

PUTNAM MANAGED HIGH YIELD TRUST

Form N-CSR

January 27, 2006

Item 1. Report to Stockholders:

The following is a copy of the report transmitted to stockholders pursuant to Rule 30e-1 under the Investment Company Act of 1940:

What makes Putnam different?

In 1830, Massachusetts Supreme Judicial Court Justice Samuel Putnam established The Prudent Man Rule, a legal foundation for responsible money management.

THE PRUDENT MAN RULE

All that can be required of a trustee to invest is that he shall conduct himself faithfully and exercise a sound discretion. He is to observe how men of prudence, discretion, and intelligence manage their own affairs, not in regard to speculation, but in regard to the permanent disposition of their funds, considering the probable income, as well as the probable safety of the capital to be invested.

A time-honored tradition in money management

Since 1937, our values have been rooted in a profound sense of responsibility for the money entrusted to us.

A prudent approach to investing

We use a research-driven team approach to seek consistent, dependable, superior investment results over time, although there is no guarantee a fund will meet its objectives.

Funds for every investment goal

We offer a broad range of mutual funds and other financial products so investors and their advisors can build diversified portfolios.

A commitment to doing what's right for investors

We have stringent investor protections and provide a wealth of information about the Putnam funds.

Industry-leading service

We help investors, along with their financial advisors, make informed investment decisions with confidence.

Message from the Trustees Dear Fellow Shareholder

During the course of 2005, U.S. and global economies proved resilient in the face of some emerging challenges. Higher energy prices, mounting inflationary pressures, and damage caused by an unusually active hurricane season appeared at times to pose a risk to corporate earnings, raising investors' concerns. The Federal Reserve Board's program of interest-rate increases remained in effect throughout the year, as well. Nevertheless, in recent months the financial markets have demonstrated trends consistent with an expanding economy -- relative weakness for bonds and relative strength for stocks. With many companies appearing likely to deliver strong earnings, our teams are working to identify investment opportunities while remaining cognizant of the risks posed by higher energy prices in the winter months, as well as the possibility of continued increases in interest rates in 2006.

In our view, the professional research, diversification, and active management that mutual funds provide continue to make them an intelligent choice for investors. We want you to know that Putnam Investments' management team, under the leadership of Chief Executive Officer Ed Haldeman, continues to focus on investment performance and remains committed to putting the interests of shareholders first. Also, in keeping with these goals, we have redesigned and expanded our shareholder reports to make it easier for you to learn more about your fund. Furthermore, on page 18 we provide information about the 2005 approval by the Trustees of your fund's management contract with Putnam.

In the following pages, members of your fund's management team discuss the fund's performance and strategies, and their outlook for the months ahead. We thank you for your support of the Putnam funds throughout 2005 and wish you a happy and prosperous 2006.

Putnam Managed High Yield Trust: a disciplined approach to seeking income and capital growth

Relative to most types of fixed-income investments, high-yield bonds are more dependent on the performance of issuing companies than on interest rates. For this reason, distinguishing between opportunities and pitfalls requires a rigorous investment process. With Putnam Managed High Yield Trust, this process is highlighted by exhaustive research, investment diversification, and timely portfolio adjustments.

Because of the risks of high-yield bond investing, in-depth credit research is essential. The fund's research team -- more than 20 professionals, including analysts who specialize by industry -- visits with the management of issuing companies and analyzes each company's prospects. The team then compares this information, along with each bond's independent credit rating, to the bond's stated yield before deciding whether it is an appropriate investment for the fund.

The fund's portfolio typically consists of a broad range of industries and companies. Holdings are diversified across industry sectors and among bonds with differing credit ratings. While the fund invests primarily in the bonds of U.S. companies, its diversified approach allows it to include foreign bonds as well. Among these securities, investments in emerging-market bonds may be used to enhance the fund's appreciation potential. Although diversification does not ensure a profit or protect against a loss and it is possible to lose money in a diversified portfolio, the fund's diversification can help reduce the volatility that typically comes with higher-risk investments.

As the bond markets shift over time, the fund's management looks for ways to capitalize on developments that affect fixed-income securities in general and high-yield bonds in particular. For example, when credit spreads

High-yield bonds have historically offered greater return potential than investment-grade bonds.

are wide and expected to tighten, the fund may pursue the higher income potential offered by lower-quality issues. On the other hand, when credit spreads are narrow -- that is, when the difference in yield between higher- and lower-rated bonds of comparable maturities is small -- the fund may shift its emphasis to higher-quality high-yield bonds.

Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in bonds are subject to certain risks, including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses. Additional risks may be associated with emerging-market securities, including illiquidity and volatility.

How do closed-end funds differ from open-end funds?

More assets at work While open-end funds must maintain a cash position to meet redemptions, closed-end funds have no such requirement and can keep more of their assets invested in the market.

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

Traded like stocks Closed-end fund shares are traded on stock exchanges, and their market prices fluctuate in response to supply and demand, among other factors.

Market price vs. net asset value Like an open-end fund's net asset value (NAV) per share, the NAV of a closed-end fund share is equal to the current value of the fund's assets, minus its liabilities, divided by the number of shares outstanding. However, when buying or selling closed-end fund shares, the price you pay or receive is the market price. Market price reflects current market supply and demand and may be higher or lower than the NAV.

In general, the performance of high-yield bonds tends to be less dependent on interest rates than that of higher-rated bonds. Over the past 10 years, the JP Morgan Developed High Yield Index (the fund's benchmark) largely outperformed the Lehman Global Aggregate Bond Index (which is made up of a variety of investment-grade bonds), particularly when corporate stocks were rallying.

The JP Morgan Developed High Yield Index is an unmanaged index of high-yield fixed-income securities of developed markets. The Lehman Global Aggregate Bond Index is an unmanaged index of global investment-grade fixed-income securities. You cannot invest directly in an index.

