Table of Contents

(A free translation of the original in Portuguese relating to the Quarterly Information prepared in thousands accordance with the requirements of Accounting Practices Generally Accepted in Brazil)

5- Notes to the Quarterly information at September 30, 2008 and 2007

Expressed In thousands of *reais*

5.1- Operations

Companhia Vale do Rio Doce (Vale) is a publicly limited liability company whose predominant activities are mining, processing and sale of iron ore, pellets, copper concentrate and potash, as well as logistic services, power generation and mineral research and development. In addition, through its direct and indirect subsidiaries and jointly controlled companies, operates in iron ore and pellets, nickel, copper, precious metals, cobalt (by product), manganese and ferroalloys, kaolin, coal, steel, aluminum-related products and logistics.

5.2- Presentation of Quarterly information

The quarterly information has been prepared in conformity with accounting practices followed in Brazil, based on corporate legislation, as well as the rules and guidelines issued by the Comissão de Valores Mobiliários CVM (Brazilian Securities Commission).

As part of the quarterly information, the Company presents as complementary information the calculation of the earnings before financing results, equity results, income tax and social contribution, depreciation and amortization LAJIDA (EBITDA)

Although the EBITDA, as defined before, does not provide valuation for operational cash flow for Brazilian accounting principles, it is often used by financial analysts on valuation of business and The Company Management uses this indicator to measure operational performance.

5.3- Accounting Pronouncements Recently-issued by Comissão de Valores Mobiliários

On December 28, 2007, Law 11638 was enacted, altering, revoking and adding new provisions to the Brazilian Corporate Law, especially with respect to chapter XV, Fiscal Year and Financial Statements, effective for fiscal years beginning on or after January 1, 2008. Said Law was designed primarily to update accounting practices as contemplated by Brazilian Corporate Law, so as to enable the convergence of Brazilian accounting practices with International Financial Reporting Standards (IFRS).

The full convergence with international accounting standards is still subject to regulation by CVM.

In line with this regulation process, on January 29, 2008, CVM issued Resolution No. 534, approving technical pronouncement CPC 02 (by the Accounting Pronouncements Committee), which addresses the effects of changes in exchange rates and remeasurement of financial statements. Accordingly, the effects of exchange variation on investments abroad will be recognized directly in shareholders' equity as from the annual report for the year ending December 31, 2008, so if this pronouncement will be maintained the net income will be adjusted by this amounts. Had the Company already adopted this Resolution, the statement of income for the reporting periods would be affected as follows:

	3Q/08	2Q/08	2008 09/30/08
Net income	12,433	4,573	19,259
Variação cambial de investimentos	(5,933)	4,655	(449)
Net income	6,500	9,228	18,810

With respect to ongoing process of convergence, it is expected that as from of 2009, the income of statement will not be affected by the treatment of goodwill amortization generated in the process of acquiring companies, which in 2008 represented an expense of R\$1,078,048 (R\$352,684 in 3Q08).

Edgar Filing: Companhia Vale do Rio Doce - Form 6-K

On May 02, 2008, CVM issued the Instruction No 469/08 in dealing with the implementation of Law 11.638, setting the mandatory application on quarterly information of the changes made directly by the Law. The accounting practices already introduced by the Law had no impact on the quarterly information submitted, however according to their regulations by CVM the accounting information may require adjustments.

Table of Contents**5.4- Principles and Practices of Consolidation**

The consolidated quarterly information shows the balances of assets and liabilities on 09/30/2008 and 06/30/2008, and of the quarterly periods ended on 09/30/2008, 06/30/2008 and 09/30/2007, of Parent Company operations, its direct and indirect subsidiaries and its jointly-controlled companies. The principal figures of the subsidiaries and jointly-controlled companies individual quarterly information included in the consolidation are presented in Attachment I.

The Company Investments in hydroelectric projects are made by the consortium contracts to participate in the Company's liabilities and expenses, which is based on proportional participation by the quota holding on power output. The Company does not have joint responsibility for any obligation. Since there is no separated legal entity for the project, there are no separated financial statements, income tax return, net income or shareholders' equity. The Brazilian legislation clearly states that there is no separate entity under the terms of consortium contract. Thus the Company recognizes the proportional participation of costs and its undivided participation in assets related to hydroelectric projects.

There were no changes in the practices of consolidation of the Company since 12/31/2007.

