company

(Do not check if a smaller reporting company)

Edgar Filing: MEADOW VALLEY CORP - Form 10-K

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's voting and non-voting common equity stock held by non-affiliates was \$69,736,267. The aggregate market value was computed using the price at which the common equity was last sold as of the last day of the registrant's most recently completed second fiscal quarter.

Determination of stock ownership by non-affiliates was made solely for the purpose of this requirement, and the registrant is not bound by these determinations for any other purpose.

On March 24, 2008, there were 5,148,404 shares of common stock outstanding.

Special Note Regarding Forward Looking Statements

This Annual Report on Form 10-K and the documents we incorporate by reference herein include forward-looking statements. All statements other than statements of historical facts contained in this Form 10-K and the documents we incorporate by reference, including statements regarding our future financial position, business strategy and plans and objectives of management for future operations, are forward-looking statements. The words believe, may, estimate, continue, anticipate, intend, should, plan, could, target, potential, is likely, will, expect and similar words relate to us, are intended to identify forward-looking statements within the meaning of the safe harbor provisions of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs.

These forward-looking statements are subject to a number of risks, uncertainties and assumptions described in Risk Factors and elsewhere in this Annual Report on Form 10-K. In addition, our past results of operations do not necessarily indicate our future results. Moreover, the ready-mix concrete and the heavy highway construction business are very competitive and rapidly changing. New risk factors emerge from time to time and it is not possible for us to predict all such risk factors, nor can we assess the impact of all such risk factors on our business or the extent to which any risk factor, or combination of risk factors, may cause actual results to differ materially from those contained in any forward-looking statements.

Except as otherwise required by applicable laws, we undertake no obligation to publicly update or revise any forward-looking statements or the risk factors described in this Annual Report on Form 10-K or in the documents we incorporate by reference, whether as a result of new information, future events, changed circumstances or any other reason after the date of this Annual Report on Form 10-K. You should not rely upon forward-looking statements as predictions of future events or performance. We cannot assure you that the events and circumstances reflected in the forward-looking statements will be achieved or occur. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements.

PART I

Item 1. Business

About Meadow Valley

Meadow Valley Corporation (the Company, Meadow Valley, we, us and our), based in Phoenix, Arizona, is engaged in the construction industry as both a provider of construction services and a supplier of construction materials. Our construction services segment (the CSS) specializes in structural concrete construction of highway bridges and overpasses, and the paving of highways and airport runways. The construction materials segment (the CMS) provides ready-mix concrete, sand and gravel products to both itself and primarily to other contractors. The construction materials testing segment (the CMTS) provides geotechnical, environmental and field and laboratory technical services to the construction industry. The CSS operates throughout Nevada and Arizona. The CMS operates in the Las Vegas, Nevada and Phoenix, Arizona metropolitan areas. The CMTS operates in the Las Vegas, Nevada regional area.

Comments on 2007 and 2008

The year of 2007 was A Tale of Two Cities for us. On one hand, it was the best of times for our construction services segment and on the other hand, it was the worst of times for the materials segment. The consolidated result was a 5.3% increase in overall revenue, but a 2.5% decline in net income. Construction services revenue grew 15.5% while the materials segment revenue dropped 9.1%. It appears that 2008 will likely follow the same pattern with the services segment building momentum and the materials segment continuing to be affected by market forces. Construction services backlog at December 31, 2007 increased 93% to \$172.4 million from \$89.5 million as of December 31, 2006. With this amount of backlog, the services segment has excellent revenue opportunities into 2008 and indications of new projects expected to be available for bid give rise to continued optimism for the services segment. The materials segment continues to be hampered by the lingering housing decline, the bottom of which may not yet have been reached. Fortunately for the ready-mix industry, non-residential

Table of Contents

construction spending experienced another year of increased spending and 2008 could be another year of positive growth for non-residential construction which should help alleviate the continuing negative influence of the housing sector decline. If the U.S. economy were to continue to decline, then both segments could experience impacts that would make business conditions even more difficult.

Our aggregate bonding capacity, which determines the cumulative value of construction contracts that our services segment can accumulate at any given time, increased from \$200 million at the beginning of 2007 to approximately \$250 million at the end of 2007, and our single project bonding limit has increased to approximately \$70 million from approximately \$50 million. Increased bonding capacity permits us to be more selective in the projects we choose to bid which may result in less competition, improved margins or better utilization of company assets.

History

Meadow Valley Corporation was incorporated in Nevada on September 15, 1994. In October and November 1995, we sold 1,926,250 units of our securities to the public at \$6.00 per unit (the Public Offering). Each unit consisted of one share of \$.001 par value common stock and one common stock purchase warrant exercisable to purchase one additional share of our common stock at \$7.20 per share. These warrants expired unexercised on December 31, 2002.

We currently have three subsidiaries, Meadow Valley Contractors, Inc. (MVCI) and Apex Testing Corp. (Apex), which are each wholly owned, and Ready Mix, Inc. (RMI), of which we own 69% of its common stock. MVCI was founded in 1980 as a heavy construction contractor and has been providing construction services since inception. We purchased all of the outstanding common stock of MVCI on October 1, 1994, therefore, references to our history includes the history of MVCI.

Through MVCI, we provide construction services. MVCI operates as a heavy highway contractor on both public and private infrastructure projects, including the construction of bridges and overpasses, channels, roadways, highways and airport runways. MVCI generally serves as the prime contractor for public sector customers (such as federal, state and local governmental authorities) in the States of Nevada and Arizona.

In 1996, we expanded into the construction materials segment of the construction industry with the formation of RMI. RMI manufactures and distributes ready-mix concrete, crushed landscaping rock and other miscellaneous rock and sand products. RMI owns and operates seven ready-mix concrete batch plants three in the Las Vegas, Nevada area, one in Moapa, Nevada and three in the Phoenix, Arizona area and owns or leases approximately 180 ready-mix trucks as well as a small fleet of tractors and trailers used for hauling raw materials. RMI operates two aggregate production facilities located in the vicinity of Las Vegas, Nevada, that supply approximately 95% of the total sand and gravel that are part of the raw materials for the ready-mix concrete that it manufactures and delivers. RMI ready-mix batch plants in the Phoenix, Arizona area are located on or near sand and gravel production sites operated by third parties from whom RMI purchases sand and gravel. RMI primarily targets customers such as concrete subcontractors, prime contractors, homebuilders, commercial and industrial property developers and homeowners. RMI began its ready-mix concrete operation from its first location in North Las Vegas, Nevada in March 1997, then began processing rock and sand from its Moapa, Nevada pit in November 1999, and expanded into the Phoenix, Arizona area with two plants in 2000. RMI completed an initial public offering in August 2005. Following RMI s initial public offering, we owned approximately 53% of RMI s common stock. During 2007, we purchased an additional 620,212 shares of RMI s common stock, bringing our total number of common stock shares owned to 2,645,212, or approximately 69%, of RMI s 3,809,500 total shares outstanding.

Consistent with our dual interests in construction services and construction materials, through MVCI we also own one portable hot mix asphalt plant, a rubberized asphalt plant, and related asphalt paving equipment as well as a portable crushing and screening plant. The portability of these plants provides us an opportunity to enhance our construction operations in our existing markets, improve our competitiveness and generate increased revenues on projects that call for large quantities of asphaltic concrete, recycled asphalt, or rubberized asphalt. These capabilities should also open opportunities to provide construction materials or to subcontract our services to other construction companies.

Table of Contents

Our backlog (anticipated revenue from the uncompleted portions of awarded projects) was approximately \$172.4 million at December 31, 2007, compared to approximately \$89.5 million at December 31, 2006, and consists of various projects in Nevada and Arizona. Approximately \$128.0 million of backlog is scheduled for completion during 2008. We have been the prime contractor on projects funded by a number of governmental authorities, including the Federal Highway Administration, the Arizona Department of Transportation, the Nevada Department of Transportation, the Clark County (Nevada) Department of Public Works, the Utah Department of Transportation, the City of Phoenix, the Salt Lake City (Utah) Airport Authority and the New Mexico State Highway and Transportation Department.

In the second quarter of 2006, we purchased the operating assets of the Las Vegas, Nevada office of an existing materials testing company. We began operating this subsidiary as Apex Testing Corp. Apex provides geotechnical, environmental and field and laboratory technical services to various contractors in all construction industries in the Las Vegas, Nevada regional area.

Business Strategy

The business strategies we employ or are implementing include:

Continuing to actively bid in the construction markets in Arizona and Nevada and improving construction project profitability. We will continue to focus our construction services within the geographic markets that have historically produced the best profits. Our emphasis is on building transportation infrastructure and other related heavy civil projects in our core markets of Arizona and Nevada. At the same time, we strive to improve margins on new contracts by, among other things, increasing, when possible, margins on new work bidding, maximizing labor and equipment productivity, negotiating more favorable material purchase contracts and employing the most competitive subcontractors.

Growing our client base for private construction services and ensuring satisfaction of existing private customer base. We have succeeded in attracting and retaining a nucleus of non-public clients for whom we regularly perform construction services. We believe we can generate better margins in the private sector, therefore we seek to grow our client base, add new customers and maintain continued customer satisfaction.

Continuing to increase working capital and liquidity. We strive to grow cash balances and employ available financing opportunities that will maximize working capital and liquidity. By doing so, we expect to increase bonding capacity, thereby allowing us to bid additional or larger projects.

Continuing diligent pursuit of the successful resolution of three construction claims. Substantial costs were incurred in completing certain projects in New Mexico and Utah for which we are seeking reimbursement. We believe that much of the costs are reimbursable due to changed conditions, owners plan errors and omissions, conflicting utility right of ways and delays not attributable to us. As of December 31, 2007, the total amount of claims on the New Mexico and Utah projects that have been submitted and remain unpaid is approximately \$19.1 million, of which \$15.1 million represents our portion of the claims.

Implementing the growth strategy for Ready Mix, Inc. We will seek to enter new geographic sub-markets initially within the Phoenix, Arizona and Las Vegas, Nevada metropolitan areas. These markets will likely be located at the outer edges of the two metropolitan markets, but at a sufficient distance from these metropolitan markets so as to require the development of newer plants to service job sites in these areas.

Acquiring sand and gravel mining rights. A key strategy for the future growth and value of the construction materials segment is the acquisition of mining properties, either by purchase or lease, whichever is most advantageous, to decrease dependency on third-party suppliers, to control production and to increase revenue from the sale of sand and gravel products.

Table of Contents

Market Overview

The construction market in the United States remains relatively stable in spite of the continued depressed state of the residential sector. According to data contained in *The 2008 U.S. Markets Construction Overview* published by FMI Corporation (FMI), total construction put in place in the U.S. in 2007 (in current dollars) was valued at \$1.15 trillion, a 4% decline from 2006. Total residential spending decreased 16% in 2007 from 2006 but was again mitigated by the 10% increase in non-residential construction spending. Highway and street construction spending in 2007 increased approximately \$4.5 billion, or 6% from 2006. According to FMI, a leading construction industry consulting and investment banking firm, total construction spending in 2008 is expected to increase 6%, due mostly to continued strength in non-residential construction activity.

Certain sectors of the local construction markets we operate in influence our business more than others. The residential sector, both single-family and multi-family, represents a primary source of revenue for our construction materials segment as ready-mix concrete is a key construction material used in home, apartment and condominium construction. The residential sector is primarily driven by population and job growth. The development of new residential subdivisions is invariably accompanied by new or improved streets, commercial, industrial and public buildings, highways and utilities, all of which provide revenue opportunities for both our services and materials segments. According to data from the U.S. Census Bureau, the value of new privately-owned housing units constructed in 2007, when compared to the value constructed in 2006, declined approximately 28.6% and 20.0% in Arizona and Nevada, respectively.

Because our business currently focuses primarily in Arizona and Nevada, certain demographic drivers, such as population growth, have a significant impact on the local construction market. According to projections from the U.S. Census Bureau, Nevada and Arizona rank #1 and #2, respectively, in estimated population growth between 2000 and 2030. By 2030, Nevada is predicted to grow 114.3%, Arizona 108.8% and Florida is third at 79.5%. More specifically, between 2006 and 2007, the estimated populations of Clark County, Nevada and Maricopa County, Arizona have increased 4.4% and 3.0%, respectively.

Construction Services Segment (CSS)

Operations

The CSS constructs highways, bridges, overpasses, airport runways and constructs other heavy civil projects. From our Phoenix, Arizona corporate office and area offices in Phoenix, Arizona and North Las Vegas, Nevada, we market (primarily by responding to solicitations for competitive bids) and manage all of our projects. Project management is also located on-site to provide direct supervision for operations.

We consider a number of factors when determining whether to bid on a project, including profitability, the location of the project, likely competitors and our current and projected workloads. We use a computer-based project estimating system which reflects our bidding and construction experience and we perform detailed quantity take-offs from bidding documents, which we believe helps identify a project's risks and opportunities. We develop comprehensive estimates with each project divided into phases and line items for which separate labor, equipment, material, subcontractor and overhead cost estimates are compiled. Once a project begins, the estimate provides us with a budget against which ongoing project costs are measured. There can be no assurance that every project will attain its budgeted costs. A number of factors can affect a project's profitability including weather, availability of a quality workforce and actual productivity rates. Each month the project manager updates the project's projected performance at completion by using actual costs-to-date and re-forecasted costs-to-complete for the balance of the work remaining. Regular review of these estimated costs-at-completion reports allow project, area and corporate management to be as responsive as possible to cost overruns or other problems that may affect profitability.

We own or lease most of the equipment used in our business, including cranes, backhoes, graders, loaders, trucks, trailers, pavers, rollers, construction material processing plants, batch plants and related equipment. On occasion, equipment that we own may be rented on a short-term basis to third parties. The net book value of our equipment in the CSS at December 31, 2007 was approximately \$9.8 million.

Table of Contents

Our corporate management oversees operational and strategic issues and, through the corporate accounting staff, provides administrative support services to area managers and individual project management at the project site. The latter are responsible for planning, scheduling and budgeting operations, equipment maintenance and utilization and customer satisfaction. Area managers and project managers monitor project costs on a daily and weekly basis while corporate management monitors such costs monthly.

Raw materials (primarily concrete, aggregate and steel) used in our operation are available from a number of sources. There are usually a sufficient number of materials suppliers within our market area to assure us of adequate competitive bids for supplying such raw materials. Generally, we will obtain several bids from competing concrete, asphalt or aggregate suppliers whose reserves of such materials will normally extend beyond the expected completion date of the project. Costs for raw materials vary depending upon project duration, construction season, and other factors; but, generally, prices quoted to us for raw materials are fixed for the project's duration.

Projects and Customers

We perform work for both private and public owners. In the public sector, our principal customers are the state departments of transportation in Nevada and Arizona as well as bureaus and departments of municipal and county governments in those states. Since completing the final contracts in New Mexico, we have ceased the CSS operation in New Mexico. In the private sector, we perform work primarily for land developers. For the year ended December 31, 2007, revenue generated from four projects in Nevada and Arizona represented approximately 30% of our consolidated revenue, or 47% of the CSS revenue. The discontinuance of any projects, a general economic downturn or a reduction in the number of projects let out for bid in any of the states in which we operate could have a material adverse effect on our business, financial condition and results of operations.

For the years ended December 31, 2007, 2006 and 2005, we recognized a significant portion of our consolidated revenue from the following customers (shown as an approximate percentage of consolidated revenue):

	For the Years Ended December 31,		
	2007	2006	2005
Arizona Department of Transportation (Public)	24.7%	20.9%	21.0%
Clark County (Public)	21.0%	9.1%	23.5%
Del Webb (Private)	2.9%	5.1%	11.6%

The Contract Process

Our projects are obtained primarily through competitive bidding and negotiations in response to advertisements by federal, state and local government agencies and solicitations by private parties. We submit bids after a detailed review of the project specifications, an internal review of our capabilities and equipment availability and an assessment of whether the project is likely to attain targeted profit margins. We own, lease, or are readily able to rent, most equipment necessary to complete the projects upon which we bid. After computing estimated costs of the project to be bid, we add our desired profit margin before submitting the bid. We believe that success in the competitive bidding process involves (i) being selective on projects bid upon in order to optimize use of resources, (ii) identifying projects which require our specific expertise, (iii) becoming familiar with all aspects of the project to avoid costly bidding errors and (iv) analyzing the local market to determine the availability and cost of labor and the degree of competition. Since 1995, we have been awarded contracts on approximately 21% of the projects upon which we have bid. A substantial portion of our revenue is derived from projects that involve fixed unit price contracts under which we are committed to provide materials or services at fixed unit prices (such as dollars per cubic yard of earth or concrete, or linear feet of pipe). The unit price is determined by a number of factors including haul distance between the construction site and the warehouses or supply facilities of local material suppliers and to or from disposal sites, site characteristics and the type of equipment to be used. While the fixed unit price contract generally shifts the risk of estimating the quantity of units for a particular project to the customer, any increase in our unit cost over its unit bid price, whether due to inefficiency, faulty estimates, weather, inflation or other factors, must be borne by us.

