Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

March 31, 2003
(Unaudited)

Note 1 - Basis of Presentation

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. For further information, refer to the financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the fiscal year ended June 30, 2002.

In the opinion of management, the unaudited condensed financial statements contain all adjustments, consisting of normal recurring adjustments, considered necessary to present fairly the Company's financial position at March 31, 2003 and June 30, 2002, results of operations for the three and nine months ended March 31, 2003 and 2002, and cash flows for the three and nine months ended March 31, 2003 and 2002. The results for the period ended March 31, 2003 are not necessarily indicative of the results to be expected for the entire fiscal year ending June 30, 2003.

The Company has incurred operating losses since inception, which have resulted in an accumulated deficit of \$65,567,439 at March 31, 2003. Based on the steps the Company has taken to refocus its operations and obtain additional financing, the Company believes that it has developed a viable plan to address the Company's ability to continue as a going concern, and that this plan will enable the Company to continue as a going concern, at least through the end of fiscal year 2003. The Company engaged a placement agent to assist in the sale of shares of the Company's common stock in a private placement. During October 2002, the Company received gross proceeds of \$4,125,000 through the sale of 4,125,000 shares pursuant to this offering. Cash proceeds net of offering costs were \$3,872,056. In addition, the due dates of Notes Payable to Stockholder and Convertible Notes Payable to Stockholder were extended from December 31, 2002 to December 31, 2003. [See Part I Item 2 "Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources"]

There can be no assurance that this plan will be successfully implemented, and if not successfully implemented the Company may be required to reduce the development efforts of its Healthcare Exchange or be forced into seeking protection under federal bankruptcy laws. As a result, the report of independent auditors on the Company's June 30, 2002 financial statements includes an explanatory paragraph indicating there is substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

5

Note 2 - Financing Arrangements

On July 26, 2002, the Company received cash of \$1,000,000 in exchange for issuance of a convertible note (the "Note"). The Note bears interest at 8% and is payable at the earliest of July 25, 2003 or when the Company raises an additional \$8,000,000 through debt or equity financing. Pursuant to the original terms of the Note, all or a portion of the Note may be converted into shares of common stock at the lower of \$2.25 per share (the initial subscription per share

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

price of the Private Placement completed in March 2002) or \$1.00 per share (the subscription price of the stock sold in the Private Placement during October 2002); or if the Company sells shares of its common stock, or issues options, warrants or other securities convertible into shares of its common stock before March 29, 2003 at a price less than the conversion price of \$1.00, then the conversion price will be equal to the per share price of Common Stock subsequently sold by the Company, (excluding common stock that may be (i) issued in connection with a merger, (ii) issued as a dividend, (iii) issued upon the exercise of options subsequently issued after the closing to employees of or consultants to the Company, or (iv) issued upon the exercise of existing options, warrants or other convertible securities).

In consideration for the loan the Company issued three warrants on July 26, 2002. Each warrant provides for the purchase of 100,000 shares of the Company's common stock at an exercise price equal to the \$1.00 subscription per share price of the October 2002 Private Placement, or if further shares are offered at a lower price per share, then at that price. The First and Second Warrants became exercisable on July 26, 2002 and January 26, 2003, respectively, and are exercisable before the expiration date. The Third Warrant issued may only be exercisable if the Company does not repay the Note within one year from the issuance of the Note. When, and if, exercisable the lender may exercise these warrants through July 26, 2009.

In connection with the issuance of the Note and the First and Second Warrants, the Company estimated the aggregate fair value of the First and Second Warrants to be \$254,000 using the Black-Scholes model. In accordance with EITF 98-5, "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios," and EITF 00-27, "Application of Issue No. 98-5 to Certain Convertible Instruments," the Company has recognized \$299,878 and \$643,719 through interest expense for the three and nine month periods respectively, ending March 31, 2003 for a portion of the fair value of the First and Second Warrants and a portion of the beneficial conversion feature of the Note, which was estimated to be in total \$802,000. The Company will record additional amounts totaling \$412,281 through interest expense until July 26, 2003 for the remaining fair value of the First and Second Warrants and the beneficial conversion feature of the Note recorded at the initial transaction date, and in accordance with EITF 00-27, the additional beneficial conversion feature recorded in the quarter ending December 31, 2002 of \$624,222 relating to the reset of the conversion price of the Note from \$2.25 to \$1.00 per share.

