Approximate date of commencement of proposed sale to the public: As soon as practicable after the effective date of this registration statement which relates to the merger of limited partnerships with and into Pioneer Natural Resources USA, Inc. pursuant to the merger agreement described in the enclosed proxy statement/prospectus.

If the securities being registered on this form are being offered in connection with the formation of a holding company and there is compliance with General Instruction G, check the following box. []

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

If this form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. []

CALCULATION OF REGISTRATION FEE

TITLE OF EACH CLASS OF SECURITIES TO BE REGISTERED	AMOUNT TO BE REGISTERED(1)	PROPOSED MAXIMUM OFFERING PRICE PER SHARE(2)	PROPOSED MAXIMUM AGGREGATE OFFERING PRICE(2)
Common Stock, \$0.01 par value	6,587,764	\$8.55	\$56,300,000

(1) Based upon the registrant's estimate of the maximum number of shares that might be issued in connection with the proposed merger transaction.

(2) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(f), based on the book value of the unaffiliated partnership interests to be cancelled in the transaction, computed as of the latest practicable date. A filing fee of \$20,500 was paid pursuant to the filing on April 17, 2001 by the registrant and Pioneer Natural Resources USA, Inc. of a preliminary Schedule 13e-3. Pursuant to Rule 240.0-11(a)(2) of the Securities Exchange Act of 1934, this amount has been credited against the amount that would otherwise be payable in connection with this filing, resulting in no additional payment herewith.

THE REGISTRANT HEREBY AMENDS THIS REGISTRATION STATEMENT ON SUCH DATE OR DATES AS MAY BE NECESSARY TO DELAY ITS EFFECTIVE DATE UNTIL THE REGISTRANT SHALL FILE A FURTHER AMENDMENT WHICH SPECIFICALLY STATES THAT THIS REGISTRATION STATEMENT SHALL THEREAFTER BECOME EFFECTIVE IN ACCORDANCE WITH SECTION 8(a) OF THE SECURITIES ACT OF 1933 OR UNTIL THE REGISTRATION STATEMENT SHALL BECOME EFFECTIVE ON SUCH DATE AS THE SECURITIES AND EXCHANGE COMMISSION, ACTING PURSUANT TO SAID SECTION 8(a), MAY DETERMINE.

Parker & Parsley Producing Properties 87-B, Ltd.	Parker & Parsley 91-A, L.P.
Parker & Parsley Private Investment 87, Ltd.	Parker & Parsley 91-B, L.P.

Parker & Parsley Petroleum USA, Inc. and other predecessors of Pioneer Natural Resources USA, Inc., a Delaware corporation that we call Pioneer USA, sponsored each of the partnerships. Pioneer USA is the managing or sole general partner of each of the partnerships. Pioneer USA is a direct 100% owned subsidiary of Pioneer Natural Resources Company, a Delaware corporation that we call Pioneer Parent.

The purpose of the special meeting for each partnership in which you own an interest is for you to consider and vote on the following matters:

1. A proposal to approve an Agreement and Plan of Merger dated as of ,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

2001, among Pioneer Parent, Pioneer USA and each of the partnerships. Each partnership that approves this proposal, which we call a participating partnership, will merge with and into Pioneer USA, with Pioneer USA surviving the merger. Each partnership interest of a participating partnership, other than Pioneer USA's partnership interests, will be converted into shares of common stock, par value \$.01 per share, of Pioneer Parent. The number of shares of common stock Pioneer Parent will offer for all partnership interests of a participating partnership will be based on (1) the participating partnership's merger value and (2) the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for the partnership. The merger value for a participating partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the partnership to its partners. For purposes of illustration in this document, we have calculated the number of shares to be issued based on an assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Prior to the date of the special meeting for each partnership, we will update the number of shares to be issued using the actual average closing price of Pioneer Parent common stock for the ten trading days ending three business days before the initial date of the special meeting. The Pioneer Parent common stock will be allocated among the partners based on the liquidation provisions of each partnership agreement. Pioneer Parent will not issue fractional shares to any limited partner upon completion of the merger of any partnership. Instead, Pioneer Parent will round any fractional shares of Pioneer Parent common stock up to the nearest whole share. Pioneer USA will not receive any Pioneer Parent common stock for its partnership interests in the participating partnerships.

-1-

3

2. A proposal to amend the partnership agreement of each partnership to permit the partnership's merger with Pioneer USA. If the amendment is not approved, that partnership cannot merge into Pioneer USA even if the partners of that partnership approve the merger agreement.

3. A proposal (A) to approve the opinion issued to Pioneer USA by on behalf of the limited partners of each partnership that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners (1) will result in the loss of any limited partner's limited liability or (2) will adversely affect the federal income tax classification of the partnership or any of its limited partners and (B) to approve the selection of as special legal counsel for the limited partners of each partnership to render the legal opinion.

4. Other business that properly comes before the special meeting or any adjournments or postponements of the special meeting. Pioneer USA is not aware of any other business for the special meeting.

The accompanying proxy statement/prospectus contains information about each merger, including the amount of Pioneer Parent common stock that will be offered to limited partners per \$1,000 initial investment in each partnership, and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

descriptions of the merger agreement, the merger amendment and the legal opinion of the special legal counsel for the limited partners. The proxy statement/prospectus also contains a copy of the merger agreement, the merger amendment and the legal opinion.

Pioneer USA set the close of business on _____, 2001, as the record date to identify the limited partners who are entitled to notice of and to vote at each special meeting or any adjournments or postponements of the special meeting. During the ten business days before the special meeting, you may examine lists of the limited partners of each partnership in which you own an interest at the offices of Pioneer USA during normal business hours for any purpose relevant to the special meeting for each partnership in which you own an interest.

ON _____, 2001, PIONEER USA'S BOARD OF DIRECTORS UNANIMOUSLY DETERMINED THAT THE MERGER OF EACH PARTNERSHIP IN WHICH YOU OWN AN INTEREST IS ADVISABLE, FAIR TO YOU AS AN UNAFFILIATED LIMITED PARTNER, AND IN YOUR BEST INTERESTS. THE BOARD RECOMMENDS THAT YOU, AS AN UNAFFILIATED LIMITED PARTNER, VOTE FOR THE MERGER AGREEMENT, THE MERGER AMENDMENT, THE SELECTION OF SPECIAL LEGAL COUNSEL FOR THE LIMITED PARTNERS AND THAT COUNSEL'S LEGAL OPINION FOR EACH PARTNERSHIP IN WHICH YOU OWN AN INTEREST. ALTHOUGH PIONEER USA'S BOARD OF DIRECTORS HAS ATTEMPTED TO FULFILL ITS FIDUCIARY DUTIES TO YOU, PIONEER USA'S BOARD OF DIRECTORS HAD CONFLICTING INTERESTS IN EVALUATING EACH MERGER BECAUSE EACH MEMBER OF ITS BOARD OF DIRECTORS IS ALSO AN OFFICER OF PIONEER PARENT. Each partnership requires a favorable vote of the holders of a majority of its limited partnership interests to approve the merger agreement, the merger amendment, the selection of special legal counsel for the limited partners and that counsel's legal opinion, except that Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P. each require the favorable vote of the holders, other than Pioneer USA, of 6-2/3% of its limited partnership interests to approve those merger proposals.

IF YOU DO NOT SEND IN YOUR PROXY CARD OR VOTE AT THE SPECIAL MEETING FOR A PARTNERSHIP IN WHICH YOU OWN AN INTEREST, IT WILL HAVE THE SAME EFFECT AS IF YOU VOTED AGAINST THE MERGER OF THAT PARTNERSHIP.

You are requested to sign, vote and date the enclosed proxy card and return it promptly in the enclosed envelope, even if you expect to be present at each special meeting for the partnerships in which you own an interest. If you give a proxy, you can revoke it at any time before the special meeting for the partnership as to which you are revoking your proxy. If you are present at the special meeting for a partnership in which you own an interest, you may withdraw your proxy and vote in person.

By Order of the Board of Directors,

_____, 2001

Mark L. Withrow
Director, Executive Vice President,
General Counsel and Secretary

Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

PRELIMINARY PROXY STATEMENT/PROSPECTUS, SUBJECT TO COMPLETION, DATED
JUNE , 2001

[LOGO]

PIONEER NATURAL RESOURCES COMPANY
PIONEER NATURAL RESOURCES USA, INC.
1400 WILLIAMS SQUARE WEST
5205 NORTH O'CONNOR BLVD.
IRVING, TEXAS 75039

, 2001

Dear Limited Partners:

Pioneer Natural Resources Company, a Delaware corporation that we call Pioneer Parent, and we at Pioneer Natural Resources USA, Inc., a Delaware corporation and 100% owned subsidiary of Pioneer Parent that we call Pioneer USA, desire to acquire 46 limited partnerships. We are the managing or sole general partner of each of the partnerships.

If you and the other limited partners of a partnership approve the merger of the partnership, the partnership will be merged with and into Pioneer USA, with Pioneer USA surviving the merger. We call each partnership that merges into Pioneer USA a participating partnership. Each partnership interest of a participating partnership will be converted into shares of common stock, par value \$.01 per share, of Pioneer Parent. The number of shares of common stock Pioneer Parent will offer for all partnership interests of a participating partnership will be based on (1) the participating partnership's merger value and (2) the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for the partnership. The merger value for a participating partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the partnership to its partners.

The merger value for each partnership is based on the reserve value of the partnership's underlying properties, which reserve value has not been reduced for general and administrative expenses. As a result, we believe the merger value is essentially the same value or a higher value than the liquidation value that might have been achieved by selling the partnership's property interests on March 31, 2001, and liquidating the partnership at that time.

We have retained Robert A. Stanger & Co., Inc., which we call Stanger, to issue an opinion regarding the fairness of the merger value to the limited partners in connection with the merger of each partnership. The written opinion of Stanger is contained in this document. You should read all of it carefully.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

We can complete the merger of each partnership only if the holders of its limited partnership interests approve the merger agreement, the amendment to the partnership agreement to permit the merger, the selection of special legal counsel for the limited partners and that counsel's legal opinion. This document provides information about each proposed merger. This document also constitutes a prospectus by Pioneer Parent for up to an aggregate of 5,855,813 shares of Pioneer Parent common stock to be issued in the proposed merger transaction, based on an assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Please give all of this information your careful attention.

YOUR VOTE IS IMPORTANT. Whether or not you plan to attend the special meeting for each partnership in which you own an interest, please take the time to vote by completing and mailing to us the enclosed proxy card. This will not prevent you from revoking your proxy at any time prior to the special meeting for each partnership in which you own an interest or from voting your partnership interests in person if you later choose to attend the special meeting for each partnership in which you own an interest.

We intend to mail certificates representing shares of Pioneer Parent common stock to the partners of each partnership that approves the merger transaction promptly after completing the merger of the partnership. Certificates representing partnership interests will be automatically cancelled, and you will not have to surrender your certificates to receive the Pioneer Parent common stock.

YOUR CERTIFICATE THAT YOU ARE NOT A FOREIGN PERSON, WHICH WE CALL A CERTIFICATION OF NON-FOREIGN STATUS, IS IMPORTANT. Whether or not you plan to vote on the merger of each partnership in which you own an interest, please take the time to complete and return to us the enclosed certification of non-foreign status. If we receive a properly completed certification of non-foreign status from you, we will not withhold federal income taxes on the Pioneer Parent common stock to be issued to you upon the merger of each partnership in which you own an interest.

Sincerely,

Mark L. Withrow
Director, Executive Vice President,
General Counsel and Secretary

YOU SHOULD CAREFULLY CONSIDER THE RISKS RELATING TO THE MERGER OF EACH PARTNERSHIP IN WHICH YOU OWN AN INTEREST DESCRIBED IN "RISK FACTORS" BEGINNING ON PAGE 17. THESE INCLUDE:

- o THE MERGER VALUE FOR THE PARTNERSHIP DETERMINES THE AMOUNT OF PIONEER PARENT COMMON STOCK YOU WILL RECEIVE IN THE MERGER OF THE PARTNERSHIP. PIONEER PARENT AND PIONEER USA DETERMINED EACH MERGER VALUE AND WILL NOT ADJUST IT FOR CHANGES IN PARTNERSHIP VALUE BEFORE THE MERGER IS COMPLETED.
- o YOU WERE NOT INDEPENDENTLY REPRESENTED IN ESTABLISHING THE TERMS OF ANY MERGER.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o OUR BOARD OF DIRECTORS HAD CONFLICTING INTERESTS IN EVALUATING EACH MERGER BECAUSE EACH MEMBER OF OUR BOARD OF DIRECTORS IS ALSO AN OFFICER OF PIONEER PARENT.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES REGULATORS HAVE APPROVED ANY OF THE MERGERS, THE PIONEER PARENT COMMON STOCK TO BE ISSUED IN EACH MERGER OR THE FAIRNESS OR THE MERITS OF EACH MERGER OR HAVE DETERMINED WHETHER THE INFORMATION CONTAINED IN THIS DOCUMENT IS ACCURATE OR ADEQUATE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

This proxy statement/prospectus is dated _____, 2001. It is first being mailed to the limited partners on or about _____, 2001.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

You may read and copy any reports, statements or other information that Pioneer Parent or any reporting partnership files at the SEC's public reference room at 450 Fifth Street, N.W., Washington, D.C. 20549, or at the SEC's public reference rooms at 7 World Trade Center, Suite 1300 New York, New York 10048 and at 500 West Madison Street, Suite 1400, Chicago, Illinois 60661. Copies of these materials may also be obtained from the SEC at prescribed rates by writing to the Public Reference Section of the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference rooms. Pioneer Parent's and each reporting partnership's filings with the SEC are also available to the public from commercial document retrieval services and at the web site maintained by the SEC at <http://www.sec.gov>.

Pioneer Parent's common stock is listed on the New York Stock Exchange and the Toronto Stock Exchange, under the symbol "PXD." Pioneer Parent's reports and other information filed with the SEC can also be inspected at the offices of the New York Stock Exchange and the Toronto Stock Exchange.

6

Pioneer Parent filed a registration statement on Form S-4 to register with the SEC Pioneer Parent common stock to be issued to the limited partners of each participating partnership. This document is a part of that registration statement and constitutes the prospectus of Pioneer Parent in addition to being the proxy statement of each partnership. As allowed by SEC rules, this document does not contain all the information you can find in the registration statement or the exhibits to the registration statement.

The SEC allows Pioneer Parent to incorporate by reference information into this document, which means that Pioneer Parent can disclose important information to you by referring you to another document filed separately with the SEC. The information incorporated by reference is deemed to be part of this document, except for any information superseded by information in this document. This document incorporates by reference the documents set forth below that Pioneer Parent has previously filed with the SEC and that contain important information about Pioneer Parent and its finances:

- o Quarterly Report on Form 10-Q for the three months ended March 31, 2001

- o Annual Report on Form 10-K for the year ended December 31, 2000

- o The description of Pioneer Parent common stock contained in Pioneer Parent's registration statement on Form 8-A filed on August 5, 1997, as amended by Form 8-A/A filed on August 8, 1997.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer Parent is also incorporating by reference additional documents that it files with the SEC under sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934 between the date of this document and the date of the special meeting for each partnership.

The supplement to this document for each partnership contains financial information for the partnership. The information supplement for each partnership constitutes an integral part of this document. Please carefully read the supplement for each partnership in which you are a limited partner.

Pioneer Parent has supplied all information contained or incorporated by reference in this document relating to Pioneer Parent, and each partnership has supplied all the information contained in this document relating to the partnership.

You can obtain any of the documents incorporated by reference through Pioneer Parent or the SEC. Documents incorporated by reference are available from Pioneer Parent without charge. Exhibits to the documents will not be sent, however, unless those exhibits have specifically been incorporated by reference as exhibits in this document. Limited partners of each partnership may obtain documents incorporated by reference in this document by requesting them in writing or by telephone at the following address:

Pioneer Natural Resources Company
1400 Williams Square West
5205 North O'Connor Blvd.
Irving, Texas 77039
Telephone: (972) 444-9001
Attention: Investor Relations

IF YOU WOULD LIKE TO REQUEST DOCUMENTS FROM PIONEER PARENT OR ANY PARTNERSHIP IN WHICH YOU OWN AN INTEREST, PLEASE DO SO BY _____, 2001 [INSERT 5TH BUSINESS DAY BEFORE MEETING] TO RECEIVE THEM BEFORE THE SPECIAL MEETING FOR THE PARTNERSHIP.

You should rely only on the information contained or incorporated by reference in this document to vote on the merger of each partnership in which you own an interest. We have not authorized anyone to give any information that is different from what is contained in this document. This document is dated _____, 2001. You should not assume that the information contained in this document is accurate as of any date other than that date, and neither the mailing of this document to you nor the issuance of Pioneer Parent common stock in the merger of each partnership shall create an implication to the contrary.

WE HAVE PREPARED A SEPARATE SUPPLEMENT TO THIS DOCUMENT FOR EACH PARTNERSHIP. EACH SUPPLEMENT INCLUDES:

- o A TABLE CONTAINING:
 - THE AGGREGATE INITIAL INVESTMENT BY THE LIMITED PARTNERS
 - THE AGGREGATE HISTORICAL LIMITED PARTNER DISTRIBUTIONS THROUGH JULY 31, 2001
 - THE MERGER VALUE ATTRIBUTABLE TO PARTNERSHIP INTERESTS OF LIMITED PARTNERS, EXCLUDING PIONEER USA
 - THE MERGER VALUE PER \$1,000 LIMITED PARTNER INVESTMENT
 - THE MERGER VALUE PER \$1,000 LIMITED PARTNER INVESTMENT AS A MULTIPLE OF DISTRIBUTIONS FOR THE PAST FOUR QUARTERLY DISTRIBUTIONS INCLUDING THE DISTRIBUTION IN JULY 2001
 - THE BOOK VALUE PER \$1,000 LIMITED PARTNER INVESTMENT AS OF MARCH 31, 2001 AND AS OF DECEMBER 31, 2000
 - THE GOING CONCERN VALUE PER \$1,000 LIMITED PARTNER INVESTMENT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- THE LIQUIDATION VALUE PER \$1,000 LIMITED PARTNER INVESTMENT

- THE ORDINARY TAX LOSS PER \$1,000 LIMITED PARTNER INVESTMENT IN YEAR OF INITIAL INVESTMENT

- o INFORMATION ABOUT:
 - THE LEGAL OPINION FOR THE LIMITED PARTNERS

 - THE TERM OF THE PARTNERSHIP

- o FOR EACH PARTNERSHIP THAT IS SUBJECT TO THE REPORTING REQUIREMENTS OF THE SECURITIES EXCHANGE ACT OF 1934, WHICH WE CALL A REPORTING PARTNERSHIP, THE PARTNERSHIP'S QUARTERLY REPORT ON FORM 10-Q, INCLUDING MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, FOR THE THREE MONTHS ENDED MARCH 31, 2001

- o FOR EACH REPORTING PARTNERSHIP, THE PARTNERSHIP'S ANNUAL REPORT ON FORM 10-K, INCLUDING MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, FOR THE YEAR ENDED DECEMBER 31, 2000

- o FOR EACH PARTNERSHIP THAT IS NOT SUBJECT TO THE REPORTING REQUIREMENTS OF THE SECURITIES EXCHANGE ACT OF 1934, WHICH WE CALL A NONREPORTING PARTNERSHIP, THE PARTNERSHIP'S FINANCIAL STATEMENTS, INCLUDING MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, FOR THE THREE MONTHS ENDED MARCH 31, 2001

- o FOR EACH NONREPORTING PARTNERSHIP, THE PARTNERSHIP'S FINANCIAL STATEMENTS, INCLUDING MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS, FOR THE YEAR ENDED DECEMBER 31, 2000

- o SELECTED HISTORICAL FINANCIAL DATA FOR THE PARTNERSHIP FOR THE THREE MONTHS ENDED MARCH 31, 2001 AND 2000 AND THE FIVE YEARS ENDED DECEMBER 31, 2000

THE SUPPLEMENT CONSTITUTES AN INTEGRAL PART OF THIS DOCUMENT FOR EACH PARTNERSHIP. PLEASE CAREFULLY READ ALL OF THE SUPPLEMENTS FOR THE PARTNERSHIPS IN WHICH YOU ARE A LIMITED PARTNER.

10

QUESTIONS AND ANSWERS ABOUT THE MERGER OF EACH PARTNERSHIP

Q: HOW DO I VOTE?

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

A: After reading this document, please fill out and sign your proxy card. Then mail your signed proxy card in the enclosed return envelope as soon as possible so that your partnership interests will be represented at the special meeting for each partnership in which you own an interest.

Q: WHAT HAPPENS IF I DO NOT RETURN A PROXY CARD?

A: The failure to return your proxy card will have the same effect as voting against the merger for each partnership in which you own an interest.

Q: MAY I VOTE IN PERSON?

A: Yes. You may attend the special meeting for each partnership in which you own an interest and vote your partnership interests in person, rather than signing and mailing your proxy card.

Q: MAY I CHANGE MY VOTE AFTER I HAVE MAILED MY SIGNED PROXY CARD?

A: Yes. You may revoke your vote at any time before your proxy is voted at the special meeting for each partnership in which you own an interest by following the instructions beginning on page 59. You then may either change your vote by sending in a new proxy card or by attending the special meeting for each partnership in which you own an interest and voting in person.

Q: IF MY PARTNERSHIP INTERESTS ARE HELD IN A RETIREMENT ACCOUNT BY A CUSTODIAN, WILL MY CUSTODIAN VOTE MY PARTNERSHIP INTERESTS FOR ME?

A: Your custodian will not be able to vote your partnership interests. You should refer to the instructions included on your proxy card to vote your partnership interests.

Q: SHOULD I SEND IN MY CERTIFICATES FOR MY PARTNERSHIP INTERESTS NOW?

A: No. If the merger of a partnership in which you own an interest is completed, your certificates representing your partnership interests in that partnership will be automatically cancelled. We will automatically mail certificates representing Pioneer Parent common stock issued to you on completion of the merger of that partnership.

Q: AM I ENTITLED TO APPRAISAL OR DISSENTERS' RIGHTS?

A: No. You will not have any appraisal or dissenters' rights in connection with the merger of any partnership in which you own an interest.

Q: WHAT HAPPENS TO MY FUTURE CASH DISTRIBUTIONS?

A: Since your partnership interests in participating partnerships will be cancelled upon completion of the merger of each such partnership, you will not receive any future distributions on those interests. Pioneer Parent's board of directors did not declare dividends to the holders of Pioneer Parent common stock during 1999, 2000 or the three months ended March 31, 2001. The amount of dividends, if any, paid by Pioneer Parent in the future will depend on business conditions, its financial condition and earnings, and other factors.

Q: WHO CAN HELP ANSWER MY QUESTIONS?

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

A: If you have any questions about the merger of any of the partnerships in which you own an interest, please call Pioneer Parent's information agent, D.F. King & Co., Inc., at (XXX) XXX-XXXX.

-iv-

11

SUMMARY

To understand the merger of each partnership in which you own an interest and to obtain a more detailed description of the legal terms of each such merger, you should carefully read this entire document, the related partnership supplements, and the documents described in "Where You Can Find More Information" on the inside front cover page of this document. For definitions of oil and gas terms used in this document, see "Commonly Used Oil and Gas Terms" on page 81.

When we use the terms "Pioneer USA," "we," "us" or "our," we are referring to your sole or managing general partner, Pioneer Natural Resources USA, Inc., including its consolidated subsidiaries and predecessors, unless the context otherwise requires. When we use the term "Pioneer Parent," we are referring to Pioneer Natural Resources Company. When we use the term "merger proposals," we are referring to the proposals to approve the merger agreement, the merger amendment, the selection of special legal counsel for the limited partners and the legal opinion of that counsel. When we use the term "participating partnership," we are referring to each partnership the limited partners of which approve the merger proposals.

THE MERGERS

Pioneer Parent proposes to acquire each partnership by merging each partnership into us. We will be the survivor of each merger. The partnership interests of each participating partnership, other than our interests, will be converted into Pioneer Parent common stock.

The number of shares of common stock Pioneer Parent will offer for all partnership interests of a participating partnership will be based on (1) the merger value for the partnership as described below and (2) the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for the partnership. Pioneer Parent and Pioneer USA determined the merger value for each partnership primarily based on the present value of estimated future net revenues from the partnership's estimated oil and gas reserves at March 31, 2001, which was reviewed by Williamson Petroleum Consultants, Inc. as of March 31, 2001. Pioneer Parent and Pioneer USA used the following parameters in calculating the present value of estimated future net revenues: (1) a five-year New York Mercantile Exchange, or NYMEX, futures price for oil and gas as of March 30, 2001 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 10.0% discount rate. For 2001, the oil and gas prices were based on the average NYMEX futures price for

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the nine-month period beginning on April 1, 2001 and ending December 31, 2001. See the table on page 6 for the NYMEX futures prices. See "Method of Determining Merger Value For Each Partnership and Amount of Pioneer Parent Common Stock Offered -- Components of Merger Value For Each Partnership" on page 44 of this document for information on the basis of pricing. In addition, each partnership's merger value includes its net working capital as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the partnership to its partners. The Pioneer Parent common stock will be allocated among the partners of a participating partnership based on the liquidation provisions of the partnership agreement of the partnership.

On pages 4 and 5 of this document is a table that shows important information about each partnership, including the amount of Pioneer Parent common stock that will be offered in the merger for each \$1,000 of initial investment for that partnership. For purposes of illustration in this document, we have calculated the number of shares to be issued based on an assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Prior to the date of the special meeting for each partnership, we will update the number of shares to be issued using the actual average closing price of Pioneer Parent common stock for the ten trading days ending three business days before the initial date of the special meeting.

Pioneer Parent and Pioneer USA agreed to structure the transaction as a merger of each partnership instead of as a property sale followed by liquidation of each partnership because the merger will:

- o require fewer legal documents;
- o reduce filing fees and other costs; and
- o result in the same amount of Pioneer Parent common stock to the limited partners as would a property sale and liquidation using the same commodity prices.

Pioneer Parent and Pioneer USA expect to sign the merger agreement as soon as the Securities and Exchange Commission declares effective under the Securities Act of 1933 the registration statement that includes this document. However, if the oil and gas commodity prices materially increase or decrease from the prices used in calculating the merger value for any partnership, Pioneer Parent or Pioneer USA might abandon the proposed merger of the partnership before submitting the merger proposals to the limited partners for approval. In addition, Pioneer Parent may abandon the proposed merger of any or all of the partnerships at any time prior to the special meeting for any such partnership for any reason including changes in, among other things, the price of Pioneer Parent common stock, the market prices for oil and gas generally or the oil and gas industry generally.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

THE COMPANIES

PIONEER NATURAL RESOURCES COMPANY

1400 Williams Square West
5205 North O'Connor Blvd.
Irving, Texas 75039
(972) 444-9001

Pioneer Parent is a large, independent exploration and production company with total proved reserves equivalent to 3.8 trillion cubic feet of natural gas, or 628 million barrels of oil. Pioneer Parent's proved reserves are balanced equally between natural gas and oil, and Pioneer Parent has a reserves-to-production ratio of 14 years. Sixty-seven percent of Pioneer Parent's proved reserves are in three U.S. areas: the Hugoton gas field, the West Panhandle gas field, and the Spraberry oil and natural gas field. Pioneer Parent also has properties in East Texas, the Gulf Coast, and the offshore Gulf of Mexico as well as in Argentina, Canada, South Africa, and Gabon. Pioneer Parent seeks to increase net asset value and production by combining lower risk development drilling with higher-risk exploration activity.

Pioneer Parent's common stock is traded on the New York Stock Exchange and the Toronto Stock Exchange under the symbol "PXD." Pioneer Parent prepared this document to offer its common stock to you. See "Pioneer Parent" on page 69 of this document for more information about Pioneer Parent.

Pioneer Parent files annual, quarterly and special reports, proxy statements and other information with the Securities and Exchange Commission. Those SEC filings are available to you in the same manner as each reporting partnership's information. See "Where You Can Find More Information" on the inside front cover page of this document.

PIONEER NATURAL RESOURCES USA, INC.

1400 Williams Square West
5205 North O'Connor Blvd.
Irving, Texas 75039
(972) 444-9001

We prepared this document to solicit your proxy. We are a 100% owned subsidiary of Pioneer Parent. We directly own almost all of Pioneer Parent's United States oil and gas properties.

THE PARTNERSHIPS

c/o Pioneer Natural Resources USA, Inc.
1400 Williams Square West
5205 North O'Connor Blvd.
Irving, Texas 75039
(972) 444-9001

The name of each partnership is found in the table beginning on page 4. Each partnership produces and sells oil and gas. Each partnership was formed to provide the general and limited partners cash flow from operations and, except for Parker & Parsley Producing Properties 87-A, Ltd., Parker & Parsley Producing

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Properties 87-B, Ltd. and Parker & Parsley Producing Properties 88-A, L.P., a one time deduction for intangible drilling and development costs. See the supplement to this document for each of your partnerships for specific information about the partnership, including the merger value as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001. As a result of each partnership's oil and gas operations, each partnership distributes cash to the limited and general partners from the partnership's net cash flows. These distributions are made quarterly, unless sufficient cash is not available.

The partnerships' properties consist of interests in approximately 1,100 oil and gas wells that are located primarily in the Spraberry field of the Permian Basin of West Texas. We operate approximately 92% of the partnerships' wells. At December 31, 2000, the partnerships' combined total proved reserves were 33.6 million barrels of oil equivalent, or MMBOE, consisting of 27.3 million barrels, or MMBbls, of oil and natural gas liquids and 37.6 billion cubic feet, or Bcf, of natural gas. Approximately 93% of the reserves are attributable to the limited partners' partnership interests, excluding partnership interests we directly own. Approximately 81% of the total proved reserves attributable to the properties are oil and liquids, and 19% are natural gas, based on six Mcf of gas being equivalent to one Bbl of oil. See "The Partnerships" on page 71 of this document for more information about the partnerships.

RISK FACTORS

You should carefully consider the risks relating to the merger of each partnership in which you own an interest described in "Risk Factors" beginning on page 17 of this document. These include:

- o The merger value for the partnership determines the amount of Pioneer Parent common stock you will receive in the merger of the partnership. Pioneer Parent and Pioneer USA determined each merger value and will not adjust it for changes in partnership value before the merger is completed.
- o You were not independently represented in establishing the terms of any merger.
- o Our board of directors had conflicting interests in evaluating each merger because each member of our board of directors is also an officer of Pioneer Parent.
- o Repurchase offers in 2001 by each of the six partnerships with a repurchase obligation were higher than the merger value for the partnership.
- o Limited partners who become Pioneer Parent stockholders will own stock in a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

corporation rather than a limited partnership interest in a limited partnership resulting in a fundamental change in the nature of their investments.

SUMMARY TABLE -- MERGER VALUE AND AMOUNT OF INITIAL LIMITED PARTNER INVESTMENT REPAID

The table on pages 4 and 5 contains the following summary information for each partnership:

-2-

13

- o the merger value attributable to:
 - Pioneer USA's partnership interests, whether general or limited;
 - the partnership interests of the unaffiliated limited partners of the nonmanaging general partner, if any, of each partnership;
 - the limited partners' partnership interests, including the estimated number of shares of Pioneer Parent common stock offered to the limited partners other than Pioneer USA;
- o for each \$1,000 initial limited partner investment in the partnership:
 - the estimated number of shares of Pioneer Parent common stock offered;
 - the merger value;
 - the total historical cash distributions through July 31, 2001; and
 - the total amount of initial investment by the limited partners that has been repaid, after giving effect to the merger of the partnership, stated in dollars and as a percentage; and
- o the aggregate reserve value attributable to the limited partners other than Pioneer USA per barrel of oil equivalent, or BOE.

This information is based on assumptions, including the following:

- o Pioneer Parent and Pioneer USA engaged Williamson Petroleum Consultants, Inc. to review the estimates of each partnership's reserves as of March 31, 2001.
- o Pioneer Parent and Pioneer USA estimated the present value of estimated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

future net revenues for each partnership from the estimated reserves for each partnership at March 31, 2001. Pioneer Parent and Pioneer USA used the following parameters in calculating the present value of estimated future net revenues: (1) a five-year NYMEX futures price for oil and gas as of March 30, 2001, with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a discount rate of 10.0%.

See "Method of Determining Merger Value for Each Partnership and Amount of Pioneer Parent Common Stock Offered - Components of Merger Value for Each Partnership."

You should read the following table together with the detailed information in Table 2 and Table 3 of Appendix A to this document. For purposes of illustration in this document, we have calculated the number of shares to be issued based on an assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Prior to the date of the special meeting for each partnership, we will update the number of shares to be issued using the actual average closing price of Pioneer Parent common stock for the ten trading days ending three business days before the initial date of the special meeting.

Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment. See Table 1 of Appendix A to this document for the initial subscription price for each unit.

 (a) For this preliminary document, the number of shares of Pioneer common stock offered is based upon an assumed average closing price of \$18.00 per share of Pioneer common stock.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following table shows the NYMEX futures price for oil and gas as of March 30, 2001, which Pioneer Parent and Pioneer USA used in the calculation of the reserve value portion of the merger value for each partnership:

DATE -----	OILS (\$/Bbl) -----	GAS (\$/Mcf) (1) -----
Apr - Dec 2001	26.17	5.18
2002	24.36	4.61
2003	22.83	4.16
2004	22.31	4.09
2005	21.97	4.12
Thereafter	21.97	4.12

(1) The NYMEX price for gas is quoted in dollars per million British thermal units, or MMBTU. We converted those prices to dollars per thousand cubic feet, or Mcf.

The reserve value portion of the merger value for each partnership was calculated using a 10.0% discount rate.

17

BENEFITS AND DISADVANTAGES TO THE LIMITED PARTNERS

We believe the merger of each partnership provides the following benefits to the limited partners of the partnership:

Liquidity. None of the partnership interests of any of the partnerships are traded on a national stock exchange or in any other significant market. No liquid market exists for interests in any of the partnerships. Although some partnership interests are occasionally sold in private or an informal secondary market for limited partner securities, we believe the potential buyers in such transactions are few and the prices generally reflect a significant discount for illiquidity. See Table 15 of Appendix A for historical information about recent trades of partnership interests in each partnership. Repurchase obligations exist in only a few of the partnerships and are limited in both amount and price by formula in the partnership agreements. See Table 8 of Appendix A for repurchase information.

The merger of each partnership provides liquidity to the limited partners of that partnership at a price based on oil and gas reserve values, not on limited market demand for illiquid partnership interests. All limited partners of a participating partnership will receive Pioneer Parent common stock in exchange for their partnership interests shortly after completion of the merger of the partnership. Shares of Pioneer Parent common stock are freely transferable and listed on the New York Stock Exchange and the Toronto Stock Exchange. On April 16, 2001, the last full trading day prior to the announcement of the proposed merger of each partnership, the last reported sales price of Pioneer Parent common stock, as reported by the New York Stock Exchange, was \$17.27.

Oil and Gas Investment Vehicle. Pioneer Parent's common stock provides an oil and gas investment vehicle that we believe will be advantageous to the partnership interests in each partnership because:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Expansion and Balancing of Reserves. The limited partners will have the opportunity to benefit from Pioneer Parent's efforts (1) to expand its reserve base through acquisitions and development or exploratory drilling, and (2) to maintain a strategic balance between oil and natural gas reserves. At December 31, 2000, Pioneer Parent's reserve mix was 50% oil and NGLs and 50% natural gas compared to the combined partnerships' reserve mix of 81% oil and NGLs and 19% natural gas at such date.

- o Geographic Diversification and Larger Oil and Gas Reserve Base. By combining each participating partnership into a single ownership entity, the merger of the partnership provides the limited partners of the partnership with an investment portfolio substantially larger and more geographically diversified than the portfolio of the partnership individually. This increased size and the resulting consolidation of operations spread the risk of an investment in Pioneer Parent over a broader group of assets and reduces the dependence of the investment upon the performance of any particular asset or group of assets, such as assets in the same geographical area.

Liquidation Value. The merger value for each partnership is based on the value of the underlying properties, which we believe is essentially the same value or a higher value than that could be achieved by selling the partnership's property interests and liquidating the partnership at that time. In addition, we believe that the value of Pioneer Parent common stock to be distributed to each limited partner in the merger of each partnership is higher than what the limited partners would otherwise receive over the life of the partnership, assuming the same oil and gas commodity prices and operating costs as used to determine the reserve value for each partnership and giving effect to the time value of money, for the following reasons:

- o The partnership agreement for each partnership requires cash distributions to be reduced by general and administrative expenses allocable to the partnership. The merger value for each partnership reflects a liquidation value based on a reserve value that has not been reduced for general and administrative expenses.

- o The merger value for each partnership is based primarily upon the reserve value for the partnership, which was determined using recent NYMEX futures oil and gas prices that are, on average, higher than historical oil and gas prices. It is likely that actual oil and gas prices will vary often and possibly widely, as has been demonstrated historically, from the prices used to prepare these estimates. Although future oil and gas prices could be higher than the prices on March 30, 2001 which were used in calculating the merger value for each partnership, using a fixed date for determining the merger value for each partnership eliminates the potential loss in value that could occur if oil and gas prices decline.

Acceleration of Realization of Value. Pioneer Parent's common stock provides the limited partners of each participating partnership with liquidity earlier than if the limited partners remain in the partnership and receive the expected ordinary cash distributions from oil and gas production. Because each

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership's properties are mature producing properties, we believe that production from those properties will continue to decline at the rate predicted in the partnership's oil and gas engineering reserve reports. Accordingly, cash distributions from each partnership are also expected to decline, subject to variation for changes in oil and gas prices.

Elimination of Partnership Tax Reports. The merger of each participating partnership will eliminate the limited partners' Schedule K-1 tax reports for the partnership for tax years after the merger occurs. This is expected to simplify the limited partners' individual tax return preparation and reduce preparation costs.

We also considered the following disadvantages of the merger of each partnership:

-7-

18

- o Limited partners of each partnership will own stock in a corporation which is a different investment objective from investing in a partnership designed to generate recurring cash distributions.
- o Limited partners who become Pioneer Parent stockholders will no longer receive partnership cash distributions.
- o Pioneer Parent will engage in the acquisition, exploration and development of new oil and gas properties which will expose limited partners of each partnership to all of the attendant risks associated with such activities. Each partnership owns producing properties and does not conduct drilling activities. Pioneer Parent's activities may, therefore, involve greater risks than the activities of each partnership, but also offer the potential for additional benefits if the acquisition and exploitation activities are successful.
- o Increases in prices for oil and gas may have a more direct effect on limited partners of each partnership due to the immediate effect on potential cash distributions. However, we believe that an increase in oil and gas prices will also have an indirect beneficial effect on the market price for Pioneer Parent common stock.
- o Limited partners who become Pioneer Parent stockholders will be subject to the volatility of the market value of Pioneer Parent common stock. Market factors that may affect the common stock price will include factors other than those that affect the value of a limited partner's interest in a partnership, such as general market conditions.
- o Limited partners who become Pioneer Parent stockholders may have to

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

recognize a taxable gain on the transaction.

FRACTIONAL SHARES

Pioneer Parent will not issue fractional shares to any limited partner upon completion of the merger of any partnership. Instead, Pioneer Parent will round any fractional shares of Pioneer Parent common stock up to the nearest whole share.

RECOMMENDATION TO LIMITED PARTNERS (SEE PAGE 32)

On _____, 2001, our board of directors unanimously determined that the merger of each partnership in which you own an interest is advisable, fair to you, as an unaffiliated limited partner, and in your best interests. Our board recommends that you, as an unaffiliated limited partner, vote for the merger proposals for each partnership in which you own an interest. Although our board of directors has attempted to fulfill its fiduciary duties to you, our board of directors had conflicting interests in evaluating each merger because each member of our board of directors is also an officer of Pioneer Parent.

FAIRNESS

In deciding to approve the merger of each partnership on _____, 2001, our board of directors decided that each merger of a partnership in which you own an interest is advisable, fair to you, as an unaffiliated limited partner, and in your best interests based on a variety of factors. These factors include:

- o the form and amount of consideration offered to you;

- o the comparison of the amount of Pioneer Parent common stock offered in each merger to the future cash distributions otherwise expected as oil and gas production continues to decline and general and administrative expenses continue to be incurred;

- o the elimination after the merger of each participating partnership of its limited partners' tax preparation costs relating to partnership tax information;

- o the belief that the price offered by Pioneer Parent is a competitive price because of:
 - the commodity pricing used in determining the merger value for each partnership;
 - Pioneer USA's position as operator of most of each partnership's wells; and
 - Pioneer USA's significant ownership of nearby properties; and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o the fairness opinion from Stanger.

FAIRNESS OPINION OF FINANCIAL ADVISOR
(SEE PAGE 33)

Stanger has issued a fairness opinion dated _____, 2001, that, subject to the qualifications expressed in the opinion, the merger value for each partnership and the allocation of the merger value of the partnership (1) to the limited partners of the partnership as a group, (2) to the general partners of the partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the partnership, (4) to the unaffiliated limited partners of the partnership as a group and (5) to the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership as a group, is fair to the unaffiliated limited partners of the partnership and the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership, from a financial point of view. The full text of the form of written opinion of Stanger is attached to this document as Appendix D. You should read all of it carefully. THE OPINION OF STANGER IS DIRECTED TO OUR BOARD OF DIRECTORS. IT IS NOT A RECOMMENDATION TO YOU ABOUT HOW YOU SHOULD VOTE ON MATTERS RELATING TO THE PROPOSED MERGER OF ANY PARTNERSHIP IN WHICH YOU OWN AN INTEREST.

MATERIAL U.S. FEDERAL INCOME
TAX CONSEQUENCES
(SEE PAGE 48)

You will generally recognize gain or loss equal to the difference between (1) the value of the Pioneer

-8-

19

Parent common stock you receive in the merger of each partnership in which you own interests and (2) your adjusted tax basis in your partnership interests in that participating partnership. Your gain or loss will be capital or ordinary depending on the nature of the assets held by each participating partnership in which you own an interest and the amount of depletion and intangible drilling and development costs that must be recaptured. You must calculate your ordinary and capital gain or loss separately for each partnership in which you own an interest.

TAX MATTERS ARE VERY COMPLICATED. THE TAX CONSEQUENCES TO YOU OF EACH MERGER OF A PARTNERSHIP IN WHICH YOU OWN AN INTEREST WILL DEPEND ON THE FACTS OF YOUR OWN SITUATION. YOU SHOULD SEEK TAX ADVICE FOR A FULL UNDERSTANDING OF THE PARTICULAR TAX CONSEQUENCES OF EACH SUCH MERGER TO YOU.

CERTIFICATION OF NON-FOREIGN STATUS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

YOUR CERTIFICATE THAT YOU ARE NOT A FOREIGN PERSON, WHICH WE CALL A CERTIFICATION OF NON-FOREIGN STATUS, IS IMPORTANT. Whether or not you plan to vote on the merger of each partnership in which you own an interest, please take the time to complete and return to us the enclosed certification of non-foreign status. If we receive a properly completed certification of non-foreign status from you, we will not withhold federal income taxes on the Pioneer Parent common stock to be issued to you upon the merger of each partnership in which you own an interest.

If we, on behalf of a partnership, are required to withhold federal income taxes from the Pioneer Parent common stock to be issued to you upon the merger of each partnership in which you own an interest, we will be entitled to deduct and withhold such taxes from the Pioneer Parent common stock otherwise payable to you. If amounts are withheld, we may, in our sole discretion:

- o sell any Pioneer Parent common stock withheld from you and use the sale proceeds to pay the required withholding taxes;
- o hold any Pioneer Parent common stock withheld from you as security until you satisfy the required withholding taxes, at which time the withheld Pioneer Parent common stock will be released to you; or
- o take such other reasonable action, at your expense, as is required or appropriate to satisfy the required withholding taxes.

Any amounts withheld as described above shall be treated as having been paid to you.

RECORD DATE; VOTING POWER

You may vote at the special meeting for each partnership in which you own an interest if you owned partnership interests as of the close of business on , 2001. We call this date the record date. For each partnership in which you own a partnership interest, you may cast one vote representing your percentage of partnership interests in that partnership. The percentage of partnership interests that you own is determined by comparing the amount of:

- o your, or your predecessor's, initial investment, including any additional assessments, in the partnership; to
- o the total investment of all partners, including any additional assessments, in the partnership.

YOUR VOTE IS IMPORTANT. Whether or not you plan to attend the special meeting for each partnership in which you own an interest, please take the time to vote by completing and mailing to us the enclosed proxy card. This will not prevent you from revoking your proxy at any time prior to the special meeting for each partnership in which you own an interest or from voting your partnership interests in person if you later choose to attend the special meeting for each partnership in which you own an interest.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PARTNER VOTE REQUIRED TO APPROVE THE MERGERS

The favorable vote of the holders of a majority of the limited partnership interests in a partnership is required to approve the merger proposals for that partnership, except that Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P. each require the favorable vote of the holders, other than Pioneer USA, of 66-2/3% of its limited partnership interests to approve the merger proposals.

We are generally entitled under the partnership agreements to vote partnership interests we hold as limited partners at the special meeting for each partnership in which we hold an interest. See "The Special Meetings -- Record Date; Voting Rights and Proxies" on page 58 of this document. We plan to vote all our partnership interests for the merger proposals. The voting interest that we hold in each partnership is found in Table 6 of Appendix A.

Except as set forth above and in "Ownership of Partnership Interests" on page 64 of this document, none of Pioneer Parent, Pioneer USA, or, to the knowledge of Pioneer USA, any of their directors or executive officers, or any associate or subsidiary of Pioneer Parent, Pioneer USA or any such director or officer, beneficially owns any partnership interests of any partnership or is otherwise entitled to vote any partnership interests.

If limited partners of a partnership approve the merger agreement, but do not approve the merger amendment, or vice versa, the partnership will not be able to merge. LIMITED PARTNERS WHO WANT THEIR PARTNERSHIP TO PARTICIPATE IN THE MERGER SHOULD VOTE FOR EACH OF THE MERGER PROPOSALS.

CONDITIONS TO EACH MERGER (SEE PAGE 55)

We will complete the merger of each partnership only if the conditions of the merger agreement are satisfied or, if permitted, waived. These conditions include:

-9-

20

- o the limited partners' adoption and approval of the merger proposals;
- o the absence of any law or court order that prohibits the merger; and
- o the absence of any lawsuit challenging the legality or any aspect of the merger.

So long as the law allows us to do so, Pioneer Parent and we may choose to complete a merger of any partnership even though a condition has not been satisfied if the limited partners have approved the merger proposals. Pioneer Parent and we may complete the merger of any one or some of the partnerships for which the listed conditions have been satisfied, even if limited partners in other partnerships do not approve the merger proposals.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

TERMINATION OF THE MERGER OF A PARTNERSHIP (SEE PAGE 56)

Pioneer Parent and Pioneer USA may jointly terminate the merger agreement, for any or all of the partnerships, at any time, even after limited partner approval. Either Pioneer Parent or Pioneer USA may terminate the merger agreement for any or all of the partnerships in some circumstances, including the following:

- o the limited partners of a partnership fail to approve that partnership's merger; or
- o if any of the other parties is in material breach of the merger agreement.

In addition, (1) Pioneer USA may terminate the merger agreement for any partnership, if Pioneer USA determines that termination of the merger agreement is required for its board of directors to comply with its fiduciary duties and (2) Pioneer Parent may abandon the proposed merger of any or all of the partnerships at any time prior to the special meeting for any such partnership for any reason including changes in, among other things, the price of Pioneer Parent common stock, the market prices for oil and gas generally or the oil and gas industry generally.

EFFECT OF DEBT OWED BY A LIMITED PARTNER TO PIONEER USA ON AMOUNT OF PIONEER PARENT COMMON STOCK TO BE RECEIVED BY THE LIMITED PARTNER

If a limited partner is indebted to Pioneer USA for any portion of the limited partner's original investment in the partnership, Pioneer USA plans to apply the Pioneer Parent common stock that would otherwise be distributed to the limited partner upon completion of the merger of the partnership against that limited partner's indebtedness. If a limited partner's indebtedness to Pioneer USA is less than the merger value allocated to limited partnership interests held by the limited partner, the limited partner will receive Pioneer Parent common stock equal to the amount by which such merger value exceeds such indebtedness. If a limited partner's indebtedness to Pioneer USA is greater than the merger value allocated to the limited partnership interests held by the limited partner, Pioneer USA may collect the deficiency from the limited partner.

EFFECTS OF THE MERGER OF A PARTNERSHIP ON ITS LIMITED PARTNERS WHO DO NOT VOTE IN FAVOR OF THE MERGER

You will be bound by the merger of a partnership in which you own interests if the limited partners in your partnership vote a majority, or 66-2/3% for Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P., of their partnership interests in favor of the merger, even if you vote against the merger. If the merger of your partnership occurs, you will be entitled to receive only an amount of Pioneer Parent common stock based on the merger value

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for your partnership interests. You will not have appraisal, dissenters' or similar rights in connection with the merger, even if you vote against the merger.

FUTURE OF A PARTNERSHIP THAT DOES NOT PARTICIPATE IN THE MERGER (SEE PAGE 51)

If your partnership does not participate in the merger of that partnership for any reason, that partnership will remain in existence. Some reasons your partnership might not participate in the merger are (1) that the limited partners vote against the merger, (2) that a condition in the merger agreement is not satisfied, or (3) that Pioneer Parent or we exercise a termination right with respect to the merger for that partnership.

At about the same time that we mail certificates representing shares of Pioneer Parent common stock to the partners of each participating partnership in payment of the merger value for that partnership, we will mail any cash distributions that were delayed for administrative purposes prior to the completion of the merger of each participating partnership to the partners of each nonparticipating partnership.

We have not formulated an alternative business plan for any nonparticipating partnership. The business objectives of each nonparticipating partnership will continue as they are. We plan to continue to manage each nonparticipating partnership and operate it in accordance with the terms of its current partnership agreement. Each nonparticipating partnership will continue to operate as a separate legal entity with its own assets and liabilities. Distributions from any nonparticipating partnership are expected to continue to decline since its production revenues are expected to continue to decline more quickly than its production costs. Regardless of whether any nonparticipating partnership distributes cash, limited partners must continue to include their share of partnership income and loss in their individual tax returns.

The board of directors of each of Pioneer Parent and Pioneer USA will decide what, if any, actions Pioneer Parent or Pioneer USA, respectively, will take regarding any nonparticipating partnership. Potential activities might include a tender offer for partnership interests of limited partners or a proposal to acquire

-10-

21

the assets of, or merge with, one or more of the nonparticipating partnerships. The proposal may be on terms similar to or different from those of the mergers described in this document.

EXPENSES AND FEES

The expenses and fees to be incurred in connection with the merger of each

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership are expected to be approximately \$2.0 million in total. Each participating partnership will pay its pro rata share, based on its reserve value, of those estimated expenses and fees. Each nonparticipating partnership will pay a portion of the estimated expenses and fees of the mergers otherwise allocable to the partnership based on a fraction, the numerator of which is the percentage of the partnership's limited partnership interests that are voted in favor of the merger proposals and the denominator of which is the percentage of the partnership's limited partnership interests for which votes are cast. Pioneer Parent has agreed to pay (1) the remainder of the estimated expenses and fees otherwise allocable to such nonparticipating partnership, (2) any expenses and fees actually incurred in excess of \$2.0 million, and (3) if Pioneer Parent terminates or abandons the merger as to any partnership, any expenses or fees allocated to that partnership. Pioneer Parent and Pioneer USA have reduced each partnership's merger value by that partnership's pro rata share of the estimated expenses and fees.

REGULATORY APPROVAL

No federal or state regulatory requirements must be satisfied or approvals obtained in connection with the merger of any of the partnerships as described in this document, except (1) filing a registration statement that includes this document with the SEC and obtaining the SEC's declaration that the registration statement is effective under the Securities Act of 1933, and (2) filing certificates of merger with the Secretary of State of the State of Delaware and the Secretary of the State of the State of Texas.

SIMILAR TRANSACTIONS

During March 2001, Pioneer Parent offered to acquire all of the direct oil and gas interests owned by some former officers and employees of Pioneer Parent and Pioneer USA in properties in which Pioneer Parent and Pioneer USA own interests. The merger value for the direct oil and gas interests was equal to the present value of estimated future net revenues from the oil and gas reserves attributable to the interests, as of March 31, 2001. In determining the present value, Pioneer Parent and Pioneer USA used (1) a five-year NYMEX futures price for oil and gas as of March 19, 2001 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 13.5% discount rate. The consideration offered in the purchases of the direct oil and gas interests was all cash since offering and registering Pioneer Parent common stock in those purchases was cost-prohibitive due to the small size of such transactions.

Additionally, in December 2000, Pioneer Parent received the approval of the partners of 13 employee limited partnerships to merge with Pioneer USA for total merger consideration of \$2.0 million. Of the total merger consideration, \$0.3 million was paid to current Pioneer Parent employees. The merger value of each employee partnership was equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of September 30, 2000, less the cash distributions on October 15, 2000 and November 15, 2000, by that partnership to its partners. In determining the present value, Pioneer Parent and Pioneer USA used (1) a five-year NYMEX futures price for oil and gas as of August 25, 2000 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

taxes, and (3) a 13.5% discount rate. The consideration paid in the mergers of the employee limited partnerships was all cash. Using the same parameters as described above, Pioneer Parent purchased all of the direct oil and gas interests held by Scott D. Sheffield, its chairman of the board of directors and chief executive officer, for \$0.2 million during October 2000. As with the purchases of the direct oil and gas interests described above, offering and registering Pioneer Parent common stock in those mergers was cost-prohibitive due to the small size of such transactions.

THIRD PARTY OFFERS (SEE PAGE 52)

We will consider any offers from third parties to purchase any partnership or its assets. Those who wish to make an offer for any partnership or its assets must demonstrate to our reasonable satisfaction their financial ability and willingness to complete such a transaction. Before reviewing non-public information about a partnership, a third party will need to enter into a customary confidentiality agreement. Offers should be at prices and on terms that are fair to the partners of the partnership and more favorable to the unaffiliated limited partners than the prices and terms proposed in the merger for that partnership described in this document. Pioneer Parent has the right to match or top any such offer. In addition, any such offer would be subject to our right to continue operation of the properties. Since first announcing our willingness to consider third party offers in September 1999, we have not received any third party offer for any partnership or its assets.

COMPARATIVE PER SHARE MARKET PRICE INFORMATION (SEE PAGE 62)

On April 16, 2001, the last full trading day before the public announcement of the proposed merger of each partnership, Pioneer Parent common stock closed at \$17.27 per share. On _____, 2001, Pioneer Parent common stock closed at \$ _____ per share.

No liquid market exists for interests in any of the partnerships. See Table 15 of Appendix A for historical information about recent trades per \$1,000

-11-

22

initial limited partner investment in each partnership and Table 7 of Appendix A for the average historical quarterly cash distributions per \$1,000 initial limited partner investment for each partnership.

SUMMARY HISTORICAL CONSOLIDATED FINANCIAL DATA OF PIONEER PARENT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following table sets forth summary financial information of Pioneer Parent for the three months ended March 31, 2001 and 2000 and each of the five years in the period ended December 31, 2000. This financial information was derived from the consolidated financial statements of Pioneer Parent. This data should be read in conjunction with the consolidated financial statements of Pioneer Parent and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the reports incorporated by reference in this document.

-
- (a) Includes amounts relating to the acquisition of MESA Inc. and Chauvco Resources Ltd. in August and December 1997, respectively.
- (b) 1999 includes \$41.8 million of option fees and liquidated damages related to an unsuccessful asset sale and \$30.2 million of income associated with an excise tax refund.
- (c) The three month periods ended March 31, 2001 and 2000 and the years ended December 31, 2000, 1999, 1998 and 1997 include non-cash mark-to-market charges for changes in the fair values of non-hedge financial instruments of \$8.8 million, \$13.5 million, \$58.5 million, \$27.0 million, \$21.2 million and \$5.2 million, respectively.
- (d) The working capital deficit for the three month period ended March 31, 2001 included \$101.5 million of net derivative obligations. The 1998 working capital deficit includes \$306.5 million of current maturities of long-term debt.
- (e) On January 1, 2001, Pioneer Parent adopted the provisions of Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities." In accordance with those provisions, Pioneer Parent recognized a transition adjustment which significantly

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

reduced stockholders' equity. As of March 31, 2001, deferred hedge gains and losses have reduced Pioneer Parent's stockholders' equity by \$110.5 million.

25

SUMMARY UNAUDITED PRO FORMA COMBINED FINANCIAL DATA OF PIONEER PARENT

The following table sets forth summary unaudited pro forma combined financial data of Pioneer Parent that is presented to give effect to the merger of each of the partnerships. The information was prepared based on the following assumptions:

- o The merger of each partnership will be accounted for as a purchase business combination under generally accepted accounting principles.
- o The income statement data is presented as if the merger of each partnership had been consummated on January 1, 2000.
- o The balance sheet data is presented as if the merger of each partnership had been consummated on March 31, 2001.

You should consider the following:

- o The unaudited pro forma combined financial data are not necessarily indicative of the results of operations or the financial position of Pioneer Parent that would have occurred had the merger of each partnership in which you own an interest been consummated on January 1, 2000, nor are they necessarily indicative of future results of operations or financial position of Pioneer Parent.
- o The unaudited pro forma combined revenue and expense data exclude the cost savings expected to be realized through the consolidation of operations of Pioneer Parent and each partnership and the elimination of duplicate expenses.

The unaudited pro forma combined financial statements should be read together with (1) the historical consolidated financial statements of Pioneer Parent incorporated by reference in this document, (2) the historical financial statements of each partnership contained in the supplement to this document for the partnership, and (3) the unaudited pro forma combined financial statements contained elsewhere in this document. With respect to future cash distributions, see "Questions and Answers About the Merger of Each Partnership -- What Happens to My Future Cash Distributions?" See also "Where You Can Find More Information" on the inside front cover page of this document.

SUMMARY OIL AND GAS RESERVE INFORMATION

The following table sets forth summary information on Pioneer Parent's and the combined partnerships' proved oil and gas reserves at December 31, 2000, and the summary pro forma combined information of Pioneer Parent on proved oil and gas reserves assuming the merger of each partnership had taken place on December 31, 2000. Pioneer Parent's and the combined partnerships' historical and Pioneer Parent's pro forma combined proved oil and gas reserve information set forth below and incorporated by reference in this document are only estimates based primarily on reports prepared by Pioneer Parent's engineers for Pioneer Parent's proved reserves and independent petroleum engineers for the combined

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnerships' proved reserves as of December 31, 2000. The reserve information as of December 31, 2000 is based on the prices of oil and gas as of that time. The discounted future net cash flows set forth or incorporated by reference in this document should not be considered as the current market value of the estimated oil and gas reserves attributable to Pioneer Parent's, the combined partnerships' or any partnership's properties. Under the applicable requirements of the Securities and Exchange Commission, the estimated discounted future net cash flows from proved reserves are based on prices and costs as of the date of the estimate, while actual future prices and costs may be materially higher or lower.

27

COMPARATIVE PER SHARE DATA

The following table summarizes the per share information for Pioneer Parent and the per \$1,000 limited partner investment for the combined partnerships on a historical, equivalent pro forma combined and pro forma combined basis. The pro forma information gives effect to the merger of each partnership accounted for by Pioneer Parent as a purchase business combination. You should read this information together with the historical financial statements (1) included in the annual reports on Form 10-K and other information that Pioneer Parent has filed with the Securities and Exchange Commission and (2) included in the supplement to this document for each partnership. See "Where You Can Find More Information" on the inside front cover page of this document. With respect to future cash distributions, see "Questions and Answers About the Merger of Each Partnership -- What Happens to My Future Cash Distributions?" and "Risk Factors -- Pioneer Parent Might Not Declare Dividends." You should not rely on the pro forma combined information as being indicative of the results that would have occurred had the merger of each partnership been completed on January 1, 2000, or the future results that Pioneer Parent will experience after the merger of each partnership. In addition, because Pioneer Parent has both a different legal structure and purpose from each partnership, the information about Pioneer Parent and the information about the combined partnerships are not necessarily comparable.

-17-

28

RISK FACTORS

You should carefully consider the following risk factors in determining whether to vote to approve the merger proposals for each partnership in which you own interests.

RISK FACTORS RELATING TO THE MERGER OF EACH PARTNERSHIP

THE MERGER VALUE FOR EACH PARTNERSHIP INVOLVES ESTIMATES THAT MAY VARY MATERIALLY FROM THE QUANTITIES OF OIL AND GAS ACTUALLY RECOVERED, AND CONSEQUENTLY FUTURE NET REVENUES

The calculations of each partnership's estimated reserves of crude oil, natural gas liquids and natural gas and future net revenues from those reserves included in this document are only estimates. Actual prices, production, operating expenses and quantities of recoverable oil and natural gas reserves may vary from those assumed in the estimates. Any significant variance from the assumptions used could result in the actual quantity of each partnership's reserves and future net revenues being materially different from the estimates used in the calculation of the merger value for that partnership.

THE MERGER VALUE FOR A PARTNERSHIP WILL NOT BE ADJUSTED FOR CHANGES IN OIL AND GAS PRICES BEFORE THE COMPLETION OF ITS MERGER

The merger value for each partnership in which you own an interest determines the amount of Pioneer Parent common stock you will receive in the merger of that partnership. The merger value for each partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the partnership to its partners. Although oil and gas prices have fluctuated greatly in the recent past and may continue to do so, the merger value for a partnership will not be adjusted as of the closing date of the merger of that partnership to reflect any general changes in oil or gas prices, or any other matter generally affecting the oil and gas industry, occurring after March 31, 2001 and prior to the closing date of the merger.

THE NUMBER OF SHARES OF PIONEER PARENT COMMON STOCK THE LIMITED PARTNERS OF EACH PARTNERSHIP WILL RECEIVE MAY DECREASE BETWEEN NOW AND THE COMPLETION OF THE MERGER OF THE PARTNERSHIP

The number of shares of Pioneer Parent common stock to be issued to the limited partners of each partnership upon the merger of the partnership will be determined by dividing the merger value assigned to the partnership by the value

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of one share of Pioneer Parent common stock determined as described below. As discussed above, the merger value for each partnership will not be changed between now and the completion of the merger for the partnership. In addition, for purposes of example in this document, a share of Pioneer Parent common stock has been valued at an assumed average closing price of \$18.00. However, the value of a share of Pioneer Parent common stock will be recalculated by computing the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for each partnership. This recalculated value, and not the assumed closing average closing price of \$18.00 per share of Pioneer Parent common stock used for illustration purposes in this document and on each limited partner's proxy card, will be used to determine the actual number of shares of Pioneer Parent common stock to be issued in the merger of each partnership. The recalculated value may be more or less than the assumed average closing price of \$18.00 per share of Pioneer Parent common stock. If it is more than \$18.00, you will receive fewer shares of Pioneer Parent common stock than the illustrations in this document show. For historical and current market prices of Pioneer Parent common stock, see "Comparative Per Share Market Price and Dividend Information" on page 62.

CURRENT MARKET PRICES FOR OIL AND GAS MAY BE HIGHER THAN THE MERGER VALUE FOR A PARTNERSHIP, WHICH MAY AFFECT DELIVERABILITY OF THE FAIRNESS OPINION

Oil and gas prices have fluctuated greatly in the recent past and may continue to do so in the future. Pioneer Parent calculated each merger value based on oil and gas prices that it believes to be fair and that are supported by current market prices. Changes in current oil and gas prices may affect the ability of Pioneer to obtain an opinion at the time this document is mailed to the limited partners of each partnership as to the fairness of the consideration to be received by limited partners. If the prices used in the calculation of each merger value significantly differ from current prices and if Pioneer Parent does not modify its offer, the fairness opinion provider may be unable to render its opinion.

YOU WERE NOT INDEPENDENTLY REPRESENTED IN ESTABLISHING THE TERMS OF THE MERGER OF EACH PARTNERSHIP

Pioneer Parent and Pioneer USA determined the terms of the merger of each partnership, including the method for determining the merger value for that partnership, and the type and allocation among the partners of the

-18-

29

consideration to be given in exchange for partnership interests. We did not seek recommendations about the type of transaction or the terms or prices from any independent underwriter, financial advisor or other securities professional prior to accepting the consideration Pioneer Parent offered. The only independent representatives in the mergers were Sayles, Lidji & Werbner, A Professional Corporation, which provided legal services to Pioneer USA's board of directors, Robert A. Stanger & Co., Inc., which will render its fairness opinion to Pioneer USA's board of directors, and , which will render the legal opinion required under the partnership agreement for each partnership, other than Parker & Parsley Producing Properties 88-A, L.P. No representative group of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

limited partners and no outside experts or consultants, such as investment bankers, legal counsel, accountants or financial experts, were engaged solely to represent the independent interests of the limited partners of any partnership in structuring and negotiating the terms of the merger for the partnership. If you had been separately represented, the terms of the merger for a partnership in which you own interests might have been different and possibly more favorable to you.

THE INTERESTS OF PIONEER PARENT, PIONEER USA AND THEIR DIRECTORS AND OFFICERS MAY DIFFER FROM YOUR INTERESTS

The interests of Pioneer Parent, Pioneer USA, and their directors and officers may differ from your interests as a result of the relationships among them. For example, Pioneer USA, as general or managing partner of each partnership, has a duty to manage the partnership in the best interests of the limited partners. Additionally, Pioneer USA has a duty to operate its business for the benefit of its sole stockholder, Pioneer Parent. Also, the members of Pioneer USA's board of directors have duties to both the limited partners of each partnership and to Pioneer Parent. All of the members of Pioneer USA's board of directors are officers of Pioneer Parent and have duties to Pioneer Parent's stockholders. Pioneer USA's board of directors was aware of these interests and considered them in approving the merger proposals for each partnership. See "Interests of Pioneer Parent, Pioneer USA and Their Directors and Officers" on page 63 of this document.

IT IS UNCLEAR WHAT THE MARKET DEMAND IS FOR ANY PARTNERSHIP OR ITS ASSETS OR THAT THE TERMS OF THE MERGER OF EACH PARTNERSHIP ARE AS FAVORABLE AS COULD BE OBTAINED IN A THIRD PARTY SALE

In September 1999, we first announced our willingness to consider third party offers to purchase any partnership or its assets at prices that are higher than the 1999 merger value for the partnership, but subject to our right to continue operation of the properties. We believe this limited form of auction would result in a better price to the limited partners of each partnership than if we merely offered the partnership or its assets for sale at any price. Since that time, we have not received any third party offer for any partnership or its assets. As a result, we cannot be sure what the market demand is for any partnership or its assets, individually or as a whole with the other partnerships, or what a third party would offer for any partnership. Also, although we do not have any plans to sell or relinquish our operating rights in any third party sale, we cannot be sure what the market demand is for any partnership or its assets if we also sold or relinquished our operating rights. No assurance may be given that the terms of the merger of each partnership are as favorable as could be obtained from a sale of any partnership or its assets, individually or as a whole with the other partnerships, to an unrelated party.

POTENTIAL LITIGATION CHALLENGING THE MERGER OF A PARTNERSHIP MAY DELAY OR BLOCK THE MERGER AND, AS A RESULT, YOUR RECEIPT OF THE PIONEER PARENT COMMON STOCK

One or more of the partners opposed to the merger of a partnership in which such partner or partners own an interest may initiate legal action to stop the merger of the partnership or to seek damages for alleged violations of federal

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and state laws. Litigation challenging the merger of any partnership may delay or block the closing of the merger for one or more of the partnerships. In addition, if any lawsuits are filed, Pioneer Parent or Pioneer USA may decide to terminate one or more of the mergers. If the merger of a partnership in which you own an interest is delayed, blocked or terminated, we will delay or terminate the issuance of the Pioneer Parent common stock that you would otherwise receive.

REPURCHASE OFFERS IN 2001 BY EACH OF THE SIX PARTNERSHIPS WITH A REPURCHASE OBLIGATION WERE HIGHER THAN THE MERGER VALUE FOR THE PARTNERSHIP

The limited partners of each of the partnerships listed below may require us to repurchase their partnership interests for cash at the times and under the conditions described in the partnership agreements for the partnership:

Parker & Parsley 82-I, Ltd.
Parker & Parsley 82-II, Ltd.
Parker & Parsley 82-III, Ltd.
Parker & Parsley 83-A, Ltd.
Parker & Parsley 83-B, Ltd.
Parker & Parsley 84-A, Ltd.

The 2001 repurchase offers were commenced and will be completed before the date of this document. In each of the partnerships with a repurchase obligation, the repurchase price in 2001 is higher than the price being offered

-19-

30

in the merger of the partnership. For a list of the repurchase prices in 2001 and the prior two years, see Table 8 of Appendix A. For a description of the mechanics of the repurchase rights, see "Special Factors - Fairness Opinion - Repurchase Offers" on page 38.

In addition, if the limited partners of a partnership with repurchase rights vote a majority of their partnership interests in favor of the merger of the partnership, those repurchase rights will terminate on completion of the merger. As a result, if the oil and gas prices used in calculating the repurchase prices in the future were high enough to offset the additional 33-1/3% discount factor used in the repurchase calculation, the limited partners would not have the opportunity to require Pioneer USA to repurchase the limited partners' partnership interests for a price higher than the merger value for the partnership.

YOU COULD BE BOUND BY THE MERGER OF EACH PARTNERSHIP IN WHICH YOU OWN AN INTEREST EVEN IF YOU DO NOT VOTE IN FAVOR OF THE MERGER

You will be bound by the merger of each partnership in which you own an interest if the limited partners in the partnership vote a majority, or 66-2/3% for Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P., of their

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership interests in favor of the merger, even if you vote against the merger or do not vote. If the merger of the partnership occurs, you will be entitled to receive only an amount of Pioneer Parent common stock based on the merger value of your partnership interests in the partnership. Under the laws of the State of Delaware and the State of Texas, which are the states of formation of the partnerships, you are not entitled to appraisal or dissenters' rights with respect to the merger of any partnership.

RISKS ASSOCIATED WITH AN INVESTMENT IN PIONEER PARENT

LIMITED PARTNERS WHO BECOME PIONEER PARENT STOCKHOLDERS WILL OWN STOCK IN A CORPORATION RATHER THAN A LIMITED PARTNERSHIP INTEREST IN A LIMITED PARTNERSHIP RESULTING IN A FUNDAMENTAL CHANGE IN THE NATURE OF THEIR INVESTMENTS

Limited partners of a participating partnership will become stockholders of Pioneer Parent and will fundamentally change the nature of their investments. Each partnership, other than Parker & Parsley 81-I, Ltd., Parker & Parsley 81-II, Ltd., Parker & Parsley 82-I, Ltd., Parker & Parsley 82-II, Ltd., Parker & Parsley 82-III, Ltd., Parker & Parsley 83-A, Ltd., Parker & Parsley 83-B, Ltd. and Parker & Parsley 84-A, Ltd., was formed as finite-life investment. The partners of each partnership receive regular cash distributions out of the partnership's net operating income and special distributions upon liquidation of the partnership's oil and gas assets. In contrast, Pioneer Parent intends to operate for an indefinite period of time and has no specific plans for the sale of its investments. Because Pioneer Parent will spend a portion of its cash flow on acquisitions, drilling and other activities, the activities of Pioneer Parent may involve higher levels of risk than those associated with the present or future operations of each partnership. Instead of having their investments liquidated through the liquidation of Pioneer Parent's assets, stockholders should expect to be able to liquidate their investment in Pioneer Parent only through the sale of their investments in the market. The amount realized through the sale of shares of Pioneer Parent common stock may not be equal to the amount that would have been realized by stockholders through the sale of Pioneer Parent's assets. Stockholders will thus be subject to the market risks of all public companies, particularly in that the value of their equity securities may fluctuate from time to time depending upon general market conditions, conditions in the oil and gas industry, and Pioneer Parent's future performance. For a description of the differences between the terms of shares of Pioneer Parent common stock and partnership interests in each partnership, see "Comparison of Rights of Stockholders and Partners" on page 73.

PIONEER PARENT MIGHT NOT DECLARE DIVIDENDS

Limited partners of a participating partnership will become stockholders of Pioneer Parent and will not receive cash distributions or will receive distributions much smaller than the distributions received from the partnership. Pioneer Parent's board of directors did not declare dividends to its stockholders during 1999, 2000 or the three months ended March 31, 2001. The determination of the amount of future cash dividends, if any, to be declared and paid is in the sole discretion of Pioneer Parent's board of directors.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

LIMITED PARTNERS WHO BECOME PIONEER PARENT STOCKHOLDERS MAY BE DILUTED

If all partnerships participate in the mergers, the shares of Pioneer Parent common stock to be issued will represent approximately 4.3% of the shares of Pioneer Parent common stock outstanding on the date of this document. That percentage is based upon the number of shares to be issued upon the merger of each partnership using an assumed average closing price of \$18.00 per share of Pioneer Parent common stock and may increase or decrease depending on the actual number of shares issued upon the merger of each partnership, which number will be determined using the actual average closing price of Pioneer Parent common stock for the ten trading days ending three business days before the initial date of the special meeting. Because of the increased liquidity afforded to the limited partners of each partnership after the merger of the partnership, all of those shares of Pioneer Parent common stock may be offered for sale in a relatively short period of time, which could result in the price at which shares of

-20-

31

Pioneer Parent common stock trade after completion of the merger of each partnership being less than the price at which such shares traded immediately prior to the completion of the merger of each partnership. In addition, limited partners of a partnership who become Pioneer Parent stockholders will be subject to the risk that their equity interests in Pioneer Parent may be diluted through the issuance of additional equity securities. Pioneer Parent has the right to issue, at the discretion of its board of directors, shares other than those to be issued in the merger of each partnership, upon such terms and conditions and at such prices as its board of directors may establish. In addition, Pioneer Parent may in the future issue preferred stock that might have priority over the Pioneer Parent common stock as to distributions and liquidation proceeds.

DIVIDENDS PAID TO PIONEER PARENT STOCKHOLDERS ARE TAXED AT TWO LEVELS

Pioneer Parent is taxed on its income, after deduction of expenses, at both the federal and state levels. Pioneer Parent stockholders, including limited partners who become Pioneer Parent stockholders, are separately taxed on the receipt, if any, of dividends.

PIONEER PARENT IS AN INDEPENDENT OIL AND GAS EXPLORATION AND DEVELOPMENT COMPANY AND ITS BUSINESS ACTIVITIES INVOLVE RISKS

Pioneer Parent is an independent oil and gas exploration and development company. Its purpose is to competitively and profitably explore for, develop and produce proved oil, natural gas liquids and gas reserves. The nature of those business activities subjects Pioneer Parent to hazards and risks, including the following:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Pioneer Parent's profitability is highly dependent on the prices of oil and gas, which have historically been very volatile. Pioneer Parent's revenues, profitability, cash flow and future rate of growth are highly dependent on prices of oil and gas, which are affected by numerous factors beyond Pioneer Parent's control. Oil and gas prices historically have been very volatile. If the significant downward trend in oil and gas prices experienced in 1998, as compared to 2000 and 1999, were to resume, it would have a material adverse effect on Pioneer Parent's revenues, profitability and cash flow and could result in a reduction in the carrying value of Pioneer Parent's oil and gas properties and an increase in Pioneer Parent's deferred tax asset valuation allowance.

- o Pioneer Parent's drilling activities may not be productive. Drilling involves numerous risks, including the risk that no commercially productive gas or oil reservoirs will be encountered. The cost of drilling, completing and operating wells is often uncertain and drilling operations may be curtailed, delayed or canceled as a result of a variety of factors, including (1) unexpected drilling conditions, (2) pressure or irregularities in formations, (3) equipment failures or accidents, (4) adverse weather conditions and (5) shortages or delays in the delivery of equipment. Pioneer Parent's future drilling activities may not be successful and, if unsuccessful, such failure could have an adverse effect on Pioneer Parent's future results of operations and financial condition. While all drilling, whether developmental or exploratory, involves these risks, exploratory drilling involves greater risks of dry holes or failure to find commercial quantities of hydrocarbons. Because of the percentage of Pioneer Parent's capital budget devoted to exploratory projects, it is likely that Pioneer Parent will continue to experience exploration and abandonment expense.

- o Pioneer Parent may be required to recognize non-cash charges relating to unproved property costs. At December 31, 2000 and 1999, Pioneer Parent carried unproved property costs of \$229.2 million and \$257.6 million, respectively. United States generally accepted accounting principles require Pioneer Parent to periodically evaluate these costs on a project-by-project basis in comparison to their estimated value. These evaluations will be affected by (1) results of exploration activities, (2) commodity price outlooks, (3) planned future sales or (4) expiration of all or a portion of the leases, contracts and permits related to such projects. If the quantity of potential reserves determined by such evaluations is not sufficient to fully recover the cost invested in each project, Pioneer Parent will recognize non-cash charges in the earnings of future periods. During 1999 and 1998, Pioneer Parent recognized non-cash impairment provisions of \$17.9 million and \$147.3 million, respectively, to reduce the carrying value of its unproved properties.

- o Pioneer Parent's growth depends on its ability to acquire oil and gas properties on a profitable basis. Acquisitions of producing oil and gas properties have been a key element of Pioneer Parent's growth. Pioneer Parent's growth following the full development of its existing property base could be impeded if it is unable to acquire additional oil and gas properties on a profitable basis. The success of any acquisition will depend on a number of factors, including the ability to estimate accurately the recoverable volumes of reserves, rates of future production and future net revenues attributable to reserves and to assess possible environmental

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

liabilities. All of these factors affect whether an acquisition will ultimately generate cash flows sufficient to provide a suitable return on investment. Even though Pioneer Parent performs a review of the properties it seeks to acquire that it believes is consistent with industry practices, such reviews are often limited in scope.

-21-

32

- o If Pioneer Parent is unable to dispose of non-strategic assets at acceptable prices this would hinder its ability to make capital resources available for more profitable activities. Pioneer Parent regularly reviews its property base for the purpose of identifying non-strategic assets, the disposition of which would increase capital resources available for other activities and create organizational and operational efficiencies. Various factors could materially affect the ability of Pioneer Parent to dispose of non-strategic assets, including the availability of purchasers willing to purchase the non-strategic assets at prices acceptable to Pioneer Parent.

- o The operation of natural gas processing plants involves the potential for damage claims. As of December 31, 2000, Pioneer Parent owns interests in nine natural gas processing plants and four treating facilities. Pioneer Parent operates six of the plants and all four treating facilities. There are significant risks associated with the operation of natural gas processing plants. Gas and natural gas liquids are volatile and explosive and may include carcinogens. Damage to or misoperation of a natural gas processing plant or facility could result in an explosion or the discharge of toxic gases, which could result in significant damage claims in addition to interrupting a revenue source.

- o Pioneer Parent is not fully insured against operating hazards. Pioneer Parent's operations are subject to all the risks normally incident to the oil and gas exploration and production business, including blowouts, cratering, explosions and pollution and other environmental damage, any of which could result in substantial losses to Pioneer Parent due to injury or loss of life, damage to or destruction of wells, production facilities or other property, clean-up responsibilities, regulatory investigations and penalties and suspension of operations. Although Pioneer Parent currently maintains insurance coverage that it considers reasonable and that is similar to that maintained by comparable companies in the oil and gas industry, it is not fully insured against certain of these risks, either because such insurance is not available or because of high premium costs.

- o In the event of noncompliance, liabilities under environmental laws and regulations could be substantial. The oil and gas business is also subject to environmental hazards, such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose Pioneer Parent to substantial liability due to pollution and other environmental damage. A variety of federal, state and foreign laws and regulations govern the environmental aspects of the oil and gas business. Noncompliance with these laws and regulations may subject Pioneer Parent to penalties, damages or other liabilities, and compliance may increase the cost of Pioneer Parent's operations. Such laws and regulations may also affect the costs of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

acquisitions.

Pioneer Parent does not believe that its environmental risks are materially different from those of comparable companies in the oil and gas industry. Nevertheless, no assurance can be given that future environmental laws will not result in a curtailment of production or processing or a material increase in the costs of production, development, exploration or processing or otherwise adversely affect Pioneer Parent's operations and financial condition. Pollution and similar environmental risks generally are not fully insurable.

- o There are factors outside of Pioneer Parent's control which could impair its ability to satisfy its debt obligations. Pioneer Parent is a borrower under fixed term senior notes and a line of credit. The terms of Pioneer Parent's borrowings under the senior notes and the line of credit specify scheduled debt repayments and require Pioneer Parent to comply with covenants and restrictions. Pioneer Parent's ability to comply with the debt repayment terms, associated covenants and restrictions is dependent on, among other things, factors outside Pioneer Parent's direct control, such as commodity prices, interest rates and competition for available debt financing.
- o The oil and gas industry is highly competitive. Pioneer Parent competes with other companies, producers and operators for acquisitions and in the exploration, development, production and marketing of oil and gas. Some of these competitors have substantially greater financial and other resources than Pioneer Parent.
- o Present or future regulations could adversely affect Pioneer Parent's business and operations. Pioneer Parent's business is regulated by a variety of federal, state, local and foreign laws and regulations. There can be no assurance that present or future regulations will not adversely affect Pioneer Parent's business and operations.
- o Pioneer Parent has international operations which are subject to international economic and political risks. At December 31, 2000, approximately 22% of Pioneer Parent's proved reserves of oil, natural gas liquids and gas were located outside the United States (17% in Argentina, 4% in Canada and 1% in South Africa). The success and profitability of international operations may be adversely affected by risks

-22-

33

associated with international activities, including (1) economic and labor conditions, (2) political instability, (3) tax laws, including United States taxes on foreign subsidiaries, and (4) changes in the value of the United States dollar versus the local currency. To the extent that Pioneer

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parent is involved in international activities, changes in exchange rates may adversely affect Pioneer Parent's consolidated revenues and expenses, as expressed in United States dollars.

- o Numerous uncertainties exist in estimating Pioneer Parent's quantities of proved reserves and future net revenues. Estimates of proved reserves and related future net revenues are based on various assumptions which may prove to be inaccurate. Therefore, those estimates should not be construed as being accurate estimates of the current market value of Pioneer Parent's proved reserves.

-23-

34

SPECIAL FACTORS

BACKGROUND OF THE MERGER OF EACH PARTNERSHIP

The partnerships were formed from 1981 through 1991 under the sponsorship of various affiliated companies collectively known as Parker & Parsley. On February 19, 1991, Parker & Parsley's principal company converted from limited partnership form to corporate form and acquired most of the assets of five oil and gas limited partnerships. The new corporation was called Parker & Parsley Petroleum Company, and it owned the sole or managing general partners of the partnerships.

In early 1992, Parker & Parsley Petroleum Company decided that it could not fully realize the benefits of the properties it had acquired while continuing to devote substantial resources to the sponsorship of and drilling for each partnership. It stopped sponsoring oil and gas development drilling and income partnerships and focused on its corporate development. In 1997, Parker & Parsley Petroleum Company and MESA Inc. combined their businesses in a merger that created Pioneer Natural Resources Company. That same year, Pioneer Parent combined many of its U.S. subsidiaries, including the managing or sole general partner of each of the partnerships, into its main subsidiary, Pioneer USA.

From time to time since 1992, Pioneer Parent and its predecessors have had general, internal discussions about whether to consolidate each partnership pursuant to a transaction such as the merger of each partnership. On several occasions, Pioneer Parent or its predecessors engaged outside legal counsel and had discussions with investment banks about a possible combination with each of the partnerships. Some of those discussions were with Stanger. The contemplated structure of the combination has varied significantly during these internal discussions and has included issuances of common stock, combinations of common stock and cash, and cash-only transactions through asset sales, mergers, tender offers, and combinations of those types of transactions. See "Special Factors - Reasons for the Merger of Each Partnership" for a discussion of why Pioneer Parent and Pioneer USA selected the proposed transaction. In general, the contemplated transactions would have been taxable to the limited partners of each partnership because of the difficulties involved in structuring a tax-free transaction for the partnership. Until 1999, every time Pioneer Parent or its predecessors considered such a transaction, it decided not to complete the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

transaction. The reasons Pioneer Parent and its predecessors did not previously complete a transaction varied. In some early cases, they wanted to collect and fully distribute proceeds to the limited partners of each partnership from litigation against an oilfield services company before trying to value any partnership. In other cases, they wanted to avoid periods of volatility in oil and gas prices or in Pioneer Parent's stock price. On several occasions, Pioneer Parent was involved in other corporate transactions that could not be completed timely if a transaction with each partnership was also pending.

In early 1998, Pioneer Parent was formulating a strategic plan to focus on its 25 core area oil and gas fields and to eliminate ancillary operations. Pioneer Parent began discussions internally to consider a transaction involving each partnership, including the basis for valuing each partnership and whether the consideration should be Pioneer Parent common stock, cash or some combination of both.

During the second quarter of 1998, Pioneer Parent and Pioneer USA began to discuss the methods for valuing each partnership. At that time, the board of directors of Pioneer USA engaged Sayles, Lidji & Werbner, A Professional Corporation (then known as Sayles & Lidji, A Professional Corporation) based in Dallas, Texas, as its independent legal counsel to assist the board in evaluating a potential transaction with Pioneer Parent. Pioneer USA's board also engaged Stanger as its financial advisor to review any proposed transaction and to render an opinion as to the fairness of the offer price, from a financial point of view, to the unaffiliated limited partners of each partnership. In May 1998, Pioneer Parent submitted an offer to merge each partnership into Pioneer USA using Pioneer Parent common stock or a combination of Pioneer Parent common stock and cash. The pricing for that offer was primarily based on oil and gas prices and the present value of estimated future net revenues from each partnership's oil and gas reserves, in each case as of December 31, 1997. The present value of estimated future net revenues was determined in accordance with the SEC's reporting convention that provides a common basis for comparing oil and gas companies and requires the use of oil and gas prices as of the date of computation, but using a 15% discount rate. After some negotiation with Pioneer USA, Pioneer Parent withdrew the May 1998 offer due to the decline in oil prices. In July 1998, Pioneer Parent submitted a second offer using Pioneer Parent common stock, or at its option upon the occurrence of specified events, a combination of Pioneer Parent common stock and cash. The oil and gas pricing for the second offer was lower than the pricing in the May 1998 offer due to the continued decline in oil prices, but the discount rate for the second offer was the same as the May 1998 offer. Pioneer Parent and Pioneer USA decided to discontinue further discussions and not to submit the proposed transaction to the limited partners of any partnership because of:

- o the continued decline in oil prices, which in turn would reduce any merger value to be paid to the limited partners of each partnership;

- o the decline in Pioneer Parent's stock price; and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o the tight lending environment for many oil and gas companies, including Pioneer Parent.

As oil and gas prices improved, in June 1999, Pioneer Parent and Pioneer USA again began discussions internally to consider a transaction involving each partnership. At that time, Scott Sheffield, the President and Chief Executive Officer of Pioneer Parent, contacted members of Pioneer USA's board regarding consideration of a potential transaction involving each partnership. Pioneer Parent did not submit a written offer to Pioneer USA at that time.

During the second quarter of 1999, Pioneer Parent and Pioneer USA attempted to formally address the conflicting interests inherent in the relationships among Pioneer Parent, Pioneer USA, each partnership and the officers and directors of Pioneer Parent and Pioneer USA. Pioneer USA caused Scott D. Sheffield to resign from Pioneer USA's board of directors because he is also a member of Pioneer Parent's board of directors. He was not replaced. Pioneer USA did not consider replacing Mr. Sheffield with an unaffiliated director because Pioneer USA is a 100% subsidiary of Pioneer Parent and typically such wholly-owned subsidiaries do not have unaffiliated directors. Because all of the board members of Pioneer USA are also employees of Pioneer Parent, an inherent conflict exists with respect to their duties to the limited partners of each partnership in their capacity as directors of Pioneer USA, on the one hand, and their duties to Pioneer Parent as employees, on the other hand.

Shortly thereafter, Pioneer USA's board again engaged Sayles, Lidji & Werbner to advise the board in connection with a proposed transaction with Pioneer Parent and any other alternative transaction that the board determined was worth consideration.

Pioneer USA's board also engaged, on behalf of each partnership, Stanger, as its financial advisor to advise the board on the fairness from a financial point of view of the merger value for each partnership to be paid to the unaffiliated limited partners in the partnership for the limited partnership interests in the partnership and to assist in Pioneer USA's evaluation of the merger transaction and other strategic alternatives. Stanger was familiar with the circumstances from its 1998 engagement.

On July 14, 1999, Pioneer USA's board met with its counsel and Stanger to discuss the proposed merger of each partnership. Stanger presented an overview of the analysis it planned to perform in evaluating the fairness of the proposed transaction. Stanger advised Pioneer USA's board that Stanger would review the following for each partnership:

- o the reserve report to be prepared by Williamson Petroleum Consultants, Inc. as of September 30, 1999;
- o the most recent quarterly financial statements;
- o the estimated cash distributions;
- o the estimated net asset value, going concern value and liquidation value;
- o secondary market prices;

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o tender offers; and
- o repurchase offers.

Sayles, Lidji & Werbner then reviewed and discussed with the board the procedures that would be involved in completing the proposed transaction with Pioneer Parent. The discussion topics included:

- o the process in which Pioneer USA's board of directors would approve the proposed transaction;
- o the submission of the proposed merger of each partnership to the limited partners of the partnership for approval;
- o the evaluation of offers from third parties;
- o the application of and compliance with the requirements of the federal securities laws; and
- o the timing of the proposed transaction.

Members of the Pioneer USA board met informally on several occasions during July and early August to discuss among each other the proposed terms of the merger transaction and other potential alternative transactions, including the formation of a royalty trust or a master limited partnership.

On August 16, 1999, at a special meeting of the Pioneer USA board, the board met with representatives of Sayles, Lidji & Werbner and Stanger to discuss the proposed merger of each partnership into Pioneer USA. Pioneer USA's board discussed with the representatives of Stanger and Sayles, Lidji & Werbner the proposed terms of the offer expected from Pioneer Parent, including the expected pricing parameters of \$18 per Bbl of oil and \$2.40 per Mcf of gas and the expected timing of receipt of Pioneer Parent's formal written offer. Stanger discussed the progress it was making on its financial analysis of each partnership and its determination of the fairness from a financial point of view of the merger value for each partnership to be paid in cash for the limited partners' interests in the partnership. Stanger's discussion centered on (1) the price to be paid for the oil and gas reserves, (2) the discount rate, (3) the application of overhead charges and administrative charges, and (4) the responsibility for any transaction expenses. Following this discussion, the board and its counsel discussed the board's fiduciary duties in evaluating the proposed transaction with Pioneer Parent and the making of a recommendation to the unaffiliated

-25-

36

limited partners. Finally, the board decided to request that Pioneer Parent make a formal written offer outlining the terms of the proposed merger transaction.

On August 17, 1999, in response to Pioneer USA's request for a written offer, Pioneer Parent delivered to Pioneer USA's board a written proposal which outlined the terms of the proposed merger transaction. The written offer

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

specified that the pricing for the oil and gas reserves would be based on 95% of the arithmetic average of a four-year or five-year NYMEX futures price. The future cash flows generated by this pricing structure would then be discounted using a 15% discount rate. At a special meeting that day of Pioneer USA's board, the board, its counsel and Stanger met to discuss the specifics of Pioneer Parent's offer, including oil and gas pricing, the present value discount rate, the right to allow others to bid on the property, and the costs of the merger of each partnership. Following the board meeting, Pioneer USA's directors determined that it would be advantageous to each partnership to seek more favorable pricing terms and a lower discount rate. Thus, the board decided to continue discussions of the written offer.

On August 23, 1999, at a special meeting of Pioneer USA's board, the board updated its counsel and Stanger on the status of its discussions with Pioneer Parent. As a result of continued discussions, Pioneer Parent and Pioneer USA agreed, in response to requests by Stanger, (1) to reduce the discount rate from 15% to 12.5%, (2) to increase the pricing of the oil reserves from 95% of the arithmetic average of a four-year or five-year NYMEX futures price to 100% of the arithmetic average of the five-year NYMEX futures price, (3) to a fixed price of \$2.40 per Mcf of gas instead of a floating NYMEX futures price and (4) to allocate the merger expenses and fees to each participating partnership.

On September 2, 1999, at a special meeting of Pioneer USA's board, the board and representatives of Stanger and Sayles, Lidji & Werbner reviewed the terms of a revised proposal submitted by Pioneer Parent which incorporated these changes. The parties discussed the revised terms of the merger of each partnership and the strategic rationale for and benefits of the merger of each partnership. At this meeting, Stanger reviewed with the board its financial analysis and its evaluation of the merger consideration and the feasibility of other strategic alternatives. Stanger also orally presented to the board the status of its findings and its preliminary evaluation of the proposed transaction.

After considering Stanger's evaluation of the proposed merger transaction, Pioneer USA's board, together with representatives of Stanger, engaged in a general discussion of other possible transactions it had considered over the last six to eight months. This discussion included anticipated ongoing operations of each partnership under its current structure and the operation of each partnership through a master limited partnership structure, as well as through a royalty trust. The board discussed selling the oil and gas properties of each partnership at auction and potentially soliciting other buyers or merger partners. The board also considered the fact that other potential buyers of each partnership would have an opportunity to make an offer for each partnership before the board submitted the merger transaction to the limited partners of each partnership for their consideration and approval.

At a special meeting held on September 8, 1999, Pioneer USA's board continued discussions with Sayles, Lidji & Werbner and Stanger regarding the merger proposals for each partnership. After considering the alternatives discussed in the preceding paragraph, including the advantages and disadvantages of each, the board concluded that none of the alternatives was more advantageous to the limited partners of any partnership than the terms of the proposed merger of the partnership. The board then unanimously approved proceeding with the merger of each partnership, subject to determination of September 30, 1999 pricing, its receipt of Stanger's fairness opinion, and the board's determination that the merger consideration of each partnership is fair to the unaffiliated limited partners of that partnership based on all circumstances as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of September 30, 1999, including without limitation, the then current market conditions and the existence, if any, of any other proposal for the partnership on terms more favorable to the limited partners.

On September 8, 1999, in connection with the proposed merger transaction, Pioneer Parent and Pioneer USA filed a preliminary proxy statement and preliminary Schedule 13e-3s with the Securities and Exchange Commission. In addition, Pioneer Parent and Pioneer USA publicly announced the proposed merger of each partnership. In that announcement, Pioneer USA also announced that it would consider proposals from other potential buyers of one or more of the partnerships.

On or about October 19, 1999, Pioneer Parent submitted a verbal offer to Pioneer USA to revise the oil reserve component of the pricing used in the preliminary proxy statement to \$18.35 per Bbl of oil. On or about November 3, 1999, Pioneer Parent submitted a second verbal offer to Pioneer USA to further revise the oil reserve pricing to \$18.40 per Bbl of oil. Later that month, due to the increase in oil and gas prices over the previous several months and in response to a request from Pioneer USA, Pioneer Parent proposed to Pioneer USA that the merger value calculation for each partnership be further modified (1) to increase the pricing to \$18.90 per Bbl for oil and \$2.55 per Mcf of gas and (2) to increase the discount rate to 15%.

-26-

37

On November 17, 1999, in connection with the approval of Pioneer Parent's capital budget for 2000, Pioneer Parent's board of directors met and voted to approve the merger of each partnership and to proceed with the completion of each merger, subject to the pricing information and other relevant conditions at the time.

At a special board meeting held on November 22, 1999, Pioneer USA's board of directors met with representatives from Stanger and Sayles, Lidji & Werbner to discuss Pioneer Parent's proposed pricing. Pioneer USA's board agreed that an increase in the merger value for each partnership based on Pioneer Parent's proposed pricing was warranted to more closely reflect the current oil and gas prices. Similarly, in view of increases in interest rates during the months since the original proposal was made and in view of the volatility of oil and gas prices over the previous year, Pioneer USA's board agreed to increase the discount rate used to determine the merger value for each partnership from 12.5% to 15%. Pioneer USA's board reported that management had worked to reduce the expected merger expenses and fees from an estimated \$4.6 million to an estimated \$1.8 million, thereby increasing the merger value for each partnership to be received by the limited partners of the partnership. The board also received a status report on whether or not any third party offers had been received since September 8, 1999, the date on which Pioneer Parent and Pioneer USA announced that it would consider such offers. In that regard, Pioneer Parent and Pioneer USA had not received any formal offers, but did receive a few inquiries from third parties expressing an interest in possibly making a bid on one or more of the partnerships or the assets of one or more of the partnerships. The nature of the inquiries was to understand the structure and pricing of the transaction proposed by Pioneer and Pioneer USA. None of the third parties who made

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

inquiries (1) specified any terms, (2) made any offer or (3) have pursued the matter further. The board then voted to extend the period it would be willing to consider third party offers from November 1, 1999 to December 31, 1999. Stanger then reviewed for the board Stanger's analysis of the fairness of the merger transaction using the new terms agreed to by Pioneer Parent and Pioneer USA. Stanger expressed its preliminary view that the revised merger value for each partnership to be paid in cash for the limited partnership interests in each partnership would be fair from a financial point of view to the unaffiliated limited partners of the partnership under recent market conditions, but stated that whether or not the transaction would be considered fair by Stanger at the time its fairness opinion was sought would depend on market conditions at that time. Following this discussion, the board approved proceeding with the merger of each partnership on the new terms, subject to (1) its receipt of a fairness opinion from Stanger, and (2) its determination that the merger value to be paid in cash for the limited partnership interests in each partnership is fair to the unaffiliated limited partners of the partnership based on all circumstances, including without limitation, the then current market conditions and the existence, if any, of any other proposal for such partnership or its assets on terms more favorable to the unaffiliated limited partners than the proposed merger transaction.

In December 1999, Pioneer became involved in discussions with an independent oil and gas company similar in size to Pioneer relating to a corporate merger opportunity. Those discussions required the dedicated time and attention of Pioneer's management. The corporate merger opportunity subsequently failed to come to fruition. Meanwhile, during December 1999 and the first quarter of 2000, oil and gas prices continued to increase. As a result, during the first quarter of 2000, Pioneer Parent and Pioneer USA began to discuss revising the pricing terms of the proposed merger transaction to (1) an arithmetic average of the five-year NYMEX futures price for oil and for gas and (2) a 15% discount rate. Pioneer Parent also proposed to offer Pioneer Parent common stock instead of cash to the limited partners of each participating partnership. In April 2000, Pioneer Parent and Pioneer USA discontinued these discussions and did not submit the proposed merger transaction to the limited partners of any partnership because of:

- o the decline in Pioneer Parent's stock price;
- o the increase in interest rates; and
- o Pioneer Parent's involvement in replacing existing debt with new publicly-held debt and a new credit facility.

In September 2000, Pioneer Parent and Pioneer USA began internal discussions to consider a merger transaction involving 13 privately-held employee limited partnerships. Pioneer Parent offered to pay an amount of cash to the limited partners of each participating partnership equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of September 30, 2000, less the cash distributions on October 15, 2000 and November 15, 2000, by the partnership to its partners. Pioneer Parent and Pioneer USA calculated the present value of the estimated future net revenues from each partnership's estimated oil and gas reserves using (1) a five-year NYMEX futures price for oil and gas as of August 25, 2000, with prices held constant after

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 13.5% discount rate. Pioneer Parent also agreed to bear the merger expenses and fees. Using the same parameters as described above, Pioneer Parent purchased all of the direct oil and gas interests held by Scott D. Sheffield, its chairman of the board of directors and chief executive officer, for \$0.2 million during October 2000. The consideration paid in the mergers of the employee limited partnerships and in the purchase of the direct oil and gas interests was all cash since offering and registering Pioneer Parent common stock in those transactions was cost-prohibitive due to the small size of such transactions. In December 2000, Pioneer Parent and

-27-

38

Pioneer USA completed the merger of each of the 13 privately-held employee limited partnerships with and into Pioneer USA.

In October 2000, Pioneer Parent terminated the preliminary proxy statement and preliminary Schedule 13e-3s filed with the Securities and Exchange Commission on September 8, 1999 in connection with the proposed merger transaction.

As oil and gas prices continued to improve, in January 2001, Pioneer Parent and Pioneer USA renewed their internal discussions to consider a transaction involving each of the partnerships described in this document. For a discussion of why Pioneer Parent and Pioneer USA selected the proposed merger transaction, see "Alternative Transactions to the Merger of Each Partnership" on page 41. Pioneer Parent offered a combination of its common stock and cash. Pioneer Parent and Pioneer USA agreed on a merger value for each participating partnership equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001. Pioneer Parent and Pioneer USA agreed to calculate the present value of the estimated future net revenues from each partnership's estimated oil and gas reserves using (1) a five-year NYMEX futures price for oil and gas as of March 30, 2001, with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 13.5% discount rate. For 2001, the oil and gas prices would be based on the average NYMEX futures price for the nine-month period beginning on April 1, 2001 and ending December 31, 2001. Pioneer Parent also agreed to bear the merger expenses and fees.

On February 15, 2001, Pioneer Parent's board of directors met and voted to approve the merger of each partnership, the issuance of Pioneer Parent common stock and the payment of cash upon each such merger, and to otherwise proceed with the completion of each merger, subject to the pricing information and other relevant conditions at the time.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

During March 2001, Pioneer Parent offered to acquire all of the direct oil and gas interests owned by some former officers and employees of Pioneer Parent and Pioneer USA in properties in which Pioneer Parent and Pioneer USA own interests. The merger value for the direct oil and gas interests was equal to the present value of estimated future net revenues from the oil and gas reserves attributable to the interests, as of March 31, 2001. In determining the present value, Pioneer Parent and Pioneer USA used (1) a five-year NYMEX futures price for oil and gas as of March 19, 2001 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 13.5% discount rate. The consideration offered in the purchases of the direct oil and gas interests was all cash since offering and registering Pioneer Parent common stock in those purchases was cost-prohibitive due to the small size of such transactions.

In April 2001, Pioneer USA contacted Sayles, Lidji & Werbner and Stanger to advise them of the proposed merger transaction, pricing terms and merger consideration.

On April 9, 2001, Pioneer USA's board met with Sayles, Lidji & Werbner to discuss the proposed merger of each partnership into Pioneer USA. The board members reviewed the terms of the merger transaction, including the pricing terms, the merger consideration and the terms and conditions of the proposed merger agreement. The board members also discussed the engagement of special legal counsel to render the legal opinion required by each partnership's partnership agreement. Finally, Pioneer USA's board discussed the fairness opinion to be delivered by Stanger and decided to hold another board meeting at which Stanger would present in detail its methodology in determining that the merger value for each partnership and the allocation of the merger value of the partnership (1) to the limited partners of the partnership as a group, (2) to the general partners of the partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the partnership, (4) to the unaffiliated limited partners of the partnership as a group and (5) to the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership as a group, is fair to the unaffiliated limited partners of the partnership and the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership, from a financial point of view. The board decided to proceed with the merger transaction, but would withhold recommending the merger transaction to the limited partners or executing the merger agreement until it received the fairness opinion from Stanger and determined that the merger of each partnership is advisable, fair to the unaffiliated limited partners and in the unaffiliated limited partners' best interests

On April 17, 2001, in connection with the proposed merger transaction, Pioneer Parent and Pioneer USA filed a registration statement on Form S-4 and preliminary Schedule 13e-3s with the Securities and Exchange Commission. In addition, Pioneer Parent and Pioneer USA publicly announced the proposed merger of each partnership. In that announcement, Pioneer USA also announced that it would continue to consider proposals from other potential buyers of any partnership or its assets.

On May 7, 2001, Pioneer USA received proposed solicitation materials prepared by Sierra Fund 3 indicating that Sierra Fund planned to make a tender offer for up to 4.9% of the limited partnership interests of Parker & Parsley 88-A, L.P. and Parker & Parsley 89-A, L.P. at a price equivalent to \$200 and \$240 per \$1,000 initial investment, respectively, in each of the partnerships. Sierra Fund requested and received a list of limited partners of these

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnerships. On June 28, 2001, Pioneer USA learned that on June 14, 2001 Sierra Fund made a tender offer for up to 4.9% of the limited partnership interests of Parker & Parsley 83-A, Ltd., Parker & Parsley 83-B, Ltd., Parker & Parsley 84-A, Ltd. and Parker & Parsley 85-A, Ltd. at a price equivalent to \$85, \$75, \$110 and \$80 per \$1,000 investment, respectively, in each of the partnerships.

-28-

39

Three other limited partners have expressed interest to Pioneer USA in either making offers for the assets of particular partnerships or in purchasing the limited partnership interests of other limited partners. In May 2001, Salvage Investors, L.L.C. expressed interest in making an offer for the assets of Parker & Parsley 82-I, Ltd. but did not indicate a price at which it would be willing to purchase those assets. Also in May 2001, Horace Potts IV expressed interest in making an offer for the assets of unspecified partnerships or, alternatively, in soliciting higher offers on the assets of those partnerships, but did not indicate a price at which he would be willing to purchase those assets. In June 2001, Nancy R. Schauer expressed interest in purchasing limited partnership interests of Parker & Parsley 87-A Conv., Ltd., Parker & Parsley 87-B Conv., Ltd. and Parker & Parsley Private Investment 88, L.P. Pioneer USA received a copy of correspondence from Ms. Schauer to the limited partners of those partnerships in which Ms. Schauer asked the limited partners to vote against the proposed mergers and to call her if they wanted to sell their limited partnership interest.