Most public sector contracts provide for termination of the contract at the election of the customer. In such event we are generally entitled to receive a small cancellation fee in addition to reimbursement for all costs we incurred on the project. Many of our contracts are subject to completion requirements with liquidated damages assessed against us

if schedules are not met. In the past, these provisions have not materially adversely affected our business.

Table of Contents

We are also obligated to perform work as directed to do so by the owner. If we believe the directives to be outside the scope of the original bid documents, or if the physical conditions as found on the project are different than provided in the bid documents, or for any variety of reasons we believe the directive to perform the work creates costs that could not reasonably be ascertained from the bid documents, the contract permits us to make a claim for equitable adjustment to the contract price. Such equitable adjustment requests are often called contract claims. The process for resolving claims may vary from one contract to another, but in general, there is a process to attempt resolution at the project supervisory level or with higher levels of management within the Company and the owner. Depending upon the terms of the contract, claim resolution may employ a variety of resolution methods including mediation, arbitration, binding arbitration, litigation or other methods. Regardless of the process, it is typical that when a potential claim arises on a project, we fulfill the obligation to perform the work and must incur the costs in doing so. We will not recoup the costs until the claim is resolved. It is not uncommon for the claim resolution process to take months, or, if it entails litigation, years.

Contracts often involve work periods in excess of one year. Revenue on uncompleted fixed price contracts is recorded under the percentage-of-completion method of accounting. Revenue on contracts is recognized when direct costs are incurred. A common construction industry practice is for the customer to retain a portion of the project's billings, generally not exceeding 10%, until the project is completed satisfactorily and all of our obligations are fulfilled.

We act as prime contractor on most of our construction projects and will subcontract certain activities such as electrical, mechanical, guardrail and fencing, signing and signals, foundation drilling, steel erection and other specialty work to others. As prime contractor, we bill the customer for work performed and pay the subcontractors from funds received from the customer. Occasionally, we provide our services as a subcontractor to another prime contractor. As a subcontractor, we will generally receive the same or similar profit margin as we would as a prime contractor, although revenue to us will be smaller because we only contract a part of the project. As a prime contractor, we are responsible for the performance of the entire contract, including work assigned to subcontractors. Accordingly, we are subject to liability associated with the failure of subcontractors to perform as required under the contract. We occasionally require our subcontractors to furnish bonds guaranteeing their performance, although affirmative action regulations require us to use our best efforts to hire minority subcontractors for a portion of the project and some of these subcontractors have historically not been able to obtain surety bonds. On average, we have not required performance bonds for less than 10% of the dollar amount of our subcontracted work, but could likely increase the percentage of bonded subcontractors in the future. We are generally aware of the skill levels and financial condition of our subcontractors through our direct inquiry of the subcontractors and contract partners of the subcontractors, as well as our review of financial information provided by the subcontractors and third party reporting services including credit reporting agencies and bonding companies.

In connection with public sector contracts, we are required to provide various types of surety bonds guaranteeing our own performance. Our ability to obtain surety bonds depends upon our net worth, liquid working capital, past performance, management expertise and other factors. Surety companies consider such factors in light of the amount of our surety bonds then outstanding and the surety companies' current underwriting standards, which may change from time to time. See "Insurance and Bonding" below.

Backlog

Our backlog (anticipated revenue from the uncompleted portions of awarded projects) was approximately \$172.4 million at December 31, 2007, compared to approximately \$89.5 million at December 31, 2006. Much of our backlog depends upon our success in the competitive bid process. Bidding strategies and priorities may be influenced and changed from time to time by the level of our backlog and other internal and external factors. A portion of our anticipated revenue in any year is not reflected in our backlog at the start of the year because some projects, or portions of projects, are initiated and completed in the same fiscal year. Currently, approximately \$128.0 million of our backlog is scheduled for completion during 2008. Revenue may be impacted in any one period by the backlog at the beginning of the period. Accordingly, revenue in the future may be significantly reduced if we are unable to obtain substantial new projects in 2008. We include a construction project in our backlog at such time as a contract is awarded or a firm letter of commitment is obtained. We believe that our backlog figures are firm, subject to provisions

contained in some contracts, which allow customers to modify or cancel the contracts at any time upon payment of a relatively small cancellation fee. We have not been adversely affected by contract cancellations or modifications in the past.

Table of Contents

Competition

We believe that the primary competitive factors as a prime contractor in the heavy construction industry are price, reputation for quality work, financial strength, knowledge of local market conditions and estimating abilities. We believe that we compete favorably with respect to each of the foregoing factors on projects that we are able to bid. Most of our projects involve public sector work for which contractors are first pre-qualified to bid and then are chosen by a competitive bidding process, primarily on the basis of price. We compete with a large number of small owner/operator contractors that tend to dominate smaller (under \$4 million) projects. When bidding on larger infrastructure projects, we also compete with larger, well-capitalized regional and national contractors, many of whom have larger net worth, higher bonding capacity and more construction personnel. Larger competitors typically have unlimited bonding capacity and, therefore, are able to bid on more work. Except for bonding capacity and liquidity, we contend that we are not at a competitive disadvantage in relation to our larger competitors. With respect to our smaller competitors, we believe that our current bonding capacity and long relationships with subcontractors and suppliers may be a competitive advantage.

In the event of a decrease of work available in the private construction market, it is foreseeable that contractors may exit the private market and enter the public market segment resulting in increased competition.

Insurance and Bonding

We carry builders risk insurance on a limited number of projects and depending upon our assessment of individual project risk versus the cost of insurance.

We are required to provide a surety bond on nearly all publicly funded projects and on some private projects. Our ability to obtain bonding, and the amount of bonding required, is primarily determined by our experience, net worth, liquid working capital (consisting of cash and accounts receivable in excess of accounts payable and accrued liabilities), performance history, the number and size of projects under construction and other factors. Surety companies consider such factors in light of the amount of our surety bonds then outstanding and the surety companies current underwriting standards, which may change from time to time. The larger the project and/or the more projects in which we are engaged, the greater our bonding, net worth and liquid working capital requirements will be. Bonding requirements vary depending upon the nature of the project to be performed. We generally pay a fee to bonding companies based upon the amount of the contract to be performed. Because these fees are generally payable at the beginning of a project, we must maintain sufficient working capital to satisfy the fee prior to receiving revenue from the project. Operating losses may result in decreased liquidity and a change in our surety credit. Our current bonding limits are consistent with our recent bidding activity. Our single project bonding limit is currently approximately \$70 million and our aggregate program maximum is approximately \$250 million. We believe our bonding capacity will continue to improve commensurate with our ongoing performance and as bonding capacity increases, so too will our bidding opportunities. Therefore, we believe that contract revenue will increase as our bonding capacity increases, although no assurance can be given that we will actually experience such results.

Marketing

Most of our contract revenue is from projects we obtain primarily through the process of competitive bidding. Accordingly, for competitive bid projects our marketing efforts are limited to subscribing to bid reporting services and monitoring trade journals and other industry sources for bid solicitations by various governmental authorities. In response to a bid request, we submit a proposal detailing our qualifications, the services to be provided and the cost of the services to the soliciting entity which then, based on their evaluation of the proposals submitted, awards the contract to the successful bidder. Generally, the contract for a project is awarded to the lowest bidder, although other factors may be taken into consideration such as the bidder's track record for compliance with bid specifications and procedures and their construction experience. The balance of our CSS work is obtained through negotiation or being included on a preferred bidder's list. We strive to constantly improve our relationships with such customers by being responsive and building quality work.

Table of Contents

Construction Materials Segment (CMS)

Operations

We began our construction materials operations in the first quarter of 1997 with the start-up of RMI. RMI currently operates seven ready-mix concrete batch plants three in the Las Vegas, Nevada area, one in Moapa, Nevada and three in the Phoenix, Arizona area and approximately 180 ready-mix trucks. The CMS operates two aggregate production facilities located in the vicinity of Las Vegas, Nevada, that supplies approximately 95% of the total sand and gravel requirement for the CMS concrete batch plants in the Las Vegas, Nevada area. Sand and gravel are essential raw materials for the production of ready-mix concrete and adequate aggregate reserves are fundamental to our operations. Our ready-mix batch plants in the Phoenix, Arizona area are located on or near sand and gravel production sites operated by third parties from whom RMI purchases sand and gravel.

Projects and Customers

We target concrete subcontractors, prime contractors, homebuilders, commercial and industrial property developers in the Las Vegas, Nevada and Phoenix, Arizona metropolitan areas. Revenue generated from our top ten CMS customers in Nevada and Arizona represented approximately 18% of our consolidated revenue and represented 49% of the CMS's revenue. The discontinuance of service to any of the above referenced customers or a general economic downturn could have an adverse effect on our future results of operations within this segment. For the years ended December 31, 2007, 2006 and 2005 we did not recognize a significant portion of our consolidated revenue from any individual CMS customer.

Competition

The ready-mix concrete industry is highly competitive. Our ability to compete in the metropolitan areas of Phoenix, Arizona and Las Vegas, Nevada depends largely on the proximity of our customers' job sites to our ready-mix concrete plant locations, our plant operating costs and the prevailing ready-mix concrete prices in each market. Price is the primary competitive factor among suppliers for small or simple jobs, principally in residential construction, while timeliness of delivery and consistency of quality and service as well as price are the principal competitive factors among suppliers for large or complex jobs. Our competitors range from small, owner-operated private companies to subsidiaries or operating units of large, vertically integrated cement manufacturing and concrete products companies.

Our direct competitors in Nevada include Cemex (including assets acquired from Rinker Materials), Silver State Materials, Sierra Ready Mix and Service Rock Products. In Arizona, we compete against Cemex (including assets acquired from Rinker Materials), Arizona Materials, Maricopa Ready Mix, Vulcan Materials and Hanson Materials. We also face significant competition from many smaller ready-mix concrete providers. We believe we compete favorably with all of our competitors due to our plant locations, quality of our raw materials, our delivery and service, and our competitive prices. However, competitors having lower operating costs than we do or having the financial resources to enable them to accept lower margins than we do have competitive advantages over us for jobs that are particularly price-sensitive. Moreover, competitors having greater financial resources to invest in new mixer trucks or build plants in new areas also have competitive advantages over us.

Marketing

General contractors and subcontractors typically select their suppliers of ready-mix concrete. In large, complex projects, an engineering firm or division within a state transportation or public works department may influence the purchasing decision, particularly where the concrete has complicated design specifications. In those projects and in government-funded projects generally, the general contractor or subcontractor usually awards supply orders on the basis of either direct negotiation or competitive bidding. We believe that the purchasing decision in many cases ultimately is relationship-based. Our marketing efforts target general contractors, concrete subcontractors, design engineers and architects whose focus extends beyond the price of ready-mix concrete to product quality and consistency and reducing their in-place cost of concrete.

Table of Contents

The CMS currently has nine full-time sales persons. We also intend to develop and implement training programs to increase the marketing and sales expertise and technical abilities of our staff. Our goal is to maintain a sales force whose service-oriented approach will appeal to our targeted prospective customers and differentiate us from our competitors.

Construction Materials Testing Segment (CMTS)

Operations

We began our construction materials testing operations in the second quarter of 2006 with the start-up of Apex Testing Corp. The CMTS currently operates a full service regional construction materials testing office in the Las Vegas, Nevada area. The CMTS provides geotechnical, environmental and field and laboratory technical services. The CMTS provides these services to a variety of customers in the Las Vegas, Nevada regional area.

Projects and Customers

The CMTS targets customers in all industries of construction contracting. Current customers include residential home builders, commercial contractors, public works prime contractors and actual owners of various projects. The discontinuance of service to any of the above referenced customers or a general economic downturn could have an adverse effect on our future results of operations within this segment. For the year ended December 31, 2007, we did not recognize a significant portion of our consolidated revenue from any individual CMTS customer.

Competition

The construction materials testing industry is very competitive. Our ability to compete for basic soil or concrete slab testing, principally in residential construction, inspection expertise and consistency of quality and service as well as price are the principal competitive factors for large public works projects or complex jobs. Our competitors range from small, owner-operated private companies to subsidiaries or operating units of large, vertically integrated engineering and testing firms.

Marketing

General contractors and subcontractors typically select their materials testing firms. In large, complex projects, materials testing firms need to be pre-qualified to be eligible to maintain the quality control program of a project, particularly where the concrete or other construction materials have complicated design specifications. In those projects and in government-funded projects generally, the general contractor or subcontractor usually awards the materials testing and quality control portion of the project on the basis of either direct negotiation or competitive bidding. We believe that the purchasing decision in many cases ultimately is relationship-based. Our marketing efforts target general contractors, concrete subcontractors, design engineers, land developers and owners whose focus extends beyond the price of professional services to expert inspection and supervision of the quality control process.

The CMTS currently has one professional engineer who is licensed in both Utah and Nevada. He is also a certified environmental manager in the State of Nevada, and a certified underground storage tank consultant in the State of Utah. We have one engineer-in-training and one graduate engineer who is also a certified soil and groundwater sampler in the State of Utah. There are eleven field inspectors as well as three certified laboratory technicians. We also intend to develop and implement training programs to increase the geotechnical and environmental expertise and technical abilities of our field staff. Our goal is to maintain a field inspection and technician staff whose service-oriented approach will appeal to our targeted prospective customers and differentiate us from our competitors.

Table of Contents

Meadow Valley Corporation and our Segments

Seasonality

The construction industry is seasonal, generally due to inclement weather and length of daylight hours occurring in the winter months. Accordingly, we may experience a seasonal pattern in our operating results with lower revenue in the first and fourth quarters of each calendar year. Quarterly results may also be affected by the timing of bid solicitations by governmental authorities, the stage of completion of major projects and revenue recognition policies. Results for any one particular quarter, therefore, may not be indicative of results for other quarters or for the year.

Insurance

We maintain general liability and excess liability insurance covering our owned and leased construction equipment and workers' compensation insurance in amounts we believe are consistent with our risks of loss and in compliance with specific insurance coverage required by our customers as a part of the bidding process. We carry liability insurance of \$11 million per occurrence, which we believe is adequate for our current operations and consistent or greater than the requirements of projects currently under construction by our construction services segment.

Government Regulation

Our operations are subject to compliance with regulatory requirements of federal, state and municipal authorities, including regulations covering labor relations, safety standards, affirmative action and the protection of the environment including requirements in connection with water discharge, air emissions and hazardous and toxic substance discharge. Under the Federal Clean Air Act and Clean Water Act, we must apply water or chemicals to reduce dust on road construction projects and to contain water contaminants in run-off water at construction sites. We may also be required to hire subcontractors to dispose of hazardous wastes encountered on a project. We believe that we are in substantial compliance with all applicable laws and regulations. However, future amendments to current laws or regulations imposing more stringent requirements could have a material adverse effect on us.

Employees

At February 2, 2008, we employed approximately 90 salaried employees (including our management personnel and executive officers) and approximately 420 hourly employees. The number of hourly employees varies depending upon the amount of construction in progress. During the year ended December 31, 2007, the number of hourly employees ranged from approximately 460 to approximately 580 and averaged approximately 520. None of our employees belong to a labor union and we believe our relationship with our employees is satisfactory.

Website Access

Our website address is www.meadowvalley.com. On our website we make available, free of charge, our annual report on Form 10-K, our most recent quarterly reports on Form 10-Q, current reports on Form 8-K, Forms 3, 4, and 5 related to beneficial ownership of our securities, code of ethics and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the United States Securities and Exchange Commission. The information on our website is not incorporated into, and is not part of, this report.

Table of Contents

Item 1A. Risk Factors

The risk factors listed in this section and other factors noted herein or incorporated by reference could cause our actual results to differ materially from those contained in any forward-looking statements. The following risk factors, in addition to the information discussed elsewhere herein, should be carefully considered in evaluating us and our business:

We are Subject to the Reporting Requirements of Federal Securities Laws, Which Impose Additional Burdens. We are a public reporting company and accordingly subject to the information and reporting requirements of the Exchange Act and other federal securities laws, including compliance with the Sarbanes-Oxley Act of 2002. As a public company, we expect these new rules and regulations to increase our compliance costs in the future and to make certain activities more time consuming and costly.

