Table of Contents**NOTE 1 PRINCIPLES OF CONSOLIDATION**

The accompanying unaudited condensed consolidated financial statements of Green Bankshares, Inc. (the Company) and its wholly owned subsidiary, GreenBank (the Bank), have been prepared in accordance with accounting principles generally accepted in the United States of America for interim information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission (SEC). Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six months ended June 30, 2011 are not necessarily indicative of the results that may be expected for the year ending December 31, 2011. For further information, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010. Certain amounts from prior period financial statements have been reclassified to conform to the current year's presentation.

Table of Contents

NOTE 2 SECURITIES (Continued)

The Company reviews its investment portfolio on a quarterly basis judging each investment for other-than-temporary impairment (OTTI). Management does not have the intent to sell any of the temporarily impaired investments and believes it is more likely than not that the Company will not have to sell any such securities before a recovery of cost. The OTTI analysis focuses on the duration and amount a security is below book value and assesses a calculation for both a credit loss and a non-credit loss for each measured security considering the security s type, performance, underlying collateral, and any current or potential debt rating changes. The OTTI calculation for credit loss is reflected in the income statement while the non-credit loss is reflected in other comprehensive income (loss).

The Company holds a single issue trust preferred security issued by a privately held bank holding company. The bank holding company deferred its interest payments beginning in the second quarter of 2009, and we have placed the security on non-accrual. The Federal Reserve Bank of St. Louis entered into an agreement with the bank holding company on October 22, 2009 which was made public on October 30, 2009. Among other provisions of the regulatory agreement, the bank holding company must strengthen its management of operations, strengthen its credit risk management practices, and submit a capital plan. As of June 30, 2011 no other communications between the bank holding company and the Federal Reserve Bank of St. Louis have been made public. Our estimated fair value implies an unrealized loss of \$37, related primarily to illiquidity. The Company did not recognize other-than-temporary impairment on the security for the three and six months ended June 30, 2011. Cumulative other-than-temporary impairment recognized for this security is \$854.

The Company holds a private label class A21 collateralized mortgage obligation that was analyzed for the quarter ended June 30, 2011 with multiple stress scenarios using conservative assumptions for underlying collateral defaults, loss severity, and prepayments. The security s estimated fair value implies an unrealized loss of \$74, an improvement of \$30 compared to December 31, 2010. The Company did not recognize a write-down through non-interest income representing other-than-temporary impairment on the security for the three and six months ended June 30, 2011. Cumulative other-than-temporary impairment recognized for this security is \$197.

(Continued)

Table of Contents**NOTE 2 SECURITIES (Continued)**

The following table presents more detail on selective Company security holdings as of June 30, 2011. These details are listed separately due to the inherent level of risk for OTTI on these securities.

Description	Cusip#	Current Credit Rating	Book Value	Fair Value	Unrealized Loss
Collateralized mortgage obligations					
Wells Fargo 2007 - 4 A21	94985RAW2	Caa2	\$ 2,802	\$ 2,728	\$ (74)

Trust preferred securities

West Tennessee Bancshares, Inc.	956192AA6	N/A	675	638	(37)
---------------------------------	-----------	-----	-----	-----	------

The following table presents a roll-forward of the cumulative amount of credit losses on the Company's investment securities that have been recognized through earnings as of June 30, 2011 and 2010. There were no credit losses on the Company's investment securities recognized in earnings for the three and six months ended June 30, 2011.

	Six months ended 6/30/2011	Six months ended 6/30/2010
Beginning balance of credit losses at January 1, 2011 and 2010	\$ 1,069	\$ 976
Other-than-temporary impairment credit losses		93
Ending balance of cumulative credit losses recognized in earnings	\$ 1,069	\$ 1,069

The Bank manages the loan portfolio by assigning one of nine credit risk ratings based on an internal assessment of credit risk. The credit risk categories are prime, desirable, satisfactory I or pass, satisfactory II, acceptable with care, management watch, substandard, and loss.

Prime credit risk rating: Assets of this grade are the highest quality credits of the Bank. They exceed substantially all the Bank's underwriting criteria, and provide superior protection for the Bank through the paying capacity of the borrower and value of the collateral. The Bank's credit risk is considered to be negligible. Included in this section are well-established borrowers with significant, diversified sources of income and net worth, or borrowers with ready access to alternative financing and unquestioned ability to meet debt obligations as agreed. A loan secured by cash or other highly liquid collateral, where the Bank holds such collateral, may be assigned this grade.

(Continued)

Table of Contents**NOTE 3 LOANS (Continued)**

Desirable credit risk rating: Assets of this grade also exceed substantially all of the Bank's underwriting criteria; however, they may lack the consistent long-term performance of a Prime rated credit. The credit risk to the Bank is considered minimal on these assets. Paying capacity of the borrower is still very strong with favorable trends and the value of the collateral is considered more than adequate to protect the Bank. Unsecured loans to borrowers with above-average earnings, liquidity and capital may be assigned this grade.

Satisfactory I credit risk rating or pass credit rating: Assets of this grade conform to all of the Bank's underwriting criteria and evidence a below-average level of credit risk. Borrower's paying capacity is strong, with stable trends. If the borrower is a company, its earnings, liquidity and capitalization compare favorably to typical companies in its industry. The credit is well structured and serviced. Secondary sources of repayment are considered to be good. Payment history is good, and borrower consistently complies with all major covenants.

Satisfactory II credit risk rating: Assets of this grade conform to substantially all of the Bank's underwriting criteria and evidence an average level of credit risk. However, such assets display more susceptibility to economic, technological or political changes since they lack the above-average financial strength of credits rated Satisfactory Tier I. Borrower's repayment capacity is considered to be adequate. Credit is appropriately structured and serviced; payment history is satisfactory.

Acceptable with care credit risk rating: Assets of this grade conform to most of the Bank's underwriting criteria and evidence an acceptable, though higher than average, level of credit risk. However, these loans have certain risk characteristics that could adversely affect the borrower's ability to repay, given material adverse trends. Therefore, loans in this category require an above-average level of servicing or show more reliance on collateral and guaranties to preclude a loss to the Bank, should material adverse trends develop. If the borrower is a company, its earnings, liquidity and capitalization are slightly below average, when compared to its peers.

Management watch credit risk rating: Assets included in this category are currently protected but are potentially weak. These assets constitute an undue and unwarranted credit risk but do not presently expose the Bank to a sufficient degree of risk to warrant adverse classification. However, Management Watch assets do possess credit deficiencies deserving management's close attention. If not corrected, such weaknesses or deficiencies may expose the Bank to an increased risk of loss in the future. Management Watch loans represent assets where the Bank's ability to substantially affect the outcome has diminished to some degree, and thus it must closely monitor the situation to determine if and when a downgrade is warranted.

Substandard credit risk rating: Substandard assets are inadequately protected by the current net worth and financial capacity of the borrower or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified as Substandard.

Loss credit rating: These assets are considered uncollectible and of such little value that their continuance as assets is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off a basically worthless asset even though partial recovery may be affected in the future. Losses should be taken in the period in which they are identified as uncollectible.

A substantial portion of commercial real estate loans are secured by real estate in markets in which the Company is located. These loans are often restructured with interest reserves to fund interest costs during the construction and development period. Additionally, certain of these loans are structured with interest-only terms. A portion of the consumer mortgage and commercial real estate portfolios were originated through the permanent financing of construction, acquisition and development loans. The prolonged economic downturn has negatively impacted many borrower s and guarantors ability to make payments under the terms of the loans as their liquidity has been depleted. Accordingly, the ultimate collectability of a substantial portion of these loans and the recovery of a substantial portion of the carrying amount of other real estate owned are susceptible to changes in real estate values in these areas. Continued economic distress could negatively impact additional borrowers and guarantors ability to repay their debt which will make more of the Company s loans collateral dependent.

Prime	126	130
Subprime	167	107
Auto-Subprime	215	193
Other		
Total	131,549	143,707

Nonperforming loans were as follows:

	June 30, 2011	December 31, 2010
Loans past due 90 days still on accrual	\$ 408	\$ 2,112
Nonaccrual loans	131,549	143,707
Total	\$ 131,957	\$ 145,819

Nonperforming loans and impaired loans are defined differently. Nonperforming loans are loans that are 90 days past due and still accruing interest and nonaccrual loans. Impaired loans are loans that based upon current information and events it is considered probable that the Company will be unable to collect all amounts of contractual interest and principal as scheduled in the loan agreement. Some loans may be included in both categories, whereas other loans may only be included in one category.

Table of Contents

NOTE 3 LOANS (Continued)

The Company may elect to formally restructure a loan due to the weakening credit status of a borrower so that the restructuring may facilitate a repayment plan that minimizes the potential losses that the Company may have to otherwise incur. At June 30, 2011, the Company had \$44,580 of restructured loans of which \$23,183 was classified as non-accrual and the remaining were performing. The Company had taken charge-offs of \$3,181 on the restructured non-accrual loans as of June 30, 2011. At December 31, 2010, the Company had \$49,537 of restructured loans of which \$9,597 was classified as non-accrual and the remaining were performing. The Company had taken charge-offs of \$843 on the restructured non-accrual loans as of December 31, 2010.

