Letter to Shareholders

An improving U.S. economy and the potential for rising interest rates continued to weigh on the gold price during 2014. In a sector which traditionally thrives on uncertainty and economic hardship, the slowly improving economic environment in the U.S. has not been conducive to a higher gold price. Positive economic news contributed to the gold price decline of 5.6% during the 2014 fiscal year, as measured by the London P.M. fix. During this past fiscal year, gold reached a high of \$1,385 an ounce, \$341 an ounce lower than the high of the previous year, and a low of \$1,142 an ounce. Price volatility increased towards the end of the 2014 fiscal year as positive economic indicators improved confidence in the U.S. economy and the U.S. dollar further strengthened. This increased pressure on the gold price as gold struggled to find support around \$1,200 per ounce.

Gold equities saw significant volatility throughout 2014, and despite being up at various points in the year, ended the year near their lows. For the fiscal year ended November 30, 2014, ASA Gold and Precious Metals Limited (“ASA” or the “Company”) reported a total return of negative 11.1% based on its net asset value (“NAV”), including reinvested dividends. The NAV of the Company was \$11.50 per share at the fiscal year-end, versus \$12.98 per share at the prior year-end. The closing price of ASA’s shares on the New York Stock Exchange (“NYSE”) on November 30, 2014 was \$10.74, representing a share price discount to NAV of 6.6%. The share prices of closed-end funds, like ASA, are determined by trading activity in the open market and consequently may reflect a premium (higher than) or a discount (lower than) to its underlying NAV.

For the fiscal year ended November 30, 2014, the total return, based on ASA’s share price, of negative 15.7% outperformed the total return of negative 17.3% for the FTSE Gold Mines Total Return Index. ASA outperformed the index due to the performance of the investment portfolio despite a small increase in the discount.

The discount at which ASA’s shares traded in the market increased from a low of 1.5% at the beginning of the fiscal year to 6.6% at year-end, negatively impacting the share price performance. ASA’s shares traded at an average discount of 6.8% during the last fiscal year, slightly higher than the average discount of 6.0% during fiscal year 2013. During the last twelve months, the discount remained below the threshold set by the Board of Directors for making share repurchases and, therefore, no shares were acquired. Over the last several years, the combination of tender offers, a Share Repurchase Program and increased marketing efforts appear to have resulted in a general improvement in the discount at which ASA’s shares trade in the market. The Board continues to monitor the discount quarterly.

U.S. Dollar Impact

Many factors can influence the gold price including inflation concerns, sovereign reserves, and investor diversification. While most of these factors remain relevant, the U.S. dollar emerged as a leading driver of the

gold price in 2014, particularly in the second half of the year. The U.S. economy appeared to improve in 2014 and significantly outperformed other developed markets. Decreasing unemployment and growing corporate profits in the U.S. were a significant contrast to the disinflation and economic weakness of other leading nations. In addition, the Federal Reserve reduced and then ended quantitative easing, while other central banks introduced, or are

contemplating, additional stimulus measures. As a result, the U.S. dollar strengthened against most other currencies.

As can be seen in Chart 1 below, the U.S. dollar and the gold price had a strong inverse correlation for 2014. For the full year of 2014, the correlation was negative 0.72. In the last five months of the year it was negative 0.96, almost a perfect, inverse relationship with the gold price dropping as the U.S. dollar strengthened. We believe that this relationship will continue in the near term as the U.S. looks to further tighten monetary policy in 2015 while the majority of the developed world continues with more accommodative monetary policies. Over the medium term, however, we anticipate that the U.S. dollar's relationship to the gold price will normalize as other issues come to the forefront and the dollar's strength moderates.

Chart 1: U.S. Dollar vs. Gold Price

Source: ASA, Bloomberg

For ASA, the value of investments domiciled in foreign currencies has been negatively impacted by the dollar strength. For gold mining companies, the impact has varied based on currency exposure; however, the overall implication has been negative with a lower gold price pressuring operating margins for most gold producers. As we conclude a third year of the current downturn, it is becoming clearer which companies can adapt to survive the volatility and which will continue to struggle. ASA is focused on those companies that have demonstrated they can manage costs and achieve reasonable growth for the benefit of shareholders. We believe these nimble companies, with strong leadership and good assets, will continue to outperform peers despite the market volatility. While the U.S. dollar may continue to influence the gold

price in the near term, we remain long term investors seeking investments that can not only weather this trend, but may prosper from it.

Industry / Portfolio Trends

ASA's team continued to visit the mining operations of numerous companies during the last year in support of our investment process. These trips, in combination with meetings in our offices and at conferences, enabled the team to generate new investment opportunities and maintain research on its current investments.