5.5- Summary of significant Accounting Policies

- (a) The Statements has been prepared with the same principles, methods and criteria consistent of the ones adopted in the period ended 12/31/07, except in the cases especificed in the notes;
- (b) In preparing the condensed consolidated financial statements, the company is required to use estimates to account for certain assets, liabilities, and transactions. Therefore the consolidated financial statements include various estimates concerning the selection of useful lives of property, plant and equipment, provisions for losses on assets, contingent liabilities, operational provisions and other similar evaluations. Actual results may vary from the estimates; and
- (c) The rights and obligations in foreign currencies are demonstrated to the effective exchange rates of the Financial Statements R\$1,9143 to US\$1,00 on 09/30/08 (R\$1,8389 to US\$1,00 on 09/30/07) and in national currency, when applicase, are actualized monetarily according the contractual bases. On 10/20/03 the exchange rate was R\$2,118 to US\$1,00 representing a Real depreciation of approximately 10,64% in relation the 09/30/08. The quarterly information hold been prepared in accordance the account policies therefore do not show the changes effect in the exchange rates after the balance sheet date.

5.6- Cash and Cash Equivalents

	Consolidated		Parent Company	
	30/09/2008	30/06/2008	30/09/2008	30/06/2008
Cash and bank accounts	1,152,556	1,095,644	65,208	55,209

Federal income tax and social contribution at statutory rates	(3,883,532)	(2,825,453)	(2,488,754)	(7,867,573)	(8,703,882)	(2,137,350)	(3,183,346)
Adjustments that affects							

the basis of
taxes:

Income tax benefit from interest on stockholders equity	286,675	286,674	209,497	868,960	635,019	868,960	635,019
Fiscal incentives Results of overseas companies taxed by different rates with difference than the parent company rate	(29,057)	118,398	81,478	69,598	243,507	90,516	110,814
Reduced incentive rate	3,916,757	(58,266)	420,568	4,584,549	790,336		
Others	29,105	44,964	17,978	90,906	62,625		
	247,502	(367,558)	10,165	(685,838)	(255,630)	2,150,106	(2,420,279)
Income tax and social contribution	111,364	(2,571,182)	(1,632,336)	(3,129,701)	(6,902,695)	(639,505)	(2,169,014)

The deferred assets and liabilities related to income tax and social contribution arising from tax losses, negative social contribution bases and temporary differences are recognized from an accounting standpoint considering an analysis of likely future results, based on economic and financial projections prepared based on internal assumptions and macroeconomic, commercial and fiscal scenarios which could change in the future.

Vale has certain tax incentives of reduction and exemption of income taxes. The incentives are calculated based on exploration profit and are based on the production levels recognized and incentive to the defined periods of each product and expire from 2008 to 2013. An amount equal to the tax saving must be appropriated to a reserve account with in stockholders equity and may not be distributed in the form of cash dividends.

Vale also has also tax incentives related to Goro Project in New Caledonia. These incentives include an income provisions tax exemption during the construction phase of the project and throughout a 15-year period commencing in the first year in which commercial production, as defined by the applicable legislation, is achieved followed by a five-year, 50 per cent income tax exemption.

In addition, Goro qualifies for certain exemptions from indirect taxes such as import duties during the construction phase of the commercial life of the project. Certain of these tax benefits, including the income tax exemption, are subject to an earlier phase out should the project achieve a specified cumulative rate of return. Vale is subject to a branch profit tax commencing in the first year in which commercial production is achieved, as defined by the applicable legislation. To date, there has been no net income for New Caledonia tax purposes. The benefits of this legislation are expected to apply with respect to any taxes otherwise payable once the Goro project is in operation.

(*) Includes non-convertible debentures and other Brazilian-reais denominated loans that the interest is the at CDI and TJLP (Brazilian interbank certificate of deposit) rate accumulated variation plus spread. For these operations the Company have entered into derivative transactions to

hedge the Company exposure on the floating rate debt denominated in reais contracted total. The average cost of these operations is R\$9,878 while the average cost of such debt after hedge transactions is 5.18%.

The indexes applied to the Company debt and respective percentage variations in each quarter were as follows:

	09/30/08	06/30/08	12/31/07
TJLP Long-Term Interest Rate (effective rate)	1.5	1.5	1.5
IGP-M General Price Index Market	1.6	4.3	2.4
Devaluation of United States Dollar against Real	20.0	(9.0)	(1.3)

On January 28, 2008 the Company entered into a trade finance agreement on working capital in the amount of R\$2 billion with final maturity in 2018.

In April 2008, Vale entered into agreements with Banco Nacional de Desenvolvimento Econômico e Social (BNDES), the Brazilian National Development Bank and with long-term Japanese financing agencies, Japan Bank for International Cooperation (JBIC) and Nippon Export and Investment Insurance (NEXI) for the financing of the mining, logistics and power generation projects to be developed under Vale's investment program for 2008-2012. Those agreements comprises a financial package of almost US\$10 billion to support investments related to Vale's growth initiatives.

