Overview

The securities are intended to provide exposure to a basket of ten domestic equities. The securities may be appropriate for investors who are moderately bullish on the Underlying Shares, are seeking coupons based on the average of the Share Performance of the Underlying Shares, and are willing to accept the credit risk of RBS and RBSG.

Return Profile

You will receive annual cash coupons based on the arithmetic average of the Share Performance of the Underlying Shares within the Basket.

Coupons will not be less than 1.00% per annum and will not exceed the Auto-Cap Rate.

In addition to the final Coupon Payment, the Payment at Maturity will be equal to \$1,000 per security

Selected Benefits

- § Exposure to U.S. equity markets through a basket of ten domestic equities.
- § The securities will pay a coupon equal to at least 1.00% per annum.
- § The securities offer full return of principal at maturity, subject to the creditworthiness of RBS and RBSG.
- § Minimum denomination of \$1,000 and multiples thereof.

Selected Risks

An investment in the securities involves significant risks, including those listed below. The risks identified below are not exhaustive. You should carefully review the more detailed explanation of risks relating to the securities in the “Risk Factors” sections beginning on page PS-7 of the Preliminary Pricing Supplement No. 134 and page S-13 of the Product Prospectus Supplement No. VIN-1.

- § The Coupon Rate may not be more than 1.00% per annum and will not exceed the Auto-Cap Rate.
- § All payments on the securities will be subject to the credit risk of RBS and RBSG.
- § Because the Auto-Cap Rate has a lower absolute value than the Floor Rate, a negative performance of an Underlying Share may have a greater influence on the average Share Performance and, consequently, the Coupon Rate than any positive performance of an Underlying Share.
- § The Basket contains a limited number of specific Underlying Shares and is not intended to provide diversification in or broad exposure to specific sectors or industries or to the equity markets in general. You should be familiar with and make your own investment decision with respect to an investment linked to such Underlying Shares.
- § The Share Performances of the Underlying Shares may offset each other.
- § To the extent the Underlying Shares are concentrated in the same industry or sector, prices of such Underlying Shares may correlate with each other.
- § Your return on an investment in the securities may be less than an investment directly in the Underlying Shares.
- § In addition to the final Coupon Payment, the Payment at Maturity will never exceed the Original Offering Price, regardless of how well each Underlying Share performs.
- § The securities are not FDIC-insured.

- § There may be little or no secondary market for the securities.
- § The value of the securities prior to maturity will be influenced by many unpredictable factors, and may be less than the Original Offering Price.
- § The value of your securities on the pricing date is less than the Original Offering Price due to the underwriting discount and our cost of hedging, both of which can be expected to be reflected in secondary market prices.
- § Hedging and trading activities by us or our affiliates may adversely affect your return on the securities and the value of the securities.
- § There may be potential conflicts of interest between security holders and the calculation agent or other of our affiliates.
- § RBS Securities Inc. and its affiliates may publish reports, express opinions or provide recommendations that are inconsistent with investing in or holding the securities, and which could affect the value of the securities.
- § There is uncertainty regarding the U.S. federal income tax consequences of an investment in the securities.
- § We may engage in business with or involving one or more of the issuers of the Underlying Shares (each, an “Underlying Company”) without regard to your interests.
- § We do not control any Underlying Company and we are not responsible for any of their disclosure.
- § There may be limited anti-dilution protection for securities linked to an Underlying Share.
- § In some circumstances (e.g., mergers, acquisitions, etc.), the payment you receive at maturity on the securities may be based on the common stock of another company and not the common stock of the Underlying Company.
