May 04, 2016

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2016

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-10042

Atmos Energy Corporation

(Exact name of registrant as specified in its charter)

Texas and Virginia 75-1743247
(State or other jurisdiction of (IRS employer
incorporation or organization) identification no.)

Three Lincoln Centre, Suite 1800 75240
5430 LBJ Freeway, Dallas, Texas (Zip code)

(Address of principal executive offices)

(972) 934-9227

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes No

Number of shares outstanding of each of the issuer's classes of common stock, as of April 29, 2016.

ATMOS ENERGY CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

March 31, 2016

1. Nature of Business

Atmos Energy Corporation (“Atmos Energy” or the “Company”) and our subsidiaries are engaged primarily in the regulated natural gas distribution and pipeline businesses as well as other nonregulated natural gas businesses. Historically, our regulated businesses have generated over 90 percent of our consolidated net income. Through our regulated distribution business, we deliver natural gas through sales and transportation arrangements to approximately three million residential, commercial, public authority and industrial customers through our six regulated distribution divisions, which at March 31, 2016, covered service areas located in eight states. In addition, we transport natural gas for others through our distribution system. Our regulated businesses also include our regulated pipeline and storage operations, which include the transportation of natural gas to our North Texas distribution system and the management of our underground storage facilities. Our regulated businesses are subject to federal and state regulation and/or regulation by local authorities in each of the states in which our regulated distribution divisions operate.

Our nonregulated businesses operate primarily in the Midwest and Southeast through various wholly-owned subsidiaries of Atmos Energy Holdings, Inc. (AEH). AEH is wholly owned by the Company and based in Houston, Texas. Through AEH, we provide natural gas management and transportation services to municipalities, natural gas distribution companies, including certain divisions of Atmos Energy, and third parties.

2. Unaudited Financial Information

These consolidated interim-period financial statements have been prepared in accordance with accounting principles generally accepted in the United States on the same basis as those used for the Company’s audited consolidated financial statements included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. In the opinion of management, all material adjustments (consisting of normal recurring accruals) necessary for a fair presentation have been made to the unaudited consolidated interim-period financial statements. These consolidated interim-period financial statements are condensed as permitted by the instructions to Form 10-Q and should be read in conjunction with the audited consolidated financial statements of Atmos Energy Corporation included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. Because of seasonal and other factors, the results of operations for the six-month period ended March 31, 2016 are not indicative of our results of operations for the full 2016 fiscal year, which ends September 30, 2016.

No events have occurred subsequent to the balance sheet date that would require recognition or disclosure in the condensed consolidated financial statements.

Significant accounting policies

Our accounting policies are described in Note 2 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

Certain prior-year amounts have been reclassified to conform with the current year presentation.

During the second quarter of fiscal 2016, we completed our annual goodwill impairment assessment. Based on the assessment performed, we determined that our goodwill was not impaired.

In May 2014, the Financial Accounting Standards Board (FASB) issued a comprehensive new revenue recognition standard that will supersede virtually all existing revenue recognition guidance under generally accepted accounting principles in the United States. Under the new standard, a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under current guidance. The new standard is currently scheduled to become effective for us beginning on October 1, 2018 and can be applied either retrospectively to each period presented or as a cumulative-effect adjustment as of the date of adoption. We are currently evaluating the effect on our financial

position, results of operations and cash flows, as well as the transition approach we will select.

In April 2015, the FASB issued guidance to simplify the presentation of debt issuance costs, which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The new standard will be effective for us beginning on October 1, 2016, and will be applied retrospectively. We are currently evaluating the impact this standard may have on our financial position, results of operations and cash flows.

In November 2015, the FASB issued guidance that requires all deferred income tax liabilities and assets to be presented as noncurrent in a classified balance sheet. Currently, entities are required to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified balance sheet. The new standard will become effective for us beginning on October 1, 2017; however, as permitted under the new guidance, we have elected early adoption. The adoption of this guidance had no impact on our results of operations or cash flows. In accordance with the transition guidance, we have adopted this new guidance prospectively and prior periods have not been adjusted.

In January 2016, the FASB issued guidance related to the classification and measurement of financial instruments. The amendments modify the accounting and presentation for certain financial liabilities and equity investments not consolidated or reported using the equity method. The guidance is effective for us beginning October 1, 2018; limited early adoption is permitted. We are currently evaluating the potential impact of this new guidance.

In February 2016, the FASB issued a comprehensive new leasing standard that will require lessees to recognize a lease liability and a right-of-use asset for all leases, including operating leases, with a term greater than 12 months on its balance sheet. The new standard will be effective for us beginning on October 1, 2019; early adoption is permitted. The new leasing standard requires modified retrospective transition, which requires application of the new guidance at the beginning of the earliest comparative period presented in the year of adoption. We are currently evaluating the effect on our financial position, results of operations and cash flows.

In March 2016, the FASB issued guidance to simplify the accounting and reporting of share-based payment arrangements. Key modifications required under the new guidance include:

Recognition of all excess tax benefits and tax deficiencies associated with stock-based compensation as income tax expense or benefit in the income statement in the period the awards vest. The guidance also requires these income tax inflows and outflows to be classified as an operating activity.

Simplification of the accounting for forfeitures.

Clarification that cash paid by an employer when directly withholding shares for tax-withholding purposes should be classified as a financing activity.

The guidance will be effective for us beginning October 1, 2017; however, as permitted under the new guidance, we have elected early adoption. In accordance with the transition requirements, we recorded a \$3.3 million income tax benefit for stock awards that vested during the current fiscal year. Additionally, we recorded a \$14.5 million cumulative-effect increase to retained earnings with an offsetting increase to the Company's net operating loss (NOL) deferred tax asset to recognize the effect of excess tax benefits earned prior to September 30, 2015. Since we have adopted this new guidance prospectively, prior periods have not been adjusted.

Regulatory assets and liabilities

Accounting principles generally accepted in the United States require cost-based, rate-regulated entities that meet certain criteria to reflect the authorized recovery of costs due to regulatory decisions in their financial statements. As a result, certain costs are permitted to be capitalized rather than expensed because they can be recovered through rates. We record certain costs as regulatory assets when future recovery through customer rates is considered probable. Regulatory liabilities are recorded when it is probable that revenues will be reduced for amounts that will be credited to customers through the ratemaking process. Substantially all of our regulatory assets are recorded as a component of deferred charges and other assets and substantially all of our regulatory liabilities are recorded as a component of deferred credits and other liabilities. Deferred gas costs are recorded either in other current assets or liabilities and the regulatory cost of removal obligation is reported separately.

Significant regulatory assets and liabilities as of March 31, 2016 and September 30, 2015 included the following:

	March 31, September 30,	
	2016	2015
	(In thousands)	
Regulatory assets:		
Pension and postretirement benefit costs ⁽¹⁾	\$ 113,483	\$ 121,183
Infrastructure mechanisms ⁽²⁾	53,698	32,813
Deferred gas costs	1,136	9,715
Recoverable loss on reacquired debt	15,040	16,319
APT annual adjustment mechanism	—	1,002
Rate case costs	1,796	1,533
Other	16,297	9,774
	\$201,450	\$ 192,339
Regulatory liabilities:		
Regulatory cost of removal obligations	\$486,857	\$ 483,676
Deferred gas costs	68,812	28,100
Asset retirement obligations	9,063	9,063
APT annual adjustment mechanism	640	—
Other	5,202	3,693
	\$570,574	\$ 524,532

(1) Includes \$13.6 million and \$16.6 million of pension and postretirement expense deferred pursuant to regulatory authorization.

(2) Infrastructure mechanisms in Texas and Louisiana allow for the deferral of all expenses associated with capital expenditures incurred pursuant to these rules, which primarily consists of interest, depreciation and other taxes, until the next rate proceeding (rate case or annual rate filing), at which time investment and costs would be recoverable through base rates.

3. Segment Information

We operate the Company through the following three segments:

- The regulated distribution segment, which includes our regulated natural gas distribution and related sales operations,
- The regulated pipeline segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline — Texas Division and
- The nonregulated segment, which is comprised of our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

Our determination of reportable segments considers the strategic operating units under which we manage sales of various products and services to customers in differing regulatory environments. Although our regulated distribution segment operations are geographically dispersed, they are reported as a single segment as each regulated distribution division has similar economic characteristics. The accounting policies of the segments are the same as those described in the summary of significant accounting policies found in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. We evaluate performance based on net income or loss of the respective operating units.

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

Income statements for the three and six months ended March 31, 2016 and 2015 by segment are presented in the following tables:

4. Earnings Per Share

We use the two-class method of computing earnings per share because we have participating securities in the form of non-vested restricted stock units with a nonforfeitable right to dividend equivalents, for which vesting is predicated solely on the passage of time. The calculation of earnings per share using the two-class method excludes income attributable to these participating securities from the numerator and excludes the dilutive impact of those shares from the denominator. Basic and diluted earnings per share for the three and six months ended March 31, 2016 and 2015 are calculated as follows:

	Three Months Ended March 31		Six Months Ended March 31	
	2016	2015	2016	2015
	(In thousands, except per share amounts)			
Basic and Diluted Earnings Per Share				
Net income	\$ 141,810	\$ 137,684	\$ 244,671	\$ 235,279
Less: Income allocated to participating securities	231	296	405	520
Income available to common shareholders	\$ 141,579	\$ 137,388	\$ 244,266	\$ 234,759
Basic and diluted weighted average shares outstanding	102,946	101,746	102,837	101,667
Net income per share - Basic and Diluted	\$ 1.38	\$ 1.35	\$ 2.38	\$ 2.31

5. Debt

The nature and terms of our debt instruments and credit facilities are described in detail in Note 5 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. Except as noted below, there were no material changes in the terms of our debt instruments during the six months ended March 31, 2016.

