The Toronto-Dominion Bank

\$n

Market Linked Securities - Leveraged Upside Participation to a Cap and Contingent Downside

Principal at Risk Securities Linked to the S&P 500[®] Index due March 7, 2022

The Toronto-Dominion Bank (“TD” or “we”) is offering the Principal at Risk Securities (the “Securities”) linked to the S&P 500[®] Index (the “Reference Asset”) described below.

If the level of the Reference Asset increases from the Initial Level to the Final Level, at maturity, investors will receive the Principal Amount plus a positive return reflecting 150% leveraged participation in the positive return of the Reference Asset, subject to the Maximum Redemption Amount of 133% to 138% of the Principal Amount (to be determined on Pricing Date). If the level of the Reference Asset remains flat or decreases from the Initial Level to the Final Level but the decrease is not more than 30%, at maturity, investors will receive only the Principal Amount. However, if the level of the Reference Asset decreases from the Initial Level to the Final Level by more than 30%, at maturity, investors will have full exposure to the decrease in the level of the Reference Asset and will lose more than

30%, and possibly all, of the Principal Amount. Specifically, investors will lose 1% of the Principal Amount for each 1% decrease from the Initial Level to the Final Level and may lose all of the Principal Amount. **Any payments on the Securities are subject to our credit risk.**

The Securities are unsecured and are not savings accounts or insured deposits of a bank. The Securities are not insured or guaranteed by the Canada Deposit Insurance Corporation, the U.S. Federal Deposit Insurance Corporation or any other governmental agency or instrumentality of Canada or the United States.

The Securities will not be listed or displayed on any securities exchange or electronic communications network. **The Securities will not bear interest.**

The Payment at Maturity will be greater than the Principal Amount only if the Percentage Change (as defined herein) is greater than zero. The Securities do not guarantee the return of the Principal Amount and investors may lose all of their investment in the Securities.

The Securities have complex features and investing in the Securities involves a number of risks. See “Additional Risk Factors” beginning on page P-8 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement MLN-EI-1 dated June 30, 2016 (the “product prospectus supplement”) and “Risk Factors” beginning on page 1 of the prospectus dated June 30, 2016 (the “prospectus”).

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that this pricing supplement, the product prospectus supplement or the prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

We will deliver the Securities in book-entry only form through the facilities of The Depository Trust Company on or about September 6, 2018, against payment in immediately available funds.

The estimated value of the Securities on the Pricing Date is expected to be between \$920.00 and \$960.00 per Security, as discussed further under “Additional Risk Factors — Estimated Value” beginning on page P-10 and “Additional Information Regarding Our Estimated Value of the Securities” on page P-27, respectively. The estimated value is expected to be less than the public offering price of the Securities.

	Public Offering Price ¹	Underwriting Discount ²	Proceeds to TD
Per Security	\$1,000.00	\$31.50	\$968.50
Total	\$	\$	\$

¹ Certain dealers who purchase the Securities for sale to certain fee-based advisory accounts may forego some or all of their selling concessions, fees or commissions. The price for investors purchasing the Securities in these accounts may be as low as \$968.50 (96.85%) per Security.

² The Agents may receive a commission of up to \$31.50 (3.15%) per Security and may use a portion of that commission to allow selling concessions to other dealers in connection with the distribution of the Securities, or will offer the Securities directly to investors. The Agents may resell the Securities to other securities dealers at the Principal Amount less a concession not in excess of \$20.00 per Security. Such securities dealers may include Wells Fargo Advisors (“WFA”, the trade name of the retail brokerage business of Wells Fargo Clearing Services, LLC and Wells Fargo Advisors Financial Network, LLC), an affiliate of Wells Fargo Securities, LLC (“Wells Fargo Securities”). The other dealers may forego, in their sole discretion, some or all of their selling concessions. In addition to the selling

concession allowed to WFA, Wells Fargo Securities will pay \$0.75 per Security of the underwriting discount to WFA as a distribution expense fee for each Security sold by WFA. TD will reimburse TD Securities (USA) LLC (“TDS”) for certain expenses in connection with its role in the offer and sale of the Securities, and TD will pay TDS a fee in connection with its role in the offer and sale of the Securities. See “Supplemental Plan of Distribution (Conflicts of Interest) –Selling Restrictions” on page P-25 of this pricing supplement.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-1

Summary

The information in this “Summary” section is qualified by the more detailed information set forth in this pricing supplement, the product prospectus supplement and the prospectus.