We incur costs associated with our public company reporting requirements, including certain requirements under the Sarbanes-Oxley Act of 2002, as well as new rules implemented by the SEC and the Financial Industry Regulatory Authority. We expect that these rules and regulations, in particular Section 404 of the Sarbanes-Oxley Act of 2002, to significantly increase our legal and financial compliance costs and to make some activities more time-consuming and costly. Like many smaller public companies, we face a significant impact from required compliance with Section 404 of the Sarbanes-Oxley Act of 2002. Section 404 currently requires management of public companies to evaluate the effectiveness of internal control over financial reporting and will shortly require our independent auditors to attest to the effectiveness of such internal controls and the evaluation performed by management.

As a public company, these new rules and regulations may make it more difficult and expensive for us to obtain director and officer liability insurance in the future, and we may be required to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same coverage. As a result, it may be more difficult for us to attract and retain qualified persons to serve on our board of directors or as executive officers.

If We Fail to Maintain an Effective System of Internal Controls, We May Not be Able to Accurately Report Our Financial Results or Prevent Fraud. As a Result, Current and Potential Shareholders Could Lose Confidence in Our Financial Reporting, Which Could Harm Our Business and the Trading Price of Our Stock. Effective internal controls are necessary for us to provide reliable financial reports and effectively prevent fraud. If we cannot provide financial reports or prevent fraud, our business reputation and operating results could be harmed. Inferior internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our stock.

Your Ownership Could be Diluted by Future Issuances of Our Stock, Options, Warrants or Other Securities. Your ownership in the Company may be diluted by future issuances of capital stock or the exercise of outstanding or to be issued options, warrants or convertible notes to purchase capital stock. In particular, we may sell securities in the future in order to finance operations, expansions or particular projects or expenditures.

Our Certificate of Incorporation Authorizes our Board of Directors to Create New Series of Preferred Stock Without Further Approval by Our Stockholders, Which Could Adversely Affect the Rights of the Holders of our Common Stock or Delay or Prevent a Change in Control. Our board of directors has the authority to fix and determine the relative rights and preferences of our preferred stock. Our board of directors also has the authority to issue preferred stock without further stockholder approval. As a result, our board of directors could authorize the issuance of a series of preferred stock that would grant to holders the preferred right to our assets upon liquidation, the right to receive dividend payments before dividends are distributed to the holders of common stock and the right to the redemption of the shares, together with a premium, prior to the redemption of our common stock. In addition, our board of directors could authorize the issuance of a series of preferred stock that has greater voting power than our common stock or that is convertible into our common stock, which could decrease the relative voting power of our common stock or result in dilution to our existing stockholders. In addition, our issuing preferred stock could have the effect of delaying or preventing a change in control.

Table of Contents

Our Company's Stock Price is Highly Volatile. The market price of our Company's stock is highly volatile and subject to wide fluctuations in response to factors such as the following, some of which are beyond our control:

quarterly variations in our operating results;

operating results that vary from the expectations of securities analysts and investors;

changes in the construction and real estate industries;

changes in expectations as to our future financial performance, including financial estimates by securities analysts and investors or such guidance provided by us;

announcements by us or our competitors of significant contracts, acquisitions, dispositions, strategic partnerships, joint ventures or capital commitments;

additions or departures of key personnel;

future issuances and sales of our securities;

trading and volume fluctuations;

other risk factors as discussed above; and

other unforeseen events.

Stock markets in the United States often experience extreme price and volume fluctuations. Market fluctuations, as well as general political and economic conditions such as acts of terrorism, a recession or interest rate or currency rate fluctuations, could adversely affect the market price of our Company's stock.

We Do Not Intend to Pay Dividends on Our Common Stock. We have never declared or paid any cash dividends on our capital stock. We currently intend to retain any future earnings and do not expect to pay any dividends in the foreseeable future.

Anti-Takeover Provisions Affecting Our Company Could Prevent or Delay a Change of Control that may be Beneficial to Its Shareholders. Provisions of our certificate of incorporation and bylaws, provisions of our Rights Agreement and provisions of applicable Nevada law and applicable Federal and state regulations may discourage, delay or prevent a merger or other change of control that holders of our Company's securities may consider favorable. These provisions could:

delay, defer or prevent a change in control in our Company;

discourage bids for our Company's securities at a premium over the market price;

adversely affect the market price of, and the voting and other rights of the holders of, our Company's securities; or

impede the ability of the holders of our Company's securities to change its management.

We are Dependent on Public Sector Customers. Substantially all of our revenue is generated from projects sponsored by federal, state and local governmental authorities. Consequently, any reduction in demand for our services by these governmental authorities for whatever reason, including a general economic slowdown or a continuation of the current trend toward reducing governmental spending, would have a material adverse effect on our business, financial condition and results of operations. Furthermore, government contracts are generally terminable at will, subject to a relatively small cancellation payment.

We are Responsible for Subcontractor Performance. We act as prime contractor on most of our construction projects and are therefore responsible for performance of the entire contract, including work assigned to subcontractors. Accordingly, we may be subject to substantial liability if a subcontractor fails to perform as required under the prime contract.

A Significant Number of Our Project Contracts are Based on Fixed Unit Price. A substantial portion of our revenue is derived from fixed unit price contracts under which we are committed to provide materials or services at fixed unit prices (such as dollars per cubic yard of earth or concrete). While fixed unit price contracts generally shift the risk of estimating the quantity of units required for a particular project to our customers, any increase in our unit cost over our unit bid price, whether due to inefficiency, faulty estimates, weather, inflation or other factors, must be borne by us and may have a material adverse effect on our business, financial condition and results of operations.

Table of Contents

We Experience Weather and Seasonal Related Variations that May Affect Quarterly Operating Results. The construction industry is seasonal, generally due to inclement weather occurring in the winter months. Accordingly, we generally experience a seasonal pattern in our operating results with lower revenue in the first and fourth quarters of each calendar year than other quarters. Quarterly results may also be affected by the timing of bid solicitations by governmental authorities and the stage of completion of major projects. Results for any one quarter, therefore, may not be indicative of results for other quarters or for the entire year.

Potential Liability for Environmental Damages and Personal Injury. The construction industry is subject to significant risks of statutory, contractual and common law liability for environmental damages and personal injury. We may be liable for claims arising from our on-site or off-site services, including mishandling of hazardous or non-hazardous waste materials, or environmental contamination caused by us or our subcontractors, the costs for which could be substantial, even if we exercised due care and complied with all relevant laws and regulations. We are also subject to worker and third party claims for personal injury resulting in substantial liability for which we may be uninsured. We carry insurance which we consider sufficient to meet regulatory and customer requirements and to protect our assets and operations. Nevertheless, an uninsured claim against us could have a material adverse effect on our business, financial condition and results of operations. Moreover, any inability to obtain insurance of the type and in the amounts required in connection with specific projects could impair our ability to bid on or complete such projects.

An Inability to Secure and Permit Aggregate Reserves Could Negatively Impact Future Operations and Results. Tighter regulations for the protection of the environment and the finite nature of property containing suitable aggregate reserves are making it increasingly challenging and costly to secure and permit aggregate reserves. Although we have thus far been able to secure and permit reserves to support our business, it is likely to become increasingly difficult to do so, and there is no assurance that we will be able to secure and permit reserves in the future.

We are Subject to Significant Bonding Requirements. We are required to provide bid and/or performance bonds in connection with governmental construction projects. Our current bonding limits are approximately \$250 million in the aggregate and approximately \$70 million per project, but there can be no assurance that we will be able to maintain these bonding limits. In addition, new or proposed legislation in various jurisdictions may require the posting of substantial additional bonds or require other financial assurances for particular projects. As a result of our bonding limits, we are restricted in the number and size of projects we may concurrently bid on, which may affect our results of operations.

We are Subject to Regulation. Our operations are subject to compliance with regulatory requirements of federal, state and municipal authorities, including regulations covering labor relations, safety standards, affirmative action and the protection of the environment, including requirements in connection with water discharge, air emissions and hazardous and toxic substance discharge. We believe that we are in substantial compliance with all applicable laws and regulations. However, amendments to current laws and regulations imposing more stringent requirements could have a material adverse effect on us.

There are Risks Associated with Concentration of Construction Projects and Customers. Our operations are primarily situated in the states of Arizona and Nevada. The discontinuance of any projects in these states, a general economic downturn or a reduction, as a result of market conditions, in the number of projects let out for bid in these two states, could have a material adverse effect on our business, financial condition and results of operations.

We Face Intense Competition. Our business and industry are intensely competitive. We compete with a large number of small owner/operator contractors that tend to dominate smaller highway projects, and with larger, well-capitalized regional and national contractors, when bidding on larger infrastructure projects. Moreover, due to currently favorable market conditions in our market areas, additional competition for projects continues to develop. Such additional competition could reduce our profit margins on our projects.

Our Success Depends on Attracting and Retaining Qualified Personnel in a Competitive Environment. The single largest factor in our ability to profitably execute our work is our ability to attract, develop and retain qualified personnel. Our success in attracting qualified people is dependent on the resources available in the individual geographic areas in which we operate and the impact on the labor supply due to general economic conditions as well

as our ability to provide a competitive compensation package and work environment.

Table of Contents

Dependence upon Executive Officers. Our operations are dependent upon the continued services of our executive officers. The loss of services of any of our executive officers, whether as a result of death, disability or otherwise, could have a material adverse effect upon our operations. We have employment agreements with our executive officers and carry key person insurance on their lives.

Strikes or Work Stoppages Could Have a Negative Impact on Our Operations and Results. Strikes or work stoppages by labor unions or attempts to unionize our workers could have a significant negative impact on us.

Unavailability of Insurance Coverage Could Have a Negative Impact on Operations and Results. We maintain insurance coverage as part of our overall risk management strategy and due to requirements to maintain specific coverage in our financing agreements and in most of our construction contracts. Although we have been able to obtain insurance coverage to meet our requirements in the past, there is no assurance that such insurance coverage will be available in the future.

We Use Diesel Fuel, Asphalt Oil and Other Petroleum Based Products That Are Subject to Significant Price Fluctuations. These materials are used to run our equipment and are a significant part of the asphalt paving materials that are used in many of our construction projects. Although we can be partially protected by asphalt or fuel escalation clauses in some of our contracts, not all contracts provide such protection.

Item 1B. Unresolved Staff Comments

None.

Table of Contents**Item 2. Properties**

We owned or leased the following properties at December 31, 2007:

Location	Segment	Purpose	Approximate Building Size in Square Feet	Approximate Land in Acres	Owned/Leased	Monthly Rental	Lease Expires
4602 East Thomas Road, Phoenix, Arizona	CSS, CMS	Corporate office, Area office	18,400	2	Owned		
3430 East Flamingo Suite 100, Las Vegas, Nevada	CMS	Area office	5,900		Leased	\$9,870	03/10/2010

Edgar Filing: MEADOW VALLEY CORP - Form 10-K

Northwest Arizona (1)	CMS	Sand and Aggregate production facility	840	40	Leased	08/27/2008
Northwest Las Vegas, Nevada (1)	CMS	Sand and Aggregate production facility		40	Leased	03/31/2008
Northwest Las Vegas, Nevada (1)	CMS	Ready Mix production facility	440		Leased	
3155 East Patrick Lane Suite #12, Las Vegas, Nevada	CMTS	Area office, laboratory facility	3,300		Leased	\$2,898

(1) Our facility rent is included in the cost of the material which we purchase from the lessors.

(2) Currently we are not mining at this site.

Our CSS may lease office space on a short-term basis based on location, duration, and the availability of facilities at our ongoing construction sites. We have determined that the above properties are sufficient to meet our current needs. We will continue to search for possible additional site locations to expand our operations if market conditions warrant.

Item 3. Legal Proceedings

See Item 8, Note 17 Litigation and Claim Matters in the accompanying notes to consolidated financial statements for information regarding material legal proceedings.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

The Company's common stock was listed on the Nasdaq National Market from October 1995 to August 2001. In August 2001, our securities were transferred to the Nasdaq SmallCap Market and trade under the symbol MVCO. This market has since been renamed the Nasdaq Capital Market. The following table represents the high and low closing prices for our common stock on the Nasdaq Capital Market. As of March 12, 2008, there were approximately 1,000 record and beneficial owners of our common stock. On March 12, 2008, our common stock closed at \$10.08 per share.

	2007 *		2006 *	
	High	Low	High	Low
First Quarter	\$13.11	\$10.31	\$15.59	\$11.12
Second Quarter	14.09	12.81	12.35	10.13
Third Quarter	13.98	11.75	12.34	8.78
Fourth Quarter	13.50	11.29	10.80	9.80

* The quarterly highs and lows are based on daily market closing prices during each respective period.

We have never declared or paid cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. Any future determination to pay cash dividends will be at the discretion of our board of directors and will be dependent upon our financial condition, results of operations, capital requirements, general business conditions and other such factors as our board of directors deems relevant.

Meadow Valley Corporation
Equity Compensation Plan Information

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available
			for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
	320,011	\$ 5.35	150,149

Equity compensation plans approved by security holders (1)

Equity compensation plans not approved by security holders

Total	320,011	150,149
-------	---------	---------

(1) Includes 320,011 options to purchase shares of our common stock issued to employees and directors from our 2004 Plan.

Our approved equity compensation plan, which we refer to as the 2004 Plan, permits the granting of any or all of the following types of awards: (1) incentive and nonqualified stock options, (2) stock appreciation rights, (3) stock awards, restricted stock and stock units, and (4) other stock or cash-based awards. In connection with any award or any deferred award, payments may also be made representing dividends or their equivalent.

We have reserved 1,200,000 shares of our common stock for issuance under the 2004 Plan. As of December 31, 2007, 150,149 shares were available for future grant under the 2004 Plan. The common terms of the stock options are five or ten years and may be exercised after issuance as follows: 33.3% after one year of continuous service, 66.6% after two years of continuous service and 100% after three years of continuous service. The exercise price of each option is no less than the market price of the Company's common stock on the date of grant. Our board of directors has full discretion to modify these terms.

Table of Contents

RMI also maintains an equity compensation plan as follows:

Ready Mix, Inc.
Equity Compensation Plan Information

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders (1)(2)	482,375	\$ 11.54	306,875
Equity compensation plans not approved by security holders			
Total	482,375		306,875

(1) Includes an individual compensation agreement for 116,250 warrants to purchase shares of RMI's common stock issued to RMI's underwriters as a portion of their compensation in connection with RMI's initial public offering.

- (2) Includes
366,125 options
to purchase
shares of RMI's
common stock
issued to RMI's
employees and
directors from
the RMI 2005
Plan.

RMI's approved equity compensation plan, which we refer to as the RMI 2005 Plan, permits the granting of any or all of the following types of awards: (1) incentive and nonqualified stock options, (2) stock appreciation rights, (3) stock awards, restricted stock and stock units, and (4) other stock or cash-based awards. In connection with any award or any deferred award, payments may also be made representing dividends or their equivalent.

RMI has reserved 675,000 shares of its common stock for issuance under the RMI 2005 Plan. As of December 31, 2007, 306,875 shares were available for future grant under the RMI 2005 Plan. The common terms of the stock options are five years and may be exercised after issuance as follows: 33.3% after one year of continuous service, 66.6% after two years of continuous service and 100% after three years of continuous service. The exercise price of each option is no less than the market price of RMI's common stock on the date of grant. RMI's board of directors has full discretion to modify these terms.

We sold 817,120 units of unregistered securities on October 23, 2006. Each unit consisted of one share of the Company's common stock and one tenth of a warrant to purchase one share of the Company's common stock. The exercise price of each warrant is \$12.60 and the warrants are exercisable six months and a day from October 23, 2006 with the exercise period ending October 19, 2011. Each unit was sold for \$9.00 and proceeds net of offering costs were approximately \$6.6 million. The proceeds were used as working capital in order to secure additional bonding capacity. The securities were offered to accredited investors in reliance on Section 4(2) of the Securities Act and Rule 506 promulgated thereunder. Wunderlich Securities, Inc. served as our placement agent. The resale of these securities was registered on Form S-3 and declared effective by the SEC on November 17, 2006.

We did not repurchase any of our equity securities during 2007.

