Nicholas-Applegate Convertible & Income Funds Letter to Shareholders

April 15, 2009

Dear Shareholder:

Please find enclosed the annual reports for the Nicholas-Applegate Convertible & Income Fund and Nicholas-Applegate Convertible & Income Fund II (collectively, the Funds) for the fiscal year ended February 28, 2009.

Corporate securities, including convertible bonds and U.S. stocks, fell sharply during the period as tight credit conditions and global economic slowing prompted investors to favor the relative safety of government bonds. In this environment, the Merrill Lynch All-Convertible Index declined 35.69% and the S&P 500 Index dropped 43.32%. The Barclays Global U.S. Treasury Bond Index rose 5.91% for the 12-month period.

Please refer to the following pages for more information on the Funds. If you have any questions regarding the information provided, we encourage you to contact your financial advisor or call the Funds shareholder servicing agent at (800) 331-1710. You will also find a wide range of information and resources on our Web site, www.allianzinvestors.com/closedendfunds.

For the fiscal 12-month period ended February 28, 2009, Nicholas-Applegate Convertible & Income Fund decreased 55.03% on net asset value and 61.55% on market price.

For the fiscal 12-month period ended February 28, 2009, Nicholas-Applegate Convertible & Income II Fund decreased 58.55% on net asset value and 63.34% on market price.

History books will be written to describe the past year. The simple conclusion was the equity, convertible and debt markets experienced one of the most rapid sell-offs of all time. Investors began 2008 with many questions about different economic scenarios and how the operating performance of issuers would fare. Those generic concerns paled in comparison to the shocking events of 2008.

Most will trace the beginning of the decline to mortgage delinquencies and falling housing prices. The housing downturn led to rapid quality and price declines in collateralized mortgage obligations (CMOs). Price declines in the CMO market led to price declines in all collateralized debt and loan obligations (CDOs, CLOs) which, in turn, cut off demand for loans.

Historically, convertibles have offered downside protection versus equities. During the fiscal year, however, the convertible universe performed roughly in line with the S&P 500 and NASDAQ. While the larger financial sector weighted in the Merrill Lynch All Convertible Index partially explained the convertible performance, rapidly widening corporate bond spreads explained the balance.

All industries posted negative returns during the fiscal year for both equities and convertibles. Consumer discretionary underperformance was the most severe of any industry in the market for the fiscal period. Materials, industrials and energy industries also underperformed as the economic data worsened. The best-performing industries were consumer staples and healthcare. These industries performed well because of favorable operating performance as well as an expected flight to quality.

The high-yield market ended 2008 on a positive note, with a record monthly gain in December. However, the final weeks' positive price move did not make up for the sharp price declines experienced during the fiscal period. For 2008, the high-yield market was down 26.4%, according to the Merrill Lynch High Yield Master II Index, a greater decline than any year in history.

Remarkably, with all of the financial chaos and headlines, the fundamentals of the majority of issuers in the high-yield market did not decline as rapidly as in previous cycles. The default rate ended 2008 at 2.25% according to JPMorgan. The average spread in the Merrill Lynch High Yield Master II Index ended the year at more than 1,800 basis points over comparable duration Treasuries. Spreads did eclipse 2,300 basis points in mid-December. In the last cycle (1990-1991), when spreads peaked near 1,200 basis points, the default rate was in excess of 10%. Defaults, or the expectation of imminent default, are the primary driver of spreads. Therefore, technical pressure and fear had a far greater impact on spreads than the relative credit deterioration.

What seemed like an endless sell-off through mid-December sharply reversed during the last weeks of 2008 and was stable for the first couple of months in 2009. The Funds outperformed in both of the record-setting down months of October and November. The Funds' high quality high yield holdings and avoidance of distressed issues helped during the tumultuous markets. As important to outperforming in poor market conditions, the Funds performed equally well in the record-setting rally in late December.

There were many negative high yield contributors during the fiscal period. Retail, Auto Supply and Chemical issuers all underperformed. Operational performance was lower than expectations and the outlook was tempered for these issuers. All of the issues were considered to be oversold and will continue to be monitored.

Concurrent with the collapsing markets, the VIX (ticker symbol for the Chicago Board Options Volatility Index) first peaked in October and then re-peaked in November at an incredulous level of 80.8. These never-before-seen volatility levels were double previous historic highs. In fact, the average volatility during the past three months was 35.7, outpacing historic averages since initial recordings.

The rapid equity market correction and record spreads and yields experienced will be discussed for a long time. We have reviewed the catalysts for this downfall. But, ultimately, investors lost confidence in the equity and debt markets, and those sellers brought more sellers through forced liquidations (from leverage triggers or withdrawals) or through sheer panic.

