Invesco Mortgage Capital Inc.

Common Stock

Invesco Mortgage Capital Inc. is a Maryland corporation focused on investing in, financing and managing residential and commercial mortgage-backed securities and mortgage loans. We invest in residential mortgage-backed securities for which a U.S. government agency or a federally chartered corporation guarantees payments of principal and interest on the securities. In addition, we invest in residential mortgage-backed securities that are not issued or guaranteed by a U.S. government agency, commercial mortgage-backed securities and mortgage loans. We generally finance our agency residential mortgage-backed securities, and may finance our non-agency residential mortgage-backed securities, through repurchase agreement financing. We finance our investments in commercial mortgage-backed securities with financings under the U.S. government's Term Asset-Backed Securities Loan Facility or with private financing sources. We may finance our investments in certain non-agency residential mortgage-backed securities, commercial mortgage-backed securities and residential and commercial mortgage loans by contributing capital to one or more of the Legacy Securities Public-Private Investment Funds that receive financing under the U.S. government's Public-Private Investment Program. We are externally managed and advised by Invesco Advisers, Inc., (formerly Invesco Institutional (N.A.), Inc.) a Delaware corporation and an indirect, wholly-owned subsidiary of Invesco Ltd., an independent global investment company listed on the New York Stock Exchange (NYSE: IVZ).

We are offering 7,000,000 shares of our common stock as described in this prospectus. Our common stock is traded on the New York Stock Exchange under the symbol **IVR**. The last reported sale price of our common stock on the NYSE was \$21.50 on January 11, 2010.

We intend to elect and qualify to be taxed as a real estate investment trust for U.S. federal income tax purposes, commencing with our taxable year ending December 31, 2009. To assist us in qualifying as a real estate investment trust, among other purposes, shareholders are generally restricted from owning more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock. Different ownership limits apply to Invesco Ltd. and its direct and indirect subsidiaries, including but not limited to Invesco Advisers, Inc. and Invesco Investments (Bermuda) Ltd. In addition, our charter contains various other restrictions on the ownership and transfer of our common stock. See **Description of Capital Stock** **Restrictions on Ownership and Transfer**.

Investing in our common stock involves risks. See **Risk Factors beginning on page 19 of this prospectus for a discussion of these risks.**

	Per Share	Total
Public offering price	\$ 21.25	\$ 148,750,000
Underwriting discounts and commissions	\$ 1.01	\$ 7,065,625
Proceeds to us, before expenses	\$ 20.24	\$ 141,684,375

The underwriters may also purchase up to an additional 1,050,000 shares of our common stock from us at the public offering price, less the underwriting discount, within 30 days after the date of this prospectus to cover over-allotments, if any.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The shares will be ready for delivery on or about January 15, 2010.

Table of Contents

SUMMARY

This summary highlights some of the information in this prospectus. It does not contain all of the information that you should consider before investing in our common stock. You should read carefully the more detailed information set forth under Risk Factors and the other information included in this prospectus. Except where the context suggests otherwise, the terms company, we, us, and our refer to Invesco Mortgage Capital Inc., a Maryland corporation, together with its consolidated subsidiaries, including IAS Operating Partnership LP, a Delaware limited partnership, which we refer to as our operating partnership; our Manager refers to Invesco Advisers, Inc. (formerly Invesco Institutional (N.A.) Inc.), a Delaware corporation, our external manager; Invesco refers to Invesco Ltd., together with its consolidated subsidiaries (other than us), the indirect parent company of our Manager.

Our Company

We are a Maryland corporation focused on investing in, financing and managing residential and commercial mortgage-backed securities and mortgage loans, which we collectively refer to as our target assets. We invest in residential mortgage-backed securities, or RMBS, for which a U.S. government agency such as the Government National Mortgage Association, or Ginnie Mae, or a federally chartered corporation such as the Federal National Mortgage Association, or Fannie Mae, or the Federal Home Loan Mortgage Corporation, or Freddie Mac, guarantees payments of principal and interest on the securities. We refer to these securities as Agency RMBS. Our Agency RMBS investments include mortgage pass-through securities and may include collateralized mortgage obligations, or CMOs. We also invest in RMBS that are not issued or guaranteed by a U.S. government agency, or non-Agency RMBS, commercial mortgage-backed securities, or CMBS, and residential and commercial mortgage loans.

We generally finance our Agency RMBS investments, and may finance our non-Agency RMBS investments, through traditional repurchase agreement financing. In addition, we finance our investments in CMBS with financings under the U.S. government's Term Asset-Backed Securities Loan Facility, or TALF, or with private financing sources. We also finance our investments in certain non-Agency RMBS, CMBS and residential and commercial mortgage loans by contributing capital to a public-private investment fund, or PPIF, managed by our Manager, or the Invesco PPIF Fund, which, in turn, invests in our target assets. The Invesco PPIF Fund receives financing from the U.S. Treasury and from the Federal Deposit Insurance Corporation, or FDIC.

We were incorporated in Maryland on June 5, 2008, and commenced operations in July 2009. On July 1, 2009, we successfully completed our initial public offering, or IPO, generating net proceeds of \$165.0 million. Concurrent with our IPO, we completed a private offering in which we sold \$1.5 million of our common stock to our Manager and \$28.5 million of units of limited partnership interests in our operating partnership, or OP units, to Invesco Investments (Bermuda) Ltd. On July 27, 2009, the underwriters of our IPO exercised their over-allotment option for net proceeds of \$6.1 million. Collectively, we received net proceeds from our IPO and the concurrent private offering of approximately \$201.1 million. We have primarily invested the net proceeds from our IPO and private offering, as well as monies that we borrowed under repurchase agreements and TALF, to purchase a \$881.9 million investment portfolio as of September 30, 2009, which primarily consisted of \$670.1 million in Agency RMBS, \$104.4 million in non-Agency RMBS, \$83.4 million in CMBS and \$24.0 million in CMOs.

Our objective is to provide attractive risk-adjusted returns to our investors, primarily through dividends and secondarily through capital appreciation. To achieve this objective, we selectively acquire target assets to construct a diversified investment portfolio designed to produce attractive returns across a variety of market conditions and economic cycles.

Edgar Filing: Invesco Mortgage Capital Inc. - Form 424B4

We intend to elect and qualify to be taxed as a real estate investment trust, or REIT, for U.S. federal income tax purposes, commencing with our current taxable year ending December 31, 2009. Accordingly, we generally will not be subject to U.S. federal income taxes on our taxable income that we distribute currently to our shareholders as long as we maintain our intended qualification as a REIT. We operate our business in a

Table of Contents

manner that permits us to maintain our exemption from registration under the Investment Company Act of 1940, as amended, or the 1940 Act.

Our Manager

We are externally managed and advised by Invesco Advisers, Inc. (formerly Invesco Institutional (N.A.), Inc.), or our Manager, an SEC-registered investment adviser and indirect wholly owned subsidiary of Invesco. Invesco is a leading independent global investment management company with \$416.9 billion in assets under management as of September 30, 2009. With over 25 years of experience, Invesco's teams of dedicated professionals have developed exceptional track records across multiple fixed income sectors and asset classes, including structured securities, such as RMBS, asset-backed securities, or ABS, CMBS, and leveraged loan portfolios.

Effective December 31, 2009, several affiliates of our Manager merged with and into our Manager and our Manager filed a certificate of ownership and merger in connection with such merger, changing its name from Invesco Institutional (N.A.), Inc. to Invesco Advisers, Inc.

Pursuant to the terms of the management agreement, our Manager provides us with our management team, including our officers, along with appropriate support personnel. Each of our officers is an employee of Invesco. We do not have any employees. With the exception of our Chief Financial Officer, our Manager does not dedicate any of its employees exclusively to us, nor is our Manager or its employees obligated to dedicate any specific portion of its or their time to our business. Our Manager is at all times subject to the supervision and oversight of our board of directors and has only such functions and authority as our board of directors delegates to it.

Invesco Aim Advisors, Inc., or Invesco Aim Advisors, an affiliate of our Manager, served as our sub-adviser pursuant to an agreement between our Manager and Invesco Aim Advisors, and merged with and into Invesco Advisers, Inc. on December 31, 2009.

Our Strategies

Investments

We invest in a diversified pool of mortgage assets that generate attractive risk adjusted returns. Our target assets include Agency RMBS, non-Agency RMBS, CMBS and residential and commercial mortgage loans. In addition to direct purchases of our target assets, we also invest in the Invesco PPIP Fund, which, in turn, invests in our target assets. Our Manager's investment committee makes investment decisions for the Invesco PPIP Fund.

As of September 30, 2009, 37% of our equity was invested in Agency RMBS, 48% in non-Agency RMBS, 9% in CMBS and 6% in other assets (including cash and restricted cash). As of September 30, 2009, we had not made an initial investment in the Invesco PPIP Fund.

Leverage

We use leverage on our target assets to achieve our return objectives. For our investments in Agency RMBS, we focus on securities we believe provide attractive returns when levered approximately 6 to 8 times. For our investments in non-Agency RMBS, we primarily focus on securities we believe provide attractive unlevered returns, however, in the future we may employ leverage of up to 1 time. We leverage our CMBS 3 to 5 times.

Financing

We finance our investments in Agency RMBS, and we may in the future finance our investments in non-Agency RMBS, primarily through short-term borrowings structured as repurchase agreements. In addition, we currently finance our investments in CMBS with financing under the TALF and with private financing sources. We also finance our investments in certain non-Agency RMBS, CMBS and residential and commercial

Table of Contents

mortgage loans by investing in the Invesco PPIP Fund, which, in turn, receives financing from the U.S. Treasury and from the FDIC.

As of September 30, 2009, we had entered into master repurchase agreements with 15 counterparties and have borrowed \$615.0 million under those master repurchase agreements to finance our purchases of Agency RMBS. In addition, as of September 30, 2009, we had entered into 3 interest rate swap agreements, for a notional amount of \$375 million, designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements. At September 30, 2009, we have secured borrowings of \$64.8 million under the TALF. Finally, as of September 30, 2009, we have a commitment to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets.

Risk Management Strategy

Interest Rate Hedging

Subject to maintaining our qualification as a REIT, we engage in a variety of interest rate management techniques that seek on one hand to mitigate the influence of interest rate changes on the costs of our liabilities and on the other hand to help us achieve our risk management objective. We utilize derivative financial instruments, including, among others, puts and calls on securities or indices of securities, interest rate swaps, interest rate caps, interest rate swaptions, exchange-traded derivatives, U.S. Treasury securities and options on U.S. Treasury securities and interest rate floors to hedge all or a portion of the interest rate risk associated with the financing of our investment portfolio. Specifically, we seek to hedge our exposure to potential interest rate mismatches between the interest we earn on our investments and our borrowing costs caused by fluctuations in short-term interest rates. In utilizing leverage and interest rate hedges, we seek to improve risk-adjusted returns and, where possible, to lock in, on a long-term basis, a favorable spread between the yield on our assets and the cost of our financing. We rely on our Manager's expertise to manage these risks on our behalf. We may implement part of our hedging strategy through a domestic taxable REIT subsidiary, or TRS, which will be subject to U.S. federal, state and, if applicable, local income tax.

Market Risk Management

Risk management is an integral component of our strategy to deliver returns to our shareholders. Because we invest in mortgage-backed securities, or MBS, investment losses from voluntary or involuntary prepayments, interest rate volatility or other risks can meaningfully reduce or eliminate our distributions to shareholders. In addition, because we employ financial leverage in funding our investment portfolio, mismatches in the maturities of our assets and liabilities can create the need to continually renew or otherwise refinance our liabilities. Our net interest margins are dependent upon a positive spread between the returns on our asset portfolio and our overall cost of funding. To minimize the risks to our portfolio, we actively employ portfolio-wide and security-specific risk measurements and management processes in our daily operations. Our Manager's risk management tools include software and services licensed or purchased from third parties, in addition to proprietary software and analytical methods developed by Invesco.

Credit Risk

We believe our investment strategy generally keeps our credit losses and financing costs low. However, we retain the risk of potential credit losses on all of the residential and commercial mortgage loans, as well as the loans underlying the non-Agency RMBS and CMBS we hold. We seek to manage this risk through our pre-acquisition due diligence process and through the use of non-recourse financing, which limits our exposure to credit losses to the specific pool of mortgages that are subject to the non-recourse financing when available. In addition, with respect to any particular target asset, our Manager's investment team evaluates, among other things, relative valuation, supply and demand

trends, shape of yield curves, prepayment rates, delinquency and default rates, recovery of various sectors and vintage of collateral.

Table of Contents

Our Investments

Our Target Assets

Our target asset classes and the principal assets in which we invest are as follows:

Asset Classes

Principal Assets

Agency RMBS

Mortgage Pass-Through Certificates. Single-family residential mortgage pass-through certificates are securities representing interests in pools of mortgage loans secured by residential real property where payments of both interest and principal, plus pre-paid principal, on the securities are made monthly to holders of the securities, in effect passing through monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer/guarantor and servicers of the securities. These mortgage pass-through certificates are guaranteed by Ginnie Mae, Fannie Mae or Freddie Mac.

Collateralized Mortgage Obligations. Collateralized mortgage obligations, or CMOs, are securities which are structured from U.S. government agency, or federally chartered corporation-backed mortgage pass-through certificates. CMOs receive monthly payments of principal and interest. CMOs divide the cash flows which come from the underlying mortgage pass-through certificates into different classes of securities. CMOs can have different maturities and different weighted average lives than the underlying mortgage pass-through certificates. CMOs can re-distribute the risk characteristics of mortgage pass-through certificates to better satisfy the demands of various investor types. These risk characteristics would include average life variability, prepayments, volatility, floating versus fixed interest rate and payment and interest rate risk.

Non-Agency RMBS

RMBS that are not issued or guaranteed by a U.S. government agency or federally chartered corporation, with an emphasis on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations.

CMBS

Fixed and floating rate commercial mortgage backed securities, with an emphasis on securities that when originally issued were rated in the highest rating category by one or more of the nationally recognized statistical rating organizations.

Residential Mortgage Loans

Prime Mortgage Loans. Prime mortgage loans are mortgage loans that are underwritten to guidelines most similar to U.S. government agency underwriting guidelines. Jumbo prime mortgage loans are mortgage loans that are underwritten to guidelines most similar to U.S. government agency underwriting guidelines except that the mortgage balance exceeds the maximum amount permitted by the guidelines.

Commercial Mortgage Loans

Alt-A Mortgage Loans. Alt-A mortgage loans are mortgage loans made to borrowers whose qualifying mortgage characteristics do not conform to U.S. government agency underwriting guidelines, but whose borrower characteristics may. Generally, Alt-A loans allow homeowners to qualify for a mortgage loan with reduced or alternative forms of documentation.

Subprime Mortgage Loans. Subprime mortgage loans are loans that do not conform to U.S. government agency underwriting guidelines.

First or second lien loans on commercial real estate, subordinate interests in first mortgages on commercial real estate, or B-Notes on commercial real estate, bridge loans to be used in the acquisition, construction or redevelopment of a property and mezzanine financings.

Table of Contents***Our Investment Activities***

As of September 30, 2009, 37% of our equity was invested in Agency RMBS, 48% in non-Agency RMBS, 9% in CMBS and 6% in other assets (including cash and restricted cash). In addition, we made a commitment to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets. As of September 30, 2009, we had not funded any of the commitment. For our investments in Agency RMBS, as of September 30, 2009, we had purchased approximately \$237.1 million in 30-year fixed rate securities that offered higher coupons and call protection based on the collateral attributes. We balanced this with approximately \$277.2 million in 15-year fixed rate securities, approximately \$145.5 million in hybrid ARMs and approximately \$10.3 million in ARMs we believe to have similar durations based on assumed prepayment speeds. In addition, as of September 30, 2009, we had purchased approximately \$24.0 million in CMOs. As of September 30, 2009, we had purchased approximately \$104.4 million non-Agency RMBS. For investments in CMBS, our primary focus is on investing in AAA rated securities issued prior to 2008. As of September 30, 2009, we had purchased approximately \$83.4 million in CMBS and financed the purchases with a \$64.8 million TALF loan.

Our Investment Portfolio

The following table summarizes certain characteristics of our investment portfolio as of September 30, 2009:

\$ in thousands	Principal Balance	Unamortized Premium (Discount)	Amortized Cost	Unrealized Gain/(Loss)	Fair Value	Net Weighted Average Coupon⁽¹⁾	Average Yield⁽²⁾
Agency RMBS:							
15-year fixed-rate	264,787	9,653	274,440	2,786	277,226	4.83%	3.77%
30-year fixed-rate	221,764	14,732	236,496	634	237,130	6.43%	4.46%
ARM	10,335	233	10,568	(276)	10,292	2.72%	2.34%
Hybrid ARM	138,771	6,628	145,399	85	145,484	5.08%	4.08%
Total Agency RMBS	635,657	31,246	666,903	3,229	670,132	5.41%	4.06%
MBS-CMO	22,313	1,116	23,429	620	24,049	6.50%	4.23%
Non-Agency RMBS	159,200	(63,129)	96,071	8,314	104,385	4.34%	18.45%
CMBS	87,272	(4,627)	82,645	727	83,372	5.13%	6.24%
Total	904,442	(35,394)	869,048	12,890	881,938	5.22%	5.86%

(1) Weighted average coupon is presented net of servicing and other fees.

(2) Average yield incorporates future prepayment assumptions.

The following table summarizes certain characteristics of our investment portfolio, at fair value, according to their estimated weighted average life classifications as of September 30, 2009:

\$ in thousands

September 30, 2009

Less than one year	
Greater than one year and less than five years	538,405
Greater than or equal to five years	343,533
Total	881,938

Table of Contents

The following table presents certain information about the carrying value of our available for sale MBS as of September 30, 2009:

\$ in thousands	September 30, 2009
Principal balance	904,442
Unamortized premium	32,362
Unamortized discount	(67,756)
Gross unrealized gains	14,669
Gross unrealized losses	(1,779)
Carrying value/estimated fair value	881,938

Our Financing

Following the closing of our IPO, we entered into repurchase agreements to finance the majority of our Agency RMBS. These agreements are secured by our Agency RMBS and bear interest at rates that have historically moved in close relationship to the London Interbank Offer Rate, or LIBOR. As of September 30, 2009, we had entered into repurchase agreements totaling \$615.0 million. As of September 30, 2009 we had secured borrowings of \$64.8 million under the TALF, which we used to fund our CMBS portfolio. Under the TALF, the Federal Reserve makes non-recourse loans to borrowers to fund purchases of asset-backed securities. The TALF loans are non-recourse and mature in July and August 2014. Finally, we committed to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets.

As of September 30, 2009, we had entered into three interest rate swap agreements designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements. These swap agreements provide for fixed interest rates indexed off of one-month LIBOR and effectively fix the floating interest rates on \$375 million of borrowings under our repurchase agreements. We intend to continue to add interest rate hedge positions according to our hedging strategy.

Investment Guidelines

Our board of directors has adopted the following investment guidelines:

no investment shall be made that would cause us to fail to qualify as a REIT for federal income tax purposes;

no investment shall be made that would cause us to be regulated as an investment company under the 1940 Act;

our investments will be in our target assets; and

until appropriate investments can be identified, our Manager may pay off short-term debt or invest the proceeds of this and any future offerings in interest-bearing, short-term investments, including funds that are consistent with our intention to qualify as a REIT.

These investment guidelines may be changed from time to time by our board of directors without the approval of our shareholders.

Dividend Policy

We intend to continue to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates on its undistributed taxable income. We intend to continue to pay regular quarterly dividends to our shareholders in an amount equal to our net taxable income. Before we pay any dividend, whether for U.S. federal income tax purposes or otherwise, we must first meet both our operating requirements and debt service on our repurchase agreements and other debt payable. If our cash available for distribution is less than our net taxable income, we could be required to sell assets or borrow funds to make

Table of Contents

cash distributions, or we may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities.

On October 13, 2009, we declared a dividend of \$0.61 per share of common stock to shareholders of record as of October 23, 2009 and paid such dividend on November 12, 2009. On December 17, 2009, we declared a dividend of \$1.05 per share of common stock to shareholders of record as of December 31, 2009 and will pay such dividend on January 27, 2010. The December 17, 2009 dividend represents our estimate of undistributed taxable earnings for 2009 and includes approximately \$0.19 per share of estimated gains on the sale of mortgage-backed securities during the fourth quarter. Investors in this offering will not be entitled to receive this dividend.

Our Competitive Advantages

We believe that our competitive advantages include the following:

Significant Experience of Our Manager

Our Manager's senior management team has a long track record and broad experience in managing residential and commercial mortgage-related assets through a variety of credit and interest rate environments and has demonstrated the ability to generate attractive risk-adjusted returns under different market conditions and cycles. In addition, our Manager benefits from the insight and capabilities of Invesco's distressed investment subsidiary, WL Ross & Co. LLC, or WL Ross, and Invesco's real estate team. Through Invesco's WL Ross subsidiary and real estate team, we have access to broad and deep teams of experienced investment professionals in real estate and distressed investing. Through these teams, we have real time access to research and data on the mortgage and real estate industries. Access to these in-house resources and expertise provides us with a competitive advantage over other companies investing in our target assets who have less internal resources and expertise.

Rigorous Counterparty Review and Approval Process

Our Manager follows an established process to mitigate counterparty risk. All repurchase agreement counterparty approval requests undergo a review and approval process to determine whether the proposed counterparty meets established criteria. This process involves a credit analysis of each prospective counterparty to ensure that it meets our Manager's internal credit risk requirements, a review of the counterparty's audited financial statements, credit ratings and clearing arrangements, and a regulatory background check. In addition, all approved counterparties are monitored on an ongoing basis by our Manager's credit team and, if they deem a credit situation to be deteriorating, the credit team has the ability to restrict or terminate trading with such counterparty.

Extensive Strategic Relationships and Experience of our Manager and its Affiliates

Our Manager and its affiliates maintain extensive long-term relationships with other financial intermediaries, including primary dealers, leading investment banks, brokerage firms, leading mortgage originators and commercial banks. We believe these relationships enhance our ability to source, finance and hedge investment opportunities and, thus, enable us to grow in various credit and interest rate environments.

Disciplined Investment Approach

We seek to maximize our risk-adjusted returns through our Manager's disciplined investment approach, which relies on rigorous quantitative and qualitative analysis. Our Manager monitors our overall portfolio risk and evaluates the characteristics of our investments in our target assets including, but not limited to, loan balance distribution, geographic concentration, property type, occupancy, and periodic interest rate caps, which limit the amount an interest

rate can increase during any given period, or lifetime interest rate caps, weighted-average loan-to-value and weighted-average credit score. In addition, with respect to any particular target asset, our Manager's investment team evaluates, among other things, relative valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates recovery of various sectors and

Table of Contents

vintage of collateral. We believe this strategy and our commitment to capital preservation provides us with a competitive advantage when operating in a variety of market conditions.

Access to Our Manager's Sophisticated Analytical Tools, Infrastructure and Expertise

We utilize our Manager's proprietary and third-party mortgage-related security and portfolio management tools to generate an attractive net interest margin from our portfolio. We engage in an in-depth analysis of the numerous factors that influence our target assets, including fundamental market and sector review, rigorous cash flow analysis, disciplined security selection, controlled risk exposure and prudent balance sheet management. We utilize these tools to guide the hedging strategies developed by our Manager to the extent consistent with satisfying the requirements for qualification as a REIT. We use our Manager's proprietary technology management platform called QTechSM to monitor investment risk. QTechSM collects and stores real-time market data and integrates market performance with portfolio holdings and proprietary risk models to measure portfolio risk positions. This measurement system portrays overall portfolio risk and its sources. In addition, our Manager utilizes First American CoreLogic's LoanPerformance loan-level RMBS securities database to obtain detailed information about the performance and characteristics of the loans that collateralize each security. We also employ the LoanPerformance HPI and TrueLTV products to determine current property values and calculate current loan to value ratios for use in projecting individual default probabilities and loss severities. Through the use of these tools, we analyze factors that affect the rate at which mortgage prepayments occur, including changes in the level of interest rates, directional trends in residential and commercial real estate prices, general economic conditions, the locations of the properties securing the mortgage loans and other social and demographic conditions in order to acquire target assets that we believe are undervalued. We believe that sophisticated analysis of both macro and micro economic factors enables us to manage cash flow and distributions while preserving capital.

Our Manager has created and maintains analytical and portfolio management capabilities to aid in security selection and risk management. We capitalize on the market knowledge and ready access to data across our target markets that our Manager and its affiliates obtain through their established platform. We also benefit from our Manager's comprehensive financial and administrative infrastructure, including its risk management and financial reporting operations, as well as its business development, legal and compliance teams.

Alignment of Invesco and Our Manager's Interests

Invesco, through our Manager, beneficially owns 75,100 shares of our common stock and, through Invesco Investments (Bermuda) Ltd., beneficially owns 1,425,000 units of partnership interests in our operating partnership, which are redeemable for cash or, at our election, shares of our common stock on a one-for-one basis. Assuming redemption of all OP units owned by the Invesco Investments (Bermuda) Ltd. for the equivalent number of shares of our common stock, Invesco would beneficially own (through the holdings of Invesco Investments (Bermuda) Ltd. and our Manager) approximately 9% of our common stock after giving effect to the sale of 7,000,000 shares in this offering. We believe that Invesco's ownership of our common stock and partnership interests in our operating partnership aligns Invesco and our Manager's interests with our interests.

Tax Advantages of REIT Qualification

Assuming that we meet, on a continuing basis, various qualification requirements imposed upon REITs by the Internal Revenue Code, we will generally be entitled to a deduction for dividends that we pay and, therefore, will not be subject to U.S. federal corporate income tax on our taxable income that is distributed currently to our shareholders. This treatment substantially eliminates the double taxation at the corporate and shareholder levels that generally results from investment in a corporation.

Table of Contents

Summary Risk Factors

An investment in shares of our common stock involves various risks. You should consider carefully the risks discussed below and under the heading "Risk Factors" beginning on page 19 of this prospectus before purchasing our common stock. If any of the following risks occur, our business, financial condition or results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline, and you may lose some or all of your investment.

We are dependent on our Manager and its key personnel for our success. In addition, we rely on our financing opportunities relating to our repurchase agreement financings that have been and will be facilitated and/or provided by our Manager.

Invesco and our Manager have limited experience operating a REIT or managing a portfolio of our target assets on a leveraged basis and we cannot assure you that our Manager's past experience will be sufficient to successfully manage our business as a REIT with such a portfolio.

There are conflicts of interest in our relationship with our Manager and Invesco, which could result in decisions that are not in the best interests of our shareholders.

The management agreement with our Manager was not negotiated on an arm's-length basis and may not be as favorable to us as if it had been negotiated with an unaffiliated third party and may be costly and difficult to terminate.

Our board of directors approved very broad investment guidelines for our Manager and does not approve each investment and financing decision made by our Manager.

There can be no assurance that the actions of the U.S. government, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies for the purpose of stabilizing the financial markets, including the establishment of the TALF and the U.S. government's Public-Private Investment Program, or PPIP, or market responses to those actions, will achieve the intended effect, and our business may not benefit from these actions and further government actions, or the cessation or curtailment of current U.S. government programs and/or participation in the mortgage and securities markets, or market developments could adversely impact us.

We may change any of our strategies, policies or procedures without shareholder consent.

We have a limited operating history and may not be able to successfully operate our business or generate sufficient revenue or sustain distributions to our shareholders.

Maintenance of our 1940 Act exemption imposes limits on our operations.

We use leverage in executing our business strategy, which may adversely affect the return on our assets and may reduce cash available for distribution to our shareholders, as well as increase losses when economic or financial conditions are unfavorable.

Our inability to access repurchase agreement or other sources of non-governmental sources of financing would have a material adverse affect on our business.

As a result of recent market events, including the contraction among and failure of certain lenders, it may be more difficult for us to secure non-governmental financing.

An increase in our borrowing costs relative to the interest we receive on investments in our target assets may adversely affect our profitability and our cash available for distribution to our shareholders.

Hedging against interest rate exposure may adversely affect our earnings, which could reduce our cash available for distribution to our shareholders.

We may allocate the net proceeds from this offering to investments with which you may not agree.

Our investments may be concentrated and will be subject to risk of default.

Table of Contents

Continued adverse developments in the residential and commercial mortgage markets, including increases in defaults, credit losses and liquidity concerns, could make it difficult for us to borrow money to acquire our target assets on a leveraged basis, on attractive terms or at all, which could adversely affect our profitability.

We operate in a highly competitive market for investment opportunities and competition may limit our ability to acquire desirable investments in our target assets and could also affect the pricing of these target assets.

We may acquire non-Agency RMBS collateralized by Alt-A and subprime mortgage loans, which are subject to increased risks.

The mortgage loans that we acquire, and the mortgage and other loans underlying the non-Agency RMBS that we acquire, are subject to defaults, foreclosure timeline extension, fraud and residential and commercial price depreciation, and unfavorable modification of loan principal amount, interest rate and amortization of principal, which could result in losses to us.

If our Manager underestimates collateral loss on our CMBS investments, we may experience losses.

An increase in interest rates may cause a decrease in the volume of certain of our target assets, which could adversely affect our ability to acquire target assets that satisfy our investment objectives and to generate income and pay dividends.

Prepayment rates may adversely affect the value of our investment portfolio.

Our failure to qualify as a REIT would subject us to U.S. federal income tax and potentially increased state and local taxes, which would reduce the amount of cash available for distribution to our shareholders.

Complying with REIT requirements may cause us to forego otherwise attractive investment opportunities or financing or hedging strategies.

Our Structure

We were organized as a Maryland corporation on June 5, 2008. On July 1, 2009, we completed our IPO, generating net proceeds of \$165.0 million. Concurrent with our IPO, we completed a private offering in which we sold \$1.5 million of our common stock to our Manager and \$28.5 million OP units to Invesco Investments (Bermuda) Ltd. On July 27, 2009, the underwriters of our IPO exercised their over-allotment option for net proceeds of \$6.1 million. Collectively, we received net proceeds from our IPO and the concurrent private offering of approximately \$201.1 million.

We conduct all of our operations through our operating partnership, of which we are the sole general partner. Subject to certain limitations and exceptions, the limited partners of the operating partnership, other than us or our subsidiaries, have the right to cause the operating partnership to redeem their OP units for cash equal to the market value of an equivalent number of our shares of common stock, or, at our option, we may purchase their OP units by issuing one share of common stock for each OP unit redeemed.

We intend to elect and qualify to be taxed as a REIT commencing with our current taxable year ending December 31, 2009. Accordingly, we generally will not be subject to U.S. federal income taxes on our taxable income that we distribute currently to our shareholders as long as we maintain our intended qualification as a REIT. We operate our business in a manner that permits us to maintain our exemption from registration under the 1940 Act.

Table of Contents

The following chart shows our structure after giving effect to the sale of 7,000,000 shares in this offering:

- (1) Assuming redemption of all OP units owned by Invesco Investments (Bermuda) Ltd. for the equivalent number of shares of our common stock, Invesco would beneficially own (through the holdings of Invesco Investments (Bermuda) Ltd. and our Manager) approximately 9% of our common stock after giving effect to the sale of 7,000,000 shares in this offering and public shareholders would own the remaining approximately 91%.
- (2) We, through IAS Asset I LLC, have a commitment to invest up to \$25.0 million in the Invesco PPIP Fund. IAS Asset I LLC relies on an exemption from registration under the 1940 Act as an investment company pursuant to Section 3(c)(5)(C) of the 1940 Act.
- (3) IMC Investments I LLC was organized as a special purpose subsidiary of IAS Operating Partnership LP that borrows under the TALF and relies on an exemption from registration under the 1940 Act as an investment company pursuant to Section 3(c)(7) of the 1940 Act.

Management Agreement

On July 1, 2009, we entered into a management agreement with Invesco Advisers, Inc. (formerly Invesco Institutional (N.A.), Inc.) pursuant to which we are externally managed and advised by our Manager. The management agreement provides that our Manager must implement our business strategy and perform certain services for us, subject to oversight by our board of directors. Our Manager is responsible for, among other

Table of Contents

duties, performing all of our day-to-day functions, determining investment criteria in conjunction with our board of directors, sourcing, analyzing and executing investments, selling and financing assets and performing asset management duties.

The initial term of the management agreement expires on July 1, 2011 and will be automatically renewed for a one-year term on such date and on each anniversary date thereafter unless terminated under certain circumstances. See [Our Manager and the Management Agreement](#) [Management Agreement](#).

The following summarizes the fees and expense reimbursements that we pay to our Manager:

Management fee. 1.50% of our shareholders' equity per annum, calculated and payable quarterly in arrears. For purposes of calculating the management fee, our shareholders' equity means the sum of the net proceeds from all issuances of our equity securities since inception (allocated on a pro rata daily basis for such issuances during the fiscal quarter of any such issuance), plus our retained earnings at the end of the most recently completed calendar quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less any amount that we pay to repurchase our common stock since inception, and excluding any unrealized gains, losses or other items that do not affect realized net income (regardless of whether such items are included in other comprehensive income or loss, or in net income). This amount will be adjusted to exclude one-time events pursuant to changes in accounting principles generally accepted in the United States, or GAAP, and certain non-cash items after discussions between our Manager and our independent directors and approval by a majority of our independent directors. We treat outstanding limited partner interests (not held by us) as outstanding shares of capital stock for purposes of calculating the management fee.

Pursuant to the terms of the management agreement, we pay our Manager a management fee. As a result, we do not pay any management or investment fees with respect to our investment in the Invesco PPIP Fund managed by our Manager. Our Manager waives all such fees.

Expense reimbursement. Reimbursement of operating expenses incurred by our Manager, including certain salary expenses and other expenses relating to legal, accounting, due diligence and other services, to be paid monthly in cash. Our reimbursement obligation is not subject to any dollar limitation.

Termination fee. Termination fee equal to three times the sum of the average annual management fee earned by our Manager during the prior 24-month period prior to such termination, calculated as of the end of the most recently completed fiscal quarter.

Incentive plan. Our equity incentive plan includes provisions for grants of restricted common stock and other equity based awards to our directors, officers and employees of our Manager. We make grants to our non-executive directors as compensation, we may also grant awards under our equity incentive plan to our Manager's officers and employees as compensation and for which the Manager may reimburse us. See [Management](#) [Director Compensation](#).

Conflicts of Interest

We are dependent on our Manager for our day-to-day management and do not have any independent officers or employees. Each of our officers and two of our directors, Mr. Armour and Ms. Dunn Kelley, are employees of Invesco. Our management agreement was negotiated between related parties and its terms, including fees and other amounts payable, may not be as favorable to us as if it had been negotiated at arm's length with an unaffiliated third party. In addition, other than our Chief Financial Officer, who is obligated to dedicate himself exclusively to us, our

Manager and its officers and personnel are permitted to engage in other business activities, including activities for Invesco, which may reduce the time our Manager and its officers and personnel spend managing us.

As of September 30, 2009, Invesco had \$416.9 billion in managed assets and our Manager managed approximately \$184.9 billion of fixed income and real estate investments. We compete for investment opportunities directly with other clients of our Manager or Invesco and its subsidiaries. In addition, our

Table of Contents

Manager may have additional clients that compete directly with us for investment opportunities, although Invesco has indicated to us that it expects that we will remain the only publicly-traded REIT advised by our Manager or Invesco and its subsidiaries whose investment strategy is to invest substantially all of its capital in our target assets. Our Manager has an investment allocation policy in place that is intended to enable us to share equitably with the investment companies and institutional and separately managed accounts that invest in securities in our target asset classes for which our Manager is responsible for the selection of brokers, dealers and other trading counterparties. According to this policy, investments may be allocated by taking into account factors, including but not limited to investment objectives or strategies, the size of the available investment, cash availability and cash flow expectations, and the tax implications of an investment. The investment allocation policy also requires a fair and equitable allocation of financing opportunities over time among us and other accounts. The investment allocation policy also includes other procedures intended to prevent any of our Manager's other accounts from receiving favorable treatment in accessing investment opportunities. The investment allocation policy may be amended by our Manager at any time without our consent. To the extent that a conflict arises with respect to the business of our Manager or us in such a way as to give rise to conflicts not currently addressed by the investment allocation policy, our Manager may need to refine its policy to address such situation. Our independent directors periodically review our Manager's compliance with the investment allocation policy. In addition, to avoid any actual or perceived conflicts of interest with our Manager, a majority of our independent directors are required to approve an investment in any security structured or issued by an entity managed by our Manager, or any of its affiliates, or any purchase or sale of our assets by or to our Manager, or its affiliates or an entity managed by our Manager or its affiliates.

We finance investments in certain non-Agency RMBS, CMBS and residential and commercial mortgage loans by contributing equity capital to the Invesco PPIF Fund. Our investment is on terms that are no less favorable to us than those made available to other third party institutional investors in the Invesco PPIF Fund. Pursuant to the terms of the management agreement, we pay our Manager a management fee. As a result, we do not pay any management or investment fees with respect to our investment in the Invesco PPIF Fund managed by our Manager. Our Manager waives all such fees. Our Manager has a conflict of interest in recommending our participation in any PPIF it manages because the fees payable to it by the PPIF may be greater than the fees payable to it by us under the management agreement. We have addressed this conflict by requiring that the terms of any equity investment we make in any such PPIF be approved by our board of directors, including a majority of our independent directors.

We do not have a policy that expressly prohibits our directors, officers, shareholders or affiliates from engaging for their own account in business activities of the types conducted by us. However, subject to Invesco's allocation policy, our code of business conduct and ethics contains a conflicts of interest policy that prohibits our directors, officers and personnel, as well as employees of our Manager who provide services to us, from engaging in any transaction that involves an actual conflict of interest with us.

Operating and Regulatory Structure

REIT Qualification

We intend to elect and qualify to be taxed as a REIT under Sections 856 through 859 of the Internal Revenue Code, commencing with our taxable year ending December 31, 2009. Our qualification as a REIT depends upon our ability to meet on a continuing basis, through actual investment and operating results, various complex requirements under the Internal Revenue Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the diversity of ownership of our shares. We believe that we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Internal Revenue Code, and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT.

So long as we qualify as a REIT, we generally will not be subject to U.S. federal income tax on our net taxable income that we distribute currently to our shareholders. If we fail to qualify as a REIT in any taxable year and do not qualify for certain statutory relief provisions, we will be subject to U.S. federal income tax at regular corporate rates and may be precluded from qualifying as a REIT for the subsequent four taxable years

Table of Contents

following the year during which we lost our REIT qualification. Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income or property.

1940 Act Exemption

We conduct our operations so as not to become regulated as an investment company under the 1940 Act. Because we are a holding company that conducts our business through the operating partnership and the wholly-owned subsidiaries of the operating partnership, the securities issued by these subsidiaries that are excepted from the definition of investment company under Section 3(c)(1) or Section 3(c)(7) of the 1940 Act, together with any other investment securities the operating partnership may own, may not have a combined value in excess of 40% of the value of the operating partnership's total assets on an unconsolidated basis, which we refer to as the 40% test. This requirement limits the types of businesses in which we may engage through our subsidiaries. In addition, we believe neither the company nor the operating partnership are considered an investment company under Section 3(a)(1)(A) of the 1940 Act because they do not engage primarily or hold themselves out as being engaged primarily in the business of investing, reinvesting or trading in securities. Rather, through the operating partnership's wholly owned or majority-owned subsidiaries, the company and the operating partnership are primarily engaged in the non-investment company businesses of these subsidiaries. IAS Asset I LLC and certain of the operating partnership's other subsidiaries that we may form in the future intend to rely upon the exemption from registration as an investment company under the 1940 Act pursuant to Section 3(c)(5)(C) of the 1940 Act, which is available for entities primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate. This exemption generally requires that at least 55% of our subsidiaries' portfolios must be comprised of qualifying assets and at least another 25% of each of their portfolios must be comprised of real estate-related assets under the 1940 Act (and no more than 20% comprised of miscellaneous assets). Qualifying assets for this purpose include mortgage loans and other assets, such as whole pool Agency and non-Agency RMBS, that the Securities and Exchange Commission, or SEC staff in various no-action letters has determined are the functional equivalent of mortgage loans for the purposes of the 1940 Act. We treat as real estate-related assets CMBS, debt and equity securities of companies primarily engaged in real estate businesses, agency partial pool certificates and securities issued by pass-through entities of which substantially all of the assets consist of qualifying assets and/or real estate-related assets. IAS Asset I LLC invests in the Invesco PPIP Fund. We treat IAS Asset I LLC's investment in the Invesco PPIP Fund as a real estate-related asset for purposes of the Section 3(c)(5)(C) analysis. As a result, IAS Asset I LLC can invest no more than 25% of its assets in the Invesco PPIP and other real estate-related assets. We note that the SEC has not provided any guidance on the treatment of interests in PPIFs as real estate-related assets and any such guidance may require us to change our strategy. We may need to adjust IAS Asset I LLC's assets and strategy in order for it to continue to rely on Section 3(c)(5)(C) for its 1940 Act exemption. Any such adjustment in IAS Asset I LLC's assets or strategy is not expected to have a material adverse effect on our business or strategy. Although we monitor our portfolio periodically and prior to each investment acquisition, there can be no assurance that we will be able to maintain this exemption from registration for each of these subsidiaries. The legacy securities PPIF formed and managed by our Manager or one of its affiliates relies on Section 3(c)(7) for its 1940 Act exemption.

