UNITED STATES SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-Q/A

(Amendment No. 1)

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2002.

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-8957

ALASKA AIR GROUP, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

91-1292054
(I.R.S. Employer
Identification No.)

19300 Pacific Highway South, Seattle, Washington 98188

(Address of principal executive offices)

Registrant's telephone number, including area code: (206) 431-7040

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes (X) No ()

APPLICABLE ONLY TO CORPORATE ISSUERS:

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

The registrant has 26,549,161 common shares, par value \$1.00, outstanding at October 31, 2002.

During 2002, the Company changed its accounting policies relating to the accrual for certain lease return costs and capitalization of software development costs. In addition, the Company changed its accounting for aircraft purchase commitments assumed by a third party. The Company also made other corrections and certain reclassifications of deferred income taxes and other balance sheet and income statement items, none of which have a significant impact on previously reported equity or net earnings. Because the previous accounting methods and classifications are not considered to be in compliance with generally accepted accounting principles in the United States of America, the Company's previously issued consolidated financial statements for the years ended December 31, 1999, 2000, and 2001, including the interim periods within those years, and for the three and nine months ended September 30, 2002, have been restated.

Table of Contents

This amendment to the Company's Quarterly Report on Form 10-Q for the three and nine months ended September 30, 2002 amends and restates only those items of the previously filed Form 10-Q which have been affected by the restatement. In order to preserve the nature and character of the disclosures set forth in such items as originally filed, no attempt has been made in this amendment to modify or update such disclosures except as required to reflect the effects of the restatement and to make non-substantive revisions to the notes to the consolidated financial statements. For additional information regarding the restatement, see Note 2 to the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (unaudited)

Alaska Air Group, Inc.

Note 1. Basis of Presentation and Significant Accounting Policies

The accompanying unaudited consolidated financial statements of Alaska Air Group, Inc. (the Company) include the accounts of its principal subsidiaries, Alaska Airlines, Inc. (Alaska) and Horizon Air Industries, Inc. (Horizon). These interim consolidated financial statements are unaudited and should be read in conjunction with the consolidated financial statements in the Company's annual report on Form 10-K/A for the year ended December 31, 2001. In the opinion of management, all adjustments have been made which are necessary to present fairly the financial position of the Company as of September 30, 2002, as well as the results of its operations for the three and nine months ended September 30, 2002 and 2001. Except for the restatement of the previous financial statements as described below, the adjustments made were of a normal recurring nature. Certain reclassifications have been made in the prior year's restated financial statements to conform to the 2002 presentation.

These consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and they require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities, as well as the reported amounts of revenues and expenses. Significant estimates include assumptions used to record liabilities, expenses and revenue associated with the Company's Mileage Plan, estimated useful lives of property and equipment and the amounts of certain accrued liabilities. Actual results may differ from these estimates.

As further discussed in Note 2, in 2002 the Company restated its consolidated financial statements for the year ended December 31, 2001, and for all quarterly periods during the year ended December 31, 2001. The Company also restated its consolidated financial statements for the three and nine months ended September 30, 2002.

Effective January 1, 2002, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets. Under this Statement, the Company's goodwill will no longer be amortized, but instead will be tested for impairment on a minimum of an annual basis. The impact of discontinuing amortization of existing goodwill has resulted in an increase of net income of \$1.5 million for the nine months ended September 30, 2002. During the second quarter of 2002, the Company completed the first step of its impairment test related to its \$51.4 million of goodwill. The test was performed using Alaska and Horizon as separate reporting units. In the fourth quarter of 2002, the Company completed the second step of its impairment test and determined that all of the Company's goodwill was impaired. As a result, the Company recorded a one-time, non-cash charge, effective January 1, 2002, of \$51.4 million (\$12.5 million for Alaska and \$38.9 million for Horizon) to write-off all of its goodwill. This charge is reflected as a cumulative effect of accounting change in the Consolidated Statement of Operations for the nine months ended September 30, 2002.

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, Accounting for Asset Retirement Obligations, which requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The Statement also requires that the associated asset retirement costs be capitalized as part of the carrying amount of the long-lived asset. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. The adoption of this Statement is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Table of Contents

In August 2001, the FASB issued SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. This Statement supersedes SFAS No. 121, Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of and APB Opinion No. 30, Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions. Adoption of this Statement, in the fiscal year beginning January 1, 2002, did not have a material impact on the Company's financial position, results of operations or cash flows.