Issuer: The Toronto-Dominion Bank
Issue: Senior Debt Securities
Type of Security: Market Linked Securities - Leveraged Upside Participation to a Cap and Contingent Downside
Term: Approximately 3.5 years
Reference Asset: S&P 500® Index (Bloomberg Ticker: SPX)
CUSIP / ISIN: 89114QPY8 / US89114QPY88
Agents: TDS and Wells Fargo Securities. The Agents may receive a commission of up to \$31.50 and may resell the Securities to other securities dealers, including securities dealers acting as custodians, at the Principal Amount less a concession of not in excess of \$20.00 per Security. Such securities dealers may include WFA, an affiliate of Wells Fargo Securities. In addition to the concession allowed to WFA, Wells Fargo Securities will pay \$0.75 per Security of the underwriting discount to WFA as a distribution expense fee for each Security sold by WFA.
Currency: U.S. Dollars
Minimum Investment: \$1,000 and minimum denominations of \$1,000 in excess thereof.
Principal Amount: \$1,000 per Security
Pricing Date: August 31, 2018
Issue Date: September 6, 2018, which is three Business Days following the Pricing Date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), trades in the secondary market generally are required to settle in two Business Days (T+2), unless the parties to a trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Securities in the secondary market on any date prior to two Business Days before delivery of the Securities will be required, by virtue of the fact that each Security initially will settle in three Business Days (T+3), to specify alternative settlement arrangements to prevent a failed settlement of the secondary market trade. See “Plan of Distribution” in the prospectus.
Valuation Date: February 28, 2022, subject to postponement for market disruption events and non-trading days, as described under “Additional Terms of Your Securities—Market Disruption Events” in this pricing supplement.
Maturity Date: March 7, 2022. If the Valuation Date is postponed, the Maturity Date will be the later of (i) March 7, 2022 and (ii) the third business day after the postponed Valuation Date.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC

P-2

If the Final Level is greater than the Initial Level (the Percentage Change is **positive**), then an investor will receive an amount per Security equal to the lesser of:

- (i) Principal Amount + (Principal Amount x Percentage Change x Leverage Factor); and
- (ii) the Maximum Redemption Amount.

If the Final Level is equal to or less than the Initial Level, but greater than or equal to the Threshold Level (the Percentage Change is 0% or **negative but not below -30%**), then an investor will receive an amount per Security equal to:

Principal Amount.

Payment at
Maturity:

If the Final Level is less than the Threshold Level (the Percentage Change is **negative and below -30%**), then an investor will receive less than the Principal Amount, if anything, calculated using the following formula:

Principal Amount + Principal Amount x Percentage Change.

If the Final Level is less than the Threshold Level, investors will have full exposure to the decrease in the level of the Reference Asset and will lose more than 30%, and possibly all, of the Principal Amount. Specifically, investors will lose 1% of the Principal Amount for each 1% decrease from the Initial Level to the Final Level and may lose all of the Principal Amount.

All amounts used in or resulting from any calculation relating to the Securities, including the Payment at Maturity, will be rounded upward or downward as appropriate, to the nearest cent.

Leverage
Factor:

150%

Maximum
Redemption
Amount:

The Maximum Redemption Amount will be determined on the Pricing Date and will be within the range of 133% to 138% of the Principal Amount (or \$1,330 to \$1,380 per Security). As a result, the maximum return on the Securities will be 33% to 38% of the Principal Amount (assuming a public offering price of \$1,000 per Security).

Threshold
Level:

A level that will be equal to 70% of the Initial Level, to be determined on the Pricing Date

Percentage
Change:

(Final Level – Initial Level) / Initial Level, expressed as a percentage

Initial Level:

The closing level of the Reference Asset on the Pricing Date

Final Level:

The closing level of the Reference Asset on the Valuation Date

Closing Level of
the Reference
Asset:

The closing level of the Reference Asset will be the official closing level of the Reference Asset or any successor index (as defined in the accompanying product prospectus supplement) published by the Index Sponsor (as defined in the accompanying product prospectus supplement) on any trading day for the Reference Asset.

Business Day:

Any day that is a Monday, Tuesday, Wednesday, Thursday or Friday that is neither a legal holiday nor a day on which banking institutions are authorized or required by law to close in New York City or Toronto.

Trading Day:

For purposes of the Securities, the definition of “trading day” set forth in the product prospectus supplement is superseded. For purposes of the Securities, a “trading day” means a day, as determined by the Calculation Agent, on which (i) the relevant stock exchanges with respect to each security

underlying the Reference Asset are scheduled to be open for trading for their respective regular trading sessions and (ii) each related futures or options exchange is scheduled to be open for trading for its regular trading session.

The “relevant stock exchange” for any security underlying the Reference Asset means the primary exchange or quotation system on which such security is traded, as determined by the Calculation Agent. The “related futures or options exchange” for the Reference Asset means an exchange or quotation system where trading has a material effect (as determined by the Calculation Agent) on the overall market for futures or options contracts relating to the Reference Asset.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-3

U.S. Tax Treatment: By purchasing a Security, each holder agrees, in the absence of a statutory or regulatory change or an administrative determination or judicial ruling to the contrary, to characterize the Securities, for U.S. federal income tax purposes, as pre-paid derivative contracts with respect to the Reference Asset. Based on certain factual representations received from us, in the opinion of our special U.S. tax counsel, Cadwalader, Wickersham & Taft LLP, it is reasonable to treat the Securities in the manner described above. However, because there is no authority that specifically addresses the tax treatment of the Securities, it is possible that your Securities could alternatively be treated for tax purposes as a single contingent payment debt instrument, or pursuant to some other characterization and the timing and character of your income from the Securities could differ materially and adversely from the treatment described above, as described further below under “Supplemental Discussion of U.S. Federal Income Tax Consequences” and in the product prospectus supplement under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.

Canadian Tax Treatment: Please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences,” which applies to the Securities.

Calculation Agent: TD

Listing: The Securities will not be listed or displayed on any securities exchange or electronic communications network.

