Item 5. Other Events

On January 9, 2001 Alteon Inc. issued the following press release:

ALTEON INC. SELLS NET OPERATING LOSS CARRYFORWARDS UNDER
NEW JERSEY PROGRAM; RAISES MORE THAN \$1.5 MILLION

Ramsey, New Jersey, January 9, 2001 - Alteon Inc. (AMEX: ALT) announced today that it has received \$1,547.762.00 from the sale of its net operating loss carryovers (NOLS) under the State of New Jersey's Technology Business Tax Certificate Transfer Program (the "Program").

Edgar Filing: ALTEON INC /DE - Form 8-K

The Program is an initiative passed by the New Jersey State Legislature that allows qualified technology and biotechnology businesses in New Jersey to sell unused amounts of NOLS and defined Research and Development tax credits for cash.

"This Program is of significant value to Alteon as we prepare for further Phase II development of our lead A.G.E. crosslink breaker compound ALT-711," said Kenneth I. Moch, President and Chief Executive Officer. "I am pleased to report that with this non-dilutive funding, as well as our efforts to control costs, Alteon has approximately \$11 million in cash at this time."

Alteon may again participate in the Program for the year 2001. The actual amount of tax credits the Company may sell will depend upon the allocation among qualifying companies of an annual pool established by the State of New Jersey.

ABOUT ALTEON

Alteon is a leader in the discovery and development of novel pharmaceuticals for the treatment of pathologies of aging and diabetes, with an initial focus on cardiovascular disease. The Company's proprietary technology is based on reversing or slowing a fundamental pathological process caused by protein-glucose complexes called Advanced Glycosylation End-products (A.G.E.s). The formation and crosslinking of A.G.E.s is an inevitable part of the aging process that leads to a loss of flexibility and function in body tissues, organs and vessels.

Alteon has created a library of novel classes of compounds based on the A.G.E. pathway. These include A.G.E. Crosslink Breakers, A.G.E. Formation Inhibitors and Glucose Lowering Agents. The Company's lead drug candidate, ALT-711, is an A.G.E. Crosslink Breaker currently in Phase II clinical trials for the treatment of cardiovascular disorders including isolated systolic hypertension.