5

Putnam Managed High Yield Trust seeks high current income and, as a secondary objective, to the extent consistent with high current income, capital growth, by investing in corporate high-yield bonds. The fund is designed for investors seeking higher fixed-income returns who are willing to accept the added risks of investing in below-investment-grade bonds.

Highlights

- For the six months ended November 30, 2005, Putnam Managed High Yield Trust returned 3.34% at net asset value (NAV) and 0.56% at market price.
- The fund's benchmark, the JP Morgan Developed High Yield Index, returned 2.52%.
- The average return for the fund's Lipper category, High Current Yield Funds (closed-end) was 3.68%.
- Additional fund performance, comparative performance, and Lipper data can be found in the performance section beginning on page 12.

Performance

It is important to note that a fund's performance at market price may differ from its results at NAV. Although market price performance generally reflects investment results, it may also be influenced by several other factors, including changes in investor perceptions of the fund or its investment advisor, market conditions, fluctuations in supply and demand for the fund's shares, and changes in fund distributions.

Total return for periods ended 11/30/05

Since the fund's inception (6/25/93), average annual return is 6.18% at NAV and 4.30% at market price.

	Average annual return		Cumulative return	
	NAV	Market price	NAV	Market price
10 years	5.63%	3.71%	72.85%	43.98%
5 years	7.86	5.23	45.96	29.02

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

3 years	13.20	4.62	45.07	14.50
1 year	4.45	-0.76	4.45	-0.76
6 months	--	--	3.34	0.56

Data is historical. Past performance does not guarantee future results. More recent returns may be less or more than those shown. Investment return, net asset value, and market price will fluctuate and you may have a gain or a loss when you sell your shares. Performance assumes reinvestment of distributions and does not account for taxes.

6

Report from the fund managers

The period in review

During the six months ended November 30, 2005, Putnam Managed High Yield Trust outperformed its benchmark, the JP Morgan Developed High Yield Index, based on results at net asset value (NAV). This outperformance was due primarily to successful security selection; in addition to positioning the fund to benefit from the strength of numerous holdings, we believe we also added value by underweighting or entirely avoiding some of the period's weakest performers. Your fund also benefited from a small position in emerging-market bonds held earlier in the period; although this position was sold before the end of the period, we believe it contributed to the fund's relative outperformance. The fund's results at NAV were slightly behind the average for its Lipper peer group, but comparisons in this category can be misleading because the peer group contains only six funds, some of which use leverage to boost returns.

Market overview

In the months leading up to the semiannual period covered by this report, high-yield bonds had struggled due to concerns that record-high energy prices might spark more broad-based inflation. Investors feared that the Federal Reserve Board (the Fed) might abandon its measured tightening policy and begin raising short-term interest rates more aggressively. In addition, market participants sought to come to terms with the credit-rating downgrades of General Motors and Ford bonds, and the automakers' subsequent entry into the high-yield market. However, these fears subsided during the semiannual period. The high-yield bond market has assimilated these large issuers smoothly and recovered to post positive returns for the period.

Overall, high-yield bonds continued to benefit from consistently solid corporate business fundamentals and steady consolidation activity. Several high-yield companies were acquired by investment-grade firms, resulting in upgrades of their credit ratings. The Fed continued to boost short-term interest rates steadily, hiking the federal funds rate four times, bringing it to 4.00% by period-end. These moves

7

didn't lead to substantial increases in yields for longer-term bonds, but created a bit of a headwind for the high-yield market in the early fall. However, high-yield bonds enjoyed stronger performance in November due to additional demand generated by solid inflows of assets into high-yield mutual funds. The default rate within the

high-yield market remained near historical lows, and the yield spread -- or advantage -- offered by high-yield bonds over Treasury bonds with comparable maturities ended the period below historical averages, indicating generally favorable sentiment toward the asset class, although spreads ended the period wider than they were at the beginning of 2005.

Strategy overview

We continued to upgrade the credit quality of the portfolio during the period, moving away from the lower-quality bonds we had emphasized during the past two years. This shift was based on our belief that the Fed's continued tightening of short-term interest rates would start to curtail economic growth. We also felt that narrow yield spreads -- i.e., a smaller difference between yields on higher-quality and lower-quality bonds of comparable maturities -- meant high-yield bond investors were not being compensated enough for the added risk of owning lower-quality bonds.

In comparison to the benchmark, the fund carried an overweighted stake in energy, where we focused on small and

Market sector performance

These indexes provide an overview of performance in different market sectors for the six months ended 11/30/05.

8

midsize exploration and production companies that we considered were well- positioned to profit from higher oil and gas prices. We underweighted transportation issues, avoiding Delta Airlines and Northwest Airlines, both of which declared bankruptcy during the period. We also underweighted the automotive industry, particularly auto suppliers whose fates are heavily dependent on the big three U.S. auto producers, and who were adversely affected by higher operating costs. In addition, we underweighted paper and forest products. We considered these bonds unattractively priced and we believed that some firms were facing weakening business prospects. As noted earlier, the fund carried a small stake in emerging-market debt for part of the period, and sold it when the bonds reached our price targets.

Your fund's holdings

During the semiannual period, your fund's performance was helped by several factors. The sector-weighting decisions just described -- overweighting energy; underweighting transportation and paper and forest products; and keeping a small stake in emerging markets -- all buoyed performance. The fund's strong showing relative to its benchmark is mainly due to our underweighting or not owning certain index components that suffered price declines during the period. These laggards included electric energy merchant

Comparison of top industry weightings

This chart shows how the fund's top weightings have changed over the last six months. Weightings are shown as a percentage of net assets. Holdings will vary over time.