Long-term debt

Long-term debt at March 31, 2016 and September 30, 2015 consisted of the following:

	March 31, 2016	September 30, 2015
	(In thousands)	
Unsecured 6.35% Senior Notes, due June 2017	\$ 250,000	\$ 250,000
Unsecured 8.50% Senior Notes, due 2019	450,000	450,000
Unsecured 5.95% Senior Notes, due 2034	200,000	200,000
Unsecured 5.50% Senior Notes, due 2041	400,000	400,000
Unsecured 4.15% Senior Notes, due 2043	500,000	500,000
Unsecured 4.125% Senior Notes, due 2044	500,000	500,000
Medium-term note Series A, 1995-1, 6.67%, due 2025	10,000	10,000
Unsecured 6.75% Debentures, due 2028	150,000	150,000
Total long-term debt	2,460,000	2,460,000
Less:		
Original issue discount on unsecured senior notes and debentures	4,441	4,612
	\$ 2,455,559	\$ 2,455,388

On October 15, 2014, we issued \$500 million of 4.125% 30-year unsecured senior notes, which replaced, on a long-term basis, our \$500 million unsecured 4.95% senior notes. The effective rate of these notes is 4.086%, after giving effect to the offering costs and the settlement of the associated forward starting interest rate swaps. The net proceeds of approximately \$494 million were used to repay our \$500 million 4.95% senior unsecured notes at maturity on October 15, 2014.

Short-term debt

Our short-term debt is utilized to fund ongoing working capital needs, such as our seasonal requirements for gas supply, general corporate liquidity and capital expenditures. Our short-term borrowing requirements are affected primarily by the seasonal nature of the natural gas business. Changes in the price of natural gas and the amount of natural gas we need to supply our customers' needs could significantly affect our borrowing requirements. Our short-term borrowings typically reach their highest levels in the winter months.

We currently finance our short-term borrowing requirements through a combination of a \$1.25 billion commercial paper program, four committed revolving credit facilities and one uncommitted revolving credit facility with third-party lenders. These facilities provide approximately \$1.3 billion of working capital funding. At March 31, 2016 and September 30, 2015 a total of \$626.9 million and \$457.9 million was outstanding under our commercial paper program.

Regulated Operations

We fund our regulated operations as needed, primarily through our commercial paper program and three committed revolving credit facilities with third-party lenders that provide approximately \$1.3 billion of working capital funding, including a five-year \$1.25 billion unsecured facility with an accordion feature, which, if utilized would increase the borrowing capacity to \$1.5 billion, a \$25 million unsecured facility and a \$10 million unsecured revolving credit facility, which is used primarily to issue letters of credit. Due to outstanding letters of credit, the total amount available to us under our \$10 million revolving credit facility was \$4.1 million at March 31, 2016.

In addition to these third-party facilities, our regulated operations have a \$500 million intercompany revolving credit facility with AEH, which bears interest at the lower of (i) the Eurodollar rate under the five-year revolving credit facility or (ii) the lowest rate outstanding under the commercial paper program. Applicable state regulatory commissions have approved our use of this facility through December 31, 2016.

Nonregulated Operations

Atmos Energy Marketing, LLC (AEM), which is wholly owned by AEH, has one uncommitted \$25 million bilateral credit facility that was renewed and extended in March 2016 and one committed \$15 million bilateral credit facility that was renewed and extended in December 2015. The uncommitted \$25 million bilateral credit facility currently expires in December 2016 and the \$15 million bilateral credit facility expires in September 2016. These facilities are used primarily to issue letters of credit. Due to outstanding letters of credit, the total amount available to us under these bilateral credit facilities was \$36.9 million at March 31, 2016.

AEH has a \$500 million intercompany demand credit facility with AEC. This facility bears interest at a rate equal to the one-month LIBOR rate plus 3.00 percent. Applicable state regulatory commissions have approved our use of this facility through December 31, 2016.

Debt Covenants

The availability of funds under our regulated credit facilities is subject to conditions specified in the respective credit agreements, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in these agreements. We are required by the financial covenants in each of these facilities to maintain, at the end of each fiscal quarter, a ratio of total debt to total capitalization of no greater than 70 percent. At March 31, 2016, our total-debt-to-total-capitalization ratio, as defined in the agreements, was 49 percent. In addition, both the interest margin and the fee that we pay on unused amounts under certain of these facilities are subject to adjustment depending upon our credit ratings.

In addition to these financial covenants, our credit facilities and public indentures contain usual and customary covenants for our business, including covenants substantially limiting liens, substantial asset sales and mergers. Additionally, our public debt indentures relating to our senior notes and debentures, as well as certain of our revolving credit agreements, each contain a default provision that is triggered if outstanding indebtedness arising out of any other credit agreements in amounts ranging from in excess of \$15 million to in excess of \$100 million becomes due by acceleration or is not paid at maturity.

We were in compliance with all of our debt covenants as of March 31, 2016. If we were unable to comply with our debt covenants, we would likely be required to repay our outstanding balances on demand, provide additional collateral or take other corrective actions.

6. Shareholders' Equity

Shelf Registration

On March 28, 2016, we filed a registration statement with the Securities and Exchange Commission (SEC) to issue, from time to time, up to \$2.5 billion in common stock and/or debt securities, which replaced our registration statement that expired on March 28, 2016.

At-the-Market Equity Sales Program

On March 28, 2016, we entered into an at-the-market (ATM) equity distribution agreement (the Agreement) with Goldman, Sachs & Co., Merrill Lynch, Pierce, Fenner & Smith Incorporated and Morgan Stanley & Co. LLC in their capacity as agents and/or as principals (Agents). Under the terms of the Agreement, we may issue and sell, through any of the Agents, shares of our common stock, up to an aggregate offering price of \$200 million, through the period ended March 28, 2019. We may also sell shares from time to time to an Agent for its own account at a price to be agreed upon at the time of sale. We will pay each Agent a commission of 1.0% of the gross offering proceeds of the shares sold through it as a sales agent. We have no obligation to offer or sell any shares under the Agreement, and may at any time suspend offers and sales under the Agreement. The shares will be issued pursuant to our shelf registration statement filed with the SEC on March 28, 2016. There were no transactions under the ATM program during the second fiscal quarter of 2016.

1998 Long-Term Incentive Plan

In August 1998, the Board of Directors approved and adopted the 1998 Long-Term Incentive Plan (LTIP), which became effective in October 1998 after approval by our shareholders. The LTIP is a comprehensive, long-term incentive compensation plan providing for discretionary awards of incentive stock options, non-qualified stock options, stock appreciation rights, bonus stock, time-lapse restricted stock, time-lapse restricted stock units, performance-based restricted stock units and stock units to certain employees and non-employee directors of the Company and our subsidiaries. The objectives of this plan include attracting and retaining the best personnel, providing for additional performance incentives and promoting our success by providing employees with the opportunity to acquire our common stock.

As of September 30, 2015, we were authorized to grant awards for up to a maximum of 8.7 million shares of common stock under this plan subject to certain adjustment provisions. In February 2016, our shareholders voted to increase the number of authorized LTIP shares by 2.5 million shares and to extend the term of the plan for an additional five years, through September 2021. On March 29, 2016, we filed with the SEC a registration statement on Form S-8 to register an additional 2.5 million shares; we also listed such shares with the New York Stock Exchange.

2011 Share Repurchase Program

We did not repurchase any shares during the six months ended March 31, 2016 and 2015 under our 2011 share repurchase program, which is scheduled to end on September 30, 2016.

Accumulated Other Comprehensive Income

We record deferred gains (losses) in AOCI related to available-for-sale securities, interest rate agreement cash flow hedges and commodity contract cash flow hedges. Deferred gains (losses) for our available-for-sale securities and commodity contract cash flow hedges are recognized in earnings upon settlement, while deferred gains (losses) related to our interest rate agreement cash flow hedges are recognized in earnings as they are amortized. The following tables provide the components of our accumulated other comprehensive income (loss) balances, net of the related tax effects allocated to each component of other comprehensive income.

7. Interim Pension and Other Postretirement Benefit Plan Information

The components of our net periodic pension cost for our pension and other postretirement benefit plans for the three and six months ended March 31, 2016 and 2015 are presented in the following table. Most of these costs are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our gas distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

	Three Months Ended March 31			
	Pension Benefits		Other Benefits

Amortization of transition obligation	—	—	41	136
Amortization of prior service credit	(113)	(96)	(822)	(822)
Amortization of actuarial (gain) loss	6,640	7,833	(1,084)	—
Net periodic pension cost	\$16,350	\$18,363	\$6,627	\$11,083

The assumptions used to develop our net periodic pension cost for the three and six months ended March 31, 2016 and 2015 are as follows:

	Pension Benefits		Other Benefits	
	2016	2015	2016	2015
Discount rate	4.55%	4.43%	4.55%	4.43%
Rate of compensation increase	3.50%	3.50%	N/A	N/A
Expected return on plan assets	7.00%	7.25%	4.45%	4.60%

The discount rate used to compute the present value of a plan's liabilities generally is based on rates of high-grade corporate bonds with maturities similar to the average period over which the benefits will be paid. Generally, our funding policy has been to contribute annually an amount in accordance with the requirements of the Employee Retirement Income Security Act of 1974. In accordance with the Pension Protection Act of 2006 (PPA), we determined the funded status of our plans as of January 1, 2016. Based on that determination, we are not required to make a minimum contribution to our defined benefit plans; however, we may consider whether a voluntary contribution is prudent to maintain certain funding levels.

We contributed \$9.0 million to our other post-retirement benefit plans during the six months ended March 31, 2016. We expect to contribute between \$15 million and \$25 million to these plans during fiscal 2016.

8. Commitments and Contingencies

Litigation and Environmental Matters

With respect to the specific litigation and environmental-related matters or claims that were disclosed in Note 10 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015, there were no material changes in the status of such litigation and environmental-related matters or claims during the six months ended March 31, 2016.

We are a party to various litigation and environmental-related matters or claims that have arisen in the ordinary course of our business. While the results of such litigation and response actions to such environmental-related matters or claims cannot be predicted with certainty, we continue to believe the final outcome of such litigation and matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Purchase Commitments

Our regulated distribution divisions, except for our Mid-Tex Division, maintain supply contracts with several vendors that generally cover a period of up to one year. Commitments for estimated base gas volumes are established under these contracts on a monthly basis at contractually negotiated prices. Commitments for incremental daily purchases are made as necessary during the month in accordance with the terms of the individual contract.

Our Mid-Tex Division also maintains a limited number of long-term supply contracts to ensure a reliable source of gas for our customers in its service area which obligate it to purchase specified volumes at prices indexed to natural gas distribution hubs. These purchase commitment contracts are detailed in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. There were no material changes to the purchase commitments for the six months ended March 31, 2016.

