INTERLINK ELECTRONICS, INC.
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 FOR THREE MONTHS AND SIX MONTHS ENDED JUNE 30, 2002 (UNAUDITED)

1. Basis of Presentation of Interim Financial Data

The financial information as of June 30, 2002 and for the three month and six month periods ended June 30, 2001 and 2002 included in this report is unaudited; however, such information reflects all adjustments (consisting only of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of results for the interim periods. The interim statements should be read in conjunction with the financial statements and the related notes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2001.

The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for the full year.

2. Comprehensive Loss

The following table provides the data required to calculate comprehensive loss:

	(In thousands)	
	Accumulated Other Comprehensive Loss	Comprehensive Loss
	-----	-----
Balance at December 31, 2000	\$ (168)	
Translation adjustment	(502)	\$ (502)
Net loss	--	(1,085)
	-----	-----
Balance at June 30, 2001	\$ (670)	\$ (1,587)
	=====	=====
Balance at December 31, 2001	\$ (843)	
Translation adjustment	30	\$ 30
Net loss	--	(732)
	-----	-----
Balance at June 30, 2002	\$ (813)	\$ (702)

3. Segment Information

The Company has four business segments: (i) business communications (ii) home entertainment, (iii) e-transactions and (iv) specialty components. The accounting policies of the segments are the same as those described in "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies." However, the Company evaluates performance based on revenue and gross profit. The Company does not allocate any other income, expenses or assets to these segments. Reportable segment information for the six months ended June 30, 2001 and 2002 is as follows (in thousands):

Six Months Ended:	Business Communications	Home Entertainment	E-Transactions	Specialty Components and Other	Total
June 30, 2001					
Revenue	\$9,470	\$567	\$523	\$3,368	\$13,928
Gross profit	2,039	272	261	1,554	4,126
June 30, 2002					
Revenue	\$7,008	\$1,350	\$788	\$2,290	\$11,436
Gross profit	2,592	608	470	1,071	4,741

4. Earnings Per Share

For all periods presented, per share information was computed pursuant to provisions of the Statement of Financial Accounting Standards (SFAS) No. 128, "Earnings Per Share", issued by the Financial Accounting Standards Board (FASB). The computation of earnings per share--basic is based upon the weighted average number of common shares outstanding during the periods presented. Earnings per share--diluted also includes the effect of common shares contingently issuable from options and warrants in periods which they have a dilutive effect.

Common stock equivalents are calculated using the treasury stock method. Under the treasury stock method, the proceeds from the assumed conversion of options and warrants are used to repurchase outstanding shares using a yearly average market price.

The following table contains information necessary to calculate earnings per share (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2001	2002	2001	2002
Weighted average shares outstanding - basic	9,640	9,763	9,525	9,761

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Effect of dilutive securities; options and warrants	-(1)	-(1)	-(1)	-(1)
	-----	-----	-----	-----
Weighted average shares--diluted	9,640	9,763	9,525	9,761
	=====	=====	=====	=====

- (1) Due to the net loss, the diluted share calculation result was anti-dilutive. Thus, the basic weighted average shares were used. Shares of common stock equivalents of approximately 1,795 and 1,698 for the three months and six months ended June 30, 2002, respectively, and 1,907 for the three months and six months ended June 30, 2001, respectively, were not included in the diluted calculations because they were anti-dilutive.

6

5. Inventories

Inventories consisted of the following (in thousands):

	December 31, 2001	June 30, 2002
	-----	-----
Raw material	\$ 3,218	\$ 3,336
Work in process	351	668
Finished goods	4,933	5,279
	-----	-----
Total inventories	\$ 8,502	\$ 9,283
	=====	=====

6. Lines of Credit

We renegotiated the terms of our \$5,000,000 domestic revolving line of credit (unused at June 30, 2002). All financial covenants have been removed and any future borrowings will be secured by cash and investments held at the bank. The new agreement will expire on June 1, 2004.