Table of Contents

The graph below compares the cumulative five year total return of holders of Meadow Valley Corporation's common stock with the cumulative total returns of the NASDAQ Composite Index, and the Dow Jones US Heavy Construction Index. The graph tracks the performance of a \$100 investment in our common stock and in the two comparative indices (with the reinvestment of all dividends) from 12/31/2002 to 12/31/2007.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our results of operations and financial condition should be read in conjunction with our consolidated financial statements and notes thereto included elsewhere herein. Historical results and percentage relationships among accounts are not necessarily an indication of trends in operating results for any future period. In these discussions, most percentages and dollar amounts have been rounded to aid presentation. As a result, all such figures are approximations.

Executive Overview

Our performance continues to steadily improve as a result of our decisions to:

- focus on the construction markets of Nevada and Arizona which have historically been more profitable for us,

- be selective in the projects we choose to bid, provide incentives and reward outstanding project management,

concentrate our efforts to prevail in our past construction claims and eliminate distractions from lingering claims as well as to avoid future claims,

gradually increase our bonding capacity in order to bid on larger single projects and increase our contract backlog to levels that provide more sustainable momentum, and

implement expansion plans for our materials segment and focus marketing efforts on non-residential market sector.

Table of Contents**Results of Operations**

The following table sets forth statement of operations data expressed as a percentage of revenue for the periods indicated:

(dollars in thousands)

	For the Years Ended December 31,					
	2007		2006		2005	
Revenue:						
Construction services	\$ 129,262	62.8%	\$ 111,936	57.3%	\$ 116,822	63.5%
Construction materials	75,620	36.7%	83,152	42.5%	67,051	36.5%
Construction materials testing	1,037	0.5%	434	0.2%		0.0%
Total revenue	205,919	100.0%	195,522	100.0%	183,873	100.0%
Gross profit	17,415	8.5%	19,310	9.9%	15,188	8.3%
General and administrative expenses	11,813	5.7%	11,162	5.7%	8,667	4.7%
Income from operations	5,602	2.7%	8,148	4.2%	6,521	3.6%
Interest income	1,558	0.8%	1,010	0.5%	563	0.3%
Interest expense	(239)	-0.1%	(339)	-0.2%	(362)	-0.2%
Other income	368	0.2%	74	0.0%	342	0.2%
Income tax expense	(2,564)	-1.2%	(3,164)	-1.6%	(2,571)	-1.4%
Minority interest in consolidated subsidiary	(664)	-0.3%	(1,563)	-0.8%	(289)	-0.2%
Net income	\$ 4,061	2.0%	\$ 4,166	2.1%	\$ 4,204	2.3%
Depreciation and amortization	\$ 7,082	3.4%	\$ 5,885	3.0%	\$ 4,499	2.4%

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006

Revenue and Backlog. Consolidated revenue improved 5.3% to \$205.9 million for the year ended December 31, 2007, as further referred to as 2007, from \$195.5 million for the year ended December 31, 2006, as further referred to as 2006. The improved revenue resulted from a \$17.3 million increase from the CSS, offset by a decrease in revenue from the CMS of \$7.5 million. The CMS decrease in revenue resulted from a 10.1% decrease in sales of cubic yards of concrete, which we refer to as units, offset by an increase of 3.2% in the average unit sales price. Backlog in the CSS increased to \$172.4 million compared to \$89.5 million a year ago. The beginning backlog in the CSS contributed to the increased revenue in 2007, based on the progress schedules and nature of the contracts contained in the backlog at the beginning of 2007. Because so much of our business stems from competitively bid public works, backlog will fluctuate depending upon the amount and type of contracts that we bid on and win. Bid bonds provided by a surety company are required on most of the contracts that we bid, therefore, any restrictions or limitations in the extension of surety credit can impact the amount and type of contracts available to be bid by our CSS. Surety credit limits and conditions may improve as our financial performance improves, but there can be no assurance that surety credit will be increased.

Gross Profit. Consolidated gross profit decreased to \$17.4 million for 2007 from \$19.3 million for 2006 and consolidated gross margin, as a percent of revenue, decreased to 8.5% in 2007 from 9.9% in 2006. Gross profit from CSS increased to \$11.3 million in 2007 from \$10.1 million in 2006 and the gross profit margin decreased to 8.8%

from 9.0% in the respective periods. Gross profit margins are affected by a variety of factors including, the quality and accuracy of the initial estimate, construction delays and difficulties due to weather or other conditions, availability of materials, the timing of work performed by other subcontractors and the physical and geological condition of the construction site. Gross profit from the CMS decreased to \$6.2 million in 2007 from \$9.2 million in 2006 and the gross profit margin decreased to 8.1% from 11.1% in the respective periods. The decreases in gross profit and gross profit margin during 2007 resulted primarily from increased costs associated with the expansion of our operations, under-utilizing new equipment placed in service and a decrease in the volume of units sold. During 2008, we will likely continue to under-utilize equipment, but we expect long-term margins will benefit from our expansion efforts. Our fixed costs will increase in 2008 as a result of our expansion efforts implemented during 2007 and will impact our gross profit margin in the interim as we are bringing the equipment up to full utilization.

Table of Contents

Depreciation and Amortization. Depreciation and amortization expense increased to \$7.1 million for 2007 from \$5.9 million in 2006. The increase resulted from additional plant, equipment and vehicles we placed in service during 2007. Of the \$7.1 million for 2007, \$4.4 million was from our CMS, while \$2.7 million came from our CSS.

General and Administrative Expenses. General and administrative expenses increased to \$11.8 million for 2007 from \$11.2 million for 2006. This increase was primarily attributable to increases in public company expenses of \$1.4 million, an increase of \$0.2 million in bad debt expense and increases of \$0.2 million in utilities and vehicle expenses, offset by a \$0.7 million decrease in compensation costs, a \$0.4 million decrease in legal fees, and decreases of \$0.1 million in office expenses, education and training and safety expenses.

Interest Income, Expense and Other Income. Interest income increased to \$1.6 million for 2007 compared to \$1.0 million for 2006. Interest expense decreased to \$0.2 million for 2007 compared to \$0.3 million for 2006. Interest expense directly related to equipment is expensed as a cost of the equipment and is included in the cost of revenue. Other income for 2007 increased to \$0.4 million compared to \$0.1 million for 2006.

Minority Interest in Consolidated Subsidiary. Minority interest in consolidated subsidiary represents the portion of income, net of tax, attributable to the shares of Ready Mix, Inc. not in our control. Minority interest for 2007 decreased to \$0.7 million, compared to \$1.6 million for 2006, due to RMI's decreased net income in 2007.

Income Taxes. The decrease in the income tax provision for 2007 to \$2.6 million compared to an income tax provision of \$3.2 million for 2006 was due to a decrease in pre-tax income during 2007. For 2007, our effective income tax rate differed from the statutory rate due primarily to state income taxes.

Net Income. Net income remained relatively flat at \$4.1 million for 2007 and \$4.2 million for 2006. Although net income remained flat, Income Before Income Taxes and Minority Interest in Consolidated Subsidiary decreased to \$7.3 million in 2007 compared to \$8.9 million in 2006.

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005

Revenue and Backlog. Consolidated revenue improved 6.3% to \$195.5 million for the year ended December 31, 2006, as further referred to as 2006, from \$183.9 million for the year ended December 31, 2005, as further referred to as 2005. The improved revenue resulted from a \$16.1 million increase, net of inter-company sales, from the CMS, offset by a decrease in revenue from the CSS of \$4.9 million. The CMS increase in revenue resulted from a 15.6% increase in the average unit sales price in 2006 from 2005, complemented by an 8.2% increase in sales of cubic yards of concrete which we refer to as units. Backlog in the CSS increased to \$89.5 million compared to \$68.4 million in 2005. The beginning backlog in the CSS contributed to the decreased revenue in 2006, based on the progress schedules and nature of the contracts contained in the backlog at the beginning of 2006. Because so much of our business stems from competitively bid public works, backlog will fluctuate depending upon the amount and type of contracts that we bid on and win. Bid bonds provided by a surety company are required on most of the contracts that we bid, therefore, any restrictions or limitations in the extension of surety credit can impact the amount and type of contracts available to be bid by our CSS. Surety credit limits and conditions may improve as our financial performance improves, but there can be no assurance that surety credit will be increased.

Gross Profit. Consolidated gross profit increased to \$19.3 million for 2006 from \$15.2 million for 2005 and consolidated gross margin, as a percent of revenue, increased to 9.9% in 2006 from 8.3% in 2005. Gross profit from CSS increased to \$10.1 million in 2006 from \$8.1 million in 2005 and the gross profit margin increased to 9.0% from 7.0% in the respective periods. Gross profit margins are affected by a variety of factors including, the quality and accuracy of the initial estimate, construction delays and difficulties due to weather or other conditions, availability of materials, the timing of work performed by other subcontractors and the physical and geological condition of the construction site. Gross profit from the CMS increased to \$9.2 million in 2006 from \$7.1 million in 2005 and the gross profit margin increased to 11.1% from 10.6% in the respective periods. The increases in gross profit and gross profit margin during 2006 resulted primarily from the expansion of the CMS operation and utilizing new equipment placed in service.

Table of Contents

Depreciation and Amortization. Depreciation and amortization expense increased to \$5.9 million for 2006 from \$4.5 million in 2005. The increase resulted from additional plant, equipment and vehicles we placed in service during 2006. Of the \$5.9 million for 2006, \$3.4 million was from our CMS, while \$2.5 million came from our CSS.

General and Administrative Expenses. General and administrative expenses increased to \$11.2 million for 2006 from \$8.7 million for 2005. This increase was primarily attributable to a \$0.4 million increase in incentive compensation, a \$0.7 million increase in payroll and payroll related expenses and taxes, increases of \$0.3 million in insurance premiums, accounting, computer and consulting expenses, \$0.2 million in legal fees, increases in public company expenses of \$0.2 million, an increase of \$0.3 million in bad debt expense and increases of \$0.2 million in utilities and office expenses.

Interest Income, Expense and Other Income. Interest income increased to \$1.0 million for 2006 compared to \$0.6 million for 2005. Interest expense decreased to \$0.3 million for 2006 compared to \$0.4 million for 2005. Interest expense directly related to equipment is expensed as a cost of the equipment and is included in the cost of revenue. Other income for 2006 decreased to \$0.1 million compared to \$0.3 million for 2005.

Minority Interest in Consolidated Subsidiary. Minority interest in consolidated subsidiary represents the portion of income, net of tax, attributable to the shares of Ready Mix, Inc. not in our control. Minority interest for 2006 increased to \$1.6 million compared to \$0.3 million for 2005 due to RMI's initial public offering in August 2005.

Income Taxes. The increase in the income tax provision for 2006 to \$3.2 million compared to an income tax provision of \$2.6 million for 2005 was due to an increase in the pre-tax income during 2006. For 2006, our effective income tax rate differed from the statutory rate due primarily to state income taxes. The difference between the amount of the tax provision and the actual cash outlay was due to the net operating loss carry-forward and the tax treatment of disqualified dispositions of incentive stock options.

Net Income. Net income remained relatively flat at \$4.2 million for 2006 and 2005. Although net income remained flat, Income Before Income Taxes and Minority Interest in Consolidated Subsidiary increased to \$8.9 million in 2006 compared to \$7.1 million in 2005.

Liquidity and Capital Resources

Our primary need for capital will be to maximize our working capital to continually improve our bonding limits (see Bonding and Insurance in Item 1, herein). RMI no longer guarantees any Meadow Valley debt; however, Meadow Valley Corporation continues to maintain certain guarantees for the benefit of RMI. We expect, but cannot assure, that eventually there will be no guarantees between the two related companies. As we expand our businesses we will continue to utilize the availability of capital offered by financial institutions, in turn increasing our total debt and debt service obligations.

Historically, our largest provider of financing has been Wells Fargo Equipment Financing, Inc., formerly known as CIT Construction, who we refer to as WFE. We believe our working capital and our historical sources of capital will be satisfactory to meet our needs for at least one year from the date of this Annual Report on Form 10-K.

In October 2007, we amended and restated our line of credit agreement with WFE. This amendment combined a \$3.0 million line of credit and approximately a \$2.0 million line of credit into a single \$10.0 million line of credit for MVCI. This amendment reduced MVCI's interest rate from .75% to .25% plus the Chase Manhattan Bank's prime rate. This agreement with WFE also provides MVCI a capital expenditure commitment of \$10.0 million. As of December 31, 2007 MVCI had approximately \$9.7 million available on this revolving credit facility and also had approximately \$6.3 million available on the capital expenditure commitment.

We also have an additional credit facility with WFE which provides RMI with a \$5.0 million line of credit, as well as a \$15.0 million capital expenditure commitment. As of December 31, 2007 RMI had approximately \$4.3 million available on its revolving credit facility and also had approximately \$7.0 million available on the capital expenditure commitment.

These WFE credit facilities are collateralized by each of our subsidiary's assets as well as our guarantee.

Table of Contents

The following table sets forth, for the periods presented, certain items from our Consolidated Statements of Cash Flows:

	For the Years Ended December 31,		
	2007	2006	2005
Cash provided by operating activities	\$ 16,746,813	\$ 10,323,569	\$ 5,217,432
Cash used in investing activities	(11,573,019)	(8,002,773)	(5,128,942)
Cash provided by (used in) financing activities	(6,382,348)	3,468,469	13,312,609

Cash provided by operating activities during 2007 of \$16.7 million represents a \$6.4 million increase from the amount provided by operating activities during 2006. The change was primarily due to a net increase in changes of billings in excess of costs and estimated earnings and a net reduction of costs and estimated earnings in excess of billings on uncompleted contracts of \$3.6 million and a net increase in reductions of refundable deposits and accrued liabilities and increases in accounts payable and income taxes payable of \$2.6 million.

Cash used in investing activities during 2007 of \$11.6 million represents a \$3.6 million increase from the amount used in investing activities during 2006. The change was primarily due to the purchase of minority interest common stock of \$8.6 million during 2007, offset by a \$5.3 million decrease in the purchase of property and equipment from the prior year.

Cash used in financing activities during 2007 of \$6.4 million represents a \$9.9 million increase from the amount provided by financing activities during 2006. The change was primarily due to the 2006 net proceeds received from the issuance of common stock, net of offering costs of \$6.8 million and an increase in the repayment of notes payable of \$3.1 million from 2006.

Cash provided by operating activities during 2006 of \$10.3 million represents a \$5.1 million increase from the amount provided by operating activities during 2005. The change was primarily due to an increase in the collection of \$1.1 million of claims receivable collected in 2006, a net increase in billings in excess of costs and estimated earnings and a net reduction of costs and estimated earnings in excess of billings on uncompleted contracts of \$3.2 million and the year to year change in minority interest in consolidated subsidiary, share-based compensation expense and the allowance for doubtful accounts.

Cash used in investing activities during 2006 of \$8.0 million represents a \$2.9 million increase from the amount used in investing activities during 2005. The change was primarily due to a \$3.8 million increase in the purchase of property and equipment, offset by an increase in proceeds received from payments on note receivable, proceeds received from the sale of property and equipment and a decrease in restricted cash.

Cash provided by financing activities during 2006 of \$3.5 million represents a \$9.8 million decrease from the amount provided by financing activities during 2005. The change was primarily due to the 2005 net proceeds received from the initial public offering of RMI of \$17.1 million, offset by the increase in proceeds from the issuance of common stock in 2006.

Impact of Inflation

There have been increases in the cost of our raw materials and the transport of those materials in our CSS; however, we have been able to fix these costs at the time of the project bid through material purchase agreements with suppliers. In our CMS, we may experience increases in the cost of our raw materials and the transport of those materials. Given the current downward pressure on pricing due to slackening demand, we are not always able to pass on additional costs, thereby possibly decreasing our margins. Additional substantial increases in labor costs, worker compensation rates and employee benefits, equipment costs, material or subcontractor costs could adversely affect our operations in future periods. Furthermore, increased interest rates typically track rising inflation. To the extent that rising interest rates equate to higher home mortgage rates, which have an impact on construction activity, a material rise in the inflation rate could cause a decline in residential or commercial construction and a negative impact on our business.

