¶We are offering five separate series of Exchange Traded Notes (the “ETNs”), each of which tracks a total return version of a specific Rogers International Commodity Index® (“RICI”) EnhancedSM. Investors can subscribe to any or all of the five offerings. The ETNs are listed on NYSE Arca under the ticker symbols listed above.

¶The RICI EnhancedSM Commodity Index is a composite, USD-based index that tracks the value of a weighted basket of 36 commodities (each, a “Component Commodity”). Each of the RICI EnhancedSM Agriculture, the RICI EnhancedSM Energy, the RICI EnhancedSM Precious Metals and the RICI EnhancedSM Industrial Metals represents a sector of the RICI EnhancedSM Commodity Index and tracks the value of a weighted basket of between 4 and 20 Component Commodities. The ETNs are designed for investors seeking exposure to one of these five RICI EnhancedSM Indices.

- The ETNs each have an annual investor fee of 0.95%.

¶We will not pay any amounts on the ETNs until maturity, or until they are redeemed or repurchased, and investors should be willing to lose up to 100% of their investment if the underlying index declines or does not increase in an amount sufficient to offset the investor fee.

¶The ETNs are unsecured and unsubordinated obligations of The Royal Bank of Scotland plc (“RBS plc”), maturing October 29, 2042, and are fully and unconditionally guaranteed by The Royal Bank of Scotland Group plc (“RBSG”). Any payment on the ETNs is subject to the ability of RBS plc, as issuer of the ETNs, and RBSG, as guarantor of the issuer’s obligations under the ETNs, to pay their respective obligations as they become due.

¶The denomination and stated face amount of each ETN is \$25.00. Any ETNs issued in the future may be issued at a price that is higher or lower than the stated face amount, based on the indicative value of the ETNs at that time.

-

The initial offering of ETNs priced on October 25, 2012 (the “inception date”) and settled on November 14, 2012 (the “initial settlement date”). Delivery of the ETNs in book-entry form only will be made through The Depository Trust Company (“DTC”).

† This amended and restated pricing supplement amends, restates and supersedes the pricing supplements dated October 25, 2012 and July 2, 2013 in their entirety. We refer to this amended and restated pricing supplement as the “pricing supplement.”

The ETNs involve risks not associated with an investment in conventional debt securities. See “Risk Factors” beginning on PS-29 of this pricing supplement.

The ETNs are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation, the Deposit Insurance Fund or any other government agency.

The Securities and Exchange Commission and state securities regulators have not approved or disapproved the ETNs, or determined if this pricing supplement or the prospectus are truthful or complete. Any representation to the contrary is a criminal offense.

RBS Securities Inc.

* The agent for this offering, RBS Securities Inc. (“RBSSI”), is our affiliate. The ETNs and additional ETNs may be offered and sold from time to time by or through RBSSI and one or more dealers at a price that is higher or lower than the \$25.00 stated face amount, based on the indicative value of the ETNs at that time. We will receive proceeds equal to 100% of the offering price of the ETNs issued and sold after the inception date. We have entered into an agreement with Pacer Financial, Inc. (“Pacer”) under which Pacer will receive a portion of the investor fee in consideration for its role in marketing the ETNs. The actual amount received by Pacer in a given year will depend on, among other things, the daily redemption value of ETNs then outstanding and the number and value of any other then-outstanding securities issued by RBS plc or its affiliates and marketed by Pacer.

In exchange for providing certain services relating to the distribution of the ETNs, RBSSI may receive all or a portion of the investor fee. See “Plan of Distribution (Conflicts of Interest)” in this pricing supplement for more information.

April 1, 2015

Key Terms

Issuer:	The Royal Bank of Scotland plc (“RBS plc”)
Guarantor:	The Royal Bank of Scotland Group plc (“RBSG”)
Inception Date:	October 25, 2012
Initial Settlement Date:	October 30, 2012
Maturity Date:	October 29, 2042
Final Valuation Date:	October 24, 2042 (or, if such day is not a valuation date, the next following valuation date but no later than October 31, 2042).
The RICI EnhancedSM Commodity and RICI EnhancedSM Sector Indices:	The return on your ETNs will be based on the performance of the total return version of the corresponding underlying index. Each ETN will be based on the RICI EnhancedSM Commodity Index (the “RICI EnhancedSM Commodity Index”) or on the RICI EnhancedSM Agriculture, the RICI EnhancedSM Energy, the RICI EnhancedSM Precious Metals and the RICI EnhancedSM Industrial Metals (each, a “Sector Index”). All of the RICI EnhancedSM Indices were created by The Royal Bank of Scotland N.V., London Branch (“RBS N.V.”) and James B. Rogers, Jr. (“Jim Rogers”) in October 2007 as an enhancement to the Rogers International Commodity Index (“RICI”) and its sub-indices that had been in operation since the late 1990s. The RICI EnhancedSM Commodity and Sector Indices are overseen by a committee (the “Index Committee”), which at present consists of two members: Jim Rogers, as the nominated representative of Beeland Interests, Inc. (“Beeland”), and the nominated representative of RBS plc. Jim Rogers and Beeland are not affiliated with RBS plc or with RBSG. For more information, see “The RICI EnhancedSM Indices” in this pricing supplement.
Payment at Maturity:	If your ETNs have not previously been repurchased or redeemed by RBS plc, at maturity you will receive a cash payment equal to the daily redemption value of your ETNs with respect to the final valuation date, subject to the provisions regarding resolution dates described below.
Daily Redemption Value:	We refer to the amount per ETN you will be entitled to receive upon any early repurchase or redemption as the daily redemption value. The daily redemption value reflects the performance of the underlying RICI EnhancedSM Commodity or Sector Index from the immediately preceding valuation date to the close of trading on the applicable valuation date, reduced by the investor fee on such trading day. The daily redemption value as of the inception date was equal to the stated face amount of \$25.00 per ETN. For any valuation date thereafter, the daily redemption value per ETN will be equal to (a) the daily redemption value with respect to the immediately preceding valuation date, multiplied by (b) the index factor with respect to such valuation date, multiplied by (c) the fee factor with respect to such valuation date. RBS Securities Inc. (the “calculation agent”) will determine the daily redemption value with respect to each valuation date. The daily redemption values of the ETNs will be published by NYSE Arca under the ticker symbols listed on the cover page of this pricing supplement. Daily redemption values are subject to subsequent adjustment when the conditions for a resolution date apply.
Index Factor:	The index factor for any ETNs with respect to any valuation date, including the final valuation date, will be equal to the underlying RICI EnhancedSM Commodity or Sector Index closing level for that valuation date, divided by the closing level of that index for the immediately preceding valuation date. For purposes of calculating the intraday indicative value, the index factor will be determined as described above using the intraday level of the underlying RICI EnhancedSM Commodity or Sector Index.
Fee Factor/Investor Fee:	The fee factor for any ETNs on any valuation date, including the final valuation date, will be equal to one minus the investor fee; the investor fee is the product of (a) the annual investor fee and (b) the day-count fraction.