Clearance and Settlement: DTC global (including through its indirect participants Euroclear and Clearstream, Luxembourg, as described under “Forms of the Debt Securities” and “Book-Entry Procedures and Settlement” in the prospectus).

The Pricing Date, the Issue Date, the Valuation Date and the Maturity Date are subject to change. These dates will be set forth in the final pricing supplement that will be made available in connection with sales of the Securities.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-4

Investor Considerations

We have designed the Securities for investors who:

- § seek 150% exposure to the upside performance of the Reference Asset if the Final Level is greater than the Initial Level, subject to the Maximum Redemption Amount of 133% to 138% (to be determined on the Pricing Date) of the Principal Amount;
- § desire a payment equal to the Principal Amount at maturity if the Final Level is equal to or greater than the Threshold Level (the Percentage Change is 0% or negative, but not below -30%);
- § understand that if the Final Level is less than the Threshold Level, they will have full exposure to the decrease in the level of the Reference Asset and will lose more than 30%, and possibly all, of the Principal Amount;
- § are willing to forgo interest payments on the Securities and dividends on securities comprising the Reference Asset (the "Reference Asset Constituents");
- § are willing to accept the credit risk of TD;
- § seek exposure to the Reference Asset generally and the Reference Asset Constituents specifically; and
- § are willing to hold the Securities until maturity.

The Securities are not designed for, and may not be a suitable investment for, investors who:

- § seek a liquid investment or are unable or unwilling to hold the Securities to maturity;
- § seek full return of the Principal Amount at maturity and are unwilling to accept the risk that, if the Final Level is less than the Threshold Level, they will lose more than 30%, and possibly all, of the Principal Amount;
- § seek uncapped exposure to the upside performance of the Reference Asset;
- § are unwilling to purchase securities with an estimated value that, as of the Pricing Date, is lower than the public offering price and that may be as low as the lower estimated value set forth on the cover hereof;
- § seek current income in the form of interest payments on the Securities or dividends on the Reference Asset Constituents;
- § seek exposure to the Reference Asset but are unwilling to accept the risk/return trade-offs inherent in the Payment at Maturity for the Securities;
- § are unwilling to accept the credit risk of TD;
- § do not seek exposure to the Reference Asset generally or the Reference Asset Constituents specifically; or
- § prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

Additional Terms of Your Securities

You should read this pricing supplement together with the prospectus, as supplemented by the product prospectus supplement, relating to our Senior Debt Securities, of which these Securities are a part. Capitalized terms used but not defined in this pricing supplement will have the meanings given to them in the product prospectus supplement. In the event of any conflict the following hierarchy will govern: first, this pricing supplement; second, the product prospectus supplement; and last, the prospectus. ***The Securities vary from the terms described in the product prospectus supplement in several important ways. You should read this pricing supplement carefully.***

This pricing supplement, together with the documents listed below, contains the terms of the Securities and supersedes all prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Additional Risk Factors” beginning on page P-8 of this pricing supplement, “Additional Risk Factors Specific to the Notes” beginning on page PS-5 of the product prospectus supplement and “Risk Factors” on page 1 of the prospectus, as the Securities involve risks not associated with conventional debt securities. We urge you to consult your investment, legal, tax, accounting and other advisors before you invest in the Securities. You may access these documents on the Securities and Exchange Commission (the “SEC”) website at www.sec.gov as follows (or if that address has changed, by reviewing our filings for the relevant date on the SEC website):

§

Prospectus dated June 30, 2016:

<https://www.sec.gov/Archives/edgar/data/947263/000119312516638441/d162493d424b3.htm>

§ Product Prospectus Supplement MLN-EI-1 dated June 30, 2016:

https://www.sec.gov/Archives/edgar/data/947263/000089109216015847/e70323_424b2.htm

Our Central Index Key, or CIK, on the SEC website is 0000947263. As used in this pricing supplement, the “Bank,” “we,” “us,” or “our” refers to The Toronto-Dominion Bank and its subsidiaries. Alternatively, The Toronto-Dominion Bank, any agent or any dealer participating in this offering will arrange to send you the product prospectus supplement and the prospectus if you so request by calling 1-855-303-3234.

Market Disruption Events. For purposes of the Securities, the definition of “market disruption event” and the postponement provisions set forth in the product prospectus supplement are superseded. For purposes of the Securities, a “market disruption event” with respect to the Reference Asset means, any of the following events as determined by the Calculation Agent in its sole discretion:

- (A) The occurrence or existence of a material suspension of or limitation imposed on trading by the relevant stock exchanges or otherwise relating to securities which then comprise 20% or more of the level of the Reference Asset or any successor index at any time during the one-hour period that ends at the close of trading on that day, whether by reason of movements in price exceeding limits permitted by those relevant stock exchanges or otherwise.
- (B) The occurrence or existence of a material suspension of or limitation imposed on trading by any related futures or options exchange or otherwise in futures or options contracts relating to the Reference Asset or any successor index on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on that day, whether by reason of movements in price exceeding limits permitted by the related futures or options exchange or otherwise.
- (C) The occurrence or existence of any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, securities that then comprise 20% or more of the level of the Reference Asset or any successor index on their relevant stock exchanges at any

time during the one-hour period that ends at the close of trading on that day.