IMC Investments I LLC was organized as a special purpose subsidiary of the operating partnership that borrows under the TALF. This subsidiary relies on Section 3(c)(7) for its 1940 Act exemption and, therefore, the operating partnership's interest in this TALF subsidiary would constitute an investment security for purposes of determining whether the operating partnership passes the 40% test.

We may in the future organize one or more TALF subsidiaries that seek to rely on the 1940 Act exemption provided to certain structured financing vehicles by Rule 3a-7. Any such TALF subsidiary would need to be structured to comply with any guidance that may be issued by the Division of Investment Management of the SEC on the restrictions contained in Rule 3a-7. We expect that the aggregate value of the operating partnership's interests in TALF subsidiaries that seek to rely on Rule 3a-7 will comprise less than 20% of the operating partnership's (and, therefore,

our) total assets on an unconsolidated basis.

Qualification for exemption from registration under the 1940 Act will limit our ability to make certain investments. For example, these restrictions will limit the ability of our subsidiaries to invest directly in

Table of Contents

mortgage-backed securities that represent less than the entire ownership in a pool of mortgage loans, debt and equity tranches of securitizations and certain Asset Based Securities and real estate companies or in assets not related to real estate.

Restrictions on Ownership of Our Common Stock

To assist us in complying with the REIT limitations on the concentration of ownership imposed by the Internal Revenue Code, among other purposes, our charter prohibits, with certain exceptions, any shareholder from beneficially or constructively owning, applying certain attribution rules under the Internal Revenue Code, more than 9.8% by value or number of shares, whichever is more restrictive, of our outstanding shares of common stock, or 9.8% by value or number of shares, whichever is more restrictive, of our outstanding capital stock. Our board of directors may, in its sole discretion, waive the 9.8% ownership limit with respect to a particular shareholder if it is presented with certain representations and undertakings required by our charter and other evidence satisfactory to it that such ownership will not then or in the future jeopardize our qualification as a REIT. In addition, different ownership limits will apply to Invesco. These ownership limits, which our board of directors has determined will not jeopardize our REIT qualification, will allow Invesco to hold up to 25% of our outstanding common stock or up to 25% of our outstanding capital stock. Our charter also prohibits any person from, among other things: (1) beneficially or constructively owning shares of our capital stock that would result in our being closely held under Section 856(h) of the Internal Revenue Code, or otherwise cause us to fail to qualify as a REIT; and (2) transferring shares of our capital stock if such transfer would result in our capital stock being beneficially owned by fewer than 100 persons.

Our Corporate Information

Our principal executive offices are located at 1555 Peachtree Street, NE, Atlanta, Georgia 30309. Our telephone number is (404) 892-0896. Our website is www.invescomortgagecapital.com. The contents of our website are not a part of this prospectus. The information on our website is not intended to form a part of or be incorporated by reference into this prospectus.

Table of Contents**SUMMARY SELECTED FINANCIAL DATA**

The following table presents summary historical financial information as of September 30, 2009 and December 31, 2008, for the three and nine months ended September 30, 2009 and for the period from June 5, 2008 (date of inception) to September 30, 2008. The summary historical financial information as of September 30, 2009, for the three and nine months ended September 30, 2009 and for the period from June 5, 2008 (date of inception) to September 30, 2008 presented in the table below has been derived from our unaudited financial statements. The summary historical financial information as of December 31, 2008 presented in the table below has been derived from our audited financial statements. The information presented below is not necessarily indicative of the trends in our performance or our results for a full fiscal year.

The information presented below is only a summary and does not provide all of the information contained in our historical financial statements, including the related notes. You should read the information below in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our historical financial statements, including the related notes, included elsewhere in this prospectus.

THE OFFERING

Common stock offered by us	7,000,000 shares (plus up to an additional 1,050,000 shares of our common stock that we may issue and sell upon the exercise of the underwriters' over-allotment option).
Common stock to be outstanding after this offering	15,887,212 shares. ⁽¹⁾
Use of proceeds	<p>We plan to use all of the net proceeds from this offering as described above to acquire our target assets in accordance with our objectives and strategies described in this prospectus. See Business Our Investment Strategy. Our focus will be on purchasing Agency RMBS, non-Agency RMBS, CMBS and certain residential and commercial mortgage loans and investing in the Invesco PPIP Fund, in each case subject to our investment guidelines and to the extent consistent with maintaining our REIT qualification. Our Manager will make determinations as to the percentage of our equity that will be invested in each of our target assets. Its determinations will depend on prevailing market conditions and may change over time in response to opportunities available in different interest rate, economic and credit environments. Until appropriate assets can be identified, our Manager may decide to use the net proceeds to pay off our short-term debt or invest the net proceeds in interest-bearing short-term investments, including funds which are consistent with our intention to qualify as a REIT. These investments are expected to provide a lower net return than we seek to achieve from our target assets. Prior to the time we have fully used the net proceeds of this offering to acquire our target assets, we may fund our quarterly distributions out of such net proceeds.</p>
Distribution policy	<p>We intend to continue to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates on its undistributed taxable income. We generally intend to continue to pay quarterly dividends in an amount equal to our taxable income, determined without regard to the deduction for dividends paid. On October 13, 2009, we declared a dividend of \$0.61 per share of common stock to shareholders of record as of October 23, 2009 and paid such dividend on November 12, 2009. On December 17, 2009, we declared a dividend of \$1.05 per share of common stock to shareholders of record as of December 31, 2009 and will pay such dividend on January 27, 2010. The December 17, 2009 dividend represents our estimate of undistributed taxable earnings for 2009 and includes approximately \$0.19 per share of estimated gains on the sale of mortgage-backed securities during the</p>

fourth quarter. Investors in this offering will not be entitled to receive this dividend.

Any distributions we make are at the discretion of our board of directors and depend upon, among other things, our actual results of operations. These results and our ability to continue to pay

Table of Contents

distributions will be affected by various factors, including the net interest and other income from our portfolio, our operating expenses and any other expenditures. For more information, see Distribution Policy.

IVR.

Risk factors

Investing in our common stock involves a high degree of risk. You should carefully read and consider the information set forth under the heading Risk Factors beginning on page 19 of this prospectus and all other information in this prospectus before investing in our common stock.

- (1) Includes, in addition to the shares offered by us in this offering: (a) 100 shares issued in connection with our incorporation and capitalization; (b) 8,886,200 shares issued in our IPO and concurrent private placement; and (c) 912 shares issued under our equity incentive plan in December 2009. Excludes 1,050,000 shares of our common stock that we may issue and sell upon the exercise of the underwriters' over-allotment option in full.

Table of Contents

RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the following risk factors and all other information contained in this prospectus before purchasing our common stock. If any of the following risks occur, our business, financial condition or results of operations could be materially and adversely affected. In that case, the trading price of our common stock could decline and you may lose some or all of your investment.

Risks Related to Our Relationship With Our Manager

We are dependent on our Manager and its key personnel for our success.

We have no separate facilities and are completely reliant on our Manager. We do not have any employees. Our executive officers are employees of Invesco. Our Manager has significant discretion as to the implementation of our investment and operating policies and strategies. Accordingly, we believe that our success depends to a significant extent upon the efforts, experience, diligence, skill and network of business contacts of the executive officers and key personnel of our Manager. The executive officers and key personnel of our Manager evaluate, negotiate, close and monitor our investments; therefore, our success depends on their continued service. The departure of any of the executive officers or key personnel of our Manager could have a material adverse effect on our performance. In addition, we offer no assurance that our Manager will remain our investment manager or that we will continue to have access to our Manager's principals and professionals. The initial term of our management agreement with our Manager only extends until the second anniversary of the closing of our IPO, or July 1, 2011, with automatic one-year renewals thereafter. If the management agreement is terminated and no suitable replacement is found to manage us, we may not be able to execute our business plan. Moreover, with the exception of our Chief Financial Officer, our Manager is not obligated to dedicate certain of its personnel exclusively to us nor is it obligated to dedicate any specific portion of its time to our business, and none of our Manager's personnel are contractually dedicated to us under our management agreement with our Manager.

As of September 30, 2009, we had entered into master repurchase agreements with 15 counterparties, including with affiliates of Morgan Stanley & Co. Incorporated and Credit Suisse Securities (USA) LLC, in order to finance our acquisitions of Agency RMBS. Our Manager has obtained commitments on our behalf from a number of the counterparties with whom our Manager has long-standing relationships. Therefore, if the management agreement is terminated, we cannot assure you that we would continue to have access to these sources of financing for our investments.

Invesco and our Manager have limited experience operating a REIT or managing a portfolio of our target assets on a leveraged basis and we cannot assure you that our Manager's past experience will be sufficient to successfully manage our business as a REIT with such a portfolio.

Prior to our inception, our Manager had never operated a REIT. The REIT provisions of the Internal Revenue Code are complex, and any failure to comply with those provisions in a timely manner could prevent us from qualifying as a REIT or force us to pay unexpected taxes and penalties. In such event, our net income would be reduced and we could incur a loss. In addition, our Manager has limited experience managing a portfolio of our target assets using leverage.

There are conflicts of interest in our relationship with our Manager and Invesco, which could result in decisions that are not in the best interests of our shareholders.

We are subject to conflicts of interest arising out of our relationship with Invesco and our Manager. Specifically, each of our officers and two of our directors, Mr. Armour and Ms. Dunn Kelley, are employees of Invesco. Our Manager and our executive officers may have conflicts between their duties to us and their duties to, and interests in, Invesco. Our Manager is not required to devote a specific amount of time to our operations. We compete for investment opportunities directly with our Manager or other clients of our

Table of Contents

Manager or Invesco and its subsidiaries. A substantial number of separate accounts managed by our Manager have limited exposure to our target assets. In addition, in the future our Manager may have additional clients that compete directly with us for investment opportunities, although Invesco has indicated to us that it expects that we will remain the only publicly-traded REIT advised by our Manager or Invesco and its subsidiaries whose investment strategy is to invest substantially all of its capital in our target assets. Our Manager has an investment and financing allocation policy in place intended to enable us to share equitably with the investment companies and institutional and separately managed accounts that effect securities transactions in fixed income securities for which our Manager is responsible in the selection of brokers, dealers and other trading counterparties. Therefore, although Invesco has indicated to us that it expects that we will remain the only publicly-traded REIT advised by our Manager or Invesco and its subsidiaries whose investment strategy is to invest substantially all of its capital in our target assets, we may compete with our Manager for investment or financing opportunities sourced by our Manager and, as a result, we may either not be presented with the opportunity or have to compete with our Manager to acquire these investments or have access to these sources of financing. Our Manager and our executive officers may choose to allocate favorable investments to Invesco or other clients of Invesco instead of to us. Further, at times when there are turbulent conditions in the mortgage markets or distress in the credit markets or other times when we will need focused support and assistance from our Manager, Invesco or entities for which our Manager also acts as an investment manager will likewise require greater focus and attention, placing our Manager's resources in high demand. In such situations, we may not receive the level of support and assistance that we may receive if we were internally managed or if our Manager did not act as a manager for other entities. There is no assurance that our Manager's allocation policies that address some of the conflicts relating to our access to investment and financing sources, which are described under Management Conflicts of Interest, will be adequate to address all of the conflicts that may arise.

We pay our Manager substantial management fees regardless of the performance of our portfolio. Our Manager's entitlement to a management fee, which is not based upon performance metrics or goals, might reduce its incentive to devote its time and effort to seeking investments that provide attractive risk-adjusted returns for our portfolio. This in turn could hurt both our ability to make distributions to our shareholders and the market price of our common stock.

Concurrently with the completion of our IPO, we completed a private placement in which we sold 75,000 shares of our common stock to Invesco, through our Manager, at \$20.00 per share and 1,425,000 OP units to Invesco, through Invesco Investments (Bermuda) Ltd., a wholly owned subsidiary of Invesco, at \$20.00 per unit. As of September 30, 2009, Invesco, through our Manager, beneficially owned 0.85% of our common stock. As of September 30, 2009, assuming that all OP units are redeemed for an equivalent number of shares of our common stock, Invesco would beneficially own approximately 15% of our outstanding common stock. Each of our Manager and Invesco Investments (Bermuda) Ltd. agreed that, for a period of one year after June 25, 2009, neither will, without the prior written consent of Credit Suisse Securities (USA) LLC and Morgan Stanley & Co. Incorporated, dispose of or hedge any of the shares of our common stock or OP units that it purchased in the private placement, subject to extension in certain circumstances. Each of our Manager and Invesco Investments (Bermuda) Ltd. may sell any of these securities at any time following the expiration of this one-year lock-up period. To the extent our Manager or Invesco Investments (Bermuda) Ltd. sell some of these securities, its interests may be less aligned with our interests.

Our Manager would have a conflict in recommending our participation in any legacy security or legacy loan PPIFs it manages.

To the extent available to us, we seek to finance additional non-Agency RMBS and CMBS by contributing capital to the Invesco PPIP Fund, which qualified to obtain financing under the legacy securities program under the PPIP. We committed to invest up to up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets and may seek additional investments in this or a similar PPIP fund managed by our Manager. Our Manager's investment committee makes investment decisions for the Invesco PPIP Fund. As of September 30, 2009, we have not funded any of the commitment. Pursuant to the terms of the management agreement, we pay our Manager a management fee. As a

result, we do not pay any management

Table of Contents

or investment fees with respect to our investment in the Invesco PPIF Fund managed by our Manager. Our Manager waives all such fees. Our Manager has a conflict of interest in recommending our participation in any PPIF it manages because the fees payable to it by the PPIF may be greater than the fees payable to it by us under the management agreement. We have addressed this conflict by requiring that the terms of any equity investment we make in any such PPIF be approved by our board of directors, including a majority of our independent directors; however, there can be no assurance that our board of directors' approval of investments in any such PPIF will eliminate the conflict of interest.

The management agreement with our Manager was not negotiated on an arm's-length basis and may not be as favorable to us as if it had been negotiated with an unaffiliated third party and may be costly and difficult to terminate.

Our executive officers and two of our five directors are employees of Invesco. Our management agreement with our Manager was negotiated between related parties and its terms, including fees payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party.

Termination of the management agreement with our Manager without cause is difficult and costly. Our independent directors will review our Manager's performance and the management fees annually and, following the initial two-year term, the management agreement may be terminated annually upon the affirmative vote of at least two-thirds of our independent directors based upon: (1) our Manager's unsatisfactory performance that is materially detrimental to us, or (2) a determination that the management fees payable to our Manager are not fair, subject to our Manager's right to prevent termination based on unfair fees by accepting a reduction of management fees agreed to by at least two-thirds of our independent directors. Our Manager will be provided 180 days prior notice of any such termination.

Additionally, upon such a termination, the management agreement provides that we will pay our Manager a termination fee equal to three times the sum of the average annual management fee received by our Manager during the prior 24-month period before such termination, calculated as of the end of the most recently completed fiscal quarter. These provisions may increase the cost to us of terminating the management agreement and adversely affect our ability to terminate our Manager without cause.

Our Manager is only contractually committed to serve us until the second anniversary of the closing of our IPO, or July 1, 2011. Thereafter, the management agreement is renewable for one-year terms; provided, however, that our Manager may terminate the management agreement annually upon 180 days prior notice. If the management agreement is terminated and no suitable replacement is found to manage us, we may not be able to execute our business plan.

Pursuant to the management agreement, our Manager does not assume any responsibility other than to render the services called for thereunder and is not responsible for any action of our board of directors in following or declining to follow its advice or recommendations. Our Manager maintains a contractual as opposed to a fiduciary relationship with us. Under the terms of the management agreement, our Manager, its officers, shareholders, members, managers, partners, directors and personnel, any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager will not be liable to us, any subsidiary of ours, our directors, our shareholders or any subsidiary's shareholders or partners for acts or omissions performed in accordance with and pursuant to the management agreement, except because of acts constituting bad faith, willful misconduct, gross negligence, or reckless disregard of their duties under the management agreement, as determined by a final non-appealable order of a court of competent jurisdiction. We have agreed to indemnify our Manager, its officers, shareholders, members, managers, directors and personnel, any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of our Manager not constituting bad faith, willful misconduct, gross negligence, or reckless disregard of duties, performed in good faith in accordance with and pursuant to the management agreement. See Our

Manager and the Management Agreement Management Agreement.

Table of Contents

Our board of directors approved very broad investment guidelines for our Manager and does not approve each investment and financing decision made by our Manager.

Our Manager is authorized to follow very broad investment guidelines. Our board of directors will periodically review our investment guidelines and our investment portfolio but does not, and is not required to, review all of our proposed investments, except that an investment in a security structured or issued by an entity managed by Invesco must be approved by a majority of our independent directors prior to such investment. In addition, in conducting periodic reviews, our board of directors may rely primarily on information provided to them by our Manager. Furthermore, our Manager may use complex strategies, and transactions entered into by our Manager may be costly, difficult or impossible to unwind by the time they are reviewed by our board of directors. Our Manager has great latitude within the broad parameters of our investment guidelines in determining the types and amounts of Agency RMBS, non-Agency RMBS, CMBS and mortgage loans it may decide are attractive investments for us, which could result in investment returns that are substantially below expectations or that result in losses, which would materially and adversely affect our business operations and results. Further, decisions made and investments and financing arrangements entered into by our Manager may not fully reflect the best interests of our shareholders.

Risks Related to Our Company

There can be no assurance that the actions of the U.S. government, Federal Reserve, U.S. Treasury and other governmental and regulatory bodies for the purpose of stabilizing the financial markets, including the establishment of the TALF and the PPIP, or market response to those actions, will achieve the intended effect, and our business may not benefit from these actions; further government actions or the cessation or curtailment of current U.S. government programs and/or participation in the mortgage and securities markets could adversely impact us.

In response to the financial issues affecting the banking system and the financial markets and going concern threats to investment banks and other financial institutions, the U.S. government, Federal Reserve and U.S. Treasury and other governmental and regulatory bodies have taken action to stabilize the financial markets. Significant measures include: the enactment of the Emergency Economic Stabilization Act of 2008, or the EESA, to, among other things, establish TARP; the enactment of the Housing and Economic Recovery Act of 2008, or the HERA, which established a new regulator for Fannie Mae and Freddie Mac; and the establishment of the TALF and the PPIP.

There can be no assurance that the EESA, HERA, TALF, PPIP or other recent U.S. government actions will have a beneficial impact on the financial markets, including on current extreme levels of volatility. To the extent the market does not respond favorably to these initiatives or these initiatives do not function as intended, our business may not receive the anticipated positive impact from the legislation. There can also be no assurance that we will continue to be eligible to participate in programs established by the U.S. government such as the TALF or the PPIP or, if we remain eligible, that we will be able to utilize them successfully or at all. In addition, because the programs are designed, in part, to restart the market for certain of our target assets, the establishment of these programs may result in increased competition for attractive opportunities in our target assets. It is also possible that our competitors may utilize the programs which would provide them with attractive debt and equity capital funding from the U.S. government. In addition, the U.S. government, the Federal Reserve, the U.S. Treasury and other governmental and regulatory bodies have taken or are considering taking other actions to address the financial crisis. However, there can be no assurance that the U.S. government, the Federal Reserve, the U.S. Treasury and other governmental and regulatory bodies will not eliminate or curtail current U.S. government programs and/or participation in the mortgage and securities markets. We cannot predict whether or when such actions may occur, and such actions could have a dramatic impact on our business, results of operations and financial condition.

We may change any of our strategies, policies or procedures without shareholder consent.

We may change any of our strategies, policies or procedures with respect to investments, acquisitions, growth, operations, indebtedness, capitalization and distributions at any time without the consent of our

Table of Contents

shareholders, which could result in an investment portfolio with a different risk profile. A change in our investment strategy may increase our exposure to interest rate risk, default risk and real estate market fluctuations. Furthermore, a change in our asset allocation could result in our making investments in asset categories different from those described in this prospectus. These changes could adversely affect our financial condition, results of operations, the market price of our common stock and our ability to make distributions to our shareholders.

We have a limited operating history and may not be able to successfully operate our business or generate sufficient revenue to make or sustain distributions to our shareholders.

We were organized in June 2008 and commenced operations upon completion of our IPO on July 1, 2009. We cannot assure you that we will be able to operate our business successfully or execute our operating policies and strategies as described in this prospectus. The results of our operations depend on several factors, including the availability of opportunities for the acquisition of assets, the level and volatility of interest rates, the availability of adequate short and long-term financing, conditions in the financial markets and economic conditions.

We are highly dependent on information systems and systems failures could significantly disrupt our business, which may, in turn, negatively affect the market price of our common stock and our ability to pay dividends.

Our business is highly dependent on communications and information systems of Invesco. Any failure or interruption of Invesco's systems could cause delays or other problems in our securities trading activities, which could have a material adverse effect on our operating results and negatively affect the market price of our common stock and our ability to pay dividends to our shareholders.

Maintenance of our 1940 Act exemption imposes limits on our operations.

The company conducts its operations so as not to become regulated as an investment company under the 1940 Act. Because the company is a holding company that conducts its businesses through the operating partnership and its wholly owned or majority-owned subsidiaries, the securities issued by these subsidiaries that are excepted from the definition of investment company under Section 3(c)(1) or Section 3(c)(7) of the 1940 Act, together with any other investment securities the operating partnership may own, may not have a combined value in excess of 40% of the value of the operating partnership's total assets on an unconsolidated basis which we refer to as the 40% test. This requirement limits the types of businesses in which we may engage through our subsidiaries. IAS Asset I LLC and certain of the operating partnership's other subsidiaries that we may form in the future intend to rely upon the exemption from registration as an investment company under the 1940 Act pursuant to Section 3(c)(5)(C) of the 1940 Act, which is available for entities primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate. This exemption generally requires that at least 55% of our subsidiaries' portfolios must be comprised of qualifying assets and at least another 25% of each of their portfolios must be comprised of real estate-related assets under the 1940 Act (and no more than 20% comprised of miscellaneous assets). Qualifying assets for this purpose include mortgage loans and other assets, such as whole pool Agency and non-Agency RMBS, that the Securities and Exchange Commission, or SEC staff in various no-action letters has determined are the functional equivalent of mortgage loans for the purposes of the 1940 Act. We treat as real estate-related assets CMBS, debt and equity securities of companies primarily engaged in real estate businesses, agency partial pool certificates and securities issued by pass-through entities of which substantially all of the assets consist of qualifying assets and/or real estate-related assets. IAS Asset I LLC invests in the Invesco PPIP Fund. We treat IAS Asset I LLC's investment in the Invesco PPIP Fund as a real estate-related asset for purposes of the Section 3(c)(5)(C) analysis. As a result, IAS Asset I LLC can invest no more than 25% of its assets in the Invesco PPIP and other real estate-related assets. We note that the SEC has not provided any guidance on the treatment of interests in PPIFs as real estate-related assets and any such guidance may require us to change our strategy. We may need to adjust IAS Asset I LLC's assets and strategy in order for it to continue to rely on Section 3(c)(5)(C) for its

1940 Act exemption. Any such adjustment in IAS Asset I LLC's assets or strategy is not expected to have a material adverse effect on our business or strategy. Although we

Table of Contents

monitor our portfolio periodically and prior to each investment acquisition, there can be no assurance that we will be able to maintain this exemption from registration for each of these subsidiaries. The legacy securities PPIF formed and managed by our Manager or one of its affiliates relies on Section 3(c)(7) for its 1940 Act exemption.

IMC Investments I LLC was organized as a special purpose subsidiary of the operating partnership that borrows under the TALF. This subsidiary relies on Section 3(c)(7) for its 1940 Act exemption and, therefore, the operating partnership's interest in this TALF subsidiary would constitute an investment security for purposes of determining whether the operating partnership passes the 40% test. We may in the future organize one or more TALF subsidiaries that seek to rely on the 1940 Act exemption provided to certain structured financing vehicles by Rule 3a-7. Any such TALF subsidiary would need to be structured to comply with any guidance that may be issued by the Division of Investment Management of the SEC on the restrictions contained in Rule 3a-7. The company expects that the aggregate value of the operating partnership's interests in TALF subsidiaries that seek to rely on Rule 3a-7 will comprise less than 20% of the operating partnership's (and, therefore, the company's) total assets on an unconsolidated basis.

To the extent that we organize subsidiaries that rely on Rule 3a-7 for an exemption from the 1940 Act, these subsidiaries will need to comply with the restrictions contained in this Rule. In general, Rule 3a-7 exempts from the 1940 Act issuers that limit their activities as follows:

the issuer issues securities the payment of which depends primarily on the cash flow from eligible assets, which include many of the types of assets that we acquire in our TALF fundings, that by their terms convert into cash within a finite time period;

the securities sold are fixed income securities rated investment grade by at least one rating agency (fixed income securities which are unrated or rated below investment grade may be sold to institutional accredited investors and any securities may be sold to qualified institutional buyers and to persons involved in the organization or operation of the issuer);

the issuer acquires and disposes of eligible assets (1) only in accordance with the agreements pursuant to which the securities are issued, (2) so that the acquisition or disposition does not result in a downgrading of the issuer's fixed income securities and (3) the eligible assets are not acquired or disposed of for the primary purpose of recognizing gains or decreasing losses resulting from market value changes; and

unless the issuer is issuing only commercial paper, the issuer appoints an independent trustee, takes reasonable steps to transfer to the trustee an ownership or perfected security interest in the eligible assets, and meets rating agency requirements for commingling of cash flows.

In addition, in certain circumstances, compliance with Rule 3a-7 may also require, among other things that the indenture governing the subsidiary include additional limitations on the types of assets the subsidiary may sell or acquire out of the proceeds of assets that mature, are refinanced or otherwise sold, on the period of time during which such transactions may occur, and on the level of transactions that may occur. In light of the requirements of Rule 3a-7, our ability to manage assets held in a special purpose subsidiary that complies with Rule 3a-7 will be limited and we may not be able to purchase or sell assets owned by that subsidiary when we would otherwise desire to do so, which could lead to losses.

The determination of whether an entity is a majority-owned subsidiary of our company is made by us. The 1940 Act defines a majority-owned subsidiary of a person as a company 50% or more of the outstanding voting securities of which are owned by such person, or by another company which is a majority-owned subsidiary of such person. The 1940 Act further defines voting securities as any security presently entitling the owner or holder thereof to vote for the

election of directors of a company. We treat companies in which we own at least a majority of the outstanding voting securities as majority-owned subsidiaries for purposes of the 40% test. We have not requested the SEC to approve our treatment of any company as a majority-owned subsidiary and the SEC has not done so. If the SEC were to disagree with our treatment of one or more companies as majority-owned subsidiaries, we would need to adjust our strategy and our assets in order to continue to pass the 40% test. Any such adjustment in our strategy could have a material adverse effect on us.

Table of Contents

Qualification for exemption from registration under the 1940 Act will limit our ability to make certain investments. For example, these restrictions will limit the ability of our subsidiaries to invest directly in mortgage-backed securities that represent less than the entire ownership in a pool of mortgage loans, debt and equity tranches of securitizations and certain asset-backed securities and real estate companies or in assets not related to real estate.

There can be no assurance that the laws and regulations governing the 1940 Act status of REITs, including the Division of Investment Management of the SEC providing more specific or different guidance regarding these exemptions, will not change in a manner that adversely affects our operations. To the extent that the SEC staff provides more specific guidance regarding any of the matters bearing upon such exclusions, we may be required to adjust our strategy accordingly. Any additional guidance from the SEC staff could provide additional flexibility to us, or it could further inhibit our ability to pursue the strategies we have chosen. If we, the operating partnership or its subsidiaries fail to maintain an exception or exemption from the 1940 Act, we could, among other things, be required either to (a) change the manner in which we conduct our operations to avoid being required to register as an investment company, (b) effect sales of our assets in a manner that, or at a time when, we would not otherwise choose to do so, or (c) register as an investment company, any of which could negatively affect the value of our common stock, the sustainability of our business model, and our ability to make distributions which could have an adverse effect on our business and the market price for our shares of common stock.

Risks Related to Financing and Hedging

We use leverage in executing our business strategy, which may adversely affect the return on our assets and may reduce cash available for distribution to our shareholders, as well as increase losses when economic conditions are unfavorable.

We use leverage to finance our assets through borrowings from repurchase agreements, borrowings under programs established by the U.S. government such as the TALF, and other secured and unsecured forms of borrowing and we contribute capital to funds that receive financing under the PPIP. Although we are not required to maintain any particular debt-to-equity leverage ratio, the amount of leverage we may deploy for particular assets will depend upon our Manager's assessment of the credit and other risks of those assets. As of September 30, 2009, our total leverage, on a debt-to-equity basis, was 3.2 times, which consisted of 7.8 times on our Agency RMBS assets and 3.5 times on our CMBS. As of September 30, 2009, our non-Agency RMBS had no leverage. We consider these leverage ratios to be prudent for these asset classes.

The capital and credit markets have been experiencing extreme volatility and disruption since July 2007. In the last year, the volatility and disruption have reached unprecedented levels. In a large number of cases, the markets have exerted downward pressure on stock prices and credit capacity for issuers. Our access to capital depends upon a number of factors over which we have little or no control, including:

general market conditions;

the market's view of the quality of our assets;

the market's perception of our growth potential;

our eligibility to participate in and access capital from programs established by the U.S. government;

our current and potential future earnings and cash distributions; and

the market price of the shares of our capital stock.

The current weakness in the financial markets, the residential and commercial mortgage markets and the economy generally could adversely affect one or more of our potential lenders and could cause one or more of our potential lenders to be unwilling or unable to provide us with financing or to increase the costs of that financing. Current market conditions have affected different types of financing for mortgage-related assets to varying degrees, with some sources generally being unavailable, others being available but at a higher cost, while others being largely unaffected. For example, in the repurchase agreement market, non-Agency RMBS

Table of Contents

have been more difficult to finance than Agency RMBS. In connection with repurchase agreements, financing rates and advance rates, or haircut levels, have also increased. Repurchase agreement counterparties have taken these steps in order to compensate themselves for a perceived increased risk due to the illiquidity of the underlying collateral. In some cases, margin calls have forced borrowers to liquidate collateral in order to meet the capital requirements of these margin calls, resulting in losses.

The return on our assets and cash available for distribution to our shareholders may be reduced to the extent that market conditions prevent us from leveraging our assets or cause the cost of our financing to increase relative to the income that can be derived from the assets acquired. Our financing costs will reduce cash available for distributions to shareholders. We may not be able to meet our financing obligations and, to the extent that we cannot, we risk the loss of some or all of our assets to liquidation or sale to satisfy the obligations. We leverage our Agency RMBS, and may leverage our non-Agency RMBS, through repurchase agreements. A decrease in the value of these assets may lead to margin calls which we will have to satisfy. We may not have the funds available to satisfy any such margin calls and may be forced to sell assets at significantly depressed prices due to market conditions or otherwise, which may result in losses. The satisfaction of such margin calls may reduce cash flow available for distribution to our shareholders. Any reduction in distributions to our shareholders may cause the value of our common stock to decline.

As a result of recent market events, including the contraction among and failure of certain lenders, it may be more difficult for us to secure non-governmental financing.

Our results of operations are materially affected by conditions in the financial markets and the economy generally. Recently, concerns over inflation, energy price volatility, geopolitical issues, unemployment, the availability and cost of credit, the mortgage market and a declining real estate market have contributed to increased volatility and diminished expectations for the economy and markets.

Dramatic declines in the residential and commercial real estate markets, with decreasing home prices and increasing foreclosures and unemployment, have resulted in significant asset write-downs by financial institutions, which have caused many financial institutions to seek additional capital, to merge with other institutions and, in some cases, to fail. We rely on the availability of repurchase agreement financing to acquire Agency RMBS, and in some cases CMBS, on a leveraged basis. Although we use U.S. government financing to acquire certain target assets, we also seek private funding sources to acquire these assets as well. Institutions from which we seek to obtain financing may have owned or financed residential or commercial mortgage loans, real estate-related securities and real estate loans which have declined in value and caused losses as a result of the recent downturn in the markets. Many lenders and institutional investors have reduced and, in some cases, ceased to provide funding to borrowers, including other financial institutions. If these conditions persist, these institutions may become insolvent. As a result of recent market events, it may be more difficult for us to secure non-governmental financing as there are fewer institutional lenders and those remaining lenders have tightened their lending standards.

If a counterparty to our repurchase transactions defaults on its obligation to resell the underlying security back to us at the end of the transaction term, or if the value of the underlying security has declined as of the end of that term, or if we default on our obligations under the repurchase agreement, we will lose money on our repurchase transactions.

When we engage in repurchase transactions, we generally sell securities to lenders (repurchase agreement counterparties) and receive cash from these lenders. The lenders are obligated to resell the same securities back to us at the end of the term of the transaction. Because the cash we receive from the lender when we initially sell the securities to the lender is less than the value of those securities (this difference is the haircut), if the lender defaults on its obligation to resell the same securities back to us we may incur a loss on the transaction equal to the amount of the haircut (assuming there was no change in the value of the securities). We would also lose money on a repurchase

transaction if the value of the underlying securities has declined as of the end of the transaction term, as we would have to repurchase the securities for their initial value but would receive securities worth less than that amount. Further, if we default on one of our obligations under a repurchase transaction, the lender can terminate the transaction and cease entering into any other repurchase

Table of Contents

transactions with us. Some of our repurchase agreements contain cross-default provisions, so that if a default occurs under any one agreement, the lenders under our other agreements could also declare a default. Any losses we incur on our repurchase transactions could adversely affect our earnings and thus our cash available for distribution to our shareholders.

Our use or future use of repurchase agreements to finance our Agency RMBS and non-Agency RMBS may give our lenders greater rights in the event that either we or a lender files for bankruptcy.

Our borrowings or future borrowings under repurchase agreements for our Agency RMBS and non-Agency RMBS may qualify for special treatment under the U.S. Bankruptcy Code, giving our lenders the ability to avoid the automatic stay provisions of the U.S. Bankruptcy Code and to take possession of and liquidate the assets that we have pledged under their repurchase agreements without delay in the event that we file for bankruptcy. Furthermore, the special treatment of repurchase agreements under the U.S. Bankruptcy Code may make it difficult for us to recover our pledged assets in the event that a lender party to such agreement files for bankruptcy. Therefore, our use of repurchase agreements to finance our investments exposes our pledged assets to risk in the event of a bankruptcy filing by either a lender or us.

We depend, and may in the future depend, on repurchase agreement financing to acquire Agency RMBS and non-Agency RMBS and our inability to access this funding for our Agency RMBS and non-Agency RMBS could have a material adverse effect on our results of operations, financial condition and business.

We use repurchase agreement financing as a strategy to increase the return on our assets. However, we may not be able to achieve our desired leverage ratio for a number of reasons, including if the following events occur:

our lenders do not make repurchase agreement financing available to us at acceptable rates;

certain of our lenders exit the repurchase market;

our lenders require that we pledge additional collateral to cover our borrowings, which we may be unable to do; or

we determine that the leverage would expose us to excessive risk.

Our ability to fund our Agency RMBS and non-Agency RMBS may be impacted by our ability to secure repurchase agreement financing on acceptable terms. We can provide no assurance that lenders will be willing or able to provide us with sufficient financing. In addition, because repurchase agreements are short-term commitments of capital, lenders may respond to market conditions making it more difficult for us to secure continued financing. During certain periods of the credit cycle, lenders may curtail their willingness to provide financing. If major market participants continue to exit the repurchase agreement financing business, the value of our Agency RMBS and non-Agency RMBS could be negatively impacted, thus reducing net shareholder equity, or book value. Furthermore, if many of our potential lenders are unwilling or unable to provide us with repurchase agreement financing, we could be forced to sell our Agency RMBS, non-Agency RMBS and assets at an inopportune time when prices are depressed. In addition, if the regulatory capital requirements imposed on our lenders change, they may be required to significantly increase the cost of the financing that they provide to us. Our lenders also may revise their eligibility requirements for the types of assets they are willing to finance or the terms of such financings, based on, among other factors, the regulatory environment and their management of perceived risk, particularly with respect to assignee liability. Moreover, the amount of financing we receive, or may in the future receive, under our repurchase agreements is directly related to the lenders' valuation of the Agency RMBS and non-Agency RMBS that secure the outstanding borrowings. Typically repurchase agreements grant the respective lender the absolute right to reevaluate the market value of the assets that

secure outstanding borrowings at any time. If a lender determines in its sole discretion that the value of the assets has decreased, it has the right to initiate a margin call. A margin call would require us to transfer additional assets to such lender without any advance of funds from the lender for such transfer or to repay a portion of the outstanding borrowings. Any such margin call could have a material adverse effect on

Table of Contents

our results of operations, financial condition, business, liquidity and ability to make distributions to our shareholders, and could cause the value of our common stock to decline. We may be forced to sell assets at significantly depressed prices to meet such margin calls and to maintain adequate liquidity, which could cause us to incur losses. Moreover, to the extent we are forced to sell assets at such time, given market conditions, we may be selling at the same time as others facing similar pressures, which could exacerbate a difficult market environment and which could result in our incurring significantly greater losses on our sale of such assets. In an extreme case of market duress, a market may not even be present for certain of our assets at any price.

Our liquidity may also be adversely affected by margin calls under repurchase agreements for our Agency RMBS and non-Agency RMBS because we will be dependent in part on the lenders' valuation of the collateral securing the financing. Any such margin call could harm our liquidity, results of operation, and financial condition. Additionally, in order to obtain cash to satisfy a margin call, we may be required to liquidate assets at a disadvantageous time, which could cause us to incur further losses and adversely affect our results of operations and financial condition.

The current dislocations in the residential and commercial mortgage sector could cause one or more of our potential lenders to be unwilling or unable to provide us with financing for our target assets on attractive terms or at all.

The current dislocations in the residential mortgage sector have caused many lenders to tighten their lending standards, reduce their lending capacity or exit the market altogether. Further contraction among lenders, insolvency of lenders or other general market disruptions could adversely affect one or more of our potential lenders and could cause one or more of our potential lenders to be unwilling or unable to provide us with financing on attractive terms or at all. This could increase our financing costs and reduce our access to liquidity. If one or more major market participants fails or otherwise experiences a major liquidity crisis, it could negatively impact the marketability of all fixed income securities, including our target assets, and this could negatively impact the value of the assets we acquire, thus reducing our net book value. Furthermore, if many of our potential lenders are unwilling or unable to provide us with financing, we could be forced to sell our assets at an inopportune time when prices are depressed.

The repurchase agreements that we use to finance our investments may require us to provide additional collateral and may restrict us from leveraging our assets as fully as desired.

We use repurchase agreements to finance our acquisition of Agency RMBS, and may use repurchase agreements to finance our acquisition of non-Agency RMBS. If the market value of the Agency RMBS pledged or sold by us to a financing institution declines, we may be required by the financing institution to provide additional collateral or pay down a portion of the funds advanced, but we may not have the funds available to do so, which could result in defaults. Posting additional collateral to support our credit will reduce our liquidity and limit our ability to leverage our assets, which could adversely affect our business. In the event we do not have sufficient liquidity to meet such requirements, financing institutions can accelerate repayment of our indebtedness, increase interest rates, liquidate our collateral or terminate our ability to borrow. Such a situation would likely result in a rapid deterioration of our financial condition and possibly necessitate a filing for bankruptcy protection.

Further, financial institutions providing the repurchase facilities may require us to maintain a certain amount of cash uninvested or to set aside non-levered assets sufficient to maintain a specified liquidity position which would allow us to satisfy our collateral obligations. As a result, we may not be able to leverage our assets as fully as we would choose, which could reduce our return on equity. If we are unable to meet these collateral obligations, our financial condition could deteriorate rapidly.

Table of Contents

An increase in our borrowing costs relative to the interest we receive on investments in our target assets may adversely affect our profitability and our cash available for distribution to our shareholders.

As our financings mature, we will be required either to enter into new borrowings or to sell certain of our investments. An increase in short-term interest rates at the time that we seek to enter into new borrowings would reduce the spread between our returns on our assets and the cost of our borrowings. This would adversely affect our returns on our assets, which might reduce earnings and, in turn, cash available for distribution to our shareholders.

We use U.S. government equity and debt financing to acquire our CMBS and mortgage loan portfolio.

