fair value option. Unfunded lending commitments are subject to the same assessment as funded loans, including estimates of probability of default and LGD. Due to the

nature of unfunded commitments, the estimate of probable losses must also consider utilization. To estimate the portion of these undrawn commitments that is likely to be drawn by a borrower at the time of estimated default, analyses of the Corporation's historical experience are applied to the unfunded commitments to estimate the funded EAD. The expected loss for unfunded lending commitments is the product of the probability of default, the LGD and the EAD, adjusted for any qualitative factors including economic uncertainty and inherent imprecision in models.

The reserve for unfunded lending commitments at September 30, 2013 was \$480 million, \$33 million lower than December 31, 2012 driven by improved credit quality in the unfunded portfolio.

Table of Contents

Market Risk Management

Market risk is the risk that values of assets and liabilities or revenues will be adversely affected by changes in market conditions. This risk is inherent in the financial instruments associated with our operations, primarily within our Global Markets segment. To a lesser extent, we are also exposed to these risks in other areas of the Corporation. In the event of market stress, these risks could have a material impact on the results of the Corporation.

Our traditional banking loan and deposit products are nontrading positions and are generally reported at amortized cost for assets or the amount owed for liabilities (historical cost). However, these positions are still subject to changes in economic value based on varying market conditions with one of the primary risks being changes in the levels of interest rates. The risk of adverse changes in the economic value of our nontrading positions is managed through our ALM activities. We have elected to account for certain assets and liabilities under the fair value option. For more information on the fair value of certain financial assets and liabilities, see Note 16 – Fair Value Measurements to the Consolidated Financial Statements.

Our trading positions are reported at fair value with changes reflected in income. Trading positions are subject to various changes in market-based risk factors. The majority of this risk is generated by our activities in the interest rate, foreign exchange, credit, mortgage, equity and commodities markets. In addition, the values of assets and liabilities could change due to market liquidity, correlations across markets and expectations of market volatility. We seek to manage these risk exposures by using a variety of techniques that encompass a broad range of financial instruments. The key risk management techniques are discussed in more detail in the Trading Risk Management section.

Global Markets Risk Management is an independent function within the Corporation that supports the Global Banking and Markets Risk Executive. The Global Markets Risk Committee (GMRC), chaired by the Global Markets Risk Executive, has been designated by ALMRC as the primary risk governance authority for Global Markets. The GMRC's focus is to take a forward-looking view of the primary credit, market and operational risks impacting Global Markets and prioritize those that need a proactive risk mitigation strategy.

Global Markets Risk Management is responsible for providing senior management with a clear and comprehensive understanding of the trading risks to which the Corporation is exposed. These responsibilities include the ownership of market risk policy, development of quantitative risk models, calculations of aggregated risk measures, establishing and monitoring position limits consistent with risk appetite, conducting daily reviews and analysis of trading inventory, approving material risk exposures and fulfilling regulatory requirements. Market risks that impact businesses outside of Global Markets are monitored and governed by their respective governance functions.

Quantitative risk models, such as VaR, are an essential component in evaluating the market risks within a portfolio. The Enterprise Model Risk Committee (EMRC) reports to the ALMRC and is responsible for providing management oversight and approval of model risk management and governance. The EMRC defines model risk standards, consistent with the Corporation's Risk Framework and risk appetite, prevailing regulatory guidance and industry best practice. Models must meet certain validation criteria, including effective challenge of the model development process and a sufficient demonstration of developmental evidence incorporating a comparison of alternative theories and approaches. The EMRC ensures that model standards are consistent with model risk requirements and monitors the effective challenge in the model validation process across the Corporation. In addition, the relevant stakeholders must agree on any required limitations or restrictions to the models and maintain a stringent monitoring process to ensure continued compliance.

For more information on our market risk management process, see page 113 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Trading Risk Management

To evaluate risk in our trading activities, we focus on the actual and potential volatility of revenues generated by individual positions as well as portfolios of positions. Various techniques and procedures are utilized to enable the most complete understanding of these risks. Quantitative measures of market risk are evaluated on a daily basis from a single position to the portfolio of the Corporation. These measures include sensitivities of positions to various market risk factors, such as the potential impact on revenue from a one basis point change in interest rates, and statistical measures utilizing both actual and hypothetical market moves, such as VaR and stress testing. Periods of extreme market stress influence the reliability of these techniques to varying degrees. Qualitative evaluations of market risk utilize the suite of quantitative risk measures while understanding each of their respective limitations. Additionally, risk managers independently evaluate the risk of the portfolios under the current market environment and potential future environments.

VaR is a common statistic used to measure market risk as it allows the aggregation of market risk factors, including the effects of portfolio diversification. A VaR model simulates the value of a portfolio under a range of scenarios in order to generate a distribution of potential gains and losses. VaR represents the loss a portfolio is not expected to exceed more than a certain number of times per period, based on a specified holding period, confidence interval and window of historical data. We use one VaR model consistently across the Corporation that uses a historical simulation approach based on a three-year window of historical data. Our primary VaR statistic is equivalent to a 99 percent confidence level. This means that for a VaR with a one-day holding period, there should not be losses in excess of VaR, on average, 99 out of 100 trading days.

Within any VaR model, there are significant and numerous assumptions that will differ from company to company. The accuracy of a VaR model depends on the availability and quality of historical data for each of the risk factors in the portfolio. A VaR model may require additional modeling assumptions for new products that do not have the necessary historical market data or for illiquid positions for which accurate daily prices are not consistently available. For positions with insufficient historical data for the VaR calculation, the process for establishing an appropriate proxy is based on fundamental and statistical analysis of the new product or illiquid position. This analysis identifies reasonable alternatives that replicate both the expected volatility and correlation to other market risk factors that the missing data would be expected to experience.

VaR may not be indicative of realized revenue volatility as changes in market conditions or in the composition of the portfolio can have a material impact on the results. In particular, the historical data used for the VaR calculation might indicate higher or lower levels of portfolio diversification than will be experienced. In order for the VaR model to reflect current market conditions, we update the historical data underlying our VaR model on a bi-weekly basis, or more frequently during periods of market stress, and regularly review the assumptions underlying the model. A relatively minor portion of risks related to our positions are not included in VaR. These risks are regularly reviewed and if deemed material, the VaR results are supplemented.

Global Markets Risk Management continually reviews, evaluates and enhances our VaR model so that it reflects the material risks in our trading portfolio. Changes to the VaR model are reviewed and approved prior to implementation and any material changes are reported to management through the appropriate governance committees.

Market risk VaR for trading activities as presented in Table 65 differs from VaR used for regulatory capital calculations (regulatory VaR). The VaR disclosed in Table 65 excludes both the counterparty CVA, which are adjustments to the mark-to-market value of our derivative exposures to reflect the impact of the credit quality of counterparties on our derivatives assets, and the corresponding hedges. Regulatory standards require that regulatory VaR only exclude the counterparty CVA but include the corresponding hedges. The holding period for regulatory VaR is 10 days while for the market risk VaR presented below it is one day. Both regulatory and market risk VaR

values utilize the same process and methodology. For more information on certain components in regulatory VaR, see Capital Management – Regulatory Capital Changes on page 74.

The market risk across all business segments to which the Corporation is exposed is included in the total market-based trading portfolio VaR results. The majority of this exposure is within the Global Markets segment.

Table of Contents

Table 65 presents period-end, average, high and low daily trading VaR for the three months ended September 30, 2013, June 30, 2013 and September 30, 2012, as well as average daily trading VaR for the nine months ended September 30, 2013 and 2012.

Table 65

Market Risk VaR for Trading Activities

(Dollars in millions)	Three Months Ended September 30, 2013				June 30, 2013				September 30, 2012				Nine Months Ended September 30	
	Period End	Average	High ⁽¹⁾	Low ⁽¹⁾	Period End	Average	High ⁽¹⁾	Low ⁽¹⁾	Period End	Average	High ⁽¹⁾	Low ⁽¹⁾	2013 Average	2012 Average
Foreign exchange	\$18	\$18	\$22	\$13	\$17	\$20	\$42	\$12	\$21	\$25	\$34	\$17	\$21	\$21
Interest rate	22	27	36	20	27	37	53	25	44	37	48	30	36	45
Credit	59	46	63	33	48	53	65	43	57	43	60	35	53	44
Real estate/mortgage	21	23	26	21	23	27	31	23	31	32	40	28	29	34
Equities	22	23	27	17	25	35	56	23	25	23	34	15	31	29
Commodities	11	12	14	11	14	14	18	10	16	12	16	11	13	13
Portfolio diversification	(96)	(95)	—	—	(95)	(117)	—	—	(114)	(117)	—	—	(115)	(119)
Total market-based trading portfolio	\$57	\$54	\$65	\$42	\$59	\$69	\$98	\$52	\$80	\$55	\$80	\$42	\$68	\$67

The high and low for the total portfolio may have occurred on different trading days than the high and low for the ⁽¹⁾ individual components. Therefore the amount of portfolio diversification, which is the difference between the total portfolio and the sum of the individual components, is not relevant.

The decrease in average VaR for the three months ended September 30, 2013 compared to the three months ended June 30, 2013 was driven by lower levels of exposures in the equity and credit markets. Total market-based trading portfolio VaR did not exceed its limit for the three months ended September 30, 2013, remaining within a more narrow range and ending the period slightly below the period-end VaR for the three months ended June 30, 2013.

The graph below presents the daily total market-based trading portfolio VaR for the previous five quarters, corresponding to the data presented in Table 65.

Table of Contents

To enhance the visibility of the market risks to which we are exposed, additional VaR statistics produced within the Corporation's single VaR model are provided in Table 66. Evaluating VaR with additional statistics allows for an increased understanding of the risks in the portfolio as the historical market data used in the VaR calculation does not necessarily follow a predefined statistical distribution. Table 66 presents average trading VaR statistics for 99 percent and 95 percent confidence intervals for the three months ended September 30, 2013, June 30, 2013 and September 30, 2012.

Table 66

Average Market Risk VaR for Trading Activities – Additional VaR Statistics

(Dollars in millions)	Three Months Ended					
	September 30, 2013		June 30, 2013		September 30, 2012	
	99 percent	95 percent	99 percent	95 percent	99 percent	95 percent
Foreign exchange	\$18	\$11	\$20	\$13	\$25	\$16
Interest rate	27	16	37	21	37	23

Portfolio diversification	(95)(52)(117)(67)(117)(70
Total market-based trading portfolio	\$54	\$27	\$69	\$34	\$55	\$29

Limits on quantitative risk measures, including VaR, are monitored on a daily basis. The limits are independently set by market risk management and reviewed on a regular basis to ensure they remain relevant and within our overall risk appetite for market risks. Limits are reviewed in the context of market liquidity, volatility and strategic business priorities. The limits are set at both a granular level to ensure extensive coverage of risks as well as at aggregated portfolios to account for correlations among risk factors. Trading limits are approved at least annually. The ALMRC has given authority to the GMRC to approve changes to trading limits throughout the year. Approved trading limits are stored and tracked in a centralized limits management system. Trading limit excesses are communicated to management for review.

In periods of market stress, the GMRC members communicate daily to discuss losses, key risk positions and any limit excesses. As a result of this process, the businesses may selectively reduce risk. Where economically feasible, positions are sold or macroeconomic hedges are executed to reduce the exposures.

Backtesting

The accuracy of the VaR methodology is evaluated by backtesting, which compares the daily VaR results against the realized daily profit and loss. Backtesting excesses occur when a trading loss exceeds the VaR for the corresponding day. These excesses are evaluated to understand the positions and market moves that produced the trading loss and to ensure that the VaR methodology accurately represents those losses. As our primary VaR statistic used for backtesting is based on a 99 percent confidence interval, we expect one trading loss in excess of VaR every 100 days, or between two to three trading losses in excess of VaR over the course of a year. The number of backtesting excesses observed can differ from the statistically expected number of excesses if the current level of market volatility is materially different than the level of market volatility during the three years of historical data used in the VaR calculation.

We conduct daily backtests on our portfolios and report the results to senior market risk management. Senior management, including the GMRC, regularly reviews and evaluates the results of these tests. The government

agencies that regulate our operations also regularly review these results.

The revenue used for backtesting is defined by regulatory agencies in order to most closely align with the VaR component of the regulatory capital calculation. This revenue differs from total trading-related revenue in that it excludes revenues from trading activities that either do not generate market risk or the market risk cannot be included in VaR. Some examples of the types of revenue excluded for backtesting are fees, commissions, reserves, net interest income and intraday trading revenues. In addition, counterparty CVA is not included in the VaR component of the regulatory capital calculation and is therefore not included in the revenue used for backtesting.

There were no days with backtesting excesses for our total market-based trading portfolio VaR during the three and nine months ended September 30, 2013.

Table of Contents

Total Trading Revenue

Total trading-related revenue represents the total amount earned from trading positions, including market-based net interest income, which are taken in a diverse range of financial instruments and markets. Trading account assets and liabilities are reported at fair value. For more information on fair value, see Note 16 – Fair Value Measurements to the Consolidated Financial Statements. Trading-related revenues can be volatile and are largely driven by general market conditions and customer demand. Also, trading-related revenues are dependent on the volume and type of transactions, the level of risk assumed, and the volatility of price and rate movements at any given time within the ever-changing market environment. Significant daily revenues by business are monitored and the primary drivers of these are reviewed. When it is deemed material, an explanation of these revenues is provided to the GMRC.

The histogram below is a graphic depiction of trading volatility and illustrates the daily level of trading-related revenue for the three months ended September 30, 2013 compared to the three months ended June 30, 2013 and March 31, 2013. During the three months ended September 30, 2013, positive trading-related revenue was recorded for 97 percent, or 62 trading days, of which 69 percent (44 days) were daily trading gains of over \$25 million and the largest loss was \$21 million. These results can be compared to the three months ended June 30, 2013, where positive trading-related revenue was recorded for 89 percent, or 57 trading days, of which 67 percent (43 days) were daily trading gains of over \$25 million and the largest loss was \$54 million. During the three months ended March 31, 2013, positive trading-related revenue was recorded for 100 percent, or 60 trading days, of which 97 percent (58 days) were daily trading gains over \$25 million.

Table of Contents

Trading Portfolio Stress Testing

Because the very nature of a VaR model suggests results can exceed our estimates and are dependent on a limited historical window, we also stress test our portfolio using scenario analysis. This analysis estimates the change in value of our trading portfolio that may result from abnormal market movements.

A set of scenarios, categorized as either historical or hypothetical, are computed daily for the overall trading portfolio and individual businesses. These scenarios include shocks to underlying market risk factors that may be well beyond the shocks found in the historical data used to calculate VaR. Historical scenarios simulate the impact of the market moves that occurred during a period of extended historical market stress. Generally, a 10-business day window or longer representing the most severe point during a crisis is selected for each historical scenario. Hypothetical scenarios provide simulations of the estimated portfolio impact from potential future market stress events. Scenarios are reviewed and updated in response to changing positions and new economic or political information. In addition, new or adhoc scenarios are developed to address specific potential market events. For example, a stress test was conducted to estimate the impact of a full or partial break-up of the Eurozone. The stress tests are reviewed on a regular basis and the results are presented to senior management.

Stress testing for the trading portfolio is integrated with enterprise-wide stress testing and incorporated into the limits framework. A process is in place to promote consistency between the scenarios used for the trading portfolio and those used for enterprise-wide stress testing. The scenarios used for enterprise-wide stress testing purposes differ from the typical trading portfolio scenarios in that they have a longer time horizon and the results are forecasted over multiple periods for use in consolidated capital and liquidity planning. For more information on enterprise-wide stress testing, see Managing Risk – Enterprise-wide Stress Testing on page 70.

Interest Rate Risk Management for Nontrading Activities

The following discussion presents net interest income excluding the impact of trading-related activities.

Interest rate risk represents the most significant market risk exposure to our nontrading balance sheet. Interest rate risk is measured as the potential change in net interest income caused by movements in market interest rates. Client-facing activities, primarily lending and deposit-taking, create interest rate sensitive positions on our balance sheet.

We prepare forward-looking forecasts of net interest income. The baseline forecast takes into consideration expected future business growth, ALM positioning and the direction of interest rate movements as implied by the market-based forward curve. We then measure and evaluate the impact that alternative interest rate scenarios have on the baseline forecast in order to assess interest rate sensitivity under varied conditions. The net interest income forecast is frequently updated for changing assumptions and differing outlooks based on economic trends, market conditions and business strategies. Thus, we continually monitor our balance sheet position in an effort to maintain an acceptable level of exposure to interest rate changes.

The interest rate scenarios that we analyze incorporate balance sheet assumptions such as loan and deposit growth and pricing, changes in funding mix, product repricing and maturity characteristics. Our overall goal is to manage interest rate risk so that movements in interest rates do not significantly adversely affect earnings and capital.

Table 67 presents the spot and 12-month forward rates used in our baseline forecasts at September 30, 2013 and December 31, 2012.

Table 67
Forward Rates

Edgar Filing: BANK OF AMERICA CORP /DE/ - Form 10-Q

	September 30, 2013			December 31, 2012		
	Federal Funds	Three-month LIBOR	10-Year Swap	Federal Funds	Three-month LIBOR	10-Year Swap
Spot rates	0.25	% 0.25	% 2.77	% 0.25	% 0.31	% 1.84
12-month forward rates	0.25	0.42	3.18	0.25	0.37	2.10

Table of Contents

Table 68 shows the pre-tax dollar impact to forecasted net interest income over the next 12 months from September 30, 2013 and December 31, 2012, resulting from instantaneous parallel and non-parallel shocks to the market-based forward curve. Periodically we evaluate the scenarios presented to ensure that they are meaningful in the context of the current rate environment. For further discussion of net interest income excluding the impact of trading-related activities, see page 23.

During the nine months ended September 30, 2013, the 10-year Treasury rate increased more than 80 bps. We continue to be asset sensitive to both a parallel move in interest rates and to a lesser degree a long-end led steepening of the yield curve. Additionally, rising interest rates impact the fair value of debt securities, and accordingly, for debt securities classified as AFS, may adversely affect accumulated OCI and, thus, capital levels.

Table 68

Estimated Net Interest Income Excluding Trading-related Net Interest Income

(Dollars in millions)	Short Rate (bps)	Long Rate (bps)	September 30 2013	December 31 2012
Curve Change				
Parallel shifts				
+100 bps instantaneous shift	+100	+100	\$3,438	\$4,350
-50 bps instantaneous shift	-50	-50	(1,662)	(2,322)
Flatteners				
Short end instantaneous change	+100	—	2,225	2,130
Long end instantaneous change	—	-50	(702)	(1,669)
Steepeners				
Short end instantaneous change	-50	—	(939)	(648)
Long end instantaneous change	—	+100	1,244	2,238

The sensitivity analysis in Table 68 assumes that we take no action in response to these rate shocks. As part of our ALM activities, we use securities, residential mortgages, and interest rate and foreign exchange derivatives in managing interest rate sensitivity.

Securities

The securities portfolio is an integral part of our interest rate risk management, which includes our ALM positioning, and is primarily comprised of debt securities including MBS and to a lesser extent U.S. Treasury, corporate, municipal and other debt securities. As part of the ALM positioning, we use derivatives to hedge certain debt securities to mitigate the interest rate and duration risk. At September 30, 2013 and December 31, 2012, our securities portfolio used for ALM positioning had a carrying value of \$321.0 billion and \$360.3 billion.

During the three months ended September 30, 2013 and 2012, we purchased debt securities of \$26.4 billion and \$37.9 billion, sold \$16.5 billion and \$13.1 billion, and had maturities and received paydowns of \$25.1 billion and \$18.0 billion, respectively. We realized \$356 million and \$339 million in net gains on sales of AFS debt securities. During the nine months ended September 30, 2013 and 2012, we purchased debt securities of \$125.6 billion and \$140.2 billion, sold \$77.5 billion and \$58.9 billion, and had maturities and received paydowns of \$76.8 billion and \$52.2 billion, respectively. We realized \$881 million and \$1.5 billion in net gains on sales of AFS debt securities.

At September 30, 2013, accumulated OCI included an after-tax net unrealized loss of \$860 million on AFS debt securities and an after-tax net unrealized loss of \$5 million on AFS marketable equity securities compared to after-tax net unrealized gains of \$5.7 billion and \$329 million at September 30, 2012. For more information on accumulated OCI, see Note 13 – Accumulated Other Comprehensive Income (Loss) to the Consolidated Financial Statements. The pre-tax net amounts in accumulated OCI related to AFS debt securities decreased \$357 million and \$8.4 billion during

the three and nine months ended September 30, 2013 to a \$1.4 billion net unrealized loss primarily due to the impact of higher interest rates. For more information on our securities portfolio, see Note 4 – Securities to the Consolidated Financial Statements.

We recognized \$7 million and \$20 million of other-than-temporary impairment (OTTI) losses in earnings on AFS debt securities in the three and nine months ended September 30, 2013 compared to losses of \$6 million and \$52 million for the same periods in 2012. The recognition of OTTI losses is based on a variety of factors, including the length of time and extent to which the market value has been less than amortized cost, the financial condition of the issuer of the security including credit ratings and any specific events affecting the operations of the issuer, underlying assets that collateralize the debt security, other industry and macroeconomic conditions, and our intent and ability to hold the security to recovery.

Table of Contents

Residential Mortgage Portfolio

At September 30, 2013 and December 31, 2012, our residential mortgage portfolio was \$253.5 billion and \$252.9 billion excluding \$2.2 billion and \$1.0 billion of consumer residential mortgage loans accounted for under the fair value option. For more information on consumer fair value option loans, see Consumer Portfolio Credit Risk Management – Consumer Loans Accounted for Under the Fair Value Option on page 103. The \$600 million increase in the nine months ended September 30, 2013 was primarily due to new origination volume, the repurchase of certain loans in connection with the FNMA Settlement and repurchases of delinquent FHA loans pursuant to our servicing agreements with GNMA, partially offset by paydowns, charge-offs and transfers to foreclosed properties. For more information on the FNMA Settlement, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements.

Three Months Ended September 30, 2013 Compared to Three Months Ended September 30, 2012

During the three months ended September 30, 2013, CRES and GWIM originated \$14.0 billion of first-lien mortgages that we retained compared to \$8.9 billion in the same period in 2012. We repurchased \$3.1 billion of government loans, primarily FHA-insured loans pursuant to our servicing agreements with GNMA compared to \$2.2 billion in the same period in 2012. We purchased \$144 million of residential mortgages related to ALM activities during the three months ended September 30, 2013; there were none in the same period in 2012. Sales of loans, excluding sales related to our mortgage banking activities, during the period were \$1.1 billion compared to \$17 million in the same period in 2012. Substantially all of the loans sold in the 2013 period were nonperforming or PCI. Gains recognized on the sales of residential mortgages in both periods were not material. We received paydowns of \$13.8 billion compared to \$13.3 billion in the same period in 2012.

Nine Months Ended September 30, 2013 Compared to Nine Months Ended September 30, 2012

During the nine months ended September 30, 2013, CRES and GWIM originated \$37.8 billion of first-lien mortgages that we retained compared to \$25.1 billion in the same period in 2012. Additionally, during the nine months ended September 30, 2013 in connection with the FNMA Settlement, we repurchased certain residential mortgage loans as mentioned above. We repurchased \$9.1 billion of government loans, primarily FHA-insured loans pursuant to our servicing agreements with GNMA compared to \$4.5 billion in the same period in 2012. We purchased \$171 million of residential mortgages related to ALM activities during the nine months ended September 30, 2013; there were none in the same period in 2012. Sales of loans, excluding sales related to our mortgage banking activities, during the period were \$1.4 billion compared to \$75 million in the same period in 2012. Substantially all of the loans sold in the 2013 period were nonperforming or PCI. Gains recognized on the sales of residential mortgages in both periods were not material. We received paydowns of \$43.7 billion compared to \$38.7 billion in the same period in 2012.

Interest Rate and Foreign Exchange Derivative Contracts

Interest rate and foreign exchange derivative contracts are utilized in our ALM activities and serve as an efficient tool to manage our interest rate and foreign exchange risk. We use derivatives to hedge the variability in cash flows or changes in fair value on our balance sheet due to interest rate and foreign exchange components. For more information on our hedging activities, see Note 3 – Derivatives to the Consolidated Financial Statements.

Our interest rate contracts are generally non-leveraged generic interest rate and foreign exchange basis swaps, options, futures and forwards. In addition, we use foreign exchange contracts, including cross-currency interest rate swaps, foreign currency forward contracts and options to mitigate the foreign exchange risk associated with foreign currency-denominated assets and liabilities.

Changes to the composition of our derivatives portfolio during the nine months ended September 30, 2013 reflect actions taken for interest rate and foreign exchange rate risk management. The decisions to reposition our derivatives portfolio are based on the current assessment of economic and financial conditions including the interest rate and foreign currency environments, balance sheet composition and trends, and the relative mix of our cash and derivative positions.

Table of Contents

Table 69 presents derivatives utilized in our ALM activities including those designated as accounting and economic hedging instruments and shows the notional amount, fair value, weighted-average receive-fixed and pay-fixed rates, expected maturity and average estimated durations of our open ALM derivatives at September 30, 2013 and December 31, 2012. These amounts do not include derivative hedges on our MSRs.

Table 69

Asset and Liability Management Interest Rate and Foreign Exchange Contracts

		September 30, 2013							
		Expected Maturity							
(Dollars in millions, average estimated duration in years)	Fair Value	Total	2013	2014	2015	2016	2017	Thereafter	Average Estimated Duration

Foreign exchange contracts (2, 5, 8)	5,636								
Notional amount (7)	(1,200)	(23,438)	8,615	1,303	582	6,183	5,555		
Futures and forward rate contracts	24								
Notional amount (7)	(11,595)	(11,595)	—	—	—	—	—		
Net ALM contracts	\$11,577								

(1) At September 30, 2013, the receive-fixed interest rate swap notional amounts that represent forward starting swaps and which will not be effective until their respective contractual start dates totaled \$600 million compared to none at December 31, 2012. There were no forward starting pay-fixed swap positions at September 30, 2013 compared to \$520 million at December 31, 2012.

(2) Does not include basis adjustments on either fixed-rate debt issued by the Corporation or AFS debt securities, which are hedged using derivatives designated as fair value hedging instruments, that substantially offset the fair values of these derivatives.

(3) At September 30, 2013 and December 31, 2012, the notional amount of same-currency basis swaps was comprised of \$172.8 billion and \$213.5 billion in both foreign currency and U.S. dollar-denominated basis swaps in which both sides of the swap are in the same currency.

(4) Foreign exchange basis swaps consisted of cross-currency variable interest rate swaps used separately or in conjunction with receive-fixed interest rate swaps.

(5) Does not include foreign currency translation adjustments on certain non-U.S. debt issued by the Corporation that substantially offset the fair values of these derivatives.

(6)

The notional amount of option products of \$331 million at September 30, 2013 was comprised of \$324 million in foreign exchange options, \$(11) million in swaptions and \$18 million in purchased caps/floors. Option products of \$4.2 billion at December 31, 2012 were comprised of \$4.2 billion in swaptions and \$18 million in purchased caps/floors.

- (7) Reflects the net of long and short positions. Amounts shown as negative reflect a net short position. The notional amount of foreign exchange contracts of \$(20.6) billion at September 30, 2013 was comprised of \$35.9 billion in foreign currency-denominated and cross-currency receive-fixed swaps, \$(8.5) billion in foreign currency-denominated pay-fixed swaps and \$(48.0) billion in net foreign currency forward rate contracts. Foreign exchange contracts of \$(1.2) billion at December 31, 2012 were comprised of \$41.9 billion in foreign currency-denominated and cross-currency receive-fixed swaps, \$(10.5) billion in foreign currency-denominated pay-fixed swaps and \$(32.6) billion in net foreign currency forward rate contracts.

Table of Contents

We use interest rate derivative instruments to hedge the variability in the cash flows of our assets and liabilities and other forecasted transactions (collectively referred to as cash flow hedges). The net losses on both open and terminated cash flow hedge derivative instruments recorded in accumulated OCI, net-of-tax, were \$2.5 billion and \$2.9 billion at September 30, 2013 and December 31, 2012. These net losses are expected to be reclassified into earnings in the same period as the hedged cash flows affect earnings and will decrease income or increase expense on the respective hedged cash flows. Assuming no change in open cash flow derivative hedge positions and no changes in prices or interest rates beyond what is implied in forward yield curves at September 30, 2013, the pre-tax net losses are expected to be reclassified into earnings as follows: \$889 million, or 23 percent, within the next year, 58 percent in years two through five, and 13 percent in years six through ten, with the remaining six percent thereafter. For more information on derivatives designated as cash flow hedges, see Note 3 – Derivatives to the Consolidated Financial Statements.

We hedge our net investment in non-U.S. operations determined to have functional currencies other than the U.S. dollar using forward foreign exchange contracts that typically settle in less than 180 days, cross-currency basis swaps, foreign exchange options and foreign currency-denominated debt. We recorded net after-tax losses on derivatives and foreign currency-denominated debt in accumulated OCI associated with net investment hedges which were offset by gains on our net investments in consolidated non-U.S. entities at September 30, 2013.

Mortgage Banking Risk Management

We originate, fund and service mortgage loans, which subject us to credit, liquidity and interest rate risks, among others. We determine whether loans will be HFI or held-for-sale at the time of commitment and manage credit and liquidity risks by selling or securitizing a portion of the loans we originate.

Interest rate risk and market risk can be substantial in the mortgage business. Fluctuations in interest rates drive consumer demand for new mortgages and the level of refinancing activity, which in turn, affects total origination and servicing income. Typically, an increase in mortgage interest rates will lead to a decrease in mortgage originations and related fees and an increase in the value of the MSRs driven by lower prepayment expectations. Hedging the various sources of interest rate risk in mortgage banking is a complex process that requires complex modeling and ongoing monitoring. IRLCs and the related residential first mortgage LHFS are subject to interest rate risk between the date of the IRLC and the date the loans are sold to the secondary market. To hedge interest rate risk, we utilize forward loan sale commitments and other derivative instruments including purchased options. These instruments are used to hedge certain market risks of IRLCs and residential first mortgage LHFS. At September 30, 2013 and December 31, 2012, the notional amounts of derivatives economically hedging the IRLCs and residential first mortgage LHFS were \$12.2 billion and \$31.1 billion.

MSRs are nonfinancial assets created when the underlying mortgage loan is sold to investors and we retain the right to service the loan. We use certain derivatives such as interest rate options, interest rate swaps, forward settlement contracts and Eurodollar futures, as well as principal-only and interest-only MBS and U.S. Treasuries to hedge certain market risks of MSRs. The fair value and notional amounts of the derivative contracts and the fair value of securities hedging the MSRs were \$(2.2) billion, \$1.8 trillion and \$4.2 billion at September 30, 2013 and \$2.3 billion, \$1.6 trillion and \$2.3 billion at December 31, 2012. For the three and nine months ended September 30, 2013, we recorded in mortgage banking income gains of \$47 million and losses of \$824 million related to the change in fair value of the derivative contracts and other securities used to hedge the market risks of the MSRs compared to gains of \$920 million and \$2.2 billion for the same periods in 2012. For more information on MSRs, see Note 19 – Mortgage Servicing Rights to the Consolidated Financial Statements and for more information on mortgage banking income, see CRES on page 37.

Table of Contents

Compliance Risk Management

The Global Compliance organization is responsible for overseeing compliance risk, which is the risk of legal or regulatory sanctions, material financial loss or damage to the reputation of the Corporation in the event of the failure of the Corporation to comply with requirements of applicable banking and financial services laws, rules and regulations, related self-regulatory organization standards, and codes of conduct. Compliance is at the core of the Corporation's culture and is a key component of risk management discipline.

The Global Compliance Framework, an addendum to the Bank of America Risk Framework, details the high-level requirements of the global compliance program in one comprehensive document. The Global Compliance Framework also clearly defines roles and responsibilities and is supported by policies that articulate detailed requirements for implementation and execution of the global compliance program. As such, the Global Compliance Framework supports responsible, well-informed compliance risk management that incorporates an ongoing, disciplined approach to proactive planning, oversight, escalation and decision making across the Corporation.

