These reports, including the financial information herein, are transmitted to shareholders of Muni Intermediate Duration Fund, Inc. and Muni New York Intermediate Duration Fund, Inc. for their information. This is not a prospectus. The Funds have leveraged their Common Stock and intend to remain leveraged by issuing Preferred Stock to provide the Common Stock shareholders with potentially higher rates of return. Leverage creates risks for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of shares of the Common Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Stock may affect the yield to Common Stock shareholders. Past performance results shown in these reports should not be considered a representation of future

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

performance. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-MER-FUND (1-800-637-3863); (2) at www.mutualfunds.ml.com; and (3) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>. Information about how the Funds vote proxies relating to securities held in the Funds' portfolios during the most recent 12-month period ended June 30 is available (1) at www.mutualfunds.ml.com; and (2) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>.

The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, each Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of each Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise,

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of its investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in such securities. As of November 30, 2005, the percentage of Muni Intermediate Duration Fund, Inc.'s total net assets invested in inverse floaters was 3.70%, before the deduction of Preferred Stock. As of November 30, 2005, none of Muni New York Intermediate Duration Fund, Inc.'s total net assets was invested in inverse floaters.

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

A Letter From the President

Dear Shareholder

As the financial markets continued to muddle their way through 2005, the Federal Reserve Board (the Fed) advanced its monetary tightening campaign full steam ahead. The 13th consecutive interest rate hike since June 2004 came on December 13, bringing the target federal funds rate to 4.25%. Oil prices, after reaching record highs on more than one occasion over the past several months, moderated somewhat by period-end, as did inflation expectations. Against this backdrop, most major market indexes managed to post positive results for the current reporting period:

Total Returns as of November 30, 2005	6-month	12-month
U.S. equities (Standard & Poor's 500 Index)	+ 5.88%	+ 8.44%
Small-cap U.S. equities (Russell 2000 Index)	+10.47	+ 8.14
International equities (MSCI Europe Australasia Far East Index)	+11.23	+13.25
Fixed income (Lehman Brothers Aggregate Bond Index)	- 0.48	+ 2.40
Tax-exempt fixed income (Lehman Brothers Municipal Bond Index)	+ 0.36	+ 3.88
High yield bonds (Credit Suisse First Boston High Yield Index)	+ 2.33	+ 2.94

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

With the kick-off of the holiday shopping season, attention turned to the consumer, who has remained resilient even amid high energy prices and rising interest rates. Some observers surmise that a slowdown in residential real estate may ultimately contribute to a weakening in consumer spending. At this juncture, the outlook remains unclear.

Equity markets moved sideways for much of 2005, notwithstanding a strong rally in the middle of the fourth quarter. Corporate earnings have continued to surprise on the upside and company profit margins remain high, as does productivity. On the other hand, high energy prices, more Fed interest rate hikes, a consumer slowdown and/or the potential for slower earnings growth pose the greatest risks to U.S. stocks. Internationally, many markets have benefited from strong economic statistics, trade surpluses and solid finances. Emerging markets have had a particularly strong year, partly reflecting high economic growth rates and positive financial reforms.

The bond market continued to be characterized by a flattening yield curve. The difference between the two-year and 10-year Treasury yield was just seven basis points (.07%) at period-end, compared to 40 basis points six months ago and 134 basis points 12 months ago.

Navigating the financial markets can be a challenge, particularly during uncertain times. With that in mind, we invite you to visit our online magazine at www.mlim.ml.com/shareholdermagazine. Shareholder is a publication designed to provide insights on investing and timely "food for thought" for investors. We are pleased to make the magazine available online, where we are able to expand our reach in terms of content and readership.

As always, we thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

(Robert C. Doll, Jr.)

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

A Discussion With Your Funds' Portfolio Managers

The Funds remained focused on generating an attractive level of tax-exempt income for shareholders, looking for income-enhancing opportunities as market rates rose late in the period.

Describe the recent market environment relative to municipal bonds.