The Vale have total revolving credit lines with bank syndicates, which work as a short term liquidity buffer that allow a more efficient cash management. Under revolving credit facilities, amounts drawn and repaid can be disbursed again at the option of the Borrower. At September 30, 2008, the total amount available under revolving credit lines was of US\$1,9 billion, being US\$1.150 billion granted to Vale International and the balance to Vale Inco. As of September 30, 2008, neither Vale International nor Vale Inco had drawn any advance amount under these facilities and Vale Inco has drawn US\$113,2 million by way of letters of credit.

Some of Vale long-term debt instruments has financial cover. The principal financial cover requires to keep requiring that certain ratios, such as debt to EBITDA and interest coverage. The Company is in full compliance with financial covenants as of September 30, 2008.

As of September 30, 2008, the US-dollar denominated fixed interest notes of R\$12,700,106 (June 30, 2008 R\$10,623,296) and other debt of R\$24,391,888 (June 30, 2008 R\$22,002,294) are not securitized. The export securitization of R\$418,508 (June 30, 2008 R\$369,232) is collateralized by future receivables from certain export sales by the subsidiary CVRD Overseas Ltd. Loans from international lenders in the amount of R\$109,559 (June 30, 2008 R\$110,785) are guaranteed by Brazilian Federal Government, to which The Company has provided guarantees in

Table of Contents

the same amount. The remaining long-term debt of R\$542,307 (June 30, 2008) R\$507,061 is collateralized mainly by receivables from the subsidiaries.

5.14- Contingent Liabilities

The Company and its subsidiaries are party to labor, civil, tax and other suits and have been contesting these matters both administratively and in court. When applicable, these are backed by judicial deposits. Provisions for losses are estimated and restated monetarily and backed by management opinions and of the Legal Department and outside counsel.

At the Financial Statements dates the contingent liabilities of the Company were:

(a) Provisions for contingencies net from judicial deposits, considered by management and its legal counsel as sufficient to cover losses from any type of lawsuit, as follows:

	09/30/08	Consolidated 06/30/08	Parent Company 09/30/08	06/30/08
I) Tax contingencies	2,254,933	2,237,539	1,248,980	1,293,708
(-) Judicial deposits	(982,308)	(958,069)	(847,155)	(830,429)
	1,272,625	1,279,470	401,825	463,279
II) Civil contingencies	433,013	397,914	258,275	211,216
(-) Judicial deposits	(40,379)	(72,003)		
	392,634	325,911	258,275	211,216
III) Labor contingencies	1,075,680	969,650	889,822	784,685
IV) Environmental contingencies	32,914	27,297	8,529	3,335
Total accrued liabilities	2,773,853	2,602,328	1,558,451	1,462,515
		09/30/08		09/30/08
Balance at the beginning of the period		2,602,328		1,462,515
Provisions, net of reversals		(190,857)		(181,586)
Payment		(9,879)		(9,652)
Monetary update		364,875		303,900
Judicial deposits		7,386		(16,726)
Balance at the end of period		2,773,853		1,558,451

1) Tax Contingencies:

The major suits are:

Value-Added Tax on Sales and Services (ICMS) The contingent figure refers to the credit right of differential rates regarding the transfer of assets between company branches;

Services Tax (ISS) The major claims are regarding local tax collecting disputes;

Tax for Social Security Financing (COFINS) The major contingencies, related to merged companies refer to the increase of the rate from 2% to 3% between 1999 and 2000;

Import Duty (II) The provision made is related to the Fiscal classification of equipment importation by merged companies;

Additional Compensation to harbour workers (AITP) Amounts regarding the collection of compensation amounts for public harbour workers equalized to Private Harbour;

Income Tax and Social Contribution Essentially regarding a fiscal loss compensation and negative bases of social contribution disputing the limit of 30% of taxable earnings and monetary variations of asset from merged companies; and

Table of Contents

Others Regarding dispute of tax credit compensations and basis of calculation of Finance Compensation by Exploration of Mineral Resources CFEM.

2) Civil Contingencies:

The civil actions are principally related to claims made against us by contractors in connection with losses alleged to have been incurred by them as a result of various past government economic plans, accidents and return of land.

3) Labor Contingencies:

Labor and social security related actions principally comprise claims for (a) payment of time spent traveling from their residences to the work-place, (b) additional health and safety related payments and (c) disputes about the amount of indemnities paid upon dismissal and the one-third extra holiday pay.

In addition to the contingencies, there are other contingent provisions, which there are possible losses totaling R\$6,254,987 (R\$3,081,664, parent company) based on the advice of legal counsel, it was not necessary to constitute any provision.

(b) In connection with the Girardin Financing, the Company provides certain guarantees on behalf of Goro pursuant to which we guaranteed payments due from Goro of up to a maximum amount of US\$100 millions (Maximum Amount) in connection with an indemnity. We also provided an additional guarantee covering the payments due from Goro of: (a) amounts exceeding the Maximum Amount in connection with the indemnity and (b) certain other amounts payable by Goro under a lease agreement covering certain assets.

