PART I.

ITEM 1. BUSINESS

Unless otherwise specified, references to "United Natural Foods," "we," "us," "our" or "the Company" in this Annual Report on Form 10-K ("Annual Report" or "Report") mean United Natural Foods, Inc. and all entities included in our consolidated financial statements. See the consolidated financial statements and notes thereto included in "Item 8. Financial Statements and Supplementary Data" of this Report for information regarding our financial performance.

Overview

We believe we are a leading distributor based on sales of natural, organic and specialty foods and non-food products in the United States and Canada, and that our twenty-seven distribution centers, representing approximately 6.5 million square feet of warehouse space, provide us with the largest capacity of any North American-based distributor in the natural, organic and specialty products industry. We offer more than 65,000 high-quality natural, organic and specialty foods and non-food products, consisting of national, regional and private label brands grouped into six product categories: grocery and general merchandise, produce, perishables and frozen foods, nutritional supplements and sports nutrition, bulk and foodservice products and personal care items. We serve more than 31,000 customer locations primarily located across the United States and Canada which can be classified as follows:

- independently owned natural products retailers, which include buying clubs;
- supernatural chains, which consist solely of Whole Foods Market, Inc. ("Whole Foods Market");
- conventional supermarkets and mass market chains; and
- other, which includes foodservice and international customers outside of Canada.

We were the first organic food distribution network in the United States designated as a "Certified Organic Distributor" by Quality Assurance International, Inc. ("QAI"), an organic certifying agency accredited by the United States Department of Agriculture ("USDA"). This process involved a comprehensive review by QAI of our operating and purchasing systems and procedures. This certification covers all of our broadline distribution centers in the United States, except our primarily specialty products distribution center in Leicester, Massachusetts. Four of our Canadian distribution centers are certified organic by either QAI or Ecocert Canada, while the remaining Canadian distribution center sells only Kosher foods and is therefore not certified organic.

Since the formation of our predecessor in 1976, we have grown our business both organically and through acquisitions which have expanded our distribution network, product selection and customer base. Since fiscal 2003, our net sales have increased at a compounded annual growth rate ("CAGR") of 16.0%. In recent years, our sales to existing and new customers have increased through the continued growth of the natural and organic products industry in general; our efforts to increase the number of conventional supermarket customers to whom we distribute products; increased market share through our high-quality service and broader product selection, including specialty products, and the acquisition of, or merger with, natural organic, and specialty product distributors; the expansion of our existing distribution centers; the construction of new distribution centers; the introduction of new products and the development of our own line of natural and organic branded products. Through these efforts, we believe that we have broadened our geographic penetration, expanded our customer base, enhanced and diversified our product selection and increased our market share.

We have been the primary distributor to Whole Foods Market for more than fifteen years. Effective June 2010, we amended our distribution agreement with Whole Foods Market to extend the term of the agreement to September 25, 2020. Under the terms of the amended agreement, we will continue to serve as the primary wholesale natural grocery distributor to Whole Foods Market in its United States regions where we were serving as the primary distributor at the time of the amendment. In July 2010, we announced that we had entered into an asset purchase agreement under which we agreed to acquire certain assets of Whole Foods Market Distribution, Inc. ("Whole Foods Distribution"), a wholly owned subsidiary of Whole Foods Market, previously used for their self-distribution of non-perishables in their Rocky Mountain and Southwest regions, and to become the primary distributor in these regions. We closed this transaction in September 2010 in the case of the Southwest region and October 2010 in the case of the Rocky Mountain region. We amended our distribution agreement with Whole Foods Market effective October 11, 2010 to include these regions, and now serve as the primary distributor to Whole Foods Market in all of its regions in the United States.

In June 2010, we acquired certain Canadian food distribution assets of the SunOpta Distribution Group business ("SDG") of SunOpta Inc. ("SunOpta") (the "SDG assets"), through our wholly-owned subsidiary, UNFI Canada, Inc. ("UNFI Canada"), for cash consideration of \$65.8 million. With the acquisition, we became the largest distributor of natural, organic and specialty foods, including kosher foods, in Canada. This was a strategic acquisition as UNFI Canada provided us with an immediate

Table of Contents

platform for growth in the Canadian market. We have utilized this platform to further expand in the Canadian market, including through our acquisition of substantially all of the assets of a specialty food distribution business in the Ontario market in November 2011 and our acquisition of substantially all of the assets of a dairy and cheese distribution business in the Ontario market in August 2012.