Annual Investor Fee:	<p>The annual investor fee for each of the ETNs will be equal to 0.95%.</p> <p>The daily redemption value payable at maturity or upon early repurchase or redemption of your ETNs will be reduced by the aggregate investor fee applicable to your ETNs. As a result, the level of the underlying RICI EnhancedSM Commodity or Sector Index must increase by an amount sufficient to offset such reduction in order for you to receive at least your initial investment at maturity or upon early repurchase or redemption. If the level of that index decreases or does not increase sufficiently, you will receive less, and possibly significantly less, than your initial investment at maturity or upon early repurchase or redemption.</p>
Intraday “Indicative Value”:	<p>The intraday “indicative value” is meant to approximate the economic value of the ETNs at any given time during a trading day. It is calculated using the same formula as the daily redemption value, except that instead of using the closing levels of the underlying RICI EnhancedSM Commodity or Sector Index, the calculation is based on the intraday level of such index at the particular time. The intraday indicative value equals (a) the daily redemption value for that ETN for the immediately preceding valuation date, multiplied by (b) the index factor for that ETN on that trading Day, multiplied by (c) the fee factor for that trading Day. NYSE Arca will publish the intraday “indicative value” of the ETNs every 15 seconds under their respective ticker symbols listed on the cover page of this pricing supplement. The intraday indicative value is a calculated value and is not the same as the trading price of the ETNs and is not a price at which you can buy or sell the ETNs in the secondary market. The intraday indicative value does not take into account the factors that influence the trading price of the ETNs, such as imbalances of supply and demand, lack of liquidity and credit considerations. The actual trading price of the ETNs in the secondary market may vary significantly from their intraday indicative value.</p> <p>Investors can compare the trading price of the ETNs against the intraday indicative value to determine whether the ETNs are trading in the secondary market at a premium or a discount to the economic value of the ETNs at any given time. Investors are cautioned that paying a premium purchase price over the intraday indicative value at any time could lead to the loss of any premium in the event the investor sells the ETNs when the premium is no longer present in the marketplace or when the ETNs are repurchased by us. It is also possible that the ETNs will trade in the secondary market at a discount below the intraday indicative value and that investors would receive less than the intraday indicative value if they had to sell their ETNs in the market at such time.</p>
Day-Count Fraction:	<p>With respect to each valuation date, the day-count fraction is equal to the number of days from, but excluding, the immediately preceding valuation date to, and including, the applicable valuation date, divided by 365.</p>
Index Closing Levels:	<p>The closing level of the RICI EnhancedSM Commodity Index and each Sector Index on any Index Publication Day will be the official closing level of that index for that Index Publication Day reported on the Bloomberg page specified on the cover page of this pricing supplement or any successor page on Bloomberg, or any successor service, as applicable, or if the official closing level is not reported on that page, the official closing level for that Index Publication Day as published or otherwise made publicly available by the Index Sponsor or the Index Calculation Agent, in each case as determined by the calculation agent. In certain circumstances, the closing level of a RICI EnhancedSM Commodity or Sector Index will be based on the alternative calculation of that index as described under “Specific Terms of the ETNs—Discontinuation or Modification of the RICI EnhancedSM Commodity and Sector Indices.”</p>
Index Publication Day:	<p>A day on which the Relevant Commodities Exchanges that are located within the U.S. are scheduled and open for trading for at least three hours.</p>
Repurchase of the ETNs at Your Option:	<p>You have the right to offer your ETNs of any series for repurchase on any trading day to, and including, October 21, 2042. The applicable valuation date for any repurchase will be the first valuation date, following the trading day on which your offer for repurchase is deemed</p>

made. On the repurchase date, which will be three business days after the valuation date, you will receive a cash payment equal to the daily redemption value for that valuation date, subject to the provisions regarding resolution dates described below.

Because the daily redemption value you will receive for each ETN will not be calculated and published until the close of trading on the trading day immediately following the date you offer your ETNs for repurchase, you will not know the applicable daily redemption value at the time you exercise your repurchase right and you will bear the risk that your ETNs will decline in value between the time of your exercise and the time at which the applicable daily redemption value is determined.

Redemption of the
ETNs at Our Option:

We have the right to redeem, in our sole discretion, any series of ETNs in whole, but not in part, by giving notice specifying the valuation date and redemption date for such redemption. The applicable valuation date may be any valuation date, from the inception date to and including October 22, 2042. On the redemption date, which will be three business days after the valuation date, you will receive a cash payment equal to the daily redemption value for that valuation date, subject to the provisions regarding resolution dates described below. The last day on which we can deliver a redemption notice is October 20, 2042.

Pursuant to the implementation of the RBS Retail Investor Products Exit Plan, the likelihood that we will redeem the ETNs prior to the maturity has increased. See “Recent Developments” and “Risk Factors – We may redeem your ETNs at our option” below for more information.

(key terms continued on next page)

(key terms continued from previous page)

Acceleration Upon Zero Daily Redemption Value:	If the daily redemption value per ETN on any valuation date equals zero, the ETNs will be automatically accelerated on that day for an amount equal to the zero daily redemption value and will cease to be outstanding thereafter. In that event, you will not receive any payment in respect of your investment and you will lose your entire investment in the ETNs.
Repurchase Mechanics:	To offer your ETNs for repurchase, you and your broker must deliver an irrevocable offer for repurchase and confirmation of repurchase to RBS plc and follow the procedures set forth under “Specific Terms of the ETNs—Repurchase at Your Option.” If your offer for repurchase is received by e-mail after 4:00 p.m. or if your signed confirmation of repurchase is received by fax after 5:00 p.m., New York City time, on a trading day, you will be deemed to have made your offer for repurchase on the following trading day. If you otherwise fail to comply with these procedures, your offer will be deemed ineffective and RBS plc will not be obligated to repurchase your ETNs. Unless the scheduled repurchase date is postponed as described herein, the final day on which RBS plc will repurchase your ETNs will be October 27, 2042. You must offer your ETNs for repurchase no later than October 21, 2042 in order to have your ETNs repurchased on October 27, 2042.
Resolution Date:	If on any valuation date, any Relevant Commodities Exchange is not open for trading for at least three hours, or if a Market Disruption Event exists with respect to such valuation date, the daily redemption value for such valuation date will be adjusted, for purposes of determining the amount payable in respect of a related repurchase or redemption or payment at maturity, so that it will reflect future closing prices for any futures contracts underlying the applicable RICI EnhancedSM Index that were unobtainable on that valuation date. We refer to the date on which all such prices are obtained, subject to a five-business-day limit, as the “resolution date” for that valuation date. The corresponding repurchase date, redemption date or maturity date, as applicable, will be postponed to the third business day following the resolution date.
Major Commodities Exchange:	Any exchange that the calculation agent determines, from time to time in its sole discretion, is an exchange on which trading of futures contracts referencing one or more Component Commodities that comprise a substantial portion of the RICI EnhancedSM Commodity Index or any Sector Index principally occurs. The Major Commodities Exchanges currently include each of the Relevant Commodities Exchanges that is located in the United States, as well as the London Metal Exchange Limited, ICE Futures Europe, Inc. and NYSE Liffe.
Relevant Commodities Exchange:	Any exchange on which trading of a commodity futures contract tracked by the RICI EnhancedSM Commodity Index principally occurs.
Exchange Holidays:	See “Specific Terms of the ETNs—Daily Redemption Value,” for a list of scheduled exchange holidays in 2012. An updated schedule will be posted from time to time at www.rbs.com/etnus .
Listing / Secondary Market:	The ETNs are listed on NYSE Arca, Inc. (“NYSE Arca”) under their respective ticker symbols listed on the cover page of this pricing supplement. If an active secondary market in the ETNs develops, we expect that investors will purchase and sell the ETNs primarily in this secondary market. We have no obligation to maintain any listing on NYSE Arca or any other exchange.
Valuation Date:	Each trading day from, and including, the inception date to, and including, the final valuation date on which all of the Major Commodities Exchanges are scheduled to be open for trading for at least three hours.
Trading Day:	A trading day is a day on which trading is generally conducted on NYSE Arca (or any successor exchange on which the ETNs are then listed).
Business Day:	

A business day is any day that is not a Saturday or Sunday or a day on which banking institutions in The City of New York are authorized or required by law, executive order or governmental decree to be closed.

Index Sponsor: Beeland Interests, Inc. (“Beeland”)

Index Calculation: RBS plc

Agent:

Calculation Agent: RBS Securities Inc.

Trustee: Wilmington Trust Company

Securities: Citibank, N.A.

Administrator:

CUSIP/ISIN: Please see table on cover page of this pricing supplement.

Recent Developments: On June 13, 2013, we announced that we would be exiting several business lines, including the structured retail investor products business that is responsible for issuing and maintaining the ETNs. We have moved the business responsible for the ETNs into a runoff organization which is executing a process of restructuring, asset sales and / or business sales (the “RBS Retail Investor Products Exit Plan”). Under the RBS Retail Investor Products Exit Plan, we currently expect that we will issue a call notice in the future such that the ETNs will be redeemed by us on or about June 30, 2015. In the interim, we plan to continue to maintain the ETNs, including issuing new ETNs, but our plans could change. We cannot give you any assurances as to any minimum period of time that you may hold the ETNs before we redeem them at our option, and we have no obligation to take your interests into account when deciding whether to maintain or redeem the ETNs.

ABOUT THIS PRICING SUPPLEMENT

As used in this pricing supplement, “RBS plc,” “we,” “us,” “our” and the “Bank” refer to The Royal Bank of Scotland plc, “RBS” refers to The Royal Bank of Scotland Group plc, “Group” means The Royal Bank of Scotland Group plc together with its subsidiaries consolidated in accordance with International Financial Reporting Standards, “RBSSI” refers to RBS Securities Inc., and references to “dollars” and “\$” are to United States dollars.

The ETNs are our unsecured and unsubordinated obligations issued as part of our RBS NotesSM program and guaranteed by RBSG. RBS NotesSM is a service mark of The Royal Bank of Scotland N.V., one of our affiliates.