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections. This Statement requires that only certain debt extinguishment transactions be classified as extraordinary items. Additionally, under this Statement, capital leases that are modified so that the resulting agreement is an operating lease shall be accounted for under the sale-leaseback provisions of SFAS No. 98. SFAS No. 145 also includes minor modifications to existing GAAP literature. SFAS No. 145 is generally effective for financial statements issued for fiscal years beginning after May 15, 2002. The adoption of this Statement is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF Issue No. 94-3, Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring). The Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. The Statement is effective for the Company on January 1, 2003 and is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Note 2. Restatement of Financial Statements

During 2002, the Company changed its accounting policies relating to the accrual for certain lease return costs and capitalization of software development costs. In addition, the Company changed its accounting for aircraft purchase commitments assumed by a third party. The Company also made other corrections and certain reclassifications of deferred income taxes and other balance sheet and income statement items, none of which have a significant impact to previously reported equity or net earnings. Because the previous accounting methods and classifications are not considered to be in compliance with GAAP, the Company's previously issued consolidated financial statements for the years ended December 31, 1999, 2000 and 2001, including the interim periods within those years, and for the three and nine months ended September 30, 2002, have been restated. Significant changes are more fully described below.

Leased Aircraft Return Costs

The Company leases many of its aircraft under relatively long-term operating lease agreements. These aircraft are subject to periodic airframe and engine overhauls based on the Company's maintenance program. The Company's previous policy was to capitalize these overhauls and amortize the costs over the estimated lives of the overhauls. Separately, many of the Company's lease agreements contain provisions, which require that at the end of the lease, either certain minimum times remain until the next overhaul or the Company make a cash payment to the lessor. At the inception of the lease, the Company does not know the balance between actual time remaining to the next overhaul and cash payments that will be used to satisfy its return commitments. Under the previous method, the Company accrued the costs of returning leased aircraft, including any cash payments due to lessors and any unamortized overhauls, on a straight-line basis over the lives of the leases. Airframe and engine overhauls are now capitalized and amortized over the

Table of Contents

remaining lease term, if shorter than the life of the overhaul. Additionally, under the new method, since the amount of cash payments by themselves cannot be reasonably predicted at the inception of the lease, the Company will accrue cash payments expected to be made to lessors over the last few years of the lease when probable and estimable.

Internally Developed Software

The Company revised its accounting practices for certain costs of internally developed software. These costs were previously charged to expense as they were incurred. Internally developed software costs are now capitalized and amortized over the estimated lives of the software.

Aircraft Purchase Commitments

The Company has a purchase commitment that may trigger a liability under certain events of default. The Company previously recognized a portion of this commitment, which was funded by a third party as a liability, and related aircraft purchase deposits on its balance sheet. Since the executory contract for the purchase commitment is not an obligation of the Company until the aircraft is delivered, this commitment is disclosed as a purchase commitment and not included in long-term debt or deposits for future flight equipment.

In the Company's filing of its Form 10-Q for the quarterly period ended September 30, 2002, the Company previously restated its financial statements for the three and nine months ended September 30, 2001 and as of December 31, 2001. Subsequently, the Company identified other corrections and certain reclassifications, which have been restated in this filing. Amounts shown as previously reported for September 30, 2001 and December 31, 2001 in the accompanying tables reflect the Company's original reporting of its financial statements as of and for the respective periods.

The effects of the restatement for the three and nine months ended September 30, 2001 is as follows:

	Three Months Ended September 30, 2001		Nine Months Ended September 30, 2001	
	As Previously Reported	Restated	As Previously Reported	Restated
(in millions, except per share amounts)				
Total Operating Revenues	\$583.4	\$587.5	\$1,678.7	\$1,686.7

Shareholders' Equity	\$ 820.3	\$ 851.3	\$ 836.4	\$ 789.1*

* Includes \$51.4 million cumulative effect of the accounting change in connection with the impairment of goodwill upon the adoption of SFAS No. 142.

Note 3. Frequent Flyer Program

Alaska's Mileage Plan liabilities are included under the following balance sheet captions:

	December 31, 2001	September 30, 2002
	(in millions)	
Current Liabilities:		
Other accrued liabilities	\$ 65.7	\$ 79.5
Other Liabilities and Credits:		
Deferred revenue	150.7	171.7
Other liabilities	31.9	32.3
Total	<u>\$248.3</u>	<u>\$283.5</u>

Note 4. Other Assets

At December 31, 2001 and September 30, 2002, other assets included prepaid pension cost of \$98.4 million and \$90.2 million, respectively.

Note 5. Earnings per Share

Earnings per share (EPS) calculations were as follows (in millions except per share amounts). Stock options excluded from the calculation of diluted EPS, because they are antidilutive, represented 2.0 million and 3.1 million shares, respectively, for the three months ended September 30, 2001 and 2002, and 2.3 million and 2.4 million shares, respectively, for the nine months ended September 30, 2001 and 2002.