(D) The occurrence or existence of any event, other than an early closure, that materially disrupts or impairs the ability of market participants in general to effect transactions in, or obtain market values for, futures or options contracts relating to the Reference Asset or any successor index on any related futures or options exchange at any time during the one-hour period that ends at the close of trading on that day.

(E) The closure on any exchange business day of the relevant stock exchanges on which securities that then comprise 20% or more of the level of the Reference Asset or any successor index are traded or any related futures or options exchange prior to its scheduled closing time unless the earlier closing time is announced by the relevant stock exchange or related futures or options exchange, as applicable, at least one hour prior to the earlier of (1) the actual closing time for the regular trading session on such relevant stock exchange or related futures or options exchange, as applicable, and (2) the submission deadline for orders to be entered into the relevant stock exchange or related futures or options exchange, as applicable, system for execution at such actual closing time on that day.

(F) The relevant stock exchange for any security underlying the Reference Asset or successor index or any related futures or options exchange fails to open for trading during its regular trading session.

For purposes of determining whether a market disruption event has occurred:

- (1) the relevant percentage contribution of a security to the level of the Reference Asset or any successor index will be based on a comparison of (x) the portion of the level of such index attributable to that security and (y) the overall level of the Reference Asset or successor index, in each case immediately before the occurrence of the market disruption event;

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-6

the “close of trading” on any trading day for the Reference Asset or any successor index means the scheduled closing time of the relevant stock exchanges with respect to the securities underlying the Reference Asset or successor index on such trading day; provided that, if the actual closing time of the regular trading session of any such relevant stock exchange is earlier than its scheduled closing time on such trading day, then (x) for purposes of clauses (A) and (C) of the definition of “market disruption event” above, with respect to any security underlying the Reference Asset or successor index for which such relevant stock exchange is its relevant stock exchange, the “close of trading” means such actual closing time and (y) for purposes of clauses (B) and (D) of the definition of “market disruption event” above, with respect to any futures or options contract relating to the Reference Asset or successor index, the “close of trading” means the latest actual closing time of the regular trading session of any of the relevant stock exchanges, but in no event later than the scheduled closing time of the relevant stock exchanges;

(2) the “scheduled closing time” of any relevant stock exchange or related futures or options exchange on any trading day for the Reference Asset or any successor index means the scheduled weekday closing time of such relevant stock exchange or related futures or options exchange on such trading day, without regard to after hours or any other trading outside the regular trading session hours; and

(3) an “exchange business day” means any trading day for the Reference Asset or any successor index on which each relevant stock exchange for the securities underlying the Reference Asset or any successor index and each related futures or options exchange are open for trading during their respective regular trading sessions, notwithstanding any such relevant stock exchange or related futures or options exchange closing prior to its scheduled closing time.

(4) If the originally scheduled Valuation Date is not a trading day, the Valuation Date will be postponed to the next succeeding trading day. If a market disruption event occurs or is continuing on the Valuation Date, then the Valuation Date will be postponed to the first succeeding trading day on which a market disruption event has not occurred and is not continuing; however, if such first succeeding trading day has not occurred as of the eighth trading day after the originally scheduled Valuation Date, that eighth trading day shall be deemed to be the Valuation Date. If the Valuation Date has been postponed eight trading days after the originally scheduled Valuation Date and a market disruption event occurs or is continuing on such eighth trading day, the Calculation Agent will determine the closing level of the Reference Asset on such eighth trading day in accordance with the formula for and method of calculating the closing level of the Reference Asset last in effect prior to commencement of the market disruption event, using the closing price (or, with respect to any relevant security, if a market disruption event has occurred with respect to such security, its good faith estimate of the value of such security at the scheduled closing time of the relevant stock exchange for such security or, if earlier, the actual closing time of the regular trading session of such relevant stock exchange) on such date of each security included in the Reference Asset. As used herein, “closing price” means, with respect to any security on any date, the relevant stock exchange traded or quoted price of such security as of the scheduled closing time of the relevant stock exchange for such security or, if earlier, the actual closing time of the regular trading session of such relevant stock exchange.

Unavailability of the Level of the Reference Asset. In addition to the provisions set forth under “Unavailability of the Level of the Reference Asset” beginning on page PS-18 of the accompanying product prospectus supplement, the following provision will also apply for purposes of the Securities:

If on the Valuation Date the Index Sponsor fails to calculate and announce the level of the Reference Asset, the Calculation Agent will calculate a substitute closing level of the Reference Asset in accordance with the formula for and method of calculating the Reference Asset last in effect prior to the failure, but using only those securities that comprised the Reference Asset immediately prior to that failure; *provided* that, if a market disruption event occurs or is continuing on such day, then the provisions set forth above under “—Market Disruption Events” above shall apply in lieu of the foregoing.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-7

Additional Risk Factors

The Securities involve risks not associated with an investment in conventional debt securities. This section describes the most significant risks relating to the terms of the Securities. For additional information as to these risks, please see “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and “Risk Factors” in the prospectus.

You should carefully consider whether the Securities are suited to your particular circumstances before you decide to purchase them. Accordingly, prospective investors should consult their investment, legal, tax, accounting and other advisors as to the risks entailed by an investment in the Securities and the suitability of the Securities in light of their particular circumstances.

Principal at Risk.