Fund Insights

Have the lows been reached? The answer is more difficult when looking at equities, but relatively easy when looking at corporate defaults. The high-yield market reached nearly double prior-cycle trough spreads without a significant increase in defaults. In this case, we believe the credit markets are oversold. Should there be a credit rally we expect convertibles and high yield issues to participate.

The duration of the economic downturn is still not clear. Corporate earnings have been poor and economic statistics are weak and are not likely to rebound in the short-term. Many eyes are watching the Obama administration. How many more TARP (Troubled Assets Relief Program) and other bailout programs will combine with economic stimulus plans to attempt to foster growth? From an investor's standpoint, it will be just as prudent to focus on credit metrics as well as on corporate profits.

Performance has been volatile as investors balance the uncertain outlook for the economy, corporate profits, and equity valuations versus prior cycles. The delevering of the market continued into early 2009, and it is unclear when the process will end. The tug of war between the deteriorating global economy and the massive and expanding global policy response package continued at the end of the fiscal period.

The calculation assumes that all of the Fund's income dividends and capital gain distributions have been reinvested. Total return does not reflect broker commissions or sales charges. Total return for a period of more than one year represents the average annual total return.

The Fund's performance at market price will differ from its results at NAV. Nicholas-Applegate Convertible & Income Funds Notes to Financial Statements

February 28, 2009

1. Organization and Significant Accounting Policies

Nicholas-Applegate Convertible & Income Fund (Convertible & Income) and Nicholas-Applegate Convertible & Income Fund II (Convertible & Income II), collectively referred to as the Funds , were organized as Massachusetts business trusts on January 17, 2003 and April 22, 2003, respectively. In December 2005, Convertible & Income II changed its fiscal year end from June 30 to February 28. Prior to commencing operations on March 31, 2003, and July 31, 2003, respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies under the Investment Company Act of 1940 and the rules and regulations there under, as amended. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Funds Investment manager and is an indirect wholly-owned subsidiary of Allianz Global Investors of America L.P. (Allianz Global). Allianz Global is an indirect, majority-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has an unlimited amount of \$0.00001 par value per share of common stock authorized.

Each Fund s investment objective is to provide total return through a combination of capital appreciation and high current income. The Funds attempt to achieve this objective by investing in a portfolio of convertible securities and non-convertible income-producing securities.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet been asserted. However, the Funds expect the risk of any loss to be remote.

The Financial Accounting Standards Board (FASB) issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109 (the Interpretation). The Interpretation establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. Fund management has determined that its evaluation of the Interpretation has resulted in no material impact to the Funds financial statements at February 28, 2009. Each of the Funds federal tax returns for the prior three fiscal periods remain subject to examination by the Internal Revenue Service.

The following is a summary of significant accounting policies followed by each of the Funds:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to guidelines established by the Board of Trustees or persons acting at their discretion pursuant to procedures established by the Board of Trustees. The Funds investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the last quoted mean price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Prices obtained from independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Synthetic convertible securities are valued based on quotations obtained from unaffiliated brokers who are the principal market-makers in such securities. Such valuations are derived by the brokers from proprietary models which are generally based on readily available market information including valuations of the common stock underlying the synthetic security and the volatility observed in the market on such common stocks. Short-term securities maturing in 60 days or less are valued at amortized cost which approximates fair value, if their original term to maturity was 60 days less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Funds to value securities may differ from the value that would be realized if the securities were sold and these differences could be material to the financial statements of the Funds. Each Fund s net asset value is normally determined daily as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

1. Organization and Significant Accounting Policies (continued)

(b) Fair Value Measurements

Effective March 1, 2008, the Funds adopted FASB Statement of Financial Accounting Standards No.157, Fair Value Measurements (SFAS 157). This standard clarifies the definition of fair value for financial reporting, establishes a framework for measuring fair value and requires additional disclosures about the use of the fair value measurements. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e. exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy under SFAS 157 are described below:

Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access.

Level 2 valuations based on other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.) or quotes from inactive exchanges.

Level 3 valuations based on significant unobservable inputs (including the Funds own assumptions in determining the fair value of investments)

The valuation techniques used by the Funds to measure fair value during the year ended February 28, 2009 maximized the use of observable inputs and minimized the use of unobservable inputs. The Funds utilized the following fair value technique on Level 3 investments: estimating the price that would have prevailed in a liquid market for a security given information available at the time of evaluation.