We converted our previous equipment purchases line of credit with an outstanding balance of \$354,000 to a long term note. The revised loan is payable in equal installments for 48 months at an interest of LIBOR plus 2.25%.

We entered into a new equipment purchases line of credit agreement for a maximum of \$500,000. The line of credit bears interest at LIBOR plus 2.5% and is secured by cash and investments held at the bank. This line matures on July 1, 2003, at which time, any outstanding balance will be converted to a 48 month note.

7. Recent Pronouncements

In April 2002, the FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections" which among other things provide guidance in reporting gains and losses from extinguishments of debt and accounting for leases. We will adopt this statement

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

in 2003 and are currently reviewing this statement to determine its impact, however we do not expect the adoption of this standard to have a material impact on our financial position or results of operations.

On July 30, 2002, the FASB issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities". SFAS No. 146 nullifies EITF Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)." It requires that a liability be recognized for those costs only when the liability is incurred, that is, when it meets the definition of a liability in the FASB's conceptual framework. SFAS No. 146 also establishes fair value as the objective for initial measurement of liabilities related to exit or disposal activities that are initiated after December 31, 2002, with earlier adoption encouraged. The Company does not expect that the adoption of SFAS No. 146 will have a material impact on its financial position or results from operations.

7

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Disclosure Regarding Forward Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that involve substantial risks and uncertainties and which are intended to be covered by the safe harbors created thereby. These statements can be identified by the fact that they do not relate strictly to historical information and may include the words "expects", "believes", "anticipates", "plans", "may", "will", "intends", "estimates", "continue" or other similar expressions. These forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from those currently anticipated. These risks and uncertainties include, but are not limited to, items discussed in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2001 under the heading "Forward-looking Statements", "Historical Factors Affecting Financial Performance" and "2001 Overview". Forward-looking statements speak only as of the date made. We undertake no obligation to publicly release or update forward-looking statements, whether as a result of new information, future events or otherwise.

Critical Accounting Policies

Material accounting policies that we believe are the most critical to an investor's understanding of our financial results and condition and require complex management judgment are discussed below.

Revenue Recognition. We recognize revenue in accordance with SEC Staff Accounting Bulletin (SAB) No. 101, "Revenue Recognition in Financial Statements", as amended by SAB 101A and 101B. SAB 101 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services rendered; (3) the fee is fixed and determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) require management's judgments regarding the fixed nature of the fee charged for services rendered and products delivered and the collectibility of those fees. Should changes in conditions cause management to determine these criteria are not met for certain future transactions, such as a determination that an outstanding account receivable has become uncollectible, revenue recognized for any reporting period could be adversely affected.

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Accounts Receivable. Our accounts receivable are unsecured, and we are at risk to the extent such amounts become uncollectible. We continually monitor account receivable balances, and provide for an allowance of doubtful accounts at the time collection may become questionable based on payment performance or age of the receivable and other factors related to the customers ability to pay.

Provision for Income Tax. We first achieved profitable operations in 1995. Because of net operating loss carryforwards available both for our U.S.-based and Japan-based operations, we did not accrue income tax expense until 1999. In that year, due to the expiration or full utilization of NOL carryforwards in California and Japan, we began to record a provision for income tax expense in those jurisdictions. By the end of 2000, we also began to accrue an income tax benefit related to our federal NOL carryforwards to be used in future periods. However, in mid-2001, we began to record quarterly tax losses and suspended any further recognition of NOL carryforward tax benefits. Management believes we will be able to utilize the deferred tax asset; however, if we do not return to quarterly profitability by the end of 2002, it is likely that we will eliminate this asset (\$1.3 million) by recording a tax expense.

Inventory and Bad Debt Reserves. In response to the economic slowdown in mid-2001, we reduced our staff size, implemented other operating cost reduction programs and increased our inventory by \$2 million in the

8

second quarter 2001 and bad debt reserves by \$300,000 in the third quarter 2001. We believe these estimates of potential losses are adequate at June 30, 2002. However, a further deterioration of the financial health of our customers either in the U.S. or Japan may prove those estimates to be inadequate.