If the Final Level is less than the Threshold Level, investors in the Securities will lose more than 30%, and possibly all, of their Principal Amount. Specifically, if the Final Level is less than the Threshold Level, investors will lose 1% of the Principal Amount of their Securities for each 1% that the Final Level is less than the Initial Level and may lose all of the Principal Amount. For example, if the Reference Asset has declined by 30.1% from the Initial Level to the Final Level, you will not receive any benefit of the contingent downside feature and you will lose 30.1% of the Principal Amount per Security.

The Securities Do Not Pay Interest and Your Return on the Securities May Be Lower Than the Return on a Conventional Debt Security of Comparable Maturity.

There will be no periodic interest payments on the Securities as there would be on a conventional fixed-rate or floating-rate debt security having the same term. The return that you will receive on the Securities, which could be negative, may be less than the return you could earn on other investments. Even if your return is positive, your return may be less than the return you would earn if you bought a conventional senior interest bearing debt security of TD.

Your Potential Return on the Securities Will Be Limited by the Maximum Redemption Amount and May Be Less Than the Return on a Hypothetical Direct Investment In the Reference Asset.

The opportunity to participate in the possible increases in the Percentage Change of the Reference Asset through an investment in the Securities will be limited because the Payment at Maturity will not exceed the Maximum Redemption Amount. Furthermore, the effect of the Leverage Factor will not be taken into account for any Percentage Change that, when multiplied by the Leverage Factor, exceeds the maximum return on the Securities (33% to 38% of the Principal Amount) regardless of how much the Reference Asset has appreciated. Accordingly, your return on the Securities may be less than your return would be if you made a hypothetical investment in a security directly linked to the performance of the Reference Asset or made a hypothetical investment in the Reference Asset, or the Reference Asset Constituents.

Investors Are Subject to TD’s Credit Risk, and TD’s Credit Ratings and Credit Spreads May Adversely Affect the Market Value of the Securities.

Although the return on the Securities will be based on the performance of the Reference Asset, the payment of any amount due on the Securities is subject to TD’s credit risk. The Securities are TD’s senior unsecured debt obligations. Investors are dependent on TD’s ability to pay all amounts due on the Securities on the Maturity Date and, therefore, investors are subject to the credit risk of TD and to changes in the market’s view of TD’s creditworthiness. Any decrease in TD’s credit ratings or increase in the credit spreads charged by the market for taking TD’s credit risk is

likely to adversely affect the market value of the Securities. If TD becomes unable to meet its financial obligations as they become due, you may not receive any amounts due under the terms of the Securities.

The Agent Discount, Offering Expenses and Certain Hedging Costs Are Likely to Adversely Affect Secondary Market Prices.

Assuming no changes in market conditions or any other relevant factors, the price, if any, at which you may be able to sell the Securities will likely be lower than the public offering price. The public offering price includes, and any price quoted to you is likely to exclude, the underwriting discount paid in connection with the initial distribution, offering expenses as well as the cost of hedging our obligations under the Securities. In addition, any such price is also likely to reflect dealer discounts, mark-ups and other transaction costs, such as a discount to account for costs associated with establishing or unwinding any related hedge transaction. In addition, because an affiliate of Wells Fargo Securities is to conduct hedging activities for us in connection with the Securities, that affiliate may profit in connection with such hedging activities and such profit, if any, will be in addition to the compensation that the dealer receives for the sale of the Securities to you. You should be aware that the potential to earn fees in connection with hedging activities may create a further incentive for the dealer to sell the Securities to you in addition to the compensation they would receive for the sale of the Securities.

There May Not Be an Active Trading Market for the Securities — Sales in the Secondary Market May Result in Significant Losses.

There may be little or no secondary market for the Securities. The Securities will not be listed or displayed on any securities exchange or electronic communications network. The Agents and their respective affiliates may make a market for the Securities; however, they are not required to do so. The Agents and their respective affiliates may stop any market-making activities at any time. Even if a secondary market for the Securities develops, it may not provide significant liquidity or trade at prices advantageous to you. We expect that transaction costs in any secondary market would be high. As a result, the difference between bid and ask prices for your Securities in any secondary market could be substantial.

If you sell your Securities before the Maturity Date, you may have to do so at a substantial discount from the public offering price irrespective of the level of the Reference Asset, and as a result, you may suffer substantial losses.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-8

If the Level of the Reference Asset Changes, the Market Value of Your Securities May Not Change in the Same Manner.

Your Securities may trade quite differently from the performance of the Reference Asset. Changes in the level of the Reference Asset may not result in a comparable change in the market value of your Securities. Even if the level of the Reference Asset increases above the Initial Level during the life of the Securities, the market value of your Securities may not increase by the same amount and could decline.

The Payment at Maturity Is Not Linked to the Level of the Reference Asset at Any Time Other than the Valuation Date.

The Final Level will be based on the closing level of the Reference Asset on the Valuation Date (subject to adjustment as described elsewhere in this pricing supplement). Therefore, if the closing level of the Reference Asset dropped precipitously on the Valuation Date, the Payment at Maturity for your Securities may be significantly less than it would have been had the Payment at Maturity been linked to the closing level of the Reference Asset prior to such drop in the level of the Reference Asset. Although the actual level of the Reference Asset on the Maturity Date or at other times during the life of your Securities may be higher than its level on the Valuation Date, you will not benefit from the closing level of the Reference Asset at any time other than the Valuation Date.

