SAFE-HARBOR STATEMENT

This quarterly report contains forward-looking statements as defined under U.S. federal securities laws. These statements reflect management's current knowledge, assumptions, beliefs, estimates, and expectations and express management's current views of future performance, results, and trends and may be identified by their use of terms such as anticipate, believe, could, estimate, expect, intend, may, plan, predict, project, will, and other. Forward-looking statements are subject to a number of risks and uncertainties that could cause our actual results to materially differ from those described in the forward-looking statements. Such risks and uncertainties include those discussed in our filings with the Securities and Exchange Commission (including those described in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009, under the heading, "Risk Factors" and elsewhere in this report). Readers should not place undue reliance on forward-looking statements. Such statements are made as of the date of this quarterly report, and we undertake no obligation to update such statements after this date.

Table of Contents

WRIGHT MEDICAL GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

1. Summary of Significant Accounting Policies

Basis of Presentation. The unaudited condensed consolidated interim financial statements of Wright Medical Group, Inc. have been prepared in accordance with accounting principles generally accepted in the United States (U.S.) for interim financial information and the instructions to Quarterly Report on Form 10-Q and Rule 10-01 of Regulation S-X. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the U.S. have been condensed or omitted pursuant to these rules and regulations. Accordingly, these unaudited condensed consolidated interim financial statements should be read in conjunction with our consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2009, as filed with the U.S. Securities and Exchange Commission (SEC). In the opinion of management, these unaudited condensed consolidated interim financial statements reflect all adjustments necessary for a fair presentation of our interim financial results. All such adjustments are of a normal and recurring nature. The results of operations for any interim period are not indicative of results for the full fiscal year. The accompanying unaudited condensed consolidated interim financial statements include our accounts and those of our wholly-owned domestic and international subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation.

Marketable Securities. We have historically invested in treasury bills, government and agency bonds, and certificates of deposit with maturity dates of less than 12 months and certificates of deposit with maturity dates of six months or less. Beginning in the second quarter of 2010, we also invested in marketable securities with maturity dates greater than 12 months. Our investments in these marketable securities are classified as available-for-sale securities in accordance with Financial Accounting Standards Board (FASB) Accounting Standard Codification (ASC) Topic 320, *Investments - Debt and Equity Securities*. These securities are carried at their fair value, and all unrealized gains and losses are recorded within other comprehensive income. Marketable securities are classified as short-term for those expected to mature or be sold within twelve months and the remaining portion is classified as long-term.

Fair Value of Financial Instruments. The carrying values of cash and cash equivalents, accounts receivable, and accounts payable approximate the fair values of these financial instruments as of June 30, 2010 and December 31, 2009 due to their short maturities.

Effective January 1, 2008, we adopted the provisions of Statement of Financial Accounting Standards (SFAS) No. 157, *Fair Value Measurements* (SFAS 157), for financial assets and liabilities measured at fair value on a recurring basis. Effective January 1, 2009, we adopted the provisions of SFAS 157 for nonfinancial assets and liabilities measured at fair value on a recurring basis. SFAS 157 applies to all financial and nonfinancial assets and liabilities that are being measured and reported on a fair value basis, establishes a framework for measuring the fair value of assets and liabilities, and expands disclosures about fair value measurements. The adoption of SFAS 157 had no impact to our condensed consolidated interim financial statements. Effective July 1, 2009, this standard was incorporated into the FASB ASC Topic 820, *Fair Value Measurements and Disclosures* (FASB ASC 820). FASB ASC 820-10-50 requires fair value measurements be classified and disclosed in one of the following three categories:

Level 1: Financial instruments with unadjusted, quoted prices listed on active market exchanges.

Level 2: Financial instruments determined using prices for recently traded financial instruments with similar underlying terms as well as directly or indirectly observable inputs, such as interest rates and yield curves that are observable at commonly quoted intervals.

Level 3: Financial instruments that are not actively traded on a market exchange. This category includes situations where there is little, if any, market activity for the financial instrument. The prices are determined using significant unobservable inputs or valuation techniques.

As of June 30, 2010 and December 31, 2009, we had current available-for-sale marketable securities totaling \$60.1 million and \$86.8 million, respectively, consisting of investments in treasury bills, government and agency

bonds, and certificates of deposits, all of which are valued at fair value using a market approach. In addition, we had

4

(UNAUDITED)

noncurrent marketable securities totaling \$31.7 million as of June 30, 2010, consisting of investments in government, agency, and corporate bonds, all of which are valued at fair value using a market approach.

The following table summarizes the valuation of the Company's financial instruments (in thousands):

	Total	Quoted Prices in Active Markets (Level 1)	Prices with Other Observable Inputs (Level 2)	Prices with Unobservable Inputs (Level 3)

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(UNAUDITED)

2. Inventories

Inventories consist of the following (in thousands):

	June 30, 2010	December 31, 2009
Raw materials	\$ 8,089	\$ 8,606
Work-in-process	24,667	23,766
Finished goods	132,119	131,163
	\$ 164,875	\$ 163,535

3. Property, Plant and Equipment, Net

Property, plant and equipment consist of the following (in thousands):

	June 30, 2010	December 31, 2009
Property, plant and equipment, at cost	\$ 295,036	\$ 286,086
Less: Accumulated depreciation	(152,301)	(146,378)
	\$ 142,735	\$ 139,708

4. Long-Term Debt and Capital Lease Obligations

Long-term debt and capital lease obligations consist of the following (in thousands):

	June 30, 2010	December 31, 2009
Capital lease obligations	\$ 538	\$ 662
Convertible senior notes	200,000	200,000
	200,538	200,662
Less: current portion	(348)	(336)
	\$ 200,190	\$ 200,326