9

Calpine, which appeared headed toward bankruptcy due to heavy indebtedness and rising prices for the natural gas the firm uses for power generation. The fund also benefited from underweighting **Ford** and **General Motors**, which, after enjoying a short rally upon entering the high-yield market, underperformed over the six-month period due to relatively weak business fundamentals. Television broadcaster **Paxson Communications**, on the other hand, made a substantial, positive contribution to performance. The prices for Paxson's bonds improved because its management team offered the market more clarity about the firm's ownership structure and corporate strategy going forward.

On the downside, the fund's performance relative to its benchmark index was held back by our underweighting of bonds issued by electric energy merchant Mirant and rural/suburban wireless telecommunications services provider Dobson Communications. Both of these companies' bonds recovered from depressed price levels during the period. Mirant's bonds rallied as the company emerged from bankruptcy, but we chose to not purchase any because we found Mirant's credit profile unappealing. Similarly, Dobson's bonds rallied when the company posted better-than-expected revenues from roaming charges that bolstered its financial health, but we missed out on the rebound due to credit concerns.

Top holdings

This table shows the fund's top holdings, and the percentage of the fund's net assets that each comprised, as of 11/30/05. The fund's holdings will change over time.

Holding (percent of fund's net assets)	Coupon (%) and maturity date	Industry
General Motors Acceptance Corp. (0.8%)	8%, 2031	Automotive
Ford Motor Credit Corp. (0.8%)	7.875%, 2010	Automotive
DirecTV Holdings, LLC (0.8%)	6.375%, 2015	Broadcasting
CCH I, LLC (0.7%)	11%, 2015	Cable television
Whiting Petroleum Corp. (0.7%)	7%, 2014	Oil and gas
Novelis, Inc. 144A (0.6%)	7.5%, 2015	Metals
Qwest Communications International, Inc. (0.6%)	8%, 2014	Regional Bells

CanWest Media, Inc. (Canada) (0.6%)	8%, 2012	Publishing
Legrand SA (France) (0.6%)	8.5%, 2025	Manufacturing
Qwest Corp. (0.6%)	8.875%, 2012	Regional Bells

10

Fund holding **Milacron**, maker of plastic injection molding equipment, declined during the period, dampening performance. Bonds issued by the company fell as investors worried that its customers -- facing high plastic resin prices -- might choose to defer buying new equipment from Milacron.

Please note that the holdings discussed in this report may not have been held by the fund for the entire period. Portfolio composition is subject to review in accordance with the fund's investment strategy, and may vary in the future.

The outlook for your fund

The following commentary reflects anticipated developments that could affect your fund over the next six months, as well as your management team's plans for responding to them.

At this time, we believe corporate business fundamentals are generally positive, driven by a strong U.S. economy, healthy capital markets, merger-and-acquisitions activity, credit upgrades, and low default rates. Defaults may rise from current lows during the next 12 months, but we do not anticipate that any increase will be dramatic. In terms of valuations, yield spreads between high-yield bonds and Treasuries are currently narrower than the historical average, indicating that high-yield bond valuations may be relatively high -- although historically, spreads have been at similar levels during extended periods of low default rates. As for technicals (issues related to the supply of and demand for high-yield bonds that help drive the market), demand and new-issue supply have both waned, leading us to a neutral outlook in this area. Overall, we feel that, after such a run-up in the recent past, any positive returns for high-yield bonds will largely be generated by their regular interest payments. We intend to follow a relatively defensive approach, particularly regarding credit quality, as we believe it is the most prudent choice in this environment.

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice.

Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in bonds are subject to certain risks, including interest-rate risk, credit risk, and inflation risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond funds have ongoing fees and expenses.

The fund's shares trade on a stock exchange at market prices, which may be higher or lower than the fund's net asset value.

11

Your fund's performance

This section shows your fund's performance during the first half of its fiscal year, which ended November 30, 2005. In accordance with regulatory requirements for mutual funds, we also include performance for the most recent calendar quarter-end. Performance should always be considered in light of a fund's investment strategy. Data represents past performance. Past performance does not guarantee future results. More recent returns may be

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

less or more than those shown. Investment return, net asset value, and market price will fluctuate, and you may have a gain or a loss when you sell your shares.

Fund manager compensation

The total 2004 fund manager compensation that is attributable to your fund is approximately \$30,000. This amount includes a portion of 2004 compensation paid by Putnam Management to the fund managers listed in this section for their portfolio management responsibilities, calculated based on the fund assets they manage taken as a percentage of the total assets they manage. The compensation amount also includes a portion of the 2004 compensation paid to the Group Chief Investment Officer of the fund's broader investment category for his oversight responsibilities, calculated based on the fund assets he oversees taken as a percentage of the total assets he oversees. This amount does not include compensation of other personnel involved in research, trading,

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

administration, systems, compliance, or fund operations; nor does it include non-compensation costs. These percentages are determined as of the fund's fiscal period-end. For personnel who joined Putnam Management during or after 2004, the calculation reflects annualized 2004 compensation or an estimate of 2005 compensation, as applicable.

Other Putnam funds managed by the Portfolio Leader and Portfolio Members

Paul Scanlon is also a Portfolio Leader of Putnam Floating Rate Income Fund, Putnam High Yield Advantage Fund, and Putnam High Yield Trust. He is also a Portfolio Member of Putnam Diversified Income Trust, Putnam Master Intermediate Income Trust, and Putnam Premier Income Trust.

Norman Boucher is also a Portfolio Member of Putnam High Yield Advantage Fund and Putnam High Yield Trust.

Geoffrey Kelley is also a Portfolio Member of Putnam High Yield Advantage Fund and Putnam High Yield Trust.

Robert Salvin is also a Portfolio Member of Putnam High Income Securities Fund, Putnam High Yield Advantage Fund, and Putnam High Yield Trust.

Paul Scanlon, Norman Boucher, Geoffrey Kelley, and Robert Salvin may also manage other accounts and variable trust funds advised by Putnam Management or an affiliate.