Much of the gold mining industry is poorly structured for profitability below a gold price of \$1,300 an ounce. During the most recent gold bull market, the industry built a number of projects that generate little or even negative cash flow in the current price environment. Moreover, we anticipate that the lack of new investment capital available to the sector today will reduce the development of new gold mining projects over the next couple of years. With few new projects being financed and older, less profitable projects subject to closure, we anticipate that global gold production has peaked and a reduction in available supply to the market over the next few years is possible. Declining supply is one of the factors which may contribute to the next upward move in the gold price.

ASA has continued to maintain its investments in the gold royalty companies, such as a Franco-Nevada and Royal Gold, as these companies could benefit in the current price environment. A decrease in the availability of traditional capital market sources for the financing of mining projects tends to drive more business to the royalty companies during down markets. These royalty investments have been two of the best contributors to ASA's relative performance during the last several years and we anticipate this will continue in the near term.

The sustained weak gold price has adversely affected development companies and high cost operators due to their decreased ability to access capital markets. As such, ASA continually attempts to position the portfolio into companies which have the potential to grow, even at currently depressed commodity prices. Following these guidelines, ASA has sold shares of Silver Lake Resources, an Australian gold producer; West Kirkland, a Canadian junior company; and NovaCopper, a Canadian junior company. In the present price environment, these investments no longer meet ASA's investment goals and we saw what we believe to be better investment opportunities elsewhere. We also reduced our investments in Tahoe Resources and Randgold Resources during the year. These are both high quality companies. However, their strong relative performance resulted in too much of the portfolio being allocated to these producers.

As mentioned in the semi-annual report, ASA increased its investment in Torex Gold Resources, and made new investments in Amara Mining and Primero Mining during the year. Alamos Gold is a gold producer with various growth opportunities that was added to the portfolio in the second half of 2014. Alamos has one oper-

ating asset that currently generates positive cash flow allowing the company to internally finance its development projects. We believe the assets and defensive balance sheet of Alamos position it well in the current environment.

ASA has also increased its holdings in diamond companies in 2014. An improving economic environment, such as the one we are witnessing here in the United States, is historically good for diamond sales. There are very few high quality diamond companies in the world well positioned to benefit from the global growth of the middle class and improved diamond prices. Stornoway Diamond is one of these as it completes the development of the Renard project in Quebec. ASA also added a new investment in Petra Diamonds. Petra is a high quality producer of diamonds with six projects in southern Africa. Recent expansions at their two flagship projects, Cullinan and Finsch, should significantly increase production over the coming years enabling them to benefit from positive industry fundamentals.

Distributions

For the fiscal year ended November 30, 2014, ASA distributed \$0.04 per share compared to \$0.18 per share for the previous fiscal year. During 2014, dividend income from investments held in the ASA portfolio declined by 50%, as an increase in mining costs combined with a falling gold price negatively impacted operating margins and distributable cash flow. We anticipate that the mining industry will remain in a difficult operating and financial environment during the coming year and do not expect an increase in dividend income during the next twelve months. The decline in investment income during 2014 was offset somewhat by a 9.8% decline in overall operating costs at ASA. Nevertheless, the cost savings were insufficient to maintain the level of dividends shareholders received in the prior year. Dividend distributions are reviewed semi-annually by the Board of Directors and dividends, if any, are typically paid in May and November.

We appreciate the support of both the Board of Directors and our shareholders over the past year. We encourage shareholders to contact us with any questions that they may have either through the company website at www.asaltd.com or by calling us directly at 1-800-432-3378.

Forward-Looking Statements

This shareholder letter includes forward-looking statements. The Company’s actual performance or results may differ from its beliefs, expectations, estimates, goals and projections, and consequently, investors should not rely on these forward-looking statements as predictions of future events. Forward-looking statements are not historical in nature and generally can be identified by words such as “believe,” “anticipate,” “estimate,” “expect,” “intend,” “should,” “may,” “will,” “could,” “might,” “may,” “estimate,” “anticipate,” “expect,” “intend,” “should,” “may,” “will,” “could,” “might,” “may,” “estimate,” “anticipate,” “expect,” “intend,” “should,” “may,” “will,” “could,” “might,” “may,” similar expressions or their negative forms, or by references to strategy, plans, goals or intentions. The absence of these words or references does not mean that the statements are not forward-looking. The Company’s performance or results can fluctuate from month to month depending on a variety of factors, a number of which are beyond the Company’s control and/or are difficult to predict, including without limitation: the Company’s investment decisions, the performance of the securities in its investment portfolio, economic, political, market and financial factors, and the prices of gold, platinum and other precious minerals that may fluctuate substantially over short periods of time. The Company may or may not revise, correct or update the forward-looking statements as a result of new information, future events or otherwise.