Additionally, in May 2001 James A. Smith of Indigo Ventures requested, and Pioneer later sent to him, a list of the limited partners of Parker & Parsley Private Investment 89, L.P. and Parker and Parsley 90 Spraberry Private Development, L.P. Pioneer Parent and Pioneer USA do not know if Mr. Smith contacted any limited partners of those partnerships.

In late April 2001, Stanger contacted members of Pioneer USA's board and expressed concern regarding the pricing terms of the merger transaction. Based on Stanger's updated analysis of the new pricing terms for the merger transaction, Stanger questioned whether merger value was fair to the unaffiliated limited partners of the partnerships and the unaffiliated limited partners of the nonmanaging general partners of the partnerships from a financial point of view. After internal discussions between members of Pioneer USA's board and Stanger to discuss pricing terms which Stanger and the Pioneer USA board believed would be fair to the unaffiliated limited partners of the partnerships and the unaffiliated limited partners of the nonmanaging general partners of the partnerships from a financial point of view, the Pioneer USA board requested that Stanger meet with Pioneer Parent to discuss the issue. Stanger met with Pioneer Parent on June 15, 2001, to discuss new pricing terms that were more favorable to the partnerships.

On June 18, 2001, in follow-up discussions between Pioneer Parent, Pioneer USA and Stanger, Pioneer Parent and Pioneer USA orally agreed, subject to the approval of their respective boards, to revise the pricing terms of the merger

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

transaction as follows: (1) that the merger value for each partnership would equal the sum of the partnership's reserve value and its working capital, in each case as of March 31, 2001, less the cash distribution to be paid in July 2001 and less the partnership's pro rata share of expenses and fees to be incurred in connection with the mergers of all of the partnerships, except that Pioneer Parent will pay (A) any such expenses and fees in excess of \$2,000,000 in the aggregate and (B) a portion of such expenses and fees otherwise allocable to any nonparticipating partnership, (2) to reduce the discount rate that would be used in calculating the present value of the estimated future net revenues from 13.5% to 10%, (3) to change the composition of the payment of the merger value for each partnership from 25% in cash and 75% in shares of Pioneer Parent common stock to 100% in shares of Pioneer Parent common stock based on the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three days business days before the date of the special meeting of the partnership, and (4) to engage Williamson Petroleum Consultants, Inc. to review the estimate of each partnership's reserves and the present value of the estimated future net revenues from those estimated reserves as of March 31, 2001. The effect of the revised pricing terms was to increase the merger consideration that would be paid to each of the participating partnerships upon completion of the merger transaction.

On June 21, 2001, Pioneer Parent's board met and approved the revised pricing terms.

At a special meeting held on June 21, 2001, Pioneer USA's board continued discussions with Sayles, Lidji & Werbner and Stanger regarding the merger proposals for each partnership. Stanger also orally presented to Pioneer USA's board the status of its findings and its preliminary evaluation of the proposed transaction based on the new pricing terms for the merger transaction. Pioneer USA's board decided that it would take the approval of the merger of each partnership under advisement, so that the board members could review the written presentation materials provided by Stanger and the revised written offer to be submitted by Pioneer Parent, and agreed to convene a special meeting on June 25, 2001.

On June 22, 2001, Pioneer submitted its written offer with the revised pricing terms to Pioneer USA.

On June 25, 2001, Pioneer USA's board held a special meeting with Sayles, Lidji & Werbner and Stanger to discuss the merger proposals for each partnership and Stanger's fairness opinion. The board then unanimously approved proceeding with the merger of each partnership, subject to (1) the execution of a definitive merger agreement, (2) its receipt of Stanger's fairness opinion, and (3) its receipt of the Securities and Exchange

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In a special meeting of the board of Pioneer USA held on _____, 2001, Stanger presented its opinion dated _____, 2001, that the merger value for each partnership and the allocation of the merger value of the partnership (1) to the limited partners of the partnership as a group, (2) to the general partners of the partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the partnership, (4) to the unaffiliated limited partners of the partnership as a group and (5) to the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership as a group, is fair to the unaffiliated limited partners of the partnership and the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership, from a financial point of view. The board of Pioneer USA then unanimously determined that the merger proposals for each partnership are advisable, fair to the unaffiliated limited partners and in the unaffiliated limited partners' best interests. Accordingly, the board recommended that the unaffiliated limited partners of each partnership vote for the merger proposals. References to Pioneer USA's board's recommendation of the merger of each partnership and its finding that the merger consideration is fair from a financial point of view are stated in this preliminary document conditioned on the execution of a definitive merger agreement and its receipt of Stanger's fairness opinion, which are expected to occur when the registration statement that includes this document is declared effective under the Securities Act of 1933.

REASONS FOR THE MERGER OF EACH PARTNERSHIP

General. For all of the reasons listed below, Pioneer Parent believes that it is the party in the position to pay the highest price for the limited partnership interests of each partnership. Pioneer USA also believes that Pioneer Parent is the most likely buyer for each partnership's properties in light of:

- o Pioneer USA's operation of most of the properties;
- o Pioneer USA's extensive property holdings in the same fields; and
- o Pioneer Parent's ability to achieve efficiencies by consolidating operations with its existing operations in the same areas.

Pioneer Parent's Reasons. Pioneer Parent believes that completion of the merger of each partnership at this time is advantageous to it for the following reasons:

- o Consolidate Core Area of Operations. The Spraberry field of the Permian Basin is one of Pioneer Parent's 25 fields of focus in its strategic plan. Acquisition of each partnership's properties would help consolidate Pioneer Parent's operations in the Spraberry field and achieve operating efficiencies. Pioneer USA operates most of each partnership's wells, and Pioneer Parent has extensive properties around each partnership's properties, including interests in most of each partnership's wells.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Achieve Operating Efficiencies. Pioneer Parent expects to improve operating efficiencies with respect to the properties acquired in the merger of each partnership because it will be able to co-mingle production of oil from each participating partnership's properties with production of oil from other Pioneer Parent properties for storage, transportation and sale. Production of oil from each partnership's properties is predominantly segregated from Pioneer Parent's production of oil until sale. Gas production is currently, and will continue to be, metered, which means that it is measured and allocated based on ownership.

- o Achieve Administrative Efficiencies. Pioneer Parent will eliminate the costs, including time spent by Pioneer Parent employees, related to preparing and filing each partnership's separate tax returns, financial statements and, for each reporting partnership, reports with the SEC, as well as dealing with the concerns of approximately 29,000 record limited partners. The merger of each partnership will result in administrative efficiencies and cost reductions in the management and operation of the properties now owned by each partnership, particularly in the areas of audit, accounting and tax services, engineering services, bookkeeping, data processing, record maintenance and mailing information to the partners. Although Pioneer Parent will lose the benefit of each partnership's reimbursement for general and administrative expenses, it will be able to use the additional time of its personnel to help achieve its corporate strategic goals.

Pioneer USA's Reasons. In considering the merger of each partnership, the board of directors of Pioneer USA considered the benefits to the limited partners of each partnership set forth on page 7 as well as the following factors:

- o Maturity of Partnerships and Properties. Although each partnership's properties were long-lived at the formation of the partnership, each partnership's properties are now mature, ranging from approximately 10 to approximately 20 years old. Pioneer Parent and Pioneer USA anticipated that at some point each

-30-

41

partnership would need to be liquidated. Pioneer USA is recommending the merger transaction for each partnership at this time because:

- Pioneer USA believes that Pioneer Parent is the most likely buyer and is the only potential buyer with an offer outstanding. While third parties have made inquiries, no one except Pioneer Parent has made an offer to Pioneer USA to acquire any of the partnerships.

- Oil and gas prices have recovered from significant lows in 1998. As a result, Pioneer USA believes that Pioneer Parent's pricing

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

is higher than it would have been otherwise.

- As our production continues to decline, administrative expenses for each partnership are increasing on a per BOE produced basis. Moreover, the administrative cost of continuing to produce each partnership to depletion could be significant, especially if no buyer is available at the time each partnership is shut down.

 - As discussed below, the tax incentive for which each partnership, other than Parker & Parsley Producing Properties 87-A, Ltd., Parker & Parsley Producing Properties 87-B, Ltd. and Parker & Parsley Producing Properties 88-A, L.P., was originally formed has been realized.
- o Declining Cash Flows. As each partnership's properties have matured, the net cash flows from operations for the partnership have generally declined, except in periods of substantially increasing commodity prices. See Table 7 of Appendix A for each partnership's historical cash distributions. The marginal benefit of continuing the operations of each partnership is offset by the related administrative costs. These administrative costs consume an increasing amount, and ultimately will consume the entire amount, of the cash flows of each partnership as production declines.

 - o Tax Incentive Has Been Realized. Each partnership, other than Parker & Parsley Producing Properties 87-A, Ltd., Parker & Parsley Producing Properties 87-B, Ltd. and Parker & Parsley Producing Properties 88-A, L.P., was intended to provide to its partners federal income tax deductions for intangible drilling and development costs incurred by the partnership in the initial years of investment. Pioneer USA believes that the tax incentives have generally been realized.

 - o Partnership Tax Burdens May Now Exceed Benefits. As net cash flow available for distribution of each partnership has declined or, at times, disappeared, some limited partners of the partnership may incur greater costs to include their share of the tax information of the partnership in their returns than they receive in cash distributions. In any event, all limited partners of each partnership are expected to benefit by the elimination of the obligation to include partnership information in their tax returns for the years after the merger of each partnership in which they own interests.

 - o Each Partnership is Unable to Access Additional Capital. Pioneer Parent, through its subsidiary, Pioneer USA, has the ability, financial and otherwise, to take advantage of corporate opportunities to expand its reserve base through acquisitions. None of the partnerships has the ability to raise capital for reserve acquisitions. The partnership agreements of the partnerships do not authorize the partnerships to raise additional capital, whether debt or equity. Even if the partnership agreement of each partnership is amended to authorize additional capital, Pioneer Parent does not believe that the limited partners of the partnership would desire to contribute additional capital or to apply all cash flow to debt service, while remaining taxable on the related income.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Fairness of Procedures. Pioneer USA considered the following factors in making its recommendation that the unaffiliated limited partners vote for the merger proposals for each partnership in which they own interests:
 - None of the partnerships has any employees or directors, and all of Pioneer USA's directors are officers of Pioneer USA and of Pioneer Parent. As a result, there has been no approval by directors who are not Pioneer Parent employees.
 - Pioneer USA did not retain an unaffiliated representative to act solely on behalf of the unaffiliated limited partners of each partnership for purposes of negotiating the terms of the merger of the partnership or preparing a report concerning the fairness of the merger of the partnership.
 - Since Pioneer USA is entitled to vote its limited partnership interests other than as described below, the transaction is not structured so that the approval of at least a majority of unaffiliated limited partnership interests is required. Pioneer USA intends to vote in favor of the transaction for the partnership interests it holds as a limited partner of each partnership as permitted by the partnership agreement of each partnership except in the following partnerships where the partnership agreement does not allow Pioneer USA to vote on the proposed transaction:

-31-

42

Parker & Parsley 85-A, Ltd.
Parker & Parsley 85-B, Ltd.
Parker & Parsley Private Investment 85-A, Ltd
Parker & Parsley Selected 85 Private Investment, Ltd
Parker & Parsley Private Investment 86, Ltd.
Parker & Parsley 91-A, L.P.
Parker & Parsley 91-B, L.P.

Despite the foregoing factors, Pioneer USA believes each merger is procedurally fair to the unaffiliated limited partners of each partnership because:

- Pioneer USA has been willing to consider any offer from third parties to purchase any partnership or the assets of any partnership since September 8, 1999, and will continue to do so through August 1, 2001; and
- Pioneer Parent does not directly own any partnership interests in the partnerships. Pioneer Parent beneficially owns all of Pioneer USA's partnership interests in the partnerships. Pioneer USA does not beneficially own more than 5% of the outstanding limited partnership interests in any partnership, except Parker & Parsley 81-I, Ltd., Parker & Parsley 82-I, Ltd. and Parker & Parsley

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

82-III, Ltd. In those partnerships, Pioneer USA repurchased and now owns partnership interests representing the following beneficial ownership percentages:

Parker & Parsley 81-I, Ltd.	5.84%
Parker & Parsley 82-1, Ltd.	10.73%
Parker & Parsley 82-III, Ltd.	5.97%

Except as set forth above, none of Pioneer Parent, Pioneer USA, or, to the knowledge of Pioneer USA, any of their directors or executive officers, or any associate or subsidiary of Pioneer Parent, Pioneer USA beneficially owns any partnership interests of any partnership. As a result, Pioneer USA believes that neither it nor its affiliates have a meaningful voting percentage for any partnership, other than Parker & Parsley 81-I, Ltd., Parker & Parsley 82-I, Ltd. and Parker & Parsley 82-III, Ltd. See "Ownership of Partnership Interests" on page 64 of this document and Table 6 of Appendix A to this document.

- o Fairness of Transaction. Pioneer USA's board of directors determined that the merger of each partnership is advisable, fair to the unaffiliated limited partners of the partnership and in their best interests. In reaching this determination for each partnership, Pioneer USA's board of directors considered the following factors:
 - The form and amount of consideration offered to the partners of the partnership;
 - The objectives of the merger of the partnership, including providing liquidity to the partners;
 - Pioneer USA's right to consider third party offers;
 - The current market prices for oil and gas, including the increase in market prices, and the subsequent increase in merger value for the partnership, since the merger transaction was initially proposed in 1999;
 - The historical market prices for oil and gas;
 - The net book value, going concern value and liquidation value of the partnership;
 - The purchase prices paid in previous repurchases by Pioneer USA;
 - The trading price of limited partnership interests in secondary market transactions
 - The analysis of alternative transactions to the proposed merger of each partnership; and
 - The fairness opinion of Stanger, including the analyses conducted by Stanger in rendering the fairness opinion.

RECOMMENDATION OF PIONEER USA

On _____, 2001, Pioneer USA's board of directors unanimously

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

determined that the merger of each partnership is advisable, fair to the unaffiliated limited partners of the partnership, and in their best interests. PIONEER USA'S

-32-

43

BOARD OF DIRECTORS RECOMMENDS THAT THE UNAFFILIATED LIMITED PARTNERS VOTE FOR THE MERGER PROPOSALS FOR EACH PARTNERSHIP IN WHICH THEY OWN INTERESTS.

In making this recommendation, Pioneer USA's board of directors considered a number of factors, including (1) the reasons for the merger of each partnership set forth above in "Special Factors -- Reasons for the Merger of Each Partnership," such as the fairness opinion and analyses conducted by Stanger, and (2) the matters described under "Risk Factors" beginning on page 17 of this document, such as its conflicting interests. Pioneer USA's board of directors also considered the likelihood, benefits and costs of other transactions, including possible third party offers. Pioneer USA will consider any offers from third parties to purchase any partnership or its assets. See "The Merger of Each Partnership -- Third Party Offers" on page 52 of this document for a description of the procedures for these offers. In view of the numerous factors taken into consideration, Pioneer USA's board of directors did not consider it practical to, and did not attempt to, quantify or assign relative weights to the factors considered by it in reaching its decision to recommend the merger of each partnership. Rather, the board viewed its position and recommendation as being based on the total information presented to and considered by the board.

FAIRNESS OPINION

Pioneer USA, on behalf of each partnership, engaged Robert A. Stanger & Co., Inc., an independent financial advisory firm, to conduct an independent review and deliver a written opinion in connection with the merger of each partnership that the merger value for each partnership and the allocation of the merger value of the partnership (1) to the limited partners of the partnership as a group, (2) to the general partners of the partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the partnership, (4) to the unaffiliated limited partners of the partnership as a group and (5) to the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership as a group, is fair to the unaffiliated limited partners of the partnership and the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership, from a financial point of view. The full text of Stanger's fairness opinion is attached as Appendix D to this document and is incorporated into this document by reference. Limited partners of each partnership are urged to read the opinion in its entirety. This summary of Stanger's fairness opinion is qualified in its entirety by reference to the full text of the opinion. Stanger has advised us that arriving at a fairness opinion is a complex analytical process not necessarily susceptible to partial analysis or amenable to summary description. For a more complete description of the assumptions and qualifications to the fairness opinion see "Qualifications to Fairness Opinion" beginning below on this page and "Assumptions" on page 39.

Except for assumptions which Pioneer USA advised Stanger would be reasonable and appropriate in its view, neither Pioneer USA nor any partnership imposed any conditions or limitations on the scope of the investigation by Stanger or the methods and procedures to be followed by Stanger in rendering the fairness opinion. In addition, each partnership has agreed to indemnify Stanger against some liabilities arising out of Stanger's engagement to prepare and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

deliver its opinion upon consummation of the merger of the partnership, and such indemnification obligations will become obligations of Pioneer USA.

Experience of Stanger. Since its founding in 1978, Stanger has provided information, research, investment banking and consulting services to clients located throughout the United States, including major New York Stock Exchange member firms and insurance companies and over seventy companies engaged in the management and operation of partnerships. The investment banking activities of Stanger include financial advisory and fairness opinion services, asset and securities valuations, industry and company research and analysis, litigation support and expert witness services, and due diligence investigations in connection with both publicly registered and privately placed securities transactions.

Stanger was selected because of its experience in the valuation of businesses and their securities in connection with mergers, acquisitions, reorganizations and for estate, tax, corporate and other purposes, including the valuation of partnerships, partnership securities and the assets typically held through partnerships including oil and gas assets. Pioneer USA has previously engaged Stanger to provide financial advisory services in connection with proposed transactions between one or more of the partnerships and Pioneer Parent which were never consummated.

Qualifications to Fairness Opinion. In the fairness opinion, Stanger specifically states that it was not requested to, and did not:

- o make any recommendations to Pioneer USA, any partnership or the limited partners of any partnership with respect to whether to approve or reject the merger of any partnership;
- o determine or negotiate the amount or form of the merger value for any partnership to be paid for limited partners' interests in the merger of the partnership;
- o offer the assets of any partnership for sale to any third party;
- o express any opinion as to:

-33-

44

- the impact on Pioneer USA or the limited partners of any partnership that does not participate in the proposed merger transaction;
- the tax consequences of the merger of any partnership for Pioneer USA, the nonmanaging general partner, if any, of the partnership or the limited partners of the partnership;
- Pioneer USA's or Pioneer Parent's ability to finance their obligations under the merger agreement or the impact of a failure to obtain financing on the financial performance of Pioneer USA, Pioneer Parent or any partnership;
- Pioneer USA's decision to estimate the reserve value of the oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and gas reserves of each partnership based upon the continued operation of the properties by Pioneer USA and the payment of overhead charges in accordance with existing operating agreements or the impact, if any, on the estimated value of each partnership's oil and gas reserves if Pioneer Parent and Pioneer USA determined to offer or operate the assets subject to revised operating agreements;

- whether or not alternative methods of determining the merger value for each partnership would have also provided fair results or results substantially similar to the methodology used;
- alternatives to the merger of each partnership, including the offering of such assets for sale to third party buyers;
- the trading price of shares of Pioneer Parent common stock immediately following the closing of the merger of each partnership and the distribution of shares of Pioneer Parent common stock in connection with the merger of each partnership;
- the fairness of the termination of the repurchase obligations of Pioneer USA with respect to some partnerships, which repurchase obligations require Pioneer USA to offer to repurchase limited partnership interests annually based upon a formula which in some circumstances, including the repurchase offers based upon December 31, 2000 oil and gas prices, result in repurchase offer prices above the market value for the reserves of any such partnership; or
- any other terms of the merger of any partnership.

Summary of Material Considered and Investigation Undertaken. Stanger's analysis of the merger of each partnership involved a review of the following information:

- o a draft of this preliminary document;
- o a draft of the merger agreement which Pioneer USA has indicated is substantially the form which will be executed in connection with the merger of each partnership;
- o financial statements of each partnership, including, if applicable, the partnership's Form 10-Q and Form 10-K, for the three months ended March 31, 2001 and for the years ended December 31, 2000, 1999 and 1998;
- o the reserve reports prepared by Pioneer Parent and Pioneer USA and the review by Williamson Petroleum Consultants, Inc., as of March 31, 2001, relating to the reserves of each partnership;
- o calculations prepared by Pioneer Parent and Pioneer USA of the merger value per \$1,000 of limited partner investment in each partnership;

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Pioneer USA's analysis of other alternatives to the merger of each partnership, including going concern value, liquidation value, royalty trust and production payment;
- o estimates prepared by Pioneer Parent and Pioneer USA of the merger value, going concern value and liquidation value per \$1,000 of limited partner investment in each partnership;
- o the financial statements of Pioneer Parent included in its Form 10-Q for the three months ended March 31, 2001 and its Form 10-K for the years ended December 31, 2000, 1999 and 1998;
- o pro forma financial data for Pioneer Parent assuming the completion of the proposed merger transaction; and
- o recent trading activity in shares of Pioneer Parent common stock.

-34-

45

In the course of its analysis, Stanger conducted interviews of senior management personnel of Pioneer USA. During such interviews, Stanger and the senior management personnel reviewed the status of the merger of each partnership, the reserve pricing and related value estimates, the estimated timing of the merger of each partnership and other matters.

Stanger reviewed estimates of the merger value, going-concern value, and liquidation value prepared by Pioneer USA with respect to each partnership. In addition, Stanger reviewed secondary market prices, as tracked by Stanger, for limited partnership interests in each partnership along with tender offers received by limited partners as derived from data provided by Pioneer USA. Stanger's analysis is summarized below.

Review of Merger Value for Each Partnership. Stanger reviewed the calculation of the merger value for each partnership prepared by Pioneer USA. Stanger observed that such calculation includes the reserve value, as described below, and other current assets as of March 31, 2001, as reduced by other current liabilities as of March 31, 2001, less the partnership's pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the partnership to its partners. Stanger reviewed the balance sheet of each partnership as of March 31, 2001 as prepared by Pioneer USA, and reconciled the current assets and current liabilities on such financial statements to the balances included in the merger value calculation for each partnership.

Stanger reviewed the summary reserve reports for each partnership prepared

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

by Pioneer Parent and Pioneer USA as reviewed by Williamson Petroleum Consultants, Inc. as of March 31, 2001. Stanger noted that the summary reserve report was prepared based upon the following pricing case: (1) a five-year NYMEX futures price for oil and gas as of March 30, 2001, with prices held constant after year five at the year five price and (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes. For 2001, the oil and gas prices were based on the average NYMEX futures price for the nine-month period beginning on April 1, 2001 and ending December 31, 2001. The standard industry adjustments reflect oil quality, BTU content, oil and gas gathering and transportation costs, and gas processing costs and shrinkage.

Stanger further observed that the summary reserve report utilized a discount rate of 10.0% and resulted in a per barrel of oil equivalent, or BOE, value of the reserves for each of the partnerships ranging from \$3.53 to \$4.61. Stanger observed that such BOE values are low by general industry averages. However, Stanger observed that such properties are long-lived, generally low-volume properties, not operated by any of the partnerships, and are subject to overhead charges by the operator, Pioneer USA. In the course of its engagement, Stanger reviewed selected comparable transactions in the BOE value range described above for long-lived, generally low-volume properties. Such transactions, including some transactions involving other Pioneer USA affiliates, provided a range of value per BOE of \$2.97 to 5.08 and an average of \$4.00.

Stanger, in connection with its engagement, interviewed acquisitions personnel at seven oil and gas companies regarding targeted pricing case ranges and discount rate ranges in order to assess the reasonableness of the pricing case and discount rates utilized to establish the reserve value for the partnerships. With respect to the pricing case ranges, Stanger observed a low pricing case range pursuant to the survey of \$22 per barrel of oil and \$3.50 per Mcf of gas, held flat for the life of the reserves to a high pricing case range of NYMEX strip pricing (plus \$2 per barrel of oil) and NYMEX strip pricing for gas, held flat after five years for the life of the reserves. With respect to discount rates, Stanger observed a range of discount rates from a low of 9% to 13% applied generally to a low range pricing case to a high range of 15% to 20%, applied generally to a high range pricing case. Stanger concluded that the pricing case and discount rates utilized to establish the merger value for each partnership fall within the ranges established in interviews with acquisition professionals.

Going Concern Value. Stanger reviewed the going concern value calculation prepared for each partnership by Pioneer USA. The going concern value was based upon:

- o The sum of (1) the estimated net cash flow from sale of the reserves during a 10-year operating period and (2) the estimated residual value from the sale of the remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation; less
- o Partnership level general and administrative expenses, calculated as follows and, consistent with the calculation of 2000 and 1999 expenses, generally representing the maximum expense percentages permitted under the partnership agreements:

- The partnership agreement for each of Parker & Parsley 81-I, Ltd., Parker & Parsley 81-II, Ltd., Parker & Parsley 82-I, Ltd., Parker & Parsley 82-II, Ltd. and Parker & Parsley 82-III, Ltd. permits Pioneer USA to allocate to the partnership (1) general and administrative expenses and (2) all expenses directly attributable to the partnership as a result of fees or charges by parties other than Pioneer USA or its affiliates, including legal, auditing and engineering fees. However, for purposes of clause (1) and for administrative ease and to the benefit of each of those partnerships, Pioneer USA allocates to each of those partnerships general and administrative expenses based on 3% of the revenues of the partnership.

-35-

46

- The partnership agreement for each of Parker & Parsley 83-A, Ltd. and Parker & Parsley 83-B, Ltd. permits Pioneer USA to allocate to the partnership (1) general and administrative expenses in an annual amount not to exceed the sum of 2% of the initial partner capital for the partnership and 2.25% of the drilling and completion expenses, of which there are none, and (2) all expenses directly attributable to the partnership as a result of fees or charges by parties other than Pioneer USA or its affiliates, including legal, auditing and engineering fees. However, for purposes of clause (1) and for administrative ease and to the benefit of each of those partnerships, Pioneer USA allocates to each of those partnerships general and administrative expenses based on 3% of the revenues of the partnership.
- The partnership agreement for Parker & Parsley 84-A, Ltd. permits Pioneer USA to allocate to the partnership (1) general and administrative expenses in an annual amount not to exceed the sum of 3.25% of the revenues of the partnership and 2.25% of the drilling and completion expenses, of which there are none, and (2) all expenses directly attributable to the partnership as a result of fees or charges by parties other than Pioneer USA or its affiliates, including legal, auditing and engineering fees. However, for purposes of clause (1) and for administrative ease and to the benefit of the partnership, Pioneer USA allocates to the partnership general and administrative expenses based on 3% of the revenues of the partnership.
- The partnership agreement for each of the following partnerships permits Pioneer USA to allocate to the partnership general and administrative expenses, including all expenses directly attributable to the partnership as a result of fees or charges by parties other than Pioneer USA or its affiliates, such as legal, auditing and engineering fees, in an annual amount not to exceed 2% of the revenues of the partnership.

Stanger observed that the going concern value of each partnership was adjusted for the March 31, 2001 working capital balance less the distribution to be mailed on or about July 12, 2001 and that such going concern value ranged from 4.6% to 10.0% less than the merger value for each partnership. See the supplemental information table on the second page of the supplement for each partnership for its merger value and its going concern value, in each case per \$1,000 limited partner investment.

Liquidation Value. Stanger reviewed the liquidation value calculation prepared for each partnership by Pioneer USA. Such liquidation value was based upon the sale of the reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the estimated expenses and fees of the mergers of all of the partnerships and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of each partnership and the legal and other closing costs associated with such transaction. Stanger observed that such merger expenses are intended to reflect Pioneer USA's estimate of the cost associated with brokers' commissions on asset sales and the additional wind-down costs of the partnership. Stanger observed that the liquidation value for each partnership ranged from 2.7% to 3.0% less than the merger value for each partnership. See the supplemental information table on the second page of the supplement for each partnership for its merger value and its liquidation value, in each case per \$1,000 limited partner investment.

Secondary Market Prices. To determine the most up-to-date secondary market prices, Stanger reviewed the secondary market prices for units of limited partnership interests in each of the partnerships during the 12 months ended April 30, 2001, collected from data maintained on partnerships by Stanger. Stanger observed that secondary market transactions were reported for 25 of the partnerships during such period. Stanger observed that for all partnerships except Parker & Parsley 81-II, Ltd. and Parker & Parsley Producing Properties 87-A, Ltd., the weighted average secondary market price on a per \$1,000 original investment basis was less than the merger value per \$1,000 original investment. For such other partnerships, the range of discount to the merger value per \$1,000 investment was 5.2% to 52.7%, averaging 27.7%. For Parker & Parsley 81-II, Ltd., Stanger observed that only one transaction involving \$35,000 of original investment (7 units) was at a price in excess of the merger value. For Parker & Parsley Producing Properties 87-A, Ltd., Stanger observed that only one transaction involving \$10,000 of original investment (20 units) was at a price in excess of the merger value per \$1,000 of original investment. All other secondary market transactions for Parker & Parsley Producing Properties 87-A, Ltd. were reported at prices below the merger value. Stanger also observed secondary market transactions at prices in excess of the merger value for one additional partnership. Secondary market firms reported a single transaction during the twelve months ended April 30, 2001 for Parker & Parsley 82-II, Ltd.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

at a price in excess of merger value. All other transactions reported for such partnerships were at amounts less than the merger value during the twelve months ended April 30, 2001.

Stanger also reviewed the secondary market data obtained by Pioneer USA from Partnership Spectrum and included in Table 15 of Appendix A to this document. Stanger observed that such data included partnerships which reported a secondary market transaction price in excess of the high-end transaction price Stanger observed in its data. In all cases, such high-end range was lower than the merger value.

Prices in the secondary market are based on market prices at the time of the secondary market transaction, which prices may be lower than prices prevailing at March 30, 2001 or as of the date of mailing this document.

Selected Tender Offers. Stanger observed that Pioneer USA reported unsolicited tender offers from unaffiliated third parties for less than 5% of the interests in the following partnerships during the period June 1998 through June

-37-

48

2001. Stanger observed that the tender offers and related merger value per limited partnership interest for each of those partnerships were as follows:

PARTNERSHIP	MERGER VALUE (PER \$1,000 INVESTMENT)	TENDER OFFER (PER \$1,000 INVESTMENT)
Parker & Parsley 82-II, Ltd.	\$101.61	\$13.75
Parker & Parsley 82-III, Ltd.	121.72	26.25
Parker & Parsley 83-A, Ltd. (a)	141.43	40.00 to 70.00
Parker & Parsley 83-B, Ltd. (a)	154.41	50.00 to 55.00
Parker & Parsley 84-A, Ltd.	201.43	60.00
Parker & Parsley 86-A, Ltd.	177.09	40.00
Parker & Parsley 86-B, Ltd.	224.17	115.00
Parker & Parsley 86-C, Ltd. (a)	161.23	65.00 to 67.50
Parker & Parsley 87-A, Ltd. (a)	190.81	90.00 to 105.00
Parker & Parsley 87-B, Ltd. (a)	201.38	60.00 to 65.00
Parker & Parsley 88-A, L.P.	245.95	80.00
Parker & Parsley 88-B, L.P.	321.02	50.00
Parker & Parsley Private Investment 89, L.P.	270.69	162.50
Parker & Parsley 90-B, L.P. (a)	265.39	102.50 to 160.00
Parker & Parsley 90-C, L.P. (a)	243.26	30.00 to 40.00
Parker & Parsley 90 Spraberry Private Dev., L.P.	288.51	162.50

(a) More than one tender offer for partnership interests was made. Amounts

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

shown represent the range of tender offer prices.

Stanger observed that the above tender offers represent a discount to the merger value for each of those partnerships of 39.7% to 87.7%. Stanger also observed that tender offers for limited partnership securities are generally at prices which represent a substantial discount to the underlying value of the assets held by such partnerships. Furthermore, the tender offer prices are based on oil prices prevailing at the time of the tender offer, which prices may have been lower than oil prices prevailing at March 30, 2001 or as of the date of mailing this document.

Repurchase Offers. Stanger observed that for each of the six partnerships listed below, which Stanger calls the repurchase partnerships, Pioneer USA is required under the partnership agreement for the partnership to offer to repurchase units of limited partnership interests in the partnership annually at a formula price based upon the December 31 year end reserve report. Stanger observed that the repurchase offer pricing at December 31, 2000 tends to overstate the value of units of the repurchase partnerships due primarily to the oil and gas prices in effect on such date and the effect of such pricing on the cash flows and recoverable reserves. Stanger observed that the repurchase offers for 2000 for the repurchase partnerships are at premiums to the merger value ranging from 25.5% to 68.5% as follows:

	PER \$1,000 ORIGINAL INVESTMENT		
	MERCER VALUE	REPURCHASE OFFER	PREMIUM
Parker & Parsley 82-I, Ltd.	\$ 80.06	\$137.97	72.3%
Parker & Parsley 82-II, Ltd.	101.61	133.72	31.6%
Parker & Parsley 82-III, Ltd.	121.72	150.59	23.7%
Parker & Parsley 83-A, Ltd.	141.43	196.67	39.1%
Parker & Parsley 83-B, Ltd.	154.41	210.15	36.1%
Parker & Parsley 84-A, Ltd.	201.43	267.03	32.6%

Stanger observed that the repurchase rights may be exercised only once a year and that a limited partner may exercise its repurchase right by delivering a written request to Pioneer USA no later than March 31 of each year. Pioneer USA advised Stanger that on or before May 31 of each year, Pioneer USA must notify each limited partner who has exercised its repurchase right of the amount of limited partnership interests to be repurchased and the method of calculating the repurchase price. Pioneer USA advised Stanger that the aggregate amount of limited partnership interests required to be repurchased in any one year is limited to \$100,000 per partnership. A repurchase price is calculated by multiplying:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o the present value of the estimated future net revenues, calculated using a discount rate equal to prime plus 1% as of December 31 of each year, from a partnership's estimated reserves, as determined by independent petroleum consultants; by

- o 66 2/3%.

Stanger advised that each limited partner who has exercised its repurchase right has 60 days to accept Pioneer USA's repurchase offer and that Pioneer USA must pay the repurchase price to each limited partner who accepts the repurchase offer within 30 days after acceptance.

Stanger further advised Pioneer USA and each repurchase partnership that no adjustment was made to the merger value offered to the repurchase partnership to reflect the repurchase offer obligation and Stanger's opinion does not include an opinion as to the fairness of the termination of Pioneer USA's repurchase obligation.

Assumptions. Pioneer Parent and Pioneer USA advised Stanger that the oil and gas properties owned by each partnership are subject to operating agreements with Pioneer USA and that:

- o such operating agreements provide for the payment of overhead charges and that such charges are reasonable compared with amounts charged for similar services by third party operators;
- o except for cause, such operating agreements do not provide for the termination of Pioneer USA as operator; and
- o such operating agreements do not provide for the revision of the overhead charges, except as escalated under the terms of such operating agreements.

Furthermore, Pioneer Parent and Pioneer USA advised Stanger that if each partnership's reserves were offered for sale to a third party, a condition of such sale would be that the oil and gas reserves would continue to be subject to the operating agreements with Pioneer USA which provide for the payment of overhead charges, and that it would be appropriate to assume, when estimating the value of such reserves, that such charges would continue.

In addition, Pioneer Parent and Pioneer USA advised Stanger that the reserve value and working capital balance of each partnership has been properly allocated between the general partners and the limited partners of each partnership in accordance with the partnership agreement with respect to a liquidation.

Stanger did not conduct any engineering studies and has relied on estimates of Pioneer Parent and Pioneer USA with respect to oil and gas reserve volumes,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

prices, operating costs and overhead charges with respect to the reserve value estimates. Furthermore, Stanger has relied upon the review by Williamson of the summary reserve reports as of March 31, 2001.

Stanger also relied on the assurance of Pioneer Parent, Pioneer USA and each partnership that:

- o the summary reserve report reviewed by Williamson Petroleum Consultants, Inc. as of March 31, 2001, and provided to Stanger was in the judgment of Pioneer USA and each partnership reasonably prepared on bases consistent with actual historical experience and reflect their best currently available estimates and good faith judgments;
- o there are no estimates of costs to remediate environmental conditions included in the reserve analysis;
- o any historical financial data, balance sheet data, merger value analyses, going concern value analyses and liquidation value analyses are accurate and complete in all material respects;
- o all allocations included in the calculations of merger values, going concern values and liquidation values have been made in accordance with the partnership agreement of each partnership;
- o no material changes have occurred in the information reviewed or in the value of the oil and gas reserves or working capital balances of each partnership between the date the information was provided to Stanger and the date of Stanger's opinion;
- o the relative ownership interests of (1) the limited partners of each partnership, (2) the unaffiliated limited partners of each partnership, (3) the general partners of each partnership, (4) the unaffiliated limited partners of the nonmanaging general partner, if any, of each partnership and (5) Pioneer USA, as the managing or sole general partner of each partnership, is accurately included in accordance with the partnership agreement for each partnership in the analyses provided to Stanger by Pioneer USA;

-39-

50

- o neither Pioneer Parent or any of its affiliates has during the thirty days prior to the date hereof commenced or continued a share repurchase program or similar transaction which could affect the price of shares of Pioneer Parent common stock to be used in the proposed merger transaction; and
- o Pioneer Parent, Pioneer USA and each partnership are not aware of any information or facts regarding the partnership, the oil and gas properties, the reserve analysis or the working capital balances of the partnership that would cause the information supplied to Stanger to be incomplete or misleading in any material respect.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Stanger's opinion is based upon business, economic, oil and gas market and other conditions as of the date of its analysis and addresses the merger value for each partnership in the context of information available as of the date of Stanger's analysis. Events occurring after the date of Stanger's analysis could affect the value of the assets of each partnership or the assumptions used in the preparation of Stanger's fairness opinion.

Conclusions. Stanger concluded that, based upon and subject to its analysis, assumptions, limitations and qualifications cited in its opinion, and as of the date of the fairness opinion, the merger value for each partnership and the allocation of the merger value of the partnership (1) to the limited partners of the partnership as a group, (2) to the general partners of the partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the partnership, (4) to the unaffiliated limited partners of the partnership as a group and (5) to the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership as a group, is fair to the unaffiliated limited partners of the partnership and the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership, from a financial point of view.

Compensation and Material Relationships. Stanger has been paid a total fee of \$350,000 in connection with the rendering of the fairness opinion. Such fee was not conditioned on Stanger's findings and is payable whether or not the merger of each partnership is consummated. In addition, Stanger will be reimbursed for all reasonable out-of-pocket expenses, including legal fees, and will be indemnified against some liabilities, including some liabilities under the securities laws. To the extent that such indemnification includes liabilities arising under the federal securities laws, it may not be enforceable as it may be determined to be against public policy.

During the past two years, Pioneer USA engaged Stanger to render financial advisory services in connection with proposed transactions which were withdrawn and never consummated. In connection with such assignments Stanger was paid fees aggregating \$175,000.

SUMMARY RESERVE REPORT

Pioneer USA engaged Williamson Petroleum Consultants, Inc., an independent petroleum engineering consulting firm based in Midland, Texas, to review a summary reserve report of the property interests of each of the partnerships as of March 31, 2001. THE FULL TEXT OF THE REVIEW OF THE SUMMARY RESERVE REPORT BY WILLIAMSON PETROLEUM CONSULTANTS, INC. EFFECTIVE AS OF MARCH 31, 2001, IS ATTACHED AS APPENDIX B. WE ENCOURAGE YOU TO READ IT CAREFULLY IN ITS ENTIRETY.

Qualifications and Method of Selection. Williamson is engaged solely in the business of petroleum evaluation and engineering studies for public and private oil and gas companies. Williamson is widely recognized in its field. Williamson is an independent consulting firm as provided in the Standards Pertaining to the Estimating and Auditing of Oil and Gas Reserves Information promulgated by the Society of Petroleum Engineers.

Pioneer USA engaged Williamson based upon Pioneer USA's assessment of their professional reputations and qualifications, capabilities, experience and responsiveness. In addition, Williamson is the independent petroleum engineering firm most familiar with the properties in which each partnership has interests and has prepared the annual independent reserve report for each partnership's reserves since the inception of each partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Summary of Procedures, Scope and Findings. Williamson reviewed the calculations of the estimated total net estimated reserves for each partnership and the present value of the estimated future net revenues from the estimated reserves for each partnership as of March 31, 2001, based on the following parameters provided by Pioneer USA: (1) a five-year NYMEX futures price for oil and gas as of March 30, 2001 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 10.0% discount rate. For 2001, the oil and gas prices were based on the average NYMEX futures price for the nine-month period beginning on April 1, 2001 and ending December 31, 2001. Williamson's estimated total net estimated reserves and the present value of the estimated future net revenues from the estimated reserves for each partnership are set forth in the exhibits to the summary reserve report attached as Appendix B to this document.

Pioneer Parent determined the amount of Pioneer Parent common stock to be offered. Williamson did not opine on the fairness of the transaction.

-40-

51

In preparing its summary reserve report, Williamson assumed the accuracy and completeness of all information provided by Pioneer USA or information which was publicly available and did not attempt to independently verify such information. Williamson did not make field inspections or judgments relative to environmental or other legal liabilities. Except as described in this document, Pioneer USA did not instruct Williamson as to the pricing, cost or other economic parameters or methods or the assessment of reserves characteristics, nor did it limit the scope of Williamson's investigation for purposes of preparing its summary reserve report.

Pioneer USA provided Williamson with all evaluation data with respect to interests, reversionary status, oil and gas prices, gas categories, gas contract terms, operating expenses, investments, salvage values, abandonment costs, net profit interests, well information and current operating conditions for Williamson's use in determining each partnership's reserves. Williamson used production data provided by Pioneer USA, and where information was not provided by Pioneer USA, Williamson used production data from public records. Williamson prepared its own reserve estimates of the property interests.

Prior Material Relationships. Williamson has estimated total proved reserves and the present value of estimated future revenues from those reserves for each of the partnerships since their respective inceptions. In addition, Pioneer USA engaged Williamson to prepare a summary reserve report in connection with a proposed transaction in 1999, similar to the one described in this document, which was withdrawn and never consummated. Pioneer USA and its affiliates have paid \$112,700 over the past two years to Williamson. Neither Williamson nor any of its personnel has any direct or indirect interest in Pioneer USA or any of the partnerships, and Williamson's compensation is not contingent upon the results of its summary reserve report.

ALTERNATIVE TRANSACTIONS TO THE MERGER OF EACH PARTNERSHIP

We considered the following alternative types of transactions before

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

selecting the merger transaction described in this document. As discussed below, we believe that the merger of each partnership is the best available alternative for each partnership to maximize the consideration to the limited partners.

Comparison of the Merger of Each Partnership to Continuing Operations. Because each partnership's properties are mature, producing properties, we believe that production from those properties will continue to decline at the rate predicted in the partnership's oil and gas engineering reserve reports. Accordingly, cash distributions from each partnership will also decline, subject to variation for changes in oil and gas prices. The marginal benefit of continuing operations of each partnership is offset by the general and administrative costs related to continuing operations. See "Special Factors -- Reasons for the Merger of Each Partnership" beginning on page 29 of this document.

We also believe there is a substantial advantage in receiving the liquidating distribution at present in the form of Pioneer Parent common stock, rather than continuing to receive decreasing levels of cash distributions over a long period of time. We believe that the reserve value included in the merger value for each partnership is higher than the net present value of estimated future cash distributions to the limited partners from continued operations because the reserve value has not been reduced for the reimbursement of Pioneer USA's general and administrative expenses allocable to the partnership. In addition, although future oil and gas prices could be higher than the prices on March 30, 2001 which were used in calculating the merger value for each partnership, continued operations over a long period of time subject the limited partners of each partnership to the risk of receiving lower levels of cash distributions if oil and gas prices over this period are lower on average than those used in preparing the estimates of cash distributions from continued operations. Continued operations also subject the limited partners of each partnership to possible changes in costs or need for workover or similar significant remedial work on each partnership's properties. In contrast, the Pioneer Parent common stock is a liquid tradeable security which can be sold and redeployed in other investments. The Pioneer Parent common stock provides the limited partners of each partnership the opportunity to participate in a larger entity having more diversified producing reserves and other oil and gas properties, with the resulting spreading of risks.

We expect that any nonparticipating partnership will continue operations and will produce its reserves until depletion with steadily decreasing rates of cash flow and, as a result, decreasing cash distributions.

Comparison of the Merger of Each Partnership to Master Limited Partnership. We considered accomplishing the consolidation of each partnership through a master limited partnership, pursuant to which the partnership interests of the limited partners of the partnership would be exchanged for interests in the master limited partnership. However, we believe each partnership's oil and gas properties are not of sufficient size, individually or in the aggregate with the other partnerships, to attract new capital through a master limited partnership. In addition, the partnership interests in a master limited partnership might not be traded on a national stock exchange or in any other significant market. Some master limited partnership interests might be sold from time to time in private or over-the-counter transactions, but the prices would likely reflect a discount for illiquidity. As a result, we believe a master limited partnership would not provide the limited partners with immediate and complete liquidity for their investment in each partnership. Finally, a master limited partnership would still be burdened with general and administrative expenses, which would reduce any cash distributions paid to the partners of the master limited

partnership. The merger value for each partnership reflects a liquidation value and has not been reduced for any reimbursement of Pioneer USA's general and administrative expenses allocable to the partnership.

Comparison of the Merger of Each Partnership to Royalty Trust. We also considered a royalty trust, pursuant to which the partnership interests of each partnership would be exchanged for beneficial ownership interests in the trust. Like the master limited partnership alternative discussed above, we believe each partnership's oil and gas properties are not of sufficient size, individually or in the aggregate with the other partnerships, to attract new capital through a royalty trust. In addition, the beneficial ownership interests in a royalty trust might not be publicly traded in a significant market. As a result, this alternative was not selected because we believe it would not result in immediate and complete liquidity for the limited partners' investments in any partnership. Finally, a royalty trust would still be burdened with general and administrative expenses, which would reduce any cash distributions paid to the beneficiaries of the royalty trust. The merger value for each partnership reflects a liquidation value and has not been reduced for any reimbursement of Pioneer USA's general and administrative expenses allocable to the partnership.

Comparison of the Merger of Each Partnership to Production Payment. We also considered whether each partnership would benefit from attempting to sell a production payment against its future oil and gas production in exchange for cash. Like the master limited partnership and royalty trust alternatives discussed above, we believe each partnership's oil and gas properties are not of a sufficient size, individually or in the aggregate with the other partnerships, to attract new capital from lenders or investors. In addition, lenders or investors that provide production payment alternatives will not advance funds against 100% of future oil and gas production, and typically limit any production payment transaction to less than 70% of estimated future oil and gas production. As a result, this alternative was not selected because we believe it would not provide the limited partners with immediate and complete liquidity for their investment in each partnership. Even with a production payment transaction, each partnership would continue to be burdened with general and administrative expenses which would reduce any cash distributions paid to the limited partners. The merger value for each partnership reflects a liquidation value and has not been reduced for any reimbursement of Pioneer USA's general and administrative expenses allocable to the partnership.

Comparison of the Merger of Each Partnership to Negotiated Sale. We also considered whether each partnership would benefit from attempting to sell its property interests in negotiated transactions. Buyers would be purchasing the partnership's property interests which they would neither control nor operate. A portion of the properties in which each partnership owns interests would continue to be operated by Pioneer USA because Pioneer USA controls other interests in fields in which the partnership's properties are located. Because of Pioneer USA's control of such properties, Pioneer Parent and Pioneer USA believe Pioneer Parent is the party in the position to pay the highest price for such interests and the one most likely to do so. In contrast, Pioneer USA's control of such properties could negatively affect the amount a third party is willing to pay and the overall interest of third parties in buying such

properties.

In addition, sale of each partnership's properties on a direct basis often involves substantial periods of time for due diligence, negotiation and execution of agreements and closings, often with different purchasers for different properties. Satisfying due diligence requests requires large amounts of time to create and supervise data rooms or disseminate data to possible purchasers, plus the time needed to deal directly with multiple prospective purchasers. Furthermore, some issues, such as environmental and title matters, may come to light in the late stages of a negotiated sale, which may delay or preclude the consummation of the sale.

The transaction costs for offering properties in a negotiated sale could be substantial, and often are higher than other means of sale. Those costs include:

- o preparing and disseminating information on properties to be offered;
- o soliciting attendance by prospective purchasers; and
- o screening and qualifying purchasers.

In a third party sale, we expect that each partnership would have to pay its own expenses or that the price would be reduced to take the expenses into account.

Although we believe the factors described above to be true, we are conducting a limited form of auction. That is, in September 1999 we established a price and publicly announced that we will consider third party offers to purchase any partnership or its assets at prices that are higher than the 1999 merger value for such partnership. We have repeated our willingness to consider third party offers in connection with the merger of each partnership we now propose, so long as the prices offered exceed those we are offering. We believe this process would result in a better price to the limited partners than if we merely offered the partnership or its assets for sale at any price. Pioneer Parent has the right to match or top any third party offer. In addition, any such offer would be subject to our right to continue operation of the properties. See "The Merger of Each Partnership -- Third Party Offers" on page 52.

-42-

53

Although we received some preliminary indications of interest from third parties during the last quarter of 1999, none of those third parties has ever made a formal bid for any partnership or its assets.

FORWARD-LOOKING STATEMENTS

This document includes "forward looking statements" as defined by the Securities and Exchange Commission. These statements concern Pioneer Parent's, Pioneer USA's and each partnership's plans, expectations and objectives for future operations. All statements, other than statements of historical facts, included in this document that address activities, events or developments that

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer Parent, Pioneer USA and each partnership expect, believe or anticipate will or may occur in the future are forward looking statements and include the following:

- o completion of the proposed merger of each partnership;
- o reserve estimates;
- o future production of oil and gas; and
- o future financial performance.

These forward looking statements are based on assumptions, which Pioneer Parent, Pioneer USA and each partnership believe are reasonable, but which are open to a wide range of uncertainties and business risks. Factors that could cause actual results to differ materially from those anticipated are discussed in (1) "Risk Factors" beginning on page 17 of this document, (2) periodic filings with the Securities and Exchange Commission, including Annual Reports on Form 10-K for the year ended December 31, 2000, for Pioneer Parent and each reporting partnership, and (3) "Management's Discussion and Analysis of Financial Condition and Results of Operations" for the year ended December 31, 2000 included in the supplement to this document for each nonreporting partnership.

"Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995: Statements in this document regarding each company's business which are not historical facts are "forward looking statements" that involve risks and uncertainties. For a discussion of these risks and uncertainties, which could cause actual results to differ from those contained in the forward looking statements, see "Risk Factors" beginning on page 17 of this document.

-43-

54

METHOD OF DETERMINING MERGER VALUE FOR EACH PARTNERSHIP AND AMOUNT OF PIONEER PARENT COMMON STOCK OFFERED

Pioneer Parent and Pioneer USA agreed to a merger value for each partnership for purposes of the merger of the partnership. The method of determining the merger value for each partnership was not determined by arm's-length negotiations. See "Risk Factors -- You Were Not Independently Represented in Establishing the Terms of the Merger of Each Partnership" on page 17 and "Interests of Pioneer Parent, Pioneer USA and Their Directors and Officers" on page 63.

In March 2001, Pioneer Parent and Pioneer USA agreed to use March 31, 2001 to determine the merger value for each partnership and to base the number of shares of Pioneer Parent common stock to be offered on the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for each partnership. For purposes of illustration in this document, we have calculated the number of shares to be issued based on an

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Prior to the date of the special meeting for each partnership, we will update the number of shares to be issued using the actual average closing price of Pioneer Parent common stock for the ten trading days ending three business days before the initial date of the special meeting. Neither Pioneer Parent nor Pioneer USA will adjust any of the other components of the merger value for any partnership.

COMPONENTS OF MERGER VALUE FOR EACH PARTNERSHIP

Pioneer Parent and Pioneer USA calculated the merger value assigned to each partnership as follows:

- o Pioneer Parent and Pioneer USA agreed to use the volumes of the partnership's estimated reserves as of March 31, 2001, as taken from the summary reserve report reviewed by Williamson Petroleum Consultants, Inc. as of March 31, 2001.

- o Pioneer Parent and Pioneer USA agreed to use the present value of estimated future net revenues for each partnership from the estimated reserves for each partnership at March 31, 2001, as taken from the summary reserve report reviewed by Williamson Petroleum Consultants, Inc. as of March 31, 2001. The reserve value component of the merger value for each partnership is also set forth in Table 16 of Appendix A to this document. Pioneer Parent and Pioneer USA instructed Williamson to use the following parameters in calculating the present value of estimated future net revenues: (1) a five-year NYMEX futures price for oil and gas as of March 30, 2001, with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a discount rate of 10.0%. For 2001, the oil and gas prices were based on the average NYMEX futures price for the nine-month period beginning on April 1, 2001 and ending December 31, 2001. See the table on page 6 for the NYMEX futures prices. Pioneer Parent and Pioneer USA believe that the five-year NYMEX futures prices provide a reasonable benchmark on the outlook for energy prices and are regularly used by financial markets, industry participants, and lenders in evaluating transactions.

- The standard industry price adjustments include:
 - (1) the effects of oil quality;
 - (2) British thermal unit, or BTU, content for gas;
 - (3) any bonus paid;
 - (4) oil and gas gathering and transportation costs; and
 - (5) gas processing costs and shrinkage.

Those adjustments reflect assumptions about the costs to extract, transport and process, if necessary, crude oil, natural gas liquids and natural gas to their point of sale.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- Pioneer Parent and Pioneer USA agreed to use a 10.0% discount rate because Pioneer Parent believes that a 10% discount rate is necessary based upon the risks involved in the oil and gas industry and Pioneer Parent's requirement to achieve a minimum rate of return on its investment.

- o Pioneer Parent and Pioneer USA added the present value of the partnership's estimated future net revenues as of March 31, 2001 to the partnership's net working capital as of March 31, 2001 and then reduced that sum by (i) the partnership's pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and (2) the cash distribution to be mailed on or about July 12, 2001,

-44-

55

by the partnership to its partners. Since the merger value for each partnership includes net working capital, the merger value assigned to the partnership includes the partnership's assets and liabilities other than its oil and gas reserves. Each partnership's other assets and liabilities consist mainly of cash, accounts receivable from the sale of oil and gas production and accounts payable.

- o The number of shares of Pioneer Parent common stock to be issued to the limited partners of each partnership upon the merger of the partnership will be determined by dividing the merger value assigned to the partnership by the value of one share of Pioneer Parent common stock determined as described below. For purposes of example in this document, a share of Pioneer Parent common stock has been valued at an assumed average closing price of \$18.00. However, on the closing date of the merger of each partnership, the value of a share of Pioneer Parent common stock will be recalculated by computing the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for each partnership. This recalculated value, and not the assumed average closing price of \$18.00 per share of Pioneer Parent common stock, used for illustration purposes in this document and on each limited partner's proxy card, will be used to determine the actual number of shares of Pioneer Parent common stock to be issued in the merger of each partnership. The recalculated value may be more or less than the assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Pioneer Parent may abandon the proposed merger of any or all of the partnerships at any time prior to the special meeting for any such partnership for any reason including changes in, among other things, the price of Pioneer Parent common stock, the market prices for oil and gas generally or the oil and gas industry generally.

Distributions. No cash distributions will be made by any partnership to its

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partners after the distribution in July 2001 through the closing date or termination date of the merger of the partnership. The Pioneer Parent common stock to be distributed as payment of the merger value of each participating partnership already reflects the expected amount of those distributions. However, any cash distributions by a nonparticipating partnership which would have been paid during that time period in the ordinary course of that partnership's business will be distributed to its partners at about the same time that the certificates representing Pioneer Parent common stock are mailed to the partners of each participating partnership.

Liabilities. Pioneer USA will assume all of the liabilities, including contingent liabilities and obligations, of each participating partnership as of the closing date of the merger of the partnership. As of the date of this document, Pioneer USA is not aware of any material contingent liabilities to which any partnership is subject.

Expenses. The expenses and fees to be incurred in connection with the merger of each partnership are expected to be approximately \$2.0 million in total. Each participating partnership will pay its pro rata share, based on its reserve value, of those estimated expenses and fees. Each nonparticipating partnership will pay a portion of the estimated expenses and fees of the mergers otherwise allocable to the partnership based on a fraction, the numerator of which is the percentage of the partnership's limited partnership interests that are voted in favor of the merger proposals and the denominator of which is the percentage of the partnership's limited partnership interests for which votes are cast. Pioneer Parent has agreed to pay (1) the remainder of the estimated expenses and fees otherwise allocable to such nonparticipating partnership, (2) any expenses and fees actually incurred in excess of \$2.0 million, and (3) if Pioneer Parent terminates or abandons the merger as to any partnership, any expenses or fees allocated to that partnership. Pioneer Parent and Pioneer USA have reduced each partnership's merger value by that partnership's pro rata share of the estimated expenses and fees.

ALLOCATION OF MERGER VALUE FOR EACH PARTNERSHIP AMONG PARTNERS OF THE PARTNERSHIP

In determining the portion of the merger value attributable to each \$1,000 of initial limited partner investment in a partnership, Pioneer Parent determined the amount payable per \$1,000 investment as if the assets of the partnership had been sold on March 31, 2001 for cash equal to the merger value of the partnership and the proceeds distributed in accordance with the liquidation provisions of the partnership's partnership agreement. The limited partners of each participating partnership would receive the same amounts if the merger value of the partnership was allocated among the partners based on the revenue-sharing provisions of the partnership agreement except for each of the following partnerships which will receive more proceeds under the liquidation provisions of its respective partnership agreement than under its revenue-sharing provisions due to certain prospect-by-prospect payout provisions not being met:

Parker & Parsley 81-I, Ltd.
Parker & Parsley 81-II, Ltd.
Parker & Parsley 82-I, Ltd.
Parker & Parsley 82-II, Ltd.
Parker & Parsley 82-III, Ltd.

OTHER METHODS OF DETERMINING MERGER VALUES

Pioneer Parent and Pioneer USA believe that the method used to determine the merger value for each partnership is a fair and reasonable method of valuing the partnership's properties. Pioneer Parent and Pioneer USA considered a number of alternative methods of determining the merger value for each partnership before selecting a method. However, the selected method might not accurately reflect the value of each partnership's assets. See "Risk Factors -- Risk Factors Relating to the Merger of Each Partnership -- The Merger Values for a Partnership Will Not be Adjusted For Changes in Oil and Gas Prices Before the Completion of Its Merger" on page 18. The following alternative methods for determining the merger value for each partnership should be taken into account in assessing the adequacy of the selected method.

Book Value of Assets. Pioneer Parent and Pioneer USA did not base the calculation of merger value for each partnership on the net book value of the partnership's assets. The net book value of each partnership's assets is based upon the financial statements reported in accordance with generally accepted accounting principles. The net book value is not adjusted for estimates in changes in the fair market value of the assets. For this reason, Pioneer Parent and Pioneer USA believe that the merger value for each partnership is more indicative of the fair market value of the assets of each partnership than the net book value of the partnership's assets. See the supplemental information table on the second page of the supplement for each partnership for the partnership's merger value and its book value, in each case per \$1,000 limited partner investment. In all cases except Parker & Parsley 81-II, Ltd., the merger value is higher than the book value. For Parker & Parsley 81-II, Ltd., the merger value is lower than book value because of the long-lived nature of the oil and gas properties owned by Parker & Parsley 81-II, Ltd. The merger value of Parker & Parsley 81-II, Ltd. takes into account the discounting effect of owning long-lived oil and gas reserves that is not reflected in a book value computation for the partnership. Nonetheless, Pioneer USA has determined that the merger transaction is fair to the limited partners of Parker & Parsley 81-II, Ltd. (1) for the reasons noted above and (2) because Pioneer Parent and Pioneer USA believe that the five-year NYMEX futures prices used in the calculation of the merger value for the partnership (A) provide a reasonable benchmark on the outlook for energy prices, (B) are regularly used by financial markets, industry participants, and lenders in evaluating transactions, and (C) are higher than historic prices.

Trading Price of Units. None of the partnership interests are traded on a national stock exchange or in any other significant market. Although some partnership interests are occasionally sold in private or an informal secondary market for limited partner securities, Pioneer Parent and Pioneer USA believe any market for the partnership interests is not reliable as an indicator of value because any such market is highly illiquid and generally reflects an illiquidity discount. As a result, Pioneer Parent and Pioneer USA did not base the calculation of the merger value for any partnership on recent trading prices of partnership interests in the partnership. See Table 15 of Appendix A for historical information about recent trades of partnership interests in each partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Repurchase Offers. Pioneer Parent and Pioneer USA did not base the calculation of the merger value for any partnership on the price of recent repurchase offers in the partnership. Most partnerships do not have a repurchase offer obligation, so no repurchase price information was available for those partnerships. Of the partnerships with a repurchase offer obligation, the most recent repurchase offers will be based on December 31, 2000 oil and gas prices. The merger value for each partnership with repurchase offer obligations is lower than the 2001 repurchase offer price for the partnership because the repurchase price was based on NYMEX oil and gas prices as of December 31, 2000, which were \$26.69 per Bbl of oil and \$9.95 per Mcf of gas. Pioneer Parent and Pioneer USA believe that the repurchase obligation is not an indicator of fair value because it is calculated annually on December 31 using oil and gas prices for that specific day. The value determined under the repurchase obligation does not adequately reflect future demand and supply fundamentals which have historically resulted in significant volatility to oil and gas prices. See "Risk Factors -- Risk Factors Relating to the Merger of Each Partnership -- Repurchase Offers in 2001 By Each of the Six Partnerships with a Repurchase Obligation were Higher than the Merger Value for the Partnership" on page 19 of this document and Table 8 of Appendix A to this document for information on each partnership with repurchase offer obligations.

Timing of Pricing. Oil and gas prices have recovered from NYMEX oil and gas prices of \$12.00 per Bbl of oil and \$2.00 per Mcf of gas as of December 31, 1998, to the five-year NYMEX futures prices for oil and gas as of March 30, 2001, set forth in the table on page 6 of this document. Pioneer Parent and Pioneer USA used those recovered oil and gas prices to calculate the merger value for each partnership. Future oil and gas prices could be higher or lower than the prices on March 30, 2001 which were used in calculating the merger value for each partnership. Significant increases in future prices would increase cash available for distribution from each partnership and could, in retrospect, suggest that the merger value for such partnership was low by comparison. If those current prices were to continue to prevail in the future, the merger value for each partnership would appear low by comparison. In contrast, however, if those current prices decline in the future, the merger value for each partnership would appear high by comparison.

-46-

57

THE MERGER OF EACH PARTNERSHIP

GENERAL

Immediately before the effective time of the merger of each participating partnership, the partnership agreement for the partnership will be amended by the merger amendment to permit the merger of the partnership with and into us. At the effective time of the merger of each participating partnership, the partnership will be merged with and into us. We will be the surviving entity. In addition, at the effective time of the merger of each participating partnership, each of your partnership interests in the partnership will be converted into the right to receive Pioneer Parent common stock.

LEGAL OPINION FOR LIMITED PARTNERS

Each of the partnership agreements, except the partnership agreement for

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley Producing Properties 88-A, L.P., requires that special legal counsel render an opinion on behalf of the limited partners of each partnership to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. In addition, the partnership agreement for each of the following partnerships requires an opinion that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability:

Parker & Parsley 81-I, Ltd.	Parker & Parsley Selected 85 Private
Parker & Parsley 81-II, Ltd.	Parker & Parsley 86-A, Ltd.
Parker & Parsley 82-I, Ltd.	Parker & Parsley 86-B, Ltd.
Parker & Parsley 82-II, Ltd.	Parker & Parsley 86-C, Ltd.
Parker & Parsley 82-III, Ltd.	Parker & Parsley Private Investment
Parker & Parsley 83-A, Ltd.	Parker & Parsley 87-A Conv., Ltd.
Parker & Parsley 83-B, Ltd.	Parker & Parsley 87-A, Ltd.
Parker & Parsley 84-A, Ltd.	Parker & Parsley 87-B, Ltd.
Parker & Parsley 85-A, Ltd.	Parker & Parsley Producing Propertie
Parker & Parsley 85-B, Ltd.	Parker & Parsley Producing Propertie
Parker & Parsley Private Investment 85-A, Ltd.	

For each of the partnerships, other than those listed below, the counsel designated to render the opinion described above must be counsel other than counsel to Pioneer USA or any partnership:

Parker & Parsley 88-A Conv., L.P.	Parker & Parsley 90-A Conv., L.P.
Parker & Parsley 88-A, L.P.	Parker & Parsley 90-A, L.P.
Parker & Parsley 88-B Conv., L.P.	Parker & Parsley 90-B Conv., L.P.
Parker & Parsley 88-B, L.P.	Parker & Parsley 90-B, L.P.
Parker & Parsley 88-C Conv., L.P.	Parker & Parsley 90-C Conv., L.P.
Parker & Parsley 88-C, L.P.	Parker & Parsley 90-C, L.P.
Parker & Parsley Private Investment 88, L.P.	Parker & Parsley Private Investment
Parker & Parsley 89-A Conv., L.P.	Parker & Parsley 90 Spraberry Privat
Parker & Parsley 89-A, L.P.	Parker & Parsley 91-A, L.P.
Parker & Parsley 89-B Conv., L.P.	Parker & Parsley 91-B, L.P.
Parker & Parsley 89-B, L.P.	
Parker & Parsley Private Investment 89, L.P.	

In all cases, the designated counsel and the legal opinion must be approved by the limited partners of each partnership.

In all cases, Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering the legal opinions described above on behalf of the limited partners of each partnership to Pioneer USA. _____ is not affiliated to Pioneer Parent, Pioneer USA or any of the partnerships. The merger proposals for each partnership include an approval of that counsel and the form of its opinion. See "The Special Meetings -- Time and Place; Purpose" on page 58 of this document. A copy of the opinion is attached as an exhibit to the merger proposals for each partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

DISTRIBUTION OF PIONEER PARENT COMMON STOCK

Upon completion of the merger of each participating partnership, the partners of the partnership will have no continuing interest in, or rights as partners of, the partnership. The transfer books of each participating partnership will be closed on the closing date of the merger of the partnership. All partnership interests in each participating partnership will cease to be outstanding, will automatically be cancelled and retired, and will cease to exist. The certificates previously representing partnership interests in each participating partnership held by record partners will represent only the right to receive Pioneer Parent common stock.

We intend to mail certificates representing Pioneer Parent common stock to the partners of record of each participating partnership promptly following the effectiveness of the merger of the partnership in payment of the merger value for the partnership. Partners of each participating partnership will not be required to surrender partnership interest certificates to receive the Pioneer Parent common stock.

FRACTIONAL SHARES

Pioneer Parent will not issue fractional shares to any limited partner upon completion of the merger of any partnership. For each fractional share that would otherwise be issued, Pioneer Parent will round any fractional shares of Pioneer Parent common stock up to the nearest whole share.

MATERIAL U.S. FEDERAL INCOME TAX CONSEQUENCES

The following discussion describes the material federal income tax consequences of a conversion of partnership interests into Pioneer Parent common stock pursuant to the merger of each participating partnership. The federal tax consequences of each merger will vary for each limited partner because of the different circumstances of each participating partnership and the individual federal income tax position of each limited partner.

Except as otherwise indicated, statements of legal conclusion regarding tax treatments, tax effects or tax consequences are the opinions of Vinson & Elkins L.L.P, counsel for Pioneer Parent based upon current law. Future legislative, judicial or administrative changes or interpretations could alter or modify the following statements and conclusions, and any of these changes or interpretations could be retroactive and could affect the tax consequences to the limited partners of each partnership.

The following discussion is not exhaustive of all possible tax consequences. It does not address any state, local or foreign tax consequences, nor does it discuss all of the aspects of federal income taxation that may be relevant to specific partners in light of their particular circumstances. The discussion below describes material federal income tax consequences applicable

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to individuals who are citizens or residents of the United States, and therefore has limited application to domestic corporations and persons subject to specialized federal income tax treatment, such as foreign persons, tax-exempt entities, regulated investment companies and insurance companies.

A copy of the tax opinion of Vinson & Elkins has been filed as an exhibit to the registration statement of which this document is a part. Vinson & Elkins' tax opinion is based, in part, on various assumptions of fact and certificates.

The following discussion does not address the particular facts and circumstances of any particular limited partner. You are advised to consult your own tax advisor to determine all of the relevant federal, state and local tax consequences of each merger particular to you.

TAX CONSEQUENCES OF A CONVERSION OF PARTNERSHIP INTERESTS.

o Generally. As more fully described below, if you own partnership interests in a participating partnership, you will generally recognize an aggregate amount of net gain or loss equal to the difference between (1) the fair market value of Pioneer Parent common stock you receive in the merger of that partnership and (2) your adjusted tax basis in your partnership interests exclusive of any basis attributable to liabilities of the partnership immediately prior to the merger. That net gain or loss may be comprised of ordinary income or ordinary loss depending upon the extent of any recapture of depletion or intangible drilling and development costs and any appreciation or depreciation in the ordinary assets of the partnership. The recognition of ordinary income will decrease the capital gain component or increase the capital loss component of the net gain or loss otherwise recognizable as a consequence of the merger.

o Characterization of the Merger of Each Partnership. The merger of a participating partnership into Pioneer USA should be treated for federal income tax purposes as a sale by such partnership of its assets for Pioneer Parent common stock followed by a distribution of the Pioneer Parent common stock received in liquidation of the limited partnership interests. Under Section 613A of the Internal Revenue Code, each of the partners of such partnership must:

-48-

59

- maintain the partner's share of the basis in the partnership's oil and gas properties at the partner level;
- adjust such basis for depletion deductions; and
- use such basis to calculate gain or loss at the partner level on any sale by the partnership of its oil and gas properties.

Accordingly, each of the mergers should be generally treated for tax computation purposes as:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- a taxable sale by you of your interest in a participating partnership's oil and gas properties for Pioneer Parent common stock and the assumption of liabilities; and

- a taxable sale of any remaining partnership assets by the participating partnership for Pioneer Parent common stock followed by a liquidation of the participating partnership.

o Gain or Loss on Sale of Partnership Oil and Gas Properties. Upon the deemed sale of a partnership's oil and gas properties in the merger of the partnership, you will recognize gain or loss equal to the difference between:

- the portion of the partnership's "amount realized" on the sale of its oil and gas properties allocated to you; and

- your adjusted tax basis in the partnership oil and gas properties sold, which must be reduced to reflect depletion claimed during the current year in respect of production prior to the date of the merger.

The amount realized will include the fair market value of Pioneer Parent common stock received and the amount of any liability assumed by Pioneer USA in connection with the merger of the partnership which is attributable to the partnership's oil and gas properties. If gain is recognized on such sale, the portion of the gain that is treated as recapture of intangible drilling and development costs or depletion will be treated as ordinary income. See "Recapture of Intangible Drilling and Development Costs" and "Recapture of Depletion" below. The remainder of such gain generally will constitute "Section 1231 gain." If loss is recognized on such sale, such loss generally will constitute "Section 1231 loss." See "Section 1231 Gains and Losses" below. You must take into account your share of the portion of the gain that constitutes recapture income, if any, as ordinary income and must aggregate your share of the Section 1231 gains and losses along with the Section 1231 gains and losses you realize from other sources.

o Other Gain or Loss. You will also recognize your allocable share of the partnership's gain or loss, if any, on the deemed sale of its assets other than oil and gas properties. Such gain or loss will be equal to the difference between the amount realized by the partnership on the sale of such assets and the partnership's adjusted tax basis in such assets. Such gain or loss will be capital or ordinary depending on the nature of the assets sold.

Finally, in the event that the fair market value of Pioneer Parent common stock you receive in the merger of the partnership is more or less than the adjusted tax basis in your partnership interests, as adjusted to reflect gains and losses described in the two preceding paragraphs as well as the effects of the partnership's current year activities, then upon the deemed liquidation of a partnership, you will recognize capital gain or loss equal to the difference between such amounts. See "Tax Consequences of Partnership Operations" below.

You will be provided with information necessary to make the calculations under Section 613A of the Internal Revenue Code described above for purposes of filing your own federal income tax return. In order to simplify your federal income tax reporting, this information will include a calculation of the amount

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and character of your gain on the deemed sale of the partnership's oil and gas properties based upon our estimates. You should verify the accuracy of these calculations based upon your own records.

o Section 1231 Gains and Losses. Generally, if the total amount of the Section 1231 gains exceeds the total amount of Section 1231 losses, all such gains and losses will be treated as capital gains and losses, and if the total amount of the Section 1231 losses exceeds the total amount of the gains, all such gains and losses will be treated as ordinary income and losses. However, your net Section 1231 gains will be treated as ordinary income to the extent of your net Section 1231 losses during the immediately preceding five years, reduced by any amount of net Section 1231 losses that have been previously "recaptured" by you pursuant to this rule.

o Recapture of Intangible Drilling and Development Costs. Generally, all or a portion of the amounts previously deducted for intangible drilling and development costs for a property must be recaptured upon the disposition of such property by treating the gain, if any, realized on such disposition as ordinary income to the extent of such amounts. For a property placed in service prior to 1987, the potential recapture amount is equal to the excess of the aggregate amounts previously deducted for intangible drilling and development costs for such property over the amount by which the deduction for depletion for such property would have been increased had the intangible drilling and development costs been capitalized and recovered through depletion rather than deducted in the year incurred. It

-49-

60

should be noted that, if percentage depletion, rather than cost depletion, has been claimed for such property, the hypothetical capitalization of intangible drilling and development costs may result in little or no increase in depletion deductions and, as a consequence, most or all of the intangible drilling and development costs for such property may be subject to recapture. For property placed in service during 1987 or thereafter, the full amount of intangible drilling and development costs previously deducted, unreduced by depletion, is subject to recapture to the extent of any gain.

o Recapture of Depletion. Upon the disposition of a property that was placed in service during 1987 or thereafter, all amounts previously deducted for depletion, whether cost depletion or percentage depletion, to the extent such amounts reduced the basis in the property, must be recaptured by treating the gain, if any, recognized on such disposition as ordinary income to the extent of such amounts. No such recapture rule is applicable to a property placed in service before 1987.

o Tax Rates. The capital gains rate for individuals and other non-corporate taxpayers is 20% if the capital asset has been held for more than one year at the time of consummation of the merger of each partnership. Corporate taxpayers are taxed at a maximum marginal rate of 35% for both capital gains and ordinary income. The maximum marginal federal income tax rate for ordinary income of individuals and other non-corporate taxpayers is currently 39.1%. Capital losses are deductible only to the extent of capital gains, except that, subject to the passive activity loss limitation discussed below, non-corporate taxpayers may deduct up to \$3,000 of capital losses in excess of the amount of their capital gains against ordinary income. Excess capital losses generally can be carried forward to succeeding years. A corporation is permitted to carry back excess capital losses to the three preceding years, provided the carryback does not

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

increase or produce a net operating loss for any of those years. A corporation's carryforward period is five years and a non-corporate taxpayer can carry such losses forward indefinitely.

o Passive Activity Loss Limitation. Under Section 469 of the Internal Revenue Code, any losses from any participating partnership that have been suspended under the passive loss rules will become fully deductible as a result of the merger of any such partnership.

FIRPTA Withholding. Gain recognized by a foreign limited partner on the sale by a participating partnership which is effectively connected with the conduct of a U.S. trade or business of its assets pursuant to the merger of the partnership will be subject to federal income tax. Gain recognized on the sale of U.S. real property, including a participating partnership's oil and gas properties, is treated as effectively connected with the conduct of a U.S. trade or business for this purpose. Under Internal Revenue Code Section 1446, a participating partnership in which an interest is held by a foreign person generally is required to deduct and withhold a tax equal to the highest marginal federal income tax rate applicable to the partner multiplied by such partner's allocable share of effectively connected income. In order to comply with this requirement, each participating partnership will withhold the prescribed percentage of the effectively connected income allocated to you unless you properly complete and sign a certification of non-foreign status certifying your taxpayer identification number and address, and that you are not a foreign person. Amounts withheld will be creditable against a limited partner's federal income tax liability and, if in excess thereof, a refund may be obtained from the Internal Revenue Service by filing a U.S. income tax return.

Tax Consequences of Partnership Operations. The federal income tax consequences of the merger of each partnership, described above, are in addition to the tax consequences of a participating partnership for the taxable year ending on the closing date of the merger of the partnership. You must include your allocable share of a participating partnership's items of income, gain, loss, deduction and credit for that taxable year, including your allocable share through the closing date of the merger of the partnership, on your federal income tax return for that taxable year. That information will be provided to you on a Schedule K-1 as required by tax law. The results of partnership operations for such period will impact your tax basis in a participating partnership, and your computation of gain or loss resulting from the merger of the partnership.

ACCOUNTING TREATMENT

The merger of each participating partnership will be accounted for as a purchase under generally accepted accounting principles. Under those rules, Pioneer USA will record the assets and liabilities of each participating partnership on its books at its estimated fair market value.

EFFECT OF DEBT OWED BY A LIMITED PARTNER TO PIONEER USA ON AMOUNT OF PIONEER PARENT COMMON STOCK TO BE RECEIVED BY THE LIMITED PARTNER

If a limited partner is indebted to Pioneer USA for any portion of the limited partner's original investment in the partnership, Pioneer USA plans to apply the Pioneer Parent common stock that would otherwise be distributed to the limited partner upon completion of the merger of the partnership against that limited partner's indebtedness. If a limited partner's indebtedness to Pioneer USA is less than the merger value allocated to limited partnership interests

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

held by the limited partner, the limited partner will receive Pioneer Parent common stock equal to the amount by which such merger value exceeds such indebtedness. If a limited partner's indebtedness to Pioneer USA is greater

-50-

61

than the merger value allocated to the limited partnership interests held by the limited partner, Pioneer USA may collect the deficiency from the limited partner.

EFFECT OF MERGER OF EACH PARTNERSHIP ON LIMITED PARTNERS WHO DO NOT VOTE IN FAVOR OF THE MERGER; NO APPRAISAL OR DISSENTERS' RIGHTS

You will be bound by the merger of each partnership in which you own an interest if the limited partners in the partnership vote a majority, or 66-2/3% for Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P., of their partnership interests in favor of the merger, even if you vote against the merger or do not vote. If the merger of the partnership occurs, you will be entitled to receive only Pioneer Parent common stock based on the merger value of your partnership interests in the partnership. Under the laws of the State of Delaware and the State of Texas, which are the states of formation of the partnerships, you are not entitled to appraisal or dissenters' rights with respect to the merger of any partnership.

FUTURE OF NONPARTICIPATING PARTNERSHIPS

If the limited partners of a partnership do not approve the merger of that partnership, the partnership will remain in existence. Each nonparticipating partnership will continue to operate as a separate legal entity with its own assets and liabilities. There will be no immediate change in its business objectives, and Pioneer USA plans to continue to manage and operate each nonparticipating partnership in accordance with the terms of its current partnership agreement. A limited partner in a nonparticipating partnership will retain the rights, privileges and obligations that the limited partner currently has pursuant to the partnership agreement of the nonparticipating partnership. At about the same time that Pioneer USA mails certificates for Pioneer Parent common stock to the partners of each participating partnership in payment of the merger value for the partnership, Pioneer USA will mail any cash distributions that were delayed for administrative purposes prior to the completion of the merger of each participating partnership to the partners of each nonparticipating partnership.

Pioneer USA's board of directors will determine each nonparticipating partnership's business plan. In addition, the board of directors of each of Pioneer Parent and Pioneer USA will decide what, if any, actions they will take with respect to each nonparticipating partnership. Potential activities may include a tender offer for partnership interests of limited partners or a proposal to acquire the assets of, or merge with, one or more of the nonparticipating partnerships. Such proposals may be on terms similar to or different from those of the merger of each partnership described in this document.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer USA plans to continue to manage each nonparticipating partnership until such partnership is dissolved or Pioneer USA is replaced as the general partner of such partnership. The replacement of Pioneer USA as general partner would require compliance with the partnership agreement of such nonparticipating partnership, including the requisite vote of the limited partners thereof. A nonparticipating partnership may be dissolved in the future in accordance with its partnership agreement if Pioneer USA or any substituted general partner withdraws from the nonparticipating partnership, or in some cases, otherwise elects to dissolve that partnership. Pioneer USA might withdraw from, or otherwise elect to dissolve, a nonparticipating partnership if Pioneer USA determines that the nonparticipating partnership's continued operation is uneconomical or its dissolution and liquidation are in the best interests of the partners of that partnership. Upon dissolution, the nonparticipating partnership's assets may be sold for cash or securities, which may be more or less than the merger value assigned to that partnership, or distributed in kind to the partners of the nonparticipating partnership. Any such sale may be to Pioneer Parent or an affiliate of Pioneer Parent and may involve cash or securities of Pioneer Parent.

NONMANAGING GENERAL PARTNERS OF SOME PARTNERSHIPS

Eight of the partnerships described in this document have two general partners. In those eight partnerships, Pioneer USA is the managing general partner. The second general partner in those partnerships is a parallel partnership whose limited partners are former affiliates of Pioneer Parent's predecessors. The names of the eight partnerships and the names of the nonmanaging general partner in each of those partnerships are:

PARTNERSHIP -----	NONMANAGING GENERAL PARTNER -----
Parker & Parsley 81-I, Ltd.	P&P Employees 81-I, Ltd.
Parker & Parsley 81-II, Ltd.	P&P Employees 81-II, Ltd.
Parker & Parsley 82-I, Ltd.	P&P Employees 82-I, Ltd.
Parker & Parsley 82-II, Ltd.	P&P Employees 82-II, Ltd.
Parker & Parsley 82-III, Ltd.	P&P Employees 82-III, Ltd.
Parker & Parsley 83-A, Ltd.	P&P Employees 83-A, Ltd.
Parker & Parsley 83-B, Ltd.	P&P Employees 83-B, Ltd.
Parker & Parsley 84-A, Ltd.	P&P Employees 84-A, Ltd.

Pioneer USA is the sole general partner of each of the nonmanaging general partners. In that capacity, Pioneer USA has authority:

- o to cause the nonmanaging general partner to perform its obligations relating to the partnership described above; and
- o to exercise on behalf of the nonmanaging general partner all of the rights and elections granted to the nonmanaging general partner by the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership described above.

None of the nonmanaging general partners has the right to vote on the merger of any partnership. However, Pioneer USA, as the general partner of each nonmanaging general partner, has approved the merger of each partnership and the distribution of this document to the limited partners of each partnership and to the unaffiliated limited partners of each nonmanaging general partner, if any, of each partnership. The merger value attributable to the unaffiliated limited partners of the nonmanaging general partners is \$199,780, consisting of approximately 11,099 shares of Pioneer Parent common stock in the aggregate. Pioneer USA will not receive any Pioneer Parent common stock in any merger for its partnership interests in any nonmanaging general partner.

THIRD PARTY OFFERS

Pioneer USA will consider offers from third parties to purchase any partnership or its assets. Those who wish to make an offer for any partnership or its assets must demonstrate to Pioneer USA's reasonable satisfaction their financial ability and willingness to complete such a transaction. Before reviewing non-public information about a partnership, a third party will need to enter into a customary confidentiality agreement. Offers should be at prices and on terms that are fair to the partners of the partnership for which the offer is being made and more favorable to the unaffiliated limited partners than the prices and terms proposed for the merger of that partnership in this document. Pioneer Parent reserves the right to match or top any such offer. In addition, any such offer would be subject to Pioneer USA's right to continue operation of the properties. Since first announcing our willingness to consider third party offers in September 1999, Pioneer USA has not received any third party offer for any partnership or its assets. Persons desiring to make an offer for any partnership should contact Timothy L. Dove or Mark L. Withrow, Board of Directors, Pioneer Natural Resources USA, Inc., 1400 Williams Square West, 5205 North O'Connor Boulevard, Irving, Texas 75039 by August 1, 2001.

MERGER AMENDMENT

In order to complete the merger of each partnership, the partnership agreement for the partnership requires an amendment to add a provision permitting the merger of the partnership with and into Pioneer USA. See the merger proposals, which include the merger amendment, set forth in Appendix E to this document. At the special meeting for each partnership, the limited partners of the partnership will vote upon the merger amendment, which, if approved, will be effective immediately prior to the effectiveness of the merger of the partnership.

TERMINATION OF REGISTRATION AND REPORTING REQUIREMENTS

As a result of the merger of each participating partnership, the partnership interests in the partnership, as well as the partnership itself, will cease to exist. Twenty-five of the partnerships described in this document have registered their partnership interests under, or are otherwise subject to the informational requirements of, the Securities Exchange Act of 1934. See "Where You Can Find More Information" for a list of those partnerships. Upon the completion of the merger of each reporting partnership, Pioneer USA intends to terminate:

- o registration of the partnership interests of the partnership under the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Securities Exchange Act of 1934; and

- o the partnership's obligations to file reports and other information under the Securities Exchange Act of 1934.

Pioneer USA plans to cause each nonparticipating partnership that is also a reporting partnership to continue to file reports and other information under the Securities Exchange Act of 1934. However, Pioneer USA's board of directors could determine in the future to cause each such partnership to terminate its reporting obligations as permitted by federal securities laws.

The advantages of remaining registered, or remaining obligated to file reports, under the Securities Exchange Act of 1934 include the informational and reporting requirements under that act, including requirements related to tender offers, proxy solicitation and consents and insiders' transactions in partnership interests. Those reporting requirements may provide limited partners with more detailed information on a more frequent basis than might otherwise be required under the partnership agreement for the partnership. In addition, a partnership's filings under the Securities Exchange Act of 1934 are available to the public over the Internet at the SEC's web site at <http://www.sec.gov> and are also available at the SEC's public reference rooms in Washington, D.C., New York, New York and Chicago, Illinois.

-52-

63

The disadvantages of remaining registered, or remaining obligated to file reports, include the partnership's cost to prepare and distribute the various reports and other information required under the Securities Exchange Act of 1934. Deregistering the partnership interests of a nonparticipating partnership or otherwise terminating its filing and reporting obligations could reduce that partnership's general and administrative expenses because the reporting obligations of the partnership under its partnership agreement require annual and semi-annual reports, but not quarterly reports.

ELIMINATION OF A FAIRNESS OPINION REQUIREMENT THAT WOULD OTHERWISE BENEFIT PIONEER USA

Pioneer USA, as the sole general partner of each of Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P., is entitled to receive an opinion as to the fairness of the proposed merger transaction to Pioneer USA in its capacity as sole general partner of each of those partnerships. However, since Pioneer Parent and Pioneer USA are the parties making the offer for the proposed merger transaction, Pioneer USA will not seek such fairness opinion. In addition, Pioneer USA, as the sole general partner of each of those two partnerships, is entitled to amend, and Pioneer USA will amend, the partnership agreement for the partnership to eliminate the requirement for such fairness opinion for Pioneer USA in connection with the proposed merger of the partnership.

PAYMENT OF EXPENSES AND FEES

Pioneer Parent and Pioneer USA estimate that the aggregate expenses and fees of the mergers of all of the partnerships will be as follows:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Filing fee with SEC.....	\$ 20,500
Legal fees.....	350,000
Accounting fees.....	100,000
Financial advisor fees.....	350,000
Independent petroleum consultant fees.....	50,000
Printing and mailing fees.....	850,000
Information agent fees and solicitation and tabulation expenses.....	225,000
Miscellaneous.....	54,500

Total expenses.....	\$2,000,000
	=====

Each participating partnership will pay its pro rata share, based on its reserve value, of the aggregate estimated expenses and fees of the mergers of all of the partnerships. Each nonparticipating partnership will pay a portion of the aggregate estimated expenses and fees of the mergers otherwise allocable to such nonparticipating partnership based on a fraction, the numerator of which is the percentage of the partnership's limited partnership interests that are voted in favor of the merger proposals and the denominator of which is the percentage of the partnership's limited partnership interests for which votes are cast. Pioneer Parent has agreed to pay (1) the remainder of the estimated expenses and fees otherwise allocable to such nonparticipating partnership, (2) any expenses and fees actually incurred in excess of \$2.0 million, and (3) if Pioneer Parent terminates or abandons the merger as to any partnership, any expenses or fees allocated to that partnership. Pioneer Parent and Pioneer USA have reduced the net working capital component of each partnership's merger value by that partnership's pro rata share of the estimated expenses and fees.

THE MERGER AGREEMENT

The following describes the material terms of the merger agreement. Pioneer Parent and Pioneer USA expect to sign the merger agreement as soon as the Securities and Exchange Commission declares effective under the Securities Act of 1933 the registration statement that includes this document. The full text of the form of the merger agreement is attached as Appendix F to this document and is incorporated by reference in this document. We encourage you to read the entire merger agreement.

STRUCTURE; EFFECTIVE TIME

The merger agreement provides for the merger of each participating partnership with and into Pioneer USA, with Pioneer USA surviving each merger. Each merger will become effective at the time of the filing of the certificate of merger for each participating partnership with the Secretary of State of the State of Delaware and, for each participating partnership formed in Texas, with the Secretary of State of the State of Texas. Each certificate of merger is expected to be filed as soon as practicable after the last condition precedent to the related merger set forth in the merger agreement has been satisfied or waived. We estimate that the closing of the merger of each partnership will be in the third quarter of 2001.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

EFFECT OF THE MERGER OF EACH PARTNERSHIP

As a result of the merger of each participating partnership, the partners in the partnership will have no continuing interest in that partnership. Following the merger of each participating partnership, there will be no trading market for the partnership interests in, and no further distributions paid to the former partners of, the partnership. In addition, following the consummation of the merger of each participating partnership that is also a reporting partnership, the registration of any partnership interests in the partnership under the Securities Exchange Act of 1934 will be terminated.

CONDUCT OF BUSINESS PRIOR TO THE MERGER OF EACH PARTNERSHIP

From the date of the merger agreement until the effective time of the merger of each partnership, each partnership is required:

- o to conduct its business only in the ordinary course consistent with past practice; and
- o to use its reasonable best efforts:
 - to preserve intact its business organization;
 - to keep available the services of its officers, employees and consultants; and
 - to preserve its relationships with customers, suppliers and other persons with which it has significant business dealings.

Pioneer USA has suspended cash distributions to the partners of each partnership until after the effective time of the merger of the partnership. Partners of each nonparticipating partnership will receive cash distributions that are delayed for administrative purposes at about the same time Pioneer USA mails certificates for Pioneer Parent common stock to the partners of each participating partnership in payment of merger value for each partnership.

OTHER AGREEMENTS

Special Meetings; Proxies. Pioneer USA has agreed to cause the special meeting of the limited partners of each partnership to be duly called and held as soon as reasonably practicable for the purpose of voting on the approval and adoption of the merger proposals for the partnership. Pioneer USA has also agreed to use its reasonable best efforts to solicit from the limited partners of each partnership proxies in favor of the merger proposals and to take all other action necessary or advisable to secure any vote or consent of the limited partners of the partnership required by the partnership agreement of the partnership or the merger agreement or by law in connection with the merger of the partnership.

Reasonable Commercial Efforts. Each party has agreed to use all reasonable commercial efforts:

- o to obtain in a timely manner all necessary waivers, consents and approvals and to effect all necessary registrations and filings; and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o to take, or cause to be taken, all actions and to do, or cause to be done, all things necessary, proper or advisable under applicable laws and regulations to consummate as promptly as practicable the transactions contemplated by the merger agreement.

-54-

65

REPRESENTATIONS AND WARRANTIES OF PIONEER PARENT, PIONEER USA AND EACH PARTNERSHIP

The merger agreement contains substantially reciprocal representations and warranties of Pioneer Parent, Pioneer USA and each of the partnerships, including the following matters:

- o due organization or formation, standing, corporate or partnership power and qualification;
- o absence of any conflict, breach, notice requirement or default under organizational documents and material agreements as a result of each contemplated merger;
- o authority to enter into and the validity and enforceability of the merger agreement;
- o absence of any material adverse change since March 31, 2001; and
- o accuracy of information.

In addition, the merger agreement contains representations and warranties by:

- o each of the partnerships as to capitalization;
- o each of Pioneer Parent and each reporting partnership, as to the absence in its reports filed with the SEC of any untrue statement of a material fact or any omission to state a material fact necessary to make the statements in such reports not misleading;
- o each of Pioneer Parent and each partnership, that its financial statements have been prepared in accordance with generally accepted accounting principles applied on a consistent basis and fairly present its financial condition and results of operations; and
- o Pioneer USA as to its capacity as the managing or sole general partner of each partnership and as the sole general partner of each nonmanaging general partner.

CONDITIONS TO THE MERGER OF EACH PARTNERSHIP

Conditions to the Obligations of Each Party. The obligations of Pioneer Parent, Pioneer USA and each partnership to complete the merger of the partnership are dependent on the satisfaction of the following conditions:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o the merger agreement shall have been approved by the requisite vote of the limited partners of the partnership entitled to vote at the partnership's special meeting;
- o Pioneer USA shall have received the fairness opinion from Stanger that, as of the date of that opinion, that the merger value for each partnership and the allocation of the merger value of the partnership (1) to the limited partners of the partnership as a group, (2) to the general partners of the partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the partnership, (4) to the unaffiliated limited partners of the partnership as a group and (5) to the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership as a group, is fair to the unaffiliated limited partners of the partnership and the unaffiliated limited partners of the nonmanaging general partner, if any, of the partnership, from a financial point of view;
- o Pioneer USA shall have received the opinion of counsel to the limited partners of each partnership that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability;
- o the absence of any law, regulation, judgment, injunction, order or decree that would prohibit the consummation of any merger;
- o the absence of any pending suit, action or proceeding challenging the legality or any aspect of the merger of any partnership or the transactions related to the merger;
- o the authorization for listing on the New York Stock Exchange and the Toronto Stock Exchange upon official issuance of notice shall have been received for the shares of Pioneer Parent common stock to be issued upon the merger of each partnership;

-55-

66

- o all material filings and registrations with, and notifications to, third parties shall have been made and all material approvals and consents of third parties shall have been received; and
- o the absence of any opinion of counsel that the exercise by the limited partners of each partnership of the right to approve the merger of the partnership is not permitted by state law.

Conditions to the Obligations of Pioneer Parent. The obligations of Pioneer Parent to complete the merger of each partnership are further subject to the satisfaction of the following conditions:

- o each of Pioneer USA and each partnership having performed in all material respects its agreements contained in the merger agreement;

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and

- o the representations and warranties of Pioneer USA and each partnership being true and correct in all material respects at the closing date of the merger of the partnership as if made at that time unless they relate to another specified time.

Conditions to the Obligations of Pioneer USA and Each Partnership. The obligations of Pioneer USA and each partnership to complete the merger of the partnership are further subject to the satisfaction of the following conditions:

- o Pioneer Parent having performed in all material respects its agreements contained in the merger agreement; and
- o the representations and warranties of Pioneer Parent being true and correct in all material respects at the closing date of the merger of the partnership as if made at that time unless they relate to another specified time.

TERMINATION OF THE MERGER AGREEMENT AND THE MERGER OF ANY PARTNERSHIP

The merger agreement may be terminated and the merger of any partnership abandoned at any time prior to the effective time, whether before or after approval by the limited partners:

- o by the mutual written consent of the parties;
- o by any party, if:
 - any applicable law, rule or regulation makes consummation of any merger illegal or otherwise prohibited or any final and non-appealable judgment, injunction, order or decree enjoining any party from consummating any merger is entered;
 - the requisite limited partner approval for a partnership is not obtained by a vote at the special meeting for the partnership or at any adjournment or postponement of the special meeting; or
 - any suit, action or proceeding is filed against Pioneer Parent, Pioneer USA, any partnership or any officer, director or affiliate of Pioneer Parent or Pioneer USA challenging the legality or any aspect of the merger of any partnership or the transactions related to the merger;
- o by Pioneer Parent, if Pioneer USA or any partnership is in material breach of the merger agreement;
- o by Pioneer USA or any partnership as to that partnership's merger, if Pioneer Parent is in material breach of the merger agreement;
- o by Pioneer USA, if Pioneer USA's board of directors determines that termination of the merger agreement is required in order for the board

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to comply with its fiduciary duties; or

- o by Pioneer Parent, if there shall have occurred any event, circumstance, condition, development or occurrence causing, resulting in or having, or reasonably expected to cause, result in or have, a material adverse effect (1) on any partnership's business, operations, properties, taken as a whole, condition, financial or otherwise, results of operations, assets, taken as a whole, liabilities, cash flows or prospects, (2) on market prices for oil and gas prevailing generally in the oil and gas industry since the date of determination of the oil and gas commodity prices used in the determination of the merger value for each partnership, (3) on the price of Pioneer Parent common stock or (4) on the oil and gas industry generally.

If the merger agreement is validly terminated or the merger of any partnership is abandoned, none of Pioneer Parent, Pioneer USA nor any such partnership shall have any liabilities or obligations to the other parties based on the merger agreement or such merger except:

-56-

67

- o Pioneer Parent will pay all expenses and fees of each partnership in connection with the merger of that partnership incurred before the termination of the merger agreement or abandonment of the merger of the partnership; and
- o a party will be liable if that party is in breach of the merger agreement.

AMENDMENTS; WAIVERS

Any provision of the merger agreement may be amended prior to the effective time if the amendment is in writing and signed by Pioneer Parent and Pioneer USA; provided, that after the approval of the merger proposals by the limited partners of each partnership, no amendment shall, without the further approval of the limited partners of each partnership:

- o adversely change the type or amount of, or the method of determining, the consideration to be received in exchange for any partnership interests in the partnership; or
- o materially and adversely affect the rights of the limited partners of the partnership, other than a termination of the merger agreement or abandonment of the merger of the partnership.

Prior to the effective time, the parties may:

- o extend the time for the performance of any of the obligations of the parties;
- o waive any inaccuracies in the representations and warranties in the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

merger agreement or in a document delivered pursuant to the merger agreement; and

- o waive compliance with any agreement or condition in the merger agreement.

Any such extension or waiver will be valid only if it is in writing and signed by the party against whom the extension or waiver is to be effective.

-57-

68

THE SPECIAL MEETINGS

TIME AND PLACE; PURPOSE

The special meeting of the limited partners of each partnership will be held on _____, 2001, at 10:00 a.m., at the Dallas Marriott Las Colinas Hotel, Irving, Texas 75039. The purpose of each special meeting, and any adjournment or postponement of the special meeting for each partnership, is for the limited partners of each partnership to consider and vote on the following matters:

- o A proposal to approve an Agreement and Plan of Merger dated as of _____, 2001, among Pioneer Parent, Pioneer USA and each of the partnerships. Each participating partnership will merge with and into Pioneer USA, with Pioneer USA surviving the merger. Each partnership interest of a participating partnership will be converted into Pioneer Parent common stock. The number of shares of common stock Pioneer Parent will offer for all partnership interests of a participating partnership will be based on (1) the participating partnership's merger value and (2) the average closing price of the Pioneer Parent common stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for the partnership. The merger value for a participating partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the partnership to its partners. For purposes of illustration in this document, we have calculated the number of shares to be issued based on an assumed average closing price of \$18.00 per share of Pioneer Parent common stock. Prior to the date of the special meeting for each partnership, we will update the number of shares to be issued using the actual average closing price of Pioneer Parent common stock for the ten trading days ending three business days before the initial date of the special meeting. The Pioneer Parent common stock will be allocated among the partners based on the liquidation provisions of each partnership agreement. Pioneer Parent will not issue fractional shares to any limited partner upon completion of the merger of any partnership. Instead, Pioneer Parent will round any fractional shares of Pioneer Parent common stock up to the nearest whole share. Pioneer USA will not receive any Pioneer Parent common stock for its partnership interests in the participating partnerships.

- o A proposal to amend the partnership agreement of each partnership to permit the partnership's merger with Pioneer USA. If the amendment is not approved, that partnership cannot merge into Pioneer USA even if the partners of that partnership approve the merger agreement.

- o A proposal (A) to approve the opinion issued to Pioneer USA by

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

on behalf of the limited partners of each partnership that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners (1) will result in the loss of any limited partner's limited liability or (2) will adversely affect the federal income tax classification of the partnership or any of its limited partners and (B) to approve the selection of _____ as special legal counsel for the limited partners of each partnership to render such legal opinion.

The Delaware Revised Uniform Limited Partnership Act and the Texas Revised Limited Partnership Act require limited partner approval and adoption of the merger agreement and the merger amendment. Generally, the partnership agreement of each partnership requires that special legal counsel for the limited partners render its legal opinion related to the limited partners' approval of the merger of that partnership. See "The Merger of Each Partnership -- Legal Opinion for Limited Partners" on page 46 of this document.

PIONEER USA'S BOARD OF DIRECTORS UNANIMOUSLY DETERMINED THAT THE MERGER OF EACH PARTNERSHIP IS ADVISABLE, FAIR TO THE UNAFFILIATED LIMITED PARTNERS OF THE PARTNERSHIP, AND IN THEIR BEST INTERESTS. THE BOARD RECOMMENDS THAT THE UNAFFILIATED LIMITED PARTNERS VOTE FOR THE MERGER PROPOSALS FOR EACH PARTNERSHIP IN WHICH THEY OWN AN INTEREST. ALTHOUGH PIONEER USA'S BOARD OF DIRECTORS HAS ATTEMPTED TO FULFILL ITS FIDUCIARY DUTIES TO THE LIMITED PARTNERS OF EACH PARTNERSHIP, PIONEER USA'S BOARD OF DIRECTORS HAD CONFLICTING INTERESTS IN EVALUATING EACH MERGER BECAUSE EACH MEMBER OF ITS BOARD OF DIRECTORS IS ALSO AN OFFICER OF PIONEER PARENT.

RECORD DATE; VOTING RIGHTS AND PROXIES

Only limited partners of record of each partnership at the close of business on _____, 2001 are entitled to notice of and to vote at the special meeting for the partnership in which they own partnership interests, or any adjournments or postponements of such special meeting. Pioneer USA is entitled to vote partnership interests it holds as a limited partner in all of the partnerships except:

- Parker & Parsley 85-A, Ltd.
- Parker & Parsley 85-B, Ltd.
- Parker & Parsley Private Investment 85-A, Ltd.
- Parker & Parsley Selected 85 Private Investment, Ltd.
- Parker & Parsley Private Investment 86, Ltd.

-58-

69

- Parker & Parsley 91-A, L.P.
- Parker & Parsley 91-B, L.P.

Pioneer USA's affiliates are also entitled to vote partnership interests they hold as limited partners in all but the seven partnerships listed above. However, no affiliates of Pioneer USA own such interests. See "Ownership of Partnership Interests" on page 64 of this document.

Limited partners of record of each partnership are entitled to vote at the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership's special meeting based on the limited partners' respective percentage of partnership interests in the partnership. Each limited partner will receive a proxy card for all partnerships in which that limited partner holds partnership interests. The proxy card will indicate the amount of Pioneer Parent common stock offered with respect to such partnership interests in each partnership. Although the number of shares of Pioneer Parent common stock offered as shown on the proxy card may change, the value of Pioneer Parent common stock offered as shown on the proxy card will not be adjusted. The percentage of partnership interests that a limited partner holds in a partnership is determined by comparing the amount of the limited partner's initial investment, including any additional assessments, in the partnership to the total investment of all partners, including any additional assessments, in the partnership. The aggregate initial investment, including any additional assessments, in each of the partnerships by the limited partners is set forth in Table 1 of Appendix A.

A limited partner of record may grant a proxy to vote for or against, or may abstain from voting on, the merger proposals applicable to each of the partnerships in which the limited partner holds partnership interests. To be effective for purposes of granting a proxy to vote on the merger proposals applicable to each partnership, a proxy card must be properly completed, executed and delivered to Pioneer USA's information agent, in person or by mail, telegraph, telex or facsimile before the special meeting for the partnership. All partnership interests represented by properly executed proxies will, unless these proxies have been previously revoked, be voted in accordance with the instructions indicated in these proxies. If no instructions are indicated, the partnership interests will be voted for approval and adoption of the merger proposals. A properly executed proxy card for a partnership marked abstain is counted as present for purposes of determining the presence or absence of a quorum at the special meeting for the partnership, but will not be voted. Accordingly, abstentions will have the same effect as a vote against the merger proposals.

Unrevoked proxies granted in the proxy cards for a partnership will be voted at the special meeting for that partnership or at any adjournment or postponement of the special meeting, if received by Pioneer USA's information agent before the special meeting for the partnership. Proxies granted in the proxy cards for a partnership will remain valid until the completion of the special meeting for the partnership. Each partnership agreement requires that a meeting be held within 60 days of the date of mailing of the notice of meeting. None of the partnership agreements specifically addresses, and Pioneer USA has not sought any opinions of counsel as to, whether proxies may be voted at a meeting originally scheduled to be held within 60 days of the sending of the notice and adjourned or postponed to a date more than 60 days after the date of notice. Pioneer USA will not accept a vote of the limited partners of any partnership in such circumstances unless it receives an opinion of counsel that such a vote would be valid.