AEH has commitments to purchase physical quantities of natural gas under contracts indexed to the forward NYMEX strip or fixed price contracts. These purchase commitment contracts are detailed in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. Except for purchases made in the normal course of business under these contracts, there were no material changes to the purchase commitments for the six months ended March 31, 2016.

Our nonregulated segment maintains long-term contracts related to storage and transportation. The estimated contractual demand fees for contracted storage and transportation under these contracts are detailed in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. There were no material changes to the estimated storage and transportation fees for the six months ended March 31, 2016.

Regulatory Matters

Various regulatory agencies, including the SEC and the Commodities Futures Trading Commission, continue to adopt regulations implementing many of the provisions of the Dodd-Frank Act of 2010. We continue to enact new procedures and modify existing business practices and contractual arrangements to comply with such regulations. Additional rulemakings are pending which we believe will result in new reporting and disclosure obligations. The costs associated with hedging certain risks inherent in our business may be further increased when these expected additional regulations are adopted.

As of March 31, 2016, a rate case was in progress in our Kentucky service area, formula rate filing mechanisms were in progress in our Atmos Pipeline-Texas, Louisiana, Mid-Tex and Tennessee service areas, infrastructure mechanisms were in progress in our Mississippi and West Texas service areas and an expedited rate filing was in progress in Virginia. These regulatory proceedings are discussed in further detail below in Management's Discussion and Analysis — Recent Ratemaking Developments.

9. Financial Instruments

We currently use financial instruments in our regulated distribution and nonregulated segments to mitigate commodity price risk and interest rate risk. The objectives and strategies for using financial instruments, which have been tailored to our regulated distribution and nonregulated segments, and the related accounting for these financial instruments are fully described in Notes 2 and 12 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. During the six months ended March 31, 2016 there were no changes in our objectives, strategies and accounting for using financial instruments. Our financial instruments do not contain any credit-risk-related or other contingent features that could cause payments to be accelerated when our financial instruments are in net liability positions. The following summarizes those objectives and strategies.

Regulated Commodity Risk Management Activities

Our purchased gas cost adjustment mechanisms essentially insulate our regulated distribution segment from commodity price risk; however, our customers are exposed to the effects of volatile natural gas prices. We manage this exposure through a

21

combination of physical storage, fixed-price forward contracts and financial instruments, primarily over-the-counter swap and option contracts, in an effort to minimize the impact of natural gas price volatility on our customers during the winter heating season.

We typically seek to hedge between 25 and 50 percent of anticipated heating season gas purchases using financial instruments. For the 2015-2016 heating season (generally October through March), in the jurisdictions where we are permitted to utilize financial instruments, we hedged approximately 33 percent, or 23.0 Bcf of the winter flowing gas requirements. We have not designated these financial instruments as hedges for accounting purposes.

Nonregulated Commodity Risk Management Activities

Our nonregulated segment is exposed to risks associated with changes in the market price of natural gas through the purchase, sale and delivery of natural gas to its customers at competitive prices. We manage our exposure to such risks through a combination of physical storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. Specifically, these operations use financial instruments in the following ways:

Gas delivery and related services - Certain financial instruments, designated as cash flow hedges of anticipated purchases and sales at index prices, are used to mitigate the commodity price risk associated with deliveries under fixed-priced forward contracts to either deliver gas to customers or purchase gas from suppliers. These financial instruments have maturity dates ranging from one to 57 months.

Transportation and storage services - Our nonregulated operations use storage swaps and futures to capture additional storage arbitrage opportunities that arise subsequent to the execution of the original fair value hedge associated with our physical natural gas inventory, basis swaps to insulate and protect the economic value of our fixed price and storage books and various over-the-counter and exchange-traded options. These financial instruments have not been designated as hedges for accounting purposes.

- Aggregating and purchasing gas supply - Certain financial instruments, designated as fair value hedges, are used to hedge our natural gas inventory used in asset optimization activities.

Interest Rate Risk Management Activities

We periodically manage interest rate risk by entering into financial instruments to effectively fix the Treasury yield component of the interest cost associated with anticipated financings.

As of March 31, 2016, we had forward starting interest rate swaps to effectively fix the Treasury yield component associated with the anticipated issuance of \$250 million and \$450 million unsecured senior notes in fiscal 2017 and fiscal 2019, at 3.37% and 3.78%, which we designated as cash flow hedges at the time the swaps were executed. As of March 31, 2016, we had \$18.5 million of net realized losses in accumulated other comprehensive income (AOCI) associated with the settlement of financial instruments used to fix the Treasury yield component of the interest cost of financing various issuances of long-term debt and senior notes, which will be recognized as a component of interest expense over the life of the associated notes from the date of settlement. The remaining amortization periods for these settled amounts extend through fiscal 2045.

Quantitative Disclosures Related to Financial Instruments

The following tables present detailed information concerning the impact of financial instruments on our condensed consolidated balance sheet and income statements.

As of March 31, 2016, our financial instruments were comprised of both long and short commodity positions. A long position is a contract to purchase the commodity, while a short position is a contract to sell the commodity. As of March 31, 2016, we had net long/(short) commodity contracts outstanding in the following quantities:

Contract Type	Hedge Designation	Regulated Distribution	
		Regulated	Nonregulated
		Quantity (MMcf)	
Commodity contracts	Fair Value	—	(35,770)
	Cash Flow	—	46,553

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

Not designated	4,690	55,854
	4,690	66,637

Financial Instruments on the Balance Sheet

The following tables present the fair value and balance sheet classification of our financial instruments by operating segment as of March 31, 2016 and September 30, 2015. The gross amounts of recognized assets and liabilities are netted within our unaudited Condensed Consolidated Balance Sheets to the extent that we have netting arrangements with the counterparties.

Impact of Financial Instruments on the Income Statement

Hedge ineffectiveness for our nonregulated segment is recorded as a component of purchased gas cost and primarily results from differences in the location and timing of the derivative instrument and the hedged item. Hedge ineffectiveness could materially affect our results of operations for the reported period. For the three months ended March 31, 2016 and 2015 we recognized a loss arising from fair value and cash flow hedge ineffectiveness of \$3.3 million and \$2.3 million. For the six months ended March 31, 2016 and 2015 we recognized a gain (loss) arising from fair value and cash flow hedge ineffectiveness of \$4.6 million and \$(4.5) million. Additional information regarding ineffectiveness recognized in the income statement is included in the tables below.

Fair Value Hedges

The impact of our nonregulated commodity contracts designated as fair value hedges and the related hedged item on our condensed consolidated income statement for the three and six months ended March 31, 2016 and 2015 is presented below.

Three Months
Ended

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

	March 31	
	2016	2015
	(In thousands)	
Commodity contracts	\$4,594	\$(7,622)
Fair value adjustment for natural gas inventory designated as the hedged item	(7,939)	5,142
Total increase in purchased gas cost	\$(3,345)	\$(2,480)
The increase in purchased gas cost is comprised of the following:		
Basis ineffectiveness	\$(2,095)	\$(678)
Timing ineffectiveness	(1,250)	(1,802)
	\$(3,345)	\$(2,480)

24

	Six Months Ended March 31	
	2016	2015
	(In thousands)	
Commodity contracts	\$10,338	\$7,469
Fair value adjustment for natural gas inventory designated as the hedged item	(5,778)	(11,641)
Total (increase) decrease in purchased gas cost	\$4,560	\$ (4,172)
The (increase) decrease in purchased gas cost is comprised of the following:		
Basis ineffectiveness	\$(806)	\$309
Timing ineffectiveness	5,366	(4,481)
	\$4,560	\$ (4,172)

Basis ineffectiveness arises from natural gas market price differences between the locations of the hedged inventory and the delivery location specified in the hedge instruments. Timing ineffectiveness arises due to changes in the difference between the spot price and the futures price, as well as the difference between the timing of the settlement of the futures and the valuation of the underlying physical commodity. As the commodity contract nears the settlement date, spot-to-forward price differences should converge, which should reduce or eliminate the impact of this ineffectiveness on purchased gas cost. To the extent that the Company's natural gas inventory does not qualify as a hedged item in a fair-value hedge, or has not been designated as such, the natural gas inventory is valued at the lower of cost or market.

Cash Flow Hedges

The impact of cash flow hedges on our condensed consolidated income statements for the three and six months ended March 31, 2016 and 2015 is presented below. Note that this presentation does not reflect the financial impact arising from the hedged physical transaction. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

	Three Months Ended March 31, 2016

Total Impact from Cash Flow Hedges	\$(580)	\$ (13,061)	\$ (13,641)

The following table summarizes the gains and losses arising from hedging transactions that were recognized as a component of other comprehensive income (loss), net of taxes, for the three and six months ended March 31, 2016 and 2015. The amounts included in the table below exclude gains and losses arising from ineffectiveness because those amounts are immediately recognized in the income statement as incurred.

	Three Months Ended		Six Months Ended	
	March 31		March 31	
	2016	2015	2016	2015
	(In thousands)			
Decrease in fair value:				
Interest rate agreements	\$(53,704)	\$(32,755)	\$(49,008)	\$(84,824)
Forward commodity contracts	(7,529)	(10,160)	(19,185)	(38,902)
Recognition of losses in earnings due to settlements:				
Interest rate agreements	86	86	173	368
Forward commodity contracts	7,749	7,978	21,758	7,768
Total other comprehensive loss from hedging, net of tax ⁽¹⁾	\$(53,398)	\$(34,851)	\$(46,262)	\$(115,590)

(1) Utilizing an income tax rate ranging from 37 percent to 39 percent based on the effective rates in each taxing jurisdiction.

Deferred gains (losses) recorded in AOCI associated with our interest rate agreements are recognized in earnings as they are amortized over the terms of the underlying debt instruments, while deferred gains (losses) associated with commodity contracts are recognized in earnings upon settlement. The following amounts, net of deferred taxes, represent the expected recognition in earnings of the deferred losses recorded in AOCI associated with our financial instruments, based upon the fair values of these financial instruments as of March 31, 2016. However, the table below does not include the expected recognition in earnings of our outstanding interest rate agreements as those instruments have not yet settled.

	Interest Rate Agreement	Commodity Contracts	Total
	(In thousands)		
Next twelve months	\$(347)	\$(19,651)	\$(19,998)
Thereafter	(18,130)	(3,213)	(21,343)
Total ⁽¹⁾	\$(18,477)	\$(22,864)	\$(41,341)

(1) Utilizing an income tax rate ranging from 37 percent to 39 percent based on the effective rates in each taxing jurisdiction.

