LETTER TO SHAREHOLDERS

LETTER TO SHAREHOLDERS
May 22, 2002

Dear Shareholder:

This report provides investment results, performance information and market outlook for ACM Managed Dollar Income Fund (the "Fund") for the semi-annual reporting period ended March 31, 2002.

Investment Objective and Policies

This closed-end fund is designed for investors who seek high current income and capital appreciation. To achieve this objective, it invests primarily in high-yielding, high-risk U.S. and non-U.S. fixed income securities, denominated in U.S. dollars, that we expect to benefit from improving economic and credit fundamentals.

Investment Results

The following table shows how the Fund performed over the six- and 12-month periods ended March 31, 2002. For comparison, we have included a composite benchmark consisting of 65% of the J.P. Morgan Emerging Markets Bond Index Plus (JPM EMBI+)--a standard measure of the performance of a basket of unmanaged emerging market debt securities--and 35% of the Credit Suisse First Boston High Yield (CSFBHY) Index--a standard measure of the performance of a basket of unmanaged U.S. high yield debt securities. We compare the Fund's performance to

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

this composite benchmark because it more closely resembles the composition of the Fund's portfolio.

INVESTMENT RESULTS*

Periods Ended March 31, 2002

	Total Returns	
	6 Months	12 Months
ACM Managed Dollar Income Fund (NAV)	19.54%	11.05%
J.P. Morgan Emerging Markets Bond Index Plus	5.65%	3.62%
Credit Suisse First Boston High Yield Index	8.32%	3.36%
Composite: 65%/35% (65% JPM EMBI+ 35% (CSFBHY)	6.58%	3.53%

* The Fund's investment results represent total returns for the periods shown and are based on the net asset value (NAV) of the Fund as of March 31, 2002. All fees and expenses related to the operation of the Fund have been deducted. Returns for the Fund include the reinvestment of any distributions paid during each period. Past performance is no guarantee of future results.

The unmanaged J.P. Morgan Emerging Markets Bond Index Plus is comprised of dollar-denominated restructured sovereign bonds; a large percentage of the index is made up of Brady bonds. The unmanaged Credit Suisse First Boston High Yield Index is a measure of lower-rated, fixed income, non-convertible

ACM MANAGED DOLLAR INCOME FUND o 1

LETTER TO SHAREHOLDERS

U.S. dollar-denominated securities meeting certain criteria developed by Credit Suisse designed to enable the index to reflect the high yield market. The composite is from the inception of the JPM EMBI+, which was 12/31/93. The indices are unmanaged and reflect no fees or expenses. An investor cannot invest directly in an index, and its results are not indicative of any specific investment, including ACM Managed Dollar Income Fund.

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

Additional investment results appear on pages 6-8.

The Fund significantly outperformed the composite benchmark for the six- and 12-month periods ended March 31, 2002. This was primarily due to the Fund's security selection in both its emerging market and high yield holdings. The Fund's use of financial leverage during a period of strong returns further enhanced the outperformance relative to the index.

Within the emerging market sector, the Fund's overweight position in Russia and its overall security selection were the primary contributors to outperformance. Positions in Mexico, Brazil, the Philippines and Ukraine also enhanced performance. Eliminating the Fund's position in Argentina in November of 2001 was a key decision that contributed positively to performance.

Russia, which benefited from strong economic growth in spite of lower oil prices, continued to outperform all other emerging market countries during the six-month period, posting a return of 33.48% as measured by the JPM EMBI+. News that Russia does not plan to issue any foreign debt in 2002 and will revamp its outdated debt management system also had a positive effect on Russian bond prices.

Mexico posted a return of 9.58% for the six-month period even though it was negatively impacted by a slowing U.S. economy and lower oil prices. Bond prices strengthened as Standard & Poor's (S&P) increased Mexico's credit rating to a BBB investment-grade level, the government began implementing much needed fiscal reforms and the economy continued to align itself with the U.S.