6

The Company engaged a placement agent to assist in the sale of shares of the Company's common stock in a private placement. During October 2002, the Company received gross proceeds of \$4,125,000 through the sale of 4,125,000 shares pursuant to this offering. Cash proceeds net of offering costs were \$3,872,056. In connection with the October Private Placement, the Company paid the placement agent a placement fee of 6% of the gross proceeds raised by them and a five year warrant to purchase 10% of the Common Stock placed by them at an exercise price of \$1.00 per share. In addition, the Company paid a finder's fee to one individual of \$12,500 and issued a warrant to purchase 30,000 shares of common stock at \$1.00 per share.

Resulting from the closing of the October 2002 Private Placement of Common Stock, 1,540,729 additional shares were issued to investors who purchased shares of common stock in the January 2002 private placement based on the October 2002 Private Placement price of \$1.00 per share. A compensation expense of \$347,222 was recorded for the additional shares issued to the Company's Chairman and Chief Financial Officer.

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

On November 1, 2002, the Company agreed with Company's Chairman and Chief Financial Officer to extend the due date on notes payable to him until December 31, 2003 in exchange for an extension fee of 2%. These extended notes total \$2,873,694, including accrued interest and extension fees, and bear interest at 10.25% per annum. Also on November 1, 2002, the Company agreed with the other note holder to extend the due date of his convertible promissory notes until December 31, 2003. These convertible promissory notes total \$2,445,288, including accrued interest, bear interest at 10.25% per annum and are convertible into common stock at \$3.00 per share at the note holder's option.

As a result of the Company's July 2002 bridge financing in which the Company granted warrants equal to 30% of the loan at an exercise price of \$1.00 per share, the Company granted to the investors of the January 2002 and October 2002 Private Placements warrants to purchase 30% of their respective investment at an exercise price of \$1.00 per share. Mr. Cameron, as a participant in the private placement, received a warrant to purchase 150,000 shares of common stock at an exercise price of \$1.00 per share, which was greater than the fair value of the common stock at the warrant issuance date.

During the quarter ended December 31, 2002, the facilities lease agreement between the Company and the Company's Chairman and Chief Financial Officer was modified to reflect an annual base rent of \$120 until further notice from lessor, in his sole and absolute discretion, to return the rent to its previous level. To recognize the estimated market rate of this transaction, a monthly expense of \$11,424 is recognized through rent expense and other capital contributions.

Note 3 - Comprehensive Loss

Total comprehensive loss for the three months ended March 31, 2003 and 2002 was \$1,603,874, and \$2,607,412, and \$6,204,560 and \$7,189,581 for the nine months ended March 31, 2003 and 2002 respectively. Other comprehensive income (loss) represents the net change in unrealized gains (losses) on available-for-sale securities.

7

Note 4 - Net Loss Per Share

As the Company has reported net losses in all periods presented, basic and diluted loss per share have been calculated on the basis of net loss applicable to common stockholders divided by the weighted average number of common stock shares outstanding without giving effect to outstanding options, warrants, and convertible securities whose effects are anti-dilutive. For the three and nine months ended March 31, 2003 and 2002 there were stock options, stock warrants, and convertible notes payable outstanding, which could potentially dilute earnings per share in the future but were not included in the computation of diluted loss per share as their effect was anti-dilutive in the periods presented.

The Company accounts for its stock-based compensation plans under the recognition and measurement principles of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" and related interpretations. Under the intrinsic value method, compensation cost is the excess, if any, of the quoted market price or fair value of the stock at the grant date or other measurement date over the amount an employee must pay to acquire the stock.