Over the past six months, long-term bond yields generally rose. Bond prices, which move opposite of yields, fell as investors focused on inflationary pressures, especially higher energy costs in the wake of the Gulf Coast

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

hurricanes. A strengthening U.S. economy, which grew at a faster-than-expected 4.3% rate in the third quarter of 2005, added further to the inflationary concerns.

The Federal Reserve Board (the Fed) continued to raise short-term interest rates at each of its meetings during the period, lifting the federal funds target rate to 4% by period-end (and to 4.25% on December 13). With short-term interest rates increasing more than long-term interest rates, the yield curve continued to flatten.

During the past six months, 10-year Treasury note yields rose 49 basis points (.49%) to 4.49%, while 30-year U.S. Treasury yields rose 37 basis points to 4.69%. Tax-exempt bond yields exhibited a similar pattern during the period. According to Municipal Market Data, the yield on AAA-rated issues maturing in 30 years increased 29 basis points to 4.55%, while the yield on AAA-rated issues maturing in 10 years rose 38 basis points to 3.87%.

Historically low nominal tax-exempt bond yields continued to encourage municipalities to issue new debt and refund outstanding, higher-couponed issues. During the past six months, almost \$207 billion in new municipal bonds was underwritten, a 16.8% increase compared to issuance during the same six months of 2004. Year-to-date through November 30, the volume of refunding issues increased by more than 44% on a year-over-year basis. Refunding issues were heavily weighted in the 10-year - 20-year maturity range, putting pressure on intermediate tax-exempt bond yields while supporting longer-term bond prices.

Investor demand for municipal product remained positive during most of the period. The most current statistics from the Investment Company Institute indicate that, year-to-date through October 2005, net new cash flows into long-term municipal bond funds exceeded \$6.9 billion - a significant improvement from the \$12.7 billion net outflow seen during the same period in 2004. Solid investor demand enabled municipal bonds to perform generally in line with their taxable counterparts, reversing some of their recent underperformance. We believe that attractive yield ratios relative to taxable bonds should continue to attract both traditional and non-traditional investors to the municipal marketplace, especially if municipal bond issuance remains manageable.

The communities shattered by Hurricanes Katrina and Rita will require extensive reconstruction. It is too early, however, to estimate the amount of tax-exempt debt that may be required to finance these efforts or assess the overall impact on the municipal market. However, much of the rebuilding is likely to be funded through federal loans and grants, and the reconstruction will likely be spread over a number of years. Consequently, any new municipal bond issuance prompted by the hurricanes is not likely to disrupt the tax-exempt market in the near future.

Muni Intermediate Duration Fund, Inc.

How did the Fund perform during the period?

For the six-month period ended November 30, 2005, the Common Stock of Muni Intermediate Duration Fund, Inc. had net annualized yields of 5.66% and 6.17%, based on a period-end per share net asset value of \$15.22 and a per share market price of \$13.96, respectively, and \$.432 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.13%, based on a change in per share net asset value from \$15.51 to \$15.22, and assuming reinvestment of all distributions.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

The Fund's total return, based on net asset value, exceeded the +.58% average return of the Lipper General Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues rated in the top four credit-rating categories. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

The Fund's outperformance can be attributed to a modestly overweighted exposure to spread product - lower-quality, higher-yielding municipal bonds, which benefited as credit spreads narrowed during the period. The high yield municipal market continued to perform well on the back of strong demand, as investors, looking for better yields in a low interest rate environment, poured cash into high yield mutual funds. The Fund benefited particularly from issues in the special tax (land secured), senior living and toll road sectors, all of which saw gains in an otherwise down market. The Fund also benefited from price appreciation of its holdings issued by Mississippi Systems Energy, a subsidiary of Entergy Corporation, which was downgraded after Hurricane Katrina struck the Gulf Coast region. Ironically, the credit downgrade caused our bonds to appreciate because it made it less probable that the securities' call feature would be exercised. Of final note, the Fund's underweight stance in airline bonds was a positive. We had no exposure to either Delta Air Lines, Inc. or Northwest Airlines, both of which declared bankruptcy during the period, in part because of the impact of higher fuel costs.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Portfolio activity concentrated on uncovering attractive relative value in the municipal marketplace. Given the prospect of continued yield curve flattening, we reduced our exposure to bonds with maturities of 10 years - 18 years while adding to our holdings in bonds longer than 25 years. We also maintained our strategy of purchasing bonds of issuers we believed were more likely to defease their existing debt to help close their budget gaps. When bonds are defeased, it typically means that the securities are retired at their first call date, enabling the bonds to appreciate significantly. The states of California and Massachusetts are two issuers who have been aggressive in implementing this strategy. Purchases during the period also included higher-coupon bonds with shorter call dates, which we believed offered attractive relative yields and the potential for future outperformance.