Financial Instruments Not Designated as Hedges

The impact of financial instruments that have not been designated as hedges on our condensed consolidated income statements for the three months ended March 31, 2016 and 2015 was an (increase) decrease in purchased gas cost of \$(2.5) million and \$8.7 million. For the six months ended March 31, 2016 and 2015 purchased gas cost (increased) decreased by \$(4.7) million and \$9.6 million. Note that this presentation does not reflect the expected gains or losses arising from the underlying physical transactions associated with these financial instruments. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

As discussed above, financial instruments used in our regulated distribution segment are not designated as hedges. However, there is no earnings impact on our regulated distribution segment as a result of the use of these financial instruments because the gains and losses arising from the use of these financial instruments are recognized in the consolidated statement of income as a component of purchased gas cost when the related costs are recovered through our rates and recognized in revenue. Accordingly, the impact of these financial instruments is excluded from this presentation.

10. Fair Value Measurements

We report certain assets and liabilities at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). We record cash and cash equivalents, accounts receivable and accounts payable at carrying value, which substantially approximates fair value due to the short-term nature of these assets and liabilities. For other financial assets and liabilities, we primarily use quoted market prices and other observable market pricing information to minimize the use of unobservable pricing inputs in our measurements when determining fair value. The methods used to determine fair value for our assets and liabilities are fully described in Note 2 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. During the six months ended March 31, 2016, there were no changes in these methods.

Fair value measurements also apply to the valuation of our pension and postretirement plan assets. Current accounting guidance requires employers to annually disclose information about fair value measurements of the assets of a defined benefit pension or other postretirement plan. The fair value of these assets is presented in Note 6 to the financial statements in our Annual Report on Form 10-K for the fiscal year ending September 30, 2015.

Quantitative Disclosures

Financial Instruments

The classification of our fair value measurements requires judgment regarding the degree to which market data is observable or corroborated by observable market data. Authoritative accounting literature establishes a fair value hierarchy that prioritizes the inputs used to measure fair value based on observable and unobservable data. The hierarchy categorizes the inputs into three levels, with the highest priority given to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1), with the lowest priority given to unobservable inputs (Level 3). The following tables summarize, by level within the fair value hierarchy, our assets and liabilities that were accounted for at fair value on a recurring basis as of March 31, 2016 and September 30, 2015. Assets and liabilities are categorized in their entirety based on the lowest level of input that is significant to the fair value measurement.

28

This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and the relevant authoritative accounting literature. In addition, as of March 31, 2016, we had \$2.7 million of cash held in margin accounts to collateralize certain regulated distribution financial instruments, which were used to offset noncurrent risk management liabilities. As of March 31, 2016, we had \$22.9 million of cash held in margin accounts to collateralize certain nonregulated financial instruments. Of this amount, \$16.1 million was used to offset current and noncurrent risk management liabilities under master netting arrangements with the remaining \$6.8 million is classified as current risk management assets.

This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and the relevant authoritative accounting literature. In addition, as of September 30, 2015, we had \$43.5 million of cash held in margin accounts to collateralize certain nonregulated financial instruments. Of this amount, \$34.6 million was used to offset current and noncurrent risk management liabilities under master netting arrangements with the remaining \$8.9 million is classified as current risk management assets.

Bonds	32,423	106	(20)	32,509
Money market funds	1,072	—	—	1,072
	\$66,399	\$ 8,343	\$(542)	\$74,200

At March 31, 2016 and September 30, 2015, our available-for-sale securities included \$41.1 million and \$41.7 million related to assets held in separate rabbi trusts for our supplemental executive benefit plans. At March 31, 2016, we maintained investments in bonds that have contractual maturity dates ranging from May 2016 through September 2020.

These securities are reported at market value with unrealized gains and losses shown as a component of accumulated other comprehensive income (loss). We regularly evaluate the performance of these investments on a fund by fund basis for impairment, taking into consideration the fund's purpose, volatility and current returns. If a determination is made that a decline in fair value is other than temporary, the related fund is written down to its estimated fair value and the other-than-temporary impairment is recognized in the income statement.

Other Fair Value Measures

Our debt is recorded at carrying value. The fair value of our debt is determined using third party market value quotations, which are considered Level 1 fair value measurements for debt instruments with a recent, observable trade or Level 2 fair value measurements for debt instruments where fair value is determined using the most recent available quoted market price. The following table presents the carrying value and fair value of our debt as of March 31, 2016 and September 30, 2015:

	March 31, 2016	September 30, 2015
	(In thousands)	

Carrying Amount	\$2,460,000	\$2,460,000
Fair Value	\$2,749,244	\$2,669,323

11. Concentration of Credit Risk

Information regarding our concentration of credit risk is disclosed in Note 15 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. During the six months ended March 31, 2016, there were no material changes in our concentration of credit risk.

30

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
Atmos Energy Corporation

We have reviewed the condensed consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of March 31, 2016 and the related condensed consolidated statements of income and comprehensive income for the three and six-month periods ended March 31, 2016 and 2015 and the condensed consolidated statements of cash flows for the six-month periods ended March 31, 2016 and 2015. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of September 30, 2015, and the related consolidated statements of income, comprehensive income, shareholders' equity, and cash flows for the year then ended, not presented herein, and we expressed an unqualified audit opinion on those consolidated financial statements in our report dated November 6, 2015. In our opinion, the accompanying condensed consolidated balance sheet of Atmos Energy Corporation and subsidiaries as of September 30, 2015, is fairly stated, in all material respects, in relation to the consolidated balance sheets from which it has been derived.

/s/ ERNST & YOUNG LLP

Dallas, Texas

May 4, 2016

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

The following discussion should be read in conjunction with the condensed consolidated financial statements in this Quarterly Report on Form 10-Q and Management's Discussion and Analysis in our Annual Report on Form 10-K for the year ended September 30, 2015.

Cautionary Statement for the Purposes of the Safe Harbor under the Private Securities Litigation Reform Act of 1995

The statements contained in this Quarterly Report on Form 10-Q may contain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report are forward-looking statements made in good faith by us and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. When used in this Report, or any other of our documents or oral presentations, the words "anticipate", "believe", "estimate", "expect", "forecast", "goal", "intend", "objective", "plan", "projection", "seek", "strive", "target", "will", "would", "could", "may", "might", "should", "could", "would", "may", "might" and similar words are intended to identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements relating to our strategy, operations, markets, services, rates, recovery of costs, availability of gas supply and other factors. These risks and uncertainties include the following: our ability to continue to access the credit and capital markets to satisfy our liquidity requirements; regulatory trends and decisions, including the impact of rate proceedings before various state regulatory commissions; the impact of adverse economic conditions on our customers; the effects of inflation and changes in the availability and price of natural gas; market risks beyond our control affecting our risk management activities, including commodity price volatility, counterparty creditworthiness or performance and interest rate risk; the concentration of our distribution, pipeline and storage operations in Texas; increased competition from energy suppliers and alternative forms of energy; adverse weather conditions; the capital-intensive nature of our regulated distribution business; increased costs of providing health care benefits along with pension and postretirement health care benefits and increased funding requirements; the inability to continue to hire, train and retain appropriate personnel; possible increased federal, state and local regulation of the safety of our operations; increased federal regulatory oversight and potential penalties; the impact of environmental regulations on our business; the impact of climate changes or related additional legislation or regulation in the future; the inherent hazards and risks involved in operating our distribution and pipeline and storage businesses; the threat of cyber-attacks or acts of cyber-terrorism that could disrupt our business operations and information technology systems; natural disasters, terrorist activities or other events and other risks and uncertainties discussed herein, all of which are difficult to predict and many of which are beyond our control. Accordingly, while we believe these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. Further, we undertake no obligation to update or revise any of our forward-looking statements whether as a result of new information, future events or otherwise.

OVERVIEW

Atmos Energy and our subsidiaries are engaged primarily in the regulated natural gas distribution and transmission and storage businesses as well as other nonregulated natural gas businesses. We distribute natural gas through sales and transportation arrangements to approximately three million residential, commercial, public authority and industrial customers throughout our six regulated distribution divisions, which at March 31, 2016 covered service areas located in eight states. In addition, we transport natural gas for others through our regulated distribution and pipeline systems.

Through our nonregulated businesses, we provide natural gas management and marketing services to municipalities, other local gas distribution companies and industrial customers primarily in the Midwest and Southeast and natural gas transmission and storage services to certain of our regulated distribution divisions and to third parties.

As discussed in Note 3, we operate the Company through the following three segments:

- the regulated distribution segment, which includes our regulated natural gas distribution and related sales operations,

the regulated pipeline segment, which includes the regulated pipeline and storage operations of our Atmos Pipeline — Texas Division and
the nonregulated segment, which includes our nonregulated natural gas management, nonregulated natural gas transmission, storage and other services.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

Our condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States. Preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures of contingent assets and liabilities. We based our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. On an ongoing basis, we evaluate our estimates, including those related to risk management and trading activities, the allowance for doubtful accounts, legal and environmental accruals, insurance accruals, pension and postretirement obligations, deferred income taxes and the valuation of goodwill, indefinite-lived intangible assets and other long-lived assets. Actual results may differ from such estimates.

Our critical accounting policies used in the preparation of our consolidated financial statements are described in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015 and include the following:

- Regulation
- Unbilled revenue
- Pension and other postretirement plans
- Contingencies
- Financial instruments and hedging activities
- Fair value measurements
- Impairment assessments

Our critical accounting policies are reviewed periodically by the Audit Committee of our Board of Directors. There were no significant changes to these critical accounting policies during the six months ended March 31, 2016.

RESULTS OF OPERATIONS**Executive Summary**

Atmos Energy strives to operate its businesses safely and reliably while delivering superior shareholder value. To achieve this objective, we are investing in our infrastructure and seeking to achieve positive rate outcomes that benefit both our customers and the Company.