The aggregate amount of loans to executive officers and directors of the Company and their related interests was approximately \$6,784 and \$7,848 at June 30, 2011 and December 31, 2010, respectively.

Table of Contents**NOTE 4 EARNINGS PER SHARE OF COMMON STOCK**

Basic earnings (loss) per share (EPS) of common stock is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings (loss) per share of common stock is computed by dividing net income available to common shareholders by the weighted average number of common shares and potential common shares outstanding during the period. Stock options, warrants and restricted common shares are regarded as potential common shares. Potential common shares are computed using the treasury stock method. For the three and six months ended June 30, 2011, 978,659 options and warrants are excluded from the effect of dilutive securities because they are anti-dilutive; 1,017,645 options are similarly excluded from the effect of dilutive securities for the three and six months ended June 30, 2010.

The following is a reconciliation of the numerators and denominators used in the basic and diluted earnings per share computations for the three and six months ended June 30, 2011 and 2010:

	Three Months Ended June 30,	
	2011	2010
Basic Earnings (loss) Per Share		
Net income (loss)	\$ (11,134)	\$ 2,811
Less: preferred stock dividends and accretion of discount on warrants	1,250	1,250
Net income (loss) available to common shareholders	\$ (12,384)	\$ 1,561
Weighted average common shares outstanding	13,126,923	13,097,611
Basic earnings (loss) per share available to common shareholders	\$ (0.94)	\$ 0.12
Diluted Earnings (loss) Per Share		
Net income (loss)	\$ (11,134)	\$ 2,811
Less: preferred stock dividends and accretion of discount on warrants	1,250	1,250
Net income (loss) available to common shareholders	\$ (12,384)	\$ 1,561
Weighted average common shares outstanding	13,126,923	13,097,611
Add: Dilutive effects of assumed conversions of restricted stock and exercises of stock options and warrants		60,520
Weighted average common and dilutive potential common shares outstanding	13,126,923	13,158,131

Table of Contents**NOTE 5 SEGMENT INFORMATION**

The Company's operating segments include banking, mortgage banking, consumer finance, automobile lending and title insurance. The reportable segments are determined by the products and services offered, and internal reporting. Loans, investments and deposits provide the revenues in the banking operation; loans and fees provide the revenues in consumer finance and mortgage banking and insurance commissions provide revenues for the title insurance company. Consumer finance, automobile lending and title insurance do not meet the quantitative threshold on an individual basis, and are therefore shown below in "Other Segments". Mortgage banking operations are included in "Bank". All operations are domestic.

Segment performance is evaluated using net interest income and non-interest income. Income taxes are allocated based on income before income taxes, and indirect expenses (includes management fees) are allocated based on time spent for each segment. Transactions among segments are made at fair value. Information reported internally for performance assessment follows.

Three months ended June 30, 2011	Bank	Other Segments	Holding Company	Eliminations	Totals

NOTE 6 FAIR VALUE DISCLOSURES

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Accounting principles generally accepted in the United States of America (GAAP), also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain U.S. Treasury, other U.S. Government and agency mortgage-backed debt securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2

Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S. Government and agency mortgage-backed debt securities, corporate debt securities, derivative contracts and residential mortgage loans held-for-sale.

Level 3

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private equity investments, retained residual interests in securitizations, residential mortgage servicing rights, and highly structured or long-term derivative contracts.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value.

Investment Securities Available-for-Sale

Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices of like or similar securities, if available and these securities are classified as Level 1 or Level 2. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions and are classified as Level 3.

Loans Held for Sale

Loans held for sale are carried at the lower of cost or market value. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies loans held for sale subjected to nonrecurring fair value adjustments as Level 2.

(Continued)

Table of Contents

NOTE 6 FAIR VALUE DISCLOSURES (continued)

Impaired Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with GAAP. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At June 30, 2011, substantially all of the total impaired loans were evaluated based on either the fair value of the collateral or its liquidation value. In accordance with GAAP, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Other Real Estate

Other real estate, consisting of properties obtained through foreclosure or in satisfaction of loans, is reported at fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs. At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the allowance for loan losses. Gains or losses on sale and any subsequent adjustments to the value are recorded as a component of foreclosed real estate expense. Other real estate is included in Level 3 of the valuation hierarchy.

Trust preferred securities		1,043	638	1,681	1,681
December 31, 2010					
Securities available for sale					
U.S. government agencies	\$	\$ 83,299	\$	\$ 83,299	\$ 83,299
States and political subdivisions		31,501		31,501	31,501
CMO Agency		64,182		64,182	64,182
CMO Non-Agency		3,393		3,393	3,393
Mortgage-backed securities		17,964		17,964	17,964
Trust preferred securities		1,025	638	1,663	1,663

Level 3 Valuations

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation.

Currently the Company has one trust preferred security that is considered Level 3. For more information on this security please refer to Note 2 Securities.

Table of Contents**NOTE 6 FAIR VALUE DISCLOSURES (continued)**

The following table shows a reconciliation of the beginning and ending balances for assets measured at fair value on a recurring basis using significant unobservable inputs.

	June 30, 2011	June 30, 2010
Beginning balance, January 1	\$ 638	\$ 638
Total gains or (loss) (realized/unrealized)		
Included in earnings		(75)
Included in other comprehensive income		11
Paydowns and maturities		
Transfers into Level 3		
Ending balance	\$ 638	\$ 574

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets measured at fair value on a nonrecurring basis are included in the table below.

Description	Fair Value Measurement Using			Total Carrying Amount in Balance Sheet	Assets/Liabilities Measured at Fair Value
	Level 1	Level 2	Level 3		
June 30, 2011					
Other real estate	\$	\$	\$ 76,690	\$ 76,690	\$ 76,690
Impaired loans			92,270	92,270	92,270
Total assets at fair value	\$	\$	\$ 168,960	\$ 168,960	\$ 168,960
December 31, 2010					
Other real estate	\$	\$	\$ 60,095	\$ 60,095	\$ 60,095
Impaired loans			129,088	129,088	129,088
Total assets at fair value	\$	\$	\$ 189,183	\$ 189,183	\$ 189,183

(Continued)

Table of Contents**NOTE 6 FAIR VALUE DISCLOSURES (Continued)**

The carrying value and estimated fair value of the Company's financial instruments are as follows at June 30, 2011 and December 31, 2010.

	June 30, 2011		December 31, 2010	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:				
Cash and cash equivalents	\$ 344,265	\$ 344,265	\$ 294,214	\$ 294,214
Securities available for sale	217,556	217,556	202,002	202,002
Securities held to maturity			465	467
Loans held for sale	617	624	1,299	1,317
Loans, net	1,497,775	1,481,977	1,678,548	1,664,126
FHLB and other stock	12,734	12,734	12,734	12,734
Cash surrender value of life insurance	32,040	32,040	31,479	31,479
Accrued interest receivable	6,830	6,830	7,845	7,845
Financial liabilities:				
Deposit accounts	\$ 1,883,388	\$ 1,905,599	\$ 1,976,854	\$ 1,987,105
Federal funds purchased and repurchase Agreements	18,713	18,713	19,413	19,413
FHLB Advances and notes payable	157,859	167,017	158,653	166,762
Subordinated debentures	88,662	60,552	88,662	64,817
Accrued interest payable	2,808	2,808	2,140	2,140

The following methods and assumptions were used to estimate the fair values for financial instruments that are not disclosed previously in this note. The carrying amount is considered to estimate fair value for cash and short-term instruments, demand deposits, liabilities for repurchase agreements, variable rate loans or deposits that repriced frequently and fully, and accrued interest receivable and payable. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, the fair value is estimated by discounted cash flow analysis using current market rates for the estimated life and credit risk. No adjustment has been made for illiquidity in the market on loans as there is no information from which to reasonably base this estimate. Liabilities for FHLB advances and notes payable are estimated using rates of debt with similar terms and remaining maturities. Fair values for subordinated debentures is estimated by discounting future cash flows using current market rates for similar non-investment grade and unrated instruments. The fair value of off-balance sheet items is based on the current fees or costs that would be charged to enter into or terminate such arrangements, which is not material. The fair value of commitments to sell loans is based on the difference between the interest rates at which the loans have been committed to sell and the quoted secondary market price for similar loans, which is not material.

(Continued)

Table of Contents**NOTE 7 CAPITAL**

The Company gave notice on November 9, 2010 to the U.S. Treasury Department that the Company was suspending the payment of regular quarterly cash dividends on the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A issued to the U.S. Treasury Department. The dividends, which are cumulative, will continue to be accrued for payment in the future and will be reported for the duration of the deferral period as a preferred dividend requirement that is deducted from net income for financial statement purposes. Additionally the Company, following consultation with the Federal Reserve Bank of Atlanta (FRB) has exercised its rights beginning in the fourth quarter of 2010 to defer regularly scheduled interest payments on all of its issues of junior subordinated debentures having an outstanding principal amount of \$88.7 million, relating to outstanding trust preferred securities (TRUPs). Under the terms of the trust documents associated with these debentures, the Company may defer payments of interest for up to 20 consecutive quarterly periods without default or penalty. The regular scheduled interest payments will continue to be accrued for payment in the future and reported as an expense for financial statement purposes. Together, the deferral of interest payments on TRUPs and suspension of dividend payments to the U.S. Treasury Department will preserve approximately \$5.1 million per year in Bank level capital; however, capital at the Company level is still reduced. The deferral also saves the same amount in liquidity at the Company level. The approximate amount of accrued but unpaid interest on subordinated debt and preferred stock dividend was \$4,669 as of June 30, 2011.