The Company concentrates its investments in the gold and precious minerals sector. This sector may be more volatile than other industries and may be affected by movements in commodity prices triggered by international monetary and political developments. The Company is a non-diversified fund and, as such, may invest in fewer investments than that of a diversified portfolio. The Company may invest in smaller-sized companies that may be more volatile and less liquid than larger more established companies. Investments in foreign securities, especially those in the emerging markets, may involve increased risk as well as exposure to currency fluctuations. Shares of closed-end funds frequently trade at a discount to net asset value. All performance information reflects past performance and is presented on a total return basis. Past performance is no guarantee of future results. Current performance may differ from the performance shown.

This shareholder letter does not constitute an offer to sell or solicitation of an offer to buy any securities.

Certain Investment Policies and Restrictions

The following is a summary of certain of the Company's investment policies and restrictions and is subject to the more complete statements contained in documents filed with the Securities and Exchange Commission.

The concentration of investments in a particular industry or group of industries. It is a fundamental policy (i.e., a policy that may be changed only by shareholder vote) of the Company that at least 80% of its total assets be (i) invested in common shares or securities convertible into common shares of companies engaged, directly or indirectly, in the exploration, mining or processing of gold, silver, platinum, diamonds or other precious minerals, (ii) held as bullion or other direct forms of gold, silver, platinum or other precious minerals, (iii) invested in instruments representing interests in gold, silver, platinum or other precious minerals such as certificates of deposit therefor, and/or (iv) invested in securities of investment companies, including exchange traded funds, or other securities that seek to replicate the

price movement of gold, silver or platinum bullion. Compliance with the percentage limitation relating to the concentration of the Company's investments will be measured at the time of investment. If investment opportunities deemed by the Company to be attractive are not available in the types of securities referred to in the preceding paragraph, the Company may deviate from the investment policy outlined in that paragraph and make temporary investments of unlimited amounts in securities issued by the U.S. Government, its agencies or instrumentalities or other high quality money market instruments.

The percentage of voting securities of any one issuer that the company may acquire. It is a non-fundamental policy (i.e., a policy that may be changed by the Board of Directors) of the Company that the Company shall not purchase a security if, at the time of purchase, more than 20% of the value of its total assets would be invested in securities of the issuer of such security.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
ASA Gold and Precious Metals Limited

We have audited the accompanying consolidated statements of assets and liabilities of ASA Gold and Precious Metals Limited (the "Company") including the schedules of investments, as of November 30, 2014 and November 30, 2013, and the related consolidated statements of operations and the consolidated statements of changes in net assets for each

of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. Other auditors have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board, the financial highlights for each of the two years in the period ended November 30, 2011, and in their report, dated January 24, 2012, they expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audits of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circum-

stances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of November 30, 2014, by correspondence with the custodian. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of the Company, as of November 30, 2014 and November 30, 2013, and the results of its operations and the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the three years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Notes to Consolidated Financial Statements

Years ended November 30, 2014 and 2013

1. Organization

These consolidated financial statements include ASA Gold and Precious Metals Limited (the “Company”), and its former wholly owned subsidiary, ASA Gold and Precious Metals Advisers, LLC (the “Adviser”). The Company is a closed-end investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), and was organized as an exempted limited liability company under the laws of Bermuda. The Company’s former subsidiary, ASA Gold and Precious Metals Advisers LLC, was discontinued on September 23, 2013 as an investment adviser in the state of California and as a limited liability corporation under the laws of the state of Delaware.

2. Summary of significant accounting policies

The following is a summary of the significant accounting policies:

A. Security valuation

The net asset value of the Company generally is determined as of the close of regular trading on the New York Stock Exchange (the “NYSE”) or the Toronto Stock Exchange (the “TSX”), whichever is later, on the date for which the valuation is being made (the “Valuation Time”). Portfolio securities listed on U.S. and foreign stock exchanges generally are valued at the last reported sale price as of the Valuation Time on the exchange on which the securities are primarily traded, or the last reported bid price if a sale price is not available. Securities traded over the counter are valued at the last reported sale price or the last reported bid price if a sale price is not available. Securities listed on foreign stock exchanges may be fair valued based on significant events that have occurred subsequent to the close of the foreign markets.

Securities for which current market quotations are not readily available are valued at their fair value as determined in good faith by, or in accordance with procedures approved by, the Company’s Board of Directors. If a security is valued at a “fair value”, that value may be different from the last quoted price for the security. Various factors may be reviewed in order to make a good faith determination of a security’s fair value. These factors include, but are not limited to, the nature of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion rights on the security; and changes in overall market conditions.

Where the Company holds securities listed on foreign stock exchanges and American Depository Receipts (“ADRs”) representing these securities are actively traded in U.S. markets, the securities normally are fair valued based on the last reported sales price of the ADRs.

The difference between cost and market value is reflected separately as net unrealized appreciation (depreciation) on investments. The net realized gain or loss from the sale of securities is determined for accounting purposes on the identified cost basis.