We acquire CMBS with financings under the TALF. On March 23, 2009, the U.S. Treasury announced preliminary plans to expand the TALF to include non-Agency RMBS and CMBS that were originally rated AAA. On May 1, 2009, the Federal Reserve published the terms for the expansion of TALF to CMBS and announced that, beginning on June 16, 2009, up to \$100 billion of TALF loans will be available to finance purchases of CMBS created on or after January 1, 2009. Additionally, on May 19, 2009, the Federal Reserve announced that certain high quality legacy CMBS, including CMBS issued before January 1, 2009, would become eligible collateral under the TALF starting in July 2009. On August 17, 2009, the TALF, which was originally scheduled to terminate December 31, 2009, was extended through March 31, 2010 for TALF loans against newly issued asset-backed securities backed by consumer and business loans and legacy CMBS, and through June 30, 2010 for TALF loans against newly issued CMBS. The Federal Reserve noted in its August 17th release that the TALF will most likely not be extended to include any new classes of eligible collateral. On October 5, 2009, the Federal Reserve announced that, beginning with November subscriptions, the FRBNY will conduct a formal risk assessment of all pledged asset-backed securities collateral, not just newly issued and legacy CMBS. On December 4, 2009, the Federal Reserve announced a final rule establishing criteria for the FRBNY to choose additional rating organizations for newly issued asset-backed securities not backed by commercial real estate.

We also finance our investments in non-Agency RMBS and CMBS by contributing capital to funds that receive financing under the legacy securities PPIP. We may also finance our investments in residential and commercial mortgage loans by contributing capital to funds that receive financing under the legacy loan PPIP. There can be no assurance that U.S. government equity and/or debit financing will be available to finance our investments. See Risk Factors Risks Relating to the PPIP and TALF below.

We enter into hedging transactions that could expose us to contingent liabilities in the future.

Subject to maintaining our qualification as a REIT, part of our investment strategy involves entering into hedging transactions that could require us to fund cash payments in certain circumstances (such as the early termination of the hedging instrument caused by an event of default or other early termination event, or the decision by a counterparty to request margin securities it is contractually owed under the terms of the hedging instrument). The amount due would be equal to the unrealized loss of the open swap positions with the respective counterparty and could also include other fees and charges. These economic losses will be reflected in our results of operations, and our ability to fund these obligations will depend on the liquidity of our assets and access to capital at the time, and the need to fund these obligations could adversely impact our financial condition.

Hedging against interest rate exposure may adversely affect our earnings, which could reduce our cash available for distribution to our shareholders.

Subject to maintaining our qualification as a REIT, we pursue various hedging strategies to seek to reduce our exposure to adverse changes in interest rates. Our hedging activity varies in scope based on the level and

Table of Contents

volatility of interest rates, the type of assets held and other changing market conditions. Interest rate hedging may fail to protect or could adversely affect us because, among other things:

interest rate hedging can be expensive, particularly during periods of rising and volatile interest rates;

available interest rate hedges may not correspond directly with the interest rate risk for which protection is sought;

due to a credit loss, the duration of the hedge may not match the duration of the related liability;

the amount of income that a REIT may earn from hedging transactions (other than hedging transactions that satisfy certain requirements of the Internal Revenue Code or that are done through a TRS) to offset interest rate losses is limited by U.S. federal tax provisions governing REITs;

the credit quality of the hedging counterparty owing money on the hedge may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and

the hedging counterparty owing money in the hedging transaction may default on its obligation to pay.

Our hedging transactions, which are intended to limit losses, may actually adversely affect our earnings, which could reduce our cash available for distribution to our shareholders.

In addition, hedging instruments involve risk since they often are not traded on regulated exchanges, guaranteed by an exchange or its clearing house, or regulated by any U.S. or foreign governmental authorities. Consequently, there are no requirements with respect to record keeping, financial responsibility or segregation of customer funds and positions. Furthermore, the enforceability of agreements underlying hedging transactions may depend on compliance with applicable statutory and commodity and other regulatory requirements and, depending on the identity of the counterparty, applicable international requirements. The business failure of a hedging counterparty with whom we enter into a hedging transaction will most likely result in its default. Default by a party with whom we enter into a hedging transaction may result in the loss of unrealized profits and force us to cover our commitments, if any, at the then current market price. Although generally we seek to reserve the right to terminate our hedging positions, it may not always be possible to dispose of or close out a hedging position without the consent of the hedging counterparty and we may not be able to enter into an offsetting contract in order to cover our risk. We cannot assure you that a liquid secondary market will exist for hedging instruments purchased or sold, and we may be required to maintain a position until exercise or expiration, which could result in losses.

Risks Relating to the PPIP and TALF

The terms and conditions of the TALF may change, which could adversely affect our investments.

The terms and conditions of the TALF, including asset and borrower eligibility, could be changed at any time. Any such modifications may adversely affect the market value of any of our assets financed through the TALF or our ability to obtain additional TALF financing. If the TALF is prematurely discontinued or reduced while our assets financed through the TALF are still outstanding, there may be no market for these assets and the market value of these assets would be adversely affected.

There is no assurance that we will be able to invest additional funds in the PPIF or, if we are able to participate, that funding will be available.

Investors in the legacy loan PPIP must be pre-qualified by the FDIC. The FDIC has complete discretion regarding the qualification of investors in the legacy loan PPIP and is under no obligation to approve Invesco's participation even if it meets all of the applicable criteria.

Requests for funding under the PPIP may surpass the amount of funding authorized by the U.S. Treasury, resulting in an early termination of the PPIP. In addition, under the terms of the legacy securities PPIP, the U.S. Treasury has the right to cease funding of committed but undrawn equity capital and debt financing to a specific fund participating in the legacy securities PPIP in its sole discretion. We may be unable to obtain

Table of Contents

capital and debt financing on similar terms and such actions may adversely affect our ability to purchase eligible assets and may otherwise affect expected returns on our investments.

There is no assurance that we will have sufficient capital to fund our commitment in the PPIF.

We committed to invest up to \$25.0 million in the Invesco PPIF Fund, which, in turn, invests in our target assets. As of September 30, 2009, we have not funded any of the commitment. A call on our commitment would require us to pay up to \$25.0 million in the Invesco Legacy Securities Master Fund, L.P. If we do not have sufficient capital to meet such a call, we may be forced to sell assets at significantly depressed prices to meet the call and to maintain adequate liquidity, which could have a material adverse effect on our results of operations, financial condition, business, liquidity and ability to make distributions to our shareholders, and could cause the value of our common stock to decline. Moreover, to the extent we are forced to sell assets at such time, given market conditions, we may be selling at the same time as others facing similar pressures, which could exacerbate a difficult market environment and which could result in our incurring significantly greater losses on our sale of such assets. In an extreme case of market duress, a market may not even be present for certain of our assets at any price.

There is no assurance that we will be able to obtain any additional TALF loans.

The TALF is operated by the FRBNY. The FRBNY has complete discretion regarding the extension of credit under the TALF and is under no obligation to make any additional loans to us even if we meet all of the applicable criteria. Requests for TALF loans may surpass the amount of funding authorized by the Federal Reserve and the U.S. Treasury, resulting in an early termination of the TALF. Depending on the demand for TALF loans and the general state of the credit markets, the Federal Reserve and the U.S. Treasury may decide to modify the terms and conditions of the TALF. Such actions may adversely affect our ability to further obtain TALF loans and use the loan leverage to enhance returns, and may otherwise affect expected returns on our investments.

We could lose our eligibility as a TALF borrower, which would adversely affect our ability to fulfill our investment objectives.

Any U.S. company is permitted to participate in the TALF, provided that it maintains an account relationship with a primary dealer. An entity is a U.S. company for purposes of the TALF if it is: (1) a business entity or institution that is organized under the laws of the United States or a political subdivision or territory thereof (U.S.-organized) and conducts significant operations or activities in the United States, including any U.S.-organized subsidiary of such an entity; (2) a U.S. branch or agency of a non-U.S. bank (other than a foreign central bank) that maintains reserves with a Federal Reserve Bank; (3) a U.S. insured depository institution; or (4) an investment fund that is U.S.-organized and managed by an investment manager that has its principal place of business in the United States. An entity that satisfies any one of the requirements above is a U.S. company regardless of whether it is controlled by, or managed by, a company that is not U.S.-organized. Notwithstanding the foregoing, a U.S. company excludes any entity, other than those described in clauses (2) and (3) above, that is controlled by a non-U.S. government or is managed by an investment manager controlled by a non-U.S. government, other than those described in clauses (2) and (3) above. For these purposes, a non-U.S. government controls a company if, among other things, such non-U.S. government owns, controls, or holds with power to vote 25% or more of a class of voting securities of the company. If for any reason we are deemed not to be eligible to participate in the TALF, all of our outstanding TALF loans will become immediately due and payable and we will not be eligible to obtain future TALF loans.

It may be difficult to acquire sufficient amounts of eligible assets to qualify to participate in the PPIF or the TALF consistent with our investment strategy.

Assets to be used as collateral for PPIP and TALF loans must meet strict eligibility criteria with respect to characteristics such as issuance date, maturity, and credit rating and with respect to the origination date of the underlying collateral. These restrictions may limit the availability of eligible assets, and it may be difficult

Table of Contents

to acquire sufficient amounts of assets to obtain financing under the PPIP and TALF consistent with our investment strategy.

In the legacy loan PPIP, eligible financial institutions must consult with the FDIC before offering an asset pool for sale and there is no assurance that a sufficient number of eligible financial institutions will be willing to participate as sellers in the legacy loan PPIP.

Once an asset pool has been offered for sale by an eligible financial institution, the FDIC will determine the amount of leverage available to finance the purchase of the asset pool. There is no assurance that the amount of leverage available to finance the purchase of eligible assets will be acceptable to our Manager.

The asset pools will be purchased through a competitive auction conducted by the FDIC. The auction process may increase the price of these eligible asset pools. Even if a fund in which we invest submits the winning bid on an eligible asset pool at a price that is acceptable to the fund, the selling financial institution may refuse to sell to the fund the eligible asset pool at that price.

These factors may limit the availability of eligible assets, and it may be difficult to acquire sufficient amounts of assets to obtain financing under the legacy loan PPIP consistent with our investment strategy.

It may be difficult to transfer any assets purchased using PPIP and TALF funding.

Any assets purchased using TALF funding will be pledged to the FRBNY as collateral for the TALF loans. Transfer or sale of any of these assets requires repayment of the related TALF loan or the consent of the FRBNY to assign obligations under the related TALF loan to the applicable assignee. The FRBNY in its discretion may restrict or prevent assignment of loan obligations to a third party, including a third party that meets the criteria of an eligible borrower. In addition, the FRBNY will not consent to any assignments after the termination date for making new loans, which is March 31, 2010 for TALF loans against newly issued asset-backed securities backed by consumer and business loans and legacy CMBS, and June 30, 2010 for TALF loans against newly issued CMBS, unless extended by the Federal Reserve.

Any assets purchased using PPIP funding, to the extent available, will be pledged to the FDIC as collateral for their guarantee under the legacy loan program and to the U.S. Treasury as collateral for debt financing under the legacy securities program. Transfer or sale of any of these assets requires repayment of the related loan or the consent of the FDIC or the U.S. Treasury to assign obligations to the applicable assignee. The FDIC or the U.S. Treasury, each in its discretion, may restrict or prevent assignment of obligations to a third party, including a third party that meets the criteria for participation in the PPIP.

These restrictions may limit our ability to trade or otherwise dispose of our investments, and may adversely affect our ability to take advantage of favorable market conditions and make distributions to shareholders.

We may need to surrender eligible TALF assets to repay TALF loans at maturity.

Each TALF loan must be repaid within three to five years. We invested in CMBS that do not mature within the term of the TALF loan. If we do not have sufficient funds to repay interest and principal on the related TALF loan at maturity and if these assets cannot be sold for an amount equal to or greater than the amount owed on such loan, we must surrender the assets to the FRBNY in lieu of repayment. If we are forced to sell any assets to repay a TALF loan, we may not be able to obtain a favorable price. If we default on our obligation to pay a TALF loan and the FRBNY elects to liquidate the assets used as collateral to secure such TALF loan, the proceeds from that sale will be applied, first, to any enforcement costs, second, to unpaid principal and, finally, to unpaid interest. Under the terms of the

TALF, if assets are surrendered to the FRBNY in lieu of repayment, all assets that collateralize that loan must be surrendered. In these situations, we would forfeit any equity that we held in these assets.

Table of Contents

FRBNY consent is required to exercise our voting rights on CMBS.

As a requirement of the TALF, we must agree not to exercise or refrain from exercising any voting, consent or waiver rights under a CMBS without the consent of the FRBNY. During the continuance of a collateral enforcement event, the FRBNY will have the right to exercise voting rights in the collateral.

Our ability to receive the interest earnings may be limited.

We make interest payments on TALF loans from the interest paid to us on the assets used as collateral for the TALF loan. To the extent that we receive distributions from pledged assets in excess of our required interest payments on a TALF loan during any loan year, the amount of excess interest we may retain will be limited.

Under certain conditions, we may be required to provide full recourse for TALF loans or to make indemnification payments.

To participate in the TALF, we executed customer agreements with primary dealers authorizing it, among other things, to act as our agent under TALF and to act on our behalf under the agreement with the FRBNY and with The Bank of New York Mellon as administrator and as the FRBNY's custodian of the CMBS. Under the agreements, we are required to represent to the primary dealers and to the FRBNY that, among other things, we are an eligible borrower and that the CMBS that we pledge meet the TALF eligibility criteria. The FRBNY has full recourse to us for repayment of the loan for any breach of these representations. Further, the FRBNY has full recourse to us for repayment of a TALF loan if the eligibility criteria for collateral under the TALF are considered continuing requirements and the pledged collateral no longer satisfies such criteria. In addition, we are required to pay to our primary dealers fees under the customer agreements and to indemnify our primary dealers for certain breaches under the customer agreements and to indemnify the FRBNY and its custodian for certain breaches under the agreement with the FRBNY. Payments made to satisfy such full recourse requirements and indemnities could have a material adverse effect on our net income and our distributions to our shareholders, including any proceeds of our IPO or this offering that we have not yet invested in CMBS or distributed to our shareholders.

Risks Related to Accounting

Changes in accounting treatment may adversely affect our reported profitability.

In February 2008, the Financial Accounting Standards Board, or FASB, issued final guidance regarding the accounting and financial statement presentation for transactions that involve the acquisition of Agency RMBS from a counterparty and the subsequent financing of these securities through repurchase agreements with the same counterparty. If we fail to meet the criteria under guidance to account for the transactions on a gross basis, our accounting treatment would not affect the economics of these transactions, but would affect how these transactions are reported on our financial statements. If we are not able to comply with the criteria under this final guidance for same party transactions we would be precluded from presenting Agency RMBS and the related financings, as well as the related interest income and interest expense, on a gross basis on our financial statements. Instead, we would be required to account for the purchase commitment and related repurchase agreement on a net basis and record a forward commitment to purchase Agency RMBS as a derivative instrument. Such forward commitments would be recorded at fair value with subsequent changes in fair value recognized in earnings. Additionally, we would record the cash portion of our investment in Agency RMBS as a mortgage-related receivable from the counterparty on our balance sheet. Although we would not expect this change in presentation to have a material impact on our net income, it could have an adverse impact on our operations. It could have an impact on our ability to include certain Agency RMBS purchased and simultaneously financed from the same counterparty as qualifying real estate interests or real estate-related assets used to qualify under the exemption to not have to register as an investment company under the

1940 Act. It could also limit our investment opportunities as we may need to limit our purchases of Agency RMBS that are simultaneously financed with the same counterparty.

Table of Contents

We may fail to qualify for hedge accounting treatment.

We enter into derivative transactions to reduce the impact changes in interest rates will have on our net interest margin. According to our accounting policy, we record these derivatives, known as cash flow hedges, on the balance sheet at fair market value with the changes in value recorded in equity as other comprehensive income. This hedge accounting is complex and requires documentation and testing to ensure the hedges are effective. If we fail to qualify for hedge accounting treatment, our operating results may suffer because losses on hedges may be recorded in current period earnings rather than other comprehensive income.

We have limited experience in making critical accounting estimates, and our financial statements may be materially affected if our estimates prove to be inaccurate.

Financial statements prepared in accordance with GAAP require the use of estimates, judgments and assumptions that affect the reported amounts. Different estimates, judgments and assumptions reasonably could be used that would have a material effect on the financial statements, and changes in these estimates, judgments and assumptions are likely to occur from period to period in the future. Significant areas of accounting requiring the application of management's judgment include, but are not limited to (1) assessing the adequacy of the allowance for loan losses and (2) determining the fair value of investment securities. These estimates, judgments and assumptions are inherently uncertain, and, if they prove to be wrong, then we face the risk that charges to income will be required. In addition, because we have limited operating history in some of these areas and limited experience in making these estimates, judgments and assumptions, the risk of future charges to income may be greater than if we had more experience in these areas. Any such charges could significantly harm our business, financial condition, results of operations and the price of our securities. See Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies for a discussion of the accounting estimates, judgments and assumptions that we believe are the most critical to an understanding of our business, financial condition and results of operations.

Risks Related to Our Investments

We may allocate the net proceeds from this offering to investments with which you may not agree.

You will be unable to evaluate the manner in which the net proceeds of this offering will be invested or the economic merit of our expected investments and, as a result, we may use the net proceeds from this offering to invest in investments with which you may not agree. The failure of our management to apply these proceeds effectively or find investments that meet our investment criteria in sufficient time or on acceptable terms could result in unfavorable returns, could cause a material adverse effect on our business, financial condition, liquidity, results of operations and ability to make distributions to our shareholders, and could cause the value of our common stock to decline.

Because assets we acquire may experience periods of illiquidity, we may lose profits or be prevented from earning capital gains if we cannot sell mortgage-related assets at an opportune time.

We bear the risk of being unable to dispose of our target assets at advantageous times or in a timely manner because mortgage-related assets generally experience periods of illiquidity, including the recent period of delinquencies and defaults with respect to residential and commercial mortgage loans. The lack of liquidity may result from the absence of a willing buyer or an established market for these assets, as well as legal or contractual restrictions on resale or the unavailability of financing for these assets. As a result, our ability to vary our portfolio in response to changes in economic and other conditions may be relatively limited, which may cause us to incur losses.

The lack of liquidity in our investments may adversely affect our business.

The assets that comprise our investment portfolio and that we acquire are not publicly traded. A portion of these securities may be subject to legal and other restrictions on resale or will otherwise be less liquid than publicly-traded securities. The illiquidity of our investments may make it difficult for us to sell such investments if the need or desire arises. In addition, if we are required to liquidate all or a portion of our

Table of Contents

portfolio quickly, we may realize significantly less than the value at which we have previously recorded our investments. Further, we may face other restrictions on our ability to liquidate an investment in a business entity to the extent that we or our Manager has or could be attributed with material, non-public information regarding such business entity. As a result, our ability to vary our portfolio in response to changes in economic and other conditions may be relatively limited, which could adversely affect our results of operations and financial condition.

Our investments may be concentrated and will be subject to risk of default.

While we diversify and intend to continue to diversify our portfolio of investments in the manner described in this prospectus, we are not required to observe specific diversification criteria, except as may be set forth in the investment guidelines adopted by our board of directors. Therefore, our investments in our target assets may at times be concentrated in certain property types that are subject to higher risk of foreclosure, or secured by properties concentrated in a limited number of geographic locations. To the extent that our portfolio is concentrated in any one region or type of security, downturns relating generally to such region or type of security may result in defaults on a number of our investments within a short time period, which may reduce our net income and the value of our common stock and accordingly reduce our ability to pay dividends to our shareholders.

Difficult conditions in the mortgage, residential and commercial real estate markets may cause us to experience market losses related to our holdings, and we do not expect these conditions to improve in the near future.

Our results of operations are materially affected by conditions in the mortgage market, the residential and commercial real estate markets, the financial markets and the economy generally. Recently, concerns about the mortgage market and a declining real estate market, as well as inflation, energy costs, geopolitical issues and the availability and cost of credit, have contributed to increased volatility and diminished expectations for the economy and markets going forward. The mortgage market has been severely affected by changes in the lending landscape and there is no assurance that these conditions have stabilized or that they will not worsen. The disruption in the mortgage market has an impact on new demand for homes, which will compress the home ownership rates and weigh heavily on future home price performance. There is a strong correlation between home price growth rates and mortgage loan delinquencies. The further deterioration of the RMBS market may cause us to experience losses related to our assets and to sell assets at a loss. Declines in the market values of our investments may adversely affect our results of operations and credit availability, which may reduce earnings and, in turn, cash available for distribution to our shareholders.

Dramatic declines in the residential and commercial real estate markets, with falling home prices and increasing foreclosures and unemployment, have resulted in significant asset write-downs by financial institutions, which have caused many financial institutions to seek additional capital, to merge with other institutions and, in some cases, to fail. Institutions from which we may seek to obtain financing may have owned or financed residential or commercial mortgage loans, real estate-related securities and real estate loans, which have declined in value and caused them to suffer losses as a result of the recent downturn in the residential and commercial mortgage markets. Many lenders and institutional investors have reduced and, in some cases, ceased to provide funding to borrowers, including other financial institutions. If these conditions persist, these institutions may become insolvent or tighten their lending standards, which could make it more difficult for us to obtain financing on favorable terms or at all. Our profitability may be adversely affected if we are unable to obtain cost-effective financing for our assets.

Continued adverse developments in the residential and commercial mortgage markets, including recent increases in defaults, credit losses and liquidity concerns, could make it difficult for us to borrow money to acquire our target assets on a leveraged basis, on attractive terms or at all, which could adversely affect our profitability.

Since mid-2008, there have been several announcements of proposed mergers, acquisitions or bankruptcies of investment banks and commercial banks that have historically acted as repurchase agreement

Table of Contents

counterparties. This has resulted in a fewer number of potential repurchase agreement counterparties operating in the market. In addition, many commercial banks, investment banks and insurance companies have announced extensive losses from exposure to the residential and commercial mortgage markets. These losses have reduced financial industry capital, leading to reduced liquidity for some institutions. Many of these institutions may have owned or financed assets which have declined in value and caused them to suffer losses, enter bankruptcy proceedings, further tighten their lending standards or increase the amount of equity capital or haircut required to obtain financing. These difficulties have resulted in part from declining markets for their mortgage loans as well as from claims for repurchases of mortgage loans previously sold under provisions that require repurchase in the event of early payment defaults or for breaches of representations regarding loan quality. In addition, a rising interest rate environment and declining real estate values may decrease the number of borrowers seeking or able to refinance their mortgage loans, which would result in a decrease in overall originations. In addition, the Federal Reserve's program to purchase Agency RMBS could cause an increase in the price of Agency RMBS, which would negatively impact the net interest margin with respect to Agency RMBS purchase. The general market conditions discussed above may make it difficult or more expensive for us to obtain financing on attractive terms or at all, and our profitability may be adversely affected if we were unable to obtain cost-effective financing for our investments.

We operate in a highly competitive market for investment opportunities and competition may limit our ability to acquire desirable investments in our target assets and could also affect the pricing of these securities.

We operate in a highly competitive market for investment opportunities. Our profitability depends, in large part, on our ability to acquire our target assets at attractive prices. In acquiring our target assets, we compete with a variety of institutional investors, including other REITs, specialty finance companies, public and private funds (including other funds managed by Invesco), commercial and investment banks, commercial finance and insurance companies and other financial institutions. Many of our competitors are substantially larger and have considerably greater financial, technical, marketing and other resources than we do. Several other REITs have recently raised, or are expected to raise, significant amounts of capital, and may have investment objectives that overlap with ours, which may create additional competition for investment opportunities. Some competitors may have a lower cost of funds and access to funding sources that may not be available to us, such as funding from the U.S. government, if we are not eligible to participate in programs established by the U.S. government. Many of our competitors are not subject to the operating constraints associated with REIT tax compliance or maintenance of an exemption from the 1940 Act. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than us. Furthermore, competition for investments in our target assets may lead to the price of such assets increasing, which may further limit our ability to generate desired returns. We cannot assure you that the competitive pressures we face will not have a material adverse effect on our business, financial condition and results of operations. Also, as a result of this competition, desirable investments in our target assets may be limited in the future and we may not be able to take advantage of attractive investment opportunities from time to time, as we can provide no assurance that we will be able to identify and make investments that are consistent with our investment objectives. In addition, the Federal Reserve's program to purchase Agency RMBS could cause an increase in the price of Agency RMBS, which would negatively impact the net interest margin with respect to Agency RMBS purchase.

We may acquire non-Agency RMBS collateralized by Alt A and subprime mortgage loans, which are subject to increased risks.

We may acquire non-Agency RMBS backed by collateral pools of mortgage loans that have been originated using underwriting standards that are less restrictive than those used in underwriting prime mortgage loans and Alt A mortgage loans. These lower standards include mortgage loans made to borrowers having imperfect or impaired credit histories, mortgage loans where the amount of the loan at origination is 80% or more of the value of the mortgage property, mortgage loans made to borrowers with low credit scores, mortgage loans made to borrowers who have

other debt that represents a large portion of their income and mortgage loans made to borrowers whose income is not required to be disclosed or verified. Due

Table of Contents

to economic conditions, including increased interest rates and lower home prices, as well as aggressive lending practices, subprime mortgage loans have in recent periods experienced increased rates of delinquency, foreclosure, bankruptcy and loss, and they are likely to continue to experience delinquency, foreclosure, bankruptcy and loss rates that are higher, and that may be substantially higher, than those experienced by mortgage loans underwritten in a more traditional manner. Thus, because of the higher delinquency rates and losses associated with subprime mortgage loans, the performance of non-Agency RMBS backed by subprime mortgage loans that we may acquire could be correspondingly adversely affected, which could adversely impact our results of operations, financial condition and business.

The mortgage loans that we acquire, and the mortgage and other loans underlying the non-Agency RMBS that we acquire, are subject to defaults, foreclosure timeline extension, fraud and residential and commercial price depreciation, and unfavorable modification of loan principal amount, interest rate and amortization of principal, which could result in losses to us.

Residential mortgage loans are secured by single family residential property and are subject to risks of delinquency and foreclosure and risks of loss. The ability of a borrower to repay a loan secured by a residential property typically is dependent upon the income or assets of the borrower. A number of factors, including a general economic downturn, acts of God, terrorism, social unrest and civil disturbances, may impair borrowers' abilities to repay their loans. In addition, we acquire non-Agency RMBS, which are backed by residential real property but, in contrast to Agency RMBS, their principal and interest are not guaranteed by federally chartered entities such as Fannie Mae and Freddie Mac and, in the case of Ginnie Mae, the U.S. government. The ability of a borrower to repay these loans or other financial assets is dependent upon the income or assets of these borrowers.

In the event of any default under a mortgage loan held directly by us, we bear a risk of loss of principal to the extent of any deficiency between the value of the collateral and the principal and accrued interest of the mortgage loan, which could have a material adverse effect on our cash flow from operations. In the event of the bankruptcy of a mortgage loan borrower, the mortgage loan to such borrower will be deemed to be secured only to the extent of the value of the underlying collateral at the time of bankruptcy (as determined by the bankruptcy court), and the lien securing the mortgage loan will be subject to the avoidance powers of the bankruptcy trustee or debtor in possession to the extent the lien is unenforceable under state law. Foreclosure of a mortgage loan can be an expensive and lengthy process which could have a substantial negative effect on our anticipated return on the foreclosed mortgage loan.

Agency RMBS are subject to risks particular to investments secured by mortgage loans on residential real property.

Our investments in Agency RMBS are subject to the risks of defaults, foreclosure timeline extension, fraud and home price depreciation and unfavorable modification of loan principal amount, interest rate and amortization of principal, accompanying the underlying residential mortgage loans. The ability of a borrower to repay a mortgage loan secured by a residential property is dependent upon the income or assets of the borrower. A number of factors may impair borrowers' abilities to repay their loans, including:

acts of God, including earthquakes, floods and other natural disasters, which may result in uninsured losses;

acts of war or terrorism, including the consequences of terrorist attacks, such as those that occurred on September 11, 2001;

adverse changes in national and local economic and market conditions;

changes in governmental laws and regulations, fiscal policies and zoning ordinances and the related costs of compliance with laws and regulations, fiscal policies and ordinances;

costs of remediation and liabilities associated with environmental conditions such as indoor mold; and the potential for uninsured or under-insured property losses.

Table of Contents

In the event of defaults on the residential mortgage loans that underlie our investments in Agency RMBS and the exhaustion of any underlying or any additional credit support, we may not realize our anticipated return on our investments and we may incur a loss on these investments.

The commercial mortgage loans we acquire and the commercial mortgage loans underlying the CMBS we acquire will be subject to defaults, foreclosure timeline extension, fraud and home price depreciation and unfavorable modification of loan principal amount, interest rate and amortization of principal.

CMBS are secured by a single commercial mortgage loan or a pool of commercial mortgage loans. Accordingly, the CMBS we invest in are subject to all of the risks of the respective underlying commercial mortgage loans. Commercial mortgage loans are secured by multifamily or commercial property and are subject to risks of delinquency and foreclosure, and risks of loss that may be greater than similar risks associated with loans made on the security of single-family residential property. The ability of a borrower to repay a loan secured by an income-producing property typically is dependent primarily upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. If the net operating income of the property is reduced, the borrower's ability to repay the loan may be impaired. Net operating income of an income-producing property can be affected by, among other things:

- tenant mix;
- success of tenant businesses;
- property management decisions;
- property location and condition;
- competition from comparable types of properties;
- changes in laws that increase operating expenses or limit rents that may be charged;
- any need to address environmental contamination at the property or the occurrence of any uninsured casualty at the property;
- changes in national, regional or local economic conditions and/or specific industry segments;
- declines in regional or local real estate values;
- declines in regional or local rental or occupancy rates;
- increases in interest rates;
- real estate tax rates and other operating expenses;
- changes in governmental rules, regulations and fiscal policies, including environmental legislation; and
- acts of God, terrorist attacks, social unrest and civil disturbances.

In the event of any default under a mortgage loan held directly by us, we will bear a risk of loss of principal to the extent of any deficiency between the value of the collateral and the principal and accrued interest of the mortgage loan, which could have a material adverse effect on our cash flow from operations and limit amounts available for distribution to our shareholders. In the event of the bankruptcy of a mortgage loan borrower, the mortgage loan to such borrower will be deemed to be secured only to the extent of the value of the underlying collateral at the time of bankruptcy (as determined by the bankruptcy court), and the lien securing the mortgage loan will be subject to the avoidance powers of the bankruptcy trustee or debtor-in-possession to the extent the lien is unenforceable under state law. Foreclosure of a mortgage loan can be an expensive and lengthy process, which could have a substantial negative effect on our anticipated return on the foreclosed mortgage loan.

Table of Contents

Our investments in CMBS are generally subject to losses.

We acquire CMBS. In general, losses on a mortgaged property securing a mortgage loan included in a securitization will be borne first by the equity holder of the property, then by a cash reserve fund or letter of credit, if any, then by the holder of a mezzanine loan or B-Note, if any, then by the first loss subordinated security holder (generally, the B-Piece buyer) and then by the holder of a higher-rated security. In the event of default and the exhaustion of any equity support, reserve fund, letter of credit, mezzanine loans or B-Notes, and any classes of securities junior to those in which we invest, we will not be able to recover all of our investment in the securities we purchase. In addition, if the underlying mortgage portfolio has been overvalued by the originator, or if the values subsequently decline and, as a result, less collateral is available to satisfy interest and principal payments due on the related CMBS. The prices of lower credit quality securities are generally less sensitive to interest rate changes than more highly rated investments, but more sensitive to adverse economic downturns or individual issuer developments.

We may not control the special servicing of the mortgage loans included in the CMBS in which we invest and, in such cases, the special servicer may take actions that could adversely affect our interests.

With respect to each series of CMBS in which we invest, overall control over the special servicing of the related underlying mortgage loans is held by a directing certificateholder or a controlling class representative, which is appointed by the holders of the most subordinate class of CMBS in such series. Since we predominantly focus on acquiring classes of existing series of CMBS originally rated AAA, we may not have the right to appoint the directing certificateholder. In connection with the servicing of the specially serviced mortgage loans, the related special servicer may, at the direction of the directing certificateholder, take actions with respect to the specially serviced mortgage loans that could adversely affect our interests.

If our Manager underestimates the collateral loss on our CMBS investments, we may experience losses.

Our Manager values our potential CMBS investments based on loss-adjusted yields, taking into account estimated future losses on the mortgage loans included in the securitization's pool of loans, and the estimated impact of these losses on expected future cash flows. Based on these loss estimates, our Manager may adjust the pool composition accordingly through loan removals and other credit enhancement mechanisms or leaves loans in place and negotiates for a price adjustment. Our Manager's loss estimates may not prove accurate, as actual results may vary from estimates. In the event that our Manager underestimates the pool level losses relative to the price we pay for a particular CMBS investment, we may experience losses with respect to such investment.

The B-Notes we acquire are subject to additional risks related to the privately negotiated structure and terms of the transaction, which may result in losses to us.

We may acquire B-Notes. A B-Note is a mortgage loan typically (1) secured by a first mortgage on a single large commercial property or group of related properties, and (2) subordinated to an A-Note secured by the same first mortgage on the same collateral. As a result, if a borrower defaults, there may not be sufficient funds remaining for B-Note holders after payment to the A-Note holders. However, because each transaction is privately negotiated, B-Notes can vary in their structural characteristics and risks. For example, the rights of holders of B-Notes to control the process following a borrower default may vary from transaction to transaction. Further, B-Notes typically are secured by a single property and so reflect the risks associated with significant concentration. Significant losses related to our B-Notes would result in operating losses for us and may limit our ability to make distributions to our shareholders.

Our mezzanine loan assets involve greater risks of loss than senior loans secured by income-producing properties.

We may acquire mezzanine loans, which take the form of subordinated loans secured by second mortgages on the underlying property or loans secured by a pledge of the ownership interests of either the entity owning the property or a pledge of the ownership interests of the entity that owns the interest in the

Table of Contents

entity owning the property. These types of assets involve a higher degree of risk than long-term senior mortgage lending secured by income-producing real property, because the loan may become unsecured as a result of foreclosure by the senior lender. In the event of a bankruptcy of the entity providing the pledge of its ownership interests as security, we may not have full recourse to the assets of such entity, or the assets of the entity may not be sufficient to satisfy our mezzanine loan. If a borrower defaults on our mezzanine loan or debt senior to our loan, or in the event of a borrower bankruptcy, our mezzanine loan will be satisfied only after the senior debt. As a result, we may not recover some or all of our initial expenditure. In addition, mezzanine loans may have higher loan-to-value ratios than conventional mortgage loans, resulting in less equity in the property and increasing the risk of loss of principal. Significant losses related to our mezzanine loans would result in operating losses for us and may limit our ability to make distributions to our shareholders.

Bridge loans involve a greater risk of loss than traditional investment-grade mortgage loans with fully insured borrowers.

We may acquire bridge loans secured by first lien mortgages on a property to borrowers who are typically seeking short-term capital to be used in an acquisition, construction or redevelopment of a property. The borrower has usually identified an undervalued asset that has been under-managed and/or is located in a recovering market. If the market in which the asset is located fails to recover according to the borrower's projections, or if the borrower fails to improve the quality of the asset's management and/or the value of the asset, the borrower may not receive a sufficient return on the asset to satisfy the bridge loan, and we bear the risk that we may not recover some or all of our initial expenditure.

In addition, borrowers usually use the proceeds of a conventional mortgage to repay a bridge loan. Bridge loans therefore are subject to risks of a borrower's inability to obtain permanent financing to repay the bridge loan. Bridge loans are also subject to risks of borrower defaults, bankruptcies, fraud, losses and special hazard losses that are not covered by standard hazard insurance. In the event of any default under bridge loans held by us, we bear the risk of loss of principal and non-payment of interest and fees to the extent of any deficiency between the value of the mortgage collateral and the principal amount of the bridge loan. To the extent we suffer such losses with respect to our bridge loans, the value of our company and the price of our shares of common stock may be adversely affected.

Increases in interest rates could adversely affect the value of our investments and cause our interest expense to increase, which could result in reduced earnings or losses and negatively affect our profitability as well as the cash available for distribution to our shareholders.

We invest in Agency RMBS, non-Agency RMBS, CMBS and mortgage loans. The relationship between short-term and longer-term interest rates is often referred to as the yield curve. In a normal yield curve environment, an investment in such assets will generally decline in value if long-term interest rates increase. Declines in market value may ultimately reduce earnings or result in losses to us, which may negatively affect cash available for distribution to our shareholders.

A significant risk associated with our target assets is the risk that both long-term and short-term interest rates will increase significantly. If long-term rates increased significantly, the market value of these investments would decline, and the duration and weighted average life of the investments would increase. We could realize a loss if the securities were sold. At the same time, an increase in short-term interest rates would increase the amount of interest owed on the repurchase agreements we enter into to finance the purchase of Agency RMBS.

Market values of our investments may decline without any general increase in interest rates for a number of reasons, such as increases or expected increases in defaults, or increases or expected increases in voluntary prepayments for those investments that are subject to prepayment risk or widening of credit spreads.

In addition, in a period of rising interest rates, our operating results will depend in large part on the difference between the income from our assets and financing costs. We anticipate that, in most cases, the income from such assets will respond more slowly to interest rate fluctuations than the cost of our borrowings.

Table of Contents

Consequently, changes in interest rates, particularly short-term interest rates, may significantly influence our net income. Increases in these rates will tend to decrease our net income and market value of our assets.

An increase in interest rates may cause a decrease in the volume of certain of our target assets which could adversely affect our ability to acquire target assets that satisfy our investment objectives and to generate income and pay dividends.

Rising interest rates generally reduce the demand for mortgage loans due to the higher cost of borrowing. A reduction in the volume of mortgage loans originated may affect the volume of target assets available to us, which could adversely affect our ability to acquire assets that satisfy our investment objectives. Rising interest rates may also cause our target assets that were issued prior to an interest rate increase to provide yields that are below prevailing market interest rates. If rising interest rates cause us to be unable to acquire a sufficient volume of our target assets with a yield that is above our borrowing cost, our ability to satisfy our investment objectives and to generate income and pay dividends may be materially and adversely affected.

Ordinarily, short-term interest rates are lower than longer-term interest rates. If short-term interest rates rise disproportionately relative to longer-term interest rates (a flattening of the yield curve), our borrowing costs may increase more rapidly than the interest income earned on our assets. Because we expect our investments, on average, generally will bear interest based on longer-term rates than our borrowings, a flattening of the yield curve would tend to decrease our net income and the market value of our net assets. Additionally, to the extent cash flows from investments that return scheduled and unscheduled principal are reinvested, the spread between the yields on the new investments and available borrowing rates may decline, which would likely decrease our net income. It is also possible that short-term interest rates may exceed longer-term interest rates (a yield curve inversion), in which event our borrowing costs may exceed our interest income and we could incur operating losses.

Interest rate fluctuations may adversely affect the level of our net income and the value of our assets and common stock.

Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Interest rate fluctuations present a variety of risks, including the risk of a narrowing of the difference between asset yields and borrowing rates, flattening or inversion of the yield curve and fluctuating prepayment rates, and may adversely affect our income and the value of our assets and common stock.

Interest rate mismatches between our Agency RMBS backed by ARMs or hybrid ARMs and our borrowings used to fund our purchases of these assets may reduce our net interest income and cause us to suffer a loss during periods of rising interest rates.

We fund most of our investments in Agency RMBS with borrowings that have interest rates that adjust more frequently than the interest rate indices and repricing terms of Agency RMBS backed by adjustable-rate mortgages, or ARMs, or hybrid ARMs. Accordingly, if short-term interest rates increase, our borrowing costs may increase faster than the interest rates on Agency RMBS backed by ARMs or hybrid ARMs adjust. As a result, in a period of rising interest rates, we could experience a decrease in net income or a net loss.

In most cases, the interest rate indices and repricing terms of Agency RMBS backed by ARMs or hybrid ARMs and our borrowings will not be identical, thereby potentially creating an interest rate mismatch between our investments and our borrowings. While the historical spread between relevant short-term interest rate indices has been relatively stable, there have been periods when the spread between these indices was volatile. During periods of changing interest rates, these interest rate index mismatches could reduce our net income or produce a net loss, and adversely

affect the level of our dividends and the market price of our common stock.

In addition, Agency RMBS backed by ARMs or hybrid ARMs are typically subject to lifetime interest rate caps which limit the amount an interest rate can increase through the maturity of the Agency RMBS. However, our borrowings under repurchase agreements typically are not subject to similar restrictions. Accordingly, in a period of rapidly increasing interest rates, the interest rates paid on our borrowings could

Table of Contents

increase without limitation while caps could limit the interest rates on these types of Agency RMBS. This problem is magnified for Agency RMBS backed by ARMs or hybrid ARMs that are not fully indexed. Further, some Agency RMBS backed by ARMs or hybrid ARMs may be subject to periodic payment caps that result in a portion of the interest being deferred and added to the principal outstanding. As a result, we may receive less cash income on these types of Agency RMBS than we need to pay interest on our related borrowings. These factors could reduce our net interest income and cause us to suffer a loss during periods of rising interest rates.