The inspector of election appointed for the special meeting for each partnership will tabulate the votes cast by proxy or in person at the special meeting.

REVOCATION OF PROXIES

You may revoke a proxy you have given at any time before that proxy is

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

voted at the special meeting for each partnership in which you own an interest by:

- o giving written notice of revocation to Pioneer USA;
- o signing and returning a later dated proxy; or
- o voting in person at the special meeting.

Your notice of revocation will not be effective until Pioneer USA receives it at or before the special meeting for each partnership in which you own an interest. Your presence at any such special meeting will not automatically revoke your proxy in a proxy card. Revocation during any such special meeting will not affect votes previously taken.

You may deliver your written notice of revocation in person or by mail, telegraph, telex, or facsimile. Any written notice of revocation must specify your name and limited partner number as shown on your proxy card and the name of the partnership to which your revocation relates.

-59-

70

SOLICITATION OF PROXIES

We are soliciting your proxy pursuant to this document. The aggregate estimated expenses and fees of the merger of each partnership that have been allocated to each partnership include those incurred in connection with solicitation of the enclosed proxy as described below.

Pioneer USA has retained D.F. King & Co., Inc. to assist in the solicitation of proxies from the limited partners of each partnership. The total fees and expenses of D.F. King & Co., Inc. are estimated to aggregate \$225,000 and have been allocated among the partnerships, on a pro rata basis, based on each partnership's reserve value. In addition to solicitation by use of the mail, proxies may be solicited by D.F. King & Co., Inc. and by directors, officers and employees of Pioneer Parent and Pioneer USA in person or by telephone, telegram, facsimile or e-mail. The directors, officers and employees will not be additionally compensated, but may be reimbursed for out-of-pocket expenses incurred in connection with the solicitation.

Arrangements may also be made with other brokerage firms, banks, custodians, nominees and fiduciaries for the forwarding of proxy solicitation materials to owners of limited partnership interests held of record by those persons. Each partnership will pay its pro rata share, based on its reserve value, of those persons' reasonable expenses incurred in forwarding those materials.

Pioneer USA has also retained D.F. King & Co., Inc. to act as information agent to perform consulting, administration and clerical work with respect to the merger of each partnership. Pioneer USA has agreed to indemnify D.F. King & Co., Inc. against certain liabilities, including liabilities under the federal securities laws. D.F. King & Co., Inc. will also be responsible for the receipt

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and tabulation of the proxy cards. The fees and expenses of D.F. King & Co., Inc. for its services as information agent and tabulator are included in the aggregate amount set forth above.

We intend to mail certificates representing shares of Pioneer Parent common stock to the partners of record of each participating partnership promptly after completing the merger of that partnership. Certificates representing partnership interests will be automatically canceled, and you will not have to surrender your certificates to receive the Pioneer Parent common stock.

QUORUM

The presence in person or by properly executed proxy of a majority of limited partnership interests entitled to vote in each partnership is necessary to constitute a quorum at that partnership's special meeting.

If a quorum is not present at any special meeting, the limited partners entitled to vote who are present or represented by proxy at that special meeting may adjourn or postpone that special meeting without notice until a quorum is present. If a quorum is present at the adjourned or postponed meeting, any business may be transacted that may have been transacted at the special meeting had a quorum originally been present. If the adjournment or postponement is for more than 30 days or if after the adjournment or postponement a new record date is fixed for the adjourned or postponed meeting, a notice of the adjourned or postponed meeting shall be given to each limited partner of record entitled to vote at the adjourned or postponed meeting. The persons named as proxies intend to vote in favor of any motion to adjourn or postpone the special meeting of any partnership if, prior to the special meeting, they have not received sufficient proxies to approve the merger of the partnership as described in this document. This process will be repeated at any adjourned or postponed meeting until sufficient proxies to vote in favor of the merger of the partnership have been received or it appears that sufficient proxies will not be received.

REQUIRED VOTE; BROKER NON-VOTES

Approval of the merger proposals for each partnership requires the affirmative vote of the limited partners holding a majority of limited partnership interests in that partnership, except that Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P. each require the favorable vote of the holders, other than Pioneer USA, of 66-2/3% of its limited partnership interests to approve those merger proposals. Pioneer USA is entitled to vote its partnership interests on the merger proposals for each partnership except for the partnerships set forth under "The Special Meetings -- Record Date; Voting Rights and Proxies" on page 58. As a result, for each partnership in which Pioneer USA is entitled to vote, approval of at least a majority, and for Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P., at least 66-2/3%, of the unaffiliated limited partners is not required to approve the merger proposals. However, for each partnership in which Pioneer Parent is not entitled to vote, the approval of the unaffiliated limited partners is required to approve the merger proposals.

Brokers, if any, who hold partnership interests in street name for customers have the authority to vote on "routine" proposals when they have not received instructions from beneficial owners. However, these brokers are precluded from exercising their voting discretion with respect to the approval and adoption of non-routine matters such as the merger proposals and thus, absent specific instructions from the beneficial owner of the partnership

interests, brokers are not empowered to vote the partnership interests with respect to the merger proposals. These "broker non-votes" will have the effect of a vote against the merger proposals.

PARTICIPATION BY ASSIGNEES

Pioneer USA has the discretionary authority granted to it under each partnership agreement to withhold its consent to the substitution of any assignees as partners of the partnership. To facilitate the notification given to limited partners of each partnership about the merger of the partnership, Pioneer USA intends to exercise that authority and withhold its consent to the substitution of any assignees as partners of the partnership from the date on which this document is initially filed with the SEC until the earlier to occur of the closing date of the merger of the partnership, or the termination or abandonment of the transaction by Pioneer Parent and Pioneer USA.

SPECIAL REQUIREMENTS FOR SOME LIMITED PARTNERS

Pioneer USA may require that any proxy card executed by an entity, such as a trust, corporation, or partnership, be accompanied by evidence or an opinion of counsel that such entity:

- o has met all requirements of its governing instruments; and
- o is authorized to execute and deliver the proxy card under the laws of the jurisdiction under which the entity was organized.

Pioneer USA will require the named trustee and the beneficial owner of trusts, including individual retirement accounts, to execute the proxy card. In some cases, Pioneer USA may provide a limited partner with an envelope, pre-addressed to his individual retirement account trustee, so that the limited partner may forward his executed proxy card to the trustee for the trustee's signature, if necessary, and subsequent delivery to Pioneer USA. Delivery of a proxy card to the trustee, with or without the use of a pre-addressed envelope, and delivery of a proxy card from the trustee to Pioneer USA are at the risk of the limited partner.

VALIDITY OF PROXY CARDS

A proxy card will not be valid unless it has been properly completed and executed and timely delivered to Pioneer USA's information agent with all other required documents. Pioneer USA will determine all questions as to the validity, form, eligibility, time of receipt and acceptance of a proxy card and its determination will be final and binding. Pioneer USA's interpretation of the terms and conditions of the merger of each partnership, including the instructions for the proxy card, will also be final and binding.

A proxy card will not be valid until any irregularities have been cured or waived. If Pioneer USA does not waive the irregularities, it will return the defective proxy card to the limited partner as soon as practicable. Pioneer USA is under no duty to give notification of defects in a proxy card and will incur no liability if it fails to give such notification.

Delivery of a proxy card is at the risk of the limited partner. A proxy

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

card will be effective for purposes of voting only when it is actually received by Pioneer USA's information agent. To ensure receipt of the proxy card and all other required documents, Pioneer USA suggests that limited partners use overnight courier delivery or certified or registered mail, return receipt requested.

LOCAL LAWS

Proxy solicitations will not be made to, nor will proxy cards be accepted from, limited partners of any partnership in any jurisdiction in which the solicitations would not be in compliance with federal and state securities or other laws. In any jurisdiction where securities laws require the proxy solicitations to be made by a licensed broker or dealer, the proxy solicitations are being made on behalf of Pioneer Parent and Pioneer USA by , which is licensed under the laws of such jurisdiction.

-61-

72

COMPARATIVE PER SHARE MARKET PRICE AND DIVIDEND INFORMATION

The table below sets forth, for the calendar quarters indicated, the reported high and low closing prices of Pioneer Parent common stock as reported on the New York Stock Exchange Composite Transaction Tape, in each case based on published financial sources. Pioneer Parent's board of directors did not declare dividends to the holders of Pioneer Parent common stock during 1999, 2000 or the three months ended March 31, 2001. The determination of the amount of future cash dividends, if any, to be declared and paid is in the sole discretion of Pioneer Parent's board of directors and will depend on the following factors:

- o Pioneer Parent's financial condition;
- o earnings and funds from operations;
- o the level of Pioneer Parent's capital and exploration expenditures;
- o dividend restrictions in Pioneer Parent's financing agreements;
- o Pioneer Parent's future business prospects; and
- o other matters that Pioneer Parent's board of directors deems relevant.

None of the partnership interests of any partnership are traded on a national stock exchange or in any other significant market. No liquid market exists for interests in any of the partnerships. See Table 15 of Appendix A for historical information about recent trades per \$1,000 limited partner investment

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in each partnership for the three months ended March 31, 2001 and the years ended December 31, 2000 and 1999. The average quarterly cash distributions per \$1,000 limited partner investment in each partnership for 1999, 2000 and the year-to-date in 2001 are set forth in Table 7 of Appendix A.

On April 16, 2001, the last full trading day prior to the announcement of the proposed merger of each partnership, Pioneer Parent common stock closed at \$17.27 per share. On , 2001, Pioneer Parent common stock closed at \$ per share.

PIONEER PARENT COMMON

-62-

73

INTERESTS OF PIONEER PARENT, PIONEER USA AND THEIR DIRECTORS AND OFFICERS

A number of conflicts of interest are inherent in the relationships among each partnership, Pioneer Parent, Pioneer USA and their respective directors and officers.

CONFLICTING DUTIES OF PIONEER USA, INDIVIDUALLY AND AS GENERAL PARTNER

Pioneer USA, as general partner of each partnership, has a duty to manage each partnership in the best interests of the limited partners. Pioneer USA also

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

has a duty to operate its business for the benefit of its sole stockholder, Pioneer Parent. Consequently, Pioneer USA's duties to the limited partners of each partnership may conflict with its duties to Pioneer Parent.

The members of the board of directors of Pioneer USA have a duty to cause Pioneer USA to manage each partnership in the best interests of the limited partners. All members of the board of directors of Pioneer USA are officers of Pioneer Parent and Pioneer USA. Thus, the members of the board of directors of Pioneer USA have duties to operate Pioneer USA's business for the benefit of its sole stockholder, Pioneer Parent, and, as officers of Pioneer Parent, to operate Pioneer Parent's business in its best interests. Consequently, the duties of the members of the board of directors of Pioneer USA to the limited partners may conflict with the duties of those members to Pioneer Parent, Pioneer USA and their stockholders.

Neither Pioneer Parent nor Pioneer USA retained an independent representative to negotiate on behalf of the limited partners of each partnership because:

- o neither the partnership agreement for any partnership nor any applicable law provides for any procedure to identify and select an independent representative, unless each limited partner of the partnership agrees to the independent representative;
- o Pioneer USA, as sole or managing general partner of each partnership, still has its fiduciary duty to the limited partners; and
- o it would be (1) cost-prohibitive to find one or more persons to represent the limited partners in all of the partnerships because no one other than Pioneer USA owns an interest in all of the partnerships and (2) impractical to have 46 independent representatives.

PIONEER USA'S EMPLOYEES PROVIDE SERVICES TO THE PARTNERSHIPS

None of the partnerships currently has any employees. Each partnership relies on Pioneer USA's personnel. Pioneer USA provides all management functions on behalf of each partnership. Therefore, each partnership currently competes with Pioneer USA for the time and resources of Pioneer USA's employees.

FINANCIAL INTERESTS OF DIRECTORS AND OFFICERS

The directors and officers of Pioneer Parent and Pioneer USA have equity interests in Pioneer Parent through stock ownership, stock options and other stock-based compensation, but do not have financial or equity interests in any partnership. See "Ownership of Partnership Interests" on page 64. The boards of directors of Pioneer Parent and Pioneer USA believe that any economic benefit their directors and officers may obtain from the merger of each partnership, or the mergers of all of the partnerships in the aggregate, will be minimal, if any, and will not result in a material economic benefit, if any, to their directors and officers individually.

THE PARTNERSHIPS PAY OPERATOR FEES TO PIONEER USA

Pioneer USA operates most of each partnership's wells. Each partnership has entered into one or more standard industry operating agreements with Pioneer

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

USA. Those operating agreements establish the base fee paid by the partnership to Pioneer USA for its lease operating services. That base fee adjusts annually based on a rate established by the Council of Petroleum Accountants Society, or COPAS, for the oil and gas industry.

-63-

74

OWNERSHIP OF PARTNERSHIP INTERESTS

Pioneer Parent does not directly own any partnership interests in any partnership. Pioneer Parent beneficially owns all of Pioneer USA's partnership interests in each partnership. Table 6 of Appendix A to this document contains the voting percentage as of March 31, 2001, of the outstanding limited partnership interests for each partnership that are beneficially owned by Pioneer USA as a limited partner. As of March 31, 2001, no person or entity known by Pioneer USA beneficially owns more than 5% of the outstanding limited partnership interests in any partnership, except in Parker & Parsley 81-I, Ltd., Parker & Parsley 82-I, Ltd. and Parker and Parsley 82-III, Ltd. In those partnerships, Pioneer USA repurchased and now owns partnership interests representing the following beneficial ownership percentages:

Parker & Parsley 81-I, Ltd.	5.84%
Parker & Parsley 82-1, Ltd.	10.73%
Parker & Parsley 82-III, Ltd.	5.97%

Pioneer USA has sole investment and voting power with respect to partnership interests it beneficially owns.

Except as set forth above, none of Pioneer Parent, Pioneer USA, or, to the knowledge of Pioneer USA, any of their directors or executive officers, or any associate or majority-owned subsidiary of Pioneer Parent, Pioneer USA or any such director or officer:

- o beneficially owns any partnership interests of any partnership; or
- o has effected any transactions in any partnership interests of any partnership during the past 60 days.

TRANSACTIONS AMONG ANY PARTNERSHIP, PIONEER PARENT, PIONEER USA AND THEIR DIRECTORS AND OFFICERS

Except as described in this document, there have not been any transactions, negotiations or material contacts between Pioneer Parent, Pioneer USA, any of their respective subsidiaries, or, to the knowledge of Pioneer Parent and Pioneer USA, any director or executive officer of Pioneer Parent or Pioneer USA or any associate of any such persons, on the one hand, and any partnership or any of its general partners, including Pioneer USA, directors, officers or affiliates, on the other hand, that are required to be disclosed pursuant to the rules and regulations of the SEC. Except as described in this document, none of Pioneer Parent, Pioneer USA, or, to the knowledge of Pioneer Parent and Pioneer USA, any director or executive officer of Pioneer Parent or Pioneer USA, has any agreement, arrangement or understanding with any other person with respect to

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

any securities of any partnership.

During March 2001, Pioneer Parent offered to acquire all of the direct oil and gas interests owned by some former officers and employees of Pioneer Parent and Pioneer USA in properties in which Pioneer Parent and Pioneer USA own interests. The merger value for the direct oil and gas interests was equal to the present value of estimated future net revenues from the oil and gas reserves attributable to the interests, as of March 31, 2001. In determining the present value, Pioneer Parent and Pioneer USA used (1) a five-year NYMEX futures price for oil and gas as of March 2001 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 13.5% discount rate. The consideration offered in the purchases of the direct oil and gas interests was all cash since offering and registering Pioneer Parent common stock in those purchases was cost-prohibitive due to the small size of such transactions.

Additionally, in December 2000, Pioneer Parent received the approval of the partners of 13 employee limited partnerships to merge with Pioneer USA for total merger consideration of \$2.0 million. Of the total merger consideration, \$0.3 million was paid to current Pioneer Parent employees. The merger value of each employee partnership was equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of September 30, 2000, less the cash distributions on October 15, 2000 and November 15, 2000, by that partnership to its partners. In determining the present value, Pioneer Parent and Pioneer USA used (1) a five-year NYMEX futures price for oil and gas as of August 25, 2000 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 13.5% discount rate. Using the same parameters as described above, Pioneer Parent purchased all of the direct oil and gas interests held by Scott D. Sheffield, its chairman of the board of directors and chief executive officer, for \$0.2 million during October 2000. The consideration paid in the mergers of the employee limited partnerships and the purchase of Mr. Sheffield's direct oil and gas interests was all cash. As with the purchases of the direct oil and gas interests described above, offering and registering Pioneer Parent common stock in these transactions was cost-prohibitive due to the small size of such transactions.

If you approve the merger of each partnership in which you own an interest, there are various ways that Pioneer USA may use the properties. Pioneer USA may continue to operate the properties, it may sell the properties to third

-64-

75

parties, including a royalty trust, or it may spin-off the properties to its stockholder. Although Pioneer USA plans to operate the properties in the immediate future following completion of the merger of each partnership, it has not decided how to use the properties in the long-term.

-65-

76

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

MANAGEMENT

PIONEER PARENT

The following information sets forth the age, business experience during the past five years, positions and offices with Pioneer Parent, and periods of service of each director and executive officer of Pioneer Parent.

NAME ----	AGE ---	POSITION -----
Scott D. Sheffield	48	Chairman of the Board of Directors, President and Chief Executive Officer
Timothy L. Dove	44	Executive Vice President and Chief Financial Officer
Dennis E. Fagerstone	52	Executive Vice President
Mark L. Withrow	53	Executive Vice President, General Counsel and Secretary
Danny L. Kellum	46	Executive Vice President -- Domestic Operations
James R. Baroffio	69	Director
R. Hartwell Gardner	66	Director
James L. Houghton	70	Director
Jerry P. Jones	69	Director
Charles E. Ramsey, Jr.	64	Director

Scott D. Sheffield. Mr. Sheffield, a distinguished graduate of the University of Texas with a Bachelor of Science degree in Petroleum Engineering, has been the Chairman of the Board of Directors of Pioneer Parent since August 1999 and the President and Chief Executive Officer of Pioneer Parent since August 1997. Mr. Sheffield was the Chairman of the Board of Directors, President and Chief Executive Officer of Parker & Parsley Petroleum Company from October 1990 until August 1997. He was the President and a director of Parker & Parsley Petroleum Company from May 1990 until October 1990. Mr. Sheffield was the sole director of Parker & Parsley Petroleum Company from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company, a predecessor of Parker & Parsley Petroleum Company, as a petroleum engineer in 1979. Mr. Sheffield served as Vice President-- Engineering of Parker & Parsley Development Company from September 1981 until April 1985, when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board of Directors and Chief Executive Officer of Parker & Parsley Development Company. Before joining Parker & Parsley Development Company 's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove, a graduate of Massachusetts Institute of Technology with a Bachelor of Science degree in Mechanical Engineering and the University of Chicago with an M.B.A., has been Executive Vice President and Chief Financial Officer of Pioneer Parent since February 2000. He was Executive Vice President-- Business Development of Pioneer Parent from August 1997 until February 2000. Mr. Dove joined Parker & Parsley Petroleum Company in May 1994 as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Vice President-- International and was promoted to Senior Vice President-- Business Development in October 1996, in which position he served until August 1997. Before joining Parker & Parsley Petroleum Company, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp., in various capacities in international exploration and production, marketing, refining, and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, has been an Executive Vice President of Pioneer Parent since August 1997. Mr. Fagerstone served as Executive Vice President and Chief Operating Officer of MESA Inc. from March 1997 until August 1997. Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of MESA Inc. from October 1996 to February 1997, and served as Vice President-- Exploration and Production of MESA Inc. from May 1991 to October 1996. Mr. Fagerstone served as Vice President-- Operations of MESA Inc. from June 1988 until May 1991.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a Bachelor of Science degree in Accounting and Texas Tech University with a J.D. degree, has been the Executive Vice President, General Counsel and Secretary of Pioneer Parent since August 1997. He served as Vice President-- General Counsel of Parker & Parsley Petroleum Company from February 1991 until January 1995, and served as Senior Vice President and General Counsel of Parker & Parsley Petroleum Company from January 1995 until August 1997. He was Parker & Parsley Petroleum Company's Secretary from August 1992 until August 1997. Mr. Withrow joined Parker & Parsley Development Company in January 1991. Before joining Parker & Parsley Development Company, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny L. Kellum. Mr. Kellum, a graduate of Texas Tech University with a Bachelor of Science degree in Petroleum Engineering in 1979, has been Executive Vice President-- Domestic Operations of Pioneer Parent since May 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations. From August 1997 until December 1999, Mr. Kellum served as Vice President-- Permian Division. Mr. Kellum served as Spraberry District Manager for Parker & Parsley Petroleum Company from 1989 until 1994 and as Vice President of

-66-

77

the Spraberry and Permian Divisions for Parker & Parsley Petroleum Company from 1994 until August 1997. He joined Parker & Parsley Petroleum Company in 1981 as Operations Engineer after a brief career with Mobil Oil Corporation.

James R. Baroffio. Dr. Baroffio received a B.A. in Geology at the College of Wooster, Ohio, an M.S. in Geology at Ohio State University, and a Ph.D. in Geology at the University of Illinois. Before becoming a director of Pioneer Parent in December 1997, Dr. Baroffio enjoyed a long career with Standard Oil Company of California, the predecessor of Chevron Corporation, where he served

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

as President, Chevron Research and Technology Center from 1980 to 1985 and eventually retired as President of Chevron Canada Resources in 1994. Dr. Baroffio was a member of the Board of Directors of the Rocky Mountain Oil & Gas Association and Chairman of the U.S. National Committee of the World Petroleum Congress. His community leadership positions included membership on the Board of Directors of Glenbow Museum and the Nature Conservancy of Canada, as well as serving as President of the Alberta Nature Conservancy.

R. Hartwell Gardner. Mr. Gardner, a graduate of Colgate University with a Bachelor of Arts degree in Economics and Harvard University with an M.B.A., became a director of Pioneer Parent in August 1997. He served as a director of Parker & Parsley Petroleum Company from November 1995 until August 1997. Until his retirement in September 1995, Mr. Gardner was the Treasurer of Mobil Oil Corporation and Mobil Corporation from 1974 and 1976, respectively. Mr. Gardner is a member of the Financial Executives Institute of which he served as Chairman in 1986/1987 and is a Director of Oil Investment Corporation Ltd. and Oil Casualty Investment Corporation Ltd., Pembroke, Bermuda.

James L. Houghton. Mr. Houghton is a certified public accountant and a graduate of Kansas University with a Bachelor of Science degree in Accounting, as well as a Bachelor of Laws degree. Mr. Houghton has served as a director of Pioneer Parent since August 1997, and as a director of Parker & Parsley Petroleum Company from October 1991 until August 1997. Until his retirement in September 1991, Mr. Houghton was the lead oil and gas tax specialist for the accounting firm of Ernst & Young LLP, was a member of Ernst & Young's National Energy Group, and had served as its Southwest Regional Director of Tax. Mr. Houghton is a member of the American Institute of Certified Public Accountants, a member of the Oklahoma Society of Certified Public Accountants, a former Chairman of its Federal and Oklahoma Taxation Committee and past President of the Oklahoma Institute of Taxation. He has also served as a Director for the Independent Petroleum Association of America and as a member of its Tax Committee.

Jerry P. Jones. Mr. Jones earned a Bachelor of Science degree from West Texas State College in 1953 and a Bachelor of Law degree from the University of Texas School of Law in 1959. Mr. Jones has served as a director of Pioneer Parent since August 1997, and as a director of Parker & Parsley Petroleum Company from May 1991 until August 1997. Mr. Jones has been an attorney with the law firm of Thompson & Knight, P.C., Dallas, Texas, since September 1959 and was a shareholder in that firm until January 1998, when he retired and became of counsel to the firm. Mr. Jones specialized in civil litigation, especially in the area of energy disputes.

Charles E. Ramsey, Jr. Mr. Ramsey is a graduate of the Colorado School of Mines with a Petroleum Engineering degree and a graduate of the Smaller Company Management program at the Harvard Graduate School of Business Administration. Mr. Ramsey has served as a director of Pioneer Parent since August 1997. Mr. Ramsey served as a director of Parker & Parsley Petroleum Company from October 1991 until August 1997. Since October 1991, he has operated Ramsey Energy LLC, an independent management and financial consulting firm. From June 1958 until June 1986, Mr. Ramsey held various engineering and management positions in the oil and gas industry and, for six years before October 1991, was a Senior Vice President in the Corporate Finance Department of Dean Witter Reynolds Inc. in Dallas, Texas. His industry experience includes 12 years of senior management

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

experience in the positions of President, Chief Executive Officer and Executive Officer and Executive Vice President of May Petroleum Inc. Mr. Ramsey is also a former director of MBank Dallas, the Dallas Petroleum Club and Lear Petroleum Corporation.

PIONEER USA

The following information sets forth the age, business experience during the past five years, positions and offices with Pioneer USA, and periods of service of each director and executive officer of Pioneer USA.

NAME ----	AGE ---	POSITION -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Director, Executive Vice President and Chief Financial Officer

Scott D. Sheffield. Mr. Sheffield has been the President of Pioneer USA since August 1997 and served as the Chairman of the Board of Directors of Pioneer USA from August 1997 until June 1999. He served as a Director of Pioneer USA's predecessor, Parker & Parsley Petroleum USA, Inc., from January 1991 until August 1997. He was an Executive Vice President of Parker & Parsley Petroleum USA, Inc. from December 1995 until August 1997. He was the President of Parker & Parsley Petroleum USA, Inc. from December 1993 until December 1995. Mr. Sheffield was President and Chief Executive Officer of Parker & Parsley Petroleum USA, Inc. from January 1991 until December 1993. Mr. Sheffield's other business experience and biographical information are set forth above under "Management-- Pioneer Parent."

Timothy L. Dove. Mr. Dove has been a Director of Pioneer USA since August 1997 and has been Executive Vice President and Chief Financial Officer of Pioneer USA since February 2000. He was the Executive Vice President-- Business Development of Pioneer USA from August 1997 until February 2000. He served as a Director of Parker & Parsley Petroleum USA, Inc. from June 1997 until August 1997. He was a Senior Vice President of Parker & Parsley Petroleum USA, Inc. from October 1996 until August 1997. He was a Vice President of Parker & Parsley Petroleum USA, Inc. from December 1995 until October 1996. Mr. Dove's other business experience and biographical information are set forth above under "Management-- Pioneer Parent."

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Dennis E. Fagerstone. Mr. Fagerstone has been a Director of Pioneer USA since August 1997 and an Executive Vice President of Pioneer USA since August 1997. Mr. Fagerstone's other business experience and biographical information are set forth above under "Management-- Pioneer Parent."

Mark L. Withrow. Mr. Withrow has been a Director of Pioneer USA since August 1997. He became an Executive Vice President, the General Counsel and the Secretary of Pioneer USA in August 1997. He served as a Director of Parker & Parsley Petroleum USA, Inc. from January 1996 until August 1997. He was a Senior Vice President and the Secretary of Parker & Parsley Petroleum USA, Inc. from January 1995 until August 1997. He was a Vice President and the Secretary of Parker & Parsley Petroleum USA, Inc. from December 1993 until January 1995. He was a Vice President of Parker & Parsley Petroleum USA, Inc. from January 1991 until December 1993. Mr. Withrow's other business experience and biographical information are set forth above under "Management-- Pioneer Parent."

Danny L. Kellum. Mr. Kellum has been a Director of Pioneer USA since February 2000, and has been Executive Vice President of Pioneer USA since May 2000. He served as Vice President -- Domestic Operations of Pioneer USA from January 2000 until May 2000, as Vice President -- Permian Division of Pioneer USA from April 1998 until December 1999 and as Vice President -- Spraberry Division of Pioneer USA from December 1997 until March 1998. Mr. Kellum's other business experience and biographical information are set forth above under "Management -- Pioneer Parent."

-68-

79

PIONEER PARENT

Pioneer Parent is a large independent exploration and production company with total proved reserves equivalent to 3.8 trillion cubic feet of natural gas, or 628 million barrels of oil. Pioneer Parent's proved reserves are balanced equally between natural gas and oil, and Pioneer Parent has a reserves-to-production ratio of 14 years. Three core areas in the United States comprise 67% of Pioneer Parent's reserve base: the Hugoton gas field, the West Panhandle gas field, and the Spraberry oil and natural gas field. Pioneer Parent also has domestic properties in East Texas, the Gulf Coast, and the offshore Gulf of Mexico as well as a significant international presence through its properties in Argentina, Canada, South Africa, and Gabon.

Pioneer Parent seeks to increase net asset value and production by combining lower risk development drilling with higher risk exploration activity. Pioneer Parent has identified over 1,700 development drilling locations on its properties in the U.S., Argentina and Canada. Approximately 76% of the identified 1,700 development drilling locations have proved undeveloped reserves attributable to them. Pioneer Parent's exploration program is focused in the deepwater Gulf of Mexico, the Gulf Coast shelf, South Africa and Gabon. Pioneer Parent expects significant new production from the deepwater Gulf of Mexico and South Africa in 2002 and 2003 as it builds on its recent exploration successes in those areas. The production from Pioneer Parent's long-lived reserves in the Spraberry, Hugoton and West Panhandle fields are expected to provide stable cash

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

flows to fund Pioneer Parent's development and exploration activities.

During 2000, Pioneer Parent spent \$340 million for capital expenditures to add 437 billion cubic feet of natural gas equivalent reserves. As a consequence, in 2000 Pioneer Parent replaced 167% of its production at an acquisition and finding cost of \$.78 per Mcf equivalent. Pioneer Parent's acquisition and finding cost is the result obtained by dividing total costs incurred by the sum of revisions of previous estimates, purchases of minerals-in-place and new discoveries and extensions. Pioneer Parent drilled 296 wells with 90% success worldwide, including 83 exploration and extension wells with 73% success.

For 2001, Pioneer Parent has budgeted \$430 million of capital expenditures, a 26% increase over 2000 capital expenditures but less than expected available cash flow. Approximately 73% of the 2001 capital expenditure budget is for development activities with the remaining 27% for exploration. Pioneer Parent plans to drill approximately 460 development wells and 26 exploratory wells in its 2001 program, and approximately 65% of the capital expenditures will be for drilling activities in the U.S.

KEY PROJECTS TO INCREASE PRODUCTION

Pioneer Parent expects to increase its production of oil and gas from current levels by 25% to 30% on a gas equivalent basis by early to mid 2003, primarily from four projects. The production increases anticipated from the four projects are derived from currently booked proved undeveloped reserves. The projects in general build on Pioneer Parent's recent exploration successes.

- o The Canyon Express project is a joint development of three deepwater Gulf of Mexico discoveries, including Pioneer Parent's Aconcagua and Camden Hills fields. The project is being developed with a capacity to deliver 500 million cubic feet of natural gas per day by the summer of 2002. Pioneer Parent owns an 18% interest in the Canyon Express project and expects that production from the project will increase Pioneer Parent's North American natural gas production by 30% from current levels.
- o Pioneer Parent's first well in offshore South Africa confirmed the presence of commercial oil reserves and resulted in Pioneer Parent's plans to develop the Sable oil field. First production from the field is expected in late 2002 or early 2003 at daily rates of 25 to 30 thousand barrels per day. Pioneer Parent has a 35% working interest in the field, and production from the project is expected to increase Pioneer Parent's total oil production by more than 20%. Pioneer Parent has also discovered oil and natural gas at its Boomslang prospect in offshore South Africa and plans a second well on the prospect later in 2001.
- o The Devils Tower discovery was Pioneer Parent's second in the deepwater Gulf of Mexico. The oil field has been successfully appraised, and development plans call for first production in early

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

2003 with additional drilling planned this year. Pioneer Parent has a 25% working interest in the field, and production from the field is expected to increase Pioneer Parent's total oil production by approximately 20% from current levels.

- o In the East Texas Bossier natural gas play, Pioneer Parent holds interests in over 130,000 acres and plans to drill or participate in over 35 wells during 2001. The play's strong initial natural gas flow rates are expected to provide significant new production growth.

THE PARTNERSHIPS

GENERAL

Pioneer USA's predecessor, Parker & Parsley Petroleum USA, Inc. or its predecessors or affiliates, sponsored each partnership. As a result of the merger of Parker & Parsley Petroleum Company and MESA Inc. to form Pioneer Parent on August 7, 1997, Pioneer USA became the managing or sole general partner of each partnership.

Appendix A to this document sets forth information about each partnership, including proved reserves as of December 31, 2000, estimated reserves as of March 31, 2001, oil and gas production, average sales prices and production costs, productive wells and developed acreage, and historical cash distributions. In addition, the supplement for each partnership constitutes an integral part of this document. You should read Appendix A and the supplement carefully in their entirety.

THE DRILLING PARTNERSHIPS

The drilling partnerships consist of the following 43 limited partnerships that were formed from 1981 through 1991:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

reserves primarily by drilling low-risk development wells in the Spraberry field of the Permian Basin of West Texas. The oil and gas properties of each drilling partnership consist primarily of leasehold interests in producing properties located in Texas. The partners of a drilling partnership received a tax benefit from drilling activities in the partnership's first year. Subsequently, each drilling partnership has regularly distributed its net cash flow. As of the date of this document, each drilling partnership has expended all of its initial capital contributions.

For a discussion of transactions between each drilling partnership and Pioneer USA, see the notes to the financial statements of each drilling partnership included in the supplement for the partnership.

THE INCOME PARTNERSHIPS

The income partnerships consist of the following three limited partnerships that were formed in 1987 and 1988:

NAME ----	STATE OF FORMATION -----
Parker & Parsley Producing Properties 87-A, Ltd.	Texas
Parker & Parsley Producing Properties 87-B, Ltd.	Texas
Parker & Parsley Producing Properties 88-A, L.P.	Delaware

The primary objective of each income partnership was to acquire long-lived, producing oil and gas properties in the Spraberry Field of the Permian Basin of West Texas. Subsequently, each income partnership has regularly distributed its net cash flow. As of the date of this document, each income partnership has expended all of its initial capital contributions.

For a discussion of transactions between each income partnership and Pioneer USA, see the notes to the financial statements of each income partnership included in the supplement for the partnership.

COMPARISON OF RIGHTS OF STOCKHOLDERS AND PARTNERS

GENERAL

The rights of Pioneer Parent stockholders are currently governed by the Delaware General Corporation Law and the certificate of incorporation and bylaws of Pioneer Parent. The rights of the limited partners of each partnership are currently governed by the Delaware Revised Uniform Limited Partnership Act or the Texas Revised Limited Partnership Act and, in either case, the partnership agreement of the partnership. Accordingly, on completion of the merger of each partnership, the rights of Pioneer Parent stockholders and of limited partners who become Pioneer Parent stockholders in the merger of their partnerships will be governed by the Delaware General Corporation Law, Pioneer Parent's certificate of incorporation and Pioneer Parent's bylaws. The following is a summary of the material differences between the current rights of Pioneer Parent stockholders and those of the limited partners of each partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following summary of the material differences between the Pioneer Parent certificate of incorporation, the Pioneer Parent bylaws and the partnership agreement for each partnership may not contain all the information that is important to you. To review all provisions and differences of such documents in full detail, please read the full text of these documents, the Delaware General Corporation Law, the Delaware Revised Uniform Limited Partnership Act and the Texas Revised Limited Partnership Act. Copies of the Pioneer Parent certificate of incorporation, the Pioneer Parent bylaws and the partnership agreement for each partnership in which you own an interest will be sent to you upon request. For information on how these documents may be obtained, see "Where You Can Find More Information" on the inside front cover page of this document.

Pioneer Parent's certificate of incorporation and bylaws will not be amended in conjunction with the merger of any partnership.

SUMMARY COMPARISON OF TERMS OF SHARES OF PIONEER PARENT COMMON STOCK AND PARTNERSHIP INTERESTS

SHARES	PARTNERSHIP INTERESTS
LIQUIDITY AND MARKETABILITY	
Shares of Pioneer Parent common stock are generally freely transferable. The shares of Pioneer Parent common stock that are currently outstanding are traded on the New York Stock Exchange and the Toronto Stock Exchange, and the shares of Pioneer Parent common stock to be issued in the merger of each participating partnership have been approved for listing on the New York Stock Exchange and the Toronto Stock Exchange upon official notice of issuance.	The partnership interests of each partnership may not be transferred if, in the opinion of the partnership, (1) such transfers would result in the termination of the partnership for purposes under Section 708 of the Internal Revenue Code, or (2) such transfers may not be registered under the Securities Act of 1933 and would result in the violation of any applicable securities laws. Clause (1) is not applicable to the partnership interests of Parker & Parsley 85-A, Ltd., Parker & Parsley Private Investment Fund, Ltd., Parker & Parsley Selected 85 Private Investment Fund, Ltd., Parker & Parsley Private Investment Fund, Ltd., Parker & Parsley 87-A Conv., Ltd., Parker & Parsley 87-B Conv., Ltd. and Parker & Parsley Private Investment Fund, Ltd. In addition, no transferee of a partnership interest has the right to become a partner unless, among other things, the transferee is approved by Pioneer USA, who may withhold such consent in its absolute discretion. Notwithstanding the foregoing restrictions, it was determined that the partnership interests would be a liquid market for the interests of any partnership exists.

 MANAGEMENT, MANAGEMENT LIABILITY AND INDEMNIFICATION

Pioneer Parent is managed by a board of directors elected by its stockholders. Under Delaware law, the directors are accountable to Pioneer Parent and its stockholders as fiduciaries and are required to perform their duties (1) in good faith, (2) in a manner believed to be in the best interests of Pioneer Parent and its stockholders and (3) with such care, including reasonable inquiry, as an ordinarily prudent person in a like position would use under similar circumstances. The liability of the directors is limited pursuant to the provisions of Delaware law and Pioneer Parent's certificate of incorporation, which limits a director's liability for monetary damages to Pioneer Parent or its stockholders for breach of the director's duty of care, where a director fails to exercise sufficient care in carrying out the responsibilities of office. Such provisions, however, would not protect a director for (1) a breach of duty of loyalty, (2) intentional misconduct or knowing violations of law, (3) unlawful dividend payments or redemption of stock, or (4) any transaction in which the director derived an improper personal benefit. Such provisions do not foreclose any other remedy which might be available to Pioneer Parent or its stockholders. Pioneer Parent's certificate of incorporation and Delaware law provide broad indemnification rights to directors and officers who

SHARES

PARTNERSHIP INTERES

Pioneer Parent's certificate of incorporation also requires Pioneer Parent to indemnify its officers and directors under some circumstances for expenses or liabilities incurred as a result of litigation. In addition, Pioneer Parent's certificate of incorporation authorizes Pioneer Parent to advance expenses incurred in the defense of its directors and officers. Pioneer Parent intends to take full advantage of those provisions and has entered into agreements with Pioneer Parent's directors and officers indemnifying them to the fullest extent permitted by Delaware law.

MANAGEMENT COMPENSATION

The board of directors of Pioneer Parent appoints officers to serve at the discretion of the board of directors. The board of directors of Pioneer Parent determines the officer salaries and incentive compensation; provided, that the board of directors of Pioneer Parent may delegate the power to determine such compensation to the chairman of the board, the president or any committee of the board of directors.

Each partnership reimburses Pioneer and administrative expenses.

MANAGEMENT CONTROL

Pioneer Parent's board of directors has exclusive control over Pioneer Parent's business and affairs subject only to the restrictions in Pioneer Parent's certificate of incorporation and bylaws. Pioneer Parent's stockholders have the right to elect members of the board of directors by a plurality vote at each annual meeting of the stockholders. The directors are accountable to Pioneer Parent and its subsidiaries as fiduciaries.

VOTING RIGHTS AND AMENDMENTS

Pioneer Parent's certificate of incorporation provides that (1) stockholders of Pioneer Parent may act only at annual or special meetings of stockholders and not by written consent, (2) Pioneer Parent will hold an annual meeting each calendar year at which its stockholders will elect directors, (3) special meetings of stockholders may be called only by the board of directors, and (4) only business proposed by the board of directors may be considered at special meetings of stockholders.

Most amendments to Pioneer Parent's certificate of incorporation require the approval of the stockholders who own a majority of the outstanding shares of Pioneer Parent common stock. A number of fundamental amendments, however, require approval by a greater percentage of stockholders. For example, any amendment to the following provisions requires the approval of two-thirds of the stockholders: (1) election of directors, (2) authority of the board of directors, (3) stockholder meetings and (4) limitation on the liability of directors. Any amendment to the provision that prohibits action by the written consent of the stockholders in lieu of a meeting requires the approval of 80% of the stockholders. In addition, the following actions require the approval of 80% of the stockholders and the approval of two-thirds of the disinterested stockholders: (1) any merger, consolidation or share exchange involving any person, other than Pioneer Parent or a subsidiary of Pioneer Parent, who beneficially owns 10% or more of the outstanding voting securities of Pioneer Parent, which person we call a related party, (2) some sales, leases, exchanges or similar transactions with

PARTNERSHIP INTERESTS

ANTI-TAKEOVER PROVISIONS

The certificate of incorporation and bylaws of Pioneer Parent and the Delaware General Corporation Law include a number of provisions which may have the effect of encouraging persons considering unsolicited tender offers or other unilateral takeover proposals to negotiate with Pioneer Parent's board of directors rather than pursue non-negotiated takeover attempts. These provisions include (1) a classified board of directors, (2) advance notice requirements for shareholder proposals and director nominations, (3) restrictions on certain business combinations and (4) prohibition against actions approved by written consent without the approval of a specified percentage of the shareholders.

There are no anti-takeover provisions in the partnership agreement for any of the partnerships formed under Delaware or Texas, as the case may be, partnership law.

CONTINUITY OF EXISTENCE

Pioneer Parent has a perpetual existence.

Except for the following partnership agreements, the partnership has a finite life of 50 years from the date of formation. The following partnership agreements were terminated by mutual agreement of the partners in the partnership:

- Parker & Parsley 81-I, Ltd.
- Parker & Parsley 81-II, Ltd.
- Parker & Parsley 82-I, Ltd.
- Parker & Parsley 82-II, Ltd.
- Parker & Parsley 82-III, Ltd.
- Parker & Parsley 83-A, Ltd.
- Parker & Parsley 83-B, Ltd.
- Parker & Parsley 84-A, Ltd.

LIMITED LIABILITY

A stockholder's liability will generally be limited to the amount of such stockholder's contribution to Pioneer Parent's

Assuming the limited partners of a partnership do not take part in the management or control of the partnership,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

capital. Under Delaware law, Pioneer Parent's stockholders will not be liable for Pioneer Parent's debts or obligations. The shares of Pioneer Parent common stock offered by Pioneer Parent under this document, upon issuance, will be fully paid and nonassessable.

of such partnership, a limited partner's liability is generally limited to the limited partner's share of assets and undistributed liabilities of the partnership. A limited partner's return of the limited partner's capital is limited to the extent that a limited partner reduces the limited partner's share of the fair value of the partnership to the extent of the value of the limited partner's contributions. A substituted limited partner is subject to the liabilities and obligations of the substituted limited partner's assigned liabilities of which the substituted partner was unaware at the time he became a partner and which could not be ascertained from the partnership agreement of the partner.

PARTNERSHIP INTERESTS

BUSINESS ACTIVITIES AND FINANCING

Pioneer Parent's mission is to provide its stockholders with superior investment returns through strategies that maximize Pioneer Parent's long-term profitability and net asset values. The strategies employed to achieve this mission are anchored by Pioneer Parent's long-lived Spraberry oil and gas field and Hugoton and West Panhandle gas fields' reserves and production. Underlying these fields are approximately 67% of Pioneer Parent's proved oil and gas reserves which have a remaining productive life in excess of 40 years. The stable base of oil and gas production from these fields generates operating cash flows that allow Pioneer Parent the financial flexibility to selectively reinvest capital:

The business operations of each partnership consisted of the development and production of oil and gas reserves. Each partnership has initial partnership capital, and additional capital cannot be acquired. Operations can be financed through permitted borrowings, reinvested cash flows not distributed, permitted assessments, and the sales of assets. Each partnership is required to distribute to its partners a portion of substantially all its net cash flow after provision for any reserves determined by Pioneer USA.

- o to develop and increase production from existing properties through low-risk development drilling activities;
- o to leverage cost containment opportunities to achieve operating and technical efficiencies; and
- o to pursue strategic acquisitions in Pioneer Parent's core areas that will complement Pioneer Parent's existing asset base and provide additional growth opportunities.

Pioneer Parent also has the financial flexibility to use portions of its operating cash flows:

- o to selectively expand into new geographic areas that feature producing properties and provide exploration or exploitation opportunities;
- o to invest in the personnel and technology necessary to increase Pioneer Parent's exploration opportunities; and
- o to enhance liquidity.

This flexibility allows Pioneer Parent to take advantage of future exploration, development and acquisition opportunities.

Pioneer Parent may engage in any phase of the oil and gas business and any other lawful business. Pioneer Parent may finance its operations and the acquisition of additional properties through, among other things, the issuance of additional shares of Pioneer Parent common stock, borrowings, and the reinvestment of earnings not distributed to stockholders.

 FINANCIAL REPORTING

Pioneer Parent is subject to the reporting requirements of the Securities Exchange Act of 1934.

For a list of the partnerships that reporting requirements of the Securities Exchange Act of 1934, see "Where You Can Find More Information" on the inside front cover page of this prospectus. In addition, the partnership agreement requires that some reports be delivered to the partners.

 SHARES

 PARTNERSHIP INTERESTS

 TAX INFORMATION

"Double taxation" at the corporate and stockholder levels typically results when a corporation such as Pioneer Parent earns income and distributes that income to its stockholders in the form of dividends. Stockholders will only recognize income on amounts actually distributed by Pioneer Parent. Distributions made by Pioneer Parent out of current or accumulated earnings and profits are taxed as dividend income. Distributions in excess of current or accumulated earnings and profits are treated as a non-taxable return of basis to the extent of stockholders' adjusted basis in their shares, with the excess taxed as capital gain.

Dividends, if any, received by stockholders from Pioneer Parent generally will constitute portfolio income, and cannot be offset with losses from "passive activities." Losses and credits generated within Pioneer Parent do not

None of the partnerships is a taxable entity for federal income tax purposes. The partnerships are required to take into account their pro rata share of the partnership's income, deductions, and credits, regardless of whether they receive cash distributions from the partnerships. Partners may be entitled to percentage depletion deductions. Partners will be required to recapture some depreciation credits upon the sale of all or a portion of their partnership interests.

A partner's share of a partnership's income or loss will be subject to the "passive activity" rules. Under the passive activity rules, losses can only be offset against income arising from his ownership of partnerships in which he is an active participant.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

pass through to the stockholders. After the end of Pioneer Parent's taxable year, stockholders will receive Form 1099-DIV to report their dividend income.

be used to offset passive income from investment and income of a partner a ownership of partnership interests m with passive losses from another pas For a discussion of the tax consequ with the merger of each partnership, Each Partnership-- Material U.S. Fed Consequences."

DIVIDEND OR DISTRIBUTION POLICY AND PARTICIPATION IN PROFITS AND LOSSES

The shares of Pioneer Parent common stock constitute equity interests in Pioneer Parent. Each stockholder will be entitled to his pro rata share of the dividends made with respect to the Pioneer Parent common stock. The dividends payable to the stockholders are not fixed in amount and are only paid if, as and when declared by Pioneer Parent's board of directors. Dividends payable with respect to the shares of Pioneer Parent common stock depend upon the performance of Pioneer Parent.

For a description of the distributio partnership, see "Risk Factors-- Ris an Investment in Pioneer Parent-- Pi Not Declare Dividends." The average distributions by each partnership fo the year-to-date in 2001 are set for Appendix A. For a description of the partnership agreement of each partne allocation of costs and revenues amo partnership's partners, see Table 9

LEGAL MATTERS

Vinson & Elkins L.L.P., counsel to Pioneer Parent, will pass upon the validity of the Pioneer Parent common stock to be issued upon the merger of each partnership and material federal income tax matters related to the merger of each partnership. The limited partners' special legal counsel, _____, Dallas, Texas, will deliver the legal opinion referred to in "The Merger of Each Partnership -- Legal Opinion for Limited Partners" on page 47 of this document. That special counsel may rely as to matters of law of jurisdictions other than the United States and the State of Texas on the opinion of counsel in such other jurisdictions.

INDEPENDENT AUDITORS AND INDEPENDENT PETROLEUM CONSULTANTS

The consolidated financial statements of Pioneer Parent appearing in its Annual Report (Form 10-K) for the year ended December 31, 2000, have been audited by Ernst & Young LLP, independent auditors, as set forth in their report, which is incorporated by reference into this document. Such consolidated financial statements are incorporated by reference in reliance upon such report given on the authority of such firm as experts in accounting and auditing.

The financial statements of each partnership listed on pages 4 and 5 of this document at December 31, 2000 and 1999 and for each of the three years in the period ended December 31, 2000 have been audited by Ernst & Young

LLP, independent auditors, as set forth in their reports included in the supplemental information to this document for each partnership. Such financial statements are included in the supplemental information of each partnership in reliance upon such reports given on the authority of such firm as experts in

accounting and auditing.

Williamson Petroleum Consultants, Inc., independent petroleum consultants, estimated each partnership's reserves as of December 31, 2000, and reviewed Pioneer Parent's and Pioneer USA's estimates of each partnership's reserves as of March 31, 2001 and the present value of the estimated future net revenues from those estimated reserves included in the summary reserve reports included in this document and such summary reserve reports and estimates and the review as of March 31, 2001, are included in this document in reliance upon their reports given upon their authority as experts on the matters covered by the summary reserve report and review.

-80-

91

COMMONLY USED OIL AND GAS TERMS

The definitions set forth below shall apply to the indicated terms as used in this document. All volumes of natural gas referred to herein are stated at the legal pressure base of the state or area where the reserves exist and at 60 degrees Fahrenheit and in most instances are rounded to the nearest major multiple.

"Bbl" means a standard barrel of 42 U.S. gallons and represents the basic unit for measuring the production of crude oil, natural gas liquids and condensate.

"Bcf" means one billion cubic feet under prescribed conditions of pressure and temperature and represents the basic unit for measuring the production of natural gas.

"BOE" means a barrel-of-oil-equivalent and is a customary convention used in the United States to express oil and gas volumes on a comparable basis. It is determined on the basis of the estimated relative energy content of natural gas to oil, being approximately six Mcf of natural gas per Bbl of oil.

"BTU" means British thermal unit.

"development drilling" means drilling within the proved area of an oil or gas reservoir to the depth of a stratigraphic horizon known to be productive.

"exploration activity" means drilling activity to find and produce oil or natural gas in an area that is not known to be an oil or natural gas reservoir, or drilling activity to extend a known reservoir.

"Mbbbl" means one thousand Bbls.

"MBOE" means one thousand BOEs.

"Mcf" means one thousand cubic feet under prescribed conditions of pressure and temperature and represents the basic unit for measuring the production of natural gas.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

"MMBbl" means one million Bbls.

"MMcf" means one million cubic feet under prescribed conditions of pressure and temperature and represents the basic unit for measuring the production of natural gas.

"NGLs" means natural gas liquids.

"proved reserves" means the estimated quantities of crude oil, natural gas, and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not on escalations based upon future conditions.

(i) Reservoirs are considered proved if economic producibility is supported by either actual production or conclusive formation test. The area of a reservoir considered proved includes (A) that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and (B) the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the proved limit of the reservoir.

(ii) Reserves which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.

(iii) Estimates of proved reserves do not include the following: (A) oil that may become available from known reservoirs but is classified separately as "indicated additional reserves"; (B) crude oil, natural gas, and natural gas liquids, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics, or economic factors; (C) crude oil, natural gas, and natural gas liquids, that may occur in undrilled prospects; and (D) crude oil, natural gas, and natural gas liquids, that may be recovered from oil shales, coal, gilsonite and other such sources.

PIONEER NATURAL RESOURCES COMPANY

UNAUDITED PRO FORMA COMBINED FINANCIAL STATEMENTS

INTRODUCTORY STATEMENTS

The unaudited pro forma combined financial statements of Pioneer Parent have been prepared to give effect to Pioneer Parent's offer to acquire 46 limited partnerships (collectively, the "Combined Partnerships") that Pioneer USA serves as the sole or managing general partner.

The unaudited pro forma combined balance sheet of Pioneer Parent as of March 31, 2001 has been prepared to give effect to the acquisition of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Combined Partnerships as if it had occurred on March 31, 2001.

The unaudited pro forma combined statements of operations of Pioneer Parent for the three months ended March 31, 2001 and for the year ended December 31, 2000 have been prepared to give effect to the acquisition of the Combined Partnerships as if it had occurred on January 1, 2000.

The unaudited pro forma combined financial statements included herein are not necessarily indicative of the results that might have occurred had the transaction taken place on the dates that are assumed for the pro forma presentations and are not intended to be a projection of future results. Future results may vary significantly from the results reflected in the accompanying unaudited pro forma combined financial statements because of normal production declines, changes in product prices, future acquisitions and divestitures, future development and exploration activities, and other factors.

The following unaudited pro forma combined financial statements should be read in conjunction with the Consolidated Financial Statements (and the related notes) of Pioneer Parent included in the Annual Report on Form 10-K for the year ended December 31, 2000, the Quarterly Report on Form 10-Q for the three months ended March 31, 2001 and the historical financial statements of each partnership in which you own an interest contained in the supplement to this document for the partnership.

PIONEER NATURAL RESOURCES COMPANY

NOTES TO UNAUDITED PRO FORMA COMBINED
FINANCIAL STATEMENTS
MARCH 31, 2001 AND DECEMBER 31, 2000

NOTE 1. BASIS OF PRESENTATION

The unaudited pro forma combined financial information of Pioneer Natural Resources Company ("Pioneer Parent") has been prepared to give effect to Pioneer Parent's offer to acquire 46 limited partnerships (collectively, the "Combined Partnerships") that Pioneer USA serves as the sole or managing general partner. The unaudited pro forma combined balance sheet as of March 31, 2001 has been prepared to give effect to the acquisition of the Combined Partnerships as if it had occurred on March 31, 2001. The unaudited pro forma combined statements of operations for the three months ended March 31, 2001 and for the year ended December 31, 2000 are presented as if the acquisition of the Combined Partnerships occurred on January 1, 2000.

Following is a description of the individual columns included in these unaudited pro forma combined financial statements:

Pioneer Parent - Represents the consolidated balance sheet of Pioneer Parent as of March 31, 2001, and the consolidated statements of operations of Pioneer Parent for the three months ended March 31, 2001 and the year ended December 31, 2000.

Combined Partnerships - Represents the combined balance sheets of the 46 limited partnerships as of March 31, 2001 and the combined statements of operations of such limited partnerships for the three months ended March 31, 2001 and the year ended December 31, 2000.

NOTE 2. PRO FORMA ADJUSTMENTS

Following are descriptions of the pro forma adjustments used in the preparation of the accompanying unaudited pro forma combined financial statements:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (a) To record the acquisition of the Combined Partnerships, using the purchase method of accounting, for \$105.4 million in Pioneer common stock, representing 5,855,813 shares assuming an \$18.00 average stock price. The allocation of the purchase price to the acquired assets and liabilities is preliminary and, therefore, subject to change.

The purchase price allocation as of March 31, 2001 reflects the fair value of the Combined Partnerships' assets and liabilities as of that date. A final purchase price allocation will be done at closing based upon the fair value of the Combined Partnerships' assets and liabilities at that time. The date three business days prior to the special meeting of limited partners of each partnership to be held on , 2001 will be the measurement date for determining the final number of shares of Pioneer Parent common stock to be issued (the "Measurement Date"). Pioneer Parent will value the shares to be issued using the average closing price of Pioneer Parent common stock for the five-day period comprised of the two days prior to the Measurement Date, the Measurement Date and the two business days subsequent to the Measurement Date. The final allocation is not anticipated to change materially other than for cash flow generated from the Combined Partnerships' property interests between March 31, 2001 and closing, which will be reflected as a reduction to oil and gas properties and an increase to working capital in the final purchase price allocation.

- (b) To eliminate affiliate receivables and affiliate payables between Pioneer Parent and the Combined Partnerships.
- (c) To adjust pro forma cash, accounts payable and partners' capital for the \$7.1 million cash distribution that will be disbursed to existing partners other than Pioneer USA during July 2001.
- (d) To eliminate Pioneer Parent's proportionate share of the Combined Partnerships that is already reflected in Pioneer Parent's consolidated statements of operations for the three months ended March 31, 2001 and for the year ended December 31, 2000.

P-5

97

PIONEER NATURAL RESOURCES COMPANY

NOTES TO UNAUDITED PRO FORMA COMBINED
FINANCIAL STATEMENTS
MARCH 31, 2001 AND DECEMBER 31, 2000

- (e) To eliminate the Combined Partnership's share of operating overhead charged by Pioneer Parent that was recorded by the Combined Partnerships as an increase in lease operating expenses and by Pioneer Parent as a reduction to general and administrative expense.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (f) To adjust depreciation, depletion and amortization expense for the basis allocated to the oil and gas properties acquired and accounted for using the successful efforts method of accounting.
- (g) To eliminate the Combined Partnerships impairment of oil and gas properties that would not occur on a pro forma basis with Pioneer Parent due to the basis in oil and gas properties reflecting the value assigned using the purchase method of accounting.
- (h) Pioneer Parent has unused net operating loss carryovers in the United States that could be used to offset any incremental earnings of the Combined Partnerships. Accordingly, no pro forma adjustment was recorded for additional income tax expense. See Note 3. below.
- (i) To adjust the weighted average basic and diluted common shares outstanding for the issuance of 5,855,813 shares of Pioneer Parent common stock to acquire the Combined Partnerships.

The pro forma numerator for basic and diluted earnings per share calculations equals "income from continuing operations" per the Unaudited Pro Forma Combined Statement of Operations (see page P-3). Following is a reconciliation of the pro forma weighted average basic and diluted shares outstanding (in thousands):

	March 31, 2001 -----	December 31, 2000 -----
Pioneer Parent weighted average basic common shares outstanding.....	98,379	99,378
Shares offered attributable to the additional nonmanaging general partners' interests.....	11	11
Shares offered attributable to the additional limited partners' interests.....	5,845	5,845
	-----	-----
Pro forma Pioneer Parent weighted average basic shares outstanding.....	104,235	105,234
Effect of dilutive common stock options.....	1,329	384
	-----	-----
Pro forma Pioneer Parent weighted average diluted shares outstanding.....	105,564	105,618
	=====	=====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 3. INCOME TAXES

Pioneer Parent will account for income taxes in accordance with the provisions of Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes". In accordance therewith, Pioneer Parent will prepare separate tax calculations for each tax jurisdiction in which Pioneer Parent will be subject to income taxes. Pioneer Parent has unused net operating loss carryovers and alternative minimum tax net operating loss carryovers that would be utilized to reduce incremental United States income taxes that would otherwise be incurred as a result of pro forma pre-tax earnings of the Combined Partnerships. Accordingly, Pioneer Parent has not recognized incremental income tax expense in the accompanying unaudited pro forma combined statements of operations for the three months ended March 31, 2001 and the year ended December 31, 2000.

NOTE 4. OIL AND GAS RESERVE DATA

The following unaudited pro forma supplemental information regarding the oil and gas activities of Pioneer Parent is presented pursuant to the disclosure requirements promulgated by the Securities and Exchange Commission and Statement of Financial Accounting Standards No. 69, "Disclosures About Oil and Gas Producing Activities". The pro forma combined reserve information is presented as if the acquisition of the Combined Partnerships had occurred on January 1, 2000. Information for oil and NGL's are presented in barrels (Bbls) and for gas in thousands of cubic feet (Mcf).

P-6

98

PIONEER NATURAL RESOURCES COMPANY

NOTES TO UNAUDITED PRO FORMA COMBINED
FINANCIAL STATEMENTS
MARCH 31, 2001 AND DECEMBER 31, 2000

Pioneer Parent emphasizes that reserve estimates are inherently imprecise and subject to revision and that estimates of new discoveries are more imprecise than those of producing oil and gas properties. Accordingly, the estimates are expected to change as future information becomes available and such changes could be significant.

For additional information regarding the oil and gas activities of Pioneer Parent and the Combined Partnerships, from which the following unaudited pro forma supplemental information was derived, please see: (a) Pioneer Parent's Annual Report on Form 10-K for the year ended December 31, 2000 for information regarding Pioneer Parent's stand-alone oil and gas activities, (b) Table 11 of Appendix A and (c) the review by Williamson Petroleum Consultants, Inc. of the Summary Reserve Report for the Combined Partnerships included in Appendix B for the volumes and values attributable to the Combined Partnerships.

PIONEER NATURAL RESOURCES COMPANY

NOTES TO UNAUDITED PRO FORMA COMBINED
FINANCIAL STATEMENTS
MARCH 31, 2001 AND DECEMBER 31, 2000

STANDARDIZED MEASURE OF DISCOUNTED FUTURE NET CASH FLOWS

The pro forma standardized measure of discounted future net cash flow is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves discounted using a rate of 10 percent per year to reflect the estimated timing of the future cash flows. Future income taxes are calculated by comparing undiscounted future cash flows to the tax basis of oil and gas properties plus available carryforwards and credits and applying the current tax rate to the difference.

NOTES TO UNAUDITED PRO FORMA COMBINED
FINANCIAL STATEMENTS
MARCH 31, 2001 AND DECEMBER 31, 2000

CHANGES RELATING TO THE PRO FORMA STANDARDIZED MEASURE OF DISCOUNTED FUTURE NET CASH FLOWS

The principal sources of the change in the pro forma combined standardized measure of discounted future net cash flows for the year ended December 31, 2000 are as follows (in thousands):

Oil and gas sales, net of production costs.....	\$ (699,206)
Net changes in prices and production costs.....	3,920,249
Extension and discoveries.....	525,361
Development costs incurred during the period.....	101,350
Sales of minerals-in-place.....	(72,624)
Purchases of mineral-in-place.....	187,097
Revisions of estimated future development costs.....	(200,734)
Revisions of previous quantity estimates.....	329,124
Accretion of discount.....	313,281
Changes in production rates, timing and other.....	(270,400)

Change in present value of future net revenues.....	4,133,498
Net change in present value of future income taxes.....	(1,428,700)

Balance, beginning of year.....	2,704,798

Balance, end of year.....	\$ 5,837,603

- (a) The merger value for each partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (b) Represents Pioneer USA's partnership interests in each partnership as: (1) the sole or managing general partner of the partnership; (2) a limited partner of the partnership; and (3) the sole general partner of each nonmanaging general partner. Pioneer USA will not receive any Pioneer common stock or cash payment for its partnership interests in any participating partnership. However, as a result of the merger of each participating partnership, Pioneer USA will own 100% of the properties of the partnership including properties attributable to its partnership interests in the partnership.
- (c) Represents four unaffiliated individuals' partnership interests as limited partners of each nonmanaging general partner. Excludes Pioneer USA's partnership interests as general partner of each nonmanaging general partner.
- (d) Represents the partnership interests of unaffiliated limited partners of each partnership. Excludes Pioneer USA's partnership interests as a

(a) Represents Pioneer USA's partnership interests in each partnership as a limited partner of the partnership. Pioneer USA will not receive any Pioneer common stock or cash payment for its partnership interests in any participating partnership. However, as a result of the merger of each participating partnership, Pioneer USA will own 100% of the properties of the partnership including properties attributable to its

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership interests in the partnership.

- (b) Represents percentage of limited partners' vote that Pioneer USA is entitled to vote. The voting percentage is calculated by dividing (1) Pioneer USA's ownership percentage of the partnership interests held as a limited partner, by (2) the percentage of partnership interests held by all limited partners in the partnership. For example, if the limited partners of a partnership represent 99% of the partnership and Pioneer USA owns 5% of the partnership interests as a limited partner in that partnership, Pioneer USA's voting percentage is 5.05%.
- (c) Pioneer USA is not entitled to vote partnership interests it holds as limited partner in this partnership.
- (d) Represents Pioneer USA's share of the initial investment by limited partners as shown on Table 1.

	=====	=====	=====	=====	=====

-
- (a) Represents Pioneer USA's partnership interests in each partnership as: (1) the sole or managing general partner of the partnership; (2) a limited partner of the partnership; and (3) the sole general partner of each nonmanaging general partner. Pioneer USA will not receive any Pioneer common stock or cash payment for its partnership interests in any participating partnership. However, as a result of the merger of each participating partnership, Pioneer USA will acquire 100% of the properties of the partnership including properties attributable to its partnership interests in the partnerships.
- (b) Represents four unaffiliated individuals' partnership interests as limited partners of each nonmanaging general partner. Excludes Pioneer USA's partnership interests as general partner of each nonmanaging general partner.
- (c) Represents the partnership interests of unaffiliated limited partners of each partnership. Excludes Pioneer USA's partnership interests as a limited partner of any partnership.
- (d) Corresponds to amounts in the reserve report prepared by Williamson Petroleum Consultants, Inc. as of December 31, 2000.

	=====	=====	=====

(a) Represents Pioneer USA's partnership interests in each partnership as: (1) the sole or managing general partner of the partnership; (2) a limited partner of the partnership; and (3) the sole general partner of each nonmanaging general partner. Pioneer USA will not receive any Pioneer common stock or cash payment for its partnership interests in any participating partnership. However, as a result of the merger of each participating partnership, Pioneer USA will acquire 100% of the properties of the partnership including properties attributable to its partnership interests in the partnerships.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (b) Represents four unaffiliated individuals' partnership interests as limited partners of each nonmanaging general partner. Excludes Pioneer USA's partnership interests as general partner of each nonmanaging general partner.
- (c) Represents the partnership interests of unaffiliated limited partners of each partnership. Excludes Pioneer USA's partnership interests as a limited partner of any partnership.

(a) This table contains historical information about recent trades of partnership interests on a per \$1,000 investment as determined from "The Partnership Spectrum." The price information represents the prices reported to have been paid to the sellers net of commissions paid by buyers. This information should not be relied upon as any indication of the price at which the partnership interests may trade. There may have been other secondary sale transactions in the partnership interests, although no information regarding any such transactions is available to Pioneer USA. Because the information regarding sale transactions in the partnership interests in this table is provided without verification by Pioneer USA and because the information provided does not reflect sufficient activity to cause the prices shown to be representative of the market values of the partnership interests, the information should not be relied upon as indicative of the ability of limited partners to sell their partnership interests in secondary sale transactions or as to the prices at which the partnership interests may be sold.

-
- (a) The reserve value is one of the components of the merger value for each partnership and represents the present value of estimated future net revenues from the partnership's estimated oil and gas reserves as of March 31, 2001. The present value was calculated using: (1) a five-year New York Mercantile Exchange, or NYMEX, futures price for oil and gas as of March 31, 2001 with prices held constant after year five at the year five price, less standard industry adjustments, (2) historical operating costs adjusted only for those items affected by commodity prices, such as production taxes and ad valorem taxes, and (3) a 10.0% discount rate. For 2001, the oil and gas prices were based on the average NYMEX futures price for the nine-month period beginning on April 1, 2001 and ending December 31, 2001.
- (b) Represents Pioneer USA's partnership interests in each partnership as: (1) the sole or managing general partner of the partnership; (2) a limited partner of the partnership; and (3) the sole general partner of each nonmanaging general partner. Pioneer USA will not receive any Pioneer common stock or cash payment for its partnership interests in any participating partnership. However, as a result of the merger of each participating partnership, Pioneer USA will acquire 100% of the properties of the partnership including properties attributable to its partnership interests in the partnerships.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (c) Represents four unaffiliated individuals' partnership interests as limited partners of each nonmanaging general partner. Excludes Pioneer USA's partnership interests as general partner of each nonmanaging general partner.
- (d) Represents the partnership interests of unaffiliated limited partners of each partnership. Excludes Pioneer USA's partnership interests as a limited partner of any partnership.

AS OF DECEMBER 31, 2000

April 10, 2001

Pioneer Natural Resources USA, Inc.
5205 North O'Connor Boulevard, Suite 1400
Irving, Texas 75039

Attention Board of Directors

Gentlemen:

Subject: Letter Report Including 46 Reports Prepared
by Williamson Petroleum Consultants, Inc.
for Pioneer Natural Resources USA, Inc.
to the Interests of Limited Partners
or the Converted Limited Partners
in Various Parker & Parsley Partnerships
Managed by Pioneer Natural Resources USA, Inc.
Effective December 31, 2000
for Disclosure to the
Securities and Exchange Commission
Williamson Project 0.8839

In accordance with your request, Williamson Petroleum Consultants, Inc.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(Williamson) has prepared this summary letter for inclusion in the proxy statement to be distributed to the limited partners of the referenced partnerships by Pioneer Natural Resources USA, Inc. (Pioneer USA). This letter includes 46 Williamson reports prepared for Pioneer USA to the interests of the limited partners or the converted limited partners in various Parker & Parsley partnerships managed by Pioneer USA effective December 31, 2000 for disclosure to the Securities and Exchange Commission (SEC). A listing of the 46 Williamson reports is included as Exhibit I.

I. ESTIMATED RESERVES AND ESTIMATED FUTURE NET REVENUES

The total Williamson estimated net proved reserves that are attributable to the evaluated interests of the 46 partnership reports are shown in Exhibit II and were based on economic parameters and operating condition considered applicable as of December 31, 2000 and may be used in disclosure to the SEC.

The present values of the estimated future net revenues from proved reserves were calculated using a discount rate of 10.00 percent per annum and were computed in accordance with the financial reporting requirements of the SEC and are presented in Exhibit II.

C-1

121

Pioneer Natural Resources USA, Inc.
Board of Directors
April 10, 2001
Page 2

At the request of Pioneer USA, Williamson used the Landmark graphics and reserves and economics evaluation software, Aries, to prepare this summary report. In evaluations of these properties prior to December 31, 1991, Williamson utilized its proprietary software programs. No comparative tests have been performed to determine the difference in evaluation results of either reserves or revenue quantities that may occur solely as a result of the differences in the programs nor has Williamson performed tests to determine the accuracy of Aries. However, in accordance with the request made by Pioneer USA and the general acceptance of Aries by the oil and gas industry, Williamson has used Aries to prepare this report.

II. DEFINITIONS OF SEC RESERVES(1)

The estimated reserves presented in this summary letter are net proved reserves, including proved developed producing, proved developed nonproducing, and proved undeveloped reserves, and were computed in accordance with the financial reporting requirements of the SEC. In preparing these evaluations, no attempt has been made to quantify the element of uncertainty associated with any category. Reserves were assigned to each category as warranted. The definitions of oil and gas reserves pursuant to the requirements of the Securities Exchange Act are:

Proved Reserves(2)

Proved reserves are the estimated quantities of crude oil, natural gas, and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

under the economic criteria employed and existing operating conditions, i.e., prices and costs as of the date the estimate is made. Prices and costs include consideration of changes provided only by contractual arrangements but not on escalations based upon an estimate of future conditions.

- (1) For evaluations prepared for disclosure to the Securities and Exchange Commission, see SEC Accounting Rules. Commerce Clearing House, Inc. October 1981, Paragraph 290, Regulation 210.4-10, p. 329.
- (2) Any variations to these definitions will be clearly stated in the report.

122

Pioneer Natural Resources USA, Inc.
Board of Directors
April 10, 2001
Page 3

- A. Reservoirs are considered proved if economic producibility is supported by either actual production or conclusive formation test. The area of a reservoir considered proved includes:
 1. that portion delineated by drilling and defined by gas-oil and/or oil-water contacts, if any; and
 2. the immediately adjoining portions not yet drilled, but which can be reasonably judged as economically productive on the basis of available geological and engineering data. In the absence of information on fluid contacts, the lowest known structural occurrence of hydrocarbons controls the lower proved limit of the reservoir.
- B. Reserves which can be produced economically through application of improved recovery techniques (such as fluid injection) are included in the "proved" classification when successful testing by a pilot project, or the operation of an installed program in the reservoir, provides support for the engineering analysis on which the project or program was based.
- C. Estimates of proved reserves do not include the following:
 1. oil that may become available from known reservoirs but is classified separately as "indicated additional reserves";
 2. crude oil, natural gas, and natural gas liquids, the recovery of which is subject to reasonable doubt because of uncertainty as to geology, reservoir characteristics, or economic factors;
 3. crude oil, natural gas, and natural gas liquids, that may occur in undrilled prospects; and
 4. crude oil, natural gas, and natural gas liquids, that may be recovered from oil shales, coal(3), gilsonite, and other such sources.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (3) According to Staff Accounting Bulletin 85, excluding certain coalbed methane gas.

C-3

123

Pioneer Natural Resources USA, Inc.
Board of Directors
April 10, 2001
Page 4

Proved Developed Reserves(4)

Proved developed reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery should be included as "proved developed reserves" only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.

Proved Undeveloped Reserves

Proved undeveloped reserves are reserves that are expected to be recovered from new wells on undrilled acreage, or from existing wells where a relatively major expenditure is required for recompletion. Reserves on undrilled acreage shall be limited to those drilling units offsetting productive units that are reasonably certain of production when drilled. Proved reserves for other undrilled units can be claimed only where it can be demonstrated with certainty that there is continuity of production from the existing productive formation. Under no circumstances should estimates for proved undeveloped reserves be attributable to any acreage for which an application of fluid injection or other improved recovery technique is contemplated, unless such techniques have been proved effective by actual tests in the area and in the same reservoir.

- (4) Williamson Petroleum Consultants, Inc. separates proved developed reserves into proved developed producing and proved developed nonproducing reserves. This is to identify proved developed producing reserves as those to be recovered from actively producing wells; proved developed nonproducing reserves as those to be recovered from wells or intervals within wells, which are completed but shut in waiting on equipment or pipeline connections, or wells where a relatively minor expenditure is required for recompletion to another zone.

III. DISCUSSION OF SEC RESERVES

The properties evaluated in this report are located in the states of Oklahoma and Texas with the majority of the value in the Spraberry (Trend Area) field, Texas.

The individual projections of lease reserves and economics prepared to produce this summary report include data that describe the production forecasts and associated evaluation parameters such as interests, taxes, product prices, operating costs, investments, salvage values, abandonment costs, and net profit interests.

Net income to the evaluated interests is the future net revenue after consideration of royalty revenue payable to others, taxes, operating expenses, investments, salvage values, abandonment costs, and net profit interests, as applicable. The future net revenue is before federal income tax and excludes consideration of any encumbrances against the properties if such exist.

The future net revenue values presented in this report were based on projections of oil and gas production. It was assumed there would be no significant delay between the date of oil and gas production and the receipt of the associated revenue for this production. No opinion is expressed by Williamson in this report as to a fair market value of the evaluated properties.

Unless specifically identified and documented by Pioneer USA as having curtailment problems, gas production trends have been assumed to be a function of well productivity and not of market conditions. The effect of "take or pay" clauses in gas contracts was not considered.

Oil and natural gas liquids (NGL) reserves are expressed in thousands of United States (U.S.) barrels (MBBL) of 42 U.S. gallons. Gas volumes are expressed in millions of cubic feet (MMCF) at 60 degrees Fahrenheit and at the legal pressure base that prevails in the state which the reserves are located. No adjustment of the individual gas volumes to a common pressure base has been made.

This report includes only those costs and revenues which are considered by Pioneer USA to be directly attributable to individual leases and areas. There could exist other revenues, overhead costs, or other costs associated with Pioneer USA or the Limited Partners/Converted Limited Partners which are not included in this report. Such additional costs and revenues are outside the scope of this report. This report is not a financial statement for Pioneer USA or the Limited Partners/Converted Limited Partners and should not be used as the sole basis for any transaction concerning Pioneer USA, the Limited Partners/Converted Limited Partners, or the evaluated properties.

Page 6

The reserves projections in this report are based on the use of the available data and accepted industry engineering methods. Future changes in any operational or economic parameters or production characteristics of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

evaluated properties could increase or decrease their reserves. Unforeseen changes in market demand or allowables set by various regulatory agencies could also cause actual production rates to vary from those projected. Williamson reserves the right to alter any of the reserves projections and the associated economics included in this evaluation in any future evaluations based on additional data that may be acquired.

All data utilized in the preparation of this report with respect to interests, reversionary status, oil and gas prices, gas categories, gas contract terms, operating expenses, investments, salvage values, abandonment costs, net profit interests, well information, and current operating conditions, as applicable, were provided by Pioneer USA. Production data provided by Pioneer USA were utilized. The production data was generally through October 2000. All data have been reviewed for reasonableness and, unless obvious errors were detected, have been accepted as correct. It should be emphasized that revisions to the projections of reserves and economics included in this report may be required if the provided data are revised for any reason. No inspection of the properties was made as this was not considered within the scope of this evaluation. No investigation was made of any environmental liabilities that might apply to the evaluated properties, and no costs are included for any possible related expenses.

Since sufficient production history and other data were available, the estimates of reserves contained in this report were determined by extrapolation of historical production trends and in accordance with the Definitions of SEC Reserves included in this summary letter report.

Prices for oil sold as of December 31, 2000 were provided by Pioneer USA to be used at the effective date. These prices include adjustments for API gravity, transportation, and any bonus paid. These adjustments were made by Pioneer USA. After the effective date, prices were held constant for the life of the properties. No attempt has been made to account for oil price fluctuations which have occurred in the market subsequent to the effective date of this report.

Prices for gas sold as of December 31, 2000 were provided by Pioneer USA to be used at the effective date. These prices include adjustments for British thermal unit content, shrinkage due to NGL removal, transportation and handling charges, and any other known differences between sales and produced volumes. These adjustments were made by Pioneer USA. After the effective date, prices were held constant for the life of the properties unless Pioneer USA indicated

C-6

126

Pioneer Natural Resources USA, Inc.
Board of Directors
April 10, 2001
Page 7

that changes were provided for by contract. All gas prices were applied to projected wellhead volumes.

Prices for NGL sold as of December 31, 2000 were provided by Pioneer USA to be used at the effective date. NGL reserves were projected as a separate stream using a constant ratio (barrels of NGL/thousand cubic feet of gas) based on historical yields. After the effective date, prices were held constant for the life of the properties. No attempt has been made to account for price

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

fluctuations which have occurred in the market subsequent to the effective date of this report.

It should be emphasized that with the current economic uncertainties, fluctuation in market conditions could significantly change the economics of the properties included in this report.

Operating expenses were provided by Pioneer USA and represented, when possible, the latest available 12-month average of all recurring expenses which are billable to the working interest owners. These expenses included, but were not limited to, all direct operating expenses, field overhead costs, and any ad valorem taxes not deducted separately. Expenses for workovers, well stimulations, and other maintenance were not included in the operating expenses unless such work was expected on a recurring basis. Judgments for the exclusion of the nonrecurring expenses were made by Pioneer USA. Operating costs were held constant for the life of the properties.

State production and county ad valorem taxes have been deducted at the published rates as provided by Pioneer USA. A 7.5 percent severance tax exemption was applied until September 2001 for qualifying wells.

IV. CONSENT AND DECLARATION OF INDEPENDENT STATUS

We understand that our estimates are to be included in a Schedule 13e-3 under the Securities Exchange Act of 1934 to be filed by you with the SEC and in the proxy statement included as an exhibit to such Schedule 13e-3. We understand further that the estimates may be used by you to establish merger values for the Partnerships. With this understanding in mind, we have consistently applied the generally accepted petroleum engineering and evaluation principles in estimating the proved oil and gas reserves and in computing the future net revenues derived from such reserves for each property attributable to the interests held by the Partnerships.

Based on information supplied by Pioneer USA, neither capital costs nor salvage values were included in the projections of reserves and economics in this report.

Williamson is an independent consulting firm and does not own any interests in the oil and gas properties covered by this report. No employee, officer, or director of Williamson is an employee, officer, or director of Pioneer USA or any of the

C-7

APPENDIX D
TO
PROXY STATEMENT/PROSPECTUS

FORM OF
FAIRNESS OPINION OF ROBERT A. STANGER & CO., INC.
(SUBJECT TO CHANGE)

, 2001

Board of Directors of
Pioneer Natural Resources USA, Inc.,
As the Sole or Managing General Partner of
The Partnerships Identified on Exhibit I
1400 Williams Square West
5205 North O'Connor Boulevard
Irving, Texas 75039

Gentlemen:

Pioneer Natural Resources USA, Inc. ("Pioneer USA"), the sole or managing general partner of the partnerships identified in Exhibit I attached hereto ("the Partnerships"), has advised us that the Partnerships are contemplating a transaction (the "Transaction") pursuant to an agreement (the "Merger Agreement") in which the Partnerships will merge with and into Pioneer USA and the interests of the limited partners (the "Limited Partners") in each Partnership will be converted into the right to receive shares of common stock (the "Pioneer Parent Shares") of Pioneer Natural Resources Company ("Pioneer Parent") equal to the estimated value of such Partnership's oil and gas reserves (the "Reserve Value") and net working capital (the "Working Capital Balance") as of March 31, 2001 (collectively, the Reserve Value and the Working Capital Balance are referred to herein as the "Merger Value"). We have been advised that the Merger Value will be allocated and paid to holders of limited partnership interests (the "Limited Partner Interests") of each Partnership in accordance with the provisions of the Partnership agreement of each Partnership relating to a liquidation of the Partnership.

We have been further advised that the Reserve Value has been established by Pioneer USA and its parent company, Pioneer Parent, based upon the present value of estimated future net revenues (after certain expenses and charges) from each Partnership's proved oil and gas reserves as of March 31, 2001 utilizing prices for 2001, 2002, 2003, 2004 and thereafter of \$26.17, \$24.36, \$22.83, \$22.31 and \$21.97 per barrel of oil and \$5.18, \$4.61, \$4.16, \$4.09 and \$4.12 per thousand cubic feet of gas, and a discount rate of 10.0%. [We have been further advised that the Reserve Value is based upon the reserve report of Pioneer USA and Pioneer Parent, as reviewed by Williamson Petroleum

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Consultants, Inc. ("Williamson"), an independent petroleum engineering firm, as of March 31, 2001, and to which Pioneer USA and Pioneer Parent applied the prices previously stated (the "Reserve Analysis").]

We have been advised that the Limited Partners in each Partnership will have the opportunity to approve or reject the participation by their Partnership in the Transaction pursuant to a proxy statement/prospectus (the "Proxy Statement/Prospectus") and a Limited Partners meeting which will be prepared and held, respectively, in connection with the Transaction, and further that Limited Partners in each Partnership, in exchange for Limited Partner Interests, will

D-1

136

receive the allocated Merger Value in Pioneer Parent Shares. We have been advised that the value to be ascribed to each share of Pioneer Parent, which is listed on the New York Stock Exchange ("NYSE"), shall be equal to the average closing price for such shares on the NYSE for the ten trading day period ending three business days prior to the initial meeting of the Limited Partners contemplated herein.

You have requested that Robert A. Stanger & Co., Inc. ("Stanger") provide an opinion as to the fairness from a financial point of view to the unaffiliated Limited Partners of each Partnership and the unaffiliated limited partners of the non-managing general partner of each applicable Partnership of the Merger Value ascribed to each Partnership and the allocation thereof to: (i) the Limited Partners of each Partnership, as a group; (ii) the general partners of each Partnership as a group; (iii) Pioneer USA, as the managing or sole general partner of each partnership; (iv) the unaffiliated Limited Partners of each Partnership, as a group; and (v) the unaffiliated limited partners of the non-managing general partner of each applicable Partnership as a group.

Stanger, founded in 1978, has provided research, investment banking and consulting services to clients located throughout the United States, including major New York Stock Exchange member firms and insurance companies and over seventy companies engaged in the management and operations of partnerships. The investment banking activities of Stanger include financial advisory services, asset and securities valuations, industry and company research and analysis, litigation support and expert witness services, and due diligence investigations in connection with both publicly registered and privately placed securities transactions.

Stanger, as part of its investment banking business, is regularly engaged in the valuation of securities in connection with mergers, acquisitions, and reorganizations and for estate, tax, corporate and other purposes. In particular, Stanger's valuation practice principally involves partnerships, partnership securities and assets typically owned through partnerships including, but not limited to, oil and gas reserves, real estate, mortgages secured by real estate, cable television systems, and equipment leasing assets.

In arriving at the opinion set forth below, we have:

- o Reviewed the Preliminary Proxy Statement/Prospectus;
- o Reviewed a draft of the Merger Agreement which Pioneer USA has indicated to be in substantially the form which will be executed in connection with the Transaction;

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Reviewed the financial statements and forms 10K and 10Q, as applicable, of the Partnerships for the years ended December 31, 1998, 1999 and 2000, and the three months ended March 31, 2001;
- o [Reviewed the Reserve Report for each Partnership reviewed by Williamson Petroleum Consultants, Inc. as of March 31, 2001;]

D-2

137

- o Reviewed the calculations prepared by Pioneer USA and Pioneer Parent of the Merger Value per \$1,000 original investment in each Partnership;
- o Reviewed Pioneer USA's analysis of other alternatives to the Transaction including going concern value, liquidation value, royalty trust and production payment;
- o Reviewed estimates prepared by Pioneer USA and Pioneer Parent of the going-concern value and liquidation value per \$1,000 original investment in each Partnership;
- o Interviewed key management personnel of Pioneer USA regarding the oil and gas reserves, the financial condition of each Partnership and the terms of the Transaction;
- o Reviewed the financial statements of Pioneer Parent for the years ended December 31, 1999 and 2000 and the three months ended March 31, 2001;
- o Reviewed pro forma financial data for Pioneer Parent assuming the completion of the transaction;
- o Reviewed recent secondary market trading activity for interests in the Partnerships, as available;
- o Reviewed recent trading activity in Pioneer Parent Shares; and
- o Conducted such other studies, analyses, inquiries and investigations as we deemed appropriate.

In rendering this opinion, we have relied, without independent verification, on the accuracy and completeness in all material respects of all financial and other information that was furnished or otherwise communicated to us by Pioneer USA, Pioneer Parent and the Partnerships. We have been advised by Pioneer USA and Pioneer Parent that the oil and gas properties owned by the Partnerships are subject to operating agreements (the "Operating Agreements") with Pioneer USA and that: (i) such Operating Agreements provide for the payment of overhead charges and that such charges are reasonable compared to amounts charged for similar services by third-party operators; and (ii) except for

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

cause, such Operating Agreements do not provide for the termination of Pioneer USA as operator, and (iii) such Operating Agreements do not provide for the revision of overhead charges, except as escalated under the terms of such Operating Agreements. Furthermore, we have been advised by Pioneer USA and Pioneer Parent that if each Partnership's reserves were offered for sale to a third party, a condition of such sale would be that the oil and gas reserves would continue to be subject to the Operating Agreements with Pioneer USA which provide for the payment of overhead charges, and that it would be appropriate to assume, when estimating the value of such reserves, that such charges would continue. We have also been advised that the Reserve Value and Working Capital Balance of each Partnership has been properly allocated between Pioneer USA, the other general partners, if any, and Limited Partners of each Partnership in accordance with the Partnership Agreement with respect to a liquidation of such Partnership.

D-3

138

We have not performed an independent appraisal of the oil and gas reserves or other assets and liabilities of the Partnerships. [We have not conducted any engineering studies and have relied on estimates of Pioneer USA and Pioneer Parent, which were reviewed by Williamson Petroleum Consultants, Inc., with respect to oil and gas reserve volumes, prices, operating costs, and overhead charges.]

We have relied on the assurance of Pioneer USA, Pioneer Parent and the Partnerships that: (i) the Reserve Analysis provided to us was in the judgment of Pioneer USA and the Partnerships reasonably prepared on bases consistent with actual historical experience and reflect their best currently available estimates and good faith judgments; (ii) any estimates of costs to remediate environmental conditions included in the Reserve Analysis are based on detailed analyses and reflect the best currently available estimates and good faith judgments; (iii) any historical financial data, balance sheet data, transaction cost estimates, Merger Value analyses, going-concern value analyses and liquidation value analyses are accurate and complete in all material respects; (iv) all allocations included within the calculations of Merger Values, going-concern values and liquidation values have been made in accordance with the Partnership Agreement for each Partnership; (v) no material changes have occurred in the information reviewed or in the value of the oil and gas reserves or Working Capital Balances of each Partnership between the date the information was provided to us and the date of this letter; (vi) the relative ownership interest of the Limited Partners, unaffiliated Limited Partners, general partners, unaffiliated limited partners of the non-managing general partner of each applicable Partnership and Pioneer USA, as manager or sole general partner, is accurately included in accordance with the Partnership Agreements on the analyses provided to us by Pioneer USA; (vii) neither Pioneer Parent or any of its affiliates has during the thirty days prior to the date hereof commenced or continued a share repurchase program or similar transaction which could affect the Pioneer Parent Share price to be used in the Transaction; and (viii) Pioneer USA, Pioneer Parent and the Partnerships are not aware of any information or facts regarding the Partnerships, the oil and gas properties, the Reserve Analysis or the Working Capital Balances of each Partnership that would cause the information supplied to us to be incomplete or misleading in any material respect.

We have not been requested to, and therefore did not: (i) make any recommendation to Pioneer USA, the Partnerships or the Limited Partners with respect to whether to approve or reject the Transaction; (ii) determine or

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

negotiate the amount or form of the Merger Value to be paid for Limited Partner Interests in the Transaction; (iii) offer the assets of the Partnerships for sale to any third party; (iv) express any opinion as to: (a) the impact of the Transaction with respect to Pioneer USA or the Limited Partners of any Partnerships that do not participate in the Transaction; (b) the tax consequences of the Transaction for Pioneer USA, other general partners or the Limited Partners of any Partnership; (c) Pioneer USA's or Pioneer Parent's ability to finance their obligations pursuant to the Merger Agreement or the impact of a failure to obtain financing on the financial performance of Pioneer USA, Pioneer Parent or the Partnerships; (d) Pioneer USA's decision to estimate the Reserve Value of the oil and gas reserves of each Partnership based upon the continued operation of the properties by Pioneer USA and the payment of overhead charges in accordance with existing Operating Agreements or the impact, if any, on the estimated values of the Partnerships' oil and gas reserves if Pioneer USA and Pioneer Parent determined to offer or operate the assets subject to revised Operating Agreements; (e) whether or not alternative methods of determining the Merger Value would have also provided fair results or results substantially similar to the methodology used; (f) alternatives to the

D-4

139

Transaction, including the offering of such assets for sale to third-party buyers; (g) the trading price of Pioneer Parent Shares immediately following the closing of the Transaction and the distribution of Pioneer Parent Shares in connection therewith; (h) the fairness of the termination of the repurchase obligations of Pioneer USA with respect to those partnerships wherein Pioneer USA is obligated to offer to repurchase limited partnership interests annually based upon a formula which, in certain circumstances including the repurchase offers based upon December 31, 2000 oil and gas prices, result in repurchase offer prices above the market value for the reserves of such Partnerships; or (i) any other terms of the Transaction.

This letter does not purport to be a complete description of the analyses performed or the matters considered in rendering this opinion. The analyses and the summary set forth herein must be considered as a whole, and selecting portions of such summary or analyses without considering all factors and analyses would create an incomplete view of the process underlying this opinion. In rendering this opinion, judgment was applied to a variety of complex analyses and assumptions. The assumptions made and the judgments applied in rendering the opinion are not readily susceptible to partial analysis or summary description. The fact that any specific analysis is referred to herein is not meant to indicate that such analysis was given greater weight than any other analyses.

Our opinion is based on business, economic, oil and gas market, and other conditions as of the date of our analysis and addresses the Merger Value in the context of information available as of the date of our analysis. Events occurring after that date could affect the value of the assets of the Partnerships or the assumptions used in preparing this opinion.

Based upon and subject to the foregoing, it is our opinion that, as of the date of this letter and subject to the assumptions, limitations and qualifications contained herein, the Merger Value ascribed to each Partnership in connection with the Transaction and the allocation thereof to: (i) the Limited Partners of each Partnership, as a group; (ii) the general partners of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

each Partnership, as a group; (iii) Pioneer USA, as the managing or sole general partner of each Partnership; (iv) the unaffiliated Limited Partners of each Partnership, as a group; and (v) the unaffiliated limited partners of the non-managing general partner of each applicable Partnership, as a group; is fair to the unaffiliated Limited Partners of each Partnership and the unaffiliated limited partners of the non-managing general partner of each applicable Partnership, from a financial point of view.

Yours truly,

Robert A. Stanger & Co., Inc.
Shrewsbury, New Jersey
 , 2001

APPENDIX E

TO

PROXY STATEMENT/PROSPECTUS

THE MERGER PROPOSALS

The merger proposals for each partnership, except as otherwise indicated, are set forth below. For each partnership, the merger proposals include the approval of:

- o the merger agreement for that partnership, pursuant to which:
 - the partnership will be merged with and into Pioneer USA, on the terms and subject to the conditions set forth in the merger agreement as described in the proxy statement/prospectus; and
 - each partner, whether limited or general, but other than Pioneer USA, will receive Pioneer Parent common stock in an amount based on the merger value of that partnership in exchange for that partner's partnership interests;
- o the merger amendment for that partnership authorizing:
 - the merger of the partnership with and into Pioneer USA, with Pioneer USA being the surviving entity; and
 - the elimination of any restrictions on the merger otherwise contained in the partnership's partnership agreement; and
- o the opinion of special legal counsel for the limited partners and the selection of that counsel.

For each partnership, approval of the merger proposals requires the affirmative vote of limited partners who own or have the power to vote a majority, or 66-2/3% for Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P., of the limited partnership interests in that partnership. The effect of an abstention or a failure to vote is the same as a vote against the merger proposals. See "The Special Meetings -- Record Date; Voting Rights and Proxies." Subject to the terms and conditions of the merger of each partnership as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

described in the proxy statement/prospectus under "The Merger Agreement," if the merger proposals are approved by a partnership, that participating partnership will merge with and into Pioneer USA, with Pioneer USA being the surviving entity. From and after the closing of the merger of each participating partnership, the partnership interests of the partners in that partnership will represent the right to receive an amount of Pioneer Parent common stock as described in the proxy statement/prospectus.

Generally, the partnership agreement of each partnership requires that special legal counsel for the limited partners, acceptable to the partnership, deliver a legal opinion, acceptable to the partnership, that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. of Dallas, Texas has delivered that opinion, subject to the approval of the limited partners of that opinion and the selection of special legal counsel for the limited partners. See "The Merger of Each Partnership -- Legal Opinion for Limited Partners."

APPROVAL OF MERGER FOR EACH PARTNERSHIP FORMED IN TEXAS:

RESOLVED: That, subject to receipt of a favorable opinion of special legal counsel for the limited partners as described in the proxy statement/prospectus, the partnership be merged with and into Pioneer USA, with Pioneer USA being the surviving entity, and that an amount of Pioneer Parent common stock be issued to each partner, other than Pioneer USA, in accordance with the terms set forth in the merger agreement included as Appendix F to the proxy statement/prospectus and subject to the conditions set forth therein.

E-1

142

RESOLVED: That, subject to receipt of a favorable opinion of special legal counsel for the limited partners as described in the proxy statement/prospectus, the following new article shall be added to the partnership agreement of the partnership:

ARTICLE

Notwithstanding any provisions of this Agreement to the contrary, it is hereby agreed as follows:

1. Definitions. For the purposes of this Article, "Proxy Statement/Prospectus" means the proxy statement/prospectus dated , 2001 of Pioneer Natural Resources Company, a Delaware corporation ("Pioneer Parent"), and Pioneer Natural Resources USA, Inc., a Delaware corporation ("Pioneer USA"), contained in the Registration Statement on Form S-4 (File No. 333-59094) of Pioneer Parent filed with the Securities and Exchange Commission.

2. Elimination of Restrictions to Transaction. Notwithstanding anything in this Agreement to the contrary, upon the consent of limited partners holding a majority of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

outstanding limited partnership interests in the partnership, which consent may or may not be the same consent to the adoption of an amendment to this Agreement, no provision of this Agreement shall prohibit, limit or prevent:

(a) the merger or consolidation of the partnership, including the merger described in the Proxy Statement/Prospectus, with any other domestic limited partnership or other entity, as those terms are defined in the Texas Revised Limited Partnership Act, and

(b) the consummation of the merger of the partnership as described in the Proxy Statement/Prospectus.

In addition, no consent of the partnership, Pioneer USA or any partner or other procedure, including the delivery of opinions of counsel, shall be required in order to enable the partnership, Pioneer USA or any partner to effect the merger.

3. Mergers. For purposes of this Agreement, each merger described in the Proxy Statement/Prospectus shall be treated as if the partnership has:

(a) disposed of all of its assets and liabilities to Pioneer USA in exchange for an amount of Pioneer Parent common stock representing the merger value of the partnership, and

(b) liquidated in the manner provided in the liquidation provisions of this Agreement.

Accordingly, upon the partnership's deemed liquidation resulting from the merger, Pioneer Parent will issue an amount of Pioneer Parent common stock to the partners, other than Pioneer USA, in accordance with the liquidation provisions of this Agreement. For purposes of Texas law, the merger shall be a merger subject to the provisions of Section 2.11 of the Texas Revised Limited Partnership Act.

4. Authority of Pioneer USA as General Partner. By obtaining the approval of the limited partners described in Section 2 of this Article, the partnership hereby extends the power of attorney granted to Pioneer USA pursuant to this Agreement to permit Pioneer USA to execute the merger agreement described in the Proxy Statement/Prospectus and the merger amendment contemplated by this Article on behalf of the limited partners. Pioneer USA shall be authorized, at such time in its full discretion as it deems appropriate, to execute, acknowledge, verify, deliver, file and record, for and in the name and on behalf of the partnership, Pioneer USA and the limited partners, any and all documents, agreements, certificates and instruments, and shall do and perform any and all acts required by applicable law or which Pioneer USA deems necessary or advisable in order to give effect to this Article and the transactions contemplated herein, including, but not limited to, the merger.

5. This Article Controlling. The provisions of this Article shall control over all other provisions of this Agreement.

Except as herein expressly amended, all other terms and provisions of this Agreement shall remain in full force and effect.

APPROVAL OF MERGER FOR EACH PARTNERSHIP FORMED IN DELAWARE:

RESOLVED: That, subject to receipt of a favorable opinion of special legal counsel for the limited partners as described in the proxy statement/prospectus, the partnership be merged with and into Pioneer USA, with Pioneer USA being the surviving entity, and that an amount of Pioneer Parent common stock be issued to each partner, other than Pioneer USA, in accordance with the terms set forth in the merger agreement included as Appendix F to the proxy statement/prospectus and subject to the conditions set forth therein.

RESOLVED: That, subject to receipt of a favorable opinion of special legal counsel for the limited partners as described in the proxy statement/prospectus, the following new article shall be added to the partnership agreement of the partnership:

ARTICLE

Notwithstanding any provisions of this Agreement to the contrary, it is hereby agreed as follows:

1. Definitions. For the purposes of this Article, "Proxy Statement/Prospectus" means the proxy statement/prospectus dated , 2001 of Pioneer Natural Resources Company, a Delaware corporation ("Pioneer Parent"), and Pioneer Natural Resources USA, Inc., a Delaware corporation ("Pioneer USA"), contained in the Registration Statement on Form S-4 (File No. 333-59094) of Pioneer Parent filed with the Securities and Exchange Commission.

2. Elimination of Restrictions to Transaction. Notwithstanding anything in this Agreement to the contrary, upon the consent of limited partners holding a majority of the outstanding limited partnership interests in the partnership, which consent may or may not be the same consent to the adoption of an amendment to this Agreement, no provision of this Agreement shall prohibit, limit or prevent:

(a) the merger or consolidation of the partnership, including the merger described in the Proxy Statement/Prospectus, with any other domestic limited partnership or other business entity, as those terms are defined in the Delaware Revised Uniform Limited Partnership Act, and

(b) the consummation of the merger of the partnership as described in the Proxy Statement/Prospectus.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In addition, no consent of the partnership, Pioneer USA or any partner or other procedure, including the delivery of opinions of counsel, shall be required in order to enable the partnership, Pioneer USA or any partner to effect the merger.

3. Mergers. For purposes of this Agreement, each merger described in the Proxy Statement/Prospectus shall be treated as if the partnership has:

(a) disposed of all of its assets and liabilities to Pioneer USA in exchange for an amount of Pioneer Parent common stock representing the merger value of the partnership, and

(b) liquidated in the manner provided in the liquidation provisions of this Agreement.

E-3

144

Accordingly, upon the partnership's deemed liquidation resulting from the merger, Pioneer Parent will issue an amount of Pioneer Parent common stock to the partners, other than Pioneer USA, in accordance with the liquidation provisions of this Agreement. For purposes of Delaware law, the merger shall be a merger subject to the provisions of Section 17.11 of the Delaware Revised Uniform Limited Partnership Act.

4. Authority of Pioneer USA as General Partner. By obtaining the approval of the limited partners described in Section 2 of this Article, the partnership hereby extends the power of attorney granted to Pioneer USA pursuant to this Agreement to permit Pioneer USA to execute the merger agreement described in the Proxy Statement/Prospectus and the merger amendment contemplated by this Article on behalf of the limited partners. Pioneer USA shall be authorized, at such time in its full discretion as it deems appropriate, to execute, acknowledge, verify, deliver, file and record, for and in the name and on behalf of the partnership, Pioneer USA and the limited partners, any and all documents, agreements, certificates and instruments, and shall do and perform any and all acts required by applicable law or which Pioneer USA deems necessary or advisable in order to give effect to this Article and the transactions contemplated herein, including, but not limited to, the merger.

5. This Article Controlling. The provisions of this Article shall control over all other provisions of this Agreement.

Except as herein expressly amended, all other terms and provisions of this Agreement shall remain in full force and effect.

APPROVAL OF COUNSEL TO LIMITED PARTNERS FOR EACH PARTNERSHIP:

RESOLVED: That the selection of of Dallas, Texas as special legal counsel

B. Each of P&P Employees 81-I, Ltd., a Texas limited partnership, P&P Employees 81-II, Ltd., a Texas limited partnership, P&P Employees 82-I, Ltd., a Texas limited partnership, P&P Employees 82-II, Ltd., a Texas limited partnership, P&P Employees 82-III, Ltd., a Texas limited partnership, P&P Employees 83-A, Ltd., a Texas limited partnership, P&P Employees 83-B, Ltd., a Texas limited partnership, and P&P Employees 84-A, Ltd., a Texas limited partnership (individually, the "Nonmanaging General Partner" and collectively, the "Nonmanaging General Partners"), is the nonmanaging general partner of Parker & Parsley 81-I, Ltd., Parker & Parsley 81-II, Ltd., Parker & Parsley 82-I, Ltd., Parker & Parsley 82-II, Ltd., Parker & Parsley 82-III, Ltd., Parker & Parsley 83-A, Ltd. Parker & Parsley 83-B, Ltd. and Parker & Parsley 84-A, Ltd., respectively.

C. Pioneer USA is the sole general partner of each of the Nonmanaging General Partners and in such capacity has authority (i) to cause the Nonmanaging General Partner to perform its obligations under the partnership agreement of the respective Partnership; and (ii) to exercise on behalf of the Nonmanaging General Partner all of the rights and elections granted to such Nonmanaging General Partner by the respective Partnership.

D. The board of directors of each of Pioneer Parent and Pioneer USA has determined that it is in the best interests of Pioneer Parent and Pioneer USA (in its individual capacity, as the sole or managing general partner of each Partnership and as the sole general partner of each Nonmanaging General Partner) to merge each Partnership with and into Pioneer USA and each such board of directors has approved the merger of each Partnership referred to below, upon the terms and subject to the conditions contained herein.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

E. Pioneer USA intends to solicit the vote of the limited partners of each Partnership holding at least a majority (or with respect to Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P. (each, a "Super-Majority Partnership"), at least 66-2/3%) of the outstanding limited partnership interests of the Partnership to approve the merger of the Partnership. Subject to certain limitations, upon consummation of the merger of each Partnership, the partners, other than Pioneer USA, will have the right to receive a number of shares of common stock, par value \$0.01 per share, of Pioneer Parent (the "Pioneer Parent Common Stock").

AGREEMENTS

NOW, THEREFORE, in consideration of the premises and the mutual agreements contained herein, the parties hereto agree as follows:

ARTICLE 1 THE MERGER OF EACH PARTNERSHIP

1.1 Merger of Each Partnership. At the Effective Time (as defined in Section 1.4), each Partnership shall be merged with and into Pioneer USA, the separate existence of the Partnership shall cease, and Pioneer USA, as the surviving corporation, shall continue to exist by virtue of and shall be governed by the laws of the State of Delaware.