B. Restricted securities

At November 30, 2014 and November 30, 2013, the Company held investments in restricted securities of 2.34% and 0.04% of net assets, respectively, valued in accordance with procedures approved by the Company’s Board of Directors as follows:

Restricted Securities

November 30, 2014

Shares/ Warrants	Cost	Issuer	Value Per Unit	Value	Acquisition Date

C. Fair value measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Company would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or *in the absence of a principal market the most advantageous market for the investment or liability*. U.S. GAAP establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs)

Notes to Consolidated Financial Statements (continued)

Years ended November 30, 2014 and 2013

and (2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Company's investments. The inputs are summarized in the three broad levels listed below.

- Level 1 — unadjusted quoted prices in active markets for identical investments
- Level 2 — other significant observable inputs (including quoted prices for similar investments, interest rates, credit risk, etc.)
- Level 3 — significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of November 30, 2014 and November 30, 2013 in valuing the Company's investments at fair value:

D. Cash and Cash Equivalents

The Company considers all money market and all highly liquid temporary cash investments purchased with an original maturity of less than three months to be cash equivalents. The majority of the Company's cash and cash equivalents at November 30, 2014 and 2013 consisted of overnight deposit of excess funds in a commercial paper sweep instrument issued by JPMorgan Chase & Co.

E. Foreign Currency Translation

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the rate of exchange reported one hour after the Valuation Time. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. The Company separately report the effect of changes in foreign exchange rates from changes in market prices of securities held. The resulting net foreign currency gain or loss is included on the Consolidated Statements of Operations. Realized foreign currency gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, fluctuation in exchange rates between the initial purchase date and subsequent sale date on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Company's books and the U.S. dollar equivalent of the amounts actually received or paid.

F. Securities Transactions and Investment Income

During the year ended November 30, 2014, sales and purchases of portfolio securities (other than temporary short-term investments) amounted to \$23,442,845 and \$19,130,693, respectively. During the year ended November 30, 2013, sales and purchases of portfolio securities (other than temporary short-term investments) amounted to \$23,043,920 and \$25,714,403, respectively.

Dividend income is recorded on the ex-dividend date, net of withholding taxes or ADR fees, if any. Interest income is recognized on the accrual basis.

G. Dividends to Shareholders

Dividends to shareholders are recorded on the ex-dividend date. The reporting for financial statement purposes of dividends paid from net investment income or net realized gains may differ from their ultimate reporting for U.S. federal income tax purposes. The differences are caused primarily by the separate line item reporting for financial statement purposes of foreign exchange gains or losses.

H. Use of Estimates

The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

I. Basis of Presentation

The consolidated financial statements are presented in U.S. dollars.

J. Income Taxes

In accordance with U.S. GAAP requirements regarding accounting for uncertainties on income taxes, management has analyzed the Company's tax positions taken on federal and state income tax returns, as applicable, for all open tax years (2011 – 2014). As of November 30, 2014 and November 30, 2013, the Company has not recorded any unrecognized tax benefits. The Company's policy, if it had unrecognized benefits, is to recognize accrued interest and penalties in operating expenses.

3. Tax status of the Company

The Company is a passive foreign investment company (PFIC) and is not subject to Bermuda tax as an exempted limited liability company organized under the laws of Bermuda. Nor is the Company generally subject to U.S. federal

income tax, since it is a non-U.S. corporation whose only business activities in the United States is trading in stocks or securities for its own account; under the U.S. federal tax law that activity does not constitute a trade or business

Notes to Consolidated Financial Statements (continued)

Years ended November 30, 2014 and 2013

within the United States, even if its principal office is located therein. As a result, its gross income is not subject to U.S. federal income tax, though certain types of income it earns from U.S. sources (such as dividends of U.S. payors) are subject to withholding tax.

On September 23, 2013, ASA Gold and Precious Metals Advisers, LLC was discontinued as an investment adviser in the state of California. The Adviser filed its final federal and state tax returns on November 22, 2013.

4. Exemptive order

The Company is a closed-end investment company and operates pursuant to an exemptive order issued by the SEC pursuant to Section 7(d) of the 1940 Act (the "Order"). The Order was originally conditioned upon, among other things, the Company complying with certain requirements relating to the custody of assets and settlement of securities transactions outside of the United States different than those required of other registered investment companies. These conditions made it more difficult for the Company to implement a flexible investment strategy and to fully achieve its desired portfolio diversification than if it were not subject to such requirements. On June 18, 2013, the SEC issued an order that amended certain conditions contained in the Company's then-existing exemptive order, most notably, the Company's ability to hold assets and settle trades in Canada, Australia, the United Kingdom, the United States, South Africa and Hong Kong (text of relief granted is available at: <http://www.sec.gov/Archives/edgar/data/1230869/999999999713009907/filename1.pdf>).