Because we acquire fixed-rate securities, an increase in interest rates on our borrowings may adversely affect our book value.

Increases in interest rates may negatively affect the market value of our assets. Any fixed-rate securities we invest in generally will be more negatively affected by these increases than adjustable-rate securities. In accordance with accounting rules, we are required to reduce our book value by the amount of any decrease in the market value of our assets that are classified for accounting purposes as available-for-sale. We are required to evaluate our assets on a quarterly basis to determine their fair value by using third party bid price indications provided by dealers who make markets in these securities or by third-party pricing services. If the fair value of a security is not available from a dealer or third-party pricing service, we estimate the fair value of the security using a variety of methods including, but not limited to, discounted cash flow analysis, matrix pricing, option-adjusted spread models and fundamental analysis. Aggregate characteristics taken into consideration include, but are not limited to, type of collateral, index, margin, periodic cap, lifetime cap, underwriting standards, age and delinquency experience. However, the fair value reflects estimates and may not be indicative of the amounts we would receive in a current market exchange. If we determine that an agency security is other-than-temporarily impaired, we would be required to reduce the value of such agency security on our balance sheet by recording an impairment charge in our income statement and our shareholders' equity would be correspondingly reduced. Reductions in shareholders' equity decrease the amounts we may borrow to purchase additional target assets, which could restrict our ability to increase our net income.

We may experience a decline in the market value of our assets.

A decline in the market value of our assets may require us to recognize an other-than-temporary impairment against such assets under GAAP if we were to determine that, with respect to any assets in unrealized loss positions, we do not have the ability and intent to hold such assets to maturity or for a period of time sufficient to allow for recovery to the amortized cost of such assets. If such a determination were to be made, we would recognize unrealized losses through earnings and write down the amortized cost of such assets to a new cost basis, based on the fair market value of such assets on the date they are considered to be other-than-temporarily impaired. Such impairment charges reflect non-cash losses at the time of recognition; subsequent disposition or sale of such assets could further affect our future losses or gains, as they are based on the difference between the sale price received and adjusted amortized cost of such assets at the time of sale.

Some of our portfolio investments are recorded at fair value and, as a result, there is uncertainty as to the value of these investments.

Some of our portfolio investments are in the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We value these investments quarterly at fair value, which may include unobservable inputs. Because such valuations are subjective, the fair value of certain of our assets may fluctuate over short periods of time and our determinations of fair value may differ materially from the values that would have been used if a ready market for these securities existed. The value of our common stock could be adversely affected if our determinations regarding the fair value of these investments were materially higher than the values that we ultimately realize upon their disposal.

Table of Contents

Prepayment rates may adversely affect the value of our investment portfolio.

Pools of residential mortgage loans underlie the RMBS that we acquire. In the case of residential mortgage loans, there are seldom any restrictions on borrowers' abilities to prepay their loans. We generally receive payments from principal payments that are made on these underlying mortgage loans. When borrowers prepay their mortgage loans faster than expected, this results in prepayments that are faster than expected on the RMBS. Faster than expected prepayments could adversely affect our profitability, including in the following ways:

We may purchase RMBS that have a higher interest rate than the market interest rate at the time. In exchange for this higher interest rate, we may pay a premium over the par value to acquire the security. In accordance with GAAP, we may amortize this premium over the estimated term of the RMBS. If the RMBS is prepaid in whole or in part prior to its maturity date, however, we may be required to expense the premium that was prepaid at the time of the prepayment.

A substantial portion of our adjustable-rate RMBS may bear interest rates that are lower than their fully indexed rates, which are equivalent to the applicable index rate plus a margin. If an adjustable-rate RMBS is prepaid prior to or soon after the time of adjustment to a fully-indexed rate, we will have held that RMBS while it was least profitable and lost the opportunity to receive interest at the fully indexed rate over the remainder of its expected life.

If we are unable to acquire new RMBS similar to the prepaid RMBS, our financial condition, results of operation and cash flow would suffer. Prepayment rates generally increase when interest rates fall and decrease when interest rates rise, but changes in prepayment rates are difficult to predict. Prepayment rates also may be affected by conditions in the housing and financial markets, general economic conditions and the relative interest rates on fixed rate mortgage loans, or FRMs, and ARMs.

While we seek to minimize prepayment risk to the extent practical, in selecting investments we must balance prepayment risk against other risks and the potential returns of each investment. No strategy can completely insulate us from prepayment risk.

Recent market conditions may upset the historical relationship between interest rate changes and prepayment trends, which would make it more difficult for us to analyze our investment portfolio.

Our success depends on our ability to analyze the relationship of changing interest rates on prepayments of the mortgage loans that underlie our RMBS and mortgage loans we acquire. Changes in interest rates and prepayments affect the market price of the target assets that we intend to purchase and any target assets that we hold at a given time. As part of our overall portfolio risk management, we analyze interest rate changes and prepayment trends separately and collectively to assess their effects on our investment portfolio. In conducting our analysis, we depend on certain assumptions based upon historical trends with respect to the relationship between interest rates and prepayments under normal market conditions. If the recent dislocations in the mortgage market or other developments change the way that prepayment trends have historically responded to interest rate changes, our ability to (1) assess the market value of our investment portfolio, (2) implement our hedging strategies, and (3) implement techniques to reduce our prepayment rate volatility would be significantly affected, which could materially adversely affect our financial position and results of operations.

Mortgage loan modification programs and future legislative action may adversely affect the value of, and the returns on, the target assets in which we invest.

The U.S. government, through the Federal Reserve, the FHA and the FDIC, commenced implementation of programs designed to provide homeowners with assistance in avoiding residential or commercial mortgage loan foreclosures. The programs may involve, among other things, the modification of mortgage loans to reduce the principal amount of the loans or the rate of interest payable on the loans, or to extend the payment terms of the loans. In addition, members of Congress have indicated support for additional legislative relief for homeowners, including an amendment of the bankruptcy laws to permit the modification of mortgage loans in

Table of Contents

bankruptcy proceedings. The servicer will have the authority to modify mortgage loans that are in default, or for which default is reasonably foreseeable, if such modifications are in the best interests of the holders of the mortgage securities and such modifications are done in accordance with the terms of the relevant agreements. Loan modifications are more likely to be used when borrowers are less able to refinance or sell their homes due to market conditions, and when the potential recovery from a foreclosure is reduced due to lower property values. A significant number of loan modifications could result in a significant reduction in cash flows to the holders of the mortgage securities on an ongoing basis. These loan modification programs, as well as future legislative or regulatory actions, including amendments to the bankruptcy laws, that result in the modification of outstanding mortgage loans may adversely affect the value of, and the returns on, the target assets in which we invest.

Risks Related to Our Common Stock

The market price and trading volume of our common stock may be volatile following this offering.

The market price of our common stock may be highly volatile and be subject to wide fluctuations. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. If the market price of our common stock declines significantly, you may be unable to resell your shares at or above the public offering price. We cannot assure you that the market price of our common stock will not fluctuate or decline significantly in the future. Some of the factors that could negatively affect our share price or result in fluctuations in the price or trading volume of our common stock include:

- actual or anticipated variations in our quarterly operating results or distributions;
- changes in our earnings estimates or publication of research reports about us or the real estate or specialty finance industry;
- decrease in the market valuations of our target assets;
- increased difficulty in maintaining or obtaining financing or attractive terms, or at all;
- increases in market interest rates that lead purchasers of our shares of common stock to demand a higher yield;
- changes in market valuations of similar companies;
- adverse market reaction to any increased indebtedness we incur in the future;
- additions or departures of key management personnel;
- actions by institutional shareholders;
- speculation in the press or investment community; and
- general market and economic conditions.

Common stock eligible for future sale may have adverse effects on our share price.

Our equity incentive plan provides for grants of restricted common stock and other equity-based awards up to an aggregate of 6% of the issued and outstanding shares of our common stock (on a fully diluted basis) at the time of the award, subject to a ceiling of 40 million shares of our common stock.

We, our Manager, each of our executive officers and directors, certain officers of our Manager and Invesco Investments (Bermuda) Ltd. have agreed with the underwriters from our IPO to a 90 day lock-up period (subject to extension in certain circumstances), meaning that, until the end of the 90 day lock-up period, we and they will not, subject to certain exceptions, sell or transfer any shares of common stock without the prior consent of Credit Suisse Securities (USA) LLC and Morgan Stanley & Co. Incorporated, the representatives of the underwriters of this offering. In addition, each of our Manager and Invesco Investments (Bermuda) Ltd. agreed that, for a period of one year after the date of our IPO prospectus dated June 25, 2009, it will not, without the prior written consent of Credit Suisse Securities (USA) LLC and Morgan Stanley &

Table of Contents

Co. Incorporated, dispose of or hedge any of the shares of our common stock or OP units, respectively, that it purchased in the private placement completed on July 1, 2009, subject to extension in certain circumstances. Credit Suisse Securities (USA) LLC or Morgan Stanley & Co. Incorporated may, in their sole discretion, at any time from time to time and without notice, waive the terms and conditions of the lock-up agreements to which they are a party. Additionally, each of our Manager and Invesco Investments (Bermuda) Ltd. has agreed with us to a further lock-up period that will expire at the earlier of (i) the date which is one year following the date of our IPO prospectus dated June 25, 2009 or (ii) the termination of the management agreement. Approximately 0.85% of our shares of common stock after giving effect to the sale of 7,000,000 shares in this offering and 1,425,000 OP units are subject to lock-up agreements. When the lock-up periods expire, these shares of common stock will become eligible for sale, in some cases subject to the requirements of Rule 144 under the Securities Act of 1933, as amended, or the Securities Act, which are described under **Shares Eligible for Future Sale**.

We cannot predict the effect, if any, of future sales of our common stock, or the availability of shares for future sales, on the market price of our common stock. The market price of our common stock may decline significantly when the restrictions on resale by certain of our shareholders lapse. Sales of substantial amounts of common stock or the perception that such sales could occur may adversely affect the prevailing market price for our common stock.

Also, we may issue additional shares in subsequent public offerings or private placements to make new investments or for other purposes. We are not required to offer any such shares to existing shareholders on a preemptive basis. Therefore, it may not be possible for existing shareholders to participate in such future share issuances, which may dilute the existing shareholders' interests in us.

We have not established a minimum distribution payment level, and we cannot assure you of our ability to pay distributions in the future.

We pay quarterly distributions and make other distributions to our shareholders in an amount such that we distribute all or substantially all of our REIT taxable income in each year, subject to certain adjustments. We have not established a minimum distribution payment level and our ability to pay distributions may be adversely affected by a number of factors, including the risk factors described in this prospectus. All distributions will be made at the discretion of our board of directors and will depend on our earnings, our financial condition, debt covenants, maintenance of our REIT qualification, applicable provisions of Maryland law and other factors as our board of directors may deem relevant from time to time. We believe that a change in any one of the following factors could adversely affect our results of operations and impair our ability to pay distributions to our shareholders:

the profitability of the investment of the net proceeds of our IPO and concurrent private placement and this offering;

our ability to make profitable investments;

margin calls or other expenses that reduce our cash flow;

defaults in our asset portfolio or decreases in the value of our portfolio; and

the fact that anticipated operating expense levels may not prove accurate, as actual results may vary from estimates.

We cannot assure you that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions in the future. In addition, some of our distributions may include a return in capital.

Investing in our common stock may involve a high degree of risk.

The investments we make in accordance with our investment objectives may result in a high amount of risk when compared to alternative investment options and volatility or loss of principal. Our investments may

Table of Contents

be highly speculative and aggressive, and therefore an investment in our common stock may not be suitable for someone with lower risk tolerance.

Future offerings of debt or equity securities, which would rank senior to our common stock, may adversely affect the market price of our common stock.

If we decide to issue debt or equity securities in the future, which would rank senior to our common stock, it is likely that they will be governed by an indenture or other instrument containing covenants restricting our operating flexibility. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock and may result in dilution to owners of our common stock. We and, indirectly, our shareholders, will bear the cost of issuing and servicing such securities. Because our decision to issue debt or equity securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus holders of our common stock will bear the risk of our future offerings reducing the market price of our common stock and diluting the value of their stock holdings in us.

Risks Related to Our Organization and Structure

Certain provisions of Maryland law could inhibit changes in control.

Certain provisions of the Maryland General Corporation Law, or the MGCL, may have the effect of deterring a third party from making a proposal to acquire us or of impeding a change in control under circumstances that otherwise could provide the holders of our common stock with the opportunity to realize a premium over the then-prevailing market price of our common stock. Under the MGCL, certain business combinations (including a merger, consolidation, share exchange, or, in circumstances specified in the statute, an asset transfer or issuance or reclassification of equity securities) between us and an interested shareholder (defined generally as any person who beneficially owns 10% or more of our then outstanding voting capital stock or an affiliate or associate of ours who, at any time within the two-year period prior to the date in question, was the beneficial owner of 10% or more of our then outstanding voting capital stock) or an affiliate thereof are prohibited for five years after the most recent date on which the shareholder becomes an interested shareholder. After the five-year prohibition, any business combination between us and an interested shareholder generally must be recommended by our board of directors and approved by the affirmative vote of at least (1) 80% of the votes entitled to be cast by holders of outstanding shares of our voting capital stock; and (2) two-thirds of the votes entitled to be cast by holders of voting capital stock of the corporation other than shares held by the interested shareholder with whom or with whose affiliate the business combination is to be effected or held by an affiliate or associate of the interested shareholder. These super-majority vote requirements do not apply if our common shareholders receive a minimum price, as defined under Maryland law, for their shares in the form of cash or other consideration in the same form as previously paid by the interested shareholder for its shares. These provisions of the MGCL do not apply, however, to business combinations that are approved or exempted by a board of directors prior to the time that the interested shareholder becomes an interested shareholder. Pursuant to the statute, our board of directors has by resolution exempted business combinations between us and any other person, provided that such business combination is first approved by our board of directors (including a majority of our directors who are not affiliates or associates of such person).

The control share provisions of the MGCL provide that control shares of a Maryland corporation (defined as shares which, when aggregated with other shares controlled by the shareholder (except solely by virtue of a revocable proxy), entitle the shareholder to exercise one of three increasing ranges of voting power in electing directors) acquired in a control share acquisition (defined as the direct or indirect acquisition of ownership or control of control shares) have no voting rights except to the extent approved by our shareholders by the affirmative vote of at least two-thirds of all the votes entitled to be cast on the matter, excluding votes entitled to be cast by the acquiror of control shares, our

officers and our employees who are also our directors. Our bylaws contain a provision exempting from the control share acquisition statute any

Table of Contents

and all acquisitions by any person of shares of our stock. There can be no assurance that this provision will not be amended or eliminated at any time in the future.

The unsolicited takeover provisions of the MGCL permit our board of directors, without shareholder approval and regardless of what is currently provided in our charter or bylaws, to implement takeover defenses, some of which (for example, a classified board) we do not yet have. These provisions may have the effect of inhibiting a third party from making an acquisition proposal for us or of delaying, deferring or preventing a change in control of us under circumstances that otherwise could provide the holders of shares of common stock with the opportunity to realize a premium over the then current market price. Our charter contains a provision whereby we have elected to be subject to the provisions of Title 3, Subtitle 8 of the MGCL relating to the filling of vacancies on our board of directors. See

Certain Provisions of The Maryland General Corporation Law and Our Charter and Bylaws Business Combinations and Certain Provisions of The Maryland General Corporation Law and Our Charter and Bylaws Control Share Acquisitions.

Our authorized but unissued shares of common and preferred stock may prevent a change in our control.

Our charter authorizes us to issue additional authorized but unissued shares of common or preferred stock. In addition, our board of directors may, without shareholder approval, amend our charter to increase the aggregate number of our shares of stock or the number of shares of stock of any class or series that we have authority to issue and classify or reclassify any unissued shares of common or preferred stock and set the preferences, rights and other terms of the classified or reclassified shares. As a result, our board of directors may establish a series of shares of common or preferred stock that could delay or prevent a transaction or a change in control that might involve a premium price for our shares of common stock or otherwise be in the best interest of our shareholders.

We are the sole general partner of our operating partnership and could become liable for the debts and other obligations of our operating partnership beyond the amount of our initial expenditure.

We are the sole general partner of our operating partnership, IAS Operating Partnership LP. As the sole general partner, we are liable for our operating partnership's debts and other obligations. Therefore, if our operating partnership is unable to pay its debts and other obligations, we will be liable for such debts and other obligations beyond the amount of our expenditure for ownership interests in our operating partnership. These obligations could include unforeseen contingent liabilities and could materially adversely affect our financial condition, operating results and ability to make distributions to our shareholders.

Ownership limitations may restrict change of control of business combination opportunities in which our shareholders might receive a premium for their shares.

In order for us to qualify as a REIT for each taxable year after 2008, no more than 50% in value of our outstanding capital stock may be owned, directly or indirectly, by five or fewer individuals during the last half of any calendar year. Individuals for this purpose include natural persons, private foundations, some employee benefit plans and trusts, and some charitable trusts. To preserve our REIT qualification, among other purposes, our charter generally prohibits any person from directly or indirectly owning more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of our capital stock or more than 9.8% in value or in number of shares, whichever is more restrictive, of the outstanding shares of our common stock. This ownership limitation could have the effect of discouraging a takeover or other transaction in which holders of our common stock might receive a premium for their shares over the then prevailing market price or which holders might believe to be otherwise in their best interests. Different ownership limits will apply to Invesco. These ownership limits, which our board of directors has determined will not jeopardize our REIT qualification, will allow Invesco to hold up to 25% of our outstanding common stock or up to 25% of our outstanding capital stock.

Table of Contents

Tax Risks

Your investment has various U.S. federal income tax risks.

This summary of certain tax risks is limited to the U.S. federal tax risks addressed below. Additional risks or issues may exist that are not addressed in this prospectus and that could affect the U.S. federal income tax treatment of us or our shareholders.

We strongly urge you to review carefully the discussion under **U.S. Federal Income Tax Considerations** and to seek advice based on your particular circumstances from an independent tax advisor concerning the effects of U.S. federal, state and local income tax law on an investment in our common stock and on your individual tax situation.

Our failure to qualify as a REIT would subject us to U.S. federal income tax and potentially increased state and local taxes, which would reduce the amount of cash available for distribution to our shareholders.

We have been organized and we operate in a manner that will enable us to qualify as a REIT for U.S. federal income tax purposes commencing with our taxable year ending December 31, 2009. We have not requested and do not intend to request a ruling from the Internal Revenue Service, or the IRS, that we qualify as a REIT. The U.S. federal income tax laws governing REITs are complex. The complexity of these provisions and of the applicable U.S. Treasury Department regulations that have been promulgated under the Internal Revenue Code, or Treasury Regulations, is greater in the case of a REIT that, like us, holds its assets through a partnership, and judicial and administrative interpretations of the U.S. federal income tax laws governing REIT qualification are limited. To qualify as a REIT, we must meet, on an ongoing basis, various tests regarding the nature of our assets and our income, the ownership of our outstanding shares, and the amount of our distributions. Moreover, new legislation, court decisions or administrative guidance, in each case possibly with retroactive effect, may make it more difficult or impossible for us to qualify as a REIT. Thus, while we intend to operate so that we will qualify as a REIT, given the highly complex nature of the rules governing REITs, the ongoing importance of factual determinations, and the possibility of future changes in our circumstances, no assurance can be given that we will so qualify for any particular year. These considerations also might restrict the types of assets that we can acquire in the future.

If we fail to qualify as a REIT in any taxable year, and we do not qualify for certain statutory relief provisions, we would be required to pay U.S. federal income tax on our taxable income, and distributions to our shareholders would not be deductible by us in determining our taxable income. In such a case, we might need to borrow money or sell assets in order to pay our taxes. Our payment of income tax would decrease the amount of our income available for distribution to our shareholders. Furthermore, if we fail to maintain our qualification as a REIT, we no longer would be required to distribute substantially all of our taxable income to our shareholders. In addition, unless we were eligible for certain statutory relief provisions, we could not re-elect to qualify as a REIT until the fifth calendar year following the year in which we failed to qualify.

Complying with REIT requirements may cause us to forego otherwise attractive investment opportunities or financing or hedging strategies.

To qualify as a REIT for U.S. federal income tax purposes, we must continually satisfy various tests regarding the sources of our income, the nature and diversification of our assets, and the amounts we distribute to our shareholders. To meet these tests, we may be required to forego investments we might otherwise make. We may be required to make distributions to shareholders at disadvantageous times or when we do not have funds readily available for distribution. Thus, compliance with the REIT requirements may hinder our investment performance.

Complying with REIT requirements may force us to liquidate otherwise attractive investments.

To qualify as a REIT, we generally must ensure that at the end of each calendar quarter at least 75% of the value of our total assets consists of cash, cash items, government securities and qualifying real estate

Table of Contents

assets, including certain mortgage loans and MBS. The remainder of our investment in securities (other than government securities and qualifying real estate assets) generally cannot include more than 10% of the outstanding voting securities of any one issuer or more than 10% of the total value of the outstanding securities of any one issuer. In addition, in general, no more than 5% of the value of our assets (other than government securities and qualifying real estate assets) can consist of the securities of any one issuer, and no more than 25% of the value of our total securities can be represented by securities of one or more TRSs. See U.S. Federal Income Tax Considerations Asset Tests. If we fail to comply with these requirements at the end of any quarter, we must correct the failure within 30 days after the end of such calendar quarter or qualify for certain statutory relief provisions to avoid losing our REIT qualification and suffering adverse tax consequences. As a result, we may be required to liquidate from our portfolio otherwise attractive investments. These actions could have the effect of reducing our income and amounts available for distribution to our shareholders.

REIT distribution requirements could adversely affect our ability to execute our business plan and may require us to incur debt, sell assets or take other actions to make such distributions.

To qualify as a REIT, we must distribute to our shareholders each calendar year at least 90% of our REIT taxable income (including certain items of non-cash income), determined without regard to the deduction for dividends paid and excluding net capital gain. To the extent that we satisfy the 90% distribution requirement, but distribute less than 100% of our taxable income, we will be subject to U.S. federal corporate income tax on our undistributed income. In addition, we will incur a 4% nondeductible excise tax on the amount, if any, by which our distributions in any calendar year are less than a minimum amount specified under U.S. federal income tax laws. We intend to make sufficient distributions to our shareholders to satisfy the 90% distribution requirement and to avoid both corporate income tax and the 4% nondeductible excise tax.

Our taxable income may substantially exceed our net income as determined based on GAAP. In addition, differences in timing between the recognition of taxable income and the actual receipt of cash may occur. For example, we may invest in assets, including debt instruments requiring us to accrue original issue discount, or OID, or recognize market discount income that generates taxable income in excess of economic income or in advance of the corresponding cash flow from the assets, referred to as phantom income. We may also acquire distressed debt investments that are subsequently modified by agreement with the borrower either directly or pursuant to our involvement in programs recently announced by the federal government. If amendments to the outstanding debt are significant modifications under applicable Treasury Regulations, the modified debt may be considered to have been reissued to us in a debt-for-debt exchange with the borrower, with gain recognized by us to the extent that the principal amount of the modified debt exceeds our cost of purchasing it prior to modification. Finally, we may be required under the terms of the indebtedness that we incur, whether to private lenders or pursuant to government programs, to use cash received from interest payments to make principal payment on that indebtedness, with the effect that we will recognize income but will not have a corresponding amount of cash available for distribution to our shareholders.

As a result of the foregoing, we may generate less cash flow than taxable income in a particular year and find it difficult or impossible to meet the REIT distribution requirements in certain circumstances. In such circumstances, we may be required to (1) sell assets in adverse market conditions, (2) borrow on unfavorable terms, (3) distribute amounts that would otherwise be invested in future acquisitions, capital expenditures or repayment of debt, or (4) make a taxable distribution of our shares of common stock as part of a distribution in which shareholders may elect to receive shares of common stock or (subject to a limit measured as a percentage of the total distribution) cash, in order to comply with the REIT distribution requirements. Thus, compliance with the REIT distribution requirements may hinder our ability to grow, which could adversely affect the value of our common stock.

We may choose to pay dividends in our own stock, in which case our shareholders may be required to pay income taxes in excess of the cash dividends received.

We may distribute taxable dividends that are payable in cash and shares of our common stock at the election of each shareholder. Under IRS Revenue Procedure 2009-15, up to 90% of any such taxable dividend

Table of Contents

for 2009 could be payable in our stock. Taxable shareholders receiving such dividends will be required to include the full amount of the dividend as ordinary income to the extent of our current and accumulated earnings and profits for federal income tax purposes. As a result, a U.S. shareholder may be required to pay income taxes with respect to such dividends in excess of the cash dividends received. If a U.S. shareholder sells the stock it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of our stock at the time of the sale. Furthermore, with respect to non-U.S. shareholders, we may be required to withhold U.S. tax with respect to such dividends, including in respect of all or a portion of such dividend that is payable in stock. In addition, if a significant number of our shareholders determine to sell shares of our common stock in order to pay taxes owed on dividends, it may put downward pressure on the trading price of our common stock.

Our ownership of and relationship with any TRS which we may form or acquire following the completion of this offering will be limited, and a failure to comply with the limits would jeopardize our REIT qualification and may result in the application of a 100% excise tax.

A REIT may own up to 100% of the stock of one or more TRSs. A TRS may earn income that would not be qualifying income if earned directly by the parent REIT. Both the subsidiary and the REIT must jointly elect to treat the subsidiary as a TRS. Overall, no more than 25% of the value of a REIT's assets may consist of stock or securities of one or more TRSs at the end of any calendar quarter. A TRS will pay federal, state and local income tax at regular corporate rates on any income that it earns. In addition, the TRS rules impose a 100% excise tax on certain transactions between a TRS and its parent REIT that are not conducted on an arm's length basis.

Any TRS that we may form following the completion of this offering would pay U.S. federal, state and local income tax on its taxable income, and its after-tax net income would be available for distribution to us but would not be required to be distributed to us. We anticipate that the aggregate value of the TRS stock and securities owned by us will be less than 25% of the value of our total assets (including the TRS stock and securities). Furthermore, we will monitor the value of our investments in our TRSs to ensure compliance with the rule that no more than 25% of the value of our assets may consist of TRS stock and securities. In addition, we will scrutinize all of our transactions with TRSs to ensure that they are entered into on arm's length terms to avoid incurring the 100% excise tax described above. There can be no assurance, however, that we will be able to comply with the TRS limitations or to avoid application of the 100% excise tax discussed above.

Liquidation of our assets may jeopardize our REIT qualification.

To qualify as a REIT, we must comply with requirements regarding our assets and our sources of income. If we are compelled to liquidate our investments to repay obligations to our lenders, we may be unable to comply with these requirements, ultimately jeopardizing our qualification as a REIT, or we may be subject to a 100% tax on any resultant gain if we sell assets in transactions that are considered to be prohibited transactions.

Characterization of the repurchase agreements we enter into to finance our investments as sales for tax purposes rather than as secured lending transactions or the failure of a mezzanine loan to qualify as a real estate asset would adversely affect our ability to qualify as a REIT.

We may enter into repurchase agreements with a variety of counterparties to achieve our desired amount of leverage for the assets in which we invest. When we enter into a repurchase agreement, we generally sell assets to our counterparty to the agreement and receive cash from the counterparty. The counterparty is obligated to resell the assets back to us at the end of the term of the transaction. We believe that, for U.S. federal income tax purposes, we will be treated as the owner of the assets that are the subject of repurchase agreements and that the repurchase agreements will be treated as secured lending transactions notwithstanding that such agreements may transfer record ownership of the

assets to the counterparty during the term of the agreement. It is possible, however, that the IRS could successfully assert that we did not own these assets during the term of the repurchase agreements, in which case we could fail to qualify as a REIT.

Table of Contents

In addition, we acquire mezzanine loans, which are loans secured by equity interests in a partnership or limited liability company that directly or indirectly owns real property. In Revenue Procedure 2003-65, the IRS provided a safe harbor pursuant to which a mezzanine loan, if it meets each of the requirements contained in the Revenue Procedure, will be treated by the IRS as a real estate asset for purposes of the REIT asset tests, and interest derived from the mezzanine loan will be treated as qualifying mortgage interest for purposes of the 75% gross income test, discussed below. See U.S. Federal Income Tax Considerations Gross Income Tests. Although the Revenue Procedure provides a safe harbor on which taxpayers may rely, it does not prescribe rules of substantive tax law. We may acquire mezzanine loans that may not meet all of the requirements for reliance on this safe harbor. In the event we own a mezzanine loan that does not meet the safe harbor, the IRS could challenge such loan's treatment as a real estate asset for purposes of the REIT asset and income tests, and if such a challenge were sustained, we could fail to qualify as a REIT.

The taxable mortgage pool rules may limit our financing options.

Securitizations and certain other financing structures could result in the creation of taxable mortgage pools for federal income tax purposes. A taxable mortgage pool owned by our operating partnership would be treated as a corporation for U.S. federal income tax purposes and may cause us to fail the asset tests, discussed below. See U.S. Federal Income Tax Considerations Asset Tests. These rules may limit our financing options.

The tax on prohibited transactions will limit our ability to engage in transactions, including certain methods of securitizing mortgage loans, which would be treated as sales for federal income tax purposes.

A REIT's net income from prohibited transactions is subject to a 100% tax. In general, prohibited transactions are sales or other dispositions of property, other than foreclosure property, but including mortgage loans, held primarily for sale to customers in the ordinary course of business. We might be subject to this tax if we were to dispose of or securitize loans in a manner that was treated as a sale of the loans for federal income tax purposes. Therefore, in order to avoid the prohibited transactions tax, we may choose not to engage in certain sales of loans at the REIT level, and may limit the structures we utilize for our securitization transactions, even though the sales or structures might otherwise be beneficial to us.

Complying with REIT requirements may limit our ability to hedge effectively.

The REIT provisions of the Internal Revenue Code limit our ability to enter into hedging transactions. Under these provisions, our annual gross income from non-qualifying hedges, together with any other income not generated from qualifying real estate assets, cannot exceed 25% of our gross income (excluding for this purpose, gross income from qualified hedges). In addition, our aggregate gross income from non-qualifying hedges, fees, and certain other non-qualifying sources cannot exceed 5% of our annual gross income. As a result, we might have to limit our use of advantageous hedging techniques or implement those hedges through a TRS, which we may form following the completion of this offering. This could increase the cost of our hedging activities or expose us to greater risks associated with changes in interest rates than we would otherwise want to bear.

Even if we qualify as a REIT, we may face tax liabilities that reduce our cash flow.

Even if we qualify as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income and assets, including taxes on any undistributed income, tax on income from some activities conducted as a result of a foreclosure, and state or local income, franchise, property and transfer taxes, including mortgage-related taxes. See U.S. Federal Income Tax Considerations Taxation of REITs in General. In addition, any TRSs we own will be subject to U.S. federal, state, and local corporate taxes. In order to meet the REIT qualification requirements, or to avoid the imposition of a 100% tax that applies to certain gains derived by a REIT from sales of inventory or property held

primarily for sale to customers in the ordinary course of business, we may hold some of our assets through taxable subsidiary corporations, including TRSs. Any taxes paid by such subsidiary corporations would decrease the cash available for distribution to our shareholders.

Table of Contents

We may be subject to adverse legislative or regulatory tax changes that could reduce the market price of our common stock.

At any time, the U.S. federal income tax laws or regulations governing REITs or the administrative interpretations of those laws or regulations may be amended. We cannot predict when or if any new U.S. federal income tax law, regulation or administrative interpretation, or any amendment to any existing federal income tax law, regulation or administrative interpretation, will be adopted, promulgated or become effective. Any such law, regulation or interpretation may take effect retroactively. We and our shareholders could be adversely affected by any such change in, or any new, federal income tax law, regulation or administrative interpretation.

Dividends payable by REITs do not qualify for the reduced tax rates.

Legislation enacted in 2003 generally reduces the maximum tax rate for dividends payable to domestic shareholders that are individuals, trusts and estates to 15% (through 2010). Dividends payable by REITs, however, are generally not eligible for the reduced rates. Although this legislation does not adversely affect the taxation of REITs or dividends paid by REITs, the more favorable rates applicable to regular corporate dividends could cause investors who are individuals, trusts and estates to perceive investments in REITs to be relatively less attractive than investments in stock of non REIT corporations that pay dividends, which could adversely affect the value of the stock of REITs, including our common stock.

Table of Contents

FORWARD-LOOKING STATEMENTS

We make forward-looking statements in this prospectus and other filings we make with the SEC within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and such statements are intended to be covered by the safe harbor provided by the same. Forward-looking statements are subject to substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. These forward-looking statements include information about possible or assumed future results of our business, financial condition, liquidity, results of operations, plans and objectives. When we use the words believe, expect, anticipate, estimate, plan, continue, intend, should, may or similar expressions, we intend to make forward-looking statements. Statements regarding the following subjects, among others, may be forward-looking:

use of proceeds of this offering;

our business and investment strategy;

our investment portfolio;

our projected operating results;

actions and initiatives of the U.S. government and changes to U.S. government policies;

our ability to obtain additional financing arrangements;

financing and advance rates for our target assets;

our expected leverage;

general volatility of the securities markets in which we invest;

our expected investments;

interest rate mismatches between our target assets and our borrowings used to fund such investments;

changes in interest rates and the market value of our target assets;

changes in prepayment rates on our target assets;

effects of hedging instruments on our target assets;

rates of default or decreased recovery rates on our target assets;

modifications to whole loans or loans underlying securities;

the degree to which our hedging strategies may or may not protect us from interest rate volatility;

changes in governmental regulations, tax law and rates, and similar matters;

our ability to qualify as a REIT for U.S. federal income tax purposes;

our ability to maintain our exemption from registration under the 1940 Act;

availability of investment opportunities in mortgage-related, real estate-related and other securities;

availability of qualified personnel;

estimates relating to our ability to continue to make distributions to our shareholders in the future;

our understanding of our competition; and

market trends in our industry, interest rates, real estate values, the debt securities markets or the general economy.

The forward-looking statements are based on our beliefs, assumptions and expectations of our future performance, taking into account all information currently available to us. You should not place undue reliance on these forward-looking statements. These beliefs, assumptions and expectations can change as a result of

Table of Contents

many possible events or factors, not all of which are known to us. Some of these factors are described in this prospectus under the headings Summary, Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations and Business. If a change occurs, our business, financial condition, liquidity and results of operations may vary materially from those expressed in our forward-looking statements. Any forward-looking statement speaks only as of the date on which it is made. New risks and uncertainties arise over time, and it is not possible for us to predict those events or how they may affect us. Except as required by law, we are not obligated to, and do not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Table of Contents

USE OF PROCEEDS

Our net proceeds from selling common stock in this offering will be approximately \$141,436,326, after deducting underwriting discounts and commissions and estimated offering expenses of approximately \$7,313,674 (or, if the underwriters exercise their over-allotment option in full, approximately \$162,688,982, after deducting underwriting discounts and commissions and estimated offering expenses of approximately \$8,373,518).

We plan to use all of the net proceeds from this offering as described above to acquire our target assets in accordance with our objectives and strategies described in this prospectus. See **Business** Our Investment Strategy. Our focus will be on purchasing Agency RMBS, non-Agency RMBS, CMBS and certain residential and commercial mortgage loans and investing in the Invesco PPIP Fund, in each case subject to our investment guidelines and to the extent consistent with maintaining our REIT qualification. Our Manager will make determinations as to the percentage of our equity that will be invested in each of our target assets. Its determinations will depend on prevailing market conditions and may change over time in response to opportunities available in different interest rate, economic and credit environments. Until appropriate assets can be identified, our Manager may decide to use the net proceeds to pay off our short-term debt or invest the net proceeds in interest-bearing short-term investments, including funds which are consistent with our intention to qualify as a REIT. These investments are expected to provide a lower net return than we seek to achieve from our target assets. Prior to the time we have fully used the net proceeds of this offering to acquire our target assets, we may fund our quarterly distributions out of such net proceeds.

Table of Contents**PUBLIC MARKET FOR OUR COMMON STOCK**

Our common stock is traded on the NYSE under the symbol IVR. As of December 18, 2009, there were 8,886,300 shares of common stock outstanding and approximately 3,751 shareholders. On January 11, 2010, the closing price of our common stock, as reported on the NYSE, was \$21.50. The following tables set forth, for the periods indicated, the high and low sale price of our common stock as reported on the NYSE and the dividends declared per share of our common stock.

	High	Low
2009		
Third quarter	\$ 22.18	\$ 19.25
Fourth quarter	\$ 24.92	\$ 19.34

	Common Dividends Declared per Share	
	Amount	Date of Payment
October 13, 2009	\$ 0.61	11/12/09
December 17, 2009	\$ 1.05	01/27/10

Table of Contents

DISTRIBUTION POLICY

We intend to continue to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, determined without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates on its undistributed taxable income. We generally intend to continue to pay quarterly dividends in an amount equal to our REIT taxable income, determined without regard to the deduction for dividends paid. On October 13, 2009, we declared a dividend of \$0.61 per share of common stock to shareholders of record as of October 23, 2009. We paid this dividend on November 12, 2009. On December 17, 2009, we declared a dividend of \$1.05 per share of common stock to shareholders of record as of December 31, 2009 and will pay such dividend on January 27, 2010. The December 17, 2009 dividend represents our estimate of undistributed taxable earnings for 2009 and includes approximately \$0.19 per share of estimated gains on the sale of mortgage-backed securities during the fourth quarter.

To the extent that in respect of any calendar year, cash available for distribution is less than our taxable income, we could be required to sell assets or borrow funds to make cash distributions or make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities. In addition, prior to the time we have fully invested the net proceeds of this offering, we may fund our quarterly distributions out of such net proceeds. We will generally not be required to make distributions with respect to activities conducted through any TRS. For more information, see U.S. Federal Income Tax Considerations Taxation of Our Company in General.

Any future distributions we make will be at the discretion of our board of directors and will depend upon our earnings and financial condition, debt covenants, funding or margin requirements under repurchase agreements, warehouse facilities or other secured and unsecured borrowing agreements, maintenance of our REIT qualification, applicable provisions of the MGCL, and such other factors as our board of directors deems relevant. Our earnings and financial condition will be affected by various factors, including the net interest and other income from our portfolio, our operating expenses and any other expenditures. For more information regarding risk factors that could materially adversely affect our earnings and financial condition, see Risk Factors.

We anticipate that our distributions generally will be taxable as ordinary income to our shareholders, although a portion of the distributions may be designated by us as qualified dividend income or capital gain or may constitute a return of capital. We will furnish annually to each of our shareholders a statement setting forth distributions paid during the preceding year and their characterization as ordinary income, return of capital, qualified dividend income or capital gain. For more information, see U.S. Federal Income Tax Considerations Taxation of Taxable U.S. Shareholders.

Table of Contents**CAPITALIZATION**

The following table sets forth (1) our actual capitalization at September 30, 2009, and (2) our capitalization as adjusted to reflect the effect of the sale of our common stock in this offering at the offering price of \$21.25 per share, after deducting the underwriting discount and estimated offering expenses. You should read this table together with Management's Discussion and Analysis of Financial Condition and Results of Operations and Use of Proceeds included elsewhere in this prospectus.

	As of September 30, 2009	
	As	
	Actual	Adjusted⁽¹⁾
	(Unaudited)	
	(Dollars in thousands)	
Shareholders' equity:		
Common stock, par value \$0.01 per share; 450,000,000 shares authorized, and 8,886,300 shares issued and outstanding, actual and 15,886,300 shares outstanding, as adjusted	\$ 89	\$ 159
Preferred Stock, par value \$0.01 per share; 50,000,000 shares authorized and 0 shares issued and outstanding, actual and 0 shares outstanding, as adjusted		
Additional paid in capital	172,519	313,885 ⁽²⁾

(1) Does not include the underwriters' option to purchase up to 1,050,000 additional shares.

(2) Represents additional paid in capital net of issuance costs.

Table of Contents**SELECTED FINANCIAL INFORMATION**

The following table presents selected historical financial information as of September 30, 2009 and December 31, 2008, for the three and nine months ended September 30, 2009 and for the period from June 5, 2008 (date of inception) to September 30, 2008. The selected historical financial information as of September 30, 2009, for the three and nine months ended September 30, 2009 and for the period from June 5, 2008 (date of inception) to September 30, 2008 presented in the table below has been derived from our unaudited financial statements. The selected historical financial information as of December 31, 2008 presented in the table below has been derived from our audited financial statements. The information presented below is not necessarily indicative of the trends in our performance or our results for a full fiscal year.

The information presented below is only a summary and does not provide all of the information contained in our historical financial statements, including the related notes. You should read the information below in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our historical financial statements, including the related notes, included elsewhere in this prospectus.

