PART I—FINANCIAL INFORMATION

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”)

This discussion contains forward-looking statements that are based upon management’s current expectations and are subject to significant uncertainties and changes in circumstances. Please review “Forward-Looking Statements” for more information on the forward-looking statements in this Quarterly Report on Form 10-Q (“this Report”). Our actual results may differ materially from those included in these forward-looking statements due to a variety of factors including, but not limited to, those described in “Part II—Item 1A. Risk Factors” in this Report and in “Part I—Item 1A. Risk Factors” in our 2014 Annual Report on Form 10-K (“2014 Form 10-K”). Unless otherwise specified, references to notes to our consolidated financial statements refer to the notes to our unaudited consolidated financial statements as of June 30, 2015 included in this Report.

Management monitors a variety of key indicators to evaluate our business results and financial condition. The following MD&A is intended to provide the reader with an understanding of our results of operations, financial condition and liquidity by focusing on changes from year to year in certain key measures used by management to evaluate performance, such as profitability, growth and credit quality metrics. MD&A is provided as a supplement to, and should be read in conjunction with, our unaudited consolidated financial statements and related notes in this Report and the more detailed information contained in our 2014 Form 10-K.

INTRODUCTION

We are a diversified financial services holding company with banking and non-banking subsidiaries. Capital One Financial Corporation and its subsidiaries (the “Company”) offer a broad array of financial products and services to consumers, small businesses and commercial clients through branches, the internet and other distribution channels. As of June 30, 2015, our principal subsidiaries included:

- Capital One Bank (USA), National Association (“COBNA”), which offers credit and debit card products, other lending products and deposit products; and
- Capital One, National Association (“CONA”), which offers a broad spectrum of banking products and financial services to consumers, small businesses and commercial clients.

The Company is hereafter collectively referred to as “we,” “us” or “our.” COBNA and CONA are collectively referred to as the “Banks.” Certain business terms used in this document are defined in the “Glossary and Acronyms” section and should be read in conjunction with the consolidated financial statements included in this Report.

We had total loans held for investment of \$209.7 billion, deposits of \$208.8 billion and stockholders’ equity of \$46.7 billion as of June 30, 2015, compared to total loans held for investment of \$208.3 billion, deposits of \$205.5 billion and stockholders’ equity of \$45.1 billion as of December 31, 2014.

Our consolidated total net revenues are derived primarily from lending to consumer and commercial customers net of funding costs associated with interest on deposits, short-term borrowings and long-term debt. We also earn non-interest income which primarily consists of interchange income net of rewards expenses and service charges and other customer-related fees. Our expenses primarily consist of the provision for credit losses, operating expenses (including salaries and associate benefits, occupancy and equipment costs, professional services, communication and data processing expenses and other miscellaneous expenses), marketing expenses and income taxes.

Our principal operations are currently organized for management reporting purposes into three major business segments, which are defined based on the products and services provided or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. The operations of acquired businesses have been integrated into our existing business segments. Certain activities that are not part of a segment, such as management of our corporate investment portfolio and asset/liability management by our centralized Corporate Treasury group, are included in the Other category.

• Credit Card: Consists of our domestic consumer and small business card lending, national closed-end installment lending and the international card lending businesses in Canada and the United Kingdom (“U.K.”).

Table of Contents

Consumer Banking: Consists of our branch-based lending and deposit gathering activities for consumers and small businesses and national deposit gathering, auto lending and consumer home loan lending and servicing activities.
Commercial Banking: Consists of our lending, deposit gathering and servicing activities provided to commercial real estate and commercial and industrial customers. Our commercial and industrial customers typically include companies with annual revenues between \$10 million and \$1 billion.

Recent Acquisitions and Dispositions

We regularly explore and evaluate opportunities to acquire financial services companies and financial assets, including credit card and other loan portfolios, and enter into strategic partnerships as part of our growth strategy. We also explore opportunities to acquire digital companies and related assets to improve our information technology infrastructure and to deliver on our digital strategy. We also regularly consider the potential disposition of certain assets, branches, partnership agreements or lines of business. We may issue equity or debt in connection with acquisitions, including public offerings, to fund such acquisitions. We did not have any significant acquisitions or dispositions in 2014 or the first six months of 2015.

Table of Contents

SUMMARY OF SELECTED FINANCIAL DATA

The following table presents selected consolidated financial data from our results of operations for the second quarter and first six months of 2015 and 2014, and selected comparative balance sheet data as of June 30, 2015 and December 31, 2014. We also provide selected key metrics we use in evaluating our performance. Certain prior period amounts have been recast to conform to the current period presentation.

- As of January 1, 2015, we changed our accounting principle to move from a gross basis of presentation to a net basis, for presenting qualifying derivative assets and liabilities, as well as the related right to reclaim cash collateral or obligation to return cash collateral. See “Note 1—Summary of Significant Accounting Policies” for additional information. Prior period results, excluding regulatory ratios, have been recast to conform to this presentation.
- (1) Includes acquisition-related costs of \$8 million and \$15 million in the second quarter and first six months of 2015, respectively, and \$18 million and \$41 million in the second quarter and first six months of 2014, respectively.
- (2) Acquisition-related costs include transaction costs, legal and other professional or consulting fees, restructuring costs, and integration expense.
- (3) Consists of credit card purchase transactions, net of returns, for the period for both loans classified as held for investment and loans classified as held for sale. Excludes cash advance and balance transfer transactions.
- (4) Calculated based on annualized total net revenue for the period divided by average interest-earning assets for the period.
- (5) Calculated based on annualized net interest income for the period divided by average interest-earning assets for the period.

Table of Contents

(6) Calculated based on annualized income from continuing operations, net of tax, for the period divided by average tangible assets for the period. See “MD&A—Table A—Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures” for additional information.

(7) Calculated based on the annualized sum of (i) income from continuing operations, net of tax; (ii) less dividends and undistributed earnings allocated to participating securities; (iii) less preferred stock dividends, for the period, divided by average common equity. Our calculation of return on average common equity may not be comparable to similarly titled measures reported by other companies.

(8) Calculated based on the annualized sum of (i) income from continuing operations, net of tax; (ii) less dividends and undistributed earnings allocated to participating securities; (iii) less preferred stock dividends, for the period, divided by average TCE. Our calculation of return on average TCE may not be comparable to similarly titled measures reported by other companies. See “MD&A—Table A—Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures” for additional information.

(9) Calculated based on annualized non-interest expense for the period divided by average loans held for investment for the period.

(10) Calculated based on non-interest expense for the period divided by total net revenue for the period.

(11) Calculated based on annualized net charge-offs for the period divided by average loans held for investment for the period.

(12) Calculation of ratio adjusted to exclude Acquired Loans. See “MD&A—Glossary and Acronyms” for the definition of Acquired Loans.

The tangible common equity (“TCE”) ratio is a non-GAAP measure calculated as TCE divided by tangible assets.

(13) See “MD&A—Table A—Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures” for the calculation of this measure and reconciliation to the comparative GAAP measure.

Supplementary leverage ratio is a regulatory capital measure calculated based on Tier 1 capital under the Basel III

(14) Standardized Approach divided by total leverage exposure. See “MD&A—Capital Management” for additional information.

EXECUTIVE SUMMARY AND BUSINESS OUTLOOK

We reported net income of \$863 million (\$1.50 per diluted common share) on total net revenue of \$5.7 billion and net income of \$2.0 billion (\$3.51 per diluted common share) on total net revenue of \$11.3 billion for the second quarter and first six months of 2015, respectively. In comparison, we reported net income of \$1.2 billion (\$2.04 per diluted common share) on total net revenue of \$5.5 billion and net income of \$2.3 billion (\$4.00 per diluted common share) on total net revenue of \$10.8 billion for the second quarter and first six months of 2014, respectively.

Our common equity Tier 1 capital ratio, as calculated under the Basel III Standardized Approach, including transition provisions, was 12.1% and 12.5% as of June 30, 2015 and December 31, 2014, respectively. We formally entered parallel run for Basel III Advanced Approaches on January 1, 2015. See “Capital Management” below for additional information.

On March 11, 2015, we announced that our Board of Directors authorized the repurchase of up to \$3.125 billion of shares of our common stock (the “2015 Stock Repurchase Program”). Through the end of the second quarter of 2015, we repurchased approximately \$625 million of common stock and expect to complete the 2015 Stock Repurchase Program by the end of the second quarter of 2016. See “Capital Management” below for additional information.

Below are additional highlights of our performance in the second quarter and first six months of 2015. These highlights are generally based on a comparison between the results of the second quarter and first six months of 2015 and 2014, except as otherwise noted. The changes in our financial condition and credit performance are generally based on our financial condition and credit performance as of June 30, 2015, compared to our financial condition and credit performance as of December 31, 2014. We provide a more detailed discussion of our financial performance in the sections following this “Executive Summary and Business Outlook.”

Total Company

€arnings: Our net income decreased by \$331 million, or 28%, to \$863 million in the second quarter of 2015, compared to the second quarter of 2014, and decreased by \$332 million, or 14%, to \$2.0 billion in the first six months

of 2015, compared to the first six months of 2014. The decreases in net income from continuing operations were driven by (i) an increase in the provision for credit losses due to the change to an allowance build in the second quarter and first six months of 2015 from an allowance release in the second quarter and first six months of 2014; and (ii) an increase in non-interest expense driven by higher operating and marketing expenses associated with loan growth, and continued technology and infrastructure investments. We recorded restructuring charges of \$157 million for severance and related benefits pursuant to our ongoing benefit programs, which included \$147 million as a result of the realignment of our workforce, and a \$78 million build in the U.K. Payment Protection Insurance customer refund reserve (“U.K. PPI Reserve”), reflecting our updated estimate of future complaint levels. These decreases were partially offset by (i) higher interest income due to growth in our credit card, auto and commercial loan portfolios partially offset by the planned run-off of our acquired home loan portfolio; and (ii) an increase in non-interest income primarily attributable to higher net interchange fees partially offset by lower customer-related fees primarily due to the continued run-off of our payment protection products in our Domestic Card business. The increase in net income from discontinued operations was primarily driven by a reduction in our mortgage representation and warranty reserve in the second quarter of 2015 resulting from favorable industry legal developments.

Table of Contents

Loans Held for Investment: Period-end loans held for investment increased by \$1.4 billion to \$209.7 billion as of June 30, 2015 from December 31, 2014, primarily driven by loan growth in our credit card, auto and commercial loan portfolios, partially offset by the planned run-off of our acquired home loan portfolio and the expected seasonal paydowns in our credit card loan portfolio. Average loans held for investment increased by \$11.3 billion to \$206.3 billion in the second quarter of 2015, compared to the second quarter of 2014, and increased by \$11.4 billion to \$205.8 billion in the first six months of 2015, compared to the first six months of 2014, primarily due to continued growth in our credit card, auto and commercial loan portfolios, partially offset by the planned run-off of our acquired home loan portfolio.

Net Charge-off and Delinquency Statistics: Our net charge-off rate decreased by 3 basis points to 1.64% in the second quarter of 2015, compared to the second quarter of 2014. Our net charge-off rate decreased by 11 basis points to 1.68%, in the first six months of 2015, compared to the first six months of 2014, primarily due to higher average loan balances. Net charge-off rates remained low compared to our historic trends due to economic improvement and portfolio seasoning in our credit card loan portfolio. Our 30+ day delinquency rate decreased by 26 basis points to 2.65% as of June 30, 2015, from 2.91% as of December 31, 2014, primarily due to seasonally lower delinquency inventories. We provide additional information on our credit quality metrics below under “Business Segment Financial Performance” and “Credit Risk Profile.”

Allowance for Loan and Lease Losses: Our allowance for loan and lease losses increased by \$293 million to \$4.7 billion as of June 30, 2015 from December 31, 2014. The increase in the allowance for loan and lease losses was primarily driven by continued loan growth in our domestic credit card and auto loan portfolios, higher loss expectations on recent auto loan originations as well as adverse market conditions impacting certain oil and gas portfolios and certain components of our transportation loan portfolio within our Commercial Banking business. These factors also contributed to a higher allowance coverage ratio, which increased by 13 basis points to 2.23% as of June 30, 2015 from December 31, 2014.

Representation and Warranty Reserve: The mortgage representation and warranty reserve decreased by \$95 million, or 13%, to \$636 million as of June 30, 2015 from December 31, 2014. The decrease in the representation and warranty reserve was primarily driven by settlements and favorable industry legal developments. We recorded a benefit for mortgage representation and warranty losses of \$54 million (which includes a benefit of \$8 million before taxes in continuing operations and a benefit of \$46 million before taxes in discontinued operations) in the first six months of 2015.

Business Segment Financial Performance

Table 2 summarizes our business segment results, which we report based on revenue and income from continuing operations, net of tax, for the second quarter and first six months of 2015 and 2014. We provide information on the allocation methodologies used to derive our business segment results under “Note 19—Business Segments” in our 2014 Form 10-K. We also provide a reconciliation of our total business segment results to our consolidated generally accepted accounting principles in the United States of America (“U.S. GAAP”) results in “Note 13—Business Segments” of this Report.

Table 2: Business Segment Results

(Dollars in millions)	Three Months Ended June 30,				2014

Table of Contents

(Dollars in millions)	Six Months Ended June 30,										
	2015		Net Income		2014		Total Net		Net Income		
	Total Net Revenue ⁽¹⁾	% of Total	Amount	% of Total	Total Net Revenue ⁽¹⁾	% of Total	Amount	% of Total	(Loss) ⁽²⁾	% of Total	
Credit Card	\$6,960	61 %	\$1,131	57 %	\$6,610	61 %	\$1,336	57 %			
Consumer Banking	3,232	29	557	28	3,184	29	664	29			
Commercial Banking ⁽³⁾	1,164	10	327	16	1,053	10	308	13			
Other ⁽⁴⁾	(37)	—	(29)	(1)	(9)	—	20	1			
Total from continuing operations	\$11,319	100 %	\$1,986	100 %	\$10,838	100 %	\$2,328	100 %			

(1) Total net revenue consists of net interest income and non-interest income.

(2) Net income (loss) for our business segments and the Other category is based on income (loss) from continuing operations, net of tax.

(3) Some of our tax-related commercial investments generate tax-exempt income or tax credits. Accordingly, we make certain reclassifications within our Commercial Banking business results to present revenues and yields on a taxable-equivalent basis, calculated assuming an effective tax rate approximately equal to our federal statutory tax rate of 35% with offsetting reclassifications within the Other category.

(4) Includes the residual impact of the allocation of our centralized Corporate Treasury group activities, unallocated corporate expense that do not directly support the operations of the business segments and other items as described in “Note 19—Business Segments” in our 2014 Form 10-K.

Credit Card: Our Credit Card business generated net income from continuing operations of \$463 million and \$1.1 billion in the second quarter and first six months of 2015, respectively, compared to net income from continuing operations of \$668 million and \$1.3 billion in the second quarter and first six months of 2014, respectively. The decrease in net income was due to a higher provision for credit losses and higher non-interest expense, which were partially offset by (i) higher net interest income primarily driven by loan growth; and (ii) higher non-interest income attributable to an increase in net interchange fees partially offset by lower customer-related fees primarily due to the continued run-off of our payment protection products in our Domestic Card business. Period-end loans held for investment in our Credit Card business increased by \$1.3 billion to \$87.2 billion as of June 30, 2015 from December 31, 2014, primarily due to loan growth in the Domestic Card business, partially offset by expected seasonal paydowns.

Consumer Banking: Our Consumer Banking business generated net income from continuing operations of \$291 million and \$557 million in the second quarter and first six months of 2015, respectively, compared to net income from continuing operations of \$334 million and \$664 million in the second quarter and first six months of 2014, respectively. The decrease in net income was primarily attributable to a higher provision for credit losses due to an allowance build and higher net charge-offs in our auto loan portfolio, as well as higher non-interest expense largely driven by increases in technology and infrastructure spending in our retail banking business and operating expenses due to growth in our auto loan portfolio. The decrease was partially offset by higher net interest income generated by growth in our auto loan portfolio partially offset by the planned run-off of the acquired home loan portfolio. Period-end loans held for investment in our Consumer Banking business decreased by \$263 million to \$71.2 billion as of June 30, 2015 from December 31, 2014, primarily due to the planned run-off of our acquired home loan portfolio, partially offset by the growth in the auto loan portfolio.

Commercial Banking: Our Commercial Banking business generated net income from continuing operations of \$172 million and \$327 million in the second quarter and first six months of 2015, respectively, compared to net income from continuing operations of \$171 million and \$308 million in the second quarter and first six months of 2014, respectively. The increase in net income was primarily due to higher net revenue driven by an increase in our average commercial loan portfolio, as well as increased fee-based services and products, partially offset by a larger provision

for credit losses. Period-end loans held for investment in our Commercial Banking business increased by \$341 million to \$51.2 billion as of June 30, 2015 from December 31, 2014, driven by loan growth in the commercial and industrial and commercial and multifamily real estate businesses.

Table of Contents

Business Outlook

We discuss below our current expectations regarding our total company performance and the performance of each of our business segments over the near-term based on market conditions, the regulatory environment and our business strategies as of the time we filed this Report. The statements contained in this section are based on our current expectations regarding our outlook for our financial results and business strategies. Our expectations take into account, and should be read in conjunction with, our expectations regarding economic trends and analysis of our business as discussed in “Part I—Item 1. Business” and “Part I—Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our 2014 Form 10-K. Certain statements are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those in our forward-looking statements. Except as otherwise disclosed, forward-looking statements do not reflect: (i) any change in current dividend or repurchase strategies; (ii) the effect of any acquisitions, divestitures or similar transactions that have not been previously disclosed; or (iii) any changes in laws, regulations or regulatory interpretations, in each case after the date as of which such statements are made. See “Forward-Looking Statements” in this Report for more information on forward-looking statements included in this Report and “Part I—Item 1A. Risk Factors” in our 2014 Form 10-K for factors that could materially influence our results.

Total Company Expectations

We delivered attractive risk-adjusted returns in the second quarter of 2015, highlighted by strong growth in our Domestic Card business. We expect the full-year 2015 efficiency ratio to be around 55%, excluding non-recurring items. We do not expect much improvement in the full-year 2016 efficiency ratio relative to 2015. Over the near-term, we believe we are positioned to deliver financial results that we expect will reflect strong revenue growth driven by growth in loans, partially offset by the planned run-off of the acquired home loan portfolio, pre-provision earnings growth more or less in line with revenue growth, higher provision for credit losses putting downward pressure on net income, and significant capital distribution, subject to regulatory approval, with share repurchases reducing share count and aiding earnings per share.

Pursuant to our approved 2015 capital plan, we increased our quarterly common stock dividend from \$0.30 per share to \$0.40 per share starting in the second quarter of 2015. We also expect to repurchase up to \$3.125 billion of shares of our common stock pursuant to the 2015 Stock Repurchase Program beginning in the second quarter of 2015 through the second quarter of 2016. The timing and exact amount of any common stock repurchases will depend on various factors, including market conditions, opportunities for growth, and our capital position and amount of retained earnings. The 2015 Stock Repurchase Program does not include specific price targets, may be executed through open market purchases or privately negotiated transactions, including utilizing Rule 10b5-1 programs, and may be suspended at any time. See “MD&A—Capital Management—Dividend Policy and Stock Purchases” for more information.

Business Segment Expectations

Credit Card: In our Domestic Card business, we expect the quarterly charge-off rates to be around 3% at the third quarter seasonal low point. Longer term, as new loan balances season, we expect this growth to put upward pressure on the charge-off rate. We expect growth to drive the quarterly charge-off rate into the mid-to-high three percent range in the fourth quarter and higher from there in 2016. In addition, we expect loan growth and our expectation for rising charge-off rates to drive allowance additions going forward.

Consumer Banking: In our Consumer Banking business, we expect persistently low interest rates will continue to pressure returns in our deposit businesses, even if rates begin to rise in 2015. We expect planned run-off in our acquired home loan portfolio. We expect slower auto loan growth and revenue margin compression in our auto business. We expect all of these factors to have a negative impact on our revenues and efficiency ratio in the second half of 2015 and in 2016.

Commercial Banking: Growth in our Commercial Banking business is slowing compared to prior periods because of actions we are taking in response to market conditions.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with U.S. GAAP requires management to make a number of judgments, estimates and assumptions that affect the amount of assets, liabilities, income and expenses on the consolidated financial statements. Understanding our accounting policies and the extent to which we use management judgment and estimates in applying these policies is integral to understanding our financial statements. We provide a summary of our significant accounting policies under “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K.