Note 7. U.S. Government Compensation

In September 2001, the U.S. Government passed the Air Transportation Safety and System Stabilization Act to compensate the airlines for direct and incremental losses as a result of the September 11th terrorist attacks. In the second quarter of 2002, Alaska and Horizon each submitted final applications to the Department of Transportation (DOT) based on each company's losses. During the third quarter of 2002, the DOT completed its review procedures and remitted final compensation payments to Alaska and Horizon of \$0.2 million and \$0.2 million, respectively. These amounts are reflected in the Consolidated Statement of Operations for the three months ended September 30, 2002.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Information

This report may contain forward-looking statements that are based on the best information currently available to management. These forward-looking statements are intended to be subject to the safe harbor protection provided by Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are indicated by phrases such as "will", "should", "the Company believes", "we expect" or any other language indicating a prediction of future events, including without limitation statements relating to the Company's expectations regarding financing new aircraft commitments. There can be no assurance that actual developments will be those anticipated by the Company. Actual results could differ materially from those projected as a result of a number of factors, some of which the Company cannot predict or control. For a discussion of these factors, please see Item 1 of the Company's Annual Report on Form 10-K/A for the year ended December 31, 2001.

As discussed in Note 2 to the consolidated financial statements, in 2002 the Company restated its financial statements for the year ended December 31, 2001 and the interim periods within that year. The Company also restated its consolidated financial statements for the three and nine months ended September 30, 2002. The accompanying management's discussion and analysis gives effect to the restatement.

Results of Operations

Third Quarter 2002 Compared with Third Quarter 2001

Our consolidated net income for the third quarter of 2002 was \$12.5 million, or \$0.47 per share, compared with net income of \$26.2 million, or \$0.99 per share, in 2001. The 2001 results include \$29.1 million (\$18.0 million after tax or \$0.68 per share) of U.S. government compensation. Our consolidated operating income for the third quarter of 2002 was \$25.5 million compared with operating income of \$13.7 million for 2001. Financial and statistical data for Alaska and Horizon is shown on pages 14 and 15. A discussion of this data follows.

Alaska Airlines

Our capacity increased 11.1% during the three months ended September 30, 2002 when compared to the same period in 2001. This increase resulted largely from service to new markets (Seattle to Washington D.C., Boston and Denver; Los Angeles to Cancun and Calgary), partially offset by reduced service in existing markets, especially the Pacific Northwest to Northern California. Traffic grew by 10.4%, while passenger load factor decreased 0.5 percentage points. The new Washington D.C., Boston and Denver markets experienced load factors exceeding the system average. Virtually all other markets experienced reductions in load factor. For 2001, capacity, traffic and load factors were adversely impacted by the September 11th terrorist attacks. Passenger yields decreased 3.9% for the quarter compared to 2001 due to a combination of fewer business passengers, a drop off in demand due to the September 11, 2001 terrorist attacks and the slowing economy, and fare sales offered to stimulate demand. Yields were down in all major markets except the Pacific Northwest to Southern California market. The lower yield combined with the lower load factor resulted in a 4.7% decrease in revenue per available seat mile (ASM). The higher traffic combined with the lower yield resulted in a 6.1% increase in passenger revenue.

Freight and mail revenues decreased 5.8% during the three months ended September 30, 2002 when compared to comparable periods in 2001. This decrease is primarily a result of increases in freight revenues offset by decreases in mail revenues.

Other-net revenues increased 11.2%, due largely to increased revenue related to the sale of miles in Alaska's frequent flyer program, new security fee reimbursement revenue and higher essential air service subsidy rates.

Table of Contents

Total operating expenses increased 5.7% during the three months ended September 30, 2002 when compared to the same period in 2001, while our cost per ASM decreased by 4.9%. Our cost per ASM excluding fuel decreased by 3.7%. Explanations of significant period over period changes in the components of operating expenses are as follows:

Wages and benefits increased \$21.1 million, or 12.8% during the three months ended September 30, 2002 as compared to the same period in 2001. This increase is due principally to increases of \$9.7 million in employee wages and higher pension, medical insurance, and workers compensation costs. Increases in wages resulted from pilot pay increases (11% effective in June 2001 plus 5% effective in May 2002), scale step increases for union employees and annual merit raises for management employees.

Fuel expense decreased 1.5% due to a 9.4% decrease in the cost per gallon of fuel combined with an 8.8% increase in gallons consumed. Fuel hedging saved \$4.6 million during the three months ended September 30, 2002.

