Release issued February 9, 2005 by Questar Corporation.

Questar 2004 Earnings Up 32% on 12% Growth in Production and Higher Prices;

Nonregulated Proved Reserves Jump 24% to 1.43 Tcfe

SALT LAKE CITY Questar Corp. (NYSE:STR) net income rose 32% to \$229.3 million, or \$2.67 per diluted share, in 2004, driven by a 12% increase in natural gas and oil-equivalent production and a 15% increase in realized natural gas prices. The natural gas-focused energy company earned \$173.6 million, or \$2.06 per diluted share, in 2003. Questar's 2003 earnings were reduced by \$5.6 million from the cumulative effect of implementing a new accounting rule related to retirement of long-lived assets.

There were 85.7 million average diluted shares outstanding in 2004 versus 84.2 million in the prior year.

Earnings from Questar Market Resources (QMR), a subsidiary that conducts gas and oil exploration and pro

duction, gas gathering and processing, cost-of-service gas development and other nonregulated activities, increased 43% to \$165.4 million. QMR generated 72% of Questar's 2004 net income.

Net income for Questar E&P, QMR's nonregulated natural gas and oil exploration and production subsidiary, grew 54% to \$108.2 million versus \$70.4 million in 2003. Natural gas and oil-equivalent production grew 12% to 103.5 billion cubic feet equivalent (bcfe) from 92.8 bcfe in 2003. Wexpro, a QMR subsidiary that manages, develops and produces cost-of-service reserves for affiliated company Questar Gas, earned \$35.3 million in 2004 compared to \$32.6 million a year ago, an 8% increase. Net income for Questar Gas Management, the company's natural gas-gathering and processing business, grew 58% to \$21 million versus \$13.3 million in 2003. Questar Energy Trading, which markets Questar E&P and third-party production, provides risk-management services and owns and operates an underground gas-storage reservoir, earned \$0.9 million in 2004 versus a loss of \$0.4 million in 2003.

Questar is one of the fastest growing natural gas producers in the U.S., said Keith O. Rattie, Questar chairman, president and CEO. In a year when most U.S. producers struggled to grow reserves and hold production flat, we bucked the industry trend we grew production by 12% and proved reserves by 24%. We grew production and reserves in the Rockies and the Midcontinent, and we did it with the drill bit. Bottom line, we did what we set out to do on the E&P side of our business in 2004. Execution will again be the key in 2005 and beyond, he said.

Edgar Filing: QUESTAR CORP - Form 8-K

Earnings for Questar Pipeline (QPC), the company's interstate gas-transmission and storage subsidiary, declined from \$30.2 million a year ago to \$27.6 million in 2004. Net income in 2004 was reduced by \$3 million after tax due to an adverse Federal Energy Regulatory Commission (FERC) order concerning proceeds from liquid sales at a processing plant.

Net income for Questar Gas (QGC), the company's retail natural gas-distribution utility, increased by \$11.3 million in 2004 to \$31.5 million. Prior-year net income was reduced by a \$15.5 million charge for an adverse Utah regulatory order, of which \$11.9 million related to periods before 2003. The order reduced 2004 results by \$4.3 million after tax.

In fourth-quarter 2004, Questar earned \$73.7 million, or \$.85 per diluted share, compared with \$60 million, or \$.71 per diluted share, for the prior-year quarter. QMR's net income increased 56% to \$49.8 million on higher natural gas-production volumes and realized prices, increased throughput and margins in Questar Gas Management, and improved margins in Questar Energy Trading.

QPC net income declined from \$7.1 million in the fourth quarter of 2003 to \$4.2 million in the 2004 period due largely to the FERC order. QGC net income declined from \$19.2 million in fourth-quarter 2003 to \$18.9 million in the same 2004 period due to lower usage per customer.

FULL-YEAR 2004 RESULTS

Exploration and Production

Questar E&P earned \$108.2 million in 2004 versus \$70.4 million in the prior year. Results were driven by a 12% increase in production to 103.5 bcf and 18% higher realized natural gas and oil-equivalent prices. Questar E&P's cost structure increased 8%, or \$0.18 per thousand cubic feet equivalent (Mcf), versus the 2003 period due primarily to higher production taxes.

Questar E&P Rockies production grew 9% in 2004, driven by a 55% increase at Pinedale and an 8% increase from legacy assets (all Rockies properties except Pinedale and the Uinta Basin). Production from the company's Uinta Basin properties declined 15% versus the year-earlier period. However, the Uinta Basin production-decline rate slowed during 2004. Uinta Basin second-half 2004 production was equal to first-half 2004 levels.

Midcontinent production grew 17% in 2004, driven by a successful coalbed-methane-development project in eastern Oklahoma and in-fill development drilling in northwestern Louisiana.