In Brazil, greater than expected trade surpluses and a strengthening currency led to declining debt ratios, enabling the central bank to lower interest rates. Growth prospects improved as heavy rains filled the reservoirs of the country's hydroelectric power plants, enabling the government to put an end to electricity rationing. Brazil's ability to withstand the crisis in neighboring Argentina also improved its outlook. For the six-month period, Brazil returned 25.90% and was the largest country weight within the JPM EMBI+.

In the Philippines, a robust agricultural sector supported the economy, which outperformed despite weak demand for electronics exports. During the period under review, the Philippine central bank cut interest rates to their lowest level since 1995, fueling economic growth. An improved credit rating, falling inflation and a stable currency further supported bond prices, with the Philippines posting a return of 23.28% for the period.

2 o ACM MANAGED DOLLAR INCOME FUND

LETTER TO SHAREHOLDERS

The Fund's position in Ukraine enhanced performance as economic growth and improving credit boosted the country's bond prices, with Ukraine returning 29.53% for the six-month period.

The Fund's high yield holdings also contributed positively to performance. Our focus on domestic cable selections such as Charter Communication Holdings and Mediacom Broadband, which benefit from stable cash flows, were significant positive contributors to the Fund. In addition, holdings in the automotive, chemical, diversified media and hotel sectors helped performance. On the other hand, the Fund's overweight position in the wireless telecommunications sector, relative to the benchmark, had a negative effect on performance. The wireless

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

telecommunications sector was impacted by concerns regarding future subscriber growth rates that adversely affected valuations. However, the Fund's security selection within the telecommunications sector was a positive contributor to performance.

Market Overview

In the U.S., economic growth surpassed expectations for the fourth quarter of 2001. Gross domestic product (GDP), which is the broadest measure of U.S. economic activity, grew a revised 1.7% in real terms. Unemployment levels appeared to have peaked as the U.S. economy began adding jobs in March for the first time in eight months. An increase in industrial production levels further indicated that the U.S. economy was beginning to rebound. The U.S. Federal Reserve ended its easing cycle as signs of an economic recovery began to emerge. In addition, in March 2002 the President signed into law a retroactive tax bill designed to enhance corporate cash flow and trigger a faster recovery in capital spending.

Emerging market debt, as measured by the JPM EMBI+, posted a return of 5.65% for the six-month period under review. Expansionary U.S. fiscal and monetary policy, increased production levels, low interest rates and the bottoming out of economic decline in Europe created a favorable environment for emerging market debt. These factors combined with high levels of liquidity and increasing investor confidence contributed to a steady inflow of funds into emerging market bonds during the period under review. However, the overall performance of the sector was significantly dampened by the negative performance of Argentina, which fell 59.29% for the period. Apart from Argentina, the JPM EMBI+ returned a strong 19.03% for the period.

Most other individual emerging market countries posted strong returns as the market de-coupled from the events in Argentina. In addition to the top performing countries already mentioned in the investment results section, Ecuador returned 37.37%, Turkey, 25.06%, Nigeria, 18.89%, Peru, 19.02% and Bulgaria 16.56%. Besides Argentina, the only countries that underperformed the index were Poland and Korea, which respectively returned 3.81% and 3.26%.

For the six-month reporting period ended March 31, 2002, the high yield market, as represented by the CSFBHY

ACM MANAGED DOLLAR INCOME FUND o 3

LETTER TO SHAREHOLDERS

Index, returned 8.32%. Strong performance in the first quarter of 2002 reflected an improved economic outlook and investors' willingness to assume additional risk. The high yield market was also the beneficiary of large inflows into high yield mutual funds. Inflows in March alone totaled approximately \$3.2 billion, the largest single monthly addition on record. However, default rates remained high throughout the six-month period, reflecting the low financial flexibility of highly leveraged companies. Default levels peaked in January 2002 with \$15.1 billion in defaulted bonds. For the six-month period, higher rated securities outperformed as investors sought higher quality issuers.