This pricing supplement amends, restates and supersedes the pricing supplements dated October 25, 2012 and July 2, 2013 in their entirety. We refer to this amended and restated pricing supplement as the “pricing supplement.” This pricing supplement sets forth certain terms of the ETNs and supplements the prospectus dated March 31, 2015 relating to our securities of which the ETNs are part. This pricing supplement is a “prospectus supplement” referred to in the prospectus. You may access the prospectus on the Securities and Exchange Commission (“SEC”) website at www.sec.gov as follows (or if such address has changed, by reviewing our filings for the relevant date on the SEC website):

- Prospectus dated March 31, 2015:

http://www.sec.gov/Archives/edgar/data/729153/000095010315002582/dp54922_424b2-prosb.htm

Our Central Index Key, or CIK, on the SEC website is 729153.

This pricing supplement, together with the prospectus described above, contains the terms of the ETNs and supersedes all other prior or contemporaneous oral statements as well as any other written materials including preliminary or indicative pricing terms, fact sheets, correspondence, trade ideas, structures for implementation, sample structures, brochures or other educational materials of ours. You should carefully consider, among other things, the matters set forth in “Risk Factors” in this pricing supplement, as the ETNs involve risks not associated with conventional debt securities. You should consult your investment, legal, tax, accounting and other advisers before deciding to invest in the ETNs.

It is important for you to read and consider all information contained in this pricing supplement and the accompanying prospectus in making your investment decision. You should also read and consider the information contained in the documents identified in “Where You Can Find More Information” in the accompanying prospectus.

We have not authorized anyone to provide information other than that which is contained in this pricing supplement and the accompanying prospectus with respect to the ETNs. We take no responsibility for, and can provide no assurance as to the reliability of, any information that others may give you. This document may only be used where it is legal to sell these ETNs. We are offering to sell these ETNs and seeking offers to buy these ETNs only in jurisdictions where offers and sales are permitted.

The information set forth in this pricing supplement is directed to prospective purchasers who are United States residents. We disclaim any responsibility to advise prospective purchasers who are residents of countries other than the United States of any matters arising under foreign law that may affect the purchase of or holding of, or receipt of payments on, the ETNs. These persons should consult their own legal and financial advisers concerning these matters.

PS-2

WHERE YOU CAN FIND ADDITIONAL INFORMATION

RBSG is subject to the informational requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and in accordance therewith, RBSG files reports and other information with the SEC. You may read and copy these documents at the SEC’s Public Reference Room, 100 F Street, N.E., Washington, D.C. 20549. You can call the SEC at 1-800-SEC-0330 for further information about the Public Reference Room. The SEC’s website, at <http://www.sec.gov>, contains reports and other information in electronic form that RBSG has filed. You may also request a copy of any filings referred to below (other than exhibits not specifically incorporated by reference) at no cost, by contacting us at The Royal Bank of Scotland plc, RBS Gogarburn, P.O. Box 1000, Edinburgh EH12 1HQ, Scotland, telephone +44 131 626 0000.

The SEC allows us to incorporate by reference much of the information RBSG files with it. This means:

- incorporated documents are considered part of this pricing supplement;
- we can disclose important information to you by referring you to those incorporated documents; and
- information that RBSG files with the SEC will automatically update and modify or supersede some of the information included or incorporated by reference into this pricing supplement

This means that you must look at all of the SEC filings that we incorporate by reference to determine if any of the statements in this pricing supplement or in any document previously incorporated by reference have been modified or superseded. The accompanying prospectus lists documents that are incorporated by reference into this pricing supplement. Reports on Form 6-K we may furnish to the SEC after the date of this pricing supplement (or portions thereof) are incorporated by reference in this pricing supplement only to the extent that the report expressly states that it (or such portions) is incorporated by reference into the registration statement of which this pricing supplement is a part.

SUMMARY

The following summary answers some questions that you might have regarding the ETNs in general terms only. It does not contain all the information that may be important to you. You should read the summary together with the more detailed information that is contained in the rest of this pricing supplement and in the accompanying prospectus. References to the “prospectus” mean the accompanying prospectus dated March 31, 2015. You should carefully consider, among other things, the matters set forth in “Risk Factors” in this pricing supplement. In addition, we urge you to consult with your investment, legal, accounting, tax and other advisers with respect to any investment in the ETNs.

We may, without providing you notice or obtaining your consent, create and issue ETNs in addition to those offered by this pricing supplement having the same terms and conditions as the ETNs. We may consolidate the additional ETNs to form a single class with the outstanding ETNs. However, we are under no obligation to issue or sell additional ETNs at any time, and if we do sell additional ETNs, we may limit or restrict such sales, and we may stop selling additional ETNs at any time. If we stop selling additional ETNs, the price and liquidity of the ETNs in the secondary market could be materially and adversely affected. Unless we indicate otherwise, if we suspend selling additional ETNs, we reserve the right to resume selling additional ETNs at any time, which might result in the reduction or elimination of any premium in the trading price. See “Risk Factors—We are under no obligation to issue or sell additional ETNs at any time, and if we do sell additional ETNs, we may limit or restrict such sales, and we may stop selling additional ETNs at any time.”

Additionally, the number of ETNs outstanding could be reduced at any time due to repurchases of the ETNs by us as described in this pricing supplement. A suspension of additional issuances of the ETNs could result in a significant reduction in the number of outstanding ETNs if investors subsequently exercise their right to have the ETNs repurchased by us. Accordingly, the number of outstanding ETNs could vary substantially over the term of the ETNs and adversely affect the liquidity of the ETNs.

What are the ETNs and how do they work?

The ETNs are unsecured and unsubordinated obligations of The Royal Bank of Scotland plc (“RBS plc”), and are fully and unconditionally guaranteed by The Royal Bank of Scotland Group plc (“RBSG”). The return on the ETNs is linked to the performance of the underlying RICI EnhancedSM Commodity or Sector Index.

We will not pay you interest during the term of the ETNs. The ETNs do not have a minimum redemption or repurchase value and are fully exposed to any decline in the underlying RICI EnhancedSM Commodity or Sector Index. Depreciation of the underlying RICI EnhancedSM Commodity or Sector Index will reduce your payment at maturity or upon early repurchase or redemption of your ETNs, and you could lose your entire investment.

In addition, the daily redemption value, which is payable at maturity or upon early repurchase or redemption of your ETNs, will be reduced by the aggregate investor fee applicable to your ETNs. As a result, the level of the underlying RICI EnhancedSM Commodity or Sector Index must increase by an amount sufficient to offset such reduction in order for you to receive at least your initial investment at maturity or upon early repurchase or redemption. If the level of that index decreases or does not increase sufficiently, you will receive less, and possibly significantly less, than the amount of your initial investment at maturity or upon early repurchase or redemption.

For a description of how the payment at maturity and upon early repurchase or redemption, respectively, is calculated, please refer to “Specific Terms of the ETNs” in this pricing supplement.

PS-4

The denomination and stated face amount of each ETN is \$25.00. Any ETNs issued in the future may be issued at a price higher or lower than the stated face amount, based on the indicative value of the ETNs at that time (which is determined in the manner described in “Valuation of the ETNs” below). You will not have the right to receive physical certificates evidencing your ownership, except under limited circumstances. Instead, we will issue the ETNs in the form of a global certificate, which will be held by The Depository Trust Company (“DTC”) or its nominee. Direct and indirect participants in DTC will record beneficial ownership of the ETNs by individual investors. Accountholders in the Euroclear or Clearstream Banking clearance systems may hold beneficial interests in the ETNs through the accounts those systems maintain with DTC. You should refer to the section “Specific Terms of the ETNs—Forms of the ETNs” below and the sections “Description of Certain Provisions Relating to Debt Securities and Contingent Convertible Securities—Form of Debt Securities and Contingent Convertible Securities; Book-Entry System” in the accompanying prospectus.

In addition, unlike ordinary debt securities, the ETNs are not principal protected and do not pay interest. Any payment on the ETNs is subject to the creditworthiness (i.e., the ability to pay) of RBS plc, as the issuer of the ETNs, and RBSG, as the guarantor of the issuer’s obligations under the ETNs.

What are the RICI EnhancedSM Commodity and Sector Indices and who calculates the levels of those Indices?

The Rogers International Commodity Index[®] EnhancedSM (the “RICI EnhancedSM Commodity Index”) is a composite, U.S. dollar-based index that is designed to track the value of a weighted basket of 36 commodities consumed in the global economy, ranging from agricultural products to energy products and metals (each, a “Component Commodity”). The value of this basket is calculated by reference to 36 individual RICI EnhancedSM indices, each tracking the value of one or more futures contracts on a single Component Commodity (each such index, as may be included in the RICI EnhancedSM Commodity or any Sector Index from time to time, a “Single Commodity Index”).

The weights of the Component Commodities in the RICI EnhancedSM Commodity Index are designed to reflect the expected economic global demand for, as well as the liquidity of the relevant futures contracts referencing, each Component Commodity. The level of the RICI EnhancedSM Commodity is calculated as a weighted sum of the levels of the Single Commodity Indices.