Balance Sheet Data

\$ in thousands	September 30, 2009 (Unaudited)	December 31, 2008

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our consolidated financial statements and the accompanying notes to our consolidated financial statements, which are included in this prospectus.

Overview

We are a Maryland corporation focused on investing in, financing and managing residential and commercial mortgage-backed securities and mortgage loans. We are externally managed and advised by our Manager, Invesco Advisers, Inc. (formerly Invesco Institutional (N.A.), Inc.), which is an indirect wholly-owned subsidiary of Invesco Ltd., or Invesco. We intend to elect and qualify to be taxed as a REIT commencing with our current taxable year ending December 31, 2009. Accordingly, we generally will not be subject to U.S. federal income taxes on our taxable income that we distribute currently to our shareholders as long as we maintain our intended qualification as a REIT. We also intend to operate our business in a manner that will permit us to maintain our exemption from registration under the Investment Company Act of 1940, as amended, or the 1940 Act.

Our objective is to provide attractive risk-adjusted returns to our investors, primarily through dividends and secondarily through capital appreciation. To achieve this objective, we invest in the following securities:

Agency RMBS, which are residential mortgage-backed securities, or RMBS, for which a U.S. government agency such as the Government National Mortgage Association, or Ginnie Mae or a federally chartered corporation such as the Federal National Mortgage Association, or Fannie Mae or the Federal Home Loan Mortgage Corporation, or Freddie Mac guarantees payments of principal and interest on the securities;

Non-Agency RMBS, which are RMBS that are not issued or guaranteed by a U.S. government agency;

CMBS, which are commercial mortgage-backed securities; and

Residential and commercial mortgage loans.

We finance our investments in Agency RMBS, and we may in the future finance our investments in non-Agency RMBS, primarily through short-term borrowings structured as repurchase agreements. In addition, we currently finance our investments in CMBS with financing under the Term Asset-Backed Securities Loan Facility, or TALF, and with private financing sources. We also finance our investments in certain non-Agency RMBS, CMBS and residential and commercial mortgage loans by investing in a public-private investment fund, or PPIF, managed by our Manager, or the Invesco PPIF Fund, which, in turn, invests in our target assets, and which receives financing from the U.S. Treasury and from the FDIC. On September 30, 2009, the Invesco PPIF Fund qualified to obtain financing under the legacy securities program under the U.S. government's Public-Private Investment Program, or PPIP.

Recent Developments

On July 1, 2009, we successfully completed our initial public offering, or IPO, pursuant to which we sold 8,500,000 shares of our common stock to the public at a price of \$20.00 per share, for net proceeds of \$165.0 million. Concurrent with our IPO, we completed a private offering in which we sold 75,000 shares of our common stock to our Manager at a price of \$20.00 per share and our operating partnership sold 1,425,000 units of limited partnership interests to Invesco Investments (Bermuda) Ltd., a wholly-owned subsidiary of Invesco, at a price of \$20.00 per unit.

The net proceeds to us from this private offering was \$30.0 million. We did not pay any underwriting discounts or commissions in connection with the private offering.

On July 27, 2009, the underwriters in our IPO exercised their over-allotment option to purchase an additional 311,200 shares of our common stock at a price of \$20.00 per share, for net proceeds of \$6.1 million. Collectively, we received net proceeds from our IPO and the concurrent private offering of approximately \$201.1 million.

Table of Contents

Since our IPO, we have been actively working to deploy our IPO proceeds and to generally commence our operations. As of September 30, 2009, we completed the following transactions:

We invested the net proceeds from our IPO and concurrent private offering, as well as monies that we borrowed under repurchase agreements and TALF, to purchase a \$881.9 million investment portfolio, which consisted of \$670.1 million in Agency RMBS, \$104.4 million in non-Agency RMBS, \$83.4 million in CMBS and \$24.0 million in CMOs.

We entered into master repurchase agreements. As of September 30, 2009, we had borrowed \$615.0 million under those master repurchase agreements at a weighted average rate of 0.34% to finance our purchases of Agency RMBS.

We entered into three interest rate swap agreements, for a notional amount of \$375.0 million, designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements.

We secured borrowings of \$64.8 million under the TALF at a weighted average interest rate of 3.87%.

We committed to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets.

Factors Impacting Our Operating Results

Our operating results can be affected by a number of factors and primarily depend on, among other things, the level of our net interest income, the market value of our assets and the supply of, and demand for, the target assets in which we invest. Our net interest income, which includes the amortization of purchase premiums and accretion of purchase discounts, varies primarily as a result of changes in market interest rates and prepayment speeds, as measured by the constant prepayment rate, or CPR, on our target assets. Interest rates and prepayment speeds vary according to the type of investment, conditions in the financial markets, competition and other factors, none of which can be predicted with any certainty.

Market Conditions

Beginning in the summer of 2007, significant adverse changes in financial market conditions resulted in a deleveraging of the entire global financial system. As part of this process, residential and commercial mortgage markets in the United States experienced a variety of difficulties, including loan defaults, credit losses and reduced liquidity. As a result, many lenders tightened their lending standards, reduced lending capacity, liquidated significant portfolios or exited the market altogether, and therefore, financing with attractive terms is generally unavailable. In response to these unprecedented events, the U.S. government has taken a number of actions to stabilize the financial markets and encourage lending. Significant measures include the enactment of the Emergency Economic Stabilization Act of 2008 to, among other things, establish TARP, the enactment of the Housing and Economic Recovery Act of 2008, which established a new regulator for Fannie Mae and Freddie Mac and the establishment of the TALF and the PPIP.

We have elected to participate in programs established by the U.S. government, including the TALF and the PPIP, in order to increase our ability to acquire our target assets and to provide a source of financing for such acquisitions. The TALF is intended to make credit available to consumers and businesses on more favorable terms by facilitating the issuance of asset-backed securities and improving the market conditions for asset-backed securities generally. The Federal Reserve Bank of New York, or FRBNY, will make up to \$200 billion of loans under the TALF. The PPIP is designed to encourage the transfer of certain illiquid legacy real estate-related assets off of the balance sheets of

financial institutions, restarting the market for these assets and supporting the flow of credit and other capital into the broader economy. See [Business Our Strategies Financing Strategy The Term Asset Backed Securities](#) and [Business Our Strategies Financing Strategy The Public-Private Investment Program](#) for a detailed description of TALF and PPIP.

Table of Contents**Investment Activities**

As of September 30, 2009, 37% of our equity was invested in Agency RMBS, 48% in non-Agency RMBS, 9% in CMBS and 6% in other assets (including cash and restricted cash). In addition, we made a commitment to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets at the direction of our Manager's investment committee. As of September 30, 2009, we had not funded any of the commitment. We use leverage on our target assets to achieve our return objectives. For our investments in Agency RMBS, we focus on securities we believe provide attractive returns when levered approximately 6 to 8 times. For our investments in non-Agency RMBS, we primarily focus on securities we believe provide attractive unlevered returns, however, in the future we may employ leverage of up to 1 time. We leverage our CMBS 3 to 5 times. In addition, we may use other financing, including other PPIP funds and private financing.

As of September 30, 2009, we had purchased approximately \$237.1 million in 30-year fixed rate securities that offered higher coupons and call protection based on the collateral attributes. We balanced this with approximately \$277.2 million in 15-year fixed rate, approximately \$145.5 million in hybrid ARMs and approximately \$10.3 million in ARMs we believe to have similar durations based on prepayment speeds. In addition, as of September 30, 2009, we had purchased approximately \$24.0 million in CMOs. As of September 30, 2009, we had purchased approximately \$104.4 million non-Agency RMBS.

Our investments in CMBS are limited to securities for which we are able to obtain financing under the TALF. Our primary focus is on investing in AAA-rated securities issued prior to 2008. As of September 30, 2009, we had purchased approximately \$83.4 million in CMBS and financed such purchases with a \$64.8 million TALF loan.

Investment Portfolio

The following table summarizes certain characteristics of our investment portfolio as of September 30, 2009:

	Principal Balance	Unamortized Premium (Discount)	Amortized Cost	Unrealized Gain/ (Loss)	Fair Value	Net Weighted Average Coupon⁽¹⁾	Average Yield⁽²⁾
\$ in thousands							
Agency RMBS:							
15-year fixed-rate	264,787	9,653	274,440	2,786	277,226	4.83%	3.77%
30-year fixed-rate	221,764	14,732	236,496	634	237,130	6.43%	4.46%
ARM	10,335	233	10,568	(276)	10,292	2.72%	2.34%
Hybrid ARM	138,771	6,628	145,399	85	145,484	5.08%	4.08%
Total Agency RMBS	635,657	31,246	666,903	3,229	670,132	5.41%	4.06%
MBS-CMO	22,313	1,116	23,429	620	24,049	6.50%	4.23%
Non-Agency RMBS	159,200	(63,129)	96,071	8,314	104,385	4.34%	18.45%
CMBS	87,272	(4,627)	82,645	727	83,372	5.13%	6.24%
Total	904,442	(35,394)	869,048	12,890	881,938	5.22%	5.86%

- (1) Weighted average coupon is presented net of servicing and other fees.
- (2) Average yield incorporates future prepayment assumptions.

Table of Contents

The following table summarizes certain characteristics of our investment portfolio, at fair value, according to their estimated weighted average life classifications as of September 30, 2009:

\$ in thousands	September 30, 2009
Less than one year	
Greater than one year and less than five years	538,405
Greater than or equal to five years	343,533
Total	881,938

The following table presents certain information about the carrying value of our available for sale MBS as of September 30, 2009:

\$ in thousands	September 30, 2009
Principal balance	904,442
Unamortized premium	32,362
Unamortized discount	(67,756)
Gross unrealized gains	14,669
Gross unrealized losses	(1,779)
Carrying value/estimated fair value	881,938

Financing and Other Liabilities. Following the closing of our IPO, we entered into repurchase agreements to finance the majority of our Agency RMBS. These agreements are secured by our Agency RMBS and bear interest at rates that have historically moved in close relationship to the London Interbank Offer Rate, or LIBOR. As of September 30, 2009, we had entered into repurchase agreements totaling \$615.0 million. In addition, we funded our CMBS portfolio with borrowings of \$64.8 million under the TALF. The TALF loans are non-recourse and mature in July and August 2014. Finally, we committed to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets.

Hedging Instruments. We generally hedge as much of our interest rate risk as we deem prudent in light of market conditions. No assurance can be given that our hedging activities will have the desired beneficial impact on our results of operations or financial condition. Our investment policies do not contain specific requirements as to the percentages or amount of interest rate risk that we are required to hedge.

Interest rate hedging may fail to protect or could adversely affect us because, among other things:

available interest rate hedging may not correspond directly with the interest rate risk for which protection is sought;

the duration of the hedge may not match the duration of the related liability;

the party owing money in the hedging transaction may default on its obligation to pay;

the credit quality of the party owing money on the hedge may be downgraded to such an extent that it impairs our ability to sell or assign our side of the hedging transaction; and

the value of derivatives used for hedging may be adjusted from time to time in accordance with accounting rules to reflect changes in fair value. Downward adjustments, or mark-to-market losses would reduce our shareholders' equity.

As of September 30, 2009, we had entered into three interest rate swap agreements designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements. These swap agreements provide for fixed interest rates indexed off of one-month LIBOR and effectively fix the floating interest rates on \$375.0 million of borrowings under our repurchase agreements. We intend to continue to add interest rate hedge positions according to our hedging strategy.

Table of Contents

The following table summarizes our hedging activity as of September 30, 2009:

Swap Transactions

Counterparty	Notional Amount (\$ in thousands)	Maturity Date	Fixed Interest Rate in Contract
The Bank of New York Mellon	175,000	8/5/2012	2.07%
SunTrust Bank	100,000	7/15/2014	2.79%
Credit Suisse International	100,000	2/24/2015	3.26%
Total/Weighted Average	375,000		2.58%

Book Value per Share

As of September 30, 2009, our book value per common share was \$20.82.

Critical Accounting Policies

Our consolidated financial statements are prepared in accordance with GAAP, which requires the use of estimates and assumptions that involve the exercise of judgment and use of assumptions as to future uncertainties. Our most critical accounting policies involve decisions and assessments that could affect our reported assets and liabilities, as well as our reported revenues and expenses. We believe that all of the decisions and assessments upon which our consolidated financial statements are based are reasonable at the time made and based upon information available to us at that time. We rely upon independent pricing of our assets at each quarter's end to arrive at what we believe to be reasonable estimates of fair market value. We have identified what we believe will be our most critical accounting policies to be the following:

Basis of Quarterly Presentation

In July 2009, the Financial Accounting Standards Board, or FASB, issued Statement No. 168, The FASB Accounting Standards Codificationtm and the Hierarchy of Generally Accepted Accounting Principles – A Replacement of FASB Statement No. 162, or FASB Statement No. 168. FASB Statement No. 168 replaces the existing hierarchy of U.S. Generally Accepted Accounting Principles with the FASB Accounting Standards Codificationtm, or the Codification as the single source of authoritative U.S. accounting and reporting standards applicable for all nongovernmental entities, with the exception of guidance issued by the SEC and its staff.

FASB Statement No. 168 is now encompassed in ASC Topic 105, Generally Accepted Accounting Principles, and was effective July 1, 2009. We have replaced references to U.S. Generally Accepted Accounting Principles with ASC references, where applicable and relevant in this prospectus.

We will no longer refer to the specific location of applicable accounting guidance in the Codification as had been past practice under pre-Codification GAAP, unless its use is necessary to clarify transitional issues.

Principles of Consolidation

The consolidated financial statements include our accounts and the accounts of our subsidiaries. All intercompany balances and transactions have been eliminated.

Use of Estimates

Our accounting and reporting policies conform to GAAP. The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Examples of estimates include, but are not limited to, estimates of the fair values of financial instruments and interest income on MBS. Actual results may differ from those estimates.

Table of Contents

Cash and Cash Equivalents

We consider all highly liquid investments that have original or remaining maturity dates of three months or less when purchased to be cash equivalents. At September 30, 2009, we had cash and cash equivalents, including amounts restricted, in excess of the Federal Deposit Insurance Corporation deposit insurance limit of \$250,000 per institution. We mitigate our risk by placing cash and cash equivalents with major financial institutions.

Repurchase Agreements

We finance our Agency RMBS investment portfolio, and may finance our non-Agency RMBS investment portfolio, through the use of repurchase agreements. Repurchase agreements are treated as collateralized financing transactions and are carried at their contractual amounts, including accrued interest, as specified in the respective agreements.

In instances where we acquire Agency RMBS through repurchase agreements with the same counterparty from whom the Agency RMBS were purchased, we account for the purchase commitment and repurchase agreement on a net basis and record a forward commitment to purchase Agency RMBS as a derivative instrument if the transaction does not comply with the criteria for gross presentation. All of the following criteria must be met for gross presentation in the circumstance where the repurchase assets are financed with the same counterparty as follows:

the initial transfer of and repurchase financing cannot be contractually contingent;

the repurchase financing entered into between the parties provides full recourse to the transferee and the repurchase price is fixed;

the financial asset has an active market and the transfer is executed at market rates; and

the repurchase agreement and financial asset do not mature simultaneously.

For assets representing available-for-sale investment securities, which is the case with respect to our portfolio of investments, any change in fair value is reported through consolidated other comprehensive income (loss) with the exception of impairment losses, which are recorded in the consolidated statement of operations.

If the transaction complies with the criteria for gross presentation, we record the assets and the related financing on a gross basis on our balance sheet, and the corresponding interest income and interest expense in its statements of operations. Such forward commitments are recorded at fair value with subsequent changes in fair value recognized in income. Additionally, we record the cash portion of our investment in Agency RMBS and non-Agency RMBS as a mortgage related receivable from the counterparty on our balance sheet.

Fair Value Measurements

We disclose the fair value of our financial instruments according to a fair value hierarchy (levels 1, 2, and 3, as defined). In accordance with GAAP, we are required to provide enhanced disclosures regarding instruments in the level 3 category (which require significant management judgment), including a separate reconciliation of the beginning and ending balances for each major category of assets and liabilities.

Additionally, GAAP permits entities to choose to measure many financial instruments and certain other items at fair value, or the fair value option. Unrealized gains and losses on items for which the fair value option has been elected are irrevocably recognized in earnings at each subsequent reporting date.

Securities

We designate securities as held-to-maturity, available-for-sale, or trading depending on our ability and intent to hold such securities to maturity. Trading and securities, available-for-sale, are reported at fair value, while securities held-to-maturity are reported at amortized cost. Although we generally intend to hold most of its RMBS and CMBS until maturity, we may, from time to time, sell any of our RMBS or CMBS as part of

Table of Contents

our overall management of our investment portfolio and as such will classify our RMBS and CMBS as available-for-sale securities.

All securities classified as available-for-sale are reported at fair value, based on market prices from third-party sources, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity.

We evaluate securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market conditions warrant such evaluation. The determination of whether a security is other-than-temporarily impaired involves judgments and assumptions based on subjective and objective factors. Consideration is given to (i) the length of time and the extent to which the fair value has been less than cost, (ii) the financial condition and near-term prospects of recovery, in fair value of the security, and (iii) our intent and ability to retain its investment in the security for a period of time sufficient to allow for any anticipated recovery in fair value. For debt securities, the amount of the other-than-temporary impairment related to a credit loss or impairments on securities that we have the intent or for which it is more likely than not that we will need to sell before recovery are recognized in earnings and reflected as a reduction in the cost basis of the security. The amount of the other-than-temporary impairment on debt securities related to other factors is recorded consistent with changes in the fair value of all other available-for-sale securities as a component of consolidated shareholders' equity in other comprehensive income or loss with no change to the cost basis of the security.

Interest Income Recognition

Interest income on available-for-sale MBS, which includes accretion of discounts and amortization of premiums on such MBS, is recognized over the life of the investment using the effective interest method. Management estimates, at the time of purchase, the future expected cash flows and determines the effective interest rate based on these estimated cash flows and our purchase price. As needed, these estimated cash flows are updated and a revised yield is computed based on the current amortized cost of the investment. In estimating these cash flows, there are a number of assumptions subject to uncertainties and contingencies, including the rate and timing of principal payments (prepayments, repurchases, defaults and liquidations), the pass through or coupon rate and interest rate fluctuations. In addition, interest payment shortfalls due to delinquencies on the underlying mortgage loans have to be judgmentally estimated. These uncertainties and contingencies are difficult to predict and are subject to future events that may impact management's estimates and its interest income. Security transactions are recorded on the trade date. Realized gains and losses from security transactions are determined based upon the specific identification method and recorded as gain (loss) on sale of available-for-sale securities in the consolidated statement of operations.

Earnings per Share

We calculate basic earnings per share by dividing net income for the period by weighted-average shares of our common stock outstanding for that period. Diluted income per share takes into account the effect of dilutive instruments, such as units of limited partnership interests in the operating partnership, or the OP Units, stock options and unvested restricted stock, but uses the average share price for the period in determining the number of incremental shares that are to be added to the weighted-average number of shares outstanding. For the period from June 5, 2008 (date of inception) to September 30, 2008, earnings per share is not presented because it is not a meaningful measure of our performance.

Comprehensive Income

Comprehensive income is comprised of net income, as presented in the consolidated statements of operations, adjusted for changes in unrealized gains or losses on available for sale securities and changes in the fair value of

derivatives accounted for as cash flow hedges.

Table of Contents

Accounting for Derivative Financial Instruments

GAAP provides disclosure requirements for derivatives and hedging activities with the intent to provide users of financial statements with an enhanced understanding of: (i) how and why an entity uses derivative instruments; (ii) how derivative instruments and related hedged items are accounted for; and (iii) how derivative instruments and related hedged items affect an entity's financial position, financial performance, and cash flows. GAAP requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about the fair value of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative instruments.

We record all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether we have elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Derivatives may also be designated as hedges of the foreign currency exposure of a net investment in a foreign operation. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. We may enter into derivative contracts that are intended to economically hedge certain of our risk, even though hedge accounting does not apply or we elect not to apply hedge accounting under GAAP.

Income Taxes

We intend to elect and qualify to be taxed as a REIT, commencing with our current taxable year ending December 31, 2009. Accordingly, we will generally not be subject to U.S. federal and applicable state and local corporate income tax to the extent that we make qualifying distributions to our shareholders, and provided we satisfy on a continuing basis, through actual investment and operating results, the REIT requirements including certain asset, income, distribution and stock ownership tests. If we fail to qualify as a REIT, and do not qualify for certain statutory relief provisions, we will be subject to U.S. federal, state and local income taxes and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year in which we lost our REIT qualification. Accordingly, our failure to qualify as a REIT could have a material adverse impact on our results of operations and amounts available for distribution to our shareholders.

A REIT's dividend paid deduction for qualifying dividends to our shareholders is computed using our taxable income as opposed to net income reported on the consolidated financial statements. Taxable income, generally, will differ from net income reported on the consolidated financial statements because the determination of taxable income is based on tax regulations and not financial accounting principles.

We may elect to treat certain of our future subsidiaries as taxable REIT subsidiaries, or TRSs. In general, a TRS may hold assets and engage in activities that we cannot hold or engage in directly and generally may engage in any real estate or non-real estate-related business. A TRS is subject to U.S. federal, state and local corporate income taxes.

While a TRS will generate net income, a TRS can declare dividends to us which will be included in our taxable income and necessitate a distribution to our shareholders. Conversely, if we retain earnings at a TRS level, no distribution is required and we can increase book equity of the consolidated entity. We have no adjustments regarding our tax accounting treatment of any uncertainties. We expect to recognize interest and penalties related to uncertain

tax positions, if any, as income tax expense, which will be included in general and administrative expense.

Table of Contents

Share-Based Compensation

We follow GAAP with regard to our equity incentive plan. Share-based compensation arrangements include share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. GAAP requires that compensation cost relating to share-based payment transactions be recognized in consolidated financial statements. The cost is measured based on the fair value of the equity or liability instruments issued on the date of grant.

On July 1, 2009, we adopted an equity incentive plan under which our independent directors, as part of their compensation for serving as directors, are eligible to receive quarterly restricted stock awards. In addition, we may compensate our officers under this plan pursuant to the management agreement.

Recent Accounting Pronouncements

In January 2009, the FASB issued FASB Staff Position EITF 99-20-1 Amendments to the Impairment Guidance of EITF Issue No. 99-20, or FSP EITF 99-20-1, which became effective for us on December 31, 2008. FSP EITF 99-20-1, which is now encompassed in ASC 325, Investments Other, revises the impairment guidance provided by FSP EITF 99-20 for beneficial interests to make it consistent with the requirements of FASB Statement No. 115 (now encompassed in ASC 320, Investments Debt and Equity Securities) for determining whether an impairment of other debt and equity securities is other-than-temporary. FSP EITF 99-20-1 eliminates the requirement that a holder's best estimate of cash flows be based upon those that a market participant would use. Instead, FSP 99-20-1 requires that an other-than-temporary impairment be recognized when it is probable that there has been an adverse change in the holder's estimated cash flows. FSP 99-20-1 did not have a material impact on our consolidated financial statements.

On April 9, 2009, the FASB issued three FSPs intended to provide additional application guidance and enhance disclosures regarding fair value measurements and impairments of securities. FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions that Are Not Orderly, or FSP FAS 157-4, provides guidelines for making fair value measurements more consistent with the principles presented in FASB Statement No. 157. FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, or FSP FAS 107-1 and APB 28-1, enhances consistency in financial reporting by increasing the frequency of fair value disclosures. FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, or FSP FAS 115-2 and FAS 124-2, provides additional guidance designed to create greater clarity and consistency in accounting for and presenting impairment losses on securities. All three FSPs are now encompassed in ASC 820.

FSP FAS 157-4 addresses the measurement of fair value of financial assets when there is no active market or where the price inputs being used could be indicative of distressed sales. FSP FAS 157-4 reaffirms the definition of fair value already reflected in FASB Statement No. 157, which is the price that would be paid to sell an asset in an orderly transaction (as opposed to a distressed or forced transaction) at the measurement date under current market conditions. FSP FAS 157-4 also reaffirms the need to use judgment to ascertain if a formerly active market has become inactive and in determining fair values when markets have become inactive. FSP FAS 157-4 became effective for us for the period ended September 30, 2009. The application of FSP FAS 157-4 did not result in a change in valuation techniques or related inputs used to obtain the fair value measurement of our assets that are carried at fair value in the balance sheet.

FSP FAS 107-1 and APB 28-1 were issued to improve the fair value disclosures for any financial instruments that are not currently reflected on the balance sheet of companies at fair value. Prior to the issuance of FSP FAS 107-1 and APB 28-1, fair values of these assets and liabilities were only disclosed once a year. FSP FAS 107-1 and APB 28-1

now requires these disclosures on a quarterly basis, providing qualitative and quantitative information about fair value estimates for all those financial instruments not measured on the balance sheet at fair value.

FSP FAS 115-2 and FAS 124-2 is intended to improve the consistency in the timing of impairment recognition and provide greater clarity to investors about the credit and noncredit components of impaired debt

Table of Contents

securities that are not expected to be sold. FSP FAS 115-2 and FAS 124-2, require increased and more timely disclosures sought by investors regarding expected cash flows, credit losses, and an aging of securities with unrealized losses. We adopted FSP FAS 115-2 and FAS 124-2 on April 1, 2009.

FSP FAS 157-4, FSP FAS 107-1 and APB 28-1, and FSP FAS 115-2 and FAS 124-2 are effective for interim and annual periods ending after June 15, 2009, and provide for early adoption for the interim and annual periods ending after March 15, 2009. We adopted all three FSPs for the interim period ending June 30, 2009.

The FASB issued FSP FAS 140-3, which is now encompassed in ASC 860. In instances where we acquire Agency RMBS through repurchase agreements with the same counterparty from whom the Agency RMBS were purchased, we will account for the purchase commitment and repurchase agreement on a net basis and record a forward commitment to purchase Agency RMBS as a derivative instrument if the transaction does not comply with the criteria for gross presentation. All of the following criteria must be met for gross presentation in the circumstance where the repurchase assets are financed with the same counterparty as follows:

the initial transfer of and repurchase financing cannot be contractually contingent;

the repurchase financing entered into between the parties provides full recourse to the transferee and the repurchase price is fixed;

the financial asset has an active market and the transfer is executed at market rates; and

the repurchase agreement and financial asset do not mature simultaneously.

For assets representing available-for-sale investment securities, as in our case, any change in fair value is reported through consolidated other comprehensive income (loss) with the exception of impairment losses, which are recorded in the consolidated statement of operations.

If the transaction complies with the criteria for gross presentation, we will record the assets and the related financing on a gross basis on our balance sheet, and the corresponding interest income and interest expense in its statements of operations. Such forward commitments are recorded at fair value with subsequent changes in fair value recognized in income. Additionally, we will record the cash portion of our investment in Agency RMBS and non-Agency RMBS as a mortgage related receivable from the counterparty on our balance sheet.

In March 2008, the FASB issued SFAS 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of SFAS 133, or SFAS 161, now encompassed in ASC 815. This new standard requires enhanced disclosures for derivative instruments, including those used in hedging activities. It is effective for fiscal years and interim periods beginning after November 15, 2008 and became applicable to us beginning in the first quarter of fiscal 2009. The adoption of SFAS 161 did not have a material effect on our consolidated financial statements, but did require additional disclosures in Note 5, Derivatives and Hedging Activities.

In May 2009, the FASB issued SFAS 165, Subsequent Events, or SFAS 165, which is now encompassed in ASC 855, Subsequent Events. SFAS 165 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. Specifically, SFAS 165 provides clarity around the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements, the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements, and the disclosure that an entity should make about events or transactions that occurred after the balance sheet date. SFAS 165 is effective for interim and annual financial reporting periods ending after June 15,

2009 and shall be applied prospectively. We have made the required disclosures in our financial statements at Note 13, Subsequent Events.

In June 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets, an amendment to SFAS No. 140, or SFAS 166. SFAS 166 eliminates the concept of a qualifying special-

Table of Contents

purpose entity, changes the requirements for derecognizing financial assets, and requires additional disclosures in order to enhance information reported to users of financial statements by providing greater transparency about transfers of financial assets, including securitization transactions, and an entity's continuing involvement in and exposure to the risks related to transferred financial assets. SFAS 166 is effective for fiscal years beginning after November 15, 2009. We will adopt SFAS 166 in fiscal 2010 and are evaluating the impact it will have on our results of operations and financial position.

In June 2009, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R), or SFAS 167. The amendments include: (i) the elimination of the exemption for qualifying special purpose entities; (ii) a new approach for determining who should consolidate a variable-interest entity; and (iii) changes to when it is necessary to reassess who should consolidate a variable-interest entity. SFAS 167 is effective for the first annual reporting period beginning after November 15, 2009 and for interim periods within that first annual reporting period. We will adopt SFAS 167 in fiscal 2010 and are evaluating the impact it will have on our results of operations and financial position.

In June 2009, the FASB issued SFAS No. 168, which established the Codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. SFAS 168 is effective for interim and annual periods ending after September 15, 2009. We began to use the Codification when referring to GAAP in our Quarterly Report on Form 10-Q for the interim period ended September 30, 2009. The adoption of these provisions did not have a material effect on our consolidated financial statements.

Results of Operations

The table below presents certain information from our Consolidated Statement of Operations for the three month periods ended September 30, 2009 and June 30, 2009 (2008 financial information is not meaningful and is therefore omitted):

Table of Contents

Net Income Summary

For the three months ended September 30, 2009, our net income was \$7.2 million, or \$0.70 basic income per average share available to common shareholders.

For the nine months ended September 30, 2009, our net income was \$7.0 million, due to operating losses incurred prior to our IPO.

Interest Income and Average Earning Asset Yield

We had average earning assets of \$870.9 million for the three months ended September 30, 2009. Our primary source of income is interest income. Our interest income was \$11.0 million for the three months ended September 30, 2009. The yield on our average investment portfolio was 5.04%. The CPR of our portfolio impacts the amount of premium and discount on the purchase of securities that is recognized into income. At September 30, 2009, our 15-year Agency RMBS had a 3-month CPR of 10.8, the 30-year Agency RMBS portfolio had a 3-month CPR of 16.0, and our Agency Hybrid Adjustable Rate Mortgage, or ARM, portfolio prepaid at a 20.5 CPR. Our non-Agency RMBS portfolio paid at a 3-month CPR of 16.4 and our CMBS had no prepayment of principal. Overall, the weighted average 3-month CPR on our investment portfolio was 13.7.

Interest Expense and the Cost of Funds

Our largest expense is the interest expense on borrowed funds. We had average borrowed funds of \$662.5 million and total interest expense of \$2.1 million for the three months ended September 30, 2009.

Our average cost of funds was 1.25% for the three months ended September 30, 2009. Since a substantial portion of our repurchase agreements are short term, changes in market rates are directly reflected in our interest expense. Interest expense includes borrowing costs under repurchase agreements, the TALF borrowings, as well as and hedging costs for our cash flow hedges.

Net Interest Income

Our net interest income, which equals interest income less interest expense, totaled \$8.9 million for the three months ended September 30, 2009. Our net interest rate margin, which equals the yield on our average assets for the period less the average cost of funds for the period, was 3.79% for the three months ended September 30, 2009.

Other Loss

Our other loss for the three months ended September 30, 2009 relates to the unrealized loss on interest rate swaps of approximately \$13,000, which represents the ineffective portion of the change in fair value of our interest rate swaps which is recognized directly in earnings for the three months ended September 30, 2009.

Expenses

We incurred management fees of \$753,000 for the three and nine months ended September 30, 2009, which are payable to our Manager under our management agreement. See [Certain Relationships and Related Transactions](#) for a discussion of the management fee and our relationship with our Manager.

Our general and administrative expense of \$245,000 and \$349,000 for the three and nine months ended September 30, 2009, respectively, includes the salary and the estimated bonus of our Chief Financial Officer, amortization of equity based compensation related to anticipated quarterly grants of our stock to our independent directors, payable subsequent to each calendar quarter, cash-based payments to our independent directors, derivative transaction fees, software licensing, industry memberships, filing fees, travel and entertainment and other miscellaneous general and administrative costs.

Table of Contents

Our insurance expense of \$354,000 and \$369,000 for the three and nine months ended September 30, 2009, respectively, represents the cost of liability insurance to indemnify our directors and officers.

Our professional fees of \$375,000 and \$388,000 for the three and nine months ended September 30, 2009, respectively, represents the cost of legal, accounting, auditing and consulting services provided to us by third party service providers.

Net Income and Return on Average Equity

Our net income was \$7.2 million for the three months ended September 30, 2009. Our annualized return on average equity was 13.73% for the three months ended September 30, 2009.

Liquidity and Capital Resources

Liquidity is a measurement of our ability to meet potential cash requirements, including ongoing commitments to pay dividends, fund investments and other general business needs. Our primary sources of funds for liquidity consists of the net proceeds from our common equity offerings, net cash provided by operating activities, cash from repurchase agreements and other financing arrangements and future issuances of common equity, preferred equity, convertible securities and/or equity or debt securities. We also have sought, and may continue to finance our assets under, and may otherwise participate in, programs established by the U.S. government.

We generally maintain liquidity to pay down borrowings under repurchase arrangements to reduce borrowing costs and otherwise efficiently manage our long-term investment capital. Because the level of these borrowings can be adjusted on a daily basis, the level of cash and cash equivalents carried on our balance sheet is significantly less important than our potential liquidity available under borrowing arrangements. We currently believe that we have sufficient liquidity and capital resources available for the acquisition of additional investments, repayments on borrowings and the payment of cash dividends as required for continued qualification as a REIT.

As of September 30, 2009, we had entered into repurchase agreements with various counterparties for total borrowings of \$615.0 million at a weighted average rate of 0.34% to finance our purchases of Agency RMBS. We generally target a debt-to-equity ratio of 6 to 8 times and as of September 30, 2009, had a ratio of 7.8 times. The counterparty with the highest percentage of repurchase agreement balance had 33%. The repurchase obligations mature and reinvest every thirty days. See Contractual Commitments below. Additionally, as of September 30, 2009, we secured borrowings of \$64.8 million under the TALF at a weighted average rate of 3.87%. We generally seek to borrow (on a non-recourse basis) between 3 and 5 times the amount of our shareholder's equity, which is consistent with funding limits under the TALF. The TALF loans are non-recourse and mature in July and August 2014.

As of September 30, 2009, the weighted average margin requirement, or the percentage amount by which the collateral value must exceed the loan amount, which we also refer to as the haircut, under all of our repurchase agreements was approximately 5.5% (weighted by borrowing amount). Across all of our repurchase facilities, the haircuts range from a low of 5% to a high of 7%. Declines in the value of our securities portfolio can trigger margin calls by our lenders under our repurchase agreements. An event of default or termination event would give some of our counterparties the option to terminate all repurchase transactions existing with us and require any amount due by us to the counterparties to be payable immediately.

As discussed above under Market Conditions, the residential mortgage market in the United States has experienced difficult economic conditions including:

increased volatility of many financial assets, including agency securities and other high-quality RMBS assets, due to potential security liquidations;

increased volatility and deterioration in the broader residential mortgage and RMBS markets; and

significant disruption in financing of RMBS.

Table of Contents

If these conditions persist, then our lenders may be forced to exit the repurchase market, become insolvent or further tighten lending standards or increase the amount of required equity capital or haircut, any of which could make it more difficult or costly for us to obtain financing.

Effects of Margin Requirements, Leverage and Credit Spreads

Our securities have values that fluctuate according to market conditions and, as discussed above, the market value of our securities will decrease as prevailing interest rates or credit spreads increase. When the value of the securities pledged to secure a repurchase loan decreases to the point where the positive difference between the collateral value and the loan amount is less than the haircut, our lenders may issue a margin call, which means that the lender will require us to pay the margin call in cash or pledge additional collateral to meet that margin call. Under our repurchase facilities, our lenders have full discretion to determine the value of the securities we pledge to them. Most of our lenders will value securities based on recent trades in the market. Lenders also issue margin calls as the published current principal balance factors change on the pool of mortgages underlying the securities pledged as collateral when scheduled and unscheduled paydowns are announced monthly.

We experience margin calls in the ordinary course of our business. In seeking to manage effectively the margin requirements established by our lenders, we maintain a position of cash and unpledged securities. We refer to this position as our liquidity. The level of liquidity we have available to meet margin calls is directly affected by our leverage levels, our haircuts and the price changes on our securities. If interest rates increase as a result of a yield curve shift or for another reason or if credit spreads widen, then the prices of our collateral (and our unpledged assets that constitute our liquidity) will decline, we will experience margin calls, and we will use our liquidity to meet the margin calls. There can be no assurance that we will maintain sufficient levels of liquidity to meet any margin calls. If our haircuts increase, our liquidity will proportionately decrease. In addition, if we increase our borrowings, our liquidity will decrease by the amount of additional haircut on the increased level of indebtedness.

We intend to maintain a level of liquidity in relation to our assets that enables us to meet reasonably anticipated margin calls but that also allows us to be substantially invested in securities. We may misjudge the appropriate amount of our liquidity by maintaining excessive liquidity, which would lower our investment returns, or by maintaining insufficient liquidity, which would force us to liquidate assets into unfavorable market conditions and harm our results of operations and financial condition.

Forward-Looking Statements Regarding Liquidity

Based upon our current portfolio, leverage rate and available borrowing arrangements, we believe that the net proceeds of our common equity offerings, combined with cash flow from operations and available borrowing capacity, are sufficient to enable us to meet anticipated short-term (one year or less) liquidity requirements to fund our investment activities, pay fees under our management agreement, fund our distributions to shareholders and for other general corporate expenses.

Our ability to meet our long-term (greater than one year) liquidity and capital resource requirements will be subject to obtaining additional debt financing and equity capital. We may increase our capital resources by obtaining long-term credit facilities or making additional public or private offerings of equity or debt securities, possibly including classes of preferred stock, common stock, and senior or subordinated notes. Such financing will depend on market conditions for capital raises and for the investment of any proceeds. If we are unable to renew, replace or expand our sources of financing on substantially similar terms, it may have an adverse effect on our business and results of operations.

Contractual Obligations

On July 1, 2009, we entered into an agreement with our Manager pursuant to which our Manager is entitled to receive a management fee and the reimbursement of certain expenses. The management fee will be calculated and payable quarterly in arrears in an amount equal to 1.50% of our shareholders' equity, per annum, calculated and payable quarterly in arrears. Our Manager will use the proceeds from its management

Table of Contents

fee in part to pay compensation to its officers and personnel who, notwithstanding that certain of those individuals are also our officers, will receive no cash compensation directly from us. We are required to reimburse our Manager for operating expenses incurred by our Manager, including certain salary expenses and other expenses relating to legal, accounting, due diligence and other services. Expense reimbursements to our Manager are made in cash on a monthly basis following the end of each month. Our reimbursement obligation is not subject to any dollar limitation.

On September 30, 2009, we committed to contribute up to \$25.0 million to the Invesco PPIP Fund, which, in turn, invests in our target assets, and may seek additional investments in this or a similar PPIP managed by our Manager. As of September 30, 2009, we have not funded any of the commitment. We intend to finance investments in certain non-Agency RMBS, CMBS and residential and commercial mortgage loans by investing in the Invesco PPIP Fund. Pursuant to the terms of the management agreement, we pay our Manager a management fee. As a result, we do not pay any management or investment fees with respect to our investment in the Invesco PPIP Fund managed by our Manager. Our Manager waives all such fees.

Contractual Commitments

As of September 30, 2009, we had the following contractual commitments and commercial obligations:

\$ in thousands	Total	Payments Due by Period			
		Less Than 1 Year	1-3 Years	3-5 Years	After 5 Years
Repurchase agreements	614,962	614,962			
TALF financing	64,807			64,807	
Total contractual obligations	679,769	614,962		64,807	

Off-Balance Sheet Arrangements

We committed to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets, and may seek additional investments in this or a similar PPIP managed by our Manager. As of September 30, 2009, we had not funded any of the commitment.

Shareholders Equity

On July 1, 2009, we successfully completed our IPO, pursuant to which we sold 8,500,000 shares of our common stock to the public at a price of \$20.00 per share for net proceeds of \$165.0 million. Concurrent with our IPO, we completed a private placement in which we sold 75,000 shares of our common stock to our Manager at a price of \$20.00 per share and our operating partnership sold 1,425,000 units of limited partnership interests in our operating partnership to Invesco Investments (Bermuda) Ltd., a wholly-owned subsidiary of Invesco, at a price of \$20.00 per unit. The net proceeds to us from this private offering was \$30.0 million. We did not pay any underwriting discounts or commissions in connection with the private placement.

On July 27, 2009, the underwriters of our IPO exercised their over-allotment option to purchase an additional 311,200 shares of our common stock at a price of \$20.00 per share for net proceeds of \$6.1 million. Collectively, we received net proceeds from our IPO and the concurrent private offerings of approximately \$201.1 million.