Aircraft maintenance expense decreased \$1.3 million or 4.0% during the three months ended September 30, 2002 when compared to the same period in 2001. This decrease is due largely to fewer major engine repairs and overhauls. In the fourth quarter of 2002, the Company expects a 30% increase in maintenance expense when compared to the same period in 2001. This expected increase is a result of several maintenance checks scheduled for the 4th quarter of 2001 that were postponed until first quarter of 2002 while the Company assessed its operating needs in the aftermath of September 11th.

Commission expense decreased 26.2%, despite a 6.1% increase in passenger revenue, due to the elimination of base commissions and the continuing shift to direct sales channels. In June 2002, the Company changed its travel agent commissions program to eliminate base commissions and move to a 100% incentive-based program. This change reduced commissions expense in the third quarter of 2002 by approximately \$7.6 million. During the three months ended September 30, 2002, 54.5% of the Company's ticket sales were made through travel agents, versus 57.7% in 2001. During the three months ended September 30, 2002, 22.6% of total ticket sales were made through Alaska's Internet web site versus 17.5% in 2001.

Landing fees and other rentals increased 16.2%, primarily due to higher rates as a result of airport construction projects, ground rents on our four new routes and 6.6% more departures during the three months ended September 30, 2002 as compared to the same period in 2001.

Other expense increased 12.4% due to higher insurance costs, partially offset by lower costs for property taxes, legal services, uninsured losses, supplies and passenger remuneration costs.

Horizon Air

During the three months ended September 30, 2002, capacity increased 18.4% compared to the same period in 2001. This increase is due principally to service in new markets (San Jose and Portland to Tucson, Sacramento and Portland to Palm Springs, Boise and Portland to Denver, Boise to San Francisco and San Diego). Our traffic grew by 19.0%, and our passenger load factor increased 0.3 percentage points. For 2001, capacity, traffic and load factors were adversely impacted by the September 11th terrorist attacks. For the quarter, passenger yields decreased 7.0% due to a combination of fewer business passengers, a drop off in

Table of Contents

demand due to the September 11th terrorist attacks, an increase in average trip length, and fare sales offered to stimulate demand. The higher traffic combined with the lower yield resulted in a 10.7% increase in passenger revenue.

Freight and mail revenues decreased 26.3% primarily due to lower freight volumes attributable to increased security restrictions and a slower economy. Other-net revenues decreased 27.8%, primarily due to lower levels of manufacturer support received as compensation for delays in delivery of new aircraft.

Operating expenses decreased by \$1.7 million, or 1.5%, during the three months ended September 30, 2002 compared to the same period in 2001. This decrease is due principally to decreases in maintenance expense and fuel expense benefits due to the transition to our new fleet. The decreases in these operating expenses were largely offset by increases in aircraft rent and other expenses. Our cost per ASM decreased by 16.8%, while our cost per ASM excluding fuel decreased by 15.4%. Explanations of significant year-over-year changes in the components of operating expenses are as follows:

Wages and benefits increased 0.8% during the three months ended September 30, 2002 when compared to the same period in 2001. This increase is due principally to increases in average wages and benefits per employee, partially offset by a reduction in the number of employees. Average wages and benefits per employee increased due to a pilot pay increase that was effective in September 2001, scale and step increases for union employees, annual merit raises for management employees, and higher health insurance costs for all employees.

Contracted services increased 31.3% due principally to increased airport security screening costs at all airports, increased outside services costs and ground handling costs at new airports served.

Fuel expense decreased 13.0% primarily due to a 12.9% decrease in the cost per gallon of fuel. Fuel hedging saved \$1.2 million during the three months ended September 30, 2002.

Aircraft maintenance expense decreased 59.8% due principally to the greater use of new aircraft in 2002 and higher expenses in 2001 related to the phasing out of the Fokker F-28 jet aircraft.

Aircraft rent increased 31.7% due to higher rental rates incurred on new Dash 8-400 and CRJ 700 aircraft commencing in mid-2001 through mid-2002.

Depreciation and amortization expense decreased 28.4%, primarily due to the phasing out of the Fokker F-28 jet aircraft in 2001.

Other expense increased 44.8%, primarily due to higher expenditures for insurance and property taxes, partly offset by lower personnel expenses and supply costs.

Consolidated Nonoperating Income (Expense)

Consolidated nonoperating income (expense) during the three months ended September 30, 2002 and 2001 includes \$0.4 million and \$29.1 million, respectively of U.S. government compensation received in connection with the September 11th terrorists attacks. Excluding these amounts, net nonoperating items were \$6.6 million expense during the three months ended September 30, 2002 compared to \$2.9 million expense during the same period in 2001. The \$3.7 million increase was primarily due to losses resulting from hedge ineffectiveness on fuel hedging contracts.