We refer to each of the RICI EnhancedSM Agriculture, the RICI EnhancedSM Energy, the RICI EnhancedSM Industrial Metals and the RICI EnhancedSM Precious Metals as a “Sector Index.” We refer to the RICI EnhancedSM Commodity Index, each of the Sector Indices and each of the Single Commodity Indices as a “RICI EnhancedSM Index.” Each Sector Index is designed to track the value of a weighted basket consisting of between 4 and 20 Component Commodities and is intended to serve as a measure of the prices of those Component Commodities in the world economy. Each of the Sector Indices, like the RICI EnhancedSM Commodity Index, is calculated as a weighted sum of the levels of the Single Commodity Indices comprising that Sector Index.

See the below chart for a list of the Component Commodities, the Relevant Commodities Exchanges they are traded on, and their Target Weights in the RICI EnhancedSM Commodity and Sector Indices.

RICI EnhancedSM Indices							
Sector Index (Target Weight in the RICI EnhancedSM Commodity Index)	Component Commodity (each of which is tracked by a Single Commodity Index)	Asset Class±	Relevant Commodities Exchange*	Currency	Target Weight** In the RICI EnhancedSM Commodity Index	Target Weight*** In Sector Index

** Actual weights are reset to Target Weights every April 5 and October 5. Single Commodity Indices in the Sector Indices are assigned Target Weights proportional to their Target Weights in the RIC I EnhancedSM Commodity Index.

The RICI EnhancedSM Indices were created by The Royal Bank of Scotland N.V., London Branch (“RBS N.V.”) and Jim Rogers in October 2007 as an enhancement to the Rogers International Commodity Index® (“RICI”) and its sub-indices that had been in operation since the late 1990s. An external agent has been engaged to maintain the compositions of the RICI EnhancedSM Indices. As explained below under “Rolling Methodology of the RICI EnhancedSM Indices,” the RICI EnhancedSM Indices employ a proprietary methodology designed to reduce the amount of notional roll premium reflected in the index levels. The methodology for the selection and rolling of the futures contracts underlying each Single Commodity Index is based on a formula that was designed taking into account liquidity, seasonality, cyclicalities and term structures of futures contracts for that Component Commodity. As a result, the RICI EnhancedSM Indices provide exposure to futures contracts with varying maturities, as opposed to the RICI and other traditional commodity indices, which provide exposure to futures contracts with the shortest time remaining to expiration.

All of the RICI EnhancedSM Indices are overseen by a committee (the “Index Committee”), which at present consists of two members: Jim Rogers, as the nominated representative of Beeland, and the nominated representative of RBS plc. Jim Rogers and Beeland are not affiliated with RBS plc or with RBSG. The RICI EnhancedSM Commodity and Sector Indices are sponsored by Beeland as Index Sponsor.

The levels of the RICI EnhancedSM Indices are calculated by RBS plc (the “Index Calculation Agent”). The excess return version of the RICI EnhancedSM Commodity Index and each Sector Index has been calculated on a daily basis since October 31, 2007, and the total return version has been calculated on a daily basis since October 2008, in each case using a base date of July 31, 1998 and a base level of 1,000 on that base date.

We and certain of our affiliates have contracted with NYSE Group, Inc. to provide for the calculation of the RICI EnhancedSM Commodity and Sector Indices during U.S. trading hours based upon the index compositions provided to them by us or our agent. NYSE Arca, Inc., an affiliate of NYSE Group, Inc., will be performing the calculation services.

Where can I find the levels of the RICI EnhancedSM Commodity and Sector Indices?

The levels of the RICI EnhancedSM Commodity and Sector Indices are reported on Bloomberg under their respective ticker symbols listed on the cover page of this pricing supplement.

For more information, please refer to “The RICI EnhancedSM Indices” in this pricing supplement.

Will I receive interest on my ETNs?

No. We will not make any periodic payments of interest or any other payments on the ETNs during the term of the ETNs. Unless you elect to have your ETNs repurchased by us or we elect to redeem your ETNs, you will not receive any payments on the ETNs prior to maturity of the ETNs.

What will I receive at maturity of the ETNs and how is that amount calculated?

Unless your ETNs have been previously repurchased or redeemed by us, the ETNs will mature on October 29, 2042, subject to postponement if such day is not a business day and subject to the provisions regarding resolution dates described below. However, if the daily redemption value per ETN on any valuation date equals zero, the ETNs will be automatically accelerated on that day for an amount equal to the zero daily redemption value and will cease to

PS-7

be outstanding thereafter. In that event, you will not receive any payment in respect of your investment and you will lose your entire investment in the ETNs. Further details on the conditions and the procedures applicable to any such repurchase or redemption are set forth in this pricing supplement.

If your ETNs have not been previously repurchased or redeemed by us, at maturity you will receive a cash payment in an amount equal to the daily redemption value of your ETNs with respect to the final valuation date stated on the cover of this pricing supplement, subject to the provisions regarding resolution dates described below. RBSSI, acting as calculation agent, will determine such daily redemption value in the manner described under “Specific Terms of the ETNs—Daily Redemption Value” in this pricing supplement.

If, on the final valuation date, any Relevant Commodities Exchange is not open for trading for at least three hours, or if a Market Disruption Event exists with respect to the final valuation date, the daily redemption value for the final valuation date will be adjusted, for purposes of determining the amount payable on the maturity date, so that it will reflect future closing prices for any futures contracts underlying the applicable RICI EnhancedSM Index that were unobtainable on the final valuation date, as described under “Specific Terms of the ETNs—Daily Redemption Value” in this pricing supplement. We refer to the date on which all such prices are obtained as the “resolution date” for that valuation date. In such case, the final payment date will be postponed to the third business day following the resolution date.

If the maturity date stated on the cover of this pricing supplement is not a business day, the maturity date will be postponed to the next following business day. In the event that payment at maturity is deferred because a resolution date applies or the maturity date is not a business day, no interest or other amount will accrue or be payable with respect to that deferred payment. For more information on the postponement of the calculation of the payment you will be entitled to receive at maturity, see “Specific Terms of the ETNs – Daily Redemption Value”.

Any payment you will be entitled to receive on the ETNs is subject to the ability of RBS plc, as the issuer of the ETNs, and RBSG, as the guarantor of the issuer’s obligations under the ETNs, to pay their respective obligations as they become due.

Will I get all of my investment back at maturity?

The ETNs are not principal protected. If your ETNs have not been previously repurchased or redeemed by us, at maturity you will receive a cash payment equal to the daily redemption value of your ETNs, determined as described in this pricing supplement. Such daily redemption value may be more or less than the stated face amount of your ETNs or the price that you paid for them. You may not get the face amount at maturity, and you may lose some or all of your investment.

Any payment you will be entitled to receive on the ETNs at maturity is subject to the ability of RBS plc, as the issuer of the ETNs, and RBSG, as the guarantor of the issuer’s obligations under the ETNs, to pay their respective obligations as they become due.

When can my ETNs be repurchased and how is the amount payable upon repurchase calculated?

Subject to certain restrictions, on any trading day from, and including, the initial issuance of the ETNs on the initial settlement date to, and including, October 21, 2042, you may offer your ETNs of any series to us for repurchase. If you choose to offer your ETNs for repurchase, you must offer at least the applicable minimum repurchase amount in accordance with the procedures described under “—How do I offer my ETNs for repurchase by RBS plc?” below. The minimum repurchase amount will be equal to 20,000 ETNs of a single series for any single repurchase;

PS-8

provided that RBS plc may, in its sole discretion, from time to time, reduce the minimum repurchase amount. Any such reduction will be applied on a consistent basis for all holders of the ETNs from the time the reduction becomes effective. Subject to any reduction in the minimum repurchase amount, if you offer at least 20,000 ETNs of a single series to us for repurchase and fulfill the repurchase procedures described under “—How do I offer my ETNs for repurchase by RBS plc?” below, we will be obligated to repurchase your ETNs on the applicable repurchase date.

If your ETNs are repurchased, on the repurchase date, you will receive a cash payment in an amount per ETN equal to the daily redemption value of the ETNs with respect to the applicable valuation date, subject to the provisions regarding resolution dates described below. The calculation agent will determine the daily redemption value in the manner described under “Specific Terms of the ETNs—Daily Redemption Value” in this pricing supplement.

The repurchase date applicable to any request for repurchase will be the third business day immediately following the valuation date, or resolution date, as applicable, for such repurchase. The applicable valuation date for any repurchase will be the first trading day following the trading day on which you make, or are deemed to have made, your offer and confirmation to us to repurchase your ETNs and on which the Major Commodities Exchanges are scheduled to be open for trading for at least three hours.