The Company provides a guarantee covering certain termination payments due in new Caledonia from Goro to the supplier under an electricity supply agreement (ESA) entered into in October 2004 for the Goro nickel-cobalt project. The amount of the termination payments guaranteed depends upon a number of factors, including whether any termination of the ESA is as a result of a default by Goro and the date on which an early termination of the ESA were to occur. If Goro defaults under the ESA prior to the anticipated start date for supply of electricity to the project, the termination payment, which currently is at its maximum, would be \$145 million. Once the supply of electricity under the ESA to the project begins, the guaranteed amounts will decrease over the life of the ESA.

The Company expects such guarantees to be not executed and therefore no provisions for losses have been made.

(c) At the time of our privatization in 1997, the Company issued debentures to its then-existing shareholders, including the Brazilian Government. The terms of the debentures, were set to ensure that the pre-privatization shareholders, including the Brazilian Government would participate in possible future financial benefits that could be obtained from exploiting certain mineral resources.

A total of 388,559,056 Debentures were issued at a par value of R\$0.01 (one cent), whose value is to be restated in accordance with the variation in the General Market Price Index (IGP-M), as set forth in the Issue Deed. The debenture holders are entitled to receive semi-annual payments (in may and September) equivalent to a percentage of the net revenue deriving from certain mineral resources owned in May 1997 and included in the Issue Deed.

According to the Debenture Issue Deed, the amount of the premium must include interest up to the month prior to that of effective payment, plus 1% in the month in which the funds are made available to the debenture holder. The accumulated sales of iron ore of the mines covered by the debentures, in the period between May 1997 and September 30, 2008, were 596 million metric tons in the Southeast System and 671 million metric tons in the North System, Carajas. In the event of the annual sales of iron ore remain equal to the level achieved in the last twelve months, the levels mentioned in the Issue Deed to start payment of premium of 1.7 billion metric tons for the Southeast System and 1,2 billion metric tons to the North System, would be achieved in 2018 and 2013, respectively. However, this prediction could not be confirmed and may the dates mentioned to achieve the levels of production of 1.7 billion tons (Southeast System) and 1.2 billion tons (System North) are anticipated or neglected.

In September 2008, the Company paid interest on debentures in the amount of R\$11,121 (R\$21,928 in 2007).

5.15- Provision for asset retirement obligations

On 09/30/08, the consolidated provision for asset retirement obligations amounted to R\$1,798,122 (R\$869,427 in the parent company), which was accounted for in Provision for asset retirement obligations in non-current liabilities and

R\$115,228 (R\$45,568 in the parent company) classified in Other in current liabilities.

Table of Contents**5.16- Pension Plan**

The following information shows the details the status of the defined benefit elements of the Company plans, of the valuation of actuarial obligations and of the sponsor contribution to the plans.

a) Pension Plan

The results of the actuarial valuation were as follows:

	09/30/08			Consolidated 06/30/08		
	(*) Overfunded pension plans	Underfunded pension plans	Underfunded other benefits	(*) Overfunded pension plans	Underfunded pension plans	Underfunded other benefits

5.17- Paid-up Capital

Preferred shares have the same rights as common shares, except for the right to elect the members of the Board of Directors. They have priority to a minimum annual dividend of 6% on the portion of capital represented by this class of share or 3% of the book net equity value of the share, whichever is greater.

At the Extraordinary Shareholders Meeting held on April 27, 2007 the capital stock was increased to R\$28,000,000. The capital increase is due through capitalization of the expansion/ investment reserve in the amount of R\$7,672,690 capitalization of the legal reserve in the amount of R\$751,545, and capitalization of the fiscal incentives reserve in the amount of R\$83,364 without new stock issue.

On August 30, 2007 the Extraordinary General Shareholders Meeting approved the forward-stock split. Since September 2007, each existing share, both common and preferred, became two shares.

For comparative purposes, the effects of the split were considered retroactively in the calculation of net income per share presented in the statement of income.

In July 2008, the Company issued 256,926,766 common shares and 164,402,799 preferred shares through a global offering, which consisted of a registered offering in Brazil and an international offering, which included a registered offering in the United States of America. As a result, the Company raised R\$18,450 million and increased capital by the same amount. Accordingly, capital is now composed by 3,256,726,482 common shares and 2,108,579,618 preferred shares, totaling R\$47,434 million. On August 2008, through additional offering, the Company issued 24,660,419 preferred shares, raising R\$984 million. After the closing of the operation, Vale's capital stock increased by R\$19,434 million and corresponding transaction cost of R\$161 were recorded as a reduction of the additional paid-in capital account.

The Board of Directors has the power, without the necessity of a statutory change, to deliberate the issue of new shares (authorized capital) including the capitalization of revenue and reserves until the authorized limit of 3,600,000,000 common shares and 7,200,000,000 preferred shares without par value.