Foreign Exchange Exposure. We have established relationships with most of the major OEMs in the business communications market. Many of these OEMs are based in Japan and approximately 40% of our 2001 revenues came from Japanese customers. Revenues from these customers are denominated in Japanese yen and as a result we are subject to foreign currency exchange rate fluctuations in the yen/dollar exchange rate. We use foreign currency forward contracts to hedge this exposure. The gain or loss from these contracts is recorded in business communications revenue (\$750,000 gain in the year 2001 and \$262,000 gain in the first six months of 2002). These contracts typically have a six-month duration; thus, yen/dollar fluctuations lasting more than six months will have an impact on our revenues. In addition, as our Japan subsidiary's functional currency is the yen, the translation of the net assets of that subsidiary into the consolidated results will fluctuate with the yen/dollar exchange rate.

Recent Pronouncements

In April 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 145 "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections" which among other things provide guidance in reporting gains and losses from extinguishments of debt and accounting for leases. We will adopt this statement in 2003 and are currently reviewing this statement to determine its impact, however we do not expect the adoption of this standard to have a material impact on our financial position or results of operations.

On July 30, 2002, the FASB issue SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities". SFAS No. 146 nullifies EITF Issue No. 94-3, "Liability Recognition for Certain Employee Termination Benefits and Other costs

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

to Exit an Activity (including Certain Costs Incurred in a Restructuring)." It requires that a liability be recognized for those costs only when the liability is incurred, that is, when it meets the definition of a liability in the FASB's conceptual framework. SFAS No. 146 also establishes fair value as the objective for initial measurement of liabilities related to exit or disposal activities that are initiated after December 31, 2002, with earlier adoption encouraged. We do not expect that the adoption of SFAS No. 146 will have a material impact on its financial position or results from operations.

Overview

We were incorporated in California in February 1985 and reincorporated in Delaware in July 1996. From 1985 to 1992, we developed and refined our Force Sensing Resistor, or FSR, technology and sold it to customers for use in electronic, musical, medical and other applications, which we now refer to as the specialty components market. In 1992, we introduced our first Interlink-branded computer-pointing device, PortaPoint, and in 1994, we introduced our first wireless pointing device. The device, called RemotePoint, established Interlink as a leading supplier of branded and OEM remote controls and other products for the computerized presentation system market, which we refer to as the business communication market. In 1999, we introduced an electronic signature capture product, ePad, for sales to customers in the e-transactions market. In 2000, we first demonstrated IntuiTouch technology, which we are marketing to customers in the home entertainment market.

Revenue by market segment for the first and second halves of 2001 and the first half of 2002 revenue by market segment is shown in the following table:

9

	First Half 2001		Second Half 2001		Fir Hal 200
Market Segment	Revenue (Millions)	% Sales	Revenue (Millions)	% Sales	Revenue (Millions)
Business Communications	\$9.4	68%	\$6.8	60%	\$7.0
Specialty Components	3.4	24%	2.7	24%	2.3
Home Entertainment	0.6	4%	1.4	12%	1.3
E-Transactions	0.5	4%	0.5	4%	0.8
Total	\$13.9	100%	\$11.4	100%	\$11.4

Our principal source of revenue continues to be our business communications business. Sales in that market declined in 2001 as a result of general economic conditions and resulting adjustments to purchasing and inventory levels by our customers. As the presentation market has begun to recover, we achieved a 3%

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

increase in business communication revenues in the first half of 2002 as compared to the second half of 2001.

Specialty components, the original market into which we sold our products, continues to be a strong contributor to revenue. In 2000 and the first three quarters of 2001, revenue generated by sales to customers in this market was positively affected by licensing revenue from International Electronics and Engineering, or IEE, which will not recur in 2002. This was the primary reason revenues in this market declined from \$3.4 million in the first half of 2001 to \$2.3 million in the same period of the current fiscal year. We expect sales to customers in the specialty components market to continue to be a significant contributor to our revenue but do not anticipate significant growth in this market.