F-2

148

1.2 Merger Value for Each Partnership; Pioneer Parent Common Stock Offered.

(a) At the Effective Time, by virtue of the merger of each Partnership and without any action on the part of Pioneer USA or the other partners of the Partnership, each partnership interest outstanding immediately prior thereto shall be converted into the right to receive an amount of Pioneer Parent Common Stock allocated to the Partnership, which amount shall be determined in accordance with the merger value assigned to the Partnership pursuant to the procedures set forth herein and in the Proxy Statement/Prospectus (as defined in Section 4.3) and the procedures set forth in the Partnership's partnership agreement for allocating liquidation distributions as though the assets of the Partnership were sold for the merger value of the Partnership. The merger value for each Partnership is equal to the sum of the present value of estimated future net revenues from the Partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001 and determined as described in the Proxy Statement/Prospectus, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the Partnerships and less the cash distribution to be mailed on or about July 12, 2001, by the Partnership to its partners. The merger value for each Partnership will not be adjusted as of the Closing Date. The number of shares of Pioneer Parent Common Stock to be issued for each partnership interest of each Partnership will be based on (i) the Partnership's merger value divided by (ii) the average closing price of the Pioneer Parent Common Stock, as reported by the New York Stock Exchange, for the ten trading days ending three business days before the initial date of the special meeting for the Partnership. For purposes of illustration in the Proxy Statement/Prospectus, Pioneer Parent and Pioneer USA calculated the aggregate number of shares of Pioneer Parent Common Stock to be offered based on \$18.00 per share of Pioneer Parent Common Stock. Pioneer Parent and Pioneer USA shall update the aggregate number of shares of Pioneer Parent Common Stock to be

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

issued based on the average closing price as described in clause (ii) above before the date of the special meeting for each Partnership. The merger value assigned to each Partnership and the amount of Pioneer Parent Common Stock offered with respect to each \$1,000 investment by the limited partners in the Partnership pursuant to the merger of the Partnership are set forth in the table entitled "Summary Table - Merger Value and Amount of Initial Limited Partner Investment Repaid" in the Proxy Statement/Prospectus.

(b) All partnership interests of each Partnership, when converted into the right to receive Pioneer Parent Common Stock, shall no longer be outstanding and shall automatically be cancelled and retired and shall cease to exist, and each holder of a certificate representing any such partnership interests shall cease to have any rights with respect thereto, except the right to receive the amount of Pioneer Parent Common Stock to be delivered in consideration therefor.

(c) The partnership interests, whether general or limited, in each Partnership held directly or indirectly by Pioneer USA shall be cancelled without any consideration being received therefor; provided, however, that as a result of the merger of each Partnership, Pioneer USA will own 100% of the properties of the Partnership, including properties attributable to its partnership interests in the Partnership.

(d) No fractional shares of Pioneer Parent Common Stock will be issued. Each fractional share of Pioneer Parent Common Stock to be issued to a partner of a Partnership will be rounded up to the nearest whole share.

(e) When any person has partnership interests in more than one Partnership that merges with Pioneer USA, Pioneer USA and Pioneer Parent may, at their sole discretion, aggregate the number of shares of Pioneer Parent Common Stock to be issued to that person before making the rounding and other adjustments provided in the preceding clause (d).

(f) If any limited partner is indebted to Pioneer USA for any portion of the limited partner's original investment in the Partnership, Pioneer USA plans to apply the Pioneer Parent Common Stock that would otherwise be distributed to the limited partner upon completion of the merger of the Partnership against that limited partner's indebtedness. If a limited partner's indebtedness to Pioneer USA is less than the merger value allocated to limited partnership interests held by the limited partner, the limited partner shall receive Pioneer Parent Common Stock equal to the amount by which such merger value exceeds such indebtedness. If a limited partner's indebtedness to Pioneer USA is greater than the merger value allocated to the limited partnership interests held by the limited partner, Pioneer USA may collect the deficiency from the limited partner.

F-3

149

(g) To the extent that Pioneer USA or a Partnership is required to withhold and pay over, or otherwise pay, any withholding or other tax (the "Required Withholding") with respect to a partner or former partner in a Partnership (the "Withholding Partner") as a result of the Withholding Partner's current or former participation in the Partnership, Pioneer USA or the Partnership shall be entitled to deduct and withhold (or cause to be deducted and withheld) the Required Holding from the merger consideration (including the Pioneer Parent Common Stock) otherwise payable to the Withholding Partner. In

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the event Pioneer USA or a Partnership withholds Pioneer Parent Common Stock in order to satisfy the Required Withholding with respect to a Withholding Partner, Pioneer USA or the Partnership, as appropriate, may, in its sole discretion, (i) sell such Pioneer Parent Common Stock and use the proceeds therefrom to satisfy the Required Withholding, (ii) hold such Pioneer Parent Common Stock as security for the satisfaction of the Required Withholding by the Withholding Partner, in which case the Pioneer Parent Common Stock shall be released to the Withholding Partner upon the full satisfaction of the Required Withholding by the Withholding Partner, or (iii) take such other reasonable action as is required or appropriate to satisfy the Required Withholding at the sole expense of the Withholding Partner. To the extent that amounts are so withheld or deducted (or caused to be withheld or deducted) by Pioneer USA or a Partnership, such amounts shall be treated for all purposes of this Merger Agreement as having been paid to the Withholding Partner.

1.3 Closing. The closing of the merger of each Partnership (the "Closing") shall take place at the offices of Vinson & Elkins L.L.P., 3700 Trammell Crow Center, 2001 Ross Avenue, Dallas, Texas 75201, as soon as practicable after the fulfillment of the conditions referred to in Article 4, or at such other time and place as the parties shall agree (the date of such Closing being the "Closing Date").

1.4 Effective Time of Merger of Each Partnership. Upon satisfaction of the conditions set forth in Article 4 hereof and as soon as practicable after the Closing, this Merger Agreement, or a certificate of merger setting forth the information required by, and otherwise in compliance with, Section 263 of the General Corporation Law of the State of Delaware (the "DGCL") and, if applicable, Section 17-211 of the Revised Uniform Limited Partnership Act of the State of Delaware (the "DRULPA") with respect to the merger of each Partnership, shall be delivered for filing with the Secretary of State of the State of Delaware. At such time, if applicable, a certificate of merger with respect to the merger of each Partnership setting forth the information required by, and otherwise in compliance with, Section 2.11 the Revised Limited Partnership Act of the State of Texas (the "TRLPA") shall be delivered for filing with the Secretary of State of the State of Texas. The merger of each Partnership shall become effective upon the later of (a) the day and at the time the Secretary of State of the State of Delaware files this Merger Agreement or such certificate of merger in compliance with Section 263 of the DGCL and, if applicable, Section 17-211 of the DRULPA, and (b) if applicable, the day and at the time the Secretary of State of the State of Texas files such certificate of merger in compliance with Section 2.11 of the TRLPA (the time of such effectiveness is herein called the "Effective Time"). Notwithstanding the foregoing, by action of its board of directors, either Pioneer Parent or Pioneer USA, in its individual capacity or as the sole general partner of each Partnership, may terminate this Merger Agreement at any time prior to the earlier of (a) the filing of this Merger Agreement or the certificate of merger with respect to the merger of the Partnership in compliance with Section 263 of the DGCL and, if applicable, Section 17-211 of the DRULPA with the Secretary of State of the State of Delaware and (b) if applicable, the filing of the certificate of merger with respect to the merger of the Partnership in compliance with Section 2.11 of the TRLPA with Secretary of State of the State of Texas.

1.5 Effect of Merger of Each Partnership. At the Effective Time of the merger of each Partnership, Pioneer USA, without further action, as provided by the laws of the State of Delaware and the State of Texas, as the case may be, shall succeed to and possess all the rights, privileges, powers, and franchises, of a public as well as of a private nature, of the Partnership; and all property, real, personal and mixed, and all debts due on whatsoever account, including subscriptions to shares, and all other choses in action, and all and every other interest, of or belonging to or due to the Partnership shall be deemed to be vested in Pioneer USA without further act or deed; and the title to

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

any real estate, or any interest therein, vested in Pioneer USA or the Partnership shall not revert or be in any way impaired by reason of the merger of the Partnership. Such transfer to and vesting in Pioneer USA shall be deemed to occur by operation of law, and no consent or approval of any other person shall be required in connection with any such transfer or vesting unless such consent or approval is specifically required in the event of merger or consolidation by law or express provision in any contract, agreement, decree, order, or other instrument to which Pioneer USA or the Partnership is a party or by which either of them is bound. At and after the Effective Time, Pioneer USA shall be responsible and liable for all debts, liabilities, and duties of each Partnership, including franchise taxes, if any, which may be enforced against Pioneer USA to the same extent as if said debts, liabilities,

F-4

150

and duties had been incurred or contracted by it. Neither the rights of creditors nor any liens upon the property of any Partnership or Pioneer USA shall be impaired by the merger of any Partnership.

1.6 Certificate of Incorporation and Bylaws. The certificate of incorporation of Pioneer USA before the merger of each Partnership shall be and remain the certificate of incorporation of Pioneer USA after the Effective Time, until the same shall thereafter be altered, amended, or repealed in accordance with law and Pioneer USA's certificate of incorporation. The bylaws of Pioneer USA as in effect at the Effective Time shall be and remain the bylaws of Pioneer USA, as the surviving corporation, until the same shall thereafter be altered, amended, or repealed in accordance with law, Pioneer USA's certificate of incorporation or such bylaws.

1.7 Pioneer USA Common Stock. At the Effective Time, each outstanding share of common stock of Pioneer USA shall remain outstanding and shall continue to represent one share of common stock of Pioneer USA.

1.8 Officers and Directors. At the Effective Time, each of the persons who was serving as an officer of Pioneer USA immediately prior to the Effective Time shall continue to be an officer of Pioneer USA and shall continue to serve in such capacity at the pleasure of the board of directors of Pioneer USA or, if earlier, until their respective death or resignation. At the Effective Time, each of the persons who was serving as a director of Pioneer USA immediately prior to the Effective Time shall continue to be a director of Pioneer USA, and each shall serve in such capacity until the next annual meeting of stockholders of Pioneer USA and until his or her successor is elected and qualified or, if earlier, until his death, resignation, or removal from office.

1.9 Exchange of Partnership Interests for Pioneer Parent Common Stock.

(a) Continental Stock Transfer & Trust Company shall act as the transfer and exchange agent (in such capacity, the "Transfer Agent") in connection with the issuance of certificates representing shares of Pioneer Parent Common Stock pursuant to Section 1.2.

(b) The Transfer Agent shall mail certificates representing shares of Pioneer Parent Common Stock to the partners of record, other than Pioneer USA, of each Partnership promptly following the Closing Date in payment of the merger consideration. Limited partners and Nonmanaging General Partners of each Partnership will not be required to surrender partnership interest certificates to receive the Pioneer Parent Common Stock.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(c) If any certificate representing shares of Pioneer Parent Common Stock is to be issued in a name other than that in which the limited partnership interests cancelled in exchange therefor are registered, it shall be a condition of the issuance thereof that the person requesting such exchange shall pay to the Transfer Agent any transfer or other taxes required by reason of the issuance of a certificate representing shares of Pioneer Parent Common Stock in any name other than that of the registered holder of the cancelled limited partnership interests, or otherwise required, or shall establish to the satisfaction of the Transfer Agent that such tax has been paid or is not payable.

(d) After the Closing Date, there shall not be any further registration of transfers on the transfer books of any Partnership of the partnership interests that were issued and outstanding immediately before the Closing Date and were converted into the right to receive Pioneer Parent Common Stock. If, after the Closing Date, certificates representing partnership interests of a Partnership are presented, they shall be exchanged for Pioneer Parent Common Stock, all as provided in this Article.

ARTICLE 2 REPRESENTATIONS AND WARRANTIES

2.1 Representations and Warranties of Each Partnership. Each Partnership hereby represents and warrants to Pioneer Parent and Pioneer USA as follows:

(a) Formation; Qualification. The Partnership is a limited partnership duly formed under the DRULPA or TRLPA, as applicable, and is validly existing and in good standing under the laws of the State of Delaware or the State of Texas, as applicable. The Partnership has all requisite partnership power and authority to own, operate or lease its properties and to carry on its business as now being conducted. The Partnership is duly qualified to do business as a foreign limited partnership and is in good standing in each jurisdiction where the

F-5

151

character of its properties owned, operated or leased, or the nature of its activities, makes such qualifications necessary.

(b) Capitalization. All of the outstanding partnership interests of the Partnership are free of all liens, encumbrances, defects and preemptive rights and are fully paid. Except as described in the Proxy Statement/Prospectus, there are no outstanding subscriptions, options or other arrangements or commitments obligating the Partnership to issue any additional partnership interests.

(c) No Conflicts. Assuming this Merger Agreement is approved by the requisite vote of the limited partners of the Partnership (with respect to Parker & Parsley 85-A, Ltd., Parker & Parsley 85-B, Ltd., Parker & Parsley Private Investment 85-A, Ltd., Parker & Parsley Selected 85 Private Investment, Ltd., Parker & Parsley Private Investment 86, Ltd., Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P. (each, a "Special Vote Partnership"), excluding Pioneer USA and its affiliates), consummation of the transactions contemplated hereby and compliance with the terms and provisions of this Merger Agreement

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

will not conflict with, result in a breach of, require notice under or constitute a default under (i) its certificate of limited partnership or partnership agreement, (ii) any material judgment, order, injunction, decree or ruling of any court or governmental authority or (iii) any material agreement, indenture or instrument to which the Partnership is a party.

(d) Authority, Authorization and Enforceability. The Partnership has all requisite power and authority to enter into and perform the provisions of this Merger Agreement. The execution and delivery of this Merger Agreement and the consummation of the transactions contemplated hereby have been duly authorized by all necessary partnership action on the part of the Partnership other than the approval of its limited partners (with respect to each Special Vote Partnership, excluding Pioneer USA and its affiliates). Subject to such approval, this Merger Agreement has been duly executed and delivered by the Partnership and constitutes a valid and binding obligation of the Partnership enforceable in accordance with its terms.

(e) SEC Reports; Financial Statements.

(i) With respect to each of Reporting Partnership (as defined below), the Partnership's (A) Annual Report on Form 10-K for the year ended December 31, 2000, (B) Quarterly Report on Form 10-Q for the quarter ended March 31, 2001, and (C) all other reports or registration statements filed with the Securities and Exchange Commission (the "SEC") since December 31, 2000 (collectively, the "Partnership's SEC Reports") (1) were prepared in accordance with the applicable requirements of the Securities Act of 1933 (the "Securities Act") and the Securities Exchange Act of 1934 (the "Exchange Act"), and (2) as of their respective dates, did not contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the statements therein, in the light of the circumstances under which they are made, not misleading.

(ii) Each of the financial statements of the Partnership for the year ended December 31, 2000 and for the three months ended March 31, 2001 contained in the Partnership's supplement to the Proxy Statement/Prospectus and, with respect to each Reporting Partnership, in the Partnership's SEC Reports has been prepared in accordance with generally accepted accounting principles applied on a consistent basis throughout the periods involved (except as may be indicated in the notes thereto) and each fairly presents the financial position of the Partnership as of the respective dates thereof and the results of operations and cash flows of the Partnership for the periods indicated, except that the unaudited interim financial statements are subject to normal and recurring year-end adjustments that are not expected to be material in amount.

(iii) For purposes hereof, the term "Reporting Partnership" means: Parker & Parsley 82-I, Ltd., Parker & Parsley 82-II, Ltd., Parker & Parsley 83-A, Ltd., Parker & Parsley 83-B, Ltd., Parker & Parsley 84-A, Ltd., Parker & Parsley 85-A, Ltd., Parker & Parsley 85-B, Ltd., Parker & Parsley 86-A, Ltd., Parker & Parsley 86-B, Ltd., Parker & Parsley 86-C, Ltd., Parker & Parsley 87-A, Ltd., Parker & Parsley 87-B, Ltd., Parker & Parsley Producing Properties 87-A, Ltd., Parker & Parsley Producing Properties 87-B, Ltd., Parker & Parsley 88-A, L.P., Parker & Parsley 88-B, L.P., Parker & Parsley Producing Properties 88-A, L.P., Parker & Parsley 89-A, L.P., Parker & Parsley 90-A L.P., Parker & Parsley 90-B Conv., L.P., Parker & Parsley 90-B, L.P., Parker & Parsley 90-C Conv., L.P., Parker & Parsley 90-C, L.P., Parker & Parsley 91-A, L.P. and Parker & Parsley 91-B, L.P.

(f) No Material Adverse Change. Since March 31, 2001, the Partnership has conducted its operations in the ordinary and usual course of business and has paid all of its obligations as they have become due; and the business of the Partnership has not undergone any material adverse change since such date.

(g) Accuracy of Information. None of the information supplied or to be supplied by the Partnership for inclusion in the Proxy Statement/Prospectus, as amended or supplemented, will, at the time of the mailing of the Proxy Statement/Prospectus, the time of the special meeting of the limited partners of the Partnership (each, a "Special Meeting") or the Closing Date, be false or misleading with respect to any material fact, contain any untrue statement of material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

2.2 Representations and Warranties of Pioneer USA. Pioneer USA hereby represents and warrants to Pioneer Parent and each Partnership as follows:

(a) Organization; Qualification. Pioneer USA is a corporation duly formed under the DGCL and is validly existing and in good standing under the laws of the State of Delaware. Pioneer USA has all requisite corporate power and authority to own, operate or lease its properties and to carry on its business as now being conducted. Pioneer USA is duly qualified to do business as a foreign corporation and is in good standing in each jurisdiction where the character of its properties owned, operated or leased, or the nature of its activities, makes such qualifications necessary.

(b) No Conflicts. Consummation of the transactions contemplated hereby and compliance with the terms and provisions of this Merger Agreement will not conflict with, result in a breach of, require notice under or constitute a default under (i) its certificate of incorporation or bylaws, (ii) any material judgment, order, injunction, decree or ruling of any court or governmental authority or (iii) any material agreement, indenture or instrument to which Pioneer USA is a party.

(c) Authority, Authorization and Enforceability. Pioneer USA has all requisite corporate power and authority to execute and deliver this Merger Agreement and to perform the provisions of this Merger Agreement. The execution and delivery of this Merger Agreement and the consummation of the transactions contemplated hereby have been duly authorized by all necessary corporate action on the part of Pioneer USA. This Merger Agreement has been duly executed and delivered by Pioneer USA and constitutes a valid and binding obligation of Pioneer USA enforceable in accordance with its terms.

(d) No Material Adverse Change. Since March 31, 2001, Pioneer USA has conducted its operations in the ordinary and usual course of business and has paid all of its obligations as they have become due; and the business of Pioneer USA has not undergone any material adverse change since such date.

(e) Accuracy of Information. None of the information supplied or to be supplied by Pioneer USA for inclusion in the Proxy Statement/Prospectus, as amended or supplemented, will, at the time of the mailing of the Proxy Statement/Prospectus, the time of the Special Meeting of each Partnership or the Closing Date, be false or misleading with respect to any

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

material fact, contain any untrue statement of material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

(f) Capacity as General Partner. Pioneer USA is the sole or managing general partner of each Partnership and is the sole general partner of each Nonmanaging General Partner.

2.3 Representations and Warranties of Pioneer Parent. Pioneer Parent hereby represents and warrants to Pioneer USA and each Partnership as follows:

(a) Organization; Qualification. Pioneer Parent is a corporation duly formed under the DGCL and is validly existing and in good standing under the laws of the State of Delaware. Pioneer Parent has all requisite corporate power and authority to own, operate or lease its properties and to carry on its business as now being conducted. Pioneer Parent is duly qualified to do business as a foreign corporation and is in good standing in each jurisdiction where the character of its properties owned, operated or leased, or the nature of its activities, makes such qualifications necessary.

F-7

153

(b) No Conflicts. Consummation of the transactions contemplated hereby and compliance with the terms and provisions of this Merger Agreement will not conflict with, result in a breach of, require notice under or constitute a default under (i) its certificate of incorporation or bylaws, (ii) any material judgment, order, injunction, decree or ruling of any court or governmental authority or (iii) any material agreement, indenture or instrument to which Pioneer Parent is a party.

(c) Authority, Authorization and Enforceability. Pioneer Parent has all requisite corporate power and authority to execute and deliver this Merger Agreement and to perform the provisions of this Merger Agreement. The execution and delivery of this Merger Agreement and the consummation of the transactions contemplated hereby have been duly authorized by all necessary corporate action on the part of Pioneer Parent. This Merger Agreement has been duly executed and delivered by Pioneer Parent and constitutes a valid and binding obligation of Pioneer Parent enforceable in accordance with its terms. When issued in accordance with this Merger Agreement, the shares of Pioneer Parent Common Stock will be validly issued, fully paid and nonassessable and not subject to preemptive rights.

(d) SEC Reports; Financial Statements.

(i) Pioneer Parent's (A) Annual Report on Form 10-K for the year ended December 31, 2000, (B) Quarterly Report on Form 10-Q for the quarter ended March 31, 2001, and (C) all other reports or registration statements filed with the SEC since December 31, 2000 (collectively, "Pioneer Parent's SEC Reports") (1) were prepared in accordance with the applicable requirements of the Securities Act and the Exchange Act, and (2) as of their respective dates, did not contain any untrue statement of a material fact or omit to state a material fact required to be stated therein or necessary in order to make the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

statements therein, in the light of the circumstances under which they are made, not misleading.

(ii) Each of the financial statements of Pioneer Parent for the year ended December 31, 2000 and for the three months ended March 31, 2001 contained in Pioneer Parent's SEC Reports has been prepared in accordance with generally accepted accounting principles applied on a consistent basis throughout the periods involved (except as may be indicated in the notes thereto) and each fairly presents the financial position of Pioneer Parent as of the respective dates thereof and the results of operations and cash flows of Pioneer Parent for the periods indicated, except that the unaudited interim financial statements are subject to normal and recurring year-end adjustments that are not expected to be material in amount.

(e) No Material Adverse Change. Since March 31, 2001, Pioneer Parent has conducted its operations in the ordinary and usual course of business and has paid all of its obligations as they have become due; and the business of Pioneer Parent has not undergone any material adverse change since such date.

(f) Accuracy of Information. None of the information supplied or to be supplied by Pioneer Parent for inclusion in the Proxy Statement/Prospectus, as amended or supplemented, will, at the time of the mailing of the Proxy Statement/Prospectus, the time of the Special Meeting of each Partnership or the Closing Date, be false or misleading with respect to any material fact, contain any untrue statement of material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading.

ARTICLE 3 CONDITIONS PRECEDENT TO THE MERGER OF EACH PARTNERSHIP

3.1 Conditions to Each Party's Obligations to Effect the Merger of Each Partnership. The respective obligations of each party to effect the merger of each Partnership shall be subject to the fulfillment (or waiver in whole or in part by the intended beneficiary thereof in its sole discretion) at or prior to the Closing Date of the following conditions:

(a) This Merger Agreement, an amendment to the partnership agreement of each Partnership to permit the merger of such Partnership (the "Merger Amendment"), the selection of special counsel for the limited partners and that counsel's legal opinion referred to in Section 3.1(c) shall have been approved by the limited partners (with respect to each Special Vote Partnership, excluding Pioneer USA and its affiliates) holding at least a

F-8

154

majority (or, with respect to each Super-Majority Partnership, at least 66-2/3%) of the outstanding limited partnership interests voting in person or by proxy at the Special Meetings at which a quorum is present, with respect to each merger.

(b) Pioneer USA shall have received from Robert A. Stanger & Co., Inc. a written opinion for inclusion in the Proxy Statement/Prospectus satisfactory in form and substance to Pioneer USA and substantially to the effect that, as of the date of that opinion, the merger value for each Partnership and the allocation of the merger value of the Partnership (1) to the limited partners of the Partnership as a group, (2) to the general partners of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the Partnership as a group, (3) to Pioneer USA as the managing or sole general partner of the Partnership, (4) to the unaffiliated limited partners of the Partnership as a group and (5) to the unaffiliated limited partners of the Nonmanaging General Partner, if any, of the Partnership as a group, is fair to the unaffiliated limited partners of the Partnership and the unaffiliated limited partners of the Nonmanaging General Partner, if any, of the Partnership, from a financial point of view. Such opinion shall not have been withdrawn prior to the Closing Date, unless a replacement opinion or opinions of an investment banking firm or firms satisfactory to Pioneer USA to a similar effect has been received by Pioneer USA and has not been withdrawn.

(c) The receipt, on or prior to the Closing Date, by Pioneer USA of the opinion of special legal counsel for the limited partners pursuant to the partnership agreement of each Partnership.

(d) No provision of any applicable law or regulation and no judgment, injunction, order or decree shall prohibit the consummation of the merger of any Partnership and the transactions related thereto.

(e) No suit, action or proceeding shall have been filed or otherwise be pending against Pioneer Parent, Pioneer USA or any officer, director or affiliate of Pioneer Parent or Pioneer USA challenging the legality or any aspect of the merger of any Partnership or the transactions related thereto.

(f) The shares of Pioneer Parent Common Stock issuable upon the merger of each Partnership pursuant to this Merger Agreement shall have been authorized for listing on the New York Stock Exchange and the Toronto Stock Exchange upon official notice of issuance.

(g) The parties to the merger of each Partnership having made all filings and registrations with, and notifications to, all third parties, including, without limitation, lenders and all appropriate regulatory authorities, required for consummation of the transactions contemplated by this Merger Agreement (other than the filing and recordation of appropriate merger documents required by the DGCL, the DRULPA and the TRLPA, as applicable), and all approvals and authorizations and consents of all third parties, including, without limitation, lenders and all regulatory authorities, required for consummation of the transactions contemplated by this Merger Agreement shall have been received and shall be in full force and effect, except for such filings, registrations, notifications, approvals, authorizations and consents, the failure of which to make or obtain would not have a material adverse effect on the business or financial condition of Pioneer Parent, Pioneer USA or any Partnership.

(h) The absence of any opinion of counsel that the exercise by the limited partners of any Partnership of the right to approve the merger of such Partnership is not permitted under applicable state law.

3.2 Conditions to Obligations of Pioneer Parent to Effect the Merger of Each Partnership. The obligations of Pioneer Parent to effect the merger of each Partnership shall be subject to the fulfillment (or waiver in whole or in part by the intended beneficiary thereof in its sole discretion), at or prior to the Closing Date, of the following additional conditions:

(a) Pioneer USA and each Partnership shall have performed in all material respects their respective agreements contained in this Merger Agreement required to be performed at or prior to the Closing Date.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(b) The representations and warranties of Pioneer USA and each Partnership contained in this Merger Agreement shall be true and correct in all material respects at and as of the Closing Date as if made at and as of such time unless they relate to another specified time.

3.3 Conditions to Obligations of Pioneer USA and Each Partnership to Effect the Merger of Such Partnership. The obligations of Pioneer USA and each Partnership to effect the merger of such Partnership shall be

F-9

155

subject to the fulfillment (or waiver in whole or in part by the intended beneficiary thereof in its sole discretion) at or prior to the Closing Date of the following additional conditions:

(a) Pioneer Parent shall have performed in all material respects its agreements contained in this Merger Agreement required to be performed at or prior to the Closing Date.

(b) The representations and warranties of Pioneer Parent contained in this Merger Agreement shall be true and correct in all material respects at and as of the Closing Date as if made at and as of such time unless they relate to another specific time.

ARTICLE 4 ADDITIONAL AGREEMENTS

4.1 Conduct of Business Pending the Merger of Each Partnership. Each Partnership covenants and agrees that, between the date of this Merger Agreement and the Closing Date, unless the other parties shall otherwise agree in writing or as otherwise contemplated in this Merger Agreement, it shall conduct its businesses only in the ordinary course of business and in a manner consistent with past practice, and it shall not take any action except for actions consistent with such practice. Each Partnership shall use its reasonable best efforts to preserve intact its business organization, to keep available the services of its present officers, employees and consultants, and to preserve its relationships with customers, suppliers and other persons with which it has significant business dealings.

4.2 Special Meetings; Proxies. As soon as reasonably practicable after the execution of this Merger Agreement, Pioneer USA will take all action necessary to duly call, give notice of, convene and hold the Special Meetings to consider and vote upon approval of this Merger Agreement, the Merger Amendment, the selection of special legal counsel for the limited partners, that counsel's legal opinion referred to in Section 3.1(c) and the transactions contemplated hereby and thereby. Pioneer USA will use its reasonable best efforts to solicit from the limited partners proxies in favor of this Merger Agreement, the Merger Amendment, the selection of special legal counsel for the limited partners, that counsel's legal opinion referred to in Section 3.1(c) and the transactions contemplated hereby and thereby, and to take all other action necessary or advisable to secure any vote or consent of the limited partners of each Partnership required by the partnership agreement of the Partnership or this Merger Agreement or applicable law to effect the merger of the Partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

4.3 Proxy Statement/Prospectus. Pioneer Parent and Pioneer USA shall file with the SEC a registration statement that includes a preliminary proxy statement/prospectus for each Special Meeting (the definitive form of such proxy statement/prospectus is referred to as the "Proxy Statement/Prospectus"). Pioneer Parent and Pioneer USA shall use all reasonable commercial efforts to have the registration statement declared effective by the SEC as promptly as practicable. Pioneer Parent and Pioneer USA shall cause the Proxy Statement/Prospectus to be mailed to the limited partners of each Partnership as soon as practicable thereafter in accordance with applicable federal and state law.

4.4 Authorization for Shares and Stock Exchange Listing. Prior to the Effective Time, Pioneer Parent and Pioneer USA shall have taken all action necessary to permit Pioneer Parent to issue the number of shares of Pioneer Parent Common Stock required to be issued pursuant to this Merger Agreement. Each of Pioneer Parent and Pioneer USA shall use its commercially reasonable efforts to cause the shares of Pioneer Parent Common Stock to be issued in the merger of each Partnership to be approved for listing on the New York Stock Exchange and the Toronto Stock Exchange, subject to official notice of issuance, prior to the Closing Date.

4.5 Additional Agreements. Subject to the terms and conditions herein provided, each of the parties hereto agrees to use all reasonable commercial efforts to obtain in a timely manner all necessary waivers, consents and approvals and to effect all necessary registrations and filings, and to use all reasonable commercial efforts to take, or cause to be taken, all other actions and to do, or cause to be done, all other things necessary, proper or advisable under applicable laws and regulations to consummate and make effective as promptly as practicable the transactions contemplated by this Merger Agreement.

F-10

156

ARTICLE 5 TERMINATION

5.1 Termination. This Merger Agreement may be terminated and the merger of any Partnership contemplated hereby may be abandoned, in whole or in part, at any time prior to the Effective Time, whether before or after approval of the merger of the Partnership by its limited partners (with respect to each Special Vote Partnership, excluding Pioneer USA and its affiliates):

(a) By mutual written consent of the parties;

(b) By any party, if:

(i) there shall be any applicable law, rule or regulation that makes consummation of the merger of any Partnership illegal or otherwise prohibited or if any judgment, injunction, order or decree enjoining any party from consummating the merger of any Partnership is entered and such judgment, injunction, order or decree shall have become final and non-appealable;

(ii) at the Special Meeting of each Partnership or at any adjournment or postponement thereof, the approval of the limited partners of the Partnership referred to in Section 3.1(a) shall not have been obtained by reason of the failure to obtain the requisite vote; or

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(iii) there shall be any pending suit, action or proceeding filed against Pioneer Parent, Pioneer USA, any Partnership or any officer, director or affiliate of Pioneer Parent or Pioneer USA challenging the legality or any aspect of the merger of any Partnership or the transactions related thereto;

(c) By Pioneer Parent, if either Pioneer USA or any Partnership shall have failed to perform its agreements and covenants contained herein, which failure has a material adverse effect on Pioneer USA or such Partnership, as the case may be, or materially and adversely affects the transactions contemplated by this Merger Agreement;

(d) By Pioneer USA or any Partnership with respect to the Partnership's merger, if Pioneer Parent shall have failed to perform its agreements and covenants contained herein, which failure has a material adverse effect on Pioneer USA or such Partnership, as the case may be, or materially and adversely affects the transactions contemplated by this Merger Agreement;

(e) By Pioneer Parent or Pioneer USA, pursuant to Section 1.4 hereof;

(f) By Pioneer USA, if Pioneer USA, after considering the written advice of outside legal counsel, determines in good faith that termination of this Merger Agreement is required for Pioneer USA's board of directors to comply with its fiduciary duties to its sole stockholder or to any Partnership imposed by applicable law; or

(g) By Pioneer Parent, if there shall have occurred any event, circumstance, condition, development or occurrence causing, resulting in or having, or reasonably expected to cause, result in or have, a material adverse effect (i) on any Partnership's business, operations, properties (taken as a whole), condition (financial or otherwise), results of operations, assets (taken as a whole), liabilities, cash flows or prospects, (ii) on market prices for oil and gas prevailing generally in the oil and gas industry since the date of determination of the oil and gas commodity prices used in the determination of the merger value for each Partnership, (iii) on the price of Pioneer Parent Common Stock or (iv) on the oil and gas industry generally.

5.2 Effect of Termination. In the event of termination of this Merger Agreement by a party as provided in Section 5.1, written notice thereof shall promptly be given to the other parties and this Merger Agreement shall forthwith terminate without further action by any of the parties hereto. If this Merger Agreement is terminated as so provided, there shall be no liabilities or obligations hereunder on the part of any party hereto except as provided in Section 6.13 and except that nothing herein shall relieve any party hereto from liability for any breach of this Merger Agreement.

F-11

157

ARTICLE 6 MISCELLANEOUS

6.1 Headings. The headings contained in this Merger Agreement are for

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

reference purposes only and shall not affect in any way the meaning or interpretation of this Merger Agreement.

6.2 Amendment. This Merger Agreement may be supplemented, amended or modified by an instrument in writing signed by Pioneer Parent and Pioneer USA (on behalf of itself and as (a) the sole or managing general partner of each Partnership, (b) the sole general partner of each Nonmanaging General Partner and (c) attorney-in-fact for the limited partners of each Partnership) at any time prior to the Closing Date; provided, however, that after approval by the limited partners of each Partnership (with respect to each Special Vote Partnership, excluding Pioneer USA and its affiliates) of this Merger Agreement, the Merger Amendment, the selection of special legal counsel for the limited partners and that counsel's legal opinion referred to in Section 3.1(c), no amendment may be made which would adversely change the type or amount of, or the method for determining, the consideration to be received upon consummation of the merger of each Partnership or which would in any other way materially and adversely affect the rights of such limited partners (other than a termination of this Merger Agreement or abandonment of the merger of any Partnership).

6.3 Waiver. At any time prior to the Closing Date, the parties hereto may (a) extend the time for the performance of any of the obligations or other acts of the other parties hereto, (b) waive any inaccuracies in the representations and warranties contained herein or in any document delivered pursuant hereto, and (c) waive compliance with any of the agreements or conditions contained herein. Any such extension or waiver shall not operate as an extension or waiver of, or estoppel with respect to, any subsequent failure of compliance or other failure. Any agreement on the part of a party hereto to any such extension or waiver shall be valid against such party if set forth in an instrument in writing signed by such party.

6.4 Expiration of Representations and Warranties. All representations and warranties made pursuant to this Merger Agreement shall expire with, and be terminated and extinguished by, the merger of each Partnership on the Closing Date.

6.5 Notices. All notices and other communications to be given or made hereunder by any party shall be delivered by first class mail, or by personal delivery, postage or fees prepaid, (a) to Pioneer Parent at 1400 Williams Square West, 5205 North O'Connor Boulevard, Irving, Texas 75039, Attn: Scott D. Sheffield, with a copy to Vinson & Elkins L.L.P., 3700 Trammell Crow Center, 2001 Ross Avenue, Dallas, Texas 75201, Attn: Robert L. Kimball, and (b) to the other parties at Pioneer Natural Resources USA, Inc., 1400 Williams Square West, 5205 North O'Connor Boulevard, Irving, Texas 75039, Attn: Mark L. Withrow, with a copy to Sayles, Lidji & Werbner, 4400 Renaissance Tower, 1201 Elm Street, Dallas, Texas 75270, Attn: Brian M. Lidji.

6.6 Counterparts. This Merger Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same agreement.

6.7 Severability. If any term or other provision of this Merger Agreement is invalid, illegal or incapable of being enforced by any rule of law or public policy, all other conditions and provisions of this Merger Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the transactions contemplated hereby is not affected in any manner materially adverse to any party.

6.8 Entire Agreement. This Merger Agreement, including the documents

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and instruments referred to herein, constitutes the entire agreement and supersedes all other prior agreements and undertakings, both written and oral, between the parties, or any of them, with respect to the subject matter hereof.

6.9 Remedies. Except as otherwise expressly provided herein, this Merger Agreement is not intended to confer upon any other person any rights or remedies hereunder.

6.10 Assignment. This Merger Agreement shall not be assigned by operation of law or otherwise without the consent of all parties hereto.

F-12

158

6.11 No Implied Waiver. Except as expressly provided in this Merger Agreement, no course of dealing among the parties hereto and no delay by any of them in exercising any right, power or remedy conferred herein or now or hereafter existing at law or in equity, by statute or otherwise, shall operate as a waiver of, or otherwise prejudice, any such right, power or remedy.

6.12 Governing Law. Except to the extent that TRLPA is mandatorily applicable, this Merger Agreement shall be governed by, and construed in accordance with, the laws of the State of Delaware (regardless of the laws that might otherwise govern under applicable principles of conflicts of law) as to all matters.

6.13 Expenses. Except as otherwise provided herein, to the extent the merger of a Partnership is completed, that participating Partnership shall pay its pro rata share, based on its reserve value, of the aggregate estimated expenses and fees to be incurred in connection with the merger of each Partnership with and into Pioneer USA. Except as otherwise provided herein, to the extent the merger of a Partnership is not completed, that nonparticipating Partnership shall pay a portion of the estimated expenses and fees of the mergers otherwise allocable to the Partnership based on a fraction, the numerator of which is the percentage of the Partnership's limited partnership interests that are voted in favor of the merger proposals and the denominator of which is the percentage of the Partnership's limited partnership interests for which votes are cast. Pioneer Parent shall pay (a) the remainder of the estimated expenses and fees otherwise allocable to any such nonparticipating Partnership and (2) any expenses and fees actually incurred in excess of \$2.0 million. In addition, if Pioneer Parent terminates this Merger Agreement or abandons the merger of any Partnership pursuant to Section 5.1, Pioneer Parent shall pay all estimated expenses and fees of such Partnership incurred in connection with the merger of such Partnership before such termination or abandonment.

6.14 Liquidation. Each Partnership, Pioneer Parent and Pioneer USA intend and agree that the merger of each Partnership shall be treated as a liquidation of the Partnership into Pioneer USA pursuant to Section 332 of the Internal Revenue Code of 1986, as amended, and shall make all declarations and filings necessary to accomplish such intent and liquidation.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 81-I, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 81-I, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 81-I, Ltd.:

o A table containing:

- the aggregate initial investment by the limited partners
- the aggregate historical limited partner distributions through July 31, 2001
- the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

o Information about:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the legal opinion for the limited partners
- the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 81-I, LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001(c)

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 81-I, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 81-I, Ltd. (the "Partnership") is a limited partnership organized in 1981 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 15% to \$108,191 for the three months ended March 31, 2001 as compared to \$94,181 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 2,157 barrels of oil, 770 barrels of natural gas liquids ("NGLs") and 5,562 mcf of gas were sold, or 3,854 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,402 barrels of oil, 1,217 barrels of NGLs and 6,102 mcf of gas were sold, or 4,636 BOEs.

6

169

The average price received per barrel of oil increased \$1.39, or 5%, from \$27.16 for the three months ended March 31, 2000 to \$28.55 for the same period in 2001. The average price received per barrel of NGLs increased \$2.13, or 15%, from \$14.58 for the three months ended March 31, 2000 to \$16.71 for the same period in 2001. The average price received per mcf of gas increased 232% from \$1.83 during the three months ended March 31, 2000 to \$6.07 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$51,712 for the three months ended March 31, 2001 as compared to \$45,205 for the same period in 2000, an increase of \$6,507, or 14%. This increase was primarily due to increases in production costs, general and administrative expenses ("G&A") and depletion.

Production costs were \$44,964 for the three months ended March 31, 2001 and \$40,666 for the same period in 2000 resulting in a \$4,298 increase, or 11%. The increase was due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 66% from \$2,921 for the three months ended March 31, 2000 to \$4,857 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$1,891 for the three months ended March 31, 2001 as compared to \$1,618 for the same period in 2000, an increase of \$273, or 17%. This increase was primarily due to a downward revision to one well's proved reserves during the three months ended March 31, 2001, offset by a decline in oil production of 245 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$24,090 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$14,166 and a reduction in working capital of \$16,158, offset by increases in production costs of \$4,298 and G&A expenses of \$1,936. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an

7

170

additional \$444 to oil and gas receipts and \$13,722 resulting from an increase in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$68,431, of which \$17,222 was distributed to the general partners and \$51,209 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$41,860, of which \$10,466 was distributed to the general partners and \$31,394 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 81-I, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 81-I, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 81-I, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 81-I, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 81-I, Ltd. (the "Partnership") is a limited partnership organized in 1981 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 81-I, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

7

178

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved

8

179

in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$50,343 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$308,345 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	
	-----	-----
Net income (loss) per statements of operations	\$ 220,612	\$
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	6,157

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	

Property acquisition costs	\$ 4,512	\$
	=====	=====

Capitalized oil and gas properties consist of the following:

Proved properties:		
Property acquisition costs		\$
Completed wells and equipment		-----
Accumulated depletion		-----
Net oil and gas properties		\$
		=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$	78,719	\$
Reimbursement of general and administrative expenses	\$	12,487	\$

Pioneer USA, EMPL and the Partnership are parties to the Partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 60% and the remaining portion is owned by former affiliates.

The costs and revenues of the Partnership are allocated as follows:

			General partners -----
Revenues:			
Proceeds from property dispositions prior to cost recovery			10%
All other Partnership revenues			25%
Costs and expenses:			
Lease acquisition costs, drilling and completion costs and all other costs			10%
Operating costs, direct costs and general and administrative expenses			25%

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

181

	Oil and NGLs (bbls) -----	Gas (mcf) -----
Net proved reserves at January 1, 1998	131,090	275,544
Revisions	(70,930)	(119,307)
Production	(13,937)	(24,638)
	-----	-----
Net proved reserves at December 31, 1998	46,223	131,599
Revisions	160,567	219,656

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production	(14,970)	(28,708)
	-----	-----
Net proved reserves at December 31, 1999	191,820	322,547
Revisions	33,336	130,129
Production	(13,976)	(25,901)
	-----	-----
Net proved reserves at December 31, 2000	211,180	426,775
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.30 per barrel of NGLs and \$7.65 per mcf of gas, discounted at 10% was approximately \$1,915,000 and undiscounted was \$3,748,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000

Plains Marketing, L.P.	54%
Genesis Crude Oil, L.P.	-
Western Gas Resources, Inc.	-
Exxon Corporation	8%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$19,892 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

12

183

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$7,410,000. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and 25% of direct, general and administrative and operating expenses.

13

184

PARKER & PARSLEY 81-I, LTD.

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

2000 compared to 1999

The Partnership's oil and gas revenues increased 60% to \$416,230 for 2000 as compared to \$260,652 in 1999. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 2000, 8,793 barrels of oil, 5,183 barrels of natural gas liquids ("NGLs") and 25,901 mcf of gas were sold, or 18,293 barrel of oil equivalents ("BOEs"). In 1999, 9,249 barrels of oil, 5,721 barrels of NGLs and 28,708 mcf of gas were sold, or 19,755 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.32, or 73%, from \$16.94 in 1999 to \$29.26 in 2000. The average price received per barrel of NGLs increased \$5.38, or 58%, from \$9.22 in 1999 to \$14.60 in 2000. The average price received per mcf of increased 81% from \$1.78 in 1999 to \$3.22 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$198,689 as compared to \$190,778 in 1999, an increase of \$7,911, or 4%. The increase was primarily due to an increase in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$174,233 in 2000 and \$165,810 in 1999, resulting in an \$8,423 increase, or 5%. The increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by less well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 20% from \$13,087 in 1999 to \$15,697 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$12,487 in 2000 and \$7,820 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$8,759 in 2000 as compared to \$11,881 in 1999, representing a decrease of \$3,122, or 26%. This decrease was primarily due to a 20,821 barrels of oil increase in proved reserves during 2000 as a result of the higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 30% to \$260,652 from \$199,789 in 1998. The increase in revenues resulted from higher average prices received and an increase in production. In 1999, 9,249 barrels of oil, 5,721 barrels of NGLs and 28,708 mcf of gas were sold, or 19,755 BOEs. In 1998, 9,634 barrels of oil, 4,303 barrels of NGLs and 24,638 mcf of gas were sold, or 18,043 BOEs.

The average price received per barrel of oil increased \$3.61, or 27%, from \$13.33 in 1998 to \$16.94 in 1999. The average price received per barrel of NGLs increased \$2.82, or 44%, from \$6.40 in 1998 to \$9.22 in 1999. The average price received per mcf of gas remained unchanged at \$1.78 in 1998 and 1999.

Total costs and expenses decreased in 1999 to \$190,778 as compared to \$333,665 in 1998, a decrease of \$142,887, or 43%. The decrease was primarily due to declines in depletion and the impairment of oil and gas properties, offset by an increase in production costs and G&A.

Production costs were \$165,810 in 1999 and \$157,631 in 1998, resulting in an \$8,179 increase, or 5%. The increase was due to additional well maintenance costs incurred to stimulate well production and an increase in production taxes due to increased oil and gas revenues, offset by a decline in ad valorem taxes.

During this period, G&A increased 47% from \$8,892 in 1998 to \$13,087 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$7,820 in 1999 and \$6,250 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$50,343 related to its oil and gas properties during 1998.

Depletion was \$11,881 in 1999 compared to \$116,799 in 1998, representing a decrease of \$104,918, or 90%. This decrease was the result of a combination of factors that included an increase in proved reserves of 104,672 barrels of oil during 1999 as a result of the higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 385 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$124,224 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$156,791, offset by increases in production costs paid of \$8,423, G&A expenses paid of \$2,610 and working capital of \$21,534. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$187,015 to oil and gas receipts, offset by \$30,224 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by lower well maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

186

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to upgrades of equipment on various oil and gas properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$194,876, of which \$48,899 was distributed to the general partners and \$145,977 to the limited partners. In 1999, cash distributions to the partners were \$63,186, of which \$15,981 was distributed to the general partners and \$47,205 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 81-II LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 81-II Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 81-II Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax status or classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

195

PARKER & PARSLEY 81-II, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 81-II (the "Partnership") is a limited partnership organized in 1981 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Revenues:

The partnership's oil and gas revenues increased 54% to \$108,066 for the three months ended March 31, 2001 as compared to \$70,001 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 2,169 barrels of oil, 535 barrels of natural gas liquids ("NGLs") and 5,731 mcf of gas were

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

sold, or 3,659 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,052 barrels of oil, 685 barrels of NGLs and 1,489 mcf of gas were sold, or 2,985 BOEs.

6

196

The average price received per barrel of oil increased \$.52, or 2%, from \$27.34 for the three months ended March 31, 2000 to \$27.86 for the same period in 2001. The average price received per barrel of NGLs increased \$3.36, or 19%, from \$17.54 for the three months ended March 31, 2000 to \$20.90 for the same period in 2001. The average price received per mcf of gas increased 405% from \$1.26 during the three months ended March 31, 2000 to \$6.36 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$65,952 for the three months ended March 31, 2001 as compared to \$62,476 for the same period in 2000, an increase of \$3,476, or 6%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$50,840 for the three months ended March 31, 2001 and \$48,539 for the same period in 2000 resulting in a \$2,301 increase, or 5%. The increase was primarily due to higher production taxes of associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 103% from \$2,190 for the three months ended March 31, 2000 to \$4,448 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$10,664 for the three months ended March 31, 2001 as compared to \$11,747 for the same period in 2000, a decrease of \$1,083, or 9%. This decrease was primarily due to a positive revision to proved reserves on one well during the three months ended March 31, 2001.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$54,285 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$38,350 and a reduction in working capital of \$20,494, offset by increases in production costs of \$2,301 and G&A expenses of \$2,258. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$11,234 to oil and gas receipts and \$27,116 resulting from an increase in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated

(limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$59,505, of which \$15,215 was distributed to the general partners and \$44,290 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$16,316, of which \$3,363 was distributed to the general partners and \$12,953 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

Parker & Parsley 81-II, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 81-II, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 81-II, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 81-II, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 81-II (the "Partnership") is a limited partnership

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

organized in 1981 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 81-II, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

7

205

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved

8

206

in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$30,131 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$172,373 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

2000	1999	1998
-----	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income (loss) per statements of operations	\$ 140,560	\$ 6,232	\$ (96,589)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	41,011	44,867	91,653
Impairment of oil and gas properties for financial reporting purposes	-	-	30,131
Other, net	(482)	(178)	454
	-----	-----	-----
Net income per Federal income tax returns	\$181,089	\$ 50,921	\$ 25,649
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 7,183	\$ 4,254	\$ 8,322
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 210,548	\$ 210,548
Completed wells and equipment	5,134,748	5,127,565
	-----	-----
Accumulated depletion	5,345,296	5,338,113
	(4,821,914)	(4,776,074)
	-----	-----
Net oil and gas properties	\$ 523,382	\$ 562,039
	=====	=====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 75,129	\$ 61,684	\$ 82,817
Reimbursement of general and administrative expenses	\$ 11,615	\$ 6,142	\$ 6,273

Pioneer USA, EMPL and the Partnership are parties to the Partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 80% and the remaining portion is owned by former affiliates.

The costs and revenues of the Partnership are allocated as follows:

	General partners	Limited partners
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%
All other Partnership revenues	25%	75%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	10%	90%
Operating costs, direct costs and general and administrative expenses	25%	75%

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	203,263	321,961
Revisions	(93,478)	(131,045)
Production	(16,033)	(22,439)
	-----	-----
Net proved reserves at December 31, 1998	93,752	168,477
Revisions	118,281	224,790
Production	(13,232)	(19,167)
	-----	-----
Net proved reserves at December 31, 1999	198,801	374,100
Revisions	18,015	(61,237)
Production	(13,921)	(15,864)
	-----	-----
Net proved reserves at December 31, 2000	202,895	296,999
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$14.08 per barrel of NGLs and \$7.91 per mcf of gas, discounted at 10% was approximately \$1,416,000 and undiscounted was \$2,636,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,		
	2000	1999	1998

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	56%	48%	-
LG&E Natural Marketing, Inc.	13%	17%	19%
NGTS LLC	11%	14%	-
Western Gas Processing	2%	4%	13%
Genesis Crude Oil, L.P.	4%	1%	43%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., LG&E Natural Marketing, Inc. and NGTS LLC were \$26,794, \$10,707 and \$4,029, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

12

210

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$5,765,000. During 1983, the Partnership received a total of \$675,000 from its limited partnership in response to an assessment by the managing general partner. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

25% of direct, general and administrative and operating expenses.

13

211

PARKER & PARSLEY 81-II, LTD.
(A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 89% to \$387,180 for 2000 as compared to \$204,717 in 1999. The increase in revenues resulted from higher average prices received and a slight increase in production. In 2000, 8,885 barrels of oil, 5,036 barrels of natural gas liquids ("NGLs") and 15,864 mcf of gas were sold, or 16,565 barrel of oil equivalents ("BOEs"). In 1999, 6,860 barrels of oil, 6,372 barrels of NGLs and 19,167 mcf of gas were sold, or 16,427 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.59, or 76%, from \$16.67 in 1999 to \$29.26 in 2000. The average price received per barrel of NGLs increased \$6.89, or 79%, from \$8.70 in 1999 to \$15.59 in 2000. The average price received per mcf of gas increased 69% from \$1.82 in 1999 to \$3.07 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$240 was recognized during 1999 from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$249,395 as compared to \$200,120 in 1999, an increase of \$49,275, or 25%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$189,764 in 2000 and \$140,847 in 1999, resulting in a \$48,917 increase, or 35%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 40% from \$9,864 in 1999 to \$13,791 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$11,615 in 2000 and \$6,142 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$45,840 in 2000 as compared to \$49,409 in 1999, representing a decrease of \$3,569, or 7%. This decrease was primarily due to an 18,828 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices, offset by an increase in oil production of 2,025 barrels for the period ended December 31, 2000 compared to the same period in 1999.

212

1999 compared to 1998

The Partnership's 1999 oil and gas revenues decreased 2% to \$204,717 from \$209,110 in 1998. The decrease in revenues resulted from a decline in production, offset by higher average prices received. In 1999, 6,860 barrels of oil, 6,372 barrels of NGLs and 19,167 mcf of gas were sold, or 16,427 BOEs. In 1998, 9,451 barrels of oil, 6,582 barrels of NGLs and 22,439 mcf of gas were sold, or 19,773 BOEs.

The average price received per barrel of oil increased \$3.51, or 27%, from \$13.16 in 1998 to \$16.67 in 1999. The average price received per barrel of NGLs increased \$1.97, or 29%, from \$6.73 in 1998 to \$8.70 in 1999. The average price received per mcf of gas increased slightly from \$1.80 in 1998 to \$1.82 in 1999.

Gain on disposition of assets of \$240 was recognized during 1999 from equipment credits received on one fully depleted well.

Total costs and expenses decreased in 1999 to \$200,120 as compared to \$307,424 in 1998, a decrease of \$107,304, or 35%. The decrease was primarily due to declines in depletion, production costs and the impairment of oil and gas properties, offset by an increase in G&A.

Production costs were \$140,847 in 1999 and \$173,960 in 1998, resulting in a \$33,113 decrease, or 19%. The decrease was due to declines in well maintenance costs, ad valorem taxes and production taxes.

During this period, G&A increased 25% from \$7,867 in 1998 to \$9,864 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$6,142 in 1999 and \$6,273 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$30,131 related to its oil and gas properties during 1998.

Depletion was \$49,409 in 1999 compared to \$95,466 in 1998, representing a decrease of \$46,057, or 48%. This decrease was the result of a combination of factors that included an increase in proved reserves of 59,807 barrels of oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during 1999 as a result of higher commodity prices, a decline in oil production of 2,591 barrels for the period ended December 31, 1999 compared to the same period in 1998 and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum Industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

213

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$93,061 during the year ended December 31, 2000 from 1999. This increase was due to increases in oil and gas sales receipts of \$183,843, offset by increases in production costs paid of \$48,917, G&A expenses paid of \$3,927 and working capital of \$37,938. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$65,846 to oil and gas receipts and \$117,997 resulted from an increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to upgrades of equipment on various oil and gas properties.

Proceeds from asset dispositions of \$690 were received during 1999 for the sale of equipment on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$141,760, of which \$38,944 was distributed to the general partners and \$102,816 to the limited partners. In 1999, cash distributions to the partners were \$36,945, of which \$9,080 was distributed to the general partners and \$27,865 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 82-I, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 82-I, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 82-I, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

July 31, 2001

- the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 82-I, LTD.

SUPPLEMENTAL INFORMATION TABLE

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Aggregate Initial Investment by the Limited Partners(a)	\$11,
Aggregate Historical Limited Partner Distributions through July 31, 2001(a)	\$11,
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$ 80
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)	2
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001(c)	\$ 22
-- as of December 31, 2000(c)	\$ 23
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$ 72
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$ 77
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

223

PARKER & PARSLEY 82-I, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 82-I, Ltd. (the "Partnership") is a limited partnership organized in 1982 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 26% to \$216,836 for the three months ended March 31, 2001 as compared to \$172,087 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 4,462 barrels of oil, 856 barrels of natural gas liquids ("NGLs") and 13,274 mcf of

7

224

gas were sold, or 7,530 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 4,433 barrels of oil, 1,810 barrels of NGLs and 12,235 mcf of gas were sold, or 8,282 BOEs.

The average price received per barrel of oil increased \$.79, or 3%, from \$27.23 for the three months ended March 31, 2000 to \$28.02 for the same period in 2001. The average price received per barrel of NGLs increased \$7.01, or 55%, from \$12.67 for the three months ended March 31, 2000 to \$19.68 for the same period in 2001. The average price received per mcf of gas increased 143%, from \$2.33 for the three months ended March 31, 2000 to \$5.65 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$112,030 for the three months ended March 31, 2001 as compared to \$99,443 for the same period in 2000, an increase of \$12,587, or 13%. This increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$97,986 for the three months ended March 31, 2001 and \$85,023 for the same period in 2000 resulting in a \$12,963 increase, or 15%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 52% from \$5,363 for the three months ended March 31, 2000 to \$8,176 for the same period in 2001 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$5,868 for the three months ended March 31, 2001 as compared to \$9,057 for the same period in 2000, a decrease of \$3,189, or 35%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$54,554 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to an increase of \$45,005 in oil and gas sales receipts and a reduction of \$25,325 in working capital, offset by increases in production costs of \$12,963 and G&A expenses of \$2,813. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional

8

225

\$57,097 to oil and gas receipts, offset by \$12,092 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$126,808, of which \$31,477 was distributed to the general partners and \$95,331 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$61,903, of which \$15,492 was distributed to the general partners and \$46,411 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d)
of the Securities Exchange Act of 1934

FOR THE FISCAL YEAR ENDED DECEMBER 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

COMMISSION FILE NO. 2-75530A

PARKER & PARSLEY 82-I, LTD.
(Exact name of Registrant as specified in its charter)

TEXAS	75-1825545
----- (State or other jurisdiction of incorporation or organization)	----- (I.R.S. Employer Identification Number)
1400 WILLIAMS SQUARE WEST, 5205 N. O'CONNOR BLVD., IRVING, TEXAS	75039
----- (Address of principal executive offices)	----- (Zip code)

Registrant's Telephone Number, including area code: (972) 444-9001

Securities registered pursuant to Section 12(b) of the Act: NONE
Securities registered pursuant to Section 12(g) of the Act:
LIMITED PARTNERSHIP INTERESTS (\$2,000 PER UNIT)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES / X / NO / /

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. / X /

No market currently exists for the limited partnership interests of the Registrant. Based on the original purchase price, the aggregate market value of limited partnership interests owned by non-affiliates of the Registrant is \$8,515,000.

As of March 8, 2001, the number of outstanding limited partnership interests was 4,891.

The following documents are incorporated by reference into the indicated parts of this Annual Report on Form 10-K: None

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

228

PART I

ITEM 1. BUSINESS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley 82-I, Ltd. (the "Partnership") is a limited partnership organized in 1982 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA") and its co-general partner is P&P Employees 82-I, Ltd. ("EMPL"), a Texas limited partnership whose general partner is Pioneer USA. Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 4,891 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000, approximately 68% and 13% were attributable to sales made to Plains Marketing, L.P. and GPM Gas Corporation, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental and exploratory oil and gas prospects located in Texas and New Mexico were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 34 oil and gas wells. There were six dry holes from previous periods, two wells plugged and abandoned and nine wells sold. At December 31, 2000, 17 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

230

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 4,891 outstanding limited partnership interests held of record by 600 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$229,765 and \$50,502, respectively, were made to the limited partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997	1996
	-----	-----	-----	-----	-----
Operating results:					

Oil and gas sales	\$ 763,858	\$ 441,997	\$ 392,883	\$ 608,207	\$ 710,000
	=====	=====	=====	=====	=====
Gain on litigation settlement, net	\$ --	\$ --	\$ --	\$ --	\$ 43,000
	=====	=====	=====	=====	=====
Impairment of oil and gas properties	\$ --	\$ --	\$ 294,610	\$ 165,201	\$ 2,000
	=====	=====	=====	=====	=====

	=====	=====	=====	=====	=====

(a) Including litigation settlement per limited partnership interest of \$6.96 in 1996.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 73% to \$763,858 for 2000 as compared to \$441,997 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 17,639 barrels of oil, 6,519 barrels of natural gas liquids ("NGLs") and 45,981 mcf of gas were sold, or 31,822 barrel of oil equivalents ("BOEs"). In 1999, 17,472 barrels of oil, 6,414 barrels of NGLs and 48,380 mcf of gas were sold, or 31,949 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.78, or 77%, from \$16.61 in 1999 to \$29.39 in 2000. The average price received per barrel of NGLs increased \$5.48, or 61%, from \$8.96 in 1999 to \$14.44 in 2000. The average price received per mcf of gas increased 69% from \$1.95 in 1999 to \$3.29 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$431,421 as compared to \$427,526 in 1999, an increase of \$3,895, or 1%. The increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$378,872 in 2000 and \$313,158 in 1999, resulting in an increase of \$65,714, or 21%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 39% from \$18,932 in 1999 to \$26,409 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$22,916 in 2000 and \$13,260 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$26,140 in 2000 as compared to \$95,436 in 1999, representing a decrease of \$69,296, or 73%. This decrease was primarily due to a 86,555 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 13% to \$441,997 from \$392,883 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 17,472 barrels of oil, 6,414 barrels of NGLs and 48,380 mcf of gas were sold, or 31,949 BOEs. In 1998, 19,150 barrels of oil, 6,748 barrels of NGLs and 48,971 mcf of gas were sold, or 34,060 BOEs.

The average price received per barrel of oil increased \$3.29, or 25%, from \$13.32 in 1998 to \$16.61 in 1999. The average price received per barrel of NGLs increased \$1.76, or 24%, from \$7.20 in 1998 to \$8.96 in 1999. The average price received per mcf of gas increased 7% from \$1.82 in 1998 to \$1.95 in 1999.

A gain on disposition of assets of \$199 was recognized during 1998 from post closing adjustments received from the sale of eight oil and gas wells during 1997.

Total costs and expenses decreased in 1999 to \$427,526 as compared to \$961,319 in 1998, a decrease of \$533,793, or 56%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A expenses.

Production costs were \$313,158 in 1999 and \$336,406 in 1998, resulting in a \$23,248 decrease, or 7%. The decrease was due to declines in well maintenance costs and ad valorem taxes.

During this period, G&A increased 30% from \$14,542 in 1998 to \$18,932 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$13,260 in 1999 and \$11,786 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$294,610 related to its oil and gas properties during 1998.

Depletion was \$95,436 in 1999 compared to \$315,761 in 1998, representing a decrease of \$220,325, or 70%. This decrease was the result of an increase in proved reserves of 168,752 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact

on world oil prices, as have overall natural gas supply and demand fundamentals

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$227,133 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$324,304, offset by increases in production costs paid of \$65,714, G&A expenses paid of \$7,477 and working capital of \$23,980. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$325,772 to oil and gas receipts, offset by \$1,468 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principle investing activities during 2000 and 1999 were related to the upgrades of oil and gas equipment on various oil and gas properties.

Proceeds from asset dispositions of \$704 in 1999 were from equipment credits received on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$308,330, of which \$78,565 was distributed to the general partners and \$229,765 to the limited partners. In 1999, cash distributions to the partners were \$67,767, of which \$17,265 was distributed to the general partners and \$50,502 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 82-I, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 82-I, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 82-I, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 82-I, Ltd. (the "Partnership") is a limited partnership organized in 1982 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 82-I, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements -

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

14

241

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$294,610 related to its proved oil and gas properties during 1998.

15

242

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$663,714 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 337,729	\$ 17,320	\$ (563,993)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	21,746	92,542	312,201
Impairment of oil and gas properties for financial reporting purposes	--	--	294,610
Loss on disposition of assets	--	--	(116)
Other, net	(637)	77	786
	-----	-----	-----
Net income per Federal income tax returns	\$ 358,838	\$ 109,939	\$ 43,488
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 11,581	\$ 4,754	\$6,820
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proved properties:		
Property acquisition costs	\$ 360,899	\$ 360,899
Completed wells and equipment	9,540,202	9,528,621
	-----	-----
	9,901,101	9,889,520
Accumulated depletion	(9,613,644)	(9,587,504)
	-----	-----
Net oil and gas properties	\$ 287,457	\$ 302,016
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related

16

243

party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$162,023	\$156,380	\$150,391
Reimbursement of general and administrative expenses	\$ 22,916	\$ 13,260	\$ 11,786

Pioneer USA, EMPL and the Partnership are parties to the Partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 77.5% and the remaining portion is owned by former affiliates. In addition, Pioneer USA owned 634 limited partner interests at January 1, 2001.

The costs and revenues of the Partnership are allocated as follows:

	General partners	Limited partners
	-----	-----
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%
All other Partnership revenues	25%	75%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	10%	90%
Operating costs, direct costs and general and administrative expenses	25%	75%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	321,477	448,047
Revisions	(230,755)	(305,609)
Production	(25,898)	(48,971)
	-----	-----

17

244

Net proved reserves at December 31, 1998	64,824	93,467
Revisions	280,613	443,568
Production	(23,886)	(48,380)
	-----	-----
Net proved reserves at December 31, 1999	321,551	488,655
Revisions	60,464	362,471
Production	(24,158)	(45,981)
	-----	-----
Net proved reserves at December 31, 2000	357,857	805,145
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.55 per barrel of oil, \$13.69 per barrel of NGLs and \$8.68 per mcf of gas, discounted at 10% was approximately \$3,226,000 and undiscounted was \$6,208,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----	-----
Balance, beginning of year	1,636	66	1,179
	-----	-----	-----
Balance, end of year	\$ 3,226	\$ 1,636	\$ 66
	=====	=====	=====

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	----	----	----
Plains Marketing, L.P.	68%	66%	--
Genesis Crude Oil, L.P.	--	--	65%
GPM Gas Corporation	13%	14%	13%
Western Gas Resources, Inc.	1%	2%	10%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and GPM Gas Corporation were \$54,651 and \$30,037, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL.

19

246

Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$9,782,000. During 1985, the Partnership received a total of \$1,372,500 from its limited partners in response to an assessment by the managing general partner. Additionally, \$650,000 was contributed by the managing general partner for limited partnership interests on unpaid assessments of which \$500,000 was paid in 1985 and \$150,000 in 1986. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and 25% of direct, general and administrative and operating expenses.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

247

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts

21

248

Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B.S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker &

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

249

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. Under the Partnership agreement, Pioneer USA pays 8% of the Partnership's acquisition, drilling and completion costs and 20% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 20% of the Partnership's revenues.

EMPL is a co-general partner of the Partnership. Under this arrangement, EMPL pays 2% of the Partnership's acquisition, drilling and completion costs and 5% of its operating and general and administrative expenses. In return, EMPL is allocated 5% of the Partnership's revenues. EMPL does not receive any fees or reimbursements from the Partnership.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA and EMPL respectively own 80% and 20% of the general partners' interests in the Partnership. Pioneer USA owned 634 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$162,023	\$156,380	\$150,391
Reimbursement of general and administrative expenses	\$ 22,916	\$ 13,260	\$ 11,786

Under the limited partnership agreement, the general partners, Pioneer USA and EMPL, together pay 10% of the Partnership's acquisition, drilling and completion costs and 25% of its operating and general and administrative expenses. In return, they are allocated 25% of the Partnership's revenues. Twenty percent of the general partners' share of costs and revenues is allocated to EMPL and the remainder is allocated to Pioneer USA. Certain former affiliates of Pioneer USA are limited partners of EMPL. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in oil and gas activities of the Partnership.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 82-II, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 82-II, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 82-II, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

(a) Stated in thousands.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

263

PARKER & PARSLEY 82-II, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 82-II, Ltd. (the "Partnership") is a limited partnership organized in 1982 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition
and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 28% to \$211,680 for the three months ended March 31, 2001 as compared to \$165,410 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 4,246 barrels of oil, 1,372 barrels of natural gas liquids ("NGLs") and 11,592 mcf of gas were sold, or 7,550 barrel of oil equivalents ("BOEs"). For the three months

264

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ended March 31, 2000, 4,439 barrels of oil, 2,044 barrels of NGLs and 9,151 mcf of gas were sold, or 8,008 BOEs.

The average price received per barrel of oil increased \$.85, or 3%, from \$27.27 for the three months ended March 31, 2000 to \$28.12 for the same period in 2001. The average price received per barrel of NGLs increased \$6.36, or 48%, from \$13.18 for the three months ended March 31, 2000 to \$19.54 for the same period in 2001. The average price received per mcf of gas increased 197% from \$1.90 during the three months ended March 31, 2000 to \$5.65 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$123,630 for the three months ended March 31, 2001 as compared to \$92,152 for the same period in 2000, an increase of \$31,478, or 34%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$104,940 for the three months ended March 31, 2001 and \$74,818 for the same period in 2000 resulting in a \$30,122 increase, or 40%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes due to increased oil and gas revenues.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 54% from \$5,159 for the three months ended March 31, 2000 to \$7,929 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$10,761 for the three months ended March 31, 2001 as compared to \$12,175 for the same period in 2000, a decrease of \$1,414, or 12%. This decrease was primarily due to a decline in oil production of 193 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$22,238 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to an increase of \$46,406 in oil and gas sales receipts and a reduction of \$8,724 in working capital, offset by increases in production costs of \$30,122 and G&A expenses of \$2,770. The increase in oil and gas receipts resulted from

the increase in commodity prices during 2001 which contributed an additional \$51,185 to oil and gas receipts, offset by \$4,779 resulting from the decline in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 were related to the upgrades of oil and gas equipment on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$130,982, of which \$32,806 was distributed to the general partners and \$98,176 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$81,280, of which \$20,320 was distributed to the general partners and \$60,960 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

Parts I and II of this annual report on Form 10-K (the "Report") contain forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements. See "Item 1. Business" for a description of various factors that could materially affect the ability of the Partnership to achieve the anticipated results described in the forward looking statements.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PART I

ITEM 1. BUSINESS

Parker & Parsley 82-II, Ltd. (the "Partnership") is a limited partnership organized in 1982 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA") and its co-general partner is P&P Employees 82-II, Ltd. ("EMPL"), a Texas limited partnership whose general partner is Pioneer USA. Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 6,126 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 70% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations. The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and

ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental and exploratory oil and gas prospects located in Texas and New Mexico were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 52 oil and gas wells. At December 31, 2000, the Partnership had 16 producing oil and gas wells. Two wells were plugged and abandoned, five wells were dry holes and 29 wells have been sold.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

271

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 6,126 outstanding limited partnership interests held of record by 772 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the general partners, are not required to meet the Partnership's obligations are distributed to the partners at least

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$270,025 and \$93,647, respectively, were made to the limited partners.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 53% to \$730,936 for 2000 as compared to \$477,533 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 17,293 barrels of oil, 7,629 barrels of natural gas liquids ("NGLs") and 35,900 mcf of gas were sold, or 30,905 barrel of oil equivalents ("BOEs"). In 1999, 17,967 barrels of oil, 9,587 barrels of NGLs and 42,858 mcf of gas were sold, or 34,697 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.39, or 73%, from \$17.08 in 1999 to \$29.47 in 2000. The average price received per barrel of NGLs increased \$5.21, or 53%, from \$9.80 in 1999 to \$15.01 in 2000. The average price received per mcf of gas increased 66% from \$1.79 in 1999 to \$2.98 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$387,226 as compared to \$361,025 in 1999, an increase of \$26,201, or 7%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$316,735 in 2000 and \$280,719 in 1999, resulting in an increase of \$36,016, or 13%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 28%, from \$19,626 in 1999 to \$25,120 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$21,928 in 2000 and \$14,326 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$45,371 in 2000 as compared to \$60,680 in 1999, a decrease of \$15,309, or 25%. This decrease was primarily due to a 21,082 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 26% to \$477,533 from \$379,887 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 17,967 barrels of oil,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

9,587 barrels of NGLs and 42,858 mcf of gas were sold, or 34,697 BOEs. In 1998, 19,042 barrels of oil, 8,812 barrels of NGLs and 41,862 mcf of gas were sold, or

5

273

34,831 BOEs.

The average price received per barrel of oil increased \$3.94, or 30%, from \$13.14 in 1998 to \$17.08 in 1999. The average price received per barrel of NGLs increased \$2.87, or 41%, from \$6.93 in 1998 to \$9.80 in 1999. The average price received per mcf of gas increased 9% from \$1.64 in 1998 to \$1.79 in 1999.

A gain on disposition of assets of \$1,281 was recognized during 1998 from post closing adjustments received from the sale of six oil and gas wells and an overriding royalty interest in one well during 1997.

Total costs and expenses decreased in 1999 to \$361,025 as compared to \$523,894 in 1998, a decrease of \$162,869, or 31%. The decrease was primarily due to declines in depletion and the impairment of oil and gas properties, offset by increases in production costs and G&A expenses.

Production costs were \$280,719 in 1999 and \$274,382 in 1998, resulting in an increase of \$6,337, or 2%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and an increase in production taxes due to increased oil and gas revenues, offset by a decline in ad valorem taxes.

During this period, G&A increased 45% from \$13,493 in 1998 to \$19,626 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$14,326 in 1999 and \$11,397 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$65,229 related to its oil and gas properties during 1998.

Depletion was \$60,680 in 1999 compared to \$170,790 in 1998, a decrease of \$110,110, or 64%. This decrease was the result of an increase in proved reserves of 182,544 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization

of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$202,645 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$256,384, offset by increases in production costs paid of \$36,016, G&A expenses paid of \$5,494 and working capital of \$12,229. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$326,338 to oil and gas receipts, offset by \$69,954 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds from asset dispositions of \$422 in 1999 were from equipment credits received on active properties. During 1998, proceeds from disposition of assets of \$153,683 were primarily from the sale of six oil and gas wells during 1997.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$361,123, of which \$91,098 was distributed to the general partners and \$270,025 to the limited partners. In 1999, cash distributions to the partners were \$124,365, of which \$30,718 was distributed to the general partners and \$93,647 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 82-II, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 82-II, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 82-II, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

281

PARKER & PARSLEY 82-II, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 82-II, Ltd. (the "Partnership") is a limited partnership organized in 1982 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 82-II, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

14

282

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the

15

283

Partnership recognized a non-cash impairment provision of \$65,229 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$425,788 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 350,536	\$ 120,353	\$(131,488)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	39,685	55,288	163,319
Impairment of oil and gas properties for financial reporting purposes	--	--	65,229
Other, net	(932)	209	217
	-----	-----	-----
Net income per Federal income tax returns	\$ 389,289 =====	\$ 175,850 =====	\$ 97,277 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 8,677	\$ 2,053	\$13,600

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

=====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 415,980	\$ 415,980
Completed wells and equipment	7,889,921	7,881,244
	-----	-----
	8,305,901	8,297,224
Accumulated depletion	(7,531,290)	(7,485,919)
	-----	-----
Net oil and gas properties	\$ 774,611	\$ 811,305
	=====	=====

16

284

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$143,855	\$139,170	\$133,844
Reimbursement of general and administrative expenses	\$ 21,928	\$ 14,326	\$ 11,397

Pioneer USA, EMPL and the Partnership are parties to the Partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 83% and the remaining portion is owned by former affiliates. In addition, Pioneer USA owned 226 limited partner interests at January 1, 2001.

The costs and revenues of the Partnership are allocated as follows:

	General partners -----	Limited partners -----
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

All other Partnership revenues	25%	75%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	10%	90%
Operating costs, direct costs and general and administrative expenses	25%	75%

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	-----	-----
Net proved reserves at December 31, 1998	185,063	305,988
Revisions	288,622	425,997
Production	(27,554)	(42,858)
	-----	-----
Net proved reserves at December 31, 1999	446,131	689,127
Revisions	(13,008)	(29,574)
Production	(24,922)	(35,900)
	-----	-----
Net proved reserves at December 31, 2000	408,201	623,653
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.58 per barrel of oil, \$13.60 per barrel of NGLs and \$8.05 per mcf of gas, discounted at 10% was approximately \$3,222,000 and undiscounted was \$6,505,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	70%	65%	-
Genesis Crude Oil, L.P.	-	-	66%
Western Gas Resources, Inc.	2%	5%	21%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$56,201 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control

and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$12,252,000. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and 25% of direct, general and administrative and operating expenses.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

289

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in

charge of Parker & Parsley's audit.

22

290

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. Under the Partnership agreement, Pioneer USA pays 8% of the Partnership's acquisition, drilling and completion costs and 20% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 20% of the Partnership's revenues.

EMPL is a co-general partner of the Partnership. Under this arrangement, EMPL pays 2% of the Partnership's acquisition, drilling and completion costs and 5% of its operating and general and administrative expenses. In return, EMPL is allocated 5% of the Partnership's revenues. EMPL does not receive any fees or reimbursements from the Partnership.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA and EMPL respectively own 80% and 20% of the general partners' interests in the Partnership. Pioneer USA owned 226 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

291

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the general partners during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 143,855	\$ 139,170	\$133,844
Reimbursement of general and administrative expenses	\$ 21,928	\$ 14,326	\$ 11,397

Under the limited partnership agreement, the general partners, Pioneer USA and EMPL, together pay 10% of the Partnership's acquisition, drilling and completion costs and 25% of its operating and general and administrative expenses. In return, they are allocated 25% of the Partnership's revenues. Twenty percent of the general partner's share of costs and revenues is allocated to EMPL and the remainder is allocated to Pioneer USA. Certain former affiliates of the managing general partner are limited partners of EMPL. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Partnership.

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 82-III, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 82-III, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

297

PARKER & PARSLEY 82-III, LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 82-III, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 82-III, Ltd. (the "Partnership") is a Texas limited partnership organized in 1982 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 4% to \$141,285 for the three months ended March 31, 2001 as compared to \$136,330 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 3,578 barrels of oil, 622 barrels of natural gas liquids ("NGLs") and 5,196 mcf of gas were sold, or 5,066 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 3,738 barrels of oil, 1,877 barrels of NGLs and 6,304 mcf of gas were sold, or 6,666 BOEs.

6

304

The average price received per barrel of oil increased \$.94, or 3%, from \$27.64 for the three months ended March 31, 2000 to \$28.58 for the same period in 2001. The average price received per barrel of NGLs increased \$4.69, or 38%, from \$12.20 for the three months ended March 31, 2000 to \$16.89 for the same period in 2001. The average price received per mcf of gas increased 243% from \$1.60 during the three months ended March 31, 2000 to \$5.49 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$74,153 for the three months ended March 31, 2001 as compared to \$62,606 for the same period in 2000, an increase of \$11,547, or 18%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$62,799 for the three months ended March 31, 2001 and \$52,005 for the same period in 2000 resulting in a \$10,794 increase, or 21%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

general partner personnel and administrative costs. During this period, G&A increased 32% from \$4,182 for the three months ended March 31, 2000 to \$5,510 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$5,844 for the three months ended March 31, 2001 as compared to \$6,419 for the same period in 2000, a decrease of \$575, or 9%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices and a decline in oil production of 160 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$15,328 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to a reduction in working capital of \$22,407 and an increase in oil and gas sales receipts of \$5,043, offset by increases in production costs of \$10,794 and G&A expenses of \$1,328. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an

7

305

additional \$36,894 to oil and gas receipts, offset by \$31,851 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$94,281, of which \$23,570 was distributed to the general partners and \$70,711 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$68,363, of which \$16,801 was distributed to the general partners and \$51,562 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

307

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 82-III, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 82-III, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 82-III, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 82-III, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 82-III, Ltd. (the "Partnership") is a Texas limited partnership organized in 1982 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 82-III, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

7

313

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved

8

314

in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$277,671 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$410,896 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 302,230	\$ 84,955	\$ (485,018)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	18,732	42,255	245,110
Impairment of oil and gas properties for financial reporting purposes	-	-	277,671
Other, net	(570)	(1,597)	787
	-----	-----	-----
Net income per Federal income tax returns	\$ 320,392 =====	\$ 125,613 =====	\$ 38,550 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 2,484 =====	\$ 1,281 =====	\$ 4,114 =====

Capitalized oil and gas properties consist of the following:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 348,798	\$ 348,798
Completed wells and equipment	5,621,599	5,619,115
	-----	-----
	5,970,397	5,967,913
Accumulated depletion	(5,634,468)	(5,611,986)
	-----	-----
Net oil and gas properties	\$ 335,929 =====	\$ 355,927 =====

9

315

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$105,725	\$102,247	\$ 97,602
Reimbursement of general and administrative expenses	\$16,872	\$10,207	\$ 7,802

Pioneer USA, EMPL and the Partnership are parties to the Partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 81% and the remaining portion is owned by former affiliates. Pioneer USA owned 205.34 limited partner interests at January 1, 2001.

The costs and revenues of the Partnership are allocated as follows:

	General partners -----	Limited partners -----
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%
All other Partnership revenues	25%	75%
Costs and expenses:		

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Lease acquisition costs, drilling and completion costs	10%	90%
Operating costs, direct costs and general and administrative expenses	25%	75%

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

Production	(20,646)	(21,480)
	-----	-----
Net proved reserves at December 31, 2000	311,092	298,289
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.66 per barrel of NGLs and \$7.61 per mcf of gas, discounted at 10% was approximately \$2,053,000 and undiscounted was \$3,888,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	60%	56%	-
TEPPCO Crude Oil LLC	14%	15%	-
Genesis Crude Oil, L.P.	-	-	77%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and TEPPCO Crude Oil LLC were \$31,458 and \$4,158, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$6,882,000. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and 25% of direct, general and administrative and operating expenses.

319

PARKER & PARSLEY 82-III, LTD.
(A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 65% to \$562,399 for 2000 as compared to \$340,246 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 14,019 barrels of oil, 6,627 barrels of natural gas liquids ("NGLs") and 21,480 mcf of gas were sold, or 24,226 barrel of oil equivalents ("BOEs"). In 1999, 14,043 barrels of oil, 6,758 barrels of NGLs and 23,061 mcf of gas were sold, or 24,645 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.54, or 73%, from \$17.13 in 1999 to \$29.67 in 2000. The average price received per barrel of NGLs increased \$4.73, or 52%, from \$9.13 in 1999 to \$13.86 in 2000. The average price received per mcf of gas increased 54% from \$1.65 in 1999 to \$2.54 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$1,922 was recognized during 1999 from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$264,479 as compared to \$259,337 in 1999, an increase of \$5,142, or 2%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$222,803 in 2000 and \$198,571 in 1999, resulting in a \$24,232 increase, or 12%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 36% from \$14,161 in 1999 to \$19,194 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$16,872 in 2000 and \$10,207 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$22,482 in 2000 as compared to \$46,605 in 1999, representing a decrease of \$24,123, or 52%. This decrease primarily due to a 36,746 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

320

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 34% to \$340,246 from \$253,873 in 1998. The increase in revenues resulted from higher average prices received and an increase in production. In 1999, 14,043 barrels of oil, 6,758 barrels of NGLs and 23,061 mcf of gas were sold, or 24,645 BOEs. In 1998, 14,727 barrels of oil, 4,813 barrels of NGLs and 17,680 mcf of gas were sold, or 22,487 BOEs.

The average price received per barrel of oil increased \$3.82, or 29%, from \$13.31 in 1998 to \$17.13 in 1999. The average price received per barrel of NGLs increased \$2.71, or 42%, from \$6.42 in 1998 to \$9.13 in 1999. The average price received per mcf of gas increased 8% from \$1.53 in 1998 to \$1.65 in 1999.

A gain on disposition of assets of \$1,922 and \$634 was recognized during 1999 and 1998 from salvage value received on various asset dispositions.

Total costs and expenses decreased in 1999 to \$259,337 as compared to \$742,645 in 1998, a decrease of \$483,308, or 65%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$198,571 in 1999 and \$202,485 in 1998, resulting in a \$3,914 decrease, or 2%. The decrease was due to declines in workover costs and ad valorem taxes, offset by an increase in production taxes due to increase oil and gas sales.

During this period, G&A increased 48% from \$9,538 in 1998 to \$14,161 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$10,207 in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1999 and \$7,802 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$277,671 related to its oil and gas properties during 1998.

Depletion was \$46,605 in 1999 compared to \$252,951 in 1998, representing a decrease of \$206,346, or 82%. This decrease was the result of an increase in proved reserves of 164,606 barrels of oil during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

321

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$190,758 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$224,339, offset by increases in production costs paid of \$24,233, G&A expenses paid of \$5,032 and working capital of \$4,316. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$230,886 to oil and gas receipts, offset by \$6,547 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to upgrades of equipment on various oil and gas properties.

Proceeds from disposition of assets of \$2,415 were recognized during 1999 from salvage value received on disposition of equipment primarily on one oil and gas well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$305,561, of which \$74,963 was distributed to the general partners and \$230,598 to the limited partners. In 1999, cash distributions to the partners were \$88,691, of which \$22,103 was distributed to the general partners and \$66,588 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 83-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED _____, 2001

THE DATE OF THIS SUPPLEMENT IS _____, 2001

This document contains important information specific to Parker & Parsley 83-A, Ltd. and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 83-A, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 83-A, Ltd. (the "Partnership") is a limited partnership organized in 1983 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 22% to \$507,768 for the three months ended March 31, 2001 as compared to \$417,066 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 10,168 barrels of oil, 3,676 barrels of natural gas liquids ("NGLs") and 25,707 mcf of gas were sold, or 18,129 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 10,838 barrels of oil, 5,586 barrels of NGLs and 22,988 mcf of gas were sold, or 20,255 BOEs.

7

332

The average price received per barrel of oil increased \$.61, or 2%, from \$27.44 for the three months ended March 31, 2000 to \$28.05 for the same period in 2001. The average price received per barrel of NGLs increased \$4.89, or 34%, from \$14.18 for the three months ended March 31, 2000 to \$19.07 for the same period in 2001. The average price received per mcf of gas increased 237% from \$1.76 during the three months ended March 31, 2000 to \$5.93 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$271,418 for the three months ended March 31, 2001 as compared to \$250,840 for the same period in 2000, an increase of \$20,578, or 8%. This increase was attributable to increases in production costs

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$232,146 for the three months ended March 31, 2001 and \$216,331 for the same period in 2000 resulting in a \$15,815 increase, or 7%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 45% from \$12,903 for the three months ended March 31, 2000 to \$18,723 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$20,549 for the three months ended March 31, 2001 as compared to \$21,606 for the same period in 2000, a decrease of \$1,057, or 5%. The decrease was primarily due to a decrease in oil production of 670 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$107,906 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to an increase of \$91,586 in oil and gas sales receipts and a reduction in working capital of \$37,955, offset by increases in production costs of \$15,815 and G&A expenses of \$5,820. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$130,676 to oil and gas receipts, offset by \$39,090 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated

8

333

with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's investing activities during the three months ended March 31, 2001 and 2000 were related to expenditures for equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$314,727, of which \$79,839 was distributed to the general partners and \$234,888 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$188,420, of which \$47,594 was distributed to the general partners and \$140,826 to the limited partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

336

PART I

ITEM 1. BUSINESS

Parker & Parsley 83-A, Ltd. (the "Partnership") is a limited partnership organized in 1983 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA") and its co-general partner is P&P Employees 83-A, Ltd. ("EMPL"), a Texas limited partnership whose general partner is Pioneer USA. Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 19,505 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 53% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations. The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that

2

337

its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 69 oil and gas wells. Two wells were dry holes from previous periods, 22 wells have been sold and three wells have been plugged and abandoned due to unprofitable operations. At December 31, 2000, 42 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

338

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 19,505 outstanding limited partnership interests held of record by 1,273 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$659,311 and \$181,573, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

4

339

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 64% to \$1,929,701 for 2000 as compared to \$1,176,562 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 43,334 barrels of oil, 23,345 barrels of natural gas liquids ("NGLs") and 94,612 mcf of gas were sold, or 82,448 barrel of oil equivalent ("BOEs"). In 1999, 43,654 barrels of oil, 25,584 barrels of NGLs and 109,716 mcf of gas were sold, or 87,524 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.58, or 74%, from \$16.96 in 1999 to \$29.54 in 2000. The average price received per barrel of NGLs increased \$6.16, or 65%, from \$9.42 in 1999 to \$15.58 in 2000. The average price received per mcf of gas increased 70% from \$1.78 in 1999 to \$3.02 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

A gain on disposition of assets of \$1,801 recognized during 1999 was related to equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$1,014,313 as compared to \$955,718 in 1999, an increase of \$58,595, or 6%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$867,551 in 2000 and \$756,020 in 1999, resulting in a \$111,531 increase, or 15%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees, computer services, postage and managing general partner personnel costs. During this period, G&A increased 39% from \$47,303 in 1999 to \$65,724 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$57,891 in 2000 and \$35,297 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

5

340

Depletion was \$81,038 in 2000 as compared to \$152,395 in 1999. This represented a decrease of \$71,357, or 47%. The decrease was primarily due to a 129,265 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 29% to \$1,176,562 from \$910,252 in 1998. The increase in revenues resulted from higher average prices received and an increase in production from 1998 to 1999. In 1999, 43,654 barrels of oil, 25,584 barrels of NGLs and 109,716 mcf of gas were sold, or 87,524 BOEs. In 1998, 46,586 barrels of oil, 21,026 barrels of NGLs and 95,156 mcf of gas were sold, or 83,471 BOEs.

The average price received per barrel of oil increased \$3.62, or 27%, from \$13.34 in 1998 to \$16.96 in 1999. The average price received per barrel of NGLs increased \$2.93, or 45%, from \$6.49 in 1998 to \$9.42 in 1999. The average price received per mcf of gas increased 11% from \$1.60 in 1998 to \$1.78 in 1999.

A gain on disposition of assets of \$1,801 recognized during 1999 was related to equipment credits received on one fully depleted well while the \$3,702 gain recognized during 1998 was from final closing adjustments from the sale during 1997 of 16 oil and gas wells.

Total costs and expenses decreased in 1999 to \$955,718 as compared to \$1,715,723 in 1998, a decrease of \$760,005, or 44%. The decrease was primarily due to declines in the impairment of oil and gas properties and depletion, offset by increases in production costs and G&A expenses.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$756,020 in 1999 and \$731,005 in 1998, resulting in a \$25,015 increase, or 3%. The increase was attributable to additional well maintenance costs incurred to stimulate well production and production taxes due to increased oil and gas revenues, offset by a decline in ad valorem taxes.

During this period, G&A increased 43% from \$33,000 in 1998 to \$47,303 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$35,297 in 1999 and \$27,308 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$430,351 related to its oil and gas properties during 1998.

Depletion was \$152,395 in 1999 compared to \$521,367 in 1998. This represented a decrease of \$368,972, or 71%. The decrease was the result of an increase in proved reserves of 416,430 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

6

341

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$620,642 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$760,015, offset by increases in production costs paid of \$111,531, G&A expenses paid of \$18,421 and working capital of \$9,421. The increase in oil and gas receipts resulted from the increase in commodity prices

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during 2000 which contributed an additional \$849,987 to oil and gas receipts, offset by \$89,973 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during 2000 and 1999 included expenditures related to equipment upgrades on various oil and gas properties.

Proceeds from asset dispositions in 1999 of \$2,611 were from equipment credits received on active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$887,776, of which \$228,465 was distributed to the general partners and \$659,311 to the limited partners. In 1999, cash distributions to the partners were \$245,794, of which \$64,221 was distributed to the general partners and \$181,573 to the limited partners.

INDEPENDENT AUDITORS' REPORT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partners
Parker & Parsley 83-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 83-A, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 83-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

348

PARKER & PARSLEY 83-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 83-A, Ltd. (the "Partnership") is a limited partnership organized in 1983 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 83-A, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

14

349

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of

15

350

\$430,351 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$1,081,971 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 929,165	\$ 229,546	\$ (784,5
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	72,648	144,177	510,6
Impairment of oil and gas properties for financial reporting purposes	-	-	430,3
Other, net	(2,243)	(235)	8
	-----	-----	-----
Net income per Federal income tax returns	\$ 999,570	\$ 373,488	\$ 157,2
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Development costs	\$ 8,882 =====	\$ 8,942 =====	\$14,943 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 1,000,072	\$ 1,000,072
Completed wells and equipment	15,901,122 -----	15,892,235 -----
	16,901,194	16,892,307
Accumulated depletion	(15,622,262) -----	(15,541,219) -----
Net oil and gas properties	\$ 1,278,932 =====	\$ 1,351,088 =====

16

351

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 407,783	\$ 397,884	\$ 370,984
Reimbursement of general and administrative expenses	\$ 57,891	\$ 35,297	\$ 27,308

Pioneer USA, EMPL and the Partnership are parties to the partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 79% and the remaining portion is owned by former affiliates. In addition, Pioneer USA owned

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

676 limited partner interests at January 1, 2001.

The costs and revenues of the Partnership are allocated as follows:

	General partners -----	Limited partners -----
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%
All other Partnership revenues	25%	75%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	10%	90%
Operating costs, direct costs and general and administrative expenses	25%	75%
Incremental direct expenses	-	100%

Incremental direct expenses are direct expenses which would not be incurred except for the requirements of the securities regulatory authorities. Such expenses totaled \$7,833, \$12,006 and \$5,692 in 2000, 1999 and 1998, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls) -----	Gas (mcf) -----
Net proved reserves at January 1, 1998	765,491	1,179,867
Revisions	(361,806)	(528,746)
Production	(67,612)	(95,156)
	-----	-----
Net proved reserves at December 31, 1998	336,073	555,965
Revisions	714,690	1,245,944
Production	(69,238)	(109,716)
	-----	-----
Net proved reserves at December 31, 1999	981,525	1,692,193
Revisions	124,418	(56,128)
Production	(66,679)	(94,612)
	-----	-----
Net proved reserves at December 31, 2000	1,039,264	1,541,453
	=====	=====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.61 per barrel

17

352

of oil, \$13.13 per barrel of NGLs and \$7.87 per mcf of gas, discounted at 10% was approximately \$7,532,000 and undiscounted was \$14,892,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended Decem	
	2000	1999
	(in thousands)	
Oil and gas producing activities:		
Future cash inflows	\$ 34,721	\$ 24,100
Future production costs	(19,829)	(14,511)
	14,892	9,589
10% annual discount factor	(7,360)	(4,422)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$19,505,000. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and

19

354

completion and 25% of direct, general and administrative and operating expenses.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

355

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Director Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts

Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

357

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. Under the partnership agreement, Pioneer USA pays 8% of the Partnership's acquisition, drilling and completion costs and 20% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 20% of the Partnership's revenues.

EMPL is a co-general partner of the Partnership. Under this arrangement, EMPL pays 2% of the Partnership's acquisition, drilling and completion costs and 5%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of its operating and general and administrative expenses. In return, EMPL is allocated 5% of the Partnership's revenues. EMPL does not receive any fees or reimbursements from the Partnership.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA and EMPL respectively own 80% and 20% of the general partners' interests in the Partnership. Pioneer USA owned 676 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

358

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$407,783	\$397,884	\$370,984
Reimbursement of general and administrative expenses	\$ 57,891	\$ 35,297	\$ 27,308

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Under the limited partnership agreement, the general partners, Pioneer USA and EMPL, together pay 10% of the Partnership's acquisition, drilling and completion costs and 25% of its operating and general and administrative expenses. In return, they are allocated 25% of the Partnership's revenues. Twenty percent of the general partners' share of costs and revenues is allocated to EMPL and the remainder is allocated to Pioneer USA. Certain former affiliates of Pioneer USA are limited partners of EMPL. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Partnership.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 83-B, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

This document contains important information specific to Parker & Parsley 83-B, Ltd. and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 83-B, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 83-B, LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

6

371

PARKER & PARSLEY 83-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of organization

Parker & Parsley 83-B, Ltd. (the "Partnership") is a limited partnership organized in 1983 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 3% to \$567,450 for the three months ended March 31, 2001 as compared to \$550,469 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 10,605 barrels of oil, 5,172 barrels of natural gas liquids ("NGLs") and 29,602 mcf of gas were sold, or 20,711 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 13,733 barrels of oil, 8,049 barrels of NGLs and 35,379 mcf of gas were sold, or 27,679 BOEs.

7

372

The average price received per barrel of oil increased \$.73, or 3%, from \$27.66 for the three months ended March 31, 2000 to \$28.39 for the same period in 2001. The average price received per barrel of NGLs increased \$5.18, or 38%, from \$13.48 for the three months ended March 31, 2000 to \$18.66 for the same period in 2001. The average price received per mcf of gas increased 226% from \$1.76 during the three months ended March 31, 2000 to \$5.74 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

A gain on disposition of assets of \$3,923 during 2000 was recognized from equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$323,442 for the three months ended March 31, 2001 as compared to \$279,699 for the same period in 2000, an increase of \$43,743, or 16%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$278,432 for the three months ended March 31, 2001 and \$232,950 for the same period in 2000 resulting in a \$45,482 increase, or 20%. The increase was primarily due to additional workover and well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 22% from \$16,889 for the three months ended March 31, 2000 to \$20,536 for the same period in 2001 primarily, due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$24,474 for the three months ended March 31, 2001 as compared to \$29,860 for the same period in 2000, a decrease of \$5,386, or 18%. This decrease was primarily due to a reduction in the Partnership's net depletable basis from charges taken in accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121") during the fourth quarter of 2000 and a decline in oil production of 3,128 barrels for the three months ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities:

Net cash provided by operating activities increased \$50,812 during the three months ended March 31, 2001 from the same period in 2000. The increase was due

8

373

to an increase of \$17,327 in oil and gas sales receipts and a reduction in working capital of \$82,614, offset by increases in production costs of \$45,482 and G&A expenses of \$3,647. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$192,976 to oil and gas receipts, offset by \$175,649 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional workover and well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Cash Provided by (Used in) Investing Activities:

The Partnership's investing activities for the three months ended March 31, 2001 and 2000 were for expenditures related to oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$3,923 recognized during the three months ended March 31, 2000 were from equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

For the three months ended March 31, 2001, cash distributions to the partners were \$349,414, of which \$90,005 was distributed to the general partners and \$259,409 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$272,131, of which \$68,700 was distributed to the general partners and \$203,431 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

No market currently exists for the limited partnership interests of the Registrant. Based on the original purchase price, the aggregate market value of limited partnership interests owned by non-affiliates of the Registrant is \$22,493,000.

As of March 8, 2001, the number of outstanding limited partnership interests was 23,370.

The following documents are incorporated by reference into the indicated parts of this Annual Report on Form 10-K: None

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

377

PART I

ITEM 1. BUSINESS

Parker & Parsley 83-B, Ltd. (the "Partnership") is a limited partnership organized in 1983 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA") and its co-general partner is P&P Employees 83-B, Ltd. ("EMPL"), a Texas limited partnership whose general partner is Pioneer USA. Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 23,370 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 46%, 13% and 10% were attributable to sales made to Plains Marketing, L.P., TEPPCO Crude Oil LLC and Phillips Petroleum Company, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations. The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that

2

378

its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in Texas were acquired by the Partnership, resulting in the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership's participation in the drilling of 59 productive oil and gas wells. At December 31, 2000, the Partnership had 41 producing wells. Thirteen wells have been plugged and abandoned due to unprofitable operations and five wells were sold.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

379

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 23,370 outstanding limited partnership interests held of record by 1,379 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$942,688 and \$325,903, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997

	=====	=====	=====	=====

(a) Including litigation settlement per limited partnership interest of \$46.83 in 1996.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 54% to \$2,376,791 for 2000 as compared to \$1,548,013 in 1999. The increase in revenues resulted from higher

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

average prices received, offset by a decline in production. In 2000, 51,895 barrels of oil, 29,919 barrels of natural gas liquids ("NGLs") and 132,106 mcf of gas were sold, or 103,832 barrel of oil equivalents ("BOEs"). In 1999, 54,446 barrels of oil, 35,000 barrels of NGLs and 157,842 mcf of gas were sold, or 115,753 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.51, or 73%, from \$17.18 in 1999 to \$29.69 in 2000. The average price received per barrel of NGLs increased \$5.47, or 55%, from \$10.00 in 1999 to \$15.47 in 2000. The average price received per mcf of gas increased 70% from \$1.66 in 1999 to \$2.83 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$7,482 during 2000 was due to salvage income received on one well plugged and abandoned during the current year. A gain of \$3,375 during 1999 was recognized from equipment credits received on one fully depleted well.

Total costs and expenses decreased in 2000 to \$1,230,645 as compared to \$1,270,634 in 1999, a decrease of \$39,989, or 3%. The decrease was primarily due to declines in depletion and the impairment of oil and gas properties, offset by increases in production costs and general and administrative expenses ("G&A").

Production costs were \$947,439 in 2000 and \$879,335 in 1999, resulting in a \$68,104 increase, or 8%. The increase was primarily due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees, and managing general partner personnel and operating costs. During this period, G&A increased 35% from \$58,993 in 1999 to \$79,646 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$71,304 in 2000 and \$46,440 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$84,697 and \$152,505 related to its oil and gas properties during 2000 and 1999, respectively.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$106,841 in 2000 as compared to \$179,801 in 1999, representing a decrease of \$72,960, or 41%. This decrease was primarily due to a 115,324 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

Abandoned property costs of \$12,022 during 2000 was related to the plugging and abandonment of one well during the current year.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 22% to \$1,548,013 from \$1,267,241 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 54,446 barrels of oil, 35,000 barrels of NGLs and 157,842 mcf of gas were sold, or 115,753 BOEs. In 1998, 62,162 barrels of oil, 31,533 barrels of NGLs and 147,495 mcf of gas were sold, or 118,278 BOEs.

The average price received per barrel of oil increased \$3.88, or 29%, from \$13.30 in 1998 to \$17.18 in 1999. The average price received per barrel of NGLs increased \$3.21, or 47%, from \$6.79 in 1998 to \$10.00 in 1999. The average price received per mcf of gas increased 8% from \$1.54 in 1998 to \$1.66 in 1999.

A gain on disposition of assets of \$3,375 during 1999 was recognized from equipment credits received on one fully depleted well. During 1998, a gain on disposition of assets of \$157 was recognized from post closing adjustments received from the sale of two oil and gas wells and an overriding royalty interest on one well during 1997.

Total costs and expenses decreased in 1999 to \$1,270,634 as compared to \$2,152,425 in 1998, a decrease of \$881,791, or 41%. The decrease was primarily due to declines in depletion, the impairment of oil and gas properties and production costs, offset by an increase in G&A.

Production costs were \$879,335 in 1999 and \$978,080 in 1998, resulting in a \$98,745 decrease, or 10%. The decrease was due to declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes due to an increase in oil and gas revenues.

During this period, G&A increased 36% from \$43,488 in 1998 to \$58,993 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$46,440 in 1999 and \$38,017 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$152,505 and \$362,325 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion was \$179,801 in 1999 compared to \$768,532 in 1998. This represented a decrease of \$588,731, or 77%. This decrease was the result of a combination of factors that included an increase in proved reserves of 430,250 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with

SFAS 121 during the fourth quarter of 1998 and a decline in oil production of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

7,716 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$733,136 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$838,001, offset by increases in production costs paid of \$68,104, G&A expenses paid of \$20,653, \$12,022 in abandoned property costs paid and working capital of \$4,086. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$1,065,062 to oil and gas receipts, offset by \$227,061 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were for expenditures related to oil and gas equipment upgrades on active properties.

Proceeds from asset dispositions of \$7,482 recognized during 2000 were related to salvage income received on one well plugged and abandoned during the current year. Proceeds of \$3,845 recognized during 1999 were primarily from equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$1,260,369, of which \$317,681 was distributed to the general partners and \$942,688 to the limited partners. In 1999, cash distributions to the partners were \$438,977, of which \$113,074 was distributed to the general partners and \$325,903 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 83-B, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 83-B, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 83-B, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 83-B, LTD.
(A Texas Limited Partnership)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTES TO FINANCIAL STATEMENTS December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 83-B, Ltd. (the "Partnership") is a limited partnership organized in 1983 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 83-B, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited

partnership interest is calculated by using the number of outstanding limited partnership interests.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$84,697, \$152,505 and \$362,325 related to its proved oil and gas properties during 2000, 1999 and 1998,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$1,137,401 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	-----
Net income (loss) per statements of operations	\$ 1,174,971	\$ 292,874	\$
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	90,760	163,887	
Impairment of oil and gas properties for financial reporting purposes	84,697	152,505	
Salvage income	-	-	
Other, net	(7,657)	(1,145)	
	-----	-----	-----
Net income per Federal income tax returns	\$ 1,342,771	\$ 608,121	\$
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 16,718	\$ 11,719	\$ 27,705
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 911,105	\$ 946,730
Completed wells and equipment	18,045,965	18,553,839
	-----	-----
	18,957,070	19,500,569

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Accumulated depletion	(17,248,214)	(17,616,893)
	-----	-----
Net oil and gas properties	\$ 1,708,856	\$ 1,883,676
	=====	=====

16

392

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 426,573	\$ 424,831	\$ 426,899
Reimbursement of general and administrative expenses	\$ 71,304	\$ 46,440	\$ 38,017

Pioneer USA, EMPL and the Partnership are parties to the partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 79% and the remaining portion is owned by former affiliates. In addition, Pioneer USA owned 877 limited partner interests at January 1, 2001.