On May 2, 2011, the Bank received notice from the Federal Deposit Insurance Corporation (FDIC) and the Tennessee Department of Financial Institutions (TDFI) that, as a result of those agencies' findings in their most recently completed joint safety and soundness examination, the agencies would be seeking a formal enforcement action against the Bank aimed at strengthening the Bank's operations and its financial condition, and that accordingly, the FDIC was pursuing the issuance of a consent order against the Bank and the TDFI was pursuing the issuance of a written agreement against the Bank. The Company believes that the final terms of the order and written agreement will contain requirements similar to those that the Bank has already informally committed to comply with, including requirements to maintain the Bank's capital ratios above those levels required to be considered well-capitalized under federal banking regulations.

The Company's and the Bank's regulatory capital ratios as of June 30, 2011, and the minimum ratios required to be met under the federal statutory and regulatory guidelines as well as the minimum ratios the Bank has informally committed to its regulators that it will maintain are set forth below:

	Required Minimum Ratio	Required to be Well Capitalized	Required by Bank's Informal Commitment to Regulators	Bank	Company
Tier 1 risk-based capital	4.00%	6.00%	12.00%	11.97%	9.03%
Total risk-based capital	8.00%	10.00%	14.00%	13.25%	13.09%
Leverage Ratio	4.00%	5.00%	10.00%	8.47%	6.39%

NOTE 8 CONTINGENCIES

The Company and its subsidiaries are subject to claims and suits arising in the ordinary course of business. In the opinion of management, the ultimate resolution of these pending claims and legal proceedings will not have a material adverse effect on the Company's results of operations. No amounts for settlements are accrued as of June 30, 2011. The details of certain legal proceedings are outlined under Part II, Item 1 Legal Proceedings in this Form 10-Q.

NOTE 9 INVESTMENT AGREEMENT WITH NORTH AMERICAN FINANCIAL HOLDINGS, INC.

On May 5, 2011, the Company and the Bank entered into an Investment Agreement with North American Financial Holdings, Inc. (North American) pursuant to which North American has agreed to acquire approximately 120 million shares of the Company's common stock at a per share purchase price of \$1.81, for a total investment of approximately \$217 million. The transaction, which is subject to shareholder and regulatory approval, as well as the satisfaction of other customary closing conditions, is expected to be consummated in the third quarter of 2011. In connection with

the investment, the Company expects that North American will enter into a binding agreement with the U. S. Department of Treasury to purchase all of the outstanding shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A, and related warrants to purchase shares of the Company's Common Stock.

(Continued)

Table of Contents

In connection with the investment by North American, the Company's shareholders as of a record date to be fixed near the closing of that transaction will receive a contingent value right, entitling them to cash proceeds of up to \$0.75 per share of common stock based on the credit performance of the Bank's legacy loan portfolio over the five-year period following closing.

If an Acquisition Proposal (as defined in the Investment Agreement) is made to the Company or its subsidiaries and thereafter the Investment Agreement is terminated because (i) the required approvals of the Company's shareholders are not obtained; (ii) the Company breaches its obligations under the non-solicitation/exclusivity provisions; or (iii) the Company breaches a covenant of the Investment Agreement (and fails to cure such breach in the time allowed in the Investment Agreement) that causes the failure of a closing condition to be satisfied, then the Company will owe North American a \$750,000 expense reimbursement immediately and, if an alternative transaction is entered into within twelve (12) months of the termination of the deal, an \$8,000,000 termination fee at the time the agreement for the new transaction is entered into. If an Acquisition Proposal is made, and thereafter the Investment Agreement is terminated by North American because the Board of Directors has withdrawn its recommendation that the shareholders approve the transactions or recommended a competing transaction, a \$750,000 expense reimbursement would be payable immediately and \$4,000,000 of the termination fee would be payable immediately, with the remaining \$4,000,000 payable if the Company enters into an agreement for an alternative transaction within 12 months of the termination of the deal.

In addition, on May 5, 2011, the Company also entered into a Stock Option Agreement (the "Option Agreement") with North American, pursuant to which the Company granted an option (the "Option") to purchase up to 2,628,183 shares of Common Stock (not to exceed 19.9% of the issued and outstanding shares of the Company) at a price equal to the closing price on the first trading day following the date of the Investment Agreement (the "Option Price"). Pursuant to the Option Agreement, the Option will be exercisable under certain circumstances in connection with certain third party acquisitions or acquisition proposals that occur prior to an Exercise Termination Event.

An Exercise Termination Event means any of the following:

- completion of the North American's initial investment in the Company;
- termination of the Investment Agreement in accordance with its terms, before certain third party acquisitions or acquisition proposals, except a termination of the Investment Agreement by North American based on a breach by the Company of a representation, warranty, covenant or other agreement contained in the Investment Agreement (unless the breach is non-volitional) or a termination based on the Company breaching its obligations under the non-solicitation/exclusivity provisions of the Investment Agreement or based on the Board of Directors having withdrawn its recommendation that the Company's shareholders approve the transactions or recommended a competing transaction; or
- the passage of 18 months, subject to certain limited extensions described in the Option Agreement, after termination of the Investment Agreement, if the termination follows the occurrence of certain third party acquisitions or acquisition proposals or is a termination of the Investment Agreement by North American based on a breach by the Company of a representation, warranty, covenant or other agreement contained in the Investment Agreement (unless the breach is non-volitional) or a termination based on the Company breaching its obligations under the non-solicitation/exclusivity provisions of the Investment Agreement or based on the Board of Directors having withdrawn its recommendation that the Company's shareholders approve the transactions or recommended a competing transaction.

In addition, upon the occurrence of certain events relating to third party acquisitions, North American may require the Company to repurchase the Option at a price equal to either (i) the number of shares for which the Option may be exercised multiplied by the amount by which the Market/Offer Price (as that term is defined in the Option Agreement), exceeds the Option Price or (ii) \$2,500,000, adjusted in the case of clause (ii) for the aggregate purchase price previously paid by North American with respect to any option shares and gains on sales of stock purchased under the Option. In no event may North American's total profit with respect to the Option exceed \$8,000,000.

Subsequent to the announcement of North American's planned investment, four class action lawsuits were filed against the Company, the Company's directors and North American by certain of its shareholders. For additional detail regarding these lawsuits (including the settlement in principle that the parties have reached), see Part II, Item 1 Legal

Proceedings below.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis provides information that management believes is relevant to an assessment and understanding of the Company's consolidated results of operations and financial condition. This discussion should be read in conjunction with the (i) condensed consolidated financial statements and notes thereto in this Form 10-Q and (ii) the financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010 (the "2010 10-K"). Except for specific historical information, many of the matters discussed in this Form 10-Q may express or imply projections of revenues or expenditures, plans and objectives for future operations, growth or initiatives, expected future economic performance, or the expected outcome or impact of pending or threatened litigation. These and similar statements regarding events or results which the Company expects will or may occur in the future, are forward-looking statements that involve risks, uncertainties and other factors which may cause actual results and performance of the Company to differ materially from those expressed or implied by those statements. All forward-looking information is provided pursuant to the safe harbor established under the Private Securities Litigation Reform Act of 1995 and should be evaluated in the context of these risks, uncertainties and other factors. **Forward-looking statements, which are based on assumptions and estimates and describe our future plans, strategies and expectations, are generally identifiable by the use of forward-looking terminology and words such as trends, assumptions, target, guidance, outlook, opportunity, future, plans, projections, expectations, near-term, long-term, projection, may, will, would, could, expect, intend, believe, potential, regular, or continue (or the negative or other derivatives of each of these terms) or similar terminology and expressions.**

Although the Company believes that the assumptions underlying any forward-looking statements are reasonable, any of the assumptions could be inaccurate, and therefore, actual results may differ materially from those projected in or implied by the forward-looking statements. Factors and risks that may result in actual results differing from this forward-looking information include, but are not limited to, those contained in the 2010 10-K as Part I, Item 1A thereof and in Part II, Item 1A of this Form 10-Q and the Company's Form 10-Q for the quarter ended March 31, 2011, including (1) the occurrence of any event, change or other circumstances that could give rise to the termination of the Investment Agreement by and among the Company, the Bank and North American Financial Holdings, Inc. ("North American"), dated as of May 5, 2011 (the "Investment Agreement"); (2) the outcome of any legal proceedings that have been or may be instituted against the Company and others following announcement of the Investment Agreement; (3) the inability to complete the transactions contemplated by the Investment Agreement due to the failure to obtain shareholder approval or the failure to satisfy other conditions to completion of the transaction, including the receipt of regulatory approval; (4) risks that the proposed transaction contemplated by the Investment Agreement disrupts current plans and operations and the potential difficulties in employee retention as a result of the proposed transaction; (5) the amount of the costs, fees, expenses and charges related to the proposed transaction contemplated by the Investment Agreement; (6) deterioration in the financial condition of borrowers resulting in significant increases in loan losses and provisions for those losses; (7) continuation of the historically low short-term interest rate environment; (8) changes in loan underwriting, credit review or loss reserve policies associated with economic conditions, examination conclusions, or regulatory developments; (9) increased levels of non-performing and repossessed assets and the ability to resolve these may result in future losses; (10) greater than anticipated deterioration or lack of sustained growth in the national or local economies; (11) rapid fluctuations or unanticipated changes in interest rates; (12) the impact of governmental restrictions on entities participating in the Capital Purchase Program (the "CPP") of the United States Department of the Treasury; (13) changes in state and federal legislation, regulations or policies applicable to banks or other financial service providers, including regulatory or legislative developments, like the Dodd-Frank Wall Street Reform and Consumer Protection Act, arising out of current unsettled conditions in the economy; (14) the results of regulatory examinations; (15) the remediation efforts related to the Company's material weakness in its internal control over financial reporting; (16) increased competition with other financial institutions in the markets that the Bank serves; (17) the Company's recording a further valuation

allowance related to its deferred tax asset; (18) exploring alternatives available for