5. Retirement plans

The Company has recorded a liability for retirement benefits due to retired directors and one current director upon retirement. The liability for these benefits at November 30, 2014 and November 30, 2013 was \$584,806 and \$613,580, respectively. A director whose first election to the Board of Directors was prior to January 1, 2008 qualifies to receive retirement benefits if he has served the Company (and any of its predecessors) for at least twelve years prior to retirement. Directors first elected on or after January 1, 2008 are not eligible to participate in the plan.

6. Concentration risk

The Company invests at least 80% of its total assets in securities of companies engaged, directly or indirectly, in the exploration, mining or processing of gold or other precious minerals. The Company also invests a substantial portion of its assets in companies that are domiciled and/or have operations outside of the United States, including emerging market countries, such as South Africa. The Company is, therefore, subject to gold and precious metals related risk as well as risk related to investing in foreign securities, including political, economic, regulatory, liquidity, currency fluctuation, and foreign exchange risks. The Company currently is invested in a limited number of securities and thus, holds large positions in certain securities. Because the Company's investments are concentrated in a limited number of securities of companies involved in the holding or mining of gold and other precious minerals and related activities, the net asset value of the Company may be subject to greater volatility than that of a more broadly diversified investment company.

7. Indemnifications

In the ordinary course of business, the Company enters into contracts that contain a variety of indemnification provisions. The Company's maximum exposure under these arrangements is unknown.

8. Investment adviser subsidiary

On July 23, 2010, the SEC granted the Company no-action relief to organize a wholly-owned investment adviser subsidiary. In reliance on such relief, the Company established the Adviser as a Delaware limited liability company on December 8, 2010.

The Company incurred allocated expenses of \$0 and \$53,193, respectively, for the administration and operations of the Adviser during the years ended November 30, 2014 and November 30, 2013, which are reflected in "Advisors operating expenses" on the Consolidated Statements of Operations.

On September 23, 2013, the Adviser filed Form ADV-W with the SEC to request termination as a state-registered investment adviser. During the fourth quarter of 2013, certificates of cancellation were filed with the State of Delaware and the State of California.

9. Compensation matters

For the years ended November 30, 2014 and November 30, 2013, the aggregate remuneration paid to the Company's officers was \$1,634,728 and \$1,344,195, respectively. Remuneration paid to officers during the year ended November 30, 2014 increased relative to the same period in 2013 due to the promotion of an employee from non-officer to

officer. In addition, \$678,100 and \$712,558, respectively was accrued for bonuses to the Company's officers and employees. The accrued bonuses are reflected in the "Accrued affiliated expenses" on the Consolidated Statements of Assets and Liabilities. The aggregate remuneration paid to the Company's directors was \$216,000 and \$225,000, respectively.

Notes to Consolidated Financial Statements (continued)

Years ended November 30, 2014 and 2013

10. Operating lease commitment

In November 2012, the Company entered into a five-year operating lease agreement in San Mateo, CA for approximately 2,500 square feet to be used as office space for its employees. The lease provides for future minimum rental payments in the aggregate amount of \$408,192 as of November 30, 2014. The lease contains escalation clauses relating to the tenant’s share of insurance, operating expenses and tax expenses of the lessor.

Future minimum rental commitments under the lease are as follows:

12/1/14 – 11/30/15	\$ 121,559
12/1/15 – 11/30/16	125,206
12/1/16 – 11/30/17	128,953
12/1/17 – 2/28/18	32,474
Total	\$408,192

11. Share repurchase

The Company may from time to time purchase its common shares at a discount to NAV on the open market in such amounts and at such prices as the Company may deem advisable.

The Company had 19,289,905 shares outstanding as of November 30, 2014 and November 30, 2013. There were no repurchases during the years ended November 30, 2014 and 2013.

12. Legal proceedings

On September 30, 2013, Firsthand Technology Value Fund, Inc. (“Plaintiff”) filed a lawsuit in California Superior Court against the Company and one of its then-independent directors Phillip Goldstein (“Co-Defendant”). Plaintiff alleged, among other things, intentional interference with contractual relations and unfair competition in violation of the

California Business and Professions Code. On November 19, 2013, pursuant to its indemnification policy for directors and officers, the Company entered into an agreement to advance legal defense costs to its Co-Defendant. The Company filed a claim with its insurance carrier for coverage of related legal expenses and costs for the Company and its Co-Defendant. The insurance carrier reimbursed a portion of the amounts claimed before the end of fiscal year 2014. Plaintiff dismissed the Company from the lawsuit on April 14, 2014 (and subsequently dismissed the Co-Defendant). The Company did not enter into any settlement with the Plaintiff in exchange for its dismissal.

