SUPPLEMENTAL NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The unaudited interim consolidated financial statements and related notes have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to such rules and regulations. The accompanying unaudited interim consolidated financial

Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

statements and related notes should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's most recent Form 10-K covering the year ended December 31, 2001.

The information furnished reflects, in the opinion of the management of Arrhythmia Research Technology, Inc. ("ART"), all adjustments necessary for a fair presentation of the financial results for the interim period presented.

Interim results are subject to year-end adjustments and audit of year-end results by independent certified public accountants.

	-----	-----
Total	\$ 992,354	\$ 897,087
	=====	=====

Goodwill:

Effective January 1, 2002 the Company adopted FASB Statements No.141, Business Combinations ("SFAS 141") and No. 142, Goodwill and Other Intangible Assets ("SFAS 142"). SFAS 141 requires the use of the purchase method of accounting and prohibits the use of the pooling-of-interest method of accounting for business combinations initiated after June 30, 2001. SFAS 141 also requires that the Company recognize acquired intangible assets apart from goodwill if the acquired intangible assets meet certain criteria. SFAS 141 applies to all business combinations initiated after June 30, 2001 and for purchase business combinations completed on or after July 1, 2001. It also requires, upon adoption of SFAS 142, that the Company reclassify the carrying amounts of intangible assets and goodwill based on the criteria in SFAS 141.

SFAS 142 requires, among other things, that companies no longer amortize goodwill, but instead test goodwill for impairment at least annually. In addition, SFAS 142, requires that the Company identify reporting units for the purpose of assessing potential future impairments of goodwill, reassess the useful lives of other existing recognized intangible assets, and cease amortization of intangible assets with an indefinite useful life. An intangible asset with an indefinite useful life should be tested for impairment in accordance with the guidelines in SFAS 142. SFAS 142 is required to be applied to all goodwill and other intangible assets regardless of when those assets were initially recognized.

As of January 1, 2002, the Company's goodwill of \$1,326,000 was composed of \$82,000 associated with attaching machine assets purchased from Newmark, Inc. in 1997 and \$1,244,000 associated with the acquisition of Micron Products, Inc. in 1992. As a result of the transitional impairment tests, the goodwill associated with the Newmark agreement was determined to be impaired as determined by using the present value of future cash flows solely related to attaching machines. The balance of \$82,000 (\$57,000 net of tax) is being reported as the cumulative effect of change in accounting principle for the

Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

three months ended March 31, 2002. The diminishing number of leases and sales of attaching machines used for the assembly of disposable medical electrodes in this mature industry lead to the impairment of Newmark goodwill. No adjustment to the \$1,244,000 balance of goodwill associated with the Micron Products acquisition was deemed necessary as of March 31, 2002.

7

Goodwill-(continued)

The effect on reported net income due to the cumulative effect of change in accounting principle and the discontinuance of goodwill amortization is as follows:

	Three months ended Mar	2002	2001

Reported net income	\$	145,021	\$ 3
Cumulative effect of change in accounting principle		57,000	
Goodwill amortization		-	3

Earnings per share (basic and dilutive) before cumulative effect of change in accounting principle and discontinuance of goodwill amortization	\$.07	\$
	=====		

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Liquidity and Capital Resources

Working capital was \$2,968,985 at March 31, 2002 compared to \$2,869,344 at December 31, 2001, an increase of \$99,641. Inventory has increased \$95,267 since December 31, 2001 of which \$37,000 is in preparation for a new supply agreement for radiotranslucent sensors and snaps in 2002. The balance of the increase in inventory was due to March 2002 shipments being 30% below forecast which the Company believes will be realized over the remainder of the year.

The Company has a \$1,000,000 revolving credit line with a bank that was established in December 1999. However, the Company has never made any borrowings under the credit line due to sufficient liquidity provided by its operations. The credit line, which is renewable in June 2002, provides for borrowings to be collateralized by accounts receivable and inventory.

Results of Operations

Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

Revenue for the first quarter ended March 31, 2002 was \$1,915,097 or 9% higher than those for the quarter ended March 31, 2001, which were \$1,753,974. Sales of Micron's silver plated sensors accounted for the revenue increase in the first quarter of 2002 in response to an increase in customer orders. No significant sales of ART's signal-averaging ECG products were recorded in the first quarter or are forecast for the year 2002.

Domestic and foreign sales for the first quarter are as follows:

	2002	%	First Quarter
Domestic	\$ 331,741	18	\$
Foreign	1,583,356	82	
Total	\$ 1,915,097	100	\$

Cost of sales was 67% of revenue for the quarter ended March 31, 2002 compared to 71% for the same period in 2001. The change in the first quarter of 2002 was due to an 11% increase in Micron's production of sensors. The increased volume has reduced the unit cost of sensors by a greater number of pieces absorbing more of the fixed costs such as payroll, payroll benefits and depreciation. Material costs have remained stable over 2000, 2001 and early 2002.

8

Selling and marketing expense was \$10,701 lower in the first quarter of 2002 compared to the first quarter of 2001 as a result of the elimination of a direct sales staff and marketing support for ART signal-averaging ECG products in 2001. The Company hopes in 2002 to market ART's software through license or sales agreements not requiring new sales personnel.

General and administrative expense was \$43,197 lower in the first quarter of 2002 compared to the first quarter of 2001, reflecting the savings associated with the closing of the Austin, Texas office in 2001.

Research and development expense was \$20,794 lower in the first quarter of 2002 compared to the first quarter of 2001 as the conversion and enhancements to ART's principal product, Predictor(R) 7, have been completed and no significant work is scheduled for other products in 2002.

Other income (expense) resulted in lower income of \$5,613 in the first quarter of 2002 compared to the first quarter of 2001. The decrease is attributed to the drop in market rates (\$20,529) on the Company's fixed return investments. The interest income decrease was partially offset by a \$14,456 expense reduction in the amortization of the Bond discount due to the early retirement of a majority of the 11% Bonds in December 2001.

Income taxes as a percent of income before income taxes and cumulative effect of change in accounting principle (net of tax) were 25% and 19% for the quarters ended March 31, 2002 and 2001, the lower rate reflecting a

Edgar Filing: ARRHYTHMIA RESEARCH TECHNOLOGY INC /DE/ - Form 10-Q

non-recurring state tax credit recorded in 2001.

Safe Harbor Under the Private Securities Litigation Reform Act of 1995.

Any forward looking statements made herein are based on current expectations of the Company that involves a number of risks and uncertainties and should not be considered as guarantees of future performance. These statements are made under the Safe Harbor Provisions of the Private Securities Litigation Reform Act of 1995. The factors that could cause actual results to differ materially include: interruptions or cancellation of existing contracts, impact of competitive products and pricing, product demand and market acceptance risks, the presence of competitors with greater financial resources than the Company, product development and commercialization risks and an inability to arrange additional debt or equity financing.