The inputs and methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used at February 28, 2009 in valuing the Funds investments carried at value:

	Convertible & Income	Convertible & Income II
Valuation Inputs	Investments in Securities	Investments in Securities
Level 1 Quoted Prices	\$ 60,685,728	\$ 46,467,259
Level 2 Other Significant Observable Inputs	618,980,697	469,297,962
Level 3 Significant Unobservable Inputs	22,566,591	19,461,237
Total	\$ 702,233,016	\$ 535,226,458

A roll forward of fair value measurements using significant unobservable inputs (Level 3) as of February 28, 2009 was as follows:

	Investments in Securities	Investments in Securities
Beginning balance, February 29, 2008	\$ 3,346,475	\$ 3,006,875

Realized gains/(losses) and change in unrealized appreciation/depreciation are recorded on the statement of operations.

(c) Disclosures about Credit Derivatives

The Funds have adopted FASB Staff Position No. 133-1 and FIN 45-4, Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161 (FSP), which requires enhanced transparency of the effect of credit derivatives and

guarantees on an issuer's financial position, financial performance and cash flows. FSP is effective for reporting periods after November 15, 2008. FSP applies to certain credit derivatives, hybrid instruments that have embedded credit derivatives (for example, credit-linked notes), and certain guarantees and it guarantees and it requires additional disclosures regarding credit derivatives with sold protection. The Funds' management have determined that the FSP has no impact to the financial statements.

In March 2008, Statement of Accounting Financial Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 161) was issued and is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. SFAS 161 requires enhanced disclosures about a fund's derivative and hedging activities. Management is currently evaluating the impact the adoption of SFAS 161 will have on the Funds' financial statement disclosures.

(d) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on an identified cost basis. Dividend income is recorded on ex-dividend date. Interest income is recorded on an accrual basis. Discounts or premiums on debt securities purchased are accreted or amortized to interest income over the lives of the respective securities using the effective interest method. Conversion premium is not amortized. Payments received from certain investments may be comprised of dividends, realized gains and return of capital. These payments may initially be recorded as dividend income and may be subsequently be reclassified as realized gains/or return of capital upon receipt of information from the issuer. Payments received on synthetic convertible securities are generally included in dividend income.

(e) Federal Income Taxes

The Funds intend to distribute all of their taxable income and to comply with the other requirements of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required. The Funds may be subject to excise tax based on the extent of distributions to shareholders.

(f) Dividends and Distributions Common Stock

The Funds declare dividends from net investment income monthly to common shareholders. Distributions of net realized capital gains, if any, are paid at least annually. The Funds record dividends and distributions to its shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment; temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions of paid-in capital in excess of par.

(g) Concentration of Risk

It is the Funds' policy to invest a portion of their assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments include features which render them more sensitive to price changes in their underlying securities. The value of structured/synthetic convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in ways that limit their potential for capital appreciation and the entire value of the security may be at a risk of loss depending on the performance of the underlying equity security. Consequently, the Funds are exposed to greater downside risk than traditional convertible securities, but still less than that of the underlying common stock. The Funds are also exposed to the risk that the issuers or counterparties to the agreements may be unable to deliver the stated underlying securities or agreed proceeds on maturity.

During the year ended February 28, 2009, the Funds held synthetic convertible securities with Lehman Brothers Holdings, Inc. as the counterparty. On September 15, 2008, Lehman Brothers Holdings, Inc. filed for protection under Chapter 11 of the United States Bankruptcy Code. The value of the relevant securities have been written down to their estimated recoverable values.

2. Investment Manager/Sub-Adviser

Each Fund has an Investment Management Agreement (the Agreements) with the Investment Manager. Subject to the supervision of the Funds Board of Trustees, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to the Agreements, the Funds pay the Investment Manager an annual fee, payable on a monthly basis, at the annual rate of 0.70% of the Funds' average daily total managed assets. Total managed assets refer to the total assets of each Fund (including

The Investment Manager has retained its affiliate, Nicholas-Applegate Capital Management LLC (the Sub-Adviser), to manage the Funds investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Funds investment decisions. The Investment Manager, and not the Funds, pays a portion of the fees it receives as Investment Manager to the Sub-Adviser in return for its services.

Purchases	\$ 42,814,670	\$ 38,772,166
Sales	51,099,676	45,624,699

4. Income Tax Information

Convertible & Income:

For the years ended February 28, 2009 and February 29, 2008, the tax character of dividends paid of \$110,164,852 and \$134,533,804, respectively, were comprised entirely of ordinary income.

At February 28, 2009, the fund had no distributable earnings.

