(d) The following exhibit is furnished with this Current Report:

99.1 News release dated February 15, 2006.

**Forward-Looking Statements**

Any statements in this Current Report about our expectations, beliefs, plans, objectives, assumptions or future events or performance are not historical facts and are forward-looking statements. These statements are often, but not always, made through the use of words or phrases such as believe, will, expect, anticipate, estimate, intend, plan, and would. For example, statements concerning Gen-Probe's financial condition, possible or expected results of operations, regulatory approvals, future milestone payments, growth opportunities, and plans and objectives of management are all forward-looking statements. Forward-looking statements are not guarantees of performance. They involve known and unknown risks, uncertainties and assumptions that may cause actual results, levels of activity, performance or achievements to differ materially from those expressed or implied by any forward-looking statement. Some of these risks, uncertainties and assumptions include but are not limited to: (i) the risk that we may not achieve our expected 2006 growth, revenue, earnings or other financial targets, (ii) the risk that Bayer may successfully appeal the arbitration decision that favored us, (iii) the risk that we may not earn or receive milestone payments from our collaborators, including Chiron, (iv) the possibility that the market for the sale of our new products, such as our TIGRIS system, APTIMA Combo 2 assay and PROCLEIX ULTRIO assay, may not develop as expected, (v) the enhancement of existing products and the development of new products, including products, if any, to be developed under our recent industrial collaborations, may not proceed as planned, (vi) the risk that our PROCLEIX ULTRIO assay and our TIGRIS instrument for blood screening may not be approved by regulatory authorities or commercially available in the time frame we anticipate, or at all, (vii) we may not be able to compete effectively, (viii) we may not be able to maintain our current corporate collaborations and enter into new corporate collaborations or customer contracts, (ix) we are dependent on Chiron, Bayer and other third parties for the distribution of some of our products, (x) we are dependent on a small number of customers, contract manufacturers and single source suppliers of raw materials, (xi) changes in third-party reimbursement policies regarding our products could adversely affect sales of our products, (xii) changes in government regulation affecting our diagnostic products could harm our sales and increase our development costs, (xiii) the risk that our intellectual property may be infringed by third parties or invalidated, and (xiv) our involvement in patent and other intellectual property and commercial litigation could be expensive and could divert management's attention. The foregoing list sets forth some, but not all, of the factors that could affect our ability to achieve results described in any forward-looking statements. For additional information about risks and uncertainties we face and a discussion of our financial statements and footnotes, see documents we file with the SEC, including our most recent annual report on Form 10-K and all subsequent periodic reports. We assume no obligation and expressly disclaim any duty to update forward-looking statement to reflect events or circumstances after the date of this current report or to reflect the occurrence of subsequent events.