We have identified the following accounting policies as critical because they require significant judgments and assumptions about highly complex and inherently uncertain matters and the use of reasonably different estimates and assumptions could have a material impact on our results of operations or financial condition. These critical accounting policies govern:

- Loan loss reserves
- Asset impairment
- Fair value of financial instruments
- Representation and warranty reserves
 - Customer rewards reserves

We evaluate our critical accounting estimates and judgments on an ongoing basis and update them, as necessary, based on changing conditions. Management has discussed our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

We provide additional information on our critical accounting policies and estimates under “MD&A—Critical Accounting Policies and Estimates” in our 2014 Form 10-K.

ACCOUNTING CHANGES AND DEVELOPMENTS

Accounting for Derivative Assets and Liabilities

As of January 1, 2015, we changed our accounting principle to move from a gross basis of presentation to a net basis, for presenting qualifying derivative assets and liabilities, as well as the related fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable), for instruments executed with the same counterparty where a right of setoff exists. This newly adopted policy is preferable as it more accurately reflects the Company’s counterparty credit risk as well as our contractual rights and obligations under these arrangements. Further, this change will align our presentation with that of the majority of our peer institutions. We retrospectively adopted this change in accounting principle and our consolidated balance sheet has been recast for all prior periods presented.

CONSOLIDATED RESULTS OF OPERATIONS

The section below provides a comparative discussion of our consolidated financial performance for the second quarter and first six months of 2015 and 2014. Following this section, we provide a discussion of our business segment results. You should read this section together with our “Executive Summary and Business Outlook” where we discuss trends and other factors that we expect will affect our future results of operations.

Net Interest Income

Net interest income represents the difference between the interest income, including certain fees, earned on our interest-earning assets and the interest expense on our interest-bearing liabilities. Interest-earning assets include loans, investment securities and other interest-earning assets and interest-bearing liabilities include interest-bearing deposits, securitized debt obligations, senior and subordinated notes, and other borrowings. Generally, we include in interest income any past due fees on loans that we deem collectible. Our net interest margin, based on our consolidated results, represents the difference between the yield on our interest-earning assets and the cost of our interest-bearing liabilities, including the notional impact of non-interest bearing funding. We expect net interest income and our net interest margin to fluctuate based on changes in interest rates and changes in the amount and composition of our interest-earning assets and interest-bearing liabilities.

Table of Contents

Table 3 below presents, for each major category of our interest-earning assets and interest-bearing liabilities, the average outstanding balances, interest income earned, interest expense incurred, average yield and rate for the second quarter and first six months of 2015 and 2014.

Impact of non-interest bearing funding			0.13			0.13
Net interest margin			6.57%			6.59 %

As of January 1, 2015, we changed our accounting principle to move from a gross basis of presentation to a net (1) basis, for presenting qualifying derivative assets and liabilities, as well as the related right to reclaim cash collateral or obligation to return cash collateral. See "Note 1—Summary of Significant Accounting Policies" for additional information. Prior period results have been recast to conform to this presentation.

(2) Past due fees included in interest income totaled approximately \$344 million and \$697 million in the second quarter and first six months of 2015, respectively, and \$336 million and \$695 million in the second quarter and first six months of 2014, respectively.

(3) Interest income and interest expense and the calculation of average yields on interest-earning assets and average rates on interest-bearing liabilities include the impact of hedge accounting.

Net interest income increased by \$222 million to \$4.5 billion in the second quarter of 2015 compared to the second quarter of 2014, and increased by \$448 million to \$9.1 billion in the first six months of 2015 compared to the first six months of 2014. These increases were primarily driven by growth in our credit card, auto and commercial loan portfolios. Net interest margin increased by 1 basis point to 6.56% in the second quarter of 2015 compared to the second quarter of 2014 and decreased by 2 basis points to 6.57% in the first six months of 2015 compared to the first six months of 2014. The relatively consistent net interest margin reflected the shift in the mix of our loan portfolio to higher yielding credit card and auto loans as a result of continued loan growth

Table of Contents

and the planned run-off of the acquired home loan portfolio, as well as lower wholesale funding costs; offset by the impact of declining yields in our auto, international credit card and investment securities portfolios. The lower yield in the international credit card loan portfolio reflected the impact from the build in the U.K. PPI Reserve in the second quarter of 2015, contributing to a decline of 2 basis points and 1 basis point in the net interest margin for the second quarter of 2015 and the first six months of 2015, respectively.

Table 4 displays the change in our net interest income between periods and the extent to which the variance is attributable to: (i) changes in the volume of our interest-earning assets and interest-bearing liabilities; or (ii) changes in the interest rates related to these assets and liabilities.

Table 4: Rate/Volume Analysis of Net Interest Income⁽¹⁾

(Dollars in millions)	Three Months Ended June 30, 2015 vs. 2014			Six Months Ended June 30, 2015 vs. 2014		
	Total Variance	Volume	Rate	Total Variance	Volume	Rate
Interest income:						
Loans:						
Credit card	\$196	\$247	\$(51)	\$350	\$433	\$(83)
Consumer banking	19	9	10	44	21	23
Commercial banking	7	35	(28)	27	83	(56)
Other	30	(6)	36	64	(9)	73
Total loans, including loans held for sale	252	285	(33)	485	528	(43)
Investment securities	(27)	8	(35)	(37)	14	(51)
Cash equivalents and other interest-earning assets	—	(1)	1	(2)	9	(11)
Total interest income	225	292	(67)	446	551	(105)
Interest expense:						
Deposits	—	3	(3)	(5)	3	(8)
Securitized debt obligations	(3)	7	(10)	(8)	10	(18)
Senior and subordinated notes	2	17	(15)	4	42	(38)
Other borrowings and liabilities	4	—	4	7	3	4
Total interest expense	3	27	(24)	(2)	58	(60)
Net interest income	\$222	\$265	\$(43)	\$448	\$493	\$(45)

We calculate the change in interest income and interest expense separately for each item. The portion of interest income or interest expense attributable to both volume and rate is allocated proportionately when the calculation ⁽¹⁾ results in a positive value. When the portion of interest income or interest expense attributable to both volume and rate results in a negative value, the total amount is allocated to volume or rate, depending on which amount is positive.

Non-Interest Income

Non-interest income primarily consists of interchange income net of rewards expense, service charges and other customer-related fees, and other non-interest income. Other non-interest income includes the pre-tax net benefit for mortgage representation and warranty losses related to continuing operations, gains and losses from the sale of investment securities, gains and losses on derivatives not accounted for in hedge accounting relationships, and hedge ineffectiveness, which we generally do not allocate to our business segments because they relate to centralized asset/liability and market risk management activities undertaken by our Corporate Treasury group.

Table of Contents

Table 5 displays the components of non-interest income for the second quarter and first six months of 2015 and 2014.
Table 5: Non-Interest Income

(Dollars in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Service charges and other customer-related fees	\$429	\$460	\$866	\$934
Interchange fees, net	567	535	1,063	975
Net other-than-temporary impairment recognized in earnings	(7)	(1)	(22)	(6)
Other non-interest income:				
Benefit for mortgage representation and warranty losses ⁽¹⁾	9	29	8	15
Net (losses) gains from the sale of investment securities	(1)	(1)	1	12
Net fair value gains on free-standing derivatives	12	13	22	26
Other	126	118	268	217
Total other non-interest income	146	159	299	270
Total non-interest income	\$1,135	\$1,153	\$2,206	\$2,173

⁽¹⁾ Represents the benefit for mortgage representation and warranty losses recorded in continuing operations. For the total impact to the net benefit for mortgage representation and warranty losses, including the portion recognized in our consolidated statements of income as a component of discontinued operations, see “MD&A—Consolidated Balance Sheets Analysis—Table 14: Changes in Representation and Warranty Reserve.”

Non-interest income decreased by \$18 million to \$1.1 billion in the second quarter of 2015 as compared to the second quarter of 2014, and increased by \$33 million to \$2.2 billion in the first six months of 2015 as compared to the first six months of 2014. The main drivers for the changes include an increase in net interchange fees due to strong purchase volume in our Credit Card business and a decrease in customer-related fees primarily due to the continued run-off of our payment protection products in our Domestic Card business.

Provision for Credit Losses

Our provision for credit losses in each period is driven by net charge-offs, changes to the allowance for loan and lease losses and changes to the reserve for unfunded lending commitments. We recorded a provision for credit losses of \$1.1 billion and \$2.1 billion in the second quarter and first six months of 2015, respectively, compared to \$704 million and \$1.4 billion in the second quarter and first six months of 2014, respectively. The provision for credit losses as a percentage of net interest income was 24.9% and 22.6% in the second quarter and first six months of 2015, respectively, compared to 16.3% and 16.6% in the second quarter and first six months of 2014, respectively.

The increases in the provision for credit losses of \$425 million and \$625 million in the second quarter and first six months of 2015 compared to the second quarter and first six months of 2014, respectively, were primarily due to (i) an allowance build in our credit card loan portfolio in 2015 due to continued loan growth, as compared to an allowance release in 2014 due to improved credit outlook and delinquency inventories; (ii) a larger allowance build and higher net charge-offs in our auto loan portfolio primarily due to continued loan growth and higher loss expectations on recent originations; and (iii) a larger allowance build in our commercial loan portfolio resulting from adverse market conditions impacting certain oil and gas portfolios and certain component of our transportation loan portfolio.

We provide additional information on the provision for credit losses and changes in the allowance for loan and lease losses within “Credit Risk Profile—Summary of Allowance for Loan and Lease Losses,” “Note 4—Loans” and “Note 5—Allowance for Loan and Lease Losses.” For information on the allowance methodology for each of our loan categories, see “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K.

Non-Interest Expense

Non-interest expense consists of ongoing operating costs, such as salaries and associate benefits, occupancy and equipment costs, professional services, communications and data processing expenses and other miscellaneous expenses, as well as marketing costs and amortization of intangibles.

Table of Contents

Table 6 displays the components of non-interest expense for the second quarter and first six months of 2015 and 2014.

(Dollars in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Salaries and associate benefits	\$1,360	\$1,125	\$2,571	\$2,286
Occupancy and equipment	439	447	874	852
Marketing	387	335	762	660
Professional services	334	296	630	583
Communications and data processing	208	203	410	399
Amortization of intangibles	111	136	221	279
Other non-interest expense:				
Collections	86	98	170	197
Fraud losses	74	57	141	130
Bankcard, regulatory and other fee assessments	108	114	217	227
Other	200	168	360	298
Other non-interest expense	468	437	888	852
Total non-interest expense	\$3,307	\$2,979	\$6,356	\$5,911

Non-interest expense increased by \$328 million to \$3.3 billion in the second quarter of 2015 as compared to the second quarter of 2014, and increased by \$445 million to \$6.4 billion in the first six months of 2015 as compared to the first six months of 2014, primarily due to (i) increased restructuring charges for severance and related benefits pursuant to our ongoing benefit programs and a build in the U.K. PPI Reserve; (ii) continued technology and infrastructure investments; and (iii) higher marketing expense in our Credit Card business and operating expenses related to growth in our credit card, auto and commercial loan portfolios. These increases were partially offset by a decline in the amortization of intangibles.

Income (Loss) from Discontinued Operations, Net of Tax

Income (loss) from discontinued operations reflects ongoing costs, which primarily consist of mortgage loan repurchase representation and warranty charges, related to the mortgage origination operations of our wholesale mortgage banking unit, GreenPoint Mortgage Funding, Inc. (“GreenPoint”), which was closed in 2007. Income from discontinued operations, net of tax, was \$11 million and \$30 million in the second quarter and first six months of 2015, respectively, compared to a loss of \$10 million and income of \$20 million in the second quarter and first six months of 2014, respectively. We recorded a benefit net of tax for mortgage representation and warranty reserve of \$17 million (\$27 million before tax) and \$29 million (\$46 million before tax) in the second quarter and first six months of 2015, respectively, compared to a provision net of tax of \$7 million (\$11 million before tax) and a benefit net of tax of \$23 million (\$36 million before tax) in the second quarter and first six months of 2014, respectively.

We provide additional information on the net provision for mortgage representation and warranty losses and the related reserve for representation and warranty claims in “Consolidated Balance Sheets Analysis—Mortgage Representation and Warranty Reserve” and “Note 14—Commitments, Contingencies, Guarantees and Others.”

Income Taxes

We recorded income tax provisions of \$384 million (31.1% effective income tax rate) and \$913 million (31.5% effective income tax rate) in the second quarter and first six months of 2015, respectively, compared to the income tax provision of \$581 million (32.5% effective income tax rate) and \$1.2 billion (33.3% effective income tax rate) in the second quarter and first six months of 2014, respectively. Our effective tax rate on income from continuing operations varies between periods due, in part, to fluctuations in our pre-tax earnings, which affects the relative tax benefit of tax-exempt income, tax credits and other permanent tax items.

The decrease in our effective income tax rate in the second quarter and first six months of 2015, from the second quarter and first six months of 2014, was primarily due to a reduction in pre-tax earnings and higher discrete tax benefits, partially offset by reduced rate benefits from foreign operations. We recorded net discrete tax benefits of \$8

million and \$5 million in the second quarter and first six months of 2015, respectively. In comparison, we recorded a net discrete expense of \$1 million and \$28 million the second quarter and first six months of 2014, respectively. Our effective income tax rate, excluding the impact of discrete tax items discussed

Table of Contents

above, was 31.7% in both the second quarter and first six months of 2015, and 32.5% in both the second quarter and first six months of 2014.

We provide additional information on items affecting our income taxes and effective tax rate under “Note 17—Income Taxes” in our 2014 Form 10-K.

BUSINESS SEGMENT FINANCIAL PERFORMANCE

Our principal operations are currently organized into three major business segments, which are defined based on the products and services provided or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. The operations of acquired businesses have been integrated into our existing business segments. Certain activities that are not part of a segment, such as management of our corporate investment portfolio and asset/liability management by our centralized Corporate Treasury group, are included in the Other category.

The results of our individual businesses, which we report on a continuing operations basis, reflect the manner in which management evaluates performance and makes decisions about funding our operations and allocating resources. We provide additional information on the allocation methodologies used to derive our business segment results in “Note 19—Business Segments” in our 2014 Form 10-K.

We refer to the business segment results derived from our internal management accounting and reporting process as our “managed” presentation, which differs in some cases from our reported results prepared based on U.S. GAAP. There is no comprehensive authoritative body of guidance for management accounting equivalent to U.S. GAAP; therefore, the managed presentation of our business segment results may not be comparable to similar information provided by other financial services companies. In addition, our individual business segment results should not be used as a substitute for comparable results determined in accordance with U.S. GAAP.

Below we summarize our business segment results for the second quarter and first six months of 2015 and 2014 and provide a comparative discussion of these results. We also discuss changes in our financial condition and credit performance statistics as of June 30, 2015, compared to December 31, 2014. We provide a reconciliation of our total business segment results to our reported consolidated results in “Note 13—Business Segments.” Additionally, we provide information on the outlook for each of our business segments as described above under “Executive Summary and Business Outlook.”

Credit Card Business

The primary sources of revenue for our Credit Card business are interest income, fees collected from customers and interchange fees. Expenses primarily consist of the provision for credit losses, operating costs such as salaries and associate benefits, occupancy and equipment, professional services, communications and data processing expenses and marketing expenses. Rewards costs are generally netted against interchange fees.

Our Credit Card business generated net income from continuing operations of \$463 million and \$1.1 billion in the second quarter and first six months of 2015, respectively, and \$668 million and \$1.3 billion in the second quarter and first six months of 2014, respectively.

Table of Contents

Table 7 summarizes the financial results of our Credit Card business, which is comprised of Domestic Card and International Card, and displays selected key metrics for the periods indicated.

Allowance for loan and lease losses	\$3,324	\$ 3,204	4%			
Allowance coverage ratio ⁽⁷⁾	3.81%	3.73%	8 bps			

We recognize billed finance charges and fee income on open-ended loans in accordance with the contractual provisions of the credit arrangements and estimate the uncollectible amount on a quarterly basis. The estimated uncollectible amount of billed finance charges and fees is reflected as a reduction in revenue and is not included in

(1) our net charge-offs. Total net revenue was reduced by \$168 million and \$315 million in the second quarter and first six months of 2015, respectively, and by \$153 million and \$316 million in the second quarter and first six months of 2014, respectively, for the estimated uncollectible amount of billed finance charges and fees. The finance charge and fee reserve totaled \$198 million and \$216 million as of June 30, 2015 and December 31, 2014, respectively.

(2) Period-end loans held for investment and average loans held for investment include accrued finance charges and fees, net of the estimated uncollectible amount.

- Calculated by dividing annualized interest income for the period by average loans held for investment during the period. Interest income excludes various allocations including funds transfer pricing that assigns certain balance sheet assets, deposits and other liabilities and their related revenue and expenses attributable to each business segment.
- (3) Calculated by dividing annualized total net revenue for the period by average loans held for investment during the period for the specified loan category. Interest income also includes interest income on loans held for sale. Represents the net reduction in interest income attributable to the amortization of premiums on purchased loans
- (4) accounted for based on contractual cash flows and the accretion of other intangibles associated with the 2012 U.S. card acquisition.
- (5) Consists of credit card purchase transactions, net of returns for the period for both loans classified as held for investment and loans classified as held for sale. Excludes cash advance and balance transfer transactions.
- (6) Calculated by dividing the allowance for loan and lease losses as of the end of the period by period-end loans held for investment.
- (7)

Table of Contents

Key factors affecting the results of our Credit Card business for the second quarter and first six months of 2015, compared to the second quarter and first six months of 2014, and changes in financial condition and credit performance between June 30, 2015 and December 31, 2014 include the following:

Net Interest Income: Net interest income increased by \$172 million to \$2.6 billion in the second quarter of 2015, and increased by \$313 million, to \$5.3 billion in the first six months of 2015. The increases in net interest income were primarily driven by loan growth in our Credit Card business.

Non-Interest Income: Non-interest income increased by \$6 million to \$845 million in the second quarter of 2015, and increased by \$37 million to \$1.7 billion in the first six months of 2015. The increases were primarily attributable to an increase in net interchange fees driven by higher purchase volume, partially offset by a decline in customer-related fees primarily due to the continued run-off of our payment protection products in our Domestic Card business.

Provision for Credit Losses: The provision for credit losses increased by \$346 million to \$895 million in the second quarter of 2015, and increased by \$457 million to \$1.6 billion in the first six months of 2015. The increases were primarily driven by a build in the allowance for loan and lease losses in our Domestic Card business in 2015 due to the impact of continued loan growth, as compared to an allowance release in 2014 as a result of improved credit outlook and delinquency inventories.

Non-Interest Expense: Non-interest expense increased by \$138 million to \$1.9 billion in the second quarter of 2015, and increased by \$188 million to \$3.6 billion in the first six months of 2015. These increases were due to higher marketing expenses and operating expenses associated with loan growth, and a build in our U.K. PPI Reserve in the second quarter of 2015, partially offset by lower intangibles amortization expense.

Loans Held for Investment: Period-end loans held for investment increased by \$1.3 billion to \$87.2 billion as of June 30, 2015 from December 31, 2014, primarily due to growth in the Domestic Card business, partially offset by expected seasonal paydowns. Average loans held for investment increased by \$6.9 billion to \$83.9 billion in the second quarter of 2015 compared to the second quarter of 2014, and increased by \$6.0 billion to \$83.2 billion in the first six months of 2015 compared to the first six months of 2014, primarily due to loan growth in the Credit Card business.

Net Charge-off and Delinquency Statistics: Our net charge-off rate decreased by 21 basis points to 3.35% in the second quarter of 2015 compared to the second quarter of 2014, and decreased by 37 basis points to 3.42% in the first six months of 2015 compared to the first six months of 2014. The decreases in net charge-off rate were primarily due to higher average loan balances and the continued economic improvement. The 30+ day delinquency rate decreased by 42 basis points to 2.88% as of June 30, 2015 from December 31, 2014 due to seasonally lower delinquency inventories.

Domestic Card Business

Domestic Card generated net income from continuing operations of \$458 million and \$1.1 billion in the second quarter and first six months of 2015, respectively, compared to net income from continuing operations of \$607 million and \$1.2 billion in the second quarter and first six months of 2014, respectively. Domestic Card accounted for 92% and 91% of total net revenues of our Credit Card business in the second quarter and first six months of 2015, respectively, compared to 90% in both the second quarter and first six months of 2014. Income attributable to Domestic Card represented 99% and 95% of net income for our Credit Card business in the second quarter and first six months of 2015, respectively, compared to 91% and 90% in the second quarter and first six months of 2014, respectively.

Table of Contents

Table 7.1 summarizes the financial results for Domestic Card and displays selected key metrics for the periods indicated.