For the year ended February 28, 2009, permanent differences are primarily attributable to the differing treatment of premium amortization, convertible preferred securities, consent payments and excise taxes. These adjustments were to decrease distributions in excess of net investment income by \$4,090,680, increase accumulated net realized loss by \$3,847,317 and decrease paid-in-capital in excess of par by \$243,363.

At February 28, 2009, Convertible & Income had a capital loss carryforward of \$144,134,274 (\$1,830,527 of which will expire in 2015, \$10,961,628 of which will expire in 2016 and \$131,342,119 of which will expire in 2017) available as a reduction, to the extent provided in the regulations, of any future net realized capital gains. To the extent that these losses are used to offset future realized capital gains, such gains will not be distributed.

In accordance with U.S. Treasury regulations, Convertible & Income elected to defer net realized capital losses of \$137,714,679 arising after October 31, 2008. Such losses are treated as rising on March 1, 2009.

The cost basis of portfolio securities for federal income tax purposes is \$1,100,316,065. Aggregate gross unrealized appreciation for securities in which there is an excess value over tax cost is \$6,132,778; aggregate gross unrealized depreciation for securities in which there is an excess of tax cost over value is \$404,215,827; net unrealized depreciation for federal income tax purposes is \$398,083,049. The difference between book and tax basis unrealized is attributable to wash sales, and the differing treatment of convertible preferred securities.

The Fund was not able to declare or pay monthly dividends to common shareholders in November and December of 2008 because the Fund's auction rate preferred shares did not have the required minimum asset coverage. This contributed to the Fund's incurring excise tax.

4. Income Tax Information (continued)

At February 28, 2009, the tax character of distributable earnings of \$7,371,380 was comprised entirely of ordinary income.

For the year ended February 28, 2009, permanent differences are primarily attributable to the differing treatment of premium amortization, convertible preferred securities, consent payments and excise taxes. These adjustments were to increase undistributed net investment income by \$4,822,708, increase accumulated net realized loss by \$4,312,513 and decrease paid-in-capital in excess of par by \$510,195.

At February 28, 2009, Convertible & Income II had a capital loss carryforward of \$143,888,261 (\$1,751,653 of which will expire in 2015, \$11,338,190 of which will expire in 2016 and \$130,798,418 of which will expire in 2017) available as a reduction, to the extent provided in the regulations, of any future net realized capital gains. To the extent that these losses are used to offset future realized capital gains, such gains will not be distributed.

In accordance with U.S. Treasury regulations, Convertible & Income II elected to defer net realized capital losses of \$127,587,602 arising after October 31, 2008. Such losses are treated as rising on March 1, 2009.

The cost basis of portfolio securities for federal income tax purposes is \$856,017,726. Aggregate gross unrealized appreciation for securities in which there is an excess value over tax cost is \$3,132,279; aggregate gross unrealized depreciation for securities in which there is an excess of tax cost over value is \$323,923,547; net unrealized depreciation for federal income tax purposes is \$320,791,268. The difference between book and tax basis unrealized is attributable to wash sales and the differing treatment of convertible preferred securities.

The Fund was not able to declare or pay monthly dividends to common shareholders in November and December of 2008 because the Fund's auction rate preferred shares did not have the required minimum asset coverage. This contributed to the Fund's incurring excise tax.

5. Auction-Rate Preferred Shares

Convertible & Income has 2,856 shares of Preferred Shares Series A, 2,856 shares of Preferred Shares Series B, 2,856 shares of Preferred Shares Series C, 2,856 shares of Preferred Shares Series D, and 2,856 shares of Preferred Shares Series E outstanding, each with a net asset and liquidation value of \$25,000 per share plus any accumulated, unpaid dividends.

Convertible & Income II has 2,192 shares of Preferred Shares Series A, 2,192 shares of Preferred Shares Series B, 2,192 shares of Preferred Shares Series C, 2,192 shares of Preferred Shares Series D, and 2,192 shares of Preferred Shares Series E outstanding, each with a net asset and liquidation value of \$25,000 per share plus any accumulated, unpaid dividends.

Dividends are accumulated daily at an annual rate (typically re-set every seven days) through auction procedures. Distributions of net realized long-term gains, if any, are paid annually.

For the year ended February 28, 2009, the annualized dividend rates for the Funds ranged from:

	High	Low	At February 28, 2009
Series A	4.413%	0.135%	0.377%
Series B	4.383%	0.135%	0.377%
Series C	4.398%	0.150%	0.362%
Series D	4.713%	0.105%	0.377%
Series E	4.473%	0.075%	0.377%

The Funds are subject to certain limitations and restrictions while preferred shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Funds from declaring any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of preferred shares at a price equal to liquidation value plus any accumulated unpaid dividends.