Our ability to distribute specialty food items (including ethnic, kosher and gourmet products) has accelerated our expansion into a number of high-growth business markets and allowed us to establish immediate market share in the fast-growing specialty foods market. We have now integrated specialty food products and natural and organic specialty non-food items into all of our broadline distribution centers across the United States and Canada. Due to our expansion into specialty foods, over the past several fiscal years we have been awarded new business with a number of conventional supermarkets that previously had not done business with us because we did not distribute specialty products. We believe that the distribution of these products enhances our conventional supermarket business channel and that our complementary product lines continue to present opportunities for cross-selling.

In June 2011, we entered into an asset purchase agreement with L&R Distributors, Inc. ("L&R Distributors") pursuant to which we agreed to sell our conventional non-foods and general merchandise lines of business, including certain inventory related to these product lines. This divestiture was completed in the first quarter of fiscal 2012 and has allowed us to concentrate on our core business of the distribution of natural, organic, and specialty foods and non-food products. As a result of this divestiture, we recognized a non-cash impairment charge of \$5.8 million related to land, building and equipment at our Harrison, Arkansas facility during the fourth quarter of fiscal 2011. During fiscal 2012, we recognized severance and other expenses related to this divestiture of approximately \$5.1 million. In the fourth quarter of fiscal 2012, we sold the Harrison, Arkansas facility to a third party. See "Our Operating Structure—Wholesale Division" for further information regarding our distribution business.

We are a Delaware corporation based in Providence, Rhode Island, and we conduct business through our various wholly owned subsidiaries. We operated twenty-seven distribution centers at 2013 fiscal year end, and we believe that our approximately 6.5 million square feet of distribution space provide us with the largest capacity of any distributor of natural, organic and specialty products in the United States or Canada.

We operate thirteen natural products retail stores within the United States, located primarily in Florida (with two locations in Maryland and one in Massachusetts), through our subsidiary doing business as Earth Origins Market ("Earth Origins"). We also operate one natural products retail store in Vancouver, British Columbia, doing business as Drive Organics. We believe that our retail business serves as a natural complement to our distribution business because it enables us to develop new marketing programs and improve customer service. In addition, our subsidiary doing business as Woodstock Farms Manufacturing specializes in the international importation, roasting, packaging and distribution of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items and confections.

Our Industry

The natural products industry encompasses a wide range of products including organic and non-organic foods, nutritional, herbal and sports supplements, toiletries and personal care items, naturally-based cosmetics, natural/homeopathic medicines, pet products and cleaning agents. According to The Natural Foods Merchandiser, a leading natural products industry trade publication, sales for all types of natural products were \$99.1 billion in calendar 2012, a growth of \$8.3 billion or approximately 9.1% from calendar 2011. According to the National Association for the Specialty Food Trade, a leading specialty food industry trade publication, sales in calendar 2012 were \$85.9 billion, representing growth of 14.4% from calendar 2011. We believe the growth of the natural products industry is a result of the increasing demand by consumers for a healthy lifestyle, food safety and environmental sustainability.

Our Operating Structure

Our operations are comprised of three principal operating divisions. These operating divisions are: our wholesale division, which includes our broadline natural, organic and specialty distribution business in the United States, UNFI Canada, which is our natural, organic and specialty distribution business in Canada, Albert's Organics, Inc. ("Albert's"), which is a leading distributor within the United States of organically grown produce and non-produce perishable items, and Select Nutrition, which distributes vitamins, minerals and supplements;

our retail division, consisting of Earth Origins, which operates our thirteen natural products retail stores within the United States; and

Table of Contents

our manufacturing division, consisting of Woodstock Farms Manufacturing, which specializes in the international importation, roasting, packaging and distribution of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items and confections, and our Blue Marble Brands product lines.

Wholesale Division

Our broadline distribution business is organized into three regions—our Eastern Region, Western Region and our Canadian Region. We distribute natural, organic and specialty products in all of our product categories to customers in the Eastern and Midwestern portions of the United States through our Eastern Region and to customers in the Western and Central portions of the United States through our Western Region. Our Canadian Region distributes natural, organic and specialty products in all of our product categories to all of our customers in Canada. As of our 2013 fiscal year end, our Eastern Region operated nine distribution centers, which provided approximately 3.0 million square feet of warehouse space, our Western Region operated eight distribution centers, which provided approximately 2.8 million square feet of warehouse space and our Canadian Region operated five distribution centers, which provided approximately 0.3 million square feet of warehouse space.