Unrealized Gains and Losses

Unrealized fluctuations in market values of assets do not impact our GAAP income but rather are reflected on our balance sheet by changing the carrying value of the asset and shareholders' equity under Accumulated Other Comprehensive Income (Loss). We account for our investment securities as available-for-sale. In addition, unrealized fluctuations in market values of our cash flow hedges that qualify for hedge accounting, are also reflected in Accumulated Other Comprehensive Income (Loss).

Table of Contents

As a result of this mark-to-market accounting treatment, our book value and book value per share are likely to fluctuate far more than if we used historical amortized cost accounting. As a result, comparisons with companies that use historical cost accounting for some or all of their balance sheet may not be meaningful.

Dividends

We intend to continue to make regular quarterly distributions to holders of our common stock. U.S. federal income tax law generally requires that a REIT distribute annually at least 90% of its REIT taxable income, without regard to the deduction for dividends paid and excluding net capital gains, and that it pay tax at regular corporate rates to the extent that it annually distributes less than 100% of its taxable income. We intend to continue to pay regular quarterly dividends to our shareholders in an amount equal at least 90% of our taxable income. Before we pay any dividend, whether for U.S. federal income tax purposes or otherwise, we must first meet both our operating requirements and debt service on our repurchase agreements and other debt payable. If our cash available for distribution is less than our taxable income, we could be required to sell assets or borrow funds to make cash distributions, or we may make a portion of the required distribution in the form of a taxable stock distribution or distribution of debt securities.

On October 13, 2009, we declared a dividend of \$0.61 per share of common stock. The dividend was paid on November 12, 2009 to shareholders of record as of the close of business on October 23, 2009. On December 17, 2009, we declared a dividend of \$1.05 per share of common stock to shareholders of record as of December 31, 2009 and will pay such dividend on January 27, 2010. The December 17, 2009 dividend represents our estimate of undistributed taxable earnings for 2009 and includes approximately \$0.19 per share of estimated gains on the sale of mortgage-backed securities during the fourth quarter.

Inflation

Virtually all of our assets and liabilities are interest rate sensitive in nature. As a result, interest rates and other factors influence our performance far more than inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates.

Other Matters

We believe that at least 75% of our assets were qualified REIT assets, as defined in the Internal Revenue Code of 1986, as amended, or the Code, for the quarter ended September 30, 2009. We also believe that our revenue qualifies for the 75% source of income test and for the 95% source of income test rules for the quarter ended September 30, 2009. Consequently, we met the REIT income and asset test. We also met all REIT requirements regarding the ownership of our common stock. Therefore, as of September 30, 2009, we believe that we were in a position to qualify as a REIT under the Code.

Quantitative and Qualitative Disclosures about Market Risk

The primary components of our market risk are related to interest rate, prepayment and market value. While we do not seek to avoid risk completely, we believe the risk can be quantified from historical experience and seek to actively manage that risk, to earn sufficient compensation to justify taking those risks and to maintain capital levels consistent with the risks we undertake.

Interest Rate Risk

Interest rate risk is highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations, and other factors beyond our control. We are subject to interest

rate risk in connection with our investments and our repurchase agreements. Our repurchase agreements are typically of limited duration and will be periodically refinanced at current market rates. We mitigate this risk through utilization of derivative contracts, primarily interest rate swap agreements, interest rate caps and interest rate floors.

Table of Contents

Interest Rate Effect on Net Interest Income

Our operating results depend in large part upon differences between the yields earned on our investments and our costs of borrowing and interest rate hedging activities. Most of our repurchase agreements provide financing based on a floating rate of interest calculated on a fixed spread over LIBOR. The fixed spread will vary depending on the type of underlying asset which collateralizes the financing. Accordingly, the portion of our portfolio which consists of floating interest rate assets are match-funded utilizing our expected sources of short-term financing, while our fixed interest rate assets are not match-funded. During periods of rising interest rates, the borrowing costs associated with our investments tend to increase while the income earned on our fixed interest rate investments may remain substantially unchanged. This increase in borrowing costs results in the narrowing of the net interest spread between the related assets and borrowings and may result in losses. Further, during this portion of the interest rate and credit cycles, defaults could increase and result in credit losses to us, which could adversely affect our liquidity and operating results. Such delinquencies or defaults could also have an adverse effect on the spread between interest-earning assets and interest-bearing liabilities.

Hedging techniques are partly based on assumed levels of prepayments of our RMBS. If prepayments are slower or faster than assumed, the life of the RMBS will be longer or shorter, which would reduce the effectiveness of any hedging strategies we may use and may cause losses on such transactions. Hedging strategies involving the use of derivative securities are highly complex and may produce volatile returns.

Interest Rate Effects on Fair Value

Another component of interest rate risk is the effect that changes in interest rates will have on the market value of the assets that we acquire. We face the risk that the market value of our assets will increase or decrease at different rates than those of our liabilities, including our hedging instruments.

We primarily assess our interest rate risk by estimating the duration of our assets and the duration of our liabilities. Duration measures the market price volatility of financial instruments as interest rates change. We generally calculate duration using various financial models and empirical data. Different models and methodologies can produce different duration numbers for the same securities.

It is important to note that the impact of changing interest rates on fair value can be significant when interest rates change materially. Therefore, the volatility in the fair value of our assets could increase significantly when interest rates change materially. In addition, other factors impact the fair value of our interest rate-sensitive investments and hedging instruments, such as the shape of the yield curve, market expectations as to future interest rate changes and other market conditions. Accordingly, changes in actual interest rates may have a material adverse effect on us.

Prepayment Risk

As we receive prepayments of principal on our investments, premiums paid on these investments are amortized against interest income. In general, an increase in prepayment rates will accelerate the amortization of purchase premiums, thereby reducing the interest income earned on the investments. Conversely, discounts on such investments are accreted into interest income. In general, an increase in prepayment rates will accelerate the accretion of purchase discounts, thereby increasing the interest income earned on the investments.

Extension Risk

We compute the projected weighted-average life of our investments based upon assumptions regarding the rate at which the borrowers will prepay the underlying mortgages. In general, when a fixed-rate or hybrid adjustable-rate

security is acquired with borrowings, we may, but are not required to, enter into an interest rate swap agreement or other hedging instrument that effectively fixes our borrowing costs for a period close to the anticipated average life of the fixed-rate portion of the related assets. This strategy is designed to protect us from rising interest rates, because the borrowing costs are fixed for the duration of the fixed-rate portion of the related target asset.

Table of Contents

However, if prepayment rates decrease in a rising interest rate environment, then the life of the fixed-rate portion of the related assets could extend beyond the term of the swap agreement or other hedging instrument. This could have a negative impact on our results from operations, as borrowing costs would no longer be fixed after the end of the hedging instrument, while the income earned on the hybrid adjustable-rate assets would remain fixed. This situation could also cause the market value of our hybrid adjustable-rate assets to decline, with little or no offsetting gain from the related hedging transactions. In extreme situations, we could be forced to sell assets to maintain adequate liquidity, which could cause us to incur losses.

Market Risk***Market Value Risk***

Our available-for-sale securities are reflected at their estimated fair value with unrealized gains and losses excluded from earnings and reported in other comprehensive income pursuant to ASC 320. The estimated fair value of these securities fluctuates primarily due to changes in interest rates and other factors. Generally, in a rising interest rate environment, the estimated fair value of these securities would be expected to decrease; conversely, in a decreasing interest rate environment, the estimated fair value of these securities would be expected to increase.

The sensitivity analysis table presented below shows the estimated impact of an instantaneous parallel shift in the yield curve, up and down 50 and 100 basis points, on the market value of our interest rate-sensitive investments and net interest income, at September 30, 2009, assuming a static portfolio. When evaluating the impact of changes in interest rates, prepayment assumptions and principal reinvestment rates are adjusted based on our Manager's expectations. The analysis presented utilized assumptions, models and estimates of our Manager based on our Manager's judgment and experience.

Change in Interest Rates	Percentage Change in Projected Net Interest Income	Percentage Change in Projected Portfolio Value
+1.00%	1.2%	(2.9)%
+0.50%	(0.6)%	(1.3)%
-0.50%	(9.8)%	1.1%
-1.00%	(20.4)%	1.3%

Real Estate Risk

Residential and commercial property values are subject to volatility and may be affected adversely by a number of factors, including, but not limited to: national, regional and local economic conditions (which may be adversely affected by industry slowdowns and other factors); local real estate conditions (such as the housing supply); changes or continued weakness in specific industry segments; construction quality, age and design; demographic factors; and retroactive changes to building or similar codes. In addition, decreases in property values reduce the value of the collateral and the potential proceeds available to a borrower to repay our loans, which could also cause us to suffer losses.

Credit Risk

We believe that our investment strategy will generally keep our credit losses and financing costs low. However, we retain the risk of potential credit losses on all of the residential and commercial mortgage loans, as well as the loans

underlying the non-Agency RMBS and CMBS in our portfolio. We seek to manage this risk through our pre-acquisition due diligence process and through the use of non-recourse financing, which limits our exposure to credit losses to the specific pool of mortgages that are subject to the non-recourse financing. In addition, with respect to any particular asset, our Manager's investment team evaluates, among other things, relative valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates, recovery of various sectors and vintage of collateral.

Table of Contents

Risk Management

To the extent consistent with maintaining our REIT qualification, we seek to manage risk exposure to protect our investment portfolio against the effects of major interest rate changes. We generally seek to manage this risk by:

monitoring and adjusting, if necessary, the reset index and interest rate related to our target assets and our financings;

structuring our financing agreements to have a range of maturity terms, amortizations and interest rate adjustment periods;

using hedging instruments, primarily interest rate swap agreements but also financial futures, options, interest rate cap agreements, floors and forward sales to adjust the interest rate sensitivity of our target assets and our borrowings; and

actively managing, on an aggregate basis, the interest rate indices, interest rate adjustment periods, and gross reset margins of our target assets and the interest rate indices and adjustment periods of our financings.

Table of Contents

BUSINESS

Our Company

We are a Maryland corporation focused on investing in, financing and managing residential and commercial mortgage-backed securities and mortgage loans, which we collectively refer to as our target assets. We invest in residential mortgage-backed securities, or RMBS, for which a U.S. government agency such as the Government National Mortgage Association, or Ginnie Mae, or a federally chartered corporation such as the Federal National Mortgage Association, or Fannie Mae, or the Federal Home Loan Mortgage Corporation, or Freddie Mac, guarantees payments of principal and interest on the securities. We refer to these securities as Agency RMBS. Our Agency RMBS investments include mortgage pass-through securities and may include collateralized mortgage obligations, or CMOs. We also invest in RMBS that are not issued or guaranteed by a U.S. government agency, or non-Agency RMBS, commercial mortgage-backed securities, or CMBS, and residential and commercial mortgage loans.

We generally finance our Agency RMBS investments, and may finance our non-Agency RMBS investments, through traditional repurchase agreement financing. In addition, we finance our investments in CMBS with financings under the Term Asset-Backed Securities Loan Facility, or TALF. We have also financed, and may do so again in the future, our investments in certain non-Agency RMBS, CMBS and residential and commercial mortgage loans by contributing capital to one or more of the legacy securities public-private investment funds, or PPIFs, that receive financing under the U.S. government's Public-Private Investment Program, or PPIP, established and managed by our Manager or one of its affiliates.

We were incorporated in Maryland on June 5, 2008, and commenced operations in July 2009. On July 1, 2009, we successfully completed our initial public offering, or IPO, generating net proceeds of \$165.0 million. Concurrent with our IPO, we completed a private offering of our common stock and a private offering of units of limited partnership interests in our operating partnership. The net proceeds to us from the private placement were \$30.0 million. On July 27, 2009, the underwriters of our IPO exercised their over-allotment option for net proceeds of \$6.1 million. Collectively, we received net proceeds from our IPO and the related private placement of approximately \$201.1 million. We have invested the net proceeds from our IPO and private placement, as well as monies that we borrowed under repurchase agreements and TALF, to purchase a \$881.9 million investment portfolio as of September 30, 2009, which consists of \$670.1 million in Agency RMBS, \$104.4 million in non-Agency RMBS, \$83.4 million in CMBS and \$24.0 million in CMOs.

We are externally managed and advised by Invesco Advisers, Inc. (formerly Invesco Institutional (N.A.), Inc.), or our Manager, an SEC-registered investment adviser and indirect wholly owned subsidiary of Invesco Ltd. (NYSE: IVZ), or Invesco. Invesco is a leading independent global investment management company with \$416.9 billion in assets under management as of September 30, 2009. Our Manager will draw upon the expertise and capabilities of Invesco's Fixed Income investment team, Invesco's real estate team and Invesco's distressed investment subsidiary, WL Ross & Co. LLC, or WL Ross, to provide insight into the mortgage markets.

Our objective is to provide attractive risk-adjusted returns to our investors, primarily through dividends and secondarily through capital appreciation. To achieve this objective, we selectively acquire target assets to construct a diversified investment portfolio designed to produce attractive returns across a variety of market conditions and economic cycles. We finance our Agency RMBS investments primarily through short-term borrowings structured as repurchase agreements. As of September 30, 2009, we had entered into master repurchase agreements with 15 counterparties and have borrowed \$615.0 million under those master repurchase agreements at a weighted average rate of 0.34% to finance our purchases of Agency RMBS. In addition, as of September 30, 2009, we had entered into

interest rate swap agreements for a notional amount of \$375 million, designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements. We have secured borrowings of \$64.8 million under the TALF at a weighted average interest rate of 3.87%. Finally, as of September 30, 2009, we have a commitment to invest up to \$25.0 million in a PPIP fund managed by our Manager, or the Invesco PPIP Fund, which, in turn, invests in our target assets. Our Manager's investment committee makes investment decisions for the Invesco PPIP Fund.

Table of Contents

We intend to elect and qualify to be taxed as a real estate investment trust, or REIT, for U.S. federal income tax purposes, commencing with our current taxable year ending December 31, 2009. Accordingly, we generally will not be subject to U.S. federal income taxes on our taxable income to the extent that we annually distribute all of our net taxable income to our shareholders and maintain our intended qualification as a REIT. We operate our business in a manner that permits us to maintain our exemption from registration under the Investment Company Act of 1940, as amended, or the 1940 Act.

Initial Public Offering and Private Placement

On July 1, 2009, we successfully completed our IPO pursuant to which we sold 8,500,000 shares of our common stock to the public at a price of \$20.00 per share for net proceeds of \$165.0 million. Concurrent with our IPO, we completed a private placement in which we sold 75,000 shares of our common stock to our Manager at a price of \$20.00 per share. In addition, our Operating Partnership sold 1,425,000 units of limited partnership interests in our Operating Partnership to Invesco Investments (Bermuda) Ltd., a wholly-owned subsidiary of Invesco, at a purchase price of \$20.00 per unit. The net proceeds from the private placement totaled \$30.0 million. We did not pay any underwriting discounts or commissions in connection with the private placement. We commenced operations upon the completion of our IPO and the related private placement.

On July 27, 2009, the underwriters of our IPO exercised their over-allotment option to purchase an additional 311,200 shares of our common stock at a price of \$20.00 per share for net proceeds of \$6.1 million. Collectively, we received net proceeds from our IPO and the related private placement of approximately \$201.1 million.

Our Manager

We are externally managed and advised by our Manager. Pursuant to the terms of the management agreement, our Manager provides us with our management team, including our officers, along with appropriate support personnel. Each of our officers is an employee of Invesco. We do not have any employees. With the exception of our Chief Financial Officer, our Manager does not dedicate any of its employees exclusively to us, nor is our Manager or its employees obligated to dedicate any specific portion of its or their time to our business. Our Manager is at all times subject to the supervision and oversight of our board of directors and has only such functions and authority as our board of directors delegates to it.

Our Manager's Invesco Fixed Income investment professionals have extensive experience in performing advisory services for funds, other investment vehicles and other managed and discretionary accounts that focus on investing in Agency and other RMBS as well as CMBS.

Our Competitive Advantages

We believe that our competitive advantages include the following:

Significant Experience of Our Manager

Our Manager's senior management team has a long track record and broad experience in managing residential and commercial mortgage-related assets through a variety of credit and interest rate environments and has demonstrated the ability to generate attractive risk-adjusted returns under different market conditions and cycles. In addition, our Manager benefits from the insight and capabilities of WL Ross and Invesco's real estate team. Through WL Ross and Invesco's real estate team, we have access to broad and deep teams of experienced investment professionals in real estate and distressed investing. Through these teams, we have real time access to research and data on the mortgage and real estate industries. Having in-house access to these resources and expertise provides us with a competitive

advantage over other companies investing in our target assets who have less internal resources and expertise.

Table of Contents

Access to Extensive Repurchase Agreement Financing and Other Strategic Relationships

Our Manager has been active in the repurchase agreement lending market since 1980 and currently has master repurchase agreements in place with a number of counterparties. Our Manager has in place a documented process to mitigate counterparty risk. During these volatile times in which a number of repurchase agreement counterparties have either defaulted or ceased to exist, we feel that it is critical to have controls in place that address current market disruptions. All repurchase agreement counterparty approval requests must be submitted to our Manager and undergo a rigorous review and approval process to determine whether the proposed counterparty meets established criteria. This process involves a credit analysis of each prospective counterparty to ensure that it meets our Manager's internal credit risk requirements, a review of the counterparty's audited financial statements, credit ratings and clearing arrangements, and a regulatory background check. In addition, all approved counterparties are monitored on an ongoing basis by our Manager's credit team and, if they deem a credit situation to be deteriorating, they have the ability to restrict or terminate trading with this counterparty. We do not expect to enter into any hedging transactions to mitigate any risks associated with our repurchase agreement counterparties.

Extensive Strategic Relationships and Experience of our Manager and its Affiliates

Our Manager and its affiliates maintain extensive long-term relationships with other financial intermediaries, including primary dealers, leading investment banks, brokerage firms, leading mortgage originators and commercial banks. We believe these relationships will enhance our ability to source, finance and hedge investment opportunities and, thus, enable us to grow in various credit and interest rate environments.

Disciplined Investment Approach

We seek to maximize our risk-adjusted returns through our Manager's disciplined investment approach, which relies on rigorous quantitative and qualitative analysis. Our Manager monitors our overall portfolio risk and evaluates the characteristics of our investments in our target assets including, but not limited to, loan balance distribution, geographic concentration, property type, occupancy, periodic interest rate caps, which limit the amount an interest rate can increase during any given period, or lifetime interest rate caps, weighted-average loan-to-value and weighted-average credit score. In addition, with respect to any particular target asset, our Manager's investment team evaluates, among other things, relative valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates recovery of various sectors and vintage of collateral. We believe this strategy and our commitment to capital preservation will provide us with a competitive advantage when operating in a variety of market conditions.

Access to Our Manager's Sophisticated Analytical Tools, Infrastructure and Expertise

We utilize our Manager's proprietary and third-party mortgage-related security and portfolio management tools to generate an attractive net interest margin from our portfolio. We focus on in-depth analysis of the numerous factors that influence our target assets, including: (1) fundamental market and sector review; (2) rigorous cash flow analysis; (3) disciplined security selection; (4) controlled risk exposure; and (5) prudent balance sheet management. We utilize these tools to guide the hedging strategies developed by our Manager to the extent consistent with satisfying the requirements for qualification as a REIT. In addition, we use our Manager's proprietary technology management platform called QTechsm to monitor investment risk. QTechsm collects and stores real-time market data, and integrates markets performance with portfolio holdings and proprietary risk models to measure portfolio risk positions. This measurement system portrays overall portfolio risk and its sources. Through the use of these tools, we analyze factors that affect the rate at which mortgage prepayments occur, including changes in the level of interest rates, directional trends in residential and commercial real estate prices, general economic conditions, the locations of the properties securing the mortgage loans and other social and demographic conditions in order to acquire the target assets that we

believe are undervalued. We believe that sophisticated analysis of both macro and micro economic factors will enable us to manage cash flow and distributions while preserving capital.

Table of Contents

Our Manager has created and maintains analytical and portfolio management capabilities to aid in security selection and risk management. We capitalize on the market knowledge and ready access to data across our target markets that our Manager and its affiliates obtain through their established platform. We also benefit from our Manager's comprehensive financial and administrative infrastructure, including its risk management and financial reporting operations, as well as its business development, legal and compliance teams.

Alignment of Invesco and Our Manager's Interests

Invesco, through our Manager, beneficially owns 75,100 shares of our common stock and, through Invesco Investments (Bermuda) Ltd., beneficially owns 1,425,000 units of partnership interests in our operating partnership, which are redeemable for cash or, at our election, shares of our common stock on a one-for-one basis. Assuming redemption of all OP units owned by the Invesco Investments (Bermuda) Ltd. for the equivalent number of shares of our common stock, Invesco would beneficially own (through the holdings of Invesco Investments (Bermuda) Ltd. and our Manager) approximately 9% of our common stock after giving effect to the sale of 7,000,000 shares in this offering. We believe that Invesco's ownership of our common stock and partnership interests in our operating partnership aligns Invesco and our Manager's interests with our interests.

Tax Advantages of REIT Qualification

Assuming that we meet, on a continuing basis, various qualification requirements imposed upon REITs by the Internal Revenue Code, we will generally be entitled to a deduction for dividends that we pay and, therefore, will not be subject to U.S. federal corporate income tax on our taxable income that is distributed currently to our shareholders. This treatment substantially eliminates the double taxation at the corporate and shareholder levels that generally results from investments in a corporation.

Our Strategies

Investments

We invest in a diversified pool of mortgage assets that generate attractive risk adjusted returns. Our target assets include Agency RMBS, non-Agency RMBS, CMBS and residential and commercial mortgage loans. In addition to direct purchases of our target assets, we also invest in the Invesco PPIP Fund, which, in turn, invests in our target assets. Our Manager's investment committee makes investment decisions for the Invesco PPIP Fund.

As of September 30, 2009, 37% of our equity was invested in Agency RMBS, 48% in non-Agency RMBS, 9% in CMBS and 6% in other assets (including cash and restricted cash). As of September 30, 2009, we had not made an initial investment in the Invesco PPIP Fund.

Leverage

We use leverage on our target assets to achieve our return objectives. For our investments in Agency RMBS, we focus on securities we believe provide attractive returns when levered approximately 6 to 8 times. For our investments in non-Agency RMBS, we primarily focus on securities we believe provide attractive unlevered returns, however, in the future we may employ leverage of up to 1 time. We leverage our CMBS 3 to 5 times.

As of September 30, 2009, we had purchased approximately \$237.1 million in 30-year fixed rate securities that offered higher coupons and call protection based on the collateral attributes. We balanced this with approximately \$277.2 million in 15-year fixed rate, approximately \$145.5 million in hybrid ARMs and approximately \$10.3 million in ARMs we believe to have similar durations based on prepayment speeds. As of September 30, 2009, we had

purchased approximately \$104.4 million non-Agency RMBS. For investments in CMBS, our primary focus is on investing in AAA rated securities issued prior to 2008. As of September 30,

Table of Contents

2009, we had purchased approximately \$83.4 million in CMBS and financed the purchases with a \$64.8 million TALF loan.

Financing

We finance our investments in Agency RMBS, and we may in the future finance our investments in non-Agency RMBS, primarily through short-term borrowings structured as repurchase agreements. In addition, we currently finance our investments in CMBS with financing under the TALF and with private financing sources. We also finance our investments in certain non-Agency RMBS, CMBS and residential and commercial mortgage loans by investing in the Invesco PPIP Fund, which, in turn, receives financing from the U.S. Treasury and from the FDIC.

As of September 30, 2009, we had entered into master repurchase agreements with 15 counterparties and have borrowed \$615.0 million under those master repurchase agreements to finance our purchases of Agency RMBS. In addition, as of September 30, 2009, we had entered into 3 interest rate swap agreements, for a notional amount of \$375 million, designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements. At September 30, 2009, we have secured borrowings of \$64.8 million under the TALF. Finally, as of September 30, 2009, we have a commitment to invest up to \$25.0 million in the Invesco PPIP Fund, which in turn, invests in our target assets.

Repurchase Agreements

Repurchase agreements are financings pursuant to which we sell our target assets to the repurchase agreement counterparty, the buyer, for an agreed upon price with the obligation to repurchase these assets from the buyer at a future date and at a price higher than the original purchase price. The amount of financing we receive under a repurchase agreement is limited to a specified percentage of the estimated market value of the assets we sell to the buyer. The difference between the sale price and repurchase price is the cost, or interest expense, of financing under a repurchase agreement. Under repurchase agreement financing arrangements, certain buyers, or lenders, require us to provide additional cash collateral, or a margin call, to re-establish the ratio of value of the collateral to the amount of borrowing.

The Term Asset-Backed Securities Loan Facility

On November 25, 2008, the U.S. Treasury and the Federal Reserve announced the creation of the TALF. The TALF is intended to make credit available to consumers and businesses on more favorable terms by facilitating the issuance of asset-backed securities and improving the market conditions for asset-backed securities generally.

The FRBNY will make up to \$200 billion of loans under the TALF. The TALF loans will have a term of three years or, in certain cases, five years, will be non-recourse to the borrower, and will be fully secured by eligible asset-backed securities. Eligible collateral will include asset-backed securities that are issued on or after January 1, 2009 except for SBA Pool Certificates or Development Company Participation Certificates, which must have been issued before January 1, 2009, or legacy CMBS. Any asset-backed securities that are not legacy CMBS are considered newly issued asset-backed securities.

The FRBNY will perform a risk assessment of any asset-backed securities proposed as collateral for a TALF loan and will retain the right to reject any asset-backed securities, including CMBS, as TALF loan collateral based on this risk assessment. The facility will cease making TALF loans collateralized by newly issued CMBS on June 30, 2010, and TALF loans collateralized by other TALF-eligible newly issued and legacy asset-backed securities on March 31, 2010, unless the Federal Reserve Board of Governors extends the facility.

On October 5, 2009, the Federal Reserve announced that beginning with November subscriptions, the FRBNY will conduct a formal risk assessment of all pledged asset-backed securities collateral, not just newly issued and legacy CMBS. On December 4, 2009, the Federal Reserve adopted changes in rating agency criteria for ABS pledged to TALF. The new criteria extends the pool of TALF-eligible nationally recognized

Table of Contents

statistical rating organizations, or NRSRO, but requires the FRBNY to accept only a credit rating issued by an agency registered with the SEC as a NRSRO for issuers of ABS. The FRBNY also indicated in its announcement on December 4 that it may limit the volume of TALF loans secured by legacy CMBS.

The Public-Private Investment Program

On March 23, 2009, the U.S. Treasury, in conjunction with the Federal Deposit Insurance Corporation, or the FDIC, and the Federal Reserve, announced the creation of the PPIP. The PPIP is designed to encourage the transfer of certain illiquid legacy real estate-related assets off of the balance sheets of financial institutions, restarting the market for these assets and supporting the flow of credit and other capital into the broader economy. PPIP funds under the legacy loan program will be established to purchase troubled loans from insured depository institutions and PPIP funds under the legacy securities program will be established to purchase from financial institutions legacy non-Agency RMBS and newly issued and legacy CMBS that were originally AAA rated. PPIFs will have access to equity capital from the U.S. Treasury as well as debt financing provided or guaranteed by the U.S. government.

Risk Management Strategy

Interest Rate Hedging

Subject to maintaining our qualification as a REIT, we may engage in a variety of interest rate management techniques that seek on one hand to mitigate the influence of interest rate changes on the costs of liabilities and on the other hand help us achieve our risk management objective. We utilize derivative financial instruments, including, among others, puts and calls on securities or indices of securities, interest rate swaps, interest rate caps, interest rate swaptions, exchange-traded derivatives, U.S. Treasury securities and options on U.S. Treasury securities and interest rate floors to hedge all or a portion of the interest rate risk associated with the financing of our investment portfolio. Specifically, we seek to hedge our exposure to potential interest rate mismatches between the interest we earn on our investments and our borrowing costs caused by fluctuations in short-term interest rates. In utilizing leverage and interest rate hedges, we seek to improve risk-adjusted returns and, where possible, to lock in, on a long-term basis, a favorable spread between the yield on our assets and the cost of our financing. We rely on our Manager's expertise to manage these risks on our behalf. We may implement part of our hedging strategy through a domestic taxable REIT subsidiary, or TRS, which will be subject to U.S. federal, state and, if applicable, local income tax.

Market Risk Management

Risk management is an integral component of our strategy to deliver returns to our shareholders. Because we invest in MBS, investment losses from prepayment, interest rate volatility or other risks can meaningfully reduce or eliminate our distributions to shareholders. In addition, because we employ financial leverage in funding our investment portfolio, mismatches in the maturities of our assets and liabilities can create the need to continually renew or otherwise refinance our liabilities. Our net interest margins are dependent upon a positive spread between the returns on our asset portfolio and our overall cost of funding. To minimize the risks to our portfolio, we actively employ portfolio-wide and security-specific risk measurement and management processes in our daily operations. Our Manager's risk management tools include software and services licensed or purchased from third parties, in addition to proprietary software and analytical methods developed by Invesco. There can be no guarantee that these tools will protect us from market risks.

Credit Risk

We believe our investment strategy generally keeps our credit losses and financing costs low. However, we retain the risk of potential credit losses on all of the residential and commercial mortgage loans, as well as the loans underlying

the non-Agency RMBS and CMBS we hold. We seek to manage this risk through our pre-acquisition due diligence process and through use of non-recourse financing, which limits our exposure to credit losses to the specific pool of mortgages that are subject to the non-recourse financing. In addition, with respect to any particular target asset, our Manager's investment team evaluates, among other things, relative

Table of Contents

valuation, supply and demand trends, shape of yield curves, prepayment rates, delinquency and default rates, recovery of various sectors and vintage of collateral.

Our Investments

We invest in the following assets:

Agency RMBS

Agency RMBS are residential mortgage-backed securities for which a U.S. government agency such as Ginnie Mae, or a federally chartered corporation such as Fannie Mae or Freddie Mac guarantees payments of principal and interest on the securities. Payments of principal and interest on Agency RMBS, not the market value of the securities themselves, are guaranteed. See Freddie Mac Gold Certificates, Fannie Mae Certificates and Ginnie Mae Certificates below.

Agency RMBS differ from other forms of traditional debt securities, which normally provide for periodic payments of interest in fixed amounts with principal payments at maturity or on specified call dates. Instead, Agency RMBS provide for monthly payments, which consist of both principal and interest. In effect, these payments are a pass-through of scheduled and prepaid principal payments and the monthly interest payments made by the individual borrowers on the mortgage loans, net of any fees paid to the issuers, servicers or guarantors of the securities.

The principal may be prepaid at any time due to prepayments on the underlying mortgage loans or other assets. These differences can result in significantly greater price and yield volatility than is the case with traditional fixed-income securities.

Various factors affect the rate at which mortgage prepayments occur, including changes in the level and directional trends in housing prices, interest rates, general economic conditions, the age of the mortgage loan, the location of the property and other social and demographic conditions. Generally, prepayments on Agency RMBS increase during periods of falling mortgage interest rates and decrease during periods of rising mortgage interest rates. However, this may not always be the case. We may reinvest principal repayments at a yield that is higher or lower than the yield on the repaid investment, thus affecting our net interest income by altering the average yield on our assets.

However, when interest rates are declining, the value of Agency RMBS with prepayment options may not increase as much as other fixed income securities. The rate of prepayments on underlying mortgages will affect the price and volatility of Agency RMBS and may have the effect of shortening or extending the duration of the security beyond what was anticipated at the time of purchase. When interest rates rise, our holdings of Agency RMBS may experience reduced returns if the owners of the underlying mortgages pay off their mortgages slower than anticipated. This is generally referred to as extension risk.

The types of Agency RMBS described below are collateralized by either FRMs, ARMs, or hybrid ARMs. FRMs have an interest rate that is fixed for the term of the loan and do not adjust. The interest rates on ARMs generally adjust annually (although some may adjust more frequently) to an increment over a specified interest rate index. Hybrid ARMs have interest rates that are fixed for a specified period of time (typically three, five, seven or ten years) and, thereafter, adjust to an increment over a specified interest rate index. ARMs and hybrid ARMs generally have periodic and lifetime constraints on how much the loan interest rate can change on any predetermined interest rate reset date. Our allocation of our Agency RMBS collateralized by FRMs, ARMs or hybrid ARMs will depend on various factors including, but not limited to, relative value, expected future prepayment trends, supply and demand, costs of hedging, costs of financing, expected future interest rate volatility and the overall shape of the U.S. Treasury and interest rate swap yield curves. We intend to take these factors into account when we make investments.

In the future, our residential portfolio may extend to debentures that are issued and guaranteed by Freddie Mac or Fannie Mae or mortgage-backed securities the collateral of which is guaranteed by Ginnie Mae, Freddie Mac, Fannie Mae or another federally chartered corporation.

Table of Contents

In our Agency RMBS portfolio, the types of mortgage pass-through certificates in which we invest or which comprise CMOs in which we intend to invest, are described below.

Mortgage Pass-Through Certificates

Single-family residential mortgage pass-through certificates are securities representing interests in pools of mortgage loans secured by residential real property where payments of both interest and principal, plus pre-paid principal, on the securities are made monthly to holders of the securities, in effect passing through monthly payments made by the individual borrowers on the mortgage loans that underlie the securities, net of fees paid to the issuer/guarantor and servicers of the securities.

CMOs

CMOs are securities which are structured from U.S. government agency or federally chartered corporation-backed mortgage pass-through certificates. CMOs receive monthly payments of principal and interest. CMOs divide the cash flows which come from the underlying mortgage pass-through certificates into different classes of securities. CMOs can have different maturities and different weighted average lives than the underlying mortgage pass-through certificates. CMOs can re-distribute the risk characteristics of mortgage pass-through certificates to better satisfy the demands of various investor types. These risk characteristics include average life variability, prepayments, volatility, floating versus fixed interest rate and payment and interest rate risk.

Freddie Mac Gold Certificates

Freddie Mac is a shareholder-owned, federally chartered corporation created pursuant to an act of Congress on July 24, 1970. The principal activity of Freddie Mac currently consists of the purchase of mortgage loans or participation interests in mortgage loans and the resale of the loans and participations in the form of guaranteed mortgage-backed securities. Freddie Mac guarantees to each holder of Freddie Mac gold certificates the timely payment of interest at the applicable pass-through rate and principal on the holder's pro rata share of the unpaid principal balance of the related mortgage loans. The obligations of Freddie Mac under its guarantees are solely those of Freddie Mac and are not backed by the full faith and credit of the United States. If Freddie Mac were unable to satisfy these obligations, distributions to holders of Freddie Mac certificates would consist solely of payments and other recoveries on the underlying mortgage loans and, accordingly, defaults and delinquencies on the underlying mortgage loans would adversely affect monthly distributions to holders of Freddie Mac certificates.

Freddie Mac gold certificates are backed by pools of single-family mortgage loans or multi-family mortgage loans. These underlying mortgage loans may have original terms to maturity of up to 40 years. Freddie Mac certificates may be issued under cash programs (composed of mortgage loans purchased from a number of sellers) or guarantor programs (composed of mortgage loans acquired from one seller in exchange for certificates representing interests in the mortgage loans purchased).

Fannie Mae Certificates

Fannie Mae is a shareholder-owned, federally chartered corporation organized and existing under the Federal National Mortgage Association Charter Act, created in 1938 and rechartered in 1968 by Congress as a shareholder-owned company. Fannie Mae provides funds to the mortgage market primarily by purchasing home mortgage loans from local lenders, thereby replenishing their funds for additional lending. Fannie Mae guarantees to the registered holder of a certificate that it will distribute amounts representing scheduled principal and interest on the mortgage loans in the pool underlying the Fannie Mae certificate, whether or not received, and the full principal amount of any such mortgage loan foreclosed or otherwise finally liquidated, whether or not the principal amount is actually received. The

obligations of Fannie Mae under its guarantees are solely those of Fannie Mae and are not backed by the full faith and credit of the United States. If Fannie Mae were unable to satisfy its obligations, distributions to holders of Fannie Mae certificates would consist solely of payments and other recoveries on the underlying mortgage loans and, accordingly, defaults and

Table of Contents

delinquencies on the underlying mortgage loans would adversely affect monthly distributions to holders of Fannie Mae.

Fannie Mae certificates may be backed by pools of single-family or multi-family mortgage loans. The original term to maturity of any such mortgage loan generally does not exceed 40 years. Fannie Mae certificates may pay interest at a fixed rate or an adjustable rate. Each series of Fannie Mae ARM certificates bears an initial interest rate and margin tied to an index based on all loans in the related pool, less a fixed percentage representing servicing compensation and Fannie Mae's guarantee fee. The specified index used in different series has included the U.S. Treasury Index, the 11th District Cost of Funds Index published by the Federal Home Loan Bank of San Francisco, LIBOR and other indices. Interest rates paid on fully-indexed Fannie Mae ARM certificates equal the applicable index rate plus a specified number of percentage points. The majority of series of Fannie Mae ARM certificates issued to date have evidenced pools of mortgage loans with monthly, semi-annual or annual interest rate adjustments. Adjustments in the interest rates paid are generally limited to an annual increase or decrease of either 1.00% or 2.00% and to a lifetime cap of 5.00% or 6.00% over the initial interest rate.

Ginnie Mae Certificates

Ginnie Mae is a wholly owned corporate instrumentality of the United States within HUD. The National Housing Act of 1934 authorizes Ginnie Mae to guarantee the timely payment of the principal of and interest on certificates which represent an interest in a pool of mortgages insured by the FHA or partially guaranteed by the Department of Veterans Affairs and other loans eligible for inclusion in mortgage pools underlying Ginnie Mae certificates. Section 306(g) of the Housing Act provides that the full faith and credit of the United States is pledged to the payment of all amounts which may be required to be paid under any guarantee by Ginnie Mae.

At present, most Ginnie Mae certificates are backed by single-family mortgage loans. The interest rate paid on Ginnie Mae certificates may be a fixed rate or an adjustable rate. The interest rate on Ginnie Mae certificates issued under Ginnie Mae's standard ARM program adjusts annually in relation to the U.S. Treasury index. Adjustments in the interest rate are generally limited to an annual increase or decrease of 1.00% and to a lifetime cap of 5.00% over the initial coupon rate.

We may, in the future, utilize to-be-announced forward contracts, or TBAs, in order to invest in Agency RMBS. Pursuant to these TBAs, we would agree to purchase, for future delivery, Agency RMBS with certain principal and interest terms and certain types of underlying collateral, but the particular Agency RMBS to be delivered would not be identified until shortly before the TBA settlement date. Our ability to purchase Agency RMBS through TBAs may be limited by the 75% asset test applicable to REITs. See U.S. Federal Income Tax Considerations Asset Tests and U.S. Federal Income Tax Considerations Gross Income Tests.

Non-Agency RMBS

Non-Agency RMBS are residential mortgage-backed securities that are not issued or guaranteed by a U.S. government agency. Like Agency RMBS, non-Agency RMBS represent interests in pools of mortgage loans secured by residential real property. We finance our non-Agency RMBS portfolio with financings under the TALF or with private financing sources. We have also financed and may continue to finance certain non-Agency RMBS by contributing capital to one or more of the legacy securities PPIFs that receive financing under PPIP.

Non-Agency RMBS may be AAA rated through unrated. The rating, as determined by one or more of the nationally recognized statistical rating organizations, including Fitch, Inc. Moody's Investors Service, Inc. and Standard & Poor's Corporation, indicates the organization's view of the creditworthiness of the investment. The mortgage loan collateral for non-Agency RMBS generally consists of residential mortgage loans that do not generally conform to the

U.S. government agency underwriting guidelines due to certain factors including mortgage balance in excess of such guidelines, borrower characteristics, loan characteristics and level of documentation.

Table of Contents

CMBS

CMBS are securities backed by obligations (including certificates of participation in obligations) that are principally secured by commercial mortgages on real property or interests therein having a multifamily or commercial use, such as regional malls, other retail space, office buildings, industrial or warehouse properties, hotels, apartments, nursing homes and senior living facilities. We finance certain of our CMBS portfolio with financings under the TALF and PPIF. See Financing Strategy below.

CMBS are typically issued in multiple tranches whereby the more senior classes are entitled to priority distributions from the trust's income to make specified interest and principal payments on such tranches. Losses and other shortfalls from expected amounts to be received on the mortgage pool are borne by the most subordinate classes, which receive payments only after the more senior classes have received all principal and/or interest to which they are entitled. The credit quality of CMBS depends on the credit quality of the underlying mortgage loans, which is a function of factors such as the following: the principal amount of loans relative to the value of the related properties; the mortgage loan terms, such as amortization; market assessment and geographic location; construction quality of the property; and the creditworthiness of the borrowers.

Residential Mortgage Loans

Residential mortgage loans are loans secured by residential real properties. We generally focus our residential mortgage loan acquisitions on the purchase of loan portfolios made available to us under the legacy loan program. See Financing Strategy above. We expect that the residential mortgage loans we acquire will be first lien, single-family FRMs, ARMs and Hybrid ARMs with original terms to maturity of not more than 40 years and that are either fully amortizing or are interest-only for up to ten years, and fully amortizing thereafter.