The members of the Board of Directors and Executive Board together own 166,915 common shares and 715,112 preferred shares.

5.18- Resources linked to future mandatory conversion in shares

In June, 2007, the Company issued mandatory convertible notes in the amount of R\$3,601, net of interest R\$3,064, with maturity in 2010. The notes, pay a coupon of 5.50% a.a quarterly and the right to receive the participation of the additional equivalent for the distribution in cash paid to the ADS's holders. These notes were classified as a capital instrument, mainly because of the fact that there is no option, from the part of the Company or from the part of the holders to liquidate, totally or in part this operation with financial resources, being the conversion mandatory.

In alignment with the international practices and after analysis, was concluded that the Mandatory convertible notes are similar to equity notes and for this reason are recognized as a specific part of the equity, net of financial changes. The resources linked to future mandatory conversion, net of interest, are represented by a maximum of 56,582,040 common shares are equivalent to R\$2,111 and the ones represented by a maximum of 30,295,456 preferred shares are equivalent to R\$926 millions. All the shares are currently in treasury stock (see note 5.20).

On October 16, 2008, Vale announced it will pay additional interest to holders of mandatory convertible notes, the series RIO and RIO P, in the amount of R\$1.187165 and R\$1.409004, respectively, converted into U.S. dollars in accordance with a real exchange rate / U.S. dollar prevailing on 10/31/08.

Table of Contents**5.19- Incentives of long stated period**

In 2008, with the purpose of introducing a shareholders vision to certain of the Company executives, as well as improving retention and reinforcing the culture of sustainable performance, the Board of Directors approved a long-term incentive compensation plan, which was implemented in April 2008, in respect with a three-year cycle (2008 to 2010).

Under the terms of the plan, the participants, restricted to certain executives, may elect to allocate part of their annual bonuses to the plan. That portion of the bonus allocated to the plan is in fact used by the executive to purchase preferred shares of Vale, through a defined financial institution), at market conditions and with no benefit provided by Vale.

The shares purchased by each executive have no restrictions and may, at the participant's discretion, be sold at any time. However, in order to be entitled to the long-term incentive compensation plan to be provided by Vale, the amount of shares initially purchased by the executives on the plan's adoption, must be held for a three-year period, and, the executive must retain its employment relationship with Vale during that period.

Upon meeting these two conditions described above (keeping the number of shares purchased, and, remaining Vale's employees, over three years), the participant become entitled to receive from Vale, a cash payment equivalent to the total amount of shares held, based on market rates.

The Company account for the compensation cost provided to executives under this long-term incentive compensation plan, following the requirements of IFRS (International Financial Reporting 2 Share Based Payment). Liabilities are measured at each reporting date at fair value, based on market rates. Compensation costs incurred are recognized, over the defined three-year vesting period. At September 30, 2008, the Company have recognized a long-term liability of R\$6,689, relating to 714,081 shares.

5.20- Treasury Stock

On 06/21/06 the Board of Directors approved a buy-back program of its preferred shares, during a maximum term of 180 days. By the end of the program, 30,299,200 preferred shares have been acquired.

On 09/30/08, the Company had 56,582,040 common shares and 30,340,904 preferred shares, which are held in treasury in the amount of R\$790,214.

On October 16, 2008, The Board of Directors approved a program to repurchase up to 69,944,380 shares involving up to 169,210,249 common shares and preferred shares, amounting respectively to 5.5% and 8.5% of the total number of shares of each class in movement (free float) based on the equity position of 09/30/08.

5.23- Financial Instruments Derivatives

Risk Policy

Vale considers the effective management of risk a key objective to support our growth strategy and financial flexibility. In furtherance of this objective, the board of directors has established an enterprise risk management policy and a risk management committee.

The risk management policy determines that Vale must evaluate the cash flow risk regularly with the purpose of risk mitigation, when necessary, reducing the volatility in cash flow. The risk management activities are conducted in accordance with the risk management policy, which prohibits speculative transactions and requires diversification of transactions and counterparties.

The company regularly monitors and evaluates the consolidated position in order to follow the financial results and assess the impact on Vale's cash flow, to ensure that the targets originally outlined will be met. The risk management committee assists our executive officers in managing and reviewing information related to the activities of managing risk, associated with market risks, credit or operational, including relevant policies, procedures and practices used in the administration of risk.

Considering the nature of business and operations of Vale, the main market risk factors to which we are exposed are as follows:

Interest rates,

Exchange rates, and

Product Price

Vale uses major financial institutions for its hedge practices, and periodically reviews the credit limits and creditworthiness of the hedging counterparties.

Methodology of calculating fair value of the positions

The company evaluates the present value of financial instruments through the use of market curves that impact the market instrument on the dates of verification.