The Global Compliance Framework also provides an outline for senior management and the Board, and/or appropriate Board-level committees, such as the Audit Committee, to continue to leverage in conducting objective oversight of the Corporation's compliance risk management. The Board provides oversight of compliance risks through its Audit Committee.

Operational Risk Management

The Corporation defines operational risk as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk may occur anywhere in the Corporation, including outsourced business processes, and is not limited to operations functions. Its effects may extend beyond financial losses. Operational risk includes legal risk. Successful operational risk management is particularly important to diversified financial services companies because of the nature, volume and complexity of the financial services business. Operational risk is a significant component in the calculation of total risk-weighted assets used in the Basel 3 capital determination. For more information on Basel 3, see Capital Management – Regulatory Capital Changes on page 74.

For more information on our operational risk management activities, see page 120 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Complex Accounting Estimates

Our significant accounting principles, as described in Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K, are essential in understanding the MD&A. Many of our significant accounting principles require complex judgments to estimate the values of assets and liabilities. We have procedures and processes in place to facilitate making these judgments.

The more judgmental estimates impacting results for the nine months ended September 30, 2013 are summarized in the following discussion. We have identified and described the development of the variables most important in the estimation processes that involve mathematical models to derive the estimates. In many cases, there are numerous alternative judgments that could be used in the process of determining the inputs to the models. Where alternatives exist, we have used the factors that we believe represent the most reasonable value in developing the inputs. Actual performance that differs from our estimates of the key variables could impact our results of operations. Separate from the possible future impact to our results of operations from input and model variables, the value of our lending portfolio and market-sensitive assets and liabilities may change subsequent to the balance sheet date, often

significantly, due to the nature and magnitude of future credit and market conditions. Such credit and market conditions may change quickly and in unforeseen ways and the resulting volatility could have a significant, negative effect on future operating results. These fluctuations would not be indicative of deficiencies in our models or inputs.

For additional information, see Complex Accounting Estimates on page 121 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Level 3 Assets and Liabilities

Financial assets and liabilities where values are based on valuation techniques that require inputs that are both unobservable and are significant to the overall fair value measurement are classified as Level 3 under the fair value hierarchy established in applicable accounting guidance. The Level 3 financial assets and liabilities include certain loans, MBS, ABS, CDOs and structured liabilities, as well as highly structured, complex or long-dated derivative contracts, private equity investments and consumer MSR. The fair value of these Level 3 financial assets and liabilities is determined using pricing models, discounted cash flow methodologies or similar techniques for which the determination of fair value requires significant management judgment or estimation.

Table 70

Level 3 Asset and Liability Summary

(Dollars in millions)	September 30, 2013				December 31, 2012			
	Level 3 Fair Value	As a % of Total Level 3 Assets	As a % of Total Assets		Level 3 Fair Value	As a % of Total Level 3 Assets	As a % of Total Assets	
Trading account assets	\$9,026	27.89	% 0.42	%	\$9,559	26.13	% 0.43	%

During the three and nine months ended September 30, 2013, we recognized net losses of \$308 million and net gains of \$2.1 billion on Level 3 assets and liabilities. The net losses during the three months ended September 30, 2013 were primarily losses on net derivative assets, partially offset by gains on trading account assets. Losses on net derivative assets were primarily unrealized losses associated with certain structured products and credit default and total return swaps. Gains on trading account assets were primarily due to realized gains on the sale of corporate bonds as well as distributions received on secondary loan positions held in inventory. The net gains during the nine months ended September 30, 2013 were primarily gains on MSRs, trading account assets and net derivative assets, partially offset by losses on other assets. Gains on MSRs were primarily due to the impact of the increase in interest rates on forecasted prepayments. Gains on trading account assets were primarily due to the same factors as described above and unrealized gains on collateralized loan obligations and secondary loan positions held in inventory. Gains on net derivative assets were primarily unrealized gains associated with the performance of various index option contracts as well as gains on IRLCs, partially offset by unrealized losses associated with certain structured products and credit default and total return swaps. Losses on other assets were primarily due to a write-down of a receivable. There were net unrealized gains of \$29 million (pre-tax) in accumulated OCI on Level 3 assets and liabilities at September 30, 2013. For more information on the components of net realized and unrealized gains and losses during three and nine

months ended September 30, 2013, see Note 16 – Fair Value Measurements to the Consolidated Financial Statements.

Level 3 financial instruments, such as our consumer MSRs, may be hedged with derivatives classified as Level 1 or 2; therefore, gains or losses associated with Level 3 financial instruments may be offset by gains or losses associated with financial instruments classified in other levels of the fair value hierarchy. The Level 3 gains and losses recorded in earnings did not have a significant impact on our liquidity or capital resources.

We conduct a review of our fair value hierarchy classifications on a quarterly basis. Transfers into or out of Level 3 are made if the significant inputs used in the financial models measuring the fair values of the assets and liabilities became unobservable or observable, respectively, in the current marketplace. These transfers are considered to be effective as of the beginning of the quarter in which they occur. For more information on the significant transfers into and out of Level 3 during the three and nine months ended September 30, 2013, see Note 16 – Fair Value Measurements to the Consolidated Financial Statements.

Table of Contents

Goodwill and Intangible Assets

Background

The nature of and accounting for goodwill and intangible assets are discussed in Note 1 – Summary of Significant Accounting Principles and Note 9 – Goodwill and Intangible Assets to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K as well as Complex Accounting Estimates on page 121 of the MD&A of the Corporation's 2012 Annual Report on Form 10-K. Goodwill is reviewed for potential impairment at the reporting unit level on an annual basis, which for the Corporation is as of June 30, and in interim periods if events or circumstances indicate a potential impairment. A reporting unit is an operating segment or one level below. As reporting units are determined after an acquisition or evolve with changes in business strategy, goodwill is assigned to reporting units and it no longer retains its association with a particular acquisition. All of the revenue streams and related activities of a reporting unit, whether acquired or organic, are available to support the value of the goodwill.

Effective January 1, 2013, on a prospective basis, the Corporation adjusted the amount of capital being allocated to the business segments. The adjustment reflects a refinement to the prior-year methodology (economic capital), which focused solely on internal risk-based economic capital models. The refined methodology (allocated capital) now also considers the effect of regulatory capital requirements in addition to internal risk-based economic capital models. For purposes of goodwill impairment testing, we utilized allocated equity as a proxy for the carrying value of our reporting units. Allocated equity in the reporting units is comprised of allocated capital plus capital for the portion of goodwill and intangibles specifically assigned to the reporting unit.

2013 Annual Goodwill Impairment Testing

The Corporation's common stock price improved during 2013; however, our market capitalization remained below our recorded book value. We estimate that the fair value of all reporting units with assigned goodwill in aggregate as of the June 30, 2013 annual goodwill impairment test was \$290.9 billion and the aggregate carrying value of all reporting units with assigned goodwill, as measured by allocated equity, was \$163.5 billion. The common stock capitalization of the Corporation as of June 30, 2013 was \$138.2 billion (\$147.4 billion at September 30, 2013). As none of our reporting units are publicly traded, individual reporting unit fair value determinations do not directly correlate to the Corporation's stock price. Although we believe it is reasonable to conclude that market capitalization could be an indicator of fair value over time, we do not believe that our current market capitalization reflects the aggregate fair value of our individual reporting units.

Estimating the fair value of reporting units is a subjective process that involves the use of estimates and judgments, particularly related to cash flows, the appropriate discount rates and an applicable control premium. We determined the fair values of the reporting units using a combination of valuation techniques consistent with the market approach and the income approach and also utilized independent valuation specialists.

The market approach we used estimates the fair value of the individual reporting units by incorporating any combination of the tangible capital, book capital and earnings multiples from comparable publicly-traded companies in industries similar to that of the reporting unit. The relative weight assigned to these multiples varies among the reporting units based on qualitative and quantitative characteristics, primarily the size and relative profitability of the reporting unit as compared to the comparable publicly-traded companies. Since the fair values determined under the market approach are representative of a noncontrolling interest, we added a control premium to arrive at the reporting units' estimated fair values on a controlling basis.

For purposes of the income approach, we calculated discounted cash flows by taking the net present value of estimated future cash flows and an appropriate terminal value. Our discounted cash flow analysis employs a capital

asset pricing model in estimating the discount rate (i.e., cost of equity financing) for each reporting unit. The inputs to this model include the risk-free rate of return, beta, which is a measure of the level of non-diversifiable risk associated with comparable companies for each specific reporting unit, size premium to reflect the historical incremental return on stocks, market equity risk premium and in certain cases an unsystematic (company-specific) risk factor. The unsystematic risk factor is the input that specifically addresses uncertainty related to our projections of earnings and growth, including the uncertainty related to loss expectations. We utilized discount rates that we believe adequately reflect the risk and uncertainty in the financial markets generally and specifically in our internally developed forecasts. We estimated expected rates of equity returns based on historical market returns and risk/return rates for similar industries of each reporting unit. We use our internal forecasts to estimate future cash flows and actual results may differ from forecasted results.

Table of Contents

During the three months ended September 30, 2013, we completed our annual goodwill impairment test as of June 30, 2013 for all of our reporting units which had goodwill. In performing the first step of the annual goodwill impairment analysis, we compared the fair value of each reporting unit to its estimated carrying value as measured by allocated equity, which includes goodwill. During our 2013 annual goodwill impairment test we also evaluated the U.K. Card business within All Other, as the U.K. Card business comprises the majority of the goodwill included in All Other. To determine fair value, we utilized a combination of the market approach and the income approach. Under the market approach, we compared earnings and equity multiples of the individual reporting units to multiples of public companies comparable to the individual reporting units. The control premium used in the June 30, 2013 annual goodwill impairment test was 35 percent for all reporting units. Under the income approach, we updated our assumptions to reflect the current market environment. The discount rates used in the June 30, 2013 annual goodwill impairment test ranged from 11 percent to 14 percent depending on the relative risk of a reporting unit. Growth rates developed by management for individual revenue and expense items in each reporting unit ranged from (5.4) percent to 11.4 percent.

Based on the results of step one of the annual goodwill impairment test, we determined that step two was not required for any of the reporting units as their fair value exceeded their carrying value indicating there was no impairment.

During the three months ended June 30, 2013, the consumer DFS business was moved from Global Banking to CBB and subsequently constitutes a new separate reporting unit. Allocated equity of \$3.7 billion has been attributed to the reporting unit, which includes \$1.7 billion of goodwill and \$2.0 billion of allocated capital. The goodwill allocated to this reporting unit was reviewed for impairment as part of the annual goodwill impairment testing process. Based on the results of step one of the annual goodwill impairment test, we determined that the fair value of the reporting unit exceeded its carrying value. Although not required, given the recent move and the results of step one, and to further substantiate the value of goodwill, we performed a step two test for this reporting unit. The fair value of the reporting unit was estimated based on the income approach. Significant assumptions for the valuation of consumer DFS under the income approach included cash flow estimates, including expected new account growth, the discount rate and the terminal value. In performing step two of the test, significant assumptions used in measuring the fair value of the assets and liabilities of the reporting unit included discount rates, loss rates and interest rates. The results of the step two test further supported that the goodwill for the consumer DFS reporting unit was not impaired.

On July 31, 2013, the U.S. District Court for the District of Columbia issued a ruling regarding the Federal Reserve's rules implementing the Financial Reform Act's Durbin Amendment. The ruling requires the Federal Reserve to reconsider the current \$0.21 per transaction cap on debit card interchange fees. The Federal Reserve is appealing the ruling and final resolution is expected in the first half of 2014. In performing the annual goodwill impairment test for Card Services within CBB, we considered the impact of the recent ruling in determining the fair value of the reporting unit and, assuming the range initially included in the proposed rule is used for forecasting interchange fees, no goodwill impairment would currently result. If the Federal Reserve, upon final resolution, implements a lower per transaction cap than the initial range, it may have a significant adverse impact on our debit card interchange fee revenue in future periods and the associated goodwill allocated to the Card Services reporting unit.

Table of Contents

Table 71 shows goodwill assigned to the individual reporting units and the fair value as a percentage of the carrying value as of our June 30, 2013 annual goodwill impairment test.

Table 71

Goodwill by Reporting Unit ⁽¹⁾

(Dollars in millions)	June 30, 2013 Estimated Fair Value as a Percent of Allocated Carrying Value		Goodwill
Consumer & Business Banking			
Deposits	130.4	%	\$17,875
Card Services	120.3		10,014
Business Banking	132.4		2,097
Dealer Financial Services	106.4		1,695
Global Banking			
Global Commercial Banking	156.2		16,146
Global Corporate and Investment Banking	228.6		6,231
Global Markets	169.1		5,181
Global Wealth & Investment Management			
U.S. Trust	178.0		2,922
Merrill Lynch Global Wealth Management	434.2		6,776
All Other ⁽²⁾	188.5		775

⁽¹⁾ There was no goodwill in CRES at June 30, 2013.

⁽²⁾ Reflects the goodwill and estimated fair value as a percent of allocated carrying value assigned to the U.K. Card business within All Other. The total amount of goodwill in All Other was \$993 million at June 30, 2013.

In estimating the fair value of the reporting units in step one of the annual goodwill impairment analysis, the fair values can be sensitive to changes in the projected cash flows and assumptions. In some instances, minor changes in the assumptions could impact whether the fair value of a reporting unit is greater than its carrying value. Furthermore, a prolonged decrease or increase in a particular assumption could eventually lead to the fair value of a reporting unit being less than its carrying value. Also, to the extent step two of the annual goodwill impairment analysis is required, changes in the estimated fair values of the individual assets and liabilities may result in a different amount of implied goodwill, and ultimately the amount of goodwill impairment, if any.

Table of Contents

Representations and Warranties

The methodology used to estimate the liability for obligations under representations and warranties related to transfers of residential mortgage loans is a function of the representations and warranties given and considers a variety of factors. Depending upon the counterparty, these factors include actual defaults, estimated future defaults, historical loss experience, estimated home prices, other economic conditions, estimated probability that we will receive a repurchase request, including consideration of whether presentation thresholds will be met, number of payments made by the borrower prior to default and estimated probability that we will be required to repurchase a loan. It also considers other relevant facts and circumstances, such as bulk settlements and identity of the counterparty or type of counterparty, as appropriate. The estimate of the liability for obligations under representations and warranties is based upon currently available information, significant judgment, and a number of factors, including those set forth above, that are subject to change. Changes to any one of these factors could significantly impact the estimate of our liability.

The representations and warranties provision may vary significantly each period as the methodology used to estimate the expense continues to be refined based on the level and type of repurchase requests presented, defects identified, the latest experience gained on repurchase requests and other relevant facts and circumstances. The estimate of the liability for representations and warranties is sensitive to future defaults, loss severity and the net repurchase rate. An assumed simultaneous increase or decrease of 10 percent in estimated future defaults, loss severity and the net repurchase rate would result in an increase or decrease of approximately \$600 million in the representations and warranties liability as of September 30, 2013. These sensitivities are hypothetical and are intended to provide an indication of the impact of a significant change in these key assumptions on the representations and warranties liability. In reality, changes in one assumption may result in changes in other assumptions, which may or may not counteract the sensitivity.

For more information on representations and warranties exposure and the corresponding estimated range of possible loss, see Off-Balance Sheet Arrangements and Contractual Obligations – Representations and Warranties on page 58, as well as Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements herein and Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Glossary

Alt-A Mortgage – A type of U.S. mortgage that, for various reasons, is considered riskier than A-paper, or "prime," and less risky than "subprime," the riskiest category. Alt-A interest rates, which are determined by credit risk, therefore tend to be between those of prime and subprime home loans. Typically, Alt-A mortgages are characterized by borrowers with less than full documentation, lower credit scores and higher LTVs.

Assets in Custody – Consist largely of custodial and non-discretionary trust assets excluding brokerage assets administered for clients. Trust assets encompass a broad range of asset types including real estate, private company ownership interest, personal property and investments.

Assets Under Management (AUM) – The total market value of assets under the investment advisory and discretion of GWIM which generate asset management fees based on a percentage of the assets' market values. AUM reflects assets that are generally managed for institutional, high net-worth and retail clients, and are distributed through various investment products including mutual funds, other commingled vehicles and separate accounts.

Basel 1 – 2013 Rules – Financial services holding companies are subject to the general risk-based capital rules issued by federal banking regulators which was Basel 1 through December 31, 2012. As of January 1, 2013, Basel 1 was amended prospectively, introducing changes to the measurement of risk-weighted assets for exposures subject to market risk.

Carrying Value (with respect to loans) – The amount at which a loan is recorded on the balance sheet. For loans recorded at amortized cost, carrying value is the unpaid principal balance net of unamortized deferred loan origination fees and costs, and unamortized purchase premium or discount. For loans that are or have been on nonaccrual status, the carrying value is also reduced by any net charge-offs that have been recorded and the amount of interest payments applied as a reduction of principal under the cost recovery method. For PCI loans, the carrying value equals fair value upon acquisition adjusted for subsequent cash collections and yield accreted to date. For credit card loans, the carrying value also includes interest that has been billed to the customer. For loans classified as held-for-sale, carrying value is the lower of carrying value as described in the sentences above, or fair value. For loans for which we have elected the fair value option, the carrying value is fair value.

Client Brokerage Assets – Include client assets which are held in brokerage accounts. This includes non-discretionary brokerage and fee-based assets which generate brokerage income and asset management fee revenue.

Committed Credit Exposure – Includes any funded portion of a facility plus the unfunded portion of a facility on which the lender is legally bound to advance funds during a specified period under prescribed conditions.

Credit Derivatives – Contractual agreements that provide protection against a credit event on one or more referenced obligations. The nature of a credit event is established by the protection purchaser and protection seller at the inception of the transaction, and such events generally include bankruptcy or insolvency of the referenced credit entity, failure to meet payment obligations when due, as well as acceleration of indebtedness and payment repudiation or moratorium. The purchaser of the credit derivative pays a periodic fee in return for a payment by the protection seller upon the occurrence, if any, of such a credit event. A credit default swap is a type of a credit derivative.

Credit Valuation Adjustment (CVA) – A portfolio adjustment required to properly reflect the counterparty credit risk exposure as part of the fair value of derivative instruments.

Debit Valuation Adjustment (DVA) – A portfolio adjustment required to properly reflect the Corporation's own credit risk exposure as part of the fair value of derivative instruments.

Interest Rate Lock Commitment (IRLC) – Commitment with a loan applicant in which the loan terms, including interest rate and price, are guaranteed for a designated period of time subject to credit approval.

Letter of Credit – A document issued on behalf of a customer to a third party promising to pay the third party upon presentation of specified documents. A letter of credit effectively substitutes the issuer's credit for that of the customer.

Loan-to-value (LTV) – A commonly used credit quality metric that is reported in terms of ending and average LTV. Ending LTV is calculated as the outstanding carrying value of the loan at the end of the period divided by the estimated value of the property securing the loan. Estimated property values are primarily determined by utilizing the Case-Schiller Home Index, a widely used index based on data from repeat sales of single family homes. Case-Schiller indices are updated quarterly and are reported on a three-month or one-quarter lag. An additional metric related to

LTV is combined loan-to-value (CLTV) which is similar to the LTV metric, yet combines

144

Table of Contents

the outstanding balance on the residential mortgage loan and the outstanding carrying value on the home equity loan or available line of credit, both of which are secured by the same property, divided by the estimated value of the property. A LTV of 100 percent reflects a loan that is currently secured by a property valued at an amount exactly equal to the carrying value or available line of the loan. Under certain circumstances, estimated values can also be determined by utilizing an automated valuation method (AVM) or Mortgage Risk Assessment Corporation (MRAC) index. An AVM is a tool that estimates the value of a property by reference to large volumes of market data including sales of comparable properties and price trends specific to the MSA in which the property being valued is located. The MRAC index is similar to the Case-Schiller Home Index in that it is an index that is based on data from repeat sales of single family homes and is reported on a lag.

Margin Receivable – An extension of credit secured by eligible securities in certain brokerage accounts.

Matched Book – Repurchase and resale agreements and securities borrowed and loaned transactions entered into to accommodate customers and earn interest rate spreads.

Mortgage Servicing Right (MSR) – The right to service a mortgage loan when the underlying loan is sold or securitized. Servicing includes collections for principal, interest and escrow payments from borrowers and accounting for and remitting principal and interest payments to investors.

Net Interest Yield – Net interest income divided by average total interest-earning assets.

Nonperforming Loans and Leases – Includes loans and leases that have been placed on nonaccrual status, including nonaccruing loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulties (TDRs). Loans accounted for under the fair value option, PCI loans and LHFS are not reported as nonperforming loans and leases. Consumer credit card loans, business card loans, consumer loans secured by personal property (except for certain secured consumer loans, including those that have been modified in a TDR), and consumer loans secured by real estate that are insured by the FHA or through long-term credit protection agreements with FNMA and FHLMC (fully-insured loan portfolio), are not placed on nonaccrual status and are, therefore, not reported as nonperforming loans and leases.

Purchased Credit-impaired (PCI) Loan – A loan purchased as an individual loan, in a portfolio of loans or in a business combination with evidence of deterioration in credit quality since origination for which it is probable, upon acquisition, that the investor will be unable to collect all contractually required payments. These loans are recorded at fair value upon acquisition.

Subprime Loans – Although a standard industry definition for subprime loans (including subprime mortgage loans) does not exist, the Corporation defines subprime loans as specific product offerings for higher risk borrowers, including individuals with one or a combination of high credit risk factors, such as low FICO scores, high debt to income ratios and inferior payment history.

Tier 1 Common Capital – Tier 1 capital less preferred stock, qualifying trust preferred securities, hybrid securities and qualifying noncontrolling interest in subsidiaries.

Troubled Debt Restructurings (TDRs) – Loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulties. Certain consumer loans for which a binding offer to restructure has been extended are also classified as TDRs. Concessions could include a reduction in the interest rate to a rate that is below market on the loan, payment extensions, forgiveness of principal, forbearance, loans discharged in bankruptcy or other actions intended to maximize collection. Secured consumer loans that have been discharged in Chapter 7 bankruptcy and have not been reaffirmed by the borrower are classified as TDRs at the time of discharge from bankruptcy. TDRs are generally reported as nonperforming loans and leases while on nonaccrual status.

Nonperforming TDRs may be returned to accrual status when, among other criteria, payment in full of all amounts due under the restructured terms is expected and the borrower has demonstrated a sustained period of repayment performance, typically six months. TDRs that are on accrual status are reported as performing TDRs through the end of the calendar year in which the restructuring occurred or the year in which they are returned to accrual status. In addition, if accruing TDRs bear less than a market rate of interest at the time of modification, they are reported as performing TDRs throughout their remaining lives unless and until they cease to perform in accordance with their modified contractual terms, at which time they would be placed on nonaccrual status and reported as nonperforming TDRs.

Value-at-Risk (VaR) – VaR is a model that simulates the value of a portfolio under a range of hypothetical scenarios in order to generate a distribution of potential gains and losses. VaR represents the loss the portfolio is expected to experience with a given confidence level based on historical data. A VaR model is an effective tool in estimating ranges of potential gains and losses on our trading portfolios.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See Market Risk Management on page 128 in the MD&A and the sections referenced therein for Quantitative and Qualitative Disclosures about Market Risk.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report and pursuant to Rule 13a-15(b) of the Securities Exchange Act of 1934 (Exchange Act), the Corporation's management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness and design of the Corporation's disclosure controls and procedures (as that term is defined in Rule 13a-15(e) of the Exchange Act). Based upon that evaluation, the Corporation's Chief Executive Officer and Chief Financial Officer concluded that the Corporation's disclosure controls and procedures were effective, as of the end of the period covered by this report, in recording, processing, summarizing and reporting information required to be disclosed by the Corporation in reports that it files or submits under the Exchange Act, within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Controls

There have been no changes in the Corporation's internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the three months ended September 30, 2013 that have materially affected or are reasonably likely to materially affect the Corporation's internal control over financial reporting.

Bank of America Corporation and Subsidiaries
Notes to Consolidated Financial Statements

NOTE 1 – Summary of Significant Accounting Principles

Bank of America Corporation (together with its consolidated subsidiaries, the Corporation), a bank holding company and a financial holding company, provides a diverse range of financial services and products throughout the U.S. and in certain international markets. The term "the Corporation" as used herein may refer to Bank of America Corporation individually, Bank of America Corporation and its subsidiaries, or certain of Bank of America Corporation's subsidiaries or affiliates.

The Corporation conducts its activities through banking and nonbanking subsidiaries. The Corporation operates its banking activities primarily under two charters: Bank of America, National Association (Bank of America, N.A. or BANA) and FIA Card Services, National Association (FIA Card Services, N.A. or FIA). On October 1, 2013, the Corporation completed the merger of the Merrill Lynch & Co., Inc. subsidiary into Bank of America Corporation, which had no impact on the Corporation's consolidated results.

Principles of Consolidation and Basis of Presentation

The Consolidated Financial Statements include the accounts of the Corporation and its majority-owned subsidiaries, and those variable interest entities (VIEs) where the Corporation is the primary beneficiary. Intercompany accounts and transactions have been eliminated. Results of operations of acquired companies are included from the dates of acquisition and for VIEs, from the dates that the Corporation became the primary beneficiary. Assets held in an agency or fiduciary capacity are not included in the Consolidated Financial Statements. The Corporation accounts for investments in companies for which it owns a voting interest and for which it has the ability to exercise significant influence over operating and financing decisions using the equity method of accounting or at fair value under the fair value option. These investments are included in other assets. Equity method investments are subject to impairment testing and the Corporation's proportionate share of income or loss is included in equity investment income.

The preparation of the Consolidated Financial Statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts and disclosures. Realized results could differ from those estimates and assumptions.

These unaudited Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. The nature of the Corporation's business is such that the results of any interim period are not necessarily indicative of results for a full year. In the opinion of management, all adjustments, which consist of normal recurring adjustments necessary for a fair statement of the interim period results have been made. The Corporation evaluates subsequent events through the date of filing with the Securities and Exchange Commission (SEC). Certain prior-period amounts have been reclassified to conform to current period presentation.

Proposed Accounting Pronouncements

In December 2012, the Financial Accounting Standards Board (FASB) issued a proposed standard on accounting for expected credit losses. It would replace multiple existing impairment models, including an "incurred loss" model for loans, with an "expected credit loss" model. The FASB announced it would establish the effective date when it issues the final standard. The Corporation cannot predict at this time whether or when a final standard will be issued, when it will be effective or what its final provisions will be. It is possible that the final standard could have a material adverse impact on the Corporation's results of operations if and when it is issued and becomes effective.

Table of Contents

Accounting Policies

All significant accounting policies are discussed either in this Note, in Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K or are included in the Notes herein listed below.

⁽¹⁾ Includes \$13.4 billion and \$30.6 billion of government-sponsored enterprise obligations at September 30, 2013 and December 31, 2012.

Table of Contents

NOTE 3 – Derivatives

Derivative Balances

Derivatives are entered into on behalf of customers, for trading, or to support risk management activities. Derivatives used in risk management activities include derivatives that may or may not be designated in qualifying hedge accounting relationships. Derivatives that are not designated in qualifying hedge accounting relationships are referred to as other risk management derivatives. For more information on the Corporation's derivatives and hedging activities, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. The following tables present derivative instruments included on the Consolidated Balance Sheet in derivative assets and liabilities at September 30, 2013 and December 31, 2012. Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements and have been reduced by the cash collateral received or paid.

⁽¹⁾ Represents the total contract/notional amount of derivative assets and liabilities outstanding.

Offsetting of Derivatives

The Corporation enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements or similar agreements with substantially all of the Corporation's derivative counterparties. Where legally enforceable, these master netting agreements give the Corporation, in the event of default by the counterparty, the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty. For purposes of the Consolidated Balance Sheet, the Corporation offsets derivative assets and liabilities and cash collateral held with the same counterparty where it has such a legally enforceable master netting agreement.

157

Table of Contents

The table below presents derivative instruments included in derivative assets and liabilities on the Consolidated Balance Sheet at September 30, 2013 and December 31, 2012 by primary risk (e.g., interest rate risk) and the platform, where applicable, on which these derivatives are transacted. Exchange-traded derivatives include listed options transacted on an exchange. Over-the-counter (OTC) derivatives include bilateral transactions between the Corporation and a particular counterparty. OTC cleared derivatives include bilateral transactions between the Corporation and a counterparty where the transaction is cleared through a clearinghouse. Balances are presented on a gross basis, prior to the application of counterparty and cash collateral netting. Total gross derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements and have been reduced by the cash collateral received or paid.

Other gross derivative assets and liabilities in the table represent derivatives entered into under master netting agreements where uncertainty exists as to the enforceability of these agreements under bankruptcy laws in some countries or industries, and accordingly, receivables and payables with counterparties in these countries or industries are reported on a gross basis.

Also included in the table is financial instrument collateral related to legally enforceable master netting agreements that represents securities collateral received or pledged and customer cash collateral held at third-party custodians. These amounts are not offset on the Consolidated Balance Sheet but are shown as a reduction to total derivative assets and liabilities in the table to derive net derivative assets and liabilities.

For more information on offsetting of securities financing agreements, see Note 10 – Federal Funds Sold or Purchased, Securities Financing Agreements and Short-term Borrowings.

Offsetting of Derivatives

(Dollars in billions)	September 30, 2013		December 31, 2012	
	Derivative Assets	Derivative Liabilities	Derivative Assets	Derivative Liabilities

Less: Financial instruments collateral ⁽¹⁾	(11.4) (7.5) (11.5) (14.6)
Total net derivative assets/liabilities	\$41.8	\$37.1	\$42.0	\$31.4	

⁽¹⁾ These amounts are limited to the derivative asset/liability balance, and accordingly, do not include excess collateral received/pledged.

Table of Contents

ALM and Risk Management Derivatives

The Corporation's asset and liability management (ALM) and risk management activities include the use of derivatives to mitigate risk to the Corporation including derivatives designated in qualifying hedge accounting relationships and derivatives used in other risk management activities. Interest rate, foreign exchange, equity, commodity and credit contracts are utilized in the Corporation's ALM and risk management activities.

The Corporation maintains an overall interest rate risk management strategy that incorporates the use of interest rate contracts, which are generally non-leveraged generic interest rate and basis swaps, options, futures and forwards, to minimize significant fluctuations in earnings that are caused by interest rate volatility. The Corporation's goal is to manage interest rate sensitivity and volatility so that movements in interest rates do not significantly adversely affect earnings or capital. As a result of interest rate fluctuations, hedged fixed-rate assets and liabilities appreciate or depreciate in fair value. Gains or losses on the derivative instruments that are linked to the hedged fixed-rate assets and liabilities are expected to substantially offset this unrealized appreciation or depreciation.

Market risk, including interest rate risk, can be substantial in the mortgage business. Market risk is the risk that values of mortgage assets or revenues will be adversely affected by changes in market conditions such as interest rate movements. To mitigate the interest rate risk in mortgage banking production income, the Corporation utilizes forward loan sale commitments and other derivative instruments including purchased options and certain debt securities. The Corporation also utilizes derivatives such as interest rate options, interest rate swaps, forward settlement contracts and Eurodollar futures to hedge certain market risks of mortgage servicing rights (MSRs). For more information on MSRs, see Note 19 – Mortgage Servicing Rights.

The Corporation uses foreign exchange contracts to manage the foreign exchange risk associated with certain foreign currency-denominated assets and liabilities, as well as the Corporation's investments in non-U.S. subsidiaries. Foreign exchange contracts, which include spot and forward contracts, represent agreements to exchange the currency of one country for the currency of another country at an agreed-upon price on an agreed-upon settlement date. Exposure to loss on these contracts will increase or decrease over their respective lives as currency exchange and interest rates fluctuate.

The Corporation enters into derivative commodity contracts such as futures, swaps, options and forwards as well as non-derivative commodity contracts to provide price risk management services to customers or to manage price risk associated with its physical and financial commodity positions. The non-derivative commodity contracts and physical inventories of commodities expose the Corporation to earnings volatility. Cash flow and fair value accounting hedges provide a method to mitigate a portion of this earnings volatility.