You Will Not Have Any Rights to the Reference Asset Constituents and the Reference Asset only Reflects Price Return.

As a holder of the Securities, you will not have voting rights or rights to receive cash dividends or other distributions or other rights that holders of the Reference Asset Constituents would have. Furthermore, the Reference Asset measures price return only and is not a total return index or strategy, meaning the Final Level will not reflect any dividends paid on the Reference Asset Constituents.

The Market Value of Your Securities May Be Influenced by Many Unpredictable Factors.

When we refer to the market value of your Securities, we mean the value that you could receive for your Securities if you choose to sell them in the open market before the Maturity Date. A number of factors, many of which are beyond our control, will influence the market value of your Securities, including:

- the level of the Reference Asset;
- the volatility – i.e., the frequency and magnitude of changes – in the level of the Reference Asset;
- the dividend rates, if applicable, of the Reference Asset Constituents;
- economic, financial, regulatory and political, military or other events that may affect the level of the Reference Asset;
- interest rates in the market;
- the time remaining until the Securities mature; and
- our creditworthiness, whether actual or perceived, and including actual or anticipated upgrades or downgrades in our credit ratings or changes in other credit measures.

These factors will influence the price you will receive if you sell your Securities before maturity, including the price you may receive for your Securities in any market-making transaction.

Past Reference Asset Performance is No Guide to Future Performance.

The actual performance of the Reference Asset over the life of the Securities, as well as the Payment at Maturity, may bear little relation to the historical closing levels of the Reference Asset or to the hypothetical return examples set forth elsewhere in this pricing supplement. We cannot predict the future performance of the Reference Asset.

There Are Potential Conflicts of Interest Between You and the Calculation Agent.

The Calculation Agent will, among other things, determine the amount of your payment on the Securities. We will serve as the Calculation Agent and may appoint a different Calculation Agent after the Issue Date without notice to you. The Calculation Agent will exercise its judgment when performing its functions and may take into consideration our ability to unwind any related hedges. For example, the Calculation Agent may have to determine whether a market disruption event affecting the Reference Asset has occurred. This determination may, in turn, depend on the Calculation Agent's judgment whether the event has materially interfered with our ability or the ability of one of our affiliates to unwind our hedge positions. Since this determination by the Calculation Agent will affect the payment on the Securities, the Calculation Agent may have a conflict of interest if it needs to make a determination of this kind. For additional information as to the Calculation Agent's role, see "General Terms of the Notes—Role of Calculation Agent" in the product prospectus supplement.

We Have No Affiliation with the Index Sponsor and Will Not Be Responsible for Any Actions Taken by the Index Sponsor.

The Index Sponsor, as defined under Information Regarding the Reference Asset, is not an affiliate of ours and will not be involved in any offerings of the Securities in any way. Consequently, we have no control of any actions of the Index Sponsor, including any actions of the type that would require the Calculation Agent to adjust the Closing Level of the Reference Asset and, therefore, the Payment at Maturity. The Index Sponsor does not have any obligation of any sort with respect to the Securities. Thus, the Index Sponsor has no obligation to take your interests into consideration for any reason, including in taking any actions that might affect the value of the

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-9

Securities. None of our proceeds from any issuance of the Securities will be delivered to the Index Sponsor, except to the extent that we are required to pay the Index Sponsor licensing fees with respect to the Reference Asset.

Trading and Business Activities by the Bank or its Affiliates May Adversely Affect the Market Value of the Securities.

We, the Agents and our respective affiliates may hedge our obligations under the Securities by purchasing securities, futures, options or other derivative instruments with returns linked or related to changes in the level of the Reference Asset and/or the price(s) if one or more Reference Asset Constituents, and we may adjust these hedges by, among other things, purchasing or selling securities, futures, options or other derivative instruments at any time. It is possible that we or one or more of our affiliates could receive substantial returns from these hedging activities while the market value of the Securities declines. We or one or more of our affiliates may also issue or underwrite other securities or financial or derivative instruments with returns linked or related to changes in the Reference Asset or one or more Reference Asset Constituents.

These trading activities may present a conflict between the holders' interest in the Securities and the interests we and our affiliates will have in our or their proprietary accounts, in facilitating transactions, including options and other derivatives transactions, for our or their customers' accounts and in accounts under our or their management. These trading activities could be adverse to the interests of the holders of the Securities.

We, the Agents and our respective affiliates may, at present or in the future, engage in business with one or more issuers of the Reference Asset Constituents (the "Reference Asset Constituent Issuers"), including making loans to or providing advisory services to those companies. These services could include investment banking and merger and acquisition advisory services. These business activities may present a conflict between our, the Agents' and our affiliates' obligations, and your interests as a holder of the Securities. Moreover, we, the Agents or our affiliates may have published, and in the future expect to publish, research reports with respect to the Reference Asset or one or more Reference Asset Constituents. This research is modified from time to time without notice and may express opinions or provide recommendations that are inconsistent with purchasing or holding the Securities. Any of these activities by us or one or more of our affiliates or the Agents or their affiliates may affect the price of the Reference Asset or one or more Reference Asset Constituents and, therefore, the market value of the Securities and the Payment at Maturity, if any.