Table of Contents

Nine Months 2002 Compared with Nine Months 2001

The consolidated loss before accounting change for the nine months ended September 30, 2002 was \$24.1 million, or \$0.91 per share compared with a net loss of \$6.0 million, or \$0.23 per share during the same period in 2001. The consolidated operating loss for the nine months ended September 30, 2002 was \$29.1 million compared with an operating loss of \$31.3 million during the same period in 2001. A discussion of operating results for the two airlines follows.

Alaska Airlines

The operating loss widened by \$10.0 million to \$20.5 million during the nine months ended September 30, 2002. Capacity increased 5.8% for the first nine months of 2002 compared to 2001. This increase is attributable to service to new markets which commenced in late 2001 (Seattle to Washington D.C. and Los Angeles to Cancun), the first quarter of 2002 (Los Angeles to Calgary), and in April 2002 (Seattle to Denver and Boston). The increase was partially offset by reduced service in existing markets, primarily the Pacific Northwest to Southern and Northern California markets. Traffic increased by 5.3% compared to 2001, and our passenger load factor decreased 0.4 percentage points. The new Washington D.C., Boston and Denver markets have experienced load factors which exceed the system average year to date. Passenger yields decreased 3.7% during the nine months ended September 30, 2002 compared to the same period in 2001, due to a combination of fewer business passengers, a drop off in demand due to the September 11th terrorist attacks, the slowing economy and fare sales offered to stimulate demand. The lower yield combined with the lower load factor resulted in a 3.7% decrease in revenue per ASM. The higher traffic combined with the lower yield resulted in a 1.4% increase in passenger revenue.

Freight and mail revenue decreased 8.1% due to lower freight volumes attributable to increased security restrictions and a slower economy.

Other-net revenues increased 22.4% primarily due to increased revenue related to the sale of miles in Alaska's frequent flyer program, new security fee reimbursement revenue and higher essential air service subsidy rates.

Total operating expenses increased 2.6% during the nine months ended September 30, 2002 when compared to the same period in 2001. Cost per ASM decreased 3.1% and cost per ASM excluding fuel decreased slightly (.2%). Explanations of significant year-over-year changes in the components of operating expenses are as follows:

Wages and benefits increased \$49.1 million, or 10.3% during the nine months ended September 30, 2002 as compared to the same period in 2001. This increase is due principally to an increase in average wages and benefits per employee combined with an overall decrease in the number of employees. Average wages and benefits per employee increased due to pilot pay increases (11% effective in June 2001 plus 5% effective in May 2002), scale and step increases for union employees, annual merit raises for management employees, and higher pension and health insurance costs for all employees.

Fuel expense decreased 13.5% due to a 16.3% decrease in the cost per gallon of fuel combined with a 3.3% increase in gallons consumed. Fuel hedging saved \$5.4 million during the nine months ended September 30, 2002.

Commission expense decreased 19.4%, despite a 1.4% increase in passenger revenue, due to elimination of base commissions and the continuing shift to direct sales channels. In June 2002, the Company changed its travel agent commissions program to eliminate base commissions and move to a 100% incentive-based program. During the nine months ended September 30, 2002, 57.0% of the

Table of Contents

Company's ticket sales were made through travel agents, versus 60.5% during the same period in 2001. During the nine months ended September 30, 2002, 20.6% of total ticket sales were made through Alaska's Internet web site versus 16.0% during the same period in 2001.

Depreciation and amortization increased 12.9%, due principally to equipment added during the year. In addition, Alaska owns one more 737-900 and 737-200 Combi this year when compared to the same period in 2001.

Landing fees and other rentals increased 16.2%, primarily due to higher rates as a result of airport construction projects, ground rents on our four new routes and more departures during the nine months ended September 30, 2002 as compared to the same period in 2001.

Other expense increased 2.2% due to higher insurance costs, partially offset by lower costs for property taxes, legal expenses, uninsured losses, supplies, personnel and passenger remuneration costs.

Horizon Air

During the nine months ended September 30, 2002, capacity increased 7.2% when compared to the same period in 2001. This increase is due principally to service in new markets (San Jose and Portland to Tucson, Sacramento and Portland to Palm Springs, Boise and Portland to Denver, Boise to San Francisco and San Diego). Traffic grew by 7.4% and our passenger load factor slightly increased by 0.1 percentage points. Passenger yields decreased by 9.8% due to a combination of fewer business passengers, a drop off in demand due to the September 11 terrorist attacks, an increase in average trip length and fare sales offered to stimulate demand. Lower passenger yield combined with higher passenger traffic resulted in a slight decrease in passenger revenue of 3.1% during the nine months ended September 30, 2002 when compared to the same period in 2001.