The Corporation purchases credit derivatives to manage credit risk related to certain funded and unfunded credit exposures. Credit derivatives include credit default swaps (CDS), total return swaps and swaptions. These derivatives are recorded on the Consolidated Balance Sheet at fair value with changes in fair value recorded in other income (loss).

Table of Contents

Derivatives Designated as Accounting Hedges

The Corporation uses various types of interest rate, commodity and foreign exchange derivative contracts to protect against changes in the fair value of its assets and liabilities due to fluctuations in interest rates, commodity prices and exchange rates (fair value hedges). The Corporation also uses these types of contracts and equity derivatives to protect against changes in the cash flows of its assets and liabilities, and other forecasted transactions (cash flow hedges). The Corporation hedges its net investment in consolidated non-U.S. operations determined to have functional currencies other than the U.S. dollar using forward exchange contracts and cross-currency basis swaps, and by issuing foreign currency-denominated debt (net investment hedges).

Fair Value Hedges

The table below summarizes certain information related to fair value hedges for the three and nine months ended September 30, 2013 and 2012, including hedges of interest rate risk on long-term debt that were acquired as part of a business combination and redesignated. At redesignation, the fair value of the derivatives was positive. As the derivatives mature, the fair value will approach zero. As a result, ineffectiveness will occur and the fair value changes in the derivatives and the long-term debt being hedged may be directionally the same in certain scenarios. Based on a regression analysis, the derivatives continue to be highly effective at offsetting changes in the fair value of the long-term debt attributable to interest rate risk.

Derivatives Designated as Fair Value Hedges

Gains (Losses) (Dollars in millions)	Three Months Ended September 30 2013			Nine Months Ended September 30 2013		
	Derivative	Hedged Item	Hedge Ineffectiveness	Derivative	Hedged Item	Hedge Ineffectiveness
Interest rate risk on long-term debt (1)	\$ (313)	\$ 81	\$ (232)	\$ (3,696)	\$ 3,114	\$ (582)
Interest rate and foreign currency risk on long-term debt (1)	991	(1,059)	(68)	(1,129)	945	(184)
Interest rate risk on available-for-sale securities (2)	—	—	—	836	(837)	(1)
Price risk on commodity inventory (3)	1	1	2	1	—	1
Total	\$ 679	\$ (977)	\$ (298)	\$ (3,988)	\$ 3,222	\$ (766)
	2012			2012		
Interest rate risk on long-term debt (1)	\$ 109	\$ (385)	\$ (276)	\$ 518	\$ (1,265)	\$ (747)
Interest rate and foreign currency risk on long-term debt (1)	(716)	647	(69)	(1,455)	1,259	(196)
Interest rate risk on available-for-sale securities (2)	349	(309)	40	(593)	659	66
Price risk on commodity inventory (3)	(24)	24	—	(10)	10	—
Total	\$ (282)	\$ (23)	\$ (305)	\$ (1,540)	\$ 663	\$ (877)

(1) Amounts are recorded in interest expense on long-term debt and in other income (loss).

(2) Amounts are recorded in interest income on debt securities. Hedged AFS securities positions were sold during the six months ended June 30, 2013 and the related hedges were terminated.

(3) Amounts relating to commodity inventory are recorded in trading account profits.

Table of Contents

Cash Flow and Net Investment Hedges

The table below summarizes certain information related to cash flow hedges and net investment hedges for the three and nine months ended September 30, 2013 and 2012. During the next 12 months, net losses in accumulated other comprehensive income (OCI) of \$889 million (\$560 million after-tax) on derivative instruments that qualify as cash flow hedges are expected to be reclassified into earnings. These net losses reclassified into earnings are expected to primarily reduce net interest income related to the respective hedged items. Amounts related to commodity price risk reclassified from accumulated OCI are recorded in trading account profits with the underlying hedged item. Amounts related to price risk on restricted stock awards reclassified from accumulated OCI are recorded in personnel expense.

Amounts related to foreign exchange risk recognized in accumulated OCI on derivatives exclude pre-tax losses of \$7 million related to long-term debt designated as a net investment hedge for the nine months ended September 30, 2012; there were no losses related to these hedges for the three months ended September 30, 2012. There were no such hedges for the three and nine months ended September 30, 2013.

Derivatives Designated as Cash Flow and Net Investment Hedges

	Three Months Ended September 30 2013			Nine Months Ended September 30 2013		
	Gains (Losses) Recognized in Accumulated OCI on Derivatives	Gains (Losses) in Income Reclassified from Accumulated OCI	Hedge Ineffectiveness and Amounts Excluded from Effectiveness Testing ⁽¹⁾	Gains (Losses) Recognized in Accumulated OCI on Derivatives	Gains (Losses) in Income Reclassified from Accumulated OCI	Hedge Ineffectiveness and Amounts Excluded from Effectiveness Testing ⁽¹⁾
(Dollars in millions, amounts pre-tax)						
Cash flow hedges						
Interest rate risk on variable-rate portfolios	\$ (15)	\$ (271)	\$ 1	\$ (305)	\$ (801)	\$ (1)

Total	\$ 86	\$ (285)	\$ —	\$ 123	\$ (726)	\$ —
Net investment hedges						
Foreign exchange risk	\$ (1,149)	\$ 11	\$ (13)	\$ (1,021)	\$ (26)	\$ (180)

(1) Amounts related to derivatives designated as cash flow hedges represent hedge ineffectiveness and amounts related to net investment hedges represent amounts excluded from effectiveness testing.

Table of Contents

Other Risk Management Derivatives

Other risk management derivatives are used by the Corporation to reduce certain risk exposures. These derivatives are not qualifying accounting hedges because either they did not qualify for or were not designated as accounting hedges. The table below presents gains (losses) on these derivatives for the three and nine months ended September 30, 2013 and 2012. These gains (losses) are largely offset by the income or expense that is recorded on the hedged item.

Other Risk Management Derivatives

Gains (Losses) (Dollars in millions)	Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012
Price risk on mortgage banking production income ^(1, 2)	\$(203) \$850	\$687	\$2,240
Market-related risk on mortgage banking servicing income ⁽¹⁾	44	822	(937) 1,970
Credit risk on loans ⁽³⁾	(16) (32) (23) (70
Interest rate and foreign currency risk on ALM activities ⁽⁴⁾	1,195	(309) 1,703	(987
Price risk on restricted stock awards ⁽⁵⁾	192	142	432	392
Other	(4) 16	(15) 105
Total	\$1,208	\$1,489	\$1,847	\$3,650

⁽¹⁾ Net gains on these derivatives are recorded in mortgage banking income.

Includes net gains on interest rate lock commitments related to the origination of mortgage loans that are

⁽²⁾ held-for-sale, which are considered derivative instruments, of \$228 million and \$767 million for the three and nine months ended September 30, 2013 compared to \$1.0 billion and \$2.4 billion for the same periods in 2012.

⁽³⁾ Net gains (losses) on these derivatives are recorded in other income (loss).

The balance is primarily related to hedges of debt securities carried at fair value and hedges of foreign

⁽⁴⁾ currency-denominated debt. Results from these items are recorded in other income (loss). The offsetting mark-to-market, while not included in the table above, is also recorded in other income (loss).

⁽⁵⁾ Gains (losses) on these derivatives are recorded in personnel expense.

Sales and Trading Revenue

The Corporation enters into trading derivatives to facilitate client transactions and to manage risk exposures arising from trading account assets and liabilities. It is the Corporation's policy to include these derivative instruments in its trading activities which include derivatives and non-derivative cash instruments. The resulting risk from these derivatives is managed on a portfolio basis as part of the Corporation's Global Markets business segment. The related sales and trading revenue generated within Global Markets is recorded in various income statement line items including trading account profits and net interest income as well as other revenue categories. However, the majority of income related to derivative instruments is recorded in trading account profits.

Sales and trading revenue includes changes in the fair value and realized gains and losses on the sales of trading and other assets, net interest income, and fees primarily from commissions on equity securities. Revenue is generated by the difference in the client price for an instrument and the price at which the trading desk can execute the trade in the dealer market. For equity securities, commissions related to purchases and sales are recorded in the "Other" column in the Sales and Trading Revenue table. Changes in the fair value of these securities are included in trading account profits. For debt securities, revenue, with the exception of interest associated with the debt securities, is typically included in trading account profits. Unlike commissions for equity securities, the initial revenue related to broker/dealer services for debt securities is typically included in the pricing of the instrument rather than being charged through separate fee arrangements. Therefore, this revenue is recorded in trading account profits as part of the initial mark to fair value. For derivatives, all revenue is included in trading account profits. In transactions where the Corporation acts as agent, which include exchange-traded futures and options, fees are recorded in other income

(loss).

Gains (losses) on certain instruments, primarily loans, that the Global Markets business segment shares with Global Banking are not considered trading instruments and are excluded from sales and trading revenue in their entirety.

162

Table of Contents

The table below, which includes both derivatives and non-derivative cash instruments, identifies the amounts in the respective income statement line items attributable to the Corporation's sales and trading revenue in Global Markets, categorized by primary risk, for the three and nine months ended September 30, 2013 and 2012. The difference between total trading account profits in the table below and in the Consolidated Statement of Income represents trading activities in business segments other than Global Markets. This table includes debit valuation adjustment (DVA) gains (losses), net of hedges. Global Markets results in Note 20 – Business Segment Information are presented on a fully taxable-equivalent (FTE) basis. The table below is not presented on a FTE basis.

Sales and Trading Revenue

(Dollars in millions)	Three Months Ended September 30 2013				Nine Months Ended September 30 2013			
	Trading Account Profits	Net Interest Income	Other ⁽¹⁾	Total	Trading Account Profits	Net Interest Income	Other ⁽¹⁾	Total
Interest rate risk	\$188	\$237	\$31	\$456	\$1,207	\$800	\$66	\$2,073
Foreign exchange risk	215	2	(6)	211	890	3	(21)	872
Equity risk	392	48	505	945	1,663	42	1,598	3,303

Other risk	57	(56)	5	6	374	(141)	35	268
Total sales and trading revenue	\$1,201	\$853	\$614	\$2,668	\$5,939	\$2,714	\$1,511	\$10,164
	2012				2012			
Interest rate risk	\$68	\$267	\$(4)	\$331	\$522	\$752	\$(21)	\$1,253
Foreign exchange risk	193	1	13	207	659	5	12	676
Equity risk	195	15	457	667	988	(90)	1,442	2,340
Credit risk	663	552	130	1,345	2,387	1,632	862	4,881
Other risk	118	(45)	(12)	61	425	(168)	30	287
Total sales and trading revenue	\$1,237	\$790	\$584	\$2,611	\$4,981	\$2,131	\$2,325	\$9,437

(1) Represents amounts in investment and brokerage services and other income (loss) that are recorded in Global Markets and included in the definition of sales and trading revenue. Includes investment and brokerage services revenue of \$480 million and \$1.6 billion for the three and nine months ended September 30, 2013 and \$428 million and \$1.4 billion for the same periods in 2012.

Credit Derivatives

The Corporation enters into credit derivatives primarily to facilitate client transactions and to manage credit risk exposures. Credit derivatives derive value based on an underlying third-party referenced obligation or a portfolio of referenced obligations and generally require the Corporation, as the seller of credit protection, to make payments to a buyer upon the occurrence of a pre-defined credit event. Such credit events generally include bankruptcy of the referenced credit entity and failure to pay under the obligation, as well as acceleration of indebtedness and payment repudiation or moratorium. For credit derivatives based on a portfolio of referenced credits or credit indices, the Corporation may not be required to make payment until a specified amount of loss has occurred and/or may only be required to make payment up to a specified amount.

Table of Contents

Credit derivative instruments where the Corporation is the seller of credit protection and their expiration are summarized at September 30, 2013 and December 31, 2012 in the table below. These instruments are classified as investment and non-investment grade based on the credit quality of the underlying referenced obligation. The Corporation considers ratings of BBB- or higher as investment grade. Non-investment grade includes non-rated credit derivative instruments.

Credit Derivative Instruments

(Dollars in millions)	September 30, 2013 Carrying Value

⁽¹⁾ For credit-related notes, maximum payout/notional is the same as carrying value.

Table of Contents

The notional amount represents the maximum amount payable by the Corporation for most credit derivatives. However, the Corporation does not monitor its exposure to credit derivatives based solely on the notional amount because this measure does not take into consideration the probability of occurrence. As such, the notional amount is not a reliable indicator of the Corporation's exposure to these contracts. Instead, a risk framework is used to define risk tolerances and establish limits to help ensure that certain credit risk-related losses occur within acceptable, predefined limits.

The Corporation manages its market risk exposure to credit derivatives by entering into a variety of offsetting derivative contracts and security positions. For example, in certain instances, the Corporation may purchase credit protection with identical underlying referenced names to offset its exposure. The carrying value and notional amount of written credit derivatives for which the Corporation held purchased credit derivatives with identical underlying referenced names and terms were \$14.2 billion and \$1.1 trillion at September 30, 2013, and \$20.7 billion and \$1.1 trillion at December 31, 2012.

Credit-related notes in the table on page 164 include investments in securities issued by collateralized debt obligation (CDO), collateralized loan obligation (CLO) and credit-linked note vehicles. These instruments are primarily classified as trading securities. The carrying value of these instruments equals the Corporation's maximum exposure to loss. The Corporation is not obligated to make any payments to the entities under the terms of the securities owned. The Corporation discloses internal categorizations of investment grade and non-investment grade consistent with how risk is managed for these instruments.

Credit-related Contingent Features and Collateral

The Corporation executes the majority of its derivative contracts in the OTC market with large, international financial institutions, including broker/dealers and, to a lesser degree, with a variety of non-financial companies. Substantially all of the derivative transactions are executed on a daily margin basis. Therefore, events such as a credit rating downgrade (depending on the ultimate rating level) or a breach of credit covenants would typically require an increase in the amount of collateral required of the counterparty, where applicable, and/or allow the Corporation to take additional protective measures such as early termination of all trades. Further, as previously discussed on page 156, the Corporation enters into legally enforceable master netting agreements which reduce risk by permitting the closeout and netting of transactions with the same counterparty upon the occurrence of certain events.

A majority of the Corporation's derivative contracts contain credit risk-related contingent features, primarily in the form of ISDA master netting agreements and credit support documentation that enhance the creditworthiness of these instruments compared to other obligations of the respective counterparty with whom the Corporation has transacted. These contingent features may be for the benefit of the Corporation as well as its counterparties with respect to changes in the Corporation's creditworthiness and the mark-to-market exposure under the derivative transactions. At September 30, 2013 and December 31, 2012, the Corporation held cash and securities collateral of \$75.6 billion and \$85.6 billion, and posted cash and securities collateral of \$58.7 billion and \$74.1 billion in the normal course of business under derivative agreements.

In connection with certain OTC derivative contracts and other trading agreements, the Corporation can be required to provide additional collateral or to terminate transactions with certain counterparties in the event of a downgrade of the senior debt ratings of the Corporation or certain subsidiaries. The amount of additional collateral required depends on the contract and is usually a fixed incremental amount and/or the market value of the exposure.

At September 30, 2013, the amount of collateral, calculated based on the terms of the contracts, that the Corporation and certain subsidiaries could be required to post to counterparties but had not yet posted to counterparties was approximately \$1.8 billion, including \$800 million for BANA.

Some counterparties are currently able to unilaterally terminate certain contracts, or the Corporation or certain subsidiaries may be required to take other action such as find a suitable replacement or obtain a guarantee. At September 30, 2013, the current liability recorded for these derivative contracts was \$281 million, against which the Corporation and certain subsidiaries had posted approximately \$198 million of collateral.

At September 30, 2013, if the rating agencies had downgraded their long-term senior debt ratings for the Corporation or certain subsidiaries by one incremental notch, the amount of additional collateral contractually required by derivative contracts and other trading agreements would have been approximately \$3.4 billion, including \$3.0 billion for BANA. If the rating agencies had downgraded their long-term senior debt ratings for these entities by an additional second incremental notch, approximately \$4.4 billion in additional incremental collateral, including \$300 million for BANA, would have been required.

Table of Contents

Also, if the rating agencies had downgraded their long-term senior debt ratings for the Corporation or certain subsidiaries by one incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of September 30, 2013 was \$2.3 billion, against which \$1.9 billion of collateral has been posted. If the rating agencies had downgraded their long-term senior debt ratings for the Corporation and certain subsidiaries by a second incremental notch, the derivative liability that would be subject to unilateral termination by counterparties as of September 30, 2013 was an incremental \$1.2 billion, against which \$800 million of collateral has been posted.

Valuation Adjustments on Derivatives

The Corporation records credit risk valuation adjustments on derivatives in order to properly reflect the credit quality of the counterparties and its own credit quality. The Corporation calculates valuation adjustments on derivatives based on a modeled expected exposure that incorporates current market risk factors. The exposure also takes into consideration credit mitigants such as enforceable master netting agreements and collateral. CDS spread data is used to estimate the default probabilities and severities that are applied to the exposures. Where no observable credit default data is available for counterparties, the Corporation uses proxies and other market data to estimate default probabilities and severity.

Valuation adjustments on derivatives are affected by changes in market spreads, non-credit related market factors such as interest rate and currency changes that affect the expected exposure, and other factors like changes in collateral arrangements and partial payments. Credit spreads and non-credit factors can move independently. For example, for an interest rate swap, changes in interest rates may increase the expected exposure which would increase the counterparty credit valuation adjustment (CVA). Independently, counterparty credit spreads may tighten, which would result in an offsetting decrease to CVA.

The Corporation may enter into risk management activities to offset market driven exposures. The Corporation often hedges the counterparty spread risk in CVA with CDS and often hedges the other market risks in both CVA and DVA primarily with currency and interest rate swaps. Since the components of the valuation adjustments on derivatives move independently and the Corporation may not hedge all of the market driven exposures, the effect of a hedge may increase the gross valuation adjustments on derivatives or may result in a gross positive valuation adjustment on derivatives becoming a negative adjustment (or the reverse).

In early 2013, the Corporation refined its methodology for calculating CVA and DVA, on a prospective basis, to adjust the way it values mutual termination clauses in derivatives contracts and to more fully incorporate the potential for the counterparties to default prior to a change in their credit ratings. This change in estimate increased CVA by \$361 million and DVA by \$433 million resulting in a net positive earnings impact of \$72 million at the time of the change and is included in the results for the nine months ended September 30, 2013. The net CVA and DVA excluding the impact of these refinements was a gain of \$230 million and a loss of \$307 million for the nine months ended September 30, 2013.

The table below presents CVA and DVA gains (losses) for the Corporation on a gross and net of hedge basis, which are recorded in trading account profits.

Valuation Adjustments on Derivatives

	Three Months Ended September 30				Nine Months Ended September 30			
	2013		2012		2013		2012	
(Dollars in millions)	Gross	Net	Gross	Net	Gross	Net	Gross	Net
Derivative assets (CVA) ⁽¹⁾	\$335	\$102	\$525	\$75	\$347	\$(131)	\$725	\$237
Derivative liabilities (DVA) ⁽²⁾	(293)	(292)	(606)	(583)	159	126	(1,899)	(2,200)

- (1) At September 30, 2013 and December 31, 2012, the cumulative CVA reduced the derivative assets balance by \$2.0 billion and \$2.4 billion.
- (2) At September 30, 2013 and December 31, 2012, the cumulative DVA reduced the derivative liabilities balance by \$1.0 billion and \$807 million.

Table of Contents

NOTE 4 – Securities

The Corporation's debt securities carried at fair value include debt securities purchased for longer term investment purposes and are used as part of ALM and other strategic activities. Generally, debt securities carried at fair value are accounted for as available-for-sale (AFS) debt securities with unrealized gains and losses reported in accumulated OCI. For certain other debt securities purchased for ALM and other strategic purposes, the Corporation has elected to report those securities at fair value with unrealized gains and losses reported in other income (loss) in the Consolidated Statement of Income.

As a result of growth in the portfolio of debt securities carried at fair value with unrealized gains and losses recorded in other income (loss) and to better reflect how such portfolio is managed as part of the ALM activities, the Corporation changed the presentation of such securities in the first quarter of 2013 to combine debt securities carried at fair value into one line item on the Consolidated Balance Sheet. Previously, the portfolio of debt securities carried at fair value with unrealized gains and losses recorded in other income (loss) was classified in other assets. The Corporation may hedge these debt securities with risk management derivatives with the unrealized gains and losses also reported in other income (loss). Certain debt securities are carried at fair value with unrealized gains and losses reported in other income (loss) to mitigate accounting asymmetry with the risk management derivatives and to achieve operational simplifications. Debt securities purchased for trading purposes are reported in Note 2 – Trading Account Assets and Liabilities. Prior-period amounts have been reclassified to conform to the current period presentation.

The following tables present the amortized cost, gross unrealized gains and losses, and fair value of AFS debt securities, other debt securities carried at fair value, held-to-maturity (HTM) debt securities and marketable equity securities at September 30, 2013 and December 31, 2012.

Debt Securities and Available-for-Sale Marketable Equity Securities

Available-for-sale marketable equity securities ⁽²⁾	\$780	\$732	\$—) \$1,512

⁽¹⁾ At December 31, 2012, the underlying collateral type included approximately 91 percent prime, six percent Alt-A and three percent subprime.

⁽²⁾ Classified in other assets on the Consolidated Balance Sheet.

At September 30, 2013, the accumulated net unrealized losses on AFS debt securities included in accumulated OCI were \$860 million, net of the related income tax benefit of \$528 million. At September 30, 2013 and December 31, 2012, the Corporation had nonperforming AFS debt securities of \$97 million and \$91 million.

The table below presents the components of other debt securities carried at fair value where the changes in fair value are reported in other income (loss) at September 30, 2013 and December 31, 2012. In the three and nine months ended September 30, 2013, the Corporation recorded mark-to-market net losses in other income (loss) of \$56 million and \$1.6 billion on other debt securities carried at fair value, which excludes the benefit of certain hedges also reported in other income (loss). Amounts in the prior-year periods were insignificant.

Other Debt Securities Carried at Fair Value

(Dollars in millions)	September 30 2013	December 31 2012
U.S. Treasury and agency securities	\$ —	\$ 491
Mortgage-backed securities:		
Agency	18,626	13,073

Non-U.S. securities ⁽¹⁾	11,506	9,451
Total	\$ 31,453	\$ 23,944

⁽¹⁾ These securities are used to satisfy certain international regulatory liquidity requirements.

Table of Contents

The Corporation recorded other-than-temporary impairment (OTTI) losses on AFS debt securities for the three and nine months ended September 30, 2013 and 2012 as presented in the table below. A debt security is impaired when its fair value is less than its amortized cost. If the Corporation intends or will more-likely-than-not be required to sell the debt securities prior to recovery, the entire impairment loss is recorded in the Consolidated Statement of Income. For AFS debt securities the Corporation does not intend or will not more-likely-than-not be required to sell, an analysis is performed to determine if any of the impairment is due to credit or whether it is due to other factors (e.g., interest rate). Credit losses are considered unrecoverable and are recorded in the Consolidated Statement of Income with the remaining unrealized losses recorded in accumulated OCI. In certain instances, the credit loss on a debt security may exceed the total impairment, in which case, the portion of the credit loss that exceeds the total impairment is recorded as an unrealized gain in accumulated OCI.

Net Impairment Losses Recognized in Earnings

(Dollars in millions)	Three Months Ended September 30, 2013		
	Non-agency Residential MBS	Non-agency Commercial MBS	Total
Total OTTI losses (unrealized and realized)	\$ (8)	\$ —	\$ (8)

Table of Contents

The Corporation estimates the portion of a loss on a security that is attributable to credit using a discounted cash flow model and estimates the expected cash flows of the underlying collateral using internal credit, interest rate and prepayment risk models that incorporate management's best estimate of current key assumptions such as default rates, loss severity and prepayment rates. Assumptions used for the underlying loans that support the mortgage-backed securities (MBS) can vary widely from loan to loan and are influenced by such factors as loan interest rate, geographic location of the borrower, borrower characteristics and collateral type. Based on these assumptions, the Corporation then determines how the underlying collateral cash flows will be distributed to each MBS issued from the applicable special purpose entity. Expected principal and interest cash flows on an impaired AFS debt security are discounted using the effective yield of each individual impaired AFS debt security.

Significant assumptions used in estimating the expected cash flows for measuring credit losses on non-agency residential mortgage-backed securities (RMBS) were as follows at September 30, 2013.

Significant Assumptions

	Weighted- average	Range ⁽¹⁾	
		10th Percentile (2)	90th Percentile (2)
Annual prepayment speed	10.5%	1.3%	22.1%
Loss severity	45.8	16.4	59.1
Life default rate	44.6	1.3	99.7

⁽¹⁾ Represents the range of inputs/assumptions based upon the underlying collateral.

⁽²⁾ The value of a variable below which the indicated percentile of observations will fall.

Annual constant prepayment speed and loss severity rates are projected considering collateral characteristics such as loan-to-value (LTV), creditworthiness of borrowers as measured using FICO scores, and geographic concentrations. The weighted-average severity by collateral type was 42.6 percent for prime, 46.4 percent for Alt-A and 54.4 percent for subprime at September 30, 2013. Additionally, default rates are projected by considering collateral characteristics including, but not limited to, LTV, FICO and geographic concentration. Weighted-average life default rates by collateral type were 31.3 percent for prime, 55.5 percent for Alt-A and 36.3 percent for subprime at September 30, 2013.

Table of Contents

The following tables present the fair value and the associated gross unrealized losses on AFS debt securities with gross unrealized losses at September 30, 2013 and December 31, 2012, and whether these securities have had gross unrealized losses for less than 12 months or for 12 months or longer.

Temporarily Impaired and Other-than-temporarily Impaired AFS Debt Securities

(Dollars in millions)	September 30, 2013					
	Less than 12 Months		12 Months or Longer		Total

Tax-exempt securities	436	1,880	1,779	1,139	5,234
Total debt securities carried at fair value	\$24,814	\$39,311	\$127,208	\$75,016	\$266,349
Fair value of HTM debt securities ⁽²⁾	\$6	\$76	\$51,643	\$1,126	\$52,851

Average yield is computed using the effective yield of each security at the end of the period, weighted based on the (1) amortized cost of each security. The effective yield considers the contractual coupon, amortization of premiums and accretion of discounts, and excludes the effect of related hedging derivatives.

(2) Substantially all U.S. agency MBS.

Table of Contents

The gross realized gains and losses on sales of AFS debt securities for the three and nine months ended September 30, 2013 and 2012 are presented in the table below.

Gains and Losses on Sales of AFS Debt Securities

(Dollars in millions)	Three Months Ended September 30		Nine Months Ended September 30	
	2013	2012	2013	2012
Gross gains	\$358	\$361	\$901	\$1,957
Gross losses	(2) (22) (20) (466
Net gains on sales of AFS debt securities	\$356	\$339	\$881	\$1,491
Income tax expense attributable to realized net gains on sales of AFS debt securities	\$132	\$125	\$326	\$552

Certain Corporate and Strategic Investments

During the three months ended September 30, 2013, the Corporation sold its remaining investment of 2.0 billion shares of China Construction Bank Corporation (CCB) and realized a pre-tax gain of \$753 million reported in equity investment income in the Consolidated Statement of Income. At December 31, 2012, these shares, representing approximately one percent of CCB, were classified as AFS marketable equity securities and carried at fair value with the after-tax unrealized gain included in accumulated OCI. The strategic assistance agreement between the Corporation and CCB, which includes cooperation in specific business areas, has been extended through 2016.

The Corporation's 49 percent investment in a merchant services joint venture, which is recorded in Consumer & Business Banking (CBB), had a carrying value of \$3.2 billion and \$3.3 billion at September 30, 2013 and December 31, 2012. For additional information, see Note 11 – Commitments and Contingencies.

Home loans 30-59 days past due includes fully-insured loans of \$2.3 billion and nonperforming loans of \$702 million. Home loans 60-89 days past due includes fully-insured loans of \$1.3 billion and nonperforming loans of \$558 million.

- (2) Home loans includes fully-insured loans of \$22.2 billion.
- (3) Home loans includes \$5.5 billion and direct/indirect consumer includes \$63 million of nonperforming loans.
- (4) PCI loan amounts are shown gross of the valuation allowance.
- (5) Total outstandings includes non-U.S. residential mortgage loans of \$93 million.
- (6) Total outstandings includes pay option loans of \$6.7 billion. The Corporation no longer originates this product. Total outstandings includes dealer financial services loans of \$35.9 billion, consumer lending loans of \$4.7 billion,
- (7) U.S. securities-based lending loans of \$28.3 billion, non-U.S. consumer loans of \$8.3 billion, student loans of \$4.8 billion and other consumer loans of \$1.2 billion.
- (8) Total outstandings includes consumer finance loans of \$1.4 billion, consumer leases of \$34 million, consumer overdrafts of \$177 million and other non-U.S. consumer loans of \$5 million.
Consumer loans accounted for under the fair value option were residential mortgage loans of \$1.0 billion.
- (9) Commercial loans accounted for under the fair value option were U.S. commercial loans of \$2.3 billion and non-U.S. commercial loans of \$5.7 billion. For additional information, see Note 16 – Fair Value Measurements and Note 17 – Fair Value Option.
- (10) Total outstandings includes U.S. commercial real estate loans of \$37.2 billion and non-U.S. commercial real estate loans of \$1.5 billion.

Table of Contents

The Corporation mitigates a portion of its credit risk on the residential mortgage portfolio through the use of synthetic securitization vehicles. These vehicles issue long-term notes to investors, the proceeds of which are held as cash collateral. The Corporation pays a premium to the vehicles to purchase mezzanine loss protection on a portfolio of residential mortgage loans owned by the Corporation. Cash held in the vehicles is used to reimburse the Corporation in the event that losses on the mortgage portfolio exceed 10 basis points (bps) of the original pool balance, up to the remaining amount of purchased loss protection of \$376 million and \$500 million at September 30, 2013 and December 31, 2012. The vehicles from which the Corporation purchases credit protection are VIEs. The Corporation does not have a variable interest in these vehicles, and accordingly, these vehicles are not consolidated by the Corporation. Amounts due from the vehicles are recorded in other income (loss) in the Consolidated Statement of Income when the Corporation recognizes a reimbursable loss, as described above. Amounts are collected when reimbursable losses are realized through the sale of the underlying collateral. At September 30, 2013 and December 31, 2012, the Corporation had a receivable of \$206 million and \$305 million from these vehicles for reimbursement of losses, and principal of \$13.5 billion and \$17.6 billion of residential mortgage loans was referenced under these agreements. The Corporation records an allowance for credit losses on these loans without regard to the existence of the purchased loss protection as the protection does not represent a guarantee of individual loans.

In addition, the Corporation has entered into long-term credit protection agreements with FNMA and FHLMC on loans totaling \$27.6 billion and \$24.3 billion at September 30, 2013 and December 31, 2012, providing full protection on residential mortgage loans that become severely delinquent. All of these loans are individually insured and therefore the Corporation does not record an allowance for credit losses related to these loans. For additional information, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees.

Nonperforming Loans and Leases

In accordance with bank regulatory interagency guidance, the Corporation classifies junior-lien home equity loans as nonperforming when the first-lien loan becomes 90 days past due even if the junior-lien loan is performing. At September 30, 2013 and December 31, 2012, \$1.3 billion and \$1.5 billion of such loans were included in nonperforming loans.

In accordance with regulatory guidance, the Corporation classifies consumer real estate loans that have been discharged in Chapter 7 bankruptcy and not reaffirmed by the borrower as troubled debt restructurings (TDRs), irrespective of payment history or delinquency status, even if the repayment terms for the loan have not been otherwise modified. The Corporation continues to have a lien on the underlying collateral. At September 30, 2013, nonperforming loans discharged in Chapter 7 bankruptcy with no change in repayment terms at the time of discharge were \$1.9 billion of which \$1.0 billion were current on their contractual payments while \$742 million were 90 days or more past due. Of the contractually current nonperforming loans, more than 70 percent were discharged in Chapter 7 bankruptcy more than 12 months ago, and nearly 50 percent were discharged 24 months or more ago. As subsequent cash payments are received, the interest component of the payments is generally recorded as interest income on a cash basis and the principal component is recorded as a reduction in the carrying value of the loan.