Changes in your fund's Portfolio Leader and Portfolio Members

During the year ended November 30, 2005, Paul Scanlon became Portfolio Leader and Geoffrey Kelley and Robert Salvin became Portfolio Members of your fund, while Portfolio Member Norman Boucher rejoined your fund's management team. These changes followed the departure of Portfolio Leader Stephen Peacher and Portfolio Member Rosemary Thomsen from your fund's management team.

15

Terms and definitions

Important terms

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding shares.

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on exchanges such as the American Stock Exchange and the New York Stock Exchange.

Comparative indexes

JP Morgan Developed High Yield Index is an unmanaged index of high-yield fixed-income securities issued in developed countries.

Lehman Aggregate Bond Index is an unmanaged index of U.S. investment-grade fixed-income securities.

Lehman Global Aggregate Bond Index is an unmanaged index of global investment-grade fixed-income securities.

Lehman GNMA Index is an unmanaged index of Government National Mortgage Association bonds.

Lehman Municipal Bond Index is an unmanaged index of long-term fixed-rate investment-grade tax-exempt bonds.

Morgan Stanley Capital International (MSCI) EAFE Index is an unmanaged index of equity securities from developed countries in Western Europe, the Far East, and Australasia.

Russell 2000 Index is an unmanaged index of the 2,000 smallest companies in the Russell 3000 Index.

S&P 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper is a third-party industry-ranking entity that ranks mutual funds. Lipper rankings are based on total return at net asset value and do not reflect sales charges. Funds are ranked among other funds with similar current investment styles or objectives as determined by Lipper. Lipper may change a fund's category assignment at its discretion. Lipper category averages reflect performance trends for funds within a category.

17

Trustee approval of management contract

General conclusions

The Board of Trustees of the Putnam funds oversees the management of each fund and, as required by law, determines annually whether to approve the continuance of your fund's management contract and administrative services contract with Putnam Management and its sub-management contract with Putnam Management's affiliate, Putnam Investments Limited ("PIL"). In this regard, the Board of Trustees, with the assistance of its Contract Committee consisting solely of Trustees who are not "interested persons" (as such term is defined in the Investment Company Act of 1940, as amended) of the Putnam funds (the "Independent Trustees"), requests and evaluates all information it deems reasonably necessary under the circumstances. Over the course of several months beginning in March and ending in June 2005, the Contract Committee met five times to consider the information provided by Putnam Management and other information developed with the assistance of the Board's independent counsel and independent staff. The Contract Committee reviewed and discussed key aspects of this information with all of the Independent Trustees. Upon completion of this review, the Contract Committee recommended and the Independent Trustees approved the continuance of your fund's management contract, administrative services contract and sub-management contract, effective July 1, 2005. Because PIL is an affiliate of Putnam Management and Putnam Management remains fully responsible for all services provided by PIL, the Trustees have not evaluated PIL as a separate entity and all subsequent references to Putnam Management below should be deemed to include reference to PIL as necessary or appropriate in the context.

This approval was based on the following conclusions:

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

- That the fee schedule currently in effect for your fund, subject to certain changes noted below, represents reasonable compensation in light of the nature and quality of the services being provided to the fund, the fees paid by competitive funds and the costs incurred by Putnam Management in providing such services, and
- That such fee schedule represents an appropriate sharing between fund shareholders and Putnam Management of such economies of scale as may exist in the management of the fund at current asset levels.

These conclusions were based on a comprehensive consideration of all information provided to the Trustees and were not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations and how the Trustees considered these factors are described below, although individual Trustees may have evaluated the information presented differently, giving different weights to various factors. It is also important to recognize that the fee arrangements for your fund and the other Putnam funds are the result of many years of review and discussion between the Independent Trustees and Putnam Management, that certain aspects of such arrangements may receive greater scrutiny in some years than others, and that the Trustees' conclusions may be based, in part, on their consideration of these same arrangements in prior years.

18

Model fee schedules and categories; total expenses

The Trustees' review of the management fees and total expenses of the Putnam funds focused on three major themes:

- Consistency. The Trustees, working in cooperation with Putnam Management, have developed and implemented a series of model fee schedules for the Putnam funds designed to ensure that each fund's management fee is consistent with the fees for similar funds in the Putnam family of funds and compares favorably with fees paid by competitive funds sponsored by other investment advisors. Under this approach, each Putnam fund is assigned to one of several fee categories based on a combination of factors, including competitive fees and perceived difficulty of management, and a common fee schedule is implemented for all funds in a given fee category. The Trustees reviewed the model fee schedule currently in effect for the Putnam funds, including fee levels and breakpoints, and the assignment of your fund to a particular fee category under this structure. (Breakpoints refer to reductions in fee rates that apply to additional assets once specified asset levels are reached.)

Since their inception, Putnam's closed-end funds have generally had management fees that are higher than those of Putnam's open-end funds pursuing comparable investment strategies. These differences ranged from five to 20 basis points. The Trustees have reexamined this matter and recommended that these differences be conformed to a uniform five basis points. Under the new fee schedule, the fund pays a quarterly management fee to Putnam Management calculated at the annual rates set out below:

0.55% of the first \$500 million of the fund's average weekly assets (as described below under *Approval of Amended and Restated Management Contract in July 2005*);

0.45% of the next \$500 million;

0.40% of the next \$500 million;

0.35% of the next \$5 billion;

0.325% of the next \$5 billion;

0.305% of the next \$5 billion;

0.29% of the next \$5 billion;

0.28% of the next \$5 billion;

0.27% of the next \$5 billion;

0.26% of the next \$5 billion;

0.25% of the next \$5 billion;
0.24% of the next \$5 billion;
0.23% of the next \$5 billion; and
0.22% thereafter.

19

Your fund's separate administrative services contract provides for quarterly payment of fees to Putnam Management equal to a percentage of the average of weekly determinations of the net asset value of the fund as calculated at the annual rates set out below:

0.20% of the first \$500 million of the fund's average net assets;
0.17% of the next \$500 million;
0.16% of the next \$500 million; and
0.15% of the excess over \$1.5 billion.