The following table illustrates the effect on net loss and net loss per share if the Company had applied the fair value recognition provision of Statement of Financial Accounting Standards Board Statement No. 123, "Accounting for Stock-Based-Compensation" to stock-based compensation.

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

	Three Months Ended March 31,	
	2003	2002
Net loss, as reported	\$ (1,603,874)	\$ (2,607,412)
Add: Stock-based employee compensation expense included in reported net loss	-	135,583
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(1,439,418)	(1,300,520)
	-----	-----
Pro forma net loss	\$ (3,043,292)	\$ (3,772,349)
	=====	=====
Loss per share:		
Basic and diluted - as reported	\$ (0.02)	\$ (0.04)
	=====	=====
Basic and diluted - pro forma	\$ (0.05)	\$ (0.06)
	=====	=====

Option valuation models were developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions, including the expected life of the option. Because the Company's employee stock options have characteristics significantly different from those of traded options and because changes in the subjective input assumptions can materially affect the fair value estimates, in management's opinion, the

8

existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options.

Note 5 - Stock Option Grant

On January 25, 2003, the Board of Directors approved the issuance of a non-qualified option grant to Mr. Jeffrey S. McCormick, Chief Executive Officer, to purchase up to 4,000,000 shares of common stock at the exercise price of \$1.25 per share. The effective date of the option grant is November 7, 2002. The option grant is to vest over a four year period, commencing with the vesting of the first 1,000,000 shares of common stock on January 31, 2003. Thereafter, the option to purchase additional 1,000,000 shares of common stock shall vest on January 31 of each year through 2006. No compensation expense was recorded in connection with this option grant as the exercise price was greater than the fair value of the common stock at the option grant date.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis

The following discussion provides information to facilitate the understanding

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

and assessment of significant changes in trends related to the financial condition of the Company and its results of operations. It should be read in conjunction with the Company's financial statements and the notes thereto and other financial information included elsewhere in the Form 10-K for the fiscal year ended June 30, 2002.

Overview

General

Alternative Technology Resources, Inc. (hereinafter referred to as "ATR," the "Company," "we" or "us") has developed and is operating an Exchange for healthcare services ("Healthcare Exchange"). The purpose of the Healthcare Exchange is to utilize the Internet and other technologies to facilitate Provider (defined below) initiated discounts and administrative, billing and remittance services for all commercial lines of business in the healthcare industry. The Healthcare Exchange offers a direct and efficient conduit between Providers and Purchasers (defined below) of healthcare services and/or their agents, such as Preferred Provider Organizations.

ATR does not provide healthcare services, but rather expects to act as a neutral conduit for efficiency between Providers, Purchasers and their intermediaries including preferred provider organizations, that should benefit all. ATR believes that reducing the costs associated with traditional "bricks and mortar" operations, creating economies of scale, facilitating access to Providers and Purchasers, streamlining overhead costs, exploiting possibilities for functional integration, reducing errors and speeding the payment of claims should allow Purchasers to pay less and Providers to recover more of what they bill.

9

Providers submit bills to the Company, who reprices the bills to the rate set by the Providers, including adding a transaction-processing fee, and then routes them to Purchasers or their intermediaries. The Company receives payments from Purchasers on behalf of the Providers, and then remits payments to the Providers.

ATR's Healthcare Exchange began operations with a limited number of Providers and Purchasers in the quarter ending June 30, 2001. The Company continues to receive, process and analyze operating data, and the results of the Company's analysis will determine the amount and timing of remaining development related efforts.

The Company is currently recruiting medical doctors, medical groups, hospitals and other health care practitioners (collectively, "Providers") in twenty-three markets in sixteen states to offer their services through the Healthcare Exchange to those who purchase or facilitate the purchase of healthcare services ("Purchasers").