Edgar Filing: QUESTAR CORP - Form 8-K

Tables at the end of this release provide a breakdown of Questar E&P's cost structure and production by region.

Questar E&P natural gas production increased 14% to 89.8 bcf in 2004. The average realized price (which includes the effect of cash-flow hedges) for natural gas in 2004 was \$4.18 per Mcf, 15% higher than for the prior-year period. About 76% of 2004 gas production was hedged at an average price of \$4.04 per Mcf, net to the well. Net-to-the-well prices reflect adjustments for regional basis, gathering and processing costs, and gas quality. Hedging reduced natural gas revenues by \$83.9 million in 2004.

Oil and natural-gas-liquids (NGL) production which comprises 13% of Questar E&P's overall production declined 2% to 2.3 million barrels in 2004. The average realized price, including hedges, was \$30.97 per barrel, 32% higher than in 2003. About 66% of 2004 oil production was hedged at an average price of \$30.98 per barrel. Hedging reduced revenues by \$16.3 million.

Questar E&P hedges to lock in cash flow, earnings and acceptable returns on invested capital and to reduce commodity-price risk.

Questar E&P increased year-end 2004 nonregulated reserves 24% to 1.43 trillion cubic feet equivalent (tcfe) versus 1.16 tcfe at the end of 2003. Reserve additions included a 295

bcfe net increase at Pinedale related primarily to the approval of 20-acre well spacing, and minor increases in Midcontinent and Rockies legacy properties.

Year-end 2004 Uinta Basin reserves decreased 30.9 bcfe versus year-end 2003 as a result of 24.8 bcfe of production and net negative reserve adjustments of 6.1 bcfe. The adjustments consisted of additions less reductions related to producing-well performance and reserves assigned to certain proved undeveloped locations.

Questar E&P's all-in pre-income-tax cost structure rose \$0.18 per Mcfe to \$2.49 per Mcfe in 2004 compared to \$2.31 per Mcfe in 2003. Increased production taxes which result from higher sales prices accounted for 67% of the overall increase.

Wexpro reported 2004 net income of \$35.3 million, up 8%, or \$2.7 million, over 2003. Wexpro earns a contractual after-tax unlevered return of approximately 19% on its investment base, which grew \$10 million to \$182.8 million at year-end 2004. The investment base includes capitalized investments net of depreciation and deferred taxes in successful gas and oil wells and associated production facilities. During 2004, Wexpro's cost-of-service production totaled 41.3 bcfe compared with 42.8 bcfe in 2003. At year-end 2004, cost-of-service reserves totaled 556.3 bcfe versus 455.9 bcfe a year earlier, a 22% increase.

Midstream Field Services Gas Gathering and Processing

Questar Gas Management increased 2004 net income 58% to \$21 million compared with \$13.3 million in 2003. Gathering-volume growth was driven primarily by expanding Pinedale production and new contracts with third parties in the Uinta Basin. Results also benefited from higher margins in both the gas-gathering and processing businesses. Gathering margins increased by \$7 million due primarily to an 11% increase in volumes and a 2.3-cent-per-million Btu (MMBtu) increase in gathering rates. Processing margins increased 7.6 cents per gallon as a result of favorable spreads between NGL and natural gas prices.

Gas and Oil Marketing and Trading

Questar Energy Trading earned \$0.9 million in 2004 versus a loss of \$0.4 million a year earlier. Profits from improved storage margins and regional pipeline differential arbitrage more than offset losses on the discounted sale of index-related equity-gas purchases and certain out-of-the-money firm-transportation contracts on regional interstate pipelines.

Interstate Gas Transmission & Storage

Questar Pipeline earned \$27.6 million in 2004 compared with \$30.2 million the prior year. QPC's total revenue remained essentially unchanged from 2003. Increased transportation revenues of \$3 million from firm contracts were offset by a \$0.4 million reduction in interruptible-transportation revenues and \$3 million net lower revenues due primarily to the adverse FERC order. Interruptible-transportation revenues declined as customers made more efficient use of released capacity under firm-transportation contracts.

Net revenues of \$5.9 million from natural gas-liquids sales were reduced by \$4.7 million due to a FERC order issued in November 2004 in a fuel-charge proceeding. The FERC required the pipeline to credit shippers with proceeds from sales of certain natural gas liquids. QPC extracts natural gas liquids to maintain system-operating efficiency and to meet hydrocarbon dew-point specifications of downstream pipelines. QPC believes these revenues should be offset by liquids-recovery costs before crediting shippers. QPC has asked the FERC for a rehearing.