In November 2007, we issued \$200 million of Convertible Senior Notes due 2014. The notes will mature on December 1, 2014. The notes pay interest semiannually at an annual rate of 2.625% and are convertible into shares of our common stock at an initial conversion rate of 30.6279 shares per \$1,000 principal amount of the notes, which represents a conversion price of \$32.65 per share. The holder of the notes may convert at any time on or prior to the close of business on the business day immediately preceding the maturity date of notes. Beginning on December 6, 2011, we may redeem the notes, in whole or in part, at a redemption price equal to 100% of the principal amount of the notes, plus accrued and unpaid interest, if the closing price of our common stock has exceeded 140% of the conversion price for at least 20 days during any consecutive 30-day trading period. Additionally, if we experience a fundamental change event, as defined in the note agreement, the holders may require us to purchase for cash all or a

portion of the notes for 100% of the principal amount of the notes, plus accrued and unpaid interest. If upon a fundamental change event, a holder elects to convert its notes, we may, under certain circumstances, increase the conversion rate for the notes surrendered. The notes are unsecured obligations and are subordinated to all existing and future secured debt, our revolving credit facility, and all liabilities of our subsidiaries.

On June 30, 2010, we renewed our revolving credit facility. The revolving credit facility has availability of \$100 million, which can be increased by up to an additional \$50 million at our request and subject to the agreement of the lenders. We currently have no borrowings outstanding under the credit facility. Borrowings under the credit facility will bear interest at the sum of a base rate or Eurodollar rate plus an applicable margin that ranges from 0.25% to 2.50% depending on the type of loan and our consolidated leverage ratio, with a current annual base rate of 3.25% and a Eurodollar rate of 0.75% (6 month rate). The term of the credit facility extends through June 30, 2014.

(UNAUDITED)

5. Goodwill and Intangible Assets

Changes in the carrying amount of goodwill occurring during the six months ended June 30, 2010, are as follows (in thousands):

Goodwill at December 31, 2009	\$ 53,860
Goodwill from contingent consideration associated with acquisitions prior to 2010	160
Foreign currency translation	(1,215)
 Goodwill at June 30, 2010	 \$ 52,805

During the six months ended June 30, 2010, we made payments for contingent consideration of \$237,000 associated with the acquisition of the assets of Creative Medical Designs, Inc. and Rayhack LLC, which was accrued as of December 31, 2009, and \$1.8 million associated with the acquisition of the assets of Inbone Technologies, Inc., completed in 2008, of which \$1.7 million was accrued as of December 31, 2009.

The components of our identifiable intangible assets are as follows (in thousands):

	June 30, 2010		December 31, 2009	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Distribution channels	\$ 19,115	\$ 18,913	\$ 22,207	\$ 22,025
Completed technology	12,560	5,579	12,537	5,213
Licenses	7,365	4,090	7,245	3,777
Customer relationships	3,750	901	3,750	720
Trademarks	2,753	661	2,733	570
Other	2,569	1,277	2,620	1,060
	48,112	\$ 31,421	51,092	\$ 33,365
Less: Accumulated amortization	(31,421)		(33,365)	
Intangible assets, net	\$ 16,691		\$ 17,727	

Based on the intangible assets held at June 30, 2010, we expect to amortize approximately \$2.5 million for the full year of 2010, \$2.3 million in 2011, \$2.2 million in 2012, \$1.9 million in 2013, and \$1.7 million in 2014.

6. Stock-Based Compensation

Amounts recognized within the condensed consolidated financial statements are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Total cost of share-based payment plans	\$ 4,171	\$ 4,148	\$ 7,095	\$ 6,915
Amounts capitalized as inventory and intangible assets	(392)	(380)	(654)	(653)
Amortization of capitalized amounts	329	312	672	606
Charged against income before income taxes	4,108	4,080	7,113	6,868
Amount of related income tax benefit	(1,314)	(1,164)	(2,150)	(2,037)

Impact to net income	\$ 2,794	\$ 2,916	\$ 4,963	\$ 4,831
Impact to basic earnings per share	\$ 0.07	\$ 0.08	\$ 0.13	\$ 0.13
Impact to diluted earnings per share	\$ 0.07	\$ 0.08	\$ 0.13	\$ 0.13

In the six-month period ended June 30, 2010, we granted approximately 296,000 stock options, 509,000 non-vested shares of common stock, and 81,000 restricted stock units at weighted-average fair values of \$6.98, \$18.35 and \$18.25, respectively, which will be recognized on a straight line basis over the requisite service period of four years. Of the 296,000 stock options granted in the six-month period ended June 30, 2010, 65,000 were granted as an

Table of Contents

WRIGHT MEDICAL GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(UNAUDITED)

inducement grant. As of June 30, 2010, we had approximately 4.0 million stock options (of which approximately 3.0 million were exercisable), 1.3 million non-vested shares of common stock, 29,000 stock-settled phantom stock units, and 119,000 restricted stock units outstanding.

As of June 30, 2010, we had \$26.7 million of total unrecognized compensation cost related to unvested stock-based compensation arrangements granted to employees, which is expected to be recognized over a weighted-average period of 2.8 years.

7. Earnings Per Share

FASB ASC Topic 260, *Earnings Per Share*, requires the presentation of basic and diluted earnings per share. Basic earnings per share is calculated based on the weighted-average number of shares of common stock outstanding during the period. Diluted earnings per share is calculated to include any dilutive effect of our common stock equivalents. Our common stock equivalents consist of stock options, non-vested shares of common stock, stock-settled phantom stock units, restricted stock units, and convertible debt. The dilutive effect of the stock options, non-vested shares of common stock, stock-settled phantom stock units, and restricted stock units is calculated using the treasury-stock method. The dilutive effect of convertible debt is calculated by applying the if-converted method. This assumes an add-back of interest, net of income taxes, to net income as if the securities were converted at the beginning of the period. During the three-month and six-month periods ending June 30, 2010 and 2009, the convertible debt had an anti-dilutive effect on earnings per share and we therefore excluded it from the dilutive shares calculation. The weighted-average number of shares outstanding for basic and diluted earnings per share is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Weighted-average number of shares outstanding, basic	37,764	37,332	37,652	37,281
Common stock equivalents	196	72	232	81
Weighted-average number of shares outstanding, diluted	37,960	37,404	37,884	37,362