For the six months ended November 30, 2005, the average yield for the Fund's Auction Market Preferred Stock (AMPS) was 1.78% for Series M7; 1.80% for Series T7; 1.83% for Series W7; 1.92% for Series TH7; 1.74% for Series F7; and 2.41% for Series TH28. The Fed's interest rate hikes clearly are having an impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and once more on

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

December 13). Still, the tax-exempt yield curve remained relatively steep and continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.6% of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

Relative to the broader municipal market, we maintained a neutral level of interest rate risk but are positioned for the continued flattening of the yield curve. Having reduced some of our more volatile corporate-backed bonds, the Fund has a more neutral exposure to high yield spread product. With higher interest rates and our outlook for slower economic activity, however, we will be on the lookout for opportunities to slightly increase the Fund's duration.

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

A Discussion With Your Funds' Portfolio Managers (concluded)

Muni New York Intermediate Duration Fund, Inc.

Describe conditions in the State of New York.

The State of New York maintains credit ratings of A1, AA and AA- from Moody's, Standard & Poor's (S&P) and Fitch, respectively. Moody's assigns a positive outlook to the state's rating, while Fitch and S&P carry stable outlooks. The state economy continues to improve and revenue collections are increasing. State tax collections remain largely dependent on the performance of the financial sector, but tax receipts for fiscal year 2005 (ended March 31, 2005) were 15% above the prior fiscal year. Due to surging tax collections, particularly income taxes, the fiscal year 2005 operating surplus totaled \$1.2 billion.

For the first time in more than 20 years, New York lawmakers approved a budget on time. The fiscal year 2006 budget calls for \$105 billion in spending and forecasts a 5% increase in tax receipts for the fiscal year (which began April 1, 2005). Aided by this revenue growth, the enacted budget includes most of the governor's original proposals for closing an estimated \$4 billion deficit. However, this does not factor in a lawsuit won by the Campaign for Fiscal Equity that could add up to \$2 billion in annual state education spending. Crafting balanced budgets beyond fiscal year 2006 will present a challenge given political resistance to additional tax hikes and cuts in popular programs, as well as pressure from local governments for pension and Medicaid relief, and new education spending.

Current employment numbers show a 1% increase from year-ago levels. New York ranks fifth-highest among all states in per capita income. Modest income growth through the remainder of 2005 would boost personal income tax receipts, which account for roughly 38% of general fund receipts.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

How did the Fund perform during the period?

For the six-month period ended November 30, 2005, the Common Stock of Muni New York Intermediate Duration Fund, Inc. had net annualized yields of 4.90% and 5.56%, based on a period-end per share net asset value of \$14.66 and a per share market price of \$12.92, respectively, and \$.360 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +.02%, based on a change in per share net asset value from \$15.05 to \$14.66, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, lagged the +.86% average return of the Lipper New York Municipal Debt Funds category for the six-month period. (Funds in this Lipper category limit their investment to securities exempt from taxation in New York or a city in New York.) Notably, the Lipper category consists primarily of funds with the ability to invest in municipal issues with longer durations, whereas our portfolio is limited to bonds in the intermediate duration range. This put the Fund at a disadvantage relative to the Lipper average as the yield curve continued to flatten, causing shorter-duration and intermediate-duration bonds to underperform longer-dated municipal investments.