The costs and revenues of the Partnership are allocated as follows:

	General partners	Limited partners
	-----	-----
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%
All other Partnership revenues	25%	75%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	10%	90%
Operating costs, direct costs and general and administrative expenses	25%	75%
Incremental direct expenses	-	100%

Incremental direct expenses are direct expenses which would not be incurred except for the requirements of the securities regulatory authorities and totaled \$8,342, \$12,553 and \$5,471 in 2000, 1999 and 1998, respectively.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

17

393

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	1,215,076	1,717,779
Revisions	(498,218)	(464,099)
Production	(93,695)	(147,495)
	-----	-----
Net proved reserves at December 31, 1998	623,163	1,106,185
Revisions	738,384	1,321,692
Production	(89,446)	(157,842)
	-----	-----
Net proved reserves at December 31, 1999	1,272,101	2,270,035
Revisions	82,614	(66,662)
Production	(81,814)	(132,106)
	-----	-----
Net proved reserves at December 31, 2000	1,272,901	2,071,267
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.32 per barrel of NGLs and \$7.73 per mcf of gas, discounted at 10% was approximately \$9,555,000 and undiscounted was \$18,817,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	=====	=====	=====

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	46%	42%	-
TEPPCO Crude Oil LLC	13%	14%	-
Phillips Petroleum Company	10%	3%	3%
Genesis Crude Oil, L.P.	-	-	60%
Western Gas Resources, Inc.	4%	8%	29%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC Inc. and Phillips Petroleum Company were \$112,877, \$29,666 and \$22,742, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

19

395

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$23,370,000. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and 25% of direct, general and administrative and operating expenses.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

396

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name -----	Age at December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	45	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

397

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

398

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. Under the partnership agreement, Pioneer USA pays 8% of the Program's acquisition, drilling and completion costs and 20% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 20% of the Program's revenues.

EMPL is a co-general partner of the Partnership. Under this arrangement, EMPL pays 2% of the Program's acquisition, drilling and completion costs and 5% of its operating and general and administrative expenses. In return, EMPL is allocated 5% of the Program's revenues. EMPL does not receive any fees or reimbursements from the Partnership.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA and EMPL respectively own 80% and 20% of the general partners' interests in the Partnership. Pioneer USA owned 877 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership

interests in the Partnership.

23

399

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 426,573	\$ 424,831	\$ 426,899
Reimbursement of general and administrative expenses	\$ 71,304	\$ 46,440	\$ 38,017

Under the limited partnership agreement, the general partners, Pioneer USA and EMPL, together pay 10% of the Partnership's acquisition, drilling and completion costs and 25% of its operating and general and administrative expenses. In return, they are allocated 25% of the Partnership's revenues. Twenty percent of the general partners' share of costs and revenues is allocated to EMPL and the remainder is allocated to Pioneer USA. Certain former affiliates of Pioneer USA are limited partners of EMPL. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Partnership.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 84-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 84-A, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 84-A, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001 (c) \$

-- as of December 31, 2000 (c) \$

Going Concern Value per \$1,000 Limited Partner Investment (c), (d) \$

Liquidation Value per \$1,000 Limited Partner Investment (c), (e) \$

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f) \$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

(f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership shall continue until terminated in accordance with the applicable provisions of its partnership agreement.

412

PARKER & PARSLEY 84-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 84-A, Ltd. (the "Partnership") is a limited partnership organized in 1984 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 19% to \$634,643 for the three months ended March 31, 2001 as compared to \$533,060 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 13,629 barrels of oil, 6,391 barrels of natural gas liquids ("NGLs") and 33,550 mcf of gas were sold, or 25,612 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 13,571 barrels of oil, 8,220 barrels of NGLs and 35,071 mcf of gas were sold, or 27,636 BOEs.

7

413

The average price received per barrel of oil decreased \$.45, or 2%, from \$27.61 for the three months ended March 31, 2000 to \$27.16 for the same period in 2001. The average price received per barrel of NGLs increased \$3.50, or 28%, from \$12.70 for the three months ended March 31, 2000 to \$16.20 for the same period in 2001. The average price received per mcf of gas increased 212% from \$1.54 during the three months ended March 31, 2000 to \$4.80 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$299,117 for the three months ended March 31, 2001 as compared to \$267,615 for the same period in 2000, an increase of \$31,502, or 12%. This increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$248,790 for the three months ended March 31, 2001 and \$219,634 for the same period in 2000 resulting in a \$29,156 increase, or 13%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 55% from \$14,335 for the three months ended March 31, 2000 to \$22,219 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$28,108 for the three months ended March 31, 2001 as compared to \$33,646 for the same period in 2000, a decrease of \$5,538, or 16%. This decrease was the result of positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$63,503 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to an increase of \$102,540 in oil and gas sales receipts, offset by increases in production costs of \$29,156, G&A expenses of \$7,884 and working capital of \$1,997. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$137,887 to oil and gas receipts, offset by \$35,347 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and

8

414

gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 were for expenditures related to oil and gas equipment upgrades on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$373,828, of which \$94,450 was distributed to the general partners and \$279,378 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$215,712, of which \$54,767 was distributed to the general partners and \$160,945 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

417

PART I

ITEM 1. BUSINESS

Parker & Parsley 84-A, Ltd. (the "Partnership") is a limited partnership organized in 1984 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA") and its co-general partner is P&P Employees 84-A, Ltd. ("EMPL"), a Texas limited partnership whose general partner is Pioneer USA. Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 19,435 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000, approximately 35%, 17% and 10% were attributable to sales made to Plains Marketing, L.P., TEPPCO Crude Oil LLC and NGTS LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations. The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental and exploratory oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 42 oil and gas wells. At December 31, 2000, 38 wells were producing and four wells had been plugged and abandoned due to unprofitable operations.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 19,435 outstanding limited partnership interests held of record by 1,268 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$872,006 and \$293,145, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997	1996
Operating results:					
Oil and gas sales	\$2,348,261	\$1,419,376	\$1,124,134	\$1,668,018	\$1,984,340
Impairment of oil and gas properties	\$ -	\$ -	\$ 425,668	\$ 370,361	\$ -
Gain on litigation settlement, net	\$ -	\$ -	\$ -	\$ -	\$1,055,350
Net income (loss)	\$1,240,674	\$ 340,062	\$ (923,346)	\$ 70,124	\$1,782,130
Allocation of net income (loss):					
General partners	\$ 328,079	\$ 113,550	\$ (56,570)	\$ 121,907	\$ 462,040
Limited partners	\$ 912,595	\$ 226,512	\$ (866,776)	\$ (51,783)	\$1,320,090
Limited partners' net income (loss) per limited partnership interest	\$ 46.96	\$ 11.65	\$ (44.60)	\$ (2.66)	\$ 67.90
Limited partners' cash distributions per limited partnership interest	\$ 44.87	\$ 15.08	\$ 12.82	\$ 32.32	\$ 73.60

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

At year end:

Identifiable assets	\$2,409,328	\$2,343,035	\$2,390,810	\$3,657,643	\$4,436,38
	=====	=====	=====	=====	=====

(a) Including litigation settlement per limited partnership interest of \$42.48 in 1996.

4

420

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 65% to \$2,348,261 for 2000 as compared to \$1,419,376 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 51,863 barrels of oil, 33,622 barrels of natural gas liquids ("NGLs") and 138,617 mcf of gas were sold, or 108,588 barrel of oil equivalents ("BOEs"). In 1999, 50,064 barrels of oil, 35,804 barrels of NGLs and 154,235 mcf of gas were sold, or 111,574 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.19, or 70%, from \$17.36 in 1999 to \$29.55 in 2000. The average price received per barrel of NGLs increased \$4.97, or 55%, from \$9.03 in 1999 to \$14.00 in 2000. The average price received per mcf of gas increased 69% from \$1.47 in 1999 to \$2.49 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$1,124,923 as compared to \$1,088,550 in 1999, an increase of \$36,373, or 3%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$937,743 in 2000 and \$859,602 in 1999, resulting in an increase of \$78,141 or 9%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and workover costs incurred to stimulate well production, offset by lower well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 45% from \$53,481 in 1999 to \$77,459 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$70,448 in 2000 and \$42,581 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

5

421

Depletion was \$109,721 in 2000 as compared to \$175,467 in 1999, representing a decrease of \$65,746, or 37%. This decrease was primarily due to a 150,475 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 26% to \$1,419,376 from \$1,124,134 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 50,064 barrels of oil, 35,804 barrels of NGLs and 154,235 mcf of gas were sold, or 111,574 BOEs. In 1998, 54,153 barrels of oil, 34,549 barrels of NGLs and 145,870 mcf of gas were sold, or 113,014 BOEs.

The average price received per barrel of oil increased \$4.06, or 31%, from \$13.30 in 1998 to \$17.36 in 1999. The average price received per barrel of NGLs increased \$2.95, or 49%, from \$6.08 in 1998 to \$9.03 in 1999. The average price received per mcf of gas increased 11% from \$1.33 in 1998 to \$1.47 in 1999.

A gain on disposition of assets of \$2,100 was recognized during 1998 from the sale of equipment on one fully depleted well.

Total costs and expenses decreased in 1999 to \$1,088,550 as compared to \$2,059,738 in 1998, a decrease of \$971,188, or 47%. The decrease was primarily due to declines in depletion, the impairment of oil and gas properties and production costs, offset by an increase in G&A expenses.

Production costs were \$859,602 in 1999 and \$865,247 in 1998, resulting in a \$5,645 decrease. The decrease was due to declines in workover costs and ad valorem taxes, offset by increases in well maintenance costs incurred to stimulate well production and in production taxes due to increased oil and gas revenues.

During this period, G&A increased 39% from \$38,385 in 1998 to \$53,481 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$42,581 in 1999 and \$33,724 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$425,668 related to its oil and gas properties during 1998.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$175,467 in 1999 compared to \$730,438 in 1998. This represented a decrease of \$554,971, or 76%. This decrease was the result of an increase in proved reserves of 445,239 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

6

422

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$852,554 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$936,985 and a decline in working capital of \$17,688, offset by increases in production costs paid of \$78,141 and G&A expenses paid of \$23,978. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$953,265 to oil and gas receipts, offset by \$16,280 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and workover costs incurred to stimulate well production, offset by lower well maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for equipment upgrades on various oil and gas properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$1,173,468, of which \$301,462 was distributed to the general partners and \$872,006 to the limited partners. In 1999, cash distributions to the partners were \$392,295, of which \$99,150 was distributed to the general partners and \$293,145 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 84-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 84-A, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 84-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 84-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 84-A, Ltd. (the "Partnership") is a limited partnership organized in 1984 under the laws of the State of Texas. The Partnership's general partners are Pioneer Natural Resources USA, Inc. ("Pioneer USA") and P&P Employees 84-A, Ltd. ("EMPL"). The Partnership's managing general partner is Pioneer USA.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements

14

430

as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership recognized a non-cash impairment provision of \$425,668 related to its proved oil and gas properties during 1998.

15

431

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$383,897 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 1,240,674	\$ 340,062	\$ (923)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	98,611	165,764	695
Impairment of oil and gas properties for financial reporting purposes	--	--	425
Salvage income	--	--	2
Other, net	(2,689)	(4,938)	5
	-----	-----	-----
Net income per Federal income tax returns	\$ 1,336,596	\$ 500,888	\$ 206
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 14,534	\$ 12,628	\$ 10,572
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

2000	1999
-----	-----

Proved properties:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Property acquisition costs	\$ 923,276	\$ 923,276
Completed wells and equipment	17,337,500	17,322,966
	-----	-----
	18,260,776	18,246,242
Accumulated depletion	(16,391,831)	(16,282,110)
	-----	-----
Net oil and gas properties	\$ 1,868,945	\$ 1,964,132
	=====	=====

16

432

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 410,572	\$ 395,016	\$ 382,325
Reimbursement of general and administrative expenses	\$ 70,448	\$ 42,581	\$ 33,724

Pioneer USA, EMPL and the Partnership are parties to the Partnership agreement. EMPL is a limited partnership in which Pioneer USA owns 77.5% and the remaining portion is owned by former s. In addition, Pioneer USA owned 419 limited partner interests in the Partnership at January 1, 2001.

The costs and revenues of the Partnership are allocated as follows:

	General partners	Limited partners
	-----	-----
Revenues:		
Proceeds from property dispositions prior to cost recovery	10%	90%
All other Partnership revenues	25%	75%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	10%	90%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Operating costs, direct costs and general and administrative expenses	25%	75%
Incremental direct expenses	-	100%

Incremental direct expenses are direct expenses which would not be incurred except for the requirements of the securities regulatory authorities and totaled \$7,011, \$10,900 and \$4,661 in 2000, 1999 and 1998, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

17

433

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	1,053,041	1,516,688
Revisions	(400,628)	(306,319)
Production	(88,702)	(145,870)
	-----	-----
Net proved reserves at December 31, 1998	563,711	1,064,499
Revisions	789,038	1,498,169
Production	(85,868)	(154,235)
	-----	-----
Net proved reserves at December 31, 1999	1,266,881	2,408,433
Revisions	168,380	(31,965)
Production	(85,485)	(138,617)
	-----	-----
Net proved reserves at December 31, 2000	1,349,776	2,237,851
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.02 per barrel of NGLs and \$7.45 per mcf of gas, discounted at 10% was approximately \$10,236,000 and undiscounted was \$20,832,000.

Numerous uncertainties exist in estimating quantities of proved reserves

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	=====	=====	=====

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	35%	33%	-
TEPPCO Crude Oil LLC	17%	18%	-
Genesis Crude Oil, L.P.	-	-	53%
NGTS LLC	10%	7%	-
Western Gas Resources, Inc.	3%	7%	29%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC and NGTS LLC were \$43,117, \$76,863 and \$693, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

General partners - The general partners of the Partnership are Pioneer USA and EMPL. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

19

435

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$19,435,000. The general partners are required to contribute amounts equal to 10% of Partnership expenditures for lease acquisition, drilling and completion and 25% of direct, general and administrative and operating expenses.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

436

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name	Age at December 31, 2000	Position
----	----	-----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Counsel and Director

Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

437

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

438

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. Under the Partnership agreement, Pioneer USA pays 8% of the Partnership's acquisition, drilling and completion costs and 20% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 20% of the Partnership's revenues.

EMPL is a co-general partner of the Partnership. Under this arrangement, EMPL pays 2% of the Partnership's acquisition, drilling and completion costs and 5% of its operating and general and administrative expenses. In return, EMPL is allocated 5% of the Partnership's revenues. EMPL does not receive any fees or reimbursements from the Partnership.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the outstanding limited partnership interests of the Partnership. Pioneer USA and EMPL respectively own 80% and 20% of the general partners' interests in the Partnership. Pioneer USA owned 419 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

439

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$410,572	\$395,016	\$382,325
Reimbursement of general and administrative expenses	\$ 70,448	\$ 42,581	\$ 33,724

Under the limited partnership agreement, the general partners, Pioneer USA and EMPL, together pay 10% of the Partnership's acquisition, drilling and completion costs and 25% of its operating and general and administrative expenses. In return, they are allocated 25% of the Partnership's revenues. Twenty percent of the general partners' share of costs and revenues is allocated to EMPL and the remainder is allocated to Pioneer USA. Certain former s of Pioneer USA are limited partners of EMPL. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Partnership.

24

440

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000,
1999 and 1998

Statements of partners' capital for the years ended December 31,
2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000,
1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the
required information is in the financial statements or notes thereto,
or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or
incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 85-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 85-A, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 85-A, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PARKER & PARSLEY 85-A LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b) (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent the estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2035, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

452

PARKER & PARSLEY 85-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 85-A, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 22% to \$216,806 for the three months ended March 31, 2001 to \$178,428 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 4,034 barrels of oil, 2,018 barrels of natural gas liquids ("NGLs") and 12,365 mcf of gas were sold, or 8,113 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 4,451 barrels of oil, 2,984 barrels of NGLs and 11,812 mcf of gas were sold, or 9,404 BOEs.

7

453

The average price received per barrel of oil increased \$.89, or 3%, from \$27.40 for the three months ended March 31, 2000 to \$28.29 for the same period in 2001. The average price received per barrel of NGLs increased \$5.52, or 45%, from \$12.16 for the three months ended March 31, 2000 to \$17.68 for the same period in 2001. The average price received per mcf of gas increased 217% from \$1.71 during the three months ended March 31, 2000 to \$5.42 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses decreased to \$100,263 for the three months ended March 31, 2001 as compared to \$105,891 for the same period in 2000, a decrease of \$5,628, or 5%. This decrease was due to decreases in production costs and depletion, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$85,302 for the three months ended March 31, 2001 and \$91,946 for the same period in 2000, a decrease of \$6,644, or 7%. The decrease was primarily due to a decrease in well maintenance costs, offset by higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 22% from \$5,353 for the three months ended March 31, 2000 to \$6,504

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$8,457 for the three months ended March 31, 2001 as compared to \$8,592 for the same period in 2000, a decrease of \$135, or 2%. This decrease was primarily due to a decline in oil production of 417 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$45,077 for the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$38,666 in oil and gas sales receipts and reductions in production costs of \$6,644 and working capital of \$918, offset by an increase in G&A expenses of \$1,151. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$64,539 to oil and gas receipts, offset by \$25,873 resulting from the decline in production during 2001. The decrease in production costs was primarily due to a decline in well maintenance costs, offset by increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

8

454

Net Cash Used in Investing Activities

The Partnership's investing activities during the three months ended March 31, 2001 and 2000 were related to equipment upgrades on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$133,032, of which \$1,330 was distributed to the managing general partner and \$131,702 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$68,884, of which \$689 was distributed to the managing general partner and \$68,195 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

457

PART I

ITEM 1. BUSINESS

Parker & Parsley 85-A, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 9,613 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000, approximately 57% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any

applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 25 productive oil and gas wells. At December 31, 2000, 21 wells were producing with four wells sold during 1996.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 9,613 outstanding limited partnership interests held of record by 820 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$372,121 and \$161,988 respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1 997
	-----	-----	-----	-----
Operating results:				

Oil and gas sales	\$ 757,929	\$ 526,325	\$ 371,098	\$ 548,786
	=====	=====	=====	=====
Impairment of oil and gas properties	\$ --	\$ --	\$ 22,031	\$ 270,187
	=====	=====	=====	=====

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 44% to \$757,929 for 2000 as compared to \$526,325 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production from 1999 to 2000. In 2000, 16,975 barrels of oil, 10,483 barrels of natural gas liquids ("NGLs") and 41,549 mcf of gas were sold, or 34,383 barrel of oil equivalents ("BOEs"). In 1999, 17,451 barrels of oil, 13,795 barrels of NGLs and 55,226 mcf of gas were sold, or 40,450 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.27, or 72%, from \$17.11 in 1999 to \$29.38 in 2000. The average price received per barrel of NGLs increased \$4.49, or 46%, from \$9.71 in 1999 to \$14.20 in 2000. The average price received per mcf of gas increased 56% from \$1.70 in 1999 to \$2.66 in 2000. The market price received for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$386,863 as compared to \$350,830 in 1999, an increase of \$36,033, or 10%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$331,978 in 2000 and \$284,086 in 1999, resulting in an increase of \$47,892, or 17%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 44% from \$15,790 in 1999 to \$22,738 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$19,018 in 2000 and \$9,794 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$32,147 in 2000 as compared to \$50,954 in 1999, representing a decrease of \$18,807, or 37%. This decrease was primarily due to a 17,541 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

5

461

The Partnership's 1999 oil and gas revenues increased 42% to \$526,325 from \$371,098 in 1998. The increase in revenues resulted from higher average prices received and an increase in production from 1998 to 1999. In 1999, 17,451 barrels of oil, 13,795 barrels of NGLs and 55,226 mcf of gas were sold, or 40,450 BOEs. In 1998, 18,178 barrels of oil, 9,630 barrels of NGLs and 43,021 mcf of gas were sold, or 34,978 BOEs.

The average price received per barrel of oil increased \$3.84, or 29%, from \$13.27 in 1998 to \$17.11 in 1999. The average price received per barrel of NGLs increased \$3.20, or 49%, from \$6.51 in 1998 to \$9.71 in 1999. The average price received per mcf of gas increased 9% from \$1.56 in 1998 to \$1.70 in 1999.

Total costs and expenses decreased in 1999 to \$350,830 as compared to \$649,476 in 1998, a decrease of \$298,646, or 46%. The decrease was primarily due to declines in depletion, the impairment of oil and gas properties and production costs, offset by an increase in G&A.

Production costs were \$284,086 in 1999 and \$304,333 in 1998, resulting in a decrease of \$20,247, or 7%. The decrease was the combination of declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes due to an increase in oil and gas revenues.

During this period, G&A increased 42% from \$11,133 in 1998 to \$15,790 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$9,794 in 1999 and \$8,231 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$22,031 related to its oil and gas properties during 1998.

Depletion was \$50,954 in 1999 compared to \$311,979 in 1998. This represented a decrease of \$261,025, or 84%. This decrease was primarily due to an increase in proved reserves of 182,664 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas

6

462

prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$172,932 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$234,104, offset by increases in production costs paid of \$47,892, G&A expenses paid of \$6,948 and working capital of \$6,332. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$331,444 to oil and gas receipts, offset by \$97,340 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for equipment upgrades on various oil and gas properties.

Proceeds from asset dispositions of \$2,454 and \$279 were recognized in 2000 and 1999, respectively. Proceeds during 2000 of \$2,205 were from salvage income received on one fully depleted well and \$249 from equipment credits received on an active property. Proceeds during 1999 of \$279 were from equipment credits received on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$375,880, of which \$3,759 was distributed to the managing general partner and \$372,121 to the limited partners. In 1999, cash distributions to the partners were \$163,624, of which \$1,636 was distributed to the managing general partner and \$161,988 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 85-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 85-A, Ltd. as of December 31, 2000 and 1999, and the related statements of income, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 85-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 85-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley 85-A, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated, in part, to the Partnership by the managing general

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$22,031 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

15

471

The financial statement basis of the Partnership's net assets and liabilities was \$500,887 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
--	------	------	------

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----	-----
Net income (loss) per statements of operations	\$ 379,203	\$ 178,927	\$ (274,769)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	26,488	45,239	307,564
Impairment of oil and gas properties for financial reporting purposes	-	-	22,031
Other, net	(713)	(817)	1,515
	-----	-----	-----
Net income per Federal income tax returns	\$ 404,978	\$ 223,349	\$ 56,341
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 3,092	\$ 6,987	\$ 12,611
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 488,509	\$ 488,509
Completed wells and equipment	6,910,445	6,907,602
	-----	-----
Accumulated depletion	7,398,954	7,396,111
	(6,871,985)	(6,839,838)
	-----	-----
Net oil and gas properties	\$ 526,969	\$ 556,273
	=====	=====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 157,269	\$ 148,638	\$ 144,020
Reimbursement of general and administrative expenses	\$ 19,018	\$ 9,794	\$ 8,231

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)	Partnership
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 187 limited partner interests owned by Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	318,665	423,423
Revisions	(154,837)	(135,041)
Production	(27,808)	(43,021)
	-----	-----
Net proved reserves at December 31, 1998	136,020	245,361
Revisions	304,597	520,701
Production	(31,246)	(55,226)
	-----	-----
Net proved reserves at December 31, 1999	409,371	710,836
Revisions	430	(151,364)
Production	(27,458)	(41,549)
	-----	-----
Net proved reserves at December 31, 2000	382,343	517,923
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.51 per barrel of NGLs and \$7.67 per mcf of gas, discounted at 10% was approximately \$2,812,000 and undiscounted was \$5,248,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	57%	49%	-
NGTS LLC	9%	10%	3%
Genesis Crude Oil, L.P.	-	-	60%
Western Gas Resources, Inc.	3%	7%	19%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$36,131, which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and

19

475

general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$9,613,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the partnership agreement

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

476

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts

21

477

Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

478

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 187 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

479

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 157,269	\$ 148,638	\$144,020
Reimbursement of general and administrative expenses	\$ 19,018	\$ 9,794	\$ 8,231

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Partnership.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 85-B, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 85-B, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 85-B, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2035, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PARKER & PARSLEY 85-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS March 31, 2001 (Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 85-B, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 32% to \$179,094 for the three months ended March 31, 2001 as compared to \$135,322 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 3,660 barrels of oil, 1,334 barrels of natural gas liquids ("NGLs") and 8,365 mcf of gas were sold, or 6,388 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 3,488 barrels of oil, 1,505 barrels of NGLs and 7,429 mcf of gas were sold, or 6,231 BOEs.

The average price received per barrel of oil increased slightly from \$28.65 for the three months ended March 31, 2000 to \$28.85 for the same period in 2001. The average price received per barrel of NGLs increased \$4.53, or 31%, from \$14.41 for the three months ended March 31, 2000 to \$18.94 for the same period in 2001. The average price received per mcf of gas increased 214% from \$1.84 during the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

three months ended March 31, 2000 to \$5.77 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$81,169 for the three months ended March 31, 2001 as compared to \$75,290 for the same period in 2000, an increase of \$5,879, or 8%. This increase was primarily due to increases in production costs, general and administrative expenses ("G&A") and depletion.

Production costs were \$61,176 for the three months ended March 31, 2001 and \$57,367 for the same period in 2000, an increase of \$3,809, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 32% from \$4,060 for the three months ended March 31, 2000 to \$5,373 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$14,620 for the three months ended March 31, 2001 as compared to \$13,863 for the same period in 2000, an increase of \$757, or 5%. The increase was primarily due to an increase in oil production of 172 barrels for the period ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$32,341 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to an increase of \$44,067 in oil and gas sales receipts, offset by increases in production costs of \$3,809, G&A expenses of \$1,313 and working capital of \$6,604. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$36,947 to oil and gas receipts and \$7,120 resulting from the increase in production during 2001. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's investing activities for the three months ended March 31, 2000 were related to equipment upgrades on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$125,339, of which \$1,253 was distributed to the managing general partner and \$124,086 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$64,107, of which \$641 was distributed

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to the managing general partner and \$63,466 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

As of March 8, 2001, the number of outstanding limited partnership interests was 7,988.

The following documents are incorporated by reference into the indicated parts of this Annual Report on Form 10-K: None

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

497

PART I

ITEM 1. BUSINESS

Parker & Parsley 85-B, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 7,988 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000, approximately 48%, 20% and 10% were attributable to sales made to Mobil Oil Corporation, Plains Marketing, L.P. and NGTS LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations. The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

498

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 22 productive oil and gas wells. One well was converted to a saltwater disposal well during 1987 and four wells have been plugged and abandoned. At December 31, 2000, the Partnership had 17 producing wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

499

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 7,988 outstanding limited partnership interests held of record by 717 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$309,279 and \$115,631, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 60% to \$619,365 for 2000 as compared to \$387,551 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 14,002 barrels of oil, 6,807 barrels of natural gas liquids ("NGLs") and 30,909 mcf of gas were sold, or 25,961 barrel of oil equivalents ("BOEs"). In 1999, 14,280 barrels of oil, 7,130 barrels of NGLs and 33,467 mcf of gas were sold, or 26,988 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$11.95, or 66%, from \$18.07 in 1999 to \$30.02 in 2000. The average price received per barrel of NGLs increased \$5.86, or 58%, from \$10.10 in 1999 to \$15.96 in 2000. The average price received per mcf of gas increased 70% from \$1.72 in 1999 to \$2.92 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses decreased in 2000 to \$347,682 as compared to \$404,907

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in 1999, a decrease of \$57,225, or 14%. The decrease was primarily due to declines in the impairment of oil and gas properties and depletion, offset by increases in production costs and general and administrative expenses ("G&A").

Production costs were \$264,543 in 2000 and \$207,744 in 1999, resulting in an increase of \$56,799, or 27%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 60% from \$11,626 in 1999 to \$18,581 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$15,555 in 2000 and \$6,624 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$10,050 and \$95,253 related to its oil and gas properties during 2000 and 1999, respectively.

5

501

Depletion was \$54,508 in 2000 as compared to \$90,284 in 1999, representing a decrease of \$35,776, or 40%. This decrease was primarily due to a 17,204 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 14% to \$387,551 from \$341,048 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 14,280 barrels of oil, 7,130 barrels of NGLs and 33,467 mcf of gas were sold, or 26,988 BOEs. In 1998, 16,204 barrels of oil, 8,599 barrels of NGLs and 41,501 mcf of gas were sold, or 31,720 BOEs.

The average price received per barrel of oil increased \$4.77, or 36%, from \$13.30 in 1998 to \$18.07 in 1999. The average price received per barrel of NGLs increased \$3.15, or 45%, from \$6.95 in 1998 to \$10.10 in 1999. The average price received per mcf of gas increased 9% from \$1.58 in 1998 to \$1.72 in 1999.

Total costs and expenses decreased in 1999 to \$404,907 as compared to \$462,704 in 1998, a decrease of \$57,797, or 12%. The decrease was primarily due to declines in production costs and depletion, offset by increases in the impairment of oil and gas properties and G&A.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$207,744 in 1999 and \$269,093 in 1998, resulting in a \$61,349 decrease, or 23%. The decrease was attributable to less well maintenance costs and ad valorem taxes.

During this period, G&A increased, in aggregate, 14% from \$10,231 in 1998 to \$11,626 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$6,624 in 1999 and \$7,884 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$95,253 and \$52,922 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion was \$90,284 in 1999 compared to \$130,458 in 1998. This represented a decrease of \$40,174, or 31%. This decrease was the result of an increase in proved reserves of 117,564 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,924 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but

to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$163,858 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$234,195, offset by increases in production costs paid of \$56,799, G&A expenses paid of \$6,955 and working capital of \$6,583. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$255,175 to oil and gas receipts, offset by a decrease of \$20,980 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were for expenditures related to oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$6,412 and \$134 during 2000 and 1999, respectively, were from equipment credits received on active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$312,403, of which \$3,124 was distributed to the managing general partner and \$309,279 to the limited partners. In 1999, cash distributions to the partners were \$116,799, of which \$1,168 was distributed to the managing general partner and \$115,631 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 85-B, Ltd.
(A Texas Limited Partnership):

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

We have audited the balance sheets of Parker & Parsley 85-B, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 85-B, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 85-B, LTD.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 85-B, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$10,050, \$95,253 and \$52,922 related to its proved oil and gas properties during 2000, 1999 and 1998, respectively.

15

511

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$89,078 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 277,323	\$ (14,097)	\$ (117,25)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	50,022	86,267	127,80
Impairment of oil and gas properties for financial reporting purposes	10,050	95,253	52,92
Other, net	5,557	(1,887)	2,20
	-----	-----	-----
Net income per Federal income tax returns	\$ 342,952 =====	\$ 165,536 =====	\$ 65,67 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 3,647 =====	\$ 7,285 =====	\$ 7,947 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 292,864	\$ 292,864
Completed wells and equipment	5,024,392	5,027,157
	-----	-----
Accumulated depletion	5,317,256 (4,526,767)	5,320,021 (4,462,209)
	-----	-----
Net oil and gas properties	\$ 790,489 =====	\$ 857,812 =====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$105,647	\$ 97,004	\$111,206
Reimbursement of general and administrative expenses	\$ 15,555	\$ 6,624	\$ 7,884

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)	Partnership
	-----	-----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 58 limited partner interests owned by Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	333,208	531,982
Revisions	(139,875)	(179,491)
Production	(24,803)	(41,501)
	-----	-----
Net proved reserves at December 31, 1998	168,530	310,990
Revisions	177,510	247,011
Production	(21,410)	(33,467)
	-----	-----
Net proved reserves at December 31, 1999	324,630	524,534
Revisions	634	(33,966)
Production	(20,809)	(30,909)
	-----	-----
Net proved reserves at December 31, 2000	304,455	459,659
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.43 per barrel of NGLs and \$7.87 per mcf of gas, discounted at 10% was approximately \$2,332,000 and undiscounted was \$4,536,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Mobil Oil Corporation	48%	51%	45%
Plains Marketing, L.P.	20%	16%	-
NGTS LLC	10%	7%	1%
Western Gas Resources, Inc.	4%	6%	29%
Genesis Crude Oil, L.P.	-	-	18%

At December 31, 2000, the amounts receivable from Mobil Oil Corporation, Plains Marketing, L.P. and NGTS LLC were \$23,621, \$7,883 and \$1,228, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

19

515

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$7,988,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

516

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name -----	Age at December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

517

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

518

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays 10% of the Program's acquisition, drilling and completion costs and 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 58 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

519

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 105,647	\$ 97,004	\$111,206
Reimbursement of general and administrative expenses	\$ 15,555	\$ 6,624	\$ 7,884

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY PRIVATE INVESTMENT 85-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Private Investment 85-A, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Investment 85-A, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment

- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners

 - the term of the partnership

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Liquidation Value per \$1,000 Limited Partner Investment (c), (e) \$

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f) \$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2035, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY PRIVATE INVESTMENT 85-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 1. Organization and nature of operations

Parker & Parsley Private Investment 85-A, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 4% to \$123,326 for the three months ended March 31, 2001 as compared to \$118,048 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 2,835 barrels of oil, 1,012 barrels of natural gas liquids ("NGLs") and 4,506 mcf of gas were sold, or 4,598 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 3,392 barrels of oil, 1,300 barrels of NGLs and 5,061 mcf of gas were sold, or 5,536 BOEs.

The average price received per barrel of oil increased \$1.37, or 5%, from \$27.36 for the three months ended March 31, 2000 to \$28.73 for the same period in 2001. The average price received per barrel of NGLs increased \$3.99, or 30%, from \$13.27 for the three months ended March 31, 2000 to \$17.26 for the same period in 2001. The average price received per mcf of gas increased 243% from \$1.58 during the three months ended March 31, 2000 to \$5.42 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

A gain on disposition of assets of \$23,661 was recognized during the three months ended March 31, 2000 due to equipment credits received on two wells

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

plugged and abandoned during 2000. Abandoned property costs of \$6,855 incurred during the three months ended March 31, 2000 were related to the abandonment of these two wells.

Costs and Expenses:

Total costs and expenses decreased to \$49,089 for the three months ended March 31, 2001 as compared to \$58,945 for the same period in 2000, a decrease of \$9,856, or 17%. This decrease was due to declines in abandoned property costs, depletion and production costs, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$38,813 for the three months ended March 31, 2001 and \$38,872 for the same period in 2000 resulting in a \$59 decrease. The decrease was due to lower well maintenance costs, offset by higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 4% from \$2,361 for the three months ended March 31, 2000 to \$2,467 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$7,809 for the three months ended March 31, 2001 compared to \$10,857 for the same period in 2000, a decrease of \$3,048, or 28%. This decrease was primarily due to a decrease in oil production of 557 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$22,609 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase of \$5,337 in oil and gas sales receipts, reductions in working capital of \$10,464, abandoned property costs of \$6,855 and production costs of \$59, offset by an increase in G&A expenses of \$106. The increase in oil and gas receipts resulted from the increase in commodity prices

7

533

during 2001 which contributed an additional \$29,315 to oil and gas receipts, offset by \$23,978 resulting from the decline in production during 2001 as compared to the same period in 2000. The decrease in production costs was primarily due to lower well maintenance costs, offset by higher production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Provided by Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets during the three months ended March 31, 2000 of \$23,867 were related to salvage income received on one well plugged and abandoned during 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$94,553, of which \$946 was distributed to the managing general partner and \$93,607 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$78,309, of which \$783 was distributed to the managing general partner and \$77,526 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

535

INDEPENDENT AUDITORS' REPORT

The Partners

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley Private Investment 85-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley Private Investment 85-A, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Private Investment 85-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY PRIVATE INVESTMENT 85-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley Private Investment 85-A, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as determined evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$61,942 and \$130,873 related to its

8

542

proved oil and gas properties during 2000 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$5,983 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000	
	-----	-----
Net income (loss) per statements of operations	\$ 263,681	\$
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	32,046	
Impairment of oil and gas properties for financial reporting purposes	61,942	
Other, net	(7,404)	
	-----	-----
Net income per Federal income tax returns	\$ 350,265	\$
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	
	-----	-----
Development costs	\$ 1,948	\$
	=====	=====

Capitalized oil and gas properties consist of the following:

Proved properties:		
Property acquisition costs		\$
Completed wells and equipment		-----
Accumulated depletion		-----
Net oil and gas properties		\$
		=====

NOTE 6. RELATED PARTY TRANSACTIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 66,336	\$
Reimbursement of general and administrative expenses	\$ 8,067	\$

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer U

Revenues:	
Proceeds from disposition of depreciable properties	9.090
All other revenues	24.242
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.090
Operating costs, direct costs and general and administrative expenses	24.242

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)

Net proved reserves at January 1, 1998	271,658
Revisions	(91,942)
Production	(21,200)

Net proved reserves at December 31, 1998	158,516
Revisions	180,472
Production	(20,664)

Net proved reserves at December 31, 1999	318,324
Revisions	27,943
Production	(17,619)

Net proved reserves at December 31, 2000	328,648
	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.00 per barrel of NGLs and \$7.43 per mcf of gas, discounted at 10% was approximately \$2,408,000 and undiscounted was \$5,247,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended	
	2000	1999

	=====	=====

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

Plains Marketing, L.P.	64%
Genesis Crude Oil, L.P.	-
Western Gas Resources, Inc.	3%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$27,002 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion

12

546

of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$5,000,000. Pioneer USA was required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

547

PARKER & PARSLEY PRIVATE INVESTMENT 85-A, LTD.
(A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND
RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 47% to \$502,432 for 2000 as compared to \$342,760 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 11,945 barrels of oil, 5,674 barrels of natural gas liquids ("NGLs") and 20,905 mcf of gas were sold, or 21,103 barrel of oil equivalents ("BOEs"). In 1999, 14,568 barrels of oil, 6,096 barrels of NGLs and 23,218 mcf of gas were sold, or 24,534 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$13.28, or 79%, from \$16.91 in 1999 to \$30.19 in 2000. The average price received per barrel of NGLs increased \$5.27, or 53%, from \$9.95 in 1999 to \$15.22 in 2000. The average price received per mcf of gas increased 72% from \$1.54 in 1999 to \$2.65 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets recognized during 2000 of \$33,459 was due to equipment credits received on two wells plugged and abandoned during the current year. Abandoned property costs of \$7,038 incurred in 2000 related to the abandonment of these two wells.

Total costs and expenses increased in 2000 to \$278,261 as compared to \$229,322 in 1999, an increase of \$48,939, or 21%. The increase was primarily due to the impairment of oil and gas properties and increases in production costs, abandoned property costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$164,183 in 2000 and \$157,138 in 1999, resulting in a \$7,045 increase, or 4%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and workover costs incurred to stimulate well production, offset by a decline in well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 47% from \$6,855 in 1999 to \$10,049 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

paid the managing general partner \$8,067 in 2000 and \$3,581 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$61,942 related to its oil and gas properties during 2000.

548

Depletion was \$35,049 in 2000 as compared to \$65,329 in 1999, representing a decrease of \$30,280, or 46%. This decrease was primarily due to a 20,767 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a decline in oil production of 2,623 barrels for the period ended December 31, 2000 compared to the same period in 1999.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 27% to \$342,760 from \$269,068 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 14,568 barrels of oil, 6,096 barrels of NGLs and 23,218 mcf of gas were sold, or 24,534 BOEs. In 1998, 14,874 barrels of oil, 6,326 barrels of NGLs and 22,343 mcf of gas were sold, or 24,924 BOEs.

The average price received per barrel of oil increased \$3.71, or 28%, from \$13.20 in 1998 to \$16.91 in 1999. The average price received per barrel of NGLs increased \$3.46, or 53%, from \$6.49 in 1998 to \$9.95 in 1999. The average price received per mcf of gas increased 9% from \$1.41 in 1998 to \$1.54 in 1999.

Total costs and expenses decreased in 1999 to \$229,322 as compared to \$441,872 in 1998, a decrease of \$212,550, or 48%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$157,138 in 1999 and \$173,592 in 1998, resulting in a \$16,454 decrease, or 9%. The decrease was due to declines in well maintenance costs and ad valorem taxes.

During this period, G&A increased 14% from \$6,018 in 1998 to \$6,855 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$3,581 in 1999 and \$4,294 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$130,873 related to its oil and gas properties during 1998.

Depletion was \$65,329 in 1999 compared to \$131,389 in 1998, representing a decrease of \$66,060, or 50%. This decrease was the result of an increase in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

proved reserves of 120,513 barrels of oil during 1999 due to higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

549

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$126,496 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$162,136, offset by increases in production costs paid of \$7,045, G&A expenses paid of \$3,194, abandoned property costs paid of \$7,038 and working capital of \$18,363. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$253,878 to oil and gas receipts, offset by \$91,742 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and workover costs incurred to stimulate well production, offset by a decline in well maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds from disposition of assets during 2000 of \$41,969 were related to \$33,459 salvage income received on two wells plugged and abandoned during the current year and \$8,510 from equipment credits received on one active well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$348,010, of which \$3,480 was distributed to the managing general partner and \$344,530 to the limited partners. In 1999, cash distributions to the partners were \$149,074, of which \$1,491 was distributed to the managing general partner and \$147,583 to the

limited partners.

A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Selected 85 Private Investment, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Selected 85 Private Investment, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

multiple of distributions for the past four quarterly distributions including the distribution in July 2001

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2035, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

558

PARKER & PARSLEY SELECTED 85 PRIVATE INVESTMENT, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Selected 85 Private Investment, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas.

The Partnership engages oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 44% to \$128,977 for the three months ended March 31, 2001 as compared to \$89,527 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 2,541 barrels of oil, 1,191 barrels of natural gas liquids ("NGLs") and 6,584 mcf of gas were sold, or 4,829 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,270 barrels of oil, 1,355 barrels of NGLs and 5,393 mcf of gas were sold, or 4,524 BOEs.

6

559

The average price received per barrel of oil increased \$.99, or 4%, from \$27.34 for the three months ended March 31, 2000 to \$28.33 for the same period in 2001. The average price received per barrel of NGLs increased \$4.69, or 35%, from \$13.50 for the three months ended March 31, 2000 to \$18.19 for the same period in 2001. The average price received per mcf of gas increased 216% from \$1.70 during the three months ended March 31, 2000 to \$5.37 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$2,574 was recognized during the three months ended March 31, 2001 resulting from equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$59,696 for the three months ended March 31, 2001 as compared to \$50,204 for the same period in 2000, an increase of \$9,492, or 19%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$50,331 for the three months ended March 31, 2001 and \$40,320 for the same period in 2000 resulting in a \$10,011 increase, or 25%. The increase was due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 44% from \$1,791 for the three months ended March 31, 2000 to \$2,579 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$6,786 for the three months ended March 31, 2001 as compared to \$8,093 for the same period in 2000, a decrease of \$1,307, or 16%. This decrease was primarily due to positive revisions to proved reserves during the three

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

months ended March 31, 2001 as a result of higher commodity prices, offset by an increase in oil production of 271 barrels for the period ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$26,020 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase of \$39,638 in oil and gas sales receipts, offset by increases in production costs of \$10,011, G&A expenses of \$788 and working

7

560

capital of \$2,819. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$28,552 to oil and gas receipts and \$11,086 resulting from an increase in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Provided by (Used in) Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$2,574 received during the three months ended March 31, 2001 were due to equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$88,265, of which \$883 was distributed to the managing general partner and \$87,382 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$43,494, of which \$435 was distributed to the managing general partner and \$43,059 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using

preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

562

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley Selected 85 Private Investment, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley Selected 85 Private Investment, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Selected 85 Private Investment, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY SELECTED 85 PRIVATE INVESTMENT, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Selected 85 Private Investment, Ltd. (the "Partnership") is a limited partnership organized in 1985 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

financial statements as the income of the Partnership is included in the individual Federal income tax returns of the

7

568

respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$92,133 related to its proved oil and gas properties during 1998.

8

569

NOTE 4. INCOME TAXES

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The financial statement basis of the Partnership's net assets and liabilities was \$152,466 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 220,155	\$ 61,348	\$ (160,482)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	28,649	30,978	116,164
Impairment of oil and gas properties for financial reporting purposes	-	-	92,133
Salvage income	-	-	2,904
Other, net	(493)	(727)	859
 Net income per Federal income tax returns	 \$ 248,311 =====	 \$ 91,599 =====	 \$ 51,578 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 3,185 =====	\$ 3,269 =====	\$ 4,417 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 141,791	\$ 141,791
Completed wells and equipment	3,722,349	3,718,041
	-----	-----
Accumulated depletion	3,864,140 (3,441,568)	3,859,832 (3,408,713)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net oil and gas properties	\$ 422,572	\$ 451,119
	=====	=====

9

570

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 66,669	\$ 78,823	\$ 77,025
Reimbursement of general and administrative expenses	\$ 6,888	\$ 1,886	\$ 2,442

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to the Partnership and Pioneer USA as follows:

	Pioneer USA (1)	Partnership
	-----	-----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

571

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	186,210	271,087
Revisions	(76,968)	(74,549)
Production	(15,439)	(25,328)
	-----	-----
Net proved reserves at December 31, 1998	93,803	171,210
Revisions	121,880	243,365
Production	(14,598)	(27,627)
	-----	-----
Net proved reserves at December 31, 1999	201,085	386,948
Revisions	46,612	21,005
Production	(15,698)	(22,987)
	-----	-----
Net proved reserves at December 31, 2000	231,999	384,966
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.63 per barrel of oil, \$13.32 per barrel of NGLs and \$7.55 per mcf of gas, discounted at 10% was approximately \$1,829,000 and undiscounted was approximately \$3,687,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	57%	49%	-
Koch Midstream Services Company	9%	11%	-
NGTS LLC	9%	10%	-
Western Gas Resources, Inc.	4%	10%	34%
Genesis Crude Oil, L.P.	-	-	52%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$26,039, which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the

Partnership. Under the limited partnership agreement, the managing general

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$4,690,000. Pioneer USA was required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

PARKER & PARSLEY SELECTED 85 PRIVATE INVESTMENT, LTD. (A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 75% to \$441,200 for 2000 as compared to \$252,399 in 1999. The increase in revenues resulted from higher average prices received and a slight increase in production. In 2000, 9,509 barrels of oil, 6,189 barrels of natural gas liquids ("NGLs") and 22,987 mcf of gas were sold, or 19,529 barrel of oil equivalents ("BOEs"). In 1999, 7,828 barrels of oil, 6,770 barrels of NGLs and 27,627 mcf of gas were sold, or 19,203 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.32, or 71%, from \$17.27 in 1999 to \$29.59 in 2000. The average price received per barrel of NGLs increased \$5.03, or 48%, from \$10.49 in 1999 to \$15.52 in 2000. The average price received per mcf of gas increased 66% from \$1.67 in 1999 to \$2.77 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$224,630 as compared to \$192,779 in 1999, an increase of \$31,851, or 17%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"),

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

offset by a decline in depletion.

Production costs were \$184,074 in 2000 and \$153,832 in 1999, resulting in a \$30,242 increase, or 20%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and workover costs incurred to stimulate well production, offset by a decline in well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 75% from \$5,048 in 1999 to \$8,824 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$6,888 in 2000 and \$1,886 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$31,732 in 2000 as compared to \$33,899 in 1999, representing a decrease of \$2,167, or 6%. This decrease was primarily due to a 28,956 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices, offset by an increase in oil production of 1,681 barrels for the period ended December 31, 2000 compared to the same period in 1999.

575

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 22% to \$252,399 from \$206,099 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 7,828 barrels of oil, 6,770 barrels of NGLs and 27,627 mcf of gas were sold, or 19,203 BOEs. In 1998, 9,075 barrels of oil, 6,364 barrels of NGLs and 25,328 mcf of gas were sold, or 19,660 BOEs.

The average price received per barrel of oil increased \$3.83, or 28%, from \$13.44 in 1998 to \$17.27 in 1999. The average price received per barrel of NGLs increased \$3.50, or 50%, from \$6.99 in 1998 to \$10.49 in 1999. The average price received per mcf of gas increased 7% from \$1.56 in 1998 to \$1.67 in 1999.

Total costs and expenses decreased in 1999 to \$192,779 as compared to \$368,781 in 1998, a decrease of \$176,002, or 48%. The decrease was primarily due to declines in the impairment of oil and gas properties and depletion, offset by increases in G&A and production costs.

Production costs were \$153,832 in 1999 and \$153,789 in 1998, resulting in a \$43 increase. The increase was due to increases in production taxes due to increased oil and gas revenues and additional well maintenance costs incurred to stimulate well production, offset by a decline in ad valorem taxes.

During this period, G&A increased 22% from \$4,122 in 1998 to \$5,048 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$1,886 in 1999 and \$2,442 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

"Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$92,133 related to its oil and gas properties during 1998.

Depletion was \$33,899 in 1999 compared to \$118,737 in 1998, representing a decrease of \$84,838, or 71%. This decrease was the result of a combination of factors that included an increase in proved reserves of 65,798 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,247 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

576

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$142,902 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$190,658, offset by increases in production costs paid of \$30,242, G&A expenses paid of \$3,776 and working capital of \$13,738. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$162,805 to oil and gas receipts and an increase of \$27,853 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and workover costs incurred to stimulate well production, offset by a decline in well maintenance costs.. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on various oil and gas properties.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$221,495, of which \$2,215 was distributed to the managing general partner and \$219,280 to the limited partners. In 1999, cash distributions to the partners were \$60,005, of which \$600 was distributed to the managing general partner and \$59,405 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 86-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 86-A, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 86-A, Ltd.:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

(f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2036, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 86-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 86-A, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 11% to \$219,518 for the three months ended March 31, 2001 as compared to \$196,979 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 3,970 barrels of oil, 2,382 barrels of natural gas liquids ("NGLs") and 10,876 mcf of gas were sold, or 8,165 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 4,620 barrels of oil, 3,346 barrels of NGLs and 14,461 mcf of gas were sold, or 10,376 BOEs.

7

587

The average price received per barrel of oil increased \$.74, or 3%, from \$27.46 for the three months ended March 31, 2000 to \$28.20 for the same period in 2001. The average price received per barrel of NGLs increased \$4.94, or 36%, from \$13.90 for the three months ended March 31, 2000 to \$18.84 for the same period in 2001. The average price received per mcf of gas increased 253% from \$1.63 during the three months ended March 31, 2000 to \$5.76 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$10,237 was recognized during the three months ended March 31, 2000 resulting from equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$111,987 for the three months ended March

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

31, 2001 as compared to \$102,924 for the same period in 2000, an increase of \$9,063, or 9%. This increase was primarily due to an increase in production costs, offset by decreases in general and administrative expenses ("G&A") and depletion.

Production costs were \$101,139 for the three months ended March 31, 2001 and \$89,952 for the same period in 2000 resulting in an \$11,187 increase, or 12%. This increase was primarily due to additional well maintenance and workover costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A decreased 28% from \$5,909 for the three months ended March 31, 2000 to \$4,249 for the same period in 2001. The decrease is attributable to the Partnership being credited for an over allocation of \$2,337 by the managing general partner for personnel and administrative costs for the year ended December 31, 2000.

Depletion was \$6,599 for the three months ended March 31, 2001 as compared to \$7,063 for the same period in 2000, a decrease of \$464, or 7%. This decrease was primarily due to a decline in oil production of 650 barrels for the period ended March 31, 2001 as compared to the same period ended March 31, 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$105,001 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to an increase of \$23,215 in oil and gas sales receipts and reductions of \$91,313 in working capital and \$1,660 in G&A expenses, offset by an increase in production costs of \$11,187. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$80,372 to oil and gas receipts, offset by \$57,157 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in

production costs was primarily due to additional well maintenance and workover costs incurred to stimulate well production and an increase in production taxes associated with higher oil and gas prices.

Net Cash Provided by Investing Activities

The Partnership's investing activities during the three months ended March 31, 2000 were related to equipment upgrades on active properties.

Proceeds from disposition of assets of \$10,237 during the three months ended March 31, 2000 resulted from equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$191,670, of which \$1,917 was distributed to the managing general partner and \$189,753 to the limited partners. For the same period ended March 31, 2000,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

cash distributions to the partners were \$88,643, of which \$886 was distributed to the managing general partner and \$87,757 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

591

PART I

ITEM 1. BUSINESS

Parker & Parsley 86-A, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 10,131 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000 approximately 51% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

592

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 32 oil and gas wells. Five wells were sold and one well was abandoned. At December 31, 2000, 26 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

593

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 10,131 outstanding limited partnership interests held of record by 962 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$462,584 and \$154,204, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997
	-----	-----	-----	-----
Operating results:				

Oil and gas sales	\$ 881,177	\$ 555,781	\$ 415,842	\$ 605,964

(a) Including litigation settlement per limited partnership interest of \$28.41 in 1996.

4

594

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 59% to \$881,177 for 2000 as compared to \$555,781 in 1999. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 2000, 18,760 barrels of oil, 13,025 barrels of natural gas liquids ("NGLs") and 56,549 mcf of gas were sold, or 41,210 barrel of oil equivalents ("BOEs"). In 1999, 18,743 barrels of oil, 14,483 barrels of NGLs and 62,354 mcf of gas were sold, or 43,618 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$11.87, or 70%, from \$17.00 in 1999 to \$28.87 in 2000. The average price received per barrel of NGLs increased \$5.31, or 55%, from \$9.63 in 1999 to \$14.94 in 2000. The average price received per mcf of gas increased 63% from \$1.57 in 1999 to \$2.56 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$31,944 was recognized during 2000 resulting from equipment credits on two fully depleted wells.

Total costs and expenses decreased in 2000 to \$432,464 as compared to \$463,135 in 1999, a decrease of \$30,671, or 7%. The decrease was due to declines in depletion and the impairment of oil and gas properties, offset by increases in production costs and general and administrative expense ("G&A").

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$364,985 in 2000 and \$341,430 in 1999, resulting in an increase of \$23,555, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by a slight decline in well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 73% from \$16,673 in 1999 to \$28,772 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$24,184 in 2000 and \$9,436 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of

5

595

the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$12,800 and \$28,052 related to its oil and gas properties during 2000 and 1999, respectively.

Depletion was \$25,907 in 2000 as compared to \$76,980 in 1999, representing a decrease of \$51,073, or 66%. This decrease was primarily due to a 40,953 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 34% to \$555,781 from \$415,842 in 1998. The increase in revenues resulted from higher average prices received and an increase in production from 1998 to 1999. In 1999, 18,743 barrels of oil, 14,483 barrels of NGLs and 62,354 mcf of gas were sold, or 43,618 BOEs. In 1998, 20,308 barrels of oil, 11,164 barrels of NGLs and 49,805 mcf of gas were sold, or 39,773 BOEs.

The average price received per barrel of oil increased \$3.68, or 28%, from \$13.32 in 1998 to \$17.00 in 1999. The average price received per barrel of NGLs increased \$3.10, or 47%, from \$6.53 in 1998 to \$9.63 in 1999. The average price received per mcf of gas increased 8% from \$1.46 in 1998 to \$1.57 in 1999.

Total costs and expenses decreased in 1999 to \$463,135 as compared to \$669,121 in 1998, a decrease of \$205,986, or 31%. The decrease was due to declines in depletion and production costs, offset by increases in the impairment of oil and gas properties and G&A.

Production costs were \$341,430 in 1999 and \$372,460 in 1998, resulting in a \$31,030 decrease, or 8%. The decrease was due to declines in workover costs, well maintenance costs and ad valorem taxes, offset by an increase in production

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

taxes due to an increase in oil and gas revenues.

During this period, G&A increased 34% from \$12,476 in 1998 to \$16,673 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$9,436 in 1999 and \$9,062 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$28,052 and \$23,593 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion was \$76,980 in 1999 compared to \$260,592 in 1998. This represented a decrease of \$183,612, or 70%. This decrease was the result of an increase in proved reserves of 148,893 barrels of oil during 1999 due to higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

6

596

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$229,299 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$328,536, offset by increases in production costs paid of \$23,555, G&A expenses paid of \$12,099 and working capital of \$63,583. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$364,711 to oil and gas receipts, offset by a decrease of \$36,175 resulting from a decrease in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by a slight decline in well maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were for expenditures related to oil and gas equipment upgrades on active properties.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proceeds from asset dispositions of \$31,944 received during 2000 were due to equipment credits received on two fully depleted wells. Proceeds of \$120 were recognized in 1999 primarily from equipment credits received on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$467,257, of which \$4,673 was distributed to the managing general partner and \$462,584 to the limited partners. In 1999, cash distributions to the partners were \$155,762, of which \$1,558 was distributed to the managing general partner and \$154,204 to the limited partners.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Notes to Financial Statements.....

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 86-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 86-A, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 86-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 86-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 86-A, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

14

604

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$12,800, \$28,052 and \$23,593 related to its proved oil and gas properties during 2000, 1999 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$695,197 less

15

605

than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999
	-----	-----
Net income (loss) per statements of operations	\$ 487,574	\$ 96,423
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	16,131	66,147
Impairment of oil and gas properties for financial reporting purposes	12,800	28,052
Timing difference	67,848	-
Other, net	(1,032)	(1,773)
	-----	-----
Net income per Federal income tax returns	\$ 583,321	\$ 188,849
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----
Development costs	\$ 6,531 =====	\$ 7,619 =====

Capitalized oil and gas properties consist of the following:

	2000 -----
Proved properties:	
Property acquisition costs	\$ 264,211
Completed wells and equipment	6,868,031 -----
	7,132,242
Accumulated depletion	(6,721,529) -----
Net oil and gas properties	\$ 410,713 =====

16

606

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 167,350	\$ 167,820
Reimbursement of general and administrative expenses	\$ 24,184	\$ 9,436

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

Pioneer
USA (1)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenues:	
Proceeds from disposition of depreciable properties	9.09091%
All other revenues	24.242425%
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%
Operating costs, direct costs and general and administrative expenses	24.242425%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 35 limited partner interests owned by Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

17

607

	Oil and NGLs (bbls)
Net proved reserves at January 1, 1998	315,662
Revisions	(123,571)
Production	(31,472)

Net proved reserves at December 31, 1998	160,619
Revisions	273,095
Production	(33,226)

Net proved reserves at December 31, 1999	400,488
Revisions	83,992
Production	(31,785)

Net proved reserves at December 31, 2000	452,695
	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$12.60 per barrel of NGLs and \$7.15 per mcf of gas, discounted at 10% was approximately \$3,610,000 and undiscounted was \$7,252,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	=====	=====

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999
	-----	-----
Plains Marketing, L.P.	51%	48%
Genesis Crude Oil, L.P.	-	-
Western Gas Resources, Inc.	7%	9%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$31,479, which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

19

609

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$10,131,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

610

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	45	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Director of Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts

21

611

Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker &

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

612

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 35 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

613

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 167,350	\$ 167,820
Reimbursement of general and administrative expenses	\$ 24,184	\$ 9,436

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 86-B, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 86-B, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

cash distribution on or about July 9, 2001, by the partnership to its partners.

- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2036, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 86-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 86-B, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition
and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 9% to \$438,473 for the three months ended March 31, 2001 as compared to \$402,132 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 8,976 barrels of oil, 2,760 barrels of natural gas liquids ("NGLs") and 20,049 mcf of gas were sold, or 15,078 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 10,821 barrels of oil, 5,059 barrels of NGLs and

20,435 mcf of gas were sold, or 19,286 BOEs. Of the decrease, 1,732 BOEs are attributable to two wells reaching payout pursuant to the terms of the farmout agreements which reduced the Partnership's net revenue interest in the wells.

The average price received per barrel of oil increased \$1.35, or 5%, from \$27.60 for the three months ended March 31, 2000 to \$28.95 for the same period in 2001. The average price received per barrel of NGLs increased \$5.78, or 43%, from \$13.37 for the three months ended March 31, 2000 to \$19.15 for the same period in 2001. The average price received per mcf of gas increased 256% from \$1.76 during the three months ended March 31, 2000 to \$6.27 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$1,419 was recognized during the three months ended March 31, 2000 due to equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses decreased to \$211,291 for the three months ended March 31, 2001 as compared to \$215,173 for the same period in 2000, a decrease of \$3,882, or 2%. This decrease was primarily due to declines in depletion and production costs, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$168,451 for the three months ended March 31, 2001 compared to \$169,111 for the same period in 2000, a decrease of \$660. The decrease was primarily due to a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements as noted above, offset by an increase in production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 9% from \$12,064 for the three months ended March 31, 2000 to \$13,154 for the same period in 2001, primarily due to an increase in the accrual of tax preparation fees.

Depletion was \$29,686 for the three months ended March 31, 2001 compared to \$33,998 for the same period in 2000, a decrease of \$4,312, or 13%. This decrease was primarily due to a decrease in oil production of 1,845 barrels for the three months ended March 31, 2001 compared to the same period in 2000 and a reduction in the Partnership's net depletable basis from charges taken in accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121") during the fourth quarter of 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$95,541 for the three months ended March 31, 2001 from the same period in 2000. This increase was primarily attributable to an increase of \$36,930 in oil and gas sales receipts and reductions in production costs of \$660 and working capital of \$59,041, offset by an increase in G&A expenses of \$1,090. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$136,786 to oil and gas receipts, offset by \$99,856 resulting from the decline in production during 2001 as compared to the same period in 2000. The decrease in production costs was primarily due to lower well maintenance costs, offset by an increase in production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to an increase in the accrual of tax preparation fees.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during the three months ended March 31, 2001 and 2000 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$1,419 recognized during the three months ended March 31, 2000 were due to equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$318,487, of which \$3,185 was distributed to the managing general partner and \$315,302 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$180,685, of which \$1,807 was distributed to the managing general partner and \$178,878 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

LIMITED PARTNERSHIP INTERESTS (\$1,000 PER UNIT)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES / X / NO / /

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. / X /

No market currently exists for the limited partnership interests of the Registrant. Based on the original purchase price, the aggregate market value of limited partnership interests owned by non-affiliates of the Registrant is \$17,080,000.

As of March 8, 2001, the number of outstanding limited partnership interests was 17,208.

The following documents are incorporated by reference into the indicated parts of this Annual Report on Form 10-K: None
PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PART I

ITEM 1. BUSINESS

Parker & Parsley 86-B, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 17,208 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 36% and 16% were attributable to sales made to Plains Marketing, L.P. and Mobil Oil Corporation, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 56 oil and gas wells. At December 31, 2000, 43 wells were producing. Nine wells and interests in two abandoned wells were sold and two wells were plugged and abandoned.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

634

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 17,208 outstanding limited partnership interests held of record by 1,409 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the years ended December 31, 2000 and 1999, distributions of \$923,558 and \$357,887, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997
	-----	-----	-----	-----
Operating results:				

Oil and gas sales	\$ 1,756,242	\$ 1,056,533	\$ 928,899	\$ 1,369,807
	=====	=====	=====	=====
Gain on litigation settlement, net	\$ -	\$ -	\$ -	\$ -
	=====	=====	=====	=====
Impairment of oil and gas properties	\$ 13,279	\$ -	\$ 509,585	\$ 561,432
	=====	=====	=====	=====
Net income (loss)	\$ 933,292	\$ 246,008	\$ (807,041)	\$ (158,796)
	=====	=====	=====	=====
Allocation of net income (loss):				
Managing general partner	\$ 9,333	\$ 2,460	\$ (8,070)	\$ (1,587)
	=====	=====	=====	=====
Limited partners	\$ 923,959	\$ 243,548	\$ (798,971)	\$ (157,209)
	=====	=====	=====	=====
Limited partners' net income (loss) per limited partnership interest	\$ 53.69	\$ 14.15	\$ (46.43)	\$ (9.14)
	=====	=====	=====	=====
Limited partners' cash distributions per limited partnership interest	\$ 53.67	\$ 20.80	\$ 18.70	\$ 46.77
	=====	=====	=====	=====
At year end:				

Identifiable assets	\$ 2,252,955	\$ 2,266,438	\$ 2,363,955	\$ 3,520,172
	=====	=====	=====	=====

(a) Including litigation settlement per limited partnership interest of \$32.55 in 1996.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 66% to \$1,756,242 for 2000 as compared to \$1,056,533 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 41,276 barrels of oil, 21,061 barrels of natural gas liquids ("NGLs") and 79,859 mcf of gas were sold, or 75,647 barrel of oil equivalent ("BOEs"). In 1999, 40,490 barrels of oil, 22,642 barrels of NGLs and 86,726 mcf of gas were sold, or 77,586 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.27, or 71%, from \$17.18 in 1999 to \$29.45 in 2000. The average price received per barrel of NGLs increased \$5.61, or 60%, from \$9.39 in 1999 to \$15.00 in 2000. The average price received per mcf of gas increased 65% from \$1.71 in 1999 to \$2.82 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$21,074 was received during 2000 due to the sale of equipment on one plugged and abandoned well. Abandoned property costs of \$12,161 were also incurred during 2000 to plug and abandon this well.

Total costs and expenses increased in 2000 to \$861,600 as compared to \$821,102 in 1999, an increase of \$40,498, or 5%. The increase was due to increases in production costs, general and administrative expenses ("G&A"), the impairment of oil and gas properties and abandoned property costs, offset by a decline in depletion.

Production costs were \$670,780 in 2000 and \$611,991 in 1999, resulting in an increase of \$58,789, or 10%. This increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 66% from \$31,696 in 1999 to \$52,687 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$44,975 in 2000 and \$19,909 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated

5

636

to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$13,279 related to its oil and gas properties during 2000.

Depletion was \$112,693 in 2000 as compared to \$177,415 in 1999, representing a decrease of \$64,722, or 36%. This decrease was primarily due to a 65,045 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 14% to \$1,056,533 from \$928,899 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 40,490 barrels of oil, 22,642 barrels of NGLs and 86,726 mcf of gas were sold, or 77,586 BOEs. In 1998, 47,107 barrels of oil, 23,292 barrels of NGLs and 97,715 mcf of gas were sold, or 86,685 BOEs.

The average price received per barrel of oil increased \$4.10, or 31%, from \$13.08 in 1998 to \$17.18 in 1999. The average price received per barrel of NGLs increased \$2.59, or 38%, from \$6.80 in 1998 to \$9.39 in 1999. The average price received per mcf of gas increased 8% from \$1.58 in 1998 to \$1.71 in 1999.

A gain on disposition of assets of \$6,371 was recognized during 1998 from the sale of equipment on one well plugged and abandoned during 1998. Abandoned property costs of \$20,389 were also incurred during 1998 to plug and abandon this well.

Total costs and expenses decreased in 1999 to \$821,102 as compared to \$1,755,278 in 1998, a decrease of \$934,176, or 53%. The decrease was due to declines in the impairment of oil and gas properties, depletion, production costs and abandoned property costs, offset by an increase in G&A.

Production costs were \$611,991 in 1999 and \$662,691 in 1998, resulting in a \$50,700 decrease, or 8%. This decrease was due to lower well maintenance costs and ad valorem taxes, offset by an increase in workover costs incurred to stimulate well production.

During this period, G&A increased 14% from \$27,867 in 1998 to \$31,696 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$19,909 in 1999 and \$21,984 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$509,585 related to its oil and gas properties during 1998.

6

637

Depletion was \$177,415 in 1999 compared to \$534,746 in 1998. This represented a decrease of \$357,331, or 67%. This decrease was the result of a combination of factors that included an increase in proved reserves of 343,529 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 6,617 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$561,909 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$706,708, offset by increases in production costs paid of \$58,789, G&A expenses paid of \$20,991, abandoned costs paid of \$12,161 and working capital of \$52,858. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$726,611 to oil and gas receipts, offset by \$19,903 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$23,670 was recognized during 2000. The gain was comprised of \$21,074 received from the sale of equipment on one well plugged and abandoned during the current period and \$2,596 from equipment credits received on one active well. Proceeds of \$8,980 in 1999 were from equipment credits received on active properties.

7

638

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$932,887, of which \$9,329 was distributed to the managing general partner and \$923,558 to the limited partners. In 1999, cash distributions to the partners were \$361,502, of which \$3,615 was distributed to the managing general partner and \$357,887 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 86-B, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 86-B, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 86-B, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 86-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 86-B, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements -

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the

15

646

respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$13,279 and \$509,585 related to its proved oil and gas properties during 2000 and 1998, respectively.

16

647

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$38,785 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999
	-----	-----
Net income (loss) per statements of operations	\$ 933,292	\$ 246,008
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	104,139	168,298
Impairment of oil and gas properties for financial reporting purposes	13,279	-
Intangible development costs capitalized for financial reporting purposes and expensed for tax reporting purposes	(13,305)	-
Other, net	(142)	11,789
	-----	-----
Net income per Federal income tax returns	\$ 1,037,263	\$ 426,095
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999
	-----	-----
Development costs	\$ 20,718	\$ 8,474
	=====	=====

Capitalized oil and gas properties consist of the following:

2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proved properties:	
Property acquisition costs	\$ 439,613
Completed wells and equipment	11,365,560

	11,805,173
Accumulated depletion	(10,032,733)

Net oil and gas properties	\$ 1,772,440
	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

17

648

	2000	1999
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 298,127	\$ 298,479
Reimbursement of general and administrative expenses	\$ 44,975	\$ 19,909

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)

Revenues:	
Proceeds from disposition of depreciable properties	9.09091%
All other revenues	24.242425%
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%
Operating costs, direct costs and general and administrative expenses	24.242425%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 128 limited partner interests owned by

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

18

649

	Oil and NGLs (bbls)
Net proved reserves at January 1, 1998	940,047
Revisions	(401,595)
Production	(70,399)
Net proved reserves at December 31, 1998	468,053
Revisions	550,528
Production	(63,132)
Net proved reserves at December 31, 1999	955,449
Revisions	42,519
Production	(62,337)
Net proved reserves at December 31, 2000	935,631

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.61 per barrel of NGLs and \$7.82 per mcf of gas, discounted at 10% was approximately \$7,100,000 and undiscounted was \$14,263,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----
Plains Marketing, L.P.	36%	35%
Genesis Crude Oil, L.P.	-	-
Western Gas Resources, Inc.	2%	4%
Mobil Oil Corporation	16%	15%
Texaco Trading & Transportation	4%	8%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and Mobil Oil Corporation were \$54,631 and \$21,954, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating

20

651

and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$17,208,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

21

652

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Director of Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

22

653

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Note 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 128 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 298,127	\$ 298,479

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Reimbursement of general and administrative expenses	\$ 44,975	\$ 19,909
--	-----------	-----------

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 86-C, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED _____, 2001

THE DATE OF THIS SUPPLEMENT IS _____, 2001

This document contains important information specific to Parker & Parsley 86-C, Ltd. and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 86-C, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

-- as of December 31, 2000(c)	\$
Going Concern Value per \$1,000 Limited Partner Investment(c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment(c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)	\$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2036, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 86-C, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 86-C, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 28% to \$532,204 for the three months ended March 31, 2001 from \$417,147 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by declines in production. For the three months ended March 31, 2001, 9,944 barrels of oil, 5,131 barrels of natural gas liquids ("NGLs") and 28,858 mcf of gas were sold, or 19,885 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 11,158 barrels of oil, 5,452 barrels of NGLs and 21,750 mcf of gas were sold, or 20,235 BOEs.

7

669

The average price received per barrel of oil increased \$.40, or 1%, from \$27.56 for the three months ended March 31, 2000 to \$27.96 for the same period in 2001. The average price received per barrel of NGLs increased \$4.44, or 33%, from \$13.64 for the three months ended March 31, 2000 to \$18.08 for the same period in 2001. The average price received per mcf of gas increased 245% from \$1.62 during the three months ended March 31, 2000 to \$5.59 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses decreased to \$264,354 for the three months ended March 31, 2001 as compared to \$272,626 for the same period in 2000, a decrease of \$8,272, or 3%. This decrease was primarily due to a decline in depletion, offset by increases in general and administrative expenses ("G&A") and production costs.

Production costs were \$217,165 for the three months ended March 31, 2001 and \$216,955 for the same period in 2000, an increase of \$210. This increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by lower well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 28% from \$12,514 for the three months ended March 31, 2000 to \$15,966 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$31,223 for the three months ended March 31, 2001 as compared to \$43,157 for the same period in 2000, a decrease of \$11,934, or 28%. This decrease was primarily due to positive revisions to proved reserves during the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

three months ended March 31, 2001 as a result of higher commodity prices and a decrease in oil production of 1,214 barrels for the three months ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities:

Net cash provided by operating activities increased \$136,028 for the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$115,865 in oil and gas sales receipts and a reduction in working capital of \$23,825, offset by increases in production costs of \$210 and G&A expenses of \$3,452. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$115,865 to oil and gas receipts. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by lower well maintenance costs. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

8

670

Net Cash Used in Investing Activities

The Partnership's investing activities during the three months ended March 31, 2001 and 2000 were related to upgrades of oil and gas equipment on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$311,278, of which \$3,113 was distributed to the managing general partner and \$308,165 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$162,999, of which \$1,630 was distributed to the managing general partner and \$161,369 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

673

PART I

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 1. BUSINESS

Parker & Parsley 86-C, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 19,317 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 37% and 15% were attributable to sales made to Plains Marketing, L.P. and TEPPCO Crude Oil LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 60 productive oil and gas wells. Four wells were sold and three wells were abandoned due to uneconomical operations. At December 31, 2000, 53 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 19,317 outstanding limited partnership interests held of record by 1,332 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$821,264 and \$236,960, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 75% to \$1,865,405 for 2000 as compared to \$1,067,096 in 1999. The increase in revenues resulted from higher average prices received, offset by a slight decline in production. In 2000, 41,783 barrels of oil, 24,546 barrels of natural gas liquids ("NGLs") and 95,610 mcf of gas were sold, or 82,264 barrel of oil equivalents ("BOEs"). In 1999, 37,899 barrels of oil, 26,995 barrels of NGLs and 105,081 mcf of gas were sold, or 82,408 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.25, or 71%, from \$17.18 in 1999 to \$29.43 in 2000. The average price received per barrel of NGLs increased \$5.79, or 62%, from \$9.27 in 1999 to \$15.06 in 2000. The average price received per mcf of gas increased 76% from \$1.58 in 1999 to \$2.78 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$1,051,119 as compared to \$969,444 in 1999, an increase of \$81,675, or 8%. The increase was due to increases in production costs and general and administrative ("G&A") expenses, offset by declines in depletion and the impairment of oil and gas properties.

Production costs were \$848,089 in 2000 and \$713,921 in 1999, resulting in an increase of \$134,168, or 19%. The increase was primarily due to additional well maintenance and workover costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 75% from \$32,012 in 1999 to \$55,962 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$46,688 in 2000 and \$17,953 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$26,652 related to its oil and gas properties during 1999.

Depletion was \$147,068 in 2000 compared to \$196,859 in 1999, representing a decrease of \$49,791, or 25%. This decrease was primarily due to a 158,291 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999, offset by an increase in oil production of 3,884 barrels for the period ended December 31, 2000 compared to the same period in 1999.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 10% to \$1,067,096 from \$973,632 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 37,899 barrels of oil, 26,995 barrels of NGLs and 105,081 mcf of gas were sold, or 82,408 BOEs. In 1998, 44,016 barrels of oil, 30,658 barrels of NGLs and 129,149 mcf of gas were sold, or 96,199 BOEs.

The average price received per barrel of oil increased \$3.92, or 30%, from \$13.26 in 1998 to \$17.18 in 1999. The average price received per barrel of NGL's increased \$2.81, or 43%, from \$6.46 in 1998 to \$9.27 in 1999. The average price received per mcf of gas increased 6% from \$1.49 in 1998 to \$1.58 in 1999.

Total costs and expenses decreased in 1999 to \$969,444 as compared to \$1,406,971 in 1998, a decrease of \$437,527, or 31%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$713,921 in 1999 and \$737,587 in 1998, resulting in a \$23,666 decrease, or 3%. The decrease was due to declines in well maintenance costs and ad valorem taxes.

During this period, G&A increased 10% from \$29,209 in 1998 to \$32,012 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$17,953 in 1999 and \$21,776 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$26,652 and \$277,277 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion was \$196,859 in 1999 compared to \$362,898 in 1998. This represented a decrease of \$166,039, or 46%. This decrease was primarily due to an increase in proved reserves of 291,530 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of

1998 and a decline in oil production of 6,117 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$596,449 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$804,637, offset by increases in production costs paid of \$134,168, G&A expenses paid of \$23,950 and working capital of \$50,070. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$753,537 to oil and gas receipts and an increase of \$51,100 resulting from the increase in oil production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from asset dispositions of \$847 were recognized during 1999 from equipment credits received on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$829,560, of which \$8,296 was distributed to the managing general partner and \$821,264 to the limited partners. In 1999, cash distributions to the partners were \$239,353, of which \$2,393 was distributed to the managing general partner and \$236,960 to the

limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 86-C, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 86-C, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 86-C, Ltd. as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 86-C, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 86-C, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions \$26,652 and \$277,277 related to its proved oil and gas properties during 1999 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$533,255 less than the tax basis at December 31, 2000.

15

687

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

2000	1999	1998
-----	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income (loss) per statements of operations	\$ 828,383	\$ 105,421	\$ (423,942)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	132,379	182,068	348,153
Impairment of oil and gas properties for financial reporting purposes	-	26,652	277,277
Salvage income	-	-	431
Other, net	(2,097)	(2,839)	4,014
	-----	-----	-----
Net income per Federal income tax returns	\$ 958,665	\$ 311,302	\$ 205,933
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 16,090	\$ 13,291	\$ 19,770
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 645,990	\$ 645,990
Completed wells and equipment	13,952,150	13,936,060
	-----	-----
Accumulated depletion	14,598,140	14,582,050
	(13,107,930)	(12,960,862)
	-----	-----
Net oil and gas properties	\$ 1,490,210	\$ 1,621,188
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 373,973	\$ 354,129	\$ 348,965
Reimbursement of general and administrative expenses	\$ 46,688	\$ 17,953	\$ 21,776

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1) -----	Partnership -----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 60 limited partner interests owned by Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	831,525	1,374,642
Revisions	(383,916)	(502,202)
Production	(74,674)	(129,149)
	-----	-----
Net proved reserves at December 31, 1998	372,935	743,291
Revisions	507,962	924,982
Production	(64,894)	(105,081)
	-----	-----
Net proved reserves at December 31, 1999	816,003	1,563,192
Revisions	148,591	(208,305)
Production	(66,329)	(95,610)
	-----	-----
Net proved reserves at December 31, 2000	898,265	1,259,277
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.39 per barrel of NGLs and \$7.64 per mcf of gas, discounted at 10% was approximately \$6,568,000 and undiscounted was \$12,019,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31		
	2000	1999	1998
	(in thousands)		
Oil and gas producing activities:			
Future cash inflows	\$ 29,187	\$ 20,004	\$ 4,140

Balance, end of year	\$ 6,568	\$ 4,140	\$ 1,891

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	37%	36%	-
TEPPCO Crude Oil LLC	15%	14%	-
Genesis Crude Oil, L.P.	-	-	50%
Western Gas Resources Inc.	5%	7%	31%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and TEPPCO Crude Oil LLP were \$72,179 and \$15,378, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The general partner of the Partnership is Pioneer USA. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

19

691

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$19,317,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

693

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

694

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 60 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$373,973	\$ 354,129	\$348,965
Reimbursement of general and administrative expenses	\$ 46,688	\$ 17,953	\$ 21,776

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY PRIVATE INVESTMENT 86, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Private Investment 86, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Investment 86, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001(a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment(b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001(c)	\$
-- as of December 31, 2000(c)	\$

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Going Concern Value per \$1,000 Limited Partner Investment (c), (d) \$

Liquidation Value per \$1,000 Limited Partner Investment (c), (e) \$

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f) \$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2036, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Private Investment 86, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 14% to \$159,338 for the three months ended March 31, 2001 as compared to \$139,554 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 3,129 barrels of oil, 1,034 barrels of natural gas liquids ("NGLs") and 8,951 mcf of gas were sold, or 5,655 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 3,720 barrels of oil, 1,704 barrels of NGLs and 7,936 mcf of gas were sold, or 6,747 BOEs.

6

708

The average price received per barrel of oil increased \$1.00, or 4%, from \$27.55 for the three months ended March 31, 2000 to \$28.55 for the same period in 2001. The average price received per barrel of NGLs increased \$4.99, or 37%, from \$13.33 for the three months ended March 31, 2000 to \$18.32 for the same period in 2001. The average price received per mcf of gas increased 215% from \$1.81 during the three months ended March 31, 2000 to \$5.70 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses decreased to \$81,294 for the three months ended March 31, 2001 as compared to \$90,317 for the same period in 2000, a decrease of \$9,023, or 10%. This decrease was due to declines in production costs and depletion, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$65,449 for the three months ended March 31, 2001 and \$72,738 for the same period in 2000 resulting in a \$7,289 decrease, or 10%. The decrease was primarily due to a decrease in well maintenance costs, offset by higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 14% from \$2,791 for the three months ended March 31, 2000 to \$3,187

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$12,658 for the three months ended March 31, 2001 compared to \$14,788 for the same period in 2000, a decrease of \$2,130, or 14%. This decrease was primarily due to a decline in oil production of 591 barrels for the period ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$53,010 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to increases in oil and gas sales receipts of \$19,933 and reductions in working capital of \$26,184 and production costs of \$7,289, offset by an increase G&A expenses of \$396. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$43,293 to oil and gas receipts, offset by \$23,360 resulting from the decline in production during 2001 as compared to the same period in 2000. The decrease in production costs was primarily due to a decrease in well maintenance

7

709

costs, offset by higher production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$112,671, of which \$1,127 was distributed to the managing general partner and \$111,544 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$69,912, of which \$699 was distributed to the managing general partner and \$69,213 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

711

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley Private Investment 86, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley Private Investment 86, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Private Investment 86, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in the United States.

6

716

PARKER & PARSLEY PRIVATE INVESTMENT 86, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Private Investment 86, Ltd. (the "Partnership") is a limited partnership organized in 1986 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

717

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$98,274 related to its proved oil and gas properties during 1998.

8

718

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$209,861 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	
	-----	-----
Net income (loss) per statements of operations	\$ 267,800	\$
Depletion and depreciation provisions for tax reporting less than amounts for financial reporting purposes	43,051	
Impairment of oil and gas properties for financial reporting purposes	-	
Other, net	(688)	
	-----	-----
Net income per Federal income tax returns	\$ 310,163	\$
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Development costs	\$ 10,643	\$
	=====	=====

Capitalized oil and gas properties consist of the following:

Proved properties:		
Property acquisition costs		\$
Completed wells and equipment		---
Accumulated depletion		---
Net oil and gas properties		\$
		=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 113,494	\$
Reimbursement of general and administrative expenses	\$ 10,107	\$

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

Revenues:

Pioneer U

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proceeds from disposition of depreciable properties	9.09
All other revenues	24.24
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.09
Operating costs, direct costs and general and administrative expenses	24.24

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)
Net proved reserves at January 1, 1998	268,312
Revisions	(79,340)
Production	(22,245)
Net proved reserves at December 31, 1998	166,727
Revisions	157,207
Production	(20,843)
Net proved reserves at December 31, 1999	303,091
Revisions	35,219
Production	(20,938)
Net proved reserves at December 31, 2000	317,372

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.44 per barrel of NGLs and \$7.89 per mcf of gas, discounted at 10% was approximately \$2,493,000 and undiscounted \$4,970,000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years e	
	2000	
Oil and gas producing activities:		
Future cash inflows	\$ 10,955	\$

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000

Plains Marketing, L.P.	45%
Mobil Oil Corporation	19%
Genesis Crude Oil, L.P.	-
Western Gas Resources, Inc.	3%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and Mobil Oil Corporation were \$23,848 and \$10,948, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$4,920,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs

12

722

allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

13

723

PARKER & PARSLEY PRIVATE INVESTMENT 86, LTD.
(A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 73% to \$611,774 for 2000 as compared to \$354,462 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 13,860 barrels of oil, 7,078 barrels of natural gas liquids ("NGLs") and 33,570 mcf of gas were sold, or 26,533 barrel of oil equivalents ("BOEs"). In 1999, 13,331 barrels of oil, 7,512 barrels of NGLs and 30,923 mcf of gas were sold, or 25,997 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.11, or 70%, from

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$17.34 in 1999 to \$29.45 in 2000. The average price received per barrel of NGLs increased \$5.74, or 62%, from \$9.27 in 1999 to \$15.01 in 2000. The average price received per mcf of gas increased 68% from \$1.73 in 1999 to \$2.90 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$348,901 as compared to \$308,958 in 1999, an increase of \$39,943, or 13%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$287,563 in 2000 and \$236,129 in 1999, resulting in a \$51,434 increase, or 22%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 73% from \$7,089 in 1999 to \$12,235 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$10,107 in 2000 and \$3,583 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$49,103 in 2000 as compared to \$65,740 in 1999, representing a decrease of \$16,637, or 25%. This decrease was primarily due to a 34,384 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 18% to \$354,462 from \$301,556 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 13,331 barrels of oil, 7,512 barrels of NGLs and 30,923 mcf of gas were sold, or 25,997 BOEs. In 1998, 14,914 barrels of oil, 7,331 barrels of NGLs and 33,219 mcf of gas were sold, or 27,782 BOEs.

724

The average price received per barrel of oil increased \$4.00, or 30%, from \$13.34 in 1998 to \$17.34 in 1999. The average price received per barrel of NGLs increased \$2.58, or 39%, from \$6.69 in 1998 to \$9.27 in 1999. The average price received per mcf of gas increased 7% from \$1.61 in 1998 to \$1.73 in 1999.

Total costs and expenses decreased in 1999 to \$308,958 as compared to \$469,189 in 1998, a decrease of \$160,231, or 34%. The decrease was primarily due to declines in the impairment of oil and gas properties and depletion, offset by increases in production costs and G&A.

Production costs were \$236,129 in 1999 and \$213,042 in 1998, resulting in a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$23,087 increase, or 11%. The increase was due to increased workover costs and well maintenance costs incurred to stimulate well production, offset by a decrease in ad valorem taxes.

During this period, G&A increased 18% from \$6,031 in 1998 to \$7,089 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$3,583 in 1999 and \$4,004 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$98,274 related to its oil and gas properties during 1998.

Depletion was \$65,740 in 1999 compared to \$151,842 in 1998, representing a decrease of \$86,102, or 57%. This decrease was the result of a combination of factors that included an increase in proved reserves of 97,690 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,583 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum Industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$170,228 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$259,542, offset by increases in production costs paid of \$51,434, G&A expenses paid of \$5,146 and working capital of \$32,734. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$242,798 to oil and gas receipts and an increase of \$16,744 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

percentage of the managing general partner's G&A being allocated (limited to 2% of oil and gas revenues) as a result of increased oil and gas revenues.

725

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on various oil and gas properties.

Proceeds from asset dispositions in 1999 of \$701 were from equipment credits received on two wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$276,142, of which \$2,761 was distributed to the managing general partner and \$273,381 to the limited partners. In 1999, cash distributions to the partners were \$68,473, of which \$685 was distributed to the managing general partner and \$67,788 to the limited partners.

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

87-A Conv., Ltd. and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 87-A Conv., Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001(a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment(b), (c)	\$

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

administrative expenses.

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

734

PARKER & PARSLEY 87-A CONV., LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 87-A Conv., Ltd. (the "Partnership") was organized in 1987 as a general partnership under the laws of the State of Texas and was converted to a Texas limited partnership in 1989.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 20% to \$103,709 for the three months ended March 31, 2001 as compared to \$86,783 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 1,910 barrels of oil, 1,022 barrels of natural gas liquids ("NGLs") and 5,718 mcf of gas were sold, or 3,885 barrel of oil equivalents ("BOEs"). For the three months

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ended March 31, 2000, 2,186 barrels of oil, 1,182 barrels of NGLs and 5,425 mcf of gas were sold, or 4,272 BOEs.

6

735

The average price received per barrel of oil increased \$.66, or 2%, from \$27.18 for the three months ended March 31, 2000 to \$27.84 for the same period in 2001. The average price received per barrel of NGLs increased \$3.50, or 23%, from \$15.12 for the three months ended March 31, 2000 to \$18.62 for the same period in 2001. The average price received per mcf of gas increased 215% from \$1.75 during the three months ended March 31, 2000 to \$5.51 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gains on disposition of assets of \$321 and \$784 were due to equipment credits received on one well during the three months ended March 31, 2001 and 2000, respectively.

Costs and Expenses:

Total costs and expenses increased to \$51,002 for the three months ended March 31, 2001 as compared to \$45,067 for the same period in 2000, an increase of \$5,935, or 13%. This increase was due to increases in depletion, production costs and general and administrative expenses ("G&A").

Production costs were \$38,017 for the three months ended March 31, 2001 and \$35,526 for the same period in 2000 resulting in a \$2,491 increase, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 20% from \$2,603 for the three months ended March 31, 2000 to \$3,111 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$9,894 for the three months ended March 31, 2001 compared to \$6,938 for the same period in 2000, an increase of \$2,956, or 43%. This increase was primarily due to a downward revision to one well's proved reserves, offset by a decline in oil production of 276 barrels during the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$16,209 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was primarily attributable to an increase of \$16,962 in oil and gas sales receipts and a reduction in working capital of \$2,246, offset by increases in production costs of \$2,491 and G&A expenses of \$508. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$26,008 to oil and gas receipts, offset by \$9,046

resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Provided by Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's principle investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from asset dispositions of \$637 and \$1,016 received during the three months ended March 31, 2001 and 2000, respectively, were comprised of \$321 and \$784, respectively, received from the salvage of equipment on one fully depleted well and \$316 and \$232, respectively, from equipment salvage on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$65,670, of which \$657 was distributed to the managing general partner and \$65,013 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$45,111, of which \$451 was distributed to the managing general partner and \$44,660 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 87-A Conv., Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 87-A Conv., Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 87-A Conv., Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 87-A CONV., LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 87-A Conv., Ltd. (the "Partnership") was organized in 1987 as a general partnership under the laws of the State of Texas and was converted to a Texas limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

7

744

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future

8

745

cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$5,726 and \$63,814 related to its proved oil and gas properties during 2000 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$34,055 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 193,583	\$ 68,399	\$ (98,562)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	21,481	31,994	77,835
Impairment of oil and gas properties for financial reporting purposes	5,726	--	63,814
Salvage income	--	--	1,795
Other, net	(320)	(923)	1,074
	-----	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income per Federal income tax returns	\$ 220,470	\$ 99,470	\$ 45,956
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 2,560	\$ 5,634	\$ 2,338
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	----	----
Proved properties:		
Property acquisition costs	\$ 126,683	\$ 126,683
Completed wells and equipment	2,576,655	2,574,578
	-----	-----
	2,703,338	2,701,261
Accumulated depletion	(2,357,166)	(2,326,550)
	-----	-----
Net oil and gas properties	\$ 346,172	\$ 374,711
	=====	=====

9

746

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 57,269	\$ 58,965	\$ 59,200

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Reimbursement of general and administrative expenses	\$ 9,809	\$ 4,592	\$ 4,507
--	----------	----------	----------

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 87-A, Ltd. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 35 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 87-A, Ltd. is 11.80396% and 88.19604%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

747

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	173,242	260,824
Revisions	(70,303)	(79,797)
Production	(14,371)	(24,025)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----
Net proved reserves at December 31, 1998	88,568	157,002
Revisions	121,459	218,318
Production	(13,578)	(24,503)
	-----	-----
Net proved reserves at December 31, 1999	196,449	350,817
Revisions	(1,562)	(40,268)
Production	(13,096)	(20,355)
	-----	-----
Net proved reserves at December 31, 2000	181,791	290,194
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.38 per barrel of NGLs and \$7.67 per mcf of gas, discounted at 10% was approximately \$1,465,000 and undiscounted was \$2,903,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

For the years ended December 31,

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
Plains Marketing, L.P.	43%	40%	--
Phillips Petroleum Company	10%	--	--
Genesis Crude Oil, L.P.	--	--	54%
Western Gas Resources, Inc.	4%	7%	29%
NGTS LLC	8%	--	--

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and Phillips Petroleum Company were \$16,353 and \$3,196, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

12

749

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$3,856,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 63% to \$380,908 for 2000 as compared to \$234,259 in 1999. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 2000, 8,407 barrels of oil, 4,689 barrels of natural gas liquids ("NGLs") and 20,355 mcf of gas were sold, or 16,489 barrel of oil equivalents ("BOEs"). In 1999, 8,263 barrels of oil, 5,315 barrels of NGLs and 24,503 mcf of gas were sold, or 17,662 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.40, or 73%, from \$17.06 in 1999 to \$29.46 in 2000. The average price received per barrel of NGLs increased \$6.20, or 63%, from \$9.81 in 1999 to \$16.01 in 2000. The average price received per mcf of gas increased 70% from \$1.68 in 1999 to \$2.86 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$191,926 as compared to \$169,175 in 1999, an increase of \$22,751, or 13%. The increase was primarily due to increases in production costs, impairment of oil and gas properties and general and administrative expenses ("G&A"), offset by a decline in depletion.

Gains on disposition of assets of \$857 and \$1,184 were due to equipment credits received on one well during 2000 and 1999, respectively.

Production costs were \$150,075 in 2000 and \$126,927 in 1999, resulting in a \$23,148 increase, or 18%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 61% from \$6,978 in 1999 to \$11,235 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$9,809 in 2000 and \$4,592 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$5,726 related to its oil and gas properties during 2000.

751

Depletion was \$24,890 in 2000 as compared to \$35,270 in 1999, representing a decrease of \$10,380, or 29%. This decrease was primarily due to an 8,116 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 20% to \$234,259 from \$194,541 in 1998. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 1999, 8,263 barrels of oil, 5,315 barrels of NGLs and 24,503 mcf of gas were sold, or 17,662 BOEs. In 1998, 9,354 barrels of oil, 5,017 barrels of NGLs and 24,025 mcf of gas were sold, or 18,375 BOEs.

The average price received per barrel of oil increased \$3.84, or 29%, from \$13.22 in 1998 to \$17.06 in 1999. The average price received per barrel of NGLs increased \$3.05, or 45%, from \$6.76 in 1998 to \$9.81 in 1999. The average price received per mcf of gas increased 9% from \$1.54 in 1998 to \$1.68 in 1999.

Total costs and expenses decreased in 1999 to \$169,175 as compared to \$295,804 in 1998, a decrease of \$126,629, or 43%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$126,927 in 1999 and \$143,008 in 1998, resulting in a \$16,081 decrease, or 11%. The decrease was due to declines in well maintenance costs, workover expenses and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 22% from \$5,727 in 1998 to \$6,978 in 1999 primarily due to a higher allocation of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$4,592 in 1999 and \$4,507 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$63,814 related to its oil and gas properties during 1998.

Depletion was \$35,270 in 1999 compared to \$83,255 in 1998, representing a decrease of \$47,985, or 58%. This decrease was primarily due to an increase in proved reserves of 71,246 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,091 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

752

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$107,462 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$148,262, offset by increases in production costs paid of \$23,148, G&A expenses paid of \$4,257 and working capital of \$13,395. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$165,908 to oil and gas receipts, offset by \$17,646 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and workover and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to upgrades of equipment on active properties.

Proceeds from asset dispositions of \$1,340 and \$1,238 received during 2000 and 1999, respectively, were primarily due to equipment credits received on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$208,425, of which \$2,084 was distributed to the managing general partner and \$206,341 to the limited partners. In 1999, cash distributions to the partners were \$70,098, of which \$701 was distributed to the managing general partner and \$69,397 to the limited partners.

753

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

SELECTED FINANCIAL DATA

The following selected financial data for the Partnership should be read in connection with Management's Discussion and Analysis of Financial Condition and Results of Operations and the financial statements included in the attached supplemental information.

	Three months ended March 31,		Years ended December 31		
	2001	2000	2000	1999	1998
Operating results:					
Oil and gas sales	\$	\$ 86,783	\$ 380,908	\$ 234,259	\$ 194,541
Impairment of oil and gas properties	\$	\$ --	\$ 5,726	\$ --	\$ 63,814
Gain on litigation settlement, net	\$	\$ --	\$ --	\$ --	\$ --
Net income (loss)	\$	\$ 43,193	\$ 193,583	\$ 68,399	\$ (98,562)
Allocation of net income (loss):

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 87-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED _____, 2001

THE DATE OF THIS SUPPLEMENT IS _____, 2001

This document contains important information specific to Parker & Parsley 87-A, Ltd. and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 87-A, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

-
- (a) Stated in thousands.
 - (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
 - (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
 - (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
 - (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
 - (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 87-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 87-A, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition
and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 19% to \$774,832 for the three months ended March 31, 2001 as compared to \$648,941 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by declines in production. For the three months ended March 31, 2001, 14,267 barrels of oil, 7,635 barrels of natural gas liquids ("NGLs") and 42,755 mcf of gas were sold, or 29,028 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 16,334 barrels of oil, 8,851 barrels of NGLs and 40,626 mcf of gas were sold, or 31,956 BOEs.

The average price received per barrel of oil increased \$.66, or 2%, from \$27.18 for the three months ended March 31, 2000 to \$27.84 for the same period in 2001. The average price received per barrel of NGLs increased \$3.50, or 23%, from \$15.12 for the three months ended March 31, 2000 to \$18.62 for the same period in 2001. The average price received per mcf of gas increased 215% from \$1.75 during the three months ended March 31, 2000 to \$5.51 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gains on disposition of assets of \$2,399 and \$5,861 were due to equipment credits received on one well during the three months ended March 31, 2001 and 2000, respectively.

Costs and Expenses:

Total costs and expenses increased to \$381,609 for the three months ended March 31, 2001 as compared to \$336,920 for the same period ended March 31, 2000, an increase of \$44,689, or 13%. This increase was due to increases in depletion, production costs and general and administrative expenses ("G&A").

Production costs were \$284,079 for the three months ended March 31, 2001 and \$265,708 for the same period in 2000, resulting in an increase of \$18,371, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 19% from \$19,468 for the three months ended March 31, 2000 to \$23,245 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$74,285 for the three months ended March 31, 2001 as compared to \$51,744 for the same period in 2000, an increase of \$22,541, or 44%. The increase was primarily due to a downward revision to one well's proved reserves, offset by a decline in oil production of 2,067 barrels during the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities:

Net cash provided by operating activities increased \$121,047 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$126,127 in oil and gas sales receipts and a reduction in working capital of \$17,068, offset by increases in production costs of \$18,371 and G&A expenses of \$3,777. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$194,581 to oil and gas receipts, offset by \$68,454 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

764

production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Provided by Investing Activities:

The Partnership's principle investing activities during the three months ended March 31, 2001 and 2000 were related to the upgrades of oil and gas equipment on active properties.

Proceeds from asset dispositions of \$4,757 and \$7,591 received during the three months ended March 31, 2001 and 2000, respectively, were comprised of \$2,399 and \$5,861, respectively, received from the salvage of equipment on one fully depleted well and \$2,358 and \$1,730, respectively, from equipment salvage on active properties.

Net Cash Used in Financing Activities:

For the three months ended March 31, 2001, cash distributions to the partners were \$490,720, of which \$4,907 was distributed to the managing general partner and \$485,813 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$337,058, of which \$3,371 was distributed to the managing general partner and \$333,687 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. / X /

No market currently exists for the limited partnership interests of the Registrant. Based on the original purchase price, the aggregate market value of limited partnership interests owned by non-affiliates of the Registrant is \$28,636,000.

As of March 8, 2001, the number of outstanding limited partnership interests was 28,811.

The following documents are incorporated by reference into the indicated parts of this Annual Report on Form 10-K: None

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

768

PART I

ITEM 1. BUSINESS

Parker & Parsley 87-A, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 28,811 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000, approximately 43% and 11% was attributable to sales made to Plains Marketing, L.P. and NGTS LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 96 oil and gas wells. Two wells were dry holes. Six uneconomical wells were plugged and abandoned and 15 oil and gas wells have been sold. At December 31, 2000, 73 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 28,811 outstanding limited partnership interests held of record by 2,148 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$1,541,726 and \$518,518, respectively, were made to the limited partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000 -----	1999 -----	1998 -----	1997 -----	1996 -----
Operating results:					
Oil and gas sales	\$ 2,845,556 =====	\$ 1,750,425 =====	\$ 1,453,492 =====	\$ 2,232,898 =====	\$ 2,620,000 =====
Gain on litigation settlement, net	\$ - =====	\$ - =====	\$ - =====	\$ - =====	\$ 84,000 =====
Impairment of oil and gas properties	\$ 42,807 =====	\$ - =====	\$ 477,501 =====	\$ 732,890 =====	\$ 34,000 =====
Net income (loss)	\$ 1,444,249 =====	\$ 511,237 =====	\$ (736,103) =====	\$ (49,528) =====	\$ 1,800,000 =====
Allocation of net income (loss):					
Managing general partner	\$ 14,442 =====	\$ 5,112 =====	\$ (7,361) =====	\$ (495) =====	\$ 1,000 =====
Limited partners	\$ 1,429,807 =====	\$ 506,125 =====	\$ (728,742) =====	\$ (49,033) =====	\$ 1,799,000 =====
Limited partners' net income (loss) per limited partnership interest	\$ 49.63 =====	\$ 17.57 =====	\$ (25.29) =====	\$ (1.70) =====	\$ 1.00 =====
Limited partners' cash distributions per limited partnership interest	\$ 53.51 =====	\$ 18.00 =====	\$ 19.54 =====	\$ 42.52 =====	\$ 0.00 =====
At year end:					
Identifiable assets	\$ 3,343,783 =====	\$ 3,464,619 =====	\$ 3,466,459 =====	\$ 4,793,102 =====	\$ 6,170,000 =====

(a) Including litigation settlement per limited partnership interest of \$29.15 in 1996.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 63% to \$2,845,556 for 2000 as compared to \$1,750,425 in 1999. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 2000, 62,796 barrels of oil, 35,028 barrels of natural gas liquids ("NGLs") and 152,075 mcf of gas were sold, or 123,170 barrel of oil equivalents ("BOEs"). In 1999, 61,734 barrels of oil, 39,707 barrels of NGLs and 183,099 mcf of gas were sold, or 131,958 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.40, or 73%, from \$17.06 in 1999 to \$29.46 in 2000. The average price received per barrel of NGLs increased \$6.20, or 63%, from \$9.81 in 1999 to \$16.01 in 2000. The average price received per mcf of gas increased 70% from \$1.68 in 1999 to \$2.86 in 2000. The market price received for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gains on disposition of assets of \$6,407 and \$8,848 were due to equipment credits received on one well during 2000 and 1999, respectively.

Total costs and expenses increased in 2000 to \$1,435,888 compared to \$1,264,233 in 1999, an increase of \$171,655, or 14%. The increase resulted from increases in production costs, the impairment of oil and gas properties and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$1,121,487 in 2000 and \$948,362 in 1999, resulting in an increase of \$173,125, or 18%. This increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 63% from \$52,563 in 1999 to \$85,559 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$73,296 in 2000 and \$34,349 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

"Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$42,807 related to its oil and gas properties during 2000.

Depletion was \$186,035 in 2000 as compared to \$263,308 in 1999, representing a decrease of \$77,273, or 29%. This decrease was primarily due to a 45,228 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 20% to \$1,750,425 from \$1,453,492 in 1998. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 1999, 61,734 barrels of oil, 39,707 barrels of NGLs and 183,099 mcf of gas were sold, or 131,958 BOEs. In 1998, 69,905 barrels of oil, 37,470 barrels of NGLs and 179,494 mcf of gas were sold, or 137,291 BOEs.

The average price received per barrel of oil increased \$3.84, or 29%, from \$13.22 in 1998 to \$17.06 in 1999. The average price received per barrel of NGLs increased \$3.05, or 45%, from \$6.76 in 1998 to \$9.81 in 1999. The average price received per mcf of gas increased 9% from \$1.54 in 1998 to \$1.68 in 1999.

A gain on disposition of assets of \$8,848 was recognized during 1999 from equipment credits received on one fully depleted well. During 1998, a gain on disposition of assets of \$765 was received from the sale of equipment on one saltwater disposal well plugged and abandoned in a prior year.

Total costs and expenses decreased in 1999 to \$1,264,233 compared to \$2,210,330 in 1998, a decrease of \$946,097, or 43%. The decrease resulted from declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$948,362 in 1999 and \$1,068,450 in 1998, resulting in a \$120,088 decrease, or 11%. This decrease was primarily attributable to reductions in well maintenance costs, workover expenses and ad valorem taxes, offset by an increase in production taxes due to increased in oil and gas revenues.

During this period, G&A increased, in aggregate, 23% from \$42,787 in 1998 to \$52,563 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$34,349 in 1999 and \$33,674 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$477,501 related to its oil and gas properties during 1998.

Depletion was \$263,308 in 1999 compared to \$621,592 in 1998. This represented a decrease of \$358,284, or 58%. This decrease was the result of a combination of factors that included an increase in proved reserves of 532,499 barrels of oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 8,171 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$934,385 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$1,107,108 and a decline in working capital of \$33,398, offset by increases in production costs paid of \$173,125 and G&A expenses paid of \$32,996. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$1,239,482 to oil and gas receipts, offset by \$132,374 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to the upgrades of oil and gas equipment on active properties.