The Company has outsourced to multiple vendors portions of the development and operations of the information systems for its Healthcare Exchange. The Company contracts with an application services provider to license, support and run software to process medical bills submitted to the Company's Healthcare Exchange. ATR also works with vendors to receive claims from Providers through electronic clearinghouses and to convert paper claims into electronic formats. ATR is evaluating other potential technology vendors as well.

History

Alternative Technology Resources, Inc. was founded as 3Net Systems, Inc. in 1989. In August 1999, James W. Cameron, Jr., the Company's largest stockholder,

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

was named Chairman and Chief Executive Officer. Under his direction the Company identified what it believes to be a significant business opportunity and began developing a business model involving the establishment of a Healthcare Exchange under the name "DoctorandPatient."

In February 2000, Jeffrey S. McCormick assumed the position of the Company's Chief Executive Officer. Mr. McCormick has significant experience in financing, managing and growing early stage development companies as a managing director of Boston-based Saturn Asset Management, Inc. Mr. McCormick has served as an advisor or director of several Internet and electronic commerce companies over the last six years. As the Company's CEO, Mr. McCormick is responsible for all phases of development, implementation and operation of the Company's Healthcare Exchange. Mr. Cameron still acts as Chairman and Chief Financial Officer and continues to play an active and substantial role in formulating the Company's business strategy and policy.

The Company is using its management's experience in health care and information technology to establish the Healthcare Exchange, which has become the Company's sole focus. ATR's Healthcare Exchange began operations with a limited number of Providers and Purchasers in the quarter ending June 30, 2001. The Company continues to receive, process and analyze operating data, and the results of the

10

Company's analysis will determine the amount and timing of remaining development related efforts. ATR's previous business was recruiting, hiring, and training foreign computer programmers and placing them with U.S. companies. In line with the Company's strategy to focus on the establishment of the Healthcare Exchange, ATR suspended recruitment of foreign computer programmers in December 1999 and began pursuing the conversion of foreign computer programmers to become employees of ATR's customers. This conversion process was complete as of June 30, 2001, and the Company is no longer in that business.

Critical Accounting Policies

Revenue Recognition. The Company recognizes revenue for the transaction-processing fee when earned and the Company has substantially completed all of its obligations under the contract.

Product Development Costs. In October 1999, the Company began incurring costs to develop its Healthcare Exchange. In accordance with SOP 98-5, "Reporting Costs on Start-Up Activities," start-up costs associated with the Healthcare Exchange have been expensed as incurred.

Prepaid License and Service Fees. Prepaid license and services fees are recorded at cost and amortized on a straight-line basis over the service period. Management considers whether indicators of impairment of these assets are present at each balance sheet date and an impairment loss is recorded, if necessary. In assessing the recoverability of the Company's prepaid license and service fees, the Company must make assumptions regarding estimated future cash flows and other factors to determine the fair value of the respective assets. If these estimates or their related assumptions change in the future, the Company may be required to record impairment charges for these assets not previously recorded.

Financial Condition

Cash and cash equivalents increased \$771,164 since June 30, 2002 attributable to cash proceeds from financing activities of \$5,324,405 received in October 2002 Private Placement and proceeds from notes payable, partially offset by cash used

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

in operations of \$4,483,193 during the nine months ended March 31, 2003. At March 31, 2003, substantially all of ATR's cash was invested in money market accounts.

Because the Company is emphasizing the development of the Healthcare Exchange, the results of operation for the nine months ended March 31, 2003 may not be indicative of results of operations for the year ended June 30, 2003.

Results of Operation

Healthcare Exchange

Healthcare Exchange Revenue. The Company began operations with a limited number of Providers in the quarter ending June 30, 2001. Providers submit bills to ATR, who reprices the bills to the rate set by the Providers, including adding a transaction-processing fee, and then routes them to Purchasers or their intermediaries. ATR receives payments from Purchasers on behalf of Providers,

11

and then remits payments to Providers. The Company recognizes revenue for the transaction-processing fee when earned and the Company has substantially completed all of its obligations under the contract. During the three and nine month periods ending March 31, 2003, \$829,011 and \$2,483,565 of revenue was recognized, respectively, as compared to \$430,308 and \$792,402 for the three and nine month periods ending March 31, 2002. The increase is primarily the result of an increase in the number of healthcare providers contracted with the Healthcare Exchange.