In addition, airline-related debt, which had benefited Fund performance in the prior period, detracted from returns over the past six months. We continue to hold a core position in airline-related debt issues, as they are a significant contributor to the yield of the portfolio, although we are monitoring our exposure carefully given the inherent volatility in this sector. Also hindering performance was our exposure to Puerto Rico paper, which we had increased during the period. Although these bonds underperformed the broader market over the past six months due to budgetary concerns in Puerto Rico, they continue to offer both good liquidity and positive incremental yield characteristics. For these reasons, coupled with our expectation for a positive resolution to the budgetary concerns, we would view further weakness in Puerto Rico as a buying opportunity.

We continued to capitalize on the flattening yield curve by moving into longer-dated securities as opportunities presented themselves, while remaining within our intermediate investment parameters. This strategy helped the Fund's total return as the price of longer-dated bonds increased.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

What changes were made to the portfolio during the period?

We entered the period defensively positioned and moved toward neutral as the period progressed. Most activity in the portfolio occurred in the latter part of the six-month period as rates increased all along the yield curve. This provided an opportunity to restructure a portion of the portfolio as more attractively structured, higher-yielding alternatives became available. In

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

general, our strategy was to roll out of shorter, more seasoned holdings (generally in the five-year - 10-year range) into longer-dated bonds (generally in the 25-year range) that we believe could contribute more attractive yield and total return potential.

As detailed in the Fund's prospectus, 80% of the bonds we hold in the portfolio must have a duration between three years and 10 years. Because the yield curve measures maturity, not duration, we are able to add bonds with longer maturities without necessarily extending duration. This is accomplished through the purchase of cushion bonds, which have longer maturities but are priced and traded at their relatively short call date (generally 10 years or less). We believe this strategy will benefit Fund performance if the yield curve continues to flatten, as expected, and should allow the Fund to more closely match the maturity profile of its Lipper peers. Overall, the portfolio's average maturity was extended by a little more than a year, for an average maturity just shy of 14 years at period-end.

For the six months ended November 30, 2005, the average yield for the Fund's Auction Market Preferred Stock (AMPS) was 2.23%. The Fed's interest rate hikes clearly are having an impact on the Fund's borrowing costs. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and once more on December 13). Still, the tax-exempt yield curve remained relatively steep and continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 33.45% of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We ended the period with a fairly neutral market outlook. At its most recent meeting, the Fed modified its language slightly, removing the long-standing reference to monetary policy that it deems "accommodative." This represented the first hint that the measured monetary tightening campaign may be nearing an end. Until it does, we anticipate continued volatility as investors adjust their assumptions about the markets.

Against this backdrop, we will continue to take advantage of the volatility and higher rates in an effort to generate a competitive yield for our shareholders. One benefit of the recent upturn in long-term interest rates is that it has allowed us to restructure the portfolio in terms of coupon, call date and maturity without having a negative impact on yield, and in certain cases, with a favorable impact on yield. Over time, we believe this restructuring should translate into enhanced total return performance.

Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into the swap will default on its obligation to pay the Funds and the risk that the Funds will not be able to meet their obligations to pay the other party to the agreement.

Notes to Financial Statements

1. Significant Accounting Policies:

Muni Intermediate Duration Fund, Inc. and Muni New York Intermediate Duration Fund, Inc. (the "Funds" or individually as the "Fund") are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset values of their Common Stock on a daily basis. Each Fund's Common Stock shares are listed on the New York Stock Exchange under the symbol MUI for Muni Intermediate Duration Fund, Inc. and MNE for Muni New York Intermediate Duration Fund, Inc.

(a) Valuation of investments--Municipal bonds are traded primarily in the over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Funds under the general direction of the Board of Directors. Such valuations and procedures are reviewed periodically by the Board of Directors of the Funds. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the OTC market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund's pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Funds.

(b) Derivative financial instruments--Each Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, their exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

* Financial futures contracts--Each Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

* Options--Each Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

Notes to Financial Statements (continued)

Written and purchased options are non-income producing investments.

* Forward interest rate swaps--Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes--It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income--Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

(e) Dividends and distributions--Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Offering costs--Direct expenses relating to the public offering of each Fund's Preferred Stock were charged to capital at the time of issuance of the shares.