Table 7.1: Domestic Card Business Results

Income from continuing operations, net of tax	\$458	\$ 607	(25)	\$1,079	\$1,202	(10)
Selected performance metrics:						
Average loans held for investment ⁽²⁾	\$75,924	\$ 69,376	9	\$75,349	\$69,592	8
Average yield on loans held for investment ⁽³⁾	13.95%	13.95%	—	14.09%	14.07%	2 bps
Total net revenue margin ⁽⁴⁾	16.81	17.07	(26)bps	16.87	17.01	(14)
Net charge-offs	\$650	\$ 610	7%	\$1,314	\$1,310	—
Net charge-off rate	3.42%	3.52%	(10)bps	3.49%	3.77%	(28)bps
Card loan premium amortization and other intangible accretion ⁽⁵⁾	\$7	\$ 31	(77)%	\$18	\$68	(74)%
PCCR intangible amortization	80	94	(15)	164	192	(15)
Purchase volume ⁽⁶⁾	62,198	52,653	18	114,223	96,792	18
(Dollars in millions)	June 30,	December 31,	Change			
	2015	2014				
Selected period-end data:						
Loans held for investment ⁽²⁾	\$78,984	\$ 77,704	2%			
30+ day delinquency rate	2.84%	3.27%	(43)bps			
Allowance for loan and lease losses	\$3,018	\$ 2,878	5%			
Allowance coverage ratio ⁽⁷⁾	3.82%	3.70%	12 bps			

We recognize billed finance charges and fee income on open-ended loans in accordance with the contractual provisions of the credit arrangements and estimate the uncollectible amount on a quarterly basis. The estimated uncollectible amount of billed finance charges and fees is reflected as a reduction in revenue and is not included in our net charge-offs.

(1) Period-end loans held for investment and average loans held for investment include accrued finance charges and fees, net of the estimated uncollectible amount.

(2) Calculated by dividing annualized interest income for the period by average loans held for investment during the period for the specified loan category. Interest income includes interest income on loans held for sale and excludes various allocations including funds transfer pricing that assigns certain balance sheet assets, deposits and other liabilities and their related revenue and expenses attributable to each business segment.

(3) Calculated by dividing annualized total net revenue for the period by average loans held for investment during the period.

(4)

Represents the net reduction in interest income attributable to the amortization of premiums on purchased loans accounted for based on contractual cash flows and the accretion of other intangibles associated with the 2012 U.S. card acquisition.

- (6) Consists of domestic card purchase transactions, net of returns, for the period for both loans classified as held for investment and loans classified as held for sale. Excludes cash advance and balance transfer transactions.
- (7) Calculated by dividing the allowance for loan and lease losses as of the end of the period by period-end loans held for investment.

Because our Domestic Card business accounts for the substantial majority of our Credit Card business, the key factors driving the results discussed above are similar to the key factors affecting our total Credit Card business. The primary driver of the decreases in net income for our Domestic Card business in the second quarter and first six months of 2015, compared to the second quarter and first six months of 2014, was continued loan growth, which drove a higher provision for credit losses largely due to a build in the allowance for loan and lease losses, as well as higher marketing and operating expenses that were partially offset by higher revenue also driven by loan growth.

Table of Contents

International Card Business

International Card generated net income from continuing operations of \$5 million and \$52 million in the second quarter and first six months of 2015, respectively, compared to net income from continuing operations of \$61 million and \$134 million in the second quarter and first six months of 2014, respectively. The decreases were primarily due to (i) a build in our U.K. PPI Reserve in the second quarter of 2015, which resulted in a reduction to our net revenue and increased non-interest expense; and (ii) the impact of foreign exchange rates driven by the strengthening of the U.S. dollar in the first six months of 2015.

Table 7.2 summarizes the financial results for International Card and displays selected key metrics for the periods indicated.

- (4) Consists of international card purchase transactions, net of returns for the period. Excludes cash advance and balance transfer transactions.
- (5) Calculated by dividing the allowance for loan and lease losses as of the end of the period by period-end loans held for investment.

Table of Contents

Consumer Banking Business

The primary sources of revenue for our Consumer Banking business are net interest income from loans and deposits and non-interest income from service charges and customer-related fees. Expenses primarily consist of the provision for credit losses, operating costs, such as salaries and associate benefits, occupancy and equipment costs, professional services, communications and data processing expenses, as well as marketing expenses.

Our Consumer Banking business generated net income from continuing operations of \$291 million and \$557 million in the second quarter and first six months of 2015, respectively, and \$334 million and \$664 million in the second quarter and first six months of 2014, respectively.

Table 8 summarizes the financial results of our Consumer Banking business and displays selected key metrics for the periods indicated.

Allowance coverage ratio ⁽⁶⁾	1.23%	1.09%	14 bps
Deposits	\$170,321	\$ 168,078	1%
Loans serviced for others	7,042	6,701	5

The period-end consumer banking loans held for investments includes Acquired Loans with carrying values of \$20.8 billion and \$23.3 billion as of June 30, 2015 and December 31, 2014, respectively. The average balance of

(1) consumer banking loans held for investment includes Acquired Loans of \$21.3 billion and \$26.2 billion in the second quarter of 2015 and 2014, respectively, and \$21.9 billion and \$26.8 billion in the first six months of 2015 and 2014, respectively.

(2) Calculated by dividing annualized interest income for the period by average loans held for investment during the period. Interest income excludes various allocations including funds transfer pricing that assigns certain balance sheet assets, deposits and other liabilities and their related revenue and expenses attributable to each business segment.

(3) See “Credit Risk Profile” and “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for additional information on the impact of Acquired Loans on our credit quality metrics.

(4) Nonperforming assets consist of nonperforming loans, real estate owned (“REO”) and other foreclosed assets. The nonperforming asset rate is calculated based on nonperforming assets as of the end of the period divided by the sum of period-end loans held for investment, foreclosed properties and other foreclosed assets, and is adjusted to exclude the impact of acquired REOs.

(5) Allowance for loan and lease losses does not include the reserve for unfunded lending commitments of \$7 million as of both June 30, 2015 and December 31, 2014, which was recorded in other liabilities on our consolidated balance sheets.

(6) Calculated by dividing the allowance for loan and lease losses as of the end of the period by period-end loans held for investment.

Key factors affecting the results of our Consumer Banking business for the second quarter and first six months of 2015, compared to the second quarter and first six months of 2014, and changes in financial condition and credit performance between June 30, 2015 and December 31, 2014 include the following:

Net Interest Income: Net interest income remained relatively consistent at \$1.4 billion in the second quarter of 2015 and \$2.9 billion in the first six months of 2015 as compared to the second quarter and first six months of 2014, as the higher net interest income generated by the growth in our auto loan portfolio was almost completely offset by the lower net interest income from our home loan portfolio attributable to the planned run-off of the acquired portfolio, margin compression in auto loans and compression in deposit spreads in retail banking.

Consumer Banking loan yields increased by 5 basis points to 6.3% and increased by 7 basis points to 6.3% in the second quarter and first six months of 2015, respectively, compared to the second quarter and first six months of 2014. The increases were driven by changes in the product mix in Consumer Banking as a result of growth in our auto loan portfolio and the planned run-off of the acquired home loan portfolio. The increase in our auto loan portfolio in relation to our total consumer banking loan portfolio drove an increase in the total Consumer Banking yield, even as the average yield on auto loans decreased by 68 basis points to 8.1% and decreased by 70 basis points to 8.2% in the second quarter and first six months of 2015, respectively. These decreases were primarily attributable to a shift to a higher proportion of prime auto loans and increased competition in the auto business. The average yield on the home loan portfolio increased by 15 basis points to 3.9% and increased by 16 basis points to 3.9% in the second quarter and first six months of 2015, respectively, driven by an increase in expected cash flows as a result of credit improvement on the acquired home loan portfolio.

Table of Contents

Non-Interest Income: Non-interest income increased by \$26 million to \$196 million in the second quarter of 2015, and increased by \$34 million to \$354 million in the first six months of 2015 partially attributable to an increase in loans originated and sold within our home loan portfolio.

Provision for Credit Losses: The provision for credit losses increased by \$42 million to \$185 million in the second quarter of 2015, and increased by \$108 million to \$391 million in the first six months of 2015. The increases were driven by an allowance build and higher net charge-offs in our auto loan portfolio due to continued loan growth and higher loss expectations on recent originations.

Non-Interest Expense: Non-interest expense increased by \$60 million to \$998 million in the second quarter of 2015, and increased by \$100 million to \$2.0 billion in the first six months of 2015, largely due to continued technology and infrastructure investments in our retail banking business and increased operating expenses due to growth in our auto loan portfolio.

Loans Held for Investment: Period-end loans held for investment decreased by \$263 million to \$71.2 billion as of June 30, 2015 from December 31, 2014, primarily due the planned run-off of our acquired home loan portfolio, partially offset by the growth in the auto loan portfolio. Average loans held for investment increased by \$483 million to \$71.4 billion in the second quarter of 2015 compared to the second quarter of 2014, and increased by \$630 million to \$71.4 billion in the first six months of 2015 compared to the first six months of 2014, due to the growth in our auto loan portfolio outpacing the planned run-off of our acquired home loan portfolio.

Deposits: Period-end deposits increased by \$2.2 billion to \$170.3 billion as of June 30, 2015 from December 31, 2014, primarily driven by our continued focus on deposit relationships with existing customers and attracting new customers.

Net Charge-off and Delinquency Statistics: The net charge-off rate increased by 7 basis points to 0.76% in the second quarter of 2015 compared to the second quarter of 2014, and increased by 7 basis points to 0.83% in the first six months of 2015 compared to the first six months of 2014. The increase in the net charge-off rate reflected the planned run-off of our acquired home loan portfolio, which generally do not have charge-offs since these loans were recorded at fair value at acquisition, and a greater portion of auto loans in our portfolio, which have a higher charge-off rate than other products within the total consumer banking loan portfolio. The 30+ day delinquency rate decreased by 43 basis points to 3.80% as of June 30, 2015 from December 31, 2014, primarily attributable to seasonally lower auto delinquency inventories.

Commercial Banking Business

The primary sources of revenue for our Commercial Banking business are net interest income from loans and deposits and non-interest income from customer fees and other transactions. Because we have some investments that generate tax-exempt income or tax credits, we make certain reclassifications to our Commercial Banking business results to present revenues on a taxable-equivalent basis. Expenses primarily consist of the provision for credit losses, operating costs, such as salaries and associate benefits, occupancy, equipment, professional services, communications and data processing expenses, as well as marketing expenses.

Our Commercial Banking business generated net income from continuing operations of \$172 million and \$327 million in the second quarter and first six months of 2015, respectively, and \$171 million and \$308 million in the second quarter and first six months of 2014, respectively.

Table 9 summarizes the financial results of our Commercial Banking business and displays selected key metrics for the periods indicated.

⁽¹⁾The average yield on loans held for investment is calculated by dividing annualized interest income for the period by average loans held for investment during the period. Annualized interest income excludes various allocations including funds transfer pricing that assigns certain balance sheet assets, deposits and other liabilities and their related revenue and expenses attributable to each business segment. Some of our tax-related commercial

investments generate tax-exempt income or tax credits. Accordingly, we make certain reclassifications within our Commercial Banking business results to present revenues and yields on a taxable-equivalent basis, calculated assuming an effective tax rate approximately equal to our federal statutory tax rate of 35%.

The period-end commercial banking loans held for investments includes Acquired Loans with carrying value of \$154 million and \$191 million as of June 30, 2015 and December 31, 2014, respectively. The average balance of (2) commercial banking loans held for investment includes Acquired Loans of \$156 million and \$222 million in the second quarter of 2015 and 2014 respectively, and \$163 million and \$226 million in the first six months of 2015 and 2014, respectively.

Nonperforming assets consist of nonperforming loans, real estate owned (“REO”) and other foreclosed assets. The (3) nonperforming asset rate is calculated based on nonperforming assets as of the end of the period divided by the sum of period-end loans held for investment, foreclosed properties and other foreclosed assets, and is adjusted to exclude the impact of acquired REOs.

(4) We recorded the reserve for unfunded lending commitments of \$128 million and \$106 million in other liabilities on our consolidated balance sheets as of June 30, 2015 and December 31, 2014, respectively.

(5) Calculated by dividing the allowance for loan and lease losses as of the end of the period by period-end loans held for investment.

Table of Contents

(6) Represents our portfolio of loans serviced for third parties related to our multifamily finance business.

Key factors affecting the results of our Commercial Banking business for the second quarter and first six months of 2015, compared to the second quarter and first six months of 2014, and changes in financial condition and credit performance between June 30, 2015 and December 31, 2014 include the following:

Net Interest Income: Net interest income increased by \$30 million to \$466 million in the second quarter of 2015, and increased by \$70 million to \$927 million in the first six months of 2015. The increase was due to growth in commercial and industrial and commercial and multifamily real estate average loans, partially offset by lower loan yields driven by market and competitive pressures.

Non-Interest Income: Non-interest income increased by \$14 million to \$123 million in the second quarter of 2015, and increased by \$41 million to \$237 million in the first six months of 2015. The increases were primarily driven by increased revenue from fee-based services and products related to our multifamily finance business.

Provision for Credit Losses: The provision for credit losses increased by \$37 million to \$49 million in the second quarter of 2015, and increased by \$57 million to \$109 million in the first six months of 2015. The increases were primarily driven by a larger allowance build resulting from adverse market conditions impacting certain oil and gas portfolios and certain components of our transportation loan portfolio, and a larger build in the reserve for unfunded lending commitments. See “MD&A—Table 18—Commercial Loans by Industry” for additional information about the composition of our commercial banking loan portfolio, and “Note 4—Loans” for additional information about our criticized commercial banking loan portfolio.

Non-Interest Expense: Non-interest expense increased by \$3 million to \$270 million in the second quarter of 2015, and increased by \$20 million to \$542 million in the first six months of 2015, driven by higher operating expenses associated with continued growth in our Commercial Banking business.

Loans Held for Investment: Period-end loans held for investment increased by \$341 million to \$51.2 billion as of June 30, 2015 from December 31, 2014 as originations were mostly offset by paydowns. Average loans held for investment increased by \$4.0 billion to \$51.0 billion in the second quarter of 2015 compared to the second quarter of 2014, and increased by \$4.8 billion to \$51.0 billion in the first six months of 2015 compared to the first six months of 2014, driven by loan growth in the commercial and industrial and commercial and multifamily real estate businesses.

Deposits: Period-end deposits increased by \$955 million to \$32.9 billion as of June 30, 2015 from December 31, 2014, driven by our strategy to strengthen existing relationships with and increase liquidity from our commercial customers.

Net Charge-off and Nonperforming Statistics: The net charge-off rate increased by 2 basis points to 0.05% in the second quarter of 2015 compared to the second quarter of 2014, and increased by 1 basis point to 0.04% in the first six months of 2015 compared to the first six months of 2014. The nonperforming loans rate increased by 56 basis points to 0.90% as of June 30, 2015 from December 31, 2014 reflecting certain credit risk rating downgrades in our oil and gas portfolio and certain components of our transportation loan portfolio.

Other Category

Other includes unallocated amounts related to our centralized Corporate Treasury group activities, such as management of our corporate investment portfolio and asset/liability management, gains and losses on our investment securities portfolio and certain capital management activities. Other also includes foreign exchange-rate fluctuations on foreign currency-denominated balances; certain gains and losses on the sale and securitization of loans; unallocated corporate expenses that do not directly support the operations of the business segments or for which the business segments are not considered financially accountable in evaluating their performance, such as certain acquisition and restructuring charges; a portion of the net provision for representation and warranty losses related to continuing operations; and offsets related to certain line-item reclassifications.

Table of Contents

Table 10 summarizes the financial results of our Other category for the periods indicated.

Table 10: Other Category Results

(Dollars in millions)	Three Months Ended June 30,			Six Months Ended June 30,		
	2015	2014	Change	2015	2014	Change
Selected income statement data:						
Net interest (expense) income ⁽¹⁾	\$ (6)	\$ (13)	(54)%	\$ 9	\$ (42)	**
Non-interest income	(29)	35	**	(46)	33	**
Total net (loss) revenue	(35)	22	**	(37)	(9)	**
Benefit for credit losses	—	—	—	—	(3)	**
Non-interest expense	182	55	231	213	76	180%
Loss from continuing operations before income taxes	(217)	(33)	**	(250)	(82)	**
Income tax benefit	(143)	(64)	123	(221)	(102)	117
(Loss) income from continuing operations, net of tax	\$ (74)	\$ 31	**	\$ (29)	\$ 20	**

** Change is not meaningful.

Some of our tax-related commercial investments generate tax-exempt income or tax credits, accordingly we make certain reclassifications within our Commercial Banking business results to present revenues and yields on a taxable-equivalent basis, calculated assuming an effective tax rate approximately equal to our federal statutory tax rate of 35%, with offsetting reclassifications within the Other category.

Net loss from continuing operations recorded in the Other category was \$74 million and \$29 million in the second quarter and first six months of 2015, respectively, compared to a net income from continuing operations of \$31 million and \$20 million in the second quarter and first six months of 2014, respectively. The shift to a net loss from a net profit was primarily due to the restructuring charges for severance and related benefits pursuant to our ongoing benefit programs during the second quarter of 2015 and decreased net revenue from our Corporate Treasury function driven by lower interest rates.

CONSOLIDATED BALANCE SHEETS ANALYSIS

Total assets increased by \$2.3 billion to \$310.5 billion as of June 30, 2015 from December 31, 2014 primarily attributable to an increase of \$1.3 billion in loans held for investment in our Credit Card business due to strong growth in our Domestic Card business and an increase of \$1.2 billion in securities due to purchases outpacing sales, maturities and paydowns. Total liabilities increased by \$737 million to \$263.9 billion as of June 30, 2015, primarily driven by higher deposit and outstanding debt due to new issuances outpacing maturities, partially offset by lower Federal Home Loan Banks (“FHLB”) advances resulting from lower liquidity-related short-term funding needs due to expected seasonality. Stockholders’ equity increased by \$1.6 billion to \$46.7 billion as of June 30, 2015. The increase in stockholders’ equity was primarily attributable to our net income of \$2.0 billion in the first six months of 2015 and \$988 million of proceeds from the issuance of preferred stock, partially offset by share repurchases under our 2014 and 2015 Stock Repurchase Programs and dividend payments.

The following is a discussion of material changes in the major components of our assets and liabilities during the first six months of 2015. Period-end balance sheet amounts may vary from average balance sheet amounts due to liquidity and balance sheet management activities that are intended to ensure the adequacy of capital while managing our liquidity requirements for the Company and our customers and our market risk exposure in accordance with our risk appetite.

Investment Securities

Our investment portfolio consists primarily of the following: U.S. Treasury securities; corporate debt securities guaranteed by U.S. government agencies; U.S. government-sponsored enterprise or agency (“Agency”) and non-agency residential mortgage-backed securities (“RMBS”) and commercial mortgage-backed securities (“CMBS”); other asset-backed securities (“ABS”); and other investments. The carrying value of our investments in U.S. Treasury, Agency securities and other securities guaranteed by the U.S. government or agencies of the U.S. government represented 89% and 86% of our total investment securities portfolio as of June 30, 2015 and December 31, 2014, respectively.

During the first six months of 2015, the fair value of our investment portfolio increased by \$505 million to \$63.6 billion as of June 30, 2015 from December 31, 2014 due to purchases outpacing maturities and paydowns.

Table of Contents

We had gross unrealized gains of \$790 million and gross unrealized losses of \$210 million on available-for sale investment securities as of June 30, 2015, compared to gross unrealized gains of \$886 million and gross unrealized losses of \$237 million as of December 31, 2014. The decreases in gross unrealized gains and gross unrealized losses in the first six months of 2015 were primarily driven by changes in interest rates. Of the \$210 million in gross unrealized losses as of June 30, 2015, \$136 million was related to securities that had been in a loss position for more than 12 months. We provide information on other-than-temporary impairment (“OTTI”) recognized in earnings on our investment securities above in “Consolidated Results of Operations—Non-Interest Income.”

Table 11 presents the amortized cost, carrying value and fair value for the major categories of our portfolio of investment securities as of June 30, 2015 and December 31, 2014.

Table 11: Investment Securities

(Dollars in millions)	June 30, 2015		December 31, 2014	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Investment securities available for sale				
U.S. Treasury securities	\$4,411	\$4,438	\$4,114	\$4,118
Corporate debt securities guaranteed by U.S. government agencies	425	421	819	800
RMBS:				
Agency ⁽¹⁾	23,529	23,652	21,804	21,995

Total investment securities held to maturity	\$23,668	\$24,511	\$22,500	\$23,634

(1) Includes Federal National Mortgage Association (“Fannie Mae”), Federal Home Loan Mortgage Corporation (“Freddie Mac”) and Government National Mortgage Association (“Ginnie Mae”).