Revenue from sales to customers in the home entertainment sector results primarily from sales of an FSR-based component for use in the Microsoft Xbox game controller. We expect that these sales will continue in 2002 but that revenue from our IntuiTouch products will develop slowly as new technologies are introduced by our customers and development partners. At the date of this report, however, we do not expect meaningful revenues from IntuiTouch products until 2003. Home entertainment revenues in the last half of 2001 and the first half of 2002 continued to be primarily driven by the Xbox program.

Our e-transactions business was adversely affected during 2001 by a general slowdown in new equipment purchasing. Nonetheless, we completed significant transactions with two insurance companies and two companies in the financial services industry and continued to build our volume of sales to customers making smaller orders. At both large and small volumes, sales of e-transaction devices tend to result in "one-time" revenue and therefore sales levels in this segment can be more volatile than in other markets in which we operate. However, we believe that the increasing installed base of our e-transactions devices can have a positive effect on future sales by providing evidence of technological soundness and customer acceptance. As we build our customer base and reference accounts, we have achieved a 60% increase in E-Transaction revenues in the first half of 2002 as compared to the second half of 2001.

In 2001, we recorded our first annual decline in revenue in more than a decade and our first annual loss since 1994. We believe that these results were significantly affected by general economic conditions that adversely affected purchasing levels in our established business communications and specialty components markets and slowed the penetration of our products into the e-transactions and home entertainment markets. In the case of particular industries, such as the insurance industry that we have targeted for our e-transactions products, the events of September 11 further impacted our ability to achieve penetration levels that we had originally

anticipated. While these factors continued to affect our results in 2002, we believe that our basic market positioning is sound. We continue to enjoy a dominant share of the OEM business presentations controller market and are having some success in developing sales channels for branded aftermarket products. Our FSR-based products and components continue to sell well in both the specialty components and home entertainment markets, our e-transactions business appears to be gaining traction and we believe that our technology, products and commercial relationships addressing interactive digital remote communication put us in a position to capitalize on any growth in this market sector.

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Despite the downturn in revenues in 2001, we chose to maintain our commitment to research and development, spending slightly more in 2001 than in the prior year and also increased selling, general and administrative expense. During the second quarter of fiscal 2001, as a result of a continued decline in revenues and customer demand, we provided additional reserves of \$2 million for excess and obsolete inventories. The continued industry-wide reduction in capital spending and the resulting decrease in demand for our products led to significant reductions in our sales forecast. Our regular and ongoing reserve analysis and methodology includes a comparison of sales forecasts and inventory levels. As a result of the analysis based on second quarter 2001 sales forecast revisions, we recorded a charge, which was included in the cost of revenues. Increases to the inventory reserve during the remainder of fiscal 2001 and the first half of 2002 were not significant. In addition, we recorded a \$300,000 increase in bad debt reserves in the third quarter of 2001 due to changes in certain customers' ability to pay arising after the original sales had been made. Since third quarter 2001, no material modification to inventory and bad debt reserves were made. Excluding the bad debt adjustment, total quarterly operating expenses have remained relatively constant in the \$2.7 - \$2.8 million range since third quarter 2001.

The loss in 2001 and in first half 2002 resulted in modest reductions in working capital and stockholders' equity. However, liquidity remains relatively strong and we foresee no immediate need for additional capital or immediate risk of capital inadequacy.

Results of Operations

The following table presents our historical operating results for the periods indicated as a percentage of revenues:

	Six Months Ended		
	(Unaudited)		
	June 30, 2001	December 31, 2001	June 30, 2002
	-----	-----	-----
Revenues	100.0%	100.0%	100.0%
Gross profit	29.6	41.3	41.5
Operating expenses:			
Product development and research	13.2	15.1	15.2
Selling, general and administrative	30.0	35.8	32.6
Total operating expenses	43.2	50.9	47.8
Operating loss	(13.6)	(9.6)	(6.3)
Other income (expense)	1.2	4	(0.1)
Income tax benefit	4.7	1.0	--
Net loss	(7.8)%	(8.2)%	(6.4)%
	=====	=====	=====