Estimated Value

The Estimated Value of Your Securities Is Expected to Be Lower Than the Public Offering Price of Your Securities.

The estimated value of your Securities on the Pricing Date is expected to be lower, and may be significantly lower, than the public offering price of your Securities. The difference between the public offering price of your Securities and the estimated value of the Securities reflects costs and expected profits associated with selling and structuring the Securities, as well as hedging our obligations under the Securities. Because hedging our obligations entails risks and may be influenced by market forces beyond our control, this hedging may result in a profit that is more or less than expected, or a loss.

The Estimated Value of Your Securities Is Based on Our Internal Funding Rate.

The estimated value of your Securities on the Pricing Date is determined by reference to our internal funding rate. The internal funding rate used in the determination of the estimated value of the Securities generally represents a discount from the credit spreads for our conventional fixed-rate debt securities and the borrowing rate we would pay for its

conventional fixed-rate debt securities. This discount is based on, among other things, our view of the funding value of the Securities as well as the higher issuance, operational and ongoing liability management costs of the Securities in comparison to those costs for our conventional fixed-rate debt, as well as estimated financing costs of any hedge positions, taking into account regulatory and internal requirements. If the interest rate implied by the credit spreads for our conventional fixed-rate debt securities, or the borrowing rate we would pay for our conventional fixed-rate debt securities were to be used, we would expect the economic terms of the Securities to be more favorable to you. Additionally, assuming all other economic terms are held constant, the use of an internal funding rate for the Securities is expected to increase the estimated value of the Securities at any time.

The Estimated Value of the Securities Is Based on Our Internal Pricing Models; These May Prove to Be Inaccurate and May Be Different from the Pricing Models of Other Financial Institutions.

The estimated value of your Securities on the Pricing Date is based on our internal pricing models. Our pricing models take into account a number of variables, such as our internal funding rate on the Pricing Date, and are based on a number of subjective assumptions, which are not evaluated or verified on an independent basis and may or may not materialize. Further, our pricing models may be different from other financial institutions' pricing models and the methodologies used by us to estimate the value of the Securities may not be consistent with those of other financial institutions that may be purchasers or sellers of the Securities in the secondary market. As a result, the secondary market price of your Securities may be materially lower than the estimated value of the Securities determined by reference to our internal pricing models. In addition, market conditions and other relevant factors in the future may change, and any assumptions may prove to be incorrect.

The Estimated Value of Your Securities Is Not a Prediction of the Prices at Which You May Sell Your Securities in the Secondary Market, if Any, and Such Secondary Market Prices, if Any, Will Likely Be Lower Than the Public Offering Price of Your Securities and May Be Lower Than the Estimated Value of Your Securities.

The estimated value of the Securities will not be a prediction of the prices at which the Agents, other affiliates of ours or third parties may be willing to purchase the Securities from you in secondary market transactions (if they are willing to purchase, which they are not obligated to do). The price at which you may be able to sell your Securities in the secondary market at any time may be based on pricing models that differ from our pricing models and will be influenced by many factors that cannot be predicted, such as market conditions and any bid and ask spread for similar sized trades, and may be substantially less than our estimated value of the Securities. Further, as secondary market prices of your Securities take into account the levels at which our debt securities trade in the secondary market and do not take into account our various costs and expected profits associated with selling

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-10

and structuring the Securities, as well as hedging our obligations under the Securities, secondary market prices of your Securities will likely be lower than the public offering price of your Securities. As a result, the price at which the Agents, other affiliates of ours or third parties may be willing to purchase the Securities from you in secondary market transactions, if any, will likely be lower than the price you paid for your Securities, and any sale prior to the Maturity Date could result in a substantial loss to you.

The Temporary Price at Which We May Initially Buy the Securities in the Secondary Market May Not Be Indicative of Future Prices of Your Securities.

Assuming that all relevant factors remain constant after the Pricing Date, the price at which the Agents may initially buy or sell the Securities in the secondary market (if the Agents make a market in the Securities, which they are not obligated to do) may exceed our estimated value of the Securities on the Pricing Date, as well as the secondary market value of the Securities, for a temporary period after the Pricing Date of the Securities, as discussed further under “Additional Information Regarding Our Estimated Value of the Securities”. The price at which the Agents may initially buy or sell the Securities in the secondary market may not be indicative of future prices of your Securities.

The Valuation Date, and Therefore the Maturity Date, May be Postponed In the Case of a Market Disruption Event.

The Valuation Date, and therefore the Maturity Date, may be postponed in the case of a Market Disruption Event or a non-trading day as described herein. For a description of what constitutes a market disruption event as well as the consequences of that market disruption event, see “Additional Terms of Your Securities—Market Disruption Events” in this pricing supplement.

Significant Aspects of the Tax Treatment of the Securities Are Uncertain.

Significant aspects of the U.S. tax treatment of the Securities are uncertain. You should consult your tax advisor about your tax situation and should read carefully the section entitled “Supplemental Discussion of U.S. Federal Income Tax Consequences” below and in the product prospectus supplement under “Supplemental Discussion of U.S. Federal Income Tax Consequences”.