Table of Contents

The table below presents the Corporation's nonperforming loans and leases including nonperforming TDRs, and loans accruing past due 90 days or more at September 30, 2013 and December 31, 2012. Nonperforming loans held-for-sale (LHFS) are excluded from nonperforming loans and leases as they are recorded at either fair value or the lower of cost or fair value. For more information on the criteria for classification as nonperforming, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Credit Quality

Total commercial	1,785	3,224	285	229
Total loans and leases	\$19,366	\$22,655	\$19,874	\$24,582

⁽¹⁾ Nonperforming loan balances did not include nonaccruing TDRs removed from the PCI loan portfolio prior to January 1, 2010 of \$356 million and \$521 million at September 30, 2013 and December 31, 2012.

Residential mortgage loans in the Core and Legacy Assets & Servicing portfolios accruing past due 90 days or more are fully-insured loans. At September 30, 2013 and December 31, 2012, residential mortgage includes \$13.9 billion and \$17.8 billion of loans on which interest has been curtailed by the FHA, and therefore are no longer accruing interest, although principal is still insured, and \$4.1 billion and \$4.4 billion of loans on which interest is still accruing.

n/a = not applicable

Table of Contents

Credit Quality Indicators

The Corporation monitors credit quality within its Home Loans, Credit Card and Other Consumer, and Commercial portfolio segments based on primary credit quality indicators. For more information on the portfolio segments, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. Within the Home Loans portfolio segment, the primary credit quality indicators are refreshed LTV and refreshed FICO score. Refreshed LTV measures the carrying value of the loan as a percentage of the value of property securing the loan, refreshed quarterly. Home equity loans are evaluated using combined loan-to-value (CLTV) which measures the carrying value of the combined loans that have liens against the property and the available line of credit as a percentage of the appraised value of the property securing the loan, refreshed quarterly. FICO score measures the creditworthiness of the borrower based on the financial obligations of the borrower and the borrower's credit history. At a minimum, FICO scores are refreshed quarterly, and in many cases, more frequently. FICO scores are also a primary credit quality indicator for the Credit Card and Other Consumer portfolio segment and the business card portfolio within U.S. small business commercial. Within the Commercial portfolio segment, loans are evaluated using the internal classifications of pass rated or reservable criticized as the primary credit quality indicators. The term reservable criticized refers to those commercial loans that are internally classified or listed by the Corporation as Special Mention, Substandard or Doubtful, which are asset categories defined by regulatory authorities. These assets have an elevated level of risk and may have a high probability of default or total loss. Pass rated refers to all loans not considered reservable criticized. In addition to these primary credit quality indicators, the Corporation uses other credit quality indicators for certain types of loans.

Table of Contents

The following tables present certain credit quality indicators for the Corporation's Home Loans, Credit Card and Other Consumer, and Commercial portfolio segments, by class of financing receivables, at September 30, 2013 and December 31, 2012.

Home Loans – Credit Quality Indicators

(1)

(Dollars in millions)	September 30, 2013					
	Core Portfolio Residential Mortgage (2)	Legacy Assets & Servicing Residential Mortgage (2)	Residential Mortgage PCI (3)	Core Portfolio Home Equity (2)	Legacy Assets & Servicing Home Equity (2)	Home Equity PCI

Fully-insured loans (5)	70,141	18,733	—	—	—	—
Total home loans	\$177,508	\$55,924	\$20,064	\$55,716	\$33,833	\$7,104

(1) Excludes \$2.2 billion of loans accounted for under the fair value option.

(2) Excludes PCI loans.

(3) Includes \$4.7 billion of pay option loans. The Corporation no longer originates this product.

(4) Refreshed LTV percentages for PCI loans are calculated using the carrying value net of the related valuation allowance.

(5) Credit quality indicators are not reported for fully-insured loans as principal repayment is insured.

Credit Card and Other Consumer – Credit Quality Indicators

(Dollars in millions)	September 30, 2013			
	U.S. Credit Card	Non-U.S. Credit Card	Direct/Indirect Consumer	Other Consumer (1)
Refreshed FICO score				
Less than 620	\$5,112	\$—	\$ 1,293	\$571
Greater than or equal to 620 and less than 680	13,106	—	3,264	273
Greater than or equal to 680 and less than 740	36,054	—	10,087	205
Greater than or equal to 740	36,008	—	27,419	193
Other internal credit metrics (2, 3, 4)	—	11,083	41,972	671
Total credit card and other consumer	\$90,280	\$11,083	\$ 84,035	\$1,913

(1)

65 percent of the other consumer portfolio is associated with portfolios from certain consumer finance businesses that the Corporation previously exited.

(2) Other internal credit metrics may include delinquency status, geography or other factors.

(3) Direct/indirect consumer includes \$36.0 billion of securities-based lending which is overcollateralized and therefore has minimal credit risk and \$4.3 billion of loans the Corporation no longer originates.

Non-U.S. credit card represents the U.K. credit card portfolio which is evaluated using internal credit metrics,

(4) including delinquency status. At September 30, 2013, 98 percent of this portfolio was current or less than 30 days past due, one percent was 30-89 days past due and one percent was 90 days or more past due.

Commercial – Credit Quality Indicators⁽¹⁾

(Dollars in millions)	September 30, 2013				U.S. Small
	U.S. Commercial	Commercial Real Estate	Commercial Lease Financing	Non-U.S. Commercial	Business Commercial ⁽²⁾
Risk ratings					
Pass rated	\$203,620	\$43,135	\$23,500	\$91,399	\$1,313
Reservable criticized	7,494	1,805	1,089	1,546	391
Refreshed FICO score ⁽³⁾					
Less than 620					235
Greater than or equal to 620 and less than 680					548
Greater than or equal to 680 and less than 740					1,594
Greater than or equal to 740					2,820
Other internal credit metrics ^(3, 4)					6,247
Total commercial	\$211,114	\$44,940	\$24,589	\$92,945	\$13,148

(1) Excludes \$8.0 billion of loans accounted for under the fair value option.

U.S. small business commercial includes \$295 million of criticized business card and small business loans which are evaluated using refreshed FICO scores or internal credit metrics, including delinquency status, rather than risk ratings. At September 30, 2013, 99 percent of the balances where internal credit metrics are used was current or less than 30 days past due.

(2) Refreshed FICO score and other internal credit metrics are applicable only to the U.S. small business commercial portfolio.

(4) Other internal credit metrics may include delinquency status, application scores, geography or other factors.

(1) Excludes \$1.0 billion of loans accounted for under the fair value option.

(2) Excludes PCI loans.

(3) Includes \$6.1 billion of pay option loans. The Corporation no longer originates this product.

(4) Refreshed LTV percentages for PCI loans are calculated using the carrying value net of the related valuation allowance.

(5) Credit quality indicators are not reported for fully-insured loans as principal repayment is insured.

Credit Card and Other Consumer – Credit Quality Indicators

(Dollars in millions)	December 31, 2012			
	U.S. Credit Card	Non-U.S. Credit Card	Direct/Indirect Consumer	Other Consumer (1)
Refreshed FICO score				
Less than 620	\$6,188	\$—	\$ 1,896	\$668
Greater than or equal to 620 and less than 680	13,947	—	3,367	301
Greater than or equal to 680 and less than 740	37,167	—	9,592	232
Greater than or equal to 740	37,533	—	25,164	212
Other internal credit metrics (2, 3, 4)	—	11,697	43,186	215
Total credit card and other consumer	\$94,835	\$11,697	\$ 83,205	\$1,628

(1) 87 percent of the other consumer portfolio is associated with portfolios from certain consumer finance businesses that the Corporation previously exited.

(2) Other internal credit metrics may include delinquency status, geography or other factors.

(3) Direct/indirect consumer includes \$36.5 billion of securities-based lending which is overcollateralized and therefore has minimal credit risk and \$4.8 billion of loans the Corporation no longer originates.

Non-U.S. credit card represents the U.K. credit card portfolio which is evaluated using internal credit metrics, (4) including delinquency status. At December 31, 2012, 97 percent of this portfolio was current or less than 30 days past due, one percent was 30-89 days past due and two percent was 90 days or more past due.

Commercial – Credit Quality Indicators⁽¹⁾

(Dollars in millions)	December 31, 2012				
	U.S. Commercial	Commercial Real Estate	Commercial Lease Financing	Non-U.S. Commercial	U.S. Small Business Commercial ⁽²⁾
Risk ratings					
Pass rated	\$189,602	\$34,968	\$22,874	\$72,688	\$1,690
Reservable criticized	7,524	3,669	969	1,496	573
Refreshed FICO score ⁽³⁾					
Less than 620					400
Greater than or equal to 620 and less than 680					580
Greater than or equal to 680 and less than 740					1,553
Greater than or equal to 740					2,496
Other internal credit metrics ^(3, 4)					5,301
Total commercial	\$197,126	\$38,637	\$23,843	\$74,184	\$12,593

(1) Excludes \$8.0 billion of loans accounted for under the fair value option.

U.S. small business commercial includes \$366 million of criticized business card and small business loans which (2) are evaluated using refreshed FICO scores or internal credit metrics, including delinquency status, rather than risk ratings. At December 31, 2012, 98 percent of the balances where internal credit metrics are used was current or less than 30 days past due.

(3) Refreshed FICO score and other internal credit metrics are applicable only to the U.S. small business commercial portfolio.

(4) Other internal credit metrics may include delinquency status, application scores, geography or other factors.

Table of Contents

Impaired Loans and Troubled Debt Restructurings

A loan is considered impaired when, based on current information, it is probable that the Corporation will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming commercial loans and all consumer and commercial TDRs. For additional information, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. Impaired loans exclude nonperforming consumer loans and nonperforming commercial leases unless they are classified as TDRs. Loans accounted for under the fair value option are also excluded. Purchased credit-impaired (PCI) loans are excluded and reported separately on page 195.

Home Loans

Impaired home loans within the Home Loans portfolio segment consist entirely of TDRs. Excluding PCI loans, most modifications of home loans meet the definition of TDRs when a binding offer is extended to a borrower. Modifications of home loans are done in accordance with the government's Making Home Affordable Program (modifications under government programs) or the Corporation's proprietary programs (modifications under proprietary programs). These modifications are considered to be TDRs if concessions have been granted to borrowers experiencing financial difficulties. Concessions may include reductions in interest rates, capitalization of past due amounts, principal and/or interest forbearance, payment extensions, principal and/or interest forgiveness, or combinations thereof. During 2012, the Corporation implemented a borrower assistance program that provides forgiveness of principal balances in connection with the settlement agreement among the Corporation and certain of its affiliates and subsidiaries, together with the U.S. Department of Justice (DOJ), the U.S. Department of Housing and Urban Development (HUD) and other federal agencies, and 49 state Attorneys General concerning the terms of a global settlement resolving investigations into certain origination, servicing and foreclosure practices (National Mortgage Settlement). In addition, the Corporation also provides interest rate modifications to qualified borrowers pursuant to the National Mortgage Settlement and these interest rate modifications are not considered to be TDRs.

Prior to permanently modifying a loan, the Corporation may enter into trial modifications with certain borrowers under both government and proprietary programs, including the borrower assistance program pursuant to the National Mortgage Settlement. Trial modifications generally represent a three- to four-month period during which the borrower makes monthly payments under the anticipated modified payment terms. Upon successful completion of the trial period, the Corporation and the borrower enter into a permanent modification. Binding trial modifications are classified as TDRs when the trial offer is made and continue to be classified as TDRs regardless of whether the borrower enters into a permanent modification.

In accordance with regulatory guidance addressing certain home loans that have been discharged in Chapter 7 bankruptcy, \$3.7 billion of home loans that have been discharged in Chapter 7 bankruptcy with no change in repayment terms at the time of discharge were included in TDRs at September 30, 2013, of which \$1.9 billion were classified as nonperforming and \$1.8 billion were loans fully-insured by the Federal Housing Administration (FHA). Of the \$3.7 billion of home loan TDRs, approximately 21 percent, 33 percent and 46 percent were discharged in Chapter 7 bankruptcy in the nine months ended September 30, 2013, in the year ended December 31, 2012 and in years prior to 2012, respectively. For more information on the regulatory guidance on loans discharged in Chapter 7 bankruptcy, see Nonperforming Loans and Leases in this Note.

In accordance with applicable accounting guidance, a home loan, excluding PCI loans which are reported separately, is not classified as impaired unless it is a TDR. Once such a loan has been designated as a TDR, it is then individually assessed for impairment. Home loan TDRs are measured primarily based on the net present value of the estimated cash flows discounted at the loan's original effective interest rate, as discussed in the following paragraph. If the carrying value of a TDR exceeds this amount, a specific allowance is recorded as a component of the allowance for

loan and lease losses. Alternatively, home loan TDRs that are considered to be dependent solely on the collateral for repayment (e.g., due to the lack of income verification or as a result of being discharged in Chapter 7 bankruptcy) are measured based on the estimated fair value of the collateral and a charge-off is recorded if the carrying value exceeds the fair value of the collateral. Home loans that reached 180 days past due prior to modification had been charged off to their net realizable value before they were modified as TDRs in accordance with established policy. Therefore, modifications of home loans that are 180 or more days past due as TDRs do not have an impact on the allowance for loan and lease losses nor are additional charge-offs required at the time of modification. Subsequent declines in the fair value of the collateral after a loan has reached 180 days past due are recorded as charge-offs. Fully-insured loans are protected against principal loss, and therefore, the Corporation does not record an allowance for loan and lease losses on the outstanding principal balance, even after they have been modified in a TDR.

Table of Contents

The net present value of the estimated cash flows is based on model-driven estimates of projected payments, prepayments, defaults and loss-given-default (LGD). Using statistical modeling methodologies, the Corporation estimates the probability that a loan will default prior to maturity based on the attributes of each loan. The factors that are most relevant to the probability of default are the refreshed LTV, or in the case of a subordinated lien, refreshed CLTV, borrower credit score, months since origination (i.e., vintage) and geography. Each of these factors is further broken down by present collection status (whether the loan is current, delinquent, in default or in bankruptcy). Severity (or LGD) is estimated based on the refreshed LTV for first mortgages or CLTV for subordinated liens. The estimates are based on the Corporation's historical experience as adjusted to reflect an assessment of environmental factors that may not be reflected in the historical data, such as changes in real estate values, local and national economies, underwriting standards and the regulatory environment. The probability of default models also incorporate recent experience with modification programs including redefaults subsequent to modification, a loan's default history prior to modification and the change in borrower payments post-modification.

At September 30, 2013 and December 31, 2012, remaining commitments to lend additional funds to debtors whose terms have been modified in a home loan TDR were immaterial. Home loan foreclosed properties totaled \$546 million and \$650 million at September 30, 2013 and December 31, 2012.

The table below presents impaired loans in the Corporation's Home Loans portfolio segment at September 30, 2013 and December 31, 2012, and for the three and nine months ended September 30, 2013 and 2012, and includes primarily loans managed by Legacy Assets & Servicing. Certain impaired home loans do not have a related allowance as the current valuation of these impaired loans exceeded the carrying value.

Table of Contents

The table below presents the September 30, 2013 and 2012 unpaid principal balance, carrying value, and average pre- and post-modification interest rates of home loans that were modified in TDRs during the three and nine months ended September 30, 2013 and 2012, and net charge-offs that were recorded during the period in which the modification occurred. The following Home Loans portfolio segment tables include loans that were initially classified as TDRs during the period and also loans that had previously been classified as TDRs and were modified again during the period. These TDRs are managed by Legacy Assets & Servicing.

Home Loans – TDRs Entered into During the Three Months Ended September 30, 2013 and 2012¹⁾

(Dollars in millions)	September 30, 2013				Three Months Ended September 30, 2013

Loans discharged in Chapter 7 bankruptcy ⁽²⁾	2,877	588	3,465
Total modifications	\$8,179	\$785	\$8,964

⁽¹⁾ Includes other modifications such as term or payment extensions and repayment plans.

Includes loans discharged in Chapter 7 bankruptcy with no change in repayment terms that are classified as TDRs in accordance with regulatory guidance implemented in the third quarter of 2012. The amount for the nine months

⁽²⁾ ended September 30, 2012 represents the cumulative impact upon adoption of the regulatory guidance. For the nine months ended September 30, 2013, home loans of \$671 million, or 53 percent of loans discharged in Chapter 7 bankruptcy, were current or less than 60 days past due.

Table of Contents

The table below presents the carrying value of loans that entered into payment default during the three and nine months ended September 30, 2013 and 2012 and that were modified in a TDR during the 12 months preceding payment default. A payment default for home loan TDRs is recognized when a borrower has missed three monthly payments (not necessarily consecutively) since modification. Payment default on a trial modification where the borrower has not yet met the terms of the agreement are included in the table below if the borrower is 90 days or more past due three months after the offer to modify is made.

Home Loans – TDRs Entering Payment Default That Were Modified During the Preceding 12 Months

(Dollars in millions)	Three Months Ended September 30, 2013

Trial modifications	963	16	979
Total modifications	\$1,883	\$33	\$1,916

⁽¹⁾ Includes loans discharged in Chapter 7 bankruptcy with no change in repayment terms that are classified as TDRs in accordance with regulatory guidance implemented in the third quarter of 2012.

Table of Contents

Credit Card and Other Consumer

Impaired loans within the Credit Card and Other Consumer portfolio segment consist entirely of loans that have been modified in TDRs (the renegotiated credit card and other consumer TDR portfolio, collectively referred to as the renegotiated TDR portfolio). The Corporation seeks to assist customers that are experiencing financial difficulty by modifying loans while ensuring compliance with federal laws and guidelines. Credit card and other consumer loan modifications generally involve reducing the interest rate on the account and placing the customer on a fixed payment plan not exceeding 60 months, all of which are considered TDRs. In addition, non-U.S. credit card modifications may involve reducing the interest rate on the account without placing the customer on a fixed payment plan, and are also considered TDRs. In all cases, the customer's available line of credit is canceled. The Corporation makes loan modifications directly with borrowers for debt held only by the Corporation (internal programs). Additionally, the Corporation makes loan modifications for borrowers working with third-party renegotiation agencies that provide solutions to customers' entire unsecured debt structures (external programs).

In 2012, regulatory guidance was implemented addressing certain consumer real estate loans that have been discharged in Chapter 7 bankruptcy. The Corporation applies this guidance to other secured consumer loans that have been discharged in Chapter 7 bankruptcy, and such loans are classified as TDRs, written down to collateral value and placed on nonaccrual status no later than the time of discharge. For more information on the regulatory guidance on loans discharged in Chapter 7 bankruptcy, see Nonperforming Loans and Leases in this Note.

All credit card and substantially all other consumer loans that have been modified in TDRs remain on accrual status until the loan is either paid in full or charged off, which occurs no later than the end of the month in which the loan becomes 180 days past due or generally at 120 days past due for a loan that was placed on a fixed payment plan after July 1, 2012.

The allowance for impaired credit card and substantially all other consumer loans is based on the present value of projected cash flows, which incorporates the Corporation's historical payment default and loss experience on modified loans, discounted using the portfolio's average contractual interest rate, excluding promotionally priced loans, in effect prior to restructuring. Prior to modification, credit card and other consumer loans are included in homogeneous pools which are collectively evaluated for impairment. For these portfolios, loss forecast models are utilized that consider a variety of factors including, but not limited to, historical loss experience, delinquency status, economic trends and credit scores.

Table of Contents

The table below provides information on the Corporation's renegotiated TDR portfolio in the Credit Card and Other Consumer portfolio segment at September 30, 2013 and December 31, 2012, and for the three and nine months ended September 30, 2013 and 2012.

Other consumer	8	—	—	8
Total renegotiated TDRs	\$372	\$237	\$—	\$609

Credit card and other consumer loans are deemed to be in payment default during the quarter in which a borrower misses the second of two consecutive payments. Payment defaults are one of the factors considered when projecting future cash flows in the calculation of the allowance for loan and lease losses for impaired credit card and other consumer loans. Based on historical experience, the Corporation estimates that 23 percent of new U.S. credit card TDRs, 69 percent of new non-U.S. credit card TDRs and 19 percent of new direct/indirect consumer TDRs may be in payment default within 12 months after modification. Loans that entered into payment default during the three and nine months ended September 30, 2013 that had been modified in a TDR during the preceding 12 months were \$11 million and \$49 million for U.S. credit card, \$60 million and \$181 million for non-U.S. credit card and \$1 million and \$4 million for direct/indirect consumer. During the three and nine months ended September 30, 2012, loans that entered into payment default that had been modified in a TDR during the preceding 12 months were \$40 million and \$173 million for U.S. credit card, \$69 million and \$228 million for non-U.S. credit card and \$6 million and \$31 million for direct/indirect consumer.

Table of Contents

Commercial Loans

Impaired commercial loans, which include nonperforming loans and TDRs (both performing and nonperforming), are primarily measured based on the present value of payments expected to be received, discounted at the loan's original effective interest rate. Commercial impaired loans may also be measured based on observable market prices or, for loans that are solely dependent on the collateral for repayment, the estimated fair value of collateral less costs to sell. If the carrying value of a loan exceeds this amount, a specific allowance is recorded as a component of the allowance for loan and lease losses.

Modifications of loans to commercial borrowers that are experiencing financial difficulty are designed to reduce the Corporation's loss exposure while providing the borrower with an opportunity to work through financial difficulties, often to avoid foreclosure or bankruptcy. Each modification is unique and reflects the individual circumstances of the borrower. Modifications that result in a TDR may include extensions of maturity at a concessionary (below market) rate of interest, payment forbearances or other actions designed to benefit the customer while mitigating the Corporation's risk exposure. Reductions in interest rates are rare. Instead, the interest rates are typically increased, although the increased rate may not represent a market rate of interest. Infrequently, concessions may also include principal forgiveness in connection with foreclosure, short sale or other settlement agreements leading to termination or sale of the loan.

At the time of restructuring, the loans are remeasured to reflect the impact, if any, on projected cash flows resulting from the modified terms. If there was no forgiveness of principal and the interest rate was not decreased, the modification may have little or no impact on the allowance established for the loan. If a portion of the loan is deemed to be uncollectible, a charge-off may be recorded at the time of restructuring. Alternatively, a charge-off may have already been recorded in a previous period such that no charge-off is required at the time of modification. For more information on modifications for the U.S. small business commercial portfolio, see Credit Card and Other Consumer in this Note.

At September 30, 2013 and December 31, 2012, remaining commitments to lend additional funds to debtors whose terms have been modified in a commercial loan TDR were immaterial. Commercial foreclosed properties totaled \$116 million and \$250 million at September 30, 2013 and December 31, 2012.

Table of Contents

The table below presents impaired loans in the Corporation's Commercial loan portfolio segment at September 30, 2013 and December 31, 2012, and for the three and nine months ended September 30, 2013 and 2012. Certain impaired commercial loans do not have a related allowance as the valuation of these impaired loans exceeded the carrying value, which is net of previously recorded charge-offs.

Non-U.S. commercial	21	7	—
U.S. small business commercial ⁽¹⁾	7	7	1
Total	\$1,496	\$1,354	\$32

	September 30, 2012		Nine Months Ended September 30, 2012
	U.S. commercial	\$558	\$534
Commercial real estate	737	695	12
Non-U.S. commercial	87	87	—
U.S. small business commercial ⁽¹⁾	20	20	3
Total	\$1,402	\$1,336	\$30

⁽¹⁾ U.S. small business commercial TDRs are comprised of renegotiated small business card loans.

A commercial TDR is generally deemed to be in payment default when the loan is 90 days or more past due, including delinquencies that were not resolved as part of the modification. U.S. small business commercial TDRs are deemed to be in payment default during the quarter in which a borrower misses the second of two consecutive payments. Payment defaults are one of the factors considered when projecting future cash flows, along with observable market prices or fair value of collateral when measuring the allowance for loan losses. TDRs that were in payment default at September 30, 2013 and 2012 had a carrying value of \$128 million and \$129 million for U.S. commercial, \$269 million and \$390 million for commercial real estate and \$1 million and \$28 million for U.S. small business commercial.

Table of Contents

Purchased Credit-impaired Loans

PCI loans are acquired loans with evidence of credit quality deterioration since origination for which it is probable at purchase date that the Corporation will be unable to collect all contractually required payments. The following table provides details on PCI loans acquired in connection with the FNMA Settlement during the nine months ended September 30, 2013.

Purchased Loans at Acquisition Date

(Dollars in millions)

Contractually required payments including interest	\$8,274
Less: Nonaccretable difference	2,159
Cash flows expected to be collected ⁽¹⁾	6,115
Less: Accretable yield	1,125
Fair value of loans acquired	\$4,990

⁽¹⁾ Represents undiscounted expected principal and interest cash flows at acquisition.

The table below shows activity for the accretable yield on PCI loans, which primarily includes the Countrywide Financial Corporation (Countrywide) portfolio and loans repurchased in connection with the FNMA Settlement. For more information on the FNMA Settlement, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees. The amount of accretable yield is affected by changes in credit outlooks, including metrics such as default rates and loss severities, prepayments speeds, which can change the amount and period of time over which interest payments are expected to be received, and the interest rates on variable rate loans. The reclassifications from nonaccretable difference during the three and nine months ended September 30, 2013 were due to increases in expected cash flows driven by improved home prices and lower expected defaults, along with a decrease in prepayment speeds as a result of rising interest rates. Changes in the prepayment assumption affect the expected remaining life of the portfolio which results in a change to the amount of future interest cash flows.

Rollforward of Accretable Yield

(Dollars in millions)	Three Months Ended September 30, 2013	Nine Months Ended September 30, 2013
Accretable yield, beginning of period	\$6,775	\$4,644
Accretion	(303)	(901)
Loans purchased	—	1,125
Disposals/transfers	(81)	(219)
Reclassifications from nonaccretable difference	292	2,034
Accretable yield, September 30, 2013	\$6,683	\$6,683

For more information on PCI loans, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K and Note 6 – Allowance for Credit Losses herein for the carrying value and valuation allowance for PCI loans.

Loans Held-for-sale

The Corporation had LHFS of \$15.0 billion and \$19.4 billion at September 30, 2013 and December 31, 2012. Proceeds, including cash and securities, from sales, securitizations and paydowns of LHFS were \$65.5 billion and \$39.5 billion for the nine months ended September 30, 2013 and 2012. Amounts used for originations and purchases of LHFS were \$55.6 billion and \$39.8 billion for the nine months ended September 30, 2013 and 2012.

Table of Contents

NOTE 7 – Securitizations and Other Variable Interest Entities

The Corporation utilizes VIEs in the ordinary course of business to support its own and its customers' financing and investing needs. The Corporation routinely securitizes loans and debt securities using VIEs as a source of funding for the Corporation and as a means of transferring the economic risk of the loans or debt securities to third parties. The assets are transferred into a trust or other securitization vehicle such that the assets are legally isolated from the creditors of the Corporation and are not available to satisfy its obligations. These assets can only be used to settle obligations of the trust or other securitization vehicle. The Corporation also administers, structures or invests in other VIEs including CDOs, investment vehicles and other entities. For more information on the Corporation's utilization of VIEs, see Note 1 – Summary of Significant Accounting Principles and Note 7 – Securitizations and Other Variable Interest Entities to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

The tables within this Note present the assets and liabilities of consolidated and unconsolidated VIEs at September 30, 2013 and December 31, 2012, in situations where the Corporation has continuing involvement with transferred assets or if the Corporation otherwise has a variable interest in the VIE. The tables also present the Corporation's maximum loss exposure at September 30, 2013 and December 31, 2012 resulting from its involvement with consolidated VIEs and unconsolidated VIEs in which the Corporation holds a variable interest. The Corporation's maximum loss exposure is based on the unlikely event that all of the assets in the VIEs become worthless and incorporates not only potential losses associated with assets recorded on the Consolidated Balance Sheet but also potential losses associated with off-balance sheet commitments such as unfunded liquidity commitments and other contractual arrangements. The Corporation's maximum loss exposure does not include losses previously recognized through write-downs of assets.

The Corporation invests in asset-backed securities (ABS) issued by third-party VIEs with which it has no other form of involvement. These securities are included in Note 2 – Trading Account Assets and Liabilities and Note 4 – Securities. In addition, the Corporation uses VIEs such as trust preferred securities trusts in connection with its funding activities. For additional information, see Note 12 – Long-term Debt to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. The Corporation also uses VIEs in the form of synthetic securitization vehicles to mitigate a portion of the credit risk on its residential mortgage loan portfolio, as described in Note 5 – Outstanding Loans and Leases. The Corporation uses VIEs, such as cash funds managed within Global Wealth & Investment Management (GWIM), to provide investment opportunities for clients. These VIEs, which are not consolidated by the Corporation, are not included in the tables within this Note.

Except as described below and in Note 7 – Securitizations and Other Variable Interest Entities to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K, the Corporation did not provide financial support to consolidated or unconsolidated VIEs during the three and nine months ended September 30, 2013 or the year ended December 31, 2012 that it was not previously contractually required to provide, nor does it intend to do so.

Mortgage-related Securitizations

First-lien Mortgages

As part of its mortgage banking activities, the Corporation securitizes a portion of the first-lien residential mortgage loans it originates or purchases from third parties, generally in the form of MBS guaranteed by government-sponsored enterprises, FNMA and FHLMC (collectively the GSEs), or GNMA in the case of FHA-insured and U.S. Department of Veterans Affairs (VA)-guaranteed mortgage loans. Securitization usually occurs in conjunction with or shortly after loan closing or purchase. In addition, the Corporation may, from time to time, securitize commercial mortgages it originates or purchases from other entities. The Corporation typically services the loans it securitizes. Further, the Corporation may retain beneficial interests in the securitization trusts including senior and subordinate securities and

equity tranches issued by the trusts. Except as described below and in Note 8 – Representations and Warranties Obligations and Corporate Guarantees, the Corporation does not provide guarantees or recourse to the securitization trusts other than standard representations and warranties.

Table of Contents

The table below summarizes select information related to first-lien mortgage securitizations for the three and nine months ended September 30, 2013 and 2012.

First-lien Mortgage Securitizations

	Three Months Ended September 30			
	Residential Mortgage - Agency		Commercial Mortgage	
(Dollars in millions)	2013	2012	2013	2012
Cash proceeds from new securitizations ⁽¹⁾	\$14,068	\$12,461	\$—	\$335
Gain (loss) on securitizations ⁽²⁾	36	(89) —	—
	Nine Months Ended September 30			
	2013	2012	2013	2012
Cash proceeds from new securitizations ⁽¹⁾	\$41,444	\$27,688	\$208	\$660
Gain (loss) on securitizations ⁽²⁾	92	(151) —	—

- (1) The Corporation sells residential mortgage loans to GSEs in the normal course of business and receives MBS in exchange which may then be sold into the market to third-party investors for cash proceeds. Substantially all of the first-lien residential mortgage loans securitized are initially classified as LHFS and accounted for under the fair value option. As such, gains are recognized on these LHFS prior to securitization. The Corporation recognized \$379 million and \$1.7 billion of gains, net of hedges, on loans securitized during the three and nine months ended September 30, 2013 compared to \$563 million and \$1.3 billion for the same periods in 2012.
- (2) Corporation recognized \$379 million and \$1.7 billion of gains, net of hedges, on loans securitized during the three and nine months ended September 30, 2013 compared to \$563 million and \$1.3 billion for the same periods in 2012.

In addition to cash proceeds as reported in the table above, the Corporation received securities with an initial fair value of \$490 million and \$3.0 billion in connection with first-lien mortgage securitizations for the three and nine months ended September 30, 2013 compared to \$315 million and \$2.5 billion for the same periods in 2012. All of these securities were initially classified as Level 2 assets within the fair value hierarchy. During the three and nine months ended September 30, 2013 and 2012, there were no changes to the initial classification.