Outlook

The world economic outlook continues to improve for 2002, sparked by the evidence of a stronger than anticipated rebound in the U.S. economy, coupled

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

with the initial success of the war on terrorism. Given the amount of fiscal and monetary stimulus, the rebound in economic growth in the U.S. should prove to be stronger than initially anticipated, paving the way for stronger global growth. Liquidity, already at historically high levels, continues to rise, further improving the outlook for a sustainable economic recovery.

We expect growth to accelerate in most emerging market economies, particularly in Latin America (excluding Argentina) and Asia (excluding Japan), as the demand for imports increases in developed economies and global risk aversion continues to subside. With Federal Funds rate increases imminent and higher Treasury yields expected, emerging market bonds will have difficulty turning in further strong performance. Nonetheless, the rapid global economic recovery and rising liquidity in all market sectors bodes well for the asset class. Within the Fund, we will continue to favor holdings in Russian debt. We also favor oil-related credits such as Ecuador and Venezuela, as oil prices have firmed. We will be somewhat more cautious with Brazil, as elections are due to be held in the fall.

The high yield market continues to build momentum into 2002 as the economy recovers. We believe that high yield will outperform relative to other fixed income sectors. We are currently focused on cable issuers that we expect to outperform in the near-term, as well as the wireless telecommunications sector that we believe is undervalued. With an improving economy, we also favor cyclical industries and will maintain a focus on single B-rated securities, which we expect to outperform.

4 o ACM MANAGED DOLLAR INCOME FUND

LETTER TO SHAREHOLDERS

Thank you for your continued interest and investment in the ACM Managed Dollar Income Fund. We look forward to reporting to you on market activity and the Fund's investment results in the coming periods.

This chart illustrates the total value of an assumed \$10,000 investment in ACM Managed Dollar Income Fund at net asset value (NAV) (from 10/31/93 to 3/31/02) as compared to the performance of an appropriate composite. The composite represents 65% of the J.P. Morgan Emerging Markets Bond Index Plus (JPM EMBI+) and 35% of the Credit Suisse First Boston High Yield (CSFBHY) Index. The composite is from the inception of the JPM EMBI+, which was 12/31/93. For the period 10/31/93 through 3/31/94, the J.P. Morgan Emerging Markets Bond Index was used in place of the JPMEBBI+. All other periods used the composite benchmark. The chart assumes the reinvestment of dividends and capital gains. Past performance is not indicative of future results, and is not representative of future gain or loss in capital value or dividend income.

The JPM EMBI+ is comprised of dollar-denominated restructured sovereign bonds; a

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

large percentage of the index is made up of Brady bonds. The CSFBHY Index is a measure of lower-rated, fixed-income, non-convertible U.S. dollar-denominated securities meeting certain criteria developed by Credit Suisse designed to enable the index to reflect the high yield market. The indices are unmanaged and reflect no fees or expenses. When comparing ACM Managed Dollar Income Fund to the composite shown above, you should note that no charges or expenses are reflected in the performance of the composite. An investor cannot invest directly in a composite, and its results are not indicative of any specific investment, including ACM Managed Dollar Income Fund.

* Closest month-end after Fund's inception date of 10/22/93.

			=====

- (a) Securities, or portions thereof, with an aggregate market value of \$67,019,376 have been segregated to collateralize reverse repurchase agreement.
- (b) Coupon changes periodically based upon a predetermined schedule. Stated interest rate in effect at March 31, 2002.

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

- (c) Securities are exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2002, the market value of these securities aggregated \$48,888,150 or 31.0% of net assets.
- (d) Indicates a security that has a zero coupon that remains in effect until a predetermined date at which time the stated coupon rate becomes effective until final maturity.
- (e) Security is in default and is non-income producing.
- (f) Coupon is paid-in-kind
- (g) Coupon is fixed until March 15, 2003. At that time, the security may then be remarketed at a new fixed rate.
- (h) Illiquid security, valued at fair market value (See Note A.)
- (i) Paid-in-kind preferred, quarterly stock payments.
- (j) Non-income producing security.
- (k) Each warrant entitles the holder to purchase 1.889 shares of common stock at \$.01 per share. The warrants are exercisable until 5/01/10.
- (l) Common stock, par value is \$0.01 per share.