Results of Operations - Three and six months ended June 30, 2002 compared to three and six months ended June 30, 2001

Revenues declined 8% from \$6.5 million in the three month period ended June 30, 2001 to \$6.0 million in the three month period ended June 30, 2002. For the

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

first half of the year, revenues declined 18% from \$13.9 million in 2001 to \$11.4 million in 2002. This revenue net decline resulted from the following factors:

11

- Business communications segment revenues declined 11% when comparing second quarter 2001 to second quarter 2002 and declined 26% in the six month comparison due to the general slowdown in worldwide economies.
- Specialty components segment revenues declined 21% when comparing second quarter 2001 to second quarter 2002 and 32% when comparing the six month periods due to the slowdown in worldwide economies coupled with the elimination of approximately \$500,000 per quarter in licensing royalties we had been receiving from IEE.
- Home entertainment segment revenues increased 45% when comparing second quarter 2001 to second quarter 2002 and 138% when comparing the six month periods due to sales of our Force Sensing Resistors for use in the Microsoft Xbox program.
- E-transactions segment revenues increased 39% when comparing second quarter 2001 to second quarter 2002 and 51% when comparing the six month periods due to sales to more customers.

Gross profit increased 190% from \$854,000 in the three month period ended June 30, 2001 to \$2.5 million in the three month period ended June 30, 2002 and increased 15% from \$4.1 million in the six month period ended June 30, 2001 to \$4.7 million in the six month period ended June 30, 2002. The increases were due to the inventory reserve adjustment of \$2 million recorded in second quarter 2001 which was recorded in cost of revenues.

Product development and research expense decreased 13% from \$1 million in the three month period ended June 30, 2001 to \$868,000 in the three month period ended June 30, 2002 and decreased 6% from \$1.8 million in the six month period ended June 30, 2001 to \$1.7 million for the six month period ended June 30, 2002. As a percentage of revenues, product development and research expense decreased from 15.3% in the three month period ended June 30, 2001 to 14.4% in the three month period ended June 30, 2002 and increased from 13.2% in the six month period ended June 30, 2001 to 15.2% for the six month period ended June 30, 2002. The decrease in the dollar amount primarily resulted from our decreased use of outside design services. The increase on a percentage basis reflects our commitment to maintain our R&D efforts despite the 18% decrease in six month revenues.

Selling, general and administrative expense decreased 13% from \$2.2 million in the three month period ended June 30, 2001 to \$1.9 million in the three month period ended June 30, 2002 and decreased 11% from \$4.2 million in the six month period ended June 30, 2001 to \$3.7 million for the six month period ended June 30, 2002. As a percentage of revenue, selling, general and administrative expense decreased from 33.4% in the three month period ended June 30, 2001 to 31.3% in the three month period ended June 30, 2002 and increased from 30.0% in the six month period ended June 30, 2001 to 32.6% in the six month period ended June 30, 2002. The decrease in the dollar amount of SG&A is due to the reduction of staff and implementation of operating cost reduction programs implemented in the second quarter of 2001.

Loss from operations decreased from \$2.3 million in the three month period ended June 30, 2001 to \$283,000 in the three month period ended June 30, 2002 and from

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

\$1.9 million in the six months ended June 30, 2001 to \$722,000 in the six months ended June 30, 2002. Key factors contributing to the operating losses were the \$2.0 million additional reserve to inventory recorded in second quarter 2001 and a partially off-setting 18% revenue decline incurred in the first half of 2002 as compared to the first half of 2001.

We recorded a \$649,000 income tax benefit in the six month period ended June 30, 2001 and a zero tax provision in the six month period ended June 30, 2002. No tax benefit was recorded in the 2002 period due to lack of sufficient probability that any additional potential benefit would actually be realized.

Our net loss decreased from a \$1.8 million loss in the three months ended June 30, 2001 to a loss of \$333,000 for the same period in 2002 and the net loss decreased from \$1.1 million for the six months ended June 30, 2001 to a loss of \$732,000 for the same period in 2002 for the reasons described above.