ABS collateralized by credit card loans constituted approximately 63% and 56% of the other ABS portfolio as of June 30, 2015 and December 31, 2014, respectively, and ABS collateralized by auto dealer floor plan inventory loans and leases constituted approximately 13% and 16% of the other ABS portfolio as of June 30, 2015 and December 31, 2014, respectively.

(3) Includes foreign government bonds, corporate securities, municipal securities and equity investments primarily related to activities under the Community Reinvestment Act (“CRA”).

Credit Ratings

Our portfolio of investment securities continues to be concentrated in securities that generally have high credit ratings and low credit risk, such as securities issued and guaranteed by the U.S. Treasury and Agencies. Approximately 94% and 93% of our total investment securities portfolio was rated AA+ or its equivalent, or better, as of June 30, 2015 and

December 31, 2014, respectively, while approximately 5% and 6% was below investment grade as of June 30, 2015 and December 31, 2014, respectively. We

26

Capital One Financial Corporation
(COF)

Table of Contents

categorize the credit ratings of our investment securities based on the lowest credit rating as issued by the following rating agencies: Standard & Poor's Ratings Services ("S&P"), Moody's Investors Service ("Moody's") and Fitch Ratings ("Fitch").

Table 12 provides information on the credit ratings of our non-agency RMBS, non-agency CMBS, other ABS and other securities in our portfolio as of June 30, 2015 and December 31, 2014.

Table 12: Non-Agency Investment Securities Credit Ratings

(Dollars in millions)	June 30, 2015				December 31, 2014			
	Fair Value	AAA	Other Investment Grade	Below Investment Grade ⁽¹⁾	Fair Value	AAA	Other Investment Grade	Below Investment Grade ⁽¹⁾
Non-agency RMBS	\$3,294	—%	3%	97%	\$3,386	—%	3%	97%
Non-agency CMBS	1,779	100	—	—	1,796	100	—	—
Other ABS	1,727	99	1	—	2,662	90	5	5
Other securities	341	8	66	26	1,028	2	88	10

⁽¹⁾ Includes a small portion of investment securities that were not rated.

For additional information on our investment securities, see "Note 3—Investment Securities."

Loans Held for Investment

Total loans held for investment ("HFI") consist of unrestricted loans and loans held and restricted in our consolidated securitization trusts. Table 13 summarizes our portfolio of loans held for investment by portfolio segment, net of the allowance for loan and lease losses, as of June 30, 2015 and December 31, 2014.

Table 13: Loans Held for Investment

(Dollars in millions)	June 30, 2015			December 31, 2014		
	Loans	Allowance	Net Loans	Loans	Allowance	Net Loans
Credit Card	\$87,203	\$ 3,324	\$83,879	\$85,876	\$ 3,204	\$82,672
Consumer Banking	71,176	875	70,301	71,439	779	70,660
Commercial Banking	51,231	472	50,759	50,890	395	50,495
Other	95	5	90	111	5	106
Total	\$209,705	\$ 4,676	\$205,029	\$208,316	\$ 4,383	\$203,933

Period-end loans held for investment increased by \$1.4 billion to \$209.7 billion as of June 30, 2015 from December 31, 2014, primarily driven by loan growth in our credit card, auto and commercial loan portfolios, partially offset by the planned run-off of our acquired home loan portfolio and the expected seasonal paydowns in our credit card loan portfolio.

We provide additional information on the composition of our loan portfolio and credit quality below in "Credit Risk Profile," "MD&A—Consolidated Results of Operations" and "Note 4—Loans."

Loans Held for Sale

Loans held for sale, which are carried at lower of cost or fair value, increased by \$440 million to \$1.1 billion, as of June 30, 2015 from December 31, 2014. The increase was primarily due to (i) the transfer of certain domestic credit card loans to held for sale from held for investment in the second quarter of 2015; and (ii) higher originations in our multifamily finance business in our Commercial Banking business and the timing of sales of these loans.

Deposits

Our deposits represent our largest source of funding for our operations, providing a consistent source of low-cost funds. Total deposits increased by \$3.2 billion to \$208.8 billion as of June 30, 2015 from December 31, 2014. The increase in deposits was primarily driven by seasonality and the growth in our Consumer Banking and Commercial Banking businesses as a result of our continued focus on deposit relationships with existing customers and our continued marketing strategy to attract new business.

We provide information on the composition of our deposits, average outstanding balances, interest expense and yield below in “Liquidity Risk Profile.”

Securitized Debt Obligations

Securitized debt obligations increased by \$2.2 billion to \$13.8 billion as of June 30, 2015 from December 31, 2014 primarily driven by debt issuances of \$2.3 billion, offset by debt maturities of \$175 million during the first six months of 2015. We provide additional information on our borrowings below in “Liquidity Risk Profile.”

Other Debt

Other debt, which consists primarily of federal funds purchased and securities loaned or sold under agreements to repurchase, senior and subordinated notes and FHLB advances, totaled \$32.0 billion as of June 30, 2015, of which \$1.9 billion represented short-term borrowings and \$30.1 billion represented long-term debt. Other debt totaled \$36.8 billion as of December 31, 2014, of which \$17.1 billion represented short-term borrowings and \$19.7 billion represented long-term debt.

The decrease in other debt of \$4.8 billion in the first six months of 2015 was primarily attributable to a net decrease of \$7.2 billion in FHLB advances, partially offset by net increases of \$1.3 billion in unsecured senior notes and \$1.0 billion in federal funds purchased and securities loaned or sold under agreements to repurchase. We provide additional information on our borrowings below in “Liquidity Risk Profile” and in “Note 8—Deposits and Borrowings.”

Mortgage Representation and Warranty Reserve

We acquired three subsidiaries that originated residential mortgage loans and sold these loans to various purchasers, including purchasers who created securitization trusts. These subsidiaries are Capital One Home Loans, LLC, which was acquired in February 2005; GreenPoint, which was acquired in December 2006 as part of the North Fork Bancorporation, Inc. (“North Fork”) acquisition; and Chevy Chase Bank, F.S.B (“CCB”), which was acquired in February 2009 and subsequently merged into CONA.

We have established representation and warranty reserves for losses associated with the mortgage loans sold by each subsidiary that we consider to be both probable and reasonably estimable, including both litigation and non-litigation liabilities. These reserves are reported on our consolidated balance sheets as a component of other liabilities. The reserve setting process relies heavily on estimates, which are inherently uncertain, and requires judgment. We evaluate these estimates on a quarterly basis. We build our representation and warranty reserves through the provision for mortgage representation and warranty losses, which we report in our consolidated statements of income as a component of non-interest income for loans originated and sold by CCB and Capital One Home Loans, LLC and as a component of discontinued operations for loans originated and sold by GreenPoint. The aggregate reserve for all three entities totaled \$636 million as of June 30, 2015, compared to \$731 million as of December 31, 2014.

The table below summarizes changes in our representation and warranty reserve in the second quarter and first six months of 2015 and 2014.

Table 14: Changes in Representation and Warranty Reserve

(Dollars in millions)	Three Months Ended		Six Months Ended June	
	June 30, 2015	2014	30, 2015	2014
Representation and warranty reserve, beginning of period	\$673	\$1,128	\$731	\$1,172
(Benefit) provision for mortgage representation and warranty losses:				
Recorded in continuing operations	(9) (29) (8) (15
Recorded in discontinued operations	(27) 11	(46) (36
Total benefit for mortgage representation and warranty losses	(36) (18) (54) (51
Net realized losses	(1) (98) (41) (109
Representation and warranty reserve, end of period	\$636	\$1,012	\$636	\$1,012

As part of our business planning processes, we have considered various outcomes relating to the future representation and warranty liabilities of our subsidiaries that are possible but do not rise to the level of being both probable and reasonably estimable outcomes justifying an incremental reserve under applicable accounting standards. Our current best estimate of reasonably possible future losses from representation and warranty claims beyond what was in our

reserve as of June 30, 2015, is approximately \$1.6 billion, a decline from our estimate of \$2.1 billion as of December 31, 2014. The decrease in the reasonably possible estimate of representation and warranty reserve was primarily driven by settlements and favorable industry legal developments. We provide additional information related to the representation and warranty reserve, including factors that may impact the adequacy of the reserve and the ultimate amount of losses incurred by our subsidiaries, in “Note 14—Commitments, Contingencies, Guarantees and Others.”

OFF-BALANCE SHEET ARRANGEMENTS AND VARIABLE INTEREST ENTITIES

In the ordinary course of business, we are involved in various types of arrangements with limited liability companies, partnerships or trusts that often involve special purpose entities and variable interest entities (“VIE”). Some of these arrangements are not recorded on our consolidated balance sheets or may be recorded in amounts different from the full contract or notional amount of the arrangements, depending on the nature or structure of, and accounting required to be applied to, the arrangement. These arrangements may expose us to potential losses in excess of the amounts recorded on our consolidated balance sheets. Our involvement in these arrangements can take many forms, including securitization and servicing activities, the purchase or sale of mortgage-backed or other asset-backed securities in connection with our home loan portfolio and loans to VIEs that hold debt, equity, real estate or other assets. Our continuing involvement in unconsolidated VIEs primarily consists of certain mortgage loan trusts and community reinvestment and development entities. We provide a discussion of our activities related to these VIEs in “Note 6—Variable Interest Entities and Securitizations.”

CAPITAL MANAGEMENT

The level and composition of our capital are determined by multiple factors, including our consolidated regulatory capital requirements and internal risk-based capital assessments such as internal stress testing and economic capital. The level and composition of our capital may also be influenced by rating agency guidelines, subsidiary capital requirements, the business environment, conditions in the financial markets and assessments of potential future losses due to adverse changes in our business and market environments.

Capital Standards and Prompt Corrective Action

Bank holding companies and national banks are subject to capital adequacy standards adopted by the Federal Reserve and the Office of the Comptroller of the Currency (“OCC”), respectively. The capital adequacy standards set forth minimum risk-based and leverage capital requirements that are based on quantitative and qualitative measures of assets and off-balance sheet items. National banks, as insured depository institutions, are also subject to Prompt Corrective Action (“PCA”) capital regulations, which require the U.S. federal banking agencies to take “prompt corrective action” for banks that do not meet the PCA capital requirements.

In July 2013, the Federal Banking Agencies finalized a new capital rule that implements the Basel III capital accord (the “Final Basel III Capital Rules”) developed by the Basel Committee on Banking Supervision (“Basel Committee”) and certain Dodd-Frank Act capital provisions and updates the PCA capital requirements. The Final Basel III Capital Rules amended both the Basel I and Basel II Advanced Approaches frameworks, establishing a new common equity Tier 1 capital requirement and setting higher minimum capital ratio requirements. The Company refers to the amended Basel I framework as the “Basel III Standardized Approach,” and the amended Advanced Approaches framework as the “Basel III Advanced Approaches.”

At the end of 2012, the Company met one of the two independent eligibility criteria set by banking regulators for becoming subject to the Advanced Approaches capital rules. As a result, the Company has undertaken a multi-year process of implementing the Advanced Approaches regime for calculating risk-weighted assets and regulatory capital levels. Certain provisions of the Final Basel III Capital Rules began to take effect on January 1, 2014 for Advanced Approaches banking organizations, including the Company. The Company entered parallel run under Advanced Approaches on January 1, 2015, during which it will calculate capital ratios under both the Basel III Standardized Approach and the Basel III Advanced Approaches, though it will continue to use the Basel III Standardized Approach for purposes of meeting regulatory capital requirements. By rule, the parallel run must last at least four consecutive quarters. Therefore, the first quarter of 2016 is the earliest possible date on which the Company would use the Basel III Advanced Approaches framework in calculating its regulatory capital and risk-weighted assets for purposes of risk-based capital requirements. Consistent with the experience of other U.S. banks, it is possible that our parallel run will last longer

Table of Contents

than the four quarter minimum. Under the Dodd-Frank Act and the Final Basel III Capital Rules, organizations subject to Basel III Advanced Approaches may not hold less capital than would be required under the Basel III Standardized Approach. Therefore, even after we exit parallel run, we will continue to calculate regulatory capital and risk-weighted assets under the Basel III Standardized Approach.

As of January 1, 2014, the minimum risk-based and leverage capital requirements for Advanced Approaches banking organizations included a common equity Tier 1 capital ratio of at least 4.0%, a Tier 1 risk-based capital ratio of at least 5.5%, a total risk-based capital ratio of at least 8.0%, and a Tier 1 leverage capital ratio of at least 4.0%. On January 1, 2015, the minimum risk-based capital ratio requirements increased to 4.5% for the common equity Tier 1 capital ratio and to 6.0% for the Tier 1 risk-based capital ratio. The minimum requirements for the total risk-based capital ratio and the Tier 1 leverage capital ratio did not change from 2014 to 2015.

The Final Basel III Capital Rules also introduced a new supplementary leverage ratio for all Advanced Approaches banking organizations with a minimum requirement of 3.0%. In September 2014 the Federal Banking Agencies issued a final rule that revised the calculation of total leverage exposures and implemented the supplementary leverage ratio. The supplementary leverage ratio compares Tier 1 capital to total leverage exposures, and includes all on-balance sheet assets and many off-balance sheet assets, including derivatives and unused commitments. The new supplementary leverage ratio becomes effective on January 1, 2018. However, as an Advanced Approaches banking organization, we were required to calculate and publicly disclose our supplementary leverage ratio beginning in the first quarter of 2015.

Insured depository institutions are also subject to PCA capital regulations. The Final Basel III Capital Rules increased some of the thresholds for the PCA capital categories and added the new common equity Tier 1 capital ratio to the PCA regulations, effective January 1, 2015. As of January 1, 2014, an insured depository institution was considered to be well-capitalized if it maintains a Tier 1 risk-based capital ratio of at least 6.0%, a total risk-based capital ratio of at least 10.0%, a Tier 1 leverage capital ratio of at least 5.0%, and is not subject to any written agreement, order, capital directive, or PCA directive issued by its regulator. Beginning on January 1, 2015, the well-capitalized level for the Tier 1 risk-based capital ratio increased to 8.0%, and the well-capitalized level for the common equity Tier 1 capital ratio was established at 6.5%. The well-capitalized levels for the total risk-based capital ratio and the Tier 1 leverage capital ratio did not change.

We disclose a non-GAAP TCE ratio in “MD&A—Summary of Selected Financial Data.” While the TCE ratio is a capital measure widely used by investors, analysts, rating agencies, and bank regulatory agencies to assess the capital position of financial services companies, it may not be comparable to similarly titled measures reported by other companies. We provide information on the calculation of this ratio in “MD&A—Table A—Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures.”

Table 15 provides a comparison of our regulatory capital ratios under the Federal Banking Agencies’ capital adequacy standards as of June 30, 2015 and December 31, 2014. Under the Final Basel III Capital Rules, beginning on January 1, 2014, as an Advanced Approaches banking organization we began using the Basel III Standardized Approach for calculating our regulatory capital, subject to applicable transition provisions. Throughout 2014, we continued to use Basel I for calculating our risk-weighted assets in our regulatory capital ratios, as required under the Final Basel III Capital Rules. On January 1, 2015, we began using the Basel III Standardized Approach for calculating our risk-weighted assets in our regulatory capital ratios.

Table of ContentsTable 15: Capital Ratios⁽¹⁾⁽²⁾

	June 30, 2015			December 31, 2014		
	Capital Ratio	Minimum Capital Adequacy	Well-Capitalized	Capital Ratio	Minimum Capital Adequacy	Well-Capitalized
Capital One Financial Corp:						
Common equity Tier 1 capital ⁽³⁾	12.1%	4.5%	N/A	12.5%	4.0%	N/A
Tier 1 risk-based capital ⁽⁴⁾	13.3	6.0	6.0%	13.2	5.5	6.0%
Total risk-based capital ⁽⁵⁾	15.1	8.0	10.0	15.1	8.0	10.0
Tier 1 leverage ⁽⁶⁾	11.1	4.0	N/A	10.8	4.0	N/A
Supplementary leverage ratio ⁽⁷⁾	9.6	N/A	N/A	N/A	N/A	N/A
Capital One Bank (USA), N.A.:						
Common equity Tier 1 capital ⁽³⁾	12.1%	4.5%	6.5%	11.3%	4.0%	N/A
Tier 1 risk-based capital ⁽⁴⁾	12.1	6.0	8.0	11.3	5.5	6.0%
Total risk-based capital ⁽⁵⁾	15.2	8.0	10.0	14.6	8.0	10.0
Tier 1 leverage ⁽⁶⁾	10.5	4.0	5.0	9.6	4.0	5.0
Supplementary leverage ratio ⁽⁷⁾	8.6	N/A	N/A	N/A	N/A	N/A
Capital One, N.A.:						
Common equity Tier 1 capital ⁽³⁾	12.6%	4.5	% 6.5%	12.5%	4.0%	N/A
Tier 1 risk-based capital ⁽⁴⁾	12.6	6.0	8.0	12.5	5.5	6.0%
Total risk-based capital ⁽⁵⁾	13.7	8.0	10.0	13.6	8.0	10.0
Tier 1 leverage ⁽⁶⁾	9.1	4.0	5.0	8.9	4.0	5.0
Supplementary leverage ratio ⁽⁷⁾	8.2	N/A	N/A	N/A	N/A	N/A

Capital ratios are calculated based on the Basel III Standardized Approach framework, subject to applicable transition provisions. As we continue to refine our classification of exposures under the Basel III Standardized Approach framework, risk-weighted asset classifications are subject to change. See “MD&A—Table A—Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures” for additional information.

(1) Ratios as of June 30, 2015 are preliminary. As we continue to validate our data the calculations are subject to change until we file our June 30, 2015 Form FR Y-9C—Consolidated Financial Statements for Holding Companies.

(2) Common equity Tier 1 capital ratio is a regulatory capital measure under Basel III calculated based on common equity Tier 1 capital divided by risk-weighted assets.

(3) Tier 1 risk-based capital ratio is a regulatory capital measure calculated based on Tier 1 capital divided by risk-weighted assets.

(4) Total risk-based capital ratio is a regulatory capital measure calculated based on total risk-based capital divided by risk-weighted assets.

(5) Tier 1 leverage ratio is a regulatory capital measure calculated based on Tier 1 capital divided by average assets, after certain adjustments.

(6) Supplementary leverage ratio is a regulatory capital measure calculated based on Tier 1 capital under the Basel III Standardized Approach divided by total leverage exposure.

Capital One Financial Corporation exceeded Federal Banking Agencies’ minimum capital requirements and the Banks exceeded minimum regulatory requirements and were “well-capitalized” under PCA requirements as of both June 30, 2015 and December 31, 2014. Our common equity Tier 1 capital ratio, as calculated under the Basel III Standardized Approach, subject to transition provisions, was 12.1% and 12.5% as of June 30, 2015 and December 31, 2014, respectively.

The calculation of our Basel III Standardized Approach common equity Tier 1 capital under the Final Basel III Capital Rules includes adjustments and deductions which are subject to transition provisions, such as the inclusion of the unrealized gains and losses on available for sale investment securities included in accumulated other comprehensive

income (“AOCI”) and adjustments related to intangible assets other than goodwill. The inclusion of AOCI and the adjustments related to intangible assets are phased-in at 20% for 2014, 40% for 2015, 60% for 2016, 80% for 2017 and 100% for 2018.

The following table compares our common equity Tier 1 capital and risk-weighted assets as of June 30, 2015, calculated based on the Final Basel III Capital Rules, subject to applicable transition provisions, to our estimated common equity Tier 1 capital and risk-weighted assets as of June 30, 2015, calculated under the Basel III Standardized Approach, as it applies when fully phased-in for Advanced Approaches banks like us that have not yet exited parallel run. Our estimated common equity Tier 1 capital ratio under the fully phased-in Basel III Standardized Approach is based on our interpretations, expectations and assumptions of relevant regulations, as well as interpretations provided by our regulators, and is subject to change based on changes to future regulations

Table of Contents

and interpretations. As we continue to engage with our regulators during our parallel run, we anticipate that there could be further changes to the calculation.