Glossary of Terms:

FLIRB - Front Loaded Interest Reduction Bond.

FRN - Floating Rate Note.

NOTES TO FINANCIAL STATEMENTS

NOTES TO FINANCIAL STATEMENTS
March 31, 2002 (unaudited)

NOTE A

Significant Accounting Policies

ACM Managed Dollar Income Fund, Inc. (the "Fund") was incorporated under the laws of the State of Maryland on August 10, 1993 and is registered under the Investment Company Act of 1940 as a non-diversified, closed-end management investment company. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States which requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities traded on a national securities exchange or on a foreign securities exchange (other than foreign securities exchanges whose operations are similar to those of the United States over-the-counter market) are generally valued at the last reported sale price or, if there was no sale on such day, the last bid price quoted on such day. If no bid prices are quoted, then the security is valued at the mean of the bid and asked prices as obtained on that day from one or more dealers regularly making a market in that security. Securities traded on the over-the-counter market, and securities listed on a foreign securities exchange whose operations are similar to the United States over-the-counter market and securities listed on a national securities exchange whose primary market is believed to be over-the-counter are valued at the mean of the closing bid and asked price provided by two or more dealers regularly making a market in such securities. U.S. government securities and other debt securities which mature in 60 days or less are valued at amortized cost unless this method does not represent fair value. Securities for which market quotations are not readily available are valued at fair value as determined in good faith by, or in accordance with procedures approved by, the Board of Directors. Fixed income securities may be valued on the basis of prices provided by a pricing service when such prices are believed to reflect the fair market

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

value of such securities. Listed put and call options purchased by the Fund are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day.

2. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its investment company taxable income and net realized gains if applicable, to shareholders. Therefore, no provisions for federal income or excise taxes are required.

3. Investment Income and Investment Transactions

Interest income is accrued daily. Dividend income is recorded on the ex-dividend date. Investment transactions are accounted for on the date the

24 o ACM MANAGED DOLLAR INCOME FUND

NOTES TO FINANCIAL STATEMENTS

investments are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund accretes discounts as adjustments to interest income.

4. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with accounting principles generally accepted in the United States. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

5. Repurchase Agreements

The Fund's custodian or designated subcustodian will take control of securities as collateral under repurchase agreements and determine on a daily basis whether the value of such securities are sufficient to cover the value of the repurchase agreements. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of collateral by the Fund may be delayed or limited.

6. Change in Accounting Principle

As required, effective October 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide, Audits of Investment Companies, and began amortizing premium on debt securities for financial statement reporting purposes only. This change has no impact on the net assets of the Fund. Prior to October 1, 2001, the Fund did not amortize premiums on debt securities.

The cumulative effect of this accounting change resulted in a \$161,415 decrease in cost of investments and a corresponding \$161,415 decrease in net unrealized depreciation, based on investments owned by the Fund on October 1, 2001.

The effect of this change for the period ended March 31, 2002, was to decrease

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

net investment income by \$78,036, increase net unrealized depreciation by \$2,664 and decrease net realized loss on investment transactions by \$80,700. The statements of changes in net assets and financial highlights for prior periods have not been restated to reflect the change in accounting principle.

NOTE B

Advisory and Administrative Fees

Under the terms of the Investment Advisory Agreement, the Fund pays Alliance Capital Management, L.P. (the "Adviser") an advisory fee equal to an annualized rate of .75 of 1% of the average adjusted weekly net assets of the Fund during the month.

Under the terms of a Shareholder Inquiry Agency Agreement with Alliance Global Investor Services, Inc. ("AGIS"), an affiliate of the Adviser, the Fund reimburses AGIS for costs relating to servicing phone inquiries for the Fund. The Fund reimbursed AGIS \$2,030 during the six months ended March 31, 2002.

ACM Managed Dollar Income Fund o 25

NOTES TO FINANCIAL STATEMENTS

Under the terms of an Administration Agreement, the Fund pays Princeton Administrators, L.P. (the "Administrator") a monthly fee equal to the annualized rate of .15 of 1% of the Fund's average adjusted weekly net assets of the Fund during the month. The Administrator prepares financial and regulatory reports for the Fund and provides clerical and other services.

