ITEM 1. SCHEDULE OF INVESTMENTS.

The Schedule(s) of Investment is attached herewith.

FLAHERTY & CRUMRINE/CLAYMORE TOTAL RETURN FUND

To the Shareholders of Flaherty & Crumrine/Claymore Total Return Fund:

## Edgar Filing: FLAHERTY & CRUMRINE/CLAYMORE TOTAL RETURN FUND INC - Form N-Q

During the first fiscal quarter of 2011, the total return on net asset value(1) of the Fund was +5.8%. Since the depth of the financial crisis, the Fund has delivered eight consecutive quarters of positive returns. We never tire of reporting positive returns, but our focus remains on providing high current income to shareholders.

Present conditions for the Fund's dividend are about as good as we can recall. Low short-term interest rates have continued to amplify the Fund's leverage strategy - we are able to borrow funds at historically attractive levels. At the same time, the investment portfolio is generating relatively high levels of income. We don't see anything on the immediate horizon to change these conditions, but one or both sides of the equation is likely to come under pressure sometime down the road.

As of this writing, the world is still dealing with the devastating events in Japan. Our thoughts go out to the people of Japan in these difficult times. Global financial markets were weaker in the immediate aftermath of the disaster, as investors assessed the impact. The Fund has very little direct exposure to the Japanese economy, and we do not anticipate any material decline in the credit quality of our holdings as a result of these events. Rest assured we are monitoring the impact very closely.

The situation at the Fukushima Dai-Ichi nuclear plant has raised fresh questions about nuclear power safety around the world. Since the Fund must have at least 25% of the portfolio invested in the utility industry, the topic is very relevant. We do not believe the incident in Japan will negatively impact utility positions owned by the Fund in any material way. In the U.S., most regulated utility companies have reduced their exposure to nuclear energy, and very few have "bet the farm" on this form of power generation.

The European sovereign debt situation continues to simmer. It may boil over in Portugal and require a bailout similar to those in Greece and Ireland. This may create some turbulence in the preferred market, but the overall impact on the Fund should be modest. The Fund has no direct investments in Portuguese banks or sovereign debt. Although it does own securities issued by companies with exposure to Portugal, we believe those exposures are manageable given the strength and diversification of those companies' activities.

Preferred securities issued by banks comprise the largest portion of the Fund's portfolio and, thus, play a critical role in the Fund's strategy. Bank regulators here and abroad have analyzed bank securities in light of the financial crisis, and some conclusions have begun to trickle out. The Basel Committee on Bank Supervision, the body charged with setting global capital standards, has finalized its recommendations for bank capital, although it will be up to regulators in individual countries to adopt these standards. Bank regulators in the U.S. have until July of this year to propose new capital rules, and we expect final rules will be issued before year-end. Over time, we expect the current crop of preferred securities issued by banks to be replaced with new securities designed to conform to the new standards. As details of the new securities become known, we will study them carefully and determine their appropriateness for the Fund. Based on the information currently available, we are optimistic about the transition.

-----  
(1) Following the methodology required by the SEC, total return includes income, principal change and the impact of the Fund's leverage.

We encourage you to visit the Fund's website [www.fcclaymore.com](http://www.fcclaymore.com) for a more in-depth discussion of conditions in the preferred markets, as well as the broader economy.

Sincerely,

/s/ Donald F. Crumrine

 NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. AGGREGATE INFORMATION FOR FEDERAL INCOME TAX PURPOSES

At February 28, 2011, the aggregate cost of securities for federal income tax purposes was \$262,928,716, the aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$26,693,942 and the aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$28,526,123.

2. ADDITIONAL ACCOUNTING STANDARDS

Fair Value Measurement: The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 - quoted prices in active markets for identical securities
- Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period. A summary of the inputs used to value the Fund's investments as of February 28, 2011 is as follows:

Flaherty & Crumrine/Claymore Total Return Fund Incorporated  
NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

The Fund's investments in Level 2 and Level 3 are based primarily on market information, where available. This includes, but is not limited to, prices provided by third-party providers, observable trading activity (including the recency, depth, and consistency of such information with quoted levels), and the depth and consistency of broker-quoted prices. In the event market information is not directly available, comparable information may be observed for securities that are similar in many respects to those being valued. The Fund may employ an income approach for certain securities that also takes into account credit risk, interest rate risk, and potential recovery prospects.

The following is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

|  | TOTAL       | PREFERRED SECURITIES |                    | CORPORATE DEBT |