Table of Contents**Summary of Contractual Obligations and Commercial Commitments**

Contractual obligations at December 31, 2007, and the effects such obligations are expected to have on liquidity and cash flow in future periods, are summarized as follows:

(Dollars in thousands)	Total	Payments Due by Period			
		Less than 1 Year	1 - 3 Years	4 - 5 Years	After 5 Years
Contractual Obligations					
Long-term debt obligations	\$ 16,485	\$ 4,216	\$ 8,162	\$ 3,001	\$ 1,106
Interest payments on long-term debt (1)	2,697	1,037	1,189	327	144
Capital lease obligations	104	104			
Operating lease obligations	7,945	3,135	4,019	791	
Purchase obligations	24,086	3,857	6,353	4,770	9,106
Other long-term liabilities (2)	1,897	979	918		
Total contractual obligations	\$ 53,214	\$ 13,328	\$ 20,641	\$ 8,889	\$ 10,356

(1) Interest payments are based on the individual interest rates of each obligation, which range from 1.9% to 9.5% per annum. We do not assume an increase in the variable interest rate. See Item 8, Note 10 Notes Payable and Note 11 Lines of Credit in the notes to the consolidated financial statements.

(2) Other long-term liabilities reflected on our balance sheets under GAAP include employment contracts with

officers and key employees that call for annual salaries ranging from \$118,450 to \$262,500 through October 2010, and are to be reviewed annually by our Compensation Committee.

Known and Anticipated Future Trends and Contingencies

For approximately three years prior to 2007, raw material costs had risen steadily during which time we were able to pass on those rising costs to our customers. During 2007, raw material cost increases subsided somewhat; however, the CMS selling mix has changed to higher cost mix designs, resulting in lower margins. The CSS is less affected by increases in raw material costs to the extent that cost increases are sufficiently factored into a project's original estimate. Regardless, both segments of our business have been, and will likely continue to be, affected by fluctuating costs of raw materials and fuel.

Because much of the funding of transportation infrastructure comes from local sales and fuel taxes, any event that may impact the overall economy that would decrease consumer spending or diminish fuel consumption would result in lower receipts of tax dollars that, in turn, would diminish the availability of funding for transportation infrastructure.

We continue to expend resources dealing with two New Mexico projects with unresolved claims and one claim with the Federal Highway Administration on the Gooseberry project that was completed in 2005. We believe we have conservatively booked claim revenue on all claims. Therefore, in the future, we believe we may be able to recover at least what we have booked to date, if not more. See Item 8, Note 17 - Litigation and Claim Matters in the notes to the consolidated financial statements.

If the CSS can continue to demonstrate operating improvements, then as profitability, working capital and liquidity increase, our surety credit will likely increase, thereby allowing us to bid on and perform more and larger projects. Bidding opportunities within our focused market areas of Nevada and Arizona are ample for the size of our current surety program and we believe, given historical bidding success, that the backlog may increase during 2008.

As public works constitute the majority of our CSS volume, and governmental entities are the primary source of funding for infrastructure work, it is, therefore, important that public funding be maintained. The national transportation legislation, SAFETEA-LU, was signed by President Bush on August 10, 2005 and should provide relatively stable funding for transportation infrastructure at least until its expiration in the fall of 2009.

Table of Contents

The competitive bidding process will continue to be the dominant method for determining contract awards. However, other innovative bidding methods will be tried and may gain favor, namely A Plus B contracts, where the bidders' proposals are selected on both price and scheduling criteria. Design-build projects and Construction Manager at Risk projects are becoming more common and are likely to increase in frequency. During 2007, we successfully completed our first design-build project. We believe that as we continue to build our resume of successfully completed design-build projects, we will increase the size and frequency of projects obtained in this manner and that it will allow us to increase our customer base.

In light of the rising need for infrastructure work throughout the nation and the tendency of the current need to out-pace the supply of funds, it is anticipated that alternative funding sources will continue to be sought. Funding for infrastructure development in the United States is coming from a growing variety of innovative sources. An increase of funding measures is being undertaken by various levels of government to help solve traffic congestion and related air quality problems. Sales taxes, fuel taxes, user fees in a variety of forms, vehicle license taxes, private toll roads and quasi-public toll roads are examples of how transportation funding is evolving. Transportation norms are being challenged by federally mandated air quality standards. Improving traffic movement, eliminating congestion, increasing public transit, adding or designating high occupancy vehicle (HOV) lanes to encourage car pooling and other solutions are being considered in order to help meet EPA-imposed air quality standards. There is also a trend toward local and state legislation regulating growth and urban sprawl. The passage of such legislation and the degree of growth limits imposed by it could dramatically affect the nature of our markets.

In November 2004, voters in Maricopa County (Phoenix, Arizona metropolitan area) passed a measure to extend, for twenty years, a half-cent sales tax dedicated to the construction and maintenance of transportation facilities, including freeways, streets and mass transit. It is expected that this measure will generate approximately \$9.0 billion of funding over a twenty year span.

Critical Accounting Policies

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our financial statements, which have been prepared in accordance with accounting policies generally accepted in the United States of America, or GAAP. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may materially differ from these estimates under different assumptions or conditions.

Our significant accounting policies are described below and in Note 1 - Summary of Significant Accounting Policies and Use of Estimates, to our consolidated financial statements included in Item 8 of this Annual Report on Form 10-K. We believe our most critical accounting policies are the revenue recognition and cost estimation on certain contracts for which we use a percentage-of-completion accounting method, our allowance for doubtful accounts and the allowance for slow moving and obsolete inventory. The revenue recognition and cost estimation accounting method is applied by the CSS to heavy construction projects executed under multi-year contracts with various customers. Approximately 63%, 57% and 64% of total net revenue was recognized under the percentage-of-completion method of accounting during 2007, 2006 and 2005, respectively.

Revenue and Cost Recognition:

Revenues and costs from fixed-price and modified fixed-price construction contracts are recognized for each contract on the percentage-of-completion method, measured by the percentage of costs incurred to-date to the estimated total of direct costs. Direct costs include, among other things, direct labor, field labor, equipment rent, subcontracting, direct materials, and direct overhead. General and administrative expenses are accounted for as period costs and are, therefore, not included in the calculation of the estimates to complete construction contracts in progress. Project losses are provided for in their entirety in the period in which such losses are determined, without reference to the percentage-of-completion. As contracts can extend over one or more accounting periods, revisions in costs and earnings estimated during the course of the work are reflected during the accounting period in which the facts that required such revisions become known.

The asset costs and estimated earnings in excess of billings on uncompleted contracts represents revenue recognized in excess of amounts billed. The liability billings in excess of costs and estimated earnings on uncompleted

contracts represents billings in excess of revenue recognized.

26

Table of Contents

The complexity of the estimation process and all issues related to the assumptions, risks and uncertainties inherent with the application of the percentage-of-completion method of accounting affects the amounts reported in our consolidated financial statements. A number of internal and external factors affect our percentage-of-completion estimates, including labor rate and efficiency variances, estimated future material prices and customer specification changes. If our business conditions were different, or if we used different assumptions in the application of this accounting policy, it is likely that materially different amounts would be reported in our consolidated financial statements.

Collectibility of Accounts Receivable

We are also required to estimate the collectibility of our accounts receivable. A considerable amount of judgment is required in assessing the realization of these receivables, including the current credit worthiness of each customer and the related aging of the past due balances. Our provision for bad debts as of December 31, 2007 and 2006 amounted to \$594,722 and \$395,243, respectively. We determine our reserve by using percentages applied to certain aged receivable categories and percentages of certain types of revenue generated, as well as a review of the individual accounts outstanding and our collection history.

Inventory, net:

We are required to state our inventories at the lower of cost or market. In assessing the ultimate realization of inventories, we are required to make judgments as to the future demand requirements and compare these with the current inventory levels. Our reserve requirements generally increase as our projected demand requirements decrease due to market conditions and longer than expected usage periods. At December 31, 2007 and 2006, inventories of \$1,232,478 and \$1,366,534, respectively, are net of reserves of \$199,936 and \$200,000, respectively. It is possible that significant changes in required inventory reserves may continue to occur in the future if there is a further decline in market conditions or market activity.

Valuation of Property and Equipment:

We are required to provide property and equipment net of depreciation and amortization expense. We expense depreciation and amortization utilizing the straight-line method, over what we believe to be the estimated useful lives. Leasehold improvements are amortized over their estimated useful lives or the lease term, whichever is shorter. The estimated useful lives of property and equipment are:

Plants	4	15 years
Computer equipment	3	5 years
Equipment	3	10 years
Leasehold improvements	2	10 years
Office furniture and equipment	5	7 years
Vehicles	3	10 years
Building		39 years

The life on any piece of equipment can vary, even within the same category of equipment, due to the quality of the maintenance, care provided by the operator and the general environmental conditions, such as temperature, rain and the terrain conditions to reach the job site where the material is delivered. We maintain, service and repair approximately 95% of our equipment through the use of our mechanics. If we inaccurately estimate the life of any given piece of equipment or category of equipment we may be overstating or understating earnings in any given period.

We also review our property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. The impairments are recognized in the period during which they are identified. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Table of Contents*Income taxes:*

We are required to estimate our income taxes in each jurisdiction in which we operate. This process requires us to estimate the actual current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and financial reporting purposes. These temporary differences result in deferred tax assets and liabilities on our consolidated balance sheets. We must calculate the blended tax rate, combining all applicable tax jurisdictions, which can vary over time as a result of the allocation of taxable income between the tax jurisdictions and the changes in tax rates. We must also assess the likelihood that the deferred tax assets, if any, will be recovered from future taxable income and, to the extent recovery is not likely, must establish a valuation allowance. This assessment is complicated by the fact that we are required to consolidate our subsidiaries for financial reporting purposes, while being separately reported for tax purposes.

Furthermore, we are subject to periodic review by domestic tax authorities for audit of our income tax returns. These audits generally include questions regarding our tax filing positions, including the amount and timing of deductions and the allocation of income among various tax jurisdictions. In evaluating the exposures associated with our various tax filing positions, including federal and state taxes, we believe we have complied with the rules of the service codes and therefore have not recorded reserves for any possible exposure. Typically the taxing authorities can audit the previous three years of tax returns and in certain situations audit additional years, therefore a significant amount of time may pass before an audit is conducted and fully resolved. Although no audits are currently being conducted, if a taxing authority would require us to amend a prior year's tax return we would record the increase or decrease in our tax obligation in the year in which it is more likely than not to be realized.

Classification of Leases:

We follow the standards established by Statements of Financial Accounting Standards No. 13, Accounting for Leases, which we will refer to as SFAS 13. One factor when determining if a lease is an operating lease or a capital lease is the intention from the inception of the lease regarding the final ownership, or transfer of title, of the asset to be leased. We are currently leasing 92 ready-mix trucks under operating lease agreements, since at the inception of those leases we had not intended to take title to those vehicles at the conclusion of the leases. Therefore, we did not request transfer of ownership provisions at the conclusion of the leases such as bargain purchase options or direct transfers of ownership. Since we do not intend to take ownership at the conclusion of the leases and we do not meet the remaining criteria of SFAS 13 for capitalization, the leases are classified as operating leases. If we would have desired at the inception of the leases to have the ownership transfer at the conclusion of the leases, we would have classified those leases as capital leases and would have recorded the ready-mix trucks as assets on our balance sheet as well as recording the liability as capital lease obligations. We believe that the lease expense under the operating lease classification approximates the depreciation expense which would have been incurred if the leases would have been classified as capital leases.

Recent Accounting Pronouncements

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which is effective for fiscal years beginning after November 15, 2007. SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. We do not expect SFAS 159 will have a material impact on our financial statements.

In June 2007, the FASB ratified EITF 06-11 Accounting for the Income Tax Benefits of Dividends on Share-Based Payment Awards (EITF 06-11). EITF 06-11 provides that tax benefits associated with dividends on share-based payment awards be recorded as a component of additional paid-in capital. EITF 06-11 is effective, on a prospective basis, for fiscal years beginning after December 15, 2007. We do not expect EITF 06-11 will have a material impact on our financial statements.

In December 2007, the FASB issued Statement No. 141R, Business Combinations (SFAS 141R). SFAS 141R requires an acquirer to recognize the assets acquired, the liabilities assumed, and any non-controlling interest in the acquired business at the acquisition date, measured at their full fair values as of that date. SFAS 141R is effective for

business combinations occurring after December 31, 2008. The impact of adopting SFAS 141R will depend on the nature and terms of future acquisitions.

Table of Contents

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards that require (i) noncontrolling interests to be reported as a component of equity, (ii) changes in a parent's ownership interest while the parent retains its controlling interest to be accounted for as equity transactions, and (iii) any retained noncontrolling equity investment upon the deconsolidation of a subsidiary to be initially measured at fair value. SFAS 160 is effective for fiscal years and interim periods within those fiscal years, beginning on or after December 15, 2008, with early adoption prohibited. We do not expect the adoption of SFAS 160 to have a material effect on our financial position or results of operations.

Off-Balance Sheet Arrangements

We had no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Market risk generally represents the risk that losses may occur in the values of financial instruments as a result of movements in interest rates, foreign currency exchange rates and commodity prices. We do not have foreign currency exchange rate and commodity price market risk.

Interest Rate Risk From time to time we temporarily invest our excess cash in interest-bearing securities issued by high-quality issuers. We monitor risk exposure to monies invested in securities in our financial institutions. Due to the short time the investments are outstanding and their general liquidity, these instruments are classified as cash equivalents in our consolidated balance sheets and do not represent a material interest rate risk. Our primary market risk exposure for changes in interest rates relates to our long-term debt obligations. We manage our exposure to changing interest rates principally through the use of a combination of fixed and floating rate debt.

We evaluated the potential effect that near term changes in interest rates would have had on the fair value of our interest rate risk sensitive financial instruments at December 31, 2007. Assuming a 100 basis point increase in the prime interest rate at December 31, 2007 the potential increase in our debt obligations would have been approximately \$0.01 million at December 31, 2007. See Note 10 Notes Payable and Note 11 Lines of Credit in our consolidated financial statements included in Item 8.

Item 8. *Financial Statements and Supplementary Data*

Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders of

Meadow Valley Corporation

We have audited the accompanying consolidated balance sheets of Meadow Valley Corporation and Subsidiaries as of December 31, 2007 and 2006 and the related consolidated statements of operations, stockholders' equity, and cash flows for the years ended December 31, 2007, 2006 and 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Meadow Valley Corporation and Subsidiaries at December 31, 2007 and 2006, and the results of its operations and its cash flows for the years ended December 31, 2007, 2006 and 2005, in conformity with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****1. Summary of Significant Accounting Policies and Use of Estimates:***Nature of the Corporation:*

Meadow Valley Corporation (the Company) was organized under the laws of the State of Nevada on September 15, 1994. The principal business purpose of the Company is to operate as the holding company of Meadow Valley Contractors, Inc. (MVCI) (Construction services segment), Ready Mix, Inc. (RMI) (Construction materials segment) and Apex Testing Corp. (Apex) (Construction materials testing segment). MVCI is a general contractor, primarily engaged in the construction of structural concrete highway bridges and overpasses, and the paving of highways and airport runways for various governmental authorities, municipalities and developers in the states of Nevada and Arizona. RMI manufactures and distributes ready-mix concrete in the Las Vegas, Nevada and Phoenix, Arizona metropolitan areas. In 2005, the Company sold, in a public offering, approximately 47% of its ownership interest in RMI. During 2007, the Company purchased an additional 620,212 shares of RMI's common stock, bringing the total number of shares of RMI's common stock owned by the Company to 2,645,212 shares, or approximately 69% of RMI's 3,809,500 total shares outstanding. Apex is a construction materials testing provider in the Las Vegas, Nevada area. In May 2006, Apex was formed and subsequently, its assets were purchased for approximately \$134,000 from an existing materials testing company in Las Vegas, Nevada.

Liquidity:

The Company incurred income from operations for the years ended December 31, 2007, 2006 and 2005 of \$5,601,948, \$8,148,269 and \$6,521,006, respectively, and has provided cash from operating activities of \$16,746,813, \$10,323,569 and \$5,217,432, respectively, for the years ended December 31, 2007, 2006 and 2005. In 2005 the Company sold approximately 47% of its stake in a subsidiary, RMI, through an initial public offering, which resulted in approximately \$17.1 million in net proceeds after underwriters' commissions and other offering costs. The Company owns approximately 69% of the outstanding shares of RMI's common stock as of December 31, 2007, after the Company purchased additional common stock for \$8,644,944. In 2006, the Company sold 817,120 shares of its common stock, par value \$.001, in a private placement offering, which resulted in approximately \$6.6 million in net proceeds after underwriting commissions and other costs.

In June 2006, a claim of approximately \$6.8 million was settled for approximately \$5.1 million in exchange for releasing Clark County Public Works from its two claims which had been filed against them. Of the \$5.1 million in settlement proceeds, \$3.0 million was paid to subcontractors for their portion of the total claim. Since the remaining \$2.1 million in proceeds exceeded the approximately \$1.8 million of claims receivable previously recorded, the difference of \$.3 million was included in gross profit for the year ended December 31, 2006.