Table of Contents

the future repayment or conversion of the preferred stock issued in the CPP, including in the transaction contemplated by the Investment Agreement; (19) further deterioration in the valuation of other real estate owned; (20) the failure to comply with the terms of regulatory enforcement actions, including informal commitments and formal agreements, including the proposed cease and desist order described in more detail below; (21) inability to comply with regulatory capital requirements and to secure any required regulatory approvals for capital actions to raise capital if necessary to comply with any regulatory capital requirements; and (22) the loss of key personnel, as well as other factors discussed throughout this document, including, without limitation the factors described under **Critical Accounting Policies and Estimates** on page 35 of this Quarterly Report on Form 10-Q, or from time to time, in the Company's filings with the SEC, press releases and other communications.

Readers are cautioned not to place undue reliance on forward-looking statements made in this document, since the statements speak only as of the document's date. All forward-looking statements included in this Quarterly Report on Form 10-Q are expressly qualified in their entirety by the cautionary statements in this section and to the more detailed risk factors included in the Company's 2010 10-K as updated in Part II, Item 1A below and in Part II, Item 1A of the Company's Quarterly Report on Form 10-Q for the Quarter ended March 31, 2011. The Company has no obligation and does not intend to publicly update or revise any forward-looking statements contained in or incorporated by reference into this Quarterly Report on Form 10-Q, to reflect events or circumstances occurring after the date of this document or to reflect the occurrence of unanticipated events. Readers are advised, however, to consult any further disclosures the Company may make on related subjects in its documents filed with or furnished to the SEC or in its other public disclosures.

Green Bankshares, Inc. (the Company) is the bank holding company for GreenBank (the Bank), a Tennessee-chartered commercial bank that conducts the principal business of the Company. The Company is the third largest bank holding company headquartered in Tennessee based on asset size at June 30, 2011 and at that date was also the second largest NASDAQ-listed bank holding company headquartered in Tennessee. The Bank currently maintains a main office in Greeneville, Tennessee and 64 full-service bank branches primarily in East and Middle Tennessee. In addition to its commercial banking operations, the Bank conducts separate businesses through its three wholly-owned subsidiaries: Superior Financial Services, Inc. (Superior Financial), a consumer finance company; GCB Acceptance Corporation (GCB Acceptance), an automobile lending company; and Fairway Title Co. The Bank also operates a wealth management office in Sumner County, Tennessee, and a mortgage banking operation in Knox County, Tennessee. All dollar amounts reported or discussed in Part I, Item 2 of this Quarterly Report on Form 10-Q are shown in thousands, except per share amounts.

Business Strategy

On May 5, 2011, the Company and the Bank entered into an Investment Agreement with North American pursuant to which North American has agreed to acquire approximately 120 million shares of the Company's common stock at a per share purchase price of \$1.81, for a total investment of approximately \$217 million. The transaction, which is subject to shareholder and regulatory approval, as well as the satisfaction of other customary closing conditions, is expected to be consummated in the third quarter of 2011. In connection with the investment, the Company expects that North American will enter into a binding agreement with the U. S. Department of Treasury to purchase all of the outstanding shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A, and related warrants to purchase shares of the Company's Common Stock.

A Special Meeting of Shareholders at which the Company's shareholders will be asked to approve the transaction contemplated by the Investment Agreement with North American has been scheduled for September 7, 2011.

In connection with the investment by North American, the Company's shareholders as of a record date to be fixed near the closing of that transaction will receive a contingent value right, entitling them to cash proceeds of up to \$0.75 per share of common stock based on the credit performance of the Bank's legacy loan portfolio over the five-year period following closing.

(Continued)

Table of Contents

The Company expects that over the short term, given the current economic environment and high levels of nonperforming assets, there will be little to no loan growth until the current environment stabilizes in the Company's markets and the economy begins to improve.

In the event that North American's investment is consummated, we believe that the additional capital contributed to the Company in that transaction will facilitate loan growth as well as enable the Company to consider growth opportunities in the form of in-market mergers and acquisitions including acquisitions of both entire financial institutions and selected branches of financial institutions. Following consummation of the North American investment, de novo branching could also be a method of growth, particularly in high-growth and other demographically-desirable markets.

The Bank focuses its lending efforts predominately on individuals and small to medium-sized businesses while it generates deposits primarily from individuals in its local communities. To aid in deposit generation efforts, the Bank offers its customers extended hours of operation during the week as well as Saturday and Sunday banking in many of its markets. The Bank also offers free online banking along with its High Performance Checking Program which since its inception has generated a significant number of core transaction accounts.

In addition to the Company's business model, which is summarized in the paragraphs above and the Company's 2010 Annual Report on Form 10-K, the Company is continuously investigating and analyzing other lines and areas of business. Conversely, the Company frequently evaluates and analyzes the profitability, risk factors and viability of its various business lines and segments and, depending upon the results of these evaluations and analyses, may conclude to exit certain segments and/or business lines. Further, in conjunction with these ongoing evaluations and analyses, the Company may decide to sell, merge or close certain branch facilities.

Overview

For the three months ended June 30, 2011, the Company reported a net loss available to common shareholders of \$12,384, compared with a net loss available to common shareholders of \$11,561 for the quarter ended March 31, 2011, and net income available to common shareholders of \$1,561 for the second quarter of 2010. Elevated credit costs continue to significantly impact earnings as the \$823 increased loss versus the quarter ended March 31, 2011 was driven largely by a \$2,491 increase in OREO expenses and a \$436 increase in the loan loss provision, partially offset by a \$609 increase in non-interest income, a \$748 decline in other non-interest expenses and a \$562 decline in income tax expense. The \$13,945 decline in net income versus the second quarter of 2010 related to a \$9,584 increase in loan loss provision, a \$4,280 increase in OREO expenses and a \$2,021 decline in net interest income reflecting the approximately 22% decline in average loan balances.

Critical Accounting Policies and Estimates

The Company's consolidated financial statements and accompanying notes have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods.

Management continually evaluates the Company's accounting policies and estimates it uses to prepare the consolidated financial statements. In general, management's estimates are based on historical experience, information from regulators and third party professionals and various assumptions that are believed to be reasonable under the existing facts and circumstances. Actual results could differ from those estimates made by management.

The Company believes its critical accounting policies and estimates include the valuation of the allowance for loan losses and the fair value of financial instruments and other accounts, including OREO. Based on management's calculation, an allowance of \$62,728, or 4.02% of total loans, net of unearned income, was deemed an adequate estimate of losses inherent in the loan portfolio as of June 30, 2011. This estimate resulted in a provision for loan losses in the income statement of \$14,333 and \$28,229 for the three and six months ended June 30, 2011, respectively. If the mix and amount of future charge-off percentages differ significantly from those assumptions used by management in making its determination, the allowance for loan losses and provision for loan losses on the income statement could be materially affected.

(Continued)

Table of Contents

The consolidated financial statements include certain accounting and disclosures that require management to make estimates about fair values. Estimates of fair value are used in the accounting for securities available for sale, loans held for sale, goodwill, other intangible assets, OREO and acquisition purchase accounting adjustments. Estimates of fair values are used in disclosures regarding securities held to maturity, stock compensation, commitments, and the fair values of financial instruments. Fair values are estimated using relevant market information and other assumptions such as interest rates, credit risk, prepayments and other factors. The fair values of financial instruments are subject to change as influenced by market conditions.

The Company believes its critical accounting policies and estimates also include the valuation of the allowance for net Deferred Tax Assets (DTA). A valuation allowance is recognized for a net DTA if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire DTA will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. In making such judgments, significant weight is given to evidence that can be objectively verified. As a result of the increased credit losses, the Company entered into a three-year cumulative pre-tax loss position (excluding the goodwill impairment charge recognized in the second quarter of 2009) as of September 30, 2010. A cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset which is difficult to overcome.

The Company's estimate of the realization of its net DTA was based on the scheduled reversal of deferred tax liabilities and taxable income available in prior carry back years, pre-tax core operating projections, tax planning strategies, and the longevity of the Company. Based on management's calculation, a valuation allowance of \$52,268, or 90% of the net DTA, was an adequate estimate as of June 30, 2011. If the Company's financial condition were to deteriorate significantly from those assumptions used by management in making its determination, the valuation allowance for the net DTA and the provision for the net DTA on the income statement could be materially affected. Once profitability has been restored for a reasonable time, if it is deemed more likely than not that the DTA can be utilized, and such profitability is considered sustainable, the valuation allowance would be reversed. Reversal of the valuation allowance requires a great deal of judgment and will be based on the circumstances that exist as of that future date.