The Corporation recognizes consumer MSR from the sale or securitization of first-lien mortgage loans. Servicing fee and ancillary fee income on consumer mortgage loans serviced, including securitizations where the Corporation has continuing involvement, were \$674 million and \$2.3 billion during the three and nine months ended September 30, 2013 compared to \$1.1 billion and \$3.6 billion for the same periods in 2012. Servicing advances on consumer mortgage loans, including securitizations where the Corporation has continuing involvement, were \$15.5 billion and \$23.2 billion at September 30, 2013 and December 31, 2012. The Corporation may have the option to repurchase delinquent loans out of securitization trusts, which reduces the amount of servicing advances it is required to make. During the three and nine months ended September 30, 2013, \$3.1 billion and \$9.4 billion of loans were repurchased from first-lien securitization trusts as a result of loan delinquencies or in order to perform modifications compared to \$2.5 billion and \$5.2 billion for the same periods in 2012. The majority of these loans repurchased were FHA-insured mortgages collateralizing GNMA securities. For more information on MSRs, see Note 19 – Mortgage Servicing Rights.

Table of Contents

The table below summarizes select information related to first-lien mortgage securitization trusts in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

Maximum loss exposure excludes the liability for representations and warranties obligations and corporate

- (1) guarantees and also excludes servicing advances and MSR. For additional information, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees and Note 19 – Mortgage Servicing Rights. As a holder of these securities, the Corporation receives scheduled principal and interest payments. During the
- (2) three and nine months ended September 30, 2013 and 2012, there were no OTTI losses recorded on those securities classified as AFS debt securities.

Not included in the table above are all other assets of \$2.3 billion and \$12.1 billion, representing the unpaid principal balance of mortgage loans eligible for repurchase from unconsolidated residential mortgage securitization

(3) vehicles, principally guaranteed by GNMA, and all other liabilities of \$2.3 billion and \$12.1 billion, representing the principal amount that would be payable to the securitization vehicles if the Corporation were to exercise the repurchase option, at September 30, 2013 and December 31, 2012.

- (4) Principal balance outstanding includes loans the Corporation transferred with which the Corporation has continuing involvement, which may include servicing the loans.

Table of Contents

Home Equity Loans

The Corporation retains interests in home equity securitization trusts to which it transferred home equity loans. These retained interests include senior and subordinate securities and residual interests. In addition, the Corporation may be obligated to provide subordinate funding to the trusts during a rapid amortization event. The Corporation also services the loans in the trusts. Except as described below and in Note 8 – Representations and Warranties Obligations and Corporate Guarantees, the Corporation does not provide guarantees or recourse to the securitization trusts other than standard representations and warranties. There were no securitizations of home equity loans during the three and nine months ended September 30, 2013 and 2012, and all of the home equity trusts have entered the rapid amortization phase.

The table below summarizes select information related to home equity loan securitization trusts in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

Home Equity Loan VIEs

(Dollars in millions)	September 30, 2013			December 31, 2012			
	Consolidated VIEs	Unconsolidated VIEs	Total	Consolidated VIEs	Unconsolidated VIEs	Total	
Maximum loss exposure ⁽¹⁾	\$ 1,317	\$ 6,440	\$ 7,757	\$ 2,004	\$ 6,707	\$ 8,711

All other liabilities	88	—	88	92	—	92	
Total	\$ 1,591	\$ —	\$ 1,591	\$ 2,423	\$ —	\$ 2,423	
Principal balance outstanding	\$ 1,406	\$ 6,829	\$ 8,235	\$ 2,197	\$ 12,644	\$ 14,841	

For unconsolidated VIEs, the maximum loss exposure includes outstanding trust certificates issued by trusts in

⁽¹⁾ rapid amortization, net of recorded reserves, and excludes the liability for representations and warranties obligations and corporate guarantees.

Included in the table above are consolidated and unconsolidated home equity loan securitizations, all of which have entered a rapid amortization period and for which the Corporation is obligated to provide subordinated funding. During this period, cash payments from borrowers are accumulated to repay outstanding debt securities and the Corporation continues to make advances to borrowers when they draw on their lines of credit. For additional information, see Note 7 – Securitizations and Other Variable Interest Entities to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. At September 30, 2013 and December 31, 2012, home equity loan securitizations in rapid amortization for which the Corporation has a subordinated funding obligation, including both consolidated and unconsolidated trusts, had \$7.9 billion and \$9.0 billion of trust certificates outstanding. This amount is significantly greater than the amount the Corporation expects to fund. The charges that will ultimately be recorded as a result of the rapid amortization events depend on the undrawn available credit on the home equity lines, which totaled \$83 million and \$196 million at September 30, 2013 and December 31, 2012, as well as performance of the loans, the amount of subsequent draws and the timing of related cash flows. At September 30, 2013 and December 31, 2012, the reserve for losses on expected future draw obligations on the home equity loan securitizations

in rapid amortization for which the Corporation has a subordinated funding obligation was \$15 million and \$51 million.

The Corporation has consumer MSRs from the sale or securitization of home equity loans. The Corporation recorded \$11 million and \$37 million of servicing fee income related to home equity loan securitizations during the three and nine months ended September 30, 2013 compared to \$14 million and \$45 million for the same periods in 2012. The Corporation repurchased \$81 million and \$197 million of loans from home equity securitization trusts in order to perform modifications during the three and nine months ended September 30, 2013 compared to \$22 million and \$60 million for the same periods in 2012.

During the nine months ended September 30, 2013, the Corporation transferred servicing for consolidated home equity securitization trusts with total assets of \$475 million and total liabilities of \$616 million to a third party. As the Corporation no longer services the underlying loans, these trusts were deconsolidated, resulting in a gain of \$141 million that was recorded in other income (loss) in the Consolidated Statement of Income.

Table of Contents

Credit Card Securitizations

The Corporation securitizes originated and purchased credit card loans. The Corporation's continuing involvement with the securitization trusts includes servicing the receivables, retaining an undivided interest (seller's interest) in the receivables, and holding certain retained interests including senior and subordinate securities, discount receivables, subordinate interests in accrued interest and fees on the securitized receivables, and cash reserve accounts. The seller's interest in the trusts, which is pari passu to the investors' interest, and the discount receivables are classified in loans and leases.

The table below summarizes select information related to consolidated credit card securitization trusts in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

Credit Card VIEs

(Dollars in millions)	September 30 2013	December 31 2012
Consolidated VIEs		
Maximum loss exposure	\$ 44,412	\$ 42,487
On-balance sheet assets		
Derivative assets	\$ 199	\$ 323
Loans and leases ⁽¹⁾	60,740	66,427
Allowance for loan and lease losses	(2,865)	(3,445)
All other assets ⁽²⁾	1,971	1,567
Total	\$ 60,045	\$ 64,872
On-balance sheet liabilities		
Long-term debt	\$ 15,569	\$ 22,291
All other liabilities	64	94
Total	\$ 15,633	\$ 22,385

(1) At September 30, 2013 and December 31, 2012, loans and leases included \$36.0 billion and \$33.5 billion of seller's interest and \$24 million and \$124 million of discount receivables.

(2) At September 30, 2013 and December 31, 2012, all other assets included restricted cash and short-term investment accounts and unbilled accrued interest and fees.

The Corporation holds subordinate securities with a notional principal amount of \$8.7 billion and \$10.1 billion at September 30, 2013 and December 31, 2012, and a stated interest rate of zero percent issued by certain credit card securitization trusts. In addition, during 2010 and 2009, the Corporation elected to designate a specified percentage of new receivables transferred to the trusts as "discount receivables" such that principal collections thereon are added to finance charges which increases the yield in the trust. Through the designation of newly transferred receivables as discount receivables, the Corporation subordinated a portion of its seller's interest to the investors' interest. These actions were taken to address the decline in the excess spread of the U.S. and U.K. credit card securitization trusts at that time.

During 2012, the Corporation transferred \$553 million of credit card receivables to a third-party sponsored securitization vehicle. The Corporation no longer services the credit card receivables and does not consolidate the vehicle. At September 30, 2013 and December 31, 2012, the Corporation held a senior interest of \$282 million and \$309 million in these receivables, classified in loans and leases, that is not included in the table above.

Table of Contents

Other Asset-backed Securitizations

Other asset-backed securitizations include resecuritization trusts, municipal bond trusts, and automobile and other securitization trusts. The table below summarizes select information related to other asset-backed securitizations in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

As a holder of these securities, the Corporation receives scheduled principal and interest payments. During the

(1) three and nine months ended September 30, 2013 and 2012, there were no OTTI losses recorded on those securities classified as AFS debt securities.

(2) The retained senior and subordinate securities were valued using quoted market prices or observable market inputs (Level 2 of the fair value hierarchy).

(3) The retained residual interests are carried at fair value which was derived using model valuations (Level 2 of the fair value hierarchy).

(4) Total assets include loans the Corporation transferred with which the Corporation has continuing involvement, which may include servicing the loan.

Table of Contents

Resecuritization Trusts

The Corporation transfers existing securities, typically MBS, into resecuritization vehicles at the request of customers seeking securities with specific characteristics. The Corporation may also resecuritize securities within its investment portfolio for purposes of improving liquidity and capital, and managing credit or interest rate risk. Generally, there are no significant ongoing activities performed in a resecuritization trust and no single investor has the unilateral ability to liquidate the trust.

The Corporation resecuritized \$6.6 billion and \$18.2 billion of securities during the three and nine months ended September 30, 2013 compared to \$12.2 billion and \$36.5 billion for the same periods in 2012. All of the securities transferred into resecuritization vehicles during the three and nine months ended September 30, 2013 and 2012 were classified as trading account assets. As such, changes in fair value were recorded in trading account profits prior to the resecuritization and no gain or loss on sale was recorded.

Municipal Bond Trusts

The Corporation administers municipal bond trusts that hold highly-rated, long-term, fixed-rate municipal bonds. The trusts obtain financing by issuing floating-rate trust certificates that reprice on a weekly or other basis to third-party investors. The Corporation may transfer assets into the trusts and may also serve as remarketing agent and/or liquidity provider for the trusts. The floating-rate investors have the right to tender the certificates at specified dates. Should the Corporation be unable to remarket the tendered certificates, it may be obligated to purchase them at par under standby liquidity facilities. The Corporation also provides credit enhancement to investors in certain municipal bond trusts whereby the Corporation guarantees the payment of interest and principal on floating-rate certificates issued by these trusts in the event of default by the issuer of the underlying municipal bond.

The Corporation's liquidity commitments to unconsolidated municipal bond trusts, including those for which the Corporation was transferor, totaled \$2.2 billion and \$2.8 billion at September 30, 2013 and December 31, 2012. The weighted-average remaining life of bonds held in the trusts at September 30, 2013 was 8.5 years. There were no material write-downs or downgrades of assets or issuers during the three and nine months ended September 30, 2013 and 2012.

Automobile and Other Securitization Trusts

The Corporation transfers automobile and other loans into securitization trusts, typically to improve liquidity or manage credit risk. At September 30, 2013 and December 31, 2012, the Corporation serviced assets or otherwise had continuing involvement with automobile and other securitization trusts with outstanding balances of \$2.9 billion and \$4.7 billion, including trusts collateralized by automobile loans of \$1.2 billion and \$3.5 billion, student loans of \$773 million and \$897 million, and other loans of \$920 million and \$290 million.

Table of Contents

Collateralized Debt Obligation Vehicles

CDO vehicles hold diversified pools of fixed-income securities, typically corporate debt or ABS, which they fund by issuing multiple tranches of debt and equity securities. Synthetic CDOs enter into a portfolio of CDS to synthetically create exposure to fixed-income securities. CLOs, which are a subset of CDOs, hold pools of loans, typically corporate loans or commercial mortgages. CDOs are typically managed by third-party portfolio managers. The Corporation typically transfers assets to these CDOs, holds securities issued by the CDOs and may be a derivative counterparty to the CDOs, including a CDS counterparty for synthetic CDOs. The Corporation has also entered into total return swaps with certain CDOs whereby the Corporation absorbs the economic returns generated by specified assets held by the CDO. The Corporation receives fees for structuring CDOs and providing liquidity support for super senior tranches of securities issued by certain CDOs. No third parties provide a significant amount of similar commitments to these CDOs.

The table below summarizes select information related to CDO vehicles in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

CDO Vehicle VIEs

(Dollars in millions)	September 30, 2013			December 31, 2012		
	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total
Maximum loss exposure	\$ 1,274	\$ 1,019	\$ 2,293	\$ 2,201	\$ 1,376	\$ 3,577

Total	\$ 1,280	\$ 493	\$ 1,773	\$ 2,201	\$ 635	\$ 2,836
On-balance sheet liabilities						
Long-term debt	\$ 1,482	\$ —	\$ 1,482	\$ 2,806	\$ 2	\$ 2,808
All other liabilities	—	7	7	—	9	9
Total	\$ 1,482	\$ 7	\$ 1,489	\$ 2,806	\$ 11	\$ 2,817
Total assets of VIEs	\$ 1,280	\$ 19,826	\$ 21,106	\$ 2,201	\$ 26,985	\$ 29,186

The Corporation's maximum loss exposure of \$2.3 billion at September 30, 2013 included \$1.3 billion of exposure to CDO financing facilities, \$135 million of super senior CDO exposure and \$884 million of other non-super senior exposure. This exposure is calculated on a gross basis and does not reflect any benefit from insurance purchased from third parties. The CDO financing facilities, which are consolidated, obtain funding from third parties for CDO positions which are principally classified in trading account assets. The CDO financing facilities' long-term debt at September 30, 2013 totaled \$1.5 billion, all of which has recourse to the general credit of the Corporation. For unconsolidated CDO vehicles in the table above, the Corporation's maximum loss exposure is significantly less than the total assets of the VIEs because the Corporation typically has exposure to only a portion of the total assets.

At September 30, 2013, the Corporation had \$1.5 billion of aggregate liquidity exposure to CDOs. This amount includes \$87 million of commitments to CDOs to provide funding for super senior exposures and \$1.4 billion notional amount of derivative contracts with unconsolidated VIEs, principally CDO vehicles, which hold non-super senior CDO debt securities or other debt securities on the Corporation's behalf. For additional information, see Note 11 – Commitments and Contingencies. The Corporation's liquidity exposure to CDOs at September 30, 2013 is included in the table above to the extent that the Corporation sponsored the CDO vehicle or the liquidity exposure is more than insignificant compared to total assets of the CDO vehicle. Liquidity exposure included in the table is reported net of previously recorded losses.

Table of Contents

Customer Vehicles

Customer vehicles include credit-linked, equity-linked and commodity-linked note vehicles, repackaging vehicles, and asset acquisition vehicles, which are typically created on behalf of customers who wish to obtain market or credit exposure to a specific company, commodity price or financial instrument. The Corporation may transfer assets to and invest in securities issued by these vehicles. The Corporation typically enters into credit, equity, interest rate, commodity or foreign currency derivatives to synthetically create or alter the investment profile of the issued securities. The Corporation also had liquidity commitments, including written put options and collateral value guarantees, with certain unconsolidated vehicles of \$667 million and \$742 million at September 30, 2013 and December 31, 2012.

The table below summarizes select information related to customer vehicles in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

Customer Vehicle VIEs

Total assets of VIEs	\$4,960	\$ 4,229	\$9,189	\$5,118	\$ 4,055	\$9,173

The Corporation's maximum loss exposure from customer vehicles includes the notional amount of credit or equity derivatives to which the Corporation is a counterparty, net of losses previously recorded, and the Corporation's investment, if any, in securities issued by the vehicles. The maximum loss exposure has not been reduced to reflect the benefit of offsetting swaps with the customers or collateral arrangements.

Table of Contents

Other Variable Interest Entities

Other consolidated VIEs primarily include leveraged lease trusts and investment vehicles. Other unconsolidated VIEs primarily include real estate vehicles and investment vehicles.

The table below summarizes select information related to other VIEs in which the Corporation held a variable interest at September 30, 2013 and December 31, 2012.

Other VIEs

(Dollars in millions)	September 30, 2013			December 31, 2012		
	Consolidated	Unconsolidated	Total	Consolidated	Unconsolidated	Total

Investment Vehicles

The Corporation sponsors, invests in or provides financing, which may be in connection with the sale of assets, to a variety of investment vehicles that hold loans, real estate, debt securities or other financial instruments and are designed to provide the desired investment profile to investors or the Corporation. At September 30, 2013 and December 31, 2012, the Corporation's consolidated investment vehicles had total assets of \$1.2 billion and \$1.3 billion. The Corporation also held investments in unconsolidated vehicles with total assets of \$4.8 billion and \$3.0 billion at September 30, 2013 and December 31, 2012. The Corporation's maximum loss exposure associated with both consolidated and unconsolidated investment vehicles totaled \$3.8 billion and \$2.1 billion at September 30, 2013 and December 31, 2012 comprised primarily of on-balance sheet assets less non-recourse liabilities.

During the three months ended September 30, 2013, the Corporation transferred servicing advance receivables to an independent third party in connection with the sale of MSRs. A portion of the receivables was transferred into a securitization trust. The Corporation retained a senior interest in such receivables with a maximum loss exposure of \$2.0 billion and an outstanding balance of \$1.7 billion at September 30, 2013, which was classified in debt securities carried at fair value.

Leveraged Lease Trusts

The Corporation's net investment in consolidated leveraged lease trusts totaled \$3.9 billion and \$4.4 billion at September 30, 2013 and December 31, 2012. The trusts hold long-lived equipment such as rail cars, power generation and distribution equipment, and commercial aircraft. The Corporation structures the trusts and holds a significant residual interest. The net investment represents the Corporation's maximum loss exposure to the trusts in the unlikely event that the leveraged lease investments become worthless. Debt issued by the leveraged lease trusts is non-recourse to the Corporation. The Corporation has no liquidity exposure to these leveraged lease trusts.

Table of Contents

Real Estate Vehicles

The Corporation held investments in unconsolidated real estate vehicles of \$5.8 billion and \$5.4 billion at September 30, 2013 and December 31, 2012, which primarily consisted of investments in unconsolidated limited partnerships that finance the construction and rehabilitation of affordable rental housing and commercial real estate. An unrelated third party is typically the general partner and has control over the significant activities of the partnership. The Corporation earns a return primarily through the receipt of tax credits allocated to the real estate projects. The Corporation's risk of loss is mitigated by policies requiring that the project qualify for the expected tax credits prior to making its investment. The Corporation may from time to time be asked to invest additional amounts to support a troubled project. Such additional investments have not been and are not expected to be significant.

Other Asset-backed Financing Arrangements

The Corporation transferred pools of securities to certain independent third parties and provided financing for up to 75 percent of the purchase price under asset-backed financing arrangements. At September 30, 2013 and December 31, 2012, the Corporation's maximum loss exposure under these financing arrangements was \$1.2 billion and \$2.5 billion, substantially all of which was classified in loans and leases. All principal and interest payments have been received when due in accordance with their contractual terms. These arrangements are not included in the Other VIEs table because the purchasers are not VIEs.

NOTE 8 – Representations and Warranties Obligations and Corporate Guarantees

Background

The Corporation securitizes first-lien residential mortgage loans generally in the form of MBS guaranteed by the GSEs or by GNMA in the case of FHA-insured, VA-guaranteed and Rural Housing Service-guaranteed mortgage loans. In addition, in prior years, legacy companies and certain subsidiaries sold pools of first-lien residential mortgage loans and home equity loans as private-label securitizations (in certain of these securitizations, monolines or financial guarantee providers insured all or some of the securities) or in the form of whole loans. In connection with these transactions, the Corporation or certain of its subsidiaries or legacy companies make or have made various representations and warranties. These representations and warranties, as set forth in the agreements, related to, among other things, the ownership of the loan, the validity of the lien securing the loan, the absence of delinquent taxes or liens against the property securing the loan, the process used to select the loan for inclusion in a transaction, the loan's compliance with any applicable loan criteria, including underwriting standards, and the loan's compliance with applicable federal, state and local laws. Breaches of these representations and warranties may result in the requirement to repurchase mortgage loans or to otherwise make whole or provide other remedies to the GSEs, HUD with respect to FHA-insured loans, VA, whole-loan investors, securitization trusts, monoline insurers or other financial guarantors (collectively, repurchases). In all such cases, the Corporation would be exposed to any credit loss on the repurchased mortgage loans after accounting for any mortgage insurance (MI) or mortgage guarantee payments that it may receive.

Subject to the requirements and limitations of the applicable sales and securitization agreements, these representations and warranties can be enforced by the GSEs, HUD, VA, the whole-loan investor, the securitization trustee or others as governed by the applicable agreement or, in certain first-lien and home equity securitizations where monoline insurers or other financial guarantee providers have insured all or some of the securities issued, by the monoline insurer or other financial guarantor, where the contract so provides. In the case of private-label securitizations, the applicable agreements may permit investors, which may include the GSEs, with contractually sufficient holdings to direct or influence action by the securitization trustee. In the case of loans sold to parties other than the GSEs or GNMA, the contractual liability to repurchase typically arises only if there is a breach of the representations and warranties that materially and adversely affects the interest of the investor, or investors, or of the monoline insurer or other financial

guarantor (as applicable) in the loan. Contracts with the GSEs do not contain equivalent language, while GNMA generally limits repurchases to loans that are not insured or guaranteed as required. The Corporation believes that the longer a loan performs prior to default, the less likely it is that an alleged underwriting breach of representations and warranties would have a material impact on the loan's performance.

The Corporation's credit loss would be reduced by any recourse it may have to organizations (e.g., correspondents) that, in turn, had sold such loans to the Corporation based upon its agreements with these organizations. When a loan is originated by a correspondent or other third party, the Corporation typically has the right to seek a recovery of related repurchase losses from that originator. Many of the correspondent originators of loans in 2004 through 2008 are no longer in business, or are in a weakened financial condition, and the Corporation's ability to recover on valid claims is therefore impacted, or eliminated accordingly. In the event a loan is originated and underwritten by a correspondent who obtains FHA insurance, even if they are no longer in business, any breach of FHA guidelines is the direct obligation of the correspondent, not the Corporation. Generally the volume of unresolved repurchase claims from the FHA and VA for loans in GNMA-guaranteed securities is not significant because the requests are limited in number and are typically resolved quickly. At September 30, 2013, approximately 17 percent of the outstanding repurchase claims relate to loans purchased from correspondents or other parties compared to approximately 26 percent at December 31, 2012. During the three and nine months ended September 30,

Table of Contents

2013, the Corporation continued to recover repurchase losses from correspondents and other parties; however, the actual recovery rate may vary from period to period based upon the underlying mix of correspondents and other parties.

The estimate of the liability for representations and warranties exposures and the corresponding estimated range of possible loss is based upon currently available information, significant judgment, and a number of factors and assumptions, including those discussed in Liability for Representations and Warranties and Corporate Guarantees in this Note, that are subject to change. Changes to any one of these factors could significantly impact the estimate of the liability and could have a material adverse impact on the Corporation's results of operations for any particular period. Given that these factors vary by counterparty, the Corporation analyzes representations and warranties obligations based on the specific counterparty, or type of counterparty, with whom the sale was made. For additional information, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Settlement Actions

The Corporation has vigorously contested any request for repurchase when it concludes that a valid basis for repurchase does not exist and will continue to do so in the future. However, in an effort to resolve these legacy mortgage-related issues, the Corporation has reached bulk settlements, or agreements for bulk settlements, including settlement amounts which have been material, with counterparties in lieu of a loan-by-loan review process. The Corporation may reach other settlements in the future if opportunities arise on terms it believes to be advantageous. However, there can be no assurance that the Corporation will reach future settlements or, if it does, that the terms of past settlements can be relied upon to predict the terms of future settlements. For a summary of the larger bulk settlement actions beginning in the fourth quarter of 2010, including the settlement with Bank of New York Mellon (the BNY Mellon Settlement), as trustee (Trustee) for 525 Countrywide first-lien and five second-lien non-GSE securitization trusts (the Covered Trusts), the December 31, 2010 agreements with the GSEs to resolve repurchase claims (the 2010 GSE Agreements), the settlement with Assured Guaranty Ltd. and subsidiaries in 2011 (the Assured Guaranty Settlement), and the settlement with Syncora Guaranty Inc. and Syncora Holdings, Ltd. in 2012, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. The settlements with MBIA Inc. and certain of its affiliates (MBIA) and FNMA are discussed below.

MBIA Settlement

On May 7, 2013, the Corporation entered into a comprehensive settlement with MBIA which resolved all outstanding litigation between the parties, as well as other claims between the parties, including outstanding and potential claims from MBIA related to alleged representations and warranties breaches and other claims involving certain first- and second-lien RMBS trusts for which MBIA provided financial guarantee insurance, certain of which claims were the subject of litigation. At the time of the settlement, the mortgages (first- and second-lien) in RMBS trusts covered by the MBIA Settlement had an original principal balance of \$54.8 billion and an unpaid principal balance of \$19.1 billion.

Under the MBIA Settlement, all pending litigation between the parties was dismissed and each party received a global release of those claims. The Corporation made a settlement payment to MBIA of \$1.565 billion in cash and transferred to MBIA approximately \$95 million in fair market value of notes issued by MBIA and previously held by the Corporation. The Corporation was fully reserved at March 31, 2013 for the MBIA Settlement. In addition, MBIA issued to the Corporation warrants to purchase up to approximately 4.9 percent of MBIA's currently outstanding common stock, at an exercise price of \$9.59 per share, which may be exercised at any time prior to May 2018. In addition, the Corporation provided a senior secured \$500 million credit facility to an affiliate of MBIA.

The parties also terminated various CDS transactions entered into between the Corporation and a MBIA-affiliate, LaCrosse Financial Products, LLC, and guaranteed by MBIA, which constituted all of the outstanding CDS protection agreements purchased by the Corporation from MBIA on commercial mortgage-backed securities (CMBS). Collectively, those CDS transactions had a notional amount of \$7.4 billion and a fair value of \$813 million as of March 31, 2013. The parties also terminated certain other trades in order to close out positions between the parties. The termination of these trades did not have a material impact on the Corporation's financial statements.

Table of Contents

Fannie Mae Settlement

On January 6, 2013, the Corporation entered into an agreement with FNMA to resolve substantially all outstanding and potential repurchase and certain other claims relating to the origination, sale and delivery of residential mortgage loans originated from January 1, 2000 through December 31, 2008 and sold directly to FNMA by entities related to Countrywide and BANA.

This agreement covers loans with an aggregate original principal balance of approximately \$1.4 trillion and an aggregate outstanding principal balance of approximately \$300 billion. Unresolved repurchase claims submitted by FNMA for alleged breaches of selling representations and warranties with respect to these loans totaled \$12.2 billion of unpaid principal balance at December 31, 2012. This agreement extinguished substantially all of those unresolved repurchase claims, as well as any future representations and warranties repurchase claims associated with such loans, subject to certain exceptions which the Corporation does not expect to be material.

In January 2013, the Corporation made a cash payment to FNMA of \$3.6 billion and also repurchased for \$6.6 billion certain residential mortgage loans that had previously been sold to FNMA, which the Corporation has valued at less than the purchase price.

This agreement also clarified the parties' obligations with respect to MI including establishing timeframes for certain payments and other actions, setting parameters for potential bulk settlements and providing for cooperation in future dealings with mortgage insurers. For additional information, see Mortgage Insurance Rescission Notices in this Note.

In addition, pursuant to a separate agreement, the Corporation settled substantially all of FNMA's outstanding and future claims for compensatory fees arising out of past foreclosure delays.

Collectively, these agreements are referred to herein as the FNMA Settlement. The Corporation was fully reserved at December 31, 2012 for the settlement with FNMA.

Settlement with the Bank of New York Mellon, as Trustee

With regard to the BNY Mellon Settlement, the court approval hearing began on June 3, 2013 in the New York Supreme Court, New York County, and additional hearing days and closing arguments are scheduled to take place in November 2013. Although the Corporation is not a party to the proceeding, certain of its rights and obligations under the settlement agreement are conditioned on final court approval of the settlement.

Table of Contents

Unresolved Repurchase Claims

Unresolved representations and warranties repurchase claims represent the notional amount of repurchase claims made by counterparties, typically the outstanding principal balance or the unpaid principal balance at the time of default. In the case of first-lien mortgages, the claim amount is often significantly greater than the expected loss amount due to the benefit of collateral and, in some cases, MI or mortgage guarantee payments. Claims received from a counterparty remain outstanding until the underlying loan is repurchased, the claim is rescinded by the counterparty, or the claim is otherwise resolved. When a claim is denied and the Corporation does not receive a response from the counterparty, the claim remains in the unresolved repurchase claims balance until resolution.

The table below presents unresolved repurchase claims at September 30, 2013 and December 31, 2012. The unresolved repurchase claims include only claims where the Corporation believes that the counterparty has a basis to submit claims. For additional information, see Whole Loan Sales and Private-label Securitizations Experience in this Note and Note 11 – Commitments and Contingencies herein. These repurchase claims do not include any repurchase claims related to the BNY Mellon Settlement regarding the Covered Trusts.

Unresolved Repurchase Claims by Counterparty and Product Type ^(1, 2)

(Dollars in millions)	September 30 2013	December 31 2012
By counterparty		
GSEs	\$ 1,208	\$ 13,530
Monolines	1,541	2,449
Private-label securitization trustees, whole-loan investors, including third-party securitization sponsors and other	14,911	12,299
Total unresolved repurchase claims by counterparty	\$ 17,660	\$ 28,278
By product type		
Prime loans	\$ 1,631	\$ 8,793
Alt-A	1,456	5,428
Home equity	1,734	2,394
Pay option	5,680	5,884
Subprime	5,276	3,687
Other	1,883	2,092
Total unresolved repurchase claims by product type	\$ 17,660	\$ 28,278

Excludes certain MI rescission notices. However, at September 30, 2013 and December 31, 2012, included \$443

⁽¹⁾ million and \$2.3 billion of repurchase requests received from the GSEs that have resulted solely from MI rescission notices. For additional information, see Mortgage Insurance Rescission Notices in this Note.

At September 30, 2013 and December 31, 2012, unresolved repurchase claims did not include repurchase demands ⁽²⁾ of \$1.4 billion and \$1.6 billion where the Corporation believes the claimants have not satisfied the contractual thresholds as discussed on page 212.

The notional amount of unresolved GSE repurchase claims totaled \$1.2 billion at September 30, 2013 compared to \$13.5 billion at December 31, 2012. As a result of the FNMA Settlement, \$12.2 billion of GSE repurchase claims outstanding at December 31, 2012 were resolved in January 2013. For further discussion of the Corporation's experience with the GSEs, see Government-sponsored Enterprises Experience in this Note.

The notional amount of unresolved monoline repurchase claims totaled \$1.5 billion at September 30, 2013 compared to \$2.4 billion at December 31, 2012. The Corporation has had limited loan-level repurchase claims experience with the remaining monoline insurers due to ongoing litigation. In the Corporation's experience, the monolines have been generally unwilling to withdraw repurchase claims, regardless of whether and what evidence was offered to refute a

claim. Substantially all of the unresolved monoline claims pertain to second-lien loans and are currently the subject of litigation. As a result of the MBIA Settlement, \$945 million of monoline repurchase claims outstanding at December 31, 2012 were resolved in May 2013. For further discussion of the Corporation's practices regarding litigation accruals and estimated range of possible loss for litigation and regulatory matters, which includes the status of its monoline litigation, see Estimated Range of Possible Loss in this Note and Litigation and Regulatory Matters in Note 11 – Commitments and Contingencies.

The notional amount of unresolved repurchase claims from private-label securitization trustees, whole-loan investors, including third-party securitization sponsors, and others totaled \$14.9 billion at September 30, 2013 compared to \$12.3 billion at December 31, 2012. The increase in the notional amount of unresolved repurchase claims is primarily due to continued submission of claims by private-label securitization trustees; the level of detail, support and analysis which impacts overall claim quality and, therefore, claims resolution; and the lack of an established process to resolve disputes related to these claims. The Corporation expects unresolved repurchase claims related to private-label securitizations to continue to increase as claims continue to be submitted by private-label securitization trustees

Table of Contents

and there is not an established process for the ultimate resolution of claims on which there is a disagreement. For further discussion of the Corporation's experience with whole loans and private-label securitizations, see Whole Loan Sales and Private-label Securitizations Experience in this Note.

During the three months ended September 30, 2013, the Corporation received \$1.8 billion in new repurchase claims, including \$642 million submitted by the GSEs for both Countrywide and legacy Bank of America originations not covered by the bulk settlements with the GSEs, \$1.0 billion submitted by private-label securitization trustees, \$174 million submitted by whole-loan investors and \$5 million submitted by monoline insurers. During the three months ended September 30, 2013, \$822 million in claims were resolved, primarily with the GSEs. Of the claims that were resolved, \$536 million were resolved through rescissions and \$286 million were resolved through mortgage repurchases and make-whole payments.