Principles of Consolidation:

The accompanying consolidated financial statements include the accounts of the Company and its subsidiaries MVCI, RMI and Apex. Intercompany transactions and balances have been eliminated in consolidation.

Accounting Estimates:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ materially from those estimates.

Significant estimates are used when accounting for the percentage-of-completion and the estimated gross profit on projects in progress, allowance for doubtful accounts, inventory allowance, depreciation and amortization, realization of claims receivable, accruals, taxes, contingencies and the valuation of stock-based compensation instruments which are discussed in the respective notes to the consolidated financial statements.

Due to the uncertainties inherent in the formulation of accounting estimates, and the significance of these items, especially as they relate to estimates used in the accounting of percentage-of-completion and the estimated gross profit on projects in progress, it is reasonable to expect that the estimates in connection with these items could be materially revised within the next year.

Table of Contents

**MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

1. Summary of Significant Accounting Policies and Use of Estimates (Continued):

Revenue and Cost Recognition:

Revenue and costs from fixed-price and modified fixed-price construction contracts are recognized for each contract on the percentage-of-completion method, measured by the percentage of costs incurred to date to the estimated total of direct costs. Direct costs include, amongst other things, direct labor, field labor, equipment rent, subcontracting, direct materials, and direct overhead. General and administrative expenses are accounted for as period costs and are, therefore, not included in the calculation of the estimates to complete construction contracts in progress. Project losses are provided for in their entirety in the period in which such losses are determined, without reference to the percentage-of-completion. As contracts can extend over one or more accounting periods, revisions in costs and earnings estimated during the course of the work are reflected during the accounting period in which the facts that required such revisions become known.

The asset costs and estimated earnings in excess of billings on uncompleted contracts represents revenue recognized in excess of amounts billed. The liability billings in excess of costs and estimated earnings on uncompleted contracts represents billings in excess of revenue recognized.

We recognize revenue in our construction materials segment on the sale of our concrete and aggregate products at the time of delivery.

We recognize revenue in our construction materials testing segment on the sale of our professional services at the time services are provided.

Claims Receivable:

Claims for additional contract revenue are recognized only to the extent that contract costs relating to the claim have been incurred and evidence provides a legal basis for the claim. As of December 31, 2007 the total amount of contract claims filed by the Company with various public entities was \$19,084,311. Of this amount, the Company's portion of the claims total was \$15,088,871 and the balance of \$3,995,440 pertains to other contractors' claims.

Total claim amounts reported in the Company's consolidated financial statements are approximate and are subject to revision as final documentation, resolution of issues, settlements progress and/or payments are received. Relative to the aforementioned claims, the Company has recorded \$2,463,880 in cumulative claims receivable as of December 31, 2007 and 2006 to offset a portion of costs incurred to-date on the claims. All claims receivable amounts as of December 31, 2007 and 2006 are classified as long-term.

The Company has not accrued a liability related to the prime contractor or subcontractors' claims as no liability would be deemed payable if their portion of the claims did not receive a favorable outcome. Correspondingly, no receivable has been recorded for overhead and profit included in their portion of the claims on the Company's behalf.

Although the Company believes that the claims receivable amount represents a reasonably conservative posture, any claims proceeds ultimately paid to the Company less than the aggregate amount recorded on the balance sheet of \$2,463,880, will decrease earnings. Conversely, a payment for those same items in excess of \$2,463,880, will result in increased income.

A common and customary practice in construction contracts is the owner's withholding of a portion of the contract in the form of retention. Retention practices vary from contract to contract, but in general, retention (usually between 5% to 10% of the contract) is withheld from each progress payment by the owner and then paid upon satisfactory completion of the contract. Contract proceeds comprising retention are included in the Company's balance sheet in accounts receivable. The portion of accounts receivable pertaining to retention withheld on the contracts for which claims have been filed amounts to \$879,763 as of December 31, 2007 and 2006. The degree to which the Company is successful in prosecuting its claims may also impact the amount of retention paid by the owner.

Table of Contents

**MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

1. Summary of Significant Accounting Policies and Use of Estimates (Continued):

Claims Receivable (Continued):

The Company believes that all retention amounts currently being held by the owners on the contracts with outstanding claims will be paid in full in accordance with the contract terms. Therefore, no allowance has been made to reduce the receivables due from the retention on the disputed contracts.

Cash and Cash Equivalents:

The Company considers all highly liquid instruments purchased with an initial maturity of three months or less to be cash equivalents.

Restricted Cash:

At December 31, 2007 and 2006, funds in the amounts of \$327,886 and \$605,243, respectively, were held in trust, in lieu of retention, on certain of the Company's construction contracts and will be released to the Company after the contracts are completed.

Accounts Receivable, net:

Included in accounts receivable are trade receivables that represent amounts billed but uncollected on completed construction contracts and construction contracts in progress as well as other trade and non-trade receivables.

The Company follows the allowance method of recognizing uncollectible accounts receivable. The allowance method recognizes bad debt expense based on a review of the individual accounts outstanding and the Company's prior history of uncollectible accounts receivable. At December 31, 2007 and 2006, the Company had established an allowance for potentially uncollectible accounts receivable in the amounts of \$594,722 and \$395,243, respectively. During the years ended December 31, 2007, 2006 and 2005 the Company incurred bad debt expense (recovery) in the amounts of \$338,214, \$125,930 and \$(206,694), respectively. The Company records delinquent finance charges on outstanding accounts receivable only if they are collected.

At December 31, 2007 and 2006, all of the Company's accounts receivable was pledged as collateral for the Company's lines of credit.

Inventory, net:

Inventory, which consists primarily of raw materials, is stated at the lower of cost, determined by the first-in, first-out method, or market. Inventory quantities are determined by physical measurements. At December 31, 2007 and 2006, the Company had an allowance for potentially obsolete or slow moving inventory in the amounts of \$199,936 and \$200,000, respectively.

At December 31, 2007 and 2006, the Company's entire inventory was pledged as collateral for the Company's lines of credit.

Property and Equipment:

Property and equipment are recorded at cost. Depreciation and amortization charged to operations during the years ended December 31, 2007, 2006 and 2005 was \$7,082,406, \$5,885,481 and \$4,499,044, respectively. Depreciation is provided for on the straight-line method, over the estimated useful lives of the assets. Leasehold improvements are recorded at cost and are amortized over their estimated useful lives or the lease term, whichever is shorter. Mineral rights and pit development costs are amortized over their estimated useful lives or the lease term, whichever is shorter.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Summary of Significant Accounting Policies and Use of Estimates (Continued):*Property and Equipment (Continued):*

The estimated useful lives of property and equipment are:

Plants	4	15 years
Computer equipment	3	5 years
Equipment	3	10 years
Vehicles	3	10 years
Office furniture and equipment	5	7 years
Leasehold improvements	2	10 years
Building		39 years

At December 31, 2007 and 2006, all property and equipment were pledged as collateral for the Company's lines of credit, notes payable or capital lease obligations.

Income Taxes:

The Company accounts for income taxes in accordance with the Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes (SFAS 109). SFAS 109 requires the Company to recognize deferred tax assets and liabilities for the expected future tax consequences of events that have been recognized in a Company's financial statements or tax returns. Under this method, deferred tax assets and liabilities are determined based on the difference between the financial statement carrying amounts and tax basis of assets and liabilities using enacted tax rates in effect in the years in which the differences are expected to reverse. Prior to 2005, the Company filed consolidated tax returns with MVCI and RMI. The Company absorbed the net income of MVCI and RMI pursuant to a tax sharing agreement, which called for any income tax receivable or payable to be remitted to, or paid by, the Company. As a result of the public offering of RMI's stock, RMI can no longer include its income as a part of the Company's consolidated tax return and files its own tax return in its respective tax jurisdictions.

Fair Value of Financial Instruments:

The carrying amounts of financial instruments including cash, restricted cash, costs and estimated earnings in excess of billings on uncompleted contracts, certain current maturities of long-term debt, billings in excess of costs and estimated earnings on uncompleted contracts, accrued liabilities and long-term debt approximate fair value based on their short maturities or on borrowing rates currently available to the Company for loans with similar terms and maturities.

The carrying amount of long-term debt approximates fair value because the interest rates on these instruments approximate the rates at which the Company could borrow at December 31, 2007 and 2006.

Accounting for the Impairment of Long-Lived Assets and Long-Lived Assets to be Disposed of:

The Company reviews property and equipment for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Earnings per Share:

Statement of Financial Accounting Standards No. 128, Earnings per Share, (SFAS 128) provides for the calculation of Basic and Diluted earnings per share. Basic earnings per share includes no dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of an entity.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

1. Summary of Significant Accounting Policies and Use of Estimates (Continued):*Stock-Based Compensation:*

Both the Company and RMI have stock-based compensation plans. Effective January 1, 2006, the Company and RMI adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), Share-Based Payment (SFAS 123R), using the modified prospective transition method and therefore neither have restated results for prior periods. Under this transition method, stock-based compensation expense for the year ended December 31, 2006 includes compensation expense for all stock-based compensation awards granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provision of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation (SFAS 123). Stock-based compensation expense for all stock-based compensation awards granted after January 1, 2006 is based on the grant-date fair value estimated in accordance with the provisions of SFAS 123R. The Company and RMI recognize these compensation costs on a straight-line basis over the requisite service period of the award, which is generally three years.

The Company and RMI estimate fair value using the Black-Scholes valuation model. Assumptions used to estimate compensation expense are determined as follows:

Expected term is generally determined using an average of the contractual term and vesting period of the award;

Expected volatility is measured using the average of historical daily changes in the market price of the Company's common stock over the expected term of the award;

Risk-free interest rate is equivalent to the implied yield on zero-coupon U.S. Treasury bonds with a remaining maturity equal to the expected term of the awards; and,

Forfeitures are based on the history of cancellations of awards granted by both companies and management's analysis of potential forfeitures.

Prior to the adoption of SFAS 123R, the Company and RMI recognized stock-based compensation expense in accordance with Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25). In March 2005, the SEC issued Staff Accounting Bulletin No. 107 (SAB 107) regarding the SEC's interpretation of SFAS 123R and the valuation of share-based payments for public companies. The Company and RMI have applied the provisions of SAB 107 in their adoption of SFAS 123R. See Note 2 Stock-Based Compensation of these notes to the accompanying consolidated financial statements for a further discussion on stock-based compensation.

The following table illustrates the effect on net income and net income per share if the Company and RMI had applied the fair value recognition provisions of SFAS 123 to options granted under the stock option plans, non-vested stock awards granted and shares issued under their respective plans in the year ended December 31, 2005. For purposes of pro forma disclosures, the value of the options is estimated using the Black-Scholes option-pricing formula and amortized to expense over the options' vesting periods using the straight line method.

	Year Ended December 31, 2005
Net income, as reported	\$ 4,203,719
Add: Stock-based employee compensation expense included in reported income, net of related tax effects	
Deduct: Total stock-based employee compensation expense determined under fair value based methods for all awards, net of related tax effects	(157,146)

Edgar Filing: MEADOW VALLEY CORP - Form 10-K

Pro forma net income	\$	4,046,573
Basic net income per common share		
As reported	\$	1.11
Pro forma		1.07
Diluted net income per common share		
As reported	\$	1.01

**MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

1. Summary of Significant Accounting Policies and Use of Estimates (Continued):

Recent Accounting Pronouncements:

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which is effective for fiscal years beginning after November 15, 2007. SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The Company does not expect SFAS 159 will have a material impact on its financial statements.

In June 2007, the FASB ratified EITF 06-11, Accounting for the Income Tax Benefits of Dividends on Share-Based Payment Awards (EITF 06-11). EITF 06-11 provides that tax benefits associated with dividends on share-based payment awards be recorded as a component of additional paid-in capital. EITF 06-11 is effective, on a prospective basis, for fiscal years beginning after December 15, 2007. The Company does not expect EITF 06-11 will have a material impact on its financial statements.

In December 2007, the FASB issued Statement No. 141R, Business Combinations (SFAS 141R). SFAS 141R requires an acquirer to recognize the assets acquired, the liabilities assumed, and any non-controlling interest in the acquired business at the acquisition date, measured at their full fair values as of that date. SFAS 141R is effective for business combinations occurring after December 31, 2008. The impact of adopting SFAS 141R will depend on the nature and terms of future acquisitions.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 (SFAS 160). SFAS 160 establishes accounting and reporting standards that require (i) noncontrolling interests to be reported as a component of equity, (ii) changes in a parent's ownership interest while the parent retains its controlling interest to be accounted for as equity transactions, and (iii) any retained noncontrolling equity investment upon the deconsolidation of a subsidiary to be initially measured at fair value. SFAS 160 is effective for fiscal years and interim periods within those fiscal years, beginning on or after December 15, 2008, with early adoption prohibited. The Company does not expect the adoption of SFAS 160 to have a material effect on its financial position or results of operations.

2. Stock-Based Compensation:

On January 1, 2006, the Company adopted the fair value recognition provisions of SFAS 123R. Prior to January 1, 2006, the Company accounted for share-based payments under the recognition and measurement provisions of APB 25, and related Interpretations, as permitted by SFAS 123. In accordance with APB 25, no compensation cost was required to be recognized for options granted that had an exercise price equal to the market value of the underlying common stock on the date of grant.

The Company adopted SFAS 123R using the modified prospective transition method. Under this transition method, compensation cost recognized in the year ended December 31, 2006 includes: a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant-date fair value estimated in accordance with the original provisions of SFAS 123, and b) compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123R. The results for the prior periods have not been restated.

The Company recognizes expected tax benefits related to employee stock based compensation as awards are granted and the incremental tax benefit or liability when related awards are deductible. No stock-based compensation costs were recognized in expense in the year ended December 31, 2005.

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Stock-Based Compensation (Continued):

The Company and RMI both have individual stock-based compensation plans. Meadow Valley Corporation's accompanying consolidated financial statements and these related notes to financial statements have been presented on a consolidated basis and therefore include RMI's stock-based compensation information. The information below is presented to show disclosures related to both the Company's and RMI's individual stock-based compensation plans. Under the sub-heading "Meadow Valley Corporation Equity Incentive Plan" of this note, information is only for the Company's plan, with the exception of information presented that is directly related to the consolidation of the accompanying financial statements and this information is indicated as consolidated. Under the sub-heading "Ready Mix, Inc. Equity Incentive Plan" of this note, information is only for RMI's plan.

Meadow Valley Corporation Equity Incentive Plan:

In 2004, the Company adopted the 2004 Equity Incentive Plan ("2004 Plan"). The 2004 Plan permits the granting of any or all of the following types of awards: (1) incentive and nonqualified stock options, (2) stock appreciation rights, (3) stock awards, restricted stock and stock units, and (4) other stock or cash-based awards. In connection with any award or any deferred award, payments may also be made representing dividends or their equivalent.

The 2004 Plan authorizes the issuance of up to 1,200,000 shares of the Company's common stock, all of which were previously reserved for issuance under the Company's prior plan. Shares of common stock covered by an award granted under the 2004 Plan will not be counted as used unless and until they are actually issued and delivered to a participant. As of December 31, 2007, 150,149 shares were available for future grant under the 2004 Plan. The common terms of the stock options are from five to ten years and may be exercised after issuance as follows: 33.3% after one year of continuous service, 66.6% after two years of continuous service and 100% after three years of continuous service. The exercise price of each option is no less than the market price of the Company's common stock on the date of the grant. The Company's board of directors has full discretion to modify these terms.

The Company uses the Black-Scholes option pricing model to estimate fair value of stock-based awards with the following assumptions for the indicated periods:

	Awards during the year ended December 31, 2007	Awards prior to January 1, 2007	
Dividend yield	0%		0%
Expected volatility	58.95%	23.94%	82.23%
Weighted average expected volatility	58.95%		50.04%
Risk free interest rate	5.00%		5.00%
Expected life of options (in years)	5		3
Weighted average grant-date fair value	\$ 7.67	\$	1.34

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Stock-Based Compensation (Continued):

The following table summarizes the Company's stock option activity during the year ended December 31, 2007:

	Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term ¹	Aggregate Fair Value	Aggregate Intrinsic Value ²
Outstanding January 1, 2007	434,542	\$ 4.86	3.98	\$ 818,371	
Granted	15,000	13.88		115,050	
Exercised	(49,531)	3.73		(80,837)	\$ 402,799
Forfeited or expired	(80,000)	5.31		(80,800)	
Outstanding December 31, 2007	320,011	\$ 5.35	3.87	\$ 771,784	\$ 2,379,777
Exercisable December 31, 2007	258,341	\$ 4.22	3.88	\$ 473,301	\$ 2,214,552

¹ Remaining contractual term is presented in years.