The consolidated financial statements include certain accounting disclosures that require management to make estimates about fair values. Independent third party valuations are used for securities available for sale and securities held to maturity as well as acquisition purchase accounting adjustments. Estimates of fair value are used in accounting for loans held for sale, goodwill and other intangible assets. Estimates of fair values are used in disclosures regarding stock compensation, commitments, and the fair values of financial instruments. Fair values are estimated using relevant market information and other assumptions such as interest rates, credit risk, prepayments and other factors. The fair values of financial instruments are subject to change as influenced by market conditions.

Table of Contents**Changes in Results of Operations**

Net Loss. The Company's net loss available to common shareholders was \$12,384 and \$23,945 for the three and six months ended June 30, 2011, compared to net income available to common shareholders of \$1,561 and \$3,507 for the three and six months ended June 30, 2010, respectively. The \$13,945 decline between the 2011 second quarter results and the second quarter of 2010 reflected a \$9,584 increase in the loan loss provision, coupled with a \$4,280 increase in costs associated with maintenance, disposition and revaluation of other real estate owned (OREO) and a \$2,021 decline in net interest income, along with continued weakness in economic conditions in our markets. We incurred an approximately 22% decline in average loan balances between the periods as well.

Net Interest Income. The largest source of earnings for the Company is net interest income, which is the difference between interest income on earning assets and interest expense on deposits and other interest-bearing liabilities.

Second quarter 2011 net interest income totaled \$19,452, up \$185 or 1% versus the first quarter of 2011 but down \$2,021 or 9% versus the second quarter of 2010. For the six months ended June 30, 2011, net interest income totaled \$38,718, down from \$43,132 for the comparable period in 2010. Versus the first quarter of 2011, the modest increase was driven by an increase in the number of days in the current quarter. The adverse impact of continued declines in performing loans (the combination of movement into non-performing loans coupled with credit worthy borrowers reducing their aggregate loans), with average balances down approximately \$85 million or 5.5% during the second quarter, was offset in part by a 0.07% increase in loan yields, due to a reduction in interest reversals, and a 0.13% decline in deposit yields due to continued pricing discipline.

The decline in net interest income in the second quarter of 2011 versus the second quarter of 2010 was due to an approximately 22% decline in average loans partially offset by the Company's ability to lower average rates paid on interest bearing deposits by 0.61% while achieving a 0.22% increase in average loan yields through pricing discipline and lower interest reversals. The 3.91% net interest margin in the second quarter of 2011 was up 0.15% versus the second quarter of 2010 despite a shift from loans into lower yielding investment securities and short-term investments. Net interest margin for the six months ended June 30, 2011 was 3.84% compared to 3.88% for the comparable period in 2010. The reduction between the periods was principally the result of increased non-performing loans, offset in part by an improvement in our net interest spread. The Company's average balance for interest-bearing deposits decreased 5% or \$92,465 for the second quarter of 2011 versus the same period of 2010 as the Company reduced its reliance on jumbo time deposits and brokered deposits while focusing on building core deposit levels throughout its branch network. However, the average balance for core deposits (defined as total customer deposits excluding time deposits and brokered deposits) for the second quarter of 2011 grew by \$101,398 or 9% compared to the second quarter of 2010.

Similarly, the 10% decline in net interest income in the first six months of 2011 versus the second quarter of 2010 was due to an approximately 21% decline in average loans partially offset by the Company's ability to lower average rates paid on interest bearing deposits by 0.59% while achieving a 0.17% increase in average loan yields through pricing discipline and a reduction in interest reversals.

(Continued)

Table of Contents

The following table sets forth certain information relating to the Company's consolidated average interest-earning assets and interest-bearing liabilities and reflects the average yield on assets and average cost of liabilities for the periods indicated. These yields and costs are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the periods presented.

Table of Contents

Provision for Loan Losses. During the three and six months ended June 30, 2011, loan charge-offs were \$17,227 and \$33,632, respectively, and recoveries of charged-off loans were \$511 and \$1,301, respectively. For the three and six months ended June 30, 2010, loan charge-offs were \$5,316 and \$10,049, respectively, and recoveries of charged-off loans were \$449 and \$1,299, respectively. The Company's provision for loan losses increased to \$14,333 and \$28,229, respectively, for the three and six months ended June 30, 2011 compared to \$4,749 and \$8,838, respectively, for the three and six months ended June 30, 2010. The impact of the continuing challenging economic environment, elevated net charge-offs and increased non-performing assets were the primary reasons for the increase in provision expense in the second quarter of 2011 when compared to the comparable period in 2010. Management continually evaluates the existing portfolio in light of loan concentrations, current general economic conditions and economic trends. On a monthly basis, the Company undertakes an extensive review of every loan in excess of \$1 million that is adversely risk graded and every loan regardless of amount graded substandard.

The Company's allowance for loan losses declined to \$62,728 at June 30, 2011 from \$65,109 at March 31, 2011. However, due to continued reductions in loan balances, the reserve to outstanding loans ratio increased to 4.02% at June 30, 2011 from 3.87% at March 31, 2011. These estimates resulted in a provision for loan losses in the income statement of \$14,333 and \$28,229 for the three and six months ended June 30, 2011, respectively, versus \$4,749 and \$8,638 for the three and six months ended June 30, 2010. If economic conditions, including residential real estate market conditions, loan mix and amount of future charge-off percentages differ significantly from those assumptions used by management in making its determination, the allowance for loan losses and provision for loan losses on the income statement could be materially affected.

The ratio of allowance for loan losses to nonperforming loans was 47.52% as of June 30, 2011 versus 39.60% as of March 31, 2011, 45.83% as of December 31, 2010 and 77.02% as of June 30, 2010. The ratio of nonperforming assets to total assets was 9.23% as of June 30, 2011 versus 9.38% as of March 31, 2011, 8.56% at December 31, 2010 and 5.61% as of June 30, 2010. The ratio of nonperforming loans to total loans, net of unearned income, fell to 8.46% as of June 30, 2011 versus 9.78% as of March 31, 2011 as there was a shift from non-performing loans to OREO during the second quarter. The ratio of nonperforming loans to total loans was 8.35% as of December 31, 2010 and 3.37% as of June 30, 2010. Within the Bank, the Company's largest subsidiary, the ratio of nonperforming assets to total assets was 9.17%, as of June 30, 2011 versus 9.34% as of March 31, 2011 and 8.52% at December 31, 2010.

Net charge-offs as a percentage of average loans increased to 1.03% (annualized 4.1%) for the three months ended June 30, 2011 from 0.25% (annualized 1.0%) for the three months ended June 30, 2010. For the six months ended June 30, 2011, net charge-offs as a percentage of average loans was 1.93% (annualized 3.9%), which was up from 0.44% (annualized 0.89%) for the comparable period in 2010.

Management believes that credit quality indicators will be driven by the current economic environment and condition of the residential real estate markets. Management continually evaluates the existing portfolio in light of loan concentrations, current general economic conditions and economic trends. During the second quarter of 2010, the Company segregated staffing for its special assets group and transferred additional independent resources into this area in an effort to accelerate problem asset resolution.

Based on its evaluation of the allowance for loan loss calculation and review of the loan portfolio, management believes the allowance for loan losses is adequate at June 30, 2011. However, the provision for loan losses could further increase based on actions taken by the special assets group to resolve problem loans, and if general economic conditions remain sluggish or weaken further or the residential real estate markets in Nashville, Knoxville or the Company's other markets or the financial conditions of borrowers deteriorate beyond management's current expectations.

Non-interest Income. Fee income unrelated to interest-earning assets, consisting primarily of service charges, commissions and fees, is an important component to the Company's total revenue stream. Total non-interest income for the three and six months ended June 30, 2011 was \$8,236 and \$15,864, respectively, down 6% and 4% versus the same periods in 2010.

Service charges on deposit accounts remain the largest component of total non-interest income. Service charges on deposit accounts for the three and six months ended June 30, 2011 were \$6,377 and \$12,208, respectively, down 5% and 4%, respectively, versus the comparable 2010 periods. The decline in service charges was primarily attributable to

regulatory changes. We also experienced reductions in our trust and investment services income and mortgage banking income in the first three and six months of 2011, as compared to the comparable periods in 2010.

(Continued)

Table of Contents

Non-interest Expense. Control of non-interest expense is a critical aspect in enhancing income. Non-interest expense includes personnel, occupancy, and other expenses such as OREO costs, data processing, printing and supplies, legal and professional fees, postage, Federal Deposit Insurance Corporation (FDIC) assessment fees and other expenses. Total non-interest expense was \$24,770 and \$47,798 for the three and six months ended June 30, 2011, up \$3,496 or 16% versus the three months ended June 30, 2010 and 14% versus the six months ended June 30, 2010. The increases in each of these periods were principally the result of a \$4,280 and \$5,842 increase, respectively, in costs associated with OREO and repossessed assets, including the impact of results of revaluations of OREO properties following receipt of updated appraisals.