Table 16: Estimated Common Equity Tier 1 Capital Ratio under Fully Phased-In Basel III Standardized Approach⁽¹⁾

(Dollars in millions)	June 30, 2015
Common equity Tier 1 capital under Basel III Standardized	\$29,804
Adjustments related to AOCI ⁽²⁾	(269)
Adjustments related to intangibles ⁽²⁾	(620)
Other adjustments ⁽²⁾	—
Estimated common equity Tier 1 capital under fully phased-in Basel III Standardized	\$28,915
Risk-weighted assets under Basel III Standardized	\$246,106
Adjustments for fully phased-in Basel III Standardized ⁽³⁾	(142)
Estimated risk-weighted assets under fully phased-in Basel III Standardized	\$245,964
Estimated common equity Tier 1 capital ratio under fully phased-in Basel III Standardized ⁽⁴⁾	11.8%

(1) Estimated common equity Tier 1 capital ratio under the fully phased-in Basel III Standardized Approach is a non-GAAP financial measure.

(2) Assumes adjustments are fully phased-in.

Adjustments include higher risk weights for items included in capital based on the threshold deduction approach, such as mortgage servicing assets and deferred tax assets. The adjustments also include removal of risk-weights for items that are deducted from common equity Tier 1 capital.

Calculated by dividing estimated common equity Tier 1 capital by estimated risk-weighted assets, which are both calculated under the Basel III Standardized Approach, as it applies when fully phased-in for Advanced Approaches

(4) banks that have not yet exited parallel run. Additional calculation adjustments are likely to apply to the common equity Tier 1 capital ratio under fully phased-in Basel III Standardized Approach following our exit from Advanced Approaches parallel run.

Under the Final Basel III Capital Rules, when we complete our parallel run for the Advanced Approaches, our minimum risk-based capital requirement will be the greater of the Basel III Standardized Approach and the Basel III Advanced Approaches. See “Part I—Item 1. Business—Supervision and Regulation” in our 2014 Form 10-K for additional information. Based on our business mix, we anticipate that we will need to hold more regulatory capital under the Basel III Advanced Approaches than under the Basel III Standardized Approach to meet our minimum required regulatory capital ratios.

Capital Planning and Regulatory Stress Testing

In November 2011, the Federal Reserve finalized capital planning rules applicable to large bank holding companies like us. Under these rules, bank holding companies with consolidated assets of \$50 billion or more must submit a capital plan to the Federal Reserve related to the Comprehensive Capital Analysis and Review (“CCAR”) on an annual basis that contains a description of all planned capital actions, including dividends or stock repurchases, over a nine-quarter planning horizon beginning with the fourth quarter of the calendar year prior to the submission of the capital plan (“CCAR Cycle”). The bank holding company may take the capital actions in its capital plan if the Federal Reserve provides a non-objection to the plan. On October 17, 2014, the Federal Reserve issued a final rule to modify the regulations for capital planning and stress testing. The final rule changes the annual capital plan and stress test cycle start date from October 1 to January 1, effective for the cycle beginning January 1, 2016. To allow for a transition to the change in timing, the Federal Reserve’s objection or non-objection applied to the capital actions spanning the five quarters starting with the second quarter of 2015 for the 2015 CCAR cycle. Subsequent submissions each would cover a four-quarter period. For additional information on the Final Rule, see “Part 1—Item 1.

Business—Supervision and Regulation” in our 2014 Form 10-K.

On January 5, 2015 we submitted our capital plan to the Board of Directors of the Federal Reserve as part of the 2015 CCAR cycle. On March 11, 2015, the Board of Governors of the Federal Reserve publicly disclosed its non-objection to our proposed capital distribution plans submitted pursuant to CCAR. As a result of this non-objection to our capital

plan, the Board of Directors also authorized an increase in the quarterly dividend on our common stock from the previous level of \$0.30 per share to \$0.40 per share. In addition, the Company's Board of Directors has authorized the repurchase of up to \$3.125 billion of shares of the Company's common stock beginning in the second quarter of 2015 through the end of the second quarter of 2016, in addition to share repurchases related to employee compensation.

Table of Contents

Equity Offerings and Transactions

On May 14, 2015, the Company issued and sold one million shares of fixed-to-floating rate non-cumulative perpetual preferred stock, Series E, \$0.01 par value, with a liquidation preference of \$1,000 per share (the “Series E Preferred Stock”). The net proceeds of the offering of Series E Preferred Stock were approximately \$988 million, after deducting underwriting commissions and offering expenses.

Dividend Policy and Stock Purchases

On July 30, 2015, our Board of Directors declared a quarterly common stock dividend of \$0.40 per share, payable on August 20, 2015 to stockholders of record at the close of the business on August 10, 2015. Our Board of Directors also approved quarterly dividends on our Series B Preferred Stock, Series C Preferred Stock, and Series D Preferred Stock payable on September 1, 2015 to stockholders of record at the close of business on August 17, 2015. Based on these declarations, the Company will pay approximately \$217 million in common equity dividends and approximately \$29 million in total preferred dividends in the third quarter of 2015. Under the terms of our outstanding preferred stock, the ability of the Company to pay dividends on, make distributions with respect to, or to repurchase, redeem or acquire its common stock or any preferred stock ranking on parity with or junior to the preferred stock, is subject to restrictions in the event that the Company does not declare and either pay or set aside a sum sufficient for payment of dividends on the preferred stock for the immediately preceding dividend period.

We paid common stock dividends of \$0.40 per share in the second quarter of 2015. We paid preferred stock dividends of \$15.00 per share on the outstanding shares of our 6.00% fixed-rate non-cumulative perpetual preferred stock, Series B (the “Series B Preferred Stock”); \$15.625 per share on the outstanding shares of our 6.25% fixed-rate non-cumulative perpetual preferred stock, Series C (the “Series C Preferred Stock”); and \$16.75 per share on the outstanding shares of our 6.70% fixed-rate non-cumulative perpetual preferred stock, Series D (the “Series D Preferred Stock”) during the second quarter of 2015.

The declaration and payment of dividends to our stockholders, as well as the amount thereof, are subject to the discretion of our Board of Directors and depend upon our results of operations, financial condition, capital levels, cash requirements, future prospects and other factors deemed relevant by the Board of Directors. As a bank holding company, our ability to pay dividends is largely dependent upon the receipt of dividends or other payments from our subsidiaries. Regulatory restrictions exist that limit the ability of the Banks to transfer funds to our bank holding company. As of June 30, 2015, there were \$1.7 billion of funds available for dividend payments from COBNA and no funds available for dividend payments from CONA. There can be no assurance that we will declare and pay any dividends to stockholders.

In addition, consistent with our 2015 capital plan, our Board of Directors has authorized the repurchase of up to \$3.125 billion of shares of common stock beginning in the second quarter of 2015 through the end of the second quarter of 2016. Through the end of the second quarter of 2015, we repurchased approximately \$625 million of shares as part of this program.

The timing and exact amount of any future common stock repurchases will depend on various factors, including market conditions, opportunities for growth, our capital position and amount of retained earnings. Our stock repurchase program does not include specific price targets, may be executed through open market purchases or privately negotiated transactions, including utilizing Rule 10b5-1 programs, and may be suspended at any time. For additional information on dividends and stock repurchases, see “Part I—Item 1. Business—Supervision and Regulation—Dividends, Stock Repurchases and Transfer of Funds” in our 2014 Form 10-K.

RISK MANAGEMENT

Overview

We use a risk framework to manage risk. We execute against our risk management framework with the “Three Lines of Defense” risk management model to demonstrate and structure the roles, responsibilities and accountabilities in the organization for taking and managing risk.

The “First Line of Defense” is comprised of the business areas that through their day-to-day business activities take risk on our behalf. As the business owner, the first line is responsible for identifying, assessing, managing and controlling that risk, and for mitigating our overall risk exposure. The first line formulates strategy and operates within the risk

appetite and framework. The “Second Line of Defense” provides oversight of first line risk taking and management, and is primarily comprised of our Risk Management organization. The second line assists in determining risk capacity, risk appetite, and the strategies, policies and

Table of Contents

structure for managing risks. The second line owns the risk framework. The second line is both an ‘expert advisor’ to the first line and an ‘effective challenger’ of first line risk activities. The “Third Line of Defense” is comprised of our Internal Audit and Credit Review functions. The third line provides independent and objective assurance to senior management and to the Board of Directors that first and second line risk management and internal control systems and governance processes are well-designed and working as intended.

Our risk framework consists of the following eight key elements:

• Establish Governance Processes, Accountabilities, and Risk Appetites

• Identify and Assess Risks and Ownership

• Develop and Operate Controls, Monitoring and Mitigation Plans

• Test and Detect Control Gaps and Perform Corrective Action

• Escalate Key Risks and Gaps to Executive Management and, when Appropriate, the Board of Directors

• Calculate and Allocate Capital in Alignment with Risk Management and Measurement Processes (including Stress Testing)

• Support with the Right Culture, Talent and Skills

• Enable with the Right Data, Infrastructure and Programs

We provide additional discussion of our risk management principles, roles and responsibilities, framework and risk appetite under “MD&A—Risk Management” in our 2014 Form 10-K.

CREDIT RISK PROFILE

Our loan portfolio accounts for the substantial majority of our credit risk exposure. Our lending activities are governed under our credit policy and are subject to independent review and approval. Below we provide information about the composition of our loan portfolio, key concentrations and credit performance metrics.

We also engage in certain non-lending activities that may give rise to credit and counterparty settlement risk, including the purchase of securities for our investment securities portfolio, entering into derivative transactions to manage our market risk exposure and to accommodate customers, short-term advances on syndication activity, certain operational cash balances in other financial institutions, foreign exchange transactions, and customer overdrafts. We provide additional information on credit risk related to our investment securities portfolio under “Consolidated Balance Sheets Analysis—Investment Securities” and credit risk related to derivative transactions in “Note 9—Derivative Instruments and Hedging Activities.”

Loan Portfolio Composition

We provide a variety of lending products. Our primary products include credit cards, auto loans, home loans and commercial lending products. For information on our lending policies and procedures, including our underwriting criteria for our primary loan products, see “MD&A—Credit Risk Profile” in our 2014 Form 10-K.

Our loan portfolio consists of loans held for investment, including restricted loans underlying our consolidated securitization trusts and loans held for sale. Table 17 presents the composition of our portfolio of loans held for investment, including Acquired Loans, by portfolio segment, as of June 30, 2015 and December 31, 2014. Table 17 and the credit metrics presented in this section exclude loans held for sale, which are carried at lower of cost or fair value and totaled \$1.1 billion and \$626 million as of June 30, 2015 and December 31, 2014, respectively.

Table of Contents

Table 17: Loan Portfolio Composition

(Dollars in millions)	June 30, 2015		December 31, 2014	
	Loans	% of Total	Loans	% of Total
Credit Card:				
Domestic credit card ⁽¹⁾	\$78,984	37.7%	\$77,704	37.3%
International credit card	8,219	3.9	8,172	3.9
Total credit card	87,203	41.6	85,876	41.2
Consumer Banking:				
Auto	39,991	19.1	37,824	18.2
Home loan	27,595	13.1	30,035	14.4
Retail banking	3,590	1.7	3,580	1.7
Total consumer banking	71,176	33.9	71,439	34.3
Commercial Banking:				
Commercial and multifamily real estate	22,886	10.9	23,137	11.1
Commercial and industrial	27,660	13.2	26,972	12.9
Total commercial lending	50,546	24.1	50,109	24.0
Small-ticket commercial real estate	685	0.3	781	0.4
Total commercial banking	51,231	24.4	50,890	24.4
Other loans	95	0.1	111	0.1
Total loans held for investment	\$209,705	100.0%	\$208,316	100.0%

(1) Includes installment loans of \$107 million and \$144 million as of June 30, 2015 and December 31, 2014, respectively.

Commercial Loans

For purposes of portfolio risk management, we aggregate our commercial loan portfolio according to market segmentation primarily based on standard industry codes. Table 18 summarizes our commercial loan portfolio (excluding loans held for sale) by industry classification as of June 30, 2015 and December 31, 2014.

Table 18: Commercial Loans by Industry⁽¹⁾

(Percentage of portfolio)	June 30, 2015	December 31, 2014
Real estate ⁽²⁾	40%	41%
Finance and insurance	12	12
Oil and gas	7	7
Health care	5	5
Business services	5	5
Public administration	5	5
Construction and land	5	4
Educational services	5	4
Retail trade	4	4
Transportation	3	4
Other	9	9
Total	100%	100%

(1) Industry categories are based on our interpretation of the North American Industry Classification System codes as they pertain to each individual loan.

(2) Primarily consists of loans secured by commercial real estate.

Table of Contents**Acquired Loans**

Our portfolio of loans held for investment includes loans acquired in the ING Direct, CCB and 2012 U.S. card acquisitions. See “MD&A—Glossary and Acronyms” for the definition of ING Direct, CCB and 2012 U.S. card acquisitions. These loans were recorded at fair value at the date of each acquisition. Acquired Loans accounted for based on expected cash flows to be collected were \$21.0 billion as of June 30, 2015 compared to \$23.5 billion as of December 31, 2014.

The difference between the fair value at acquisition and expected cash flows represents the accretable yield, which is recognized in interest income over the life of the loans. The difference between the contractual payments on the loans and expected cash flows represents the nonaccretable difference or the amount of principal and interest not considered collectible, which incorporates future expected credit losses over the life of the loans. We regularly update our estimate of expected principal and interest to be collected from these loans and evaluate the results for each accounting pool that was established at acquisition based on loans with common risk characteristics. Probable decreases in expected cash flows would trigger the recognition of an allowance for loan and lease losses through our provision for credit losses. Probable and significant increases in expected cash flows would first reverse any previously recorded allowance for loan and lease losses established subsequent to acquisition, with any remaining increase in expected cash flows recognized prospectively in interest income over the remaining estimated life of the underlying loans. See “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for additional information on Acquired Loans.

Home Loans

The substantial majority of our home loan portfolio was acquired in the ING Direct and CCB acquisitions, and they accounted for 99.1% and 98.9% of our total Acquired Loans as of June 30, 2015 and December 31, 2014, respectively. The expected cash flows for our acquired home loan portfolio are significantly impacted by future expectations of home prices and interest rates. Decreases in expected cash flows that result from declining conditions, particularly associated with these variables, could result in an increase in the allowance for loan and lease losses and reduction in accretable yield.

Charge-offs on these loans are not recorded until the expected credit losses within the nonaccretable difference are depleted. In addition, Acquired Loans are not initially classified as delinquent or nonperforming as we expect to collect our net investment in these loans and the nonaccretable difference is expected to absorb the majority of the losses associated with these loans.

Table 19 presents the relative size of Acquired Loans in our home loan portfolio, by lien priority.

Table 19: Home Loans - Risk Profile by Lien Priority

(Dollars in millions)	Loans		Acquired Loans		Total Home Loans	
	Amount	% of Total	Amount	% of Total	Amount	% of Total
June 30, 2015						
Lien type:						
1st lien	\$5,807	21.0%	\$20,444	74.1%	\$26,251	95.1%
2nd lien	1,009	3.7	335	1.2	1,344	4.9
Total	\$6,816	24.7%	\$20,779	75.3%	\$27,595	100.0%
December 31, 2014						
(Dollars in millions)						
Lien type:						
1st lien	\$5,756	19.2%	\$22,883	76.2%	\$28,639	95.4%
2nd lien	1,038	3.4	358	1.2	1,396	4.6
Total	\$6,794	22.6%	\$23,241	77.4%	\$30,035	100.0%

See “Note 4—Loans” in this Report for additional credit quality information. See “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for information on our accounting policies for Acquired Loans, delinquent loans, nonperforming loans, net charge-offs and troubled debt restructurings (“TDRs”) for each of our loan categories.

Table of Contents

Table 20 provides a sensitivity analysis of the Acquired Loans in our home loan portfolio as of June 30, 2015. The analysis reflects a hypothetical decline of 10% in the home price index and its impact on lifetime future cash flow expectations, accretable yield and allowance for loan and lease losses. Any significant economic events or variables not considered could impact results that are presented below.

Table 20: Sensitivity Analysis - Acquired Loans - Home Loan Portfolio⁽¹⁾

(Dollars in millions)	June 30, 2015	Estimated Impact
Expected cash flows	\$24,672	\$(158)
Accretable yield	3,926	(14)
Allowance for loan and lease losses	33	144

The estimated impact is the change in the balance as of June 30, 2015 from the hypothetical decline of 10% in the home price index. Changes in the accretable yield would be recognized in interest income in our consolidated statements of income over the life of the loans. Changes in the allowance for loan and lease losses would be recognized immediately in the provision for credit losses in the consolidated statements of income.

Credit Risk Measurement

We closely monitor economic conditions and loan performance trends to assess and manage our exposure to credit risk. Key metrics we track in evaluating the credit quality of our loan portfolio include delinquency and nonperforming asset rates, as well as net charge-off rates and our internal risk ratings of larger balance commercial loans. Trends in delinquency rates are a primary indicator of credit risk within our consumer loan portfolios, as changes in delinquency rates provide an early warning of changes in credit losses. The primary indicator of credit risk in our commercial loan portfolios is our internal risk ratings. Because we generally classify loans that have been delinquent for an extended period of time and other loans with significant risk of loss as nonperforming, the level of nonperforming assets represents another indicator of the potential for future credit losses. In addition to delinquency rates, the geographic distribution of our loans provides insight as to the credit quality of the portfolio based on regional economic conditions.

We underwrite most consumer loans using proprietary models, which are typically based on credit bureau data, including borrower credit scores, along with application information and, where applicable, collateral and deal structure data. We continuously adjust our management of credit lines and collection strategies based on customer behavior and risk profile changes. We use borrower credit scores for subprime classification, for competitive benchmarking and, in some cases, to drive product segmentation decisions.

The following table provides details on the credit scores of our domestic credit card and auto loan portfolios as of June 30, 2015, December 31, 2014 and June 30, 2014.

Table 21: Credit Score Distribution

(Percentage of portfolio)	June 30, 2015	December 31, 2014	June 30, 2014
Domestic credit card - Refreshed FICO scores: ⁽¹⁾			
Greater than 660	67%	68%	69%
660 or below	33	32	31
Total	100%	100%	100%
Auto - At origination FICO scores: ⁽²⁾			
Greater than 660	49%	47%	45%
621 - 660	17	17	17
620 or below	34	36	38
Total	100%	100%	100%

⁽¹⁾ Credit scores generally represent FICO scores. These scores are obtained from one of the major credit bureaus at origination and are refreshed monthly thereafter. We approximate non-FICO credit scores to comparable FICO

scores for consistency purposes. Balances for which no credit score is available or the credit score is invalid are included in the 660 or below category.

(2) Credit scores represent FICO scores. These scores are obtained from three credit bureaus at the time of application and are not refreshed thereafter. The FICO score distribution is based on the average scores. Balances for which no credit score is available or the credit score is invalid are included in the 620 or below category.

Table of Contents

We present information in the section below on the credit performance of our loan portfolio, including the key metrics we use in tracking changes in the credit quality of our loan portfolio.

See “Note 4—Loans” in this Report for additional credit quality information. Also, see “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for information on our accounting policies for delinquent and nonperforming loans, net charge-offs and TDRs for each of our loan categories.

Delinquency Rates

We consider the entire balance of an account to be delinquent if the minimum required payment is not received by the customer’s due date, measured at the reporting date. Our 30+ day delinquency metrics include all loans held for investment that are 30 or more days past due, whereas our 30+ day performing delinquency metrics include loans that are 30 or more days past due but are currently classified as performing and accruing interest. The 30+ day delinquency and 30+ day performing delinquency metrics are the same for domestic credit card loans, as we continue to classify the substantial majority of domestic credit card loans as performing until the account is charged-off, typically when the account is 180 days past due. See “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for information on our policies for classifying loans as nonperforming for each of our loan categories. We provide additional information on our credit quality metrics above under “Business Segment Financial Performance.”

Table 22 presents our 30+ day performing delinquency rates and 30+ day delinquency rates of our portfolio of loans held for investment, including Acquired Loans, by portfolio segment, as of June 30, 2015 and December 31, 2014.

Table 22: 30+ Day Delinquencies

	June 30, 2015				December 31, 2014

Domestic	\$5,279	2.52%	\$5,776	2.77%
International	270	0.13	294	0.14
Total	\$5,549	2.65%	\$6,070	2.91%

(1) Calculated by dividing loans in each delinquency status category or geographic region as of the end of the period by the total loans held for investment, including Acquired Loans accounted for based on expected cash flows.

Table 24 summarizes loans that were 90 days or more past due as to interest or principal and still accruing interest as of June 30, 2015 and December 31, 2014. These loans consist primarily of credit card accounts between 90 days and 179 days past due. As permitted by regulatory guidance issued by the Federal Financial Institutions Examination Council (“FFIEC”), we generally continue to accrue interest and fees on domestic credit card loans through the date of charge-off, which is typically in the period the account becomes 180 days past due. While domestic credit card loans typically remain on accrual status until the loan is charged-off, we reduce the balance of our credit card receivables by the amount of finance charges and fees billed but not expected to be collected and exclude this amount from revenue.