The administrative services contract may be amended to provide for payment of fees to Putnam Management on the basis of average weekly assets without shareholder approval.

Based on net asset levels as of June 30, 2005, and without taking into account any leverage your fund may incur for investment purposes, the new management fee schedule for your fund will not change the management fees, as a percentage of the fund's net assets, currently paid by common shareholders. The Trustees approved the new fee schedules for the funds effective as of January 1, 2006, in order to provide Putnam Management an opportunity to accommodate the impact on revenues in its budget process for the coming year.

- **Competitiveness.** The Trustees also reviewed comparative fee and expense information for competitive funds, which indicated that, in a custom peer group of competitive funds selected by Lipper Inc., your fund ranked in the 50th percentile in management fees and in the first percentile in total expenses as of December 31, 2004 (the first percentile being the least expensive funds and the 100th percentile being the most expensive funds). The Trustees expressed their intention to monitor this information closely to ensure that fees and expenses of the Putnam funds continue to meet evolving competitive standards.
- **Economies of scale.** The Trustees concluded that the fee schedule currently in effect for your fund, subject to the changes noted above, represents an appropriate sharing of economies of scale at current asset levels. The Trustees examined the existing breakpoint structure of the Putnam funds' management fees in light of competitive industry practices. The Trustees considered various possible modifications to the Putnam funds' current breakpoint structure, but ultimately concluded that the current breakpoint structure continues to serve the interests of fund shareholders. Accordingly, the Trustees continue to believe that the fee schedules currently in effect for the funds, subject to the changes noted above, represent an appropriate sharing of economies of scale at current asset levels.

In connection with their review of the management and administrative services fees and total expenses of the Putnam funds, the Trustees also reviewed the costs of the services to be provided and profits to be realized by Putnam Management and its affiliates from the relationship with the funds. This information included trends in revenues, expenses and profitability of Putnam Management and its affiliates relating to the investment management and distribution services provided to the funds. In this regard, the Trustees also reviewed an analysis of Putnam Management's revenues, expenses and profitability with respect to the funds' management contracts, allocated on a fund-by-fund basis.

20

Investment performance

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

The quality of the investment process provided by Putnam Management represented a major factor in the Trustees' evaluation of the quality of services provided by Putnam Management under your fund's management contract. The Trustees were assisted in their review of the fund's investment process and performance by the work of the Investment Oversight Committees of the Trustees, which meet on a regular monthly basis with the fund's portfolio teams throughout the year. The Trustees concluded that Putnam Management generally provides a high-quality investment process -- as measured by the experience and skills of the individuals assigned to the management of fund portfolios, the resources made available to such personnel, and in general the ability of Putnam Management to attract and retain high-quality personnel -- but also recognize that this does not guarantee favorable investment results for every fund in every time period. The Trustees considered the investment performance of each fund over multiple time periods and considered information comparing the fund's performance with various benchmarks and with the performance of competitive funds. The Trustees noted the satisfactory investment performance of many Putnam funds. They also noted the disappointing investment performance of certain funds in recent years and continued to discuss with senior management of Putnam Management the factors contributing to such underperformance and actions being taken to improve performance. The Trustees recognized that, in recent years, Putnam Management has made significant changes in its investment personnel and processes and in the fund product line to address areas of underperformance. The Trustees indicated their intention to continue to monitor performance trends to assess the effectiveness of these changes and to evaluate whether additional remedial changes are warranted.

In the case of your fund, the Trustees considered that your fund's common share performance at net asset value was in the following percentiles of its Lipper Inc. peer group for the one-, three- and five-year periods ended December 31, 2004 (the first percentile being the best-performing funds and the 100th percentile being the worst-performing funds):

One-year period	Three-year period	Five-year period
56th	40th	40th

(Because of the passage of time, these performance results may differ from the performance results for more recent periods shown elsewhere in this report.)

As a general matter, the Trustees believe that cooperative efforts between the Trustees and Putnam Management represent the most effective way to address investment performance problems. The Trustees believe that investors in the Putnam funds have, in effect, placed their trust in the Putnam organization, under the oversight of the fund's Trustees, to make appropriate decisions regarding the management of the funds. Based on the responsiveness of Putnam Management in the recent past to Trustee concerns about investment performance, the Trustees believe that it is preferable to seek change within Putnam Management to address performance shortcomings. In the Trustees'

21

view, the alternative of terminating a management contract and engaging a new investment advisor for an underperforming fund would entail significant disruptions and would not provide any greater assurance of improved investment performance.

Brokerage and soft-dollar allocations; other benefits

The Trustees considered various potential benefits that Putnam Management may receive in connection with the services it provides under the management contract with your fund. These include principally benefits related to brokerage and soft-dollar allocations, whereby a portion of the commissions paid by a fund for brokerage is earmarked to pay for research services that may be utilized by a fund's investment advisor, subject to the obligation to seek best execution. The Trustees believe that soft-dollar credits and other potential benefits associated with the allocation of fund brokerage, which pertains mainly to funds investing in equity securities, represent assets of the funds that should be used for the benefit of fund shareholders. This area has been marked by significant change in recent years. In July 2003, acting upon the Contract Committee's recommendation, the Trustees directed that allocations of brokerage to reward firms that sell fund shares be discontinued no later than December 31, 2003. In addition, commencing in 2004, the allocation of brokerage commissions by Putnam

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

Management to acquire research services from third-party service providers has been significantly reduced, and continues at a modest level only to acquire research that is customarily not available for cash. The Trustees will continue to monitor the allocation of the funds' brokerage to ensure that the principle of "best price and execution" remains paramount in the portfolio trading process.

The Trustees' annual review of your fund's management contract and administrative services contract also included the review of your fund's custodian and investor servicing agreements with Putnam Fiduciary Trust Company, which provide benefits to affiliates of Putnam Management.

