Par-la-Ville Place, 14 Par-la-Ville Road, Hamilton, HM 08, Bermuda
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): ____

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): ____

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934. Yes No

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b):
82-_____.

INFORMATION CONTAINED IN THIS FORM 6-K REPORT

Attached as Exhibit 1 is a copy of the press release of Frontline Ltd. (the “Company”) dated February 13, 2008, announcing the Company’s preliminary financial results for the fourth quarter and year ended December 31, 2007.

Exhibit 1

FRONTLINE LTD.

PRELIMINARY FOURTH QUARTER AND FINANCIAL YEAR 2007 RESULTS

Highlights

- Frontline reports net income of \$202.3 million and earnings per share of \$2.70 for the fourth quarter of 2007, including gain on sale of assets and securities of \$144.0 million
- Frontline reports annual net income in 2007 of \$574.4 million and earning per share of \$7.68, including gain on sale of assets and securities of \$323.2 million
 - Frontline announces a cash dividend of \$2.00 per share for the fourth quarter of 2007
- Frontline has paid a total dividend of \$767.8 million in 2007, including the spin off of Ship Finance in the first quarter of 2007
- In line with our strategy to reduce exposure to single hull tankers, Frontline has agreed to sell three single hull vessels in the fourth quarter of 2007. Twelve single hull vessels have been sold or committed to be sold in 2007

Preliminary Fourth Quarter and Financial Year 2007 Results

The Board of Frontline Ltd. (the “Company” or “Frontline”) announces net income of \$202.3 million for the fourth quarter of 2007, equivalent to earnings per share of \$2.70. Operating income for the quarter was \$152.7 million including a gain on sale of assets of \$53.4 million. This gain consists of \$37.0 million relating to the delivery of the second converted heavy lift vessel to Dockwise Ltd. (“Dockwise”) and \$16.4 million relating to the termination of the lease for the Front Birch.

The reported earnings reflect a stronger spot market. The average daily time charter equivalents (“TCEs”) earned in the spot and period market in the fourth quarter by the Company’s VLCCs, Suezmax tankers and Suezmax OBO carriers were \$45,700, \$33,100 and \$42,400, respectively compared with \$36,000, \$25,000 and \$41,300 respectively in the third quarter. The results show a continued differential in earnings between single and double hull tonnage. The spot earnings for the Company’s double hull VLCC and Suezmax vessels were \$43,600 and \$37,500 in the fourth quarter, compared to \$35,500 and \$28,300 in the third quarter.

Profit share expense of \$16.1 million has been recorded in the fourth quarter as a result of the profit sharing agreement with Ship Finance International Limited (“Ship Finance”) compared to \$5.5 million in the third quarter.

Interest income was \$14.4 million in the fourth quarter, of which \$7.6 million relates to restricted deposits held by subsidiaries reported in Independent Tankers Corporation (“ITC”). Interest expense, net of capitalized interest, was \$58.1 million in the fourth quarter of which \$14.0 million relates to ITC and \$44.1 million relates to the capital lease interest expense.

Other financial items in the fourth quarter includes a \$48.7 million gain on the sale of the Company's entire shareholding in Dockwise and a \$41.9 million gain on the sale of the Company's entire shareholding in IMAREX ASA ("IMAREX").

Frontline announces net income of \$574.4 million for the year ended December 31, 2007, equivalent to earnings per share of \$7.68. The average TCEs earned in the spot and period market by the Company's VLCCs, Suezmax tankers, and Suezmax OBO carriers for the year ended December 31, 2007 were \$45,700, \$33,000 and \$39,700, respectively.

As of December 31, 2007, the Company had total cash and cash equivalents of \$819.8 million which includes \$651.4 million of restricted cash. Restricted cash includes \$422.8 million relating to deposits in ITC and \$228.6 million in Frontline Shipping Limited and Frontline Shipping II Limited which are restricted under the charter agreements with Ship Finance.

The financial statements for the fourth quarter of 2006 have been restated to reflect the revised accounting treatment for three entities within the ITC group which were previously fully consolidated but are now being accounted for as investments under the equity method. The restatement has no effect on net income.

As a result of the spin-off and subsequent deconsolidation of Ship Finance in the first quarter of 2007, Frontline no longer reports vessels leased from Ship Finance as owned vessels, but rather as vessels held under capital lease. Additionally, Frontline no longer reports results relating to containerships and rig that were consolidated by Ship Finance since the Company will not have continued involvement with these vessels. Consequently, the results for the years ended December 31, 2007 and 2006 have been reclassified to reflect discontinued operations related to these containerships and rigs.

As of February 2008, the Company has average total cash cost breakeven rates on a TCE basis for VLCCs and Suezmaxes of approximately \$31,400 and \$22,500, respectively.