The following potential common shares were excluded from the computation of diluted earnings per share as their effect would have been anti-dilutive (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Stock options	3,850	4,151	3,850	4,133
Non-vested shares, restricted stock units, and stock-settled phantom stock units	663	1,153	735	1,106
Convertible debt	6,126	6,126	6,126	6,126

8. Other Comprehensive Income

The difference between our net income and our comprehensive income (loss) is attributable to foreign currency translation, unrealized gains and losses on our available-for-sale marketable securities, and adjustments related to our minimum pension liability in Japan. The following table provides a reconciliation of net income to comprehensive income (loss) (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Net income	\$ 4,847	\$ 2,427	\$ 4,322	\$ 5,744
Changes in foreign currency translation	(4,244)	4,005	(7,162)	802
Unrealized gain (loss) on marketable securities	45	(115)	91	(355)
Minimum pension liability adjustment	4	4	8	8
Comprehensive income (loss)	\$ 652	\$ 6,321	\$ (2,741)	\$ 6,199

9. Restructuring**Toulon, France**

In June 2007, we announced plans to close our manufacturing, distribution, and administrative facility located in Toulon, France. The facility's closure affected approximately 130 Toulon-based employees. The majority of our restructuring activities were complete by the end of 2007, with production now conducted solely in our existing manufacturing facility in Arlington, Tennessee, and distribution activities being carried out from our European headquarters in Amsterdam, the Netherlands.

Management estimates that the pre-tax restructuring charges will total approximately \$28 million to \$30 million. These charges consist of the following estimates:

\$14 million for severance and other termination benefits;

\$3 million of non-cash asset impairments of property, plant and equipment;

\$2 million of inventory write-offs and manufacturing period costs;

\$3 million to \$4 million of external legal and professional fees; and

\$6 million to \$7 million of other cash and non-cash charges (including employee litigation).

Charges associated with the restructuring are presented in the following table. All of the following amounts were recognized within Restructuring charges in our consolidated statement of operations, with the exception of the inventory write-offs and manufacturing period costs, which were recognized within Cost of sales restructuring.

	Three	Six Months	Cumulative

Restructuring liability at June 30, 2010	\$ 4,206

In connection with the closure of our Toulon, France facility, 103 of our former employees have filed claims to challenge the economic justification for their dismissal. To date, we have received judgments for 86 of those claims, the substantial majority of which were unfavorable to us. All of these judgments have been appealed by both parties, and an appellate hearing has been scheduled for September 2010. Management has estimated the probable liability upon the ultimate resolution of these 103 claims to be \$4.1 million, and has therefore recorded this amount as a liability within Accrued expenses and other current liabilities in our consolidated balance sheet as of June 30, 2010.

Creteil, France

In October 2009, we announced plans to close our distribution and finance support office in Creteil, France, in order to migrate all relevant French distribution and support functions into our European organization based out of our European headquarters in Amsterdam, the Netherlands.

Management estimated that the pre-tax restructuring charges would total approximately \$3 million to \$4 million, consisting of the following estimates:

\$1.0 million to \$1.5 million for severance and other termination benefits;

\$1.0 million to \$1.5 million for contract termination charges;

\$0.5 million of external legal and professional fees; and

\$0.5 million of other restructuring related costs.

As of June 30, 2010, we have concluded our restructuring efforts, incurring a total of \$2.8 million of charges. Charges associated with the restructuring are presented in the following table. All of the following amounts were recognized within Restructuring charges in our consolidated statement of operations.

10. Commitments and Contingencies

In 2000, Howmedica Osteonics Corp. (Howmedica), a subsidiary of Stryker Corporation, filed a lawsuit against us in the United States District Court for the District of New Jersey (District Court) alleging that we infringed Howmedica's U.S. Patent No. 5,824,100 related to our ADVANCE® knee product line. The lawsuit sought an order of infringement, injunctive relief, unspecified damages, and various other costs and relief and could have impacted a substantial portion of our knee product line. In May 2010, we entered into a settlement agreement with Howmedica. As a result of the settlement agreement, we are entitled to continue to sell our ADVANCE® knee product line without any current or future monetary payments to Howmedica. We had not established a reserve for the litigation. Therefore, the settlement resulted in no impact to our consolidated financial position or results of operations.

In December 2007, we received a subpoena from the U.S. Department of Justice (DOJ) through the U.S. Attorney for the District of New Jersey requesting documents for the period January 1998 through the present related to any consulting and professional service agreements with orthopaedic surgeons in connection with hip or knee joint replacement procedures or products. This subpoena was served shortly after several of our knee and hip competitors agreed to resolutions with the DOJ after being subjects of investigation involving the same subject matter. We are cooperating fully with the DOJ's investigation. The conclusion of the investigation could result in our being subject to additional government oversight and sanctions requiring the payment of criminal fines, civil fines, and/or settlement amounts. We are currently in discussions with the DOJ and the Office of Inspector General (OIG) as to a potential resolution of this matter. Management believes that it is probable that a settlement will be reached and will, among other things, include a monetary payment of approximately \$8 million. We have recorded a contingent liability for this amount within Accrued expenses and other current liabilities in our consolidated balance sheet. There can be no assurance that we will enter into a consensual resolution of this matter with the DOJ or OIG, or what the terms of any

such resolution might be.

As previously reported, one of our insurers reserved the right to pursue payment from us for up to approximately \$10.5 million paid by the insurer for the settlements of 33 product liability lawsuits in West Virginia during 2009.