Other-net revenues increased 5.1% primarily due to higher levels of manufacturer support received as compensation for delays in delivery of new aircraft during the first quarter of 2002.

Operating expenses decreased by \$23.5 million, or 6.8%, during the nine months ended September 30, 2002 compared to the same period in 2001. This decrease is due principally to decreases in maintenance expense and fuel expense due to the transition to our new fleet. These decreases in operating expenses were largely offset by increases in aircraft rent and other expenses. Our cost per ASM decreased by 13.1%, while our cost per ASM excluding fuel decreased by 10.1%. Explanations of significant year-over-year changes in the components of operating expenses are as follows:

Wages and benefits increased 1.3% during the three months ended September 30, 2002 when compared to the same period in 2001. This increase is due principally to increases in average wages and benefits per employee, partially offset by a reduction in the number of employees. Average wages and benefits per employee increased due to a pilot pay increase that was effective in September 2001, scale and step increases for union employees, annual merit raises for management employees, and higher health insurance costs for all employees.

Fuel expense decreased 28.1% due to a 17.9% decrease in the cost per gallon of fuel and a 12.5% decrease in gallons consumed. The fuel consumption rate decreased due to the use of more fuel-efficient Dash 8-400 and CRJ 700 aircraft. Additionally, fuel hedging saved \$1.4 million during the nine months ended September 30, 2002.

Aircraft maintenance expense decreased 58.7% due principally to the greater use of new aircraft in

Table of Contents

2002 and higher expenses in 2001 related to the phasing out of the Fokker F-28 jet aircraft.

Aircraft rent increased 32.7% due to higher rental rates incurred on new Dash 8-400 and CRJ 700 aircraft commencing in mid-2001 through mid-2002.

Other expense increased 37.4%, primarily due to higher expenditures for insurance, property taxes and legal fees, partly offset by lower passenger remuneration, supplies and communication costs.

Consolidated Nonoperating Income (Expense)

Consolidated nonoperating income (expense) during the nine months ended September 30, 2002 and 2001 includes \$0.5 million and \$29.1 million, respectively, of U.S. government compensation received in connection with the September 11th terrorist attacks. Excluding these amounts, net nonoperating items were \$8.3 million expense in 2002 compared to \$7.0 million expense in 2001. The \$1.3 million net change was due principally to lower interest income and higher interest expense resulting from new debt incurred in the past year, partially offset by gains resulting from hedge ineffectiveness on certain fuel hedging contracts in 2002.

Consolidated Income Tax Benefit (Expense)

Accounting standards require us to provide for income taxes each quarter based on our estimate of the effective tax rate for the full year. The volatility of airfares and fuel prices and the seasonality of our business make it difficult to accurately forecast full-year pretax results. In addition, a relatively small change in pretax results can cause a significant change in the effective tax rate due to the magnitude of nondeductible expenses, such as employee per diem costs. In estimating the 34.7% tax rate for the first nine months of 2002, we considered a variety of factors, including the U.S. federal rate of 35%, estimates of nondeductible expenses and state income taxes and our forecast of pretax loss for the full year. We evaluate this effective rate each quarter and make adjustments if necessary.

Critical Accounting Policies

For more information on the Company's critical accounting policies, see Item 7 of the Company's Annual Report on Form 10-K/A for the year ended December 31, 2001. In 2002, the Company revised its accounting practices with respect to aircraft lease return costs. This change is more fully described in Note 2 to the consolidated financial statements.

Liquidity and Capital Resources

The table below presents the major indicators of financial condition and liquidity.

	December 31, 2001 Restated	September 30, 2002 Restated	Change
(In millions, except debt-to-capital and per share amounts)			
Cash and marketable securities	\$ 660.6	\$ 661.0	\$ 0.4
Working capital	167.0	206.8	39.8
Long-term debt and capital lease obligations, net of current	852.2	843.7	(8.5)
Shareholders' equity	851.3	789.1	(62.2)
Book value per common share	\$ 32.09	\$ 29.72	\$(2.37)
Debt-to-capital	50%:50%	52%:48%	NA
Debt-to-capital assuming aircraft operating leases are capitalized at seven times annualized rent	72%:28%	74%:26%	NA

Table of Contents

The Company's cash and marketable securities portfolio increased \$0.4 million during the first nine months of 2002. Operating activities provided \$117.1 million of cash during this period. Additional cash was provided by the issuance of \$25.5 million of new debt. Cash outflows included \$70.1 million of capital expenditures, for spare parts, airframe and engine overhauls and \$36.8 million for purchases of new aircraft. In addition, the Company made \$26.8 million of debt repayments.