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments, options and U.S. government securities) aggregated \$84,224,822 and \$85,285,249, respectively, for the six months ended March 31, 2002. There were no purchases or sales of U.S. government or government agency obligations for the six months ended March 31, 2002.

At March 31, 2002, the cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purposes. Accordingly, gross unrealized appreciation of investments was \$20,507,681 and gross unrealized depreciation of investments was \$21,015,111, resulting in net unrealized depreciation of \$507,430.

At September 30, 2001, the Fund had a capital loss carryforward of \$92,990,518 of which \$57,455,739 expires in the year 2007, \$24,635,181 expires in the year 2008 and \$10,899,598 expires in the year 2009.

Capital losses incurred after October 31 ("post-October" losses) within the taxable year are deemed to arise on the first business day of the Fund's next taxable year. The Fund incurred and will elect to defer net capital losses of \$25,917,547 during fiscal year 2001. To the extent they are so used, future capital gains will not be distributed to shareholders until they exceed available capital loss carryovers.

1. Options Transactions

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign government securities that are traded on U.S. and foreign securities exchanges and over-the-counter markets.

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from writing options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The differ-

26 o ACM MANAGED DOLLAR INCOME FUND

NOTES TO FINANCIAL STATEMENTS

ence between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the security purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security at a price different from the current market value.

There were no transactions in options written for the six months ended March 31, 2002.

2. Interest Rate Swap Agreements

The Fund may enter into interest rate swaps on sovereign debt obligations to protect itself from interest rate fluctuations on the underlying debt instruments and for investment purposes. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of another party to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interest payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

The Fund records a net receivable or payable on a daily basis for the net interest income or expense expected to be received or paid in the interest period. Net interest received or paid on these contracts is recorded as interest income (or as an offset to interest income). Fluctuations in the value of swap contracts are recorded for financial statement purposes as net unrealized appreciation or depreciation on interest rate swap contracts.

At March 31, 2002, the Fund had no outstanding interest rate swap contracts.

NOTE D

Capital Stock

There are 300,000,000 shares of \$.01 par value capital stock authorized. During the six months ended March 31, 2002 and for the year ended September 30, 2001, the Fund issued 126,479 and 186,638 shares, respectively, in connection with the dividend reinvestment plan.

NOTE E

Bank Borrowing

The Fund entered into a Revolving Credit Agreement with Citibank, N.A.

ACM MANAGED DOLLAR INCOME FUND o 27

NOTES TO FINANCIAL STATEMENTS

which was renewed on March 23, 2001. On March 22, 2002 the Fund terminated this agreement. The maximum credit available was \$85,000,000. The average daily amount of the loan outstanding during the period ended March 22, 2002 was approximately \$57,586,705 with a related weighted average annualized interest rate of 3.92%. The Fund was also obligated to pay Citibank, N.A. a facility fee computed at the rate of .125% of 1% per annum on the average daily unused portion of the revolving credit.

NOTE F

Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price.

For the six months ended March 31, 2002, the average amount of reverse repurchase agreements outstanding was \$69,062,500 and the daily weighted average interest rate was 1.76%.

As of March 31, 2002, the Fund had entered into the following reverse repurchase agreements:

Amount	Broker	Interest Rate	Maturity
=====	=====	=====	=====
\$30,773,305	Deutsche Banc	1.85%	12/31/02

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

\$12,736,542	JPMorgan Chase & Co.	1.85%	12/31/02
\$25,586,012	JPMorgan Chase & Co.	1.55%	12/31/02

NOTE G

Concentration of Risk

Investing in securities of foreign companies and foreign governments involves special risks, which include the possibility of future political and economic development, which could adversely affect the value of such securities. Moreover, securities of many foreign companies and foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the United States Government. The Fund invests in the sovereign debt obligations of countries that are considered emerging market countries at the time of purchase. Therefore, the Fund is susceptible to governmental factors and economic and debt restructuring developments adversely affecting the economies of these emerging market countries. In addition, these debt obligations may be less liquid and subject to greater volatility than debt obligations of more developed countries.