During the nine months ended September 30, 2013, the Corporation received \$5.1 billion in new repurchase claims, including \$1.6 billion submitted by the GSEs for both Countrywide and legacy Bank of America originations not covered by the bulk settlements with the GSEs, \$3.0 billion submitted by private-label securitization trustees, \$442 million submitted by whole-loan investors and \$49 million submitted by monoline insurers. During the nine months ended September 30, 2013, \$15.6 billion in claims were resolved, primarily with the GSEs, including \$12.2 billion in GSE claims resolved through the FNMA Settlement and \$945 million resolved through the MBIA Settlement. Of the remaining claims that were resolved, \$1.5 billion were resolved through rescissions and \$962 million were resolved through mortgage repurchases and make-whole payments, primarily with the GSEs.

In addition to, and not included in, the total unresolved repurchase claims of \$17.7 billion at September 30, 2013, the Corporation has received repurchase demands from private-label securitization investors and a master servicer where it believes the claimants have not satisfied the contractual thresholds to direct the securitization trustee to take action and/or that these demands are otherwise procedurally or substantively invalid. The total amounts outstanding of such demands were \$1.4 billion, comprised of \$1.1 billion of demands received during 2012 and approximately \$300 million of demands related to trusts covered by the BNY Mellon Settlement at September 30, 2013 compared to \$1.6 billion at December 31, 2012. The Corporation does not believe that the \$1.4 billion of demands outstanding at September 30, 2013 represents valid repurchase claims and, therefore, it is not possible to predict the resolution with respect to such demands.

Mortgage Insurance Rescission Notices

In addition to repurchase claims, the Corporation receives notices from mortgage insurance companies of claim denials, cancellations or coverage rescission (collectively, MI rescission notices). Although the number of such notices has remained elevated, they have decreased over the last several quarters as the resolution of open notices exceeded new notices. At September 30, 2013, the Corporation had approximately 105,000 open MI rescission notices compared to 110,000 at December 31, 2012. Open MI rescission notices at September 30, 2013 included 43,000 pertaining principally to first-lien mortgages serviced for others, 11,000 pertaining to loans held-for-investment and 51,000 pertaining to ongoing litigation for second-lien mortgages. Approximately 24,000 of the open MI rescission notices pertaining to first-lien mortgages serviced for others are related to loans sold to FNMA. As of September 30, 2013, 39 percent of the MI rescission notices received have been resolved.

Although the FNMA Settlement did not resolve underlying MI rescission notices, the FNMA Settlement resolved significant representations and warranties exposures, including unresolved and potential repurchase claims from FNMA resulting solely from MI rescission notices relating to loans covered by the FNMA Settlement. The Corporation's pipeline of unresolved repurchase claims from the GSEs resulting solely from MI rescission notices was \$443 million at September 30, 2013 compared to \$2.3 billion at December 31, 2012. The FNMA Settlement resolved approximately \$1.9 billion of such unresolved repurchase claims that were outstanding at December 31, 2012. Many

of these claims represent repurchase claims on loans for which the Corporation received a MI rescission notice that is included in the 24,000 open MI rescission notices referenced in the paragraph above. In addition, the FNMA Settlement clarified the parties' obligations with respect to MI rescission notices including establishing timeframes for certain payments and other actions, setting parameters for potential bulk settlements and providing for cooperation in future dealings with mortgage insurers. As a result, the Corporation is required to pay the amount of certain MI coverage to FNMA as a result of MI claims rescissions in advance of collection from the mortgage insurance companies and has remitted the amounts required under the agreement related to the 24,000 open MI rescission notices. In certain cases, it may not ultimately collect all such amounts from the mortgage insurance companies.

For additional information, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Liability for Representations and Warranties and Corporate Guarantees

The liability for representations and warranties and corporate guarantees is included in accrued expenses and other liabilities on the Consolidated Balance Sheet and the related provision is included in mortgage banking income in the Consolidated Statement of Income. The liability for representations and warranties is established when those obligations are both probable and reasonably estimable.

The Corporation's estimated liability at September 30, 2013 for obligations under representations and warranties given to the GSEs and the corresponding estimated range of possible loss considers, and is necessarily dependent on, and limited by, a number of factors, including the Corporation's experience related to actual defaults, projected future defaults, historical loss experience, estimated home prices and other economic conditions. The methodology also considers such factors as the number of payments made by the borrower prior to default as well as certain other assumptions and judgmental factors. See Estimated Range of Possible Loss below for a discussion of the representations and warranties liability and the corresponding estimated range of possible loss.

The Corporation's estimate of the non-GSE representations and warranties liability and the corresponding estimated range of possible loss considers, among other things, repurchase experience based on the BNY Mellon Settlement, adjusted to reflect differences between the Covered Trusts and the remainder of the population of private-label securitizations, and assumes that the conditions to the BNY Mellon Settlement will be met. Since the non-GSE securitization trusts that were included in the BNY Mellon Settlement differ from those that were not included in the BNY Mellon Settlement, the Corporation adjusted the repurchase experience implied in the settlement in order to determine the estimated non-GSE representations and warranties liability and the corresponding estimated range of possible loss. The judgmental adjustments made include consideration of the differences in the mix of products in the subject securitizations, loan originator, likelihood of claims expected, the differences in the number of payments that the borrower has made prior to default and the sponsor of the securitizations. Where relevant, the Corporation also takes into account more recent experience, such as increased claim activity, its experience with various counterparties and other facts and circumstances, such as bulk settlements, as the Corporation believes appropriate.

Additional factors that impact the non-GSE representations and warranties liability and the portion of the estimated range of possible loss corresponding to non-GSE representations and warranties exposures include: (1) contractual material adverse effect requirements, (2) the representations and warranties provided, and (3) the requirement to meet certain presentation thresholds. For more information on these factors, see Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

The table below presents a rollforward of the liability for representations and warranties and corporate guarantees.

Representations and Warranties and Corporate Guarantees

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2013	2012	2013	2012
Liability for representations and warranties and corporate guarantees, beginning of period	\$14,020	\$15,943	\$19,021	\$15,858
Additions for new sales	9	8	31	19
Net reductions	(236) 11	(5,706) (592
Provision	323	307	770	984
Liability for representations and warranties and corporate guarantees, September 30	\$14,116	\$16,269	\$14,116	\$16,269

Estimated Range of Possible Loss

The representations and warranties liability represents the Corporation's best estimate of probable incurred losses as of September 30, 2013. However, it is reasonably possible that future representations and warranties losses may occur in excess of the amounts recorded for these exposures. In addition, the Corporation has not recorded any representations and warranties liability for certain potential private-label securitization and whole-loan exposures where it has little to no claim activity. The Corporation currently estimates that the range of possible loss for representations and warranties exposures could be up to \$4 billion over accruals at September 30, 2013. The estimated range of possible loss reflects principally non-GSE exposures. The estimated range of possible loss related to these representations and warranties exposures does not represent a probable loss, and is based on currently available information, significant judgment and a number of assumptions that are subject to change. The Corporation's estimated range of possible loss related to representations and warranties exposures does not include possible losses related to monoline insurers.

Table of Contents

Future provisions and/or ranges of possible loss for representations and warranties may be significantly impacted if actual experiences are different from the Corporation's assumptions in its predictive models, including, without limitation, ultimate resolution of the BNY Mellon Settlement, estimated repurchase rates, estimated MI rescission rates, economic conditions, estimated home prices, consumer and counterparty behavior, and a variety of other judgmental factors. Adverse developments with respect to one or more of the assumptions underlying the liability for representations and warranties and the corresponding estimated range of possible loss could result in significant increases to future provisions and/or the estimated range of possible loss. For example, an appellate court, in the context of claims brought by a monoline insurer, disagreed with the Corporation's interpretation that a loan must be in default in order to satisfy the underlying agreements' requirement that a breach have a material and adverse effect. If that decision is extended to non-monoline contexts, it could significantly impact the Corporation's provision and/or the estimated range of possible loss. Additionally, if court rulings related to monoline litigation, including one related to the Corporation, that have allowed sampling of loan files instead of requiring a loan-by-loan review to determine if a representations and warranties breach has occurred, are followed generally by the courts in future monoline litigation, private-label securitization counterparties may view litigation as a more attractive alternative compared to a loan-by-loan review. Finally, although the Corporation believes that the representations and warranties typically given in non-GSE transactions are less rigorous and actionable than those given in GSE transactions, the Corporation does not have significant experience resolving loan-level claims in non-GSE transactions to measure the impact of these differences on the probability that a loan will be required to be repurchased. For additional information, see Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

The liability for representations and warranties exposures and the corresponding estimated range of possible loss do not consider any losses related to litigation matters, including litigation brought by monoline insurers, nor do they include any separate foreclosure costs and related costs, assessments and compensatory fees or any other possible losses related to potential claims for breaches of performance of servicing obligations, except as such losses are included as potential costs of the BNY Mellon Settlement, potential securities law or fraud claims or potential indemnity or other claims against the Corporation, including claims related to loans insured by the FHA. The Corporation is not able to reasonably estimate the amount of any possible loss with respect to any such servicing, securities law, fraud or other claims against the Corporation, except to the extent reflected in the estimated range of possible loss for litigation and regulatory matters disclosed in Note 11 – Commitments and Contingencies; however, such loss could be material.

Government-sponsored Enterprises Experience

The Corporation and its subsidiaries have an established history of working with the GSEs on repurchase claims. Generally, the Corporation first becomes aware that a GSE is evaluating a particular loan for repurchase when the Corporation receives a request from a GSE to review the underlying loan file (file request). Upon completing its review, the GSE may submit a repurchase claim to the Corporation. As soon as practicable after receiving a repurchase claim from a GSE, the Corporation evaluates the claim and takes appropriate action. Claim disputes are generally handled through loan-level negotiations with the GSEs and the Corporation seeks to resolve the repurchase claim within 90 to 120 days of the receipt of the claim although claims remain open beyond this timeframe. Disputes include reasonableness of stated income, occupancy, undisclosed liabilities, and the validity of MI claim rescissions in the vintages with the highest default rates.

At September 30, 2013, for loans originated prior to 2009, the notional amount of unresolved repurchase claims submitted by the GSEs was \$1.1 billion. The Corporation has performed an initial review with respect to \$742 million of these claims and does not believe a valid basis for repurchase has been established by the claimant and is still in the process of reviewing the remaining \$361 million of these claims.

At September 30, 2013, for loans originated after 2008, the notional amount of unresolved repurchase claims submitted by the GSEs was \$105 million. The Corporation has performed an initial review with respect to \$83 million of these claims and does not believe a valid basis for repurchase has been established by the claimant and is still in the process of reviewing the remaining \$22 million of these claims.

Table of Contents

Monoline Insurers Experience

The Corporation has had limited representations and warranties repurchase claims experience with the monoline insurers due to ongoing litigation against Countrywide and/or Bank of America. During the three and nine months ended September 30, 2013, there was minimal repurchase claim activity with the monolines.

The MBIA Settlement resolved outstanding and potential claims between the parties to the settlement involving 31 first- and 17 second-lien RMBS trusts for which MBIA provided financial guarantee insurance, including \$945 million of monoline repurchase claims outstanding at December 31, 2012. In addition, this settlement covered loans with an unpaid principal balance of \$2.6 billion for which the Corporation had received file requests but for which no repurchase claims had been received as of December 31, 2012. The first- and second-lien mortgages in the covered RMBS trusts had an original principal balance of \$29.3 billion and \$25.5 billion, and an unpaid principal balance of \$9.8 billion and \$9.3 billion at the time of the settlement.

For more information related to the monolines, see Note 11 – Commitments and Contingencies herein and Note 8 – Representations and Warranties Obligations and Corporate Guarantees to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Whole Loan Sales and Private-label Securitizations Experience

The majority of the repurchase claims that the Corporation has received and resolved outside of those from the GSEs and monolines are from third-party whole-loan investors. The Corporation provided representations and warranties and the whole-loan investors may retain those rights even when the loans were aggregated with other collateral into private-label securitizations sponsored by the whole-loan investors. The Corporation reviews properly presented repurchase claims for these whole loans on a loan-by-loan basis. If, after the Corporation's review, it does not believe a claim is valid, it will deny the claim and generally indicate a reason for the denial. When the whole-loan investor agrees with the Corporation's denial of the claim, the whole-loan investor may rescind the claim. When there is disagreement as to the resolution of the claim, meaningful dialogue and negotiation between the parties are generally necessary to reach a resolution on an individual claim. Generally, a whole-loan investor is engaged in the repurchase process and the Corporation and the whole-loan investor reach resolution, either through loan-by-loan negotiation or at times, through a bulk settlement. As of September 30, 2013, 15 percent of the whole-loan claims that the Corporation initially denied have subsequently been resolved through repurchase or make-whole payments and 43 percent have been resolved through rescission or repayment in full by the borrower. Although the timeline for resolution varies, once an actionable breach is identified on a given loan, settlement is generally reached as to that loan within 60 to 90 days. When a claim has been denied and the Corporation does not have communication with the counterparty for six months, the Corporation views these claims as inactive; however, they remain in the outstanding claims balance until resolution.

In private-label securitizations, certain presentation thresholds need to be met in order for investors to direct a trustee to assert repurchase claims. Continued high levels of new private-label claims are primarily related to repurchase requests received from trustees and third-party sponsors for private-label securitization transactions not included in the BNY Mellon Settlement, including claims related to first-lien third-party sponsored securitizations that include monoline insurance. Over time, there has been an increase in requests for loan files from certain private-label securitization trustees, as well as requests for tolling agreements to toll the applicable statute of limitations relating to representations and warranties repurchase claims, and the Corporation believes it is likely that these requests will lead to an increase in repurchase claims from private-label securitization trustees with standing to bring such claims. In addition, private-label securitization trustees may have obtained loan files through other means, including litigation and administrative subpoenas. The representations and warranties, as governed by the private-label securitization agreements, generally require that counterparties have the ability to both assert a claim and actually prove that a loan

has an actionable defect under the applicable contracts. While the Corporation believes the agreements for private-label securitizations generally contain less rigorous representations and warranties and place higher burdens on claimants seeking repurchases than the express provisions of comparable agreements with the GSEs, without regard to any variations that may have arisen as a result of dealings with the GSEs, the agreements generally include a representation that underwriting practices were prudent and customary. In the case of private-label securitization trustees and third-party sponsors, there is currently no established process in place for the parties to reach a conclusion on an individual loan if there is a disagreement on the resolution of the claim. For more information on repurchase demands, see Unresolved Repurchase Claims in this Note.

At September 30, 2013, for loans originated between 2004 and 2008, the notional amount of unresolved repurchase claims submitted by private-label securitization trustees and whole-loan investors was \$14.8 billion. The Corporation has performed an initial review with respect to \$13.9 billion of these claims and does not believe a valid basis for repurchase has been established by the claimant and is still in the process of reviewing the remaining \$911 million of these claims.

Table of Contents

NOTE 9 – Goodwill and Intangible Assets

Goodwill

The table below presents goodwill balances by business segment at September 30, 2013 and December 31, 2012. The reporting units utilized for goodwill impairment tests are the operating segments or one level below. For additional information, see Note 9 – Goodwill and Intangible Assets to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Goodwill

(Dollars in millions)	September 30 2013	December 31 2012
Consumer & Business Banking	\$ 31,681	\$ 31,681
Global Banking	22,377	22,377
Global Markets	5,197	5,181
Global Wealth & Investment Management	9,698	9,698
All Other	938	1,039
Total goodwill	\$ 69,891	\$ 69,976

Effective January 1, 2013, on a prospective basis, the Corporation adjusted the amount of capital being allocated to the business segments. The adjustment reflects a refinement to the prior-year methodology (economic capital), which focused solely on internal risk-based economic capital models. The refined methodology (allocated capital) now also considers the effect of regulatory capital requirements in addition to internal risk-based economic capital models. For purposes of goodwill impairment testing, the Corporation utilizes allocated equity as a proxy for the carrying value of its reporting units. Allocated equity in the reporting units is comprised of allocated capital plus capital for the portion of goodwill and intangibles specifically assigned to the reporting unit.

There was no goodwill in Consumer Real Estate Services at September 30, 2013 and December 31, 2012.

During the nine months ended September 30, 2013, the consumer Dealer Financial Services (DFS) business, including \$1.7 billion of goodwill, was moved from Global Banking to CBB in order to align this business more closely with the Corporation's consumer lending activity and better serve the needs of its customers. In 2012, the International Wealth Management businesses within GWIM, including \$230 million of goodwill, were moved to All Other in connection with the Corporation's agreement to sell these businesses in a series of transactions. Certain of the sales transactions were completed during the nine months ended September 30, 2013, and most of the remaining sales transactions are expected to close over the next 15 months. Prior periods were reclassified to conform to current period presentation.

During the three months ended September 30, 2013, the Corporation completed its annual goodwill impairment test as of June 30, 2013 for all applicable reporting units. Based on the results of the annual goodwill impairment test, the Corporation determined there was no impairment. For more information regarding annual goodwill impairment testing, see Note 9 – Goodwill and Intangible Assets to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Table of Contents

Intangible Assets

The table below presents the gross carrying value and accumulated amortization for intangible assets at September 30, 2013 and December 31, 2012.

Intangible Assets ⁽¹⁾

(Dollars in millions)	September 30, 2013		December 31, 2012	
	Gross Carrying Value	Accumulated Amortization	Gross Carrying Value	Accumulated Amortization
Purchased credit card relationships	\$6,137	\$4,735	\$6,184	\$4,494
Core deposit intangibles	3,592	3,009	3,592	2,858
Customer relationships	4,025	2,182	4,025	1,884
Affinity relationships	1,571	1,167	1,572	1,087
Other intangibles	2,045	434	2,139	505
Total intangible assets	\$17,370	\$11,527	\$17,512	\$10,828

⁽¹⁾ Excludes fully amortized intangible assets.

At September 30, 2013 and December 31, 2012, none of the intangible assets were impaired. Amortization of intangibles expense was \$270 million and \$820 million for the three and nine months ended September 30, 2013 compared to \$315 million and \$955 million for the same periods in 2012. The Corporation estimates aggregate amortization expense will be approximately \$270 million for the remainder of 2013, and \$940 million, \$840 million, \$740 million, \$650 million and \$570 million for 2014 through 2018, respectively.

Table of Contents

Offsetting of Securities Financing Agreements

Substantially all of repurchase and resale activities are transacted under legally enforceable master repurchase agreements that give the Corporation, in the event of default by the counterparty, the right to liquidate securities held and to offset receivables and payables with the same counterparty. The Corporation offsets repurchase and resale transactions with the same counterparty on the Consolidated Balance Sheet where it has such a legally enforceable master netting agreement and the transactions have the same maturity date.

Substantially all securities borrowing and lending activities are transacted under legally enforceable master securities lending agreements that give the Corporation, in the event of default by the counterparty, the right to liquidate securities held and to offset receivables and payables with the same counterparty. The Corporation offsets securities borrowing and lending transactions with the same counterparty on the Consolidated Balance Sheet where it has such a legally enforceable master netting agreement and the transactions have the same maturity date.

The table below presents securities financing agreements included on the Consolidated Balance Sheet in federal funds sold and securities borrowed or purchased under agreements to resell, and in federal funds purchased and securities loaned or sold under agreements to repurchase at September 30, 2013 and December 31, 2012. Balances are presented on a gross basis, prior to the application of counterparty netting. Gross assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements. For more information on the offsetting of derivatives, see Note 3 – Derivatives.

The "other" amount in the table below relates to transactions where the Corporation acts as the lender in a securities lending agreement and receives securities that can be pledged or sold as collateral. In these transactions, the Corporation recognizes an asset at fair value, representing the securities received, and a liability for the same amount, representing the obligation to return those securities. The "other" amount is included on the Consolidated Balance Sheet in other assets and in accrued expenses and other liabilities.

The column titled "Financial Instruments" in the table below includes securities collateral received or pledged under repurchase or securities lending agreements where there is a legally enforceable master netting agreement. These amounts are not offset on the Consolidated Balance Sheet, but are shown as a reduction to the net balance sheet amount in the table to derive a net asset or liability. Securities collateral received or pledged where the legal enforceability of the master netting agreements is not certain is not included.

Gross assets and liabilities include activity where uncertainty exists as to the enforceability of certain master netting agreements under bankruptcy laws in some countries or industries, and accordingly, these are reported on a gross basis.

Securities Financing Agreements

(Dollars in millions)	September 30, 2013		Net Sheet Amount	Financial Instruments	Net Assets/Liabilities

Total credit extension commitments	\$530,383	\$108,926	\$157,253	\$47,095	\$843,657

The notional amounts of SBLCs and financial guarantees classified as investment grade and non-investment grade based on the credit quality of the underlying reference name within the instrument were \$28.6 billion and \$10.1 billion at September 30, 2013, and \$31.5 billion and \$11.6 billion at December 31, 2012. Amounts include consumer SBLCs of \$537 million and \$669 million at September 30, 2013 and December 31, 2012.

⁽²⁾ Includes business card unused lines of credit.

Legally binding commitments to extend credit generally have specified rates and maturities. Certain of these commitments have adverse change clauses that help to protect the Corporation against deterioration in the borrower's ability to pay.

Table of Contents

Other Commitments

At September 30, 2013 and December 31, 2012, the Corporation had unfunded equity investment commitments of \$235 million and \$307 million.

At September 30, 2013 and December 31, 2012, the Corporation had commitments to purchase loans (e.g., residential mortgage and commercial real estate) of \$1.4 billion and \$1.3 billion, which upon settlement will be included in loans or LHFS.

At September 30, 2013 and December 31, 2012, the Corporation had commitments to enter into forward-dated resale and securities borrowing agreements of \$92.3 billion and \$67.3 billion, and commitments to enter into forward-dated repurchase and securities lending agreements of \$59.1 billion and \$42.3 billion. All of these commitments expire within the next 12 months.

The Corporation is a party to operating leases for certain of its premises and equipment. Commitments under these leases are approximately \$731 million, \$2.7 billion, \$2.4 billion, \$2.0 billion and \$1.6 billion for the remainder of 2013 and the years through 2017, respectively, and \$7.1 billion in the aggregate for all years thereafter.

Other Guarantees

Bank-owned Life Insurance Book Value Protection

The Corporation sells products that offer book value protection to insurance carriers who offer group life insurance policies to corporations, primarily banks. The book value protection is provided on portfolios of intermediate investment-grade fixed-income securities and is intended to cover any shortfall in the event that policyholders surrender their policies and market value is below book value. These guarantees are recorded as derivatives and carried at fair value in the trading portfolio. At September 30, 2013 and December 31, 2012, the notional amount of these guarantees totaled \$13.3 billion and \$13.4 billion and the Corporation's maximum exposure related to these guarantees at both dates totaled \$3.0 billion with estimated maturity dates between 2030 and 2040. The net fair value including the fee receivable associated with these guarantees was \$42 million and \$52 million at September 30, 2013 and December 31, 2012, and reflects the probability of surrender as well as the multiple structural protection features in the contracts.

Employee Retirement Protection

The Corporation sells products that offer book value protection primarily to plan sponsors of the Employee Retirement Income Security Act of 1974 (ERISA) governed pension plans, such as 401(k) plans and 457 plans. The book value protection is provided on portfolios of intermediate/short-term investment-grade fixed-income securities and is intended to cover any shortfall in the event that plan participants continue to make qualified withdrawals after all securities have been liquidated and there is remaining book value. The Corporation retains the option to exit the contract at any time. If the Corporation exercises its option, the investment manager will either terminate the contract or convert the portfolio into a high-quality fixed-income portfolio, typically all government or government-backed agency securities, with the proceeds of the liquidated assets to assure the return of principal. To manage its exposure, the Corporation imposes restrictions and constraints on the timing of the withdrawals, the manner in which the portfolio is liquidated and the funds are accessed, and the investment parameters of the underlying portfolio. These constraints, combined with significant structural protections, are designed to provide adequate buffers and guard against payments even under extreme stress scenarios. These guarantees are recorded as derivatives and carried at fair value in the trading portfolio. At September 30, 2013 and December 31, 2012, the notional amount of these guarantees totaled \$6.1 billion and \$18.4 billion with estimated maturity dates up to 2017 if the exit option is exercised on all

deals. The decline in notional amount in the nine months ended September 30, 2013 was primarily the result of plan sponsors terminating contracts pursuant to exit options. As of September 30, 2013, the Corporation had not made a payment under these products.

Table of Contents

Merchant Services

In accordance with credit and debit card association rules, the Corporation sponsors merchant processing servicers that process credit and debit card transactions on behalf of various merchants. In connection with these services, a liability may arise in the event of a billing dispute between the merchant and a cardholder that is ultimately resolved in the cardholder's favor. If the merchant defaults on its obligation to reimburse the cardholder, the cardholder, through its issuing bank, generally has until six months after the date of the transaction to present a chargeback to the merchant processor, which is primarily liable for any losses on covered transactions. However, if the merchant processor fails to meet its obligation to reimburse the cardholder for disputed transactions, then the Corporation, as the sponsor, could be held liable for the disputed amount. For the three and nine months ended September 30, 2013, the sponsored entities processed and settled \$154.7 billion and \$460.9 billion of transactions and recorded losses of \$4 million and \$12 million. For the three and nine months ended September 30, 2012, the sponsored entities processed and settled \$153.9 billion and \$442.7 billion of transactions and recorded losses of \$3 million and \$7 million. A significant portion of this activity was processed by a joint venture in which the Corporation holds a 49 percent ownership. At September 30, 2013 and December 31, 2012, the sponsored merchant processing servicers held as collateral \$207 million and \$202 million of merchant escrow deposits which may be used to offset amounts due from the individual merchants.

The Corporation believes the maximum potential exposure for chargebacks would not exceed the total amount of merchant transactions processed through Visa and MasterCard for the last six months, which represents the claim period for the cardholder, plus any outstanding delayed-delivery transactions. As of September 30, 2013 and December 31, 2012, the maximum potential exposure for sponsored transactions totaled \$260.4 billion and \$263.9 billion. However, the Corporation believes that the maximum potential exposure is not representative of the actual potential loss exposure and does not expect to make material payments in connection with these guarantees.

Other Derivative Contracts

The Corporation funds selected assets, including securities issued by CDOs and CLOs, through derivative contracts, typically total return swaps, with third parties and VIEs that are not consolidated on the Consolidated Balance Sheet. The total notional amount of these derivative contracts was \$2.4 billion and \$2.9 billion with commercial banks and \$1.4 billion with VIEs at both September 30, 2013 and December 31, 2012. The underlying securities are senior securities and substantially all of the Corporation's exposures are insured. Accordingly, the Corporation's exposure to loss consists principally of counterparty risk to the insurers. In certain circumstances, generally as a result of ratings downgrades, the Corporation may be required to purchase the underlying assets, which would not result in additional gain or loss to the Corporation as such exposure is already reflected in the fair value of the derivative contracts.

Other Guarantees

The Corporation has entered into additional guarantee agreements and commitments, including lease-end obligation agreements, partial credit guarantees on certain leases, real estate joint venture guarantees, sold risk participation swaps, divested business commitments and sold put options that require gross settlement. The maximum potential future payment under these agreements was approximately \$6.7 billion and \$6.8 billion at September 30, 2013 and December 31, 2012. The estimated maturity dates of these obligations extend up to 2033. The Corporation has made no material payments under these guarantees.

In the normal course of business, the Corporation periodically guarantees the obligations of its affiliates in a variety of transactions including ISDA-related transactions and non-ISDA related transactions such as commodities trading, repurchase agreements, prime brokerage agreements and other transactions.

Payment Protection Insurance Claims Matter

In the U.K., the Corporation previously sold payment protection insurance (PPI) through its international card services business to credit card customers and consumer loan customers. PPI covers a consumer's loan or debt repayment if certain events occur such as loss of job or illness. In response to an elevated level of customer complaints across the industry, heightened media coverage and pressure from consumer advocacy groups, the U.K. Financial Services Authority investigated and raised concerns about the way some companies have handled complaints related to the sale of these insurance policies. In connection with this matter, the Corporation established a reserve for PPI. The reserve was \$300 million and \$510 million at September 30, 2013 and December 31, 2012. The Corporation recorded \$66 million and \$95 million of expense for the three and nine months ended September 30, 2013 compared to \$267 million and \$467 million for the same periods in 2012. It is reasonably possible that the Corporation will incur additional expense related to PPI claims; however, the amount of such additional expense cannot be reasonably estimated.

Table of Contents

Litigation and Regulatory Matters

The following supplements the disclosure in Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K and in Note 11 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's Quarterly Report on Form 10-Q for the quarterly periods ended June 30, 2013 and March 31, 2013 (the prior commitments and contingencies disclosure).

In the ordinary course of business, the Corporation and its subsidiaries are routinely defendants in or parties to many pending and threatened legal actions and proceedings, including actions brought on behalf of various classes of claimants. These actions and proceedings are generally based on alleged violations of consumer protection, securities, environmental, banking, employment, contract and other laws. In some of these actions and proceedings, claims for substantial monetary damages are asserted against the Corporation and its subsidiaries.

In the ordinary course of business, the Corporation and its subsidiaries are also subject to regulatory examinations, information gathering requests, inquiries, investigations, and threatened legal actions and proceedings. Certain subsidiaries of the Corporation are registered broker/dealers or investment advisors and are subject to regulation by the SEC, the Financial Industry Regulatory Authority, the European Commission, the Prudential Regulatory Authority, the Financial Conduct Authority and other international, federal and state securities regulators. In connection with formal and informal inquiries by those agencies, such subsidiaries receive numerous requests, subpoenas and orders for documents, testimony and information in connection with various aspects of their regulated activities.

In view of the inherent difficulty of predicting the outcome of such litigation and regulatory matters, particularly where the claimants seek very large or indeterminate damages or where the matters present novel legal theories or involve a large number of parties, the Corporation generally cannot predict what the eventual outcome of the pending matters will be, what the timing of the ultimate resolution of these matters will be, or what the eventual loss, fines or penalties related to each pending matter may be.

In accordance with applicable accounting guidance, the Corporation establishes an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. In such cases, there may be an exposure to loss in excess of any amounts accrued. When a loss contingency is not both probable and estimable, the Corporation does not establish an accrued liability. As a litigation or regulatory matter develops, the Corporation, in conjunction with any outside counsel handling the matter, evaluates on an ongoing basis whether such matter presents a loss contingency that is probable and estimable. If, at the time of evaluation, the loss contingency related to a litigation or regulatory matter is not both probable and estimable, the matter will continue to be monitored for further developments that would make such loss contingency both probable and estimable. Once the loss contingency related to a litigation or regulatory matter is deemed to be both probable and estimable, the Corporation will establish an accrued liability with respect to such loss contingency and record a corresponding amount of litigation-related expense. The Corporation continues to monitor the matter for further developments that could affect the amount of the accrued liability that has been previously established. Excluding expenses of internal or external legal service providers, litigation-related expense of \$1.1 billion and \$3.8 billion was recognized for the three and nine months ended September 30, 2013 compared to \$1.6 billion and \$3.3 billion for the same periods in 2012.