Personnel costs are the largest category of recurring non-interest expenses. For the three and six months ended June 30, 2011, employee compensation and benefits represented \$7,324 and \$15,455, or 30% and 32%, respectively, of total non-interest expense. This represented a decline of \$648 and \$183, respectively, versus the year ago quarter and six month period, due to the Company's reduction in force effected in the first quarter of 2011 given the current business environment and level of business activity. Our employee compensation and benefit costs for the six months ended June 30, 2011 included severance costs associated with the reduction in force that were recorded in the first quarter of 2011.

Income Taxes. A \$281 benefit for the three months ended June 30, 2011 was recorded. The benefit offset the provision recorded in the linked quarter. Accounting guidance states that a DTA should be reduced by a valuation allowance if, based on the weight of all available evidence, it is more likely than not that some portion or the entire deferred tax asset will not be realized. The determination of whether a deferred tax asset is realizable is based on weighing all available evidence, including both positive and negative evidence. In making such judgments, significant weight is given to the evidence that can be objectively verified. The Company's estimate of the realization of its net DTA was based on the scheduled reversal of deferred tax liabilities and taxable income available in prior carry back years, pre-tax core operating projections and tax planning strategies. Based on management's calculation, an allowance of \$52,268, or 90% of the DTA, was an adequate estimate of the portion of the net DTA which is more likely than not to not be realized as of June 30, 2011. For the six months ended June 30, 2010, which had no DTA valuation allowance provision, the effective income tax rate was 34.2%.

Changes in Financial Condition

Total assets at June 30, 2011 were \$2,293,815, a decrease of \$112,225 or 4.7% from December 31, 2010. The decrease in assets reflects a \$184,875 decline in loans, partially offset by an increase of \$65,140 in investment securities and liquid assets. Total assets at June 30, 2011 declined \$235,517 or 9% from June 30, 2010 reflecting a \$367,671 decline in loans, net of unearned income, which was partially offset by an increase of \$175,929 in investment securities and liquid assets.

Non-performing assets (NPA s), which include non-accrual loans, loans past due 90 days or more and still accruing interest and OREO, totaled \$211,695 at June 30, 2011 compared with \$205,914 at December 31, 2010. NPAs at June 30, 2011 increased \$69,780 or 49% versus June 30, 2010. The Company expects that the levels of NPA s will remain elevated for the remainder of 2011.

Non-performing loans include non-accrual loans and loans 90 or more days past due. All loans that are greater than 90 days past due are considered non-accrual unless they are adequately secured and there is reasonable assurance of full collection of principal and interest. Non-accrual loans that are 120 days past due without assurance of repayment are charged off against the allowance for loan losses. Non-performing loans totaled \$132,005 at June 30, 2011, representing a decline of \$13,814 versus December 31, 2010, due primarily to foreclosures and resulting transfer of the loan to OREO. Non-performing loans increased \$67,207 or 103% versus June 30, 2010.

OREO totaled \$79,690 at June 30, 2011, representing an increase of \$19,595 from December 31, 2010, and an increase of \$2,758 versus June 30, 2010 as recorded foreclosures exceeded recognized sales and write-downs.

Impaired loans, which are loans identified as being probable that the Company will not be able to collect all amounts of contractual interest and principal as scheduled in the loan agreement, totaled \$149,903 after impairment charges necessary to reflect current fair values at June 30, 2011.

(Continued)

Table of Contents

The Company's policy requires new appraisals on adversely rated collateral dependent loans and OREO to be obtained at least annually. Each four months, the Company receives a written report from an independent nationally recognized organization which provides updated valuation trends, by price point and by zip code, for each of the major markets in which the Company is conducting business. The information obtained is then used in the Company's impairment analysis of collateral dependent loans. If actual losses exceed the amount of the allowance for loan losses, earnings of the Company could be adversely affected.

At June 30, 2011, the ratio of the Company's allowance for loan losses to non-performing loans (which include non-accrual loans) was 47.5% compared to 77.0% at June 30, 2010.

The Company maintains an investment portfolio to provide liquidity and earnings. Investments at June 30, 2011 with an amortized cost of \$214,081 had a market value of \$217,556. At December 31, 2010, investments with an amortized cost of \$200,824 had a market value of \$202,469. At June 30, 2010, investments with an amortized cost of \$173,361 had a market value of \$176,746.

Liquidity and Capital Resources

Liquidity. Liquidity refers to the ability or the financial flexibility to meet the needs of depositors and borrowers and fund operations. Maintaining appropriate levels of liquidity allows the Company to have sufficient funds available for reserve requirements, customer demand for loans, withdrawal of deposit balances and maturities of deposits and other liabilities.

As of June 30, 2011, the Bank's liquidity reserves included \$275,680 of surplus cash with the Federal Reserve, \$5,023 of fed funds sold to upstream correspondent banks, and \$27,227 of unpledged securities. As of June 30, 2011, the holding company's liquidity reserves consisted of \$1,773 of cash.

The Company's primary source of liquidity is dividends paid by the Bank. Applicable Tennessee statutes and regulations impose restrictions on the amount of dividends that may be declared by the Bank. Under Tennessee law, the Bank can only pay dividends to the Company in an amount equal to or less than the total amount of its net income for that year combined with retained net income for the preceding two years. Payment of dividends in excess of this amount requires the consent of the Commissioner of the Tennessee Department of Financial Institutions (TDFI), FDIC, and the Federal Reserve Bank of Atlanta (FRB). Further, any dividend payments are subject to the continuing ability of the Bank to maintain compliance with minimum federal regulatory capital requirements, or any higher requirements that the Bank may be subject to, and to retain its characterization under federal regulations as a well-capitalized institution. Because of the Bank's losses in 2009, 2010 and year-to-date 2011, dividends from the Bank to the holding company, including funds for payment of dividends on preferred stock and trust preferred, including the preferred stock issued to the U.S. Treasury, and interest on trust preferred securities to the extent that the Company does not have sufficient cash available at the holding company level, will require prior approval of the TDFI, FDIC and FRB.

Supervisory guidance from the FRB indicates that bank holding companies that are experiencing financial difficulties generally should eliminate, reduce or defer dividends on Tier 1 capital instruments including trust preferred securities, preferred stock or common stock, if the holding company needs to conserve capital for safe and sound operation and to serve as a source of strength to its subsidiaries. The Company has informally committed to the FRB that it will not (1) declare or pay dividends on the Company's common or preferred stock, including the preferred shares owned by the U.S. Treasury Department (2) make any distributions on subordinated debentures or trust preferred securities or (3) incur any additional indebtedness without in each case, the prior written approval of the FRB. No dividends are expected to be paid in the foreseeable future.

(Continued)

Table of Contents

Following consultation with the FRB, the Company gave notice on November 9, 2010 to the U.S. Treasury Department that the Company was suspending the payment of regular quarterly cash dividends on the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A issued to the U.S. Treasury Department. The dividends, which are cumulative, will continue to be accrued for payment in the future and will be reported for the duration of the deferral period as a preferred dividend requirement that is deducted from net income for financial statement purposes. Additionally the Company, following consultation with the FRB, has exercised its rights beginning in the fourth quarter of 2010 to defer regularly scheduled interest payments on all of its issues of junior subordinated debentures having an outstanding principal amount of \$88.7 million, relating to outstanding trust preferred securities (TRUPs). Under the terms of the trust documents associated with these debentures, the Company may defer payments of interest for up to 20 consecutive quarterly periods without default or penalty. The regular scheduled interest payments will continue to be accrued for payment in the future and reported as an expense for financial statement purposes. Together, the deferral of interest payments on TRUPs and suspension of dividend payments to the U.S. Treasury Department will preserve approximately \$5.1 million per year in Bank level capital. As of June 30, 2010, cumulative deferred interest payments on TRUPs and dividend payments to the U.S. Treasury Department totaled \$4,669.

For the six months ended June 30, 2011, operating activities of the Company provided \$32,457 of cash flows. The net loss of \$21,444 comprised a substantial portion of the cash generated from operations after removing various non-cash items, including \$28,229 in provision for loan losses and \$3,442 of depreciation and amortization. A decline in other assets added \$12,191.

Maturities of \$46,333 in investment securities, proceeds from the net change in loans of \$111,627 and proceeds of \$15,117 from the sale of OREO were the primary components of inflows from investing activities. These were offset in part by \$59,790 in purchases of investment securities available for sale for a net increase in net cash provided from investing activities of \$112,517.

The net cash used in financing activities totaled \$94,960, due to a \$93,466 decline in customer deposits, due a decline of approximately \$128 million in non-core time deposits, partially offset by an increase in core deposits.

Capital Resources. The Company's capital position is reflected in its shareholders' equity, subject to certain adjustments for regulatory purposes. Shareholders' equity, or capital, is a measure of the Company's net worth, soundness and viability.

As a result of the first half 2011 loss, the Bank's capital ratios declined. Shareholders' equity on June 30, 2011 was \$122,046, a decline of \$21,851 or 15.2% since December 31, 2010 and a decline of \$111,104 or 47.7% since June 30, 2010.