Proceeds from asset dispositions of \$10,011 and \$9,249 received during 2000 and 1999, respectively, were from equipment credits on one well in each year.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$1,557,299, of which \$15,573 was distributed to the managing general partner and \$1,541,726 to the limited

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partners. In 1999, cash distributions to the partners were \$523,756, of which \$5,238 was distributed to the managing general partner and \$518,518 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 87-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 87-A, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 87-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

(A Texas Limited Partnership)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTES TO FINANCIAL STATEMENTS December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 87-A, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$42,807 and \$477,501 related to its proved oil and gas properties during 2000 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$254,091 less than the tax basis at December 31, 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 1,444,249	\$ 511,237	\$ (736,103)
Intangible development costs capitalized for financial reporting purposes and expensed for tax reporting purposes	--	--	(6)
Depletion and depreciation provisions for tax reporting purposes less than amount for financial reporting purposes	162,602	238,819	584,799
Impairment of oil and gas properties for financial reporting purposes	42,807	--	477,501
Salvage income	1,288	--	13,408
Other, net	(3,728)	(5,120)	6,254
	-----	-----	-----
Net income per Federal income tax returns	\$ 1,647,218 =====	\$ 744,936 =====	\$ 345,853 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 19,125 =====	\$ 42,098 =====	\$ 17,466 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 946,545	\$ 946,545
Completed wells and equipment	19,252,084	19,236,563
	-----	-----
	20,198,629	20,183,108

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Accumulated depletion	(17,611,694)	(17,382,852)
	-----	-----
Net oil and gas properties	\$ 2,586,935	\$ 2,800,256
	=====	=====

17

784

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 428,017	\$ 440,563	\$ 442,313
Reimbursement of general and administrative expenses	\$ 73,296	\$ 34,349	\$ 33,674

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA, Parker & Parsley 87-A Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
	-----	-----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

at the Partnership level and 175 limited partner interests owned by Pioneer USA.

- (2) The allocation between the Partnership and Parker & Parsley 87-A Conv., L.P. is 88.19604% and 11.80396%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

18

785

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	1,294,911	1,949,548
Revisions	(525,530)	(596,528)
Production	(107,375)	(179,494)
	-----	-----
Net proved reserves at December 31, 1998	662,006	1,173,526
Revisions	907,814	1,631,783
Production	(101,441)	(183,099)
	-----	-----
Net proved reserves at December 31, 1999	1,468,379	2,622,210
Revisions	(35,573)	(336,529)
Production	(97,824)	(152,075)
	-----	-----
Net proved reserves at December 31, 2000	1,334,982	2,133,606
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.83 per barrel of NGLs and \$7.67 per mcf of gas, discounted at 10% was approximately \$10,856,000 and undiscounted was \$21,368,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	43%	39%	-
Genesis Crude Oil, L.P.	-	-	54%
Western Gas Resources, Inc.	3%	7%	29%
NGTS LLC	11%	9%	1%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and NGTS LLC were \$122,179 and \$4,335, respectively, which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The general partner of the Partnership is Pioneer USA. Pioneer USA, the managing general partner, has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement,

20

787

the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$28,811,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

21

788

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

22

789

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA, Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

790

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 175 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

24

791

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 428,017	\$ 440,563	\$ 442,313
Reimbursement of general and administrative expenses	\$ 73,296	\$ 34,349	\$ 33,674

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules.

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this Report to be signed on its behalf by the undersigned, thereunto duly authorized.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 87-B, CONV., LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

This document contains important information specific to Parker & Parsley 87-B Conv., Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 87-B Conv., Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 87-B CONV., LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001(c)

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 87-B CONV., LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 87-B Conv., Ltd. (the "Partnership") was organized in 1987 as a general partnership under the laws of the State of Texas and was converted to a Texas limited partnership in 1989.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues decreased 2% to \$109,348 for the three months ended March 31, 2001 as compared to \$111,198 for the same period in 2000. The decrease in revenues resulted from a decrease in production, offset by higher average prices received. For the three months ended March 31, 2001, 2,438 barrels of oil, 729 barrels of natural gas liquids ("NGLs") and 4,549 mcf of gas were sold, or 3,925 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,793 barrels of oil, 1,487 barrels of NGLs and 6,437 mcf of gas were sold, or 5,353 BOEs.

The average price received per barrel of oil decreased slightly from \$27.69 for the three months ended March 31, 2000 to \$27.55 for the same period in 2001. The average price received per barrel of NGLs increased \$3.74, or 25%, from \$15.18

6

804

for the three months ended March 31, 2000 to \$18.92 for the same period in 2001. The average price received per mcf of gas increased 257% from \$1.75 during the three months ended March 31, 2000 to \$6.24 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$4,013 was received during the three months ended March 31, 2001 of which \$3,637 was from disposal of equipment on one well plugged and abandoned during the current period and \$376 was from equipment credits received on one fully depleted well. Expenses to plug and abandon this well were \$3,413. For the three months ended March 31, 2000, \$919 was recognized due to credits received from the disposal of oil and gas equipment on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$71,228 for the three months ended March 31, 2001 as compared to \$52,653 for the same period in 2000, an increase of \$18,575, or 35%. This increase was due to increases in depletion, production costs and abandoned property costs, offset by a decline in general and administrative expenses ("G&A").

Production costs were \$46,813 for the three months ended March 31, 2001 and \$39,867 for the same period in 2000 resulting in a \$6,946 increase, or 17%. This increase was primarily due to additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A decreased 15% from \$3,336 for the three months ended March 31, 2000 to \$2,843 for the same period in 2001. The decline was due to less G&A being allocated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(limited to 3% of oil and gas revenues) due to lower oil and gas revenues for the three months ended March 31, 2001 as compared to the same period in 2000, offset by an increase in the accrual for tax preparation fees.

Depletion was \$18,159 for the three months ended March 31, 2001 compared to \$9,450 for the same period in 2000, an increase of \$8,709, or 92%. This increase was primarily due to a downward revision to proved reserves on one well, offset by a decline in oil production of 355 barrels during the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$25,743 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to reductions of \$37,192 in working capital and \$493 in G&A expenses, offset by a decline in oil and gas sales receipts of \$1,583 and increases in production costs of \$6,946 and abandoned property costs of \$3,413. The G&A decline was primarily due to less G&A being allocated (limited to 3% of

7

805

oil and gas revenues) due to less oil and gas revenues during the three months ended March 31, 2001 as compared to the same period in 2000, offset by an increase in the accrual of tax preparation fees. The increase in production costs was primarily due to increased well maintenance costs incurred to stimulate well production. The decline in oil and gas receipts resulted from a decline in production of \$34,583, offset by \$36,166 resulting from higher average prices received. The increase in abandoned property costs was due to the plugging and abandonment of one uneconomical well.

Net Cash Provided by (Used in) Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's principle investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from salvage income of \$376 and \$919 were recognized during the three months ended March 31, 2001 and 2000, respectively, on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$85,129, of which \$851 was distributed to the managing general partner and \$84,278 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$50,010, of which \$500 was distributed to the managing general partner and \$49,510 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 87-B Conv., Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 87-B Conv., Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 87-B Conv., Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

The accompanying notes are an integral part of these financial statements.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 87-B Conv., Ltd. (the "Partnership") was organized in 1987 as a general partnership under the laws of the State of Texas and was converted to a Texas limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$21,231 and \$48,745 related to its proved oil and gas properties during 2000 and 1998, respectively.

8

814

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$63,837 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 231,785	\$ 68,410	\$ (81,182)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	33,614	47,165	116,988
Impairment of oil and gas properties for financial reporting purposes	21,231	--	48,745
Other, net	(643)	(5,995)	(1,248)
	-----	-----	-----
Net income per Federal income tax returns	\$ 285,987 =====	\$ 109,580 =====	\$ 83,303 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 2,609 =====	\$ 4,857 =====	\$ 5,631 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 135,396	\$ 135,396
Completed wells and equipment	3,144,754	3,142,199
	-----	-----
Accumulated depletion	3,280,150 (2,733,516)	3,277,595 (2,675,751)
	-----	-----
Net oil and gas properties	\$ 546,634 =====	\$ 601,844 =====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$74,535	\$73,744	\$71,600
Reimbursement of general and administrative expenses	\$12,385	\$ 5,720	\$ 5,800

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 87-B, Ltd. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 10 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 87-B, Ltd. is 19.66971% and 80.33029%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	230,505	316,120
Revisions	(76,948)	(70,310)
Production	(17,879)	(25,477)
	-----	-----
Net proved reserves at December 31, 1998	135,678	220,333
Revisions	155,187	272,717
Production	(16,758)	(24,436)
	-----	-----
Net proved reserves at December 31, 1999	274,107	468,614
Revisions	(9,351)	(76,076)
Production	(16,015)	(23,682)
	-----	-----
Net proved reserves at December 31, 2000	248,741	368,856
	=====	=====

10

816

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.26 per barrel of NGLs and \$7.62 per mcf of gas, discounted at 10% was approximately \$1,851,000 and undiscounted was \$3,947,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	49%	50%	-
Genesis Crude Oil, L.P.	2%	1%	57%
Western Gas Resources, Inc.	4%	6%	26%
Phillips Petroleum Company	16%	-	-

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and Phillips Petroleum Company were \$23,391 and \$10,443, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

12

818

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$4,919,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

13

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

819

PARKER & PARSLEY 87-B CONV., LTD. (A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 69% to \$469,502 for 2000 as compared to \$278,326 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 10,352 barrels of oil, 5,663 barrels of natural gas liquids ("NGLs") and 23,682 mcf of gas were sold, or 19,962 barrel of oil equivalents ("BOEs"). In 1999, 10,784 barrels of oil, 5,974 barrels of NGLs and 24,436 mcf of gas were sold, or 20,831 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.60, or 75%, from \$16.71 in 1999 to \$29.31 in 2000. The average price received per barrel of NGLs increased \$7.17, or 74%, from \$9.73 in 1999 to \$16.90 in 2000. The average price received per mcf of gas increased 82% from \$1.64 in 1999 to \$2.98 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$1,005, recognized during 2000, was attributable to credits received from the disposal of oil and gas equipment on one fully depleted well.

Total costs and expenses increased in 2000 to \$243,866 as compared to \$213,033 in 1999, an increase of \$30,833, or 14%. The increase was primarily due to the impairment of oil and gas properties and increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$172,228 in 2000 and \$155,029 in 1999, resulting in a \$17,199 increase, or 11%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production, offset by a decline in workover expenses.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 69% from \$8,214 in 1999 to \$13,873 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$12,385 in 2000 and \$5,720 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$21,231 related to its oil and gas properties during 2000.

Depletion was \$36,534 in 2000 as compared to \$49,790 in 1999, representing a decrease of \$13,256, or 27%. This decrease was primarily due to a 2,194 barrels of oil increase in proved reserves during 2000 as a result of higher commodity

820

prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 18% to \$278,326 from \$236,434 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 10,784 barrels of oil, 5,974 barrels of NGLs and 24,436 mcf of gas were sold, or 20,831 BOEs. In 1998, 12,040 barrels of oil, 5,839 barrels of NGLs and 25,477 mcf of gas were sold, or 22,125 BOEs.

The average price received per barrel of oil increased \$3.54, or 27%, from \$13.17 in 1998 to \$16.71 in 1999. The average price received per barrel of NGLs increased \$2.91, or 43%, from \$6.82 in 1998 to \$9.73 in 1999. The average price received per mcf of gas increased 10% from \$1.49 in 1998 to \$1.64 in 1999.

A gain on disposition of assets of \$3,419 was recognized during 1998 from the sale of oil and gas equipment on one well abandoned in a prior year. Abandoned property costs of \$965 in 1998 were related to this abandonment.

Total costs and expenses decreased in 1999 to \$213,033 as compared to \$324,593 in 1998, a decrease of \$111,560, or 34%. The decrease was primarily due to declines in depletion, the impairment of oil and gas properties and abandoned property costs, offset by increases in production costs and G&A.

Production costs were \$155,029 in 1999 and \$146,967 in 1998, resulting in an \$8,062 increase, or 5%. The increase was due to increases in well maintenance costs and workover costs incurred to stimulate well production, offset by a decline in ad valorem taxes.

During this period, G&A increased 16% from \$7,093 in 1998 to \$8,214 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$5,720 in 1999 and \$5,800 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$48,745 related to its oil and gas properties during 1998.

Depletion was \$49,790 in 1999 compared to \$120,823 in 1998, representing a decrease of \$71,033, or 59%. This decrease was the result of a 92,485 barrels of oil increase in proved reserves during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,256 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum Industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

821

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$123,838 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$193,203, offset by increases in production costs paid of \$17,199, G&A expenses paid of \$5,659 and working capital of \$46,507. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$213,360 to oil and gas receipts, offset by \$20,157 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production, offset by a decline in workover expense. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from asset dispositions of \$1,059 were comprised of \$1,005 received from salvage income on one fully depleted well and \$54 from equipment credits received on one active well. Proceeds of \$1,226 received during 1999 were from equipment credits received on one temporarily abandoned well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$243,542, of which \$2,435 was distributed to the managing general partner and \$241,107 to the limited

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partners. In 1999, cash distributions to the partners were \$90,776, of which \$908 was distributed to the managing general partner and \$89,868 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 87-B, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 87-B, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 87-B, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001 (c) \$

-- as of December 31, 2000 (c) \$

Going Concern Value per \$1,000 Limited Partner Investment (c), (d) \$

Liquidation Value per \$1,000 Limited Partner Investment (c), (e) \$

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f) \$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as any value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

(f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

831

PARKER & PARSLEY 87-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 87-B, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues decreased 2% to \$446,606 for the three months ended March 31, 2001 as compared to \$453,944 for the same period in 2000. The decrease in revenues resulted from declines in production, offset by higher average prices received. For the three months ended March 31, 2001, 9,952 barrels of oil, 2,989 barrels of natural gas liquids ("NGLs") and 18,570 mcf of gas were sold, or 16,036 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 11,392 barrels of oil, 6,086 barrels of NGLs and 26,331 mcf of gas were sold, or 21,867 BOEs.

7

832

The average price received per barrel of oil decreased slightly from \$27.69 for the three months ended March 31, 2000 to \$27.55 for the same period in 2001. The average price received per barrel of NGLs increased \$3.74, or 25%, from \$15.18 for the three months ended March 31, 2000 to \$18.92 for the same period in 2001. The average price received per mcf of gas increased 257% from \$1.75 during the three months ended March 31, 2000 to \$6.24 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$16,389 was received during the three months ended March 31, 2001 of which \$14,853 was from disposal of equipment on one well plugged and abandoned during the current period and \$1,536 was from equipment credits received on one fully depleted well. Expenses to plug and abandon this well were \$13,935. For the three months ended March 31, 2000, a gain on disposition of assets of \$3,753 was recognized due to credits received from the disposal of oil and gas equipment on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$290,946 for the three months ended March 31, 2001 as compared to \$215,010 for the same period in 2000, an increase of \$75,936, or 35%. This increase was due to increases in depletion, production costs and abandoned property costs, offset by a decline in general and administrative expenses ("G&A").

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$191,209 for the three months ended March 31, 2001 and \$162,841 for the same period in 2000, resulting in a \$28,368 increase, or 17%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A decreased 15% from \$13,618 for the three months ended March 31, 2000 to \$11,612 for the same period in 2001. The decline was due to less G&A being allocated (limited to 3% of oil and gas revenues) due to lower oil and gas revenues for the three months ended March 31, 2001 as compared to the same period in 2000, offset by an increase in the accrual of tax preparation fees.

Depletion was \$74,190 for the three months ended March 31, 2001 as compared to \$38,551 for the same period in 2000, an increase of \$35,639, or 92%. This increase was primarily due to a downward revision to proved reserves on one well, offset by a decline in oil production of 1,440 barrels during the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$113,239 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to reductions of \$159,890 in working capital and \$2,006 in G&A expenses, offset

8

833

by a decline in oil and gas sales receipts of \$6,354 and increases in production costs of \$28,368 and abandoned property costs of \$13,935. The G&A decline was primarily due to less G&A being allocated (limited to 3% of oil and gas revenues) due to lower oil and gas revenues during the three months ended March 31, 2001 as compared to the same period in 2000, offset by an increase in the accrual of tax preparation fees. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production. The decline in oil and gas receipts resulted from declines in production of \$146,692, offset by \$140,338 resulting from higher average prices received. The increase in abandoned property costs was due to the plugging and abandonment of one well during the three months ended March 31, 2001.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principle investing activities for the three months ended March 31, 2001 and 2000 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$1,536 and \$3,753 were recognized during the three months ended March 31, 2001 and 2000, respectively, from equipment credits received on fully depleted wells.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$347,671, of which \$3,477 was distributed to the managing general partner and \$344,194 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$204,239, of which \$2,042 was distributed to the managing general partner and \$202,197 to the limited partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

837

PART I

ITEM 1. BUSINESS

Parker & Parsley 87-B, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 20,089 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 49% and 16% was attributable to sales made to Plains Marketing, L.P. and Phillips Petroleum Company. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

838

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located in Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 64 oil and gas wells. At December 31, 2000, 49 wells were producing; one well was a dry hole from a previous year; five wells have been plugged and abandoned and nine wells were sold.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

839

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 20,089 outstanding limited partnership interests held of record by 1,468 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$984,669 and \$367,015, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000 -----	1999 -----	1998 -----	1997 -----	1996 -----
Operating results:					
Oil and gas sales	\$1,917,791 =====	\$1,136,700 =====	\$ 965,599 =====	\$1,412,905 =====	\$1,725,580 =====
Gain on litigation settlement, net	\$ - =====	\$ - =====	\$ - =====	\$ - =====	\$ 590,715 =====
Impairment of oil and gas properties	\$ 86,674 =====	\$ - =====	\$ 199,037 =====	\$ 768,208 =====	\$ - =====
Net income (loss)	\$ 945,927 =====	\$ 279,094 =====	\$ (331,789) =====	\$ (347,350) =====	\$1,199,153 =====
Allocation of net income (loss):					
Managing general partner	\$ 9,459 =====	\$ 2,791 =====	\$ (3,318) =====	\$ (3,473) =====	\$ 11,992 =====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Limited partners	\$ 936,468	\$ 276,303	\$ (328,471)	\$ (343,877)	\$1,187,161
	=====	=====	=====	=====	=====
Limited partners' net income (loss) per limited partnership interest	\$ 46.62	\$ 13.75	\$ (16.35)	\$ (17.12)	\$ 59.10
	=====	=====	=====	=====	=====
Limited partners' cash distributions per limited partnership interest	\$ 49.02	\$ 18.27	\$ 21.24	\$ 35.83	\$ 87.23 (a)

	=====	=====	=====	=====	=====

(a) Including litigation settlement per limited partnership interest of \$29.11 in 1996.

4

840

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 69% to \$1,917,791 for 2000 as compared to \$1,136,700 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 42,280 barrels of oil, 23,121 barrels of natural gas liquids ("NGLs") and 96,740 mcf of gas were sold, or 81,524 barrel of oil equivalents ("BOEs"). In 1999, 44,029 barrels of oil, 24,404 barrels of NGLs and 99,771 mcf of gas were sold, or 85,062 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production to continue in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.60, or 75%, from \$16.71 in 1999 to \$29.31 in 2000. The average price received per barrel of NGLs increased \$7.17, or 74%, from \$9.73 in 1999 to \$16.90 in 2000. The average price received per mcf of gas increased 82% from \$1.64 in 1999 to \$2.98 in 2000. The market price received for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$4,102, recognized during 2000, was attributable to credits received from the disposal of oil and gas equipment on one fully depleted well.

Total costs and expenses increased in 2000 to \$997,051 as compared to \$870,434

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in 1999, an increase of \$126,617, or 15%. The increase was primarily due to the impairment of oil and gas properties and increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$703,352 in 2000 and \$633,091 in 1999, resulting in an increase of \$70,261, or 11%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate production, offset by a decline in workover expenses.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 69% from \$34,237 in 1999 to \$57,746 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$50,579 in 2000 and \$23,361 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated

5

841

to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$86,674 related to its oil and gas properties during 2000.

Depletion was \$149,279 in 2000 compared to \$203,106 in 1999, representing a decrease of \$53,827, or 27%. The decrease was primarily due to an 8,836 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 18% to \$1,136,700 from \$965,599 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 44,029 barrels of oil, 24,404 barrels of NGLs and 99,771 mcf of gas were sold, or 85,062 BOEs. In 1998, 49,182 barrels of oil, 23,854 barrels of NGLs and 104,072 mcf of gas were sold, or 90,381 BOEs.

The average price received per barrel of oil increased \$3.54, or 27%, from \$13.17 in 1998 to \$16.71 in 1999. The average price received per barrel of NGLs increased \$2.91, or 43%, from \$6.82 in 1998 to \$9.73 in 1999. The average price received per mcf of gas increased 10% from \$1.49 in 1998 to \$1.64 in 1999.

A gain on disposition of assets of \$13,965 was received during 1998 from the sale of oil and gas equipment on one well abandoned in a prior year. Abandoned property costs of \$3,943 were incurred in 1998. These costs were attributable to the plugging and abandonment of one uneconomical well in a prior year.

Total costs and expenses decreased in 1999 to \$870,434 as compared to \$1,326,204

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in 1998, a decrease of \$455,770, or 34%. The decrease was due to declines in depletion, the impairment of oil and gas properties and abandoned property costs, offset by increases in production costs and G&A.

Production costs were \$633,091 in 1999 and \$600,702 in 1998, resulting in a \$32,389 increase, or 5%. The increase was due to increases in well maintenance costs and workover costs incurred to stimulate well production, offset by a decline in ad valorem taxes.

During this period, G&A increased 18% from \$28,968 in 1998 to \$34,237 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$23,361 in 1999 and \$23,688 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$199,037 related to its oil and gas

6

842

properties during 1998.

Depletion was \$203,106 in 1999 compared to \$493,554 in 1998. This represented a decrease of \$290,448, or 59%. The decrease was the result of a combination of factors that included an increase in proved reserves of 377,754 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 5,153 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$569,152 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$789,348, offset by increases in production costs paid of \$70,261, G&A expenses paid of \$23,509 and working capital of \$126,426. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$871,310 to oil and gas receipts,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

offset by \$81,962 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production, offset by a decline in workover expenses. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from asset dispositions of \$4,326 and \$5,007 were received during 2000 and 1999, respectively. The proceeds of \$4,326 were due to \$4,102 salvage income on one fully depleted well

7

843

and the remaining \$224 on equipment credits received on an active well. The proceeds of \$5,007 were due to equipment credits received on one temporarily abandoned well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$994,615, of which \$9,946 was distributed to the managing general partner and \$984,669 to the limited partners. In 1999, cash distributions to the partners were \$370,722, of which \$3,707 was distributed to the managing general partner and \$367,015 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 87-B, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley 87-B, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 87-B, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 87-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 87-B, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the

15

851

respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$86,674 and \$199,037 related to its proved oil and gas properties during 2000 and 1998, respectively.

NOTE 4. INCOME TAXES

16

852

The financial statement basis of the Partnership's net assets and liabilities was \$261,429 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 945,927	\$279,094	\$ (331,789)
Intangible development costs capitalized for financial reporting purposes and expensed for tax reporting purposes	--	(273)	(5)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	137,352	192,661	477,912
Impairment of oil and gas properties for financial reporting purposes	86,674	--	199,037
Loss on sale of assets for tax reporting purposes greater than amounts for financial reporting purposes	--	(25,328)	--
Other, net	(2,628)	2,156	(4,671)
	-----	-----	-----
Net income per Federal income tax returns	\$1,167,325 =====	\$448,310 =====	\$ 340,484 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 10,658 =====	\$ 19,835 =====	\$ 22,998 =====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 552,956	\$ 552,956
Completed wells and equipment	12,843,048	12,832,614
	-----	-----
Accumulated depletion	13,396,004 (11,162,910)	13,385,570 (10,926,957)
	-----	-----
Net oil and gas properties	\$ 2,233,094	\$ 2,458,613
	=====	=====

17

853

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 304,400	\$ 301,167	\$ 292,411
Reimbursement of general and administrative expenses	\$ 50,579	\$ 23,361	\$ 23,688

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. In addition, Pioneer USA, Parker & Parsley 87-B Conv., Ltd. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

Pioneer USA (1)	Partnerships (2)
-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 45 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 87-B Conv., Ltd. is 80.33029% and 19.66971%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

18

854

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	941,555	1,291,273
Revisions	(314,311)	(287,194)
Production	(73,036)	(104,072)
	-----	-----
Net proved reserves at December 31, 1998	554,208	900,007
Revisions	633,879	1,113,934
Production	(68,433)	(99,771)
	-----	-----
Net proved reserves at December 31, 1999	1,119,654	1,914,170
Revisions	(38,404)	(311,039)
Production	(65,401)	(96,740)
	-----	-----
Net proved reserves at December 31, 2000	1,015,849	1,506,391
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.26 per barrel of NGLs and \$7.62 per mcf of gas, discounted at 10% was approximately \$7,561,000 and undiscounted was \$16,119,000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	----	----	----
Plains Marketing, L.P.	49%	50%	-
Genesis Crude Oil, L.P.	2%	-	57%
Western Gas Resources, Inc.	4%	6%	26%
Phillips Petroleum Company	16%	9%	8%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and Phillips Petroleum Company were \$95,526 and \$42,656, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

20

856

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$20,089,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

21

857

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Rich Dealy

34

Vice President and Chief Accounting
Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

22

858

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

859

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 45 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 ----	1999 ----	1998 ----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$304,400	\$ 301,167	\$292,411
Reimbursement of general and administrative expenses	\$ 50,579	\$ 23,361	\$ 23,688

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Statements of cash flows for the years ended December 31,
2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

OF

PARKER & PARSLEY PRODUCING PROPERTIES 87-A, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Producing Properties 87-A, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Producing Properties 87-A, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)

Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)

Merger Value per \$1,000 Limited Partner Investment (b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001 (c)

-- as of December 31, 2000 (c)

Going Concern Value per \$1,000 Limited Partner Investment (c), (d)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Liquidation Value per \$1,000 Limited Partner Investment (c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (f)

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Not applicable. Since this partnership purchased producing properties, there were no intangible drilling and development costs nor any related write-off for tax purposes.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY PRODUCING PROPERTIES 87-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 1. Organization and nature of operations

Parker & Parsley Producing Properties 87-A, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas.

The Partnership engages in oil and gas production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 5% to \$383,411 for the three months ended March 31, 2001 as compared to \$366,869 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 11,080 barrels of oil, 1,780 barrels of natural gas liquids ("NGLs") and 11,750 mcf of gas were sold, or 14,818 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 11,876 barrels of oil, 1,997 barrels of NGLs and 9,135 mcf of gas were sold, or 15,396 BOEs.

7

874

The average price received per barrel of oil increased slightly from \$27.47 for the three months ended March 31, 2000 to \$27.48 for the same period in 2001. The average price received per barrel of NGLs increased \$1.44, or 12%, from \$11.93 for the three months ended March 31, 2000 to \$13.37 for the same period in 2001. The average price received per mcf of gas increased 155% from \$1.84 during the three months ended March 31, 2000 to \$4.69 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Gains on disposition of assets of \$27,320 and \$15,629 were recognized during the three months ended March 31, 2001 and 2000, respectively. The gain recognized during 2001 was due to \$25,956 from equipment credits on one well plugged and abandoned in the current period and \$1,364 was due to salvage income from a well abandoned during 2000. The gain recognized during 2000 was comprised of \$10,858 from equipment credits on one well plugged and abandoned in the current period and \$4,771 salvage income on a well plugged and abandoned during 1999.

Costs and Expenses:

Total costs and expenses increased to \$209,110 for the three months ended March 31, 2001 as compared to \$201,099 for the same period in 2000, an increase of \$8,011, or 4%. This increase was the result of higher production costs and general and administrative expenses ("G&A"), offset by declines in depletion and abandoned property costs.

Production costs were \$170,185 for the three months ended March 31, 2001 and \$159,161 for the same period in 2000, resulting in an \$11,024 increase, or 7%. This increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 5% from \$11,006 for the three months ended March 31, 2000 to \$11,502 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$15,152 for the three months ended March 31, 2001 as compared to \$18,149 for the same period in 2000, a decrease of \$2,997, or 17%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121") during the fourth quarter of 2000.

Abandoned property costs of \$12,271 and \$12,783 were incurred on the abandonment of one well during each period ended March 31, 2001 and 2000, respectively.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$113,848 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$17,102 in oil and gas sales receipts and reductions in working capital of \$107,754 and abandoned property costs of \$512, offset by increases in production costs of \$11,024 and G&A expenses of \$496. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$29,603 to oil and gas receipts, offset by \$12,501 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

revenues) as a result of increased oil and gas revenues.

Net Cash Provided by Investing Activities

Proceeds from disposition of assets of \$11,517 and \$18,129 were recognized during the three months ended March 31, 2001 and 2000, respectively. The proceeds recognized during both periods were from equipment credits on wells plugged and abandoned.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$265,310, of which \$2,653 was distributed to the managing general partner and \$262,657 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$134,767, of which \$1,348 was distributed to the managing general partner and \$133,419 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

879

PART I

ITEM 1. BUSINESS

Parker & Parsley Producing Properties 87-A, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 24,426 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 59%, 15% and 11% were attributable to sales made to Plains Marketing, L.P., Phillips Petroleum Company and TEPPCO Crude Oil LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and

2

880

ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to landowner royalties, overriding royalties and other oil and gas leasehold interests.

The Partnership completed seven purchases of producing properties. These acquisitions involved the purchase of working interests in 187 properties of which 98 uneconomical oil and gas wells were plugged and abandoned and seven wells were sold. The Partnership also participated in the drilling of two oil and gas wells during 1988 which were completed as producers. During 1997, the Partnership participated in the recompletion of one well in which Pioneer USA acquired the deep rights. The Partnership already owned the shallow rights of the well bore. At December 31, 2000, the Partnership had 85 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

881

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 24,426 outstanding limited partnership interests held of record by 1,104 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$618,681 and \$223,952, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

(a) Including litigation settlement of \$.81 per limited partnership interest in 1996.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

4

882

2000 compared to 1999

The Partnership's oil and gas revenues increased 76% to \$1,514,918 for 2000 as compared to \$860,305 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 43,390 barrels of oil, 10,266 barrels of natural gas liquids ("NGLs") and 45,872 mcf of gas were sold, or 61,301 barrel of oil equivalents ("BOEs"). In 1999, 41,606

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

barrels of oil, 11,495 barrels of NGLs and 53,145 mcf of gas were sold, or 61,959 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.54, or 75%, from \$16.80 in 1999 to \$29.34 in 2000. The average price received per barrel of NGLs increased \$4.80, or 66%, from \$7.32 in 1999 to \$12.12 in 2000. The average price received per mcf of gas increased 75% from \$1.46 in 1999 to \$2.56 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$37,944 recognized during 2000 resulted from \$26,860 in salvage income received on a fully depleted well and wells plugged and abandoned in prior years, in addition to an \$11,084 gain recognized from the abandonment of three wells during the current year. Gain on disposition of assets of \$25,173 for 1999 resulted from \$17,629 in salvage income received on the abandonment of two oil and gas wells during 1999, in addition to \$7,544 salvage income received on fully depleted wells and wells plugged and abandoned in prior years.

Total costs and expenses increased in 2000 to \$967,456 as compared to \$760,971 in 1999, an increase of \$206,485, or 27%. The increase was due to higher production costs, general and administrative expenses ("G&A"), the impairment of oil and gas properties and abandoned property costs, offset by a decline in depletion.

Production costs were \$765,021 in 2000 and \$555,988 in 1999, resulting in an increase of \$209,033, or 38%. The increase was primarily due to additional workover costs and well maintenance costs incurred to stimulate production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 76%, from \$25,809 in 1999 to \$45,448 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$29,711 in 2000 and \$1,550 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$59,777 and \$43,412 related to its oil and gas properties during 2000 and 1999, respectively.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$69,296 in 2000 as compared to \$109,034 in 1999, representing a decrease of \$39,738, or 36%. This decrease was primarily due to a 119,706 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

Abandoned property costs of \$27,914 and \$26,728 were incurred on the abandonment of several properties in 2000 and 1999, respectively.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 7% to \$860,305 from \$807,421 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 41,606 barrels of oil, 11,495 barrels of NGLs and 53,145 mcf of gas were sold, or 61,959 BOEs. In 1998, 51,039 barrels of oil, 13,328 barrels of NGLs and 56,240 mcf of gas were sold, or 73,740 BOEs.

The average price received per barrel of oil increased \$3.76, or 29%, from \$13.04 in 1998 to \$16.80 in 1999. The average price received per barrel of NGLs increased \$1.86, or 34%, from \$5.46 in 1998 to \$7.32 in 1999. The average price received per mcf of gas increased 19% from \$1.23 in 1998 to \$1.46 in 1999.

The \$25,173 gain on disposition of assets for 1999 resulted from \$17,629 in salvage income received on the abandonment of two oil and gas wells during 1999, in addition to \$7,544 salvage income received on fully depleted wells and wells plugged and abandoned in prior years. During 1998, the \$24,040 gain on disposition of assets resulted from \$29,099 in salvage income received during 1998 on properties that were plugged and abandoned in prior years, offset by a \$5,059 loss on the abandonment of two oil and gas wells and one saltwater disposal well.

Total costs and expenses decreased in 1999 to \$760,971 as compared to \$1,202,296 in 1998, a decrease of \$441,325, or 37%. The decrease was due to declines in depletion, production costs and abandoned property costs, offset by increases in the impairment of oil and gas properties and G&A.

Production costs were \$555,988 in 1999 and \$682,634 in 1998, resulting in a \$126,646 decrease, or 19%. The decrease was due to reductions in well maintenance costs and ad valorem taxes, offset by an increase in workover costs incurred to stimulate production.

During this period, G&A increased 7%, from \$24,223 in 1998 to \$25,809 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and

gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$1,550 in 1999 and \$10,723 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$43,412 and \$37,388 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion was \$109,034 in 1999 compared to \$383,398 in 1998, representing a decrease of \$274,364, or 72%. This decrease was the result of an increase in proved reserves of 306,417 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

a decline in oil production of 9,433 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Abandoned property costs of \$26,728 and \$74,653 were incurred on the abandonment of several properties in 1999 and 1998, respectively.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$389,055 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$660,529, offset by increases in production costs paid of \$209,033, G&A expenses paid of \$19,639, abandoned property costs paid of \$1,186 and working capital of \$41,616. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$641,727 to oil and gas receipts and an increase of \$18,802 resulting from an increase in oil production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

7

885

Net Cash Provided by Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to the addition of oil and gas equipment on active properties.

Proceeds from disposition of assets of \$57,999 for 2000 resulted from \$36,906 salvage income on a fully depleted well and wells abandoned in a prior year, \$15,711 salvage income received on two wells plugged and abandoned in 2000 and \$5,382 from equipment credits on one active well. Proceeds from disposition of assets of \$21,887 for 1999 resulted from \$7,583 in salvage income received on one well plugged and abandoned during 1999, in addition to \$7,544 salvage income primarily received on fully depleted wells and \$6,760 from equipment credits on one active well.

Net Cash Used in Financing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

For 2000, cash distributions to the partners were \$624,930, of which \$6,249 was distributed to the managing general partner and \$618,681 to the limited partners. In 1999, cash distributions to the partners were \$226,214, of which \$2,262 was distributed to the managing general partner and \$223,952 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley Producing Properties 87-A, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley Producing Properties 87-A, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Producing Properties 87-A, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY PRODUCING PROPERTIES 87-A, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley Producing Properties 87-A, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income (loss) of the Partnership is included in the individual Federal income tax returns of the

15

893

respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of the cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$59,777, \$43,412 and \$37,388 related to its proved oil and gas properties during 2000, 1999 and 1998, respectively.

16

894

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$1,521,385 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income (loss) per Federal income tax returns for the years ended December 31:

2000	1999	1998
------	------	------

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income (loss) per statements of operations	\$ 601,515	\$ 134,700	\$ (357,482)
Depletion and depreciation provisions for tax reporting purposes (greater than) less than amounts for financial reporting purposes	(12,672)	47,101	(84,454)
Impairment of oil and gas properties for financial reporting purposes	59,777	43,412	37,388
Other, net	(15,730)	(2,287)	4,922
	-----	-----	-----
Net income (loss) per Federal income tax returns	\$ 632,890	\$ 222,926	\$ (399,626)
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the net costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Property acquisition costs	\$ 4,087	\$ 1,104	\$ 11,491
	=====	=====	=====
Development costs	\$ 829	\$ 1,714	\$ -
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$5,021,262	\$ 5,095,617
Completed wells and equipment	679,775	678,946
	-----	-----
Accumulated depletion	5,701,037	5,774,563
	(5,019,550)	(4,958,910)
	-----	-----
Net oil and gas properties	\$ 681,487	\$ 815,653
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 268,224	\$ 254,244	\$ 292,539
Reimbursement of general and administrative expenses	\$ 29,711	\$ 1,550	\$ 10,723

17

895

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees Producing Properties 87-A ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a general partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1) -----	Partnership -----
Revenues:		
Revenues from oil and gas production, proceeds from sales of producing properties and all other revenues:		
Before payout (2)	4.040405%	95.959595%
After payout	19.191920%	80.808080%
Costs and expenses:		
Property acquisition costs, operating costs, general and administrative expenses and other costs:		
Before payout (2)	4.040405%	95.959595%
After payout	19.191920%	80.808080%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 86 limited partner interests owned by Pioneer USA.

(2) The Partnership has not reached payout.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	719,789	996,755
Revisions	(302,841)	(385,883)
Production	(64,367)	(56,240)
	-----	-----
Net proved reserves at December 31, 1998	352,581	554,632
Revisions	461,643	633,460
Production	(53,101)	(53,145)
	-----	-----
Net proved reserves at December 31, 1999	761,123	1,134,947
Revisions	6,756	(376,058)
Production	(53,656)	(45,872)
	-----	-----
Net proved reserves at December 31, 2000	714,223	713,017
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$12.58 per barrel of NGLs and \$7.60 per mcf of gas, discounted at 10% was approximately \$4,683,000 and undiscounted was \$9,322,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

19

897

	For the years ended December 31		
	2000	1999	1998

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

2000 1999 1998

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----	-----
Plains Marketing, L.P.	59%	60%	-
Phillips Petroleum Company	15%	14%	16%
TEPPCO Crude Oil LLC	11%	-	-
Genesis Crude Oil, L.P.	-	-	66%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., Phillips Petroleum Company and TEPPCO Crude Oil LLC were \$78,270, \$54,144 and \$29,228, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership

20

898

affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$12,213,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

21

899

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name -----	Age at December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the limited partnership agreement, Pioneer USA pays 1% of the Program's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 1% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 86 limited partnership interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$268,224	\$ 254,244	\$292,539
Reimbursement of general and administrative expenses	\$ 29,711	\$ 1,550	\$ 10,723

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

TO

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PROXY STATEMENT/PROSPECTUS DATED _____, 2001

THE DATE OF THIS SUPPLEMENT IS _____, 2001

This document contains important information specific to Parker & Parsley Producing Properties 87-B, Ltd. and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Producing Properties 87-B, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY PRODUCING PROPERTIES 87-B, LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001(c)

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(f)

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Not applicable. Since this partnership purchased producing properties, there were no intangible drilling and development costs nor any related write-off for tax purposes.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

(A Texas Limited Partnership)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTES TO FINANCIAL STATEMENTS

March 31, 2001

(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Producing Properties 87-B, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas.

The Partnership engages in oil and gas production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues decreased 10% to \$238,043 for the three months ended March 31, 2001 as compared to \$263,792 for the same period in 2000. The decrease in revenues resulted from a decline in production, offset by higher average prices received. For the three months ended March 31, 2001, 5,392 barrels of oil, 1,750 barrels of natural gas liquids ("NGLs") and 9,834 mcf of gas were sold, or 8,781 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 7,007 barrels of oil, 3,011 barrels of NGLs and 14,555 mcf of gas were sold, or 12,444 BOEs. Of the decrease, 1,646 BOE's are attributable

to the fact that on April 1, 2000 the Partnership's revenue and operating expense allocation reverted to 80.808081% from 95.959595% pursuant to the Program Agreement governing the Partnership which provides for a reversionary interest of 80.080801% once cumulative distributions equal initial partner's capital ("Reversionary Interest").

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The average price received per barrel of oil decreased \$.40, or 1%, from \$27.54 for the three months ended March 31, 2000 to \$27.14 for the same period in 2001. The average price received per barrel of NGLs increased \$4.14, or 28%, from \$14.93 for the three months ended March 31, 2000 to \$19.07 for the same period in 2001. The average price received per mcf of gas increased 233% from \$1.78 during the three months ended March 31, 2000 to \$5.93 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$8,294 was recognized during the three months ended March 31, 2000. The gain recognized was due to equipment credits received on fully depleted wells.

Costs and Expenses:

Total costs and expenses decreased to \$104,202 for the three months ended March 31, 2001 as compared to \$128,076 for the same period in 2000, a decrease of \$23,874, or 19%. This decrease was due to declines in production costs, depletion and general and administrative expenses ("G&A").

Production costs were \$87,509 for the three months ended March 31, 2001 and \$109,436 for the same period in 2000 resulting in a \$21,927 decrease, or 20%. Lease operating costs and production taxes declined 15% which were attributable to the Revisionary Interest change and production costs declined 5% resulting from lower well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A decreased 10% from \$7,914 for the three months ended March 31, 2000 to \$7,141 for the same period in 2001, primarily due to the Revisionary Interest change as noted above.

Depletion was \$9,552 for the three months ended March 31, 2001 as compared to \$10,726 for the same period in 2000, a decrease of \$1,174, or 11%. This decrease was primarily due to a decline in oil production of 1,615 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$68,587 during the three months ended March 31, 2001 from the same period in 2000. The increase was due to reductions in production costs of \$21,927, G&A expenses of \$773 and working capital of \$71,527, offset by a decrease in oil and gas sales receipts of \$25,640. The decline in production costs was primarily due to the Reversionary

Interest change and lower well maintenance. The decrease in oil and gas sales receipts resulted in \$95,880 from the decline in production in 2001, offset by the increase in commodity prices during 2001 which contributed an additional \$70,240 to oil and gas receipts.

Net Cash Provided by (Used in) Investing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership's principal investing activities during the three months ended March 31, 2001 were related to expenditures for upgrades of oil and gas equipment on active properties.

Proceeds from disposition of assets of \$13,944 were recognized during the three months ended March 31, 2000. The proceeds recognized were primarily from equipment credits on fully depleted wells.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$169,535, of which \$1,695 was distributed to the managing general partner and \$167,840 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$114,082, of which \$1,141 was distributed to the managing general partner and \$112,941 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

921

PART I

ITEM 1. BUSINESS

Parker & Parsley Producing Properties 87-B, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the state of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 12,191 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 32%, 22% and 20% were attributable to sales made to Plains Marketing, L.P., TEPPCO Crude Oil LLC and Phillips Petroleum Company, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that

2

922

its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to landowner royalties, overriding royalties and other oil and gas leasehold interests.

The Partnership completed seven purchases of producing properties. These acquisitions involved the purchase of working interests in 54 properties. The Partnership also participated in the drilling of two oil and gas wells during 1988 which were completed as producers. Additionally, the Partnership purchased 15 overriding royalty interests effective January 1, 1990 and two additional overriding royalty interests during 1991. Twenty-two uneconomical wells have been abandoned. At December 31, 2000, the Partnership had 34 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

923

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 12,191 outstanding limited partnership interests held of record by 550 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$586,016 and \$170,405, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

2000	1999	1998	1997	1996
-----	-----	-----	-----	-----

	=====	=====	=====	=====	=====

4

924

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 57% to \$982,604 for 2000 as compared to \$625,861 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 22,713 barrels of oil, 10,402 barrels of natural gas liquids ("NGLs") and 49,380 mcf of gas were sold, or 41,345 barrel of oil equivalents ("BOEs"). In 1999, 24,976 barrels of oil, 10,794 barrels of NGLs and 48,774 mcf of gas were sold, or 43,899 BOEs. Of the decrease, 5,393 BOEs are attributable to the fact that on April 1, 2000, the Partnership's revenue and operating expense allocation reverted to 80.808081% from 95.959595% pursuant to the Program Agreement governing the Partnership which provides for a reversionary interest of 80.808081% once cumulative distributions equal initial partner's capital ("Reversionary Interest"). This is offset by a production increase of 2,839 BOEs. Due to the decline characteristics of the Partnership's oil and gas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$11.92, or 68%, from \$17.44 in 1999 to \$29.36 in 2000. The average price received per barrel of NGLs increased \$6.36, or 62%, from \$10.32 in 1999 to \$16.68 in 2000. The average price received per mcf of gas increased 78% from \$1.62 in 1999 to \$2.88 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gains on disposition of assets of \$8,294 and \$11,482 were recognized in 2000 and 1999, respectively. The gain from 2000 was from equipment salvage on one well abandoned in a prior year. The gain from 1999 was from equipment salvage of \$12,955 on one well plugged and abandoned in a prior year, offset by a \$1,473 loss on the write-off of basis on one well plugged and abandoned during 1999.

Total costs and expenses decreased in 2000 to \$434,793 as compared to \$477,552 in 1999, a decrease of \$42,759, or 9%. The decrease was primarily attributable to declines in depletion, production costs and abandoned property costs, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$347,938 in 2000 and \$364,187 in 1999, resulting in a decrease of \$16,249, or 4%. Lease operating costs and production taxes declined 12% which was attributable to the Reversionary Interest change, offset by an 8% increase in production costs resulting from high production taxes due to higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 79%, from \$18,776 in 1999 to

5

925

\$33,521 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$27,424 in 2000 and \$8,400 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$53,334 in 2000 as compared to \$79,975 in 1999, a decrease of \$26,641, or 33%. This decrease was primarily due to a 51,092 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

Abandoned property costs of \$14,614 incurred in 1999 were related to the temporary abandonment of one well during 1999 and two wells plugged and abandoned in prior years.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 18% to \$625,861 from \$532,606 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 24,976 barrels of oil,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

10,794 barrels of NGLs and 48,774 mcf of gas were sold, or 43,899 BOEs. In 1998, 29,481 barrels of oil, 11,315 barrels of NGLs and 50,220 mcf of gas were sold, or 49,166 BOEs.

The average price received per barrel of oil increased \$4.39, or 34%, from \$13.05 in 1998 to \$17.44 in 1999. The average price received per barrel of NGLs increased \$3.74, or 57%, from \$6.58 in 1998 to \$10.32 in 1999. The average price received per mcf of gas increased 11% from \$1.46 in 1998 to \$1.62 in 1999.

Gain on disposition of assets of \$11,482 was recognized in 1999 from equipment salvage of \$12,955 on one well plugged and abandoned in a prior year, offset by a \$1,473 loss on the write-off of basis on one well plugged and abandoned during 1999. In 1998, \$4,248 gain on disposition of assets was recognized from proceeds received from equipment salvage on wells plugged in prior years.

Total costs and expenses decreased in 1999 to \$477,552 as compared to \$659,670 in 1998, a decrease of \$182,118, or 28%. The decrease was primarily attributable to declines in depletion, the impairment of oil and gas properties, production costs and abandoned property costs, offset by an increase in G&A.

Production costs were \$364,187 in 1999 and \$385,648 in 1998, resulting in a \$21,461 decrease, or 6%. The decrease was the result of declines in well maintenance costs, ad valorem taxes and workover expenses.

During this period, G&A increased 18% from \$15,978 in 1998 to \$18,776 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$8,400 in 1999 and \$9,662 in 1998 for G&A incurred on behalf of the Partnership.

6

926

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$35,017 related to its oil and gas properties during 1998.

Depletion was \$79,975 in 1999 compared to \$206,289 in 1998, a decrease of \$126,314, or 61%. This decrease was primarily due to an increase in proved reserves of 180,622 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 4,505 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Abandoned property costs of \$14,614 incurred in 1999 were related to the temporary abandonment of one well during 1999 and two wells plugged and abandoned in prior years. Expenses of \$16,738 were incurred in 1998 to plug and abandon one oil and gas well which was temporarily abandoned in a prior year.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

7

927

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$392,559 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$359,902 and declines in production costs paid of \$16,249, abandoned property costs paid of \$14,614 and working capital of \$16,539, offset by an increase in G&A expenses paid of \$14,745. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$431,139 to oil and gas receipts, offset by \$71,237 resulting from the decline in production during 2000. The decrease in production costs was primarily due to the Reversionary Interest change, offset by higher production taxes associated with high oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during 1999 were primarily for expenditures related to upgrades of equipment on various oil and gas properties.

Proceeds of \$13,943 and \$12,956 were recognized during 2000 and 1999, respectively, from equipment salvage on wells abandoned in prior years.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$591,935, of which \$5,919 was distributed to the managing general partner and \$586,016 to the limited partners. In 1999, cash distributions to the partners were \$172,065, of which \$1,660 was distributed to the managing general partner and \$170,405 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley Producing Properties 87-B, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley Producing Properties 87-B, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Producing Properties 87-B, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY PRODUCING PROPERTIES 87-B, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Producing Properties 87-B, Ltd. (the "Partnership") is a limited partnership organized in 1987 under the laws of the State of Texas. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

15

935

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$35,017 related to its proved oil and gas properties during 1998.

16

936

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$838,681 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income (loss) per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 562,621	\$ 163,148	\$ (118,738)
Depletion and depreciation provisions for tax reporting purposes (greater than) less than amounts for financial reporting purposes	(39,072)	7,412	(59,976)
Impairment of oil and gas properties for financial reporting purposes	-	-	35,017
Abandoned property dispositions for tax reporting greater than (less than) amounts for financial reporting purposes	-	-	(218,079)
Other, net	4,370	(7,638)	3,376
	-----	-----	-----
Net income (loss) per Federal income tax returns	\$ 527,919 =====	\$ 162,922 =====	\$ (358,400) =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Property acquisition costs	\$ - =====	\$ (2,313) =====	\$ 6,754 =====
Development costs	\$ - =====	\$ 4,136 =====	\$ 1,863 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 3,288,184	\$ 3,289,170
Completed wells and equipment	1,541,019 -----	1,548,421 -----
	4,829,203	4,837,591
Accumulated depletion	(4,181,937) -----	(4,131,342) -----
Net oil and gas properties	\$ 647,266 =====	\$ 706,249 =====

17

937

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 121,257	\$ 137,769	\$ 144,149
Reimbursement of general and administrative expenses	\$ 27,424	\$ 8,400	\$ 9,662

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Producing Properties 87-B Employees ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a general partnership organized for the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)	Partnership
Revenues:		
Revenues from oil and gas production, proceeds from sales of producing properties and all other revenues:		
Before payout	4.040405%	95.959595%
After payout (2)	19.191920%	80.808080%
Costs and expenses:		
Property acquisition costs, operating costs, general and administrative expenses and other costs:		
Before payout	4.040405%	95.959595%
After payout (2)	19.191920%	80.808080%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 196 limited partner interests owned by Pioneer USA.

(2) The Partnership reached payout in April 2000.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

18

938

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	419,589	664,089
Revisions	(95,538)	(99,794)
Production	(40,796)	(50,220)
	-----	-----
Net proved reserves at December 31, 1998	283,255	514,075
Revisions	292,082	490,347
Production	(35,770)	(48,774)
	-----	-----
Net proved reserves at December 31, 1999	539,567	955,648

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revisions	31,315	(45,195)
Production	(33,115)	(49,380)
	-----	-----
Net proved reserves at December 31, 2000	537,767	861,073
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.63 per barrel of oil, \$13.33 per barrel of NGLs and \$7.67 per mcf of gas, discounted at 10% was approximately \$4,413,000 and undiscounted was \$9,495,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31		
	2000	1999	1998
	(in thousands)		
Oil and gas producing activities:			
Future cash inflows	\$ 18,453	\$ 13,256	\$ 3,300

Balance, end of year	\$ 4,413	\$ 3,078	\$ 559

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
Plains Marketing, L.P.	32%	37%	-
TEPPCO Crude Oil LLC	22%	23%	-
Phillips Petroleum Company	20%	10%	9%
Genesis Crude Oil, L.P.	-	-	58%
Western Gas Resources, Inc.	6%	7%	23%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC and Phillips Petroleum Company were \$25,204, \$31,416 and \$21,019, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$6,095,500. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name	Age at December 31, 2000	Position
----	----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

22

942

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

23

943

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the limited partnership agreement, Pioneer USA pays 1% of the Program's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, Pioneer USA is allocated 1% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 196 limited partner interests at January 1, 2001.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

24

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$121,257	\$ 137,769	\$144,149
Reimbursement of general and administrative expenses	\$ 27,424	\$ 8,400	\$ 9,662

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY PRIVATE INVESTMENT 87, LTD., A TEXAS LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Private Investment 87, Ltd. and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Investment 87, Ltd.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY PRIVATE INVESTMENT 87, LTD.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

- as of March 31, 2001(c)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion must be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2037, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY PRIVATE INVESTMENT 87, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 1. Organization and nature of operations

Parker & Parsley Private Investment 87, Ltd. (the "Partnership") was organized in 1987 as a general partnership under the laws of the State of Texas and was converted to a Texas limited partnership in 1989.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations (1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 22% to \$294,672 for the three months ended March 31, 2001 as compared to \$240,933 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 6,848 barrels of oil, 2,038 barrels of natural gas liquids ("NGLs") and 11,385 mcf of gas were sold, or 10,784 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 6,630 barrels of oil, 2,699 barrels of NGLs and 11,546 mcf of gas were sold, or 11,253 BOEs.

6

957

The average price received per barrel of oil increased slightly from \$27.10 for the three months ended March 31, 2000 to \$27.13 for the same period in 2001. The average price received per barrel of NGLs increased \$4.75, or 32%, from \$14.77 for the three months ended March 31, 2000 to \$19.52 for the same period in 2001. The average price received per mcf of gas increased 226% from \$1.86 during the three months ended March 31, 2000 to \$6.07 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Gain on disposition of assets of \$14,938 recognized during the three months ended March 31, 2000 were from equipment credits on a well plugged and abandoned during the prior year.

Costs and Expenses:

Total costs and expenses increased to \$139,829 for the three months ended March 31, 2001 as compared to \$133,650 for the same period in 2000, an increase of \$6,179 or 5%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$111,234 for the three months ended March 31, 2001 and \$104,648 for the same period in 2000 resulting in a \$6,586 increase, or 6%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 7% from \$7,228 for the three months ended March 31, 2000 to \$7,701 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$20,894 for the three months ended March 31, 2001 compared to \$21,774 for the same period in 2000, a decrease of \$880, or 4%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices, offset by an increase in oil production of 218 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$51,228 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$54,017 and a reduction of \$4,270 in working capital, offset by increases in production costs of \$6,586 and G&A expenses of \$473. The increase in oil and gas receipts

7

958

resulted from the increase in commodity prices during 2001 which contributed an additional \$61,985 to oil and gas receipts, offset by \$7,968 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Provided by Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 related to oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$13,708 and \$24,834 were recognized

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during the three months ended March 31, 2001 and 2000, respectively. The proceeds recognized during 2001 were from equipment credits received on an active property. The proceeds recognized during 2000 were from salvage income received on a well plugged and abandoned during the prior year.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$194,342, of which \$1,943 was distributed to the managing general partner and \$192,399 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$132,869, of which \$1,329 was distributed to the managing general partner and \$131,540 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

960

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley Private Investment 87, Ltd.
(A Texas Limited Partnership):

We have audited the balance sheets of Parker & Parsley Private Investment 87, Ltd. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Private Investment 87, Ltd. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY PRIVATE INVESTMENT 87, LTD.
(A Texas Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Private Investment 87, Ltd. (the "Partnership") was organized in 1987 as a general partnership under the laws of the State of Texas and was converted to a Texas limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted and the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$176,587 related to its proved oil and gas properties during 1998.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$72,098 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	
	-----	-----
Net income (loss) per statements of operations	\$ 556,684	\$
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	73,725	
Impairment of oil and gas properties for financial reporting purposes	-	
Salvage income	-	
Other, net	8,468	
	-----	-----
Net income per Federal income tax returns	\$ 638,877	\$
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	
	-----	-----
Development costs	\$ 12,021	\$
	=====	=====

Capitalized oil and gas properties consist of the following:

Proved properties:		
Property acquisition costs		\$
Completed wells and equipment		-----
Accumulated depletion		-----
Net oil and gas properties		\$
		=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 168,618	\$
Reimbursement of general and administrative expenses	\$ 27,190	\$

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer U

Revenues:	
Proceeds from disposition of depreciable properties	9.09
All other revenues	24.24
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.09
Operating costs, direct costs and general and administrative expenses	24.24

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

established by the Securities and Exchange Commission.

969

10

	Oil and NGLs (bbls)
Net proved reserves at January 1, 1998	593,108
Revisions	(204,355)
Production	(42,801)

Net proved reserves at December 31, 1998	345,952
Revisions	377,937
Production	(40,495)

Net proved reserves at December 31, 1999	683,394
Revisions	114,936
Production	(35,242)

Net proved reserves at December 31, 2000	763,088
	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.67 per barrel of NGLs and \$7.76 per mcf of gas, discounted at 10% was approximately \$5,193,000 and undiscounted was \$12,461,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

(based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000

Plains Marketing, L.P.	42%
Genesis Crude Oil, L.P.	-
Western Gas Resources, Inc.	3%
Phillips Petroleum Company	17%
NGTS LLC	10%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., Phillips Petroleum Company and NGTS LLC were \$34,772, \$27,567 and \$3,043, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being

12

971

paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. The managing general partner is also responsible for 1% of the guaranty and loan commitment fees. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$10,480,000. Contributions aggregating \$2,822,500 were received directly from the partners in cash and the remainder was made available to the limited partners by a financial institution. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

13

972

PARKER & PARSLEY PRIVATE INVESTMENT 87, LTD.
(A TEXAS LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 54% to \$1,035,947 for 2000 as compared to \$674,794 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 24,016 barrels of oil, 11,226 barrels of natural gas liquids ("NGLs") and 48,307 mcf of gas were sold, or 43,293 barrel of oil equivalents ("BOEs"). In 1999, 27,432 barrels of oil, 13,063 barrels of NGLs and 52,874 mcf of gas were sold, or 49,307 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.74, or 76%, from \$16.82 in 1999 to \$29.56 in 2000. The average price received per barrel of NGLs increased \$6.76, or 72%, from \$9.41 in 1999 to \$16.17 in 2000. The average price received per mcf of gas increased 75% from \$1.71 in 1999 to \$2.99 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$15,201 during 2000 was attributable to salvage income received on two wells plugged and abandoned during 1999. Gain on disposition of assets of \$20,924 during 1999 was from salvage value received on equipment from two wells plugged and abandoned during 1999. Abandoned property costs of \$20,129 were incurred during 1999 related to the plugging of these two wells.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Total costs and expenses increased in 2000 to \$505,407 as compared to \$497,201 in 1999, an increase of \$8,206, or 2%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by declines in depletion and abandoned property costs.

Production costs were \$395,308 in 2000 and \$333,765 in 1999, resulting in a \$61,543 increase, or 18%. The increase was due to additional well maintenance costs incurred to stimulate well production and higher production taxes.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 54% from \$20,244 in 1999 to \$31,079 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$27,190 in 2000 and \$13,954 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$79,020 in 2000 as compared to \$123,063 in 1999, representing a decrease of \$44,043, or 36%. This decrease was primarily due to a 114,527 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a decline in oil production of 3,416 barrels for the period ended December 31, 2000 compared to the same period in 1999.

973

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 19% to \$674,794 from \$568,014 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 27,432 barrels of oil, 13,063 barrels of NGLs and 52,874 mcf of gas were sold, or 49,307 BOEs. In 1998, 30,005 barrels of oil, 12,796 barrels of NGLs and 58,036 mcf of gas were sold, or 52,474 BOEs.

The average price received per barrel of oil increased \$3.77, or 29%, from \$13.05 in 1998 to \$16.82 in 1999. The average price received per barrel of NGLs increased \$2.86, or 44%, from \$6.55 in 1998 to \$9.41 in 1999. The average price received per mcf of gas increased 8% from \$1.59 in 1998 to \$1.71 in 1999.

Gain on disposition of assets of \$20,924 during 1999 was from salvage value received on equipment from two wells plugged and abandoned during 1999. Abandoned property costs of \$20,129 were incurred during 1999 related to the plugging of these two wells.

Miscellaneous income of \$27,020 during 1998 consisted of the write-off of amounts previously recorded as accounts payable. These amounts were set aside until the Partnership reconciled payments for the initial capital contributions. Once these payments were reconciled, the liability was eliminated and the cash distributed to the partners.

Total costs and expenses decreased in 1999 to \$497,201 as compared to \$810,102 in 1998, a decrease of \$312,901, or 39%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by increases in abandoned property costs and G&A.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$333,765 in 1999 and \$357,125 in 1998, resulting in a \$23,360 decrease, or 7%. The decrease was due to declines in well maintenance costs and ad valorem taxes.

During this period, G&A increased 19% from \$17,041 in 1998 to \$20,244 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$13,954 in 1999 and \$13,315 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$176,587 related to its oil and gas properties during 1998.

Depletion was \$123,063 in 1999 compared to \$259,349 in 1998, representing a decrease of \$136,286, or 53%. This decrease was the result of an increase in proved reserves of 239,857 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

974

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$254,339 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$366,174 and a decline in abandoned property costs of \$20,129, offset by increases in production costs paid of \$61,543, G&A expenses paid of \$10,835 and working capital of \$59,586. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$510,519 to oil and gas receipts, offset by \$144,345 resulting from the decline in production during 2000. The increase in production

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds from asset dispositions of \$15,201 received in 2000 were related to salvage income received on two wells plugged and abandoned during 1999. Proceeds from asset dispositions of \$17,049 received in 1999 were from equipment credits of \$10,226 received on two wells plugged and abandoned during 1999 and equipment credits of \$6,823 received on two active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$591,830, of which \$5,918 was distributed to the managing general partner and \$585,912 to the limited partners. In 1999, cash distributions to the partners were \$258,205, of which \$2,582 was distributed to the managing general partner and \$255,623 to the limited partners.

975

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 88-A CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

This document contains important information specific to Parker & Parsley 88-A Conv., L.P., and supplements the proxy statement/prospectus dated 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 88-A Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December

PARKER & PARSLEY 88-A CONV., L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners	(a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001	(a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA	(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment	(b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001	(b), (c)	
Book Value per \$1,000 Limited Partner Investment:		
-- as of March 31, 2001	(c)	\$
-- as of December 31, 2000	(c)	\$
Going Concern Value per \$1,000 Limited Partner Investment	(c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment	(c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment	(c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in the merger value calculation, less (2) partnership level general and administrative expenses.

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

983

PARKER & PARSLEY 88-A CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 88-A Conv., L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 50% to \$133,532 for the three months ended March 31, 2001 as compared to \$89,122 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 2,956 barrels of oil, 927 barrels of natural gas liquids ("NGLs") and 8,645 mcf of gas were sold, or 5,324 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,309 barrels of oil, 1,187 barrels of NGLs and 4,685 mcf of gas were sold, or 4,277 BOEs. Of the increase, 1,183 BOEs are attributable to two

6

984

wells reaching payout pursuant to the terms of the farmout agreements which increased the Partnership's net revenue interest in the wells.

The average price received per barrel of oil decreased \$1.92, or 7%, from \$27.90 for the three months ended March 31, 2000 to \$25.98 for the same period in 2001. The average price received per barrel of NGLs increased \$4.19, or 30%, from \$13.93 for the three months ended March 31, 2000 to \$18.12 for the same period in 2001. The average price received per mcf of gas increased 167% from \$1.73 during the three months ended March 31, 2000 to \$4.62 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$76 was recognized during the three months ended March 31, 2000 resulting from equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$57,647 for the three months ended March 31, 2001 as compared to \$53,950 for the same period in 2000, an increase of \$3,697, or 7%. This increase was due to increases in depletion, general and administrative expenses ("G&A") and production costs.

Production costs were \$44,328 for the three months ended March 31, 2001 and \$43,761 for the same period in 2000 resulting in a \$567 increase, or 1%. The increase was primarily due to increased lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements as noted above and higher production taxes associated with higher oil and gas prices, offset by decreases in well maintenance and workover costs.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 50% from \$2,674 for the three months ended March 31, 2000 to \$4,006 for the same period in 2001, primarily due to a higher percentage of the managing general partners' G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues attributable to commodity prices and the two wells reaching payout as noted above and an increase in the accrual for tax preparation fees.

Depletion was \$9,313 for the three months ended March 31, 2001 compared to \$7,515 for the same period in 2000, an increase of \$1,798, or 24%. This increase was primarily due to an increase in oil production of 647 barrels, which was principally due to the two wells reaching payout as noted above, for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$22,853 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$44,527, offset

7

985

by increases in production costs of \$567, G&A expenses of \$1,332 and working capital of \$19,775. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$14,119 to oil and gas receipts and \$30,408 resulting from an increase in production during 2001. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by a decrease in well maintenance and workover costs. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from asset dispositions of \$76 received during the three months ended March 31, 2000 were due to equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$79,705, of which \$797 was distributed to the managing general partner and \$78,908 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$47,796, of which \$478 was distributed to the managing general partner and \$47,318 to the limited partners.

Proposal to acquire partnerships

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARKER & PARSLEY 88-A CONV., L.P.
(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

987

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 88-A Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 88-A Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 88-A Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 88-A CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 88-A Conv., L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

993

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$118,823 related to its proved oil and gas properties during 1998.

8

994

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$78,614 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	
	-----	-----
Net income (loss) per statements of operations	\$ 219,454	\$
Depletion and depreciation amounts for tax reporting purposes less than provisions for financial reporting purposes	27,183	
Impairment of oil and gas properties for financial reporting purposes	-	
Other, net	(622)	
	-----	-----
Net income per Federal income tax returns	\$ 246,015	\$
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	
	-----	-----
Development costs	\$ 2,632	\$
	=====	=====

Capitalized oil and gas properties consist of the following:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 143,766	\$ 143,766
Completed wells and equipment	2,821,220	2,818,588
	-----	-----
	2,964,986	2,962,354
Accumulated depletion	(2,502,477)	(2,471,979)
	-----	-----
Net oil and gas properties	\$ 462,509	\$ 490,375
	=====	=====

9

995

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 64,830	\$
Reimbursement of general and administrative expenses	\$ 10,947	\$

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 88-A, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

Revenues:
 Proceeds from disposition of depreciable properties

Pioneer

9.09

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

All other revenues	24.24
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.09
Operating costs, direct costs and general and administrative expenses	24.24

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 50 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 88-A, L.P. is 22.674558% and 77.325442%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	245,336	365,36
Revisions	(90,082)	(90,31
Production	(16,899)	(25,36
	-----	-----
Net proved reserves at December 31, 1998	138,355	249,69
Revisions	118,130	203,39
Production	(17,052)	(27,41
	-----	-----
Net proved reserves at December 31, 1999	239,433	425,67
Revisions	3,043	(86,94
Production	(14,604)	(21,39
	-----	-----
Net proved reserves at December 31, 2000	227,872	317,33
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

per barrel of oil, \$12.95 per barrel of NGLs and \$7.75 per mcf of gas, discounted at 10% was approximately \$1,723,000 and undiscounted was \$3,515,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999
	-----	-----
Plains Marketing, L.P.	54%	50%
NGTS LLC	9%	10%
Genesis Crude Oil, L.P.	-	-
Western Gas Resources, Inc.	3%	6%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. was \$21,731, which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being

12

998

paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$3,793,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

13

999

PARKER & PARSLEY 88-A CONV., L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2000 compared to 1999

The Partnership's oil and gas revenues increased 49% to \$418,514 for 2000 as compared to \$280,717 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 9,403 barrels of oil, 5,201 barrels of natural gas liquids ("NGLs") and 21,399 mcf of gas were sold, or 18,171 barrel of oil equivalents ("BOEs"). In 1999, 9,977 barrels of oil, 7,075 barrels of NGLs and 27,417 mcf of gas were sold, or 21,622 BOEs. Due to the decline characteristics of the Partnership's oil and gas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.37, or 73%, from \$16.91 in 1999 to \$29.28 in 2000. The average price received per barrel of NGLs increased \$6.00, or 65%, from \$9.30 in 1999 to \$15.30 in 2000. The average price received per mcf of gas increased 77% from \$1.69 in 1999 to \$2.99 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$76 was recognized in 2000 resulting from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$203,772 as compared to \$186,418 in 1999, an increase of \$17,354, or 9%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$160,855 in 2000 and \$129,227 in 1999, resulting in a \$31,628 increase, or 24%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 47% from \$8,448 in 1999 to \$12,419 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$10,947 in 2000 and \$5,872 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$30,498 in 2000 as compared to \$48,743 in 1999, representing a decrease of \$18,245, or 37%. This decrease was primarily due to a 13,403 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1000

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 24% to \$280,717 from \$227,119 in 1998. The increase in revenues resulted from higher average prices received and an increase in production. In 1999, 9,977 barrels of oil, 7,075 barrels of NGLs and 27,417 mcf of gas were sold, or 21,622 BOEs. In 1998, 10,890 barrels of oil, 6,009 barrels of NGLs and 25,367 mcf of gas were sold, or 21,127 BOEs.

The average price received per barrel of oil increased \$3.32, or 24%, from \$13.59 in 1998 to \$16.91 in 1999. The average price received per barrel of NGLs increased \$2.73, or 42%, from \$6.57 in 1998 to \$9.30 in 1999. The average price received per mcf of gas increased 8% from \$1.56 in 1998 to \$1.69 in 1999.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

A gain on disposition of assets of \$1,875 was recognized during 1998 for credits received from the disposal of oil and gas equipment on a fully depleted well.

Total costs and expenses decreased in 1999 to \$186,418 as compared to \$383,123 in 1998, a decrease of \$196,705, or 51%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$129,227 in 1999 and \$149,228 in 1998, resulting in a \$20,001 decrease, or 13%. The decrease was due to declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 21% from \$6,995 in 1998 to \$8,448 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$5,872 in 1999 and \$5,659 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$118,823 related to its oil and gas properties during 1998.

Depletion was \$48,743 in 1999 compared to \$108,077 in 1998, representing a decrease of \$59,334, or 55%. This decrease was the result of an increase in proved reserves of 72,170 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum Industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1001

Liquidity and capital resources

Net Cash Provided by Operating Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net cash provided by operating activities increased \$108,537 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$139,776 and a decline in working capital of \$4,360, offset by increases in production costs paid of \$31,628 and G&A expenses paid of \$3,971. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$203,232 to oil and gas receipts, offset by \$63,456 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds from asset dispositions of \$76 received during 2000 were due to equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$239,144, of which \$2,391 was distributed to the managing general partner and \$236,753 to the limited partners. In 1999, cash distributions to the partners were \$96,923, of which \$969 was distributed to the managing general partner and \$95,954 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 88-A, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

88-A, L.P., and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 88-A, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PARKER & PARSLEY 88-A, L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 1. Organization and nature of operations

Parker & Parsley 88-A, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 50% to \$455,361 for the three months ended March 31, 2001 as compared to \$304,068 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 10,082 barrels of oil, 3,156 barrels of natural gas liquids ("NGLs") and 29,495 mcf of gas were sold, or 18,154 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 7,878 barrels of oil, 4,068 barrels of NGLs and

7

1012

15,987 mcf of gas were sold, or 14,611 BOEs. Of the increase, 3,880 BOEs are attributable to two wells reaching payout pursuant to the terms of the farmout agreements which increased the Partnership's net revenue interest in the wells.

The average price received per barrel of oil decreased \$1.92, or 7%, from \$27.90 for the three months ended March 31, 2000 to \$25.98 for the same period in 2001. The average price received per barrel of NGLs increased \$4.19, or 30%, from \$13.93 for the three months ended March 31, 2000 to \$18.12 for the same period in 2001. The average price received per mcf of gas increased 167% from \$1.73

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during the three months ended March 31, 2000 to \$4.62 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$259 was recognized during the three months ended March 31, 2000 resulting from equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$196,581 for the three months ended March 31, 2001 as compared to \$183,979 for the same period in 2000, an increase of \$12,602, or 7%. The increase was due to increases in depletion, general and administrative expenses ("G&A") and production costs.

Production costs were \$151,163 for the three months ended March 31, 2001 and \$149,276 for the same period in 2000, resulting in a \$1,887 increase, or 1%. The increase was primarily due to increased lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements as noted above and higher production taxes associated with higher oil and gas prices, offset by decreases in well maintenance and workover costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 50% from \$9,122 for the three months ended March 31, 2000 to \$13,661 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues attributable to commodity prices and the two wells reaching payout as noted above and an increase in the accrual for tax preparation fees.

Depletion was \$31,757 for the three months ended March 31, 2001 as compared to \$25,581 for the same period in 2000, an increase of \$6,176, or 24%. This increase was primarily due to an increase in oil production of 2,204 barrels, which was principally due to the two wells reaching payout as noted above, for the three months ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$104,369 for the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$151,512 in oil and gas sales receipts,

offset by increases in production costs of \$1,887, G&A expenses of \$4,539 and working capital of \$40,717. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$48,394 to oil and gas receipts and \$103,118 resulting from an increase in production during 2001. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

a decrease in well maintenance and workover costs. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2000 were related to upgrades of oil and gas equipment on active properties.

Proceeds from disposition of assets of \$259 received during the three months ended March 31, 2000 were due to equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$271,814, of which \$2,718 was distributed to the managing general partner and \$269,096 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$162,998, of which \$1,630 was distributed to the managing general partner and \$161,368 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

1017

PART I

1028

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 1. BUSINESS

Parker & Parsley 88-A, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 12,935 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segments other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 54% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and

ruptures and discharges of toxic substances or gases that could expose the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 40 oil and gas wells. At December 31, 2000, 39 wells were producing with one well plugged and abandoned.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

At March 8, 2001, the Partnership had 12,935 outstanding limited partnership interests held of record by 981 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations, are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$807,385 and \$327,220, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000 -----	1999 -----	1998 -----	1997 -----	1996 -----
Operating results:					
Oil and gas sales	\$ 1,428,374 =====	\$ 957,278 =====	\$ 774,533 =====	\$ 1,157,862 =====	\$ 1,411,5 =====
Impairment of oil and gas properties	\$ - =====	\$ - =====	\$ 405,308 =====	\$ 699,976 =====	\$ =====
Net income (loss)	\$ 749,290 =====	\$ 331,033 =====	\$ (514,812) =====	\$ (331,171) =====	\$ 600,6 =====
Allocation of net income (loss):					
Managing general partner	\$ 7,493 =====	\$ 3,310 =====	\$ (5,148) =====	\$ (3,312) =====	\$ 6,0 =====
Limited partners	\$ 741,797 =====	\$ 327,723 =====	\$ (509,664) =====	\$ (327,859) =====	\$ 594,6 =====
Limited partners' net income (loss) per limited partnership interest	\$ 57.35 =====	\$ 25.34 =====	\$ (39.40) =====	\$ (25.35) =====	\$ 45. =====
Limited partners' cash distributions per limited partnership interest	\$ 62.42 =====	\$ 25.30 =====	\$ 27.90 =====	\$ 50.68 =====	\$ 57. =====
At year end:					
Identifiable assets	\$ 1,994,828 =====	\$ 2,065,363 =====	\$ 2,059,502 =====	\$ 2,953,618 =====	\$3,940,2 =====

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 49% to \$1,428,374 for 2000 as compared to \$957,278 in 1999. The increase in revenues resulted from higher average prices received, offset by a decrease in production. In 2000, 32,063 barrels of oil, 17,745 barrels of natural gas liquids ("NGLs") and 72,965 mcf of gas were sold, or 61,969 barrel of oil equivalents ("BOEs"). In 1999, 34,020 barrels of oil, 24,121 barrels of NGLs and 93,498 mcf of gas were sold, or 73,724 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.37, or 73%, from \$16.91 in 1999 to \$29.28 in 2000. The average price received per barrel of NGLs increased \$6.00, or 65%, from \$9.30 in 1999 to \$15.30 in 2000. The average price received per mcf of gas increased 77% from \$1.69 in 1999 to \$2.99 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$259 was recognized in 2000 resulting from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$695,576 as compared to \$635,628 in 1999, an increase of \$59,948, or 9%. The increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$548,561 in 2000 and \$440,670 in 1999, resulting in an increase of \$107,891, or 24%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 50% from \$28,692 in 1999 to \$42,987 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$37,340 in 2000 and \$20,027 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$104,028 in 2000 as compared to \$166,266 in 1999, representing a decrease of \$62,238, or 37%. This decrease was primarily due to a 45,809 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 24% to \$957,278 from \$774,533 in 1998.

5

1021

The increase in revenues resulted from higher average prices received and an increase in production. In 1999, 34,020 barrels of oil, 24,121 barrels of NGLs and 93,498 mcf of gas were sold, or 73,724 BOEs. In 1998, 37,135 barrels of oil, 20,500 barrels of NGLs and 86,501 mcf of gas were sold, or 72,052 BOEs.

The average price received per barrel of oil increased \$3.32, or 24%, from \$13.59 in 1998 to \$16.91 in 1999. The average price received per barrel of NGLs increased \$2.73, or 42%, from \$6.57 in 1998 to \$9.30 in 1999. The average price received per mcf of gas increased 8% from \$1.56 in 1998 to \$1.69 in 1999.

A gain on disposition of assets of \$6,393 was recognized in 1998 for credits received from the disposal of oil and gas equipment on a fully depleted well.

Total costs and expenses decreased in 1999 to \$635,628 as compared to \$1,306,368 in 1998, a decrease of \$670,740, or 51%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A expenses.

Production costs were \$440,670 in 1999 and \$508,919 in 1998, resulting in a \$68,249 decrease, or 13%. The decrease was due to reductions in well maintenance costs and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 22% from \$23,611 in 1998 to \$28,692 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$20,027 in 1999 and \$19,297 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$405,308 related to its oil and gas properties during 1998.

Depletion was \$166,266 in 1999 compared to \$368,530 in 1998, representing a decrease of \$202,264, or 55%. This decrease was the result of an increase in proved reserves of 246,048 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but

6

1022

to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$401,553 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$477,946 and a decline in working capital of \$45,793, offset by increases in production costs paid of \$107,891 and G&A expenses paid of \$14,295. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$694,183 to oil and gas receipts, offset by \$216,237 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for oil and gas equipment upgrades on active properties.

Proceeds from asset dispositions of \$259 received in 2000 were due to equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$815,540, of which \$8,155 was distributed to the managing general partner and \$807,385 to the limited partners. In 1999, cash distributions to the partners were \$330,525, of which

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$3,305 was distributed to the managing general partner and \$327,220 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 88-A, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 88-A, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 88-A, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 88-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 88-A, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

14

1030

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$405,308 related to its proved oil and gas properties during 1998.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$267,761 greater than the tax basis at December 31, 2000.

15

1031

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 749,290	\$ 331,033	\$ (514,812)

	-----	-----
Net oil and gas properties	\$ 1,576,872	\$ 1,671,927
	=====	=====

16

1032

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 221,084	\$ 211,623	\$ 215,684
Reimbursement of general and administrative expenses	\$ 37,340	\$ 20,027	\$ 19,297

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 88-A Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnership
	-----	-----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.9090
All other revenues	24.242425%	75.75757
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.9090
Operating costs, direct costs and general and		

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

administrative expenses 24.242425% 75.75757

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 173 limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 88-A Conv., L.P. is 77.325442% and 22.674558%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

17

1033

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	836,39	1,245,602
Revisions	(307,084)	(307,863)
Production	(57,635)	(86,501)
	-----	-----
Net proved reserves at December 31, 1998	471,675	851,238
Revisions	402,731	693,436
Production	(58,141)	(93,498)
	-----	-----
Net proved reserves at December 31, 1999	816,265	1,451,176
Revisions	10,578	(296,099)
Production	(49,808)	(72,965)
	-----	-----
Net proved reserves at December 31, 2000	777,035	1,082,112
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$12.95 per barrel of NGLs and \$7.75 per mcf of gas, discounted at 10% was approximately \$5,875,000 and undiscounted was \$11,988,000.

Numerous uncertainties exist in estimating quantities of proved reserves

1045

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31		
	2000	1999	1998

	=====	=====	=====

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	54%	50%	-
NGTS LLC	9%	10%	3%
Genesis Crude Oil, L.P.	-	-	55%
Western Gas Resources, Inc.	3%	6%	22%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$74,114, which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general

19

1035

partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$12,935,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1036

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

1048

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Name -----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 173 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

1039

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard			

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

industry operating agreements	\$ 221,084	\$ 211,623	\$ 215,684
Reimbursement of general and administrative expenses	\$ 37,340	\$ 20,027	\$ 19,297

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 88-B CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 88-B Conv., L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 88-B Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners

 - the term of the partnership

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment	(c), (f)	\$

-
- (a) Stated in thousands.
 - (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
 - (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
 - (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
 - (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
 - (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 88-B CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 88-B Conv., L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 13% to \$132,577 for the three months ended March 31, 2001 as compared to \$117,117 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 2,743 barrels of oil, 940 barrels of natural gas liquids ("NGLs") and 3,500 mcf of gas were sold, or 4,266 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 3,346 barrels of oil, 1,321 barrels of NGLs and 5,699 mcf of gas were sold, or 5,617 BOEs.

6

1052

Of the decrease, 1,125 BOEs are attributable to three wells reaching payout pursuant to the terms of the farmout agreements which reduced the Partnership's net revenue interest in the wells.

The average price received per barrel of oil increased \$3.39, or 13%, from \$26.41 for the three months ended March 31, 2000 to \$29.80 for the same period in 2001. The average price received per barrel of NGLs increased \$5.63, or 39%, from \$14.34 for the three months ended March 31, 2000 to \$19.97 for the same period in 2001. The average price received per mcf of gas increased 428% from \$1.73 during the three months ended March 31, 2000 to \$9.14 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$52,042 for the three months ended March 31, 2001 as compared to \$48,254 for the same period in 2000, an increase of \$3,788, or 8%. This increase was due to an increase in production costs, offset

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

by declines in depletion and general and administrative expenses ("G&A").

Production costs were \$42,392 for the three months ended March 31, 2001 and \$36,623 for the same period in 2000 resulting in a \$5,769 increase, or 16%. The increase in production costs was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production, offset by a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of a farmout agreements as noted above.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A decreased 9% from \$3,627 for the three months ended March 31, 2000 to \$3,314 for the same period in 2001.

Depletion was \$6,336 for the three months ended March 31, 2001 compared to \$8,004 for the same period in 2000, a decrease of \$1,668, or 21%. This decrease was primarily due to a decrease in oil production of 603 barrels for the period ended March 31, 2001 as compared to the same period in 2000 and positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$23,647 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$15,715 and reductions in working capital of \$13,388 and G&A expenses of \$313, offset by an

7

1053

increase in production costs of \$5,769. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$61,429 to oil and gas receipts, offset by \$45,714 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$213 recognized during the three months ended March 31, 2001 were due to equipment credits received on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$106,165, of which \$1,062 was distributed to the managing general partner and \$105,103 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$66,905, of which \$669 was distributed

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to the managing general partner and \$66,236 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) " Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 88-B Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 88-B Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 88-B Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

1060

PARKER & PARSLEY 88-B CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 88-B Conv., L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in

1070

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1061

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

1071

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$156,111 related to its proved oil and gas properties during 1998.

8

1062

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$30,771 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----
Net income (loss) per statements of operations	\$ 327,306	\$ 96,268
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	23,646	38,232

1072

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Impairment of oil and gas properties for financial reporting purposes	-	-
Other, net	(1,011)	3,526
	-----	-----
Net income per Federal income tax returns	\$ 349,941	\$ 138,026
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999
	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 64,694	\$ 63,771	\$
Reimbursement of general and administrative expenses	\$ 13,920	\$ 5,293	\$

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 88-B, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)

Revenues:	
Proceeds from disposition of depreciable properties	9.09091%
All other revenues	24.242425%
Costs and expenses:	
Lease acquisition costs, drilling and completion costs	9.09091%
Operating costs, direct costs and general and administrative expenses	24.242425%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 20 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 88-B, L.P. is 28.880064% and 71.119936%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)

Revisions	46,611
Production	(18,572)

Net proved reserves at December 31, 2000	273,248
	=====

10

1064

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.59 per barrel of NGLs and \$7.85 per mcf of gas, discounted at 10% was approximately \$2,098,000 and undiscounted was \$4,398,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----
Plains Marketing, L.P.	50%	44%
Genesis Crude Oil, L.P.	-	-
Western Gas Resources, Inc.	3%	5%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$25,238 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

12

1066

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$3,636,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 84% to \$535,228 for 2000 as compared to \$291,390 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 13,209 barrels of oil, 5,363 barrels of natural gas liquids ("NGLs") and 21,781 mcf of gas were sold, or 22,202 barrel of oil equivalents ("BOEs"). In 1999, 11,400 barrels of oil, 5,586 barrels of NGLs and 23,221 mcf of gas were sold, or 20,856 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.12, or 71%, from \$17.17 in 1999 to \$29.29 in 2000. The average price received per barrel of NGLs increased \$5.99, or 60%, from \$10.03 in 1999 to \$16.02 in 2000. The average price received per mcf of gas increased 69% from \$1.70 in 1999 to \$2.87 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$7,186 was recognized during 2000. The gain was comprised of \$5,981 received from the sale of equipment on one well plugged and abandoned during the current period and \$1,205 from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$220,151 as compared to \$197,819 in 1999, an increase of \$22,332, or 11%. The increase was due to increases in production costs, general and administrative expenses ("G&A") and abandoned property costs, offset by a decline in depletion.

Production costs were \$174,071 in 2000 and \$146,805 in 1999, resulting in a \$27,266 increase, or 19%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 84% from \$8,615 in 1999 to \$15,875 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$13,920 in 2000 and \$5,293 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$27,450 in 2000 as compared to \$42,399 in 1999, representing a decrease of \$14,949, or 35%. This decrease was primarily due to a 35,962 barrels of oil increase in proved reserves during 2000 due to higher commodity prices, offset by an increase in oil production of 1,809 barrels for the period ended December 31, 2000 compared to the same period in 1999.

Abandoned property costs of \$2,755 were incurred during 2000 due to the plugging and abandonment of one well during

1068

the current period.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 24% to \$291,390 from \$234,942 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 11,400 barrels of oil, 5,586 barrels of NGLs and 23,221 mcf of gas were sold, or 20,856 BOEs. In 1998, 12,653 barrels of oil, 4,957 barrels of NGLs and 21,214 mcf of gas were sold, or 21,146 BOEs.

The average price received per barrel of oil increased \$3.93, or 30%, from \$13.24 in 1998 to \$17.17 in 1999. The average price received per barrel of NGLs increased \$3.12, or 45%, from \$6.91 in 1998 to \$10.03 in 1999. The average price received per mcf of gas increased 9% from \$1.56 in 1998 to \$1.70 in 1999.

Total costs and expenses decreased in 1999 to \$197,819 as compared to \$436,801 in 1998, a decrease of \$238,982, or 55%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$146,805 in 1999 and \$158,704 in 1998, resulting in an \$11,899 decrease, or 7%. The decrease was due to declines in well maintenance costs, workover costs and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 21% from \$7,091 in 1998 to \$8,615 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$5,293 in 1999 and \$5,608 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$156,111 related to its oil and gas properties during 1998.

Depletion was \$42,399 in 1999 compared to \$114,895 in 1998, representing a decrease of \$72,496, or 63%. This decrease was the result of a combination of factors that included an increase in proved reserves of 100,955 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,253 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1069

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$191,512 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$246,184, offset by increases in production costs paid of \$27,266, G&A expenses paid of \$7,260 abandoned property costs paid of \$2,755 and working capital of \$17,391. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$200,923 to oil and gas receipts and an increase of \$45,261 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were related to equipment upgrades on active properties.

Proceeds from disposition of assets of \$7,186 were recognized during 2000. The proceeds were comprised of \$5,981 received from the sale of equipment on one well plugged and abandoned during the current period and \$1,205 from equipment credits received on one active well. Proceeds of \$4,369 during 1999 were primarily related to equipment dispositions on one oil and gas well that is temporarily abandoned.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$319,176, of which \$3,192 was distributed to the managing general partner and \$315,984 to the limited partners. In 1999, cash distributions to the partners were \$106,208, of which \$1,062 was distributed to the managing general partner and \$105,146 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 88-B, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 88-B, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 88-B, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment
(c), (f)

\$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 88-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 88-B, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 13% to \$326,397 for the three months ended March 31, 2001 as compared to \$288,612 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 6,753 barrels of oil, 2,315 barrels of natural gas liquids ("NGLs") and 8,631 mcf of gas were sold, or 10,507 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 8,236 barrels of oil, 3,267 barrels of NGLs and

7

1080

14,019 mcf of gas were sold, or 13,840 BOEs. Of the decrease, 2,758 BOEs are attributable to three wells reaching payout pursuant to the terms of the farmout agreements which reduced the Partnership's net revenue interest in the wells.

The average price received per barrel of oil increased \$3.39, or 13%, from \$26.41 for the three months ended March 31, 2000 to \$29.80 for the same period in 2001. The average price received per barrel of NGLs increased \$5.63, or 39%, from \$14.34 for the three months ended March 31, 2000 to \$19.97 for the same period in 2001. The average price received per mcf of gas increased 428% from \$1.73 during the three months ended March 31, 2000 to \$9.14 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$128,179 for the three months ended March 31, 2001 as compared to \$118,857 for the same period in 2000, an increase of \$9,322, or 8%. The increase was primarily due to an increase in production costs, offset by decreases in depletion and general and administrative expenses ("G&A").

Production costs were \$104,442 for the three months ended March 31, 2001 and \$90,211 for the same period in 2000, resulting in a \$14,231 increase, or 16%. The increase in production costs was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production, offset by a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements as noted above.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A decreased 9% from \$8,938 for the three months ended March 31, 2000 to \$8,160 for the same period in 2001.

Depletion was \$15,577 for the three months ended March 31, 2001 as compared to \$19,708 for the same period in 2000, a decrease of \$4,131, or 21%. This decrease was primarily due to a decrease in oil production of 1,483 barrels for the three months ended March 31, 2001 compared to the same period in 2000 and positive

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$61,136 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$38,414 in oil and gas sales receipts and reductions of \$778 in G&A expenses and \$36,175 in working capital, offset by an increase in production costs of \$14,231. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$150,881 to oil and gas receipts, offset by \$112,467 resulting from

8

1081

the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 were for equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$524 recognized during the three months ended March 31, 2001 were due to equipment credits received on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$261,441, of which \$2,614 was distributed to the managing general partner and \$258,827 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$164,763, of which \$1,648 was distributed to the managing general partner and \$163,115 to the limited partners.

Proposal to acquire partnerships

On April 18, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement with the SEC proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Pioneer USA is the sole or managing general partner of the partnerships. The preliminary proxy statement is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partners in each partnership and the resolution of SEC review comments. If approved, Pioneer anticipates closing the mergers during the third quarter of 2001.

ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PART I

ITEM 1. BUSINESS

Parker & Parsley 88-B, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 8,954 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 50% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 43 oil and gas wells. Two wells have been plugged and abandoned. At December 31, 2000, 41 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 8,954 outstanding limited partnership interests held of record by 690 subscribers. There is no established public

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$778,145 and \$258,933, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 84% to \$1,318,092 for 2000 as compared to \$717,449 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 32,524 barrels of oil, 13,205 barrels of natural gas liquids ("NGLs") and 53,620 mcf of gas were sold, or 54,666 barrel of oil equivalents ("BOEs"). In 1999, 28,078 barrels of oil, 13,752 NGLs and 57,190 mcf of gas were sold, or 51,362 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.12, or 71%, from \$17.17 in 1999 to \$29.29 in 2000. The average price received per barrel of NGLs increased \$5.99, or 60%, from \$10.03 in 1999 to \$16.02 in 2000. The average price received per mcf of gas increased 69% from \$1.70 in 1999 to \$2.87 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$17,697 was recognized during 2000. The gain was comprised of \$14,729 received from the sale of equipment on one well plugged and abandoned during the current period and \$2,968 from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$542,703 as compared to \$487,566 in 1999, an increase of \$55,137, or 11%. The increase was due to increases in production costs, general and administrative expenses ("G&A") and abandoned property costs, offset by a decline in depletion.

Production costs were \$428,633 in 2000 and \$361,482 in 1999, resulting in an increase of \$67,151, or 19%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 83% from \$21,650 in 1999 to \$39,725 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$34,281 in 2000 and \$13,039 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$67,561 in 2000 as compared to \$104,434 in 1999, representing a decrease of \$36,873, or 35%. This decrease was primarily due to a 88,489 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices, offset by an increase in oil production of 4,446 barrels for the period ended December 31, 2000 compared to the same period in 1999.

Abandoned property costs of \$6,784 incurred in 2000 were related to the plugging and abandonment of one well during the current year.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 24% to \$717,449 from \$578,573 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 28,078 barrels of oil, 13,752 barrels of NGLs and 57,190 mcf of gas were sold, or 51,362 BOEs. In 1998, 31,155 barrels of oil, 12,210 NGLs and 52,254 mcf of gas were sold, or 52,074 BOEs.

The average price received per barrel of oil increased \$3.93, or 30%, from \$13.24 in 1998 to \$17.17 in 1999. The average price received per barrel of NGLs increased \$3.12, or 45%, from \$6.91 in 1998 to \$10.03 in 1999. The average price received per mcf of gas increased 9% from \$1.56 in 1998 to \$1.70 in 1999.

Total costs and expenses decreased in 1999 to \$487,566 as compared to \$1,075,163 in 1998, a decrease of \$587,597, or 55%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$361,482 in 1999 and \$390,835 in 1998, resulting in a \$29,353 decrease, or 8%. The decrease was primarily due to declines in well maintenance costs, workover costs and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 25% from \$17,315 in 1998 to \$21,650 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$13,039 in 1999 and \$13,810 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$383,951 related to its oil and gas properties during 1998.

Depletion was \$104,434 in 1999 compared to \$283,062 in 1998. This represented a decrease of \$178,628, or 63%. This decrease was the result of a combination of factors that included an increase in proved reserves of 248,642 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 3,077 barrels for the period ended

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$512,129 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$606,337, offset by increases in production costs paid of \$67,151, G&A expenses paid of \$18,075, abandoned property costs paid of \$6,784 and working capital of \$2,198. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$495,153 to oil and gas receipts and an increase of \$111,184 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to the upgrades of oil and gas equipment on active properties.

Proceeds from disposition of assets of \$17,697 were recognized during 2000. The proceeds were comprised of \$14,729 received from the sale of equipment on one well plugged and abandoned during the current period and \$2,968 from equipment credits received on active wells. Proceeds of \$10,758 recognized during 1999 were related to equipment disposals on one temporarily abandoned oil and gas well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$786,005, of which \$7,860 was

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

distributed to the managing general partner and \$778,145 to the limited partners. In 1999, cash distributions to the partners were \$261,548, of which \$2,615 was distributed to the managing general partner and \$258,933 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 88-B, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 88-B, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 88-B, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

1097

PARKER & PARSLEY 88-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 88-B, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the

15

1098

respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$383,951 related to its proved oil and gas properties during 1998.

16

1099

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$77,883 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 805,539	\$236,642	\$(488,631)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	58,194	94,173	274,063
Impairment of oil and gas properties for financial reporting purposes	-	-	383,951
Other	(2,494)	8,701	1,161
	-----	-----	-----
Net income per Federal income tax returns	\$ 861,239 =====	\$339,516 =====	\$ 170,544 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 6,430 =====	\$ 8,363 =====	\$ 15,067 =====

Capitalized oil and gas properties consist of the following:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 426,682	\$ 439,249
Completed wells and equipment	6,527,863	6,689,822
	-----	-----
	6,954,545	7,129,071
Accumulated depletion	(5,969,972)	(6,083,367)
	-----	-----
Net oil and gas properties	\$ 984,573 =====	\$ 1,045,704 =====

17

1100

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$159,314	\$157,042	\$150,985
Reimbursement of general and administrative expenses	\$ 34,281	\$ 13,039	\$ 13,810

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 88-B Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1) -----	Partnership -----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909
All other revenues	24.242425%	75.757575
Costs and expenses:		
Lease acquisition costs, drilling and completion		

1109

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

costs and all other costs	9.09091%	90.90909
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 94 limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 88-B Conv., L.P. is 71.119936% and 28.880064%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

18

1101

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	528,956	612,323
Revisions	(215,651)	(183,598)
Production	(43,365)	(52,254)
	-----	-----
Net proved reserves at December 31, 1998	269,940	376,471
Revisions	375,777	553,985
Production	(41,830)	(57,190)
	-----	-----
Net proved reserves at December 31, 1999	603,887	873,266
Revisions	114,704	59,721
Production	(45,729)	(53,620)
	-----	-----
Net proved reserves at December 31, 2000	672,862	879,367
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.59 per barrel of NGLs and \$7.85 per mcf of gas, discounted at 10% was approximately \$5,167,000 and undiscounted was \$10,831,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should

1110

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,		
	2000	1999	1998

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	50%	44%	-
Genesis Crude Oil, L.P.	-	-	49%
Western Gas Resources, Inc.	3%	5%	17%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$62,153 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

1103

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$8,954,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

1104

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Rich Dealy

34

Vice President and Chief Accounting
Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

22

1105

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

1114

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

23

1106

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 25% of its operating and general and administrative expenses. In return, Pioneer USA is allocated approximately 25% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 94 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

1107

24

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreement	\$159,314	\$ 157,042	\$150,985
Reimbursement of general and administrative expenses	\$ 34,281	\$ 13,039	\$ 13,810

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 88-C CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 88-C Conv., L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 88-C Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 88-C CONV., L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

-- as of March 31, 2001(c)

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as any value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 88-C Conv., L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 18% to \$112,186 for the three months ended March 31, 2001 as compared to \$95,029 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 2,158 barrels of oil, 953 barrels of natural gas liquids ("NGLs") and 3,530 mcf of gas were sold, or 3,699 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,693 barrels of oil, 1,122 barrels of NGLs and 4,769 mcf of gas were sold, or 4,610 BOEs. Of the decrease, 881 BOEs are attributable to three wells reaching payout pursuant to the terms of the farmout agreements which reduced the Partnership's net revenue interest in the wells.

6

1120

The average price received per barrel of oil increased \$3.74, or 14%, from \$26.37 for the three months ended March 31, 2000 to \$30.11 for the same period in 2001. The average price received per barrel of NGLs increased \$5.19, or 36%, from \$14.26 for the three months ended March 31, 2000 to \$19.45 for the same period in 2001. The average price received per mcf of gas increased 378% from \$1.70 during the three months ended March 31, 2000 to \$8.12 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$45,356 for the three months ended March 31, 2001 as compared to \$43,879 for the same period in 2000, an increase of \$1,477, or 3%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$35,748 for the three months ended March 31, 2001 and \$34,061 for the same period in 2000 resulting in a \$1,687 increase, or 5%. The increase was primarily due to higher production taxes associated with higher oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and gas prices and additional workover and well maintenance costs incurred to stimulate well production, offset by a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements as noted above.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 32% from \$2,851 for the three months ended March 31, 2000 to \$3,766 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$5,842 for the three months ended March 31, 2001 compared to \$6,967 for the same period in 2000, a decrease of \$1,125, or 16%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices and a decline in oil production of 535 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$22,812 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$17,346 and a reduction of \$8,068 in working capital, offset by increases in production costs of \$1,687 and G&A expenses of \$915. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$46,804 to oil and gas receipts, offset by \$29,458 resulting from the

7

1121

decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover costs incurred to stimulate well production, offset by a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$168 recognized during the three months ended March 31, 2001 were due to equipment credits received on one active well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$85,826, of which \$858 was distributed to the managing general partner and \$84,968 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$56,445, of which \$564 was distributed to the managing general partner and \$55,881 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1123

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 88-C Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 88-C Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

1129

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 88-C Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

1128

PARKER & PARSLEY 88-C CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 88-C Conv., L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1129

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$119,715 related to its proved oil and gas properties during 1998.

8

1130

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$35,215 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	
	-----	-----	-----
Net income (loss) per statements of operations	\$ 261,490	\$ 69,459	\$ (1
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	21,929	37,157	
Impairment of oil and gas properties for financial reporting purposes	-	-	1
Other, net	(822)	3,106	
	-----	-----	-----
Net income per Federal income tax returns	\$ 282,597	\$ 109,722	\$
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 2,067	\$ 3,851	\$ 5,337
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

2000	1999
-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proved properties:		
Property acquisition costs	\$ 124,434	\$ 128,446
Completed wells and equipment	2,333,684	2,385,378
	-----	-----
	2,458,118	2,513,824
Accumulated depletion	(2,078,258)	(2,110,906)
	-----	-----
Net oil and gas properties	\$ 379,860	\$ 402,918
	=====	=====

9

1131

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 58,509	\$ 56,225	\$ 56,225
Reimbursement of general and administrative expenses	\$ 9,514	\$ 1,096	\$ 1,096

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 88-C, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
	-----	-----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and		

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

administrative expenses 24.242425% 75.757575%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and ten limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 88-C, L.P. is 58.387538% and 41.612462%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

1132

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	181,762	227,096
Revisions	(75,078)	(70,056)
Production	(14,859)	(19,764)
	-----	-----
Net proved reserves at December 31, 1998	91,825	137,276
Revisions	124,253	193,483
Production	(14,136)	(21,119)
	-----	-----
Net proved reserves at December 31, 1999	201,942	309,640
Revisions	35,970	23,002
Production	(15,453)	(19,618)
	-----	-----
Net proved reserves at December 31, 2000	222,459	313,024
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.56 per barrel of NGLs and \$7.78 per mcf of gas, discounted at 10% was approximately \$1,724,000 and undiscounted was approximately \$3,597,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	52%	46%	-
Genesis Crude Oil, L.P.	-	-	51%
Western Gas Resources, Inc.	4%	6%	21%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$21,565 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's

1134

revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$3,411,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

1135

PARKER & PARSLEY 88-C CONV., L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 80% to \$443,642 for 2000 as compared to \$246,242 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 10,646 barrels of oil, 4,807 barrels of natural gas liquids ("NGLs") and 19,618 mcf of gas were sold, or 18,723 barrel of oil equivalents ("BOEs"). In 1999, 9,260 barrels of oil, 4,876 barrels of NGLs and 21,119 mcf of gas were sold, or 17,656 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.09, or 70%, from \$17.24 in 1999 to \$29.33 in 2000. The average price received per barrel of NGLs increased \$5.41, or 52%, from \$10.42 in 1999 to \$15.83 in 2000. The average price received per mcf of gas increased 66% from \$1.70 in 1999 to \$2.82 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Gain on disposition of assets of \$5,650 recognized in 2000 was due to equipment credits received from salvage income of \$4,703 on one well plugged and abandoned during the current year and \$947 on one fully depleted well.

Total costs and expenses increased in 2000 to \$192,070 as compared to \$178,895 in 1999, an increase of \$13,175, or 7%. The increase was primarily due to increases in production costs, general and administrative expenses ("G&A") and abandoned property costs, offset by a decline in depletion.

Production costs were \$151,650 in 2000 and \$131,165 in 1999, resulting in a \$20,485 increase, or 16%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

Abandoned property costs of \$2,166 during 2000 were related to the plugging and abandonment of one well during the current year.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 82% from \$7,217 in 1999 to \$13,129 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$9,514 in 2000 and \$1,096 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$25,125 in 2000 as compared to \$40,513 in 1999, representing a decrease of \$15,388, or 38%. This decrease was primarily due to a 26,409 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices, offset by an increase in oil production of 1,386 barrels for the period ended December 31, 2000 compared to the same period in 1999.

1136

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 23% to \$246,242 from \$200,460 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 9,260 barrels of oil, 4,876 barrels of NGLs and 21,119 mcf of gas were sold, or 17,656 BOEs. In 1998, 10,457 barrels of oil, 4,402 barrels of NGLs and 19,764 mcf of gas were sold, or 18,153 BOEs.

The average price received per barrel of oil increased \$3.94, or 30%, from \$13.30 in 1998 to \$17.24 in 1999. The average price received per barrel of NGLs increased \$3.48, or 50%, from \$6.94 in 1998 to \$10.42 in 1999. The average price received per mcf of gas increased 10% from \$1.55 in 1998 to \$1.70 in 1999.

A gain on disposition of assets of \$2,175 was recognized during 1998 from equipment credits on a well plugged and abandoned in 1997.

Total costs and expenses decreased in 1999 to \$178,895 as compared to \$366,001 in 1998, a decrease of \$187,106, or 51%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

costs, offset by an increase in G&A.

Production costs were \$131,165 in 1999 and \$142,438 in 1998, resulting in an \$11,273 decrease, or 8%. The decrease was due to declines in well maintenance costs, workover expenses and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 20% from \$5,997 in 1998 to \$7,217 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$1,096 in 1999 and \$2,651 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$119,715 related to its oil and gas properties during 1998.

Depletion was \$40,513 in 1999 compared to \$97,851 in 1998, representing a decrease of \$57,338, or 59%. This decrease was the result of a combination of factors that included an increase in proved reserves of 79,930 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,197 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1137

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$155,222 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and gas sales receipts of \$199,556, offset by increases in production costs paid of \$20,485, G&A expenses paid of \$5,912, abandoned property costs paid of \$2,166 and working capital of \$15,771. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$164,214 to oil and gas receipts and an increase of \$35,342 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds from disposition of assets of \$5,650 recognized in 2000 was due to equipment credits received from salvage income of \$4,703 on one well plugged and abandoned during the current year and \$947 on one fully depleted well. Proceeds from disposition of assets of \$3,435 during 1999 were received from equipment credits on active wells.