Comparison of retail and institutional fee schedules

The information examined by the Trustees as part of their annual contract review has included for many years information regarding fees charged by Putnam Management and its affiliates to institutional clients such as defined benefit pension plans, college endowments, etc. This information included comparison of such fees with fees charged to the funds, as well as a detailed assessment of the differences in the services provided to these two types of clients. The Trustees observed, in this regard, that the differences in fee rates between institutional clients and the mutual funds are by no means uniform when examined by individual asset sectors, suggesting that differences in the pricing of investment management services to these types of clients reflect to a substantial degree historical competitive forces operating in separate market places. The Trustees considered the fact that fee rates across all asset sectors are higher on average for mutual funds than for institutional clients, as well as the differences between the

22

services that Putnam Management provides to the Putnam funds and those that it provides to institutional clients of the firm, but have not relied on such comparisons to any significant extent in concluding that the management fees paid by your fund are reasonable.

Approval of amended and restated management contract in July 2005

In July 2005, the Trustees, including the Independent Trustees of your fund, approved an amendment to your fund's management contract to take into account investment leverage in calculating management fees. The Trustees, including a majority of the Independent Trustees, have concluded that it would be in the best interest of your fund and its common shareholders to compensate Putnam Management on the basis of its "average weekly assets," rather than its net assets. "Average weekly assets" is defined as the difference (as measured on a weekly basis) between the fund's total assets (including assets attributable to leverage for investment purposes) and its total liabilities (excluding liabilities attributable to leverage for investment purposes). This formulation effectively allows for Putnam Management to receive management fees on leveraged assets. As a fundamental investment restriction prohibits the fund from issuing preferred shares, for all practical purposes the only form of investment leverage available would be borrowing. In the course of their evaluation, the Trustees considered the benefit to your fund from the additional investment management services that Putnam Management would perform in connection with a leveraged investment strategy, as well as the amount of compensation Putnam Management would receive under the proposed fee structure.

The Trustees noted that the amendment would align the fee arrangements for your fund more closely with those of other closed-end Putnam funds that currently engage in leverage for investment purposes. Furthermore, the Trustees were advised by Putnam Management that it is a customary and widespread practice in the closed-end fund industry to structure leveraged products in a manner that compensates advisors for their management of the assets acquired through leverage.

In evaluating the incentives and potential conflicts of interest created by an average weekly assets-based fee, the Trustees considered that the asset coverage restrictions under the 1940 Act, as well as other legal requirements, limit the extent to which a manager can expose a fund to additional risk through leverage. Furthermore, the Trustees considered the advantages of a management fee reduction mechanism that is included in the amended contract, which reduces the management fee dollar for dollar (subject to a specified maximum reduction) where the costs of carrying investment leverage outweigh the benefits (in terms of net income and short-term capital gains) to common shareholders from managing additional investment assets. In the event that your fund actually engages in leverage, the Trustees will have the opportunity, through regular reports from Putnam Management prepared in connection with the fee reduction mechanism described above, to continue monitoring the conflict of

interest between Putnam Management and your fund.

23

Shareholders of your fund approved the amended and restated management contract at a meeting on December 6, 2005 (which was an adjournment of the fund's annual meeting convened on October 28, 2005).

The Trustees also approved conforming changes to the sub-management contract between Putnam Management and PIL with respect to your fund, to provide for PIL's fee to be calculated on the basis of the fund's average weekly assets. The fee paid under the sub-management contract is paid by Putnam Management and not by your fund. Under the circumstances, the changes to the sub-management contract did not require shareholder approval.

24

Other information for shareholders

Important notice regarding share repurchase program

In October 2005, the Trustees of your fund authorized Putnam Investments to implement a repurchase program on behalf of your fund, which would allow your fund to repurchase up to 5% of its outstanding shares over the 12 months following the announcement.

Notice regarding 2006 annual shareholder meeting

The 2006 annual meeting of shareholders of your fund is currently expected to be held in June 2006, rather than in October, as was stated in the proxy statement for the 2005 annual meeting. Accordingly, shareholder proposals to be included in the proxy statement for the 2006 meeting must be received by your fund on or before February 28, 2006. Shareholders who wish to make a proposal at the 2006 annual meeting -- other than one that will be included in the fund's proxy materials -- should notify the fund no later than April 26, 2006. Shareholders who wish to propose one or more nominees for election as Trustees, or to make a proposal fixing the number of Trustees, at the 2006 annual meeting must provide written notice to the fund (including all required information) so that such notice is received in good order by the fund no earlier than April 15, 2006, and no later than May 15, 2006. Notices of any such proposals should be addressed to the Clerk of your fund at One Post Office Square, Boston, Massachusetts 02109.

Important notice regarding delivery of shareholder documents

In accordance with SEC regulations, Putnam sends a single copy of annual and semiannual shareholder reports, prospectuses, and proxy statements to Putnam shareholders who share the same address. If you prefer to receive your own copy of these documents, please call Putnam at 1-800-225-1581, and Putnam will begin sending individual copies within 30 days.

25

Proxy voting

Putnam is committed to managing our mutual funds in the best interests of our shareholders. The Putnam funds' proxy voting guidelines and procedures, as well as information regarding how your fund voted proxies relating to portfolio securities during the 12-month period ended June 30, 2005, are available on the Putnam Individual Investor Web site, www.putnam.com/individual, and on the SEC's Web site, www.sec.gov. If you have questions about finding forms on the SEC's Web site, you may call the SEC at 1-800-SEC-0330. You may also obtain the Putnam funds' proxy voting guidelines and procedures at no charge by calling Putnam's Shareholder Services at 1-800-225-1581.