ACM MANAGED DOLLAR INCOME FUND o 29

FINANCIAL HIGHLIGHTS

- (a) As required, effective October 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide, Audits of Investment Companies, and began amortizing premium on debt securities for financial reporting purposes only. The effect of this change for the six months ended March 31, 2002, was to decrease net investment income per share by \$0.004, increase net realized and unrealized gain on investment transactions per share by \$0.004 and decrease the ratio of net investment income to average net assets from 8.81% to 8.74%. Per share, ratios and supplemental data for periods prior to October 1, 2001 have not been restated to reflect this change in presentation.
- (b) Based on average shares outstanding.
- (c) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend reinvestment plan. Generally, total investment return based on net asset value will be higher than the total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

Total investment return calculated for a period of less than one year is not annualized.

- (d) Annualized.
- (e) Net interest expense of 1.07%, 1.62%, 1.61%, 1.35%, 1.53%, and 1.35%, respectively, on loan agreements (See Notes E and F).

 GLOSSARY OF INVESTMENT TERMS

GLOSSARY OF INVESTMENT TERMS

benchmark

Edgar Filing: ACM MANAGED DOLLAR INCOME FUND INC - Form N-30D

A standard by which a fund's performance can be measured. A benchmark is usually an unmanaged index, such as the Standard & Poor's 500 Stock Index or the Lehman Brothers Aggregate Bond Index.

bond

Bonds are issued by governments or corporations when they need to raise cash. Bonds are sold, or issued, to investors and have a maturity date, which is the date the issuer is obligated to repay the investor for the principal, or face amount, of the bond. Bonds also pay interest until maturity. Bonds are also called fixed-income securities.

credit rating

Credit ratings are issued by independent organizations, such as the Standard & Poor's Ratings group or Moody's Investors Service. These groups attempt to assess the likelihood that the issuer of the bond will be able to make timely payments of principal and interest on the bond, based on such factors as the issuer's financial condition and any collateral securing these obligations. Ratings typically range from AAA, which is the highest rating, to D, which is the lowest rating.

index

A compilation of securities of similar types of companies that is used to measure the investment performance of securities within that specific market. An index is often used as a benchmark for a mutual fund. An investor cannot invest directly in an index.

liquidity

The ability of an asset to be quickly converted into cash and without penalty.

sector

A group of securities that are similar with respect to maturity, type, rating, industry and/or coupon. Refers to a distinct part of the economy, for example, the technology sector.

yield

The rate of return on an asset, usually referring to dividend or interest payments, expressed as a percentage of current market price.

SUMMARY OF GENERAL INFORMATION

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The daily net asset value of the Fund's shares is available from the Fund's Transfer Agent by calling (800) 426-5523. The Fund also distributes its daily net asset value to various financial publications or independent organizations such as Lipper Analytical Services, Inc., Morningstar, Inc. and Bloomberg. Daily market prices for the Fund's shares are published in the New York Stock Exchange Composite Transaction section of newspapers each day. The Fund's NYSE trading symbol is "ADF." Weekly comparative net asset value (NAV) and market price information about the Fund is published each Monday in The Wall Street Journal, each Sunday in The New York Times and each Saturday in Barron's and other newspapers in a table called "Closed-End Funds."

Dividend Reinvestment Plan

Pursuant to the Fund's Dividend Reinvestment Plan shareholders whose shares are registered in their own names may elect to have all distributions reinvested automatically in additional shares of the Fund by State Street Bank & Trust Company, as agent under the Plan. Shareholders whose shares are held in the name of a broker or nominee should contact the broker or nominee for details. All distributions to investors who elect not to participate in the Plan will be paid by check mailed directly to the record holder by or under the direction of State Street Bank & Trust Company. For questions concerning Shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call State Street Bank and Trust Company at (800) 219-4218.