13. New accounting pronouncements

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. The amendments in the ASU enhance disclosures about offsetting of financial assets and liabilities to enable investors to understand the effect of these arrangements on a fund's financial position. In January 2013, FASB issued ASU No. 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. The amendments in ASU No. 2013-01 clarify the intended scope of disclosures required by ASU No. 2011-11. These ASUs are effective for interim and annual reporting periods beginning on or after January 1, 2013. The adoption of these ASUs has not had a material impact on the Company's consolidated financial statements.

14. Subsequent events

In accordance with U.S. GAAP provisions, management has evaluated the possibility of subsequent events existing in the Company's consolidated financial statements through the date the consolidated financial statements were issued. The Company believes that there are no material events that would require disclosure.

Certain Tax Information for U.S. Shareholders

The Company is a “passive foreign investment company” (“PFIC”) for United States federal income tax purposes. In view of this, United States investors holding shares in taxable accounts are strongly urged to review the important tax information regarding the consequences of an investment in the common shares of the Company, which may be found at www.asaltd.com under

“Investor Information | Tax Information - PFIC”. **Due to the complexity and potentially adverse effect of the applicable tax rules, U.S. shareholders are strongly urged to consult their own tax advisors concerning the impact of these rules on their investment in the Company and on their individual situations, and any additional informational filing requirements.**

Dividend Reinvestment and Direct Stock Purchase Plan

Computershare Trust Company, N.A. (“Computershare”) has been authorized by the Company to offer and administer the Computershare Investment Plan, a direct stock purchase and dividend reinvestment plan (“CIP”) to shareholders as well as new investors or non-shareholders. Shareholders and new investors may elect to participate in the CIP by signing an enrollment form or by going to www.computershare.com/investor and following the instructions. New investors or non-shareholders must include a minimum initial investment of at least \$500. Computershare as agent will apply to the purchase of common shares of the Company in the open market (i) all cash dividends (after deduction of the service charge described below) that become payable to such participant on the Company’s shares (including shares registered in his or her name and shares accumulated under the CIP) and (ii) any optional cash purchases (\$50 minimum, subject to an annual maximum of \$250,000) received from such participant.

For the purpose of making purchases, Computershare will commingle each participant’s funds with those of all other participants in the CIP. The price per share of shares purchased for each participant’s account shall be the weighted average price of all shares purchased in the open market with the net funds available from a cash dividend and any voluntary cash purchases being invested. Any stock dividends or split shares distributed on shares held in the CIP will be credited to the participant’s account.

A one-time \$10 enrollment fee to establish a new account for a new investor or non-shareholder will be deducted from the purchase amount. For each participant, each dividend reinvestment will entail a transaction fee of 5% of the amount reinvested, up to a maximum of \$3.00 plus \$0.03 per share purchased. Each optional cash purchase by check or one-time online bank debit will entail a transaction fee of \$5 plus \$0.03 per share purchased. If a participant has funds automatically deducted monthly from his or her savings

or checking account, for each debit the transaction fee is \$2.50 plus \$0.03 per share purchased. Fees will be deducted from the purchase amount. Each batch order sale will entail a transaction fee of \$15 plus \$0.12 per share sold. Each market order sale will entail a transaction fee of \$25 plus \$0.12 per share sold. Fees are deducted from the proceeds derived from the sale. All per share fees include any brokerage commissions Computershare is required to pay. Additional fees are charged by Computershare for specific shareholder requests such as copies of account statements for prior years (\$10 per year requested) and a returned check and ACH reject fee of \$25.

Participation in the CIP may be terminated by a participant at any time by written, telephone or Internet instructions to Computershare. Upon termination, a participant will receive a certificate for the whole number of shares credited to his or her account, unless he or she requests the sale of all or part of such shares. Dividends reinvested by a shareholder under the Plan will generally be treated for U.S. federal income tax purposes in the same manner as dividends paid to such shareholder in cash. See "Certain tax information for U.S. shareholders" for more information regarding tax consequences of an investment in shares of the Company, including the effect of the Company's status as a PFIC. The amount of the service charge is deductible for U.S. federal income tax purposes, subject to limitations.

To participate in the CIP, shareholders may not hold their shares in a "street name" brokerage account.

Additional information regarding the Plan may be obtained from Computershare, P.O. Box 30170, College Station, TX 77842-3170. Information may also be obtained on the Internet at www.computershare.com/investor or by calling Computershare's Telephone Response Center at (800) 317-4445 between 9:00 a.m. and 5:00 p.m., Eastern time, Monday through Friday.

Privacy Notice

The Company is committed to protecting the financial privacy of its shareholders.

We do not share any nonpublic, personal information that we may collect about shareholders with anyone, including our affiliates, except to service and administer shareholders' share accounts, to process transactions, to comply with shareholders' requests of legal requirements or for other limited purposes permitted by law. For example, the Company may disclose a shareholder's name, address, social security number and the number of shares owned to its administrator, transfer agent or other service providers in order to provide the shareholder with proxy

statements, tax reporting forms, annual reports or other information about the Company. This policy applies to all of the Company's shareholders and former shareholders.