Healthcare Exchange Costs. Healthcare Exchange costs are the direct costs related to the processing of the bills submitted by Providers and payments received from Purchasers. These costs include the salary and other wage and benefit costs of the Healthcare Exchange operations staff and the operating cost of the application services provider and other technology providers. The costs for the three and nine month periods ending March 31, 2003 were \$597,562 and \$1,783,652, respectively, in comparison to \$401,529 and \$976,530 for the three and nine month periods ending March 31, 2002. As of March 31, 2003, there were 32 operations staff members responsible for the processing of bills submitted by Providers and payments received from Purchasers, compared to 18 operations staff members as of March 31, 2002.

Selling, Marketing and Product Development Costs

In October 1999, the Company began incurring costs to develop its Healthcare Exchange. Costs incurred are primarily the salary, other wage and benefit costs of ATR's employees and other operational costs associated with recruiting the network of healthcare providers. The costs for the three and nine month periods ending March 31, 2003 were \$822,523 and \$3,727,803, respectively, in comparison to \$1,852,186 and \$4,903,843 for the three and nine month periods ending March 31, 2002. The decrease is the result of reduction of sales staff to 19 at March 31, 2003 from 48 at March 31, 2002.

General and Administrative Expenses

General and administrative expenses were \$546,603 and \$2,001,035 for the three and nine month periods ended March 31, 2003, in comparison to \$673,076 and \$1,778,955 for the three and nine month periods ending March 31, 2002. The decrease for the three month period ended March 31, 2003 in comparison to the same period ended March 31, 2002 was the result of the compensation expense of approximately \$135,600 recorded during the three month period ended March 31, 2002 for the Company's Chairman and Chief Financial Officer's participation in

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

the January 2002 Private Placement of Common Stock. No such expense was recorded for the three month period ended March 31, 2003. The increase for nine month period ended March 31, 2003 in comparison to the same period ended March 31, 2002 was primarily the result of compensation expense of \$347,222 recorded during the quarter ended December 31, 2002 for additional shares issued to the Company's Chairman and Chief Financial Officer resulting from the price adjustment to the January 2002 Private Placement of Common Stock, in which Mr. Cameron was an investor. The adjustment was based on the closing price of the October 2002 Private Placement of Common Stock of \$1.00 per share.

12

Other Income (Expense)

Interest Income. Interest income is related to the short-term investment of cash balances, primarily in money market accounts. The change in the three month period is not significant, and the decrease for the nine month period is the result of reduced cash balances at March 31, 2003 as compared to the same period in fiscal 2002.

Interest Expense to Third Party. Interest expense to third party of \$319,604 and \$698,294, for the three and nine month periods ending March 31, 2003, resulted primarily from the fair value of warrants issued in connection with a convertible note and the beneficial conversion feature of the convertible note to third party, which were recognized through interest expense. No interest expense to third party was recognized during the same period in the prior fiscal year.

Interest Expense to Stockholders and Directors. Interest expense to stockholders and directors of \$149,233 and \$488,243 was recognized for the three and nine month periods ending March 31, 2003 in comparison to \$111,673 and \$364,200 for the three and nine month periods ending March 31, 2002. This increase resulted primarily from the extension of stockholder notes as of November 1, 2002, which included a 2% fee.

Income Taxes

As of June 30, 2002 the Company had net operating loss carryforwards for federal and state income tax purposes of approximately \$46,119,000 and \$26,245,000, respectively. The federal net operating loss carryforwards expire in 2004 through 2022 and the state net operating loss carryforwards expire in 2002 through 2022. The Company also has approximately \$98,000 and \$25,000 of research and development tax credit carryforwards for federal and state income tax purposes, respectively. The federal research and development tax credit carryforwards expire in 2005.