2. Investment Advisory Agreement and Transactions with Affiliates:

Each Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Funds. For such services, each Fund pays a monthly fee at an annual rate of .55% of the Fund's average daily net assets,

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

including proceeds from the issuance of Preferred Stock. FAM has contractually agreed to waive a portion of its fee during the first seven years of each Fund's operations ending July 31, 2010, as follows:

	Fee Waiver (As a Percentage of Average Daily Net Assets)
Years 1 through 5	.15%
Year 6	.10%
Year 7	.05%
Year 8 and thereafter	.00%

FAM has not agreed to waive any portion of its fee beyond July 31, 2010.

For the six months ended November 30, 2005, FAM earned fees and waived a portion of its fees as follows:

	Investment Advisory Fees Earned	Fees Waived
Muni Intermediate Duration Fund, Inc.	\$2,465,897	\$672,517
Muni New York Intermediate Duration Fund, Inc.	\$ 258,152	\$ 70,405

In addition, FAM has agreed to reimburse its management fee by the amount of management fees Muni New York Intermediate Duration Fund, Inc. pays to FAM indirectly through its investment in CMA New York Municipal Money Fund. For the six months ended November 30, 2005, FAM reimbursed the Fund in the amount of \$2,154.

For the six months ended November 30, 2005, Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"), an affiliate of FAM, received underwriting fees of \$350,000 in connection with the issuance of Muni Intermediate Duration Fund, Inc.'s Preferred Stock.

For the six months ended November 30, 2005, the Funds reimbursed FAM for certain accounting services. The reimbursements were as follows:

	Reimbursement
Muni Intermediate Duration Fund, Inc.	\$9,729
Muni New York Intermediate Duration Fund, Inc.	\$ 952

of FAM, PSI, and/or ML & Co.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended November 30, 2005 were as follows:

	Muni Intermediate Duration Fund, Inc.	Muni New York Intermediate Duration Fund, Inc.
Total Purchases	\$270,265,460	\$26,292,471
Total Sales	\$258,685,824	\$28,969,062

4. Stock Transactions:

Each Fund is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to reclassify any unissued shares of beneficial interest without approval of the holders of Common Stock.

Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Fund, with a par value of \$.10 per share and a liquidation preference of \$25,000 per share plus accrued and unpaid dividends, that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yields in effect at November 30, 2005 were as follows:

	Muni Intermediate Duration Fund, Inc.	Muni New York Intermediate Duration Fund, Inc.
Series M7	3.05%	--
Series T7	3.05%	--
Series TH7	2.95%	--
Series W7	2.95%	--
Series F7	2.95%	2.75%
Series TH28	2.90%	--

Muni Intermediate Duration Fund, Inc.

Shares issued and outstanding during the six months ended November 30, 2005 increased by 1,400 from the issuance of an additional series of Preferred Stock and during the year ended May 31, 2005 remained constant.

Muni New York Intermediate Duration Fund, Inc.

Shares issued and outstanding during the six months ended November 30, 2005 and the year ended May 31, 2005 remained constant.

Each Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended November 30, 2005, MLPF&S

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

earned \$333,716 relating to Muni Intermediate Duration Fund, Inc. and \$28,971 relating to Muni New York Intermediate Duration Fund, Inc., as commissions.

5. Capital Loss Carryforward:

Muni New York Intermediate Duration Fund, Inc.

On May 31, 2005, the Fund had a net capital loss carryforward of \$572,101, of which \$57,391 expires in 2012 and \$514,710 expires in 2013. This amount will be available to offset any like amounts of any future taxable gains.

6. Subsequent Event:

Each Fund paid a tax-exempt income dividend to holders of Common Stock in the amounts of \$.072000 per share and \$.060000 per share relating to Muni Intermediate Duration Fund, Inc. and Muni New York Intermediate Duration Fund, Inc., respectively, on December 29, 2005 to shareholders of record on December 15, 2005.