If, on the applicable valuation date, any Relevant Commodities Exchange is not open for trading for at least three hours, or if a Market Disruption Event exists with respect to such valuation date, the daily redemption value for such valuation date will be adjusted, for purposes of determining the amount payable in respect of the related repurchase, so that it will reflect future closing prices for any futures contracts underlying the applicable RICI EnhancedSM Index that were unobtainable on that valuation date, as described under “Specific Terms of the ETNs— Daily Redemption Value” in this pricing supplement. We refer to the date on which all such prices are obtained as the “resolution date” for that valuation date. The corresponding repurchase date will be postponed to the third business day following the resolution date.

Unless the scheduled repurchase date is postponed, the final day on which we will repurchase your ETNs will be October 27, 2042. As such, you must offer your ETNs for repurchase no later than October 21, 2042 in order to have your ETNs repurchased on October 27, 2042. The applicable valuation date for any such repurchase would be October 22, 2042.

In the event that payment upon repurchase by RBS plc is deferred as described above, no interest or other amount will accrue or be payable with respect to that deferred payment.

Because the daily redemption value you will receive for each ETN will not be calculated and published until the close of trading on the trading day immediately following the date you offer your ETNs for repurchase, you will not know the applicable daily redemption value at the time you exercise your repurchase right and you will bear the risk that your ETNs will decline in value between the time of your exercise and the close of trading on the applicable valuation date. Because the determination of the daily redemption value will be postponed to the resolution date in the event that any Relevant Commodities Exchange is not open for trading for at least three hours or a Market Disruption Event exists on such valuation date, you may bear this risk for an extended period of time.

Any payment upon repurchase of the ETNs is subject to the ability of RBS plc, as the issuer of the ETNs, and RBSG, as the guarantor of the issuer’s obligations under the ETNs, to pay their respective obligations as they become due.

How do I offer my ETNs for repurchase by RBS plc?

If you wish to offer your ETNs to us for repurchase, you and your broker must follow the following procedures:

- Your broker must deliver an irrevocable offer for repurchase, a form of which is attached as Annex A to this pricing supplement, to us by e-mail at ETNUSCorpActions@rbs.com. If your offer for repurchase is received by us after 4:00 p.m., New York City time, on a trading day, you will be deemed to have delivered your offer for repurchase on the following trading day.
- In addition to the offer for repurchase, your broker must deliver a completed and signed irrevocable confirmation of repurchase, a form of which is attached as Annex B, to us by facsimile by 5:00 p.m., New York City time, on the same day. If your irrevocable confirmation of repurchase is received after 5:00 p.m., New York City time, you will be deemed to have delivered your confirmation of repurchase on the following trading day. One portion of the confirmation of repurchase must be completed by you as beneficial owner of the ETNs, and the other portion must be completed by your broker. You must offer at least 20,000 ETNs of a single series for any single repurchase by us on any repurchase date; provided that RBS plc may, in its sole discretion, from time to time, reduce the minimum repurchase amount. We must acknowledge receipt from your broker in order for your offer to be effective.
- Your broker must book a delivery versus payment trade with respect to your ETNs on the applicable valuation date or, if applicable, the resolution date, at a price equal to the applicable daily redemption value, facing us.
- Your broker must cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m., New York City time, on the applicable repurchase date.

Different brokers and DTC participants may have different deadlines for accepting instructions from their customers. Accordingly, you should consult the brokerage firm or other DTC participant through which you own your interest in the ETNs in respect of such deadlines. Any repurchase instructions that we receive in accordance with the procedures described above will be irrevocable.

When can my ETNs be redeemed and how is the amount payable upon redemption calculated?

We have the right to redeem, in our sole discretion, any series of ETNs in whole, but not in part, by delivering an irrevocable notice to DTC (the holder of the global note) specifying the valuation date and redemption date for such redemption. We may specify any valuation date from the inception date to and including, October 22, 2042. The redemption date we specify must be three scheduled business days after the specified valuation date and must be not less than five business days or more than ten business days after the date of delivery of the notice. On the redemption date, you will receive a cash payment equal to the daily redemption value for that valuation date, subject to the provisions regarding resolution dates described below. The calculation agent will determine the daily redemption value in the manner described under “Specific Terms of the ETNs—Daily Redemption Value” in this pricing supplement.

If, on the applicable valuation date, any Relevant Commodities Exchange is not open for trading for at least three hours, or if a Market Disruption Event exists with respect to such valuation date, the daily redemption value for such valuation date will be adjusted, for purposes of determining the amount payable in respect of the related redemption, so that it will reflect future closing prices for any futures contracts underlying the applicable RICI EnhancedSM Index that

were unobtainable on that valuation date, as described under “Specific Terms of the ETNs—Daily Redemption Value” in this pricing supplement. We refer to the date on which all such prices are obtained, subject to a five-business-day limit, as the “resolution date” for that valuation date. The corresponding redemption date will be postponed to the third business day following the resolution date.

The final day on which we can redeem your ETNs will be October 27, 2042. As such, the last day on which we can deliver a redemption notice is October 20, 2042, and the applicable valuation date for any such redemption would be October 22, 2042.

In the event that payment upon redemption by RBS plc is deferred as described above, no interest or other amount will accrue or be payable with respect to that deferred payment.

How is the daily redemption value for my ETNs calculated?

RBS Securities Inc. (“RBSSI”), as the calculation agent for the ETNs, will calculate the amount payable at maturity or upon early repurchase or redemption by us of your ETNs, which will be equal to the daily redemption value of your ETNs with respect to the applicable valuation date.

The daily redemption value as of October 25, 2012, the inception date of the ETNs, was equal to the stated face amount of \$25.00 per ETN. With respect to any valuation date thereafter, the daily redemption value per ETN will be equal to:

- the daily redemption value with respect to the immediately preceding valuation date, multiplied by
 - the index factor (as defined below) with respect to such valuation date, multiplied by
 - the fee factor (as defined below) with respect to such valuation date.

The “index factor” for any ETNs with respect to any valuation date, including the final valuation date, will be equal to the underlying RICI EnhancedSM Commodity or Sector Index closing level for that valuation date, divided by the closing level of that index for the immediately preceding valuation date.

The RICI EnhancedSM Commodity and Sector Indices closing levels on any trading day will be, for the RICI EnhancedSM Commodity Index and each Sector Index, the respective official closing level with respect to such trading day reported on the respective Bloomberg page or any successor page on Bloomberg, or any successor service, as applicable, or if the official closing level is not reported on such page, the official closing level with respect to such trading day as published or otherwise made publicly available by the Index Sponsor or the Index Calculation Agent, in each case as determined by the calculation agent. In certain circumstances, the underlying RICI EnhancedSM Commodity or Sector Index closing level will be based on the alternative calculation of the index as described under “—Discontinuation or Modification of the RICI EnhancedSM Commodity and Sector Indices” below.

The “fee factor” for any ETNs on any valuation date, including the final valuation date, will be equal to one minus the investor fee, which is equal to the product of (a) the annual investor fee and (b) the day-count fraction.

The “annual investor fee” for any ETNs will be equal to 0.95% per annum.

On each valuation date, the “day-count fraction” is equal to the number of days from, but excluding, the immediately preceding valuation date to, and including, the applicable valuation date, divided by 365.

PS-11

See “Specific Terms of the ETNs—Daily Redemption Value” in this pricing supplement for further information on calculation of the daily redemption value, including an explanation of how the daily redemption value may be adjusted, and how any corresponding repurchase date, redemption date or maturity date may be postponed if, on the valuation date, any Relevant Commodities Exchange is not open for trading for at least three hours, or if a Market Disruption Event exists with respect to that valuation date.

The daily redemption value payable at maturity or upon early repurchase or redemption of your ETNs is reduced by the aggregate investor fee applicable to your ETNs. As a result, the level of the underlying RICI EnhancedSM Commodity or Sector Index must increase by an amount sufficient to offset such reduction in order for you to receive at least the initial amount of your investment at maturity or upon early repurchase or redemption. If the level of that index decreases or does not increase sufficiently, you will receive less, and possibly significantly less, than the initial amount of your investment at maturity or upon early repurchase or redemption.

Can my ETNs be accelerated?

If the daily redemption value per ETN on any valuation date equals zero, the ETNs will be automatically accelerated on that day for an amount equal to the zero daily redemption value and will cease to be outstanding thereafter. In that event, you will not receive any payment in respect of your investment and you will lose your entire investment in the ETNs.

PS-12

What are the differences among the trading price or market price, the indicative value and the daily redemption value of the ETNs?