During the second quarter of 2009 the Company suspended common stock dividends and on November 9, 2010 the Company announced that it had suspended preferred stock dividends and interest payments on its junior subordinated debentures associated with its trust preferred securities in order to preserve capital at the Bank level.

Risk-based capital regulations adopted by the Board of Governors of the FRB and the FDIC require bank holding companies and banks, respectively, to achieve and maintain specified ratios of capital to risk-weighted assets. The risk-based capital rules are designed to measure Tier 1 Capital and Total Capital in relation to the credit risk of both on- and off-balance sheet items. Under the guidelines, one of four risk weights is applied to the different on-balance sheet items. Off-balance sheet items, such as loan commitments, are also subject to risk-weighting after conversion to balance sheet equivalent amounts. All bank holding companies and banks must maintain a minimum total capital to total risk-weighted assets ratio of 8.00%, at least half of which must be in the form of core, or Tier 1, capital (consisting of common equity, retained earnings, and a limited amount of qualifying perpetual preferred stock and trust preferred securities, net of goodwill and other intangible assets and accumulated other comprehensive income). These guidelines also specify that bank holding companies that are experiencing internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels. At June 30, 2011, capital ratios for the Bank and the Company remained above the statutory minimums necessary to be deemed a well-capitalized financial institution. However, they fell below the Tier 1 leverage ratio of 10.0% and the Total risk-based capital ratio of 14.0% that the Bank had informally committed to its regulators that it would maintain, as discussed further in the 2010 Form 10-K.

(Continued)

Table of Contents

On May 2, 2011, the Bank received notice from the FDIC and the TDFI that, as a result of those agencies' findings in their most recently completed joint safety and soundness examination, the agencies would be seeking a formal enforcement action against the Bank aimed at strengthening the Bank's operations and its financial condition, and that accordingly, the FDIC was pursuing the issuance of a consent order against the Bank and the TDFI was pursuing the issuance of a written agreement against the Bank. The Company believes that the final terms of the order and written agreement will contain requirements similar to those that the Bank has already informally committed to comply with, including requirements to maintain the Bank's capital ratios above those levels required to be considered well-capitalized under federal banking regulations.

The Company's and the Bank's regulatory capital ratios as of June 30, 2011, and the minimum ratios required to be met under the federal statutory and regulatory guidelines as well as the minimum ratios that the Bank has informally committed to its regulators that it will maintain are set forth below:

	Required Minimum Ratio	Required to be Well Capitalized	Required by Bank's Informal Commitment to Regulators	Bank	Company
Tier 1 risk-based capital	4.00%	6.00%	12.00%	11.97%	9.03%
Total risk-based capital	8.00%	10.00%	14.00%	13.25%	13.09%
Leverage Ratio	4.00%	5.00%	10.00%	8.47%	6.39%

The Company announced on May 5, 2011 that it had entered into a definitive agreement to raise approximately \$217 million in new capital through the sale of newly issued common shares to North American. The transaction, which is subject to shareholder and regulatory approval, as well as the satisfaction of other customary closing conditions, is expected to be consummated in the third quarter of 2011. The recapitalization will strengthen the Company's and the Bank's capital ratios and balance sheet.

(Continued)

Table of Contents**Off-Balance Sheet Arrangements**

At June 30, 2011, the Company had outstanding unused lines of credit and standby letters of credit totaling \$234,801 and unfunded loan commitments outstanding of \$5,382. Because these commitments generally have fixed expiration dates and most will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund outstanding commitments, as noted in Liquidity and Capital Resources Liquidity, as of June 30, 2011, the Company had various liquidity reserves, including \$275,680 of surplus cash at the Federal Reserve, the ability to liquidate \$5,023 of Federal funds sold, and \$27,227 of unpledged investment securities. The following table presents additional information about the Company's off-balance sheet commitments as of June 30, 2011:

	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	Total
Commitments to make loans fixed	\$	\$ 1,084	\$ 1,585	\$ 766	\$ 3,435
Commitments to make loans variable	500	205	24	1,218	1,947
Unused lines of credit	111,138	71,814	13,370	14,811	211,133
Letters of credit	16,167	7,501			23,668
Total	\$ 127,805	\$ 80,604	\$ 14,979	\$ 16,795	\$ 240,183

Table of Contents**Disclosure of Contractual Obligations**

In the ordinary course of operations, the Company enters into certain contractual obligations. Such obligations include the funding of operations through debt issuances as well as leases for premises and equipment. The following table summarizes the Company's significant fixed and determinable contractual obligations as of June 30, 2011:

	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	Total
Certificates of deposits	\$ 481,029	\$ 118,214	\$ 52,178	\$ 3,441	\$ 654,862
FHLB advances and notes payable	25,325	65,637	20,686	46,211	157,859
Subordinated debentures				88,662	88,662
Operating lease obligations	1,304	2,177	949	571	5,001
Deferred compensation	1,487		267	2,207	3,961
Purchase obligations					
Total	\$ 509,145	\$ 186,028	\$ 74,080	\$ 141,092	\$ 910,345

Additionally, the Company routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for early termination of the contract. Management is not aware of any additional commitments or contingent liabilities which may have a material adverse impact on the liquidity or capital resources of the Company.

Effect of New Accounting Standards

FASB ASU 2011-1 In January 2011, the FASB issued ASU No. 2011-1 Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20. ASU 2011-1 temporarily delays the effective date of the disclosures about troubled debt restructurings in Update 2010-20 for public entities. Accordingly, management has not included such disclosures in Note 3 (Loans footnote) of the interim financial statements. Management will implement the disclosures required by this standard beginning with the Company's September 30, 2011 interim financial statements

FASB ASU 2011-2 In April 2011, the FASB issued ASU No. 2011-2 Receivables (Topic 310) - A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring. ASU 2011-2 provides additional guidance to assist creditors in determining whether a restructuring of a receivable meets the criteria to be considered a troubled debt restructuring. In conjunction with ASU 2011-1, the effective date of the disclosures has been temporarily delayed. Therefore, management has not included such disclosures in Note 3 (Loans footnote) of the financial statements. Management will implement the disclosures required by this standard beginning with the Company's September 30, 2011 interim financial statements

In May 2011, the FASB issued an update to the accounting standards for amendments to achieve common fair value measurements and disclosure requirements in U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRS). This update, which is a joint effort between the FASB and the International Accounting Standards Board (IASB), amends existing fair value measurement guidance to converge the fair value measurement guidance in U.S. GAAP and IFRS. This update clarifies the application of existing fair value measurement requirements, changes certain principles in existing guidance and requires additional fair value disclosures. The update permits measuring financial assets and liabilities on a net credit risk basis, if certain criteria are met, increases disclosure surrounding company determined market prices (Level 3) financial instruments, and also requires the fair value hierarchy disclosure of financial assets and liabilities that are not recognized at fair value in the financial statements, but are included in disclosures at fair value. This update is effective for interim and annual periods beginning after December 15, 2011, and is not expected to have a significant impact on the Company's financial statements.

In June 2011, the FASB issued an update to the accounting standards relating to the presentation of comprehensive income. This update amends current accounting standards to require that all nonowner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive

statements. Additionally, the update requires entities to present, on the face of the financial statements, reclassification adjustments for items that are reclassified from other comprehensive income to net income in the statement or statements where the components of net income and the components of other comprehensive income are presented. The option to present components of other comprehensive income as part of the statement of changes in stockholders equity was eliminated. This update is effective for interim and annual periods beginning after December 15, 2011, and is not expected to have a significant impact on the Company's financial statements.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Part II, Item 7A of the 2010 10-K is incorporated in this item of this Quarterly Report by this reference. There have been no material changes in the quantitative and qualitative market risks of the Company since December 31, 2010.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company's management, with the participation of the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(f) promulgated under the Securities Exchange Act of 1934 (the Exchange Act)) as of the end of the period covered by this report. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of June 30, 2011, the Company's disclosure controls and procedures were effective.

As outlined per the Internal Control section below, management completed remediation efforts in the first quarter of 2011 related to the material weakness in internal control over financial reporting identified as of December 31, 2010 and reported on in the Company's 2010 10-K. Management anticipates that these remedial actions strengthened the Company's internal control over financial reporting and addressed the individual deficiencies identified as of December 31, 2010. Because some of these remedial actions take place on a quarterly basis, their successful implementation will continue to be evaluated to validate management's assessment that the deficiencies have been remediated.

In addition to these remediation efforts, in light of the material weakness as of December 31, 2010, in preparing the Company's Consolidated Financial Statements included in this quarterly report on Form 10-Q, the Company performed a thorough review of credit quality, focusing especially on the timely receipt and review of updated appraisals from outside independent third parties and internal supporting documentation to ensure that the Company's Consolidated Financial Statements included in this Report have been prepared in accordance with U.S. GAAP.

Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting, except for further refinements to remediation efforts which management implemented in the first quarter of 2011 related to a material weakness in internal control over financial reporting identified as of December 31, 2010 and reported on in the Company's 2010 Form 10-K. Following management's determination of the material weakness, management took the following remedial actions:

During the fourth quarter of 2010 and as of December 31, 2010 all appraisals on impaired assets are, and will continue to be, ordered 90 days prior to the annual appraisal date, or when evidence of impairment has occurred, and submitted to the independent third party for review upon completion, in order to assure that all appraisals on impaired assets are received in accordance with the Company's internal policies;

Pre-reviewed appraisals indicating evidence that impairment has occurred will be separately reviewed and discussed in the monthly valuation meeting held between the Special Assets Group and Accounting to ensure that there is adequate documentation of the consideration for recording a potential impairment when the review process is not 100% complete but it is probable that a loss has been incurred; and

Controls evidencing adequate secondary review and approval of impaired loan valuations and other real estate owned will be appropriately documented and evident within the Special Assets Group.

