Rio de Janeiro, July 4, 2008 Companhia Vale do Rio Doce (Vale) announces that it has launched a global offering of up to 256,926,766 common shares and 164,402,799 preferred shares (not including any exercise of the underwriters over-allotment option) today. The global offering will consist of a registered offering in Brazil and an international offering, which will include a registered offering in the United States. Investors in the international offering may elect to receive their shares in the form of American Depositary Shares (ADSs). The closings of the Brazilian offering and the international offering will be conditioned upon each other. Further information about the offers will be contained in the offering documents.

Existing shareholders of Vale that are resident in Brazil will have the right to subscribe for shares in the Brazilian offering on a priority basis. Our principal shareholder, Valepar, has decided to subscribe the number of common shares required to maintain its proportionate interest in our common shares following our capital increase.

As previously announced, Vale will use the net proceeds of this offering for general corporate purposes, which may include financing its program of organic growth based on its US\$59 billion investment plan, strategic acquisitions and increased financial flexibility.

In connection with this offering, Vale has applied to list and trade its common and preferred ADSs on Euronext Paris. Our ADSs have been admitted to listing and trading on Euronext Paris in euros. Vale's common shares and preferred shares are listed on the São Paulo Stock Exchange, and its common ADSs and the preferred ADSs are listed on The New York Stock Exchange.

Credit Suisse Securities (USA) LLC is acting as lead underwriter.

Vale has an effective registration statement on file with the U.S. Securities and Exchange Commission. This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and Vale cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian and Canadian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore and nickel business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which Vale operates.