During the second quarter of 2010, we reached a settlement with this insurer for \$2.5 million, for which we recorded a provision in our results of operations for the three months ended June 30, 2010. This provision was primarily offset by favorable results of other litigation finalized during this same period that were individually immaterial.

As of June 30, 2010, the trade receivable balance due from our stocking distributor in Turkey was \$9.7 million, of which a significant portion is past due. We have a reserve of \$5.6 million against this balance as of June 30, 2010. It is possible that the future realization of this accounts receivable balance could be less than the remaining unreserved balance of \$4.1 million.

Table of Contents

**WRIGHT MEDICAL GROUP, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)
(UNAUDITED)**

We were involved in separate disputes in Italy with a former agent and two former employees. In June 2010, we entered into favorable settlement agreements with these individuals for individually immaterial amounts. In addition to those noted above, we are subject to various other legal proceedings, product liability claims, and other matters which arise in the ordinary course of business. In the opinion of management, the amount of liability, if any, with respect to these matters, will not materially affect our consolidated results of operations or financial position.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.****General**

The following management's discussion and analysis of financial condition and results of operations describes the principal factors affecting the results of our operations, financial condition, and changes in financial condition for the three- and six-month periods ended June 30, 2010. This discussion should be read in conjunction with the accompanying unaudited financial statements, our Annual Report on Form 10-K for the year ended December 31, 2009, which includes additional information about our critical accounting policies and practices and risk factors, and Item 1A of Part II of this report, which updates those risk factors.

Executive Overview

Company Description. We are a global orthopaedic medical device company specializing in the design, manufacture, and marketing of devices and biologic products for extremity, hip, and knee repair and reconstruction. Extremity hardware includes implants and other devices to replace or reconstruct injured or diseased joints and bones of the foot, ankle, hand, wrist, elbow, and shoulder, which we generally refer to as either foot and ankle or upper extremity products. We are a leading provider of surgical solutions for the foot and ankle market. Reconstructive devices are used to replace or repair knee, hip, and other joints and bones that have deteriorated or been damaged through disease or injury. Biologics are used to repair or replace damaged or diseased bone, to stimulate bone growth and to provide other biological solutions for surgeons and their patients. Within these markets, we focus on the higher-growth sectors of the orthopaedic industry, such as foot and ankle and upper extremity markets, as well as on the integration of our biologic products into reconstructive procedures and other orthopaedic applications. Our extensive foot and ankle product portfolio, our over 150 specialized foot and ankle sales representatives, and our increasing level of training of extremities-focused surgeons has resulted in our being a recognized leader in the foot and ankle market. We have been in business for over 50 years and have built a well-known and respected brand name and strong relationships with orthopaedic surgeons and surgical podiatrists.

Principal Products. We primarily sell devices and biologic products for extremity, hip, and knee repair and reconstruction. We specialize in extremity and biologic products used by extremity focused surgeon specialists for the reconstruction, trauma, and arthroscopy markets. Our biologics sales encompass a broad portfolio of products designed to stimulate and augment the natural regenerative capabilities of the human body. We also sell orthopaedic products not considered to be part of our knee, hip, extremity, or biologic product lines.

Significant Quarterly Business Developments. Net sales increased 7% in the second quarter of 2010 to \$127.7 million, compared to net sales of \$118.9 million in the second quarter of 2009. In the second quarter of 2010, we recorded net income of \$4.8 million, compared to net income of \$2.4 million for the second quarter of 2009, primarily as a result of decreased expenses relating to ongoing governmental inquiries, decreased amortization expense, and leveraging of other operating expenses.

Our second quarter domestic sales increased 5% in 2010, primarily due to 13% growth within our extremity line. Our domestic extremities growth is primarily attributable to higher sales volume of our foot and ankle products, in particular our INBONE products, our ORTHOLOC Polyaxial Locked Plating System, launched in September 2009, and our DARCO® plating systems. Domestic sales of our hip products increased by 2% in the second quarter of 2010 as compared to the same period in 2009, while both our domestic knee sales and domestic biologic sales increased by less than 1%.

Our international sales increased 12% to \$51.3 million in the second quarter of 2010, compared to \$45.8 million in the second quarter of 2009. This increase in sales in the second quarter of 2010 compared to 2009 is primarily the result of increased sales in Europe, Japan, and Australia.

Opportunities and Challenges. Our results of operations can be substantially affected not only by global economic conditions, but also by local operating and economic conditions, which can vary substantially by market. Unfavorable conditions can depress sales in a given market and may result in actions that adversely affect our margins, constrain our operating flexibility, or result in charges which are unusual or non-recurring. The global economy negatively impacted industry growth rates in both domestic and international markets beginning in 2009, and we are unable to predict when these markets will return to historical rates of growth.

In our domestic markets, we expect that an expansion of our focused foot and ankle sales force and new product offerings will continue to favorably impact our extremities and biologics businesses in the remainder of 2010. We also expect that our domestic hip and knee business will grow at the market growth rates in 2010.

Table of Contents

During 2010, we expect positive impact from our increased presence in Australia and the annualization of the lower levels of revenues from our international stocking distributor business. Given these expectations, we anticipate moderate levels of sales growth in our international business. This, however, could be impacted by foreign currency translation due to strengthening of the U.S. dollar as compared with currencies such as the euro.

Significant Industry Factors. Our industry is affected by numerous competitive, regulatory, and other significant factors. The growth of our business relies on our ability to continue to develop new products and innovative technologies, obtain regulatory clearance and compliance for our products, protect the proprietary technology of our products and our manufacturing processes, manufacture our products cost-effectively, respond to competitive pressures specific to each of our geographic markets, including our ability to enforce non-compete agreements, and successfully market and distribute our products in a profitable manner. We, and the entire industry, are subject to extensive governmental regulation, primarily by the United States Food and Drug Administration (FDA). Failure to comply with regulatory requirements could have a material adverse effect on our business. Additionally, our industry is highly competitive and has recently experienced increased pricing pressures, specifically in the areas of reconstructive joint devices. We devote significant resources to assessing and analyzing competitive, regulatory, and economic risks and opportunities.