In the case of options, the pricing is done using the Black & Scholes model, a model widely used for evaluation of options, which basically uses the volatility and price of the underlying asset, the strike price of active-object, the exercise price of the option, the interest rate and the tenor to maturity.

In the case of swaps, both assets and liabilities are estimated independently and brought to present value, where the difference between the swap legs of the result creates the market value of the swap.

Contracts subject to margin call

Vale has contracts, with margin calls; only on derivative transactions of copper and nickel hired by Vale Inco. The total value of margin posted in cash on September is R\$31,8 million in cash. Of this amount, R\$23,4 million refers to positions that mature in 2008; and R\$8,4 million in 2009.

Exchange rate and interest rate risk

The company cash flow is subjected to volatility of several currencies against the dollar. Prices of most of our products are indexed to the U.S.dollar and represent about 94% of total revenue, whilst the majority of the costs, expenses and investments are indexed to currencies other than U.S. dollars, mainly Brazilian reais and Canadian dollars.

Thus, the reference currency for the company's basic obligations is the U.S. dollar and the potential volatility risk of the company's cash flow would be from the neglect of the indebtedness floating in Reais with the revenues, almost entirely denominated in dollars. To that end, the Company use derivative instruments, whose portfolio consists primarily of interest rate swaps to convert the cash flows from floating into cash flows in U.S. dollars at rates fixed and floating with no leverage.

Moreover, the company is exposed to interest rate risks on loans and financing. The floating rate debt in U.S. dollars includes pre-payment of exports, loans at commercial banks and multilateral organizations. In general, the floating rate debt in dollars are indexed to U.S. LIBOR (London Interbank Offered Rate). The Company considers the natural hedge between dollar and metal prices to mitigate the effects of the volatility of interest rates in our cash flow. When

there is no natural hedge, the company can choose to obtain the same effect through the use of financial instruments.

Table of Contents

The debts exposed to Brazilian floating interest rates are loans such as bonds BNDES loans and financing for the purchase of goods and services made in the Brazilian market. These debts linked to Brazilian reais are mainly indexed to CDI and TJLP.

The nominal and fair values of each instrument are shown below. In the gray area, we present the annual cash disbursements related to each position considering an hypothetical event in which the variables remain exactly as observed on 30/09/2008.

Table of Contents**Prices risk of Products**

Vale is exposed to several market risks related to the volatility of world market prices in its products. Currently, our derivatives transactions involving derivatives associated to the price of our products/inputs, including nickel, copper, gold, platinum and natural gas, all of them with the aim to reduce the impact of the volatility of the company cash flow.

Nickel The company has some future contracts on the London Metal Exchange (LME), with the aim to keep its exposure to the fluctuations of nickel prices, as our product in some cases is sold in fixed prices. The fixed part of this contracts is recorded as an embedded derivative and its market value on September 30 was R\$132,6 million. Vale also participates in future LME contracts to reduce the risk of price mismatch between cost of intermediate products and price of finished products.

	Notional Value 09/30/2008	Notional Value 06/30/08	Fair Value 09/30/2008	Fair Value 06/30/08	Receipt (Payment) Accumulated until 2008	Fair Value by due date 2008	2009	2010	2011

Besides the contracts above, we have purchase contracts of intermediate products of nickel and copper that has a pricing settlement based on commodity index, leading this contracts to be treated as embedded derivatives. The market value of this position on September 30 was R\$ 59,34 million.

Aluminum In order to reduce the volatility of cash flow after Inco's acquisition, as a result of the additional debt incurred, Vale made hedging operations of copper and aluminum. In the case of aluminum, the operations as presented below:

	Notional Value 09/30/2008	Notional Value 06/30/08	Fair Value 09/30/2008	Fair Value 06/30/08	Receipt (Payment) 09/30/2008	Accumulated until 06/30/08	Fair value by due date 2008	2009	2010

INDEPENDENT ACCOUNTANTS REVIEW REPORT

To the Shareholders and Board of Directors of
Companhia Vale do Rio Doce
Rio de Janeiro RJ