For a limited number of the matters disclosed in this Note, and in the prior commitments and contingencies disclosure, for which a loss is probable or reasonably possible in future periods, whether in excess of a related accrued liability or where there is no accrued liability, the Corporation is able to estimate a range of possible loss. In determining whether it is possible to provide an estimate of loss or range of possible loss, the Corporation reviews and evaluates its material litigation and regulatory matters on an ongoing basis, in conjunction with any outside counsel handling the matter, in light of potentially relevant factual and legal developments. These may include information learned through the

discovery process, rulings on dispositive motions, settlement discussions, and other rulings by courts, arbitrators or others. In cases in which the Corporation possesses sufficient appropriate information to develop an estimate of loss or range of possible loss, that estimate is aggregated and disclosed below. There may be other disclosed matters for which a loss is probable or reasonably possible but such an estimate may not be possible. For those matters where an estimate is possible, management currently estimates the aggregate range of possible loss is \$0 to \$5.1 billion in excess of the accrued liability (if any) related to those matters. This estimated range of possible loss is based upon currently available information and is subject to significant judgment and a variety of assumptions, and known and unknown uncertainties. The matters underlying the estimated range will change from time to time, and actual results may vary significantly from the current estimate, including as a result of the current and future governmental and regulatory environment. Those matters for which an estimate is not possible are not included within this estimated range. Therefore, this estimated range of possible loss represents what the Corporation believes to be an estimate of possible loss only for certain matters meeting these criteria. It does not represent the Corporation's maximum loss exposure. Information is provided below, or in the prior commitments and contingencies disclosure, regarding the nature of all of these contingencies and, where specified, the amount of the claim associated with these loss contingencies. Based on current knowledge, management does not believe that loss contingencies arising from pending matters, including the matters described herein, and in the prior commitments and contingencies disclosure, will have a material adverse effect on the consolidated financial position or liquidity of the Corporation. However, in light of the inherent uncertainties involved in these matters, some of which are beyond the Corporation's control, and the very large or indeterminate damages sought in some of these matters,

Table of Contents

an adverse outcome in one or more of these matters could be material to the Corporation's results of operations or cash flows for any particular reporting period.

FIRREA and False Claims Act Litigation

In the O'Donnell action, trial began on September 24, 2013. On October 23, 2013, a verdict of liability was returned against Countrywide Home Loans, Inc., Countrywide Bank, FSB and BANA. The Court may impose civil monetary penalties as early as December 2013. The Corporation is currently considering its options for appeal.

Fontainebleau Las Vegas Litigation

On August 30, 2013, the U.S. District Court for the Southern District of Florida entered an order requesting that the U.S. Judicial Panel on Multidistrict Litigation (JPML) remand the disbursement agent claims in the Avenue Action back to the District of Nevada. On September 4, 2013, the JPML issued a conditional remand order (CRO) to remand the Avenue Action back to the District of Nevada. BANA filed a motion to vacate the CRO on September 26, 2013.

Interchange and Related Litigation

On August 16, 2013, the Corporation entered into an agreement to settle the Canadian interchange class actions for an amount not material to the Corporation's results of operations. The settlement is subject to court approval in five provinces.

Mortgage-backed Securities Litigation

Civil RMBS Matter Filed by the DOJ and the SEC

On August 6, 2013, the DOJ and the SEC filed civil actions in the U.S. District Court for the Western District of North Carolina against Merrill Lynch, Pierce, Fenner & Smith (MLPF&S), BANA and Banc of America Mortgage Securities, Inc. (and, in the DOJ case, the Corporation). Both cases allege generally that the offering materials for a single 2008 RMBS offering contained material misstatements and omissions regarding, inter alia, the concentration of loans originated in the wholesale loan channel. The DOJ case asserts violations of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) and the SEC case asserts claims under Sections 17(a)(2) and (3) and Section 5(b)(1) of the Securities Act of 1933. The complaints demand unspecified damages and other relief. Defendants have until November 8, 2013 to answer or move to dismiss the complaints.

Luther Litigation and Related Actions

On August 8, 2013, the Multidistrict Litigation Court preliminarily approved the settlement of the Maine State, David H. Luther and Western Conference of Teamsters actions. The settlement provides, among other things, that all claims that have been asserted in any putative class action against Countrywide concerning Countrywide-issued MBS will be released and discharged upon final court approval of the settlement.

Regulatory Investigations

The Corporation has received a number of subpoenas and other requests for information from regulators and governmental authorities regarding MBS and other mortgage-related matters, including inquiries, investigations and potential proceedings related to a number of transactions involving the underwriting and issuance of MBS by the Corporation (including legacy entities the Corporation acquired) and participation in certain CDO offerings. These inquiries and investigations include, among others, an investigation by the SEC related to risk control, valuation,

structuring, marketing and purchase of CDOs by MLPF&S, and investigations by the RMBS Working Group of the Financial Fraud Enforcement Task Force, including the DOJ, the SEC, the New York Attorney General (the NYAG) and the California Attorney General, concerning the purchase, securitization and underwriting of mortgage loans and RMBS. The Corporation has provided documents and testimony, and continues to cooperate fully with these inquiries and investigations.

The staff of the NYAG has advised that they intend to recommend filing an action against MLPF&S as a result of their RMBS investigation. In addition, the staff of a U.S. Attorney's office recently advised that they intend to recommend that the DOJ file a civil action against affiliates of the Corporation related to the securitization of RMBS.

Table of Contents

Mortgage Repurchase Litigation

Policemen's Annuity and Related Litigation

On August 23, 2013, the Vermont Pension Investment Committee and the Washington State Investment Board brought a new putative class action in the U.S. District Court for the Southern District of New York entitled Vermont Pension Investment Committee and the Washington State Investment Board v. Bank of America, N.A. and U.S. Bank National Association (Vermont Pension). The Vermont Pension action is based on similar factual allegations and the same claims and legal theories as the Policemen's Annuity action, but concerns six different RMBS trusts collateralized by Washington Mutual-originated mortgages for which BANA is the former trustee and U.S. Bank is the current trustee. As in Policemen's Annuity, plaintiffs seek unspecified compensatory damages and/or equitable relief, and costs and expenses. The case was marked as related to Policemen's Annuity and assigned to the same judge, who ordered the two cases coordinated for pre-trial purposes.

Ocala Litigation

FDIC Action

On August 26, 2013, the U.S. District Court for the District of Columbia granted the FDIC's motion to dismiss BANA's claims against the FDIC in its capacity as receiver for Colonial Bank. The court ruled that the order of judgment would be held in abeyance pending resolution of BANA's challenge filed on July 22, 2013 to the FDIC's No Value Determination.

Table of Contents

NOTE 12 – Shareholders' Equity

Common Stock

The table below presents the declared quarterly cash dividends on common stock during 2013 and through October 30, 2013.

Declaration Date	Record Date	Payment Date	Dividend Per Share
October 24, 2013	December 6, 2013	December 27, 2013	\$0.01
July 24, 2013	September 6, 2013	September 27, 2013	0.01
April 30, 2013	June 7, 2013	June 28, 2013	0.01
January 23, 2013	March 1, 2013	March 22, 2013	0.01

On March 14, 2013, the Corporation announced that its Board of Directors authorized the repurchase of up to \$5.0 billion of common stock. The timing and amount of common stock repurchases have been and will continue to be consistent with the Corporation's 2013 capital plan and will be subject to various factors, including the Corporation's capital position, liquidity, applicable legal considerations, financial performance and alternative uses of capital, stock trading price, and general market conditions, and may be suspended at any time. The remaining common stock repurchases may be effected through open market purchases or privately negotiated transactions, including repurchase plans that satisfy the conditions of Rule 10b5-1 of the Securities Exchange Act of 1934.

During the three and nine months ended September 30, 2013, the Corporation repurchased and retired 60.0 million and 139.6 million shares of common stock, which reduced shareholders' equity by \$866 million and \$1.9 billion.

During the nine months ended September 30, 2013, in connection with employee stock plans, the Corporation issued approximately 73 million shares and repurchased approximately 28 million shares of its common stock to satisfy tax withholding obligations. At September 30, 2013, the Corporation had reserved 1.8 billion unissued shares of common stock for future issuances under employee stock plans, common stock warrants, convertible notes and preferred stock.

Preferred Stock

During the three months ended March 31, 2013, June 30, 2013 and September 30, 2013, the cash dividends declared on preferred stock were \$373 million, \$365 million and \$255 million for a total of \$993 million for the nine months ended September 30, 2013.

During the nine months ended September 30, 2013, the Corporation redeemed for \$6.6 billion its Non-Cumulative Preferred Stock, Series H, J, 6, 7 and 8. The \$100 million difference between the carrying value of \$6.5 billion and the redemption price of the preferred stock was recorded as a preferred stock dividend. In addition, the Corporation issued \$1.0 billion of its Fixed-to-Floating Rate Semi-annual Non-Cumulative Preferred Stock, Series U.

Dividends and undistributed earnings allocated to participating securities	(1)	—	(2)	(2)
Net income (loss) allocated to common shareholders	\$2,217	\$(33)	\$6,897	\$2,391
Average common shares issued and outstanding	10,718,918	10,776,173	10,764,216	10,735,461
Earnings per common share	\$0.21	\$0.00	\$0.64	\$0.22
Diluted earnings per common share				
Net income (loss) applicable to common shareholders	\$2,218	\$(33)	\$6,899	\$2,393
Add preferred stock dividends due to assumed conversions	75	—	225	—
Dividends and undistributed earnings allocated to participating securities	(1)	—	(2)	(2)
Net income (loss) allocated to common shareholders	\$2,292	\$(33)	\$7,122	\$2,391
Average common shares issued and outstanding	10,718,918	10,776,173	10,764,216	10,735,461
Dilutive potential common shares ⁽¹⁾	763,308	—	759,433	91,042
Total diluted average common shares issued and outstanding	11,482,226	10,776,173	11,523,649	10,826,503
Diluted earnings per common share	\$0.20	\$0.00	\$0.62	\$0.22

⁽¹⁾ Includes incremental shares from restricted stock units, restricted stock, stock options and warrants.

The Corporation previously issued a warrant to purchase 700 million shares of the Corporation's common stock to the holder of the Corporation's 6% Cumulative Perpetual Preferred Stock, Series T (the Series T Preferred Stock). The warrant may be exercised, at the option of the holder, through tendering the Series T Preferred Stock or paying cash. For both the three and nine months ended September 30, 2013, 700 million average dilutive potential common shares associated with the Series T Preferred Stock were included in the diluted share count under the "if-converted" method. For the same periods in 2012, they were not included in the diluted share count because the result would have been antidilutive under the "if-converted" method.

For both the three and nine months ended September 30, 2013 and 2012, 62 million average dilutive potential common shares associated with the 7.25% Non-Cumulative Perpetual Convertible Preferred Stock, Series L were not included in the diluted share count because the result would have been antidilutive under the "if-converted" method. For the three and nine months ended September 30, 2013, average options to purchase 123 million and 127 million shares of common stock were outstanding but not included in the computation of EPS because the result would have been antidilutive under the treasury stock method compared to 159 million and 166 million for the same periods in 2012. For the three and nine months ended September 30, 2013, average warrants to purchase 263 million and 272 million shares of common stock were outstanding but not included in the computation of EPS because the result

would have been antidilutive under the treasury stock method compared to 272 million for the same periods in 2012.

Table of Contents

NOTE 15 – Pension, Postretirement and Certain Compensation Plans

Pension and Postretirement Plans

The Corporation sponsors noncontributory trustee pension plans, a number of noncontributory nonqualified pension plans, and postretirement health and life plans that cover eligible employees. During the three months ended September 30, 2013, the Corporation merged a defined benefit pension plan, which covered eligible employees of certain legacy companies, into the Bank of America Pension Plan. This plan is referred to as the Qualified Pension Plan (Qualified Pension Plans prior to this merger). The benefit structures of the merged plans did not change and there was no impact to plan participants. The merger of the pension plans required a remeasurement, which was accelerated from the required December 31 remeasurement, of the qualified pension obligations and plan assets at fair value as of the merger date that resulted in an increase in accumulated OCI of \$1.4 billion, net-of-tax. Under pension plan accounting guidance, pension assets and obligations are required to be measured again at December 31. Effective June 30, 2012, the benefits earned in the Qualified Pension Plans were frozen. For more information on these plans, see Note 18 – Employee Benefit Plans to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Net periodic benefit cost of the Corporation's plans for the three and nine months ended September 30, 2013 and 2012 included the following components.

Components of Net Periodic Benefit Cost

(Dollars in millions)	Three Months Ended September 30, 2013			
	Qualified Pension Plan	Non-U.S. Pension Plans	Nonqualified and Other Pension Plans ⁽¹⁾	Postretirement Health and Life Plans
Service cost	\$—	\$8	\$—	\$ 1
Interest cost	157	26	30	13

⁽¹⁾ Includes nonqualified pension plans and the terminated Merrill Lynch U.S. pension plan.

Table of Contents

The Corporation's best estimate of its contributions to be made to the Non-U.S. Pension Plans, Nonqualified and Other Pension Plans, and Postretirement Health and Life Plans in 2013 is \$123 million, \$103 million and \$107 million, respectively. For the nine months ended September 30, 2013, the Corporation contributed \$112 million, \$78 million and \$81 million, respectively, to these plans. The Corporation has not made and does not expect to make a contribution to the Qualified Pension Plan in 2013.

Certain Compensation Plans

During the nine months ended September 30, 2013, the Corporation granted 183 million restricted stock unit (RSU) awards to certain employees under the Key Associate Stock Plan. Generally, one-third of the RSUs vest on each of the first three anniversaries of the grant date provided that the employee remains continuously employed with the Corporation during that time. Except for two million RSUs that are authorized to settle in shares of common stock of the Corporation, the RSUs will be paid in cash to the employees on the vesting date based on the fair value of the Corporation's common stock as of the vesting date. The RSUs are expensed ratably over the vesting period, net of estimated forfeitures, for non-retirement eligible employees based upon the fair value of the Corporation's common stock on the accrual date. For RSUs granted to employees who are retirement eligible or will become retirement eligible during the vesting period, the RSUs are expensed as of the grant date or ratably over the period from the grant date to the date the employee becomes retirement eligible, net of estimated forfeitures. The accrued liability for the RSUs is adjusted to fair value based on changes in the fair value of the Corporation's common stock. The Corporation enters into cash-settled equity derivatives for a significant portion of the RSUs to minimize the change in expense driven by fluctuations in the fair value of the RSUs over the applicable vesting period. For additional information, see Note 19 – Stock-based Compensation Plans to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

NOTE 16 – Fair Value Measurements

Under applicable accounting guidance, fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Corporation determines the fair values of its financial instruments based on the fair value hierarchy established under applicable accounting guidance which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. There are three levels of inputs used to measure fair value. The Corporation conducts a review of its fair value hierarchy classifications on a quarterly basis. Transfers into or out of fair value hierarchy classifications are made if the significant inputs used in the financial models measuring the fair values of the assets and liabilities became unobservable or observable, respectively, in the current marketplace. These transfers are considered to be effective as of the beginning of the quarter in which they occur. For more information regarding the fair value hierarchy and how the Corporation measures fair value, see Note 1 – Summary of Significant Accounting Principles to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K. The Corporation accounts for certain financial instruments under the fair value option. For additional information, see Note 17 – Fair Value Option.

Valuation Processes and Techniques

The Corporation has various processes and controls in place to ensure that fair value is reasonably estimated. A model validation policy governs the use and control of valuation models used to estimate fair value. This policy requires review and approval of models by personnel who are independent of the front office, and periodic reassessments of models to ensure that they are continuing to perform as designed. In addition, detailed reviews of trading gains and losses are conducted on a daily basis by personnel who are independent of the front office. A price verification group, which is also independent of the front office, utilizes available market information including executed trades, market

prices and market-observable valuation model inputs to ensure that fair values are reasonably estimated. The Corporation performs due diligence procedures over third-party pricing service providers in order to support their use in the valuation process. Where market information is not available to support internal valuations, independent reviews of the valuations are performed and any material exposures are escalated through a management review process.

While the Corporation believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

During the nine months ended September 30, 2013, there were no changes to the valuation techniques that had, or are expected to have, a material impact on the Corporation's consolidated financial position or results of operations.

Table of Contents

Level 1, 2 and 3 Valuation Techniques

Financial instruments are considered Level 1 when the valuation is based on quoted prices in active markets for identical assets or liabilities. Level 2 financial instruments are valued using quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or models using inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques, and at least one significant model assumption or input is unobservable and when determination of the fair value requires significant management judgment or estimation.

Trading Account Assets and Liabilities and Debt Securities

The fair values of trading account assets and liabilities are primarily based on actively traded markets where prices are based on either direct market quotes or observed transactions. The fair values of debt securities are generally based on quoted market prices or market prices for similar assets. Liquidity is a significant factor in the determination of the fair values of trading account assets and liabilities and debt securities. Market price quotes may not be readily available for some positions, or positions within a market sector where trading activity has slowed significantly or ceased. Some of these instruments are valued using a discounted cash flow model, which estimates the fair value of the securities using internal credit risk, interest rate and prepayment risk models that incorporate management's best estimate of current key assumptions such as default rates, loss severity and prepayment rates. Principal and interest cash flows are discounted using an observable discount rate for similar instruments with adjustments that management believes a market participant would consider in determining fair value for the specific security. Other instruments are valued using a net asset value approach which considers the value of the underlying securities. Underlying assets are valued using external pricing services, where available, or matrix pricing based on the vintages and ratings. Situations of illiquidity generally are triggered by the market's perception of credit uncertainty regarding a single company or a specific market sector. In these instances, fair value is determined based on limited available market information and other factors, principally from reviewing the issuer's financial statements and changes in credit ratings made by one or more rating agencies.

Derivative Assets and Liabilities

The fair values of derivative assets and liabilities traded in the OTC market are determined using quantitative models that utilize multiple market inputs including interest rates, prices and indices to generate continuous yield or pricing curves and volatility factors to value the position. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third-party pricing services. When third-party pricing services are used, the methods and assumptions used are reviewed by the Corporation. Estimation risk is greater for derivative asset and liability positions that are either option-based or have longer maturity dates where observable market inputs are less readily available, or are unobservable, in which case, quantitative-based extrapolations of rate, price or index scenarios are used in determining fair values. The fair values of derivative assets and liabilities include adjustments for market liquidity, counterparty credit quality and other instrument-specific factors, where appropriate. In addition, the Corporation incorporates within its fair value measurements of OTC derivatives a valuation adjustment to reflect the credit risk associated with the net position. Positions are netted by counterparty, and fair value for net long exposures is adjusted for counterparty credit risk while the fair value for net short exposures is adjusted for the Corporation's own credit risk. An estimate of severity of loss is also used in the determination of fair value, primarily based on market data.

Loans and Loan Commitments

The fair values of loans and loan commitments are based on market prices, where available, or discounted cash flow analyses using market-based credit spreads of comparable debt instruments or credit derivatives of the specific borrower or comparable borrowers. Results of discounted cash flow calculations may be adjusted, as appropriate, to reflect other market conditions or the perceived credit risk of the borrower.

Mortgage Servicing Rights

The fair values of MSR are determined using models that rely on estimates of prepayment rates, the resultant weighted-average lives of the MSR and the option-adjusted spread (OAS) levels. For more information on MSR, see Note 19 – Mortgage Servicing Rights.

Loans Held-for-sale

The fair values of LHFS are based on quoted market prices, where available, or are determined by discounting estimated cash flows using interest rates approximating the Corporation's current origination rates for similar loans adjusted to reflect the inherent credit risk.

Table of Contents

Private Equity Investments

Private equity investments consist of direct investments and fund investments which are initially valued at their transaction price. Thereafter, the fair value of direct investments is based on an assessment of each individual investment using methodologies that include publicly-traded comparables derived by multiplying a key performance metric (e.g., earnings before interest, taxes, depreciation and amortization) of the portfolio company by the relevant valuation multiple observed for comparable companies, acquisition comparables, entry level multiples and discounted cash flow analyses, and are subject to appropriate discounts for lack of liquidity or marketability. After initial recognition, the fair value of fund investments is based on the Corporation's proportionate interest in the fund's capital as reported by the respective fund managers.

Securities Financing Agreements

The fair values of certain reverse repurchase agreements, repurchase agreements and securities borrowed transactions are determined using quantitative models, including discounted cash flow models that require the use of multiple market inputs including interest rates and spreads to generate continuous yield or pricing curves, and volatility factors. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third-party pricing services.

Deposits and Short-term Borrowings

The fair values of deposits and short-term borrowings are determined using quantitative models, including discounted cash flow models that require the use of multiple market inputs including interest rates and spreads to generate continuous yield or pricing curves, and volatility factors. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third-party pricing services. The Corporation considers the impact of its own credit spreads in the valuation of these liabilities. The credit risk is determined by reference to observable credit spreads in the secondary cash market.

Long-term Debt

The Corporation issues structured liabilities that have coupons or repayment terms linked to the performance of debt or equity securities, indices, currencies or commodities. The fair values of these structured liabilities are estimated using quantitative models for the combined derivative and debt portions of the notes. These models incorporate observable and, in some instances, unobservable inputs including security prices, interest rate yield curves, option volatility, currency, commodity or equity rates and correlations between these inputs. The Corporation also considers the impact of its own credit spreads in determining the discount rate used to value these liabilities. The credit spread is determined by reference to observable spreads in the secondary bond market.

Asset-backed Secured Financings

The fair values of asset-backed secured financings are based on external broker bids, where available, or are determined by discounting estimated cash flows using interest rates approximating the Corporation's current origination rates for similar loans adjusted to reflect the inherent credit risk.

Table of Contents

Recurring Fair Value

Assets and liabilities carried at fair value on a recurring basis at September 30, 2013 and December 31, 2012, including financial instruments which the Corporation accounts for under the fair value option, are summarized in the following tables.

(Dollars in millions)	September 30, 2013 Fair Value Measurements			Netting Adjustments (2)	Assets/Liabilities at Fair Value

⁽¹⁾ Assets (liabilities). For assets, increase / (decrease) to Level 3 and for liabilities, (increase) / decrease to Level 3.

⁽²⁾ Net derivatives include derivative assets of \$7.5 billion and derivative liabilities of \$6.8 billion.

⁽³⁾ Amounts represent instruments that are accounted for under the fair value option.

⁽⁴⁾ Issuances represent loan originations and mortgage servicing rights retained following securitizations or whole loan sales.

⁽⁵⁾ Other assets is primarily comprised of private equity investments.

During the three months ended September 30, 2013, the transfers into Level 3 included \$208 million of trading account assets, \$116 million of net derivative assets, \$100 million of AFS debt securities, \$239 million of other assets and \$485 million of long-term debt. Transfers into Level 3 for trading account assets were primarily the result of decreased third-party prices available for certain corporate loans. Transfers into Level 3 for net derivative assets were primarily due to decreased price observability (i.e., market comparables for the referenced instruments) for certain

complex interest rate derivative transactions. Transfers into Level 3 for AFS debt securities were primarily due to decreased price observability. Transfers into Level 3 for other assets were primarily due to a lack of independent pricing data for certain receivables. Transfers into Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities. Transfers occur on a regular basis for these long-term debt instruments due to changes in the impact of unobservable inputs on the value of the embedded derivative in relation to the instrument as a whole.

During the three months ended September 30, 2013, the transfers out of Level 3 included \$279 million of trading account assets, \$101 million of net derivative assets and \$328 million of long-term debt. Transfers out of Level 3 for trading account assets were primarily the result of increased market liquidity and third-party prices available for certain corporate loans and securities. Transfers out of Level 3 for net derivative assets were primarily due to increased price observability (i.e., market comparables for the referenced instruments) for certain options. Transfers out of Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities.

Long-term debt ⁽³⁾	(2,388)	(91)	—	70	—	(115)	391	(531)	374	(2,290)

⁽¹⁾ Assets (liabilities). For assets, increase / (decrease) to Level 3 and for liabilities, (increase) / decrease to Level 3.

⁽²⁾ Net derivatives include derivative assets of \$10.0 billion and derivative liabilities of \$7.0 billion.

⁽³⁾ Amounts represent instruments that are accounted for under the fair value option.

⁽⁴⁾ Issuances represent loan originations and mortgage servicing rights retained following securitizations or whole loan sales.

⁽⁵⁾ Other assets is primarily comprised of net monoline exposure to a single counterparty and private equity investments.

During the three months ended September 30, 2012, the transfers into Level 3 included \$166 million of trading account assets, \$350 million of net derivative assets, \$450 million of loans and leases, and \$531 million of long-term debt. Transfers into Level 3 for trading account assets primarily related to decreased market liquidity for certain corporate loans. Transfers into Level 3 for net derivative assets primarily related to decreased price observability for certain long-dated equity derivative liabilities due to a lack of independent pricing. Transfers into Level 3 for loans and leases were driven by updated information related to certain commercial loans. Transfers into Level 3 for

long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities. Transfers occur on a regular basis for these long-term debt instruments due to changes in the impact of unobservable inputs on the value of the embedded derivative in relation to the instrument as a whole.

During the three months ended September 30, 2012, the transfers out of Level 3 included \$390 million of trading account assets and \$374 million of long-term debt. Transfers out of Level 3 for trading account assets primarily related to increased price observability for certain corporate loans due to improved liquidity in the secondary markets. Transfers out of Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities.

⁽¹⁾ Assets (liabilities). For assets, increase / (decrease) to Level 3 and for liabilities, (increase) / decrease to Level 3.

⁽²⁾ Net derivatives include derivative assets of \$7.5 billion and derivative liabilities of \$6.8 billion.

⁽³⁾ Amounts represent instruments that are accounted for under the fair value option.

⁽⁴⁾ Issuances represent loan originations and mortgage servicing rights retained following securitizations or whole loan sales.

⁽⁵⁾ Other assets is primarily comprised of private equity investments.

During the nine months ended September 30, 2013, the transfers into Level 3 included \$693 million of trading account assets, \$46 million of net derivative assets, \$100 million of AFS debt securities, \$239 million of other assets and \$1.0 billion of long-term debt. Transfers into Level 3 for trading account assets were primarily the result of decreased third-party prices available for certain corporate loans and securities. Transfers into Level 3 for net derivative assets were primarily due to decreased price observability (i.e., market comparables for the referenced instruments) for certain complex interest rate derivative transactions and updated information related to certain total return swaps. Transfers into Level 3 for AFS debt securities were primarily due to decreased price observability. Transfers into Level 3 for other assets were primarily due to a lack of independent pricing data for certain receivables. Transfers into

Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities. Transfers occur on a regular basis for these long-term debt instruments due to changes in the impact of unobservable inputs on the value of the embedded derivative in relation to the instrument as a whole.

During the nine months ended September 30, 2013, the transfers out of Level 3 included \$1.3 billion of trading account assets, \$603 million of net derivative assets, \$261 million of AFS debt securities and \$889 million of long-term debt. Transfers out of Level 3 for trading account assets were primarily the result of increased market liquidity and third-party prices available for certain corporate loans and securities. Transfers out of Level 3 for net derivative assets were primarily due to increased price observability (i.e., market comparables for the referenced instruments) for certain options. Transfers out of Level 3 for AFS debt securities were primarily due to increased market liquidity. Transfers out of Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities.

Long-term debt ⁽⁴⁾	(2,943)	(239)	—	188	(33)	(253)	1,099	(1,569)	1,460	(2,290)

⁽¹⁾ Assets (liabilities). For assets, increase / (decrease) to Level 3 and for liabilities, (increase) / decrease to Level 3.

During the nine months ended September 30, 2012, approximately \$900 million was reclassified from Trading account assets - Corporate securities, trading loans and other to Trading account assets - Mortgage trading loans and ABS. In the table above, this reclassification is presented as a sale of Trading account assets - Corporate securities, trading loans and other and a purchase of Trading account assets - Mortgage trading loans and ABS.

⁽²⁾ Net derivatives include derivative assets of \$10.0 billion and derivative liabilities of \$7.0 billion.

⁽³⁾ Amounts represent instruments that are accounted for under the fair value option.

⁽⁴⁾ Issuances represent loan originations and mortgage servicing rights retained following securitizations or whole loan sales.

⁽⁵⁾ Other assets is primarily comprised of net monoline exposure to a single counterparty and private equity investments.

During the nine months ended September 30, 2012, the transfers into Level 3 included \$1.1 billion of trading account assets, \$283 million of net derivative assets, \$450 million of loans and leases and \$1.6 billion of long-term debt. Transfers into Level 3 for trading account assets were primarily the result of decreased market liquidity for certain corporate loans and updated information related to certain CLOs. Transfers into Level 3 for net derivative assets primarily related to decreased price observability for certain long-dated equity derivative liabilities due to a lack of independent pricing. Transfers into Level 3 for loans and leases were driven by updated information related to certain commercial loans. Transfers into Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities. Transfers occur on a regular basis for these long-term debt instruments due to changes in the impact of unobservable inputs on the value of the embedded derivative in relation to the instrument as a whole.

During the nine months ended September 30, 2012, the transfers out of Level 3 included \$1.1 billion of trading account assets, \$370 million of net derivative assets, \$771 million of AFS debt securities, \$632 million of LHFS and \$1.5 billion of long-term debt. Transfers out of Level 3 for trading account assets primarily related to increased market liquidity for certain corporate and commercial real estate loans. Transfers out of Level 3 for net derivative assets primarily related to increased price observability (i.e., market comparables for the referenced instruments) for certain total return swaps and foreign exchange swaps. Transfers out of Level 3 for AFS debt securities primarily related to increased price observability for certain non-agency RMBS and ABS. Transfers out of Level 3 for LHFS primarily related to increased observable inputs, primarily liquid comparables. Transfers out of Level 3 for long-term debt were primarily due to changes in the impact of unobservable inputs on the value of certain structured liabilities.

Table of Contents

The following tables summarize gains (losses) due to changes in fair value, including both realized and unrealized gains (losses), recorded in earnings for Level 3 assets and liabilities during the three and nine months ended September 30, 2013 and 2012. These amounts include gains (losses) on loans, LHFS, loan commitments and structured liabilities that are accounted for under the fair value option.

Equity derivatives	\$(1,295)	Industry standard derivative pricing ⁽³⁾	Equity correlation 30% to 97%
			Long-dated volatilities 20% to 70%
Commodity derivatives	\$(5)	Discounted cash flow	Natural gas forward price \$3/MMBtu to \$12/MMBtu
Interest rate derivatives	\$441		Correlation (IR/IR) 15% to 99%
			Correlation (FX/IR) -65% to 50%
			Long-dated inflation rates 2% to 3%
		Industry standard derivative pricing ⁽⁴⁾	Long-dated inflation volatilities 0% to 1%
			Long-dated volatilities (FX) 5% to 36%
			Long-dated swap rates 8% to 10%
Total net derivative assets	\$1,468		

The categories are aggregated based upon product type which differs from financial statement classification. The following is a reconciliation to the line items in the table on page 238: Trading account assets – Corporate securities, (1) trading loans and other of \$3.7 billion, Trading account assets – Mortgage trading loans and ABS of \$4.9 billion, AFS debt securities – Other taxable securities of \$3.9 billion, AFS debt securities – Tax-exempt securities of \$1.1 billion, Loans and leases of \$2.3 billion, LHFS of \$2.7 billion and Other assets of \$1.9 billion.

(2) For more information on the ranges of inputs for equity correlation and long-dated volatilities, see the qualitative equity derivatives discussion on page 245.

(3) Includes models such as Monte Carlo simulation and Black-Scholes.

(4) Includes models such as Monte Carlo simulation, Black-Scholes and other methods that model the joint dynamics of interest, inflation and foreign exchange rates.

n/a = not applicable

n/m = not meaningful

CPR = Constant Prepayment Rate

CDR = Constant Default Rate

EBITDA = Earnings before interest, taxes, depreciation and amortization

MMBtu = Million British thermal units

IR = Interest Rate

FX = Foreign Exchange

Table of Contents

In the tables above, instruments backed by residential and commercial real estate assets include RMBS, CMBS, whole loans, mortgage CDOs and net monoline exposure. Commercial loans, debt securities and other includes corporate CLOs and CDOs, commercial loans and bonds, and securities backed by non-real estate assets. Structured liabilities primarily include equity-linked notes that are accounted for under the fair value option.

In addition to the instruments in the tables above, the Corporation held \$934 million and \$1.2 billion of instruments at September 30, 2013 and December 31, 2012 consisting primarily of certain direct private equity investments and private equity funds that were classified as Level 3 and reported within other assets. Valuations of direct private equity investments are based on the most recent company financial information. Inputs generally include market and acquisition comparables, entry level multiples, as well as other variables. The Corporation selects a valuation methodology (e.g., market comparables) for each investment and, in certain instances, multiple inputs are weighted to derive the most representative value. Discounts are applied as appropriate to consider the lack of liquidity and marketability versus publicly-traded companies. For private equity funds, fair value is determined using the net asset value as provided by the individual fund's general partner.