In December 2007, we received a subpoena from the U.S. Department of Justice (DOJ) through the U.S. Attorney for the District of New Jersey requesting documents for the period January 1998 through the present related to any consulting and professional service agreements with orthopaedic surgeons in connection with hip or knee joint replacement procedures or products. This subpoena was served shortly after several of our knee and hip competitors agreed to resolutions with the DOJ after being subjects of investigation involving the same subject matter. We are cooperating fully with the DOJ's investigation. The conclusion of the investigation could result in our being subject to additional government oversight and sanctions requiring the payment of criminal fines, civil fines, and/or settlement amounts. We are currently in discussions with the DOJ and the Office of Inspector General (OIG) as to a potential resolution of this matter. Management believes that it is probable that a settlement will be reached and will include a monetary payment of approximately \$8 million, and we recognized a contingent liability for this amount during the first quarter of 2010. There can be no assurance that we will enter into a consensual resolution of this matter with the DOJ or OIG, or what the terms of any such resolution might be.

In June 2008, we received a letter from the U.S. Securities and Exchange Commission (SEC) informing us that it was conducting an informal investigation regarding potential violations of the Foreign Corrupt Practices Act in the sale of medical devices in a number of foreign countries by companies in the medical device industry. In March 2010, we were advised by the SEC's Division of Enforcement that the investigation has been completed as to us and that the SEC does not intend to recommend any enforcement action.

In March 2010, the U.S. Congress adopted and President Obama signed into law comprehensive health care reform legislation through the passage of the Patient Protection and Affordable Health Care Act (H.R. 3590) and the Health Care and Education Reconciliation Act (H.R. 4872). Among other initiatives, these bills impose a 2.3% excise tax on domestic sales of medical devices following December 31, 2012.

A detailed discussion of these risks and other factors is provided in Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2009, and elsewhere in this report.

Table of Contents**Results of Operations****Comparison of three months ended June 30, 2010 to three months ended June 30, 2009**

The following table sets forth, for the periods indicated, our results of operations expressed as dollar amounts (in thousands) and as percentages of net sales:

Table of Contents

The following table sets forth our net sales by product line for the periods indicated (in thousands) and the percentage of year-over-year change:

	Three Months Ended June 30,		
	2010	2009	% Change
Hip products	\$ 44,177	\$ 41,061	7.6%
Knee products	31,775	30,225	5.1%
Extremity products	29,509	25,629	15.1%
Biologics products	19,838	19,464	1.9%
Other	2,435	2,547	(4.4%)
Total net sales	\$ 127,734	\$ 118,926	7.4%

The following graphs illustrate our product line net sales as a percentage of total net sales for the three months ended June 30, 2010 and 2009:

Product Line Sales as a Percentage of Total Net Sales**2010****2009**

Net Sales. Overall, our net sales increased 7% in the second quarter of 2010 compared to the second quarter of 2009. We experienced continued growth in our extremity product line, which increased 15% over prior year, as well as growth of 8%, 5%, and 2% in our hip, knee and biologic product lines, respectively. Geographically, our domestic net sales totaled \$76.5 million in the second quarter of 2010 and \$73.1 million in the second quarter of 2009, representing 60% and 62% of total net sales, respectively, and growth of 5% in 2010 compared to 2009. Our international net sales totaled \$51.3 million in the second quarter of 2010, compared to \$45.8 million in the second quarter of 2009, representing growth of 12%. This increase is primarily a result of increased sales in Europe, Japan, and Australia. Our hip product net sales totaled \$44.2 million during the second quarter of 2010, representing an 8% increase over the prior year. Our domestic hip sales increased 2% over prior year primarily due to increased average selling prices due to mix shifts to higher priced products. Internationally, hip sales increased 13% over prior year primarily due to increased sales in Europe and Japan. Our knee product net sales increased 5% to \$31.8 million in the second quarter of 2010 from \$30.2 million during the same period in 2009. Domestically, knee sales increased 1% over the prior year due to increased unit sales. International knee sales increased 11% due to higher levels of sales in Europe.

Table of Contents

Our extremity product line net sales increased to \$29.5 million in the second quarter of 2010, representing growth of 15% over the second quarter of 2009. Domestically, extremity product sales increased 13% over the second quarter of 2009, as higher levels of sales of our foot and ankle products were partially offset by declines in certain of our upper extremity products. Our international extremity sales increased 25% compared to the same period in 2009 primarily due to increased sales by our new subsidiary in Australia.

Net sales of our biologics products totaled \$19.8 million in the second quarter of 2010, representing growth of 2% over the second quarter of 2009. In the U.S., our biologics sales increased 1% in 2010, primarily due to sales of our PRO-STIM Osteoinductive Bone Graft Substitute that was launched in September 2009. This increase was partially offset by continued declines of our GRAFTJACKET® tissue repair and containment membranes and ALLOMATRIX® line of injectable tissue-based bone graft substitutes. Our international biologics sales increase of 10% in the second quarter of 2010, as compared to the same period in 2009, is primarily attributable to increased sales in Australia and Asia.

Cost of Sales. Our cost of sales as a percentage of net sales increased from 30.9% in the second quarter of 2009 to 31.3% in the second quarter of 2010, primarily due to unfavorable geographic mix, as higher-margin domestic sales have decreased as a percentage of total sales. This was partially offset by lower levels of excess and obsolete inventory provisions. Our cost of sales included 0.3 percentage points of non-cash, stock-based compensation expense in both 2010 and 2009. Our cost of sales and corresponding gross profit percentages can be expected to fluctuate in future periods depending upon changes in our product sales mix and prices, distribution channels and geographies, manufacturing yields, period expenses, levels of production volume, cost of raw materials, and currency exchange rates.