Table of Contents

Management believes these remedial actions strengthened the Company's internal control over financial reporting and addressed the individual deficiencies identified as of December 31, 2010. Because some of these remedial actions take place on a quarterly basis, their successful implementation will continue to be evaluated to validate management's assessment that the deficiencies have been remediated.

The independent loan review function has been absent since the first quarter of 2011 and, given the pending Investment Agreement with North American, plans to outsource this function have been deferred. While not performed by an independent loan review function, there are a number of procedures presently in place which provide for review of past due loans, assessment of renewals, and re-grading of loans. Such procedures are conducted by credit officers, the interim Chief Credit Officer, special assets managers and credit analysts, as well as the line lending personnel.

PART II OTHER INFORMATION**Item 1. Legal Proceedings**

Securities Class Action. On November 18, 2010 a shareholder of the Company filed a putative class action lawsuit (styled *Bill Burgraff v. Green Bankshares, Inc., et al., U.S. District Court, Eastern District of Tennessee, Northeastern Division, Case No. 2:10-cv-00253*) against the Company and certain of its current and former officers in the United States District Court for the Eastern District of Tennessee in Greeneville, Tennessee on behalf of all persons that acquired shares of the Company's common stock between January 19, 2010 and November 9, 2010. On January 18, 2011, a separate shareholder of the Company filed a putative class action lawsuit (styled *Brian Molnar v. Green Bankshares, Inc., et al., U.S. District Court, Eastern District of Tennessee, Northeastern Division, Case No. 2:11-cv-00014*) against the Company and certain of its current and former officers in the same court on behalf of all persons that acquired shares of the Company's common stock between January 19, 2010 and October 20, 2010. These lawsuits were filed following, and relate to the drop in value of the Company's common stock price after, the Company announced its third quarter performance results on October 20, 2010. The Burgraff case also complains of the Company's decision on November 9, 2010, to suspend payment of certain quarterly cash dividends.

The plaintiffs allege that defendants made false and/or misleading statements or failed to disclose that the Company was purportedly overvaluing collateral of certain loans; failing to timely take impairment charges of these certain loans; failing to properly account for loan charge-offs; lacking adequate internal and financial controls; and providing false and misleading financial results. The plaintiffs have asserted federal securities laws claims against all defendants for alleged violations of Section 10(b) of the Securities Exchange Act of 1934 (the Exchange Act) and Rule 10b-5 promulgated thereunder. The plaintiffs have also asserted control person liability claims against the individual defendants named in the complaints pursuant to Section 20(a) of the Exchange Act. The two cases were consolidated on February 4, 2011. On February 11, 2011, the Court appointed movant Jeffrey Blomgren as lead plaintiff. On May 3, 2011, Plaintiff filed an amended and consolidated complaint alleging a class period of January 19, 2010 to November 9, 2010. On July 11, 2011, Defendants filed a motion to dismiss the consolidated amended complaint. Plaintiff has until August 29, 2011 to file an opposition to that motion.

The Company and the individual named defendants collectively intend to vigorously defend themselves against these allegations.

North American Transaction. On May 12, 2011, a shareholder of the Company filed a putative class action lawsuit (styled *Betty Smith v. Green Bankshares, Inc. et al., Case No. 11-625-III, Davidson County, Tennessee, Chancery Court*) against the Company, the Bank, the Company's Board of Directors (Steven M. Rownd, Robert K. Leonard, Martha M. Bachman, Bruce Campbell, W.T. Daniels, Samuel E. Lynch, Bill Mooningham, John Tolsma, Kenneth R. Vaught, and Charles E. Whitfield, Jr., and North American on behalf of all persons holding common stock of the Company. This complaint, which has been subsequently amended, was filed following the Company's public announcement on May 5, 2011 of its entering into the Investment Agreement with North American and relates to the proposed investment in the Company by North American.

The amended complaint alleges that the individual defendants breached their fiduciary duties by accepting a sale price for the shares to be sold to North American that was unfair to the Company's shareholders and by issuing a proxy statement that contained material omissions. The complaint also alleges that the Company, the Bank and North American aided and abetted these breaches of fiduciary duty. It seeks injunctive relief and/or rescission of the

proposed investment by North American and fees and expenses in an unspecified amount.

Table of Contents

On May 25, 2011, another shareholder of the Company filed a similar putative class action lawsuit (styled *Mark McClinton v. Green Bankshares, Inc. et al., Case No. 11-CV-284ktl, Greene County Circuit Court, Greeneville, Tennessee*) against the Company, the Company's Board of Directors and North American on behalf of all persons holding the Company's common stock. The complaint similarly alleges that the individual defendants breached their fiduciary duties to the Company by agreeing to sell shares to North American at a price unfair to the Company's shareholders. The complaint also alleges that the Company and North American aided and abetted these breaches of fiduciary duty. It seeks an injunction and/or rescission of North American's investment in the Company and fees and expenses in an unspecified amount.

On June 16, 2011, another shareholder of the Company filed a putative class action lawsuit (styled *Thomas W. Cook Jr. v. Green Bankshares, Inc. et al., Civil Action No. 2:11-cv-00176, United States District Court for the Eastern District of Tennessee, Greeneville*) against the Company, the Company's Board of Directors and North American on behalf of all persons holding the Company's common stock. The complaint alleges that the individual defendants breached their fiduciary duties to the Company by failing to maximize shareholder value in the proposed transaction with North American. The complaint also alleges that the Company and the individual defendants violated the securities laws by issuing a Preliminary Proxy Statement that contains alleged material misstatements and omissions. The complaint also alleges that the Company and North American aided and abetted the breaches of fiduciary duty. It seeks an injunction and/or rescission of North American's investment in the Company, monetary damages and fees and expenses in an unspecified amount.

On July 6, 2011, another shareholder of the Company filed a lawsuit (styled *Barbara N. Ballard v. Stephen M. Rownd, et al., Civil Action No. 2:11-cv-00201, United States District Court for the Eastern District of Tennessee, Greeneville*) against the Company, the Company's Board of Directors and North American asserting an individual claim that alleges that the individual defendants violated the securities laws by issuing a Preliminary Proxy Statement that contains alleged material misstatements and omissions. The complaint also alleges a class action claim on behalf of all persons holding the Company's common stock against the individual defendants for breach of fiduciary duty based on these same alleged material misstatements and omissions. The complaint also alleges that the Company and North American aided and abetted the breaches of fiduciary duty. It seeks an injunction and/or rescission of North American's investment in the Company and fees and expenses in an unspecified amount.

On July 26, 2011, the parties to the four North American transaction-related class action lawsuits reached an agreement in principle to resolve those four lawsuits on the basis of the inclusion of certain additional disclosures regarding the North American transaction in the proxy statement in connection with the proposed North American transaction. The proposed settlement is subject to, among other things, court approval.

The Company and the individual defendants collectively intend to vigorously defend themselves against these class action allegations.

General. The Company and its subsidiaries are subject to claims and suits arising in the ordinary course of business. In the opinion of management, the ultimate resolution of these pending claims and legal proceedings will not have a material adverse effect on the Company's results of operations.

Item 1A. Risk Factors

Except as set forth below and in the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2011, there have been no material changes to our risk factors as previously disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010:

If the Bank becomes subject to the cease and desist order to which the FDIC has sought the Bank's consent, its and the Company's operations, liquidity and capital resources could be negatively impacted.

The FDIC is requesting that the Bank consent to the issuance of a cease and desist order and the TDFI is pursuing the issuance of a written agreement against the Bank. The Company believes that this order and written agreement will require, among other things, that the Bank maintain its capital ratios above those levels required to be considered well-capitalized under federal banking regulations. The Company also expects that this order and written agreement will prohibit the Bank from paying dividends to the Company and will require the Bank to, among other things, institute a plan for the reduction of charge-offs and classified assets, restrict its advances to certain classified borrowers and implement a plan for the reduction of certain loan concentrations. Because the consent order will constitute a formal enforcement action requiring the Bank to maintain specified capital levels above those required to be well-capitalized under the prompt corrective action provisions of the FDICIA, the Bank will, upon issuance of the order, be subject to additional limitations on its operations including its ability to pay interest on deposits above proscribed rates and its ability to accept, rollover or renew brokered deposits, which could adversely affect the Bank's liquidity and/or operating results. If the Bank fails to comply with the requirements of the consent order, after it is issued, it may be subject to further regulatory action. The FDIC and the TDFI each has broad authority to take additional actions against the Bank, including assessing civil fines and penalties, issuing additional consent or cease and desist orders and removing officers and directors.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The Company made no unregistered sales of its equity securities or repurchases of its common stock during the quarter ended June 30, 2011.

Item 3. Defaults Upon Senior Securities

None

Item 4. (Removed and Reserved)

Item 5. Other Information

None