PS-13

Term	Respective Ticker Symbols (NYSE Arca)	What does it mean?	Frequency of dissemination	How determined?
Trading price or market price	RGRC RGRA RGRE RGRP RGRI	The price at which buyers and sellers execute transactions in the ETNs in the secondary market.	The “best bid” and the “best offer” are disseminated continuously during regular exchange hours on NYSE Arca.	<p>Trades are generally effected on NYSE Arca at a price between the current “best bid” and “best offer.”</p> <p>The “best bid” is the highest price at which an investor is willing to buy ETNs at any given point. (Our obligation to repurchase ETNs at the daily redemption value is intended to induce arbitrageurs to counteract any trading of the ETNs at a price lower than their indicative value, but there can be no assurance that arbitrageurs will do so.)</p> <p>The “best offer” is the lowest price at which an investor is willing to sell ETNs at any given point. (To the extent we stand ready to issue and sell additional ETNs at their indicative value or daily redemption value, we expect arbitrageurs will be induced to counteract any trading of the ETNs at a price higher than their indicative value, but there can be no assurance that arbitrageurs will do so. If we were to suspend the issuance of additional ETNs, the ETNs might trade at a premium to their indicative value.)</p>

	RGRI.NV	the ETNs.	

The daily redemption value is determined using the same formula as the indicative value, but it is calculated as of the close on the applicable valuation date. The applicable valuation date occurs at least one day after you confirm your offer to us to repurchase or we deliver a notice to redeem.

See “—What will I receive if I sell my ETNs in the secondary market?” below and “Risk Factors—The intraday indicative value and the daily redemption value are not the same as the trading price or market price of the ETNs in the secondary market.”

Can I sell my ETNs in the secondary market?

The ETNs are listed on NYSE Arca, Inc. (“NYSE Arca”) under their respective ticker symbols listed on the cover page of this pricing supplement. If an active secondary market in the ETNs develops, we expect that investors will purchase and sell the ETNs primarily in this secondary market. However, there is no guarantee that an active secondary market in the ETNs will develop. We are not required to maintain any listing of the ETNs on NYSE Arca or any other exchange. We have the ability to delist the ETNs. Accordingly, there may be little or no secondary market for the ETNs.

What will I receive if I sell my ETNs in the secondary market?

If you sell ETNs in the secondary market, if any, you will receive the market price of the ETNs, which may be more or less than the stated face amount, the indicative value or the daily redemption value of your ETNs, and which may be more or less than what you paid for them.

If we limit or suspend the issuance of additional ETNs, the ETNs may trade at a premium over their intraday indicative value due to the resulting decrease or halt in the supply causing an imbalance of supply and demand in the market for the ETNs. See “Risk Factors—We are under no obligation to issue or sell additional ETNs at any time, and if we do sell additional ETNs, we may limit or restrict such sales, and we may stop selling additional ETNs at any time.” We may redeem all the ETNs at our option even if the ETNs are trading in the secondary market at a premium over their indicative value or daily redemption value. See “Risk Factors—We may redeem your ETNs at our option.”

Paying a premium price over the indicative value of the ETNs could lead to significant losses in the event you sell such ETNs at a time when that premium is no longer present in the marketplace, or in the event the ETNs are redeemed at our option (in which case you will receive a cash payment in an amount equal to the daily redemption value, which does not include any premium, with respect to the applicable valuation date). Any premium may be reduced or eliminated at any time.

Who will determine the daily redemption value and the payment at maturity or upon early repurchase or redemption of my ETNs?

We have appointed our affiliate, RBSSI, to act as calculation agent for the ETNs. As calculation agent, RBSSI will determine the daily redemption value and the payment at maturity or upon early repurchase or redemption of your ETNs. Under some circumstances, RBSSI’s duties as calculation agent could result in a conflict of interest between its status as our affiliate and its responsibilities as calculation agent. For example, the calculation agent may be required, due to events beyond our control, to adjust any of these calculations, which we describe under “Specific Terms of the ETNs—Discontinuation or Modification of the RICI EnhancedSM Commodity and Sector Indices.”

What is the relationship among RBS plc, RBSG and RBSSI?

RBSSI is an affiliate of RBS plc and RBSG. RBSSI will act as calculation agent for the ETNs, and is acting as agent for this offering. On the initial settlement date, we issued \$4,000,000 in face amount of each series of ETNs (equivalent to 160,000 ETNs of each series) to be sold through RBSSI. RBSSI will conduct any offering of ETNs in compliance with the requirements of

PS-15

Rule 5121 of the Financial Industry Regulatory Authority, which is commonly referred to as FINRA, regarding a FINRA member firm's distribution of the securities of an affiliate. See "Risk Factors—Risks Relating to the ETNs—Hedging and trading activities by us or our affiliates could affect prices of ETNs," "Risk Factors—Risks Relating to the ETNs—Potential conflicts of interest between holders of the ETNs and the calculation agent and the Index Calculation Agent" and "Plan of Distribution (Conflicts of Interest)" in this pricing supplement.

What is the role of RBS plc?

RBS plc is the issuer of the ETNs. All of the RICI EnhancedSM Indices are overseen by a committee (the "Index Committee"), which at present consists of two members: Jim Rogers, as the nominated representative of Beeland, and the nominated representative of RBS plc. Jim Rogers and Beeland are not affiliated with RBS plc, RBSG or RBSSI. RBS plc also serves as the Index Calculation Agent. Our role on the Index Committee and as Index Calculation Agent could result in a conflict of interest between our role as the issuer of the ETNs and you. See "Risk Factors—Risks Relating to the ETNs—Hedging and trading activities by us or our affiliates could affect prices of ETNs," "Risk Factors—Risks Relating to the ETNs—Potential conflicts of interest between holders of the ETNs and the calculation agent and the Index Calculation Agent" and "Risk Factors—Risks Relating to the ETNs—Potential conflicts of interest between holders of the ETNs and the Index Committee, including RBS plc, may exist." For more information, see "The RICI EnhancedSM Indices" in this pricing supplement.

What are some of the risks of investing in the ETNs?

Investing in the ETNs involves a number of risks. We have described some of the risks relating to the ETNs under the heading "Risk Factors" in this pricing supplement, which you should read before making an investment in the ETNs.

Some selected risk considerations include:

- **Credit risk of the issuer.** Because you are purchasing a security issued by us, you are assuming the risk that we may be unable to pay our obligations to you as they become due and payable. In addition, because the ETNs are fully and unconditionally guaranteed by RBSG, you are also assuming the risk that RBSG will be unable to pay amounts due to you under the ETNs in the event we fail to make any payment required by the terms of the ETNs.
- **Market risk.** The return on the ETNs will depend on the performance of the underlying RICI EnhancedSM Commodity or Sector Index (which in turn will depend on the performance of the relevant underlying Single Commodity Indices and commodity futures contracts) and other market conditions. There is no guarantee of any return to an investor in the ETNs. In particular, an investment in the ETNs carries the risks associated with an investment in commodities, the prices of which are volatile and are affected by numerous factors as discussed under "Risk Factors—Risks Relating to the RICI EnhancedSM Commodity and Sector Indices—The prices of commodities are volatile and are affected by numerous factors, certain of which are specific to the market for each commodity" in this pricing supplement.
- **The RICI EnhancedSM Indices Strategy-Specific Risk.** A futures contract for a commodity typically specifies an expiration date, which is the date on which the contract will cease to trade, and a delivery date, which is the date on which the underlying physical commodity referenced by the futures contract is delivered. A "front-month futures contract" for a commodity means the futures contract for that commodity that has the nearest expiration date. Various commodity indices, including the S&P GSCI®, provide exposure to commodities by tracking the front-month futures contracts for those commodities. Under the RICI EnhancedSM index methodology, the selection and rolling of the futures contracts for each underlying Single Commodity Index is based on a formula that was designed taking into

PS-16

account liquidity, seasonality, cyclicity and term structures of futures contracts for that commodity. As a result, the RICI EnhancedSM Indices provide exposure to futures contracts with varying maturities, as opposed to the S&P GSCI® and other traditional commodity indices, which provide exposure to front-month contracts. The performance of the RICI EnhancedSM Indices will differ from those commodity indices that track only front-month futures contracts. Please see “Risk Factors—Risks Relating to the RICI EnhancedSM Commodity and Sector Indices—Unlike commodity indices that only track prices of front-month futures contracts, the RICI EnhancedSM Indices track the prices of front-month futures contracts and also futures contracts with more distant expiration dates, which may affect the levels of the RICI EnhancedSM Indices, and, consequently the value of the ETNs in various ways.”