Selling, General and Administrative. Our selling, general and administrative expenses as a percentage of net sales totaled 53.1% in the second quarter of 2010, a 2.2 percentage point decrease from 55.3% in the second quarter of 2009. Selling, general and administrative expense for the second quarter of 2010 included \$3.2 million of non-cash, stock based compensation expense (2.5% of net sales) and \$606,000 of costs associated with U.S. government inquiries (0.5% of net sales). During the second quarter of 2009, selling, general and administrative expense included \$3.2 million of non-cash, stock based compensation expense (2.7% of net sales) and \$2.0 million of costs, primarily legal fees, associated with U.S. government inquiries (1.7% of net sales). The decrease in selling, general and administrative expenses as a percentage of sales during the second quarter of 2010 is primarily the result of lower levels of expenses associated with U.S. government inquiries, savings realized from our restructuring efforts, and cost savings initiatives, partially offset by higher levels of spending on compliance and cash incentive compensation. We anticipate that our selling, general and administrative expenses will increase in absolute dollars to the extent that additional growth in net sales results in increases in sales commissions and royalty expense associated with those sales and requires us to expand our infrastructure. Further, in the near term, we anticipate that these expenses may increase as a percentage of net sales as we make strategic investments in order to grow our business, as we continue to incur expenses associated with the DOJ investigation, and as our spending related to the global compliance requirements of our industry increases.

Research and Development. Our investment in research and development activities represented approximately 7.7% of net sales in the second quarter of 2010, as compared to 7.6% of net sales in the second quarter of 2009. Our research and development expenses include approximately \$0.6 million (0.5% of net sales) of non-cash, stock-based compensation expense in both the second quarter of 2010 and 2009.

We anticipate that our research and development expenditures may increase as a percentage of net sales and will increase in absolute dollars as we continue to increase our investment in product development initiatives and clinical studies to support regulatory approvals and provide expanded proof of the efficacy of our products.

Amortization of Intangible Assets. Charges associated with the amortization of intangible assets in the second quarter of 2010 decreased compared to the same period in 2009 from 1.1% of net sales to 0.5% of net sales as a significant amount of our intangible assets became fully amortized at the end of 2009. Based on the intangible assets held as of June 30, 2010, we expect to recognize amortization expense of approximately \$2.5 million for the full year of 2010, \$2.3 million in 2011, \$2.2 million in 2012, \$1.9 million in 2013, and \$1.7 million in 2014.

Interest Expense, Net. Interest expense, net, consists of interest expense of \$1.6 million during both the second quarter of 2010 and 2009, primarily from borrowings under our Convertible Senior Notes due 2014 issued in

17

Table of Contents

November 2007, offset by interest income of \$103,000 and \$340,000 during the second quarter of 2010 and 2009, respectively, generated by our invested cash balances and investments in marketable securities.

The amounts of interest income we realize in 2010 and beyond are subject to variability, dependent upon both the rate of invested returns we realize and the amount of excess cash balances on hand.

Provision for Income Taxes. We recorded tax provisions of \$3.0 million and \$1.6 million in the second quarter of 2010 and 2009, respectively. During the second quarter of 2010, our effective tax rate was approximately 38.0% as compared to 40.2% in the second quarter of 2009.

Comparison of six months ended June 30, 2010 to six months ended June 30, 2009

The following table sets forth, for the periods indicated, our results of operations expressed as dollar amounts (in thousands) and as percentages of net sales:

	Six Months Ended June 30,

Table of Contents

The following table sets forth our net sales by product line for the periods indicated (in thousands) and the percentage of year-over-year change:

	Six Months Ended June 30,		
	2010	2009	% Change
Hip products	\$ 90,462	\$ 82,975	9.0%
Knee products	64,193	60,613	5.9%
Extremity products	59,613	51,570	15.6%
Biologics products	39,630	39,235	1.0%
Other	5,080	5,445	(6.7%)
Total net sales	\$ 258,978	\$ 239,838	8.0%

The following graphs illustrate our product line net sales as a percentage of total net sales for the six months ended June 30, 2010 and 2009:

Product Line Sales as a Percentage of Total Net Sales**2010****2009**

Net Sales. Net sales totaled \$259.0 million during the first six months of 2010, representing a 8% increase over the first six months in the prior year. The increase in net sales is primarily attributable to 16% growth over prior year in our extremity product line, 9% growth in our hip product line and a favorable currency impact of \$2.4 million. Specifically, the increase in our extremities product line can be attributed to increased domestic sales in our foot and ankle products, including sales of our DARCO® plating systems, the continued success of our CHARLOTTE Foot and Ankle system, sales of our INBONE products, and sales of ORTHOLOCPolyaxial Locked Plating System launched in September 2009.

In the first six months of 2010, domestic net sales increased by 5% over the first six months of 2009 to \$154.2 million, or 59.5% of total net sales. International sales totaled \$104.8 million, including the aforementioned favorable currency impact of \$2.4 million, representing an increase of 14% over the first six months in the prior year. This increase is attributable to growth in Europe, Japan, and Australia, as well as the favorable currency impact.

Cost of Sales. Our cost of sales as a percentage of net sales decreased from 31.2% in the first six months of 2009 to 30.9% in the first six months of 2010. This decrease is primarily attributable to lower levels of provisions for excess and obsolete inventory and a favorable currency impact, which were partially offset by unfavorable geographic mix.

Operating Expenses. As a percentage of net sales, our operating expenses were 64.1% in both the first six months of 2010 and 2009. Increased expenses relating to the expansion of our foot and ankle sales force and investments in

Table of Contents

product development initiatives and clinical studies during the first half of 2010 were offset by decreased amortization expense.