Table 24: 90+ Day Delinquent Loans Accruing Interest

(Dollars in millions)	June 30, 2015		December 31, 2014	
	Amount	% of Total Loans ⁽¹⁾	Amount	% of Total Loans ⁽¹⁾
Loan category:				
Credit card	\$1,041	1.19%	\$1,254	1.46%
Consumer banking	1	0.00	1	0.00
Commercial banking	6	0.01	8	0.01
Total	\$1,048	0.50	\$1,263	0.61
Geographic region:				
Domestic	\$984	0.49%	\$1,190	0.59%
International	64	0.78	73	0.90
Total	\$1,048	0.50	\$1,263	0.61

(1) Delinquency rates are calculated for each loan category by dividing 90+ day delinquent loans accruing interest by period-end loans held for investment for the specified loan category.

Nonperforming Loans and Nonperforming Assets

Nonperforming assets consist of nonperforming loans, foreclosed property and repossessed assets and the net realizable value of auto loans that have been charged-off as a result of a bankruptcy. Nonperforming loans generally include loans that have been placed on nonaccrual status and certain restructured loans whose contractual terms have been modified in a manner that grants a concession to a borrower experiencing financial difficulty. See “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for information on our policies for classifying loans as nonperforming for each of our loan categories.

Table of Contents

Table 25 presents comparative information on nonperforming loans, by portfolio segment, and other nonperforming assets as of June 30, 2015 and December 31, 2014. We do not classify loans held for sale as nonperforming, as they are recorded at the lower of cost or fair value. We provide additional information on our credit quality metrics above under “Business Segment Financial Performance.”

Table 25: Nonperforming Loans and Other Nonperforming Assets⁽¹⁾

(Dollars in millions)	June 30, 2015		December 31, 2014	
	Amount	% of Total Loans HFI	Amount	% of Total Loans HFI
Nonperforming loans held for investment:				
Credit Card:				
International credit card	\$68	0.83%	\$70	0.86%
Total credit card	68	0.08	70	0.08
Consumer Banking:				
Auto	160	0.40	197	0.52
Home loan ⁽²⁾	313	1.13	330	1.10
Retail banking	28	0.79	22	0.61
Total consumer banking ⁽²⁾	501	0.70	549	0.77
Commercial Banking:				
Commercial and multifamily real estate	27	0.12	62	0.27
Commercial and industrial	433	1.56	106	0.39
Total commercial lending	460	0.91	168	0.33
Small-ticket commercial real estate	3	0.47	7	0.96
Total commercial banking	463	0.90	175	0.34
Other loans	10	10.68	15	13.37
Total nonperforming loans held for investment ⁽²⁾⁽³⁾	\$1,042	0.50	\$809	0.39
Other nonperforming assets: ⁽⁴⁾				
Foreclosed property ⁽⁵⁾	\$126	0.06%	\$139	0.06%
Other assets ⁽⁶⁾	178	0.08	183	0.09
Total other nonperforming assets	304	0.14	322	0.15
Total nonperforming assets	\$1,346	0.64	\$1,131	0.54

We recognized interest income for loans classified as nonperforming of \$14 million and \$12 million in the first six months of 2015 and 2014, respectively. Interest income forgone related to nonperforming loans was \$28 million and \$29 million in the first six months of 2015 and 2014, respectively. Forgone interest income represents the amount of interest income that would have been recorded during the period for nonperforming loans as of the end of the period had the loans performed according to their contractual terms.

Excluding the impact of Acquired Loans, the nonperforming loan ratio for our home loan portfolio, total consumer banking and total nonperforming loans held for investment was 4.59%, 1.00% and 0.55%, respectively, as of June 30, 2015, compared to 4.86%, 1.14% and 0.44%, respectively, as of December 31, 2014.

Excluding the impact of domestic credit card loans, nonperforming loans as a percentage of total loans held for investment was 0.80% and 0.62% as of June 30, 2015 and December 31, 2014, respectively.

The denominator used in calculating the nonperforming asset ratios consists of total loans held for investment and total other nonperforming assets.

Includes foreclosed properties related to Acquired Loans of \$102 million and \$101 million as of June 30, 2015 and December 31, 2014, respectively.

Includes the net realizable value of auto loans that have been charged-off as a result of a bankruptcy and repossessed assets obtained in satisfaction of auto loans.

Table of Contents

Net Charge-Offs

Net charge-offs consist of the unpaid principal balance of loans held for investment that we determine are uncollectible, net of recovered amounts. We exclude accrued and unpaid finance charges and fees and fraud losses from charge-offs. Net charge-offs are recorded as a reduction to the allowance for loan and lease losses and subsequent recoveries of previously charged-off amounts are credited to the allowance for loan and lease losses. Costs incurred to recover charged-off loans are recorded as collection expenses and included in our consolidated statements of income as a component of other non-interest expense. Our charge-off policy for loans varies based on the loan type. See “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K for information on our charge-off policy for each of our loan categories.

Table 26 presents our net charge-off amounts and rates, by portfolio segment, in the second quarter and first six months of 2015 and 2014.

Table 26: Net Charge-Offs

(Dollars in millions)	Three Months Ended June 30,				Six Months Ended June 30,			
	2015		2014		2015		2014

Total commercial banking	7	0.05	3	0.03	10	0.04	7	0.03
Other loans	0	(0.79)	2	2.18	0	0.44	1	0.77
Total net charge-offs ⁽²⁾	\$846	1.64	\$812	1.67	\$1,727	1.68	\$1,743	1.79
Average loans held for investment	\$206,337		\$194,996		\$205,768		\$194,362	
Average loans held for investment (excluding Acquired Loans)	184,897		168,505		183,662		167,237	

(1) Calculated for each loan category by dividing annualized net charge-offs for the period by average loans held for investment during the period.

Excluding the impact of Acquired Loans, the net charge-off rates for our home loan portfolio, total consumer banking and total loans held for investment were 0.16%, 1.09% and 1.83%, respectively, for the three months ended June 30, 2015, compared to 0.25%, 1.09% and 1.93%, respectively, for the three months ended June 30, 2014; and 0.13%, 1.19% and 1.88% respectively, for the six months ended June 30, 2015, compared to 0.27%, 1.23% and 2.08%, respectively, for the six months ended June 30, 2014.

For information regarding management’s expectations of net charge-offs, see “MD&A—Business Segment Expectations.”

Table of Contents

Loan Modifications and Restructurings

As part of our loss mitigation efforts, we may provide short-term (three to twelve months) or long-term (greater than twelve months) modifications to a borrower experiencing financial difficulty to improve long-term collectability of the loan and to avoid the need for foreclosure or repossession of collateral.

Table 27 presents our recorded investment of loans modified in TDRs as of June 30, 2015 and December 31, 2014. It excludes loan modifications that do not meet the definition of a TDR and Acquired Loans accounted for based on expected cash flows, which we track and report separately.

Table 27: Loan Modifications and Restructurings

(Dollars in millions)	June 30, 2015		December 31, 2014	
	Amount	% of Total Modifications	Amount	% of Total Modifications
Modified and restructured loans:

Commercial banking	281	16.9	272	16.5
Total	\$1,665	100.0%	\$1,652	100.0%
Status of modified and restructured loans:				
Performing	\$1,221	73.4%	\$1,203	72.8 %
Nonperforming	444	26.6	449	27.2
Total	\$1,665	100.0%	\$1,652	100.0%

The majority of our credit card TDRs involve reducing the interest rate on the account and placing the customer on a fixed payment plan not exceeding 60 months. We determine the effective interest rate for purposes of measuring impairment on modified loans that involve a reduction and are considered to be a TDR based on the interest rate in effect immediately prior to the loan entering the modification program. In some cases, the interest rate on a credit card account is automatically increased due to non-payment, late payment or similar events. In all cases, we cancel the customer's available line of credit on the credit card. If the customer does not comply with the modified payment terms, then the credit card loan agreement may revert to its original payment terms, with the amount of any loan outstanding reflected in the appropriate delinquency category. The loan amount may then be charged off in accordance with our standard charge-off policy.

In the Consumer Banking business, the majority of our modified loans receive an extension, while a portion receive an interest rate reduction or principal reduction. Their impairment is determined using the present value of expected cash flows or a collateral evaluation for certain auto and home loans where the collateral value is lower than the recorded investment. In the Commercial Banking business, the majority of modified loans receive an extension, with a portion of these loans receiving an interest rate reduction. The impairment on modified commercial loans is generally determined based on the underlying collateral value. We provide additional information on modified loans accounted for as TDRs, including the performance of those loans subsequent to modification, in "Note 4—Loans."

Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due from the borrower in accordance with the original contractual terms of the loan. Generally, we report loans as impaired based on the method for measuring impairment in accordance with applicable accounting guidance. Loans defined as individually impaired include larger balance commercial nonperforming loans and TDRs. Loans held for sale are not reported as impaired, as these loans are recorded at lower of cost or fair value. Impaired loans also exclude Acquired Loans accounted for based on expected cash flows because this accounting methodology takes into consideration future credit losses expected to be incurred.

Table of Contents

Impaired loans, including TDRs, totaled \$2.2 billion and \$1.9 billion as of June 30, 2015 and December 31, 2014, respectively. Loans modified in TDRs accounted for \$1.7 billion of impaired loans as of both June 30, 2015 and December 31, 2014. We provide additional information on our impaired loans, including the allowance for loan and lease losses established for these loans, in “Note 4—Loans” and “Note 5—Allowance for Loan and Lease Losses.”

Allowance for Loan and Lease Losses
Our allowance for loan and lease losses represents management’s best estimate of incurred loan and lease credit losses inherent in our held for investment portfolio as of each balance sheet date. The allowance for loan and lease losses is increased through the provision for credit losses and reduced by net charge-offs. We provide additional information on the methodologies and key assumptions used in determining our allowance for loan and lease losses under “Note 1—Summary of Significant Accounting Policies” in our 2014 Form 10-K.

Our allowance for loan and lease losses increased by \$293 million to \$4.7 billion as of June 30, 2015 from December 31, 2014. The allowance coverage ratio increased by 13bps to 2.23% as of June 30, 2015 from December 31, 2014. The increase in the allowance for loan and lease losses was primarily driven by continued loan growth in our domestic credit card and auto loan portfolios, higher loss expectations on recent auto loan originations as well as adverse market conditions impacting certain oil and gas portfolios and certain components of our transportation loan portfolio within our Commercial Banking business.

Table 28 presents changes in our allowance for loan and lease losses for the second quarter and first six months of 2015 and 2014, and details the provision for credit losses recognized in our consolidated statements of income and charge-offs and recoveries by portfolio segment.

Table of Contents

Table 28: Allowance for Loan and Lease Losses Activity

Allowance for loan and lease losses as a percentage of loans held for investment			2.23%	2.01%

The total provision for credit losses reported in our consolidated statements of income consists of a provision for loan and lease losses and a provision for unfunded lending commitments. This table only presents the provision for

- (1) loan and lease losses and does not include the provision for unfunded lending commitments of \$14 million and \$22 million in the second quarter and first six months of 2015, respectively, and a provision of \$3 million and \$15 million in the second quarter and first six months of 2014, respectively.
- (2) Represents foreign currency translation adjustments and the net impact of loan transfers and sales.

Table of Contents

Table 29 presents an allocation of our allowance for loan and lease losses by portfolio segment as of June 30, 2015 and December 31, 2014.

Table 29: Allocation of the Allowance for Loan and Lease Losses

(Dollars in millions)	June 30, 2015		December 31, 2014	
	Amount	% of Total Loans HFI	Amount	% of Total Loans HFI
Credit Card:				
Domestic credit card	\$3,018	3.82%	\$2,878	3.70%
International credit card	306	3.71	326	3.99
Total credit card	3,324	3.81	3,204	3.73
Consumer Banking:				
Auto	744	1.86	661	1.75
Home loan ⁽¹⁾	65	0.24	62	0.21
Retail banking	66	1.86	56	1.58
Total consumer banking ⁽¹⁾	875	1.23	779	1.09
Commercial Banking:				
Commercial and multifamily real estate	143	0.63	155	0.67
Commercial and industrial	324	1.17	229	0.85
Total commercial lending	467	0.93	384	0.77
Small-ticket commercial real estate	5	0.72	11	1.43
Total commercial banking	472	0.92	395	0.78
Other loans	5	5.13	5	4.68
Total allowance for loan and lease losses	\$4,676	2.23	\$4,383	2.10
Total allowance coverage ratios:				
Period-end loans held for investment	\$209,705	2.23	\$208,316	2.10
Period-end loans held for investment (excluding Acquired Loans)	188,735	2.46	184,816	2.36
Nonperforming loans ⁽²⁾	1,042	448.48	809	541.86
Allowance coverage ratios by loan category:⁽³⁾				
Credit card (30+ day delinquent loans)	2,513	132.24	2,832	113.13
Consumer banking (30+ day delinquent loans)	2,702	32.41	3,024	25.76
Commercial banking (nonperforming loans)	463	102.19	175	225.86

Excluding the impact of Acquired Loans, the coverage ratios for our home loan portfolio and total consumer

⁽¹⁾ banking were 0.47% and 1.67%, respectively, as of June 30, 2015, compared to 0.52% and 1.56%, respectively, as of December 31, 2014.

The allowance for loan and lease losses for both of nonperforming and performing loans as a percentage of

⁽²⁾ nonperforming loans, excluding the allowance for loan and lease losses related to our domestic credit card loans, was 159.05% and 186.07% as of June 30, 2015 and December 31, 2014, respectively.

⁽³⁾ Calculated based on the total allowance for loan and lease losses divided by the outstanding balance of loans within the specified loan category.

LIQUIDITY RISK PROFILE

We have established liquidity practices that are intended to ensure we have sufficient asset-based liquidity to withstand the potential impact of deposit attrition or diminished liquidity in the funding markets. Our practices are intended to maintain adequate liquidity reserves to cover our funding requirements as well as any potential deposit run-off and maintain access to diversified funding sources to avoid over-dependence on volatile, less reliable funding markets. Our liquidity reserves consist of readily-marketable or pledgable assets which can be used as a source of

liquidity, if needed.

44

Capital One Financial Corporation
(COF)

Table of Contents

Table 30 below presents the composition of our liquidity reserves as of June 30, 2015 and December 31, 2014.

Table 30: Liquidity Reserves

(Dollars in millions)	June 30, 2015	December 31, 2014
Cash and cash equivalents	\$7,156	\$7,242
Investment securities available for sale, at fair value	39,136	39,508
Investment securities held to maturity, at fair value	24,511	23,634
Total investment securities portfolio ⁽¹⁾⁽²⁾	63,647	63,142
FHLB borrowing capacity secured by loans	28,243	29,547
Outstanding FHLB advances and letters of credit secured by loans	(10,608)	(17,720)
Investment securities encumbered for Public Funds and others	(11,033)	(10,631)
Total liquidity reserves	\$77,405	\$71,580

(1) The weighted-average life of our securities was approximately 6.0 years and 5.7 years as of June 30, 2015 and December 31, 2014, respectively.

As part of our liquidity management strategy, we pledge securities to secure borrowings from counterparties and to secure trust and public deposits and other purposes as required or permitted by law. We pledged securities

(2) available for sale with a fair value of \$2.1 billion and \$3.5 billion as of June 30, 2015 and December 31, 2014, respectively. We also pledged securities held to maturity with a carrying value of \$9.3 billion and \$9.0 billion as of June 30, 2015 and December 31, 2014, respectively.

Our liquidity reserves increased by \$5.8 billion in the first six months of 2015 to \$77.4 billion as of June 30, 2015 from December 31, 2014. This increase was primarily driven by lower FHLB advances resulting from lower liquidity-related short-term funding needs due to expected seasonality. See “MD&A—Risk Management” in our 2014 Form 10-K for additional information on our management of liquidity risk.

In September 2014, the Federal Banking Agencies issued final rules implementing the Basel III Liquidity Coverage Ratio in the United States (the “Final LCR Rule”). The Final LCR Rule applies to institutions with \$250 billion or more in total consolidated assets or \$10 billion or more in total consolidated on-balance sheet foreign exposure, and their respective consolidated subsidiary depository institutions with \$10 billion or more in total consolidated assets. The LCR is calculated by dividing the amount of an institution’s high quality, unencumbered liquid assets, as defined and calculated in accordance with the haircuts and limitations of the Final LCR Rule, by its estimated net cash outflow, which are determined by applying assumed outflow factors in the Final LCR Rule.

The Final LCR Rule phases-in the minimum LCR standard as follows: 80% by January 1, 2015; 90% by January 1, 2016; and 100% by January 1, 2017 and thereafter. The Final LCR Rule came into effect in January 2015 and requires us to calculate the LCR as of the last business day of each month from January 2015 until July 2016, and then on a daily basis thereafter. At June 30, 2015, we exceeded the fully phased-in LCR requirement. The calculation and the underlying components are based on our interpretations, expectations and assumptions of relevant regulations, as well as interpretations provided by our regulators, and are subject to change based on changes to future regulations and interpretations.

Borrowing Capacity

We filed a new shelf registration statement with the U.S. Securities and Exchange Commission (“SEC”) on March 31, 2015, which expires in March 2018. Under this shelf registration, we may periodically offer and sell an indeterminate aggregate amount of senior or subordinated debt securities, preferred stock, depository shares, common stock, purchase contracts, warrants and units. There is no limit under this shelf registration statement to the amount or number of such securities that we may offer and sell, subject to market conditions.

In addition to our issuance capacity under the shelf registration statement, we also have access to FHLB advances with a maximum borrowing capacity of \$28.3 billion as of June 30, 2015, of which \$17.6 billion was still available to us to borrow as of June 30, 2015. To secure this borrowing capacity, we pledged loan collateral with an outstanding balance of \$35.0 billion and security collateral with a fair value of \$12 million as of June 30, 2015. The ability to draw down

funding is based on membership status and the amount is dependent upon the Banks' ability to post collateral. Our FHLB membership is secured by our investment in FHLB stock of \$459 million and \$807 million as of June 30, 2015 and December 31, 2014, respectively, which was determined in part based on our outstanding advances. We also have access to the Federal Reserve Discount Window through which we had a borrowing

Table of Contents

capacity of \$15.5 billion as of June 30, 2015. Although available, we do not view this borrowing capacity as a primary source of liquidity and did not utilize it in 2014 or the first six months of 2015.

Funding

The Company's primary source of funding comes from deposits, which provide us with a stable and relatively low cost of funds. In addition to deposits, the Company raises funding through the purchase of federal funds, the issuance of brokered deposits, FHLB advances secured by certain portions of our loan and securities portfolios, the issuance of senior and subordinated notes, the issuance of securitized debt obligations and other borrowings. A key objective in our use of these markets is to maintain access to a diversified mix of wholesale funding sources.

Deposits

Table 31 provides a comparison of the composition of our deposits, average balances, interest expense and average deposit rates for the first six months of 2015 and full year of 2014.

Table 31: Deposit Composition and Average Deposit Rates

(Dollars in millions)	Six Months Ended June 30, 2015				
	Period End Balance	Average Balance	Interest Expense	% of Average Deposits	Average Deposit Rate
Non-interest bearing accounts	\$25,123	\$25,026	N/A	12.0%	N/A
Interest-bearing checking accounts ⁽¹⁾	42,691	42,644	\$103	20.5	0.49%
Saving deposits ⁽²⁾	132,274	131,958	387	63.3	0.59
Time deposits less than \$100,000	5,692	5,727	31	2.7	1.09
Total core deposits	205,780	205,355	521	98.5	0.51
Time deposits of \$100,000 or more	1,956	2,116	20	1.0	1.88
Foreign time deposits ⁽³⁾	1,044	1,030	2	0.5	0.34
Total deposits	\$208,780	\$208,501	\$543	100.0%	0.52

(Dollars in millions)	Twelve Months Ended December 31, 2014				
	Period End Balance	Average Balance	Interest Expense	% of Average Deposits	Average Deposit Rate
Non-interest bearing accounts	\$25,081	\$24,639	N/A	12.0%	N/A
Interest-bearing checking accounts ⁽¹⁾	41,022	41,702	\$204	20.3	0.49%
Saving deposits ⁽²⁾	130,156	129,868	752	63.1	0.58
Time deposits less than \$100,000	6,051	5,856	75	2.8	1.29
Total core deposits	202,310	202,065	1,031	98.2	0.51
Time deposits of \$100,000 or more	2,261	2,560	53	1.3	2.07
Foreign time deposits ⁽³⁾	977	1,050	4	0.5	0.34
Total deposits	\$205,548	\$205,675	\$1,088	100.0%	0.53

(1) Includes Negotiable Order of Withdrawal ("NOW") accounts.