Shareholders' equity decreased \$62.2 million due principally to the net loss of \$75.5 million, partially offset by an increase in accumulated other comprehensive income of \$13.1 million

Financing Activities During the first nine months of 2002, Horizon added three Dash 8-400 and six CRJ 700 aircraft to its operating fleet. The aircraft were financed with a combination of U.S. leveraged leases and single investor leases with terms of approximately 16.5 years. Future minimum lease payments under these nine leases total \$221.2 million. Because these aircraft were financed at delivery, they are not included in the capital expenditures amount stated above.

Aircraft Purchase Commitments At September 30, 2002, the Company had firm orders for 29 aircraft requiring aggregate payments of approximately \$587 million, as set forth below. In addition, Alaska has options to acquire 24 more B737s, and Horizon has options to acquire 15 Dash 8-400s and 25 CRJ 700s. Alaska expects to finance five of the B737-700 deliveries in 2003 with operating leases and the remainder of the new planes with long-term debt or internally generated cash. Horizon expects to finance its new aircraft with operating leases.

Aircraft	Delivery Period - Firm Orders				
	2002	2003	2004	2005	Total
Boeing 737-700		6			6
Boeing 737-900		5	3		8
Bombardier CRJ 700	1	2	6	6	15
Total	1	13	9	6	29
Payments (Millions)	\$51	\$235	\$194	\$107	\$587

The Company has a purchase commitment that may trigger a liability under certain events of default. The Company previously recognized a portion of this commitment, which was funded by a third party, as a liability and related aircraft purchase deposits on its balance sheet. Since the executory contract for the purchase commitment is not an obligation of the Company until the aircraft is delivered, this commitment is now disclosed as a purchase commitment and not included in long-term debt or deposits for future flight equipment. See Note 2 to the consolidated financial statements.

New Accounting Standards Effective January 1, 2002, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets. Under this Statement the Company's goodwill will no longer be amortized, but instead will be tested for impairment on a minimum of an annual basis. The impact of discontinuing amortization of existing goodwill has resulted in an increase of net income of \$1.5 million for the nine months ended September 30, 2002. During the second quarter of 2002, the Company completed the first step of its impairment test related to its \$51.4 million of goodwill. The test was performed using Alaska and Horizon as separate reporting units. In the fourth quarter of 2002, the Company completed the second step of its impairment test and determined that all of the Company's goodwill was impaired. As a result, the Company recorded a one-time, non-cash charge, effective January 1, 2002, of \$51.4

Table of Contents

million (\$12.5 million Alaska and \$38.9 million Horizon) to write-off all of its goodwill. This charge is reflected as a cumulative effect of accounting change in the Consolidated Statement of Operations for the nine months ended September 30, 2002.

In June 2001, the Financial Accounting Standards Board (FASB) issued SFAS No. 143, *Accounting for Asset Retirement Obligations*, which requires that the fair value of a liability for an asset retirement obligation be recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The Statement also requires that the associated asset retirement costs be capitalized as part of the carrying amount of the long-lived asset. This Statement is effective for financial statements issued for fiscal years beginning after June 15, 2002. The adoption of this Statement is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections*. This Statement requires that only certain debt extinguishment transactions be classified as an extraordinary item. Additionally, under this Statement, capital leases that are modified so that the resulting agreement is an operating lease, shall be accounted for under the sale-leaseback provisions of SFAS No. 98. SFAS No. 145 also includes minor modifications to existing U.S. Generally Accepted Accounting Principles literature. SFAS No. 145 is generally effective for financial statements issued for fiscal years beginning after May 15, 2002. The adoption of this statement is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. This Statement addresses financial accounting and reporting for costs associated with exit or disposal activities and nullifies EITF Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. The Statement requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred. The Statement is effective for the Company on January 1, 2003 and is not expected to have a material impact on the Company's financial position, results of operations or cash flows.

ITEM 3. Quantitative and Qualitative Disclosure about Market Risk

The Company utilizes financial derivative instruments as hedges to decrease its exposure to jet fuel price increases. The Company accounts for its fuel hedge derivative instruments as cash flow hedges as defined by SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended. At September 30, 2002, the Company had hedge agreements in place to hedge approximately 40% of its 2002 and 35% of its 2003 expected jet fuel requirements. Under SFAS No. 133, all changes in fair value that are considered to be effective are recorded in accumulated other comprehensive income (loss) until the underlying jet fuel is consumed. The fair value of the Company's hedge instruments at September 30, 2002 was a net asset of approximately \$21.6 million, which is recorded in prepaid expenses and other assets in the consolidated balance sheet as of September 30, 2002.