Provision for Income Taxes. We recorded tax provisions of \$5.5 million and \$3.4 million in the first six months of 2010 and 2009, respectively. During the first six months of 2010, our effective tax rate was approximately 55.9% as compared to 37.3% in the first six months of 2009. This increase is primarily attributable to an unfavorable 16.7 percentage point impact due to the discrete tax effect of the \$8.0 million charge to record management's estimate of the monetary payment for the potential settlement of the ongoing DOJ investigation. Additionally, the U.S. Federal Research and Development tax credit expired effective January 1, 2010, and our tax provision during the first half of 2009 included a favorable impact due to the tax effect of expenses related to U.S. governmental inquiries.

Seasonal Nature of Business

We traditionally experience lower sales volumes in the third quarter than throughout the rest of the year as many of our products are used in elective procedures, which generally decline during the summer months, typically resulting in selling, general and administrative expenses and research and development expenses as a percentage of sales that are higher during this period than throughout the rest of the year. In addition, our first quarter selling, general and administrative expenses include additional expenses that we incur in connection with the annual meeting held by the American Academy of Orthopaedic Surgeons. This meeting, which is the largest orthopaedic meeting in the world, features the presentation of scientific papers and instructional courses for orthopaedic surgeons. During this three-day event, we display our most recent and innovative products to these surgeons.

Restructuring**Toulon, France**

In 2007, we announced our plans to close our facilities in Toulon, France. This announcement came after a thorough evaluation in which it was determined that we had excess manufacturing capacity and redundant distribution and administrative resources that would be best eliminated through the closure of this facility. The majority of our restructuring activities were complete by the end of 2007, with production now conducted in our existing manufacturing facility in Arlington, Tennessee, and distribution activities being carried out from our European headquarters in Amsterdam, the Netherlands. We have estimated that total pre-tax restructuring charges will be approximately \$28 million to \$30 million, of which we have recognized \$27.4 million through June 30, 2010. We anticipate that the remaining restructuring expenses will not have a material impact on our results of operations in the period incurred, or on our financial condition or liquidity in future periods. We began realizing the benefits from this restructuring within selling, general and administrative expenses in 2008. While we began realizing the benefits from this restructuring within cost of sales in 2009, unfavorable currency exchange rates and increased raw material and other manufacturing costs offset some of those benefits. See Note 9 to our condensed consolidated financial statements for further discussion of our restructuring charges

Creteil, France

In October 2009, we announced our plans to close our distribution and finance support office in Creteil, France, to migrate all relevant French distribution and support functions into our European organization based out of our European headquarters in Amsterdam, the Netherlands. Direct sales in France will continue and will be serviced by independent sales agents. We estimated that total pre-tax restructuring charges would be approximately \$3 million to \$4 million. We have recognized a total of \$2.8 million through June 30, 2010, and have completed our restructuring activities in Creteil, France. We began realizing the benefits of this restructuring within selling, general, and administrative expenses in the second quarter of 2010 and have realized an improvement in working capital. See Note 9 to our condensed consolidated financial statements for further discussion of our restructuring charges.

Table of Contents**Liquidity and Capital Resources**

The following table sets forth, for the periods indicated, certain liquidity measures (in thousands):

	As of June 30, 2010	As of December 31, 2009
Cash and cash equivalents	\$ 99,320	\$ 84,409
Short-term marketable securities	60,082	86,819
Long-term marketable securities	31,653	
Working capital	393,230	421,647
Line of credit availability	100,000	100,000

During the second quarter of 2010, we began investing in long-term marketable securities with maturity dates ranging from 14 to 24 months, consisting of investments in government, agency, and corporate bonds. As of June 30, 2010, the weighted average maturity for these investments is 18.8 months.

Operating Activities. Cash provided by operating activities was \$46.7 million for the first six months of 2010, as compared to \$34.0 million for the first six months of 2009. The increase in operating cash flow is primarily attributable to favorable changes in working capital for accrued expenses, most of which was due to timing.

Investing Activities. Our capital expenditures totaled approximately \$22.4 million and \$19.1 million in the first six months of 2010 and 2009, respectively. The increase is attributable to increased spending on manufacturing equipment in anticipation of product launches. Our industry is capital intensive, particularly as it relates to surgical instrumentation. Historically, our capital expenditures have consisted of purchased manufacturing equipment, research and testing equipment, computer systems, office furniture and equipment, and surgical instruments. We expect to incur capital expenditures of approximately \$46 million in 2010 for routine capital expenditures, and approximately \$8 million for the continued expansion of facilities in Arlington, Tennessee.

Financing Activities. During the first six months of 2010, cash used in financing activities totaled \$87,000 compared to the first six months of 2009 when cash used in financing activities totaled \$61,000.

On June 30, 2010, we renewed our revolving credit facility. The revolving credit facility has availability of \$100 million, which can be increased by up to an additional \$50 million at our request and subject to the agreement of the lenders. We currently have no borrowings outstanding under the credit facility. Borrowings under the credit facility will bear interest at the sum of a base rate or a Eurodollar rate plus an applicable margin that ranges from 0.25% to 2.50% depending on the type of loan and our consolidated leverage ratio, with a current annual base rate of 3.25% and a Eurodollar rate of 0.75% (6 month rate). The term of the credit facility extends through June 30, 2014. The payment of our indebtedness under the new credit facility is secured by pledges of 100% of the capital stock of our U.S. subsidiaries and 65% of the capital stock of our foreign subsidiaries, and is guaranteed by our U.S. subsidiaries. The new credit agreement contains customary financial and non-financial covenants. Upon the occurrence of an event of default, the lenders may declare that all principal, interest and other amounts owed are immediately due and payable and may exercise any other available right or remedy. The events of default include, but are not limited to, non-payment of amounts owed, failure to perform covenants, breach of representations and warranties, institution of insolvency proceedings, entry of certain judgments, and occurrence of a change in control. The term of the new credit facility extends through June 30, 2014.