Fund portfolio holdings

The fund will file a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. Shareholders may obtain the fund's Forms N-Q on the SEC's Web site at www.sec.gov. In addition, the fund's Forms N-Q may be reviewed and copied at the SEC's public reference room in Washington, D.C. You may call the SEC at 1-800-SEC-0330 for information about the SEC's Web site or the operation of the public reference room.

26

Financial statements

A guide to financial statements

These sections of the report, as well as the accompanying Notes, constitute the fund's financial statements.

The fund's portfolidists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share, which is calculated separately for each class of shares. (For funds with preferred shares, the amount subtracted from total assets includes the liquidation preference of preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings -- from dividends and interest income -- and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings -- as well as any unrealized gains or losses over the period -- is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund's net assets were affected by the fund's net investment gain or loss, by distributions to shareholders, and by changes in the number of the fund's shares. It lists distributions and their sources (net investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period. For open-end funds, a separate table is provided for each share class.

Notes to financial statements 11/30/05 (Unaudited)

Note 1: Significant accounting policies

Putnam Managed High Yield Trust (the "fund"), a Massachusetts business trust, is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The fund's primary investment objective is to seek high current income. Its secondary objective is capital growth to the extent consistent with seeking high current income. The fund intends to achieve its objective by investing in high yielding income securities. The fund invests in higher yielding, lower rated bonds that have a higher rate of default due to the nature of the issuers.

In the normal course of business, the fund enters into contracts that may include agreements to indemnify another party under given circumstances. The fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be, but have not yet been, made against the fund. However, the fund expects the risk of material loss to be remote.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Market quotations are not considered to be readily available for certain debt obligations; such

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

investments are valued on the basis of valuations furnished by an independent pricing service approved by the Trustees or dealers selected by Putnam Investment Management, LLC (Putnam Management), the fund's manager, an indirect wholly-owned subsidiary of Putnam, LLC. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities. Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore the closing prices for securities in such markets or on such exchanges may not fully reflect events that occur after such close but before the close of the New York Stock Exchange. Accordingly, on certain days, the fund will fair value foreign securities taking into account multiple factors, including movements in the U.S. securities markets. The number of days on which fair value prices will be used will depend on market activity and it is possible that fair value prices will be used by the fund to a significant extent. Securities quoted in foreign currencies, if any, are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are valued at amortized cost, which approximates fair value. Other investments, including certain restricted securities, are valued at fair value following procedures approved by the Trustees. Such valuations and procedures are reviewed periodically by the Trustees.

B) Security transactions and related investment income Security transactions are recorded on the trade date (the date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis.

Interest income is recorded on the accrual basis. Dividend income, net of applicable withholding taxes, is recognized on the ex-dividend date except that certain dividends from foreign securities, if any, are recognized as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

49

The fund earned certain fees in connection with its senior loan purchasing activities. These fees are treated as market discount and are recorded as income in the statement of operations.

C) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

D) Forward currency contracts The fund may buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short-term investments), or for other investment purposes. The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked-to-market daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

terms of their contracts or if the fund is unable to enter into a closing position. Risks may exceed amounts recognized on the statement of assets and liabilities. Forward currency contracts outstanding at period end, if any, are listed after the fund's portfolio.

E) Credit default contracts The fund may enter into credit default contracts where one party, the protection buyer, makes an upfront or periodic payment to a counterparty, the protection seller, in exchange for the right to receive a contingent payment. The maximum amount of the payment may equal the notional amount, at par, of the underlying index or security as a result of a related credit event. An upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. An upfront payment made by the fund, as the protection buyer, is recorded as an asset on the fund's books. Periodic payments received or paid by the fund are recorded as realized gains or losses. The credit default contracts are marked-to-market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain

50

or loss. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses. In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index, the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased comparable publicly traded securities or that the counterparty may default on its obligation to perform. Risks of loss may exceed amounts recognized on the statement of assets and liabilities. Credit default contracts outstanding at period end, if any, are listed after the fund's portfolio.

F) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code of 1986 (the "Code") applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Code, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

At May 31, 2005, the fund had a capital loss carryover of \$33,361,798 available to the extent allowed by the Code to offset future net capital gain, if any. The amount of the carryover and the expiration dates are:

\$	Loss Carryover	Expiration
	2,584,483	May 31, 2007
	4,168,119	May 31, 2008
	3,778,275	May 31, 2009
	8,384,999	May 31, 2010
	11,264,568	May 31, 2011
	1,858,608	May 31, 2012
	1,322,746	May 31, 2013

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer to its fiscal year ending May 31, 2006 \$149,157 of losses recognized during the period November 1, 2004 to May 31, 2005.

The aggregate identified cost on a tax basis is \$69,517,299, resulting in gross unrealized appreciation and depreciation of \$1,675,604 and \$4,704,622, respectively, or net unrealized depreciation of \$3,029,018.

G) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Note 2: Management fee, administrative services and other transactions

Putnam Management is paid for management and investment advisory services quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.55% of the first \$500 million of average weekly net assets, 0.48% of the next \$500 million, 0.44% of the next \$500 million and 0.40% thereafter.

In addition, the fund pays an administrative services fee to Putnam Management, quarterly based on the net assets of the fund, based on the following payment rates: 0.20% of the first \$500 million of average weekly net assets, 0.17% of the next \$500 million, 0.16% of the next \$500 million and 0.15% thereafter.

In December 2005, consistent with the recommendation of the Trustees (including the Independent Trustees), the shareholders of the

51

fund approved a new investment management contract that will allow for Putnam Management to receive management fees on leveraged assets raised through borrowing by the fund. In addition, the new contract, which goes into effect on January 1, 2006, reflects a reduced management fee structure agreed upon by the Trustees and Putnam Management in June 2005. Effective on January 1, 2006, the fund's management fee is expected to be an annual rate of 0.55% of the [average weekly assets], as described below.

