Item 2.02 Results of Operations and Financial Condition.

On March 14, 2011, ACL Semiconductors Inc. (the “Company”) reported results for the quarter ended December 31, 2010. The Company reported net revenue of \$117.9 million, an increase from \$90.3 million, or 31%, compared to the same period last year. The year-over-year revenue growth was primarily due to an increase of sales volume in the PRC market. Net loss for the quarter ended December 31, 2010 was \$24,874, compared to net loss of \$383,804 in the same period last year. The decrease in net loss resulted primarily from pricing pressure stabilization on our products as compared to the year ago quarter. Loss per diluted share was \$0.0009 for the quarter ended December 31, 2010, as compared to a loss of \$0.01 in the same period last year.

Gross profit for the quarter ended December 31, 2010 was \$1.7 million, up 157% from \$653,721 for the quarter ended December 31, 2009, primarily due to our market share gains in NAND Flash distribution. Gross margin for the quarter ended December 31, 2010 was 1.4%, up from 0.7% as compared to the quarter ended December 31, 2009. The increase in gross profit and gross margin was mainly due to the increase in the average selling prices and market share gains.