For more information on the inputs and techniques used in the valuation of MSRs, see Note 19 – Mortgage Servicing Rights.

The Corporation uses multiple market approaches in valuing certain of its Level 3 financial instruments. For example, market comparables and discounted cash flows are used together. For a given product, such as corporate debt securities, market comparables may be used to estimate some of the unobservable inputs and then these inputs are incorporated into a discounted cash flow model. Therefore, the balances disclosed encompass both of these techniques.

The level of aggregation and diversity within the products disclosed in the tables results in certain ranges of inputs being wide and unevenly distributed across asset and liability categories. At December 31, 2012, weighted averages were disclosed for all loans and securities. At September 30, 2013, weighted averages are disclosed for all loans, securities, structured liabilities and net derivative assets.

For credit derivatives, the range of credit spreads represented positions with varying levels of default risk to the underlying instruments. The lower end of the credit spread range typically represented shorter-dated instruments and those with better perceived credit risk. The higher end of the range represented longer-dated instruments and those referencing debt issuances that were more likely to be impaired or nonperforming. At December 31, 2012, the majority of inputs were concentrated in the lower end of the range. Similarly, the spread to index could vary significantly based on the risk of the instrument. The spread will be positive for instruments that have a higher risk of default than the index (which is based on a weighted average of its components) and negative for instruments that have a lower risk of default than the index. At December 31, 2012, inputs were distributed evenly throughout the range for spread to index. In addition, for yield and credit correlation, the majority of the inputs were concentrated in the center of the range. Inputs were concentrated in the middle to lower end of the range for upfront points. The range for loss severity reflected exposures that were concentrated in the middle to upper end of the range while the ranges for prepayment speed and default rates reflected exposures that were concentrated in the lower end of the range.

For equity derivatives at December 31, 2012, including those embedded in long-term debt, the range for equity correlation represented exposure primarily concentrated toward the upper end of the range. The range for long-dated volatilities represented exposure primarily concentrated toward the lower end of the range.

For interest rate derivatives, the diversity in the portfolio was reflected in wide ranges of inputs because the variety of currencies and tenors of the transactions required the use of numerous foreign exchange and interest rate curves. Since foreign exchange and interest rate correlations were measured between curves and across the various tenors on the

same curve, the range of potential values could include both negative and positive values. For the correlation (IR/IR) range, the exposure represented the valuation of interest rate correlations on less liquid pairings and was concentrated at the upper end of the range at December 31, 2012. For the correlation (FX/IR) range, the exposure was the sensitivity to a broad mix of interest rate and foreign exchange correlations and was distributed evenly throughout the range at December 31, 2012. For long-dated inflation rates and volatilities as well as long-dated volatilities (FX), the inputs were concentrated in the middle of the range.

Sensitivity of Fair Value Measurements to Changes in Unobservable Inputs

Loans and Securities

For instruments backed by residential real estate assets, commercial real estate assets, and commercial loans, debt securities and other, a significant increase in market yields, default rates or loss severities would result in a significantly lower fair value for long positions. Short positions would be impacted in a directionally opposite way. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested.

Table of Contents

For closed-end auction rate securities (ARS), a significant increase in discount rates would result in a significantly lower fair value. For student loan and municipal ARS, a significant increase in projected tender price/refinancing levels would result in a significantly higher fair value.

Structured Liabilities and Derivatives

For credit derivatives, a significant increase in market yield, including spreads to indices, upfront points (i.e., a single upfront payment made by a protection buyer at inception), credit spreads, default rates or loss severities would result in a significantly lower fair value for protection sellers and higher fair value for protection buyers. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested.

Structured credit derivatives, which include tranching portfolio CDS and derivatives with derivative product company (DPC) and monoline counterparties, are impacted by credit correlation, including default and wrong-way correlation. Default correlation is a parameter that describes the degree of dependence among credit default rates within a credit portfolio that underlies a credit derivative instrument. The sensitivity of this input on the fair value varies depending on the level of subordination of the tranche. For senior tranches that are net purchases of protection, a significant increase in default correlation would result in a significantly higher fair value. Net short protection positions would be impacted in a directionally opposite way. Wrong-way correlation is a parameter that describes the probability that as exposure to a counterparty increases, the credit quality of the counterparty decreases. A significantly higher degree of wrong-way correlation between a DPC counterparty and underlying derivative exposure would result in a significantly lower fair value.

For equity derivatives, equity-linked long-term debt (structured liabilities) and interest rate derivatives, a significant change in long-dated rates and volatilities and correlation inputs (e.g., the degree of correlation between an equity security and an index, between two different interest rates, or between interest rates and foreign exchange rates) would result in a significant impact to the fair value; however, the magnitude and direction of the impact depends on whether the Corporation is long or short the exposure.

Nonrecurring Fair Value

The Corporation holds certain assets that are measured at fair value, but only in certain situations (e.g., impairment) and these measurements are referred to herein as nonrecurring. These assets primarily include LHFS, certain loans and leases, and foreclosed properties. The amounts below represent only balances measured at fair value during the three and nine months ended September 30, 2013 and 2012, and still held as of the reporting date.

Assets Measured at Fair Value on a Nonrecurring Basis

(Dollars in millions)	September 30, 2013		Three Months Ended September 30, 2013	Nine Months Ended September 30, 2013
	Level 2	Level 3	Gains (Losses)	
Assets				
Loans held-for-sale	\$4,266	\$274	\$1	\$(66)
Loans and leases ⁽¹⁾	23	5,114	(281)	(985)
Foreclosed properties ⁽²⁾	17	1,293	21	23
Other assets	78	10	(7)	(15)
	September 30, 2012		Three Months Ended September	Nine Months Ended September

			30, 2012	30, 2012	
Assets					
Loans held-for-sale	\$3,551	\$1,006	\$—	\$(6)
Loans and leases ⁽¹⁾	16	8,576	(1,548) (3,422)
Foreclosed properties ⁽²⁾	64	1,436	(20) (68)
Other assets	32	111	(11) (13)

⁽¹⁾ Losses represent charge-offs on real estate-secured loans.

Amounts are included in other assets on the Consolidated Balance Sheet and represent the fair value of, and related

⁽²⁾ losses on foreclosed properties that were written down subsequent to their initial classification as foreclosed properties.

Table of Contents

The table below presents information about significant unobservable inputs related to the Corporation's nonrecurring Level 3 financial assets and liabilities at September 30, 2013 and December 31, 2012.

Quantitative Information about Nonrecurring Level 3 Fair Value Measurements at September 30, 2013

(Dollars in millions)

Financial Instrument	Fair Value	Valuation Technique	Inputs Significant Unobservable Inputs	Ranges of Inputs	Weighted Average	
Instruments backed by residential real estate assets	\$5,114	Market comparables	OREO discount	0% to 19%	9	%
Loans and leases	5,114		Cost to sell	8%	n/a	

Quantitative Information about Nonrecurring Level 3 Fair Value Measurements at December 31, 2012

Instruments backed by residential real estate assets	\$9,932	Discounted cash flow, Market comparables	Yield	3% to 5%	3	%
Loans held-for-sale	748		Prepayment speed	3% to 30%	15	%
Loans and leases	9,184		Default rate	0% to 55%	7	%
			Loss severity	6% to 66%	48	%
			OREO discount	0% to 28%	15	%
		Cost to sell	8%	n/a		
Instruments backed by commercial real estate assets	\$388	Discounted cash flow	Yield	4% to 13%	6	%
Loans held-for-sale	388		Loss severity	24% to 88%	53	%

Instruments backed by residential real estate assets represent residential mortgages where the loan has been written down to the fair value of the underlying collateral or, in the case of LHFS, are carried at the lower of cost or fair value.

In addition to the instruments disclosed in the table above, the Corporation holds foreclosed residential properties where the fair value is based on unadjusted third-party appraisals or broker price opinions. Appraisals are conducted every 90 days. Factors considered in determining the fair value include geographic sales trends, the value of comparable surrounding properties as well as the condition of the property.

Table of Contents

NOTE 17 – Fair Value Option

The Corporation elects to account for certain financial instruments under the fair value option. For more information on the primary financial instruments for which the fair value option elections have been made, see Note 22 – Fair Value Option to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

The table below provides information about the fair value carrying amount and the contractual principal outstanding of assets and liabilities accounted for under the fair value option at September 30, 2013 and December 31, 2012.

Fair Value Option Elections

(Dollars in millions)	September 30, 2013			December 31, 2012		
	Fair Value Carrying Amount	Contractual Principal Outstanding	Fair Value Carrying Amount Less Unpaid Principal	Fair Value Carrying Amount	Contractual Principal Outstanding	Fair Value Carrying Amount Less Unpaid Principal
Loans reported as trading account assets ⁽¹⁾	\$2,510	\$4,013	\$(1,503)	\$1,663	\$2,879	\$(1,216)
Trading inventory – other	3,106	n/a	n/a	2,170	n/a	n/a
Consumer and commercial loans	10,196	10,598	(402)	9,002	9,576	(574)
Loans held-for-sale	8,217	8,937	(720)	11,659	12,676	(1,017)
Securities financing agreements	164,816	164,556	260	141,309	140,791	518
Other assets	412	270	142	453	270	183
Long-term deposits	1,916	1,794	122	2,262	2,046	216
Asset-backed secured financings	762	1,105	(343)	741	1,176	(435)
Unfunded loan commitments	412	n/a	n/a	528	n/a	n/a
Short-term borrowings	2,082	2,082	—	3,333	3,333	—
Accrued expenses and other liabilities	20	20	—	—	—	—
Long-term debt ^(2, 3)	47,401	47,811	(410)	49,161	50,792	(1,631)

A significant portion of the loans reported as trading account assets are distressed loans which trade and were ⁽¹⁾ purchased at a deep discount to par, and the remainder are loans with a fair value near contractual principal outstanding.

The majority of the difference between the fair value carrying amount and contractual principal outstanding at ⁽²⁾ September 30, 2013 and December 31, 2012 relates to the impact of the Corporation's credit spreads as well as the fair value of the embedded derivative, where applicable.

⁽³⁾ Includes structured liabilities with a fair value of \$36.1 billion and contractual principal outstanding of \$35.9 billion at September 30, 2013 compared to \$39.3 billion and \$39.9 billion at December 31, 2012.

n/a = not applicable

The table below provides information about where changes in the fair value of assets and liabilities accounted for under the fair value option are included in the Consolidated Statement of Income for the three and nine months ended September 30, 2013 and 2012. Of the changes in fair value for LHFS, gains of \$52 million and \$119 million were attributable to changes in borrower-specific credit risk for the three and nine months ended September 30, 2013 compared to gains of \$117 million and \$281 million for the same periods in 2012. Of the changes in fair value for loans and loan commitments, gains of \$62 million and \$218 million were attributable to changes in borrower-specific credit risk for the three and nine months ended September 30, 2013 compared to gains of \$487 million and \$975 million for the same periods in 2012. Changes to borrower-specific credit risk for loans reported as trading account assets were not material for the three and nine months ended September 30, 2013 and 2012.

Table of Contents

Gains (Losses) Relating to Assets and Liabilities Accounted for Under the Fair Value Option

Total	\$ (851) \$ 2,027	\$ (3,456) \$ (2,280

(1) Includes the value of interest rate lock commitments on loans funded, including those already sold during the period.

The majority of the net gains (losses) in trading account profits (losses) relate to the embedded derivative in structured liabilities and are offset by gains (losses) on derivatives and securities that hedge these liabilities. The net gains (losses) in other income (loss) relate to the impact on structured liabilities of changes in the Corporation's credit spreads.

Table of Contents

NOTE 18 – Fair Value of Financial Instruments

The fair values of financial instruments and their classifications within the fair value hierarchy have been derived using methodologies described in Note 16 – Fair Value Measurements. The following disclosures include financial instruments where only a portion of the ending balance at September 30, 2013 and December 31, 2012 was carried at fair value on the Consolidated Balance Sheet.

Short-term Financial Instruments

The carrying value of short-term financial instruments, including cash and cash equivalents, time deposits placed and other short-term investments, federal funds sold and purchased, resale and certain repurchase agreements, customer and other receivables, customer payables (within accrued expenses and other liabilities on the Consolidated Balance Sheet), and short-term borrowings approximates the fair value of these instruments. These financial instruments generally expose the Corporation to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market. The Corporation elected to account for certain repurchase agreements under the fair value option.

Under the fair value hierarchy, cash and cash equivalents are classified as Level 1. Time deposits placed and other short-term investments, such as U.S. government securities and short-term commercial paper, are classified as Level 1 and Level 2. Federal funds sold and purchased are classified as Level 2. Resale and repurchase agreements are classified as Level 2 because they are generally short-dated and/or variable-rate instruments collateralized by U.S. government or agency securities. Customer and other receivables primarily consist of margin loans, servicing advances and other accounts receivable and are classified as Level 2 and Level 3. Customer payables (within accrued expenses and other liabilities) and short-term borrowings are classified as Level 2.

Held-to-maturity Debt Securities

HTM debt securities, which consist of U.S. agency debt securities, are classified as Level 2 using the same methodologies as AFS U.S. agency debt securities. For more information on HTM debt securities, see Note 4 – Securities.

Loans

The fair values for commercial and consumer loans are generally determined by discounting both principal and interest cash flows expected to be collected using a discount rate for similar instruments with adjustments that the Corporation believes a market participant would consider in determining fair value. The Corporation estimates the cash flows expected to be collected using internal credit risk, interest rate and prepayment risk models that incorporate the Corporation's best estimate of current key assumptions, such as default rates, loss severity and prepayment speeds for the life of the loan. The carrying value of loans is presented net of the applicable allowance for loan losses and excludes leases. The Corporation elected to account for certain large commercial loans that exceeded the Corporation's single name credit risk concentration guidelines by an amount that would require hedging under the fair value option.

Mortgage Servicing Rights

Commercial and residential reverse MSR, which are carried at the lower of cost or market value and accounted for using the amortization method, are classified as Level 3. For more information on MSR, see Note 19 – Mortgage Servicing Rights.

Deposits

The fair value for certain deposits with stated maturities was determined by discounting contractual cash flows using current market rates for instruments with similar maturities. The carrying value of non-U.S. time deposits approximates fair value. For deposits with no stated maturities, the carrying value was considered to approximate fair value and does not take into account the significant value of the cost advantage and stability of the Corporation's long-term relationships with depositors. The Corporation accounts for certain long-term fixed-rate deposits that are hedged with derivatives on a risk management basis under the fair value option.

Long-term Debt

The Corporation uses quoted market prices, when available, to estimate fair value for its long-term debt. When quoted market prices are not available, fair value is estimated based on current market interest rates and credit spreads for debt with similar terms and maturities. The Corporation accounts for certain structured liabilities under the fair value option.

Table of Contents

Fair Value of Financial Instruments

The carrying values and fair values by fair value hierarchy of certain financial instruments where only a portion of the ending balance was carried at fair value at September 30, 2013 and December 31, 2012 are presented in the table below.

Fair Value of Financial Instruments

(Dollars in millions)	September 30, 2013				December 31, 2012			
	Carrying Value	Fair Value		Total	Carrying Value	Fair Value		Total
		Level 2	Level 3			Level 2	Level 3	
Financial assets								
Loans	\$890,469	\$105,404	\$802,191	\$907,595	\$859,875	\$105,119	\$772,761	\$877,880
Loans held-for-sale	15,001	13,447	1,554	15,001	19,413	15,087	4,321	19,408
Financial liabilities								
Deposits	1,110,118	1,110,427	—	1,110,427	1,105,261	1,105,669	—	1,105,669
Long-term debt	255,331	261,903	2,063	263,966	275,585	281,173	2,301	283,474

Commercial Unfunded Lending Commitments

Fair values were generally determined using a discounted cash flow valuation approach which is applied using market-based CDS or internally developed benchmark credit curves. The Corporation accounts for certain loan commitments under the fair value option.

The carrying values and fair values of the Corporation's commercial unfunded lending commitments were \$888 million and \$4.3 billion at September 30, 2013, and \$1.0 billion and \$4.5 billion at December 31, 2012. Commercial unfunded lending commitments are primarily classified as Level 3. The carrying value of these commitments is classified in accrued expenses and other liabilities.

The Corporation does not estimate the fair values of consumer unfunded lending commitments because, in many instances, the Corporation can reduce or cancel these commitments by providing notice to the borrower. For more information on commitments, see Note 11 – Commitments and Contingencies.

Table of Contents

NOTE 19 – Mortgage Servicing Rights

The Corporation accounts for consumer MSR assets at fair value with changes in fair value recorded in mortgage banking income in the Consolidated Statement of Income. The Corporation manages the risk in these MSR assets with securities including MBS and U.S. Treasuries, as well as certain derivatives such as options and interest rate swaps, which are not designated as accounting hedges. The securities used to manage the risk in the MSR assets are classified in other assets with changes in the fair value of the securities and the related interest income recorded in mortgage banking income.

The table below presents activity for residential first-lien MSR assets for the three and nine months ended September 30, 2013 and 2012. Commercial and residential reverse MSR assets, which are carried at the lower of cost or market value and accounted for using the amortization method, totaled \$10 million and \$135 million at September 30, 2013 and December 31, 2012, and are not included in the tables in this Note.

Rollforward of Mortgage Servicing Rights

(Dollars in millions)	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2013	2012	2013	2012
Balance, beginning of period	\$5,827	\$5,708	\$5,716	\$7,378
Additions	129	100	399	268
Sales	(729)	(15)	(1,774)	(113)
Amortization of expected cash flows ⁽¹⁾	(240)	(346)	(814)	(1,149)
Impact of changes in interest rates and other market factors ⁽²⁾	24	(280)	1,162	(1,022)
Model and other cash flow assumption changes: ⁽³⁾				
Projected cash flows, primarily due to decreases in costs to service loans	9	113	23	506
Impact of changes in the Home Price Index	(197)	(62)	(399)	(42)
Impact of changes to the prepayment model	206	—	609	342
Other model changes ⁽⁴⁾	29	(131)	136	(1,081)
Balance, September 30	\$5,058	\$5,087	\$5,058	\$5,087
Mortgage loans serviced for investors (in billions)	\$616	\$1,142	\$616	\$1,142

⁽¹⁾ Represents the net change in fair value of the MSR asset due to the recognition of modeled cash flows.

⁽²⁾ These amounts reflect the changes in modeled MSR fair value primarily due to observed changes in interest rates, volatility, spreads and the shape of the forward swap curve.

⁽³⁾ These amounts reflect periodic adjustments to the valuation model to reflect changes in the modeled relationship between inputs and their impact on projected cash flows as well as changes in certain cash flow assumptions such as cost to service and ancillary income per loan.

⁽⁴⁾ These amounts include the impact of periodic recalibrations of the model to reflect changes in the relationship between market interest rate spreads and projected cash flows. Also included is a decrease of \$929 million for the nine months ended September 30, 2012 due to changes in OAS rate inputs.

The Corporation primarily uses an OAS valuation approach which factors in prepayment risk to determine the fair value of MSR assets. This approach consists of projecting servicing cash flows under multiple interest rate scenarios and discounting these cash flows using risk-adjusted discount rates. In addition to updating the valuation model for interest, discount and prepayment rates, periodic adjustments are made to recalibrate the valuation model for factors used to project cash flows. The changes to the factors capture the effect of variances related to actual versus estimated servicing proceeds.

The \$729 million and \$1.8 billion of MSR sales during the three and nine months ended September 30, 2013 primarily relate to transfers completed under definitive agreements the Corporation entered into during 2013 to sell certain

MSRs. The transfers of the MSRs have occurred in stages throughout 2013, and approximately 92 percent of the servicing encompassed by these agreements had been transferred as of September 30, 2013.

255

Table of Contents

Significant economic assumptions in estimating the fair value of MSR's at September 30, 2013 and December 31, 2012 are presented below. The change in fair value as a result of changes in OAS rates is included within "Model and other cash flow assumption changes" in the Rollforward of Mortgage Servicing Rights table. The weighted-average life is not an input in the valuation model but is a product of both changes in market rates of interest and changes in model and other cash flow assumptions. The weighted-average life represents the average period of time that the MSR's cash flows are expected to be received. Absent other changes, an increase (decrease) to the weighted-average life would generally result in an increase (decrease) in the MSR's fair value.

Significant Economic Assumptions

	September 30, 2013		December 31, 2012	
	Fixed	Adjustable	Fixed	Adjustable
Weighted-average OAS	4.08 %	7.33 %	4.00 %	6.63 %
Weighted-average life, in years	5.19	2.75	3.65	2.10

The table below presents the sensitivity of the weighted-average lives and fair value of MSR's to changes in modeled assumptions. These sensitivities are hypothetical and should be used with caution. As the amounts indicate, changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of MSR's that continue to be held by the Corporation is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities. The below sensitivities do not reflect any hedge strategies that may be undertaken to mitigate such risk.

Sensitivity Impacts

(Dollars in millions)	September 30, 2013				Change in Fair Value
	Change in Weighted-average Lives				
	Fixed		Adjustable		
Prepayment rates					
Impact of 10% decrease	0.24	years	0.19	years	\$303
Impact of 20% decrease	0.51		0.40		639
Impact of 10% increase	(0.22)	(0.16)	(275)
Impact of 20% increase	(0.42)	(0.31)	(526)
OAS level					
Impact of 100 bps decrease					\$261
Impact of 200 bps decrease					545
Impact of 100 bps increase					(240)
Impact of 200 bps increase					(461)

Table of Contents

NOTE 20 – Business Segment Information

The Corporation reports the results of its operations through five business segments: Consumer & Business Banking (CBB), Consumer Real Estate Services (CRES), Global Banking, Global Markets and Global Wealth & Investment Management (GWIM), with the remaining operations recorded in All Other.

Consumer & Business Banking

CBB offers a diversified range of credit, banking and investment products and services to consumers and businesses. CBB product offerings include traditional savings accounts, money market savings accounts, CDs and IRAs, noninterest- and interest-bearing checking accounts, investment accounts and products as well as credit and debit cards in the U.S. to consumers and small businesses. Customers and clients have access to a franchise network that stretches coast to coast through 31 states and the District of Columbia. The franchise network includes approximately 5,200 banking centers, 16,200 ATMs, nationwide call centers, and online and mobile platforms. CBB also offers a wide range of lending-related products and services, integrated working capital management and treasury solutions through a network of offices and client relationship teams along with various product partners to U.S.-based companies generally with annual sales of \$1 million to \$50 million. CBB results are impacted by the migration of clients and their deposit and loan balances between CBB and other client-managed businesses. Subsequent to the date of migration, the associated net interest income, noninterest income and noninterest expense are recorded in the business to which the clients migrated. During the second quarter of 2013, consumer DFS results were moved to CBB from Global Banking to align this business more closely with the Corporation's consumer lending activity and better serve the needs of its customers. Prior periods were reclassified to conform to current period presentation.

Consumer Real Estate Services

CRES provides an extensive line of consumer real estate products and services to customers nationwide. CRES products include fixed- and adjustable-rate first-lien mortgage loans for home purchase and refinancing needs, home equity lines of credit (HELOCs) and home equity loans. First mortgage products are generally either sold into the secondary mortgage market to investors, while retaining MSR and the Bank of America customer relationships, or are held on the balance sheet in All Other for ALM purposes. Newly originated HELOCs and home equity loans are retained on the CRES balance sheet. CRES services mortgage loans, including those loans it owns, loans owned by other business segments and All Other, and loans owned by outside investors.

The financial results of the on-balance sheet loans are reported in the business segment that owns the loans or All Other. CRES is not impacted by the Corporation's first mortgage production retention decisions as CRES is compensated for loans held for ALM purposes on a management accounting basis, with a corresponding offset recorded in All Other, and for servicing loans owned by other business segments and All Other. CRES also includes the impact of migrating customers and their related loan balances between GWIM and CRES. Subsequent to the date of migration, the associated net interest income and noninterest expense are recorded in the business segment to which loans were transferred.

Global Banking

Global Banking provides a wide range of lending-related products and services, integrated working capital management and treasury solutions to clients, and underwriting and advisory services through the Corporation's network of offices and client relationship teams. Global Banking's lending products and services include commercial loans, leases, commitment facilities, trade finance, real estate lending and asset-based lending. Global Banking's treasury solutions business includes treasury management, foreign exchange and short-term investing options. Global Banking also works with clients to provide investment banking products such as debt and equity underwriting and

distribution, and merger-related and other advisory services. The economics of most investment banking and underwriting activities are shared primarily between Global Banking and Global Markets based on the activities performed by each segment. Global Banking clients generally include middle-market companies, commercial real estate firms, auto dealerships, not-for-profit companies, large global corporations, financial institutions and leasing clients. During the second quarter of 2013, the results of consumer DFS, previously reported in Global Banking, were moved into CBB and prior periods have been reclassified to conform to current period presentation.

Table of Contents

Global Markets

Global Markets offers sales and trading services, including research, to institutional clients across fixed-income, credit, currency, commodity and equity businesses. Global Markets product coverage includes securities and derivative products in both the primary and secondary markets. Global Markets provides market-making, financing, securities clearing, settlement and custody services globally to institutional investor clients in support of their investing and trading activities. Global Markets also works with commercial and corporate clients to provide risk management products using interest rate, equity, credit, currency and commodity derivatives, foreign exchange, fixed-income and mortgage-related products. As a result of market-making activities in these products, Global Markets may be required to manage risk in government securities, equity and equity-linked securities, high-grade and high-yield corporate debt securities, MBS, commodities and ABS. The economics of most investment banking and underwriting activities are shared primarily between Global Markets and Global Banking based on the activities performed by each segment.

Global Wealth & Investment Management

GWIM provides comprehensive wealth management solutions to a broad base of clients from emerging affluent to the ultra-wealthy. These services include investment and brokerage services, estate and financial planning, fiduciary portfolio management, cash and liability management, and specialty asset management. GWIM also provides retirement and benefit plan services, philanthropic management and asset management to individual and institutional clients. GWIM results are impacted by the net migration of clients and their related deposit and loan balances between GWIM and other businesses. Subsequent to the date of migration, the associated net interest income, noninterest income and noninterest expense are recorded in the business to which the clients migrated.

All Other

All Other consists of ALM activities, equity investments, the international consumer card business, liquidating businesses, residual expense allocations and other. ALM activities encompass the whole-loan residential mortgage portfolio and investment securities, interest rate and foreign currency risk management activities including the residual net interest income allocation, gains/losses on structured liabilities, the impact of certain allocation methodologies and accounting hedge ineffectiveness. The results of certain ALM activities are allocated to the business segments. Additionally, All Other includes certain residential mortgage loans that are managed by CRES.

Basis of Presentation

The management accounting and reporting process derives segment and business results by utilizing allocation methodologies for revenue and expense. The net income derived for the businesses is dependent upon revenue and cost allocations using an activity-based costing model, funds transfer pricing, and other methodologies and assumptions management believes are appropriate to reflect the results of the business.

Total revenue, net of interest expense, includes net interest income on a FTE basis and noninterest income. The adjustment of net interest income to a FTE basis results in a corresponding increase in income tax expense. The segment results also reflect certain revenue and expense methodologies that are utilized to determine net income. The net interest income of the businesses includes the results of a funds transfer pricing process that matches assets and liabilities with similar interest rate sensitivity and maturity characteristics. For presentation purposes, in segments where the total of liabilities and equity exceeds assets, which are generally deposit-taking segments, the Corporation allocates assets to match liabilities. Net interest income of the business segments also includes an allocation of net interest income generated by certain of the Corporation's ALM activities.

The Corporation's ALM activities include an overall interest rate risk management strategy that incorporates the use of various derivatives and cash instruments to manage fluctuations in earnings and capital that are caused by interest rate volatility. The Corporation's goal is to manage interest rate sensitivity so that movements in interest rates do not significantly adversely affect earnings and capital. The results of a majority of the Corporation's ALM activities are allocated to the business segments and fluctuate based on the performance of the ALM activities. ALM activities include external product pricing decisions including deposit pricing strategies, the effects of the Corporation's internal funds transfer pricing process and the net effects of other ALM activities.

Certain expenses not directly attributable to a specific business segment are allocated to the segments. The most significant of these expenses include data and item processing costs and certain centralized or shared functions. Data processing costs are allocated to the segments based on equipment usage. Item processing costs are allocated to the segments based on the volume of items processed for each segment. The costs of certain other centralized or shared functions are allocated based on methodologies that reflect utilization.

Table of Contents

The following tables present total revenue, net of interest expense, on a FTE basis, and net income (loss) for the three and nine months ended September 30, 2013 and 2012, and total assets at September 30, 2013 and 2012 for each business segment, as well as All Other.

Consolidated net income	\$2,497	\$340	\$7,992	\$3,456
			September 30	
			2013	2012
Segments' total assets			\$1,948,784	\$1,872,589
Adjustments:				
ALM activities, including securities portfolio			662,206	677,585
Equity investments			2,625	5,626
Liquidating businesses and other			70,991	124,053
Elimination of segment asset allocations to match liabilities			(557,953) (513,691
Consolidated total assets			\$2,126,653	\$2,166,162

Includes negative fair value adjustments on structured liabilities related to the improvement in the Corporation's

⁽¹⁾ credit spreads of \$152 million and \$232 million for the three and nine months ended September 30, 2013 compared to negative adjustments of \$1.3 billion and \$4.7 billion for the same periods in 2012.

Table of Contents

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

See Litigation and Regulatory Matters in Note 11 – Commitments and Contingencies to the Consolidated Financial Statements, which is incorporated by reference in this Item 1, for litigation and regulatory disclosure that supplements the disclosure in Note 13 – Commitments and Contingencies to the Consolidated Financial Statements of the Corporation's 2012 Annual Report on Form 10-K.

Item 1A. Risk Factors

The following supplements the risk factors set forth under Part 1, Item 1A. Risk Factors in the Corporation's 2012 Annual Report on Form 10-K captioned “We are subject to significant financial and reputational risks from potential legal liability and regulatory action.” and “Damage to our reputation could significantly harm our businesses, including our competitive position and business prospects.”

The current environment of heightened scrutiny may subject us to governmental or regulatory inquiries, investigations, actions, penalties and fines, including by the RMBS Working Group of the Financial Fraud Enforcement Task Force, or by other regulators or government agencies that could significantly adversely affect our reputation and result in material costs to us in excess of current reserves and management's estimate of the aggregate range of possible loss for litigation matters.

The disclosures in the risk factors cited above remain unchanged, except as specifically supplemented above. Except as supplemented above, there are no material changes from the risk factors set forth under Part 1, Item 1A. Risk Factors in the Corporation's 2012 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below presents share repurchase activity for the three months ended September 30, 2013. The primary source of funds for cash distributions by the Corporation to its shareholders is dividends received from its banking subsidiaries. Each of the banking subsidiaries is subject to various regulatory policies and requirements relating to the payment of dividends, including requirements to maintain capital above regulatory minimums. All of the Corporation's preferred stock outstanding has preference over the Corporation's common stock with respect to the payment of dividends.

(Dollars in millions, except per share information; shares in thousands)	Common Shares Repurchased ⁽¹⁾	Weighted-Average Per Share Price	Shares	
			Purchased as Part of Publicly Announced Programs	Remaining Buyback Authority Amounts ⁽²⁾
July 1 - 31, 2013	37	\$ 12.93	—	\$3,997
August 1 - 31, 2013	44,531	14.45	44,347	3,356
September 1 - 30, 2013	15,658	14.38	15,653	3,131
Three Months Ended September 30, 2013	60,226	14.43		

Includes shares of the Corporation's common stock acquired by the Corporation in connection with satisfaction of (1) tax withholding obligations on vested restricted stock or restricted stock units and certain forfeitures and terminations of employment-related awards under equity incentive plans.

On March 14, 2013, the Corporation announced that its Board of Directors authorized the repurchase of up to \$5.0 billion of the Corporation's common stock through open market purchases or privately negotiated transactions, ⁽²⁾ including Rule 10b5-1 plans, over four quarters beginning with the second quarter of 2013. For additional information, see Capital Management – Regulatory Capital on page 71 and Note 12 – Shareholders' Equity to the Consolidated Financial Statements.

The Corporation did not have any unregistered sales of its equity securities during the three months ended September 30, 2013.