Preferred shareholders, who are entitled to one vote per share, generally vote with the common shareholders but vote separately as a class to elect two Trustees and on any matters affecting the rights of the preferred shareholders.

Since mid-February 2008, holders of auction-rate preferred shares (ARPS) issued by the Funds have been directly impacted by an unprecedented lack of liquidity, which has similarly affected ARPS holders in many of the nation s closed-end funds. Since then, regularly scheduled auctions for ARPS issued by the Funds have consistently failed because of insufficient demand (bids to buy shares) to meet the supply (shares offered for sale) at each auction. In a failed auction, ARPS holders cannot sell all, and may not be able to sell any, of their shares tendered for sale. While repeated auction failures have affected the liquidity for ARPS, they do not constitute a default or automatically alter the credit quality of the ARPS, and

5. Auction-Rate Preferred Shares (continued)

ARPS holders have continued to receive dividends at the defined maximum rate, the 7-day AA Composite Commercial Paper Rate multiplied by 150% (which is a function of short-term interest rates and typically higher than the rate that would have otherwise been set through a successful auction).

These developments with respect to ARPS have not affected the management or investment policies of the Funds, and the Funds' outstanding common shares continue to trade on the NYSE without any change. If the Funds' ARPS auctions continue to fail and the maximum rate payable on the ARPS rises as a result of changes in short-term interest rates, returns for the Funds' common shareholders could be adversely affected.

During the fiscal year ended February 28, 2009, the Funds redeemed, at par, a portion of their ARPS on three separate occasions. In each case, the decision to redeem a portion of the Funds' ARPS was made by the Funds' Board of Trustees at the recommendation of the Funds' Investment Manager and Sub-Adviser with the intention of increasing asset coverage of the Funds' ARPS above the 200% Level (subject to future market conditions), permitting the Funds to pay/declare common share dividends. The Funds redeemed the ARPS, at the full liquidation preference of \$25,000 per share plus accumulated but unpaid dividends, across each Fund's five series on their respective dates of redemption as follows:

	Convertible & Income	Convertible & Income II	Dates of Redemptions
Beginning balance, 2/29/08	\$ 525,000,000	\$ 505,000,000

Ending balance, 2/28/09	\$ 357,000,000	\$ 274,000,000

7. Legal Proceedings

In June and September 2004, the Investment Manager, and certain of its affiliates (including PEA Capital LLC (PEA), Allianz Global Investors Distributors LLC (AGID) and Allianz Global Investors of America, L.P.) agreed to settle, without admitting or denying the allegations, claims brought by the SEC, and the New Jersey Attorney General alleging violations of federal and state securities laws with respect to certain open-end

Edgar Filing: NICHOLAS APPLGATE CONVERTIBLE & INCOME FUND II - Form N-CSR

funds for which the Investment Manager serves as investment adviser. The settlements related to an alleged market timing arrangement in certain open-end funds formerly sub-advised by PEA. The Investment Manager and its affiliates agreed to pay a total of \$68 million to settle the claims. In addition to monetary payments, the settling parties agreed to undertake certain corporate governance, compliance and disclosure reforms related to market timing and consented to cease and desist orders and censures. Subsequent to these events, PEA Capital LLC deregistered as an investment adviser and dissolved. None of the settlements alleged that any inappropriate activity took place with respect to the Funds.

Since February 2004, the Investment Manager, the Sub-Adviser, and certain of their affiliates and their employees have been named as defendants in a number of pending lawsuits concerning market timing, which allege the same or similar conduct underlying the regulatory settlements discussed above. The market timing lawsuits have been consolidated in a multi-district litigation proceeding in the U.S. District Court for the District of Maryland. Any potential resolution of these matters may include, but not be limited to, judgments or settlements for damages against the Investment Manager, the Sub-Adviser, or their affiliates or related injunctions.

The Investment Manager and the Sub-Advisers believe that these matters are not likely to have a material adverse effect on the Funds or on their ability to perform their respective investment advisory activities relating to the Funds.

The foregoing speaks only as of the date hereof.

Privacy Policy

Our Commitment to You

We consider customer privacy to be a fundamental aspect of our relationship with clients. We are committed to maintaining the confidentiality, integrity, and security of our current, prospective and former clients' personal information. To ensure clients' privacy, we have developed policies designed to protect this confidentiality, while allowing client needs to be served.