Through Albert's, we distribute organically grown produce and non-produce perishables, such as organic milk, dressings, eggs, juices, poultry and various other refrigerated specialty items. Albert's operates out of four distribution centers strategically located throughout the United States, providing approximately 0.3 square feet of warehouse space, and is designated as a "Certified Organic Distributor" by QAI.

Through Select Nutrition, we distribute more than 15,000 health and beauty aids, vitamins, minerals and supplements from distribution centers in Pennsylvania and California.

Certain of our distribution centers are shared by multiple operations within our wholesale division.

Retail Division

We operate thirteen natural products retail stores through Earth Origins within the United States, ten of which are located in Florida, two in Maryland and one in Massachusetts. We also operate a natural products retail store in Vancouver, British Columbia that is reflected within our wholesale division. We believe that our retail business serves as a natural complement to our distribution business because it enables us to see market trends, develop new marketing programs and receive direct customer feedback.

We believe our natural products retail stores have a number of advantages over their competitors, including our financial strength and marketing expertise, the purchasing power resulting from group purchasing by stores within Earth Origins and the breadth of our product selection.

We believe that we benefit from certain advantages in acting as a distributor to our natural products retail stores, including our ability to:

- control the purchases made by these stores;
- expand the number of high-growth, high-margin product categories, such as produce and prepared foods, within these stores; and
- stay abreast of the trends in the retail marketplace, which enables us to better anticipate and serve the needs of our wholesale customers.

Additionally, as the primary natural products distributor to our retail locations, we realize significant economies of scale and operating and buying efficiencies. As an operator of natural products retail stores, we also have the ability to test market select products prior to offering them nationally. We can then evaluate consumer reaction to the product without incurring significant inventory risk. We also are able to test new marketing and promotional programs within our stores prior to offering them to our wholesale customer base.

Manufacturing & Branded Products Division

Our subsidiary, Woodstock Farms Manufacturing, specializes in the international importation, roasting, packaging and distribution of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items and confections. We sell these items in bulk and through private label packaging arrangements with large health food, supermarket and convenience store chains and independent owners. We operate an organic (USDA and QAI) and kosher (Circle K) certified packaging, roasting, and processing facility in New Jersey.

Our Blue Marble Brands portfolio is a collection of 15 organic, natural and specialty food brands representing more than 650 unique products. We have a dedicated team of marketing, supply chain and sales professionals that have a

passion to energize our retail partners and provide consumers with affordable Non-GMO foods. Our unique Blue Marble Brands products

Table of Contents

are sold through our wholesale division, third-party distributors and directly to retailers. Our Field Day® brand is primarily sold to customers in our independent natural products retailer channel ("independent retailers"), and is meant to serve as a private label brand for independent retailers to allow them to compete with conventional supermarkets and supernatural chains which often have their own private label store brands.

Our Competitive Strengths

We believe we distinguish ourselves from our competitors through the following strengths:

We are the market leader with a nationwide presence in the United States and Canada.

We believe that we are the largest distributor of natural, organic and specialty foods and non-food products by sales in the United States and Canada, and one of the few distributors capable of meeting the natural, organic and specialty product needs of regional and local independent retailer customers, conventional supermarket chains, and the rapidly growing supernatural chain. The opening of our facility in Lancaster, Texas in September 2010 marked the extension of our distribution presence to a nation-wide level. The opening of a new larger Albert's facility in New Jersey in May 2013 has provided additional space to serve the growing New York City metropolitan market. The consolidation into a new, larger, facility in Aurora, Colorado in May 2013 will allow us to serve this growing market with greater operational efficiencies. We believe that our network of twenty-seven distribution centers (including five in Canada) creates significant advantages over smaller national and regional distributors. Our nationwide presence across the United States and Canada allows us to offer marketing and customer service programs across regions, offer a broader product selection and provide operational excellence with high service levels and same day or next day on-time deliveries.

We are an efficient distributor.