(2) Includes Money Market Deposit Accounts ("MMDA").

(3) Substantially all of our foreign time deposits were greater than \$100,000 as of both June 30, 2015 and December 31, 2014.

Our deposits include brokered deposits, which we obtained through the use of third-party intermediaries. Those brokered deposits are reported as saving deposits and time deposits in the above table and totaled \$5.1 billion as of both June 30, 2015 and December 31, 2014.

The Federal Deposit Insurance Corporation ("FDIC") limits the use of brokered deposits to "well-capitalized" insured depository institutions and, with a waiver from the FDIC, to "adequately capitalized" institutions. COBNA and CONA were "well-capitalized,"

Table of Contents

as defined under the federal banking regulatory guidelines, as of both June 30, 2015 and December 31, 2014, and therefore were permitted to maintain brokered deposits.

Short-Term Borrowings and Long-Term Debt

We access the capital markets to meet our funding needs through the issuance of senior and subordinated notes, securitized debt obligation transactions, and federal funds purchased and securities loaned or sold under agreements to repurchase. In addition, we may utilize short-term and long-term FHLB advances secured by our investment securities, residential home loans, multifamily real estate loans, commercial real estate loans and home equity lines of credit.

Our short-term borrowings include those borrowings with an original contractual maturity of one year or less and do not include the current portion of long-term debt. The short-term borrowings, which consist of federal funds purchased and securities loaned or sold under agreements to repurchase, and short-term FHLB advances, decreased by \$15.2 billion to \$1.9 billion as of June 30, 2015 from December 31, 2014. This decrease reflected \$16.2 billion in payoffs of FHLB advances, partially offset by an increase of \$1.0 billion in federal funds purchased and securities loaned or sold under agreements to repurchase during the first six months of 2015. The decrease in short-term FHLB advances was primarily driven by lower liquidity-related short-term funding needs due to expected seasonality.

Our long-term debt, which consists of securitized debt obligations, senior and subordinated notes, and long-term FHLB advances, increased by \$12.5 billion, to \$43.9 billion as of June 30, 2015 from December 31, 2014. The increase was primarily attributable to net increases of \$9.0 billion in long-term FHLB advances, \$2.2 billion in securitized debt obligations and \$1.3 billion in unsecured notes.

Table 32 displays the maturity profile, based on contractual maturities, of our short-term borrowings and long-term debt including securitized debt obligations, senior and subordinated notes and other borrowings as of June 30, 2015, and the outstanding balances as of December 31, 2014.

Table 32: Contractual Maturity Profile of Outstanding Debt

(Dollars in millions)	June 30, 2015						Total	December 31, 2014
	Up to 1 Year	> 1 Year to 2 Years	> 2 Years to 3 Years	> 3 Years to 4 Years	> 4 Years to 5 Years	> 5 Years		
Short-term borrowings:								
Federal funds purchased and securities loaned or sold under agreements to repurchase	\$1,888	\$—	\$—	\$—	\$—	\$—	\$1,888	\$ 880
FHLB advances	—	—	—	—	—	—	—	16,200
Total short-term borrowings	1,888	—	—	—	—	—	1,888	17,080
Long-term debt:								
Securitized debt obligations	2,351	4,982	4,164	589	1,624	75	13,785	11,624
Senior and subordinated notes:								
Unsecured senior debt	1,250	3,021	3,955	3,118	1,006	5,027	17,377	16,054
Unsecured subordinated debt	—	1,056	—	—	324	1,230	2,610	2,630
Total senior and subordinated notes	1,250	4,077	3,955	3,118	1,330	6,257	19,987	18,684
Other long-term borrowings:								
FHLB advances	6	32	11	4	1	10,052	10,106	1,069

Edgar Filing: CAPITAL ONE FINANCIAL CORP - Form 10-Q

Total long-term debt ⁽¹⁾	3,607	9,091	8,130	3,711	2,955	16,384	43,878	31,377
Total short-term borrowings and long-term debt	\$5,495	\$9,091	\$8,130	\$3,711	\$2,955	\$16,384	\$45,766	\$48,457
Percentage of total	12%	20%	18%	8%	6%	36%	100%	100%

⁽¹⁾ Includes unamortized discounts, premiums and other cost basis adjustments, which together resulted in a net reduction of \$229 million and \$233 million as of June 30, 2015 and December 31, 2014, respectively.

We provide additional information on our short-term borrowings and long-term debt under “Consolidated Balance Sheets Analysis—Securitized Debt Obligations,” “Consolidated Balance Sheets Analysis—Other Debt” and in “Note 8—Deposits and Borrowings.”

Table of Contents

Credit Ratings

Our credit ratings impact our ability to access capital markets and our non-deposit borrowing costs. Rating agencies base their ratings on numerous factors, including liquidity, capital adequacy, asset quality, quality of earnings and the probability of systemic support. Significant changes in these factors could result in different ratings. Such ratings help to support our cost effective unsecured funding as part of our overall financing programs. Table 33 provides a summary of the credit ratings for the senior unsecured debt of Capital One Financial Corporation, COBNA and CONA as of June 30, 2015 and December 31, 2014.

Table 33: Senior Unsecured Debt Credit Ratings

	June 30, 2015			December 31, 2014		
	Capital One Financial Corporation	Capital One Bank (USA), N.A.	Capital One, N.A.	Capital One Financial Corporation	Capital One Bank (USA), N.A.	Capital One, N.A.
Moody's	Baa1	Baa1	Baa1	Baa1	A3	A3
S&P	BBB	BBB+	BBB+	BBB	BBB+	BBB+
Fitch	A-	A-	A-	A-	A-	A-

As of August 3, 2015, Moody's, S&P and Fitch have us on a stable outlook. On March 17, 2015, Moody's announced that they would be adopting a new bank rating methodology that could potentially result in changes in the ratings of the securities of many banks, including Capital One. As a result of this adoption, on May 14, 2015, COF's subordinated debt and preferred stock ratings received upgrades, while on June 19, 2015, COBNA and CONA's senior unsecured debt ratings received a one level downgrade.

MARKET RISK PROFILE

Market risk is inherent in the financial instruments associated with our operations and activities, including loans, deposits, securities, short-term borrowings, long-term debt and derivatives. Below we provide additional information about our primary sources of market risk, our market risk management strategies and the measures we use to evaluate our market risk exposure.

Primary Market Risk Exposures

Our primary source of market risk is interest rate risk. We also have exposure to foreign exchange risk.

Interest Rate Risk

Interest rate risk, which represents exposure to instruments whose yield or price varies with the volatility of interest rates, is our most significant source of market risk exposure. Banks are inevitably exposed to interest rate risk due to differences in the timing between the maturities or re-pricing of assets and liabilities.

Foreign Exchange Risk

Foreign exchange risk represents exposure to changes in the values of current holdings and future cash flows denominated in other currencies. Our primary exposure is related to the funding of our non-dollar net investments in our International Card business in the U.K. and Canada. Changes in foreign exchange rates affect the value of non-dollar denominated equity invested in our foreign operations and impact our AOCI and related capital ratios. Our intercompany funding exposes our consolidated statements of income to foreign exchange transaction risk, while our equity investments in our foreign operations results in translation risk in AOCI. We manage our transaction risk by entering into forward foreign currency derivative contracts to hedge our exposure to variability in cash flows related to foreign currency denominated intercompany borrowings. In the third quarter of 2014, we began entering into net investment hedges to manage our AOCI exposure. We apply hedge accounting to both of the intercompany funding hedges and the net investment hedges.

We measure our total exposure by regularly tracking the equity value of our net equity invested in our U.K. and Canadian foreign operations as well as their funding requirements. We apply a 30 percent U.S. dollar appreciation shock against each of our Great British Pound ("GBP") and Canadian Dollar ("CAD") net investment exposures. This shock approximates a 99 percent confidence interval over a one year time horizon for our combined GBP and CAD net investment exposure. Our gross equity exposures were 1.3 billion GBP as of both June 30, 2015 and December 31, 2014, and 630 million CAD and 581 million CAD as of June 30, 2015

Table of Contents

and December 31, 2014, respectively. As a result of our derivative management activities, we believe our net exposure to foreign exchange risk is minimal.

Market Risk Management

We employ several techniques to manage our interest rate and foreign exchange risk, which include, but are not limited to, altering the duration and re-pricing characteristics of our various assets and liabilities through interest rate derivatives or mitigating the foreign exchange exposure of certain non-dollar denominated equity or transactions through derivatives. Derivatives are one of the primary tools we use in managing interest rate and foreign exchange risk. Our current asset and liability management policy includes the use of derivatives. We execute our derivative contracts in both over-the-counter and exchange-traded derivative markets. Although the majority of our derivatives are interest rate swaps, we also use a variety of other derivative instruments, including caps, floors, options, futures and forward contracts, to manage both our interest rate and foreign currency risk. The outstanding notional amount of our derivative contracts totaled \$95.0 billion as of June 30, 2015, compared to \$88.6 billion as of December 31, 2014, driven by an increase in our hedging activities.

Market Risk Measurement

We have risk management policies and limits established by our Market and Liquidity Risk Policy and approved by the Board of Directors. Our objective is to manage our asset and liability risk position and exposure to market risk in accordance with these policies and prescribed limits based on prevailing market conditions and long-term expectations. Because no single measure can reflect all aspects of market risk, we use various industry standard market risk measurement techniques and analysis to measure, assess and manage the impact of changes in interest rates on our net interest income and our economic value of equity and foreign exchange rates on our non-dollar denominated earnings and non-dollar equity investments in foreign operations. We provide additional information below in "Economic Value of Equity."

We consider the impact on both net interest income and economic value of equity in measuring and managing our interest rate risk. Because the federal funds rate was lowered to near zero in December 2008, and since then has remained in a target range of 0% to 0.25%, we use a 50 basis points decrease as our declining interest rate scenario, since a scenario where interest rates would decline by 200 basis points is unlikely. In scenarios where a 50 basis points decline would result in a rate less than 0%, we assume a rate of 0%. Below we discuss the assumptions used in calculating each of these measures.

Net Interest Income Sensitivity

This sensitivity measure estimates the impact on our projected 12-month base-line interest rate sensitive revenue resulting from movements in interest rates. Interest rate sensitive revenue consists of net interest income and certain components of other non-interest income significantly impacted by movements in interest rates, including changes in the fair value of mortgage servicing rights and free-standing interest rate swaps. Adjusted net interest income consists of net interest income and changes in the fair value of mortgage servicing rights, including related derivative hedging activity, and changes in the fair value of free-standing interest rate swaps. In addition to our existing assets and liabilities, we incorporate expected future business growth assumptions, such as loan and deposit growth and pricing, and plans for projected changes in our funding mix in our baseline forecast. In measuring the sensitivity of interest rate movements on our projected interest rate sensitive revenue, we assume an instantaneous +200 basis points and -50 basis points shock, with the lower rate scenario limited to zero as described above.

Economic Value of Equity

Our economic value of equity sensitivity measure estimates the impact on the net present value of our assets and liabilities, including derivative hedging activity, resulting from movements in interest rates. Our economic value of equity sensitivity measures are calculated based on our existing assets and liabilities, including derivatives, and do not incorporate business growth assumptions or projected plans for funding mix changes. In measuring the sensitivity of interest rate movements on our economic value of equity, we assume a hypothetical instantaneous parallel shift in the level of interest rates of +200 basis points and -50 basis points to spot rates, with the lower rate scenario limited to zero as described above.

Table of Contents

Table 34 shows the estimated percentage impact on our projected base-line net interest income and economic value of equity, calculated under the methodology described above, as of June 30, 2015 and December 31, 2014.

Table 34: Interest Rate Sensitivity Analysis

	June 30, 2015	December 31, 2014
Estimated impact on projected base-line net interest income		
+200 basis points	3.0%	4.5%
-50 basis points	(1.6)	(2.1)
Estimated impact on economic value of equity		
+200 basis points	(5.4)	(3.4)
-50 basis points	(0.4)	(1.2)

Our projected net interest income and economic value of equity sensitivity measures were within our policy limits as of June 30, 2015 and December 31, 2014. In addition to these industry standard measures, we will continue to factor into our internal interest rate risk management decisions the potential impact of alternative interest rate scenarios, such as stressed rate shocks as well as steepening and flattening yield curve scenarios.

Limitations of Market Risk Measures

The interest rate risk models that we use in deriving these measures incorporate contractual information, internally-developed assumptions and proprietary modeling methodologies, which project borrower and depositor behavior patterns in certain interest rate environments. Other market inputs, such as interest rates, market prices and interest rate volatility, are also critical components of our interest rate risk measures. We regularly evaluate, update and enhance these assumptions, models and analytical tools as we believe appropriate to reflect our best assessment of the market environment and the expected behavior patterns of our existing assets and liabilities.

There are inherent limitations in any methodology used to estimate the exposure to changes in market interest rates. The above sensitivity analysis contemplates only certain movements in interest rates and is performed at a particular point in time based on the existing balance sheet and, in some cases, expected future business growth and funding mix assumptions. The strategic actions that management may take to manage our balance sheet may differ significantly from our projections, which could cause our actual earnings and economic value of equity sensitivities to differ substantially from the above sensitivity analysis.

SUPERVISION AND REGULATION

We provide information on our Supervision and Regulation in our 2014 Form 10-K under “Part I—Item 1. Business—Supervision and Regulation.”

FORWARD-LOOKING STATEMENTS

From time to time, we have made and will make forward-looking statements, including those that discuss, among other things, strategies, goals, outlook or other non-historical matters; projections, revenues, income, returns, expenses, capital measures, accruals for claims in litigation and for other claims against us; earnings per share or other financial measures for us; future financial and operating results; our plans, objectives, expectations and intentions; and the assumptions that underlie these matters.

To the extent that any such information is forward-looking, it is intended to fit within the safe harbor for forward-looking information provided by the Private Securities Litigation Reform Act of 1995.

Numerous factors could cause our actual results to differ materially from those described in such forward-looking statements, including, among other things:

Table of Contents

general economic and business conditions in the U.S., the U.K., Canada or our local markets, including conditions affecting employment levels, interest rates, collateral values, consumer income and confidence, spending and savings that may affect consumer bankruptcies, defaults, charge-offs and deposit activity;

- an increase or decrease in credit losses (including increases due to a worsening of general economic conditions in the credit environment);
- financial, legal, regulatory, tax or accounting changes or actions, including the impact of the Dodd-Frank Act and the regulations promulgated thereunder and regulations governing bank capital and liquidity standards, including Basel-related initiatives and potential changes to financial accounting and reporting standards;
- developments, changes or actions relating to any litigation matter involving us;
- the inability to sustain revenue and earnings growth;
- increases or decreases in interest rates;
- our ability to access the capital markets at attractive rates and terms to capitalize and fund our operations and future growth;
- the success of our marketing efforts in attracting and retaining customers;
- increases or decreases in our aggregate loan balances or the number of customers and the growth rate and composition thereof, including increases or decreases resulting from factors such as shifting product mix, amount of actual marketing expenses we incur and attrition of loan balances;
- the level of future repurchase or indemnification requests we may receive, the actual future performance of mortgage loans relating to such requests, the success rates of claimants against us, any developments in litigation and the actual recoveries we may make on any collateral relating to claims against us;
- the amount and rate of deposit growth;
- changes in the reputation of, or expectations regarding, the financial services industry or us with respect to practices, products or financial condition;
- any significant disruption in our operations or technology platform;
- our ability to maintain a compliance and technology infrastructure suitable for the nature of our business;
- our ability to develop digital technology that addresses the needs of our customers;
- our ability to control costs;
- the amount of, and rate of growth in, our expenses as our business develops or changes or as it expands into new market areas;
- our ability to execute on our strategic and operational plans;
- any significant disruption of, or loss of public confidence in, the United States mail service affecting our response rates and consumer payments;
- any significant disruption of, or loss of public confidence in, the internet affecting the ability of our customers to access their accounts and conduct banking transactions;
- our ability to recruit and retain talented and experienced personnel to assist in the development, management and operation of new products and services;
- changes in the labor and employment markets;
- fraud or misconduct by our customers, employees or business partners;
- competition from providers of products and services that compete with our businesses; and

Table of Contents

Other risk factors listed from time to time in reports that we file with the SEC.

Any forward-looking statements made by us or on our behalf speak only as of the date they are made or as of the date indicated, and we do not undertake any obligation to update forward-looking statements as a result of new information, future events or otherwise. You should carefully consider the factors discussed above in evaluating these forward-looking statements. For additional information on factors that could materially influence forward-looking statements included in this Report, see the risk factors set forth under “Part I—Item 1A. Risk Factors” in our 2014 Form 10-K.

Common equity Tier 1 capital	29,804	29,534
Tier 1 capital instruments ⁽³⁾	2,810	1,822
Additional Tier 1 capital adjustments	—	(1)
Tier 1 capital	32,614	31,355
Tier 2 capital instruments ⁽³⁾	1,403	1,542
Qualifying allowance for loan and lease losses	3,098	2,981
Additional Tier 2 capital adjustments	—	1
Tier 2 capital	4,501	4,524
Total risk-based capital ⁽¹³⁾	\$37,115	\$35,879

Table of Contents

-
- As of January 1, 2015, we changed our accounting principle to move from a gross basis of presentation to a net basis, for presenting qualifying derivative assets and liabilities, as well as the related right to reclaim cash collateral or obligation to return cash collateral. See “Note 1—Summary of Significant Accounting Policies” for additional information. Prior period results, excluding regulatory ratios, have been recast to conform to this presentation.
- (1) Includes impact of related deferred taxes.
 - (2) Includes related surplus.
 - (4) Tangible common equity ratio is a non-GAAP measure calculated based on TCE divided by tangible assets.
 - (5) Common equity Tier 1 capital ratio is a regulatory capital measure calculated based on common equity Tier 1 capital divided by risk-weighted assets.
 - (6) Tier 1 risk-based capital ratio is a regulatory capital measure calculated based on Tier 1 capital divided by risk-weighted assets.
 - (7) Total risk-based capital ratio is a regulatory capital measure calculated based on total risk-based capital divided by risk-weighted assets.
 - (8) Tier 1 leverage ratio is a regulatory capital measure calculated based on Tier 1 capital divided by average assets, after certain adjustments.
 - (9) Supplementary leverage ratio is a regulatory capital measure calculated based on Tier 1 capital under the Basel III Standardized Approach divided by total leverage exposure. See “MD&A—Capital Management” for additional information.
 - (10) As of January 1, 2015, risk-weighted assets are calculated under the Basel III Standardized Approach, subject to transition provisions. Prior to January 1, 2015 risk-weighted assets were calculated under Basel I.
 - (11) Amounts presented are net of tax.
 - (12) Amounts based on transition provisions for regulatory capital deductions and adjustments of 20% for 2014 and 40% for 2015.
 - (13) Total risk-based capital equals the sum of Tier 1 capital and Tier 2 capital.

Table of Contents

Glossary and Acronyms

2012 U.S. card acquisition: On May 1, 2012, pursuant to the agreement with HSBC Finance Corporation, HSBC USA Inc. and HSBC Technology and Services (USA) Inc. (collectively, “HSBC”), we closed the acquisition of substantially all of the assets and assumed liabilities of HSBC’s credit card and private label credit card business in the United States (other than the HSBC Bank USA, consumer credit card program and certain other retained assets and liabilities).

2014 Stock Repurchase Program: On March 26, 2014, we announced that our Board of Directors had authorized the repurchase of up to \$2.5 billion of shares of our common stock. The 2014 Stock Repurchase Program was completed as of March 31, 2015.

2015 Stock Repurchase Program: On March 11, 2015, we announced that our Board of Directors had authorized the repurchase of up to \$3.125 billion of shares of our common stock beginning in the second quarter of 2015 through the end of the second quarter of 2016.

Acquired Loans: Refers to the substantial majority of consumer and commercial loans acquired in the ING Direct and Chevy Chase Bank acquisitions, and a limited portion of the credit card loans acquired in the 2012 U.S. card acquisition, which were recorded at fair value at acquisition and subsequently accounted for based on expected cash flows to be collected (under the accounting standard formerly known as “Statement of Position 03-3, Accounting for Certain Loans or Debt Securities Acquired in a Transfer,” commonly referred to as “SOP 03-3” or “ASC 310-30”). The difference between the fair value at acquisition and expected cash flows represents the accretable yield, which is recognized into interest income over the life of the loans. The difference between the contractual payments on the loans and expected cash flows represents the nonaccretable difference or the amount of principal and interest not considered collectible, which incorporates future expected credit losses over the life of the loans. Decreases in expected cash flows from the previous estimate resulting from further credit deterioration will generally result in an impairment charge recognized in our provision for credit losses and an increase in the allowance for loan and lease losses. Charge-offs are not recorded until the expected credit losses within the nonaccretable difference are depleted. In addition, Acquired Loans are not classified as delinquent or nonperforming as we expect to collect our net investment in these loans and the nonaccretable difference will absorb the majority of the losses associated with these loans.