During 2007, we issued \$200 million of Convertible Senior Notes due 2014, which generated net proceeds of \$193.5 million. The notes pay interest semiannually at an annual rate of 2.625%. The notes are convertible into shares of our common stock at an initial conversion rate of 30.6279 shares per \$1,000 principal amount of the notes, which represents a conversion price of \$32.65 per share. We will make scheduled interest payments in 2010 related to the notes totaling \$5.3 million.

Table of Contents

Other Liquidity Information

We have funded our cash needs since 2000 through various equity and debt issuances and through cash flow from operations. In 2007, we issued \$200 million of Convertible Senior Notes due 2014, which generated net proceeds totaling \$193.5 million.

Although it is difficult for us to predict our future liquidity requirements, we believe that our current cash and cash equivalents balance of \$99.3 million, our marketable securities balances totaling \$91.7 million, our existing available credit line of \$100 million, and our expected cash flow from our 2010 operations will be sufficient for the foreseeable future to fund our working capital requirements and operations, permit anticipated capital expenditures in 2010 of approximately \$54 million, and meet our contractual cash obligations in 2010.

Critical Accounting Policies and Estimates

Information on judgments related to our most critical accounting policies and estimates is discussed in Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2009. Certain of our more critical accounting estimates require the application of significant judgment by management in selecting the appropriate assumptions in determining the estimate. By their nature, these judgments are subject to an inherent degree of uncertainty. We develop these judgments based on our historical experience, terms of existing contracts, our observance of trends in the industry, information provided by our customers, and information available from other outside sources, as appropriate. Actual results may differ from these judgments under different assumptions or conditions. Different, reasonable estimates could have been used for the current period. Additionally, changes in accounting estimates are reasonably likely to occur from period to period. Both of these factors could have a material impact on the presentation of our financial condition, changes in financial condition or results of operations. All of our significant accounting policies are more fully described in Note 2 to our consolidated financial statements set forth in our Annual Report on Form 10-K for the year ended December 31, 2009. There have been no significant modifications to the policies related to our critical accounting estimates since December 31, 2009.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Foreign Currency Exchange Rate Risk

Fluctuations in the rate of exchange between the U.S. dollar and foreign currencies could adversely affect our financial results. Approximately 28% of our total net sales were denominated in foreign currencies during the three months ended June 30, 2010 and for the year ended December 31, 2009, and we expect that foreign currencies will continue to represent a similarly significant percentage of our net sales in the future. Cost of sales related to these sales are primarily denominated in U.S. dollars; however, operating costs related to these sales are largely denominated in the same respective currencies, thereby partially limiting our transaction risk exposure. For sales not denominated in U.S. dollars, an increase in the rate at which a foreign currency is exchanged for U.S. dollars will require more of the foreign currency to equal a specified amount of U.S. dollars than before the rate increase. In such cases, if we price our products in the foreign currency, we will receive less in U.S. dollars than we did before the rate increase went into effect. If we price our products in U.S. dollars and our competitors price their products in local currency, an increase in the relative strength of the U.S. dollar could result in our prices not being competitive in a market where business is transacted in the local currency.

A substantial majority of our sales denominated in foreign currencies are derived from European Union countries, which are denominated in the euro; from Japan, which are denominated in the Japanese yen; and from the United Kingdom, which are denominated in the British pound; and from Canada, which are denominated in the Canadian dollar. Additionally, we have significant intercompany receivables from our foreign subsidiaries which are denominated in foreign currencies, principally the euro, the yen, the British pound, and the Canadian dollar. Our principal exchange rate risk, therefore, exists between the U.S. dollar and the euro, the U.S. dollar and the yen, the U.S. dollar and the British pound, and the U.S. dollar and the Canadian dollar. Fluctuations from the beginning to the end of any given reporting period result in the revaluation of our foreign currency-denominated intercompany receivables and payables, generating currency translation gains or losses that impact our non-operating income and expense levels in the respective period.

As discussed in Note 2 to our consolidated financial statements set forth in our Annual Report on Form 10-K for the year ended December 31, 2009, we enter into certain short-term derivative financial instruments in the form of foreign currency forward contracts. These forward contracts are designed to mitigate our exposure to currency fluctuations in our intercompany balances principally denominated in euros, Japanese yen, British pounds, and Canadian dollars. Any change in the fair value of these forward contracts as a result of a fluctuation in a currency exchange rate is expected to be offset by a change in the value of the intercompany balance. These contracts are effectively closed at the end of each reporting period.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES.

Disclosure Controls and Procedures

We have established disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934. Our disclosure controls and procedures are designed to ensure that material information relating to us, including our consolidated subsidiaries, is made known to our principal executive officer and principal financial officer by others within our organization. Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our disclosure controls and procedures as of June 30, 2010 to ensure that the information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our principal executive officer and principal financial officer as appropriate, to allow timely decisions regarding required disclosure. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of June 30, 2010.

Changes in Internal Control Over Financial Reporting

During the three months June 30, 2010, there were no significant changes in our internal control over financial reporting that materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

Not applicable.

ITEM 1A. RISK FACTORS.

Our business could be significantly and adversely impacted if certain types of healthcare reform programs are adopted and other legislative proposals are enacted into law.

In March 2010, the U.S. Congress adopted and President Obama signed into law comprehensive health care reform legislation through the passage of the Patient Protection and Affordable Health Care Act (H.R. 3590) and the Health Care and Education Reconciliation Act (H.R. 4872). Among other initiatives, these bills impose a 2.3% excise tax on domestic sales of medical devices following December 31, 2012, which is estimated to contribute approximately \$27 billion to healthcare reform. Various healthcare reform proposals have also emerged at the state level. Outside of the excise tax, which will impact results of operations following December 31, 2012, we cannot predict with certainty what healthcare initiatives, if any, will be implemented at the state level, or what the ultimate effect of federal health care reform or any future legislation or regulation will have on us. However, an expansion in government's role in the U.S. healthcare industry may lower reimbursements for our products, reduce medical procedure volumes, and adversely affect our business and results of operations, possibly materially.