In connection with the Company's initial public offering in August 1992, a change of ownership (as defined in Section 382 of the Internal Revenue Code of 1986, as amended) occurred. As a result, the Company's net operating loss carryforwards generated through August 20, 1992 (approximately \$1,900,000) are subject to an annual limitation in the amount of approximately \$300,000.

In 1993, a controlling interest of the Company's stock was purchased, resulting in a second annual limitation in the amount of approximately \$398,000 on the Company's ability to utilize net operating loss carryforwards generated between August 11, 1992 and September 13, 1993 (approximately \$7,700,000).

In accordance with provisions of the Internal Revenue Code Section 382, additional portions of the net operating loss carryforwards may be disallowed as a result of additional changes in ownership of the Company.

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

The Company expects the aforementioned annual limitations will result in net operating loss carryovers, which will not be utilized prior to the expiration of the carryover period.

13

Liquidity and Capital Resources

For the nine month period ending March 31, 2003, the Company earned revenues of \$2,483,565 but incurred a net loss of \$6,204,560. Until the Company can generate sufficient revenue to finance its operations, the Company will have to seek other financing. Traditionally, the Company has used a combination of equity and debt financing and revenue generated to fund operations but has incurred operating losses since its inception, which has resulted in an accumulated deficit of \$65,567,439 at March 31, 2003. The Company had cash and cash equivalents of \$1,173,455 and negative working capital of 7,322,944 at March 31, 2003. Such negative working capital includes a \$1,000,000 convertible promissory note due July 25, 2003.

During October 2002 the Company sold 4,125,000 shares of its common stock at a purchase price of \$1.00 per share. The shares of common stock issued in the private placement are restricted securities. Net proceeds from the offering were \$3,872,056. In connection with the private placement, the Company engaged Stonegate Securities, Inc. as placement agent who received a placement fee of 6% on the gross proceeds received from the sale of common stock placed by them and a five year warrant to purchase 10% of the common stock placed by them at \$1.00 per share. The placement of the common stock was exempt from registration pursuant to Regulation D.

On July 26, 2002 Company received short-term unsecured financing in the form of a convertible note of \$1,000,000 from a lender. This note bears interest at 8% and is payable at the earliest of July 25, 2003 or when the Company, raises \$8,000,000 through debt or equity financing. All or a portion of the convertible note may be converted into shares of common stock at the lower of \$1.00 per share, the subscription per share price of the October 2002 Private Placement of Common Stock, or if further shares are offered at a price less than the per share price of \$1.00, then the conversion price will be equal to the per share price subsequently offered by the Company. In consideration for the loan the Company issued three warrants. The Company issued to the lender one warrant to purchase 100,000 shares of common stock. The lender received a second warrant to purchase 100,000 shares of common stock that became exercisable as the Company did not repay the convertible note within 180 days of the agreement. The lender received a third warrant to purchase 100,000 shares of common stock that may be exercisable if the Company does not repay the convertible note within one year of the agreement. Each of the warrants has an exercise price of \$1.00, the subscription per share price of the October 2002 Private Placement of Common Stock, or if further shares are offered at a lower price per share at that price. When, and if, exercisable the lender may exercise these warrants through July 26, 2009.

In connection with the issuance of the Note and the First and Second Warrants, the Company estimated the aggregate fair value of the First and Second Warrants to be \$254,000 using the Black-Scholes model. In accordance with EITF 98-5, "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios," and EITF 00-27, "Application of Issue No. 98-5 to Certain Convertible Instruments," the Company has recognized \$299,878 and \$643,719 through interest expense for the three and nine month periods respectively, ending March 31, 2003 for a portion of the fair value of

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

the First and Second Warrants and a portion of the beneficial conversion feature of the Note, which was estimated to be in total \$802,000. The Company will

14

record additional amounts totaling \$412,281 through interest expense until July 26, 2003 for the remaining fair value of the First and Second Warrants and the beneficial conversion feature of the Note recorded at the initial transaction date, and in accordance with EITF 00-27, the additional beneficial conversion feature recorded in the quarter ending December 31, 2002 of \$624,222 relating to the reset of the conversion price of the Note from \$2.25 to \$1.00 per share.