During the first six months of fiscal 2016, we earned \$244.7 million, or \$2.38 per diluted share, a four percent increase period over period. Regulated operations represented 98 and 97 percent of our consolidated net income for the three and six months ended March 31, 2016. The following tables reflect the segregation of our consolidated net income and diluted earnings per share between our regulated and nonregulated operations:

	Three Months Ended March		
	2016	2015	Change
	(In thousands, except per share data)		
Regulated operations	\$139,497	\$129,535	\$9,962
Nonregulated operations	2,313	8,149	(5,836)
Net income	\$141,810	\$137,684	\$4,126
Diluted EPS from regulated operations	\$1.36	\$1.27	\$0.09
Diluted EPS from nonregulated operations	0.02	0.08	(0.06)
Consolidated diluted EPS	\$1.38	\$1.35	\$0.03

	Six Months Ended March 31		
	2016	2015	Change
	(In thousands, except per share data)		
Regulated operations	\$238,338	\$222,957	\$15,381
Nonregulated operations	6,333	12,322	(5,989)
Net income	\$244,671	\$235,279	\$9,392
Diluted EPS from regulated operations	\$2.32	\$2.19	\$0.13
Diluted EPS from nonregulated operations	0.06	0.12	(0.06)
Consolidated diluted EPS	\$2.38	\$2.31	\$0.07

Positive rate outcomes achieved in our regulated businesses offset the effect of weather that was 26 percent warmer than the prior-year period. As of March 31, 2016, we had completed nine regulatory proceedings resulting in a \$22.1 million increase in annual operating income and had twelve ratemaking efforts in progress seeking \$109.0 million of additional annual operating income. Our nonregulated results in the current-year period reflect larger losses on the settlement of financial positions during a period of falling gas prices.

Capital expenditures for the first six months of fiscal 2016 were \$538.2 million. Approximately 83 percent was invested to improve the safety and reliability of our distribution and transportation systems, with a significant portion of this investment incurred under regulatory mechanisms that reduce lag to six months or less. We expect our capital expenditures to range between \$1 billion and \$1.1 billion for fiscal 2016. We funded our capital expenditure program primarily through operating cash flows of \$455.8 million and net short-term borrowings.

On March 28, 2016, we entered into an at-the-market (ATM) equity distribution agreement under which we may issue and sell, shares of our common stock, up to an aggregate offering price of \$200 million. The shares will be issued under our shelf registration statement filed with the SEC on March 28, 2016. Proceeds from the ATM program will be used primarily to repay short-term debt outstanding under our \$1.25 billion commercial paper program, to fund capital spending primarily to enhance the safety and reliability of our system and for general corporate purposes.

As a result of the continued contribution and stability of our regulated earnings, cash flows and capital structure, our Board of Directors increased the quarterly dividend by 7.7 percent for fiscal 2016.

Regulated Distribution Segment

The primary factors that impact the results of our regulated distribution operations are our ability to earn our authorized rates of return, the cost of natural gas, competitive factors in the energy industry and economic conditions in our service areas.

Our ability to earn our authorized rates of return is based primarily on our ability to improve the rate design in our various ratemaking jurisdictions by reducing or eliminating regulatory lag and, ultimately, separating the recovery of our approved margins from customer usage patterns. Improving rate design is a long-term process and is further complicated by the fact that we operate in multiple rate jurisdictions.

Seasonal weather patterns can also affect our regulated distribution operations. However, the effect of weather that is above or below normal is substantially offset through weather normalization adjustments, known as WNA, which has been approved by state regulatory commissions for approximately 97 percent of our residential and commercial meters in the following states for the following time periods:

Kansas, West Texas	October — May
Tennessee	October — April
Kentucky, Mississippi, Mid-Tex	November — April
Louisiana	December — March
Virginia	January — December

Our regulated distribution operations are also affected by the cost of natural gas. The cost of gas is passed through to our customers without markup. Therefore, increases in the cost of gas are offset by a corresponding increase in

revenues. Accordingly, we believe gross profit is a better indicator of our financial performance than revenues. However, gross profit in our Texas and Mississippi service areas includes franchise fees and gross receipts taxes, which are calculated as a percentage of

34

revenue (inclusive of gas costs). Therefore, the amount of these taxes included in revenues is influenced by the cost of gas and the level of gas sales volumes. We record the associated tax expense as a component of taxes, other than income. Although changes in these revenue-related taxes arising from changes in gas costs affect gross profit, over time the impact is offset within operating income.

As discussed above, the cost of gas typically does not have a direct impact on our gross profit. However, higher gas costs mean higher bills for our customers, which may adversely impact our accounts receivable collections, resulting in higher bad debt expense and may require us to increase borrowings under our credit facilities resulting in higher interest expense. In addition, higher gas costs, as well as competitive factors in the industry and general economic conditions may cause customers to conserve or, in the case of industrial consumers, to use alternative energy sources. However, gas cost risk has been mitigated in recent years through improvements in rate design that allow us to collect from our customers the gas cost portion of our bad debt expense on approximately 75 percent of our residential and commercial margins.

Three Months Ended March 31, 2016 compared with Three Months Ended March 31, 2015

Financial and operational highlights for our regulated distribution segment for the three months ended March 31, 2016 and 2015 are presented below.

	Three Months Ended March 31		
	2016	2015	Change
	(In thousands, unless otherwise noted)		
Gross profit	\$409,142	\$406,235	\$2,907
Operating expenses	211,529	221,517	(9,988)
Operating income	197,613	184,718	12,895
Miscellaneous expense	(150)	(937)	787
Interest charges	18,717	19,313	(596)
Income before income taxes	178,746	164,468	14,278
Income tax expense	64,434	62,615	1,819
Net income	\$114,312	\$101,853	\$12,459
Consolidated regulated distribution sales volumes — MMcf	111,932	142,455	(30,523)
Consolidated regulated distribution transportation volumes — MMcf	40,677	40,559	118
Total consolidated regulated distribution throughput — MMcf	152,609	183,014	(30,405)
Consolidated regulated distribution average cost of gas per Mcf sold	\$3.94	\$5.08	\$(1.14)

Income for our regulated distribution segment increased 12 percent, primarily due to a \$2.9 million increase in gross profit combined with a \$10.0 million decrease in operating expenses. The quarter-over-quarter increase in gross profit primarily reflects:

- a \$17.1 million net increase in rate adjustments. Our Mid-Tex Division accounted for \$9.8 million of this increase.

- We also experienced increases in our Mississippi and West Texas Divisions.

- a \$12.6 million decrease in revenue-related taxes primarily in our Mid-Tex and West Texas Divisions, offset by a corresponding \$10.4 million decrease in the related tax expense.

- a \$2.2 million decrease in consumption. Current-quarter weather was 25 percent warmer than the prior-year quarter, before adjusting for weather normalization mechanisms. As a result, sales volumes decreased 21 percent.

The decrease in operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense and taxes, other than income, was primarily due to the decrease in revenue-related tax expense partially offset by higher depreciation expense associated with increased capital investments.

The following table shows our operating income by regulated distribution division, in order of total rate base, for the three months ended March 31, 2016 and 2015. The presentation of our regulated distribution operating income is included for financial reporting purposes and may not be appropriate for ratemaking purposes.

	Three Months Ended March 31		
	2016	2015	Change
	(In thousands)		
Mid-Tex	\$80,645	\$73,999	\$6,646
Kentucky/Mid-States	30,461	29,356	1,105
Louisiana	23,742	24,094	(352)
West Texas	20,298	17,704	2,594
Mississippi	23,705	21,511	2,194
Colorado-Kansas	18,030	17,268	762
Other	732	786	(54)
Total	\$197,613	\$184,718	\$12,895

Six Months Ended March 31, 2016 compared with Six Months Ended March 31, 2015

Financial and operational highlights for our regulated distribution segment for the six months ended March 31, 2016 and 2015 are presented below.

	Six Months Ended March 31		
	2016	2015	Change
	(In thousands, unless otherwise noted)		
Gross profit	\$742,603	\$730,047	\$12,556
Operating expenses	405,473	407,232	(1,759)
Operating income	337,130	322,815	14,315
Miscellaneous expense	(902)	(2,266)	1,364
Interest charges	39,422	40,953	(1,531)
Income before income taxes	296,806	279,596	17,210
Income tax expense	109,239	106,356	2,883
Net income	\$187,567	\$173,240	\$14,327
Consolidated regulated distribution sales volumes — MMcf	180,649	229,377	(48,728)
Consolidated regulated distribution transportation volumes — MMcf	72,888	77,071	(4,183)
Total consolidated regulated distribution throughput — MMcf	253,537	306,448	(52,911)
Consolidated regulated distribution average cost of gas per Mcf sold	\$4.13	\$5.44	\$(1.31)

Income for our regulated distribution segment increased eight percent, primarily due to a \$12.6 million increase in gross profit combined with a \$1.8 million decrease in operating expenses. The year-over-year increase in gross profit primarily reflects:

- a \$30.6 million net increase in rate adjustments. Our Mid-Tex Division accounted for \$16.9 million of this increase. We also experienced increases in our Mississippi and West Texas Divisions.

- a \$13.9 million decrease in revenue-related taxes primarily in our Mid-Tex and West Texas Divisions, offset by a corresponding \$10.8 million decrease in the related tax expense.

- a \$3.3 million decrease in consumption. Current-period weather was 26 percent warmer than the prior-year period, before adjusting for weather normalization mechanisms. As a result, sales volumes decreased 21 percent.

The decrease in operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense and taxes, other than income, was primarily due to the decrease in revenue-related tax expense partially offset by increased property taxes and depreciation expense associated with

increased capital investments.

Net income for the six months ended March 31, 2016 includes a \$3.3 million income tax benefit for stock awards that vested during the current-year period as a result of adopting the new stock-based accounting guidance.

The following table shows our operating income by regulated distribution division, in order of total rate base, for the six months ended March 31, 2016 and 2015. The presentation of our regulated distribution operating income is included for financial reporting purposes and may not be appropriate for ratemaking purposes.