This information may come from sources such as account applications and other forms, from other written, electronic or verbal correspondence, from your transactions, from your brokerage or financial advisory firm, financial adviser or consultant, and/or from information captured on our internet web sites.

Respecting Your Privacy

As a matter of policy, we do not disclose any personal or account information provided by you or gathered by us to non-affiliated third parties, except as required or permitted by law or as necessary for such third parties to perform their agreements with respect to the Funds. As is common in the industry, non-affiliated companies may from time to time be used to provide certain services, such as preparing and mailing prospectuses, reports, account statements and other information, conducting research on client satisfaction, and gathering shareholder proxies. We may also retain non-affiliated companies to market our products and enter in joint marketing agreements with other companies. These companies may have access to your personal and account information, but are permitted to use the information solely to provide the specific service or as otherwise permitted by law. We may also provide your personal and account information to your respective brokerage or financial advisory firm and/or to your financial adviser or consultant.

Sharing Information with Third Parties

We do reserve the right to disclose or report personal information to non-affiliated third parties in limited circumstances where we believe in good faith that disclosure is required under law, to cooperate with regulators or law enforcement authorities, to protect our rights or property, or upon reasonable request by any mutual fund in which you have chosen to invest. In addition, we may disclose information about you or your accounts to a non-affiliated third party with the consent or at your request or if you consent in writing to the disclosure.

Sharing Information with Affiliates

We may share client information with our affiliates in connection with servicing your account or to provide you with information about products and services that we believe may be of interest to you. The information we share may include, for example, your participation in our mutual funds or other investment programs, your ownership of certain types of accounts (such as IRAs), or other data about your accounts. Our affiliates, in turn, are not permitted to share your information with non-affiliated entities, except as required or permitted by law.

Procedures to Safeguard Private Information

In addition to this policy, we have also implemented procedures that are designed to restrict access to your non-public personal information only to internal personnel who need to know that information in order to provide products or services to you. In order to guard your non-public personal information, physical, electronic and procedural safeguards are in place.

Nicholas-Applegate Convertible & Income Funds Dividend Reinvestment Plan
(unaudited)

Dividend Reinvestment Plan

Pursuant to the Funds' Dividend Reinvestment Plan (the "Plan"), all Common Shareholders whose shares are registered in their own names will have all dividends, including any capital gain dividends, reinvested automatically in additional Common Shares by PFPC Inc., as agent for the Common Shareholders (the "Plan Agent"), unless the shareholder elects to receive cash. An election to receive cash may be revoked or reinstated at the option of the shareholder. In the case of record shareholders such as banks, brokers or other nominees that hold Common Shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder as representing the total amount registered in such shareholder's name and held for the account of beneficial owners who are to participate in the Plan. Shareholders whose shares are held in the name of a bank, broker or nominee should contact the bank, broker or nominee for details. All distributions to investors who elect not to participate in the Plan (or whose broker or nominee elects not to participate on the investor's behalf), will be paid cash by check mailed, in the case of direct shareholder, to the record holder by PFPC Inc., as the Funds' dividend disbursement agent.

Unless you elect (or your broker or nominee elects) not to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If on the payment date the net asset value of the Common Shares is equal to or less than the market price per Common Share plus estimated brokerage commissions that would be incurred upon the purchase of Common Shares on the open market, the Funds will issue new shares at the greater of (i) the net asset value per Common Share on the payment date or (ii) 95% of the market price per Common Share on the payment date; or
- (2) If on the payment date the net asset value of the Common Shares is greater than the market price per Common Share plus estimated brokerage commissions that would be incurred upon the purchase of Common Shares on the open market, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the New York Stock Exchange or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price on the payment date, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Funds. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market on or shortly after the payment date, but in no event later than the ex-dividend date for the next distribution. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. The Plan Agent will also furnish each person who buys Common Shares with written instructions detailing the procedures for electing not to participate in the Plan and to instead receive distributions in cash. Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvested dividends and distributions are taxed in the same manner as cash dividends and distributions.

The Funds and the Plan Agent reserve the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Funds reserve the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Funds' transfer agent, PNC Global Investment Servicing, P.O. Box 43027, Providence, RI 02940-3027, telephone number (800) 331-1710.