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

Disclosure of Investment Advisory Agreement

Activities of and Composition of the Board of Directors

All but one member of each Fund's Board of Directors is an independent director whose only affiliation with Fund Asset Management, L.P. (the "Investment Adviser") or other Merrill Lynch affiliates is as a director of each Fund and as a trustee or director of certain other funds advised by the Investment Adviser or its affiliates. The Chairmen of the Boards are also independent directors. New director nominees are chosen as nominees by a Nominating Committee consisting of independent directors. All independent directors also are members of each Board's Audit Committee and the independent directors meet in executive session at each in-person Board meeting. The Board and the Audit Committee meet in person for at least two days each quarter and conduct other in-person and telephone meetings throughout the year, some of which are formal board meetings, and some of which are informational meetings. The independent counsel to the independent directors attends all in-person

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

Board and Audit Committee meetings and other meetings at the independent directors' request.

Investment Advisory Agreements--Matters Considered by the Board

Every year, each Board considers approval of each Fund's investment advisory agreement (the "Investment Advisory Agreement"). Each Board assesses the nature, scope and quality of the services provided to each Fund by the personnel of the Investment Adviser and its affiliates, including administrative services, shareholder services, oversight of fund accounting, marketing services and assistance in meeting legal and regulatory requirements. Each Board also receives and assesses information regarding the services provided to the Fund by certain unaffiliated service providers.

At various times throughout the year, each Board also considers a range of information in connection with its oversight of the services provided by the Investment Adviser and its affiliates. Among the matters considered are: (a) fees (in addition to management fees) paid to the Investment Adviser and its affiliates by each Fund; (b) Fund operating expenses paid to third parties; (c) the resources devoted to and compliance reports relating to each Fund's investment objective, policies and restrictions, and its compliance with its Code of Ethics and the Investment Adviser's compliance policies and procedures; and (d) the nature, cost and character of non-investment management services provided by the Investment Adviser and its affiliates.

Each Board believes that the Investment Adviser is one of the most experienced global asset management firms and considers the overall services provided by the Investment Adviser to be of high quality. Each Board also believes that the Investment Adviser is financially sound and well managed and notes that the Investment Adviser is affiliated with one of America's largest financial firms. Each Board works closely with the Investment Adviser in overseeing the Investment Adviser's efforts to achieve good performance. As part of this effort, each Board discusses portfolio manager effectiveness and, when performance is not satisfactory, discusses with the Investment Adviser taking steps such as changing investment personnel.

Annual Consideration of Approvals by the Board of Directors

In the period prior to the Board meeting to consider renewal of the Investment Advisory Agreement, each Board requests and receives materials specifically relating to the Fund's Investment Advisory Agreement. These materials are prepared separately for each Fund, and include (a) information compiled by Lipper Inc. ("Lipper") on the fees and expenses and the investment performance of the Fund as compared to a comparable group of funds as classified by Lipper; (b) information comparing the Fund's market price with its net asset value per share; (c) a discussion by the Fund's portfolio management team of investment strategies used by the Fund during its most recent fiscal year; (d) information on the profitability to the Investment Adviser and its affiliates of the Investment Advisory Agreement and other relationships with the Fund; and (e) information provided by the Investment Adviser concerning services related to the valuation and pricing of Fund portfolio holdings, allocation of Fund brokerage fees, the Fund's portfolio turnover statistics, and direct and indirect benefits to the Investment Adviser and its affiliates from their relationship with the Fund.

Certain Specific Renewal Data

In connection with the most recent renewal of each Fund's Investment Advisory Agreement in November 2005, the independent directors' and Board's review

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

included the following:

Investment Adviser's Services and Fund Performance--Each Board reviewed the nature, extent and quality of services provided by the Investment Adviser, including the investment advisory services and the resulting performance of each Fund. The Boards focused primarily on the Investment Adviser's investment advisory services and each Fund's investment performance, having concluded that the other services provided to each Fund by the Investment Adviser were satisfactory. Each Board compared Fund performance - both including and excluding the effects of each Fund's fees and expenses - to the performance of a comparable group of mutual funds, and the performance of a relevant index or combination of indexes. While each Board reviews performance data quarterly, consistent with the Investment Adviser's investment goals, each Board attaches primary importance to performance over relatively long periods of time, typically three to five years. For a fund in operation for less than three years, such as each of the Funds, the Board considers performance for the life of the fund.

