Form FWP

September 26, 2011

Filed Pursuant To Rule 433

Registration No. 333-167132

September 26, 2011

The Strategic Case for Portfolio Construction Gold: A Unique Asset Class

Edgar Filing: SPDR GOLD TRUST - Form FWP

Agenda A picture is worth a 1000 words Size and diversity of the gold market Rediscovering the role of gold within an investment portfolio Potential portfolio diversification: low and negative correlation Risk management: liquidity, moderate volatility, no credit risk and tail risk protection Gold market fundamental drivers Supply & Demand Structural changes India, China and central banks Gold bull market in perspective Ways to access the market

A Picture is Worth A 1000 Words

Total Mined Gold Relative to US Debt All gold ever mined would form a 20 metre high cube

Rediscovering the Role of Gold Within an Investment Portfolio

Gold Has Low Correlation Relative to Most Assets... Correlation of weekly returns between gold (US\$/oz) and selected asset classes (US\$): Jan 87 Jul 10* JPM 3-month T-bill Index JPM US Treasury Index BarCap Global Tsy Agg ex US BarCap US Credit BarCap US High Yield JPM EM sovereign debt MSCI US MSCI EAFE MSCI EM S&P GSCI® Gold (US\$/oz) *Except for MSCI EM index (Dec 87Jul 10) and JP Morgan EM sovereign debt index (Dec 90 Jul 10) due to data availability. Source: LBMA, Barclays Capital, JP Morgan, Bloomberg, World Gold Council The correlation coefficient measures the degree to which the movements of two variables are related. For example, a correlation of 1.00 would (or 100%) indicate that the two asset classes monthly returns move in the same direction (positive or negative) for the stated time period. In contrast, a correlation coefficient of -1.00 would mean that the two indices move in opposite direction. A correlation of zero indicates that the two exhibit no discernible relationship.

and it is Negatively Correlated in Tail Risk Events... Weekly-return correlation between equities, gold and commodities when equities move by more than 2 standard deviations; Jan 87 Jul 10 Correlation between S&P 500 and gold (US\$/oz) Correlation between S&P 500 and S&P GSCI Source: LBMA, Bloomberg, World Gold Council

and it Reduces Losses When Tail Risk Events Occur Performance of a US\$100mn portfolio* with a 6% gold allocation and w/o gold during tail risk events *Benchmark portfolio with approx. 55% equities, 40% fixed income, 5% alternative assets. Source: World Gold Council

Gold's Volatility is Usually Lower Than Many Markets Annualized volatility (%) of weekly returns for selected asset classes; Jan 87-Jul 10* JPM 3M T-Bill Index BarCap US Treasury Agg BarCap US Credit Index BarCap US High Yield BarCap Global Tsy Agg ex US JPM EM sovereign debt Gold (US\$/oz) MSCI US MSCI EAFE S&P GSCI MSCI EM *Except for MSCI EM Index (Dec 87-Jul 10) and JP Morgan EM Sovereign Debt Index (Dec 90-Jul 10) due to data availability Source: LBMA, JP Morgan, Barclays Capital, MSCI Barra, Standard & Poor's, World Gold Council

Allocations to Gold Tend to Reduce Value at Risk Value at risk for a US\$10mn portfolio investment with and without gold* *VaR or Value at Risk is a risk management measure of maximum expected loss given a confidence level. Correlation estimates for VaR computation used weekly return data from Jan 1987 July 2010. Each portfolio is structured to obtain the maximum risk adjusted return. In this case the allocation to gold was 4%. Source: LBMA, JP Morgan, Barclays Capital, MSCI Barra, Standard & Poor's, World Gold Council

Additionally, in the Past, Gold has Outperformed Other Assets in High Inflation and Performs Well in Deflation... Performance of various asset in different scenarios 2011 2015¹ Performance based on a 1-5 scale (5=best performance; 1=worst performance). 2 The Wilshire 5000 Index is used for US equities. 3 10-year US Treasury bonds used as a proxy for all US bonds. 4 Baseline scenario is the average scenario depicting the normal of steady growth and moderate inflation. 5 Deflation scenario is representative of markets marked by depreciating prices. 6 Stagflation is an economic scenario that combines high inflation and negative growth. 7 Inflation scenario is a scenario of high inflation and average growth.

and it Usually Does not Perform Like a Commodity in Periods of Systemic Risk... Performance on various commodities and commodity indices for the period Apr 29 May 6 and Q2 * Volatility is the annualized standard deviation of daily returns for the period. Source: Bloomberg

and the Gold Market is Deeper Than Other Markets Size of Various Markets *Based on the open interest in oil futures contracts across major oil futures exchanges. Source: BIS, Bloomberg, GFMS, SIFMA

Many Options to Suit Needs and Preferences Coins and bars Bullion vs. numismatic. Economy of scale. Gold accounts available from bullion banks Allocated: specific bars identified by number, hallmark and weight. Unallocated: share in a pool of gold; can be lent out. Mining equities A complement to bullion. Over-the-counter products ETFs Fully-backed. Leveraged. Gold futures and options Exchanges around the world COMEX being the largest for gold.

Disclosure FOR INVESTMENT PROFESSIONAL USE ONLY. NOT FOR PUBLIC USE.

IMPORTANT RISK INFORMATION As with all investments, investing in gold entails risk. There can be no assurance that gold will maintain its long-term value in terms of purchasing power in the future or that gold will continue to exhibit low to negative correlation with other asset classes. You could lose money by investing in gold. ETF trade like stocks, fluctuate in market value and may trade at prices above or below the ETFs net asset value. Brokerage commissions and ETF expenses will reduce returns. Although shares of GLD have historically been readily tradable on securities exchanges, there can be no assurance that an active trading market will be maintained. Diversification does not ensure profit or guarantee against loss. Commodities and commodity-index linked securities may be affected by changes in overall market movements, changes in interest rates, and other factors such as weather, disease, embargoes, or political and regulatory developments, as well as trading activity of speculators and arbitrageurs in the underlying commodities. Important Information Relating to SPDR Gold Trust: The SPDR Gold Trust (GLD) has filed a registration statement (including a prospectus) with the Securities and Exchange Commission (SEC) for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents GLD has filed with the SEC for more complete information about GLD and this offering. You may get these documents for free by visiting EDGAR on the SEC website at www.sec.gov or by visiting www.spdrgoldshares.com. Alternatively, the Trust or any authorized participant will arrange to send you the prospectus if you request it by calling 1-866-320-4053. GLD is not an investment company registered under the Investment Company Act of 1940 (the 1940 Act) and is not subject to regulation under the Commodity Exchange Act of 1936 (the CEA). As a result, shareholders of the Trust do not have the protections associated with ownership of shares in an investment company registered under the 1940 Act or the protections afforded by the CEA. GLD shares trade like stocks, are subject to investment risk and will fluctuate in market value. The value of GLD shares relates directly to the value of the gold held by GLD (less its expenses), and fluctuations in the price of gold could materially and adversely affect an investment in the shares. The price received upon the sale of the shares, which trade at market price, may be more or less than the value of the gold represented by them. GLD does not generate any income, and as GLD regularly sells gold to pay for its ongoing expenses, the amount of gold represented by each Share will decline over time. Investing involves risk, and you could lose money on an investment in GLD. Please see the GLD prospectus for a detailed discussion of the risks of investing in GLD shares.