During the period between January 9, 2002 and March 28, 2002, the Company sold 1,232,585 shares of its common stock at a purchase price of \$2.25 per share. The shares of common stock issued in the private placement are restricted securities. Further pursuant to the private placement, it was agreed that in the event that within one year from the final closing the Company sells shares of common stock, or securities exercisable or convertible into common stock, at a price less than \$2.25 per share, the Company would issue additional shares to these investors in an amount such that the overall purchase price will be equal to the lower, subsequent sales price. The forgoing shall exclude common stock that may be issued in connection with a merger, as a dividend, pursuant to the exercise of outstanding options, warrants and other convertible securities and pursuant to options subsequently issued to employees. Net proceeds from the offering were \$2,742,519. The proceeds from the private placement were used to fund operations and repay debt. The Company's Chairman and Chief Financial Officer purchased 222,222 shares of the Company's common stock in the private placement. Because the purchase price of such stock was less than the public trading price on the date of purchase, the Company recorded compensation expense of \$138,583 during fiscal year 2002. Resulting from the closing of the October 2002 Private Placement of Common Stock, 1,540,729 additional shares were issued to these investors based on the October 2002 Private Placement price of \$1.00 per share. Compensation expense recorded during the quarter ended December 31, 2002, for the additional shares issued to the Company's Chairman and Chief Financial Officer was \$347,222.

As of June 30, 2002, the Company had received short-term, unsecured financing to fund its operations in the form of notes payable of \$4,636,352, from Mr. Cameron and another stockholder. These notes bear interest at 10.25%. During the three month period ending September 30, 2002, Mr. Cameron loaned the Company an additional \$619,000 bearing interest at 10.25% payable on December 31, 2002. On November 1, 2002, the Company agreed with Mr. Cameron to extend the due date on notes payable to him until December 31, 2003 in exchange for an extension fee of 2%. These extended notes total \$2,873,694, including accrued interest and extension fees, and bear interest at 10.25% per annum. Also on November 1, 2002, the Company agreed with the other note holder to extend the due date of his convertible promissory notes until December 31, 2003. These convertible promissory notes total \$2,445,288, including accrued interest, bear interest at 10.25% per annum and are convertible into common stock at \$3.00 per share at the note holder's option.

The Company signed agreements effective in January 2001 with an application services provider to license, support and run software to process medical bills submitted to the Company's Healthcare Exchange. The agreements are for 66 months. The application service provider required payment of an initial base license fee of \$250,000, which is being amortized over 66 months, and start-up costs, including data center set up, training and implementation fees of approximately \$145,000, which were expensed. The agreements require monthly minimum payments, currently of approximately \$35,000, and additional fees, that

15

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

are transaction based, if volumes exceed levels included in the monthly minimums.

The Company's Healthcare Exchange development efforts will require substantial funds prior to generating sufficient revenues to fund operations and repay debt. Based on the steps the Company has taken to refocus its operations and obtain additional financing, the Company believes that it has developed a viable plan to address the Company's ability to continue as a going concern, and that this plan will enable the Company to continue as a going concern through at least the end of fiscal 2003. Although during the nine months ended March 31, 2003, the Company earned gross profit, it continues to recognize net loss, (and expects to recognize net loss in the near future until the Company's business plan is successfully implemented.) No assurance can be given that the Company's business plan will be successfully implemented. Further, if the Company continues to recognize losses, it will be required to raise additional capital for its operations. If the Company is unsuccessful in implementing its business plan or, if required, raising additional capital, the Company may be required to reduce the development efforts of its Healthcare Exchange or be forced into seeking protection under federal bankruptcy laws. As a result, the report of independent auditors on the Company's June 30, 2002 financial statements includes an explanatory paragraph indicating there is substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