SEMI-ANNUAL REPORTS

NOVEMBER 30, 2005

The Board noted that for the period ended August 31, 2005, Muni Intermediate Duration Fund, Inc.'s performance was in the second quintile for the one-year period. The Board reviewed the Fund's investment objectives and strategies. The Board discussed with senior management of the Investment Adviser responsible for investment operations and the senior management of the Investment Adviser's municipal investing group the strategies being used to achieve the stated objectives. Among other things, the Board considered the size, education and experience of the Investment Adviser's investment staff, its use of technology, and the Investment Adviser's approach to training and retaining portfolio managers and other research, advisory and management personnel. The Board also reviewed the Investment Adviser's compensation policies and practices with respect to the Fund's portfolio manager. The Board also considered the experience of the Fund's portfolio manager and noted that Mr. DiMella has over ten years of experience investing in municipal securities. The Board concluded that the Fund's performance supported the continuation of the Investment Advisory Agreement.

The Board noted that Muni New York Intermediate Duration Fund, Inc.'s performance was in the fifth quintile for the one-year period ended August 31, 2005. In considering this measure of relative performance, the Board took into account the fact that the universe of comparable funds was very small. The Board reviewed the Fund's investment objectives and strategies. The Board discussed with senior management of the Investment Adviser responsible for investment operations and the senior management of the Investment Adviser's municipal investing group the strategies being used to achieve the stated objectives. Among other things, the Board considered the size, education and experience of the Investment Adviser's investment staff, its use of technology, and the Investment Adviser's approach to training and retaining portfolio managers and other research, advisory and management personnel. The Board also reviewed the Investment Adviser's compensation policies and practices with respect to the Funds' portfolio manager. The Board also considered the experience of the Funds' portfolio manager and noted that Mr. Browse has over five years of experience investing in municipal securities. The Board concluded that the Fund's performance supported the continuation of the Investment Advisory Agreement.

Management Fees and Other Expenses--Each Board reviews the Fund's contractual management fee rate and actual management fee rate as a percentage of total

Edgar Filing: MUNI INTERMEDIATE DURATION FUND INC - Form N-CSRS

assets at common asset levels - the actual rate includes advisory and administrative service fees and the effects of any fee waivers - compared to the other funds in its Lipper category. It also compares the Fund's total expenses to those of other comparable funds. The Investment Adviser noted that it did not have clients other than investment companies with similar investment mandates. With respect to Muni Intermediate Duration Fund, Inc. the Board noted that the contractual and actual management fee rates, as well as total expenses, were lower than the median fees charged by comparable funds, as determined by Lipper. With respect to Muni New York Intermediate Duration Fund, Inc. the Board noted that contractual and actual management fee rates, as well as total expenses, were equal to the median fees charged by comparable funds, as determined by Lipper. Each Board concluded that the Fund's management fee and fee rate and overall expense ratio are reasonable compared to those of other comparable funds.

Profitability--Each Board considers the cost of the services provided to the Fund by the Investment Adviser, and the Investment Adviser's and its affiliates' profits relating to the management and distribution of the Fund and the MLIM/FAM-advised funds. As part of its analysis, each Board reviewed the Investment Adviser's methodology in allocating its costs to the management of the Fund and concluded that there was a reasonable basis for the allocation. The Boards also considered federal court decisions discussing an investment adviser's profitability and profitability levels considered to be reasonable in those decisions. Each Board believes the Investment Adviser's profits are reasonable in relation to the nature and quality of services provided.

Economies of Scale--Each Board considered the extent to which economies of scale might be realized as the assets of a Fund increase and whether there should be changes in the management fee rate or structure in order to enable the Fund to participate in these economies of scale. Each Board considered economies of scale to the extent applicable to each Fund's closed-end structure and determined that each Fund appropriately benefits from any economies of scale and no changes were currently necessary.

Conclusion

After the independent directors deliberated in executive session, each entire Board, including all of the independent directors, approved the renewal of the existing Investment Advisory Agreement, concluding that the advisory fee was reasonable in relation to the services provided and that a contract renewal was in the best interests of the shareholders.