	Six Months Ended March 31		
	2016	2015	Change
	(In thousands)		
Mid-Tex	\$148,776	\$133,113	\$15,663
Kentucky/Mid-States	49,379	49,152	227
Louisiana	38,794	40,819	(2,025)
West Texas	33,228	28,802	4,426
Mississippi	36,532	35,810	722
Colorado-Kansas	28,156	27,257	899
Other	2,265	7,862	(5,597)
Total	\$337,130	\$322,815	\$14,315

Recent Ratemaking Developments

The amounts described in the following sections represent the operating income that was requested or received in each rate filing, which may not necessarily reflect the stated amount referenced in the final order, as certain operating costs may have changed as a result of a commission's or other governmental authority's final ruling. During the first six months of fiscal 2016, we completed nine regulatory proceedings, resulting in a \$22.1 million increase in annual operating income as summarized below:

Rate Action	Annual Increase to Operating Income (In thousands)
Annual formula rate mechanisms	\$ 17,826
Rate case filings	4,456
Other rate activity	(183)
	\$ 22,099

Additionally, the following ratemaking efforts seeking \$68.3 million in annual operating income were in progress as of March 31, 2016:

Division	Rate Action	Jurisdiction	Operating Income Requested (In thousands)
Kentucky/Mid-States	Rate Case	Kentucky	\$ 5,531
Kentucky/Mid-States	Formula Rate Mechanism	Tennessee	4,888
Kentucky/Mid-States	Expedited Rate Filing ⁽¹⁾	Virginia	537
Louisiana	Formula Rate Mechanism ⁽¹⁾	Trans LA	6,216
Louisiana	Formula Rate Mechanism	LGS	8,686
Mid-Tex	Formula Rate Mechanism	Dallas	6,915
Mid-Tex	Formula Rate Mechanism	Mid-Tex Cities	26,564
Mid-Tex	Formula Rate Mechanism ⁽²⁾	Environs	1,325
Mississippi	Infrastructure Mechanism	Mississippi	3,519
West Texas	Infrastructure Mechanism ⁽³⁾	Cities of Amarillo, Channing, Lubbock & Dalhart	3,484
West Texas	Infrastructure Mechanism ⁽²⁾	Environs	646
			\$ 68,311

(1) The proposed increase for Virginia and Trans LA customers was implemented on April 1, 2016, subject to refund.

(2) The 2015 GRIP increase was approved by the Railroad Commission of Texas on May 3, 2016.

(3) The 2015 GRIP increase was implemented on April 26, 2016.

Annual Formula Rate Mechanisms

As an instrument to reduce regulatory lag, formula rate mechanisms allow us to refresh our rates on an annual periodic basis without filing a formal rate case. However, these filings still involve discovery by the appropriate regulatory authorities prior to the final determination of rates under these mechanisms. We currently have formula rate mechanisms in our Louisiana, Mississippi and Tennessee operations and in substantially all of our Texas divisions. Additionally, we have specific infrastructure programs in substantially all of our distribution divisions with tariffs in place to permit the investment associated with these programs to have their surcharge rate adjusted annually to recover approved capital costs incurred in a prior test-year period. The following table summarizes our annual formula rate mechanisms by state.

State	Annual Formula Rate Mechanisms	
	Infrastructure Programs	Formula Rate Mechanisms
Colorado	System Safety and Integrity Rider (SSIR)	—
Kansas	Gas System Reliability Surcharge (GSRS)	—
Kentucky	Pipeline Replacement Program (PRP)	—
Louisiana	(1)	Rate Stabilization Clause (RSC)
Mississippi	System Integrity Rider (SIR)	Stable Rate Filing (SRF), Supplemental Growth Filing (SGR)
Tennessee	—	Annual Rate Mechanism (ARM)
Texas	Gas Reliability Infrastructure Program (GRIP), (1)	Dallas Annual Rate Review (DARR), Rate Review Mechanism (RRM)
Virginia	Steps to Advance Virginia Energy (SAVE)	—

Infrastructure mechanisms in Texas and Louisiana allow for the deferral of all expenses associated with capital expenditures incurred pursuant to these rules, which primarily consists of interest, depreciation and other taxes, until the next rate proceeding (rate case or annual rate filing), at which time investment and costs would be recoverable through base rates.

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

The following annual formula rate mechanisms were approved during the six months ended March 31, 2016.

Division	Jurisdiction	Test Year Ended	Increase (Decrease) in Annual Operating Income	Effective Date
(In thousands)				
2016 Filings:				
Colorado-Kansas	Colorado	12/31/2016	\$ 764	01/01/2016
Mississippi	Mississippi-SRF ⁽¹⁾	10/31/2016	9,192	01/01/2016
Mississippi	Mississippi-SGR ⁽²⁾	10/31/2016	250	12/01/2015
Kentucky/Mid-States	Kentucky-PRP	09/30/2016	3,786	10/01/2015
Kentucky/Mid-States	Virginia-SAVE	09/30/2016	118	10/01/2015
West Texas	West Texas Cities	09/30/2015	3,716	10/01/2015
Total 2016 Filings			\$ 17,826	

(1) The commission issued a final order approving a \$9.2 million increase in annual operating income on December 21, 2015 with an effective date of January 1, 2016.

The Mississippi Supplemental Growth Rider permits the Company to pursue up to \$5.0 million of eligible industrial growth projects beyond the Division's normal main extension policies. This is the third year of the SGR program.

Rate Case Filings

A rate case is a formal request from Atmos Energy to a regulatory authority to increase rates that are charged to our customers. Rate cases may also be initiated when the regulatory authorities request us to justify our rates. This process is referred to as a "show cause" action. Adequate rates are intended to provide for recovery of the Company's costs as well as a fair rate of return and ensure that we continue to deliver reliable, reasonably priced natural gas service safely to our customers. The following table summarizes the rate cases that were completed during the six months ended March 31, 2016.

Division	State	Increase in Annual Operating Income	Effective Date
(In thousands)			
2016 Rate Case Filings:			
Colorado-Kansas	Kansas	\$ 2,372	03/17/2016
Colorado-Kansas	Colorado	2,084	01/01/2016
Total 2016 Rate Case Filings		\$ 4,456	

Other Ratemaking Activity

The following table summarizes other ratemaking activity during the six months ended March 31, 2016.

Division	Jurisdiction	Rate Activity	Additional Annual Operating Income	Effective Date
(In thousands)				

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

2016 Other Rate Activity:

Colorado-Kansas	Kansas	Ad-Valorem ⁽¹⁾	\$ (183)	02/01/2016
Total 2016 Other Rate Activity			\$ (183)	

(1) The Ad Valorem filing relates to a collection of property taxes in excess of the amount included in our Kansas service area's base rates.

39

Regulated Pipeline Segment

Our regulated pipeline segment consists of the pipeline and storage operations of the Atmos Pipeline–Texas Division. The Atmos Pipeline–Texas Division transports and stores natural gas for our Mid-Tex Division and third party local distribution companies and manages five underground storage facilities in Texas. We also provide interruptible transportation, storage and ancillary services to electric generation and industrial customers as well as producers, marketers and other shippers.

Our regulated pipeline segment is impacted by seasonal weather patterns, competitive factors in the energy industry and economic conditions in our Mid-Tex service area. Natural gas prices do not directly impact the results of this segment as revenues are derived from the transportation and storage of natural gas. However, natural gas prices and demand for natural gas could influence the level of drilling activity in the markets that we serve, which may influence the level of throughput we may be able to transport on our pipeline. Further, natural gas price differences between the various hubs that we serve could influence the volumes of gas transported for shippers through our pipeline system and the rates for such transportation.

The results of Atmos Pipeline — Texas Division are also significantly impacted by the natural gas requirements of the Mid-Tex Division because it is the primary transporter of natural gas for our Mid-Tex Division.

Finally, as a regulated pipeline, the operations of the Atmos Pipeline — Texas Division may be impacted by the timing of when costs and expenses are incurred and when these costs and expenses are recovered through its tariffs.

Additionally, APT annually uses GRIP to recover capital costs incurred in the prior calendar year.

Three Months Ended March 31, 2016 compared with Three Months Ended March 31, 2015

Financial and operational highlights for our regulated pipeline segment for the three months ended March 31, 2016 and 2015 are presented below.

	Three Months Ended March		
	2016	2015	Change
	(In thousands, unless otherwise noted)		
Mid-Tex transportation	\$72,872	\$60,666	\$12,206
Third-party transportation	19,594	28,085	(8,491)
Storage and park and lend services	588	1,069	(481)
Other	2,649	1,910	739
Gross profit	95,703	91,730	3,973
Operating expenses	47,048	39,827	7,221
Operating income	48,655	51,903	(3,248)
Miscellaneous expense	(376)	(379)	3
Interest charges	9,145	8,391	754
Income before income taxes	39,134	43,133	(3,999)
Income tax expense	13,949	15,451	(1,502)
Net income	\$25,185	\$27,682	\$(2,497)
Gross pipeline transportation volumes — MMcf	185,542	220,646	(35,104)
Consolidated pipeline transportation volumes — MMcf	15,040	126,371	(11,331)

Net income for our regulated pipeline segment decreased nine percent, primarily due to a \$4.0 million increase in gross profit, offset by a \$7.2 million increase in operating expenses. The increase in gross profit primarily reflects a \$7.0 million increase in rates from the GRIP filing approved in 2015 partially offset by decreased through-system volumes and lower storage and blending fees due to warmer weather in the current-year quarter compared to the prior-year quarter.

Operating expenses increased \$7.2 million, primarily due to increased levels of pipeline maintenance activities to improve the safety and reliability of our system and increased property taxes and depreciation expense associated with

increased capital investments.

On May 3, 2016, a GRIP filing was approved by the Railroad Commission of Texas for \$40.7 million of additional annual operating income, effective with bills rendered on and after May 3, 2016.

40

Six Months Ended March 31, 2016 compared with Six Months Ended March 31, 2015

Financial and operational highlights for our regulated pipeline segment for the six months ended March 31, 2016 and 2015 are presented below.

	Six Months Ended March 31		
	2016	2015	Change
	(In thousands, unless otherwise noted)		
Mid-Tex transportation	\$141,159	\$120,745	\$20,414
Third-party transportation	40,882	48,479	(7,597)
Storage and park and lend services	1,564	2,073	(509)
Other	6,775	4,000	2,775
Gross profit	190,380	175,297	15,083
Operating expenses	92,477	80,689	11,788
Operating income	97,903	94,608	3,295
Miscellaneous expense	(805)	(631)	(174)
Interest charges	18,292	16,715	1,577
Income before income taxes	78,806	77,262	1,544
Income tax expense	28,035	27,545	490
Net income	\$50,771	\$49,717	\$1,054
Gross pipeline transportation volumes — MMcf	363,744	402,008	(38,264)
Consolidated pipeline transportation volumes — MMcf	44,199	247,005	(2,806)

Net income for our regulated pipeline segment increased two percent, primarily due to a \$15.1 million increase in gross profit, partially offset by an \$11.8 million increase in operating expenses. The increase in gross profit primarily reflects a \$17.1 million increase in rates from the GRIP filing approved in 2015 and a \$3.1 million increase from the sale of excess retention gas. These increases were partially offset by decreased through-system volumes and lower storage and blending fees due to warmer weather in the current-year period compared to the prior-year period. Operating expenses increased \$11.8 million, primarily due to increased levels of pipeline maintenance activities to improve the safety and reliability of our system and increased property taxes and depreciation expense associated with increased capital investments.