1. We have reviewed the accounting information included in the accompanying interim financial statements of Companhia Vale do Rio Doce (the Company) and subsidiaries, for the quarter ended September 30, 2008, consisting of the individual (Company) and consolidated balance sheets, the related statements of operations, changes in shareholders' equity and cash flows, the performance report and the related notes, prepared under the responsibility of the Company's management. The interim financial statements' reviews for the quarter ended September 30, 2008, of certain investees which investments were accounted for by the equity method were conducted under the responsibility of other independent auditors. Accordingly, the conclusions resulting from our review, related to the investments of the holding company as of September 30, 2008, in the amount of R\$8,145,491 thousand (R\$6,567,883 thousand, as of June 30, 2008), and the loss generated for the quarter and the gain generated for the period of nine months ended on that date in the amounts of R\$713,089 thousand and R\$467.830 thousand, respectively; and related to the consolidated total assets of R\$54,003,594 thousand as of September 30, 2008 (R\$45,511,942 thousand, as of June 30, 2008); and consolidated net operating revenues for the quarter and period of nine months ended on that date, in the amounts of R\$3,266,096 thousand and R\$11,476,275 thousand, respectively; are based exclusively on those other auditors' reviews report.
2. Except as mentioned in paragraph 3, our review was conducted in accordance with specific standards established by the Brazilian Institute of Independent Auditors (IBRACON), together with the Brazilian Federal Accounting Council (CFC), and consisted, principally, of: (a) inquiries of and discussions with certain officials of the Company and its subsidiaries who have responsibility for accounting, financial and operating matters about the criteria adopted in the preparation of the interim financial statements; and (b) review of the information and subsequent events that have, or might have had, material effects on the financial position and results of operations of the Company and its subsidiaries.

Table of Contents

3. The financial statements for the quarter ended September 30, 2008, of certain investees, in which there are relevant investments accounted for by the equity method, have not been reviewed by independent auditors. Accordingly, the conclusions resulting from our review do not cover: R\$24,120,628 thousand of these investments of the holding company as of September 30, 2008 (R\$16,980,219 thousand, as of June 30, 2008); R\$331,137 thousand of the losses for the quarter ended September 30, 2008 (gains generated in 2007, amounting to R\$409,299 thousand) and R\$410,436 thousand of the gains generated for period of nine months ended on that date (R\$624,989 thousand, in 2007); consolidated total assets of R\$9,100,439 thousand as of September 30, 2008 (R\$5,345,399 thousand, as of June 30, 2008); and consolidated net operating revenues for the quarter ended September 30, 2008 in the amount of R\$1,748,273 thousand (R\$936,455 thousand, in 2007) and R\$3.467,284 thousand for the period of nine months ended on that date (R\$2,769,802 thousand, in 2007).
4. Based on our review and on other auditors' reviews reports and, except for the effects of the adjustments, if any, which might have been required if the financial statements of the investees, mentioned in paragraph 3 had been reviewed by independent auditors, we are not aware of any material modifications that should be made to the accounting information included in the interim financial statements referred to in paragraph 1 for them to be in conformity with standards established by the Brazilian Securities and Exchange Commission (CVM), specifically applicable to the preparation of the interim financial statements, including CVM Instruction No. 469, of May 2, 2008.
5. As mentioned in note 5.3, on December 28, 2007, Law No. 11,638/07 was enacted, altering, revoking and adding new provisions to Law No. 6,404/76 (Brazilian Corporate Law). This Law is effective for fiscal years beginning on or after January 1, 2008 and introduced changes in Brazilian accounting practices. Although this Law has already become effective, certain changes introduced by it are subject to regulation by regulatory agencies before being fully applied by companies. Accordingly, during this transition phase, CVM, through the Instruction No. 469/08, has permitted companies not to apply all the provisions of Law No. 11,638/07 in the preparation of the interim financial statements. Thus, the accounting information contained in the interim Financial statements for the quarter ended September 30, 2008 have been prepared in conformity with specific instructions of the CVM and do not include all the changes in accounting practices introduced by Law No. 11,638/07.
6. The accompanying interim financial statements have been translated into English for the convenience of readers outside Brazil.

Table of Contents**B- Additional Information****8- Cash generation (unaudited)**

Consolidated operating cash generation measured by EBITDA (earnings before financial results, equity in subsidiaries, interest, taxes, depreciation, amortization and depletion, increased by dividends received) was R\$ 28,463,242 as of September 30, 2008 against R\$ 27,188,495 as of September 30, 2007, a decrease of 4.7%.

EBITDA is not a BR GAAP measure and does not represent the expected cash flow for the reporting periods and, therefore, should not be considered as an alternative measure to net income (loss), as an indicator of our operating performance or as an alternative to cash flow as a liquidity source.

Our definition of EBITDA may not be comparable with EBITDA as defined by other companies.

Table of Contents**9- Management's Discussion and Analysis of the Operating Results in September 30, 2008**

In analyzing this information, some general aspects should be considered, as follows:

On September 30, 2008, about 94% of consolidated gross revenue and 42% of consolidated total costs are linked to currencies other than Brazilian reais. As a result, exchange rate fluctuations have a significant impact on financial income (expenses).

The average dollar rate fell 15.8% between periods (R\$ 1.6864 as of September 30, 2008 against R\$ 2.0018 as of September 30, 2007), partially offset by increases in prices, whereas exchange rates between the periods fell 4.1% (R\$ 1.9143 as of September 30, 2008 against R\$ 1.8389 as of September 30, 2007).