Sale of Assets

In line with our strategy to reduce exposure to single hull tonnage, Frontline has in the fourth quarter of 2007 agreed with Ship Finance to terminate the long term charter parties between the companies for the single hull VLCC Front Duchess and for the double side single bottom Suezmax tankers Front Birch and Front Maple. Ship Finance has simultaneously sold the vessels. Frontline has received and recognized a compensation payment of approximately \$16.4 million for the early termination of the charter party regarding Front Birch in the fourth quarter of 2007 and will receive and recognize a further \$41.8 million in the first quarter of 2008 relating to Front Duchess and Front Maple.

In October 2007, Frontline announced the sale of its entire holding of 34,976,500 shares in Dockwise. The shares were sold at a gross price of NOK 25 per share, with net proceeds of approximately \$157 million. Frontline has recorded a gain of \$48.7 million in the fourth quarter of 2007 as a result of this sale. This is reported in other financial items. Simultaneously with the sale of the shares, Frontline declared an interim extraordinary dividend of \$1.75 per share which was paid on October 24, 2007. In the second quarter of 2007, Frontline recorded a gain on the issuance of shares by Dockwise of \$43.7 million and in the second and fourth quarter of 2007 Frontline recorded a gain on delivery of vessels to Dockwise in an amount of \$60.7 million. Further gains will be recorded at the time of delivery of the two remaining vessels to Dockwise, which is estimated to be in the second quarter of 2008.

In November 2007, Frontline sold its entire holding of 1,714,544 shares in IMAREX to NYMEX Holdings, Inc. The sale price was NOK 160 per share, with proceeds of approximately \$51 million.

Frontline has recorded a gain of \$41.9 million in the fourth quarter of 2007 as a result of this sale. This is reported in other financial items.

Other Matters

Frontline announces today that it has agreed to invest \$20 million in NAVIG8 LIMITED (“Navig8”) against the issue of new share capital representing a total of 15.8% stake in the company. Navig8 controls approximately 30 tankers representing approximately 1.4 million dwt, including newbuildings on order. Navig8 actively trades a time-charter fleet, owns and invests in tonnage, commercially and technically manages vessels for third parties and trades in the freight-derivatives market. The investment should be considered as purely financial, but gives Frontline at the same time a foothold in the Clean Petroleum Product market.

In January 2008, Golden President Shipping Corporation, a 100% subsidiary of Golden Ocean Group Limited (“Golden Ocean”), had a full and final win in the court case against Bocimar N.V. on the Channel Alliance Time Charter Party and was awarded \$14.7 million plus interest thereon in an amount of \$2.3 million. The amount of \$14.7 million was originally guaranteed by Frontline to Golden Ocean in connection with the spin-off in December 2004, and was later paid to Golden Ocean as it became due according to the charter party. The full settlement from Bocimar N.V. is therefore due to Frontline. The proceeds are expected to be recognized in the first quarter of 2008.

On February 13, 2008, the Board declared a dividend of \$2.00 per share. The record date for the dividend is February 26, 2008, ex dividend date is February 22, 2008 and the dividend will be paid on or about March 10, 2008.

74,825,169 ordinary shares were outstanding as of December 31, 2007, and the weighted average number of shares outstanding for the quarter was also 74,825,169.

The Market

The tanker market was tranquil at the start of the fourth quarter with average VLCC earnings at about \$27,500 per day for the first half of the quarter. Markets then spiked for the VLCCs to a high of about \$230,000 per day mid December for later decreasing, according to Clarksons.

The average market rate for VLCCs from MEG to Japan in the fourth quarter was approximately WS 117 (\$78,900 per day) compared to approximately WS 56 (\$22,500 per day) in the third quarter of 2007. The average rate for Suezmaxes from WAF to USAC in the fourth quarter of 2007 was about WS 140 (\$45,800 per day), compared to about WS 87 (\$21,400 per day) in the third quarter of 2007.

Bunkers at Fujairah averaged about \$463/mt in the fourth quarter with a low of about \$399/mt and a high of about \$512/mt.

The International Energy Agency (IEA) reported in February 2008 an average OPEC oil production, including Iraq, of 31.6 million barrels per day during the fourth quarter of the year, a 0.95 million barrels per day increase from the third quarter. The next OPEC meeting is scheduled to take place on March 5, 2008.

IEA further estimates that world oil demand averaged 87.2 million barrels per day in the fourth quarter, a 1.9 percent increase from the third quarter of 2007. IEA predicts that the average demand for 2008 in total will be 87.6 million barrels per day, or a 1.9 percent growth from 2007, hence showing a firm belief in continued demand growth.

According to Fearnleys, the VLCC fleet totalled 489 vessels at the end of the fourth quarter with seven deliveries during the quarter. There are 40 deliveries expected in 2008. The total orderbook amounted to 176 vessels at the end of the fourth quarter, up from 172 vessels after the third quarter of 2007. The current orderbook represents about 36 percent of the VLCC fleet. Five VLCCs were deleted from the trading fleet whilst eleven VLCCs were ordered during the quarter. The single hull fleet amounted to 137 vessels at the end of the fourth quarter.