The following table represents the debt requirements pertaining to contractual obligations of the Company over the next five years:

Contractual Obligations	Payments Due by Period		
	Total	Less than 1 year	1-3 years
Notes payable to stockholder	\$ 2,873,694	\$ 2,873,694	\$ -
Convertible notes payable to stockholder	2,445,288	2,445,288	-
Convertible note payable to third party	1,000,000	1,000,000	-
Operating leases - facilities - payable to stockholder	360	120	240
Operating leases - equipment	130,279	49,178	73,103
Application services provider	1,989,141	619,992	1,369,149
Total contractual cash obligations	\$ 8,438,762	\$ 6,988,272	\$ 1,442,492

During the quarter ending December 31, 2002, the facilities lease agreement

Edgar Filing: ALTERNATIVE TECHNOLOGY RESOURCES INC - Form 10-Q

between the Company and the Company's Chairman and Chief Financial Officer was modified to reflect an annual base rent of \$120 until further notice from lessor, in his sole and absolute discretion, to return the rent to its previous level. To recognize the estimated market rate for this transaction a monthly expense of \$11,424 is recognized through rent expense and other capital contributions.

16

PART I FINANCIAL INFORMATION

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company has notes payable in the aggregate amount of \$6,318,982 as of March 31, 2003 payable to two stockholders of the Company and another lender. The notes bear interest at 8% to 10.25% per annum and are due from July 25, 2003 to December 31, 2003, or earlier if other funding is obtained. The Company does not believe that any change in interest rates will have a material impact on the Company during fiscal 2003. Further, the Company has no foreign operations and therefore is not subject to foreign currency fluctuations.

Item 4. Controls and Procedures

Within the 90 days prior to the date of this Form 10-Q, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's President and Chief Executive Officer along with the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Company's President and Chief Executive Officer along with the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company required to be included in this Form 10-Q.

There have been no significant changes in the Company's internal controls or in other factors, which could significantly affect internal controls subsequent to the date the Company carried out its evaluation.

17

PART II. OTHER INFORMATION

Item 1 Legal Proceedings

None

Item 2 Changes in Securities and Use of Proceeds

On January 25, 2003, in consideration of the contributions to the Company the Board of Directors in a Unanimous Written Consent approved the issuance of a non-qualified option grant to Mr. Jeffrey S. McCormick, Chief Executive Officer, to purchase up to 4,000,000 shares of common stock at the exercise price of \$1.25 per share. The effective date of the Option Grant is November 7, 2002. The option grant is to vest over a four year period, commencing with the vesting of the first 1,000,000 shares of the common stock on January 31, 2003. Thereafter, the option to purchase additional 1,000,000 shares of the option stock shall vest on January 31 of each year through 2006.

Item 3 Defaults Upon Senior Securities
None

Item 4 Submission of Matters to a Vote of Security Holders
None

Item 5 Other Information

Pre-approval of Non-audit Services. In accordance with Section 10A(i)(2) of the Securities Exchange Act of 1934, as added by Section 202 of the Sarbanes-Oxley Act of 2002, the Company is responsible for disclosing non-audit services to be performed by the Company's external auditors, Ernst & Young LLP, that have been pre-approved by the audit committee. Non-audit services are defined by law as services other than those provided in connection with an audit of the financial statements of the Company. During the quarterly period covered by this filing, the audit committee approved the following non-audit services: assistance with the filing of the Company's registration statement on Form S-8. The nature of the above services is considered by the Company to be audit-related services that are closely related to the financial statement audit process.

Item 6 Exhibits and Reports on Form 8-K

- (a) Exhibit 99.1 Certification Pursuant to Section 906 of the Sarbanes-Oxley Act.
- (b) Reports on Form 8-K None