Prime and Jumbo Mortgage Loans

Prime mortgage loans are mortgage loans that generally conform to U.S. government agency underwriting guidelines. Jumbo prime mortgage loans are mortgage loans that generally conform to U.S. government agency underwriting guidelines except that the mortgage balance exceeds the maximum amount permitted by U.S. government agency underwriting guidelines.

Alt-A Mortgage Loans

Alt-A mortgage loans are mortgage loans made to borrowers whose qualifying mortgage characteristics do not conform to U.S. government agency underwriting guidelines, but whose borrower characteristics may. Generally, Alt-A mortgage loans allow homeowners to qualify for a mortgage loan with reduced or alternative forms of documentation. The credit quality of Alt-A borrowers generally exceeds the credit quality of subprime borrowers.

Subprime Mortgage Loans

Subprime mortgage loans are loans that do not conform to U.S. government agency underwriting guidelines.

Commercial Mortgage Loans

We have generally focused our commercial mortgage loan acquisitions on the purchase of loan portfolios made available to us under PPIF. See Financing Strategy above.

First and Second Lien Loans

Commercial mortgage loans are mortgage loans secured by first or second liens on commercial properties such as regional malls, other retail space, office buildings, industrial or warehouse properties, hotels, apartments, nursing homes and senior living facilities. These loans, which tend to range in term from five to

Table of Contents

15 years, can carry either fixed or floating interest rates. They generally permit pre-payments before final maturity but only with the payment to the lender of yield maintenance pre-payment penalties. First lien loans represent the senior lien on a property while second lien loans or second mortgages represent a subordinate or second lien on a property.

B-Notes

A B-Note, unlike a second mortgage loan, is part of a single larger commercial mortgage loan, with the other part evidenced by an A-Note, which are evidenced by a single commercial mortgage. The holder of the A-Note and B-Note enter into an agreement which sets forth the respective rights and obligations of each of the holders. The terms of the agreement provide that the holder of the A-Note has a priority of payment over the holder of the B-Note. A loan evidenced by a note which is secured by a second mortgage is a separate loan and the holder has a direct relationship with the borrower. In addition, unlike the holder of a B-Note, the holder of the loan would also be the holder of the mortgage. The holder of the second mortgage loan typically enters into an intercreditor agreement with the holder of the first mortgage loan which sets forth the respective rights and obligations of each of the holders, similar in substance to the agreement that is entered into between the holder of the A-Note and the holder of the B-Note. B-Note lenders have the same obligations, collateral and borrower as the A-Note lender, but typically are subordinated in recovery upon a default.

Bridge Loans

Bridge loans tend to be floating rate whole loans made to borrowers who are seeking short-term capital (with terms of up to five years) to be used in the acquisition, construction or redevelopment of a property. This type of bridge financing enables the borrower to secure short-term financing while improving the property and avoid burdening it with restrictive long-term debt.

Mezzanine Loans

Mezzanine loans are generally structured to represent senior positions to the borrower's equity in, and subordinate to a first mortgage loan on a property. These loans are generally secured by pledges of ownership interests, in whole or in part, in entities that directly or indirectly own the real property. At times, mezzanine loans may be secured by additional collateral, including letters of credit, personal guarantees, or collateral unrelated to the property. Mezzanine loans may be structured to carry either fixed or floating interest rates as well as carry a right to participate in a percentage of gross revenues and a percentage of the increase in the fair market value of the property securing the loan. Mezzanine loans may also contain prepayment lockouts, penalties, minimum profit hurdles and other mechanisms to protect and enhance returns to the lender. Mezzanine loans usually have maturities that match the maturity of the related mortgage loan but may have shorter or longer terms.

Our Investment Portfolio

We have invested the net proceeds from our IPO and private placement, as well as monies that we borrowed under repurchase agreements and TALF, in accordance with our investment strategy. As of September 30, 2009, our investment portfolio totaled \$881.9 million, which consists of \$670.1 million in Agency RMBS, \$104.4 million in non-Agency RMBS, \$83.4 million in CMBS and \$24.0 million in CMOs.

Our Portfolio Financing

We finance our investments in Agency RMBS, and may finance our investments in non-Agency RBMS, primarily through short-term borrowings structured as repurchase agreements. In addition, we finance our investments in CMBS with financing under the TALF. We also finance investments in certain non-Agency RMBS, CMBS and residential

and commercial mortgage by contributing capital to funds that receive financing under the PPIP.

As of September 30, 2009, we had entered into master repurchase agreements with 15 counterparties and have borrowed \$615.0 million under those master repurchase agreements at a weighted average rate of 0.34%

Table of Contents

to finance our purchases of Agency RMBS. In addition, as of September 30, 2009, we had entered into 3 interest rate swap agreements, for a notional amount of \$375 million, designed to mitigate the effects of increases in interest rates under a portion of our repurchase agreements. Finally, we have secured borrowings of \$64.8 million under the TALF at a weighted average interest rate of 3.87%. Finally, as of September 30, 2009, we had a commitment to invest up to \$25.0 million in the Invesco PPIP Fund, which, in turn, invests in our target assets and obtains financing through government programs.

Investment Sourcing

We expect our Manager to take advantage of the broad network of relationships it and Invesco have established to identify investment opportunities. Our Manager and its affiliates have extensive long-term relationships with financial intermediaries, including primary dealers, leading investment banks, brokerage firms, leading mortgage originators and commercial banks.

Investing in, and sourcing financing for, Agency RMBS, non-Agency RMBS, CMBS and mortgage loans is highly competitive. Although our Manager competes with many other investment managers for profitable investment opportunities in fixed-income asset classes and related investment opportunities and sources of financing, we believe that a combination of our Manager's experience, together with the vast resources and relationships of Invesco, provide us with a significant advantage in identifying and capitalizing on attractive opportunities.

Investment Guidelines

Our board of directors has adopted the following investment guidelines:

no investment shall be made that would cause us to fail to qualify as a REIT for federal income tax purposes;

no investment shall be made that would cause us to be regulated as an investment company under the 1940 Act;

our assets will be invested within our target assets; and

until appropriate investments can be identified, our Manager may pay off short-term debt or invest the proceeds of this and any future offerings in interest-bearing, short-term investments, including funds that are consistent with our intention to qualify as a REIT.

These investment guidelines may be changed from time to time by our board of directors without the approval of our shareholders.

Investment Committee

We have an investment committee comprised of our officers and investment professionals. The investment committee periodically reviews our investment portfolio and its compliance with our investment policies and procedures, including our investment guidelines, and provides our board of directors an investment report at the end of each quarter in conjunction with its review of our quarterly results. In addition, our Manager has a separate investment committee that makes investment decisions for the Invesco PPIP Fund. From time to time, as it deems appropriate or necessary, our board of directors also reviews our investment portfolio and its compliance with our investment policies and procedures, including our investment guidelines. For a description of the members comprising the investment committee, see Our Manager and The Management Agreement Investment Committee and Management.

Investment Process

Our investment process benefits from our Manager's resources and professionals. Moreover, our Manager's investment committee oversees our investment guidelines and meets periodically, at least every quarter, to discuss investment opportunities.

Table of Contents

The investment team has a strong focus on security selection and on the relative value of various sectors within the mortgage market. Our Manager utilizes this expertise to build a diversified portfolio of Agency RMBS, non-Agency RMBS, CMBS and residential and commercial mortgage loans. Our Manager incorporates its views on the economic environment and the outlook for the mortgage market, including relative valuation, supply and demand trends, the level of interest rates, the shape of the yield curve, prepayment rates, financing and liquidity, housing prices, delinquencies, default rates, recovery of various sectors and vintage of collateral.

Our investment process includes sourcing and screening investment opportunities, assessing investment suitability, conducting interest rate and prepayment analysis, evaluating cash flow and collateral performance, reviewing legal structure and servicer and originator information and investment structuring, as appropriate, to ensure an attractive return commensurate with the risk we are bearing. Upon identification of an investment opportunity, the investment will be screened and monitored by our Manager to determine its impact on maintaining our REIT qualification and our exemption from registration under the 1940 Act. We make investments in sectors where our Manager has strong core competencies and where we believe market risk and expected performance can be reasonably quantified.

Our Manager evaluates each of our investment opportunities based on its expected risk-adjusted return relative to the returns available from other, comparable investments. In addition, we evaluate new opportunities based on their relative expected returns compared to our comparable securities held in our portfolio. The terms of any leverage available to us for use in funding an investment purchase are also taken into consideration, as are any risks posed by illiquidity or correlations with other securities in the portfolio. Our Manager also develops a macro outlook with respect to each target asset class by examining factors in the broader economy such as GDP, interest rates, unemployment rates and availability of credit, among other factors. Our Manager also analyzes fundamental trends in the relevant target asset class sector to adjust/maintain its outlook for that particular target asset class. Views on a particular target asset class are recorded in our Manager's QTechSM system. These macro decisions guide our Manager's assumptions regarding model inputs and portfolio allocations among target assets. Additionally, our Manager conducts extensive diligence with respect to each target asset class by, among other things, examining and monitoring the capabilities and financial wherewithal of the parties responsible for the origination, administration and servicing of relevant target assets.

Additionally, through Invesco's distressed investment subsidiary, WL Ross, and Invesco's in-house real estate team, we have access to broad and deep teams of experienced investment professionals in real estate and distressed investing. Through these teams, we have real-time access to research and data on the mortgage and real estate industries. In-house access to these resources and expertise provides us with a competitive advantage over other companies investing in our target assets who have less internal resources and expertise.

Operating and Regulatory Structure

REIT Qualification

We intend to elect to qualify as a REIT under Sections 856 through 859 of the Internal Revenue Code commencing with our taxable year ending on December 31, 2009. Our qualification as a REIT depends upon our ability to meet on a continuing basis, through actual investment and operating results, various complex requirements under the Internal Revenue Code relating to, among other things, the sources of our gross income, the composition and values of our assets, our distribution levels and the diversity of ownership of our shares. We believe that we have been organized in conformity with the requirements for qualification and taxation as a REIT under the Internal Revenue Code and that our intended manner of operation will enable us to meet the requirements for qualification and taxation as a REIT.

So long as we qualify as a REIT, we generally will not be subject to U.S. federal income tax on our REIT taxable income we distribute currently to our shareholders. If we fail to qualify as a REIT in any taxable year and do not

qualify for certain statutory relief provisions, we will be subject to U.S. federal income tax at regular corporate rates and may be precluded from qualifying as a REIT for the subsequent four taxable years following the year during which we lost our REIT qualification. Even if we qualify for taxation as a REIT, we may be subject to certain U.S. federal, state and local taxes on our income or property.

Table of Contents***1940 Act Exemption***

We conduct our operations so as not to become regulated as an investment company under the 1940 Act. Because we are a holding company that conducts our business through the operating partnership and the wholly-owned subsidiaries of the operating partnership, the securities issued by these subsidiaries that are excepted from the definition of investment company under Section 3(c)(1) or Section 3(c)(7) of the 1940 Act, together with any other investment securities the operating partnership may own, may not have a combined value in excess of 40% of the value of the operating partnership's total assets on an unconsolidated basis, which we refer to as the 40% test. This requirement limits the types of businesses in which we may engage through our subsidiaries. In addition, we believe neither the company nor the operating partnership are considered an investment company under Section 3(a)(1)(A) of the 1940 Act because they do not engage primarily or hold themselves out as being engaged primarily in the business of investing, reinvesting or trading in securities. Rather, through the operating partnership's wholly owned or majority-owned subsidiaries, the company and the operating partnership are primarily engaged in the non-investment company businesses of these subsidiaries. IAS Asset I LLC and certain of the operating partnership's other subsidiaries that we may form in the future intend to rely upon the exemption from registration as an investment company under the 1940 Act pursuant to Section 3(c)(5)(C) of the 1940 Act, which is available for entities primarily engaged in the business of purchasing or otherwise acquiring mortgages and other liens on and interests in real estate. This exemption generally requires that at least 55% of our subsidiaries' portfolios must be comprised of qualifying assets and at least another 25% of each of their portfolios must be comprised of real estate-related assets under the 1940 Act (and no more than 20% comprised of miscellaneous assets). Qualifying assets for this purpose include mortgage loans and other assets, such as whole pool Agency and non-Agency RMBS, that the Securities and Exchange Commission, or SEC staff in various no-action letters has determined are the functional equivalent of mortgage loans for the purposes of the 1940 Act. We treat as real estate-related assets CMBS, debt and equity securities of companies primarily engaged in real estate businesses, agency partial pool certificates and securities issued by pass-through entities of which substantially all of the assets consist of qualifying assets and/or real estate-related assets. IAS Asset I LLC invests in the Invesco PPIP Fund. We treat IAS Asset I LLC's investment in the Invesco PPIP Fund as a real estate-related asset for purposes of the Section 3(c)(5)(C) analysis. As a result, IAS Asset I LLC can invest no more than 25% of its assets in the Invesco PPIP and other real estate-related assets. We note that the SEC has not provided any guidance on the treatment of interests in PPIFs as real estate-related assets and any such guidance may require us to change our strategy. We may need to adjust IAS Asset I LLC's assets and strategy in order for it to continue to rely on Section 3(c)(5)(C) for its 1940 Act exemption. Any such adjustment in IAS Asset I LLC's assets or strategy is not expected to have a material adverse effect on our business or strategy. Although we monitor our portfolio periodically and prior to each investment acquisition, there can be no assurance that we will be able to maintain this exemption from registration for each of these subsidiaries. The legacy securities PPIF formed and managed by our Manager or one of its affiliates relies on Section 3(c)(7) for its 1940 Act exemption.

IMC Investments I LLC was organized as a special purpose subsidiary of the operating partnership that borrows under the TALF. This subsidiary relies on Section 3(c)(7) for its 1940 Act exemption and, therefore, the operating partnership's interest in this TALF subsidiary would constitute an investment security for purposes of determining whether the operating partnership passes the 40% test.

We may in the future organize one or more TALF subsidiaries that seek to rely on the 1940 Act exemption provided to certain structured financing vehicles by Rule 3a-7. Any such TALF subsidiary would need to be structured to comply with any guidance that may be issued by the Division of Investment Management of the SEC on the restrictions contained in Rule 3a-7. We expect that the aggregate value of the operating partnership's interests in TALF subsidiaries that seek to rely on Rule 3a-7 will comprise less than 20% of the operating partnership's (and, therefore, our) total assets on an unconsolidated basis.

Qualification for exemption from registration under the 1940 Act will limit our ability to make certain investments. For example, these restrictions will limit the ability of our subsidiaries to invest directly in mortgage-backed securities that represent less than the entire ownership in a pool of mortgage loans, debt and

Table of Contents

equity tranches of securitizations and certain Asset Based Securities and real estate companies or in assets not related to real estate.

Policies with Respect to Certain Other Activities

If our board of directors determines that additional funding is required, we may raise such funds through additional offerings of equity or debt securities or the retention of cash flow (subject to provisions in the Internal Revenue Code concerning distribution requirements and the taxability of undistributed REIT taxable income) or a combination of these methods. In the event that our board of directors determines to raise additional equity capital, it has the authority, without shareholder approval, to issue additional common stock or preferred stock in any manner and on such terms and for such consideration as it deems appropriate, at any time.

As of the date of this prospectus, we do not intend to offer equity or debt securities in exchange for property. We have not in the past but may in the future repurchase or otherwise reacquire our shares.

As of the date of this prospectus, we do not intend to invest in the securities of other REITs, other entities engaged in real estate activities or securities of other issuers for the purpose of exercising control over such entities. We engage in the purchase and sale of investments. We have not in the past but may in the future make loans to third parties in the ordinary course of business for investment purposes. As of the date of this prospectus, we do not intend to underwrite the securities of other issuers.

We intend to furnish our shareholders with annual reports containing consolidated financial statements audited by our independent certified public accountants and file quarterly reports with the SEC containing unaudited consolidated financial statements for each of the first three quarters of each fiscal year.

Our board of directors may change any of these policies without prior notice to you or a vote of our shareholders.

Competition

Our net income depends, in large part, on our ability to acquire assets at favorable spreads over our borrowing costs. In acquiring our investments, we compete with other REITs, specialty finance companies, savings and loan associations, banks, mortgage bankers, insurance companies, mutual funds, institutional investors, investment banking firms, financial institutions, governmental bodies and other entities. See Management's Discussion and Analysis of Financial Condition and Results of Operations Market Conditions. In addition, there are numerous REITs with similar asset acquisition objectives, including a number that have been recently formed, and others may be organized in the future. These other REITs increase competition for the available supply of mortgage assets suitable for purchase. Many of our competitors are significantly larger than we are, have access to greater capital and other resources and may have other advantages over us. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of investments and establish more relationships than we can. Current market conditions may attract more competitors, which may increase the competition for sources of financing. An increase in the competition for sources of funding could adversely affect the availability and cost of financing, and thereby adversely affect the market price of our common stock.

In the face of this competition, we have access to our Manager's professionals and their industry expertise, which provides us with a competitive advantage. These professionals help us assess investment risks and determine appropriate pricing for certain potential investments. We expect that these relationships will enable us to compete more effectively for attractive investment opportunities. In addition, we believe that current market conditions may have adversely affected the financial condition of certain competitors. Despite certain competitive advantages, we may

not be able to achieve our business goals or expectations due to the competitive risks that we face. For additional information concerning these competitive risks, see Risk Factors Risks Related to Our Investments We operate in a highly competitive market for investment opportunities and competition may limit our ability to acquire desirable investments in our target assets and could also affect the pricing of these securities.

Table of Contents

Staffing

We are managed by our Manager pursuant to the management agreement between our Manager and us. All of our officers are employees of Invesco. We do not have any employees. See Our Manager and The Management Agreement Management Agreement.

Our Corporate Information

Our principal executive offices are located at 1555 Peachtree Street, NE, Atlanta, Georgia 30309. Our telephone number is (404) 892-0896. Our website is www.invescomortgagecapital.com. The contents of our website are not a part of this prospectus. The information on our website is not intended to form a part of or be incorporated by reference into this prospectus.

Legal Proceedings

From time to time, we may be involved in various claims and legal actions arising in the ordinary course of business. As of September 30, 2009, we were not involved in any such legal proceedings.

Table of Contents**MANAGEMENT****Our Directors and Executive Officers**

Our board of directors is comprised of five members. Our directors are each elected to serve a term of one year. Our board of directors has determined that each of Messrs. Balloun, Day and Williams satisfy the listing standards for independence of the NYSE. Our bylaws provide that a majority of the board of directors may at any time increase or decrease the number of directors. However, unless our bylaws are amended, the number of directors may never be less than the minimum number required by the MGCL nor more than 15.

The following sets forth certain information with respect to our directors, executive officers and other key personnel:

Name	Age	Position Held with Us
G. Mark Armour	56	Director
Karen Dunn Kelley	49	Director
James S. Balloun	71	Director
John S. Day	60	Director
Neil Williams	73	Director
Richard J. King	50	President and Chief Executive Officer
John Anzalone	45	Chief Investment Officer
Donald R. Ramon	46	Chief Financial Officer
Robson J. Kuster*	36	Head of Research
Jason Marshall*	35	Portfolio Manager

* Messrs. Kuster and Marshall are not our executive officers; they are key personnel of our Manager.

Set forth below is biographical information for our directors, executive officers and other key personnel.

Directors

G. Mark Armour, Director since June 5, 2008. Mr. Armour is the Co-President, Co-Chief Executive Officer and a Director of our Manager. Mr. Armour is also the Senior Managing Director and Head of Invesco's Worldwide Institutional business, positions he has held since January 2007. Mr. Armour was previously the Head of Sales & Client Service for the Worldwide Institutional business. He was Chief Executive Officer of Invesco Australia from September 2002 until July 2006. Prior to joining Invesco, Mr. Armour held significant leadership roles in the funds management business, both in Australia and Hong Kong. He previously served as Chief Investment Officer for ANZ Investments and spent almost 20 years with the National Mutual/AXA Australia Group, where he was Chief Executive, and Funds Management from 1998 to 2000. Mr. Armour graduated with honors with a Bachelor of Economics from La Trobe University in Melbourne, Australia.

Karen Dunn Kelley, Director since June 5, 2008. Ms. Dunn Kelley is the Chief Executive Officer of Invesco Fixed Income, with responsibility for its fixed income and cash management business and is also a member of Invesco's Executive Management and Worldwide Institutional Strategy Committees. She is President and Principal Executive Officer of Short-Term Investments Trust and Aim Treasurer's Series Trust and serves on the board of directors for the

Short-Term Investments Company (Global Services) plc and Aim Global Management Company, Ltd. Ms. Dunn Kelley joined Invesco Aim Management Group, Inc. in 1989 as a money market Portfolio Manager. Ms. Dunn Kelley has been in the investment business since 1982. Ms. Dunn Kelley graduated magna cum laude with a Bachelor of Science from Villanova University, College of Commerce and Finance.

James S. Balloun, Director since July 1, 2009. Mr. Balloun serves as a non-executive director of our Company and as Chairman of the Compensation Committee. Mr. Balloun was previously the Chairman and Chief Executive Officer of Acuity Brands, Inc. from November 2001 until his retirement in September 2004

Table of Contents

and was the Chairman, President and Chief Executive Officer of National Services Industries, Inc. prior to National Services Industries, Inc.'s spin-off of Acuity Brands in November 2001. Prior to joining National Services Industries, Inc., Mr. Balloun was with McKinsey & Company, Inc. from 1965 to 1996. Mr. Balloun is on the board of directors of Radiant Systems, Inc. where he is the Chairman of the Nominating and Corporate Governance Committee, Enzymatic Deinking Technologies, LLC, Unisen/StarTrac and the Georgia Port Authority. Mr. Balloun received a Bachelor of Science from Iowa State University and a Master of Business Administration from Harvard Business School.

John S. Day, Director since July 1, 2009. Mr. Day serves as a non-executive director of our Company and as Chairman of the Audit Committee. Mr. Day was previously with Deloitte & Touche LLP from 2002 until his retirement in December 2005. Prior to joining Deloitte & Touche LLP, Mr. Day was with Arthur Andersen LLP from 1976 to 2002. Mr. Day serves on the board of directors of Force Protection, Inc., where he is the Chairman of the Audit Committee, and Lenbrook Square Foundation, Inc. Mr. Day received a Bachelor of Arts from the University of North Carolina and a Master of Business Administration from Harvard Business School.

Neil Williams, Director since July 1, 2009. Mr. Williams serves as the Non-Executive Chairman of the Board of Directors of our Company and as Chairman of the Nominating and Governance Committee. Mr. Williams was previously the general counsel of Invesco from 1999 to 2002. Mr. Williams was a partner of Alston & Bird LLP from 1965 to 1999 where he was managing partner from 1984 through 1996. Mr. Williams serves on the board of directors of Acuity Brands, Inc. where he is the Lead Director and Chairman of the Governance Committee and on the board of directors of Printpack, Inc. Mr. Williams received a Bachelor of Arts in 1958 and a J.D. in 1961 from Duke University.

Executive Officers

Richard J. King, CFA, President and Chief Executive Officer. Mr. King has served as our President and Chief Executive Officer since June 16, 2008. He is also a member of the Invesco Fixed Income senior management team, and is the Head of US Investment Grade Fixed Income Investment, contributing 25 years of fixed income investment expertise. Mr. King joined Invesco in 2000 and has held positions as Senior Portfolio Manager and Product Manager for Core and Core Plus, Head of the Structured Team, and Head of Portfolio Management, leading a team responsible for portfolio management of all investment-grade domestic fixed income portfolios. Prior to Invesco, Mr. King spent two years as Head of Fixed Income at Security Management, and ten years with Criterion Investment Management, where he served as Chairman of the Core Sector Group. He also served as Managing Director and Portfolio Manager with Bear Stearns Asset Management. Starting in 1984, he spent four years with Ohio PERS as an Investment Analyst, with the responsibility of analyzing and trading corporate bonds and mortgage-backed securities. Mr. King began his career in 1981, as an auditor for Touche Ross & Co. Mr. King received a Bachelor of Science in Business Administration from Ohio State University. Mr. King is a Chartered Financial Analyst.

John M. Anzalone, CFA, Chief Investment Officer. Mr. Anzalone has served as our Chief Investment Officer since June 25, 2009. He is also a Senior Director and Head of Research & Trading, Mortgage-Backed Securities for our Manager. Mr. Anzalone joined Invesco's Fixed Income Division in 2002. As the Head of the MBS group, he is responsible for the application of investment strategy across portfolios consistent with client investment objectives and guidelines. Additionally, the MBS team is responsible for analyzing and implementing investment actions in the residential and commercial mortgage-backed securities sectors. Mr. Anzalone began his investment career in 1992 at Union Trust. In 1994 he moved to AgriBank, FCB, where he served as a Senior Trader for six years. Mr. Anzalone is also a former employee of Advantus Capital Management where he was a Senior Trader responsible for trading mortgage-backed, asset-backed and commercial mortgage securities. Mr. Anzalone received a Bachelor of Arts in Economics from Hobart College and a Master of Business Administration from the Simon School at the University of Rochester. Mr. Anzalone is a Chartered Financial Analyst.

Donald R. Ramon, CPA, Chief Financial Officer. Mr. Ramon is our Chief Financial Officer and joined Invesco in 2009. Mr. Ramon has 23 years of banking and financial institution experience which includes five

Table of Contents

years working directly with mortgage REITs. Mr. Ramon began his career in 1986 with SunTrust Banks, Inc. where he held several accounting and internal audit positions over 13 years, including two years as the Senior Financial Officer for numerous private mortgage REITs. From 1999 to 2005, Mr. Ramon worked for GE Capital Corporation, overseeing their U.S. banking operations. In addition, Mr. Ramon spent two years as Chairman of the Board, Chief Executive Officer and President of GE Money Bank and Monogram Credit Card Bank of Georgia and four years as Chief Financial Officer for the same. From 2005 to 2008, Mr. Ramon was SVP and Controller of HomeBanc Corp., a publicly held mortgage REIT that filed a voluntary petition for relief under Chapter 11 of the U.S. Bankruptcy Code in August 2007. In 2008, Mr. Ramon was named Acting Chief Executive Officer and Chief Financial Officer. Mr. Ramon received a bachelor's degree in Accounting from the University of South Florida. Mr. Ramon is a Certified Public Accountant.

Other Key Personnel

Robson J. Kuster, CFA, Head of Research. Mr. Kuster has served as our Head of Research since July 1, 2009. He is also the Head of Structured Securities Research for Invesco Fixed Income. Mr. Kuster is responsible for overseeing all structured securities positions across stable value and total return platforms and is supported by a team of seasoned analysts. Additionally, he is closely involved in all structured product development efforts. Prior to joining Invesco in 2002, Mr. Kuster served as a Credit Analyst with Bank One Capital Markets, which he joined in 2000. Mr. Kuster received a Bachelor of Arts in both Economics and American History from Cornell College and a Master of Business Administration from DePaul University. Mr. Kuster is a Chartered Financial Analyst.

Jason Marshall, Portfolio Manager. Mr. Marshall has served as our Portfolio Manager since July 28, 2009. Mr. Marshall is also a Portfolio Manager on Invesco's structured team with a focus in the mortgage-backed sector. He is responsible for providing expertise for the mortgage-related focus products and working collectively with the structured team to implement strategies throughout the fixed income platform. Prior to joining Invesco, Mr. Marshall worked for PNC Financial Services Group, Inc., which he joined in 1997. He was most recently Vice President of Portfolio Management, responsible for the trading and strategic implementation of the firm's large mortgage-backed securities portfolio. Mr. Marshall received his Bachelor of Science in Finance from Indiana University of Pennsylvania and a Master of Business Administration with a concentration in Finance from Duquesne University.

Corporate Governance Board of Directors and Committees

Our business is managed by our Manager, subject to the supervision and oversight of our board of directors, which has established investment guidelines described under *Business Investment Guidelines* for our Manager to follow in its day-to-day management of our business. A majority of our board of directors is independent, as determined by the requirements of the NYSE and the regulations of the SEC. Our directors keep informed about our business by attending meetings of our board of directors and its committees and through supplemental reports and communications. Our independent directors meet regularly in executive sessions without the presence of our corporate officers or non-independent directors.

Our board of directors has formed an audit committee, a compensation committee and a nominating and corporate governance committee and has adopted charters for each of these committees. Each of these committees has three directors and is composed exclusively of independent directors, as defined by the listing standards of the NYSE. Moreover, the compensation committee is composed exclusively of individuals intended to be, to the extent provided by Rule 16b-3 of the Exchange Act, non-employee directors and will, at such times as we are subject to Section 162(m) of the Internal Revenue Code, qualify as outside directors for purposes of Section 162(m) of the Internal Revenue Code.

Audit Committee

The audit committee is comprised of Messrs. Balloun, Day and Williams, each of whom is an independent director and financially literate under the rules of the NYSE. Mr. Day chairs our audit committee and serves as our audit committee financial expert, as that term is defined by the SEC.

Table of Contents

The committee assists the board of directors in overseeing:

our financial reporting, auditing and internal control activities, including the integrity of our financial statements;

our compliance with legal and regulatory requirements;

the independent auditor's qualifications and independence; and

the performance of our internal audit function and independent auditor.

The audit committee is also responsible for engaging our independent registered public accounting firm, reviewing with the independent registered public accounting firm the plans and results of the audit engagement, approving professional services provided by the independent registered public accounting firm, reviewing the independence of the independent registered public accounting firm, considering the range of audit and non-audit fees and reviewing the adequacy of our internal accounting controls.

Compensation Committee

The compensation committee is comprised of Messrs. Balloun, Day and Williams, each of whom is an independent director. Mr. Balloun chairs our compensation committee.

The principal functions of the compensation committee are to:

review and approve on an annual basis the corporate goals and objectives relevant to Chief Executive Officer compensation, if any, evaluate our Chief Executive Officer's performance in light of such goals and objectives and, either as a committee or together with our independent directors (as directed by the board of directors), determine and approve the remuneration of our Chief Executive Officer based on such evaluation;

review and oversee management's annual process, if any, for evaluating the performance of our senior officers and review and approve on an annual basis the remuneration of our senior officers;

oversee our equity-based remuneration plans and programs;

assist the board of directors and the chairman in overseeing the development of executive succession plans; and

determine from time to time the remuneration for our non-executive directors (including the chairman).

Nominating and Corporate Governance Committee

The nominating and corporate governance committee is comprised of Messrs. Balloun, Day and Williams, each of whom is an independent director. Mr. Williams chairs our nominating and corporate governance committee.

The nominating and corporate governance committee is responsible for:

providing counsel to the board of directors with respect to the organization, function and composition of the board of directors and its committees;

overseeing the self-evaluation of the board of directors and the board of director's evaluation of management;

periodically reviewing and, if appropriate, recommending to the board of directors changes to, our corporate governance policies and procedures; and

identifying and recommending to the board of directors potential director candidates for nomination.

Table of Contents**Director Compensation*****Compensation of Executive Directors***

A member of our board of directors who is also an employee of Invesco is referred to as an executive director. Executive directors do not receive compensation for serving on our board of directors. We reimburse each of our executive directors for his or her travel expenses incurred in connection with his or her attendance at board of directors and committee meetings.

Compensation of Non-executive Directors

A member of our board of directors who is not an employee of Invesco is referred to as a non-executive director. Each non-executive director received an upfront fee of \$5,000 upon completion of our IPO. In addition, each non-executive director receives an annual base fee for his services of \$25,000, payable in cash, and an annual deferred director fee of \$25,000, payable in shares of our common stock under our equity incentive plan. Such shares of our common stock may not be sold or transferred during the non-executive director's service on our board of directors. Both base and deferred director fees are paid on a quarterly basis. We also reimburse each of our non-executive directors for his or her travel expenses incurred in connection with his or her attendance at board of directors and committee meetings.

The table below describes the compensation earned by our non-executive directors as of December 31, 2009. We compensated only those directors who are independent under the NYSE listing standards.

Name	Fees Earned or Paid in Cash	Stock Awards	Total (\$)
	(\$)(1)	(\$)(2)	
James S. Balloun	17,500	6,250	23,750
John S. Day	17,500	6,250	23,750
Neil Williams	17,500	6,250	23,750

(1) Represents an initial one-time cash fee of \$5,000 and a quarterly cash award of \$6,250.

(2) Reflects the dollar amount that we recognized for financial statement reporting purposes relating to shares of our common stock granted to each of our non-executive directors in payment of his quarterly deferred director fee. The stock awards were fully-vested as of the date of grant. Accordingly, the dollar amounts also reflect the full grant date fair value of such stock awards. The fair values of these awards and the amounts expensed were determined in accordance with GAAP.

Compensation Committee Interlocks and Insider Participation

None of the members of our compensation and governance committee is or has been employed by us. None of our executive officers currently serves, or in the past three years has served, as a member of the board of directors or compensation committee of another entity that has one or more executive officers serving on our board of directors or compensation and governance committee. See Management Our Directors and Executive Officers.

Executive Compensation

Because our management agreement provides that our Manager is responsible for managing our affairs, our executive officers, who are employees of Invesco, do not receive cash compensation from us for serving as our executive officers. Instead we pay our Manager the management fees described in Our Manager and the Management Agreement Management Agreement Management Fees and Expense Reimbursements. However, we have agreed to reimburse our Manager for the compensation expense of our Chief Financial Officer in respect of the services he provides to us. Our Chief Financial Officer's annual base salary is \$175,000, and he is eligible to receive an annual bonus between 25% and 100% per annum of his base salary. Our Chief Financial Officer is dedicated exclusively to us and, as a result, we are responsible for his total compensation. In their capacities as officers or personnel of Invesco, persons other than our Chief Financial Officer devote such portion of their time to our affairs as is necessary to enable us to operate our business.

Table of Contents

Our Manager compensates each of our executive officers. We pay our Manager a management fee and our Manager uses the proceeds from the management fee, in part, to pay compensation to its officers and personnel. We may in the future grant equity to our executive officers for which our Manager will reimburse us or for which there will be an offset against the management fee we otherwise owe our Manager under the management agreement.

2009 Equity Incentive Plan

We adopted the 2009 Equity Incentive Plan to provide incentive compensation to attract and retain qualified directors, officers, advisors, consultants and other personnel, including our Manager and its affiliates and personnel of our Manager and its affiliates, and any joint venture affiliates of ours. Unless terminated earlier, our equity incentive plan will terminate in 2019, but will continue to govern unexpired awards. Our equity incentive plan provides for grants of share options, restricted shares of common stock, phantom shares, dividend equivalent rights and other equity-based awards up to an aggregate of 6% of the issued and outstanding shares of our common stock (on a fully diluted basis) at the time of the award, subject to a ceiling of 40 million shares available for issuance under the plan. In making awards under the plan, our board of directors or the compensation committee, as applicable, may consider the recommendations of our Manager as to the personnel who should receive awards and the amounts of the awards. The maximum number of shares with respect to which any options may be granted in any one year to any grantee may not exceed 700,000. The maximum number of shares underlying grants, other than grants of options, in any one year to any grantee may not exceed 700,000. Notwithstanding the foregoing, except in the case of grants intended to qualify as a performance-based award under Section 162(m) of the Internal Revenue Code, there is no limit on the number of phantom shares or dividend equivalent rights to the extent they are paid out in cash that may be granted under the equity incentive plan. Prior to the completion of this offering, we have not issued any equity-based compensation other than to our non-executive directors. See Management Director Compensation Compensation of Non-executive Directors for a detailed explanation of our non-executive director compensation.

The equity incentive plan is administered by the compensation committee of our board of directors. The compensation committee has the full authority (1) to administer and interpret the equity incentive plan, (2) to authorize the granting of awards, (3) to determine the eligibility of directors, officers, advisors, consultants and other personnel, including our Manager and its affiliates and personnel of our Manager and its affiliates, and any joint venture affiliates of ours, to receive an award, (4) to determine the number of shares of common stock to be covered by each award (subject to the individual participant limitations provided in the equity incentive plan), (5) to determine the terms, provisions and conditions of each award (which may not be inconsistent with the terms of the equity incentive plan), (6) to prescribe the form of instruments evidencing such awards and (7) to take any other actions and make all other determinations that it deems necessary or appropriate in connection with the equity incentive plan or the administration or interpretation thereof. In connection with this authority, the compensation committee may, among other things, establish performance goals that must be met in order for awards to be granted or to vest, or for the restrictions on any such awards to lapse.

The compensation committee may, in its discretion, designate awards granted under the equity incentive plan as a qualified performance-based award in order to make the award fully deductible without regard to the \$1,000,000 deduction limit imposed by Internal Revenue Code Section 162(m), at such times as we are subject to Section 162(m). If an award is so designated, the compensation committee must establish objectively determinable performance goals for the award based on one or more of the following business criteria: (1) pre-tax income, (2) after-tax income, (3) net income (meaning net income as reflected in our financial reports for the applicable period, on an aggregate, diluted and/or per share basis), (4) operating income, (5) cash flow, (6) earnings per share, (7) return on equity, (8) return on invested capital or assets, (9) cash and/or funds available for distribution, (10) appreciation in the fair market value of the common stock, (11) return on investment, (12) total shareholder return (meaning the aggregate common stock price appreciation and dividends paid, assuming full reinvestment of dividends during the applicable period), (13) net earnings growth, (14) stock appreciation (meaning an increase in the price or value of the common stock after the date

of grant

100

Table of Contents

of an award and during the applicable period), (15) related return ratios, (16) increase in revenues, (17) the Company's published rankings against its peer group of REITs based on total shareholder return, (18) net earnings, (19) changes (or the absence of changes) in the per share or aggregate market price of our common stock, (20) number of securities sold, (21) earnings before any one or more of the following items: interest, taxes, depreciation or amortization for the applicable period, and (22) total revenue growth (meaning the increase in total revenues after the date of grant of an award and during the applicable period).

The equity incentive plan contains provisions regarding the treatment of awards granted under the plan in the event of a participant's termination of service, including his or her death, disability or retirement, or upon the occurrence of a change in our control. Unless otherwise provided by the committee in the applicable award agreement, upon the occurrence of a change of control (as defined in the equity incentive plan), all awards granted under the equity incentive plan will become fully-vested. Unless otherwise provided by the compensation committee in the applicable award agreement, upon the termination of a participant's service by us without cause or due to his or her death, disability or retirement (as such terms are defined in the equity incentive plan), all restrictions on such participant's outstanding awards of restricted stock and phantom shares will lapse as of the date of termination.

Code of Conduct and Code of Ethics

Our board of directors has established a code of conduct and a code of ethics that applies to our officers and directors and to our Manager's officers, directors and personnel when such individuals are acting for or on our behalf. Among other matters, our code of conduct and code of ethics are designed to deter wrongdoing and to promote:

honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

full, fair, accurate, timely and understandable disclosure in our SEC reports and other public communications;

compliance with applicable governmental laws, rules and regulations;

prompt internal reporting of violations of the code to appropriate persons identified in the codes; and

accountability for adherence to the codes.

Any waiver of the code of conduct and code of ethics for our executive officers or directors may be made only by our board of directors or one of our board committees and will be promptly disclosed as required by law or stock exchange regulations.

Conflicts of Interest

We are dependent on our Manager for our day-to-day management and do not have any independent officers or employees. Each of our officers and two of our directors, Mr. Armour and Ms. Dunn Kelley, are employees of Invesco. Our management agreement with our Manager was negotiated between related parties and its terms, including fees and other amounts payable, may not be as favorable to us as if it had been negotiated at arm's length with an unaffiliated third party. In addition, the obligations of our Manager and its officers and personnel to engage in other business activities, including for Invesco, may reduce the time our Manager and its officers and personnel spend managing us.

As of September 30, 2009, Invesco had \$416.9 billion in managed assets and our Manager managed approximately \$184.9 billion of fixed income and real estate investments. A substantial number of separate accounts managed by our

Manager's had limited exposure to our target assets. In addition, in the future our Manager may have additional clients that compete directly with us for investment opportunities, although Invesco has indicated to us that it expects that we will be the only publicly-traded REIT advised by our Manager or Invesco and its subsidiaries whose investment strategy is to invest substantially all of its capital in our target assets. Our Manager has an investment allocation policy in place that is intended to enable us to share equitably with the investment companies and institutional and separately managed accounts that effect

Table of Contents

securities transactions in fixed income securities for which our Manager is responsible in the selection of brokers, dealers and other trading counterparties. According to this policy, investments may be allocated by taking into account factors, including but not limited to investment objectives or strategies, the size of the available investment, cash availability and cash flow expectations, and the tax implications of an investment. The investment allocation policy also requires a fair and equitable allocation of financing opportunities over time among us and other accounts. The investment allocation policy also includes other procedures intended to prevent any of its other accounts from receiving favorable treatment in accessing investment opportunities over any other account. The investment allocation policy may be amended by our Manager at anytime without our consent. To the extent that a conflict arises with respect to the business of our Manager or us in such a way as to give rise to conflicts not currently addressed by the investment allocation policy, our Manager may need to refine its policy to address such situation. Our independent directors will review our Manager's compliance with the investment allocation policy. In addition, to avoid any actual or perceived conflicts of interest with our Manager, a majority of our independent directors will be required to approve an investment in any security structured or issued by an entity managed by our Manager, or any of its affiliates, or any purchase or sale of our assets by or to our Manager or its affiliates or an entity managed by our Manager or its affiliates.