² The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the closing price of the Company's common stock as of December 31, 2007, for those awards that have an exercise price currently below the closing price as of December 31, 2007. Awards with an exercise price above the

closing price as of December 31, 2007 are considered to have no intrinsic value.

A summary of the status of the Company's nonvested shares as of December 31, 2007 and changes during the year ended December 31, 2007 is presented below:

	Shares	Weighted Average Grant-Date Fair Value
Nonvested stock options at January 1, 2007	95,000	\$ 4.85
Granted	15,000	7.67
Vested	(48,330)	5.74
Forfeited		
Nonvested stock options at December 31, 2007	61,670	\$ 4.84

During the years ended December 31, 2007 and 2006 the Company recognized consolidated compensation expense of \$626,509 and \$267,110, respectively, of which \$375,081 and \$161,427, respectively, was related to RMI's stock-based compensation plan, and the Company recognized a tax benefit of \$30,993 and \$21,555, respectively, related thereto. As of December 31, 2007, there was \$308,439 of total unrecognized compensation cost, net of \$25,933 attributable to estimated forfeitures based upon an approximate forfeiture rate of 9%, related to nonvested stock options granted under the 2004 Plan. That cost is expected to be recognized over the weighted average vesting period of 1.8 years. Awards granted during the year ended December 31, 2007, total options to purchase 15,000 shares of the Company's common stock, which were granted on July 2, 2007, with an exercise price of \$13.88 per share. During the year ended December 31, 2007, 80,000 options to purchase common stock were forfeited, all of which were fully vested.

During the year ended December 31, 2007, the Company received proceeds of \$184,546, as a result of the exercise of options to purchase shares of the Company's common stock.

Ready Mix, Inc. Equity Incentive Plan:

In 2005, RMI adopted the 2005 Equity Incentive Plan (the RMI 2005 Plan). The RMI 2005 Plan permits the granting of any or all of the following types of awards: (1) incentive and nonqualified stock options, (2) stock appreciation rights, (3) stock awards, restricted stock and stock units, and (4) other stock or cash-based awards. In connection with any award or any deferred award, payments may also be made representing dividends or their equivalent.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Stock-Based Compensation (Continued):

RMI has reserved 675,000 shares of its common stock for issuance under the RMI 2005 Plan. Shares of common stock covered by an award granted under the RMI 2005 Plan will not be counted as used unless and until they are actually issued and delivered to a participant. As of December 31, 2007, 306,875 shares were available for future grant under the RMI 2005 Plan. The common terms of the stock options are five years and may be exercised after issuance as follows: 33.3% after one year of continuous service, 66.6% after two years of continuous service and 100% after three years of continuous service. The exercise price of each option is equal to the market price of RMI's common stock on the date of grant. RMI's board of directors has full discretion to modify these terms.

RMI uses the Black-Scholes option pricing model to estimate fair value of stock-based awards with the following assumptions for the indicated periods:

	Awards during the year ended December 31, 2007	Awards prior to January 1, 2007
Dividend yield	0%	0%
Expected volatility	36.70%	21.4% 39.1%
Weighted-average volatility	36.70%	26.60%
Risk-free interest rate	5.00%	5.00%
Expected life of options (in years)	5	3
Weighted-average grant-date fair value	\$ 5.21	\$ 2.40

The following table summarizes RMI's stock option activity during the year ended December 31, 2007:

	Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term ¹	Aggregate Fair Value	Aggregate Intrinsic Value ²
Outstanding January 1, 2007	350,625	\$ 10.90	3.65	\$ 839,741	
Granted	20,000	12.85		104,200	
Exercised ³	(2,000)	11.00		(3,900)	
Forfeited or expired	(2,500)	11.00		(4,875)	
Outstanding December 31, 2007	366,125	\$ 11.01	2.75	\$ 935,166	\$
Exercisable December 31, 2007	218,750	\$ 11.16	2.63	\$ 380,865	\$

¹ Remaining contractual term is presented in years.

² The aggregate intrinsic value is calculated as the

difference between the exercise price of the underlying awards and the closing price of RMI's common stock as of December 31, 2007, for those awards that have an exercise price currently below RMI's closing price as of December 31, 2007. Awards with an exercise price above RMI's closing price as of December 31, 2007 are considered to have no intrinsic value.

- ³ RMI's aggregate intrinsic value for exercised options was \$4,400 for the year ended December 31, 2007.

A summary of the status of RMI's nonvested shares as of December 31, 2007 and changes during the year ended December 31, 2007 is presented below:

	Shares	Weighted Average Grant-Date Fair Value
Nonvested stock options at January 1, 2007	267,084	\$ 2.51
Granted	20,000	5.21
Vested	(135,209)	2.82
Forfeited	(2,500)	1.95
Nonvested stock options at December 31, 2007	149,375	\$ 2.61

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. Stock-Based Compensation (Continued):

During the years ended December 31, 2007 and 2006, RMI recognized compensation expense of \$375,081 and \$161,427, respectively, and a tax benefit of \$63,694 and \$10,198, respectively, related thereto. As of December 31, 2007, there was \$236,375 of RMI's total unrecognized compensation cost. No attributable expense has been included in RMI's total unrecognized compensation costs related to estimated forfeitures related to nonvested stock options granted under the RMI 2005 Plan as all options outstanding are granted to officers and directors. The total unrecognized compensation costs are expected to be recognized over the weighted average vesting period of 1.92 years. RMI's total fair value of the 135,209 options to purchase shares of RMI's common stock vested during the year ended December 31, 2007, was \$380,865. Awards granted during the year ended December 31, 2007, total 20,000 options to purchase shares of RMI's common stock, which were granted on July 2, 2007, with an exercise price of \$12.85 per share. During the year ended December 31, 2007, 2,500 options to purchase RMI's common stock were forfeited. The forfeited options to purchase shares of RMI's common stock had a grant date fair value per share of \$1.95 and a total fair value of \$4,875.

3. Note Receivable:

During the year ended December 31, 2006, the Company sold its minority interest in a related party, LAM Contracting, LLC (LAM) to LAM's majority owner. The Company sold its interest in LAM for \$793,540 that is to be paid with an initial payment of \$100,000 and quarterly payments of \$32,647 for six years, including interest at 4%. As of December 31, 2007 and 2006, \$535,360 and \$641,859, respectively, was due to the Company.

4. Concentration of Credit Risk:

The Company maintains cash balances at various financial institutions. Deposits not to exceed \$100,000 for each institution are insured by the Federal Deposit Insurance Corporation. At December 31, 2007 and 2006, the Company has uninsured cash, cash equivalents, and restricted cash in the amounts of approximately \$33.6 million and \$32.7 million, respectively.

The Company's business activities and accounts receivable are with customers in the construction industry and various governmental authorities and municipalities located primarily in Nevada and Arizona. The Company performs ongoing credit evaluations of its customers and maintains allowances for potential credit losses.

5. Accounts Receivable, net:

Accounts receivable, net consists of the following:

	December 31,	
	2007	2006

2012	872,729
Subsequent to 2011	1,106,005
	\$ 16,485,515

11. Lines of Credit:

In October 2007, the Company amended and restated its line of credit agreement. The Company combined a \$3.0 million line of credit and approximately a \$2.0 million line of credit into a single \$10.0 million line of credit for MVCI with an interest rate at Chase Manhattan Bank's prime rate, plus .25%. The interest rate as of December 31, 2007 was 7.5%. The balance outstanding on the line of credit as of December 31, 2007 was \$340,669 and is reported in Note 10 Notes Payable of these notes to consolidated financial statements. The line of credit agreement allows interest only payments until January 31, 2009. Beginning February 1, 2009, the line of credit converts into a term agreement requiring equal monthly principal plus interest payments through January 31, 2012 and is collateralized by all of MVCI's and the Company's assets. Under the terms of the agreement, the Company and/or MVCI are required to maintain a certain level of tangible net worth, a ratio of total debt to tangible net worth as well as a minimum cash flow to debt ratio. The Company is also required to maintain a certain level of earnings before interest, tax, depreciation and amortization (EBITDA). MVCI is also required to maintain a certain level of cash flow to current

portion of long term debt. As of December 31, 2007, the Company and MVCI were in compliance with these covenants.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

11. Lines of Credit (Continued):

As of December 31, 2007, the Company had a \$5.0 million line of credit loan agreement for RMI, with an interest rate at Chase Manhattan Bank's prime, plus .25%. The interest rate as of December 31, 2007 was 7.50%. The balance outstanding on the line of credit as of December 31, 2007 was \$664,012 and is reported in Note 10 Notes Payable of these notes to consolidated financial statements. The line of credit agreement allows interest only payments until December 31, 2008. If the agreement is not renewed by December 31, 2008 and a balance is outstanding, then the line of credit converts into a term agreement requiring equal monthly principal plus interest payments through December 31, 2011 and is collateralized by all of RMI's and the Company's assets. Under the terms of the agreement, the Company and/or RMI are required to maintain a certain level of tangible net worth, a ratio of total debt to tangible net worth as well as a minimum cash flow to debt ratio. The Company is also required to maintain a certain level of earnings before interest, tax, depreciation and amortization (EBITDA). RMI is also required to maintain a certain level of cash flow to current portion of long-term debt. As of December 31, 2007, the Company and RMI were in compliance with these covenants.

In addition to the lines of credit agreements mentioned above, the Company and RMI have each established capital expenditure commitments in the amounts of \$10.0 million and \$15.0 million, respectively. The purposes of these commitments are to fund certain acquisitions of capital equipment that the Company and RMI may need to improve capacity or productivity. As of December 31, 2007, the Company and RMI had approximately \$6.3 million and \$7.0 million, respectively, available to draw against under such commitments.

12. Related Party Transactions:*Revenue and Accounts Receivable:*

During the year ended December 31, 2006, the Company sold its minority interest in a related party, LAM Contracting, LLC (LAM) to LAM's majority owner and received a note receivable in the terms of the sale and is reported in Note 3 Note Receivable of these notes to consolidated financial statements. During the year ended December 31, 2005, the Company provided construction materials to LAM in the amount of \$152,630.

Professional Services:

During the years ended December 31, 2007, 2006 and 2005, a related party rendered professional services to the Company in the amounts of \$0, \$0 and \$164,202, respectively. During the years ended December 31, 2007, 2006 and 2005, the Company incurred director fees of \$201,000, \$91,000 and \$110,500, respectively, in aggregate to outside members of the board of directors. At December 31, 2007 and 2006, \$201,000 and \$91,000, respectively, were due to related parties which included amounts due to outside directors.

Subcontractor/Supplier:

LAM provided materials, services and equipment used in the Company's construction services segment during the year ended December 31, 2005 in the amount of \$7,740. At December 31, 2007 and 2006 there were no liabilities due to related parties from subcontracts and supplies.

13. Income Taxes:

The provisions for income tax expense from operations consist of the following:

	For the Years Ended December 31,		
	2007	2006	2005
Current	\$ (2,947,301)	\$ (3,167,174)	\$ (372,102)
Deferred	382,925	3,389	(2,198,853)
	\$ (2,564,376)	\$ (3,163,785)	\$ (2,570,955)

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES

13. Income Taxes (Continued):

The Company's deferred tax asset (liability) consists of the following:

	December 31,	
	2007	2006
Deferred tax asset:		
Nonqualified stock-based compensation	\$ 144,159	\$ 25,991
Allowance for bad debt and other	363,967	462,216
Inventory allowance	71,977	72,000
NOL carryforward		992
	580,103	561,199
Deferred tax liability:		
Depreciation	(2,610,836)	(2,974,857)
Net deferred tax liability	\$ (2,030,733)	\$ (2,413,658)

For the years ended December 31, 2007, 2006 and 2005, the effective tax rate differs from the federal statutory rate primarily due to state income taxes and permanent differences, as follows:

	For the Years Ended December 31,		
	2007	2006	2005
Statutory rate of 34% applied to income before income taxes	\$ 2,516,000	\$ 3,024,000	\$ 2,401,000
State taxes, net of federal benefit	196,000	202,000	140,000
Increase (decrease) in income taxes resulting from:			
Non-Deductible items	36,000	40,000	30,000
Domestic production activities deduction	(184,000)	(102,000)	
	\$ 2,564,000	\$ 3,164,000	\$ 2,571,000

At December 31, 2007 the Company has no Federal net operating loss carryforwards.

14. Commitments and Contingencies:

The Company purchased a building and moved its main office in Phoenix, Arizona in December 2006. The Company leases additional office space, batch plants, equipment, mixer trucks and property under leases and raw material purchase obligations expiring in various years through 2016. Rents and purchase obligations under the aforementioned operating leases and purchase agreements were \$9,147,545, \$6,126,141 and \$6,951,970 for the years ended December 31, 2007, 2006 and 2005, respectively.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. Commitments and Contingencies (Continued):

Minimum future rental payments under non-cancelable operating leases as of December 31, 2007 for each of the following years and in aggregate are:

For the Years Ending December 31,	Amount
2008	\$ 3,135,171
2009	2,486,739
2010	1,532,754
2011	717,642
2012	73,213
	\$ 7,945,519

Minimum future purchase agreements under non-cancelable purchase agreements as of December 31, 2007 for each of the following years and in aggregate are:

For the Years Ending December 31,	Amount
2008	\$ 3,857,293
2009	3,549,644
2010	2,802,935
2011	2,385,000
2012	2,385,000
Subsequent to 2012	9,106,250
	\$ 24,086,122

The Company has entered into employment contracts with its executive officers and key employees that provide for an annual salary, issuance of the Company's common stock and various other benefits and incentives. RMI has entered into employment contracts with two of its executive officers that provide for an annual salary, issuance of RMI's common stock and various other benefits and incentives. As of December 31, 2007, the total commitments, excluding benefits and incentives, for each of the following years and in aggregate are:

For the Years Ending December 31,	Amount
2008	\$ 979,208
2009	557,500
2010	360,417
	\$ 1,897,125

The Company is the lessee of vehicles and equipment under capital leases expiring in various years through 2008. The assets and liabilities under a capital lease are initially recorded at the lower of the present value of the minimum lease payments or the fair value of the asset. Each asset is depreciated over the lesser of the expected useful life or the lease term. Depreciation on the assets under capital leases charged to expense in 2007, 2006 and 2005 was \$83,315, \$353,768 and \$347,729, respectively. At December 31, 2007 and 2006, property and equipment included \$186,961

and \$892,302, respectively, net of accumulated depreciation, of vehicles and equipment under capital leases.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. Commitments and Contingencies (Continued):

Minimum future lease payments under capital leases as of December 31, 2007 for the following year and in aggregate are:

For the Year Ending December 31,	Amount
2008	\$ 104,193
Total minimum payments	104,193
Less: amount representing interest	(2,093)
Present value of net minimum lease payment	102,100
Less: current portion	(102,100)
	\$

Interest rates on capitalized leases vary from 5.07% to 6.75% and are imputed based on the lower of the Company's incremental borrowing rate at the inception of the lease or the lessor's implicit rate of return.

The Company has agreed to indemnify its officers and directors for certain events or occurrences arising as a result of the officer or director serving in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited. However, the Company has a directors and officers liability insurance policy that enables it to recover a portion of any future amounts paid up to \$25.0 million. As a result of its insurance policy coverage and no current or expected litigation against the Company's officers or directors, the Company believes the estimated fair value of these indemnification agreements is minimal and has no liabilities recorded for these agreements as of December 31, 2007.

The Company enters into indemnification provisions under its agreements with other companies in its ordinary course of business, typically with business partners, customers, landlords, lenders and lessors. Under these provisions the Company generally indemnifies and holds harmless the indemnified party for losses suffered or incurred by the indemnified party as a result of the Company's activities or, in some cases, as a result of the indemnified party's activities under the agreement. The maximum potential amount of future payments the Company could be required to make under these indemnification provisions is unlimited. The Company has not incurred material costs to defend lawsuits or settle claims related to these indemnification agreements. As a result, the Company believes the estimated fair value of these agreements is minimal. Accordingly, the Company has no liabilities recorded for these agreements as of December 31, 2007.