12

Liquidity and Capital Resources

At June 30, 2002, working capital totaled \$18.9 million as compared to \$19.3 million at December 31, 2001. This decrease is a result of the negative operating results coupled with the purchase of capital equipment.

For the six months ended June 30, 2002 operations generated \$73,000. This result is due to the negative operating results offset by non-cash adjustments and a reduction in accounts receivable of \$667,000.

For the six month period ended June 30, 2002, investing activities consisted primarily of the usage of \$251,000 to purchase production and computer network equipment which was offset by the conversion to cash of marketable securities that matured during the period.

We believe we can fund operations for at least the next twelve months from existing cash balances. We renegotiated our U.S. bank lines of credit to eliminate the financial covenants; however, the agreements governing the lines of credit now require any future borrowings to be secured by cash and investments held at the bank. Negotiated lines of credit in Japan and the exercise of employee stock options are also potential sources of capital available to us. We require liquidity to fund capital expenditures and for working capital and other general corporate purposes.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

We use six-month foreign exchange forward contracts to hedge certain revenue exposures against future movements in foreign exchange rates. Gains and losses on the forward contracts are largely offset by gains and losses on the underlying exposure and consequently we would not expect a sudden or significant change in foreign exchange rates to have a material impact on future net income or cash flows. However, a foreign exchange movement with a duration of over six months could materially impact financial performance.

PART II: OTHER INFORMATION

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Item 4. Submission of Matters to a Vote of Security Holders

On June 11, 2002 at our Annual Meeting of Stockholders, the holders of our outstanding common stock took the actions described below. At April 17, 2002, the record date, 9,758,872 shares of common stock were outstanding and eligible to vote at the Annual Meeting of Stockholders.

1. By the vote indicated below, the stockholders re-elected George Gu and E. Michael Thoben to the Company's Board of Directors to serve for a three-year term:

For George Gu:

9,083,281	Shares in favor
0	Shares against
41,828	Shares withheld

For E. Michael Thoben

9,083,341	Shares in favor
0	Shares against
41,768	Shares withheld

Item 5. Other Information.

On July 9, 2002, we filed a Schedule TO-I with the Securities and Exchange Commission and distributed an offer to exchange to holders of our options with an exercise price per share equal to or greater than \$15, all of which were outstanding under our 1996 Stock Incentive Plan. The offer gives those option holders the opportunity to exchange their eligible options for a promise from us to issue to them new options to purchase shares of our common stock, also to be granted under the 1996 Stock Incentive Plan. Our offer expired at 5:00 p.m., Pacific time, on Wednesday, August 7, 2002. Options representing approximately 99.7% of the shares of our common stock underlying eligible options were tendered. We cancelled those options on August 8, 2002 and, under the terms and conditions of our offer to exchange, on or about February 10, 2003, we will grant new options to purchase the same number of shares of common stock as the number of shares subject to the options accepted for exchange with an exercise price per share equal to the fair market value of a share of our stock on that date.

On July 23, 2002, we filed a Current Report on Form 8-K under Item 4., "Changes in Registrant's Certifying Accountants", announcing that we had engaged KPMG LLP as our principal independent auditors.

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

- 3.1 Certificate of Incorporation, as amended (incorporated by reference to Exhibit 3.1 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2000).
- 3.2 Bylaws (incorporated by reference to Exhibit 3.2 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2000).

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Registrant dated June 1, 2002.

99.1 Certification of Chief Executive Officer of Registrant Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

99.2 Certification of Chief Financial Officer of Registrant Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

(b) Reports on Form 8-K

We filed a Current Report on Form 8-K under Item 4. "Changes in Registrant's Certifying Accountants" on June 28, 2002 announcing our dismissal of Arthur Andersen LLP as our principal accountant effective June 24, 2002. A letter from Arthur Andersen LLP addressed to the Securities and Exchange Commission confirming statements made by us in the report was attached as an exhibit.
