RADVISION's Data Collaboration Server (DCS)
for Application Sharing Now Available as Windows NT(R)Application

DCS-30 ENHANCES MULTIPOINT VIDEOCONFERENCING COMMUNICATION BY ENABLING
TRANSPARENT T.120 DATA SHARING CAPABILITIES

Mahwah, New Jersey, April 3, 2001 -- RADVISION (NASDAQ: RVSN), the leading provider of award-winning, industry-standard products and technology for real-time voice and video over IP (V2oIPTM), today announced the availability of the DCS-30 software for real-time data collaboration and application sharing for converged voice, video and data IP networks. The standalone DCS-30 application is designed to work with RADVISION's OnLAN-TM and viaIPSM multipoint conferencing units (MCU) and runs on any Microsoft(R) Windows NT Server.

RADVISION's DCS-30 allows videoconferencing participants to view diagrams, graphic presentations and slide lectures simultaneously with audio or video streams. Additional uses include text chats, whiteboard exchanges or rapid file transfers during a multipoint videoconference of three or more participants.

"We are constantly working to provide our customers with platforms for deploying enhanced IP-centric services for next generation communication networks," said Dr. Michelle Blank, vice president of galactic marketing for RADVISION. "Our data collaboration software enables transparent multipoint data sharing between conference participants. It is the simplest application for end users to use for real-time collaboration."

The DCS-30 enables application sharing, using the T.120 data collaboration standard, for up to 30 conferencing participants. The DCS was initially developed as an embedded application for RADVISION's multifunction, chassis-based viaIP platform. The DCS-30 is now available as a standalone application to run on any NT Server. RADVISION is currently offering the standalone DCS-30 application free with every OnLAN-323 or viaIP MCU card purchased now until the end of June 2001. More information on this offer can be found at the company Web site at www.radvision.com.