Net Cash Used in Financing Activities

For 2000, cash distributions to the partners were \$260,376, of which \$2,604 was distributed to the managing general partner and \$257,772 to the limited partners. In 1999, cash distributions to the partners were \$74,621, of which \$746 was distributed to the managing general partner and \$73,875 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 88-C, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 88-C, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 88-C, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001(a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment(b), (c)	\$

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 88-C, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 88-C, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 17% to \$79,813 for the three months ended March 31, 2001 as compared to \$68,027 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 1,537 barrels of oil, 674 barrels of natural gas liquids ("NGLs") and 2,517 mcf of gas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

were sold, or 2,631 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 1,930 barrels of oil, 799 barrels of NGLs and 3,392 mcf of

6

1147

gas were sold, or 3,294 BOEs. Of the decrease, 631 BOEs are attributable to three wells reaching payout pursuant to the terms of the farmout agreements which reduced the Partnership's net revenue interest in the wells.

The average price received per barrel of oil increased \$3.74, or 14%, from \$26.37 for the three months ended March 31, 2000 to \$30.11 for the same period in 2001. The average price received per barrel of NGLs increased \$5.19, or 36%, from \$14.26 for the three months ended March 31, 2000 to \$19.45 for the same period in 2001. The average price received per mcf of gas increased 378% from \$1.70 during the three months ended March 31, 2000 to \$8.12 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$32,014 for the three months ended March 31, 2001 as compared to \$31,314 for the same period in 2000, an increase of \$700, or 2%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$25,472 for the three months ended March 31, 2001 and \$24,290 for the same period in 2000 resulting in a \$1,182 increase, or 5%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional workover costs incurred to stimulate well production, offset by a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements as noted above.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 17% from \$2,041 for the three months ended March 31, 2000 to \$2,394 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$4,148 for the three months ended March 31, 2001 compared to \$4,983 for the same period in 2000, a decrease of \$835, or 17%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices and a decline in oil production of 393 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$15,568 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$11,808 and a reduction of \$5,295 in working capital, offset by increases in production costs

1148

of \$1,182 and G&A expenses of \$353. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$33,173 to oil and gas receipts, offset by \$21,365 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover costs incurred to stimulate well production, offset by a decline in lease operating and production taxes attributable to the wells that reached payout pursuant to the terms of the farmout agreements. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active properties.

Proceeds from disposition of assets of \$120 recognized during the three months ended March 31, 2001 were due to equipment credits received on one active well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$61,168, of which \$612 was distributed to the managing general partner and \$60,556 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$40,228, of which \$402 was distributed to the managing general partner and \$39,826 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated

results described in the forward looking statements.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 88-C, L.P.

(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 88-C, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 88-C, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 88-C, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 88-C, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the

respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$85,160 related to its proved oil and gas properties during 1998.

8

1157

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$24,633 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

2000

1999

1998

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----	-----
Net income (loss) per statements of operations	\$ 185,992	\$ 49,060	\$ (114,54
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	15,635	26,451	67,89
Impairment of oil and gas properties for financial reporting purposes	--	--	85,16
Other, net	(560)	2,209	(3,30
	-----	-----	-----
Net income per Federal income tax returns	\$ 201,067	\$ 77,720	\$ 35,20
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	-----
Development costs	\$ 1,473	\$ -----
	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 88,684	\$ 91,543
Completed wells and equipment	1,663,203	1,700,045
	-----	-----
	1,751,887	1,791,588
Accumulated depletion	(1,481,594)	(1,504,855)
	-----	-----
Net oil and gas properties	\$ 270,293	\$ 286,733
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$41,699	\$40,071	\$39,194
Reimbursement of general and administrative expenses	\$ 6,776	\$ 782	\$ 1,889

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, Parker & Parsley 88-C Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA(1) -----	Partnerships (2) -----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and five limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 88-C Conv., L.P. is 41.612462% and 58.387538%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

established by the Securities and Exchange Commission.

10

1159

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	129,544	161,856
Revisions	(53,503)	(49,926)
Production	(10,596)	(14,091)
	-----	-----
Net proved reserves at December 31, 1998	65,445	97,839
Revisions	88,560	137,904
Production	(10,071)	(15,049)
	-----	-----
Net proved reserves at December 31, 1999	143,934	220,694
Revisions	25,631	16,368
Production	(11,023)	(13,979)
	-----	-----
Net proved reserves at December 31, 2000	158,542	223,083
	=====	=====

As of December 31, 2000 the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.56 per barrel of NGLs and \$7.78 per mcf of gas, discounted at 10% was approximately \$1,229,000 and undiscounted was \$2,564,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	19 -----
Plains Marketing, L.P.	52%	45%	
Genesis Crude Oil, L.P.	-	-	
Western Gas Resources, Inc.	4%	6%	

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$15,388 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's

revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

subscription agreements for aggregate capital contributions of \$2,431,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

PARKER & PARSLEY 88-C, L.P. (A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 80% to \$316,382 for 2000 as compared to \$175,483 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 7,593 barrels of oil, 3,430 barrels of natural gas liquids ("NGLs") and 13,979 mcf of gas were sold, or 13,353 barrel of oil equivalents ("BOEs"). In 1999, 6,595 barrels of oil, 3,476 barrels of NGLs and 15,049 mcf of gas were sold, or 12,579 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.09, or 70%, from \$17.24 in 1999 to \$29.33 in 2000. The average price received per barrel of NGLs increased \$5.41, or 52%, from \$10.42 in 1999 to \$15.83 in 2000. The average price received per mcf of gas increased 66% from \$1.70 in 1999 to \$2.82 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$4,027 recognized in 2000 was due to salvage income from equipment credits of \$3,352 on one well plugged and abandoned during the current year and \$675 on one fully depleted well.

Total costs and expenses increased in 2000 to \$137,222 as compared to \$127,758 in 1999, an increase of \$9,464, or 7%. The increase was primarily due to increases in production costs, general and administrative expenses ("G&A") and abandoned property costs, offset by a decline in depletion.

Production costs were \$108,093 in 2000 and \$93,481 in 1999, resulting in a \$14,612, or 16%, increase. The increase was primarily due to higher production taxes associated with higher oil and gas prices, additional well maintenance and workover costs incurred to stimulate well production.

1167

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Abandoned property costs of \$1,544 during 2000 were related to the plugging and abandonment of one well during the current year.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 78% from \$5,434 in 1999 to \$9,672 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$6,776 in 2000 and \$782 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

2000 as compared to \$28,843 in 1999, representing a decrease of \$10,930, or 38%. This decrease was primarily due to a 18,820 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices, offset by an increase in oil production of 998 barrels for the period ended December 31, 2000 compared to the same period in 1999.

1163

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 23% to \$175,483 from \$142,874 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 6,595 barrels of oil, 3,476 barrels of NGLs and 15,049 mcf of gas were sold, or 12,579 BOEs. In 1998, 7,453 barrels of oil, 3,143 barrels of NGLs and 14,091 mcf of gas were sold, or 12,945 BOEs.

The average price received per barrel of oil increased \$3.94, or 30%, from \$13.30 in 1998 to \$17.24 in 1999. The average price received per barrel of NGLs increased \$3.48, or 50%, from \$6.94 in 1998 to \$10.42 in 1999. The average price received per mcf of gas increased 10% from \$1.55 in 1998 to \$1.70 in 1999.

A gain on disposition of assets of \$1,550 was recognized during 1998 from equipment credits on a well plugged and abandoned in 1997.

Total costs and expenses decreased in 1999 to \$127,758 as compared to \$260,912 in 1998, a decrease of \$133,154, or 51%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$93,481 in 1999 and \$101,514 in 1998, resulting in an \$8,033, or 8%, decrease. The decrease was due to declines in well maintenance costs, workover expenses and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 26% from \$4,303 in 1998 to \$5,434 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$782 in 1999 and \$1,889 in 1998 for G&A incurred on behalf of the Partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$85,160 related to its oil and gas properties during 1998.

Depletion was \$28,843 in 1999 compared to \$69,935 in 1998, representing a decrease of \$41,092, or 59%. This decrease was the result of a combination of factors that included an increase in proved reserves of 56,967 barrels of oil during 1999 due to higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 858 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1164

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$110,523 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$142,369, offset by increases in production costs paid of \$14,612, G&A expenses paid of \$4,238, abandoned property costs paid of \$1,544 and working capital of \$11,452. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$116,842 to oil and gas receipts and an increase of \$25,527 resulting from an increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds from disposition of assets of \$4,027 during 2000 were due to salvage income from equipment credits of \$3,352 on one well plugged and abandoned during the current year and \$675 on one fully depleted well. Proceeds from disposition of assets of \$2,448 during 1999 were from equipment credits on active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$185,568, of which \$1,856 was distributed to the managing general partner and \$183,712 to the limited partners. In 1999, cash distributions to the partners were \$53,182, of which \$532 was distributed to the managing general partner and \$52,650 to the limited partners.

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Producing Properties 88-A, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Producing Properties 88-A, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)

Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)

Merger Value per \$1,000 Limited Partner Investment (b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

past four quarterly distributions including the distribution in July 2001 (b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001 (c)

-- as of December 31, 2000 (c)

Going Concern Value per \$1,000 Limited Partner Investment (c), (d)

Liquidation Value per \$1,000 Limited Partner Investment (c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (f)

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on June , 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

(f) Not applicable. Since this partnership purchased producing properties, there were no intangible drilling and development costs nor any related write-off for tax purposes.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

Although not required by the partnership agreement for the partnership, special legal counsel will render an opinion on behalf of the limited partners to Pioneer USA that (1) neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

affect the federal income tax classification of the partnership or any of its limited partners; and (2) neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion will be submitted for approval by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

1174

PARKER & PARSLEY PRODUCING PROPERTIES 88-A, L.P. (A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS March 31, 2001 (Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Producing Properties 88-A, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware.

The Partnership engages in oil and gas production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenues:

The Partnership's oil and gas revenues increased 31% to \$195,445 for the three months ended March 31, 2001 as compared to \$149,416 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 4,417 barrels of oil, 1,856 barrels of natural gas liquids ("NGLs") and 8,730 mcf of gas were sold, or 7,728 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 3,708 barrels of oil, 2,352 barrels of NGLs and 9,789 mcf of gas were sold, or 7,692 BOEs.

7

1175

The average price received per barrel of oil decreased \$.58, or 2%, from \$27.98 for the three months ended March 31, 2000 to \$27.40 for the same period in 2001. The average price received per barrel of NGLs increased \$3.04, or 23%, from \$13.03 for the three months ended March 31, 2000 to \$16.07 for the same period in 2001. The average price received per mcf of gas increased 234% from \$1.53 during the three months ended March 31, 2000 to \$5.11 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$9,859 recognized during the three months ended March 31, 2000 resulted from equipment credits received on one fully depleted well.

Costs and Expenses:

Total costs and expenses decreased to \$91,252 for the three months ended March 31, 2001 as compared to \$91,741 for the same period in 2000, a decrease of \$489. This decrease was primarily due to a decline production costs, offset by increases in depletion and general and administrative expenses ("G&A").

Production costs were \$65,335 for the three months ended March 31, 2001 and \$74,634 for the same period in 2000 resulting in a \$9,299 decrease, or 12%. This decrease was primarily due to less well maintenance costs, offset by higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 31% from \$4,482 for the three months ended March 31, 2000 to \$5,863 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$20,054 for the three months ended March 31, 2001 as compared to \$12,625 for the same period in 2000, an increase of \$7,429, or 59%. This increase was primarily due to an increase in oil production of 709 barrels and to a downward revision to proved reserves on one well for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net cash provided by operating activities increased \$40,233 for the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$45,652 in oil and gas sales receipts and a decline in production costs of \$9,299, offset by increases in G&A expenses of \$1,381 and working capital of \$13,337. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$39,603 to oil and gas receipts and \$6,049 resulting from an increase in production during 2001 as compared to the same period in 2000. The decrease in production costs was primarily due to less well maintenance costs, offset by an increase in production taxes associated with higher oil and gas prices and. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

8

1176

Net Cash Provided by Investing Activities

Proceeds from asset dispositions of \$9,859 recognized during the three months ended March 31, 2000 resulted from equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$154,242, of which \$1,542 was distributed to the managing general partner and \$152,700 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$124,431, of which \$1,244 was distributed to the managing general partner and \$123,187 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1179

PART I

ITEM 1. BUSINESS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Parker & Parsley Producing Properties 88-A, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 11,222 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 59% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that

its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of working interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

The Partnership completed one purchase of producing properties. This acquisition involved the purchase of working interests in 21 properties, all of which are operated by the managing general partner. In subsequent years, the Partnership participated in the drilling of three additional wells and one well was plugged and abandoned. At December 31, 2000 the Partnership had 23 producing oil and gas properties.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 11,222 outstanding limited partnership interests held of record by 507 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$458,003 and \$165,195, respectively,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000 -----	1999 -----	1998 -----	1997 -----
Operating results:				
Oil and gas sales	\$ 742,384 =====	\$ 495,753 =====	\$ 443,496 =====	\$ 753,775 =====
Impairment of oil and gas properties	\$ - =====	\$ 280,950 =====	\$ - =====	\$ 6,231 =====
Net income (loss)	\$ 357,190 =====	\$ (111,304) =====	\$ (13,621) =====	\$ 255,412 =====
Allocation of net income (loss):				
Managing general partner	\$ 3,572 =====	\$ (1,113) =====	\$ (136) =====	\$ 2,554 =====
Limited partners	\$ 353,618 =====	\$ (110,191) =====	\$ (13,485) =====	\$ 252,858 =====
Limited partners' net income (loss) per limited partnership interest	\$ 31.51 =====	\$ (9.82) =====	\$ (1.20) =====	\$ 22.53 =====

4

1182

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 50% to \$742,384 for 2000 as compared to \$495,753 in 1999. The increase in revenues resulted from higher

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

average prices received, offset by a decline in production. In 2000, 17,170 barrels of oil, 9,806 barrels of natural gas liquids ("NGLs") and 37,939 mcf of gas were sold, or 33,299 barrel of oil equivalents ("BOEs"). In 1999, 19,878 barrels of oil, 10,402 barrels of NGLs and 44,467 mcf of gas were sold, or 37,691 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.62, or 75%, from \$16.82 for 1999 to \$29.44 in 2000. The average price received per barrel of NGLs increased \$5.10, or 56%, from \$9.18 for 1999 to \$14.28 in 2000. The average price received per mcf of gas increased 72%, from \$1.48 for 1999 to \$2.55 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$9,859 was recognized during 2000 from salvage income received on one fully depleted well.

Total costs and expenses decreased in 2000 to \$411,959 as compared to \$619,585 in 1999, a decrease of \$207,626, or 34%. This decrease was primarily the result of declines in the impairment of oil and gas properties and depletion, offset by increases in production costs and general and administrative expenses ("G&A").

Production costs were \$322,751 in 2000 and \$237,875 in 1999, resulting in an increase of \$84,876, or 36%. The increase was primarily due to additional workover expense and well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 50% from \$14,872 in 1999 to \$22,272 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$18,064 in 2000 and \$8,371 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$280,950 related to its oil and gas properties during 1999.

Depletion was \$66,936 in 2000 as compared to \$85,888 in 1999, representing a decrease of \$18,952, or 22%. This decrease was primarily due to a reduction in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999 and a decline in oil production of 2,708 barrels for the period ended December 31, 2000 compared to the same period in 1999, offset by a 20,203 barrels of oil decrease in proved reserves during 2000 as a result of a significant well having lower reserves due to a revised decline curve.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 12% to \$495,753 from \$443,496 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 19,878 barrels of oil, 10,402 barrels of NGLs and 44,467 mcf of gas were sold, or 37,691 BOEs. In 1998, 22,482 barrels of oil, 12,009 barrels of NGLs and 51,099 mcf of gas were sold, or 43,008 BOEs.

The average price received per barrel of oil increased \$3.68, or 28%, from \$13.14 for 1998 to \$16.82 in 1999. The average price received per barrel of NGLs increased \$2.87, or 45%, from \$6.31 for 1998 to \$9.18 in 1999. The average price received per mcf of gas increased 5%, from \$1.41 for 1998 to \$1.48 in 1999.

Total costs and expenses increased in 1999 to \$619,585 as compared to \$471,884 in 1998, an increase of \$147,701, or 31%. This increase was primarily the result of increases in the impairment of oil and gas properties and G&A expenses, offset by declines in depletion and production costs.

Production costs were \$237,875 in 1999 and \$252,339 in 1998, resulting in a \$14,464, or 6%, decrease. The decrease was due to less well maintenance costs and ad valorem taxes, offset by an increase in production taxes due to the increase in oil and gas revenues.

During this period, G&A increased 12% from \$13,305 in 1998 to \$14,872 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$8,371 in 1999 and \$9,891 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$280,950 related to its oil and gas properties during 1999.

Depletion was \$85,888 in 1999 compared to \$206,240 in 1998. This represented a decrease of \$120,352, or 58%. This decrease was the result of an increase in proved reserves of 77,231 barrels of oil during 1999 as a result of higher commodity prices and a decline in oil production of 2,604

barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$159,721 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$251,009 and a decline in working capital of \$988, offset by increases in production costs paid of \$84,876 and G&A expenses paid of \$7,400. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$355,912 to oil and gas receipts, offset by \$104,903 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover expenses and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were related to various upgrades of equipment.

Proceeds from asset dispositions of \$9,859 recognized during 2000 were from equipment credits received on one fully depleted well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$462,629, of which \$4,626 was distributed to the managing general partner and \$458,003 to the limited partners. In 1999, cash distributions to the partners were \$166,787, of which \$1,592 was distributed to the managing general partner and \$165,195 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley Producing Properties 88-A, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley Producing Properties 88-A, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Producing Properties 88-A, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Producing Properties 88-A, L.P. (the "Partnership") is a limited partnership organized in 1988 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$280,950 related to its proved oil and gas properties during 1999.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$949,574 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 357,190	\$ (111,304)	\$ (13,300)
Depletion and depreciation provisions for tax reporting purposes less than (greater than) amounts for financial reporting purposes	(55,096)	24,264	26,000
Impairment of oil and gas properties for financial reporting purposes	-	280,950	
Other	(247)	(441)	
	-----	-----	-----
Net income per Federal income tax returns	\$ 301,847 =====	\$ 193,469 =====	\$ 12,000 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Property acquisition costs	\$ 782 =====	\$ 12,230 =====	\$ 1,181 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 4,109,672	\$ 4,108,890
Completed wells and equipment	746,040	746,040
	-----	-----
Accumulated depletion	4,855,712 (3,719,241) -----	4,854,930 (3,652,305) -----
Net oil and gas properties	\$ 1,136,471 =====	\$ 1,202,625 =====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 98,073	\$ 91,828	\$ 99,719
Reimbursement of general and administrative expenses	\$ 18,064	\$ 8,371	\$ 9,891

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees Producing Properties 88-A ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a general partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1) -----	Partnership -----
Revenues:		
Revenues from oil and gas production, proceeds from sales of producing properties and all other revenues:		
Before payout	4.040405%	95.959595%
After payout (2)	19.191920%	80.808080%
Costs and expenses:		
Property acquisition costs, operating costs, general and administrative expenses and other costs:		
Before payout	4.040405%	95.959595%
After payout (2)	19.191920%	80.808080%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 78 limited partner interests owned by Pioneer USA.

(2) The Partnership reached payout in September 1997.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

17

1195

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	563,684	808,875
Revisions	(105,464)	(18,612)
Production	(34,491)	(51,099)
	-----	-----
Net proved reserves at December 31, 1998	423,729	739,164
Revisions	113,184	157,201
Production	(30,280)	(44,467)
	-----	-----
Net proved reserves at December 31, 1999	506,633	851,898
Revisions	(52,176)	(249,428)
Production	(26,976)	(37,939)
	-----	-----
Net proved reserves at December 31, 2000	427,481	564,531
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$12.90 per barrel of NGLs and \$7.43 per mcf of gas, discounted at 10% was approximately \$3,258,000 and undiscounted was \$6,795,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	59%	57%	-
Western Gas Resources, Inc.	4%	6%	28%
Genesis Crude Oil, L.P.	-	-	57%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$44,879 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total

19

1197

contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$5,611,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1198

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name -----	Age at December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Directors
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

1199

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

1200

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the limited partnership agreement, Pioneer USA pays 1% of the Program's acquisition, drilling and completion costs and 1% of its operating, general and administrative expenses. In return, Pioneer USA is allocated 1% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 78 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

23

1201

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 98,073	\$ 91,828	\$ 99,719
Reimbursement of general and administrative expenses	\$ 18,064	\$ 8,371	\$ 9,891

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Private Investment 88, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Investment 88, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001(c)

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The term of the partnership is until December 31, 2038, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Private Investment 88, L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 24% to \$339,232 for the three months ended March 31, 2001 as compared to \$274,206 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 7,599 barrels of oil, 2,038 barrels of natural gas liquids ("NGLs") and 14,638 mcf of gas were sold, or 12,077 barrel of oil equivalents ("BOEs"). For the three

6

1214

months ended March 31, 2000, 7,128 barrels of oil, 3,764 barrels of NGLs and 15,649 mcf of gas were sold, or 13,500 BOEs.

The average price received per barrel of oil increased \$.71, or 3%, from \$27.22 for the three months ended March 31, 2000 to \$27.93 for the same period in 2001. The average price received per barrel of NGLs increased \$4.83, or 34%, from \$14.02 for the three months ended March 31, 2000 to \$18.85 for the same period in 2001. The average price received per mcf of gas increased 246% from \$1.75 during the three months ended March 31, 2000 to \$6.05 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$148,646 for the three months ended March 31, 2001 as compared to \$139,911 for the same period in 2000, an increase of \$8,735, or 6%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$121,120 for the three months ended March 31, 2001 and \$110,748 for the same period in 2000 resulting in a \$10,372 increase, or 9%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 3% from \$8,226 for the three months ended March 31, 2000 to \$8,481 for the same period in 2001, primarily due to an increase in the accrual for tax preparation fees.

Depletion was \$19,045 for the three months ended March 31, 2001 compared to \$20,937 for the same period in 2000, a decrease of \$1,892, or 9%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$69,275 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$65,272 and a reduction in working capital of \$14,630, offset by increases in production costs of \$10,372 and G&A expenses of \$255. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$90,763 to oil and gas receipts, offset by \$25,491 resulting from the

7

1215

decline in production during 2001 as compared to 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$467 recognized during the three months ended March 31, 2000 were due to equipment credits received on one active well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$236,965, of which \$2,370 was distributed to the managing general partner and \$234,595 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$160,897, of which \$1,609 was distributed to the managing general partner and \$159,288 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

1216

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P.
(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1217

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley Private Investment 88, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley Private Investment 88, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

1218

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Private Investment 88, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Private Investment 88, L.P. (the "Partnership") was organized in 1988 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1989. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentation.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the

Partnership recognized a non-cash impairment provision of \$118,049 related to its proved oil and gas properties during 1998.

NOTE 4. INCOME TAXES

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The financial statement basis of the Partnership's net assets and liabilities was \$148,226 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	
Net income (loss) per statements of operations	\$ 789,392	\$ 287,153	\$ (19
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	67,335	130,790	31
Impairment of oil and gas properties for financial reporting purposes	-	-	11
Other, net	(1,469)	221	--
	-----	-----	--
Net income per Federal income tax returns	\$ 855,258 =====	\$ 418,164 =====	\$ 23 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 8,806 =====	\$ 9,360 =====	\$ 14,794 =====

Capitalized oil and gas properties consist of the following:

	2000 ----	1999 ----
Proved properties:		
Property acquisition costs	\$ 76,042	\$ 76,042
Completed wells and equipment	7,272,100	7,263,761
	-----	-----
	7,348,142	7,339,803
Accumulated depletion	(6,092,889)	(6,015,639)
	-----	-----
Net oil and gas properties	\$ 1,255,253 =====	\$ 1,324,164 =====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 164,64
Reimbursement of general and administrative expenses	\$ 29,88

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and the Partnership are parties to the Program agreement.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1) -----	Partnership -----
Revenues:		
Proceeds from disposition of depreciable properties	9.09091%	90.90909%
All other revenues	24.242425%	75.757575%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.09091%	90.90909%
Operating costs, direct costs and general and administrative expenses	24.242425%	75.757575%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	642,625	841,260
Revisions	(223,184)	(203,072)
Production	(48,933)	(61,718)
	-----	-----
Net proved reserves at December 31, 1998	370,508	576,470
Revisions	353,229	566,412
Production	(48,802)	(66,701)
	-----	-----
Net proved reserves at December 31, 1999	674,935	1,076,181
Revisions	142,138	(79,131)
Production	(46,284)	(59,532)
	-----	-----
Net proved reserves at December 31, 2000	770,789	937,518
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.25 per barrel of NGLs and \$7.86 per mcf of gas, discounted at 10% was approximately \$5,885,000 and undiscounted was \$12,796,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	55%	52%	-
Genesis Crude Oil, L.P.	-	-	63%
Western Gas Resources, Inc.	4%	5%	21%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$52,075 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. The managing general partner is also responsible for

12

1228

1% of the guaranty and loan commitment fees. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$9,960,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

1229

1230

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 63% to \$1,311,024 for 2000 as compared to \$805,538 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 30,403 barrels of oil, 15,881 barrels of natural gas liquids ("NGLs") and 59,532 mcf of gas were sold, or 56,206 barrel of oil equivalents ("BOEs"). In 1999, 30,947 barrels of oil, 17,855 barrels of NGLs and 66,701 mcf of gas were sold, or 59,919 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.44, or 73%, from \$17.01 in 1999 to \$29.45 in 2000. The average price received per barrel of NGLs increased \$6.29, or 67%, from \$9.32 in 1999 to \$15.61 in 2000. The average price received per mcf of gas increased 67% from \$1.69 in 1999 to \$2.82 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$535,959 as compared to \$526,775 in 1999, an increase of \$9,184, or 2%. The increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$425,425 in 2000 and \$361,694 in 1999, resulting in a \$63,731 increase, or 18%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 38% from \$24,166 in 1999 to \$33,284 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$29,882 in 2000 and \$18,547 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$77,250 in 2000 compared to \$140,915 in 1999, representing a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

decrease of \$63,665, or 45%. This decrease was primarily due to a 111,058 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 25% to \$805,538 from \$645,636 in 1998. The increase in revenues resulted from higher average prices received. In 1999, 30,947 barrels of oil, 17,855 barrels of NGLs and 66,701 mcf of gas

1230

were sold, or 59,919 BOEs. In 1998, 33,377 barrels of oil, 15,556 barrels of NGLs and 61,718 mcf of gas were sold, or 59,219 BOEs.

The average price received per barrel of oil increased \$3.70, or 28%, from \$13.31 in 1998 to \$17.01 in 1999. The average price received per barrel of NGLs increased \$2.53, or 37%, from \$6.79 in 1998 to \$9.32 in 1999. The average price received per mcf of gas increased 9% from \$1.55 in 1998 to \$1.69 in 1999.

Total costs and expenses decreased in 1999 to \$526,775 as compared to \$854,253 in 1998, a decrease of \$327,478, or 38%. The decrease was due to declines in depletion, the impairment of oil and gas properties and production costs, offset by an increase in G&A.

Production costs were \$361,694 in 1999 and \$390,754 in 1998, resulting in a \$29,060 decrease, or 7%. The decrease was due to declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 34% from \$17,997 in 1998 to \$24,166 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$18,547 in 1999 and \$14,864 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$118,049 related to its oil and gas properties during 1998.

Depletion was \$140,915 in 1999 compared to \$327,453 in 1998, representing a decrease of \$186,538, or 57%. This decrease was the result of an increase in proved reserves of 220,875 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1231

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$402,704 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$511,423, offset by increases in production costs paid of \$63,731, G&A expenses paid of \$9,118 and working capital of \$35,870. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$578,466 to oil and gas receipts, offset by \$67,043 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Proceeds recognized during 2000 of \$467 were due to equipment credits received on an active property.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$803,002, of which \$8,030 was distributed to the managing general partner and \$794,972 to the limited partners. In 1999, cash distributions to the partners were \$312,790, of which \$3,128 was distributed to the managing general partner and \$309,662 to the limited partners.

1232

PARKER & PARSLEY PRIVATE INVESTMENT 88, L.P.

SELECTED FINANCIAL DATA

The following selected financial data for the Partnership should be read in connection with Management's Discussion and Analysis of Financial Condition and Results of Operations and the financial statements included in the attached supplemental information.

	Three months ended March 31,		Years ended December 31

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 89-A CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 89-A Conv., L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 89-A Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$ 149

-
- (a) Stated in thousands.
 - (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
 - (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
 - (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
 - (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
 - (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

1240

PARKER & PARSLEY 89-A CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 89-A Conv., L.P. (the "Partnership") was organized in 1989 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1990.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Revenues:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership's oil and gas revenues increased 36% to \$110,224 for the three months ended March 31, 2001 as compared to \$81,009 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 2,177 barrels of oil, 839 barrels of natural gas liquids ("NGLs") and 5,605 mcf of gas were sold, or 3,950 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 2,078 barrels of oil, 1,072 barrels of NGLs and 4,757 mcf of gas were sold, or 3,943 BOEs.

The average price received per barrel of oil increased \$.62, or 2%, from \$27.48 for the three months ended March 31, 2000 to \$28.10 for the same period in 2001. The average price received per barrel of NGLs increased \$3.52, or 25%, from

6

1241

\$13.84 for the three months ended March 31, 2000 to \$17.36 for the same period in 2001. The average price received per mcf of gas increased 223% from \$1.91 during the three months ended March 31, 2000 to \$6.16 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$3,713 was recognized during the three months ended March 31, 2001 from equipment salvage received on one well plugged and abandoned during the current period. Abandoned property costs of \$2,335 were incurred to plug and abandon this well.

Costs and Expenses:

Total costs and expenses increased to \$45,636 for the three months ended March 31, 2001 as compared to \$40,176 for the same period in 2000, an increase of \$5,460, or 14%. This increase was due to increases in abandoned property costs, production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$33,385 for the three months ended March 31, 2001 and \$31,408 for the same period in 2000 resulting in a \$1,977 increase, or 6%. The increase was primarily due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 60% from \$2,441 for the three months ended March 31, 2000 to \$3,912 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$6,004 for the three months ended March 31, 2001 compared to \$6,327 for the same period in 2000, a decrease of \$323, or 5%. This decrease was primarily due to downward revisions to proved reserves on several wells during the three months ended March 31, 2001, offset by an increase in oil production of 99 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$30,127 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$29,329 and a reduction in working capital of \$6,581, offset by increases in production costs of \$1,977, G&A expenses of \$1,471 and abandoned property costs of \$2,335. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$25,364 to oil and gas receipts and \$3,965 resulting from the increase in production during 2001 as compared to the

7

1242

same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$83,321, of which \$833 was distributed to the managing general partner and \$82,488 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$50,740, of which \$507 was distributed to the managing general partner and \$50,233 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

results described in the forward looking statements.

PARKER & PARSLEY 89-A CONV., L.P.
(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1244

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 89-A Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 89-A Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 89-A Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 89-A CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 89-A Conv., L.P. (the "Partnership") was organized in 1989 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1990. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

7

1250

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the

8

1251

Partnership recognized a non-cash impairment provision of \$6,198 and \$103,108 related to its proved oil and gas properties during 2000 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$52,175 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 213,459	\$ 77,957	\$ (149,762)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	18,394	35,333	113,374
Impairment of oil and gas properties for financial reporting purposes	6,198	--	103,108
Other, net	(560)	(1,305)	1,416
	-----	-----	-----
Net income per Federal income tax returns	\$ 237,491	\$ 111,985	\$ 68,136
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

2000	1999	1998
-----	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Development costs	\$ 2,459	\$ 4,107	\$5,690
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 93,966	\$ 93,966
Completed wells and equipment	2,112,015	2,109,556
	-----	-----
	2,205,981	2,203,522
Accumulated depletion	(1,860,437)	(1,832,074)
	-----	-----
Net oil and gas properties	\$ 345,544	\$ 371,448
	=====	=====

9

1252

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$52,987	\$52,678	\$51,730
Reimbursement of general and administrative expenses	\$10,994	\$ 7,203	\$ 5,808

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 89-A Conv., Ltd. ("EMPL"), Parker & Parsley 89-A, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000,

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

Pioneer USA (1)	Partnerships (2)
-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenues:

Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

Costs and expenses:

Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

(2) The allocation between the Partnership and Parker & Parsley 89-A, L.P. is 25.166457% and 74.833543%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

1253

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	189,854	326,511
Revisions	(83,618)	(110,279)
Production	(14,102)	(21,106)
	-----	-----
Net proved reserves at December 31, 1998	92,134	195,126
Revisions	106,866	158,479
Production	(14,166)	(20,484)
	-----	-----
Net proved reserves at December 31, 1999	184,834	333,121
Revisions	30,916	(27,906)
Production	(13,092)	(20,057)
	-----	-----
Net proved reserves at December 31, 2000	202,658	285,158
	=====	=====

1252

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$12.34 per barrel of NGLs and \$8.31 per mcf of gas, discounted at 10% was approximately \$1,685,000 and undiscounted \$3,469,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
Plains Marketing, L.P.	63%	62%	-
Genesis Crude Oil, L.P.	-	-	59%
Western Gas Resources, Inc.	3%	3%	12%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$22,502 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The

1255

majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$2,797,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

1256

PARKER & PARSLEY 89-A CONV., L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 59% to \$383,529 for 2000 as compared to \$241,781 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 8,466 barrels of oil, 4,626 barrels of natural gas liquids ("NGLs") and 20,057 mcf of gas were sold, or 16,435 barrel of oil equivalent ("BOEs"). In 1999, 9,190 barrels of oil, 4,976 barrels of NGLs and 20,484 mcf of gas were sold, or 17,580 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.48, or 73%, from \$17.11 in 1999 to \$29.59 in 2000. The average price received per barrel of NGLs increased \$5.88, or 62%, from \$9.54 in 1999 to \$15.42 in 2000. The average price received per mcf of gas increased 70% from \$1.81 in 1999 to \$3.07 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

During 2000 and 1999, gains on disposition of assets of \$1,765 and \$1,483, respectively, were attributable to credits received from equipment salvage on one fully depleted well in each year.

Total costs and expenses increased in 2000 to \$175,856 as compared to \$167,660 in 1999, an increase of \$8,196, or 5%. The increase was due to increases in production costs, the impairment of oil and gas properties and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$135,124 in 2000 and \$118,700 in 1999, resulting in a \$16,424 increase, or 14%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 29% from \$9,612 in 1999 to \$12,370 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$10,994 in 2000 and \$7,203 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$6,198 related to its oil and gas properties during 2000.

1257

Depletion was \$22,165 in 2000 as compared to \$39,348 in 1999, representing a decrease of \$17,183, or 44%. This decrease was primarily due to a 28,723 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 23% to \$241,781 from \$196,186 in 1998. The increase in revenues resulted from higher average prices received. In 1999, 9,190 barrels of oil, 4,976 barrels of natural gas liquids ("NGLs") and 20,484 mcf of gas were sold, or 17,580 barrel of oil equivalents ("BOEs"). In 1998, 9,782 barrels of oil, 4,320 barrels of NGLs and 21,106 mcf of gas were sold, or 17,620 BOEs.

The average price received per barrel of oil increased \$3.88, or 29%, from \$13.23 in 1998 to \$17.11 in 1999. The average price received per barrel of NGLs increased \$2.59, or 37%, from \$6.95 in 1998 to \$9.54 in 1999. The average price received per mcf of gas increased 4% from \$1.74 in 1998 to \$1.81 in 1999.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

During 1999, gain on disposition of assets of \$1,483 was attributable to credits received from equipment salvage on one active well. Gain on disposition of assets of \$648 was attributable to credits received in 1998 from the disposal of oil and gas equipment on a well that was plugged and abandoned in a prior year.

Total costs and expenses decreased in 1999 to \$167,660 as compared to \$349,225 in 1998, a decrease of \$181,565, or 52%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$118,700 in 1999 and \$121,865 in 1998, resulting in a \$3,165 decrease, or 3%. The decrease was due to declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes.

During this period, G&A increased 37% from \$7,006 in 1998 to \$9,612 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$7,203 in 1999 and \$5,808 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$103,108 related to its oil and gas properties during 1998.

Depletion was \$39,348 in 1999 compared to \$117,246 in 1998, representing a decrease of \$77,898, or 66%. This decrease was primarily due to an increase in proved reserves of 70,433 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1258

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$118,472 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$143,417, offset by increases in production costs paid of \$16,424, G&A expenses paid of \$2,758 and working capital of \$5,763. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$171,552 to oil and gas receipts, offset by \$28,135 resulting from the decline in production during 2000. The

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and workover and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were related to equipment upgrades on active properties.

During 2000 and 1999, proceeds from disposition of assets of \$1,765 and \$1,483, respectively, were from equipment credits received on an active well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$226,382, of which \$2,264 was distributed to the managing general partner and \$224,118 to the limited partners. In 1999, cash distributions to the partners were \$80,698, of which \$807 was distributed to the managing general partner and \$79,891 to the limited partners.

1259

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 89-A, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 89-A, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 89-A, L.P.:

- o A table containing:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the aggregate initial investment by the limited partners

- the aggregate historical limited partner distributions through July 31, 2001

- the merger value attributable to partnership interests of limited partners, excluding Pioneer USA

- the merger value per \$1,000 limited partner investment

- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment

- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners

 - the term of the partnership

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

1260

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a),

Merger Value per \$1,000 Limited Partner Investment (b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001 (c)

-- as of December 31, 2000 (c)

Going Concern Value per \$1,000 Limited Partner Investment (c), (d)

Liquidation Value per \$1,000 Limited Partner Investment (c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

(f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

6

1268

PARKER & PARSLEY 89-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 89-A, L.P. (the "Partnership") is a limited partnership organized in 1989 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 36% to \$327,815 for the three months ended March 31, 2001 as compared to \$240,830 for the same period in 2000. The increase in revenues resulted from higher average prices received and a slight increase in production. For the three months ended March 31, 2001, 6,466 barrels of oil, 2,508 barrels of natural gas liquids ("NGLs") and 16,665 mcf of gas were sold, or 11,752 barrel of oil equivalents ("BOEs"). For the three

7

1269

months ended March 31, 2000, 6,179 barrels of oil, 3,187 barrels of NGLs and 14,142 mcf of gas were sold, or 11,723 BOEs.

The average price received per barrel of oil increased \$.62, or 2%, from \$27.48 for the three months ended March 31, 2000 to \$28.10 for the same period in 2001. The average price received per barrel of NGLs increased \$3.52, or 25%, from \$13.84 for the three months ended March 31, 2000 to \$17.36 for the same period in 2001. The average price received per mcf of gas increased 223% from \$1.91 during the three months ended March 31, 2000 to \$6.16 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gain on disposition of assets of \$11,040 was recognized during the three months ended March 31, 2001 from equipment salvage received on one well plugged and abandoned during the current period. Abandoned property costs of \$8,824 were incurred to plug and abandon this well.

Costs and Expenses:

Total costs and expenses increased to \$137,282 for the three months ended March 31, 2001 as compared to \$119,641 for the same period in 2000, an increase of \$17,641, or 15%. This increase was due to increases in abandoned property costs, production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$98,933 for the three months ended March 31, 2001 and \$93,383 for the same period in 2000 resulting in a \$5,550 increase, or 6%. The increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by lower well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

increased 57%, from \$7,458 for the three months ended March 31, 2000 to \$11,707 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$17,818 for the three months ended March 31, 2001 as compared to \$18,800 for the same period in 2000, a decrease of \$982, or 5%. This decrease was primarily due to downward revisions to proved reserves on several wells during the three months ended March 31, 2001, offset by an increase in oil production of 287 barrels for the period ended March 31, 2001 as compared to the same period in 2000.

8

1270

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$90,071 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$87,294 in oil and gas sales receipts and a reduction in working capital of \$21,400, offset by increases in abandoned property costs of \$8,824, production costs of \$5,550 and G&A expenses of \$4,249. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$75,474 to oil and gas receipts and \$11,820 resulting from the increase in production during 2001 as compared to the same period in 2000. The increase in abandoned property costs was due to one well being plugged and abandoned in the current year. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by lower well maintenance costs. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's investing activities during the three months ended March 31, 2000 were related to upgrades of oil and gas equipment on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$247,760, of which \$2,478 was distributed to the managing general partner and \$245,282 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$150,878, of which \$1,509 was distributed to the managing general partner and \$149,369 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

1274

PART I

ITEM 1. BUSINESS

Parker & Parsley 89-A, L.P. (the "Partnership") is a limited partnership organized in 1989 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 8,317 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 63% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and

2

1275

ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located in the Spraberry Trend area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 33 oil and gas wells. One well has been plugged and abandoned. At December 31, 2000, 32 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

1276

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTEREST AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 8,317 outstanding limited partnership interests held of record by 609 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$666,425 and \$237,558, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000 -----	1999 -----	1998 -----	1997 -----	1996 -----
Operating results:					

Oil and gas sales	\$1,140,280 =====	\$ 718,969 =====	\$ 583,396 =====	\$ 856,926 =====	\$1,132,944 =====
Impairment of oil and gas properties	\$ 18,391 =====	\$ - =====	\$ 306,826 =====	\$ 531,929 =====	\$ - =====
Net income (loss)	\$ 634,127 =====	\$ 231,838 =====	\$ (444,718) =====	\$ (269,363) =====	\$ 488,019 =====
Allocation of net income (loss):					
Managing general partner	\$ 6,341 =====	\$ 2,318 =====	\$ (4,447) =====	\$ (2,693) =====	\$ 4,880 =====
Limited partners	\$ 627,786 =====	\$ 229,520 =====	\$ (440,271) =====	\$ (266,670) =====	\$ 483,139 =====

1274

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	=====	=====	=====	=====	=====

4

1277

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 59% to \$1,140,280 for 2000 as compared to \$718,969 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 25,176 barrels of oil, 13,747 barrels of natural gas liquids ("NGLs") and 59,638 mcf of gas were sold, or 48,863 barrel of oil equivalents ("BOEs"). In 1999, 27,333 barrels of oil, 14,796 barrels of NGLs and 60,905 mcf of gas were sold, or 52,280 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.48, or 73%, from \$17.11 in 1999 to \$29.59 in 2000. The average price received per barrel of NGLs increased \$5.88, or 62%, from \$9.54 in 1999 to \$15.42 in 2000. The average price received per mcf of gas increased 70% from \$1.81 in 1999 to \$3.07 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gains on disposition of assets of \$5,248 and \$4,410 in 2000 and 1999, respectively, were attributable to equipment credits on one fully depleted well in each year.

Total costs and expenses increased in 2000 to \$523,646 as compared to \$498,672 in 1999, an increase of \$24,974, or 5%. The increase was primarily due to increases in production costs, the impairment of oil and gas properties and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$402,118 in 2000 and \$352,977 in 1999, resulting in an

1275

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

increase of \$49,141, or 14%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 31% from \$28,521 in 1999 to \$37,259 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$32,691 in 2000 and \$21,420 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

5

1278

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$18,391 related to its oil and gas properties during 2000.

Depletion was \$65,878 in 2000 as compared to \$117,174 in 1999, representing a decrease of \$51,296, or 44%. This decrease was primarily due to a 85,285 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 23% to \$718,969 from \$583,396 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 27,333 barrels of oil, 14,796 barrels of NGLs and 60,905 mcf of gas were sold, or 52,280 BOEs. In 1998, 29,084 barrels of oil, 12,847 barrels of NGLs and 62,751 mcf of gas were sold, or 52,390 BOEs.

The average price received per barrel of oil increased \$3.88, or 29%, from \$13.23 in 1998 to \$17.11 in 1999. The average price received per barrel of NGLs increased \$2.59, or 37%, from \$6.95 in 1998 to \$9.54 in 1999. The average price received per mcf of gas increased 4% from \$1.74 in 1998 to \$1.81 in 1999.

Gain on disposition of assets of \$4,410 in 1999 was attributable to equipment credits on one fully depleted well. During 1998, gain on disposition of assets of \$1,926 was attributable to credits received from the disposal of oil and gas equipment on a well that was plugged and abandoned in a prior year.

Total costs and expenses decreased in 1999 to \$498,672 as compared to \$1,038,152 in 1998, a decrease of \$539,480, or 52%. The decrease was primarily due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$352,977 in 1999 and \$362,377 in 1998, resulting in a \$9,400 decrease, or 3%. The decrease was due to declines in ad valorem taxes and well maintenance costs, offset by an increase in workover costs incurred to stimulate well production and an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 38% from \$20,635 in 1998 to \$28,521 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$21,420 in 1999 and \$17,270 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$306,826 related to its oil and gas properties during 1998.

6

1279

Depletion was \$117,174 in 1999 compared to \$348,314 in 1998. This represented a decrease of \$231,140, or 66%. This decrease was primarily due to an increase in proved reserves of 209,480 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$351,738 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$426,425, offset by increases in production costs paid of \$49,141, G&A expenses paid of \$8,738 and working capital of \$16,808. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$510,320 to oil and gas receipts, offset by \$83,895 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional workover and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during 2000 and 1999 were related to expenditures for equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$5,248 and \$4,410 recognized in 2000 and 1999, respectively, were from equipment credits received on one fully depleted well in each year.

Net Cash Used in Financing Activities

For 2000, cash distributions to the partners were \$673,157, of which \$6,732 was distributed to the managing general partner and \$666,425 to the limited partners. For 1999, cash distributions to the partners were \$239,958, of which \$2,400 was distributed to the managing general partner and \$237,558 to the limited partners.

INDEPENDENT AUDITORS' REPORT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partners
Parker & Parsley 89-A, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 89-A, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 89-A, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

1286

PARKER & PARSLEY 89-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 89-A, L.P. (the "Partnership") is a limited partnership organized in 1989 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of

1283

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

14

1287

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$18,391 and \$306,826 related to its proved oil and gas properties during 2000 and 1998, respectively.

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$155,457 greater than the tax basis at December 31, 2000.

15

1288

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 634,127	\$ 231,838	\$ (444,718)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	54,665	105,234	336,801
Impairment of oil and gas properties for financial reporting purposes	18,391	-	306,826
Salvage income	-	-	-
Other, net	(1,709)	(3,610)	3,948
	-----	-----	-----
Net income per Federal income tax returns	\$ 705,474 =====	\$ 333,462 =====	\$ 202,857 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the net costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

1285

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Development costs	\$ 7,310 =====	\$ 12,213 =====	\$ 16,919 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 279,410	\$ 279,410
Completed wells and equipment	6,280,166 -----	6,272,856 -----
	6,559,576	6,552,266
Accumulated depletion	(5,531,818) -----	(5,447,549) -----
Net oil and gas properties	\$ 1,027,758 =====	\$ 1,104,717 =====

16

1289

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 157,560	\$ 156,639	\$ 153,822
Reimbursement of general and administrative expenses	\$ 32,691	\$ 21,420	\$ 17,270

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 89-A Conv., Ltd. ("EMPL"), Parker & Parsley 89-A Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL

1286

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
Revenues:		
Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 105 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 89-A Conv., L.P. is 74.833543% and 25.166457%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	564,653	971,094
Revisions	(248,699)	(328,006)
Production	(41,931)	(62,751)
	-----	-----
Net proved reserves at December 31, 1998	274,023	580,337
Revisions	317,834	471,328
Production	(42,129)	(60,905)
	-----	-----

1290

Net proved reserves at December 31, 1999	549,728	990,760
Revisions	91,729	(83,266)
Production	(38,923)	(59,638)
	-----	-----
Net proved reserves at December 31, 2000	602,534	847,856
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$12.34 per barrel of NGLs and \$8.31 per mcf of gas, discounted at 10% was approximately \$5,009,000 and undiscounted was \$10,314,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	63%	62%	-
Genesis Crude Oil, L.P.	-	-	59%
Western Gas Resources, Inc.	3%	3%	12%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$66,937 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

19

1292

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$8,317,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1293

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Name -----	Age at December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	45	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B.S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

1295

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 15% during the first three years and approximately 20% after three years of its operating and general and administrative expenses. In return, they are allocated approximately 15% during the first three years and approximately 20% after three years of the Program's revenues.

1292

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 105 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

23

1296

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$157,560	\$ 156,639	\$153,822
Reimbursement of general and administrative expenses	\$ 32,691	\$ 21,420	\$ 17,270

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" regarding the Partnership's participation with the managing general partner in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 89-B CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

This document contains important information specific to Parker & Parsley 89-B Conv., L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 89-B Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 89-B CONV., L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001(a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment(b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001(c)	\$
-- as of December 31, 2000(c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment(c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

1308

PARKER & PARSLEY 89-B CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 89-B Conv., L.P. (the "Partnership") was organized as a general partnership in 1989 under the laws of the State of Texas and was converted to a Delaware limited partnership on May 30, 1990.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 22% to \$242,302 for the three

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

months ended March 31, 2001 as compared to \$198,773 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 4,701 barrels of oil, 1,784 barrels of natural gas liquids ("NGLs") and 12,480 mcf of gas were sold, or 8,565 barrel of oil equivalents ("BOEs"). For the three months

6

1309

ended March 31, 2000, 5,036 barrels of oil, 2,823 barrels of NGLs and 11,218 mcf of gas were sold, or 9,729 BOEs.

The average price received per barrel of oil increased \$1.28, or 5%, from \$27.13 for the three months ended March 31, 2000 to \$28.41 for the same period in 2001. The average price received per barrel of NGLs increased \$4.56, or 31%, from \$14.82 for the three months ended March 31, 2000 to \$19.38 for the same period in 2001. The average price received per mcf of gas increased 232% from \$1.79 during the three months ended March 31, 2000 to \$5.95 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$112,177 for the three months ended March 31, 2001 as compared to \$103,469 for the same period in 2000, an increase of \$8,708, or 8%. This increase was due to increases in depletion, production costs and general and administrative expenses ("G&A").

Production costs were \$85,210 for the three months ended March 31, 2001 and \$82,217 for the same period in 2000 resulting in a \$2,993 increase, or 4%. The increase was due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 41% from \$5,963 for the three months ended March 31, 2000 to \$8,379 for the same period in 2001 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$18,588 for the three months ended March 31, 2001 as compared to \$15,289 for the same period in 2000, an increase of \$3,299, or 22%. This increase was primarily due to downward revisions to proved reserves on several wells for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$52,389 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$43,781 and a reduction of \$14,017 in working capital, offset by increases in production costs of \$2,993 and G&A expenses of \$2,416. The increase in oil and gas receipts

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

resulted from the increase in commodity prices during 2001 which contributed an

7

1310

additional \$65,914 to oil and gas receipts, offset by \$22,133 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$168,850, of which \$1,689 was distributed to the managing general partner and \$167,161 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$90,992, of which \$910 was distributed to the managing general partner and \$90,082 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARKER & PARSLEY 89-B CONV., L.P.
(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1312

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 89-B Conv., L.P.
(A Delaware Limited Partnership):

We have audited the accompanying balance sheets of Parker & Parsley 89-B Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 89-B Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 89-B CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 89-B Conv., L.P. (the "Partnership") was organized as a general partnership in 1989 under the laws of the State of Texas and was converted to a Delaware limited partnership on May 30, 1990. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Financial Accounting Standards No. 121. "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1318

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$27,748 and \$262,396 related to its proved oil and gas properties during 2000 and 1998, respectively.

8

1319

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$191,325 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 433,269	\$ 121,713	\$ (366,035)
Impairment of oil and gas properties for financial reporting purposes	27,748	-	262,396
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	57,991	91,381	226,609
Other, net	(1,014)	(2,514)	2,725
	-----	-----	-----
Net income per Federal income tax returns	\$ 517,994 =====	\$ 210,580 =====	\$ 125,695 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 10,434	\$ 7,556	\$ 10,801

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 171,441	\$ 171,441
Completed wells and equipment	5,143,530	5,133,096
	-----	-----
Accumulated depletion	5,314,971 (4,443,011)	5,304,537 (4,349,082)
	-----	-----
Net oil and gas properties	\$ 871,960	\$ 955,455
	=====	=====

9

1320

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 133,513	\$ 129,059	\$ 124,312
Reimbursement of general and administrative expenses	\$ 25,658	\$ 16,168	\$ 14,082

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and P&P Employees 89-B Conv., L.P. ("EMPL"), Parker & Parsley 89-B, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
	-----	-----
Revenues:		

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 20 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 89-B, L.P. is 47.578455% and 52.421545%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

1321

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	471,441	734,987
Revisions	(202,204)	(246,962)
Production	(35,481)	(52,345)
	-----	-----
Net proved reserves at December 31, 1998	233,756	435,680
Revisions	267,905	413,961
Production	(32,585)	(46,681)
	-----	-----
Net proved reserves at December 31, 1999	469,076	802,960
Revisions	1,942	(157,459)
Production	(30,959)	(42,179)
	-----	-----
Net proved reserves at December 31, 2000	440,059	603,322
	=====	=====

1315

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.35 per barrel of NGLs and \$7.90 per mcf of gas, discounted at 10% was approximately \$3,414,000 and undiscounted was \$6,785,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,		
	2000	1999	1998
	(in thousands)		
Oil and gas producing activities:			
Future cash inflows	\$ 14,354	\$ 11,715	\$ 2,600

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
Plains Marketing, L.P.	55%	51%	-
Genesis Crude Oil, L.P.	-	-	59%
Western Gas Resources, Inc.	4%	6%	26%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$37,745 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating, general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of undistributed profits.

12

1323

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$6,307,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 61% to \$873,058 for 2000 as compared to \$542,232 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 19,708 barrels of oil, 11,251 barrels of natural gas liquids ("NGLs") and 42,179 mcf of gas were sold, or 37,989 barrel of oil equivalents ("BOEs"). In 1999, 20,322 barrels of oil, 12,263 barrels of NGLs and 46,681 mcf of gas were sold, or 40,365 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.25, or 72%, from \$16.96 in 1999 to \$29.21 in 2000. The average price received per barrel of NGLs increased \$5.99, or 63%, from \$9.57 in 1999 to \$15.56 in 2000. The average price received per mcf of gas increased 69% from \$1.72 in 1999 to \$2.90 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$448,166 as compared to \$425,787 in 1999, an increase of \$22,379, or 5%. The increase was due to increases in the impairment of oil and gas properties, production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production costs were \$326,082 in 2000 and \$305,897 in 1999, resulting in a \$20,185 increase, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by a decline in well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 38% from \$20,352 in 1999 to \$28,155 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$25,658 in 2000 and \$16,168 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partners. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$27,748 related to its oil and gas properties during 2000.

Depletion was \$66,181 in 2000 as compared to \$99,538 in 1999, representing a decrease of \$33,357, or 34%. This decrease was primarily due to an 8,572 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1325

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 15% to \$542,232 from \$471,148 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 20,322 barrels of oil, 12,263 barrels of NGLs and 46,681 mcf of gas were sold, or 40,365 BOEs. In 1998, 22,378 barrels of oil, 13,103 barrels of NGLs and 52,345 mcf of gas were sold, or 44,205 BOEs.

The average price received per barrel of oil increased \$3.70, or 28%, from \$13.26 in 1998 to \$16.96 in 1999. The average price received per barrel of NGLs increased \$2.63, or 38%, from \$6.94 in 1998 to \$9.57 in 1999. The average price received per mcf of gas increased 8% from \$1.60 in 1998 to \$1.72 in 1999.

Total costs and expenses decreased in 1999 to \$425,787 as compared to \$842,701 in 1998, a decrease of \$416,914, or 49%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$305,897 in 1999 and \$322,354 in 1998, resulting in a \$16,457 decrease, or 5%. The decrease was due to declines in ad valorem taxes and well maintenance costs.

During this period, G&A increased 27% from \$16,076 in 1998 to \$20,352 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and gas revenues. The Partnership paid the managing general partner \$16,168 in 1999 and \$14,082 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$262,396 related to its oil and gas properties during 1998.

Depletion was \$99,538 in 1999 compared to \$241,875 in 1998, representing a decrease of \$142,337, or 59%. This decrease was the result of an increase in proved reserves of 173,770 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$259,724 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$334,289, offset by increases in production costs paid of \$20,185, G&A expenses paid of \$7,803 and working capital of \$46,577. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$381,025 to oil and gas receipts, offset by \$46,736 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by a decline in well maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited

1326

to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$474,240, of which \$4,742 was distributed to the managing general partner and \$469,498 to the limited

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partners. In 1999, cash distributions to the partners were \$154,304, of which \$1,543 was distributed to the managing general partner and \$152,761 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 89-B, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 89-B, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 89-B, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31 , 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

-
- (a) Stated in thousands.
 - (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
 - (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
 - (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
 - (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
 - (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 89-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 89-B, L.P. (the "Partnership") is a limited partnership organized in 1989 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 22% to \$266,742 for the three months ended March 31, 2001 as compared to \$218,705 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 5,173 barrels of oil, 1,967 barrels of natural gas liquids ("NGLs") and 13,738 mcf of gas were sold, or 9,430 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 5,544 barrels of oil, 3,112 barrels of NGLs and 12,352 mcf of gas were sold, or 10,715 BOEs.

6

1336

The average price received per barrel of oil increased \$1.28, or 5%, from \$27.13 for the three months ended March 31, 2000 to \$28.41 for the same period in 2001. The average price received per barrel of NGLs increased \$4.56, or 31%, from \$14.82 for the three months ended March 31, 2000 to \$19.38 for the same period in 2001. The average price received per mcf of gas increased 232% from \$1.79 during the three months ended March 31, 2000 to \$5.95 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$123,577 for the three months ended March 31, 2001 as compared to \$113,966 for the same period in 2000, an increase of \$9,611, or 8%. This increase was due to increases in depletion, production costs and general and administrative expenses ("G&A").

Production costs were \$93,860 for the three months ended March 31, 2001 and \$90,560 for the same period in 2000 resulting in a \$3,300 increase, or 4%. The increase was due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 40% from \$6,561 for the three months ended March 31, 2000 to \$9,217 for the same period in 2001, primarily due to a higher percentage of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$20,500 for the three months ended March 31, 2001 compared to \$16,845 for the same period in 2000, an increase of \$3,655, or 22%. This increase was primarily due to downward revisions to proved reserves on several wells for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$57,693 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$48,294 and a reduction of \$15,355 in working capital, offset by increases in production costs of \$3,300 and G&A expenses of \$2,656. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$72,787 to oil and gas receipts, offset by \$24,493 resulting from the decline in production during 2001 as compared to the same period in 2000. The

7

1337

increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$186,038, of which \$1,860 was distributed to the managing general partner and \$184,178 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$100,255, of which \$1,003 was distributed to the managing general partner and \$99,252 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARKER & PARSLEY 89-B, L.P.
(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1339

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 89-B, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 89-B, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 89-B, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 89-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 89-B, L.P. (the "Partnership") is a limited partnership organized in 1989 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1345

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$30,586 and \$289,124 related to its proved oil and gas properties during 2000 and 1998, respectively.

8

1346

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$211,364 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 476,944	\$ 133,840	\$ (403,385)
Impairment of oil and gas properties for financial reporting purposes	30,586	--	289,124
Depletion and depreciation provisions for tax reporting purposes less than amounts deducted for financial reporting purposes	63,879	100,769	254,734
Other, net	(1,322)	(3,050)	3,282
	-----	-----	-----
Net income per Federal income tax returns	\$ 570,087	\$ 231,559	\$ 143,755
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the net costs incurred, whether

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 11,495 =====	\$ 8,325 =====	\$11,900 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 188,868	\$ 188,868
Completed wells and equipment	5,666,935 -----	5,655,440 -----
Accumulated depletion	5,855,803 (4,894,889) -----	5,844,308 (4,791,400) -----
Net oil and gas properties	\$ 960,914 =====	\$ 1,052,908 =====

9

1347

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$147,103	\$142,197	\$136,965
Reimbursement of general and administrative expenses	\$ 28,269	\$ 17,812	\$ 15,438

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 89-B Conv., L.P. ("EMPL") Parker & Parsley 89-B Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
Revenues:		
Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 72 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 89-B Conv., L.P. is 52.421545% and 47.578455%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

1348

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	519,501	809,915
Revisions	(222,853)	(272,177)
Production	(39,063)	(57,643)
	-----	-----
Net proved reserves at December 31, 1998	257,585	480,095
Revisions	295,189	456,122
Production	(35,879)	(51,400)
	-----	-----

1339

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net proved reserves at December 31, 1999	516,895	884,817
Revisions	1,443	(174,232)
Production	(34,089)	(46,454)
	-----	-----
Net proved reserves at December 31, 2000	484,249	664,131
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.35 per barrel of NGLs and \$7.90 per mcf of gas, discounted at 10% was approximately \$3,756,000 and undiscounted was \$7,461,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
Plains Marketing, L.P.	55%	51%	-
Genesis Crude Oil, L.P.	-	-	59%
Western Gas Resources, Inc.	4%	6%	26%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$41,588 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all

12

1350

Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$6,949,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and offering expenses allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

13

1351

PARKER & PARSLEY 89-B, L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 61% to \$961,197 for 2000 as compared to \$597,130 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 21,703 barrels of oil, 12,386 barrels of natural gas liquids ("NGLs") and 46,454 mcf of gas were sold, or 41,831 barrel of oil equivalents ("BOEs"). In 1999, 22,376 barrels of oil, 13,503 barrels of NGLs and 51,400 mcf of gas were sold, or 44,446 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the

1342

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.25, or 72%, from \$16.96 in 1999 to \$29.21 in 2000. The average price received per barrel of NGLs increased \$5.99, or 63%, from \$9.57 in 1999 to \$15.56 in 2000. The average price received per mcf of gas increased 69% from \$1.72 in 1999 to \$2.90 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$493,734 as compared to \$469,149 in 1999, an increase of \$24,585, or 5%. The increase was due to increases in the impairment of oil and gas properties, production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$359,243 in 2000 and \$337,025 in 1999, resulting in a \$22,218 increase, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by a decline in well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 39% from \$22,369 in 1999 to \$31,002 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$28,269 in 2000 and \$17,812 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$30,586 related to its oil and gas properties during 2000.

Depletion was \$72,903 in 2000 as compared to \$109,755 in 1999, representing a decrease of \$36,852, or 34%. This decrease was primarily due to an 8,955 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1352

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 15% to \$597,130 from \$518,801 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 22,376 barrels of oil, 13,503 barrels of NGLs and 51,400 mcf of gas were sold, or 44,446 BOEs. In 1998, 24,633 barrels of oil, 14,430 barrels of NGLs and 57,643 mcf of gas were sold, or 48,670 BOEs.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The average price received per barrel of oil increased \$3.70, or 28%, from \$13.26 in 1998 to \$16.96 in 1999. The average price received per barrel of NGLs increased \$2.63, or 38%, from \$6.94 in 1998 to \$9.57 in 1999. The average price received per mcf of gas increased 8% from \$1.60 in 1998 to \$1.72 in 1999.

Total costs and expenses decreased in 1999 to \$469,149 as compared to \$928,348 in 1998, a decrease of \$459,199, or 49%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$337,025 in 1999 and \$355,148 in 1998, resulting in an \$18,123 decrease, or 5%. The decrease was due to reductions in ad valorem taxes and well maintenance costs.

During this period, G&A increased 27% from \$17,625 in 1998 to \$22,369 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$17,812 in 1999 and \$15,438 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$289,124 related to its oil and gas properties during 1998.

Depletion was \$109,755 in 1999 compared to \$266,451 in 1998, representing a decrease of \$156,696, or 59%. This decrease was the result of an increase in proved reserves of 191,467 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$286,341 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$368,079, offset by increases in production costs paid of \$22,218, G&A expenses paid of \$8,633 and working capital of \$50,887. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$419,447 to oil and gas receipts, offset by \$51,368 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by a decline in well

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited

1353

to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on several oil and gas properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$522,514, of which \$5,225 was distributed to the managing general partner and \$517,289 to the limited partners. In 1999, cash distributions to the partners were \$170,020, of which \$1,700 was distributed to the managing general partner and \$168,320 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY PRIVATE INVESTMENT 89, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley Private Investment 89, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Investment 89, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the aggregate historical limited partner distributions through July 31, 2001
- the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001

- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000

- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment

- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)

Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a),

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Merger Value per \$1,000 Limited Partner Investment (b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001 (c)

-- as of December 31, 2000 (c)

Going Concern Value per \$1,000 Limited Partner Investment (c), (d)

Liquidation Value per \$1,000 Limited Partner Investment (c). (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY PRIVATE INVESTMENT 89, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Private Investment 89, L.P. (the "Partnership") was organized in 1989 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1990.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 32% to \$249,447 for the three months ended March 31, 2001 as compared to \$188,721 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 5,909 barrels of oil, 1,619 barrels of natural gas liquids ("NGLs") and 11,008 mcf of gas were sold, or 9,363 barrel of oil equivalents ("BOEs"). For the three months ended

1363

March 31, 2000, 5,867 barrels of oil, 1,854 barrels of NGLs and 6,473 mcf of gas were sold, or 8,800 BOEs.

The average price received per barrel of oil increased \$.69, or 3%, from \$26.78 for the three months ended March 31, 2000 to \$27.47 for the same period in 2001. The average price received per barrel of NGLs increased \$5.15, or 44%, from \$11.59 for the three months ended March 31, 2000 to \$16.74 for the same period in 2001. The average price received per mcf of gas increased 249% from \$1.56 during the three months ended March 31, 2000 to \$5.45 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$174,906 for the three months ended March 31, 2001 as compared to \$98,843 for the same period in 2000, an increase of \$76,063, or 77%. This increase was primarily due to increases in production costs, general and administrative expenses ("G&A") and depletion.

Production costs were \$144,855 for the three months ended March 31, 2001 and \$78,434 for the same period in 2000 resulting in a \$66,421 increase, or 85%. The increase was due to additional workover and well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 54% from \$5,662 for the three months ended March 31, 2000 to \$8,710 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$21,341 for the three months ended March 31, 2001 as compared to \$14,747 for the same period in 2000, an increase of \$6,594, or 45%. This increase was primarily due to a downward revision to proved reserves on one well.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities decreased \$32,158 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This decrease was due to increases in production costs of \$66,421, G&A expenses of \$3,048 and working capital of \$23,477, offset by an increase in oil and gas sales receipts of \$60,788. The increase in oil and gas receipts resulted from

1364

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the increase in commodity prices during 2001 which contributed an additional \$38,843 to oil and gas receipts and \$21,945 resulting from the increase in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional workover and well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Provided by (Used in) Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$158 recognized during the three months ended March 31, 2000 were due to equipment credits received on one active well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$94,260, of which \$943 was distributed to the managing general partner and \$93,317 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$94,968, of which \$950 was distributed to the managing general partner and \$94,018 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1367

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley Private Investment 89, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley Private Investment 89, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Private Investment 89, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

1372

PARKER & PARSLEY PRIVATE INVESTMENT 89, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Private Investment 89, L.P. (the "Partnership") was organized in 1989 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1990. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

1360

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1373

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$44,421 and \$18,873 related to its proved oil and gas properties during 1999 and 1998, respectively.

8

1374

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$49,559 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----
Net income (loss) per statements of operations	\$ 454,189	\$ 40,604
Impairment of oil and gas properties for financial reporting purposes	-	44,421

1362

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion and depreciation for tax reporting purposes less than amounts for financial reporting purposes	49,670	66,310

1375

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 126,729	\$ 122,574	\$ 123,196
Reimbursement of general and administrative expenses	\$ 25,581	\$ 14,534	\$ 14,259

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 89 Private Conv., L.P. ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)	Partn
	-----	-----
Revenues:		
Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.8
After three years	19.191919%	80.8
All other revenues -		
First three years	14.141414%	85.8
After three years	19.191919%	80.8
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	9.090909%	90.9
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.8
After three years	19.191919%	80.8

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	480,284	559,912

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revisions	(179,534)	(180,570)
Production	(36,741)	(44,624)
	-----	-----
Net proved reserves at December 31, 1998	264,009	334,718
Revisions	227,645	277,954
Production	(30,310)	(32,985)
	-----	-----
Net proved reserves at December 31, 1999	461,344	579,687
Revisions	37,767	(55,380)
Production	(30,738)	(30,037)
	-----	-----
Net proved reserves at December 31, 2000	468,373	494,270
	=====	=====

10

1376

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.18 per barrel of NGLs and \$7.93 per mcf of gas, discounted at 10% was approximately \$3,336,000 and undiscounted was \$6,999,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

For the years ended Decem

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

2000	1999	1998
-----	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Plains Marketing, L.P.	65%	64%	-
Genesis Crude Oil, L.P.	-	-	57%
Western Gas Resources, Inc.	1%	3%	15%
GPM Gas Corporation	3%	3%	5%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$48,161 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

12

1378

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$7,060,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS

1367

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 75% to \$856,030 for 2000 as compared to \$487,809 in 1999. The increase in revenues resulted from higher average prices received, offset by a slight decline in production. In 2000, 22,438 barrels of oil, 8,300 barrels of natural gas liquids ("NGLs") and 30,037 mcf of gas were sold, or 35,744 barrel of oil equivalents ("BOEs"). In 1999, 20,601 barrels of oil, 9,709 barrels of NGLs and 32,985 mcf of gas were sold, or 35,808 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$11.94, or 70%, from \$17.06 in 1999 to \$29.00 in 2000. The average price received per barrel of NGLs increased \$6.17, or 71%, from \$8.69 in 1999 to \$14.86 in 2000. The average price received per mcf of gas increased 74% from \$1.57 in 1999 to \$2.73 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses decreased in 2000 to \$410,135 as compared to \$451,760 in 1999, a decrease of \$41,625, or 9%. The decrease was due to a decline in depletion and the impairment of oil and gas properties, offset by an increase in production costs and general and administrative expenses ("G&A").

Production costs were \$321,340 in 2000 and \$311,071 in 1999, resulting in a \$10,269 increase, or 3%. The increase was primarily due to higher production taxes associated with higher oil and gas prices, offset by lower well maintenance costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 47% from \$19,470 in 1999 to \$28,583 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$25,581 in 2000 and \$14,534 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$44,421 related to its oil and gas properties during 1999.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Depletion was \$60,212 in 2000 as compared to \$76,798 in 1999, representing a decrease of \$16,586, or 22%. This decrease was primarily due to a 23,945 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

1380

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 2% to \$487,809 from \$478,637 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 20,601 barrels of oil, 9,709 barrels of NGLs and 32,985 mcf of gas were sold, or 35,808 BOEs. In 1998, 25,672 barrels of oil, 11,069 barrels of NGLs and 44,624 mcf of gas were sold, or 44,178 BOEs.

The average price received per barrel of oil increased \$3.78, or 28%, from \$13.28 in 1998 to \$17.06 in 1999. The average price received per barrel of NGLs increased \$2.12, or 32%, from \$6.57 in 1998 to \$8.69 in 1999. The average price received per mcf of gas increased 8% from \$1.46 in 1998 to \$1.57 in 1999.

Total costs and expenses decreased in 1999 to \$451,760 as compared to \$594,818 in 1998, a decrease of \$143,058, or 24%. The decrease was due to a decline in depletion, offset by an increase in the impairment of oil and gas properties, production costs and G&A.

Production costs were \$311,071 in 1999 and \$300,564 in 1998, resulting in a \$10,507 increase, or 3%. The increase was due to an increase in well maintenance costs incurred to stimulate well production, offset by declines in ad valorem and production taxes.

During this period, G&A increased 15% from \$16,898 in 1998 to \$19,470 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$14,534 in 1999 and \$14,259 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$44,421 and \$18,873 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion was \$76,798 in 1999 compared to \$258,483 in 1998, representing a decrease of \$181,685, or 70%. This decrease was the result of a combination of factors that included an increase in proved reserves of 160,524 barrels of oil during 1999 as a result of higher commodity prices, a decline in oil production of 5,071 barrels for the period ended December 31, 1999 compared to the same period in 1998 and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$337,800 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$371,960, offset by increases in production costs paid of

1381

\$10,269, G&A expenses paid of \$9,113 and working capital of \$14,778. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$347,665 to oil and gas receipts and an increase of \$24,295 resulting from the increase in oil production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices, offset by lower well maintenance costs. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active properties.

Proceeds from asset dispositions of \$158 in 2000 were from equipment credits received on one active well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$465,729, of which \$4,657 was distributed to the managing general partner and \$461,072 to the limited partners. In 1999, cash distributions to the partners were \$103,460, of which \$1,035 was distributed to the managing general partner and \$102,425 to the limited partners.

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 90-A Conv., L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90-A Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2040, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

1390

PARKER & PARSLEY 90-A CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90-A Conv., L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1991.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations (1)

Results of Operations

Revenues:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership's oil and gas revenues increased 29% to \$81,855 for the three months ended March 31, 2001 as compared to \$63,489 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 1,635 barrels of oil, 533 barrels of natural gas liquids ("NGLs") and 4,098 mcf of gas were sold, or 2,851 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 1,650 barrels of oil, 877 barrels of NGLs and 3,430 mcf of gas were sold, or 3,099 BOEs.

6

1391

The average price received per barrel of oil increased \$1.00, or 4%, from \$27.38 for the three months ended March 31, 2000 to \$28.38 for the same period in 2001. The average price received per barrel of NGLs increased \$5.61, or 41%, from \$13.78 for the three months ended March 31, 2000 to \$19.39 for the same period in 2001. The average price received per mcf of gas increased 236% from \$1.82 during the three months ended March 31, 2000 to \$6.12 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$36,428 for the three months ended March 31, 2001 as compared to \$33,586 for the same period in 2000, an increase of \$2,842, or 8%. This increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$26,631 for the three months ended March 31, 2001 and \$24,535 for the same period in 2000 resulting in a \$2,096 increase, or 9%. The increase was due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 54% from \$1,913 for the three months ended March 31, 2000 to \$2,954 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$6,843 for the three months ended March 31, 2001 as compared to \$7,138 for the same period in 2000, a decrease of \$295, or 4%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$17,783 during the three

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$18,395 and a reduction in working capital of \$2,525, offset by increases in production costs of \$2,096 and G&A expenses of \$1,041. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an

7

1392

additional \$21,406 to oil and gas receipts, offset by \$3,011 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$47,627, of which \$476 was distributed to the managing general partner and \$47,151 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$30,267 of which \$303 was distributed to the managing general partner and \$29,964 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated

results described in the forward looking statements.

(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1394

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 90-A Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90-A Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90-A Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

1399

PARKER & PARSLEY 90-A CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90-A Conv., L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1400

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$11,795 related to its proved oil and gas properties during 1998.

8

1401

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$109,150 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$135,356	\$34,513	\$(15,498)
Depletion and depreciation for tax reporting purposes			
less than amounts for financial reporting purposes	23,651	33,412	51,723
Impairment of oil and gas properties for financial reporting purposes	--	--	11,795
Other, net	(403)	1,343	1,229
	-----	-----	-----
Net income per Federal income tax returns	\$158,604	\$69,268	\$49,249
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----	1998 -----
Development costs	\$ 3,055 =====	\$ 2,507 =====	\$ 3,134 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 69,332	\$ 69,332
Completed well and equipment	1,691,929 -----	1,688,874 -----
Accumulated depletion	1,761,261 (1,390,348) -----	1,758,206 (1,363,812) -----
Net oil and gas properties	\$ 370,913 =====	\$ 394,394 =====

9

1402

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 42,503	\$ 41,777	\$ 41,366
Reimbursement of general and administrative expenses	\$ 8,329	\$ 5,027	\$ 4,007

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 90-A Conv., L.P. ("EMPL"), Parker & Parsley 90-A, L.P. and the Partnership are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
Revenues:		
Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 14 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 90-A, L.P. is 25.725191% and 74.274809%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

1403

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	137,987	205,757
Revisions	(49,089)	(52,907)
Production	(11,399)	(16,309)
	-----	-----
Net proved reserves at December 31, 1998	77,499	136,541
Revisions	71,585	121,688
Production	(10,130)	(14,989)
	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net proved reserves at December 31, 1999	138,954	243,240
Revisions	6,057	(59,715)
Production	(9,876)	(13,365)
	-----	-----
Net proved reserves at December 31, 2000	135,135	170,160
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.25 per barrel of NGLs and \$7.89 per mcf of gas, discounted at 10% was approximately \$1,053,000 and undiscounted was \$2,025,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	54%	51%	-
TEPPCO Crude Oil LLC	12%	11%	-
NGTS LLC	10%	10%	-
Genesis Crude Oil, L.P.	-	-	57%
Western Gas Resources, Inc.	2%	5%	22%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC and NGTS LLC were \$13,068, \$2,535 and \$1,423, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the Partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

12

1405

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$2,359,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission, organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

13

1406

PARKER & PARSLEY 90-A CONV., L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 65% to \$279,230 for 2000 as compared to \$169,279 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 6,255 barrels of oil, 3,621 barrels of natural gas liquids ("NGLs") and 13,365 mcf of gas were sold, or 12,104 barrel of oil equivalents ("BOEs"). In 1999, 6,133 barrels of oil, 3,997 barrels of NGLs and 14,989 mcf of gas were sold, or 12,628 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.26, or 72%, from \$17.06 in 1999 to \$29.32 in 2000. The average price received per barrel of NGLs

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

increased \$6.04, or 63%, from \$9.58 in 1999 to \$15.62 in 2000. The average price received per mcf of gas increased 67% from \$1.76 in 1999 to \$2.94 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$3,262 was recognized during 2000 resulting from equipment credits received on one well.

Total costs and expenses increased in 2000 to \$150,163 as compared to \$136,517 in 1999, an increase of \$13,646, or 10%. The increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$114,159 in 2000 and \$93,178 in 1999, resulting in a \$20,981 increase, or 23%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 34% from \$7,068 in 1999 to \$9,468 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$8,329 in 2000 and \$5,027 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$26,536 in 2000 as compared to \$36,271 in 1999, representing a decrease of \$9,735, or 27%. This decrease was primarily due to a 10,806 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 11% to \$169,279 from \$152,905 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 6,133 barrels of oil, 3,997 barrels

1407

of NGLs and 14,989 mcf of gas were sold, or 12,628 BOEs. In 1998, 7,476 barrels of oil, 3,923 barrels of NGLs and 16,309 mcf of gas were sold, or 14,117 BOEs.

The average price received per barrel of oil increased \$3.86, or 29%, from \$13.20 in 1998 to \$17.06 in 1999. The average price received per barrel of NGLs increased \$2.56, or 36%, from \$7.02 in 1998 to \$9.58 in 1999. The average price received per mcf of gas increased 7% from \$1.64 in 1998 to \$1.76 in 1999.

Total costs and expenses decreased in 1999 to \$136,517 as compared to \$170,483 in 1998, a decrease of \$33,966, or 20%. The decrease was due to reductions in depletion, the impairment of oil and gas properties and production costs, offset by an increase in G&A.

Production costs were \$93,178 in 1999 and \$97,819 in 1998, resulting in a \$4,641 decrease, or 5%. The decrease was due to declines in ad valorem taxes and well

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

maintenance costs.

During this period, G&A increased 42% from \$4,961 in 1998 to \$7,068 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$5,027 in 1999 and \$4,007 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$11,795 related to its oil and gas properties during 1998.

Depletion was \$36,271 in 1999 compared to \$55,908 in 1998, representing a decrease of \$19,637, or 35%. This decrease was primarily the result of an increase in proved reserves of 43,411 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 1,343 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$77,593 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$111,227, offset by increases in production costs paid of

1408

\$20,981, G&A expenses paid of \$2,400 and working capital of \$10,253. The increase in oil and gas receipts resulted from the increase in commodity prices

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during 2000 which contributed an additional \$118,292 to oil and gas receipts, offset by \$7,065 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active properties.

Proceeds from disposition of assets of \$3,262 was recognized during 2000 resulting from equipment credits received on one well. Proceeds of \$2,501 during 1999 were received from equipment credits on one active well and one temporarily abandoned well.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$152,116, of which \$1,521 was distributed to the managing general partner and \$150,595 to the limited partners. In 1999, cash distributions to the partners were \$53,463, of which \$535 was distributed to the managing general partner and \$52,928 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 90-A, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 90-A, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90-A, L.P.:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Liquidation Value per \$1,000 Limited Partner Investment	(c), (e)	\$	
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment	(c), (f)	\$	

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or before July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

1418

PARKER & PARSLEY 90-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90-A, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 29% to \$236,358 for the three months ended March 31, 2001 as compared to \$183,303 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by declines in production. For the three months ended March 31, 2001, 4,722 barrels of oil, 1,543 barrels of natural gas liquids ("NGLs") and 11,838 mcf of gas were sold, or 8,238 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 4,767 barrels of oil, 2,523 barrels of NGLs and 9,897 mcf of gas were sold, or 8,940 BOEs.

7

1419

The average price received per barrel of oil increased \$1.00, or 4%, from \$27.38 for the three months ended March 31, 2000 to \$28.38 for the same period in 2001. The average price received per barrel of NGLs increased \$5.61, or 41%, from \$13.78 for the three months ended March 31, 2000 to \$19.39 for the same period in 2001. The average price received per mcf of gas increased 236% from \$1.82 during the three months ended March 31, 2000 to \$6.12 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$105,172 for the three months ended March 31, 2001 as compared to \$97,129 for the same period in 2000, an increase of \$8,043, or 8%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$76,877 for the three months ended March 31, 2001 and \$70,816 for the same period in 2000, resulting in a \$6,061 increase, or 9%. This increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 51% from \$5,681 for the three months ended March 31, 2000 to \$8,561 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$19,734 for the three months ended March 31, 2001 as compared to \$20,632 for the same period in 2000, a decrease of \$898, or 4%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices.

Liquidity and Capital Resources

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$51,822 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$53,129 in oil and gas sales receipts and a reduction of \$7,634 in working capital, offset by increases in production costs of \$6,061 and G&A expenses of \$2,880. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$61,531 to oil and gas receipts, offset by \$8,402 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs

8

1420

incurred to stimulate well production. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual of tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 were for expenditures related to oil and gas equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$137,512, of which \$1,375 was distributed to the managing general partner and \$136,137 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$87,388, of which \$874 was distributed to the managing general partner and \$86,514 to the limited partners.

Proposal to acquire partnerships

On April 18, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement with the SEC proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Pioneer USA is the sole or managing general partner of the partnerships. The preliminary proxy statement is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partners in each partnership and the resolution of SEC review comments. If approved, Pioneer anticipates closing the mergers during the third quarter of 2001.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1423

PART I

ITEM 1. BUSINESS

Parker & Parsley 90-A, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 6,811 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers. Of the Partnership's total oil and gas revenues for 2000, approximately 54%, 12% and 10% were attributable to sales made to Plains Marketing, L.P., TEPPCO Crude Oil LLC and NGTS LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

1424

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 27 oil and gas wells. Two wells have been sold. At December 31, 2000, 25 wells were producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 6,811 outstanding limited partnership interests held of record by 525 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$434,802 and \$152,818, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 65% to \$806,344 for 2000 as compared to \$488,752 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 18,065 barrels of oil, 10,454 barrels of natural gas liquids ("NGLs") and 38,570 mcf of gas were sold, or 34,947 barrel of oil equivalents ("BOEs"). In 1999, 17,702 barrels of oil, 11,546 barrels of NGLs and 43,302 mcf of gas were sold, or 36,465 BOEs. Due to the decline characteristics of the Partnership's oil and gas

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.26, or 72% from \$17.06 in 1999 to \$29.32 in 2000. The average price received per barrel of NGLs increased \$6.04, or 63% from \$9.58 in 1999 to \$15.62 in 2000. The average price received per mcf of gas increased 67% in 2000 to \$2.94 compared to \$1.76 in 1999. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$9,419 was recognized during 2000 resulting from equipment credits received on one fully depleted well.

Total costs and expenses increased in 2000 to \$433,960 as compared to \$394,007 in 1999, an increase of \$39,953, or 10%. This increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$329,608 in 2000 and \$269,017 in 1999, resulting in an increase of \$60,591, or 23%. The increase was primarily due to additional well maintenance and workover costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 36% from \$20,244 in 1999 to \$27,629 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$24,038 in 2000 and \$14,514 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$76,723 in 2000 compared to \$104,746 in 1999, representing a decrease of \$28,023, or 27%. This decrease was primarily due to a 33,982 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 11% to \$488,752 from \$441,480 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 17,702 barrels of oil, 11,546 barrels of NGLs and 43,302 mcf of gas were sold, or 36,465 BOEs. In 1998, 21,587 barrels of oil, 11,328 barrels of NGLs and 47,086 mcf of gas were sold, or 40,763 BOEs.

The average price received per barrel of oil increased \$3.86, or 29% from \$13.20

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in 1998 to \$17.06 in 1999. The average price received per barrel of NGLs increased \$2.56, or 36% from \$7.02 in 1998 to \$9.58 in 1999. The average price received per mcf of gas increased 7% in 1999 to \$1.76 compared to \$1.64 in 1998.

Total costs and expenses decreased in 1999 to \$394,007 as compared to \$492,078 in 1998, a decrease of \$98,071, or 20%. This decrease was primarily due to declines in depletion, the impairment of oil and gas properties and production costs, offset by an increase in G&A.

Production costs were \$269,017 in 1999 and \$282,430 in 1998, resulting in a \$13,413 decline, or 5%. The decline includes a reduction in ad valorem taxes and less well maintenance costs.

During this period, G&A increased 43% from \$14,124 in 1998 to \$20,244 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$14,514 in 1999 and \$11,560 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$34,145 related to its oil and gas properties during 1998.

Depletion was \$104,746 in 1999 compared to \$161,379 in 1998. This represented a decrease of \$56,633, or 35%. This decrease was primarily the result of an increase in proved reserves of 125,332 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 3,885 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$223,816 during the year ended December 31, 2000 from 1999. This increase was due to increases in oil and gas sales receipts of \$321,283, offset by increases in production costs paid of \$60,591, G&A expenses paid of \$7,385 and working capital of \$29,491. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$341,604 to oil and gas receipts, offset by \$20,321 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's investing activities during 2000 and 1999 were for expenditures related to oil and gas equipment upgrades on active properties.

Proceeds from asset dispositions of \$9,419 were recognized during 2000 from equipment credits on one fully depleted well and proceeds of \$7,220 in 1999 were from equipment credits received on one active property and one temporarily abandoned property.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$439,194, of which \$4,392 was distributed to the managing general partner and \$434,802 to the limited partners. In 1999, cash distributions to the partners were \$154,362 of which \$1,544 was distributed to the managing general partner and \$152,818 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 90-A, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90-A, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90-A, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 90-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90-A, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

14

1436

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$34,145 related to its proved oil and gas properties during 1998.

15

1437

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$315,080 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 390,714	\$ 99,965	\$ (44,000)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	68,390	96,496	149,000
Impairment of oil and gas properties for financial reporting purposes	-	-	34,000
Other, net	(1,209)	3,745	3,000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----	-----
Net income per Federal income tax returns	\$ 457,895	\$ 200,206	\$ 142,000
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 8,823	\$ 7,237	\$ 9,047
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 200,177	\$ 200,177
Completed wells and equipment	4,885,008	4,876,185
	-----	-----
Accumulated depletion	5,085,185 (4,014,368)	5,076,362 (3,937,645)
	-----	-----
Net oil and gas properties	\$ 1,070,817	\$ 1,138,717
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 122,715	\$ 120,620	\$ 119,432
Reimbursement of general and administrative expenses	\$ 24,038	\$ 14,514	\$ 11,560

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

16

1438

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and P&P Employees 90-A, L.P., ("EMPL"), Parker & Parsley 90-A Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
	-----	-----
Revenues:		
Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 147 limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 90-A Conv., L.P. is 74.274809% and 25.725191%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	=====	=====

17

1439

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.25 per barrel of NGLs and \$7.89 per mcf of gas, discounted at 10% was approximately \$3,042,000 and undiscounted was \$5,865,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	54%	51%	-
TEPPCO Crude Oil LLC	12%	11%	-
NGTS LLC	10%	10%	3%
Western Gas Resources, Inc.	2%	5%	22%
Genesis Crude Oil, L.P.	-	-	57%

1425

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC and NGTS LLC were \$37,832, \$7,318 and \$4,105, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

19

1441

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$6,811,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1442

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

1426

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name -----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 15% during the first three years and approximately 20% after three years of its operating and general and administrative expenses. In return, they are allocated approximately 15% during the first three years and approximately 20% after three years of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 147 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 122,715	\$ 120,620	\$ 119,432
Reimbursement of general and administrative expenses	\$ 24,038	\$ 14,514	\$ 11,560

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 90-B CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 90-B Conv., L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90-B Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership

- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

(a) Stated in thousands.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2040, unless the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 90-B CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90-B Conv., L.P. (the "Partnership") was organized as a general partnership in 1990 under the laws of the State of Texas and was converted to a Delaware limited partnership on August 1, 1991.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition
and Results of Operations(1)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 28% to \$424,735 for the three months ended March 31, 2001 as compared to \$330,703 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 8,755 barrels of oil, 3,239 barrels of natural gas liquids ("NGLs") and 18,996 mcf of gas were sold, or 15,160 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 8,990 barrels of oil, 3,979 barrels of NGLs and 15,621 mcf of gas were sold, or 15,573 BOEs.

7

1459

The average price received per barrel of oil increased \$1.56, or 6%, from \$27.70 for the three months ended March 31, 2000 to \$29.26 for the same period in 2001. The average price received per barrel of NGLs increased \$4.36, or 31%, from \$13.89 for the three months ended March 31, 2000 to \$18.25 for the same period in 2001. The average price received per mcf of gas increased 243% from \$1.68 during the three months ended March 31, 2000 to \$5.76 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gains on disposition of assets of \$1,975 and \$2,023 was recognized during the three months ended March 31, 2001 and 2000, respectively, from the sale of equipment on one fully depleted well.

Costs and Expenses:

Total costs and expenses increased to \$183,688 for the three months ended March 31, 2001 as compared to \$170,500 for the same period in 2000, an increase of \$13,188, or 8%. The increase was due to increases in production costs and general, administrative expenses ("G&A") and depletion.

Production costs were \$143,206 for the three months ended March 31, 2001 and \$133,608 for the same period in 2000, resulting in a \$9,598 increase, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 34% from \$10,132 for the three months ended March 31, 2000 to \$13,562 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$26,920 for the three months ended March 31, 2001 as compared to \$26,760 for the same period in 2000, an increase of \$160. The increase was primarily due to downward revisions to proved reserves on several wells during the three months ended March 31, 2001, offset by a reduction in the Partnership's net depletable basis from charges taken in accordance with

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121") during the fourth quarter of 2000 and a decline in oil production of 235 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$110,603 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$94,446 in oil and gas sales receipts and a reduction in working capital of \$29,185, offset by increases in production costs of \$9,598 and G&A expenses of \$3,430. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an

8

1460

additional \$95,426 to oil and gas receipts, offset by \$980 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities for the three months ended March 31, 2001 and 2000 were for expenditures related to oil and gas equipment upgrades on active properties.

Proceeds from disposition of assets of \$1,975 and \$2,023 received during the three months ended March 31, 2001 and 2000, respectively, were derived from the sale of equipment on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$285,221, of which \$2,852 was distributed to the managing general partner and \$282,369 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$180,055, of which \$1,801 was distributed to the managing general partner and \$178,254 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1464

PART I

ITEM 1. BUSINESS

Parker & Parsley 90-B Conv., L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas. The Partnership converted to a Delaware limited partnership on August 1, 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 11,897 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 48% was attributable to sales made to Plains Marketing, L.P., 10% to TEPPCO Crude Oil LLC and 10% to Phillips Petroleum Company. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or

2

1465

other liabilities and compliance may increase the cost of the Partnership's operations. The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 104 oil and gas wells. One well has been plugged and abandoned. At December 31, 2000, the Partnership had 103 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

PART II

3

1466

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 11,897 outstanding limited partnership interests held of record by 665 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$825,165 and \$271,636, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

4

1467

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 67% to \$1,513,122 for 2000 as compared to \$907,791 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 36,592 barrels of oil, 16,796 barrels of natural gas liquids ("NGLs") and 64,786 mcf of gas were sold, or 64,186 barrel of oil equivalents ("BOEs"). In 1999, 36,383 barrels of oil, 17,481 barrels of NGLs and 70,803 mcf of gas were sold, or 65,665 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.00, or 70%, from \$17.23 in 1999 to \$29.23 in 2000. The average price received per barrel of NGLs increased \$5.96, or 63%, from \$9.49 in 1999 to \$15.45 in 2000. The average price received per mcf of gas increased 75% from \$1.62 in 1999 to \$2.84 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$2,023 recognized in 2000 was due to equipment credits received on one fully depleted well.

Total costs and expenses decreased to \$739,327 in 2000 as compared to \$749,072

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

in 1999, a decrease of \$9,745, or 1%. The decrease was due to declines in the impairment of oil and gas properties and depletion, offset by increases in production costs and general and administrative expenses ("G&A").

Production costs were \$557,245 in 2000 and \$478,183 in 1999, resulting in an increase of \$79,062, or 17%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 30% from \$35,038 in 1999 to \$45,379 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$40,368 in 2000 and \$27,181 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

5

1468

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$31,774 and \$88,497 related to its oil and gas properties during 2000 and 1999, respectively.

Depletion was \$104,929 in 2000 compared to \$147,354 in 1999, representing a decrease of \$42,425, or 29%. The decrease was primarily due to a 27,994 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 19% to \$907,791 from \$764,787 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 36,383 barrels of oil, 17,481 barrels of NGLs and 70,803 mcf of gas were sold, or 65,665 BOEs. In 1998, 41,140 barrels of oil, 17,403 barrels of NGLs and 73,460 mcf of gas were sold, or 70,786 BOEs.

The average price received per barrel of oil increased \$4.11, or 31%, from \$13.12 in 1998 to \$17.23 in 1999. The average price received per barrel of NGLs increased \$2.89, or 44%, from \$6.60 in 1998 to \$9.49 in 1999. The average price received per mcf of gas increased 8% from \$1.50 in 1998 to \$1.62 in 1999.

Gain on disposition of assets of \$1,669 for 1998 was attributable to credits received from the disposal of oil and gas equipment on a fully depleted well and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

on one well that was plugged and abandoned in a prior year.

Total costs and expenses decreased to \$749,072 in 1999 as compared to \$1,147,349 in 1998, a decrease of \$398,277, or 35%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$478,183 in 1999 and \$517,526 in 1998, resulting in a \$39,343 decrease, or 8%. The decrease was due to declines in well maintenance costs, ad valorem taxes and workover costs, offset by an increase in production taxes due to increased oil and gas sales.

During this period, G&A increased 31% from \$26,722 in 1998 to \$35,038 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$27,181 in 1999 and \$22,923 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$88,497 and \$275,430 related to its oil and gas properties during 1999 and 1998, respectively.

6

1469

Depletion was \$147,354 in 1999 compared to \$327,671 in 1998. This represented a decrease of \$180,317, or 55%. The decrease was primarily due to an increase in proved reserves of 280,631 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 4,757 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$504,622 during the year

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$611,256, offset by increases in production costs paid of \$79,062, G&A expenses paid of \$10,341 and working capital of \$17,231. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$632,790 to oil and gas receipts, offset by \$21,534 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$2,023 recognized in 2000 were due to equipment credits received on one fully depleted well.

7

1470

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$833,500, of which \$8,335 was distributed to the managing general partner and \$825,165 to the limited partners. In 1999, cash distributions to the partners were \$274,380, of which \$2,744 was distributed to the managing general partner and \$271,636 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 90-B Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90-B Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90-B Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 90-B CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90-B Conv., L.P. (the "Partnership") was organized as a general partnership in 1990 under the laws of the State of Texas and was converted to a Delaware limited partnership on August 1, 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

15

1478

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$31,774, \$88,497 and \$275,430 related to its proved oil and gas properties during 2000, 1999 and 1998, respectively.

16

1479

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$233,211 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 787,438	\$ 164,414	\$ (373,956)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	90,499	132,570	175,500
Impairment of oil and gas properties for financial reporting purposes	31,774	88,497	275,430
Other, net	(1,742)	(4,660)	3,987
	-----	-----	-----
Net income per Federal income tax returns	\$ 907,969	\$ 380,821	\$ 80,961
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Development costs	\$ 15,304	\$ 12,347	\$ 18,344
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

2000

1999

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proved properties:		
Property acquisition costs	\$ 369,498	\$ 369,498
Completed wells and equipment	9,258,622	9,243,318
	-----	-----
	9,628,120	9,612,816
Accumulated depletion	(8,075,752)	(7,939,049)
	-----	-----
Net oil and gas properties	\$1,552,368	\$1,673,767
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 211,037	\$ 214,306	\$ 209,549
Reimbursement of general and administrative expenses	\$ 40,368	\$ 27,181	\$ 22,923

17

1480

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 90-B Conv., L.P. ("EMPL"), Parker & Parsley 90-B, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA(1)	Partnerships(2)
	-----	-----
Revenues:		
Proceeds from disposition of depreciable and depletable properties:		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues		
First three years	14.141414%	85.858586%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses:		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 80 limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 90-B, L.P. is 26.94006% and 73.05994%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	914,930	864,646
Revisions	(446,456)	(190,771)
Production	(58,543)	(73,460)
	-----	-----
Net proved reserves at December 31, 1998	409,931	600,415
Revisions	435,645	666,249
Production	(53,864)	(70,803)
	-----	-----
Net proved reserves at December 31, 1999	791,712	1,195,861
Revisions	15,019	(155,368)
Production	(53,388)	(64,786)
	-----	-----
Net proved reserves at December 31, 2000	753,343	975,707
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.19 per barrel of NGLs and \$7.66 per mcf of gas, discounted at 10% was approximately \$5,752,000 and undiscounted was \$11,644,000.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	48%	46%	-
TEPPCO Crude Oil LLC	10%	11%	-
Genesis Crude Oil, L.P.	-	-	58%
Western Gas Resources, Inc.	4%	5%	21%
Phillips Petroleum Company	10%	5%	5%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC and Phillips Petroleum Company were \$65,440, \$13,643 and \$7,386, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The

1483

majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the Partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$11,897,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

1484

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name	Age at December 31, 2000	Position
----	----	-----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

22

1485

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate

1467

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

23

1486

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 15% during the first three years and approximately 20% after three years of its operating and general and administrative expenses. In return, they are allocated approximately 15% during the first three years and approximately 20% after three years of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

1468

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 80 limited partnership interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

1487

24

	2000	1999	1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 211,037	\$ 214,306	\$ 209,549
Reimbursement of general and administrative expenses	\$ 40,368	\$ 27,181	\$ 22,923

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000,
1999 and 1998

Statements of partners' capital for the years ended December 31,
2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000,
1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the
required information is in the financial statements or notes thereto,
or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or
incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 90-B, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 90-B, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90-B, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

--	as of December 31, 2000	(c) \$
Going Concern Value per \$1,000 Limited Partner Investment	(c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment	(c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment	(c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2040, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90-B, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 28% to \$1,151,858 for the three months ended March 31, 2001 as compared to \$896,935 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 23,737 barrels of oil, 8,809 barrels of natural gas liquids ("NGLs") and 51,504 mcf of gas were sold, or 41,130 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 24,387 barrels of oil, 10,810 barrels of NGLs and 42,382 mcf of gas were sold, or 42,261 BOEs.

7

1501

The average price received per barrel of oil increased \$1.56, or 6%, from \$27.70 for the three months ended March 31, 2000 to \$29.26 for the same period in 2001. The average price received per barrel of NGLs increased \$4.36, or 31%, from \$13.89 for the three months ended March 31, 2000 to \$18.25 for the same period in 2001. The average price received per mcf of gas increased 243% from \$1.68 during the three months ended March 31, 2000 to \$5.76 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Gains on disposition of assets of \$5,357 and \$5,487 recognized during the three months ended March 31, 2001 and 2000, respectively, were from the sale of equipment on one fully depleted well.

Costs and Expenses:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Total costs and expenses increased to \$497,655 for the three months ended March 31, 2001 as compared to \$462,446 for the same period in 2000, an increase of \$35,209, or 8%. The increase was due to increases in production costs, general and administrative expenses ("G&A") and depletion.

Production costs were \$388,370 for the three months ended March 31, 2001 and \$362,344 for the same period in 2000, resulting in a \$26,026 increase, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 33% from \$27,481 for the three months ended March 31, 2000 to \$36,650 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$72,635 for the three months ended March 31, 2001 as compared to \$72,621 for the same period in 2000, an increase of \$14. The increase was primarily due to downward revisions to proved reserves on several wells during the three months ended March 31, 2001, offset by a reduction in the Partnership's net depletable basis from charges taken in accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121") during the fourth quarter of 2000 and a decline in oil production of 650 barrels for the period ended March 31, 2001 compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$246,326 for the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$256,268 in oil and gas sales receipts and a reduction in working capital of \$25,253, offset by increases in production costs of \$26,026 and G&A expenses of \$9,169. The increase in oil and gas

8

1502

receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$259,260 to oil and gas receipts, offset by \$2,992 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities for the three months ended March 31, 2001 and 2000 were related to expenditures for upgrades of oil and gas equipment on active properties.

Proceeds from disposition of assets of \$5,357 and \$5,487 received during the three months ended March 31, 2001 and 2000, respectively, were derived from the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

sale of equipment on one fully depleted well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$773,504, of which \$7,735 was distributed to the managing general partner and \$765,769 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$488,299, of which \$4,883 was distributed to the managing general partner and \$483,416 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1506

PART I

ITEM 1. BUSINESS

Parker & Parsley 90-B, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 32,264 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA supplies all management functions.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 48% was attributable to sales made to Plains Marketing, L.P., 10% to TEPPCO Crude Oil LLC and 10% to Phillips Petroleum Company. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

1507

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 104 oil and gas wells. One well has been plugged and abandoned. At December 31, 2000, the Partnership had 103 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

1508

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 32,264 outstanding limited partnership interests held of record by 2,201 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$2,237,802 and \$736,663, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

ITEM 7. MANAGEMENT' DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 67% to \$4,103,548 for 2000 as compared to \$2,461,819 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 99,252 barrels of oil, 45,552 barrels of natural gas liquids ("NGLs") and 175,696 mcf of gas were sold, or 174,087 barrel of oil equivalents ("BOEs"). In 1999, 98,658 barrels of oil, 47,406 barrels of NGLs and 192,016 mcf of gas were sold, or

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

178,067 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.00, or 70%, from \$17.23 in 1999 to \$29.23 in 2000. The average price received per barrel of NGLs increased \$5.96, or 63%, from \$9.49 in 1999 to \$15.45 in 2000. The average price received per mcf of gas increased 75% from \$1.62 in 1999 to \$2.84 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$5,487 recognized in 2000 was due to equipment credits received on one fully depleted well.

Total costs and expenses decreased in 2000 to \$2,004,420 as compared to \$2,029,978 in 1999, a decrease of \$25,558, or 1%. The decrease was due to declines in the impairment of oil and gas properties and depletion, offset by increases in production costs and general and administrative expenses ("G&A").

Production costs were \$1,511,223 in 2000 and \$1,296,822 in 1999, resulting in an increase of \$214,401, or 17%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 31% from \$93,562 in 1999 to \$122,731 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$109,474 in 2000 and \$73,707 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

5

1510

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$86,231 and \$240,063 related to its oil and gas properties during 2000 and 1999, respectively.

Depletion was \$284,235 in 2000 compared to \$399,531 in 1999, representing a decrease of \$115,296, or 29%. This decrease was primarily due to an 81,075 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

1999 compared to 1998

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership's 1999 oil and gas revenues increased 19% to \$2,461,819 from \$2,074,056 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 98,658 barrels of oil, 47,406 barrels of NGLs and 192,016 mcf of gas were sold, or 178,067 BOEs. In 1998, 111,585 barrels of oil, 47,190 barrels of NGLs and 199,215 mcf of gas were sold, or 191,978 BOEs.

The average price received per barrel of oil increased \$4.11, or 31%, from \$13.12 in 1998 to \$17.23 in 1999. The average price received per barrel of NGLs increased \$2.89, or 44%, from \$6.60 in 1998 to \$9.49 in 1999. The average price received per mcf of gas increased 8% from \$1.50 in 1998 to \$1.62 in 1999.

A gain on disposition of assets of \$4,527 recognized during 1998 was due to credits received from the disposal of oil and gas equipment on one fully depleted well and one well that was plugged and abandoned in a prior year.

Total costs and expenses decreased in 1999 to \$2,029,978 as compared to \$3,108,696 in 1998, a decrease of \$1,078,718, or 35%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$1,296,822 in 1999 and \$1,403,494 in 1998, resulting in a \$106,672 decrease, or 8%. The decrease was due to declines in well maintenance costs, ad valorem taxes and workover costs.