- The ETNs and the RICI EnhancedSM Indices do not provide exposure to spot prices of commodities. The ETNs will reflect the return on the underlying RICI EnhancedSM Commodity or Sector Index, which tracks futures contracts that are traded on the Relevant Commodities Exchanges, not physical commodities or their spot prices. The price movements in futures contracts on commodities may not correlate with changes in the spot prices of the commodities. A commodity futures contract is an agreement to buy a set amount of an underlying physical commodity at a predetermined price during a stated delivery period. A futures contract reflects the expected value of the underlying physical commodity upon delivery in the future. In contrast, the underlying physical commodity’s current or “spot” price reflects the immediate delivery value of the commodity. A variety of factors can lead to a disparity between the expected future price of a commodity and the spot price at a given point in time, such as the cost of storing the commodity for the term of the futures contract, interest charges incurred to finance the purchase of the commodity and expectations concerning supply and demand for the commodity. The RICI EnhancedSM Indices track the settlement prices of futures contracts and not the spot prices of the relevant commodities. Consequently, an investment in the ETNs is not the same as an investment in the spot prices of the relevant commodities or buying and holding the relevant commodities. While price movements in the futures contracts of commodities may correlate with changes in the spot prices of the commodities, the correlation will not be perfect and price movements in the spot markets may not be reflected in the futures market and vice versa. Accordingly, increases in the spot prices of commodities may not result in increases in the prices of the futures contracts of the commodities. The prices of the futures contracts tracked by the RICI EnhancedSM Indices may decrease while the spot prices for the relevant commodities increase.
- The RICI EnhancedSM Commodity and Sector Indices include futures contracts on foreign exchanges and are subject to risks that do not always apply to U.S. Markets. The RICI EnhancedSM Commodity and Sector Indices include futures contracts on physical commodities on exchanges located outside the United States. The Index Committee has not established any limits on the volume of commodities included in the RICI EnhancedSM Commodity and Sector Indices that can be traded on non-U.S. exchanges. The percentage, by Target Weight, of the Component Commodities underlying the RICI EnhancedSM Commodity Index that are traded in foreign exchanges is approximately 28%; the percentages for the RICI EnhancedSM Agriculture, Energy, Industrial Metals and Precious Metals Sector Indices are approximately 5%, 32%, 100% and 0%, respectively. The regulations of the Commodity Futures Trading Commission do not apply to trading on foreign exchanges, and trading on foreign exchanges may involve different and greater risks than trading on United States exchanges.
- A trading market for the ETNs may not develop. Although the ETNs are listed on NYSE Arca, Inc. (“NYSE Arca”) under their respective ticker symbols listed on the cover page of this pricing supplement, there is no guarantee of secondary market liquidity. Even if a

secondary market does develop, it may not be liquid and may not continue for the term of the ETNs. In addition, no assurances can be given as to the continuation of the listing during the term of the ETNs. We are not required to maintain any listing of the ETNs on NYSE Arca or any other exchange or quotation system.

- Uncertain payment of your investment. The ETNs are not principal protected, which means there is no guaranteed return of your investment. You may receive less than the face amount of your ETNs at maturity or upon early repurchase or redemption. If the level of the underlying RICI EnhancedSM Commodity or Sector Index decreases, or does not increase by an amount sufficient to offset the investor fee, you will receive less, and possibly significantly less, than your original investment in the ETNs. Any payment on the ETNs is subject to the creditworthiness of RBS plc, as issuer, and RBSG, as guarantor.
- No interest payments. You will not receive any periodic interest payments on the ETNs.
- Restrictions on your ability to offer ETNs for repurchase by us. Unless the minimum repurchase amount has been reduced by RBS plc, you must offer at least 20,000 ETNs of a single series to us for any single repurchase and satisfy the other requirements described herein for your offer for repurchase to be considered.
- Your offer for repurchase is irrevocable. You will not be able to rescind your offer for repurchase after it is received by RBS plc, so you will be exposed to market risk in the event market conditions change after RBS plc receives your offer.
- Issuer call risk. Your ETNs may be redeemed at our option, in whole but not in part, on any trading day during the period from, and including, the initial settlement date to, and including, October 27, 2042. If we elect to redeem your ETNs, you will receive a cash payment in an amount equal to the daily redemption value with respect to the applicable valuation date, subject to the provisions regarding resolution dates described under “Specific Terms of the ETNs—Daily Redemption Value,” and you may not be able to reinvest your proceeds in a comparable investment. In addition, the implementation of the RBS Retail Investor Products Exit Plan increases the likelihood of our calling the ETNs prior to maturity.

Who invests in the ETNs?

The ETNs are complex financial instruments and are not suitable for all investors. You may consider an investment in the ETNs if:

- you are seeking exposure to commodity futures contracts, as represented by the underlying RICI EnhancedSM Commodity or Sector Index, and you believe that the level of that index will increase by an amount sufficient to offset the aggregate investor fee applicable to the ETNs and provide you with a satisfactory return on your investment during the term of your holding of the ETNs;
- you have sufficient knowledge and experience to evaluate how the ETNs may perform under different conditions and the merits and risks of an investment in the ETNs;
- you have sufficient financial resources and liquidity to bear all of the risks of an investment in the ETNs, including the risk of loss of such investment;
- you understand that the prices of commodity futures contracts tracked by the applicable Rogers Enhanced or Sector Index may not correlate with spot or front-month futures prices of the relevant commodities and you appreciate that an investment in the ETNs is not the same as an investment in commodity spot or front-month futures prices or buying or holding commodities;

PS-18

- you understand the terms of the investment in the ETNs and are familiar with the behavior of the underlying RICI EnhancedSM Commodity or Sector Index and financial markets generally;
- you are willing to risk losing some or all of your initial investment in exchange for the opportunity to benefit from the appreciation, if any, in the level of the underlying RICI EnhancedSM Commodity or Sector Index over the term of your holding of the ETNs;
 - you do not seek a current income stream from this investment;
- you are willing to be exposed to fluctuations in the prices of commodity futures contracts, in general, and the prices of the underlying commodity futures contracts reflected in the levels of the underlying RICI EnhancedSM Commodity or Sector Index, in particular; and
- you are willing to make an investment, the payments on which depend on the creditworthiness of RBS plc, as the issuer of the ETNs, and RBSG, as the guarantor.

The ETNs may not be a suitable investment for you if:

- you seek exposure to an investment that tracks the spot or front-month futures prices of the relevant commodities rather than an investment that tracks the prices of the commodity futures contracts underlying the RICI EnhancedSM Indices;
- you do not have sufficient knowledge and experience to evaluate how the ETNs may perform under different conditions and the merits and risks of investment in the ETNs;
- you do not have sufficient financial resources and liquidity to bear all of the risks of an investment in the ETNs, including the risk of loss of such investment;
- you do not understand the terms of the investment in the ETNs or are not familiar with the behavior of the underlying RICI EnhancedSM Commodity or Sector Index and financial markets generally;
- you believe the level of the underlying RICI EnhancedSM Commodity or Sector Index will decrease or will not increase by an amount sufficient to offset the aggregate investor fee applicable to your ETNs during the term of your holding of the ETNs;
 - you seek a guaranteed return of your invested principal;
 - you seek current income from your investment;
- you are not willing to be exposed to fluctuations in the prices of commodity futures contracts, in general, and the prices of the underlying commodity futures contracts reflected in the levels of the underlying RICI EnhancedSM Commodity or Sector Index, in particular;
- you prefer the lower risk and therefore accept the potentially lower returns of fixed income investments with comparable maturities; or
- you are unwilling or unable to assume the credit risk associated with RBS plc, as the issuer of the ETNs, and RBSG, as the guarantor.

You should carefully consider whether the ETNs are suited to your particular circumstances before you decide to purchase them. In addition, we urge you to consult with your investment, legal, accounting, tax and other advisers with respect to any investment in the ETNs.

PS-19

Does an investment in the ETNs entitle you to any ownership interests in the commodity futures contracts tracked by the underlying RICI EnhancedSM Commodity or Sector Indices?

No. Owning the ETNs is not the same as owning any commodity futures contracts. The return on your ETNs will not reflect the return you would realize if you actually purchased the commodity futures contracts tracked by the underlying RICI EnhancedSM Commodity or Sector Index, commodities upon which those commodity futures contracts are based or other exchange-traded or over-the-counter instruments referencing those futures contracts or commodities. You will not have any rights that holders of such assets or instruments have, merely as a result of your ownership of the ETNs.

What are the tax consequences of an investment in the ETNs?

You should review carefully the section in this pricing supplement entitled “U.S. Federal Income Tax Consequences.”

For a discussion of United Kingdom tax considerations relating to the ETNs, you should review the section in this pricing supplement entitled “United Kingdom Taxation Considerations.”