The Consolidated Trade Balance performance was as follows:

	In US\$ million				
	Quarter			Accumulated	
	3Q/08	2Q/08	3Q/07	09/30/08	09/30/07
Exports	6,319	3,886	2,855	13,219	9,216

(**) The Company carried through its railroad system of 7.198, 7.247, 8.064, 20.192 and 22.943 millions of TKUs of general cargo and 2.762, 2.570, 3.163, 7.857 and 8.947 millions of TKUs of iron ore for third parties in 3Q/08, 2Q/08, 3Q/07, 09/30/08 and 09/30/07, respectively.

Table of Contents

Sales volume and revenues by products and services:

The 7.8% gross revenue decrease, from R\$50,863,139 on September 30, 2007 to R\$54,820,199 as of September 30, 2008 was due to:

A decrease in prices charged for nickel sales; and

A real valuation comparing to dollar of 4.1%.

	58%	42%					

The 9.7% increase in cost of products and services (R\$21,923,591 as of September 30, 2007 against R\$24,044,743 on September 30, 2008) was due to variations in volumes sold and adjustments to prices of materials, oil and gas, electricity and services that comprise production costs during the period.

9.1.3- Selling and administrative expenses

The costs of sales increased 42.9%, of R\$260,598 on September 30, 2007 to R\$372,391 on September 30, 2008, due primarily to Vale Australia Royalties and demurrage payments, while administrative expenses increased 2.7%, from R\$1,489,590 at September 30, 2007 as of R\$1,529,548 on September 30, 2008.

9.1.4- Research and development

Research and development expenses increased by 44.7%, from R\$935,035 as of September 30, 2007 to R\$1,353,039 as of September 30, 2008, reflecting Vale's plan to diversify production and expand production to meet global demand.

9.1.5- Other operating expenses

Other operating expenses increased R\$413,417, from R\$810,064 as September 30, 2007 to R\$1,223,481 on September 30, 2008, basically due to provision for inventory of the Vale and performance bonus of Vale International.

9.1.6- Net financial results

Net financial results varied R\$1,516,383 (R\$1,633,790 as of September 30, 2008 against R\$117,407 as of September 30, 2007), reflecting the effects of exchange rate variation of Brazilian real against US dollar on the debt.

Table of Contents

9.1.7- Income tax and social contribution

Income and social contribution tax expenses totaled R\$3,431,737 as of September 30, 2008 compared to R\$6,902,695 as of September 30, 2007, mainly due to a decrease in taxable income.

9.2- Parent Company

9.2.1- Gross revenue

The 49.1% increase in gross revenue (R\$24,878,808 as of September 30, 2008 against R\$16,689,166 as of September 30, 2007) is a result of a 25.7% increase in volume of iron ore sold. These positive effects on the Company's revenue were partially decreased by the average valuation of 4.1% of Brazilian real against US dollar on the Company's revenue.

9.2.2- Cost of products and services

Cost of products and services sold as of September 30, 2008 was R\$11,967,244, against R\$9,266,379 as of September 30, 2007, representing a 29.1% increase. The main factors for such increase include higher volumes sold, contracts adjustments and increase in base of assets, which ultimately resulted in an increase in depreciation expenses.

9.2.3- Gross margin

Gross margin decreased 1.1% (from 55.9% as of September 30, 2007 to 54.8% as of September 30, 2008) mainly due to dollar devaluation against Brazilian real.

9.2.4- Equity Results

Equity in subsidiaries increased by R\$5,210,323 from R\$8,402,127 as of September 30, 2007 to R\$13,612,450 as of September 30, 2008 mainly due to dollar devaluation in the period.

9.2.5- Selling and administrative expenses

Selling expenses increased by R\$12,297, from R\$10,804 as of September 30, 2007 to R\$23,101 as of September 30, 2008, while administrative expenses increased 28.6% from R\$715,413 as of September 30, 2007 to R\$919,791 as of September 30, 2008, basically due to an increase in personnel expenses due to collective bargaining, professional service fees and infrastructure and support expenses, and .

9.2.6- Research and development

Research and development increased by 59%, from R\$473,635 as of September 30, 2007 to R\$753,146 as of September 30, 2008, reflecting Vale's plan to diversify production and expand production to meet global demand.

9.2.7- Other operating expenses (income)

Other operating expenses increased by R\$166,093, from income of R\$160,919 as of September 30, 2007 to income of R\$327,012 as of September 30, 2008.

9.2.8- Net financial results

Net financial results as of September 30, 2008 had a negative impact of R\$6,266,357 (income of R\$3,384,185 as of September 30, 2008 against R\$2,882,172 as of September 30, 2007) basically due to the exchange rate variation effect of Brazilian Real against dollar for the foreign debt.

9.2.9- Income tax and social contribution

Income tax and social contribution revenue totaled R\$639,505 as of September 30, 2008 compared to R\$2,169,014 as of September 30, 2007, mainly due to a decrease in taxable income.