Nonregulated Segment

Our nonregulated operations are conducted through Atmos Energy Holdings, Inc. (AEH), a wholly-owned subsidiary of Atmos Energy Corporation and, historically, have represented approximately five percent of our consolidated net income.

AEH's primary business is to buy, sell and deliver natural gas at competitive prices to approximately 1,000 customers located primarily in the Midwest and Southeast areas of the United States. AEH accomplishes this objective by aggregating and purchasing gas supply, arranging transportation and storage logistics and effectively managing commodity price risk.

AEH also earns storage and transportation demand fees primarily from our regulated distribution operations in Louisiana and Kentucky. These demand fees are subject to regulatory oversight and are renewed periodically. Our nonregulated activities are significantly influenced by competitive factors in the industry and general economic conditions. Therefore, the margins earned from these activities are dependent upon our ability to attract and retain customers and to minimize the cost of buying, selling and delivering natural gas to offer more competitive pricing to those customers.

Natural gas prices can influence:

- The demand for natural gas. Higher prices may cause customers to conserve or use alternative energy sources. Conversely, lower prices could cause customers such as electric power generators to switch from alternative energy sources to natural gas.

- The collection of accounts receivable from customers, which could affect the level of bad debt expense recognized by this segment.

• The level of borrowings under our credit facilities, which affects the level of interest expense recognized by this segment.

Natural gas price volatility can also influence our nonregulated business in the following ways:

• Price volatility influences basis differentials, which provide opportunities to profit from identifying the lowest cost alternative among the natural gas supplies, transportation and markets to which we have access.

• Increased or decreased volatility impacts the amounts of unrealized margins recorded in our gross profit and could impact the amount of cash required to collateralize our risk management liabilities.

Our nonregulated segment manages its exposure to natural gas commodity price risk through a combination of physical storage and financial instruments. Therefore, results for this segment include unrealized gains or losses on its net physical gas position and the related financial instruments used to manage commodity price risk. These margins fluctuate based upon changes in the spreads between the physical and forward natural gas prices. The magnitude of the unrealized gains and losses is also contingent upon the levels of our net physical position at the end of the reporting period.

Three Months Ended March 31, 2016 compared with Three Months Ended March 31, 2015

Financial and operating highlights for our nonregulated segment for the three months ended March 31, 2016 and 2015 are presented below.

	Three Months Ended March 31		
	2016	2015	Change
	(In thousands, unless otherwise noted)		
Realized margins			
Gas delivery and related services	\$16,705	\$17,873	\$(1,168)
Storage and transportation services	3,272	3,353	(81)
Other	(3,514)	3,001	(6,515)
Total realized margins	16,463	24,227	(7,764)
Unrealized margins	(3,364)	(1,321)	(2,043)
Gross profit	13,099	22,906	(9,807)
Operating expenses	9,351	9,317	34
Operating income	3,748	13,589	(9,841)

Gross nonregulated delivered gas sales volumes — MMcf	107,414	122,178	(14,764)
Consolidated nonregulated delivered gas sales volumes — MMcf	95,804	105,401	(9,597)
Net physical position (Bcf)	36.4	17.0	19.4

The \$9.8 million quarter-over-quarter decrease in gross profit reflects a \$7.8 million decrease in realized margins, combined with a \$2.0 million decrease in unrealized margins. The following were the key drivers for the \$7.8 million decrease in realized margins:

• Margins from gas delivery and related services margins decreased \$1.2 million, primarily due to a nine percent decrease in consolidated sales volumes due to warmer weather in the current-year quarter. However, this decrease was partially offset by an increase in per-unit margins from 15 cents to 16 cents per Mcf, primarily due to lower net transportation costs incurred as result of fewer deliveries.

Other realized margins decreased \$6.5 million. The decrease primarily reflects higher losses, compared with the prior-year quarter, on the settlement of long financial positions as a result of falling natural gas prices during the quarter. Additionally, storage fees increased quarter-over-quarter due to increased park and loan activity.

Unrealized margins decreased \$2.0 million, primarily due to the quarter-over-quarter unfavorable movement of the physical mark on the fair value of natural gas inventory hedged positions.

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

Six Months Ended March 31, 2016 compared with Six Months Ended March 31, 2015

	Six Months Ended March 31		
	2016	2015	Change
	(In thousands, unless otherwise noted)		
Realized margins			
Gas delivery and related services	\$28,555	\$28,632	\$(77)
Storage and transportation services	6,527	6,666	(139)
Other	(14,765)	(2,830)	(11,935)
Total realized margins	20,317	32,468	(12,151)
Unrealized margins	8,540	6,477	2,063
Gross profit	28,857	38,945	(10,088)
Operating expenses	17,669	18,433	(764)
Operating income	11,188	20,512	(9,324)
Miscellaneous income	671	552	119
Interest charges	1,187	466	721
Income before income taxes	10,672	20,598	(9,926)
Income tax expense	4,339	8,276	(3,937)
Net income	\$6,333	\$12,322	\$(5,989)
Gross nonregulated delivered gas sales volumes — MMcf	204,147	230,371	(26,224)
Consolidated nonregulated delivered gas sales volumes — MMcf	80,935	196,331	(15,396)
Net physical position (Bcf)	36.4	17.0	19.4

The \$10.1 million year-over-year decrease in gross profit reflects a \$12.2 million decrease in realized margins, partially offset by a \$2.1 million increase in unrealized margins. The following were the key drivers for the \$12.2 million decrease in realized margins:

Margins from gas delivery and related services were flat year-over-year. Consolidated sales volumes decreased eight percent due to warmer weather. However, lower net transportation costs and other variable costs driven by fewer deliveries resulted in an increase in per-unit margins from 12 cents to 14 cents per Mcf, which offset the effect of reduced sales volumes.

Other realized margins decreased \$11.9 million. The decrease primarily reflects higher losses, compared with the prior-year period, on the settlement of long financial positions as a result of falling natural gas prices. Additionally, storage fees increased period-over-period due to increased park and loan activity.

Unrealized margins increased \$2.1 million, primarily due to the period-over-period favorable movement of the physical mark on the fair value of natural gas inventory hedged positions.

Operating expenses decreased \$0.8 million, primarily due to lower bad debt expense.

Liquidity and Capital Resources

The liquidity required to fund our working capital, capital expenditures and other cash needs is provided from a variety of sources including internally generated funds and borrowings under our commercial paper program and bank credit facilities. Additionally, we have various uncommitted trade credit lines with our gas suppliers that we utilize to purchase natural gas on a monthly basis. Finally, from time to time, we raise funds from the public debt and equity capital markets to fund our liquidity needs.

We regularly evaluate our funding strategy and capital structure to ensure that we (i) have sufficient liquidity for our short-term and long-term needs in a cost-effective manner and (ii) maintain a balanced capital structure with a debt-to-capitalization ratio in a target range of 45 to 55 percent. We also evaluate the levels of committed borrowing capacity that we require. We currently have over \$1 billion of capacity under our short-term facilities.

We plan to continue to fund our growth through the use of operating cash flows, debt and equity securities while maintaining a balanced capital structure. To support our capital market activities, we filed a registration statement with the SEC on March 28, 2016 to issue, from time to time, up to \$2.5 billion in common stock and/or debt securities, which replaced our registration statement that expired on March 28, 2016. On March 28, 2016, we entered into an at-the-market (ATM) equity

distribution agreement under which we may issue and sell, shares of our common stock, up to an aggregate offering price of \$200 million. The shares will be issued under our shelf registration statement. Proceeds from the ATM program will be used primarily to repay short-term debt outstanding under our \$1.25 billion commercial paper program, to fund capital spending primarily to enhance the safety and reliability of our system and for general corporate purposes. No shares were issued under the ATM program during the second fiscal quarter of 2016. The following table presents our capitalization inclusive of short-term debt and the current portion of long-term debt as of March 31, 2016, September 30, 2015 and March 31, 2015:

	March 31, 2016	September 30, 2015	March 31, 2015
	(In thousands, except percentages)		
Short-term debt	\$626,929 9.8 %	\$457,927 7.5 %	\$224,986 3.9 %
Long-term debt	2,455,559 38.2 %	2,455,388 40.2 %	2,455,217 42.2 %
Shareholders' equity	3,344,565 52.0 %	3,194,797 52.3 %	3,139,694 53.9 %
Total	\$6,427,053 100.0 %	\$6,108,112 100.0 %	\$5,819,897 100.0 %

Cash Flows

Our internally generated funds may change in the future due to a number of factors, some of which we cannot control. These include regulatory changes, prices for our products and services, demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks and other factors.

Cash flows from operating, investing and financing activities for the six months ended March 31, 2016 and 2015 are presented below.

	Six Months Ended March 31		
	2016	2015	Change
	(In thousands)		
Total cash provided by (used in)			
Operating activities	\$455,776	\$540,848	\$(85,072)
Investing activities	(536,345)	(442,990)	(93,355)
Financing activities	99,834	(44,591)	144,425
Change in cash and cash equivalents	19,265	53,267	(34,002)
Cash and cash equivalents at beginning of period	28,653	42,258	(13,605)
Cash and cash equivalents at end of period	\$47,918	\$95,525	\$(47,607)

Cash flows from operating activities

Period-over-period changes in our operating cash flows are primarily attributable to changes in net income and working capital changes, particularly within our regulated distribution segment resulting from changes in the price of natural gas and the timing of customer collections, payments for natural gas purchases and deferred gas cost recoveries.

For the six months ended March 31, 2016, we generated cash flow of \$455.8 million from operating activities compared with \$540.8 million for the six months ended March 31, 2015. The \$85.1 million decrease in operating cash flows primarily reflects the timing of deferred gas cost recoveries.

