Item 8.01. Other Events

On March 22, 2018, the California Public Utilities Commission (the “Commission”) issued a decision in the proceeding to determine the cost of capital (“COC”) for the period 2018 through 2020 for San Jose Water Company, a wholly-owned subsidiary of SJW Group. The COC is a triannual regulatory process in which the Commission determines a regulated water utility's cost of long-term debt and common stock and the components of the authorized capital structure. The Commission’s decision provides for a reduction to San Jose Water Company's authorized return on equity from 9.43% to 8.90% and its overall return on rate base from 8.09% to 7.64%. The decision is effective retroactively to January 1, 2018, and it allows for the continuation of a Water Cost of Capital Mechanism (“WCCM”). The WCCM is a mechanism that allows for an annual adjustment to authorized return on equity between COC filings. New customer water rates reflecting this updated authorized rate of return will become effective on or about March 27, 2018. The differential in revenue requirement from January 1, 2018 up to the time when the new rates became effective in March 2018 has been tracked in a memorandum account and is subject to customer refund in San Jose Water Company’s next general rate adjustment. The anticipated reduction in authorized revenue requirement for 2018 is approximately \$6 million. The decision is subject to appeal within 30 days from the date of issuance.