To the extent available to us, we may seek to finance our non-Agency RMBS and CMBS portfolios with financings under the legacy securities program, and we may also seek to acquire residential and commercial mortgage loans with financing under the legacy loan program. One of the ways we may access this financing is by contributing our equity capital to one or more legacy securities or legacy loan PPIFs that will be established and managed by our Manager or one of its affiliates. On September 30, 2009, U.S. Treasury announced that the Invesco PPIP Fund had acquired the requisite private capital to obtain funding from U.S. Treasury's legacy securities program. Pursuant to the terms of the management agreement, we pay our Manager a management fee. As a result, we do not pay any management or investment fees with respect to our investment in the Invesco PPIP Fund managed by our Manager. Our Manager waives all such fees. Our Manager would have a conflict of interest in recommending our participation in any legacy securities or legacy loan PPIFs it manages for the fees payable to it by the legacy securities or legacy loan PPIF may be greater than the fees payable to it by us under the management agreement. We have addressed this conflict by requiring that the terms of any equity investment we make in any such legacy securities or legacy loan PPIF be approved by a majority of our independent directors.

We do not have a policy that expressly prohibits our directors, officers, shareholders or affiliates from engaging for their own account in business activities of the types conducted by us. However, subject to Invesco's allocation policy, our code of business conduct and ethics contains a conflicts of interest policy that prohibits our directors, officers and personnel, as well as employees of our Manager who provide services to us, from engaging in any transaction that involves an actual conflict of interest with us.

Limitation of Liability and Indemnification

Maryland law permits a Maryland corporation to include in its charter a provision limiting the liability of its directors and officers to the corporation and its shareholders for money damages except for liability resulting from (1) actual receipt of an improper benefit or profit in money, property or services or (2) active and deliberate dishonesty established by a final judgment as being material to the cause of action. Our charter contains such a provision and limits the liability of our directors and officers to the maximum extent permitted by Maryland law.

Our charter authorizes us, to the maximum extent permitted by Maryland law, to indemnify and pay or reimburse reasonable expenses in advance of final disposition of a proceeding to (1) any present or former director or officer of our company or (2) any individual who, while serving as our director or officer and at our request, serves or has served another corporation, REIT, partnership, joint venture, trust, employee benefit plan, limited liability company or any other enterprise as a director, officer, partner or trustee of such corporation, REIT, partnership, joint venture, trust,

employee benefit plan, limited liability company or other enterprise, from and against any claim or liability to which such person may become subject or which such person may incur by reason of his or her service in such capacity or capacities. Our bylaws obligate us, to the

Table of Contents

maximum extent permitted by Maryland law, to indemnify and, without requiring a preliminary determination of the ultimate entitlement to indemnification, pay or reimburse reasonable expenses in advance of final disposition of a proceeding to (1) any present or former director or officer of our company who is made or threatened to be made a party to the proceeding by reason of his service in that capacity or (2) any individual who, while serving as our director or officer and at our request, serves or has served another corporation, REIT, partnership, joint venture, trust, employee benefit plan, limited liability company or any other enterprise as a director, officer, partner or trustee of such corporation, REIT, partnership, joint venture, trust, employee benefit plan, limited liability company or other enterprise, and who is made or threatened to be made a party to the proceeding by reason of his or her service in that capacity. Our charter and bylaws also permit us to indemnify and advance expenses to any person who served any predecessor of our company in any of the capacities described above and to any employee or agent of our company or of any predecessor.

The MGCL requires us (unless our charter provides otherwise, which our charter does not) to indemnify a director or officer who has been successful, on the merits or otherwise, in the defense of any proceeding to which he is made or threatened to be made a party by reason of his service in that capacity. The MGCL permits a corporation to indemnify its present and former directors and officers, among others, against judgments, penalties, fines, settlements and reasonable expenses actually incurred by them in connection with any proceeding to which they may be made or threatened to be made a party by reason of their service in those or other capacities unless it is established that (1) the act or omission of the director or officer was material to the matter giving rise to the proceeding and (A) was committed in bad faith or (B) was the result of active and deliberate dishonesty, (2) the director or officer actually received an improper personal benefit in money, property or services, or (3) in the case of any criminal proceeding, the director or officer had reasonable cause to believe that the act or omission was unlawful. However, under the MGCL, a Maryland corporation may not indemnify for an adverse judgment in a suit by or in the right of the corporation or for a judgment of liability on the basis that personal benefit was improperly received, unless in either case a court orders indemnification and then only for expenses. In addition, the MGCL permits a corporation to advance reasonable expenses to a director or officer upon the corporation's receipt of (1) a written affirmation by the director or officer of his good faith belief that he has met the standard of conduct necessary for indemnification by the corporation and (2) a written undertaking by him or on his behalf to repay the amount paid or reimbursed by the corporation if it is ultimately determined that the appropriate standard of conduct was not met.

Table of Contents**OUR MANAGER AND THE MANAGEMENT AGREEMENT****General**

We are externally managed and advised by our Manager. Each of our officers is an employee of Invesco. Our Manager is entitled to receive a management fee pursuant to the management agreement. The executive offices of our Manager are located at 1555 Peachtree Street, NE, Atlanta, Georgia 30309, and the telephone number of our Manager's executive offices is (404) 892-0896.

Executive Officers and Key Personnel of Our Manager

The following sets forth certain information with respect to each of the executive officers and certain other key personnel of our Manager:

Executive Officer	Age	Position Held with our Manager
G. Mark Armour	56	Co-President, Co-Chief Executive Officer and Director
Philip A. Taylor	54	Co-President, Co-Chief Executive Officer and Director
David A. Hartley	47	Treasurer and Chief Accounting Officer
Kevin M. Carome	53	Secretary and Director
Todd L. Spillane	51	Chief Compliance Officer and Senior Vice President

Set forth below is biographical information for the executive officers and certain other key personnel of our Manager.

G. Mark Armour. See Management Our Directors and Executive Officers Directors for his biographical information.

Philip A. Taylor, Co-President, Co-Chief Executive Officer and Director. Mr. Taylor is the Co-President, Co-Chief Executive Officer and a Director of our Manager. He is also the head of Invesco's North American Retail business and previously served as head of Invesco Trimark. Mr. Taylor joined Invesco Trimark in 1999 as senior vice president of operations and client services and later became executive vice president and chief operating officer. Mr. Taylor was president of Canadian retail broker Investors Group Securities from 1994 to 1997 and managing partner of Meridian Securities, an execution and clearing broker, from 1989 to 1994. He held various management positions with Royal Trust, now part of Royal Bank of Canada, from 1982 to 1989. Mr. Taylor began his career in consumer brand management in the U.S. and Canada with Richardson-Vicks, now part of Procter & Gamble. He received a Bachelor of Commerce (honors) degree from Carleton University and an MBA from the Schulich School of Business at York University. Mr. Taylor is a member of the Dean's Advisory council of the Schulich School of Business.

David A. Hartley, Treasurer and Chief Accounting Officer. Mr. Hartley is the Treasurer and Chief Accounting Officer of our Manager. He has also served as Chief Accounting Officer of Invesco since April 2004. Mr. Hartley served as Chief Financial Officer of our Manager from September 1998 to January 2003. During this time, he was the Head of Institutional Services for our Manager, providing operational, administrative and back office support to Invesco. Since 1993, Mr. Hartley served as the Principal Accounting Officer for AMVESCAP PLC, as Invesco was then known. In 1991, Mr. Hartley joined Invesco as Controller for Invesco North American operations. Mr. Hartley began his career in 1982 at KPMG Peat Marwick in London before moving to Atlanta in 1987. Mr. Hartley received a Bachelor of Science in Economics and Accounting from the University of Bristol. Mr. Hartley is an English Chartered Accountant.

Kevin M. Carome, Secretary and Director. Mr. Carome is the Secretary and a Director of our Manager. He has served as general counsel of Invesco since January 2006. Previously, he was senior vice president and general counsel of Invesco Aim from 2003 to 2005. Prior to joining Invesco, Mr. Carome worked with Liberty Financial Companies, Inc. (LFC) in Boston where he was senior vice president and general counsel from August 2000 through December 2001. He joined LFC in 1993 as associate general counsel and, from 1998 through 2000, was general counsel of certain of its investment management subsidiaries. Mr. Carome began

Table of Contents

his career as an associate at Ropes & Gray in Boston. He received a B.S. in political science and a J.D. from Boston College.

Todd Spillane, Chief Compliance Officer and Senior Vice President. Mr. Spillane is the Chief Compliance Officer and Senior Vice President of our Manager. He has also served as Chief Compliance Officer of Invesco U.S. Compliance since March 2006. As Chief Compliance Officer, Mr. Spillane directs the compliance teams that support the U.S. Retail and U.S. Institutional operations of Invesco Aim Advisors and Invesco. Previously, Mr. Spillane served as the Advisory Compliance Director for Invesco Aim Advisors and was responsible for the management of the Advisory Compliance group. Prior to joining Invesco Aim Advisors in 2004, Mr. Spillane was the Vice President of global product development with AIG Global Investment Group. While at AIG, he also served as Chief Compliance Officer and Deputy General Counsel for AIG/SunAmerica Asset Group and AIG/American General Investment Management. Mr. Spillane began his career in 1988 as an attorney with Aetna Life Insurance Company. He also served as Director of Compliance for Nicholas-Applegate Capital Management from 1994 to 1999. Mr. Spillane received a Bachelor of Arts in Politics from Fairfield University and a Juris Doctorate from Western New England School of Law. He is a member of the Connecticut Bar Association.

Brian P. Norris, CFA, Portfolio Manager, Mortgage-Backed Securities. Mr. Norris is a Portfolio Manager on the structured securities team with a focus in the mortgage-backed sector. He is responsible for trading for the mortgage-related focus products and works collectively with the structured team to implement strategies throughout the fixed income platform. Mr. Norris moved to the investment team in 2006. He has been employed by Invesco since March 2001 and served for five years as an Account Manager, where he was responsible for communicating the fixed income investment process and strategy to both clients and consultants. Mr. Norris began his investment career in 1999 with Todd Investment Advisers in Louisville, Kentucky, as a Securities Trader. Mr. Norris received a Bachelor of Science in Business Administration majoring in Finance from the University of Louisville. Mr. Norris is a Chartered Financial Analyst and a member of the CFA Institute.

Clint Dudley, Portfolio Manager, Mortgage-Backed Securities. Mr. Dudley is a Portfolio Manager for Invesco Fixed Income and is responsible for the management of mortgage-backed securities in the long-term investment grade bond funds. Mr. Dudley joined Invesco Aim Advisors in 1998 as a Systems Analyst in the information technology department. Mr. Dudley was promoted to Money Market Portfolio Manager in 2000 and assumed his current duties in 2001. Mr. Dudley received a Bachelor of Business Administration and a Master of Business Administration from Baylor University. Mr. Dudley is a Chartered Financial Analyst.

David B. Lyle, Senior Analyst, Structured Securities. Mr. Lyle joined our Manager in June 2006 as a Structured Securities Analyst. He is responsible for evaluating and forming credit opinions of issuers, originators, servicers, insurance providers and other parties associated with a range of structured securities and related collateral. Mr. Lyle is also involved in the management of structured credit vehicles and the development and marketing of new investment products. Prior to joining Invesco, Mr. Lyle spent three years at Friedman Billings Ramsey where he was a Vice President in the Investment Banking ABS group. From 2001 to 2003, Mr. Lyle was an Analyst in the Mortgage Finance group at Wachovia Securities. Mr. Lyle graduated magna cum laude with a Bachelor of Engineering from Vanderbilt University.

Kevin M. Collins, Senior Analyst, Structured Securities. Mr. Collins joined our Manager in 2007 and is currently a Senior Analyst in the Structured Securities division. He is responsible for evaluating residential mortgage, commercial mortgage and asset-backed securities investments and determining views on issuers, originators, servicers, insurance providers, and other parties involved in the structured securities market. Additionally, Mr. Collins is involved in identifying new investment strategies and creating related product offerings for Invesco Fixed Income. Prior to joining Invesco, Mr. Collins raised capital for banks and specialty finance companies by originating and executing securitizations at Credit Suisse from 2004 to 2007. Mr. Collins began his career in the Structured Finance Advisory

Services practice at Ernst and Young LLP in 2002. Mr. Collins graduated magna cum laude with a Bachelor of Science in Accounting from Florida State University.

Table of Contents

Laurie F. Brignac, CFA, Senior Portfolio Manager, Cash Management. Ms. Brignac is a Senior Portfolio Manager for Invesco Fixed Income and is responsible for the management of all cash management products, including institutional, retail and offshore money funds, as well as private accounts. She joined Invesco Aim Advisors in 1992 as a Money Market Trader specializing in the repurchase agreement and time deposit markets. She was promoted to Investment Officer in 1994 and to Senior Portfolio Manager in 2002. Her duties have expanded to include all forms of short-term taxable fixed income securities, but her primary responsibility lies in the enhanced cash and short-term cash management area. Prior to joining Invesco Aim Advisors, Ms. Brignac was a Sales Assistant for HSBC Securities, Inc. She began her investment career as a Money Market Trader responsible for managing the Federal Reserve position at Premier Bank in Louisiana. Ms. Brignac received a Bachelor of Science in Accounting from Louisiana State University. Ms. Brignac is a Chartered Financial Analyst and a member of the Association for Investment Management and Research.

Lyman Missimer III, CFA, Chief Investment Officer, Cash Management, Senior Vice President of Invesco Aim Distributors, Inc., Assistant Vice President of Invesco Aim Advisors and Invesco Aim Capital Management, Inc. Mr. Missimer is responsible for directing the management of all cash management products including, institutional, retail, offshore money market funds, as well as enhanced cash and private accounts. Mr. Missimer has been in the investment business since 1980. He joined Invesco in 1995 as a Senior Portfolio Manager and the Head of the Money Market desk. Previously, he served as a Senior Portfolio Manager at Bank of America in Illinois, an Institutional Salesman at Wells Fargo Bank and a Senior Analyst in the Economics division at Continental Bank. Mr. Missimer received a Bachelor of Arts in Economics from Dartmouth College and a Master of Business Administration from The University of Chicago. He is a Chartered Financial Analyst.

Thomas Gerhardt, Portfolio Manager, Cash Management. Mr. Gerhardt is a Portfolio Manager for Invesco Fixed Income and is responsible for the management of all cash management products, including institutional, retail and offshore money funds, as well as private accounts. Mr. Gerhardt joined Invesco Aim Advisors in 1992 as a Portfolio Administrator specializing in the pricing of collateral for repurchase agreements and assisting in the day-to-day operations surrounding the money market funds. In 1999, he rejoined Invesco Aim Advisors after several years in the teaching profession. He joined Invesco Aim Advisors Cash Management Marketing team in 2002 as an Internal Wholesaler and he assumed his current position as Portfolio Manager in 2006. Mr. Gerhardt received a Bachelor of Arts in Communications from Trinity University and a Master of Business Administration from the University of St. Thomas.

Mark V. Matthews, Ph.D., Head of Global Process Management. Mr. Matthews joined Invesco's Quantitative Research group in September 2000. He is responsible for developing models and forecasting tools for fixed income markets. Mr. Matthews develops models and measurement algorithms for investment opportunity and performance, and works on quantitative product design, risk measurement, and performance attribution. Mr. Matthews began his career in 1991 as Assistant Professor of Applied Math at the Massachusetts Institute of Technology. From 1996 to 1999, he worked on security analytics for a financial software company. Immediately prior to joining Invesco, Mr. Matthews was a Quantitative Analyst in the Equity Trading group at Fidelity Investments. He became Director of Quantitative Research for Invesco in 2004. In 2007, he joined Invesco's Global Process Management team as Head of Research and Development and was named Head of Global Process Management in 2008. Mr. Matthews received a Bachelor of Arts from Harvard University, and a Masters of Science and Doctor of Philosophy in Statistics from Stanford University.

Aaron D. Kemp, Analyst, Structured Securities. Mr. Kemp joined our Manager in August 2009 as a Structured Securities Analyst. He is responsible for evaluating and forming credit opinions on residential mortgage investments and related collateral for Invesco Fixed Income. Prior to joining Invesco, Mr. Kemp spent three years at American Capital Ltd. where he was a Manager in the Debt Capital Markets group. From 2005 to 2006, Mr. Kemp was an Analyst in the Investment Banking ABS group at Friedman Billings Ramsey. Mr. Kemp graduated cum laude with a

Bachelor of Science in Finance from Virginia Polytechnic Institute and State University and magna cum laude with a Master of Business Administration from the University of Maryland. He is currently a Level III candidate in the Chartered Financial Analyst program.

Investment Committee

We have an investment committee comprised of our professionals, namely: Messrs. King, Anzalone, Kuster, Marshall and Missimer. For biographical information on the members of the investment committee, see Management Our Directors and Executive Officers Executive Officers, Management Our Directors and Executive Officers Other Key Personnel and Our Manager and the Management Agreement Executive Officers and Key Personnel of Our Manager. The role of the investment committee is to oversee our investment guidelines, our investment portfolio holdings and related compliance with our investment policies. In addition, our Manager has a separate investment committee that makes investment decisions for the Invesco PPIP Fund. The investment committee meets as frequently as it believes is necessary.

Management Agreement

We entered into a management agreement with our Manager pursuant to which it will provide for the day-to-day management of our operations. The management agreement requires our Manager to manage our business affairs in conformity with the investment guidelines and other policies that are approved and monitored by our board of directors. Our Manager's role as Manager is under the supervision and direction of our board of directors.

Management Services

Our Manager is responsible for (1) the selection, purchase and sale of our portfolio investments, (2) our financing activities, and (3) providing us with investment advisory services. Our Manager is responsible for our day-to-day operations and performs (or causes to be performed) such services and activities relating to our assets and operations as may be appropriate, which may include, without limitation, the following:

- (i) serving as our consultant with respect to the periodic review of the investment guidelines and other parameters for our investments, financing activities and operations, any modification to which will be approved by a majority of our independent directors;
- (ii) investigating, analyzing and selecting possible investment opportunities and acquiring, financing, retaining, selling, restructuring or disposing of investments consistent with the investment guidelines;
- (iii) with respect to prospective purchases, sales or exchanges of investments, conducting negotiations on our behalf with sellers, purchasers and brokers and, if applicable, their respective agents and representatives;
- (iv) negotiating and entering into, on our behalf, repurchase agreements, interest rate swap agreements, agreements relating to borrowings under programs established by the U.S. government and other agreements and instruments required for us to conduct our business;
- (v) engaging and supervising, on our behalf and at our expense, independent contractors that provide investment banking, securities brokerage, mortgage brokerage, other financial services, due diligence services, underwriting review services, legal and accounting services, and all other services (including transfer agent and registrar services) as may be required relating to our operations or investments (or potential investments);
- (vi) advising us on, preparing, negotiating and entering into, on our behalf, applications and agreements relating to programs established by the U.S. government;
- (vii) coordinating and managing operations of any joint venture or co-investment interests held by us and conducting all matters with the joint venture or co-investment partners;

(viii) providing executive and administrative personnel, office space and office services required in rendering services to us;

(ix) administering the day-to-day operations and performing and supervising the performance of such other administrative functions necessary to our management as may be agreed upon by our Manager and our board of directors, including, without limitation, the collection of revenues and the payment of

Table of Contents

our debts and obligations and maintenance of appropriate computer services to perform such administrative functions;

(x) communicating on our behalf with the holders of any of our equity or debt securities as required to satisfy the reporting and other requirements of any governmental bodies or agencies or trading markets and to maintain effective relations with such holders;

(xi) counseling us in connection with policy decisions to be made by our board of directors;

(xii) evaluating and recommending to our board of directors hedging strategies and engaging in hedging activities on our behalf, consistent with such strategies as so modified from time to time, with our qualification as a REIT and with our investment guidelines;

(xiii) counseling us regarding the maintenance of our qualification as a REIT and monitoring compliance with the various REIT qualification tests and other rules set out in the Internal Revenue Code and Treasury Regulations thereunder and using commercially reasonable efforts to cause us to qualify for taxation as a REIT;

(xiv) counseling us regarding the maintenance of our exemption from the status of an investment company required to register under the 1940 Act, monitoring compliance with the requirements for maintaining such exemption and using commercially reasonable efforts to cause us to maintain such exemption from such status;

(xv) furnishing reports and statistical and economic research to us regarding our activities and services performed for us by our Manager;

(xvi) monitoring the operating performance of our investments and providing periodic reports with respect thereto to the board of directors, including comparative information with respect to such operating performance and budgeted or projected operating results;

(xvii) investing and reinvesting any moneys and securities of ours (including investing in short-term investments pending investment in other investments, payment of fees, costs and expenses, or payments of dividends or distributions to our shareholders and partners) and advising us as to our capital structure and capital raising;

(xviii) causing us to retain qualified accountants and legal counsel, as applicable, to assist in developing appropriate accounting procedures and systems, internal controls and other compliance procedures and testing systems with respect to financial reporting obligations and compliance with the provisions of the Internal Revenue Code applicable to REITs and, if applicable, TRSs, and to conduct quarterly compliance reviews with respect thereto;

(xix) assisting us in qualifying to do business in all applicable jurisdictions and to obtain and maintain all appropriate licenses;

(xx) assisting us in complying with all regulatory requirements applicable to us in respect of our business activities, including preparing or causing to be prepared all financial statements required under applicable regulations and contractual undertakings and all reports and documents, if any, required under the Exchange Act, the Securities Act, or by the NYSE;

(xxi) assisting us in taking all necessary action to enable us to make required tax filings and reports, including soliciting shareholders for required information to the extent required by the provisions of the Internal Revenue Code applicable to REITs;

(xxii) placing, or arranging for the placement of, all orders pursuant to our Manager's investment determinations for us either directly with the issuer or with a broker or dealer (including any affiliated broker or dealer);

(xxiii) handling and resolving all claims, disputes or controversies (including all litigation, arbitration, settlement or other proceedings or negotiations) in which we may be involved or to which we may

Table of Contents

be subject arising out of our day-to-day operations (other than with our Manager or its affiliates), subject to such limitations or parameters as may be imposed from time to time by the board of directors;

(xxiv) using commercially reasonable efforts to cause expenses incurred by us or on our behalf to be commercially reasonable or commercially customary and within any budgeted parameters or expense guidelines set by the board of directors from time to time;

(xxv) advising us with respect to and structuring long-term financing vehicles for our portfolio of assets, and offering and selling securities publicly or privately in connection with any such structured financing;

(xxvi) forming the investment committee, which will propose investment guidelines to be approved by a majority of our independent directors;

(xxvii) serving as our consultant with respect to decisions regarding any of our financings, hedging activities or borrowings undertaken by us including (1) assisting us in developing criteria for debt and equity financing that is specifically tailored to our investment objectives, and (2) advising us with respect to obtaining appropriate financing for our investments;

(xxviii) providing us with portfolio management;

(xxix) arranging marketing materials, advertising, industry group activities (such as conference participations and industry organization memberships) and other promotional efforts designed to promote our business;

(xxx) performing such other services as may be required from time to time for management and other activities relating to our assets and business as our board of directors shall reasonably request or our Manager shall deem appropriate under the particular circumstances; and

(xxxii) using commercially reasonable efforts to cause us to comply with all applicable laws.

Liability and Indemnification

Pursuant to the management agreement, our Manager does not assume any responsibility other than to render the services called for thereunder and is not responsible for any action of our board of directors in following or declining to follow its advice or recommendations. Our Manager maintains a contractual as opposed to a fiduciary relationship with us. Under the terms of the management agreement, our Manager, its officers, shareholders, members, managers, partners, directors and personnel, any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager will not be liable to us, any subsidiary of ours, our directors, our shareholders or any subsidiary's shareholders or partners for acts or omissions performed in accordance with and pursuant to the management agreement, except because of acts constituting bad faith, willful misconduct, gross negligence, or reckless disregard of their duties under the management agreement, as determined by a final non-appealable order of a court of competent jurisdiction. We have agreed to indemnify our Manager, its officers, shareholders, members, managers, directors and personnel, any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of our Manager not constituting bad faith, willful misconduct, gross negligence, or reckless disregard of duties, performed in good faith in accordance with and pursuant to the management agreement. Our Manager has agreed to indemnify us, our directors, officers, personnel and agents and any persons controlling or controlled by us with respect to all expenses, losses, damages, liabilities, demands, charges and claims arising from acts of our Manager constituting bad faith, willful misconduct, gross negligence or reckless disregard of its duties under the management agreement or any claims by our Manager's personnel relating to the terms and conditions of

their employment by our Manager. Our Manager will not be liable for trade errors that may result from ordinary negligence, such as errors in the investment decision making process (such as a transaction that was effected in violation of our investment guidelines) or in the trade process (such as a buy order that was entered instead of a sell order, or the wrong purchase or sale of security, or a transaction in which a security was purchased or sold in an amount or at a price other than the correct amount

Table of Contents

or price). Notwithstanding the foregoing, our Manager carries errors and omissions and other customary insurance.

Management Team

Pursuant to the terms of the management agreement, our Manager is required to provide us with our management team, including a Chief Executive Officer, a Chief Financial Officer, a Chief Investment Officer, a Head of Research and a Portfolio Manager and appropriate support personnel, to provide the management services to be provided by our Manager to us. With the exception of the Chief Financial Officer, none of the officers or employees of our Manager are dedicated exclusively to us.

Our Manager is required to refrain from any action that, in its sole judgment made in good faith, (1) is not in compliance with the investment guidelines, (2) would adversely and materially affect our status as a REIT under the Internal Revenue Code or our status as an entity intended to be exempted or excluded from investment company status under the 1940 Act or (3) would violate any law, rule or regulation of any governmental body or agency having jurisdiction over us or that would otherwise not be permitted by our charter or bylaws. If our Manager is ordered to take any action by our board of directors, our Manager will promptly notify the board of directors if it is our Manager's judgment that such action would adversely and materially affect such status or violate any such law, rule or regulation or our charter or bylaws. Our Manager, its directors, members, officers, shareholders, managers, personnel and employees and any person controlling or controlled by our Manager and any person providing sub-advisory services to our Manager will not be liable to us, our board of directors or our shareholders, partners or members, for any act or omission by our Manager or its directors, officers, shareholders or employees except as provided in the management agreement.

Term and Termination

The management agreement may be amended or modified by agreement between us and our Manager. The initial term of the management agreement expires on the second anniversary of the closing of our IPO, or July 1, 2011, and will be automatically renewed for a one-year term each anniversary date thereafter unless previously terminated as described below. Our independent directors will review our Manager's performance and the management fees annually and, following the initial term, the management agreement may be terminated annually upon the affirmative vote of at least two-thirds of our independent directors, based upon (1) unsatisfactory performance that is materially detrimental to us or (2) our determination that the management fees payable to our Manager are not fair, subject to our Manager's right to prevent such termination due to unfair fees by accepting a reduction of management fees agreed to by at least two-thirds of our independent directors. We must provide 180 days prior notice of any such termination. Unless terminated for cause, our Manager will be paid a termination fee equal to three times the sum of the average annual management fee during the 24-month period immediately preceding such termination, calculated as of the end of the most recently completed fiscal quarter before the date of termination.

We may also terminate the management agreement at any time, including during the initial term, without the payment of any termination fee, with 30 days prior written notice from our board of directors for cause, which is defined as:

our Manager's continued material breach of any provision of the management agreement following a period of 30 days after written notice thereof (or 45 days after written notice of such breach if our Manager, under certain circumstances, has taken steps to cure such breach within 30 days of the written notice);

our Manager's fraud, misappropriation of funds, or embezzlement against us;

our Manager's gross negligence of duties under the management agreement;

the occurrence of certain events with respect to the bankruptcy or insolvency of our Manager, including an order for relief in an involuntary bankruptcy case or our Manager authorizing or filing a voluntary bankruptcy petition;

Table of Contents

our Manager is convicted (including a plea of nolo contendere) of a felony; and

the dissolution of our Manager.

Our Manager may assign the agreement in its entirety or delegate certain of its duties under the management agreement to any of Invesco's affiliates without the approval of our independent directors if such assignment or delegation does not require our approval under the 1940 Act.

Our Manager may terminate the management agreement if we become required to register as an investment company under the 1940 Act, with such termination deemed to occur immediately before such event, in which case we would not be required to pay a termination fee. Our Manager may decline to renew the management agreement by providing us with 180 days written notice, in which case we would not be required to pay a termination fee. In addition, if we default in the performance of any material term of the agreement and the default continues for a period of 30 days after written notice to us, our Manager may terminate the management agreement upon 60 days' written notice. If the management agreement is terminated by our Manager upon our breach, we would be required to pay our Manager the termination fee described above.

We may not assign our rights or responsibilities under the management agreement without the prior written consent of our Manager, except in the case of assignment to another REIT or other organization which is our successor, in which case such successor organization will be bound under the management agreement and by the terms of such assignment in the same manner as we are bound under the management agreement.

Management Fees and Expense Reimbursements

We do not maintain an office or directly employ personnel. Instead we rely on the facilities and resources of our Manager to manage our day-to-day operations.

Management Fee

We pay our Manager a management fee in an amount equal to 1.50% of our shareholders' equity, per annum, calculated and payable quarterly in arrears. For purposes of calculating the management fee, our shareholders' equity means the sum of the net proceeds from all issuances of our equity securities since inception (allocated on a pro rata daily basis for such issuances during the fiscal quarter of any such issuance), plus our retained earnings at the end of the most recently completed calendar quarter (without taking into account any non-cash equity compensation expense incurred in current or prior periods), less any amount that we pay to repurchase our common stock since inception, and excluding any unrealized gains, losses or other items that do not affect realized net income (regardless of whether such items are included in other comprehensive income or loss, or in net income). This amount is adjusted to exclude one-time events pursuant to changes in GAAP, and certain non-cash items after discussions between our Manager and our independent directors and approved by a majority of our independent directors. Our shareholders' equity, for purposes of calculating the management fee, could be greater or less than the amount of shareholders' equity shown on our financial statements. We treat outstanding limited partner interests (not held by us) as outstanding shares of capital stock for purposes of calculating the management fee. Our Manager uses the proceeds from its management fee in part to pay compensation to its officers and personnel who, notwithstanding that certain of them also are our officers, receive no cash compensation directly from us. The management fee is payable independent of the performance of our portfolio. In our management agreement, our Manager has agreed to reduce the management fee payable in respect of any equity investment we may decide to make in any legacy securities or legacy loan PPIF if managed by our Manager or any of its affiliates. However, our Manager's management fee will not be reduced in respect of any equity investment we may decide to make in a legacy securities or legacy loan PPIF managed by an entity other than our

Manager or any of its affiliates. Because we pay our Manager a management fee pursuant to the management agreement, we do not pay any management or investment fees with respect to our investment in the Invesco PPIP Fund managed by our Manager. Our Manager waives all such fees.

Table of Contents

The management fee of our Manager shall be calculated within 30 days after the end of each quarter and such calculation shall be promptly delivered to us. We are obligated to pay the management fee in cash within five business days after delivery to us of the written statement of our Manager setting forth the computation of the management fee for such quarter.

Although there is no current intention to do so, as a component of our Manager's compensation, we may in the future issue to personnel of our Manager stock-based compensation under our equity incentive plan.

Since July 1, 2009, the date on which we entered into the management agreement with our Manager, we have paid \$0.8 million in management fees.

Reimbursement of Expenses

We are required to reimburse our Manager for the expenses described below. Expense reimbursements to our Manager are made in cash on a quarterly basis following the end of each quarter. Our reimbursement obligation is not subject to any dollar limitation. Because our Manager's personnel perform certain legal, accounting, due diligence tasks and other services that outside professionals or outside consultants otherwise would perform, our Manager is paid or reimbursed for the documented cost of performing such tasks, provided that such costs and reimbursements are in amounts which are no greater than those which would be payable to outside professionals or consultants engaged to perform such services pursuant to agreements negotiated on an arm's-length basis.

We also pay all operating expenses, except those specifically required to be borne by our Manager under the management agreement. The expenses required to be paid by us include, but are not limited to:

expenses in connection with the issuance and transaction costs incident to the acquisition, disposition and financing of our investments;

costs of legal, tax, accounting, consulting, auditing, administrative and other similar services rendered for us by providers retained by our Manager or, if provided by our Manager's personnel, in amounts which are no greater than those which would be payable to outside professionals or consultants engaged to perform such services pursuant to agreements negotiated on an arm's-length basis;

the compensation and expenses of our directors and the cost of liability insurance to indemnify our directors and officers;

costs associated with the establishment and maintenance of any of our credit or other indebtedness of ours (including commitment fees, accounting fees, legal fees, closing and other similar costs) or any of our securities offerings;

expenses connected with communications to holders of our securities or of our subsidiaries and other bookkeeping and clerical work necessary in maintaining relations with holders of such securities and in complying with the continuous reporting and other requirements of governmental bodies or agencies, including, without limitation, all costs of preparing and filing required reports with the SEC, the costs payable by us to any transfer agent and registrar in connection with the listing and/or trading of our stock on any exchange, the fees payable by us to any such exchange in connection with its listing, costs of preparing, printing and mailing our annual report to our shareholders and proxy materials with respect to any meeting of our shareholders;

costs associated with any computer software or hardware, electronic equipment or purchased information technology services from third-party vendors that is used for us;

expenses incurred by managers, officers, personnel and agents of our Manager for travel on our behalf and other out-of-pocket expenses incurred by managers, officers, personnel and agents of our Manager in connection with the purchase, financing, refinancing, sale or other disposition of an investment or establishment and maintenance of any of our repurchase agreements or any of our securities offerings;

costs and expenses incurred with respect to market information systems and publications, research publications and materials, and settlement, clearing and custodial fees and expenses;

Table of Contents

compensation and expenses of our custodian and transfer agent, if any;

the costs of maintaining compliance with all federal, state and local rules and regulations or any other regulatory agency;

all taxes and license fees;

all insurance costs incurred in connection with the operation of our business except for the costs attributable to the insurance that our Manager elects to carry for itself and its personnel;

costs and expenses incurred in contracting with third parties, including affiliates of our Manager, for the servicing and special servicing of our assets;

all other costs and expenses relating to our business and investment operations, including, without limitation, the costs and expenses of acquiring, owning, protecting, maintaining, developing and disposing of investments, including appraisal, reporting, audit and legal fees;

expenses relating to any office(s) or office facilities, including but not limited to disaster backup recovery sites and facilities, maintained for us or our investments separate from the office or offices of our Manager;

expenses connected with the payments of interest, dividends or other distributions in cash or any other form authorized or caused to be made by the board of directors to or on account of holders of our securities or the securities of our subsidiaries, including, without limitation, in connection with any dividend reinvestment plan;

any judgment or settlement of pending or threatened proceedings (whether civil, criminal or otherwise) against us or any subsidiary, or against any trustee, director, partner, member or officer of us or of any subsidiary in his capacity as such for which we or any subsidiary is required to indemnify such trustee, director, partner, member or officer by any court or governmental agency; and

all other expenses actually incurred by our Manager (except as described below) which are reasonably necessary for the performance by our Manager of its duties and functions under the management agreement.

We do not reimburse our Manager for the salaries and other compensation of its personnel, except, we reimburse our Manager for our Chief Financial Officer's compensation. The compensation of our Chief Financial Officer is competitive with other similarly situated public REITs. See Management Executive and Director Compensation Executive Compensation.

In addition, we are required to pay our pro rata portion of rent, telephone, utilities, office furniture, equipment, machinery and other office, internal and overhead expenses of our Manager and its affiliates required for our operations.

Grants of Equity Compensation to Our Manager, Its Personnel and Its Affiliates

Under our equity incentive plan, our compensation committee is authorized to approve grants of equity-based awards to, among others, directors, officers, our Manager and personnel of our Manager and its affiliates. See Equity Incentive Plan for a detailed description of our equity incentive plan. We grant shares of restricted stock to each non-executive director as part of his compensation. See Management Director Compensation Compensation of Non-executive Directors for a detailed explanation of our non-executive director compensation. Future equity awards

may be made to our officers and to our Manager and its personnel and affiliates under our equity incentive plan. See Management Equity Incentive Plan.

Table of Contents**PRINCIPAL SHAREHOLDERS**

As of December 18, 2009, there were 8,886,300 shares of common stock outstanding and approximately 3,751 shareholders. At that time, we had no other shares of capital stock outstanding. The following table sets forth certain information, prior to this offering as of January 11, 2010 regarding the ownership of each class of our capital stock by: each of our directors; each of our executive officers; each holder of 5% or more of each class of our capital stock; and all of our directors and executive officers as a group.

In accordance with SEC rules, each listed person's beneficial ownership includes: all shares the investor actually owns beneficially or of record; all shares over which the investor has or shares voting or dispositive control (such as in the capacity as a general partner of an investment fund); and all shares the investor has the right to acquire within 60 days (such as shares of restricted common stock that are currently vested or which are scheduled to vest within 60 days).

Unless otherwise indicated, all shares are owned directly, and the indicated person has sole voting and investment power. Except as indicated in the footnotes to the table below, the business address of the shareholders listed below is the address of our principal executive office, 1555 Peachtree Street, NE, Atlanta, Georgia 30309.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

On July 1, 2009 we entered into a management agreement with Invesco Advisers, Inc. (formerly Invesco Institutional (N.A.), Inc.), our Manager, pursuant to which our Manager provides the day-to-day management of our operations. The management agreement requires our Manager to manage our business affairs in conformity with the policies and the investment guidelines that are approved and monitored by our board of directors. The management agreement has an initial two-year term and will be renewed for one-year terms thereafter unless terminated by either us or our Manager. Our Manager is entitled to receive a termination fee from us, under certain circumstances. We are also obligated to reimburse certain expenses incurred by our Manager. Our Manager is entitled to receive from us a management fee. See [Our Manager and The Management Agreement](#) [Management Agreement](#).

Our executive officers are also employees of Invesco. As a result, the management agreement between us and our Manager and the terms of the limited partner interests provided therein were negotiated between related parties, and the terms, including fees and other amounts payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party. See [Management Conflicts of Interest](#) and [Risk Factors Risks Related to Our Relationship With Our Manager](#) There are conflicts of interest in our relationship with our Manager and Invesco, which could result in decisions that are not in the best interests of our shareholders.

Our management agreement provides us with access to our Manager's pipeline of assets and its personnel and experience in capital markets, credit analysis, debt structuring and risk and asset management, as well as assistance with corporate operations, legal and compliance functions and governance. However, our Chief Executive Officer, Chief Investment Officer, Chief Financial Officer and Secretary also serve as officers and employees of Invesco. As a result, the management agreement between us and our Manager was negotiated between related parties, and the terms, including fees and other payments payable, may not be as favorable to us as if it had been negotiated with an unaffiliated third party. See [Management Conflicts of Interest](#) and [Risk Factors Risks Related to Our Relationship With Our Manager](#) There are conflicts of interest in our relationship with our Manager and Invesco, which could result in decisions that are not in the best interests of our shareholders.

Related Party Transaction Policies

Our board of directors has adopted a written policy regarding the approval of any related person transaction, which is any transaction or series of transactions in which we or any of our subsidiaries is or are to be a participant, the amount involved exceeds \$120,000, and a related person (as defined under SEC rules) has a direct or indirect material interest. Under the policy, a related person must promptly disclose to our Secretary any related person transaction and all material facts about the transaction. Our Secretary will then assess and promptly communicate that information to the Audit Committee of our board of directors. Based on its consideration of all of the relevant facts and circumstances, this committee will decide whether or not to approve such transaction and will generally approve only those transactions that do not create a conflict of interest. If we become aware of an existing related person transaction that has not been pre-approved under this policy, the transaction will be referred to this committee which will evaluate all options available, including ratification, revision or termination of such transaction. Our policy requires any director who may be interested in a related person transaction to recuse himself or herself from any consideration of such related person transaction. See [Management Conflicts of Interest](#).

Restricted Common Stock and Other Equity-Based Awards

Our equity incentive plan provides for grants of share options, restricted shares of common stock, phantom shares, dividend equivalent rights and other equity-based awards up to an aggregate of 6% of the issued and outstanding

shares of our common stock (on a fully diluted basis) at the time of the award, subject to a ceiling of 40 million shares available for issuance under the plan.

Table of Contents

Ownership of Common Stock by Affiliates

Invesco, through our Manager, beneficially owns 0.85% of our outstanding common sto