Cash flows from investing activities

In executing our regulatory strategy, we target our capital spending on regulatory mechanisms that permit us to earn an adequate return timely on our investment without compromising the safety or reliability of our system.

Substantially all of our regulated jurisdictions have rate tariffs that provide the opportunity to include in their rate base approved capital costs on a periodic basis without being required to file a rate case.

In recent years, a substantial portion of our cash resources has been used to fund our ongoing construction program, which enables us to enhance the safety and reliability of the systems used to provide regulated distribution services to our existing customer base, expand our natural gas distribution services into new markets, enhance the integrity of our pipelines and, more recently, expand our intrastate pipeline network. Over the last three fiscal years, approximately 80 percent of our capital spending has been committed to improving the safety and reliability of our system. We

anticipate our annual capital spending will be in the range of \$1 billion to \$1.1 billion through fiscal 2020.

For the six months ended March 31, 2016, capital expenditures were \$538.2 million, compared with \$441.6 million in the prior-year period. The \$96.6 million increase primarily reflects an increase in capital spending in our regulated pipeline segment, primarily related to the enhancement and fortification of two storage fields to ensure the reliability of gas service to our Mid-Tex Division combined with a planned increase in spending in our regulated distribution operations.

Cash flows from financing activities

For the six months ended March 31, 2016, our financing activities generated \$99.8 million of cash compared with \$44.6 million of cash used in the prior-year period. The \$144.4 million increase of cash generated is primarily due to higher net short-term debt borrowings due to increased capital expenditures and period-over-period changes in working capital funding needs compared to the prior year.

The following table summarizes our share issuances for the six months ended March 31, 2016 and 2015.

	Six Months Ended March 31	
	2016	2015
Shares issued:		
Direct Stock Purchase Plan	78,652	79,803
1998 Long-Term Incentive Plan	458,929	488,729
Retirement Savings Plan and Trust	193,106	178,067
Total shares issued	730,687	746,599

The year-over-year decrease in the number of shares issued primarily reflects a decrease in shares issued under the 1998 Long-Term Incentive Plan. For the six months ended March 31, 2016, we did not cancel and retire any shares attributable to federal income tax withholdings on equity awards. For the six months ended March 31, 2015, we canceled and retired 148,464 such shares.

Credit Facilities

Our short-term borrowing requirements are affected primarily by the seasonal nature of the natural gas business and the level of our capital expenditures. Changes in the price of natural gas, the amount of natural gas we need to supply to meet our customers' needs and our capital spending activities could significantly affect our borrowing requirements. However, our short-term borrowings typically reach their highest levels in the winter months.

We finance our short-term borrowing requirements through a combination of a \$1.25 billion commercial paper program, four committed revolving credit facilities and one uncommitted revolving credit facility with third-party lenders that provide approximately \$1.3 billion of working capital funding. As of March 31, 2016, the amount available to us under our credit facilities, net of commercial paper and outstanding letters of credit, was \$0.7 billion.

Credit Ratings

Our credit ratings directly affect our ability to obtain short-term and long-term financing, in addition to the cost of such financing. In determining our credit ratings, the rating agencies consider a number of quantitative factors, including debt to total capitalization, operating cash flow relative to outstanding debt, operating cash flow coverage of interest and pension liabilities and funding status. In addition, the rating agencies consider qualitative factors such as consistency of our earnings over time, the quality of our management and business strategy, the risks associated with our regulated and nonregulated businesses and the regulatory structures that govern our rates in the states where we operate.

Our debt is rated by three rating agencies: Standard & Poor's Corporation (S&P), Moody's Investors Service (Moody's) and Fitch Ratings (Fitch). As of March 31, 2016, Moody's and Fitch maintained a stable outlook. S&P issued a revised outlook from stable to positive on October 29, 2015, citing the potential for an upgraded rating in the future if we maintain our current level of financial performance as capital spending levels remain elevated. Our current debt ratings are all considered investment grade and are as follows:

	S&P	Moody's	Fitch
Senior unsecured long-term debt	A-	A2	A
Short-term debt	A-2	P-1	F-2

A significant degradation in our operating performance or a significant reduction in our liquidity caused by more limited access to the private and public credit markets as a result of deteriorating global or national financial and credit conditions could trigger a negative change in our ratings outlook or even a reduction in our credit ratings by the three credit rating agencies. This would mean more limited access to the private and public credit markets and an increase in the costs of such borrowings.

A credit rating is not a recommendation to buy, sell or hold securities. The highest investment grade credit rating is AAA for S&P, Aaa for Moody's and AAA for Fitch. The lowest investment grade credit rating is BBB- for S&P, Baa3 for Moody's and BBB- for Fitch. Our credit ratings may be revised or withdrawn at any time by the rating agencies, and each rating should be evaluated independently of any other rating. There can be no assurance that a rating will remain in effect for any given period of time or that a rating will not be lowered, or withdrawn entirely, by a rating agency if, in its judgment, circumstances so warrant.

Debt Covenants

We were in compliance with all of our debt covenants as of March 31, 2016. Our debt covenants are described in greater detail in Note 5 to the unaudited condensed consolidated financial statements.

Contractual Obligations and Commercial Commitments

Except as noted in Note 7 to the unaudited condensed consolidated financial statements, there were no significant changes in our contractual obligations and commercial commitments during the six months ended March 31, 2016.

Risk Management Activities

We conduct risk management activities through our regulated distribution and nonregulated segments. In our regulated distribution segment, we use a combination of physical storage, fixed physical contracts and fixed financial contracts to reduce our exposure to unusually large winter-period gas price increases. Additionally, we manage interest rate risk by entering into financial instruments to effectively fix the Treasury yield component of the interest cost associated with anticipated financings.

In our nonregulated segment, we manage our exposure to the risk of natural gas price changes and lock in our gross profit margin through a combination of storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. To the extent our inventory cost and actual sales and actual purchases do not correlate with the changes in the market indices we use in our hedges, we could experience ineffectiveness or the hedges may no longer meet the accounting requirements for hedge accounting, resulting in the financial instruments being treated as mark to market instruments through earnings.

The following table shows the components of the change in fair value of our regulated distribution segment's financial instruments for the three and six months ended March 31, 2016 and 2015:

	Three Months Ended		Six Months Ended	
	March 31		March 31

Other changes in value	3,085	(14,387)	(2,212)	(44,618)
Fair value of contracts at end of period	(16,085)	(36,140)	(16,085)	(36,140)
Netting of cash collateral	22,922	52,723	22,922	52,723
Cash collateral and fair value of contracts at period end	\$6,837	\$16,583	\$6,837	\$16,583

The fair value of our nonregulated segment's financial instruments at March 31, 2016 is presented below by time period and fair value source:

Source of Fair Value	Fair Value of Contracts at March 31, 2016				Total Fair Value
	Maturity in Years				
	Less Than 1	1-3	4-5	Greater Than 5	
	(In thousands)				
Prices actively quoted	\$(14,503)	\$(2,047)	\$465	—	—\$(16,085)
Prices based on models and other valuation methods	—	—	—	—	—
Total Fair Value	\$(14,503)	\$(2,047)	\$465	—	—\$(16,085)

Pension and Postretirement Benefits Obligations

For the six months ended March 31, 2016 and 2015, our total net periodic pension and other benefits costs were \$23.0 million and \$29.4 million. A substantial portion of those costs relating to our regulated distribution operations are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

Our fiscal 2016 costs were determined using a September 30, 2015 measurement date. As of September 30, 2015, interest and corporate bond rates utilized to determine our discount rates were higher than the interest and corporate bond rates as of September 30, 2014, the measurement date for our fiscal 2015 net periodic cost. Therefore, we increased the discount rate used to measure our fiscal 2016 net periodic cost from 4.43 percent to 4.55 percent. We lowered our expected return on plan assets from 7.25 percent to 7.00 percent in the determination of our fiscal 2016 net periodic pension cost based upon expected market returns for our targeted asset allocation. In October 2014, the Society of Actuaries released its final report on mortality tables and the mortality improvement scale to reflect

increasing life expectancies in the United States and in October 2015, the Society of Actuaries issued an additional report related to mortality tables and the mortality improvement scale. As of September 30, 2015, we updated our assumed mortality tables to incorporate both of these updates. As a result of the net impact

of changes in these and other assumptions, we expect our fiscal 2016 net periodic pension cost to decrease by approximately 20 percent.

The amounts with which we fund our defined benefit plans are determined in accordance with the Pension Protection Act of 2006 (PPA) and are influenced by the funded position of the plans when the funding requirements are determined on January 1 of each year. Based upon the determination as of January 1, 2015, we are not required to make a minimum contribution to our defined benefit plans during fiscal 2016. However, we may consider whether a voluntary contribution is prudent to maintain certain funding levels.

For the six months ended March 31, 2016 we contributed \$9.0 million to our postretirement medical plans. We anticipate contributing between \$15 million and \$25 million to our postretirement plans during fiscal 2016.

The projected pension liability, future funding requirements and the amount of pension expense or income recognized for the plans are subject to change, depending upon the actuarial value of plan assets in the plans and the determination of future benefit obligations as of each subsequent actuarial calculation date. These amounts will be determined by actual investment returns, changes in interest rates, values of assets in the plans and changes in the demographic composition of the participants in the plans.

OPERATING STATISTICS AND OTHER INFORMATION

Note to preceding tables:

⁽¹⁾ Sales volumes and revenues reflect segment operations, including intercompany sales and transportation amounts.

RECENT ACCOUNTING DEVELOPMENTS

Recent accounting developments and their impact on our financial position, results of operations and cash flows are described in Note 2 to the unaudited condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information regarding our quantitative and qualitative disclosures about market risk are disclosed in Item 7A in our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. During the six months ended March 31, 2016, there were no material changes in our quantitative and qualitative disclosures about market risk.

Item 4. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the Company's disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act). Based on this evaluation, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures were effective as of March 31, 2016 to provide reasonable assurance that information required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC's rules and forms, including a reasonable level of assurance that such information is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

We did not make any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the second quarter of the fiscal year ended September 30, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

During the six months ended March 31, 2016, there were no material changes in the status of the litigation and other matters that were disclosed in Note 10 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2015. We continue to believe that the final outcome of such litigation and other matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 6. Exhibits

A list of exhibits required by Item 601 of Regulation S-K and filed as part of this report is set forth in the Exhibits Index, which immediately precedes such exhibits.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