You should consult your tax adviser regarding the U.S. federal tax consequences of an investment in the ETNs, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

How have the RICI EnhancedSM Commodity and Sector Indices performed historically?

The graphs below show the daily closing levels, and the tables below show the year-end closing levels (except for the present year, for which closing levels as of March 17, 2015 are provided), of the RICI EnhancedSM Commodity Index and the Sector Indices from October 31, 2007 through to March 17, 2015, and comparisons to the performance during the same period of the following indices and the agriculture, energy, industrial metals and precious metals sub-indices thereof:

- The Rogers International Commodity Index®-Total ReturnSM (the “RICI Commodity Index”) (Bloomberg ticker: RICIGLTR). The RICI Commodity Index is a composite, USD-based index, designed by Jim Rogers in the late 1990s. It represents the value of a basket of commodities consumed in the global economy ranging from agricultural to energy and metals products.
- The S&P GSCI® Total Return (the “S&P GSCI”) (Bloomberg ticker: SPGSCITR). The S&P GSCI™ is an index on a world production-weighted basket of principal nonfinancial commodities (i.e., physical commodities) that is designed to be a measure of the performance over time of the markets for these commodities. The only commodities represented in the S&P GSCI are those physical commodities on which active and liquid contracts are traded on trading facilities in major industrialized countries.
- The DBIQ Optimum Yield Diversified Commodity Index Total Return (the “DBIQ Optimum Yield Commodity Index”) (Bloomberg ticker: DBLCDBCT). The DBIQ Optimum Yield Commodity Index is intended to reflect the change in market value of certain commodities. Its rule-based methodology aims to maximize the potential roll yield in backwardated markets and minimize the loss from rolling in contango markets.

- Dow Jones-UBS Commodity IndexSM Total Return (the “DJ-UBS Commodity Index”) (Bloomberg ticker: DJUBSTR). The DJ-UBS Commodity Index was established in July 1998 to provide a liquid and diversified benchmark for commodities. It is composed of exchange-traded futures contracts on physical commodities and is designed to be a highly liquid and diversified benchmark for commodities as an asset class. Its component weightings are determined primarily based on liquidity data.

Because the total return versions of the RICI EnhancedSM Indices have only been calculated on a daily basis since October 2008, the closing levels in the graphs and tables below reflect actual Index closing levels from October 2008 to March 17, 2015, and retrospectively calculated levels from October 31, 2007 to October 2008. The retrospectively calculated levels are based on the actual performance of the excess return version of each Index and the interest that could have been earned on cash collateral invested in 3-month U.S. Treasury bills during the same period. The historical closing levels and performance of the RICI EnhancedSM Commodity and Sector Indices should not be taken as an indication of future performance. We obtained the historical data from Bloomberg, without independent verification.

The performance of the RICI EnhancedSM Indices illustrated in the graphs and table below do not reflect the investor fee that will be deducted in calculating the daily redemption value of the ETNs.

For comparison purposes, the historical closing levels of each index represented in each graph below are based to a value of 100 on October 31, 2007.

PS-27

How have the ETNs performed historically?

The graphs below show the daily closing prices of each series of the ETNs from October 25, 2012, the inception date, to the dates set forth below. The trading price or market price of the ETNs at any time is the price at which you may be able to sell your ETNs in the secondary market, if it exists. The closing price of the Rogers Enhanced Commodity ETNs on March 17, 2015 was \$17.36 (NYSE Arca: "RGRC"). The closing price of the Rogers Enhanced Agriculture ETNs on March 17, 2015 was \$18.07 (NYSE Arca: "RGRA"). The closing price of the Rogers Enhanced Energy ETNs on March 17, 2015 was \$15.79 (NYSE Arca: "RGRE"). The closing price of the Rogers Enhanced Precious Metals ETNs on March 13, 2015 was \$16.46 (NYSE Arca: "RGRP"). The closing price of the Rogers Enhanced Industrial Metals ETNs on February 25, 2015 was \$20.52 (NYSE Arca: "RGRI"). The actual trading price or market price of the ETNs may vary significantly from the indicative value and the daily redemption value due to, among other things, imbalances of supply and demand, lack of liquidity, transaction costs, credit considerations and bid-offer spreads.

What if I have more questions?

You should read “Valuation of the ETNs” and “Specific Terms of the ETNs” in this pricing supplement for a detailed description of the terms of the ETNs. The ETNs are unsecured and unsubordinated obligations of RBS plc issued as part of our RBS NotesSM program and are fully and unconditionally guaranteed by RBSG. The ETNs offered by RBS plc will constitute our unsecured and unsubordinated obligations and rank pari passu without any preference among them and with all our other present and future unsecured and unsubordinated obligations. The guarantees of RBSG will constitute RBSG’s unsecured and unsubordinated obligations and rank pari passu without any preference among them and with all RBSG’s other current and future unsecured and unsubordinated obligations. You can find a general description of certain basic features of the ETNs in the section of the accompanying prospectus called “Description of Debt Securities.”

PS-31

RISK FACTORS

The ETNs are our unsecured and unsubordinated obligations and are fully and unconditionally guaranteed by RBSG. The ETNs are securities as described in the accompanying prospectus dated March 31, 2015 and are riskier than ordinary unsecured debt securities. The return on the ETNs is linked to the performance of the underlying RICI EnhancedSM Commodity or Sector Index. Investing in the ETNs is not equivalent to investing directly in the underlying RICI EnhancedSM Commodity or Sector Index or commodity futures contracts. See “The RICI EnhancedSM Indices” below for more information.

You should carefully consider whether the ETNs are suited to your particular circumstances before you decide to purchase them. In addition, we urge you to consult with your investment, legal, accounting, tax and other advisers with respect to any investment in the ETNs.

Risks Relating to the ETNs

You may lose all or a significant portion of your investment in the ETNs

The ETNs do not have a minimum redemption or repurchase value and you may receive less, and possibly significantly less, at maturity or upon early repurchase or redemption, than the amount you originally invested. Any cash payment on your ETNs at maturity or upon early repurchase or redemption of your ETNs will be based primarily on any increase or decrease in the level of the underlying RICI EnhancedSM Commodity or Sector Index, and will be reduced by the accrued investor fee on your ETNs. You may lose all or a significant amount of your investment in the ETNs if the level of the underlying RICI EnhancedSM Commodity or Sector Index decreases substantially. In addition, if the daily redemption value per ETN on any valuation date equals zero, the ETNs will be automatically accelerated on that day for an amount equal to the zero daily redemption value and will cease to be outstanding thereafter. In that event, you will not receive any payment in respect of your investment and you will lose your entire investment in the ETNs.

The credit risk of RBS plc and RBSG, and their credit ratings and their credit spreads, may adversely affect the market price of the ETNs prior to maturity, and all payments on the ETNs will be subject to the ability of RBS plc and RBSG to pay their respective obligations as they become due

You are dependent on RBS plc’s ability to pay all amounts due on the ETNs, and therefore you are subject to the credit risk of RBS plc and to changes in the market’s view of RBS plc’s creditworthiness. In addition, because the ETNs are unconditionally guaranteed by RBS plc’s parent company, RBSG, you are also dependent on the credit risk of RBSG in the event that RBS plc fails to make any payment or delivery required by the terms of the ETNs. Any actual or anticipated decline in RBS plc’s or RBSG’s credit ratings or increase in their credit spreads charged by the market for taking credit risk is likely to adversely affect the value of the ETNs prior to maturity, and all payments on the ETNs will be subject to the ability of RBS plc and RBSG to pay their respective obligations as they become due.

Our credit ratings are an assessment, by each rating agency, of our ability to pay our obligations, including those under the ETNs. Credit ratings are subject to revision, suspension or withdrawal at any time by the assigning rating organization in their sole discretion. However, because the return on the ETNs is dependent upon factors in addition to our ability to pay our obligations under the ETNs, an improvement in our credit ratings will not necessarily increase the market price of the ETNs and will not reduce market risk and other investment risks related to the ETNs. Credit ratings (i) do not reflect market risk, which is the risk that the level of the underlying RICI EnhancedSM Commodity or Sector Index may fall resulting in a loss of some or all of your investment, (ii) do not address the price, if any, at which the ETNs may be resold prior to maturity (which may be substantially less than the issue price of the ETNs),

and (iii) are not recommendations to buy, sell or hold the ETNs. Credit ratings are not taken into account in determining the daily redemption value of the ETNs. See “—The market price of the ETNs may be influenced by many unpredictable factors” below.

PS-32

Although we are a bank, the ETNs are not bank deposits and are not insured or guaranteed by the Federal Deposit Insurance Corporation, the Deposit Insurance Fund or any other government agency