Under the new contract, the fund will pay management fees to Putnam Management based on the fund's [average weekly assets], rather than to its average weekly net assets. [Average weekly assets] means, in effect, the weekly determinations of the difference between the fund's total assets (including assets attributable to borrowing for investment purposes) and its total liabilities (excluding liabilities attributable to borrowing for investment purposes).

Effective September 13, 2004, Putnam Investments Limited ([PIL]), an affiliate of Putnam Management, is authorized by the Trustees to manage a separate portion of the assets of the fund as determined by Putnam Management from time to time. Putnam Management pays a quarterly sub-management fee to PIL for its services at an annual rate of 0.40% of the average net assets (effective January 1, 2006, the average weekly assets) of the portion of the fund managed by PIL.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company ([PFTC]), a subsidiary of Putnam, LLC. PFTC receives fees for custody services based on the fund's asset level, the number of its security holdings and transaction volumes. Putnam Investor Services, a division of PFTC, provides investor servicing agent functions to the fund. Putnam Investor Services is paid a monthly fee for investor servicing at an annual rate of 0.05% of the fund's average net assets. During the period ended November 30, 2005, the fund incurred \$57,270 for these services.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the six months ended November 30, 2005, the

Edgar Filing: PUTNAM MANAGED HIGH YIELD TRUST - Form N-CSR

fund's expenses were reduced by \$1,544 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$239, as a quarterly retainer, has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings, industry seminars and for certain compliance-related matters. Trustees also are reimbursed for expenses they incur relating to their services as Trustees. George Putnam, III, who is not an independent Trustee, also receives the foregoing fees for his services as Trustee.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years and were first elected prior to 2004. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Trustee compensation and expenses in the statement of operations. Accrued pension liability is included in Payable for Trustee compensation and expenses in the statement of assets and liabilities. The Trustees have terminated the Pension Plan with respect to any Trustee first elected after 2003.

52

Note 3: Purchases and sales of securities

During the six months ended November 30, 2005, cost of purchases and proceeds from sales of investment securities other than short-term investments aggregated \$21,639,905 and \$22,627,654, respectively. There were no purchases or sales of U.S. government securities.

Note 4: Share repurchase program

On October 7, 2005, the Trustees authorized Putnam Management to implement a share repurchase program pursuant to which the fund may, over the 12 months following the announcement, repurchase up to 5% of its common shares outstanding as of such date. Repurchases will only be made when the fund's shares are trading at less than net asset value and in accordance with procedures approved by the fund's Trustees.

For the period ended November 30, 2005, the fund repurchased 43,438 common shares for an aggregate purchase price of \$342,795, which reflects a weighted-average discount from net asset value per share of 12.1% .

Note 5: Investment in Putnam Prime Money Market Fund

Pursuant to an exemptive order from the Securities and Exchange Commission, the fund invests in Putnam Prime Money Market Fund, an open-end management investment company managed by Putnam Management. Management fees paid by the fund are reduced by an amount equal to the management and administrative services fees paid by Putnam Prime Money Market Fund with respect to assets invested by the fund in Putnam Prime Money Market Fund. For the period ended November 30, 2005, management fees paid were reduced by \$855 relating to the fund's investment in Putnam Prime Money Market Fund. Income distributions earned by the fund are recorded as income in the statement of operations and totaled \$23,666 for the period ended November 30, 2005. During the period ended November 30, 2005, cost of purchases and cost of sales of investments in Putnam Prime Money Market Fund aggregated \$11,900,316 and \$10,994,735, respectively.

Note 6: Senior loan commitments

Senior loans are purchased or sold on a when-issued or delayed delivery basis and may be settled a month or more after the trade date, which from time to time can delay the actual investment of available cash balances; interest income is accrued based on the terms of the securities. Senior loans can be acquired through an agent, by assignment from another holder of the loan, or as a participation interest in another holder's portion of the loan. When the fund invests in a loan or participation, the fund is subject to the risk that an intermediate participant between the fund and the borrower will fail to meet its obligations to the fund, in addition to the risk that the borrower under the loan may default on its obligations.

Note 7: Regulatory matters and litigation

Putnam Management has entered into agreements with the Securities and Exchange Commission and the Massachusetts Securities Division settling charges connected with excessive short-term trading by Putnam employees and, in the case of the charges brought by the Massachusetts Securities Division, by participants in some Putnam-administered 401(k) plans. Pursuant to these settlement agreements, Putnam Management will pay a total of \$193.5 million in penalties and restitution, with \$153.5 million being paid to certain open-end funds and their shareholders. The amount will be allocated to shareholders and funds pursuant to a plan developed by an independent consultant, and will be paid following approval of the plan by the SEC and the Massachusetts Securities Division.

The Securities and Exchange Commission's and Massachusetts Securities Division's allegations and related matters also serve as the general basis for

53

numerous lawsuits, including purported class action lawsuits filed against Putnam Management and certain related parties, including certain Putnam funds. Putnam Management will bear any costs incurred by Putnam funds in connection with these lawsuits. Putnam Management believes that the likelihood that the pending private lawsuits and purported class action lawsuits will have a material adverse financial impact on the fund is remote, and the pending actions are not likely to materially affect its ability to provide investment management services to its clients, including the Putnam funds.

The Staff of the SEC has indicated that it believes that Putnam Management did not comply with certain disclosure requirements in connection with dividend payments to shareholders of your fund. Putnam Management is currently engaged in settlement negotiations with the SEC Staff regarding this matter.

Putnam Management and Putnam Retail Management are named as defendants in a civil suit in which the plaintiffs allege that the management and distribution fees paid by certain Putnam funds were excessive and seek recovery under the Investment Company Act of 1940. Putnam Management and Putnam Retail Management have contested the plaintiffs' claims and the matter is currently pending in the U.S. District Court for the District of Massachusetts. Based on currently available information, Putnam Management believes that this action is without merit and that it is unlikely to have a material effect on Putnam Management's and Putnam Retail Management's ability to provide services to their clients, including the fund.