For a more complete discussion of the Canadian federal income tax consequences of investing in the Securities, please see the discussion in the product prospectus supplement under “Supplemental Discussion of Canadian Tax Consequences.”

If you are not a Non-resident Holder (as that term is defined in the prospectus) for Canadian federal income tax purposes or if you acquire the Securities in the secondary market, you should consult your tax advisors as to the consequences of acquiring, holding and disposing of the Securities and receiving the payments that might be due under the Securities.

Hypothetical Returns

The examples, table and graph set out below are included for illustration purposes only. The **hypothetical** Percentage Changes of the Reference Asset used to illustrate the calculation of the Payment at Maturity (rounded to two decimal places) are not estimates or forecasts of the Final Level or the level of the Reference Asset on any trading day prior to the Maturity Date throughout the term of the Securities. All examples, the table and the graph are based on a hypothetical Initial Level of 2,700, assume the Threshold Level is equal to 70% of the Initial Level, a Leverage Factor of 150%, a Maximum Redemption Amount of 135.50% of the Principal Amount (the midpoint of the Maximum Redemption Amount range of 133% to 138%), that a holder purchased each Security at the public offering price of \$1,000 and that no market disruption event occurs on the Valuation Date.

Example 1 Calculation of the Payment at Maturity where the Percentage Change is positive (the Final Level is greater than the Initial Level).

Percentage Change: 10%
 $\$1,000 + (\$1,000 \times 10\% \times 150\%)$

Payment at Maturity: = \$1,000 + \$150

= \$1,150.00

On a \$1,000 investment, a 10% Percentage Change results in a Payment at Maturity of \$1,150.00, a 15.00% return on the Securities.

Example 2— Calculation of the Payment at Maturity where the Percentage Change is positive (the Final Level is greater than the Initial Level) and the Payment at Maturity equals the Maximum Redemption Amount.

Percentage Change: 40%

Payment at Maturity: $\$1,000 + (\$1,000 \times 40\% \times 150\%) = \$1,000 + \$600.00 = \$1,600.00$ however, the Maximum Redemption Amount is \$1,355.00, and the Payment at Maturity would be \$1,355.00.

On a \$1,000 investment, a 40% Percentage Change results in a Payment at Maturity equal to the Maximum Redemption Amount, a 35.50% return on the Securities, because that amount is the lesser of the Maximum Redemption amount and \$1,600.00.

In addition to limiting your return on the Securities, the Maximum Redemption Amount limits the positive effect of the Leverage Factor. If the Final Level is greater than the Initial Level, you will participate in the performance of the Reference Asset at a rate of 150% up to a certain point. However, the effect of the Leverage Factor will be progressively reduced for Final Levels that are greater than approximately 23.67% of the Initial Level (assuming a Maximum Redemption Amount of 135.50% or \$1,355.00 per Security, the midpoint of the specified range for the Maximum Redemption Amount) since your return on the Securities for any Final Level greater than approximately 23.67% of the Initial Level will be limited to the Maximum Redemption Amount.

Example 3— Calculation of the Payment at Maturity where the

Percentage Change is zero
or negative, but not below

-30% (the Final Level is less
than or equal to the Initial
Level, but greater than or
equal to the Threshold
Level).

Percentage Change: -20%
Payment at Maturity: \$1,000
On a \$1,000 investment, a
-20% Percentage Change
results in a Payment at
Maturity of \$1,000.00, a
0.00% return on the
Securities.

Example 4 Calculation of the Payment at Maturity where
the Percentage Change is negative and below
-30% (the Final Level is less than the
Threshold Level).

Percentage Change: -50%
 $\$1,000 + \$1,000 \times -50\%$

Payment at Maturity: = \$1,000 - \$500

= \$500.00

On a \$1,000 investment, a -50% Percentage
Change results in a Payment at Maturity of
\$500.00, a -50.00% return on the Securities.

If the Final Level is less than the Threshold Level (the Percentage Change is negative and below -30%), investors will have full exposure to the decrease in the level of the Reference Asset and will lose more than 30%, and possibly all, of the Principal Amount.

TD SECURITIES (USA) LLC WELLS FARGO SECURITIES, LLC
P-12

The following table and graph show the return profile for the Securities at the Maturity Date, assuming that the investor purchased the Securities on the Pricing Date and held the Securities until the Maturity Date. The returns illustrated in the following table are not estimates or forecasts of the Percentage Change or the return on the Securities. Neither TD nor either Agent is predicting or guaranteeing any gain or particular return on the Securities.

Hypothetical Final Level	Hypothetical Percentage Change	Hypothetical Payment at Maturity (\$)	Hypothetical Return on Securities² (%)
3,780.00	40.00%	\$1,355.00	35.50%
3,510.00	30.00%	\$1,355.00	35.50%
3,339.09	23.67%	\$1,355.00	35.50%
3,240.00	20.00%	\$1,300.00	30.00%
2,970.00	10.00%	\$1,150.00	15.00%
2,835.00	5.00%	\$1,075.00	7.50%
2,767.50	2.50%	\$1,037.50	3.75%
2,700.00 ¹	0.00%	\$1,000.00	0.00%
2,430.00	-10.00%	\$1,000.00	0.00%
2,160.00	-20.00%	\$1,000.00	0.00%
1,890.00	-30.00%