AUDIT OVERSIGHT COMMITTEE POLICY FOR PRE-APPROVAL OF SERVICES PROVIDED BY THE INDEPENDENT ACCOUNTANTS

The Fund's Audit Oversight Committee (the "Committee") is charged with the oversight of the Funds' financial reporting policies and practices and their internal controls. As part of this responsibility, the Committee must pre-approve any independent accounting firm's engagement to render audit and/or permissible non-audit services, as required by law. In evaluating a proposed engagement by the independent accountants, the Committee will assess the effect that the engagement might reasonably be expected to have on the accountant's independence. The Committee's evaluation will be based on:

a review of the nature of the professional services expected to be provided,

the fees to be charged in connection with the services expected to be provided,

a review of the safeguards put into place by the accounting firm to safeguard independence, and

At least annually, the Committee will receive a report of all audit and non-audit services that were rendered in the previous calendar year pursuant to this Policy. In addition to the Committee's pre-approval of services pursuant to this Policy, the engagement of the independent accounting firm for any permitted non-audit service provided to the Funds will also require the separate written pre-approval of the President of the Fund, who will confirm, independently, that the accounting firm's engagement will not adversely affect the firm's independence. Any such pre-approval shall be reported to the full Committee at its next regularly scheduled meeting.

Nicholas-Applegate Capital Management LLC (NACM)

Description of Proxy Voting Policy and Procedures

NACM votes proxies on behalf of its clients pursuant to its written Proxy Policy Guidelines and Procedures (the Proxy Guidelines), unless a client requests otherwise. The Proxy Guidelines are designed to honor NACM's fiduciary duties to its clients and protect and enhance its clients' economic welfare and rights.

The Proxy Guidelines are established by a Proxy Committee consisting of executive, investment, sales, marketing, compliance and operations personnel. The Proxy Guidelines reflect NACM's normal voting positions on specific corporate actions, including but not limited to those relating to social and corporate responsibility issues, stock option plans and other management compensation issues, changes to a portfolio company's capital structure and corporate governance. For example, NACM generally votes for proposals to declassify boards and generally supports proposals that remove restrictions on shareholders' ability to call special meetings independently of management. Some issues will require a case-by-case analysis.

The Proxy Guidelines largely follow the recommendations of Glass, Lewis & Co. LLC (Glass Lewis), an investment research and proxy advisory firm. The Proxy Guidelines may not apply to every situation and NACM may vote differently than specified by the Proxy Guidelines and/or contrary to Glass Lewis' recommendation if NACM reasonably determines that to do so is in its clients' best interest. Any variance from the Proxy Guidelines is documented.

In the case of a potential conflict of interest, NACM's Proxy Committee will be responsible for reviewing the potential conflict and will have the final decision as to how the relevant proxy should be voted.

Under certain circumstances, NACM may in its reasonable discretion refrain from voting clients' proxies due to cost or other factors.

Like other investment professionals with multiple clients, a Portfolio Manager for a Fund may face certain potential conflicts of interest in connection with managing both the Fund and other accounts at the same time. The paragraphs below describe some conflicts faced by investment professionals at most major financial firms.

The Investment Adviser has adopted compliance policies and procedures that address certain of these potential conflicts. The management of accounts with different advisory fee rates and/or fee structures, including accounts that pay advisory fees based on account performance may raise potential conflicts of interest by creating an incentive to favor higher-fee accounts. These potential conflicts may include, among others:

- The most attractive investments could be allocated to higher-fee accounts or performance fee accounts.
- The trading of higher-fee accounts could be favored as to timing and/or execution price. For example, higher-fee accounts could be permitted to sell securities earlier than other accounts when a prompt sale is desirable or to buy securities at an earlier and more opportune time.
- The investment management team could focus their time and efforts primarily on higher-fee accounts due to a personal stake in compensation.

When the Investment Adviser considers the purchase or sale of a security to be in the best interests of a Fund as well as other accounts, the Investment Adviser's trading desk may, to the extent permitted by applicable laws and regulations, aggregate the securities to be sold or purchased. Aggregation of trades may create the potential for unfairness to a Fund or another account if one account is favored over another in allocating the securities purchased or sold—for example, by allocating a disproportionate amount of a security that is likely to increase in value to a favored account. The Investment Adviser considers many factors when allocating securities among accounts, including the account's investment style, applicable investment restrictions, availability of securities, available cash and other current holdings. The Investment Adviser attempts to allocate investment opportunities among accounts in a fair and equitable manner. However, accounts are not assured of participating equally or at all in particular investment allocations due to such factors as noted above.

Cross trades, in which one Investment Adviser account sells a particular security to another account (potentially saving transaction costs for both accounts), may also pose a potential conflict of interest if, for example, one account is permitted to sell a security to another account at a higher price than an independent third party would pay. The Investment Adviser has adopted compliance procedures that provide that all cross trades are to be made at an independent current market price, as required by law.