15. Minority Interest in Consolidated Subsidiary:

On August 24, 2005, the Company's construction materials subsidiary, Ready Mix, Inc. (RMI) began trading on the American Stock Exchange under the trading symbol RMX. The initial public offering of 1,782,500 shares of RMI's common stock, including the exercise of the over-allotment option, was sold for \$11.00 per share. In 2007, the Company purchased an additional 620,212 shares of RMI's common stock and as of December 31, 2007, retains ownership of 2,645,212 shares, representing approximately 69% of the total outstanding shares of RMI's common stock. Proceeds from the initial public offering were used by RMI for the purchase of plant and equipment, repayment of debt to the Company and working capital.

Net proceeds realized through the initial public offering and the proportionate share of minority interest in RMI's net income from the date of the offering through December 31, 2007 and 2006 are reported on the December 31, 2007 and 2006 balance sheets under the caption Minority Interest in Consolidated Subsidiary. Also, the portion of net income referenced above is reported on the related statements of operations for the years ended December 31, 2007,

2006 and 2005 under the caption Minority Interest in Consolidated Subsidiary.

**MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

16. Stockholders Equity:

Preferred Stock:

The Company has authorized 1,000,000 shares of \$.001 par value preferred stock to be issued, with such rights, preferences, privileges, and restrictions as determined by its board of directors.

Common Stock and Warrants to Purchase Common Stock:

On October 23, 2006, the Company issued an additional 817,120 shares of common stock in a private placement offering as units. The units were issued with 81,712 warrants to purchase 81,712 shares of the Company's common stock as units, exercisable six months and one day from October 23, 2006, the closing date of the offering, at an exercise price of \$12.60 per share. The Company issued the units of common stock at \$9.00 per share which resulted in proceeds received in the amount of approximately \$6.6 million, which is net of offering costs of approximately \$.8 million. The proceeds from the offering were used as working capital in order to secure additional bonding capacity. In connection with this offering, the Company entered into a registration rights agreement with all of the investors who purchased units. The registration of the shares pursuant to a Registration Statement on Form S-3 was declared effective by the SEC on November 17, 2006.

17. Litigation and Claim Matters:

The Company and its subsidiaries are party to legal proceedings in the ordinary course of its business. With the exception of the matters detailed below, the Company believes that the nature of these proceedings (which generally relate to disputes between the Company, or the Company's subsidiaries, and its subcontractors, material suppliers or customers regarding payment for work performed or materials supplied) are typical for a construction firm of its size and scope, and no other pending proceedings are deemed to be materially detrimental and some claims may prove beneficial to its financial condition.

The following proceedings represent matters that may be material and have been referred to legal counsel for further action:

Requests for Equitable Adjustment to Construction Contracts. MVCI has made claims as described below on the following contracts:

- (1) Two contracts with the New Mexico State Highway and Transportation Department The approximate total value of claims on these projects is \$12,002,782 of which \$8,336,931 is on behalf of MVCI and the balance of \$3,665,851 is on behalf of the prime contractor or subcontractors. The primary issues are changed conditions, plan errors and omissions, contract modifications and associated delay costs. In addition, the projects were not completed within the adjusted contract time because of events giving rise to the claims. The prosecution of the claims will include the appropriate extensions of contract time to offset any potential liquidated damages. The trial date has been postponed to May 4, 2009.
- (2) Federal Highway Administration The approximate total value of claims on this project is \$7,081,529, of which \$6,751,940 is on behalf of MVCI and the balance of \$329,589 is on behalf of a subcontractor. The primary issues are unforeseen conditions, changed conditions, plan errors and omissions, contract modifications and associated delay costs. In addition, the projects were not completed within the adjusted contract time because of events giving rise to the claims. On September 18, 2006, MVCI submitted a formal claim with the Federal Highway Administration. On September 28, 2007, the Federal Highway Administration denied all of MVCI's claims. On November 6, 2007, MVCI filed an appeal with the United States Civilian Board of Contract Appeals and no trial date has been set as of the date of this report. MVCI and the Federal Highway Administration have since engaged in settlement discussions of all claims.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

17. Litigation and Claim Matters (Continued):

The combined total of all outstanding claims as of December 31, 2007 is \$19,084,311. MVCI's portion of the total claims is \$15,088,871 and the balance pertaining to a prime contractor or subcontractors' claims is \$3,995,440. Total claim amounts reported by MVCI are approximate and are subject to revision as final documentation progresses and as issues are resolved and/or payments made. Claim amounts do not include any prejudgment interest, if applicable. Relative to the aforementioned claims, the Company has recorded \$2,463,880 in cumulative claims receivable to offset a portion of costs incurred to date on the claims.

The Company has not accrued a liability related to the prime contractor or subcontractors' claims as no liability would be deemed payable if their portion of the claims did not receive a favorable final outcome. Correspondingly, no receivable has been recorded for overhead and profit included in their portion of the claims on the Company's behalf.

Although the Company believes that the claims receivable amount represents a reasonably conservative posture, any claims proceeds ultimately paid to the Company less than the aggregate amount recorded on the balance sheet of \$2,463,880, will decrease earnings. Conversely, a payment for those same items in excess of \$2,463,880 will result in increased income.

The portion of accounts receivable pertaining to retention withheld on the contracts for which claims have been filed amounts to \$879,763. The degree to which the Company is successful in prosecuting its claims may also impact the amount of retention paid by the owner. The Company believes that all retention amounts currently being held by the owners on the contracts with outstanding claims will be paid in full in accordance with the contract terms. Therefore, no allowance has been made to reduce the receivables due from the retention on the disputed contracts.

Lawsuits Filed Against Meadow Valley Contractors, Inc. and Ready Mix, Inc.

- (1) MVCI is defending a claimed preference, in the Third Judicial Court of Salt Lake County, in connection with a payment made to it by an insurance company, Southern America Insurance Company, in the approximate amount of \$100,000. In January of 2008, the court entered judgment against MVCI in the amount of approximately \$185,000, representing the original claim amount plus interest. MVCI continues to believe that the payment is not a preference, and is vigorously appealing the judgment, and in contemplation of the minimal after tax effect of the judgment, MVCI has not recorded any liability in regards to this claim at December 31, 2007.
- (2) MVCI, through its insurance company, is providing a defense to the State of Arizona, pursuant to its obligations under its contract, for a complaint brought by the parents of Corey James and Michelle James in the Superior Court of the State of Arizona, in and for the County of Pinal. The complaint, No. CV00400744, was filed on July 9, 2004. The complaint is a civil action titled John James, the Father of Decedent Corey James, Donna James, the mother of Decedent Corey James, Marjorie Surine, the Mother of Decedent Michelle James and Joseph Burkhamer, the Father of Decedent Michelle James, Plaintiffs, vs. The State of Arizona, a Body Politic; John Does and Jane Does 1-10; ABC Companies 1-5; and Black and White Corporations, Partnerships and/or Sole proprietorships 1-10, or Other Entities, Defendants. The complaint seeks damages from the State of Arizona for losses suffered by the plaintiffs as a result of a traffic accident. In January of 2006, Joseph Burkhamer, the father of decedent Michelle James, was dismissed from the complaint and he has appealed the dismissal. During 2007, MVCI's insurance company settled with the remaining plaintiffs with no additional responsibility for MVCI. MVCI denies responsibility for the accident and is vigorously defending the action. MVCI is unable to ascertain if any loss is probable or even estimatable and accordingly, has not accrued a liability related to this complaint as of December 31, 2007.

17. Litigation and Claim Matters (Continued):

- (3) On November 8, 2007 Kitchell Contractors, Inc. of Arizona filed a complaint (CV2007-020708), in the Superior Court of the State of Arizona, against RMI for re-imbursement of costs they incurred to remove and replace concrete totaling approximately \$200,000. The claim alleges that the materials supplied to a construction project did not meet the minimum standards as defined in the contract between the parties. RMI is disputing their claims and are vigorously defending against the complaint.

18. Statement of Cash Flows:*Non-Cash Investing and Financing Activities:*

The Company recognized investing and financing activities that affected assets and liabilities, but did not result in cash receipts or payments. These non-cash activities are as follows:

During the years ended December 31, 2007, 2006 and 2005, the Company financed the purchase of property and equipment in the amounts of \$4,106,578, \$6,409,452 and \$3,793,429, respectively. During the year ended December 31, 2005, the Company refinanced a note payable in the amount of \$3,205,303.

During the years ended December 31, 2006 and 2005, the Company financed the purchase of various insurance policies in the amounts of \$477,747 and \$416,017, respectively.

During the year ended December 31, 2007, 2006 and 2005, the Company realized income tax benefits of \$30,993, \$144,879 and \$884,083, respectively, as a result of disqualifying dispositions of incentive stock options, which is included in income taxes payable and additional paid-in capital.

During the year ended December 31, 2006, the Company sold its minority interest in LAM to its majority owner. The Company sold its interest in LAM for \$793,540, which includes an initial payment of \$100,000 and quarterly payments to be paid over six years. The balance of this note receivable at December 31, 2007 was \$535,360.

19. Significant Customers:

For the years ended December 31, 2007, 2006 and 2005, the Company recognized a significant portion of its revenue from the following customers (shown as an approximate percentage of consolidated revenue):

	For the Years Ended December 31,		
	2007	2006	2005
A	24.7%	20.9%	21.0%
B	21.0%	9.1%	23.5%
C	2.9%	5.1%	11.6%

At December 31, 2007 and 2006, amounts due from the aforementioned Customers included in restricted cash and accounts receivables, are as follows:

	December 31,	
	2007	2006
A	\$2,500,347	\$1,874,446
B	8,172,638	4,789,025
C	1,964,328	2,153,500

20. Employee Benefit Plan:

The Company maintains a 401(k) profit sharing plan (Plan) allowing substantially all employees to participate. Under the terms of the Plan, the employees may elect to contribute a portion of their salary to the Plan. The matching contributions by the Company are at the discretion of the Company's board of directors, and are subject to certain limitations. For the years ended December 31, 2007, 2006 and 2005, the Company contributed \$693,078, \$580,268 and \$437,363, respectively, to the Plan.

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

21. Earnings per Share:

Statement of Financial Accounting Standards No. 128, Earnings per Share, provides for the calculation of Basic and Diluted earnings per share. Basic earnings per share includes no dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period.

Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of an entity, as set forth below:

	For the Years Ended December 31,		
	2007	2006	2005
Weighted average common shares outstanding	5,129,275	4,328,160	3,783,089
Dilutive effect of:			
Stock options	177,019	292,964	368,007
Weighted average common shares outstanding assuming dilution	5,306,294	4,621,124	4,151,096

All dilutive common stock equivalents are reflected in our earnings per share calculations. Anti-dilutive common stock equivalents are not included in our earnings per share calculations. The Company had anti-dilutive common stock equivalents as of December 31, 2007 and 2006, as described below.

The Company's diluted net income per common share for the year ended December 31, 2007 was computed based on the weighted average number of shares of common stock outstanding during the period and the weighted average number of options to purchase 305,011 shares at a range of \$1.46 to \$10.11. The weighted average number of options and warrants to purchase 90,212 shares at \$13.88 and \$12.60 per share were outstanding at December 31, 2007, but were not included in the computation of diluted net income per common shares because the options' and warrants' exercise price was greater than the average market price of the common share.

The Company's diluted net income per common share for the year ended December 31, 2006 was computed based on the weighted average number of shares of common stock outstanding during the period and the weighted average number of options to purchase 434,542 shares at a range of \$1.46 to \$10.11. The weighted average number of warrants to purchase 81,712 shares at \$12.60 per share were outstanding at December 31, 2006, but were not included in the computation of diluted net income per common shares because the warrants' exercise price was greater than the average market price of the common share.

The Company's diluted net income per common share for the year ended December 31, 2005 was computed based on the weighted average number of shares of common stock outstanding during the period and the weighted average number of options to purchase 494,857 shares at a range of \$1.46 to \$9.38.

22. Backlog:

The Company's backlog (anticipated revenue from the uncompleted portions of awarded projects) was approximately \$172.4 million at December 31, 2007, compared to approximately \$89.5 million at December 31, 2006. At December 31, 2007, approximately \$128.0 million (unaudited) of the Company's backlog of work is scheduled for completion during 2008.

23. Other Informative Disclosures:

The construction services segment of the Company generates revenue by providing construction services, usually under terms of a contract with an owner or a subcontract with another contractor. The construction services segment operates in Nevada and Arizona markets.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

23. Other Informative Disclosures (Continued):

The construction materials segment manufactures and distributes ready-mix concrete and sand and gravel products in the Las Vegas, Nevada and Phoenix, Arizona markets. Prospective customers include concrete subcontractors, prime contractors, homebuilders, commercial and industrial property developers, pool builders and homeowners. Construction materials sales first began from a single location in March 1997 and, by the end of 2006, expanded to three locations in the Las Vegas, Nevada vicinity, one location in the Moapa, Nevada vicinity and three locations in the Phoenix, Arizona vicinity.

The construction materials testing segment of the Company generates revenue by providing materials testing to all segments of the construction industry, which can be under terms of a contract or as time and materials billable work with an owner or a subcontract with another contractor. The construction materials testing segment operates in the Las Vegas, Nevada regional market.

The following is a summary of certain financial information of the Company's three main areas of operations for 2007, 2006 and 2005:

	Construction Services	Construction Materials	Construction Materials Testing
For the twelve months ended December 31, 2007			
Gross revenue	\$ 129,262,421	\$ 77,364,672	\$ 1,383,085
Intercompany revenue		(1,744,544)	(346,630)
Cost of revenue	117,924,528	71,210,190	1,460,210
Interest income	1,172,274	385,353	
Interest expense	101,333	137,533	
Depreciation and amortization	2,686,412	4,376,723	19,271
Income (loss) before taxes	5,773,251	2,111,309	(595,699)
Income tax benefit (expense)	(2,011,750)	(756,107)	203,481
Net income (loss)*	3,761,501	691,523	(392,218)
Total assets	54,836,237	46,279,080	636,959
For the twelve months ended December 31, 2006			
Gross revenue	\$ 112,948,370	\$ 83,588,803	\$ 546,548
Intercompany revenue	(1,012,085)	(436,865)	(112,820)
Cost of revenue	102,878,625	74,382,436	512,572

Interest expense	(175,657)	(163,229)	
Depreciation and amortization	2,438,374	3,439,208	7,899
Income (loss) before taxes	3,863,765	5,211,606	(182,216)
Income tax benefit (expense)	(1,357,211)	(1,872,331)	65,757
Net income (loss)*	2,506,554	1,775,827	(116,459)
Total assets	54,463,850	47,022,753	619,052
For the twelve months ended December 31, 2005			
Gross revenue	\$ 116,822,072	\$ 67,734,424	\$
Intercompany revenue		(683,633)	
Cost of revenue	108,706,174	60,662,743	
Interest income	466,901	173,574	
Interest expense	(212,546)	(227,341)	
Intercompany interest income (expense)	77,561	(77,561)	
Depreciation and amortization	2,088,144	2,410,900	

Income before taxes	3,142,565	3,920,632
Income tax expense	(1,135,913)	(1,435,042)
Net income *	2,006,652	2,197,067
Total assets	47,109,736	39,906,794

* Net income for the construction materials segment includes the minority interest deduction of \$663,679, \$1,563,449 and \$288,523 for the years ended December 31, 2007, 2006 and 2005, respectively. In addition, in 2005 net income has been re-allocated for comparative purposes.

Table of Contents

MEADOW VALLEY CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

23. Other Informative Disclosures (Continued):

There are no differences in accounting principles between the operations. All centrally incurred costs are allocated to the construction services operation. Beginning in 2005, an administrative services fee has been allocated to the materials segment in the amount of \$22,000 per month. Intercompany revenue is eliminated at cost to arrive at consolidated revenue and cost of revenue.

24. Quarterly Financial Data, Unaudited:

	March 31,	June 30,	September 30,	December 31,
2007

Diluted weighted average common shares outstanding	3,960,138	4,040,282	4,198,742	4,405,220

25. Subsequent Events:

On January 2, 2008, the Company and RMI granted each of its outside, independent directors options to purchase 5,000 shares of common stock of each respective company. These options vested upon grant and expire in 2013. The exercise price per share for these options to purchase the Company's and RMI's common stock is \$12.50 and \$6.40.

respectively.

Table of Contents

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A(T). *Controls and Procedures*

(a) Evaluation of Disclosure Controls and Procedures

Our principal executive officer and principal financial officer, based on their evaluation of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Annual Report on Form 10-K, have concluded that our disclosure controls and procedures are effective for ensuring that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

(b) Management's Annual Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f). Our management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation under the framework in Internal Control – Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2007.

This Annual Report on Form 10-K does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this Annual Report on Form 10-K.

(c) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the last quarter of 2007 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information*

None.