We keep nonpublic personal information in a secure environment. We restrict access to nonpublic personal information to Company employees, agents and service providers who have a need to know the information based on their role in servicing or administering shareholders' accounts. The Company also maintains physical, electronic and procedural safeguards to protect the confidentiality of nonpublic personal information.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

ASA Gold and Precious Metals Limited

Proxy Voting Policies and Procedures

The following is a statement of the proxy voting policies and procedures of ASA Gold and Precious Metals Limited (ASA).

Proxy Administration

ASA s portfolio is primarily comprised of holdings in precious metals companies, and thus proxy voting will be done by ASA on proposals made by these issuing companies (portfolio company or portfolio companies).

ASA understands its proxy voting responsibilities and that proxy voting decisions may affect the long-term interests of its shareholders. ASA attempts to process every proxy vote it receives. However, voting proxies for shares of certain non- U.S. companies may involve significantly greater effort and cost than voting proxies for shares of U.S. companies. There may be situations where ASA may not or cannot vote a proxy. For example, ASA may receive proxy material too late to act upon or the cost of voting may outweigh the benefit of voting. In addition, ASA may not receive proxy materials when it holds depository receipts, (ADRs) as opposed to the underlying securities. Certain issuers do not instruct the holding banks to solicit proxies from depository receipt holders.

Authority and responsibility to vote proxies with respect to ASA's portfolio securities has been delegated to the President and, in his absence or inability to act, the Chief Compliance Officer. In evaluating proxy proposals, the President (or the Chief Compliance Officer, when appropriate) may consider information from various sources, including the board of directors (board) of ASA presenting a proposal, as well as independent sources. The ultimate decision rests with the President (or Chief Compliance Officer, when appropriate), who is accountable to the Board of Directors of ASA.

General Principles

For the purposes of ASA, a portfolio company is defined as a company in which ASA holds securities or assets.

In voting proxies, ASA will act solely in the best economic interests of its shareholders with the goal of maximizing the value of ASA's portfolio. These policies and procedures are designed to promote accountability of a portfolio company's management and board to its shareholders and to align the interests of those portfolio companies and their management with those of shareholders.

These policies and procedures recognize that a portfolio company's managers are entrusted with the day-to-day operations of the company, as well as longer-term strategic planning, subject to the oversight of that company's board.

ASA believes that the quality and depth of a portfolio company's management and its board is an important consideration in determining the desirability of an investment. Accordingly, the recommendations of the portfolio company's board on many issues are given substantial weight in determining how to vote a proxy. However, each issue is considered on its own merits, and the position of the portfolio company's board will not be supported whenever it is determined not to be in the best interests of ASA and its shareholders.

Specific Policies

A. Routine Matters

Election of Directors. In general, ASA will vote in favor of the board's director nominees if they are running unopposed. ASA believes that the board is in the best position to evaluate the qualifications of its directors and the needs of a particular board. Nevertheless, ASA will vote against, or withhold its vote for, any nominee whom it feels is not qualified or appears to lack sufficient independence. When the board's nominees are opposed in a proxy contest, ASA will evaluate which nominee's publicly-announced management policies and goals are most likely to maximize shareholder value, as well as the past performance of the incumbent.

Ratification of Selection of Auditors. In general, ASA will rely on the judgment of the board in selecting the independent auditors. Nevertheless, ASA will examine the recommendation of the board in appropriate cases (e.g., where there has been a change in auditors based upon a disagreement on accounting matters).

Stock Option and Other Equity Based Compensation Plan Proposals. ASA will generally approve the board's recommendations with respect to the adoption or amendment of stock option plans and other equity based compensation plans, provided that the total number of shares reserved under all of a company's plans is reasonable and not excessively dilutive.

B. Acquisitions, Mergers, Reincorporations, Reorganizations and Other Transactions

Because voting on transactions such as acquisitions, mergers, reincorporations and reorganizations involve considerations unique to each transaction, ASA does not have a general policy in regard to voting on those transactions. ASA will vote on a case-by-case basis on each transaction.

C. Changes in Capital Structure

ASA evaluates proposed capital actions on a case-by-case basis and will generally defer to the business analysis of the portfolio company's board in support of such actions. In cases where proposed capital actions support proxy defenses or act to reduce or limit shareholder rights, particular consideration will be given to all the effects of the action, and ASA's vote will be made in a manner consistent with the objective of maximizing long-term shareholder value.

D. Anti-Takeover Proposals

In general, ASA will vote against any proposal which ASA believes would materially contribute to preventing a potential acquisition or takeover of the portfolio company, including proposals to:

Stagger the board;

Introduce cumulative voting;

Introduce unequal voting rights;

Create supermajority voting;

Establish preemptive rights.