Another potential conflict of interest may arise from the different investment objectives and strategies of a Fund and other accounts. For example, another account may have a shorter-term investment horizon or different investment objectives,

policies or restrictions than a Fund. Depending on another account's objectives or other factors, a Portfolio Manager may give advice and make decisions that may differ from advice given, or the timing or nature of decisions made, with respect to a Fund. In addition, investment decisions are subject to suitability for the particular account involved. Thus, a particular security may not be bought or sold for certain accounts even though it was bought or sold for other accounts at the same time. More rarely, a particular security may be bought for one or more accounts managed by a Portfolio Manager when one or more other accounts are selling the security (including short sales). There may be circumstances when purchases or sales of portfolio securities for one or more accounts may have an adverse effect on other accounts. The Investment Adviser maintains trading policies designed to provide portfolio managers an opportunity to minimize the effect that short sales in one portfolio may have on holdings in other portfolios.

A Portfolio Manager who is responsible for managing multiple accounts may devote unequal time and attention to the management of those accounts. As a result, the Portfolio Manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. The effects of this potential conflict may be more pronounced where funds and/or accounts overseen by a particular Portfolio Manager have different investment strategies.

A Fund's Portfolio Manager(s) may be able to select or influence the selection of the broker/dealers that are used to execute securities transactions for the Fund. In addition to executing trades, some brokers and dealers provide the Investment Adviser with brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934), which may result in the payment of higher brokerage fees than might have otherwise be available. These services may be more beneficial to certain funds or accounts than to others. In order to be assured of continuing to receive services considered of value to its clients, the Investment Adviser has adopted a brokerage allocation policy embodying the concepts of Section 28(e) of the Securities Exchange Act of 1934. The Investment Adviser allocates the payment of brokerage commissions is subject to the requirement that the Portfolio Manager determine in good faith that the commissions are reasonable in relation to the value of the brokerage and research services provided to the Fund.

A Fund's Portfolio Manager(s) may also face other potential conflicts of interest in managing a Fund, and the description above is not a complete description of every conflict that could be deemed to exist in managing both the Funds and other accounts. In addition, a Fund's Portfolio Manager may also manage other accounts (including their personal assets or the assets of family members) in their personal capacity. The Investment Adviser's investment personnel, including each Fund's Portfolio Manager, are subject to restrictions on engaging in personal securities transactions pursuant to the Investment Adviser's Codes of Ethics, which contain provisions and requirements designed to identify and address conflicts of interest between personal investment activities and the interests of the Funds.

Nicholas-Applegate believes that competitive compensation is essential to retaining top industry talent. With that in mind, the firm continually reevaluates its compensation policies against industry benchmarks. Its goal is to offer portfolio managers and analysts compensation and benefits in the top quartile for comparable experience, as measured by industry benchmarks surveyed by McLagan and ECS (Watson Wyatt Data Services).

Nicholas-Applegate's compensation policy features both short-term and long-term components. The firm offers competitive base salaries and bonuses, profit-sharing and generous retirement plans. Investment professionals' annual compensation is directly affected by the performance of their portfolios, their performance as individuals and the success of the firm. Typically, an investment professional's compensation is comprised of a base salary and a bonus.

Investment professionals are awarded bonuses based primarily on product performance. A 360-degree qualitative review is also considered. As part of the 360-degree review, analysts and portfolio managers are reviewed by the portfolio manager who is responsible for the team's final investment decisions and other portfolio managers to whose portfolios they contribute. Portfolio managers responsible for final investment decisions are reviewed by the Chief Investment Officer, who evaluates performance both quantitatively versus benchmarks and peer universes, as well as qualitatively.

Compensation and Account Performance

Compensation pools for investment teams are directly related to the size of the business and the performance of the products. Approximately half of the pool is based on one, three and five year performance relative to benchmarks and peers. The team pools are then subjectively allocated to team members based on individual contributions to client accounts. We believe our compensation system clearly aligns the interests of clients with our people and keeps our compensation competitive with industry norms.

Long-Term Incentive Plan

A Long-Term Incentive Plan provides rewards to certain key staff and executives of Nicholas-Applegate and the other Allianz Global Investors companies to promote long-term growth and profitability. The Plan provides awards that are based on Nicholas-Applegate's operating earnings growth. The plan provides a link between longer term company performance and participant pay, further motivating participants to make a long-term commitment to the company's success.

Equity Ownership

In September 2006, Allianz SE approved an equity ownership plan for key employees of Nicholas-Applegate. The plan was implemented as of January 31, 2007. Nicholas-Applegate believes this plan is important in retaining and recruiting key investment

professionals, as well as providing ongoing incentives for Nicholas-Applegate employees.