Annual Report: References to our “2014 Form 10-K” or “2014 Annual Report” or “this Report” are to our Annual Report on Form 10-K for the fiscal year ended December 31, 2014.

Banks: Refers to COBNA and CONA.

Basel Committee: The Basel Committee on Banking Supervision.

Basel III Advanced Approaches: The Basel III Advanced Approaches is mandatory for those institutions with consolidated total assets of \$250 billion or more or consolidated total on-balance-sheet foreign exposure of \$10 million or more. The Final Rule modified the Advanced Approaches version of Basel II to create the Basel III Advanced Approaches.

Basel III Standardized Approach: The Final Rule modified Basel I to create the Basel III Standardized Approach, which requires for Basel III Advanced Approaches banking organizations that have yet to exit parallel run to use the Basel III Standardized Approach to calculate regulatory capital, including capital ratios, subject to transition provisions.

Capital One: Capital One Financial Corporation and its subsidiaries.

Carrying value (with respect to loans): The amount at which a loan is recorded on the consolidated balance sheets. For loans recorded at amortized cost, carrying value is the unpaid principal balance net of unamortized deferred loan origination fees and costs, and unamortized purchase premium or discount. For loans that are or have been on nonaccrual status, the carrying value is also reduced by any net charge-offs that have been recorded and the amount of interest payments applied as a reduction of principal under the cost recovery method. For credit card loans, the carrying value also includes interest that has been billed to the customer. For loans classified as held for sale, carrying value is the lower of carrying value as described in the sentences above, or fair value. For Acquired Loans, the carrying value equals fair value upon acquisition adjusted for subsequent cash collections and yield accreted to date.

CCB: Chevy Chase Bank, F.S.B., which was acquired by the Company on February 27, 2009.

COBNA: Capital One Bank (USA), National Association, one of our fully owned subsidiaries, which offers credit and debit card products, other lending products and deposit products.

Table of Contents

Common equity Tier 1 capital: Common equity, related surplus, and retained earnings less accumulated other comprehensive income net of applicable phase-ins, less goodwill and intangibles net of associated deferred tax liabilities and applicable phase-ins, less other deductions, as defined by regulators.

Company: Capital One Financial Corporation and its subsidiaries.

CONA: Capital One, National Association, one of our fully owned subsidiaries, which offers a broad spectrum of banking products and financial services to consumers, small businesses and commercial clients.

Credit risk: Credit risk is the risk of loss from an obligor's failure to meet the terms of any contract or otherwise fail to perform as agreed.

Derivative: A contract or agreement whose value is derived from changes in interest rates, foreign exchange rates, prices of securities or commodities, credit worthiness for credit default swaps or financial or commodity indices.

Discontinued operations: The operating results of a component of an entity, as defined by ASC 205, that are removed from continuing operations when that component has been disposed of or it is management's intention to sell the component.

Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"): Regulatory reform legislation signed into law on July 21, 2010. This law broadly affects the financial services industry and contains numerous provisions aimed at strengthening the sound operation of the financial services sector.

Exchange Act: The Securities Exchange Act of 1934.

eXtensible Business Reporting Language ("XBRL"): A language for the electronic communication of business and financial data.

Federal Banking Agencies: The Federal Reserve, Office of the Comptroller of the Currency and Federal Deposit Issuance Corporation.

Federal Reserve: Board of Governors of the Federal Reserve System.

FICO score: A measure of consumer credit risk provided by credit bureaus, typically produced from statistical modeling software created by Fair Isaac Corporation utilizing data collected by the credit bureaus.

Final Basel III Capital Rules: The Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency issued a rule implementing the Basel III capital framework developed by the Basel Committee on Banking Supervision as well as certain Dodd-Frank Act and other capital provisions.

Final LCR Rule: The Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, and the Office of the Comptroller of the Currency issued final rules implementing the Basel III liquidity coverage ratio in the United States.

Final Rule: A capital rule finalized by the Federal Reserve, the OCC and the FDIC (collectively, the U.S. federal banking agencies) that implements the Basel III capital accord developed by the Basel Committee on Banking Supervision and incorporates certain Dodd-Frank Act capital provisions and updates to the PCA capital requirements.

Foreign currency derivative contracts: An agreement to exchange contractual amounts of one currency for another currency at one or more future dates.

Foreign exchange contracts: Contracts that provide for the future receipt or delivery of foreign currency at previously agreed-upon terms.

GreenPoint: Refers to our wholesale mortgage banking unit, GreenPoint Mortgage Funding, Inc. ("GreenPoint"), which was closed in 2007.

GSE or Agency: A government-sponsored enterprise or agency is a financial services corporation created by the United States Congress. Examples of U.S. government agencies include Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae) and the Federal Home Loan Banks.

Impairment: The condition when the carrying amount of an asset exceeds or is expected to exceed its fair value.

Impaired loans: A loan is considered impaired when, based on current information and events, it is probable that we will not be able to collect all amounts due from the borrower in accordance with the original contractual terms of the loan.

Table of Contents

Inactive Insured Securitizations: Securitizations as to which the monoline bond insurers have not made repurchase-related requests or loan file requests to one of our subsidiaries.

ING Direct acquisition: On February 17, 2012, we completed the acquisition of substantially all of the ING Direct business in the United States (“ING Direct”) from ING Groep N.V., ING Bank N.V., ING Direct N.V. and ING Direct Bancorp.

Insured securitizations: Securitizations supported by bond insurance.

Interest rate sensitivity: The exposure to interest rate movements.

Interest rate swaps: Contracts in which a series of interest rate flows in a single currency are exchanged over a prescribed period. Interest rate swaps are the most common type of derivative contract that we use in our asset/liability management activities.

Investment grade: Represents Moody’s long-term rating of Baa3 or better; and/or a Standard & Poor’s, Fitch or DBRS long-term rating of BBB- or better; or if unrated, an equivalent rating using our internal risk ratings. Instruments that fall below these levels are considered to be non-investment grade.

Investments in Qualified Affordable Housing Projects: Capital One invests in private investment funds that make equity investments in multifamily affordable housing properties that provide affordable housing tax credits for these investments. The activities of these entities are financed with a combination of invested equity capital and debt.

Investor entities: Entities that invest in community development entities (“CDE”) that provide debt financing to businesses and non-profit entities in low-income and rural communities.

Leverage ratio (Basel I guideline): Tier 1 capital divided by average assets after certain adjustments, as defined by the regulators.

Liquidity risk: Liquidity risk is the risk that the Company will not be able to meet its future financial obligations as they come due, or invest in future asset growth because of an inability to obtain funds at a reasonable price within a reasonable time period.

Loan-to-value (“LTV”) ratio: The relationship expressed as a percentage, between the principal amount of a loan and the appraised value of the collateral (i.e., residential real estate, autos, etc.) securing the loan.

Managed basis: A non-GAAP presentation of financial results that includes reclassifications to present revenue on a fully taxable-equivalent basis. Management uses this non-GAAP financial measure at the segment level, because it believes this provides information to enable investors to understand the underlying operational performance and trends of the particular business segment and facilitates a comparison of the business segment with the performance of competitors.

Market risk: Market risk is the risk that an institution’s earnings or the economic value of equity could be adversely impacted by changes in interest rates, foreign exchange rates, or other market factors.

Master netting agreement: An agreement between two counterparties that have multiple contracts with each other that provides for the net settlement of all contracts through a single payment in the event of default or termination of any one contract.

Mortgage-backed security (“MBS”): An asset-backed security whose cash flows are backed by the principal and interest payments of a set of mortgage loans.

Mortgage servicing rights (“MSR”): The right to service a mortgage loan when the underlying loan is sold or securitized. Servicing includes collections for principal, interest and escrow payments from borrowers and accounting for and remitting principal and interest payments to investors.

Net interest margin: The result of dividing net interest income by average interest-earning assets.

Nonperforming loans and leases: Loans and leases that have been placed on non-accrual status.

North Fork: North Fork Bancorporation, Inc., which was acquired by the Company in 2006.

Operational risk: The risk of loss, capital impairment, adverse customer experience, or reputational impact resulting from failure to comply with policies and procedures, failed internal processes or systems, or from external events.

Option-ARM loans: The option-ARM real estate loan product is an adjustable-rate mortgage loan that initially provides the borrower with the monthly option to make a fully-amortizing, interest-only or minimum fixed payment. After the initial payment option period, usually five years, the recalculated minimum payment represents a

fully-amortizing principal and interest payment that would effectively repay the loan by the end of its contractual term.

Table of Contents

Other-than-temporary impairment (“OTTI”): An impairment charge taken on a security whose fair value has fallen below the carrying value on the balance sheet and its value is not expected to recover through the holding period of the security.

Public Fund deposits: Deposits that are derived from a variety of political subdivisions such as school districts and municipalities.

Purchase volume: Dollar amount of customer purchases, net of returns.

Rating agency: An independent agency that assesses the credit quality and likelihood of default of an issue or issuer and assigns a rating to that issue or issuer.

Repurchase agreement: An instrument used to raise short-term funds whereby securities are sold with an agreement for the seller to buy back the securities at a later date.

Restructuring charges: Charges typically from the consolidation or relocation of operations, and reductions in work force.

Return on average assets: Calculated based on annualized income from continuing operations, net of tax, for the period divided by average total assets for the period.

Return on average common equity: Calculated based on the annualized sum of (i) income from continuing operations, net of tax; (ii) less dividends and undistributed earnings allocated to participating securities; (iii) less preferred stock dividends, for the period, divided by average common equity. Our calculation of return on average common equity may not be comparable to similarly titled measures reported by other companies.

Return on average tangible common equity: Calculated based on the annualized sum of (i) income from continuing operations, net of tax; (ii) less dividends and undistributed earnings allocated to participating securities; and (iii) less preferred stock dividends, for the period, divided by average tangible common equity. Our calculation of return on average tangible common equity may not be comparable to similarly titled measures reported by other companies.

Risk-weighted assets: Risk-weighted assets consist of on- and off-balance sheet assets that are assigned to one of several broad risk categories and weighted by factors representing their risk and potential for default. In 2014, the calculation of risk weighted assets is based on the general risk-based approach, as defined by regulators.

Securitized debt obligations: A type of asset-backed security and structured credit product constructed from a portfolio of fixed-income assets.

SOP 03-3: Statement of Position 03-3 (or ASC 310-30), Accounting for Certain Loans or Debt Securities Acquired in a Transfer.

Small-ticket commercial real estate: Our small-ticket commercial real estate portfolio is predominantly low, or no documentation loans, with balances generally less than \$2 million. This portfolio was originated on a national basis through a broker network, and is in a run-off mode.

Subprime: For purposes of lending in our Credit Card business we generally consider FICO scores of 660 or below, or other equivalent risk scores, to be subprime. For purposes of auto lending in our Consumer Banking business we generally consider borrowers FICO scores of 620 or below to be subprime.

Tangible common equity (“TCE”): Common equity less goodwill and intangible assets adjusted for deferred tax liabilities associated with non-tax deductible intangible assets and tax deductible goodwill.

Troubled debt restructuring (“TDR”): A TDR is deemed to occur when the Company modifies the contractual terms of a loan agreement by granting a concession to a borrower that is experiencing financial difficulty.

U.K. PPI Reserve: U.K. Payment Protection Insurance customer refund reserve.

U.S. federal banking agencies: The Federal Reserve, the OCC and the FDIC.

U.S. GAAP: Accounting principles generally accepted in the United States of America. Accounting rules and conventions defining acceptable practices in preparing financial statements in the U.S.

Unfunded commitments: Legally binding agreements to provide a defined level of financing until a specified future date.

Variable Interest Entity (“VIE”): An entity that: (1) lacks enough equity investment at risk to permit the entity to finance its activities without additional financial support from other parties; (2) has equity owners that lack the right to make significant decisions affecting the entity’s operations; and/or (3) has equity owners that do not have an obligation to

absorb or the right to receive the entity's losses or return.

CAPITAL ONE FINANCIAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1—SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company

Capital One Financial Corporation, a Delaware Corporation established in 1994 and headquartered in McLean, Virginia, is a diversified financial services holding company with banking and non-banking subsidiaries. Capital One Financial Corporation and its subsidiaries (the “Company”) offer a broad array of financial products and services to consumers, small businesses and commercial clients through branches, the internet and other distribution channels. As of June 30, 2015, our principal subsidiaries included:

• Capital One Bank (USA), National Association (“COBNA”), which offers credit and debit card products, other lending products and deposit products; and

• Capital One, National Association (“CONA”), which offers a broad spectrum of banking products and financial services to consumers, small businesses and commercial clients.

The Company and its subsidiaries are hereafter collectively referred to as “we,” “us” or “our.” COBNA and CONA are collectively referred to as the “Banks.”

We also offer products outside of the United States of America (“U.S.”) principally through Capital One (Europe) plc (“COEP”), an indirect subsidiary of COBNA organized and located in the United Kingdom (“U.K.”), and through a branch of COBNA in Canada. COEP has authority, among other things, to provide credit card loans. Our branch of COBNA in Canada also has the authority to provide credit card loans.

Our principal operations are currently organized for management reporting purposes into three major business segments, which are defined based on the products and services provided or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. We provide details on our business segments, the integration of recent acquisitions into our business segments, and the allocation methodologies and accounting policies used to derive our business segment results in “Note 13—Business Segments.”

Basis of Presentation and Use of Estimates

The accompanying consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the U.S. (“U.S. GAAP”). The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and in the related disclosures. These estimates are based on information available as of the date of the consolidated financial statements. While management makes its best judgment, actual amounts or results could differ from these estimates. Certain prior period amounts have been reclassified to conform to the current period presentation.

Principles of Consolidation

The consolidated financial statements include the accounts of Capital One Financial Corporation and all other entities in which we have a controlling financial interest. We determine whether we have a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity (“VIE”). All significant intercompany account balances and transactions have been eliminated.

Change in Accounting Principle

As of January 1, 2015, we changed our accounting principle to move from a gross basis of presentation to a net basis for presenting qualifying derivative assets and liabilities, as well as the related fair value amounts recognized for the right to reclaim cash collateral (a receivable) or the obligation to return cash collateral (a payable), for instruments executed with the same counterparty where a right of setoff exists. This newly adopted policy is preferable as it more accurately reflects the Company’s counterparty credit risk as well as our contractual rights and obligations under these arrangements. Further, this change will align our presentation with that of the majority of our peer institutions.

We retrospectively adopted this change in accounting principle and our consolidated balance sheet has been recast for all prior periods presented. As a result, our interest receivable, other assets and total assets as of December 31, 2014

were reduced by \$356 million, \$331 million and \$687 million, respectively. Interest payable, other liabilities and total liabilities decreased as of December 31, 2014 by \$63 million, \$624 million and \$687 million, respectively. There was no impact to operating activities in the consolidated statement of cash flows or any line item within the consolidated statements of income. See “Note 9—Derivative Instruments and Hedging Activities” for additional detail on the accounting for derivative instruments.

New Accounting Standards Adopted

Accounting for Repurchase Transactions

In June 2014, the Financial Accounting Standards Board (“FASB”) issued guidance that requires repurchase-to-maturity transactions to be accounted for as secured borrowings rather than sales. New disclosures are also required for certain transactions accounted for as secured borrowings and transfers accounted for as sales when the transferor retains substantially all of the exposure to the economic return on the transferred financial assets. Our adoption of the accounting guidance in the first quarter of 2015 did not have a significant impact on our financial condition, results of operations or liquidity as the guidance is consistent with our current practice. As required by the new guidance, the new disclosures are effective and have been provided beginning in the second quarter of 2015.

Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period

In June 2014, the FASB issued guidance clarifying that a performance target contained within a share-based payment award that affects vesting and can be achieved after the requisite service period has been completed is to be accounted for as a performance condition. Accordingly, the grantor of such awards should recognize compensation cost in the period in which it becomes probable that the performance target will be achieved. The amount of the compensation cost recognized should represent the cost attributable to the requisite service period fulfilled. The guidance is effective for annual and interim periods beginning after December 15, 2015, with early adoption permitted. Our adoption of this guidance in the first quarter of 2015 did not have a significant impact on our financial condition, results of operations or liquidity as the guidance is consistent with our current practice.

Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity

In April 2014, the FASB issued guidance raising the threshold for a disposal to qualify as a discontinued operation. Under the new guidance, a component of an entity or group of components that has been disposed by sale, disposed of other than by sale or is classified as held for sale and that represents a strategic shift that has, or will have, a major effect on an entity’s operations and financial results should be reported as discontinued operations. The guidance should be applied prospectively for disposals or classifications as held for sale of components of an entity that occur within annual and interim periods beginning after December 15, 2014, with early adoption permitted in certain circumstances. Our adoption of this guidance in the first quarter of 2015 did not have any effect on our consolidated financial statements due to the prospective transition provisions.

Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans Upon Foreclosure

In January 2014, the FASB issued guidance clarifying when an entity should reclassify a consumer mortgage loan collateralized by residential real estate to foreclosed property. Reclassification should occur when the creditor obtains legal title to the residential real estate property or when the borrower conveys all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. An entity should not wait until a redemption period, if any, has expired to reclassify a consumer mortgage loan to foreclosed property. The guidance was effective for annual and interim periods beginning after December 15, 2014. Our adoption of this guidance in the first quarter of 2015 did not have a significant impact on our financial condition, results of operations or liquidity as the guidance is materially consistent with our current practice.

Recently Issued but Not Yet Adopted Accounting Standards

Simplifying the Presentation of Debt Issuance Costs

In April 2015, the FASB issued guidance simplifying the presentation of debt issuance costs. Under the new guidance, the debt issuance costs related to a recognized debt liability will be presented on the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The guidance should be applied retrospectively and is effective for annual and interim periods beginning after December 15, 2015, with early adoption permitted. We are currently evaluating the potential impact of the new guidance on the consolidated financial statements.

Table of ContentsCAPITAL ONE FINANCIAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 2—DISCONTINUED OPERATIONS

Shutdown of Mortgage Origination Operations of our Wholesale Mortgage Banking Unit

In the third quarter of 2007, we closed the mortgage origination operations of our wholesale mortgage banking unit, GreenPoint, which we acquired in December 2006 as part of the North Fork Bancorporation, Inc. (“North Fork”) acquisition. The results of the wholesale banking unit have been accounted for as a discontinued operation and are therefore not included in our results from continuing operations for the three and six months ended June 30, 2015 and 2014. We have no significant continuing involvement in these operations.

The following table summarizes the results from discontinued operations related to the closure of the mortgage origination operations of our wholesale mortgage banking unit:

Table 2.1: Results of Discontinued Operations

(Dollars in millions)	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Non-interest income (expense), net	\$18	\$(15)) \$48	\$32
Income (loss) from discontinued operations before income taxes	18	(15)) 48	32
Income tax provision (benefit)	7	(5)) 18	12
Income (loss) from discontinued operations, net of tax	\$11	\$(10)) \$30	\$20

The discontinued mortgage origination operations of our wholesale mortgage banking unit had remaining assets which primarily consisted of the deferred tax asset related to the reserve for representations and warranties; and liabilities which primarily consisted of reserves for representations and warranties on loans previously sold to third parties. See “Note 14—Commitments, Contingencies, Guarantees and Others” for information related to reserves we have established for our mortgage representation and warranty exposure.

Table of ContentsCAPITAL ONE FINANCIAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 3—INVESTMENT SECURITIES

Our investment portfolio consists primarily of the following: U.S. Treasury securities; corporate debt securities guaranteed by U.S. government agencies; U.S. government-sponsored enterprise or agency (“Agency”) and non-agency residential mortgage-backed securities (“RMBS”) and commercial mortgage-backed securities (“CMBS”); other asset-backed securities (“ABS”); and other investments. The carrying value of our investments in U.S. Treasury securities, Agency securities and other securities guaranteed by the U.S. government or U.S. government agencies represented 89% and 86% of our total investment securities as of June 30, 2015 and December 31, 2014, respectively. Our investment portfolio includes securities available for sale and securities held to maturity. We classify securities as available for sale or held to maturity based on our investment strategy and management’s assessment of our intent and ability to hold the securities until maturity.

The table below presents the overview of our investment portfolio at June 30, 2015 and December 31, 2014.

Table 3.1: Overview of Investment Portfolio

(Dollars in millions)	June 30, 2015	December 31, 2014