In general, ASA will vote in favor of any proposals to reverse the above.

E. Shareholder Proposals Involving Social, Moral or Ethical Matters

In general, ASA will vote in accordance with the recommendation of the portfolio company's board on issues that primarily involve social, moral or ethical matters, although exceptions may be made in certain instances where ASA

believes a proposal has substantial economic implications.

F. Conflicts of Interest

In view of the fact that ASA is internally managed and does not have an outside investment advisor, it is unlikely that conflicts of interest will arise in voting the proxies of ASA's portfolio companies. ASA maintains a record of affiliated persons and ownership of more than 1/2 of 1% of any publicly traded companies of each director and officer of ASA, including the Chief Executive Officer, Chief Compliance Officer and Chief Financial Officer. The Chief Executive Officer is primarily responsible for voting the proxies of ASA's portfolio companies. In the event that the Chief Executive Officer has a personal conflict of interest or is unable to vote, the proxy may be voted by the Chief Compliance Officer. In cases of a conflict of interest, a record shall be maintained confirming that ASA's vote was made solely in the interests of ASA and without regard to any other consideration.

G. Affiliated Entity

ASA's Proxy Voting Policies and Procedures were also applied to ASA's former wholly owned subsidiary, ASA Gold and Precious Metals Advisers LLC ("Adviser"). The Adviser did not have any client accounts. The Adviser was discontinued on September 23, 2013 as an investment adviser in the state of California and as a limited liability company under the laws of the state of Delaware.

H. Recordkeeping

ASA uses ProxyEdge, a third party automated proxy voting service. Where appropriate, rationales for "No" votes cast by ASA will be supported by footnoted documentation on ProxyEdge. According to the Proxy Edge website, this service is a suite of electronic voting services that help simplify the management of institutional proxies. The system manages the process of meeting notifications, voting, tracking, mailing, reporting, record maintenance and even vote disclosure rules enacted by the SEC.

Item 8. Portfolio Managers of Closed-End Management Investment Companies.

Unless otherwise indicated, the information set forth below is as of November 30, 2014.

- (a)(1) As of the date of this filing, January 29, 2015, David J. Christensen, President and Chief Executive Officer of the registrant since February 2009, is responsible for the day-to-day management of the registrant's portfolio. Mr. Christensen joined the registrant in 2007 as Vice President – Investments and served in that capacity until February 2009. He served as Vice President, Corporate Development of Gabriel Resources Ltd. from 2006 to 2008; was an independent financial consultant from 2003 to 2006; and was Director of Fundamental Equity Research for Credit Suisse First Boston from 2002 to 2003.
 - (2) Mr. Christensen is not responsible for the day-to-day management of the portfolio of any other registered investment company, other pooled investment vehicle or other account, except his personal accounts or those of members of his family. Conflicts of interest could arise when a portfolio manager personally buys, holds or sells securities held or to be purchased or sold by the registrant. The registrant has codes of ethics and procedures designed to address potential conflicts of interest. However, there is no guarantee that such procedures will detect each and every situation in which a conflict arises.
 - (3) Mr. Christensen's compensation as Portfolio Manager consists of a fixed salary and a discretionary bonus, each as determined annually by the Board of Directors upon the recommendation of its Compensation Committee. In determining Mr. Christensen's compensation, the Board of Directors and Compensation Committee consider his overall performance and his management responsibilities with the registrant, including those not related to the investment performance of the registrant's portfolio. Investment performance is based on, among other things, relative performance to the Company's benchmark, the FTSE Gold Mines Index. Mr. Christensen also receives reimbursement of medical insurance. The Company pays the premium for Mr. Christensen's life insurance. In addition, under certain circumstances, Mr. Christensen may be entitled to compensation in the event that his services are terminated by the registrant.

directors since the registrant provided disclosure in response to Item 22(b)(15) of Schedule 14A in its proxy statement dated January 26, 2015.

Item 11. Controls and Procedures

- (a) The President and Chief Executive Officer and the Controller, in their capacities as principal executive officer and principal financial officer of the registrant, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940 (the "1940 Act")) are effective, based on their evaluation of these controls and procedures as of a date within 90 days prior to the filing date of this report.
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act) that occurred during the second fiscal quarter of the period covered by this report that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12. Exhibits.

- (a)(1) The code of ethics that is the subject of disclosure under Item 2 above is attached hereto.
 - (2) The certification required by Rule 30a-2(a) under the 1940 Act is attached hereto.
 - (3) Not applicable.
 - (b) The certification required by Rule 30a-2(b) under the 1940 Act, Rule 13a-14(b) under the Exchange Act and Section 1350 of Chapter 63 of Title 18 of the United States Code is attached hereto. This certification is not deemed filed for purposes of Section 18 of the Exchange Act, or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference.