Excluding the FERC order, QPC 2004 earnings were 1% higher than in 2003. Transportation volumes declined 7% to 355.8 MMDth because of lower customer usage of both interruptible and released firm-transportation capacity. QPC's core-transmission system pipelines in Wyoming, Colorado and Utah remained contracted at above 90% capacity.

QPC has obtained FERC approval for a 102 MMdth per-day expansion of its southern system in central Utah. Service should begin in fourth-quarter 2005.

QPC operating costs rose 5% to \$55.7 million in 2004 compared to \$53.2 million in 2003. The increase was primarily due to higher employee-benefit costs and higher costs associated with maintenance and continued marketing of the western segment of the Southern Trails Pipeline.

Retail Gas Distribution

Questar Gas earned \$31.5 million in 2004 compared to \$20.2 million in 2003. QGC 2003 earnings included after-tax charges of \$15.5 million related to a long-standing dispute in Utah over the recovery of gas-processing and heat-content-management costs. Of the charges, \$3.6 million related to 2003 and the remainder to prior years. QGC 2004 net income was reduced by \$4.3 million for these unrecovered costs. On Feb. 1, 2005, QGC filed a request with the Public Service Commission of Utah to recover ongoing costs of \$5.7 million per year.

QGC's customer base grew by 23,623 or 3.1% to 794,117 at year-end 2004. Revenue growth from customer additions was offset by a 3.4% decrease in temperature-adjusted usage per customer. Usage per customer continues to decline as customers respond to higher prices. QGC's operating and maintenance costs rose 4% in 2004 primarily due to higher employee benefit costs.

Fourth-Quarter 2004 Results

Questar E&P earned \$32.8 million in fourth-quarter 2004, 67% more than in the year-earlier period. Nonregulated natural gas production rose 14% to 24.3 bcf while the average realized price was 18% higher at \$4.40 per Mcf. Nonregulated oil and NGL production decreased 6% in the 2004 quarter to 564,000 barrels, while the average realized price increased 40% to \$33.08 per barrel versus \$23.70 in the prior-year period. Wexpro net income for the 2004 quarter was essentially flat with the year-earlier period. Wexpro results for the 2004 period were reduced by a \$1.7 million after-tax charge related to abandonment of an unsuccessful coalbed-methane development project in western Wyoming.

Net income from Questar Gas Management's gas-gathering and processing business was \$6.8 million, 75% higher than a year earlier, due to rising throughput and increased gathering and processing margins.

Questar Energy Trading earned \$1.4 million during the quarter versus a loss of \$0.4 million during the 2003 period. Increased storage margins and pipeline price differentials improved results during the 2004 quarter.

Questar Pipeline's fourth-quarter 2004 net income declined \$2.9 million to \$4.2 million due to the FERC liquid-sales order.

Questar Gas earned \$18.9 million compared with \$19.2 million in the 2003 quarter due to lower usage per customer.

Revised 2005 Earnings Guidance Reflects Lower Gas and Oil Prices

Questar CEO Rattie said that the company now expects 2005 earnings to range from \$3.10 to \$3.30 per diluted share. The company's previous guidance of \$3.25 to \$3.45 per diluted share was based on the forward-price curves for natural gas and oil on Oct. 18, 2004. The reduction is due to the subsequent decline in natural gas and oil prices. The revised guidance is based on natural gas and crude-oil hedges in place on Feb. 7, 2005, and assumes a 12-month 2005 NYMEX average price for unhedged production of \$6.27 per MMBtu for gas and a NYMEX prompt-month average of \$45.71 per barrel for oil. The guidance assumes Questar E&P production will range from 112 to 114 bcfe. Based on current hedges, the company now estimates that a 10-cent change in NYMEX gas prices over the remaining 11 months of 2005 will impact net income by about \$1 million. A \$1 per-barrel change in NYMEX crude oil prices over the same period will impact net income about \$780,000. The company's guidance also excludes one-time items such as potential gains and losses on the sale of assets.

Questar is a natural gas-focused energy company with \$5.3 billion in enterprise value. Headquartered in Salt Lake City, Questar engages in gas and oil development and production; gas gathering, processing and marketing; interstate gas transmission and storage; and retail gas distribution.

Forward-looking Statements

This release contains certain forward-looking statements within the meaning of the federal securities laws. Such statements are based on management's current expectations, estimates and projections, which are subject to a wide range of uncertainties and business risks. Factors that could cause actual results to differ from those anticipated are discussed in the company's periodic filings with the Securities and Exchange Commission, including its annual report on Form 10-K for the year ended Dec. 31, 2003. Subject to the requirements of otherwise applicable law, the company cannot be expected to update the statements contained in this news release or take actions described herein or otherwise currently planned.