During this period, G&A increased 29% from \$72,284 in 1998 to \$93,562 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$73,707 in 1999 and \$62,152 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$240,063 and \$744,642 related to its oil and gas properties during 1999 and 1998, respectively.

6

1511

Depletion was \$399,531 in 1999 compared to \$888,276 in 1998. This represented a decrease of \$488,745, or 55%. This decrease was primarily due to an increase in proved reserves of 761,146 barrels of oil during 1999 due to higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 12,927 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$1,473,163 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$1,657,757 and a decline in working capital of \$58,976, offset by increases in production costs paid of \$214,401 and G&A expenses paid of \$29,169. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$1,715,313 to oil and gas receipts, offset by \$57,556 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$5,487 recognized in 2000 were due to equipment credits received on one fully depleted well.

7

1512

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$2,260,406, of which \$22,604 was distributed to the managing general partner and \$2,237,802 to the limited partners. In 1999, cash distributions to the partners were \$744,104, of which \$7,441 was distributed to the managing general partner and \$736,663 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 90-B, L.P.

(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90-B, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90-B, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 90-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90-B, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

15

1520

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$86,231, \$240,063 and \$744,642 related to its proved oil and gas properties during 2000, 1999 and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1998, respectively.

16

1521

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$632,807 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----
Net income (loss) per statements of operations	\$ 2,136,271	\$ 447,469
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	246,057	359,438
Impairment of oil and gas properties for financial reporting purposes	86,231	240,063
Other, net	(4,768)	(12,935)
	-----	-----
Net income per Federal income tax returns	\$ 2,463,791 =====	\$ 1,034,035 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 41,504 =====	\$ 33,486 =====	\$ 49,747 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 1,002,057	\$ 1,002,057

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Completed wells and equipment	25,108,873	25,067,369
	-----	-----
Accumulated depletion	26,110,930 (21,899,717)	26,069,426 (21,529,251)
	-----	-----
Net oil and gas properties	\$ 4,211,213	\$ 4,540,175
	=====	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 572,323	\$ 581,191	\$ 568,275
	-----	-----	-----
Reimbursement of general and administrative expenses	\$ 109,474	\$ 73,707	\$ 62,152

17

1522

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and P&P Employees 90-B Conv., L.P. ("EMPL"), Parker & Parsley 90-B Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
	-----	-----
Revenues:		
Proceeds from disposition of depreciable and depletable properties		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

1501

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Costs and expenses:

Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 83 limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 90-B Conv., L.P. is 73.05994% and 26.94006%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	2,481,201	2,344,959
Revisions	(1,210,571)	(517,240)
Production	(158,775)	(199,215)
	-----	-----
Net proved reserves at December 31, 1998	1,111,855	1,628,504
Revisions	1,181,592	1,807,095
Production	(146,064)	(192,016)
	-----	-----
Net proved reserves at December 31, 1999	2,147,383	3,243,583
Revisions	46,430	(419,625)
Production	(144,804)	(175,696)
	-----	-----
Net proved reserves at December 31, 2000	2,049,009	2,648,262
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

per barrel of oil, \$13.19 per barrel of NGLs and \$7.66 per mcf of gas, discounted at 10% was approximately \$15,617,000 and undiscounted was \$31,632,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider probable reserves, anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Plains Marketing, L.P.	48%	46%	-
TEPPCO Crude Oil LLC	10%	11%	-
Genesis Crude Oil, L.P.	-	-	58%
Western Gas Resources, Inc.	4%	5%	22%
Phillips Petroleum Company	10%	5%	5%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., TEPPCO Crude Oil LLC and Phillips Petroleum Company were \$177,462, \$37,001 and \$20,032, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The

20

1525

majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the Partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$32,264,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

21

1526

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name -----	Age at December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 15% during the first three years and approximately 20% after three years of its operating and general and administrative expenses. In return, they are allocated approximately 15% during

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the first three years and approximately 20% after three years of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 83 limited partnership interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

24

1529

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 572,323	\$ 581,191	\$ 568,275
Reimbursement of general and administrative expenses	\$ 109,474	\$ 73,707	\$ 62,152

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 90-C CONV., L.P., A DELAWARE LIMITED PARTNERSHIP

TO

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PROXY STATEMENT/PROSPECTUS DATED _____, 2001

THE DATE OF THIS SUPPLEMENT IS _____, 2001

This document contains important information specific to Parker & Parsley 90-C Conv., L.P., and supplements the proxy statement/prospectus dated _____, 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90-C Conv., L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

results of operations, for the three months ended March 31, 2001

- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

1535

PARKER & PARSLEY 90-C CONV., L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$ 7,5
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$ 4,9
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$ 1,8
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$243.
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	3.
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$126.
-- as of December 31, 2000 (c)	\$132.
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$226.
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$236.
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$ 1

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

value or amount attributable to a single unit investment.

- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2040, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

PARKER & PARSLEY 90-C CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90-C Conv., L.P. (the "Partnership") was organized as a general partnership in 1990 under the laws of the State of Texas and was converted to a Delaware limited partnership on August 1, 1991.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 19% to \$230,925 for the three months ended March 31, 2001 as compared to \$193,711 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 5,811 barrels of oil, 859 barrels of natural gas liquids ("NGLs") and 8,151 mcf of gas were sold, or 8,029 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 5,802 barrels of oil, 1,943 barrels of NGLs and 6,434 mcf of gas were sold, or 8,817 BOEs.

7

1543

The average price received per barrel of oil increased \$.92, or 3%, from \$27.16 for the three months ended March 31, 2000 to \$28.08 for the same period in 2001. The average price received per barrel of NGLs increased \$6.00, or 46%, from \$12.95 for the three months ended March 31, 2000 to \$18.95 for the same period in 2001. The average price received per mcf of gas increased 270% from \$1.71 during the three months ended March 31, 2000 to \$6.33 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Total costs and expenses increased to \$117,298 for the three months ended March 31, 2001 as compared to \$103,387 for the same period in 2000, an increase of \$13,911, or 13%. This increase was primarily due increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$95,640 for the three months ended March 31, 2001 and \$83,711 for the same period in 2000, resulting in an increase of \$11,929, or 14%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas revenues.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 38% from \$5,934 for the three months ended March 31, 2000 to \$8,175 for the same period in 2001 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$13,483 for the three months ended March 31, 2001 as compared to \$13,742 for the same period in 2000, a decrease of \$259, or 2%. This decrease was primarily due to positive revisions to proved reserves on one well during the three months ended March 31, 2001.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$39,829 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$37,505 in oil and gas sales receipts and a reduction in working capital of \$16,494, offset by increases in production costs of \$11,929 and G&A expenses of \$2,241. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$46,902 to oil and gas receipts, offset by \$9,397 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and increased production taxes associated with higher oil and gas prices. The increase in G&A

was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 related to expenditures for upgrades of oil and gas equipment on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$161,186, of which \$1,612 was distributed to the managing general partner

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

and \$159,574 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$103,576, of which \$1,036 was distributed to the managing general partner and \$102,540 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1547

PART I

ITEM 1. BUSINESS

Parker & Parsley 90-C Conv., L.P. (the "Partnership") is a general partnership organized in 1990 under the laws of the State of Texas. The Partnership converted to a Delaware limited partnership on August 1, 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 7,531 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 64% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

1548

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 44 oil and gas wells. One well was sold and one well was plugged and abandoned due to uneconomical operations. At December 31, 2000, the Partnership had 42 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

1549

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 7,531 outstanding limited partnership interests held of record by 505 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$492,300 and \$135,825, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000 -----	1999 -----	1998 -----	1997 -----
Operating results:

4

1550

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 71% to \$917,184 for 2000 as compared to \$537,893 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 23,602 barrels of oil, 9,171 barrels of natural gas liquids ("NGLs") and 30,423 mcf of gas were sold, or 37,844 barrel of oil equivalentents ("BOEs"). In 1999, 23,568 barrels of oil, 9,050 barrels of NGLs and 29,399 mcf of gas were sold, or 37,518 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.21, or 71%, from \$17.13 in 1999 to \$29.34 in 2000. The average price received per barrel of NGLs increased \$5.60, or 60%, from \$9.31 in 1999 to \$14.91 in 2000. The average price received per mcf of gas increased 70% from \$1.70 in 1999 to \$2.89 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than received in 2000.

Gains on dispositions of assets of \$388 and \$104 recognized during 2000 and 1999, respectively, were due to equipment credits received on a fully depleted well in each year.

Total costs and expenses increased in 2000 to \$416,488 compared to \$405,150 in 1999, an increase of \$11,338, or 3%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

decline in depletion.

Production costs were \$334,055 in 2000 and \$297,353 in 1999, resulting in an increase of \$36,702, or 12%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period G&A increased 45% from \$20,987 in 1999 to \$30,429 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$27,439 in 2000 and \$16,060 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

5

1551

Depletion was \$52,004 in 2000 as compared to \$86,810 in 1999, representing a decrease of \$34,806, or 40%. This decrease was primarily due to a 31,374 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 25% to \$537,893 from \$430,499 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 23,568 barrels of oil, 9,050 barrels of NGLs and 29,399 mcf of gas were sold, or 37,518 BOEs. In 1998, 24,493 barrels of oil, 8,694 barrels of NGLs and 30,348 mcf of gas were sold, or 38,245 BOEs.

The average price received per barrel of oil increased \$3.89, or 29%, from \$13.24 in 1998 to \$17.13 in 1999. The average price received per barrel of NGLs increased \$2.51, or 37%, from \$6.80 in 1998 to \$9.31 in 1999. The average price received per mcf of gas increased 10% from \$1.55 in 1998 to \$1.70 in 1999.

Total costs and expenses decreased in 1999 to \$405,150 compared to \$693,871 in 1998, a decrease of \$288,721, or 42%. This decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$297,353 in 1999 and \$314,363 in 1998, resulting in a decrease of \$17,010, or 5%. The decrease was due to declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes.

During this period G&A increased 39% from \$15,084 in 1998 to \$20,987 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$16,060 in 1999 and \$12,838 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$185,784 related to its oil and gas properties during 1998.

Depletion was \$86,810 in 1999 compared to \$178,640 in 1998. This represented a decrease of \$91,830, or 51%. This decrease was primarily the result of an increase in proved reserves of 207,077 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

6

1552

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$330,268 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$383,466, offset by increases in production costs paid of \$36,702, G&A expenses paid of \$9,442 and working capital of \$7,054. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$377,706 to oil and gas receipts and \$5,760 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active oil and gas properties.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proceeds from dispositions of assets of \$388 and \$104 recognized during 2000 and 1999, respectively, were related to equipment credits received on a fully depleted well in each year.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$497,273, of which \$4,973 was distributed to the managing general partner and \$492,300 to the limited partners. In 1999, cash distributions to the partners were \$137,197, of which \$1,372 was distributed to the managing general partner and \$135,825 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley 90-C Conv., L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90-C Conv., L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners'

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90-C Conv., L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 90-C CONV., L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90-C Conv., L.P. (the "Partnership") is a general partnership organized in 1990 under the laws of the State of Texas. The Partnership converted to a Delaware limited partnership on August 1, 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

1536

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of- production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income (loss) of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$185,784 related to its proved oil and gas properties during 1998.

15

1561

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$49,618 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income (loss) per Federal income tax returns for the years ended December 31:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	2000 -----	1999 -----
Net income (loss) per statements of operations	\$ 509,518	\$ 137,106
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	40,369	76,676
Impairment of oil and gas properties for financial reporting purposes	-	-
Intangible development costs capitalized for financial reporting purposes and expensed for tax reporting purposes	(385)	-
Other, net	(1,143)	(1,786)
	-----	-----
Net income (loss) per Federal income tax returns	\$ 548,359 =====	\$ 211,996 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----
Development costs	\$ 22,764 =====	\$ 10,512 =====

Capitalized oil and gas properties consist of the following:

	2000 -----
Proved properties:	
Property acquisition costs	\$ 226,701
Completed wells and equipment	5,571,792

Accumulated depletion	5,798,493 (5,000,618)

Net oil and gas properties	\$ 797,875 =====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

following related party transactions with the managing general partner during the years ended December 31:

16

1562

	2000	1999
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 130,806	\$ 126,701
Reimbursement of general and administrative expenses	\$ 27,439	\$ 16,060

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 90-C Conv., L.P. ("EMPL"), Parker & Parsley 90-C, L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)
Revenues:	
Proceeds from disposition of depreciable and depletable properties -	
First three years	14.141414%
After first three years	19.191919%
All other revenues -	
First three years	14.141414%
After first three years	19.191919%
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	9.090909%
Operating costs, reporting and legal expenses and general and administrative expenses -	
First three years	14.141414%
After first three years	19.191919%

- (1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 30 limited partner interests owned by Pioneer USA.
- (2) The allocation between the Partnership and Parker & Parsley 90-C, L.P. is 38.349119% and 61.650881%, respectively.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table represents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

17

1563

	Oil and NGLs (bbls) -----
Net proved reserves at January 1, 1998	424,601
Revisions	(204,124)
Production	(33,187)

Net proved reserves at December 31, 1998	187,290
Revisions	293,912
Production	(32,618)

Net proved reserves at December 31, 1999	448,584
Revisions	50,848
Production	(32,773)

Net proved reserves at December 31, 2000	466,659 =====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.22 per barrel of NGLs and \$7.80 per mcf of gas, discounted at 10% was approximately \$3,245,000 and undiscounted was \$6,366,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999
Plains Marketing, L.P.	64%	62%
Genesis Crude Oil, L.P.	-	-
Western Gas Resources, Inc.	2%	3%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$48,722 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the Partnership agreement, the managing general partner pays

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$7,531,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1566

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Director Operations and Director

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Rich Dealy

34

Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

1567

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm

1545

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 15% during the first three years and approximately 20% after three years of its operating and general and administrative expenses. In return, they are allocated approximately 15% during the first three years and approximately 20% after three years of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 30 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

23

1569

	2000	1999
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 130,806	\$ 126,701
Reimbursement of general and administrative expenses	\$ 27,439	\$ 16,060

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 90-C, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 90-C, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90-C, L.P.:

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 90-C, L.P.
SUPPLEMENTAL INFORMATION TABLE

1552

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Aggregate Initial Investment by the Limited Partners(a)

Aggregate Historical Limited Partner Distributions through July 31, 2001(a)

Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a),

Merger Value per \$1,000 Limited Partner Investment(b), (c)

Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)

Book Value per \$1,000 Limited Partner Investment:

-- as of March 31, 2001(c)

-- as of December 31, 2000(c)

Going Concern Value per \$1,000 Limited Partner Investment(c), (d)

Liquidation Value per \$1,000 Limited Partner Investment(c), (e)

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f)

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2039, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90-C, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 19% to \$371,240 for the three months ended March 31, 2001 as compared to \$311,387 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 9,339 barrels of oil, 1,379 barrels of natural gas liquids ("NGLs") and 13,106 mcf of gas were sold, or 12,902 barrel of oil equivalents ("BOEs"). For the three

7

1583

months ended March 31, 2000, 9,323 barrels of oil, 3,126 barrels of NGLs and 10,341 mcf of gas were sold, or 14,173 BOEs.

The average price received per barrel of oil increased \$.92, or 3%, from \$27.16 for the three months ended March 31, 2000 to \$28.08 for the same period in 2001. The average price received per barrel of NGLs increased \$6.00, or 46%, from \$12.95 for the three months ended March 31, 2000 to \$18.95 for the same period in 2001. The average price received per mcf of gas increased 270% from \$1.71 during the three months ended March 31, 2000 to \$6.33 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$188,490 for the three months ended March 31, 2001 as compared to \$166,213 for the same period in 2000, an increase of \$22,277, or 13%. This increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$153,745 for the three months ended March 31, 2001 and \$134,566 for the same period in 2000, resulting in an increase of \$19,179, or 14%. The increase was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 37% from \$9,539 for the three months ended March 31, 2000 to \$13,096 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual of tax preparation fees.

Depletion was \$21,649 for the three months ended March 31, 2001 as compared to \$22,108 for the same period in 2000, a decrease of \$459, or 2%. This decrease was primarily due to positive revisions to proved reserves on one well during the three months ended March 31, 2001.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$67,747 during the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$60,337 in oil and gas sales receipts and a reduction in working capital of \$30,146, offset by increases in production costs of \$19,179 and G&A expenses of \$3,557. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which

8

1584

contributed an additional \$75,502 to oil and gas receipts, offset by \$15,165 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to additional well maintenance costs incurred to stimulate well production and higher production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual of tax preparation fees.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 were related to expenditures for upgrades of oil and gas equipment on active properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$259,063, of which \$2,591 was distributed to the managing general partner and \$256,472 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$166,511, of which \$1,665 was distributed to the managing general partner and \$164,846 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

Parts I and II of this annual report on Form 10-K (the "Report") contain forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements. See "Item 1. Business" for a description of various factors that could materially affect the ability of the Partnership to achieve the anticipated results described in the forward looking statements.

1588

PART I

ITEM 1. BUSINESS

Parker & Parsley 90-C, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 12,107 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 64% was attributable to sales made to Plains Marketing, L.P. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial liability due to pollution and other environmental damages. Although the Partnership believes that

2

1589

its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 44 oil and gas wells. One well was sold and one well was plugged and abandoned due to uneconomical operations. At December 31, 2000, the Partnership had 42 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities for the years then ended, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

1590

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 12,107 outstanding limited partnership interests held of record by 901 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$791,434 and \$218,354, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

2000	1999	1998	1997	1996
------	------	------	------	------

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Operating results:

Oil and gas sales	\$1,474,499	\$ 864,722	\$ 692,090	\$1,063,396	\$ 1,346,
Impairment of oil and gas properties	\$ --	\$ --	\$ 298,622	\$ 127,213	\$

At year end:					
Identifiable assets	\$1,636,242	\$1,621,156	\$1,617,114	\$2,261,689	\$ 2,664,

4

1591

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 71% to \$1,474,499 for 2000 as compared to \$864,722 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 37,944 barrels of oil, 14,742 barrels of natural gas liquids ("NGLs") and 48,907 mcf of gas were sold, or 60,837 barrel of oil equivalents ("BOEs"). In 1999, 37,886 barrels of oil, 14,547 barrels of NGLs and 47,265 mcf of gas were sold, or 60,311 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.21, or 71%, from

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$17.13 in 1999 to \$29.34 in 2000. The average price received per barrel of NGLs increased \$5.60, or 60%, from \$9.31 in 1999 to \$14.91 in 2000. The average price received per mcf of gas increased 70% from \$1.70 in 1999 to \$2.89 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gains on disposition of assets of \$624 and \$167 recognized during 2000 and 1999, respectively, were due to equipment credits received on a fully depleted well in each year.

Total costs and expenses increased in 2000 to \$669,449 as compared to \$650,544 in 1999, an increase of \$18,905, or 3%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$537,048 in 2000 and \$477,835 in 1999, resulting in an increase of \$59,213, or 12%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period G&A increased 47% from \$33,223 in 1999 to \$48,801 in 2000 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$44,112 in 2000 and \$25,818 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$83,600 in 2000 compared to \$139,486 in 1999, representing a decrease of \$55,886, or 40%. This decrease was primarily due to a 50,718 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 25% to \$864,722 from \$692,090 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 37,886 barrels of oil, 14,547 barrels of NGLs and 47,265 mcf of gas were sold, or 60,311 BOEs. In 1998, 39,380 barrels of oil, 13,978 barrels of NGLs and 48,787 mcf of gas were sold, or 61,489 BOEs.

The average price received per barrel of oil increased \$3.89, or 29%, from \$13.24 in 1998 to \$17.13 in 1999. The average price received per barrel of NGLs increased \$2.51, or 37%, from \$6.80 in 1998 to \$9.31 in 1999. The average price

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

received per mcf of gas increased 10% from \$1.55 in 1998 to \$1.70 in 1999.

Total costs and expenses decreased in 1999 to \$650,544 as compared to \$1,115,454 in 1998, a decrease of \$464,910, or 42%. This decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$477,835 in 1999 and \$505,571 in 1998, resulting in a \$27,736 decrease, or 5%. The decrease was due to declines in well maintenance costs and ad valorem taxes, offset by an increase in production taxes

During this period G&A increased 37% from \$24,190 in 1998 to \$33,223 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$25,818 in 1999 and \$20,639 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$298,622 related to its oil and gas properties during 1998.

Depletion was \$139,486 in 1999 compared to \$287,071 in 1998. This represented a decrease of \$147,585, or 51%. This decrease was primarily the result of an increase in proved reserves of 332,733 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998,

weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net cash provided by operating activities increased \$532,008 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$616,371, offset by increases in production costs paid of \$59,213, G&A expenses paid of \$15,578 and working capital of \$9,572. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$607,017 to oil and gas receipts and an increase of \$9,354 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active oil and gas properties.

Proceeds from disposition of assets of \$624 and \$167 recognized during 2000 and 1999, respectively, were related to equipment credits received on a fully depleted well in each year.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$799,428, of which \$7,994 was distributed to the managing general partner and \$791,434 to the limited partners. In 1999, cash distributions to the partners were \$220,560, of which \$2,206 was distributed to the managing general partner and \$218,354 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 90-C, L.P.

(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90-C, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90-C, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 90-C, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90-C, L.P. (the "Partnership") is a limited partnership organized in 1990 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income (loss) of the Partnership is included in the individual Federal income tax returns of the respective partners.

14

1601

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$298,622 related to its proved oil and gas properties during 1998.

15

1602

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$81,171 less than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income (loss) per Federal income tax returns for the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Net income (loss) per statements of operations	\$ 818,778	\$ 220,855	\$ (416,064)
Depletion and depreciation provisions for tax reporting purposes less than amounts for financial reporting purposes	64,630	123,267	81,152
Impairment of oil and gas properties for financial reporting purposes	--	--	298,622
Intangible development costs capitalized for financial reporting purposes and expensed for tax reporting purposes	(619)	--	--
Other, net	(1,775)	(4,424)	4,552
	-----	-----	-----
Net income (loss) per Federal income tax return	\$ 881,014	\$ 339,698	\$ (31,738)
	=====	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999	1998
Development costs	\$ 36,595	\$ 16,900	\$ 21,456

Capitalized oil and gas properties consist of the following:

	2000		1999		1998
Proved properties:					
Property acquisition costs	\$ 364,450	\$	8,957,333	\$	8,957,333
Completed wells and equipment	9,321,783		(8,040,111)		(7,957,333)
Accumulated depletion	\$ 1,281,672		\$ 1,281,672		\$ 1,281,672
Net oil and gas properties					

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000		1999		1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 210,287	\$	203,686	\$	203,686
Reimbursement of general and administrative expenses	\$ 44,112	\$	25,818	\$	25,818

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA and P&P Employees 90-C Conv., L.P. ("EMPL") (the "Entities"), Parker & Parsley 90-C Conv., L.P. and the Partnership (the "Partnerships") are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnerships as follows:

	Pioneer USA (1)	Partnerships (2)
Revenues:		
Proceeds from disposition of depreciable and depletable properties:		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
All other revenues:		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses:		
First three years	14.141414%	85.858586%
After first three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 27 limited partner interests owned by Pioneer USA.

(2) The allocation between the Partnership and Parker & Parsley 90-C Conv., L.P. is 61.650881% and 38.349119%, respectively.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	682,212	685,617
Revisions	(327,935)	(275,264)
Production	(53,358)	(48,787)
	-----	-----
Net proved reserves at December 31, 1998	300,919	361,566
Revisions	472,259	575,173
Production	(52,433)	(47,265)
	-----	-----
Net proved reserves at December 31, 1999	720,745	889,474
Revisions	82,135	(88,650)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Production	(52,686)	(48,907)
	-----	-----
Net proved reserves at December 31, 2000	750,194	751,917
	=====	=====

17

1604

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.22 per barrel of NGLs and \$7.80 per mcf of gas, discounted at 10% was approximately \$5,217,000 and undiscounted was \$10,234,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended December 31,

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	64%	62%	-
Genesis Crude Oil, L.P.	-	-	69%
Western Gas Resources, Inc.	2%	3%	13%

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$78,327 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the Partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues.

19

1606

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$12,107,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1607

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Age at

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Name -----	December 31, 2000 -----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Domestic Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by Pioneer USA, the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 10% of the Program's acquisition, drilling and completion costs and approximately 15% during the first three years and approximately 20% after three years of its operating and general and administrative expenses. In return, they are allocated approximately 15% during the first three years and approximately 20% after three years of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers or

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

employees of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 27 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

1610

23

	2000	1999	1998
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 210,287	\$ 203,686	\$199,461
Reimbursement of general and administrative expenses	\$ 44,112	\$ 25,818	\$ 20,639

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data",

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART IV

ITEM 14. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K

(a) 1. Financial statements

The following are filed as part of this Report:

Independent Auditors' Report

Balance sheets as of December 31, 2000 and 1999

Statements of operations for the years ended December 31, 2000, 1999 and 1998

Statements of partners' capital for the years ended December 31, 2000, 1999 and 1998

Statements of cash flows for the years ended December 31, 2000, 1999 and 1998

Notes to financial statements

2. Financial statement schedules

All financial statement schedules have been omitted since the required information is in the financial statements or notes thereto, or is not applicable nor required.

(b) Reports on Form 8-K

None.

(c) Exhibits

The exhibits listed on the accompanying index to exhibits are filed or incorporated by reference as part of this Report.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY PRIVATE INVESTMENT 90, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

This document contains important information specific to Parker & Parsley Private Investment 90, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley Private Investment 90, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY PRIVATE INVESTMENT 90, L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners(a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001(a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA(a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001(b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001(c)	\$
-- as of December 31, 2000(c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2040, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

1622

PARKER & PARSLEY PRIVATE INVESTMENT 90, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley Private Investment 90, L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1991.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 18% to \$396,909 for the three months ended March 31, 2001 as compared to \$337,608 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decline in production. For the three months ended March 31, 2001, 9,409 barrels of oil, 2,026 barrels of natural gas liquids ("NGLs") and 14,913 mcf of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

gas were sold, or 13,921 barrel of oil equivalents ("BOEs"). For the three

6

1623

months ended March 31, 2000, 9,901 barrels of oil, 3,207 barrels of NGLs and 12,754 mcf of gas were sold, or 15,234 BOEs.

The average price received per barrel of oil increased \$1.00, or 4%, from \$27.27 for the three months ended March 31, 2000 to \$28.27 for the same period in 2001. The average price received per barrel of NGLs increased \$5.75, or 41%, from \$14.06 for the three months ended March 31, 2000 to \$19.81 for the same period in 2001. The average price received per mcf of gas increased 244% from \$1.77 during the three months ended March 31, 2000 to \$6.09 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$154,949 for the three months ended March 31, 2001 as compared to \$154,508 for the same period in 2000, an increase of \$441. This increase was primarily due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$120,499 for the three months ended March 31, 2001 and \$112,552 for the same period in 2000 resulting in a \$7,947 increase, or 7%. The increase was primarily due to higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 16% from \$10,128 for the three months ended March 31, 2000 to \$11,777 for the same period in 2001 primarily due to an increase in the accrual for tax preparation fees

Depletion was \$22,673 for the three months ended March 31, 2001 as compared to \$31,828 for the same period in 2000, a decrease of \$9,155, or 29%. This decrease was due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices and a decline in oil production of 492 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$101,717 during the three months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$59,795 and a reduction in working capital of \$51,518, offset by increases in production costs of \$7,947 and G&A expenses of \$1,649. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an

7

1624

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

additional \$83,969 to oil and gas receipts, offset by \$24,174 resulting from the decline in production during 2001 as compared to the same period in 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to an increase in the accrual for tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2001 and 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$304,619, of which \$3,047 was distributed to the managing general partner and \$301,572 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$166,714, of which \$1,667 was distributed to the managing general partner and \$165,047 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1626

INDEPENDENT AUDITORS' REPORT

The Partners
Parker & Parsley Private Investment 90, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley Private Investment 90, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley Private Investment 90, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY PRIVATE INVESTMENT 90, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley Private Investment 90, L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1632

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally discounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$49,757 and \$373,422 related to its proved oil and gas properties during 2000 and 1998, respectively.

8

1633

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$139,996 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	
Net income (loss) per statements of operations	\$ 824,583	\$ 230,882	\$ (
Depletion and depreciation for tax reporting purposes			
less than amounts for financial reporting purposes	93,056	131,771	
Impairment of oil and gas properties for financial reporting purposes	49,757	-	
Other, net	(1,853)	432	
	-----	-----	
Net income per Federal income tax returns	\$ 965,543 =====	\$ 363,085 =====	\$ ==

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Development costs	\$ 25,378 =====	\$ 14,048 =====	\$ 11,793 =====

Capitalized oil and gas properties consist of the following:

	2000 -----	1999 -----
Proved properties:		
Property acquisition costs	\$ 98,110	\$ 98,110
Completed wells and equipment	8,366,256 -----	8,340,878 -----
Accumulated depletion	8,464,366 (7,073,249) -----	8,438,988 (6,916,963) -----
Net oil and gas properties	\$ 1,391,117 =====	\$ 1,522,025 =====

9

1634

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000 -----	1999 -----	1998 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 186,568	\$ 174,796	\$ 187,435
Reimbursement of general and administrative expenses	\$ 37,554	\$ 23,205	\$ 16,483

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 90 Private Conv., L.P. ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)
Revenues:	
Proceeds from disposition of depreciable and depletable properties -	
First three years	14.141414%
After three years	19.191919%
All other revenues -	
First three years	14.141414%
After three years	19.191919%
Costs and expenses:	
Lease acquisition costs, drilling and completion costs	9.090909%
Operating costs, reporting and legal expenses and general and administrative expenses -	
First three years	14.141414%
After three years	19.191919%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
Net proved reserves at January 1, 1998	745,340	883,417
Revisions	(342,345)	(365,103)
Production	(49,468)	(54,218)
	-----	-----
Net proved reserves at December 31, 1998	353,527	464,096
Revisions	394,885	538,864
Production	(46,335)	(47,331)
	-----	-----

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net proved reserves at December 31, 1999	702,077	955,629
Revisions	172,617	(96,553)
Production	(52,913)	(49,484)
	-----	-----
 Net proved reserves at December 31, 2000	 821,781	 809,592
	=====	=====

10

1635

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.49 per barrel of NGLs and \$7.81 per mcf of gas, discounted at 10% was approximately \$5,749,000 and undiscounted was \$12,495,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	71%	69%	-
Genesis Crude Oil, L.P.	-	-	64%
Western Gas Resources, Inc.	3%	4%	17%

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

At December 31, 2000, the amount receivable from Plains Marketing, L.P. was \$93,082 which is included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the Partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. The managing general partner is also responsible for 1% of guaranty and loan commitment fees. In return, it is allocated 1% of the Partnership's revenues.

12

1637

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$10,970,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less commission, organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent that its share of revenues does not cover such costs.

(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 94% to \$1,508,541 for 2000 as compared to \$776,849 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 39,040 barrels of oil, 13,873 barrels of natural gas liquids ("NGLs") and 49,484 mcf of gas were sold, or 61,160 barrel of oil equivalents ("BOEs"). In 1999, 32,789 barrels of oil, 13,546 barrels of NGLs and 47,331 mcf of gas were sold, or 54,224 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.05, or 70%, from \$17.30 in 1999 to \$29.35 in 2000. The average price received per barrel of NGLs increased \$6.36, or 67%, from \$9.46 in 1999 to \$15.82 in 2000. The average price received per mcf of gas increased 69% from \$1.72 in 1999 to \$2.90 in 2000. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$700,691 as compared to \$553,188 in 1999, an increase of \$147,503, or 27%. The increase was primarily due to increases in the impairment of oil and gas properties, production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$502,676 in 2000 and \$379,923 in 1999, resulting in a \$122,753 increase, or 32%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 39% from \$29,997 in 1999 to \$41,729 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$37,554 in 2000 and \$23,205 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$49,757 related to its oil and gas properties during 2000.

Depletion was \$106,529 in 2000 as compared to \$143,268 in 1999, representing a decrease of \$36,739, or 26%. This decrease was primarily due to a 148,753

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices, offset by an increase in oil production of 6,251 barrels for the period ended December 31, 2000 compared to the same period in 1999.

1639

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 20% to \$776,849 from \$648,378 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 32,789 barrels of oil, 13,546 barrels of NGLs and 47,331 mcf of gas were sold, or 54,224 BOEs. In 1998, 35,555 barrels of oil, 13,913 barrels of NGLs and 54,218 mcf of gas were sold, or 58,504 BOEs.

The average price received per barrel of oil increased \$4.11, or 31%, from \$13.19 in 1998 to \$17.30 in 1999. The average price received per barrel of NGLs increased \$2.69, or 40%, from \$6.77 in 1998 to \$9.46 in 1999. The average price received per mcf of gas increased 10% from \$1.57 in 1998 to \$1.72 in 1999.

Total costs and expenses decreased in 1999 to \$553,188 as compared to \$1,100,322 in 1998, a decrease of \$547,134, or 50%. The decrease was primarily due to declines in the impairment of oil and gas properties, production costs and depletion, offset by an increase in G&A.

Production costs were \$379,923 in 1999 and \$481,924 in 1998, resulting in a \$102,001 decrease, or 21%. The decrease was due to declines in well maintenance costs and ad valorem taxes.

During this period, G&A increased 49% from \$20,196 in 1998 to \$29,997 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$23,205 in 1999 and \$16,483 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized a non-cash SFAS 121 charge of \$373,422 related to its oil and gas properties during 1998.

Depletion was \$143,268 in 1999 compared to \$224,780 in 1998, representing a decrease of \$81,512, or 36%. This decrease was the result of an increase in proved reserves of 266,736 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1640

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$559,243 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$738,819, offset by increases in production costs paid of \$122,753, G&A expenses paid of \$11,732 and working capital of \$45,091. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$543,958 to oil and gas receipts and an increase of \$194,861 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active properties.

Proceeds from asset dispositions of \$2,385 and \$2,124 recognized during 2000 and 1999, respectively, were due to equipment credits received on active properties.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$870,242, of which \$8,702 was distributed to the managing general partner and \$861,540 to the limited partners. In 1999, cash distributions to the partners were \$255,913, of which \$2,559 was distributed to the managing general partner and \$253,354 to the limited partners.

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 90 Spraberry Private Development, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 90 Spraberry Private Development, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA
 - the merger value per \$1,000 limited partner investment
 - the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
 - the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
 - the going concern value per \$1,000 limited partner investment
 - the liquidation value per \$1,000 limited partner investment
 - the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's financial statements, including management's

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001

- o The partnership's financial statements, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000

- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

PARKER & PARSLEY 90 SPRABERRY PRIVATE DEVELOPMENT, L.P.

SUPPLEMENTAL INFORMATION TABLE

Aggregate Initial Investment by the Limited Partners (a)	\$
Aggregate Historical Limited Partner Distributions through July 31, 2001 (a)	\$
Merger Value Attributable to Partnership Interests of Limited Partners, Excluding Pioneer USA (a), (b)	\$
Merger Value per \$1,000 Limited Partner Investment (b), (c)	\$
Merger Value per \$1,000 Limited Partner Investment as a Multiple of Distributions for the past four quarterly distributions including the distribution in July 2001 (b), (c)	
Book Value per \$1,000 Limited Partner Investment:	
-- as of March 31, 2001 (c)	\$
-- as of December 31, 2000 (c)	\$
Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2040, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

5

1649

PARKER & PARSLEY 90 SPRABERRY PRIVATE DEVELOPMENT, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 90 Spraberry Private Development, L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1991.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of Parker & Parsley 90 Spraberry Private Development, L.P. (the "Partnership") as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year.

Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in these interim financial statements. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report for the year ended December 31, 2000, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Management's Discussion and Analysis of Financial Condition and
Results of Operations(1)

Results of Operations

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Revenues:

The Partnership's oil and gas revenues increased 37% to \$183,614 for the three months ended March 31, 2001 as compared to \$133,917 for the same period in 2000. The increase in revenues resulted from higher average prices received and an increase in production. For the three months ended March 31, 2001, 4,046 barrels of oil, 1,147 barrels of natural gas liquids ("NGLs") and 8,177 mcf of gas were

6

1650

sold, or 6,556 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 4,139 barrels of oil, 1,076 barrels of NGLs and 3,949 mcf of gas were sold, or 5,873 BOEs.

The average price received per barrel of oil increased \$.97, or 4%, from \$26.99 for the three months ended March 31, 2000 to \$27.96 for the same period in 2001. The average price received per barrel of NGLs increased \$4.80, or 33%, from \$14.49 for the three months ended March 31, 2000 to \$19.29 for the same period in 2001. The average price received per mcf of gas increased 252% from \$1.68 during the three months ended March 31, 2000 to \$5.91 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses decreased to \$68,475 for the three months ended March 31, 2001 as compared to \$76,232 for the same period in 2000, a decrease of \$7,757, or 10%. This decrease was primarily due to declines in depletion and production costs, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$53,740 for the three months ended March 31, 2001 and \$58,485 for the same period in 2000 resulting in a \$4,745 decrease, or 8%. The decrease was due to lower well maintenance costs, offset by higher production taxes associated with higher oil and gas prices.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 46% from \$4,365 for the three months ended March 31, 2000 to \$6,374 for the same period in 2001, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual for tax preparation fees.

Depletion was \$8,361 for the three months ended March 31, 2001 as compared to \$13,382 for the same period in 2000, a decrease of \$5,021, or 38%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices and a decline in oil production of 93 barrels for the period ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$44,947 during the three

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

months ended March 31, 2001 from the same period ended March 31, 2000. This increase was due to an increase in oil and gas sales receipts of \$49,637 and a

7

1651

decrease in production costs of \$4,745, offset by an increase in G&A expenses of \$2,009 and working capital of \$7,426. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$25,873 to oil and gas receipts and \$23,764 resulting from an increase in production during 2001 as compared to the same period in 2000. The decrease in production costs was due to lower well maintenance costs, offset by higher production taxes associated with higher oil and gas prices. The increase in G&A was primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues and an increase in the accrual of tax preparation fees.

Net Cash Used in Investing Activities

For the three months ended March 31, 2000, the Partnership's investing activities included expenditures related to equipment upgrades on active oil and gas properties.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$107,338, of which \$1,073 was distributed to the managing general partner and \$106,265 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$87,613, of which \$876 was distributed to the managing general partner and \$86,737 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, the majority approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

(A Delaware Limited Partnership)

FINANCIAL STATEMENTS
WITH
INDEPENDENT AUDITORS' REPORT

December 31, 2000 and 1999

1653

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 90 Spraberry Private Development, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 90 Spraberry Private Development, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 90 Spraberry Private Development, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 90 SPRABERRY PRIVATE DEVELOPMENT, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 90 Spraberry Private Development, L.P. (the "Partnership") was organized in 1990 as a general partnership under the laws of the State of Texas and was converted to a Delaware limited partnership in 1991. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

7

1659

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$90,823 related to its proved oil and gas properties during 1998.

8

1660

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$43,760 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

	2000 -----	1999 -----	1998 -----
Net income (loss) per statements of operations	\$ 345,899	\$ 72,722	\$ (133,234)
Impairment of oil and gas properties for financial reporting purposes	-	-	90,823
Depletion, depreciation and amortization for tax reporting purposes less than amounts for financial reporting purposes	36,539	79,135	110,651
Other, net	(76,555)	39,044	36,173
	-----	-----	-----
Net income per Federal income tax returns	\$ 305,883 =====	\$ 190,901 =====	\$ 104,413 =====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the net costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

2000 -----	1999 -----	1998 -----
---------------	---------------	---------------

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Development costs	\$ 5,683	\$ 2,042	\$7,821
	=====	=====	=====

Capitalized oil and gas properties consist of the following:

	2000	1999
	-----	-----
Proved properties:		
Property acquisition costs	\$ 19,608	\$ 19,608
Completed wells and equipment	3,646,563	3,640,880

	-----	-----
Net oil and gas properties	\$ 619,819	\$ 655,330
	=====	=====

9

1661

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$88,496	\$85,512	\$81,995
Reimbursement of general and administrative expenses	\$18,935	\$11,455	\$ 9,241

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 90 Spraberry Private Conv., L.P. ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a limited partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)	Partnership
	-----	-----
Revenues:		

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Proceeds from disposition of depreciable and depletable properties -		
First three years	14.141414%	85.858586%
After three years	19.191919%	80.808081%
All other revenues -		
First three years	14.141414%	85.858586%
After three years	19.191919%	80.808081%
Costs and expenses:		
Lease acquisition costs, drilling and completion costs	9.090909%	90.909091%
Operating costs, reporting and legal expenses and general and administrative expenses -		
First three years	14.141414%	85.858586%
After three years	19.191919%	80.808081%

(1) Excludes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

10

1662

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----
Net proved reserves at January 1, 1998	270,590	306,642
Revisions	(126,717)	(142,535)
Production	(20,835)	(24,095)
	-----	-----
Net proved reserves at December 31, 1998	123,038	140,012
Revisions	214,995	265,098
Production	(20,688)	(19,579)
	-----	-----
Net proved reserves at December 31, 1999	317,345	385,531
Revisions	122,969	18,001
Production	(22,593)	(22,121)
	-----	-----
Net proved reserves at December 31, 2000	417,721	381,411
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.12 per barrel of NGLs and \$7.64 per mcf of gas, discounted at 10% was approximately \$2,575,000 and undiscounted was \$5,966,000.

1633

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended Decem

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000	1999	1998
	-----	-----	-----
Plains Marketing, L.P.	56%	50%	-
TEPPCO Crude Oil LLC	10%	10%	-
Genesis Crude Oil, L.P.	-	-	47%
Phillips Petroleum Company	17%	14%	12%
Western Gas Resources, Inc.	2%	3%	9%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P., Phillips Petroleum Company and TEPPCO Crude Oil LLC were \$29,695, \$12,633 and \$4,023, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the Partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Program and Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being

1664

paid to the Partnership. Under the Partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating, general and administrative expenses. The managing general partner is also responsible for 1% of guaranty and loan commitment fees. In return, it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The partners entered into subscription agreements for aggregate capital contributions of \$5,200,000. Pioneer USA is required to contribute amounts equal to 1% of initial Partnership capital less commission and organization and offering costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent that its share of revenues does not cover such costs.

1665

PARKER & PARSLEY 90 SPRABERRY PRIVATE DEVELOPMENT, L.P.
(A DELAWARE LIMITED PARTNERSHIP)

THIS REPORT CONTAINS FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In September 2000, restated financial statements for 1999 and 1998 were issued to the partners to correct a revenue allocation error for one well in the Partnership. The 1999 and 1998 amounts contained in the following discussion of financial condition and the results of operation are based on the restated amounts.

Results of operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 85% to \$638,385 from 2000 as compared to \$345,743 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 16,344 barrels of oil, 6,249 barrels of natural gas liquids ("NGLs") and 22,121 mcf of gas were sold, or 26,280 barrel of oil equivalents ("BOEs"). In 1999, 15,384 barrels of oil, 5,304 barrels of NGLs and 19,579 mcf of gas were sold, or 23,951 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.13, or 71%, from \$17.04 in 1999 to \$29.17 in 2000. The average price received per barrel of NGLs increased \$5.86, or 60%, from \$9.70 in 1999 to \$15.56 in 2000. The average price received per mcf of gas increased 76% from \$1.65 in 1999 to \$2.91 in 2000. The

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Total costs and expenses increased in 2000 to \$297,927 as compared to \$276,234 in 1999, an increase of \$21,693, or 8%. The increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$235,823 in 2000 and \$177,422 in 1999, resulting in a \$58,401 increase, or 33%. The increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A increased 42% from \$14,767 in 1999 to \$20,910 in 2000, primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$18,935 in 2000 and \$11,455 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$41,194 in 2000 as compared to \$84,045 in 1999, representing a decrease of \$42,851, or 51%. This decrease was primarily due to a 106,156 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

1666
1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 25% to \$345,743 from \$275,856 in 1998. The increase in revenues resulted from higher average prices received and an increase in production. In 1999, 15,384 barrels of oil, 5,304 barrels of NGLs and 19,579 mcf of gas were sold, or 23,951 BOEs. In 1998, 15,196 barrels of oil, 5,639 barrels of NGLs and 24,095 mcf of gas were sold, or 24,851 BOEs.

The average price received per barrel of oil increased \$3.98, or 30%, from \$13.06 in 1998 to \$17.04 in 1999. The average price received per barrel of NGLs increased \$2.81, or 41%, from \$6.89 in 1998 to \$9.70 in 1999. The average price received per mcf of gas increased 3% from \$1.60 in 1998 to \$1.65 in 1999.

Gain on disposition of assets of \$213 recognized during 1998 was related to equipment salvage received on a well plugged and abandoned in a prior year.

Total costs and expenses decreased in 1999 to \$276,234 as compared to \$413,082 in 1998, a decrease of \$136,848, or 33%. The decrease was due to reductions in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$177,422 in 1999 and \$184,952 in 1998, resulting in a \$7,530 decrease, or 4%. The decrease was due to reductions in well maintenance costs and ad valorem taxes.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

During this period, G&A increased 35% from \$10,935 in 1998 to \$14,767 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$11,455 in 1999 and \$9,241 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$90,823 related to its oil and gas properties during 1998.

Depletion was \$84,045 in 1999 compared to \$126,372 in 1998, representing a decrease of \$42,327, or 33%. This decrease was primarily due to an increase in proved reserves of 151,444 barrels of oil during 1999 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

1667

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$102,509 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$294,870, offset by increases in production costs paid of \$58,401, G&A expenses paid of \$6,143 and working capital of \$127,817. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$244,760 to oil and gas receipts and an increase of \$50,110 resulting from the increase in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production. The increase in G&A was primarily due to higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during 2000 and 1999 included expenditures related to equipment upgrades on active properties.

Proceeds from asset dispositions of \$3,269 in 1999 were due to equipment credits received on active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$308,005, of which \$3,080 was distributed to the managing general partner and \$304,925 to the limited partners. In 1999, cash distributions to the partners were \$140,741, of which \$1,407 was distributed to the managing general partner and \$139,334 to the limited partners.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 91-A, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 91-A, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 91-A, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment
- the liquidation value per \$1,000 limited partner investment
- the ordinary tax loss per \$1,000 limited partner investment in year of initial investment
- o Information about:
 - the legal opinion for the limited partners
 - the term of the partnership
- o The partnership's quarterly report on Form 10-Q, including management's discussion and analysis of financial condition and results of operations, for the three months ended March 31, 2001
- o The partnership's annual report on Form 10-K, including management's discussion and analysis of financial condition and results of operations, for the year ended December 31, 2000
- o Selected historical financial data for the partnership for the three months ended March 31, 2001 and 2000 and the five years ended December 31, 2000

Book Value per \$1,000 Limited Partner Investment:	

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

-- as of March 31, 2001(c) \$

-- as of December 31, 2000(c) \$

Going Concern Value per \$1,000 Limited Partner Investment(c), (d) \$

Liquidation Value per \$1,000 Limited Partner Investment(c), (e) \$

Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment(c), (f) \$

(a) Stated in thousands.

(b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.

(c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.

(d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.

(e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.

(f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

classification of the partnership or any of its limited partners. Although not required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2041, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

1677

PARKER & PARSLEY 91-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of organization

Parker & Parsley 91-A, L.P. (the "Partnership") is a limited partnership organized in 1991 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's Report on Form 10-K for the year ended

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues increased 7% to \$452,460 for the three months ended March 31, 2001 as compared to \$424,423 for the same period in 2000. The increase in revenues resulted from higher average prices received, offset by a decrease in production. For the three months ended March 31, 2001, 10,545 barrels of oil, 2,575 barrels of natural gas liquids ("NGLs") and 19,051 mcf of gas were sold, or 16,295 barrel of oil equivalents ("BOEs"). For the three months ended March 31, 2000, 11,360 barrels of oil, 4,839 barrels of NGLs and 22,979 mcf of gas were sold, or 20,029 BOEs.

7

1678

The average price received per barrel of oil increased slightly from \$27.88 for the three months ended March 31, 2000 to \$27.99 for the same period in 2001. The average price received per barrel of NGLs increased \$1.21, or 9%, from \$13.65 for the three months ended March 31, 2000 to \$14.86 for the same period in 2001. The average price received per mcf of gas increased 245% from \$1.81 during the three months ended March 31, 2000 to \$6.25 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses increased to \$215,473 for the three months ended March 31, 2001 as compared to \$206,441 for the same period in 2000, an increase of \$9,032, or 4%. This increase was due to increases in production costs and general and administrative expenses ("G&A"), offset by a decline in depletion.

Production costs were \$160,852 for the three months ended March 31, 2001 and \$147,769 for the same period in 2000 resulting in a \$13,083 increase, or 9%. This increase was primarily due to additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 101% from \$10,466 for the three months ended March 31, 2000 to \$21,056 for the same period in 2001. The G&A increase was primarily due to an increase in the accrual for tax preparation and monitoring service fees.

Depletion was \$33,565 for the three months ended March 31, 2001 as compared to \$48,206 for the same period in 2000, a decrease of \$14,641, or 30%. This decrease was primarily due to positive revisions to proved reserves during the three months ended March 31, 2001 as a result of higher commodity prices, a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

reduction in the Partnership's net depletable basis from charges taken in accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121") during the fourth quarter of 2000 and a decline in oil production of 815 barrels for the three months ended March 31, 2001 as compared to the same period in 2000.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$74,334 for the three months ended March 31, 2001 from the same period in 2000. The increase was primarily attributable to an increase of \$28,204 in oil and gas sales receipts and a reduction in working capital of \$69,803, offset by increases in production costs of \$13,083 and G&A expenses of \$10,590. The increase in oil and gas receipts resulted from the increase in commodity prices during 2001 which contributed an additional \$109,197 to oil and gas receipts, offset by \$80,993 resulting from the decline in production during 2001 as compared to the same period in 2000.

8

1679

The increase in production costs was primarily due to increased well maintenance costs incurred to stimulate well production. The G&A increase was primarily due to the accrual for tax preparation and monitoring service fees.

Net Cash Provided by (Used in) Investing Activities

The Partnership's principal investing activities during the three months ended March 31, 2001 and 2000 were related to the upgrades of oil and gas equipment on active properties.

Proceeds from asset dispositions of \$8,812 recognized during 2000 were from equipment credits received on one active well.

Net Cash Used in Financing Activities

For the three months ended March 31, 2001, cash distributions to the partners were \$320,327, of which \$3,203 was distributed to the managing general partner and \$317,124 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$243,701, of which \$2,437 was distributed to the managing general partner and \$241,264 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, requires a 66-2/3% approval of the limited partnership interests in each partnership and the resolution of Security and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1682

PART I

ITEM 1. BUSINESS

Parker & Parsley 91-A, L.P. (the "Partnership") is a limited partnership organized in 1991 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 11,620 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 38% and 16% were attributable to sales made to Plains Marketing, L.P. and TEPPCO Crude Oil LLC, respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

1683

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 48 oil and gas wells. One well has been plugged and abandoned. At December 31, 2000, the Partnership had 47 wells producing.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

1684

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 11,620 outstanding limited partnership interests held of record by 724 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations are distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, distributions of \$1,162,365 and \$432,629, respectively, were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997
	-----	-----	-----	-----
Operating results:				

Oil and gas sales	\$ 1,899,948	\$ 1,140,335	\$ 955,645	\$ 1,411,24
	=====	=====	=====	=====
Impairment of oil and gas properties	\$ 12,824	\$ 66,898	\$ 306,043	\$ 485,15
	=====	=====	=====	=====
Net income (loss)	\$ 1,115,704	\$ 266,803	\$ (280,631)	\$ (7,02

1685

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 67% to \$1,899,948 for 2000 as compared to \$1,140,335 in 1999. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 2000, 43,704 barrels of oil, 20,425 barrels of natural gas liquids ("NGLs") and 94,315 mcf of gas were sold, or 79,848 barrel of oil equivalents ("BOEs"). In 1999, 44,203 barrels of oil, 20,617 barrels of NGLs and 100,615 mcf of gas were sold, or 81,589 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.33, or 70%, from \$17.57 in 1999 to \$29.90 in 2000. The average price received per barrel of NGLs increased \$5.60, or 60%, from \$9.34 in 1999 to \$14.94 in 2000. The average price received per mcf of gas increased 80% from \$1.70 in 1999 to \$3.06 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

A gain on disposition of assets of \$1,096 recognized during 1999 was from equipment credits received on one temporarily abandoned property.

Total costs and expenses decreased in 2000 to \$802,130 as compared to \$884,937 in 1999, a decrease of \$82,807, or 9%. The decrease was due to declines in depletion, the impairment of oil and gas properties and general and administrative expenses ("G&A"), offset by an increase in production costs.

Production costs were \$589,344 in 2000 and \$514,994 in 1999, resulting in an increase of \$74,350, or 14%. This increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A decreased 21% from \$75,454 in 1999 to \$59,962 in 2000. The Partnership paid the managing general partner \$41,213 in 2000 and \$34,110 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized non-cash charges of \$12,824 and \$66,898 related to its oil and gas properties during 2000 and 1999, respectively.

5

1686

Depletion decreased in 2000 to \$140,000 as compared to \$227,591 in 1999, representing a decrease of \$87,591, or 38%. This decrease was primarily due to a 127,977 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices and a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1999.

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 19% to \$1,140,335 from \$955,645 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 44,203 barrels of oil, 20,617 barrels of NGLs and 100,615 mcf of gas were sold, or 81,589 BOEs. In 1998, 49,403 barrels of oil, 21,220 barrels of NGLs and 108,617 mcf of gas were sold, or 88,726 BOEs.

The average price received per barrel of oil increased \$4.42, or 34%, from \$13.15 in 1998 to \$17.57 in 1999. The average price received per barrel of NGLs increased \$2.90, or 45%, from \$6.44 in 1998 to \$9.34 in 1999. The average price received per mcf of gas increased 9% from \$1.56 in 1998 to \$1.70 in 1999.

A gain on disposition of assets of \$1,096 recognized during 1999 was from equipment credits received on one temporarily abandoned property.

Total costs and expenses decreased in 1999 to \$884,937 as compared to \$1,247,302 in 1998, a decrease of \$362,365, or 29%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$514,994 in 1999 and \$535,948 in 1998, resulting in a decrease of \$20,954, or 4%. This decrease resulted from declines in ad valorem taxes, well maintenance costs and workover costs, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 72% from \$43,977 in 1998 to \$75,454 in 1999 primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$34,110 in 1999 and \$24,415 in 1998 for G&A incurred on behalf of the Partnership.

The Partnership recognized non-cash SFAS 121 charges of \$66,898 and \$306,043 related to its oil and gas properties during 1999 and 1998, respectively.

Depletion decreased in 1999 to \$227,591 as compared to \$361,334 in 1998. This represented a decrease of \$133,743, or 37%. This decrease was the result of an increase in proved reserves of 281,767 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998 and a decline in oil production of 5,200 barrels for the period ended December 31, 1999 compared to the same period in 1998.

Petroleum industry

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998,

6

1687

weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$647,967 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$767,190 and a decline in G&A expenses paid of \$15,492, offset by an increase in production costs paid of \$74,350 and working capital of \$60,365. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$804,227 to oil and gas receipts, offset by \$37,037 resulting from the decline in production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance costs incurred to stimulate well production.

Net Cash Used in Investing Activities

The Partnership's investing activities during 2000 and 1999 included expenditures related to equipment upgrades on various oil and gas properties.

Proceeds from asset dispositions of \$11,549 and \$1,096 recognized during 2000 and 1999, respectively, were from the disposition of oil and gas equipment on active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$1,174,106, of which \$11,741 was distributed to the managing general partner and \$1,162,365 to the limited partners. In 1999, cash distributions to the partners were \$436,999, of which \$4,370 was distributed to the managing general partner and \$432,629 to the limited partners.

INDEPENDENT AUDITORS' REPORT

The Partners

Parker & Parsley 91-A, L.P.

(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 91-A, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 91-A, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 91-A, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 91-A, L.P. (the "Partnership") is a limited partnership organized in 1991 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

1664

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated, in part, to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized non-cash impairment provisions of \$12,824, \$66,898 and \$306,043 related to its proved oil and gas properties during 2000, 1999 and 1998, respectively.

15

1696

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$946,627 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income per Federal income tax returns for the years ended December 31:

2000

1999

1666

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net income (loss) per statements of operations	\$ 1,115,704	\$ 266,803
Depletion and depreciation provisions for tax reporting purposes (greater than) less than amounts for financial reporting purposes	120,160	106,971
Impairment of oil and gas properties for financial reporting purposes	12,824	66,898
Other, net	8,901	(4,139)
	-----	-----
Net income per Federal income tax returns	\$ 1,257,589	\$ 436,533
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	1999
	-----	-----
Development costs	\$ 20,160	\$ 23,360
	=====	=====

Capitalized oil and gas properties consist of the following:

	2000

Property acquisition costs	\$ 343,666
Completed wells and equipment	9,366,466

Accumulated depletion	9,710,132 (7,727,573)

Net oil and gas properties	\$ 1,982,559
	=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

2000	1999
------	------

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 202,739	\$ 213,969
Reimbursement of general and administrative expenses	\$ 41,213	\$ 34,110

16

1697

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 91-A GP ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a general partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

	Pioneer USA (1)

Revenues:	
Proceeds from disposition of depreciable and depletable properties	34.3434343%
All other revenues	34.3434343%
Costs and expenses:	
Lease acquisition costs, drilling and completion costs and all other costs	24.2424242%
Operating costs, reporting and legal expenses and general and administrative expenses	34.3434343%

- (1) Includes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 45 limited partner interests owned by Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

Oil and NGLs

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

	(bbls)

Net proved reserves at January 1, 1998	909,941
Revisions	(333,709)
Production	(70,623)

Net proved reserves at December 31, 1998	505,609
Revisions	430,559
Production	(64,820)

Net proved reserves at December 31, 1999	871,348
Revisions	171,624
Production	(64,129)

Net proved reserves at December 31, 2000	978,843
	=====

17

1698

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.72 per barrel of oil, \$12.21 per barrel of NGLs and \$7.85 per mcf of gas, discounted at 10% was approximately \$8,217,000 and undiscounted was \$17,966,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider probable reserves, anticipated

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the years ended December 31:

	2000 -----	1999 -----
Plains Marketing, L.P.	38%	36%
TEPPCO Crude Oil LLC	16%	17%
Genesis Crude Oil, L.P.	-	-
Western Gas Resources, Inc.	3%	5%

At December 31, 2000, the amounts receivable from Plains Marketing, L.P. and TEPPCO Crude Oil LLC were \$64,973 and \$19,274, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1%

of the Partnership's acquisition, drilling and completion costs, and 1% of its operating and general and administrative expenses. In return it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

\$11,620,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less sales commission costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

1701

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name ----	Age at December 31, 2000 ----	Position -----
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice President, Chief Financial Officer and Director
Dennis E. Fagerstone	51	Executive Vice President and Director
Mark L. Withrow	53	Executive Vice President, General Counsel and Director
Danny Kellum	46	Executive Vice President - Director Operations and Director
Rich Dealy	34	Vice President and Chief Accounting Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

1702

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

1703

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 25% of the Program's acquisition, drilling and completion costs and approximately 35% of its operating and general and administrative expenses. In return, they are allocated approximately 35% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers or employees of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA owned 45 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

23

1704

	2000 -----	1999 -----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 202,739	\$ 213,969
Reimbursement of general and administrative expenses	\$ 41,213	\$ 34,110

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation in oil and gas activities of the Program.

SUPPLEMENTAL INFORMATION

OF

PARKER & PARSLEY 91-B, L.P., A DELAWARE LIMITED PARTNERSHIP

TO

PROXY STATEMENT/PROSPECTUS DATED , 2001

THE DATE OF THIS SUPPLEMENT IS , 2001

This document contains important information specific to Parker & Parsley 91-B, L.P., and supplements the proxy statement/prospectus dated , 2001, of Pioneer Natural Resources Company and Pioneer Natural Resources USA, Inc., by which Pioneer USA is soliciting proxies to be voted at a special meeting of limited partners of the partnership. The purpose of the special meeting is for you to vote upon the merger of the partnership with and into Pioneer USA that, if completed, will result in your receiving common stock of Pioneer Natural Resources Company for your partnership interests.

This document contains the following information concerning Parker & Parsley 91-B, L.P.:

- o A table containing:
 - the aggregate initial investment by the limited partners
 - the aggregate historical limited partner distributions through July 31, 2001
 - the merger value attributable to partnership interests of limited partners, excluding Pioneer USA

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

- the merger value per \$1,000 limited partner investment
- the merger value per \$1,000 limited partner investment as a multiple of distributions for the past four quarterly distributions including the distribution in July 2001
- the book value per \$1,000 limited partner investment as of March 31, 2001 and as of December 31, 2000
- the going concern value per \$1,000 limited partner investment

Going Concern Value per \$1,000 Limited Partner Investment (c), (d)	\$
Liquidation Value per \$1,000 Limited Partner Investment (c), (e)	\$
Ordinary Tax Loss per \$1,000 Limited Partner Investment in Year of Initial Investment (c), (f)	\$

- (a) Stated in thousands.
- (b) The merger value for the partnership is equal to the sum of the present value of estimated future net revenues from the partnership's estimated oil and gas reserves and its net working capital, in each case as of March 31, 2001, less its pro rata share, based on its reserve value, of the estimated expenses and fees of the mergers of all of the partnerships and less the cash distribution on or about July 9, 2001, by the partnership to its partners.
- (c) Interests in some partnerships were sold in units at prices other than \$1,000. We have presented this information based on a \$1,000 initial investment for ease of use and comparison among partnerships. You should not assume that the amount shown per \$1,000 investment is the same as the value or amount attributable to a single unit investment.
- (d) The going concern value for the partnership is based upon: (1) the sum of (A) the estimated net cash flow from the sale of the partnership's reserves during a 10-year operating period and (B) the estimated residual value from the sale of the partnership's remaining reserves at the end of the operating period, in each case using the same pricing and discount rate as in the merger value calculation, less (2) partnership level general and administrative expenses.
- (e) The liquidation value for the partnership is based upon the sale of the partnership's reserves at the reserve value, less liquidation expenses which are estimated to be the sum of (1) the partnership's pro rata share of the merger expenses and fees described in footnote (b) above and (2) 3% of the partnership's reserve value. The liquidation expenses represent estimated costs to retain an investment banker or broker to sell the assets of the partnership and the legal and other closing costs associated with such transaction, including the wind-down costs of the partnership.
- (f) Your ability to use your distributive share of the partnership's loss to offset your other income may have been subject to certain limitations at your level as a partner, and you may therefore wish to consult your tax advisor to determine the additional value, if any, actually realized by you in your particular circumstances.

INFORMATION ABOUT THE LEGAL OPINION FOR THE LIMITED PARTNERS

The partnership agreement for the partnership requires that special legal counsel render an opinion on behalf of the limited partners to Pioneer USA that neither the grant nor the exercise of the right to approve the merger of the partnership by its limited partners will adversely affect the federal income tax classification of the partnership or any of its limited partners. Although not

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

required by the partnership agreement, the opinion will also state that neither the grant nor exercise of such right will result in the loss of any limited partner's limited liability. In addition, the counsel designated to render the opinion is not required to be counsel other than counsel to Pioneer USA or the partnership. Both the designated counsel and the legal opinion must be approved by the limited partners. Pioneer USA has retained _____ of Dallas, Texas for the purpose of rendering this legal opinion on behalf of the limited partners to Pioneer USA. The merger proposals include an approval of that counsel and the form of its opinion. A copy of the opinion is attached as an exhibit to the merger proposals.

INFORMATION ABOUT THE TERM OF THE PARTNERSHIP

The term of the partnership is until December 31, 2041, unless the partnership is earlier terminated in accordance with the applicable provisions of its partnership agreement.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1717

PARKER & PARSLEY 91-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
March 31, 2001
(Unaudited)

Note 1. Organization and nature of operations

Parker & Parsley 91-B, L.P. (the "Partnership") is a limited partnership organized in 1991 under the laws of the State of Delaware.

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

Note 2. Basis of presentation

In the opinion of management, the unaudited financial statements of the Partnership as of March 31, 2001 include all adjustments and accruals consisting only of normal recurring accrual adjustments which are necessary for a fair presentation of the results for the interim period. These interim results are not necessarily indicative of results for a full year. Certain reclassifications may have been made to the March 31, 2000 financial statements to conform to the March 31, 2001 financial statement presentations.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. The financial statements should be read in conjunction with the financial statements and the notes thereto contained in the Partnership's report on Form 10-K for the year ended December 31, 2000, as filed with the Securities and Exchange Commission, a copy of which is available upon request by writing to Rich Dealy, Vice President and Chief Accounting Officer, 5205 North O'Connor Boulevard, 1400 Williams Square West, Irving, Texas 75039-3746.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations(1)

Results of Operations

Revenues:

The Partnership's oil and gas revenues decreased 16% to \$381,877 for the three months ended March 31, 2001 as compared to \$453,588 for the same period in 2000. The decrease in revenues resulted from a decrease in production, offset by higher average prices received. For the three months ended March 31, 2001, 9,590 barrels of oil, 2,009 barrels of natural gas liquids ("NGLs") and 10,623 mcf of gas were sold, or 13,370 barrel of oil equivalent ("BOEs"). For the three months ended March 31, 2000, 12,062 barrels of oil, 4,976 barrels of NGLs and 19,802 mcf of gas were sold, or 20,338 BOEs.

7

1718

The average price received per barrel of oil increased slightly from \$28.53 for the three months ended March 31, 2000 to \$28.83 for the same period in 2001. The average price received per barrel of NGLs increased \$3.34, or 22%, from \$15.13 for the three months ended March 31, 2000 to \$18.47 for the same period in 2001.

1687

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The average price received per mcf of gas increased 272% from \$1.73 during the three months ended March 31, 2000 to \$6.43 for the same period in 2001. The market price for oil and gas has been extremely volatile in the past decade, and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received during the three months ended March 31, 2001.

Costs and Expenses:

Total costs and expenses decreased to \$164,549 for the three months ended March 31, 2001 as compared to \$179,125 for the same period in 2000, a decrease of \$14,576, or 8%. This decrease was primarily due to declines in production costs and depletion, offset by an increase in general and administrative expenses ("G&A").

Production costs were \$124,783 for the three months ended March 31, 2001 and \$145,956 for the same period in 2000, resulting in a \$21,173 decrease, or 15%. The decrease was primarily due to lower well maintenance and workover costs.

G&A's components are independent accounting and engineering fees and managing general partner personnel and administrative costs. During this period, G&A increased 60% from \$11,204 for the three months ended March 31, 2000 to \$17,982 for the same period in 2001, primarily due to an increase in the accrual for tax preparation and monitoring service fees.

Depletion was \$21,784 for the three months ended March 31, 2001 as compared to \$21,965 for the same period in 2000, a decrease of \$181, or 1%. The decrease was primarily due to a decrease in oil production of 2,472 barrels for the period ended March 31, 2001 compared to the same period in 2000, offset by a downward revision to one well's proved reserves during the three months ended March 31, 2001.

Liquidity and Capital Resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$80,977 during the three months ended March 31, 2001 from the same period ended March 31, 2000. The increase was primarily attributable to reductions of \$138,184 in working capital and production costs of \$21,173, offset by a decline in oil and gas sales receipts of \$71,602 and an increase in G&A expenses of \$6,778. The decrease in production costs was primarily due to lower well maintenance and workover costs. The decrease in oil and gas receipts resulted from \$185,099 from the decline in production during 2001, offset by \$113,497 from the increase in commodity prices during 2001. The increase in G&A was primarily due to an increase in the accrual for tax preparation and monitoring service fees.

8

1719

Net Cash Used in Investing Activities

The Partnership's investing activities during the three months ended March 31, 2001 and 2000 were related to the upgrades of oil and gas equipment on active properties.

Proceeds from disposition of assets of \$133 recognized during the three months ended March 31, 2001 were related to equipment credits on one active well.

Net Cash Used in Financing Activities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

For the three months ended March 31, 2001, cash distributions to the partners were \$281,876, of which \$2,819 was distributed to the managing general partner and \$279,057 to the limited partners. For the same period ended March 31, 2000, cash distributions to the partners were \$248,545, of which \$2,485 was distributed to the managing general partner and \$246,060 to the limited partners.

Proposal to acquire partnerships

On April 17, 2001, Pioneer Natural Resources Company ("Pioneer") filed a preliminary proxy statement/prospectus with the Securities and Exchange Commission proposing an agreement and plan of merger among Pioneer, Pioneer Natural Resources USA, Inc. ("Pioneer USA"), a wholly-owned subsidiary of Pioneer, and the limited partners of 46 Parker & Parsley limited partnerships. Each partnership that approves the agreement and plan of merger and the other related merger proposals will merge with and into Pioneer USA, and the partnership interests of each such partnership will be converted into the right to receive cash and Pioneer common stock. Pioneer USA is the sole or managing general partner of the partnerships. The Partnership is one of the 46 Parker & Parsley limited partnerships being requested to approve the agreement and plan of merger. The preliminary proxy statement/prospectus is non-binding and is subject to, among other things, consideration of offers from third parties to purchase any partnership or its assets, requires 66-2/3% approval of the limited partnership interests in each partnership and the resolution of Securities and Exchange Commission review comments. No solicitation will be made using preliminary materials.

- (1) "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations" contains forward looking statements that involve risks and uncertainties. Accordingly, no assurances can be given that the actual events and results will not be materially different than the anticipated results described in the forward looking statements.

Part II. Other Information

- Item 6. Exhibits and Reports on Form 8-K

PARTS I AND II OF THIS ANNUAL REPORT ON FORM 10-K (THE "REPORT") CONTAIN FORWARD LOOKING STATEMENTS THAT INVOLVE RISKS AND UNCERTAINTIES. ACCORDINGLY, NO ASSURANCES CAN BE GIVEN THAT THE ACTUAL EVENTS AND RESULTS WILL NOT BE MATERIALLY DIFFERENT THAN THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS. SEE "ITEM 1. BUSINESS" FOR A DESCRIPTION OF VARIOUS FACTORS THAT COULD MATERIALLY AFFECT THE ABILITY OF THE PARTNERSHIP TO ACHIEVE THE ANTICIPATED RESULTS DESCRIBED IN THE FORWARD LOOKING STATEMENTS.

1722

PART I

ITEM 1. BUSINESS

Parker & Parsley 91-B, L.P. (the "Partnership") is a limited partnership organized in 1991 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA"). Pioneer USA is a wholly-owned subsidiary of Pioneer Natural Resources Company ("Pioneer"). As of March 8, 2001, the Partnership had 11,249 limited partnership interests outstanding.

The Partnership does not have any employees of its own. Pioneer USA employs 701 persons, many of whom dedicated a part of their time to the conduct of the Partnership's business during the period for which this Report is filed. Pioneer USA is responsible for all management functions.

The Partnership engages in oil and gas development and production and is not involved in any industry segment other than oil and gas. The Partnership's production is geographically concentrated in West Texas.

The principal markets during 2000 for the oil produced by the Partnership were refineries and oil transmission companies that have facilities near the Partnership's oil producing properties. During 2000, Pioneer USA marketed the Partnership's gas to a variety of purchasers, none of which accounted for 10% or more of the Partnership's oil and gas revenues. Of the Partnership's total oil and gas revenues for 2000, approximately 48% and 22% were attributable to sales made to Mobil Oil Corporation and Plains Marketing, L.P., respectively. Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on its ability to sell its oil, natural gas liquids ("NGLs") and gas production.

The Partnership's revenues, profitability, cash flow and future rate of growth are highly dependent on the prevailing prices of oil and gas, which are affected by numerous factors beyond the Partnership's control. Oil and gas prices

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

historically have been very volatile. A substantial or extended decline in the prices of oil or gas could have a material adverse effect on the Partnership's revenues, profitability and cash flow and could, under certain circumstances, result in a reduction in the carrying value of the Partnership's oil and gas properties.

Oil and gas production operations are subject to various types of regulations by local, state and federal agencies. The Partnership's operations are also subject to state conservation laws and regulations, including the establishment of maximum rates of production from wells and the regulation of spacing, plugging and abandonment of wells. Each state generally imposes a production or severance tax with respect to production and sale of oil and gas within their respective jurisdictions. Noncompliance with the laws and regulations may subject the Partnership to penalties, damages or other liabilities and compliance may increase the cost of the Partnership's operations.

The oil and gas business is also subject to environmental hazards such as oil spills, gas leaks and ruptures and discharges of toxic substances or gases that could expose the Partnership to substantial

2

1723

liability due to pollution and other environmental damages. Although the Partnership believes that its business operations do not impair environmental quality and that its costs of complying with any applicable environmental regulations are not currently significant, the Partnership cannot predict what, if any, effect these environmental regulations may have on its current or future operations.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should not be construed as estimates of the current market value of the Partnership's proved reserves.

No material part of the Partnership's business is seasonal and the Partnership conducts no foreign operations.

ITEM 2. PROPERTIES

The Partnership's properties consist of leasehold interests in properties on which oil and gas wells are located. Such property interests are often subject to landowner royalties, overriding royalties and other oil and gas leasehold interests.

Fractional working interests in developmental oil and gas prospects located primarily in the Spraberry Trend Area of West Texas were acquired by the Partnership, resulting in the Partnership's participation in the drilling of 29 oil and gas wells. At December 31, 2000, the Partnership had 29 producing oil and gas wells.

For information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998, see Note 7 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" below. Such reserves have been evaluated by Williamson Petroleum Consultants, Inc., an independent petroleum consultant.

ITEM 3. LEGAL PROCEEDINGS

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partnership from time to time is a party to various legal proceedings incidental to its business involving claims in oil and gas leases or interests, other claims for damages in amounts not in excess of 10% of its current assets and other matters, none of which Pioneer USA believes to be material to the Partnership.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of the partners during the fourth quarter of 2000.

3

1724

PART II

ITEM 5. MARKET FOR LIMITED PARTNERSHIP INTERESTS AND LIMITED PARTNERSHIP DISTRIBUTIONS

At March 8, 2001, the Partnership had 11,249 outstanding limited partnership interests held of record by 677 subscribers. There is no established public trading market for the limited partnership interests. Under the limited partnership agreement, Pioneer USA has made certain commitments to purchase partnership interests at a computed value.

Revenues which, in the sole judgement of the managing general partner, are not required to meet the Partnership's obligations will be distributed to the partners at least quarterly in accordance with the limited partnership agreement. During the years ended December 31, 2000 and 1999, \$1,324,583 and \$481,274, respectively, of such revenue-related distributions were made to the limited partners.

ITEM 6. SELECTED FINANCIAL DATA

The following table sets forth selected financial data for the years ended December 31:

	2000	1999	1998	1997
	-----	-----	-----	-----
Operating results:				

Oil and gas sales	\$ 2,046,224	\$ 1,136,073	\$ 873,012	\$ 1,273,373
	=====	=====	=====	=====
Impairment of oil and gas properties	\$ --	\$ --	\$ 295,542	\$ 323,078
	=====	=====	=====	=====
Net income (loss)	\$ 1,354,094	\$ 490,669	\$ (177,905)	\$ 222,730
	=====	=====	=====	=====

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Allocation of net income				
(loss):				
Managing general partner	\$ 13,541	\$ 4,907	\$ (1,779)	\$ 2,227
	=====	=====	=====	=====
Limited partners	\$ 1,340,553	\$ 485,762	\$ (176,126)	\$ 220,503

1725

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2000 compared to 1999

The Partnership's oil and gas revenues increased 80% to \$2,046,224 for 2000 as compared to \$1,136,073 in 1999. The increase in revenues resulted from higher average prices received and an increase in production. In 2000, 47,684 barrels of oil, 21,866 barrels of natural gas liquids ("NGLs") and 85,556 mcf of gas were sold, or 83,809 barrel of oil equivalents ("BOEs"). In 1999, 46,030 barrels of oil, 19,026 barrels of NGLs and 74,025 mcf of gas were sold, or 77,394 BOEs. Due to the decline characteristics of the Partnership's oil and gas properties, management expects a certain amount of decline in production in the future until the Partnership's economically recoverable reserves are fully depleted.

The average price received per barrel of oil increased \$12.19, or 68%, from \$17.90 in 1999 to \$30.09 in 2000. The average price received per barrel of NGLs increased \$6.35, or 63%, from \$10.15 in 1999 to \$16.50 in 2000. The average price received per mcf of gas increased 82% from \$1.61 in 1999 to \$2.93 in 2000. The market price for oil and gas has been extremely volatile in the past decade and management expects a certain amount of volatility to continue in the foreseeable future. The Partnership may therefore sell its future oil and gas production at average prices lower or higher than that received in 2000.

Gain on disposition of assets of \$2,273 was recognized during 2000 from equipment credits received on one fully depleted well.

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Total costs and expenses increased in 2000 to \$713,527 as compared to \$655,625 in 1999, an increase of \$57,902, or 9%. The increase was due to an increase in production costs, offset by decreases in depletion and general and administrative expenses ("G&A").

Production costs were \$576,561 in 2000 and \$442,342 in 1999, resulting in an increase of \$134,219, or 30%. This increase was primarily due to higher production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

G&A's components are independent accounting and engineering fees and managing general partner personnel and operating costs. During this period, G&A decreased 22% from \$68,860 in 1999 to \$53,623 in 2000. The Partnership paid the managing general partner \$38,999 in 2000 and \$33,982 in 1999 for G&A incurred on behalf of the Partnership. The remaining G&A was paid directly by the Partnership. The managing general partner determines the allocated expenses based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Depletion was \$83,343 in 2000 as compared to \$144,423 in 1999, representing a decrease of \$61,080, or 42%. This decrease was primarily due to a 82,084 barrels of oil increase in proved reserves during 2000 as a result of higher commodity prices.

5

1726

1999 compared to 1998

The Partnership's 1999 oil and gas revenues increased 30% to \$1,136,073 from \$873,012 in 1998. The increase in revenues resulted from higher average prices received, offset by a decline in production. In 1999, 46,030 barrels of oil, 19,026 barrels of NGLs and 74,025 mcf of gas were sold, or 77,394 BOEs. In 1998, 49,100 barrels of oil, 17,427 barrels of NGLs and 68,244 mcf of gas were sold, or 77,901 BOEs.

The average price received per barrel of oil increased \$4.57, or 34%, from \$13.33 in 1998 to \$17.90 in 1999. The average price received per barrel of NGLs increased \$3.36, or 49%, from \$6.79 in 1998 to \$10.15 in 1999. The average price received per mcf of gas increased 10% from \$1.47 in 1998 to \$1.61 in 1999.

Gain on disposition of assets of \$197 recognized in 1998 was attributable to credits received from the disposal of oil and gas equipment on a saltwater disposal well that was plugged and abandoned in a prior year.

Total costs and expenses decreased in 1999 to \$655,625 as compared to \$1,062,299 in 1998, a decrease of \$406,674, or 38%. The decrease was due to declines in the impairment of oil and gas properties, depletion and production costs, offset by an increase in G&A.

Production costs were \$442,342 in 1999 and \$464,489 in 1998, resulting in a \$22,147 decrease, or 5%. This decrease was due to lower ad valorem taxes and well maintenance costs, offset by an increase in production taxes due to increased oil and gas revenues.

During this period, G&A increased 58% from \$43,606 in 1998 to \$68,860 in 1999

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

primarily due to a higher percentage of the managing general partner's G&A being allocated (limited to 3% of oil and gas revenues) as a result of increased oil and gas revenues. The Partnership paid the managing general partner \$33,982 in 1999 and \$27,503 in 1998 for G&A incurred on behalf of the Partnership.

In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the managing general partner reviews the Partnership's oil and gas properties for impairment whenever events or circumstances indicate a decline in the recoverability of the carrying value of the Partnership's assets may have occurred. As a result of the review and evaluation of its long-lived assets for impairment, the Partnership recognized a non-cash charge of \$295,542 related to its oil and gas properties during 1998.

Depletion was \$144,423 in 1999 compared to \$258,662 in 1998. This represented a decrease of \$114,239, or 44%. This decrease was primarily the result of an increase in proved reserves of 362,706 barrels of oil during 1999 as a result of higher commodity prices, a reduction in the Partnership's net depletable basis from charges taken in accordance with SFAS 121 during the fourth quarter of 1998.

6

1727

Petroleum industry

The petroleum industry has been characterized by volatile oil, NGL and natural gas commodity prices and relatively stable supplier costs during the three years ended December 31, 2000. During 1998, weather patterns, regional economic recessions and political matters combined to cause worldwide oil supplies to exceed demand resulting in a substantial decline in oil prices. Also during 1998, but to a lesser extent, market prices for natural gas declined. During 1999 and 2000, the Organization of Petroleum Exporting Countries ("OPEC") and certain other crude oil exporting nations announced reductions in their planned export volumes. Those announcements, together with the enactment of the announced reductions in export volumes, had a positive impact on world oil prices, as have overall natural gas supply and demand fundamentals on North American natural gas prices. Although the favorable commodity price environment and stable field service cost environment is expected to continue during 2001, there is no assurance that commodity prices will not return to a less favorable level or that field service costs will not escalate in the future, both of which could negatively impact the Partnership's future results of operations and cash distributions.

Liquidity and capital resources

Net Cash Provided by Operating Activities

Net cash provided by operating activities increased \$766,498 during the year ended December 31, 2000 from 1999. This increase was due to an increase in oil and gas sales receipts of \$919,054 and a decline in G&A expenses paid of \$15,237, offset by increases in production costs paid of \$134,219 and working capital of \$33,574. The increase in oil and gas receipts resulted from the increase in commodity prices during 2000 which contributed an additional \$788,626 to oil and gas receipts and \$130,428 resulting from the increase in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

production during 2000. The increase in production costs was primarily due to increased production taxes associated with higher oil and gas prices and additional well maintenance and workover costs incurred to stimulate well production.

Net Cash Used in Investing Activities

The Partnership's principal investing activities during 2000 and 1999 were related to the addition of equipment on various oil and gas properties.

Proceeds from asset dispositions of \$2,372 recognized during 2000 were related to equipment credits on two active wells.

Net Cash Used in Financing Activities

In 2000, cash distributions to the partners were \$1,337,963, of which \$13,380 was distributed to the managing general partner and \$1,324,583 to the limited partners. In 1999, cash distributions to the partners were \$486,135, of which \$4,861 was distributed to the managing general partner and \$481,274 to the limited partners.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

INDEX TO FINANCIAL STATEMENTS

Financial Statements of Parker & Parsley 91-B, L.P.:

- Independent Auditors' Report.....
- Balance Sheets as of December 31, 2000 and 1999.....

INDEPENDENT AUDITORS' REPORT

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

The Partners
Parker & Parsley 91-B, L.P.
(A Delaware Limited Partnership):

We have audited the balance sheets of Parker & Parsley 91-B, L.P. as of December 31, 2000 and 1999, and the related statements of operations, partners' capital and cash flows for each of the three years in the period ended December 31, 2000. These financial statements are the responsibility of the Partnership's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Parker & Parsley 91-B, L.P. as of December 31, 2000 and 1999, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2000, in conformity with accounting principles generally accepted in the United States.

PARKER & PARSLEY 91-B, L.P.
(A Delaware Limited Partnership)

NOTES TO FINANCIAL STATEMENTS
December 31, 2000, 1999 and 1998

NOTE 1. ORGANIZATION AND NATURE OF OPERATIONS

Parker & Parsley 91-B, L.P. (the "Partnership") is a limited partnership organized in 1991 under the laws of the State of Delaware. The Partnership's managing general partner is Pioneer Natural Resources USA, Inc. ("Pioneer USA").

The Partnership engages in oil and gas development and production in Texas and is not involved in any industry segment other than oil and gas.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies consistently applied in the preparation of the accompanying financial statements follows:

Oil and gas properties - The Partnership utilizes the successful efforts method of accounting for its oil and gas properties and equipment. Under this method, all costs associated with productive wells and nonproductive development wells are capitalized while nonproductive exploration costs are expensed. Capitalized costs relating to proved properties are depleted using the unit-of-production method on a property-by-property basis based on proved oil (dominant mineral) reserves as evaluated by independent petroleum consultants. The carrying amounts of properties sold or otherwise disposed of and the related allowances for depletion are eliminated from the accounts and any gain or loss is included in results of operations.

Impairment of long-lived assets - In accordance with Statement of Financial Accounting Standards No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to be Disposed Of" ("SFAS 121"), the Partnership reviews its long-lived assets to be held and used on an individual property basis, including oil and gas properties accounted for under the successful efforts method of accounting, whenever events or circumstances indicate that the carrying value of those assets may not be recoverable. An impairment loss is indicated if the sum of the expected future cash flows is less than the carrying amount of the assets. In this circumstance, the Partnership recognizes an impairment loss for the amount by which the carrying amount of the asset exceeds the estimated fair value of the asset.

Use of estimates in the preparation of financial statements - Preparation of the accompanying financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Net income (loss) per limited partnership interest - The net income (loss) per limited partnership interest is calculated by using the number of outstanding limited partnership interests.

Income taxes - A Federal income tax provision has not been included in

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

the financial statements as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

14

1735

Statements of cash flows - For purposes of reporting cash flows, cash includes depository accounts held by banks.

General and administrative expenses - General and administrative expenses are allocated in part to the Partnership by the managing general partner. Allocated expenses are determined by the managing general partner based upon the level of activity of the Partnership relative to the non-partnership activities of the managing general partner. The method of allocation has been consistent over the past several years with certain modifications incorporated to reflect changes in Pioneer USA's overall business activities.

Reclassifications - Certain reclassifications may have been made to the 1999 and 1998 financial statements to conform to the 2000 financial statement presentations.

Environmental - The Partnership is subject to extensive federal, state and local environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Partnership to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefits are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated. Such liabilities are generally undiscounted unless the timing of cash payments for the liability or component are fixed or reliably determinable. No such liabilities have been accrued as of December 31, 2000.

Revenue recognition - The Partnership uses the entitlements method of accounting for oil, natural gas liquids ("NGLs") and natural gas revenues.

NOTE 3. IMPAIRMENT OF LONG-LIVED ASSETS

In accordance with SFAS 121, the Partnership reviews its proved oil and gas properties for impairment whenever events and circumstances indicate a decline in the recoverability of the carrying value of the Partnership's oil and gas properties. The Partnership has estimated the expected future cash flows of its oil and gas properties as of December 31, 2000, 1999 and 1998, based on proved reserves, and compared such estimated future cash flows to the respective carrying amount of the oil and gas properties to determine if the carrying amounts were likely to be recoverable. For those proved oil and gas properties for which the carrying amount exceeded the estimated future cash flows, an impairment was determined to exist; therefore, the Partnership adjusted the carrying amount of those oil and gas properties to their fair value as determined by discounting their expected future cash flows at a discount rate commensurate with the risks involved in the industry. As a result, the Partnership recognized a non-cash impairment provision of \$295,542 related to its proved oil and gas properties during 1998.

15

1736

1704

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

NOTE 4. INCOME TAXES

The financial statement basis of the Partnership's net assets and liabilities was \$367,378 greater than the tax basis at December 31, 2000.

The following is a reconciliation of net income (loss) per statements of operations with the net income (loss) per Federal income tax returns for the years ended December 31:

	2000	
	-----	-----
Net income (loss) per statements of operations	\$ 1,354,094	\$
Depletion and depreciation provisions for tax reporting purposes greater than amounts for financial reporting purposes	(27,307)	
Impairment of oil and gas properties for financial reporting purposes	-	
Salvage income		
Intangible development costs capitalized for financial reporting purposes and expensed for tax reporting purposes	(328)	
Other, net	(2,832)	
	-----	-----
Net income (loss) per Federal income tax returns	\$ 1,323,627	\$
	=====	=====

NOTE 5. OIL AND GAS PRODUCING ACTIVITIES

The following is a summary of the net costs incurred, whether capitalized or expensed, related to the Partnership's oil and gas producing activities for the years ended December 31:

	2000	
	-----	-----
Development costs	\$ 12,408	\$
	=====	=====

Capitalized oil and gas properties consist of the following:

		2000

Property acquisition costs	\$	9
Completed wells and equipment		8,8

Accumulated depletion		9,7 (8,3)

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Net oil and gas properties

\$ 1,3
=====

NOTE 6. RELATED PARTY TRANSACTIONS

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

1737

16

	2000	
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 196,507	\$
Reimbursement of general and administrative expenses	\$ 38,999	\$

The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Pioneer USA, P&P Employees 91-B GP ("EMPL") and the Partnership are parties to the Program agreement. EMPL is a general partnership organized for the benefit of certain employees of Pioneer USA. EMPL was merged with Pioneer USA on December 28, 2000.

The costs and revenues of the Program are allocated to Pioneer USA and the Partnership as follows:

		Pioneer U

Revenues:		
Proceeds from disposition of depreciable and depletable properties		34.343
All other revenues		34.343
Costs and expenses:		
Lease acquisition costs, drilling and completion costs and all other costs		24.242
Operating costs, reporting and legal expenses and general and administrative expenses		34.343

- (1) Includes Pioneer USA's 1% general partner ownership which is allocated at the Partnership level and 10 limited partner interests

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

owned by Pioneer USA.

NOTE 7. OIL AND GAS INFORMATION (UNAUDITED)

The following table presents information relating to the Partnership's estimated proved oil and gas reserves at December 31, 2000, 1999 and 1998 and changes in such quantities during the years then ended. All of the Partnership's reserves are proved developed and located within the United States. The Partnership's reserves are based on an evaluation prepared by Williamson Petroleum Consultants, Inc., an independent petroleum consultant, using criteria established by the Securities and Exchange Commission.

	Oil and NGLs (bbls)	Gas (mcf)
	-----	-----

Net proved reserves at December 31, 2000	1,041,776	1,225,571
	=====	=====

As of December 31, 2000, the estimated present value of future net revenues of proved reserves, calculated using December 31, 2000 prices of \$26.64 per barrel of oil, \$13.59 per barrel of NGLs and \$7.73 per mcf of gas, discounted at 10% was approximately \$8,364,000 and undiscounted was \$17,283,000.

Numerous uncertainties exist in estimating quantities of proved reserves and future net revenues therefrom. The estimates of proved reserves and related future net revenues set forth in this Report are based on various assumptions, which may ultimately prove to be inaccurate. Therefore, such estimates should

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

not be construed as estimates of the current market value of the Partnership's proved reserves. The Partnership emphasizes that reserve estimates are inherently imprecise and, accordingly, the estimates are expected to change as future information becomes available.

Disclosures about Oil & Gas Producing Activities

Standardized Measure of Discounted Future Net Cash Flows

The standardized measure of discounted future net cash flows is computed by applying year-end prices of oil and gas (with consideration of price changes only to the extent provided by contractual arrangements) to the estimated future production of proved oil and gas reserves less estimated future expenditures (based on year-end costs) to be incurred in developing and producing the proved reserves, discounted using a rate of 10% per year to reflect the estimated timing of the future cash flows. A Federal income tax provision has not been calculated as the income of the Partnership is included in the individual Federal income tax returns of the respective partners.

Discounted future cash flow estimates like those shown below are not intended to represent estimates of the fair value of oil and gas properties. Estimates of fair value should also consider anticipated future oil and gas prices, interest rates, changes in development and production costs and risks associated with future production. Because of these and other considerations, any estimate of fair value is necessarily subjective and imprecise.

	For the years ended	
	2000	1999

NOTE 8. MAJOR CUSTOMERS

The following table reflects the major customers of the Partnership's oil and gas sales (a major customer is defined as a customer whose sales exceed 10% of total sales) during the periods ended December 31:

	2000		19
	-----		-----
Mobil Oil Corporation	48%		
Plains Marketing, L.P.	22%		
Genesis Crude Oil, L.P.	-		
Western Gas Resources, Inc.	4%		

At December 31, 2000, the amounts receivable from Mobil Oil Corporation and Plains Marketing, L.P. were \$64,224 and \$32,862, respectively, which are included in the caption "Accounts receivable - oil and gas sales" in the accompanying Balance Sheet.

Pioneer USA is of the opinion that the loss of any one purchaser would not have an adverse effect on the ability of the Partnership to sell its oil, NGLs and gas production.

NOTE 9. PARTNERSHIP AGREEMENT

The following is a brief summary of the more significant provisions of the limited partnership agreement:

Managing general partner - The managing general partner of the Partnership is Pioneer USA. Pioneer USA has the power and authority to manage, control and administer all Partnership affairs. As managing general partner and operator of the Partnership's properties, all production expenses are incurred by Pioneer USA and billed to the Partnership. The majority of the Partnership's oil and gas revenues are received directly by the Partnership, however, a

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

1740

portion of the oil and gas revenue is initially received by Pioneer USA prior to being paid to the Partnership. Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs, and 1% of its operating and general and administrative expenses. In return it is allocated 1% of the Partnership's revenues.

Limited partner liability - The maximum amount of liability of any limited partner is the total contributions of such partner plus his share of any undistributed profits.

Initial capital contributions - The limited partners entered into subscription agreements for aggregate capital contributions of \$11,249,000. The managing general partner is required to contribute amounts equal to 1% of initial Partnership capital less sales commission costs allocated to the limited partners and to contribute amounts necessary to pay costs and expenses allocated to it under the Partnership agreement to the extent its share of revenues does not cover such costs.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

20

1741

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE PARTNERSHIP

The Partnership does not have any officers or directors. Under the limited partnership agreement, the Partnership's managing general partner, Pioneer USA, is granted the exclusive right and full authority to manage, control and administer the Partnership's business.

Set forth below are the names, ages and positions of the directors and executive officers of Pioneer USA. Directors of Pioneer USA are elected to serve until the next annual meeting of stockholders or until their successors are elected and qualified.

Name	Age at December 31, 2000	
----	----	---
Scott D. Sheffield	48	President
Timothy L. Dove	44	Executive Vice Pr Financial Offic

1710

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

Dennis E. Fagerstone	51	Executive Vice Pr
Mark L. Withrow	53	Executive Vice Pr Counsel and Dir
Danny Kellum	46	Executive Vice Pr Operations and
Rich Dealy	34	Vice President an Officer

Scott D. Sheffield. Mr. Sheffield is a graduate of The University of Texas with a B.S. in Petroleum Engineering. Since August 1997, he has served as President, Chief Executive Officer and a director of Pioneer and President of Pioneer USA. Mr. Sheffield assumed the position of Chairman of the Board of Pioneer in August 1999. He served as a director of Pioneer USA from August 1997 until his resignation from the board in June 1999. Mr. Sheffield was the President and a director of Parker & Parsley Petroleum Company ("Parker & Parsley") from May 1990 until August 1997 and was the Chairman of the Board and Chief Executive Officer of Parker & Parsley from October 1990 until August 1997. He was the sole director of Parker & Parsley from May 1990 until October 1990. Mr. Sheffield joined Parker & Parsley Development Company ("PPDC"), a predecessor of Parker & Parsley, as a petroleum engineer in 1979. He served as Vice President - Engineering of PPDC from September 1981 until April 1985 when he was elected President and a director. In March 1989, Mr. Sheffield was elected Chairman of the Board and Chief Executive Officer of PPDC. Before joining PPDC's predecessor, Mr. Sheffield was employed as a production and reservoir engineer for Amoco Production Company.

21

1742

Timothy L. Dove. Mr. Dove earned a B.S. in Mechanical Engineering from Massachusetts Institute of Technology in 1979 and received his M.B.A. in 1981 from the University of Chicago. He became Executive Vice President - Business Development of Pioneer and Pioneer USA in August 1997 and was also appointed a director of Pioneer USA in August 1997. Mr. Dove assumed the position of Chief Financial Officer of Pioneer and Pioneer USA effective February 1, 2000. Mr. Dove joined Parker & Parsley in May 1994 as Vice President - International and was promoted to Senior Vice President - Business Development in October 1996, in which position he served until August 1997. Prior to joining Parker & Parsley, Mr. Dove was employed with Diamond Shamrock Corp., and its successor, Maxus Energy Corp, in various capacities in international exploration and production, marketing, refining and marketing and planning and development.

Dennis E. Fagerstone. Mr. Fagerstone, a graduate of the Colorado School of Mines with a B.S. in Petroleum Engineering, became an Executive Vice President of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. He served as Executive Vice President and Chief Operating Officer of MESA Inc. ("Mesa") from March 1, 1997 until August 1997. From October 1996 to February 1997, Mr. Fagerstone served as Senior Vice President and Chief Operating Officer of Mesa and from May 1991 to October 1996, he served as Vice President - Exploration and Production of Mesa. From June 1988 to May 1991, Mr. Fagerstone served as Vice President - Operations of Mesa.

Mark L. Withrow. Mr. Withrow, a graduate of Abilene Christian University with a B. S. in Accounting and Texas Tech University with a Juris Doctorate

1711

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

degree, became Executive Vice President, General Counsel and Secretary of Pioneer and Pioneer USA in August 1997. He was also appointed a director of Pioneer USA in August 1997. Mr. Withrow was Vice President - General Counsel of Parker & Parsley from January 1991, when he joined Parker & Parsley, to January 1995, when he was appointed Senior Vice President - General Counsel. He was Parker & Parsley's Secretary from August 1992 until August 1997. Prior to joining Parker & Parsley, Mr. Withrow was the managing partner of the law firm of Turpin, Smith, Dyer, Saxe & MacDonald, Midland, Texas.

Danny Kellum. Mr. Kellum, who received a Bachelor of Science degree in Petroleum Engineering from Texas Tech University in 1979, was elected Executive Vice President - Domestic Operations of Pioneer and Pioneer USA on May 18, 2000 and Director of Pioneer USA on February 1, 2000. From January 2000 until May 2000, Mr. Kellum served as Vice President - Domestic Operations of Pioneer and Pioneer USA. Mr. Kellum served as Vice President Permian Division of Pioneer and Pioneer USA from April 1998 until December 1999. From 1989 until 1994 he served as Spraberry District Manager and as Vice President of the Spraberry and Permian Division for Parker & Parsley until August of 1997. Mr. Kellum joined Parker & Parsley as an operations engineer in 1981 after a brief career with Mobil Oil Corporation.

Rich Dealy. Mr. Dealy is a graduate of Eastern New Mexico University with a B.B.A. in Accounting and Finance and is a Certified Public Accountant. He became Vice President and Chief Accounting Officer of Pioneer and Pioneer USA in February 1998. Mr. Dealy served as Controller of Pioneer USA from August 1997 to February 1998. He served as Controller of Parker & Parsley from August 1995 to August 1997. Mr. Dealy joined Parker & Parsley as an Accounting Manager in July, 1992. He was previously employed with KPMG Peat Marwick as an Audit Senior, in charge of Parker & Parsley's audit.

22

1743

ITEM 11. EXECUTIVE COMPENSATION

The Partnership does not have any directors or officers. Management of the Partnership is performed by the managing general partner. The Partnership participates in oil and gas activities through an income tax partnership (the "Program") pursuant to the Program agreement. Under the Program agreement, Pioneer USA pays approximately 25% of the Program's acquisition, drilling and completion costs and approximately 35% of its operating and general and administrative expenses. In return, they are allocated approximately 35% of the Program's revenues.

The Partnership does not directly pay any salaries of the executive officers or employees of Pioneer USA, but does pay a portion of Pioneer USA's general and administrative expenses of which these salaries are a part.

See Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data" for information regarding fees and reimbursements paid to the managing general partner by the Partnership.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

(a) Beneficial owners of more than five percent

The Partnership is not aware of any person who beneficially owns 5% or more of the outstanding limited partnership interests of the Partnership. Pioneer USA

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

owned 10 limited partner interests at January 1, 2001.

(b) Security ownership of management

The Partnership does not have any officers or directors. The managing general partner of the Partnership, Pioneer USA, has the exclusive right and full authority to manage, control and administer the Partnership's business. Under the limited partnership agreement, limited partners holding a majority of the outstanding limited partnership interests have the right to take certain actions, including the removal of the managing general partner or any other general partner. The Partnership is not aware of any current arrangement or activity which may lead to such removal. The Partnership is not aware of any officer or director of Pioneer USA who beneficially owns limited partnership interests in the Partnership.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Transactions with the managing general partner

Pursuant to the limited partnership agreement, the Partnership had the following related party transactions with the managing general partner during the years ended December 31:

1744

23

	2000	
	-----	-----
Payment of lease operating and supervision charges in accordance with standard industry operating agreements	\$ 196,507	\$
Reimbursement of general and administrative expenses	\$ 38,999	\$

Under the limited partnership agreement, the managing general partner pays 1% of the Partnership's acquisition, drilling and completion costs and 1% of its operating and general and administrative expenses. In return, it is allocated 1% of the Partnership's revenues. Also, see Notes 6 and 9 of Notes to Financial Statements included in "Item 8. Financial Statements and Supplementary Data", regarding the Partnership's participation with the managing general partner in oil and gas activities of the Program.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

ITEM 20. INDEMNIFICATION OF OFFICERS AND DIRECTORS.

Article Twelfth of the Amended and Restated Certificate of Incorporation of Pioneer Parent provides that Pioneer Parent must indemnify its officers and directors to the extent allowed by the Delaware General Corporation Law. Pursuant to Section 145 of the Delaware General Corporation Law, Pioneer Parent generally has the power to indemnify its present and former directors and officers against expenses and liabilities incurred by them in connection with any suit to which they are, or are threatened to be made, a party by reason of their serving in those positions so long as they acted in good faith and in a manner they reasonably believed to be in, or not opposed to, the best interests of Pioneer Parent, and with respect to any criminal action, they had no reasonable cause to believe their conduct was unlawful. With respect to suits by or in the right of Pioneer Parent, however, indemnification is generally limited to attorneys' fees and other expenses and is not available if the person is adjudged to be liable to Pioneer Parent unless the court determines that indemnification is appropriate. The statute expressly provides that the power to indemnify authorized thereby is not exclusive of any rights granted under any by-law, agreement, vote of stockholders or disinterested directors, or otherwise. Pioneer Parent also has the power to purchase and maintain insurance for its directors and officers. Additionally, Article Twelfth of the Amended and Restated Certificate of Incorporation of Pioneer Parent provides that, in the event that an officer or director files suit against Pioneer Parent seeking indemnification of liabilities or expenses incurred, the burden will be on Pioneer Parent to prove that the indemnification would not be permitted under the Delaware General Corporation Law.

Pioneer Parent has entered into indemnification agreements with each of its directors and officers. These agreements provide that Pioneer Parent must, within 30 days of a request, indemnify an officer or director for liabilities

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

incurred to the fullest extent permitted by the Delaware General Corporation Law. Pioneer Parent must, within two days of a request, indemnify an officer or director for expenses incurred in the defense of a claim or other proceeding. The obligation of Pioneer Parent to provide the indemnification does not apply if, before the date on which Pioneer Parent must provide the indemnification, Pioneer Parent's board of directors, or a representative chosen by the board of directors, concludes that indemnification would be improper under the Delaware General Corporation Law.

The preceding discussion of Pioneer Parent's Amended and Restated Certificate of Incorporation, Section 145 of the Delaware General Corporation Law, and the indemnification agreements is not intended to be exhaustive and is qualified in its entirety by such Amended and Restated Certificate of Incorporation, Section 145 of the Delaware General Corporation Law, and such indemnification agreements.

 ITEM 22. UNDERTAKINGS.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of Pioneer Parent pursuant to the foregoing provisions, or otherwise, Pioneer Parent has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities, other than the payment by Pioneer Parent of expenses incurred or paid by a director, officer or controlling person of Pioneer Parent in the successful defense of any action,

Edgar Filing: PIONEER NATURAL RESOURCES CO - Form S-4/A

suit or proceeding, is asserted by such director, officer or controlling person in connection with the securities being registered, Pioneer Parent will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

Pioneer Parent hereby undertakes:

(1) That, for purposes of determining any liability under the Securities Act of 1933, each filing of Pioneer Parent's annual report pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof;

(2) That prior to any public reoffering of the securities registered hereunder through use of a prospectus which is a part of this registration statement by any person or party who is deemed to be an underwriter within the meaning of Rule 145(c), Pioneer Parent undertakes that such reoffering prospectus will contain the information called for by the applicable registration form with respect to reofferings by persons who may be deemed underwriters, in addition to the information called for by the other items of the applicable form;

(3) That every prospectus: (a) that is filed pursuant to paragraph (3) immediately preceding, or (b) that purports to meet the requirements of Section 10(a)(3) of the Securities Exchange Act of 1934 and is used in connection with an offering of securities subject to Rule 415, will be filed as a part of an amendment to the registration statement and will not be used until such amendment is effective, and that, for purposes of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof;

(4) To respond to requests for information that is incorporated by reference into the prospectus pursuant to Items 4, 10(b), 11 or 13 of Form S-4, within one business day of receipt of such request, and to send the incorporated documents by first class mail or other equally prompt means. This includes information contained in documents filed subsequent to the effective date of the registration statement through the date of responding to the request; and

(5) To supply by means of a post-effective amendment all information concerning a transaction, and the company being acquired involved therein, that was not the subject of and included in the registration statement when it became effective.