During the three and nine months ended September 30, 2002, the Company recognized approximately \$5.8 million and \$6.8 million in realized hedging gains which are reflected in aircraft fuel in the consolidated statements of operations. During the three and nine months ended September 30, 2002, the Company recorded \$2.0 million expense and \$6.5 million income, respectively, related to the ineffectiveness of the Company's hedges. These amounts are recorded as non-operating income (expense) in other-net in the consolidated statements of operations.

As of September 30, 2002, the Company had unrealized hedging gains of \$11.1 million (net of taxes of \$6.5 million). This amount is reflected in accumulated other comprehensive income (loss) in the consolidated

Table of Contents

balance sheet as of September 30, 2002.

ITEM 4. Controls and Procedures

In the 90-day period before the filing of this report, the chief executive officer and chief financial officer of the Company (collectively, the certifying officers) have evaluated the effectiveness of the Company's disclosure controls and procedures. These disclosure controls and procedures are designed to ensure that the information required to be disclosed by the Company in its periodic reports filed with the Securities and Exchange Commission (the Commission) is recorded, processed, summarized and reported, within the time periods specified by the Commission's rules and forms, and that the information is communicated to the certifying officers on a timely basis.

The certifying officers concluded, based on their evaluation, that the Company's disclosure controls and procedures are effective for the Company, taking into consideration the size and nature of the Company's business and operations.

No significant changes in the Company's internal controls or in other factors were detected that could significantly affect the Company's internal controls subsequent to the date when the internal controls were evaluated.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

Flight 261 Litigation

Alaska is a defendant in a number of lawsuits relating to the loss of Flight 261 on January 31, 2000. Representatives of all 88 passengers and crew on board have filed cases against Alaska, the Boeing Company, and others. The suits seek unspecified compensatory and punitive damages. In May 2001, the judge presiding over the majority of the cases ruled that punitive damages are not available against Alaska. Alaska has settled a number of these cases and continues in its efforts to settle the remaining ones. Consistent with industry standards, the Company maintains insurance against aircraft accidents.

Management believes the ultimate disposition of this matter is not likely to materially affect the Company's financial position or results of operations. This forward-looking statement is based on management's current understanding of the relevant law and facts; it is subject to various contingencies, including the potential costs and risks associated with litigation and the actions of judges and juries.

The Company is also a party to other ordinary routine litigation incidental to its business and with respect to which no material liability is expected.

ITEM 5. Other Information

Employees

Alaska has two major labor contracts becoming amendable in 2002. Negotiations are continuing with the International Association of Machinists and Aerospace Workers regarding the Clerical, Office and Passenger Service (COPS) employee group. The COPS contract became amendable on October 29, 2002. During the third quarter of 2002, negotiations started with the Aircraft Mechanics Fraternal Association (AMFA) regarding the mechanics, inspectors and cleaners employee group. The AMFA contract is amendable December 25, 2002.

Alaska has a labor contract with the Transit Workers Union (TWU), which covers 29 dispatchers. The contract was amendable on August 9, 2002. During the third quarter of 2002, the Company and TWU agreed to a five-year contract term on all issues except hourly wage rate and certain wage-related issues. By agreement

Table of Contents

of both parties, those issues were submitted to interest arbitration to determine wages for a three-year period. The Company hopes to have resolution to these issues in the fourth quarter of 2002.

Horizon is continuing negotiations with the Association of Flight Attendants regarding the flight attendant employee group, whose contract is amendable January 28, 2003. During the third quarter of 2002, negotiations started with AMFA (that recently replaced the Transport Workers Union) regarding the mechanics and related classifications employee group, whose contract is amendable December 15, 2002.

ITEM 6. Exhibits and Reports on Form 8-K

Exhibits

Exhibit 99.1- Certification of Chief Executive Officer Pursuant to 18 U.S.C. Section 1350

Exhibit 99.2- Certification of Chief Financial Officer Pursuant to 18 U.S.C. Section 1350

Reports on Form 8-K

On July 3, 2002, August 22, 2002 and September 16, 2002, reports on Form 8-K were filed discussing estimated financial results under regulation FD disclosure. On August 20, 2002, a report on Form 8-K was filed disclosing the CEO and CFO sworn statements required by SEC Order 4-460.