The Suezmax fleet totalled 348 vessels at the end of the quarter, down from 350 vessels after the third quarter of 2007, a 0.6 percent fleet decrease over the quarter. Five Suezmaxes were deleted from the trading fleet, no Suezmaxes were ordered and 3 deliveries took place in the quarter. The total orderbook amounted to 134 vessels at the end of the quarter, a decrease of one from the end of the third quarter. There are 19 deliveries expected in 2008. The orderbook represents approximately 39 percent of the current Suezmax fleet. The single hull fleet amounted to 47 vessels at the end of the fourth quarter.

Strategy

Frontline's core strategy is to maintain its position as a world leading operator and charterer of modern, high quality oil tankers. The majority of its double hull tonnage is operating in the spot market. All of its remaining single hull VLCC's have been fixed out on time charters for the remainder of the fixed committed period and all of the Company's eight OBO carriers have been fixed out on medium to long term charters. Through sales of vessels and time charters, the Company has reduced the single hull exposure to only one Suezmax vessel operating in the spot market.

Frontline has four VLCC and eight Suezmax newbuildings on order, confirming its position as a leading operator of quality Suezmax and VLCC tonnage. The total investment of the newbuilding program is approximately \$1 billion. As of December 31, 2007, the Company has paid \$104 million and expects to pay further approximately \$93 million in the first quarter of 2008 before a planned drawdown of financing which will be equal to 80 percent of the contractual prices. Based on recent transactions the market values of the newbuilding contracts are significantly higher than the original contractual newbuilding prices.

Frontline will continue to look for attractive opportunities in the Sales and Purchase market as well as in the charter market.

The Company has for a time evaluated opportunities to enhance the value of its investment in ITC and has decided to do a separate listing of ITC and to distribute 20 percent to the eligible Frontline shareholders during the first or second quarter of 2008. The Company will provide full details of the distribution in the near future.

Outlook

The tanker market improved considerably in November 2007 and although tanker rates have come off significantly since their peak in December 2007, they are still at good levels in the first quarter of 2008, with average TCE rates for modern VLCCs, according to Clarkson, of \$102,000 per day so far this quarter compared to \$58,900 per day in the first quarter of 2007. The first quarter of 2008 started with spot fixtures in the VLCC and Suezmax segment of \$197,800 and \$104,100 per day, respectively, and present indication from Clarkson in the VLCC and Suezmax segment is \$79,000 and \$40,200 per day, respectively.

Although the US economy is showing signs of weakness, the world economy is still strong with a forecasted global GDP growth of 4.1 percent for 2008. IEA projects oil consumption to rise by 1.9 percent in 2008. The 2008 forecasts, however, may be too optimistic and further revised if forthcoming assessments from the IMF and the OECD point to a weaker than expected outlook for the US economy, which may be only partially offset by strong GDP growth in the Middle East and China.

The overall order book for tankers has now approached 37 percent of the current fleet. The impact from the new vessels will be mitigated by the fact that the order book is spread over four years, that 22 percent of the fleet is non double hull, combined with increased inefficiency of the single hull fleet caused by reduced acceptance by major charterers to employ such tonnage. Korean and Philippine officials have stated their reluctance to use single hull tonnage in the future. Further, Frontline estimates that about 40 VLCCs will be converted for non-trading purposes in 2008, about 90 percent to VLOC and the balance to FSO/FPSO. It is also likely that some of the tonnage will be delayed as a function of the uncertainty of the delivery schedule for several of the yards due to financing issues.

Frontlines newbuilding program has attractive terms, seems well timed and provides for future growth as we divest our older, single hull fleet. These divestitures have resulted in Frontline having low exposure to single hull tonnage. Our charter coverage is estimated to 39 percent and 30 percent of the fleet in 2008 and 2009, respectively. The Company has low cash breakeven rates which reduces the financial risk and creates a good platform for cash generation.

The recent development which have included tighter trading restrictions on single hull tonnage, more conversion of tankers to dry, financial uncertainty linked to yards newbuilding progress and stronger spot rates have all positively influenced the short as well as the long term outlook for the tanker market.

The results and the liquidity in the first quarter of 2008 will be positively influenced by payment of \$ 41.8 million from Ship Finance for termination of two charters, and \$17.0 million in payment from Bocimar N.V. Based on the regular trading results so far in the first quarter of 2008, the Board expects a strong result including continued high dividend payment for the first quarter of 2008.

Forward Looking Statements

This press release contains forward looking statements. These statements are based upon various assumptions, many of which are based, in turn, upon further assumptions, including Frontline management's examination of historical operating trends. Although Frontline believes that these assumptions were reasonable when made, because assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond its control, Frontline cannot give assurance that it will achieve or accomplish these expectations, beliefs or intentions.

Important factors that, in the Company's view, could cause actual results to differ materially from those discussed in this press release include the strength of world economies and currencies, general market conditions including fluctuations in charter hire rates and vessel values, changes in demand in the tanker market as a result of changes in OPEC's petroleum production levels and world wide oil consumption and storage, changes in the Company's operating expenses including bunker prices, drydocking and insurance costs, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, and other important factors described from time to time in the reports filed by the Company with the United States Securities and Exchange Commission.