We believe that our scale affords us significant benefits within a highly fragmented industry including volume purchasing opportunities and warehouse and distribution efficiencies. Our continued growth has allowed us to expand our existing facilities and open new facilities as we seek to achieve maximum operating efficiencies, including reduced fuel and other transportation costs, and has created sufficient capacity for future growth. Recent efficiency improvements include the centralization of general and administrative functions, the consolidation of systems applications among physical locations and regions and the optimization of customer distribution routes, all of which reduced expenses. We have made significant investments in our people, facilities, equipment and technology to broaden our footprint and enhance the efficiency of our operations. Key examples in the last several years include the following:

In connection with the acquisition of the SDG assets in June 2010, we acquired five distribution centers which provided a nationwide presence in Canada with approximately 286,000 square feet of distribution space and the ability to serve all major markets in Canada.

In September 2010 we commenced operations at a new facility in Lancaster, Texas serving customers throughout the Southwestern United States, including Texas, Oklahoma, New Mexico, Arkansas and Louisiana.

In October 2010 we began operating the former Whole Foods Distribution center in Aurora, Colorado.

During July 2011 we completed the integration of specialty food products into our nationwide platform.

In May 2013 our Albert's division commenced operations at a new facility in Logan Township, New Jersey with 55,000 square feet of distribution space to more efficiently serve our growing customer base on the East Coast, including the New York City metropolitan market.

In June 2013 we commenced operations at a new 540,000 square foot distribution center in Aurora, Colorado and consolidated all existing Aurora operations including an Albert's location and off-site storage into one building.

In May 2013 we began construction of a distribution center in Sturtevant, Wisconsin, from which we expect to begin operations in the spring of 2014.

- In July 2013 we purchased land in Montgomery, New York to build a new distribution center from which we expect to commence operations in fiscal 2015 and which will service the growing New York City metropolitan market and allow us to transfer certain routes from our York, Pennsylvania, Chesterfield, New Hampshire and Dayville, Connecticut distribution centers.

We have extensive and long-standing customer relationships and provide superior service.

Throughout the 37 years of our, and our predecessors' operations, we have developed long-standing customer relationships, which we believe are among the strongest in our industry. In particular, we have been the primary supplier of natural and organic products to the largest supernatural chain in the United States, Whole Foods Market, for more than 15 years. We believe a key driver of our strong customer loyalty is our superior service levels, which include accurate fulfillment of orders, timely product delivery, competitive prices and a high level of product marketing support. Our average

Table of Contents

broadline distribution in-stock service level for fiscal 2013, measured as the percentage of items ordered by customers that are delivered by the requested delivery date (excluding manufacturer out-of-stocks and discontinued items), was approximately 97%. We believe that our high distribution service levels are attributable to our experienced inventory planning and replenishment department and sophisticated warehousing, inventory control and distribution systems. Furthermore, we offer next-day delivery service to a majority of our active customers and offer multiple deliveries each week to our largest customers, which we believe differentiates us from many of our competitors.

We have an experienced, motivated management team.

Our management team has extensive experience in the retail and distribution business, including the natural, organic and specialty product industries. On average, each of our eleven executive officers has over twenty years of experience in the retail, natural products or food distribution industry. Furthermore, a significant portion of our management-level employees' compensation is equity based or performance based, and, therefore, there is a substantial incentive to continue to generate strong growth in operating results in the future.

Our Growth Strategy

We seek to maintain and enhance our position within the natural and organic industry in the United States and Canada and to increase our market share in the specialty products industry. Since our formation, we have grown our business organically and through the acquisition of a number of distributors and suppliers, which has expanded our distribution network, product selection and customer base. For example, we acquired our Albert's, UNFI Canada, Earth Origins, Woodstock Farms Manufacturing, and specialty businesses.

Beginning in fiscal 2009, our strategic plan has focused on increasing market share, particularly in our conventional supermarket channel. This channel typically generates lower gross margins than our independent retailer channel, but also typically has lower operating expenses. Our strategic plan also includes the roll-out of new technology including a national warehouse management and procurement system upgrade. These steps and others are intended to promote operational efficiencies and further reduce our operating expenses to offset the lower gross margins we expect with increased sales to the conventional supermarket and supernatural channels.

To implement our growth strategy, we intend to continue increasing our market share of the growing natural and organic products industry by expanding our customer base, increasing our share of existing customers' business and continuing to expand and further penetrate new distribution territories. We plan to expand our presence within the specialty industry by offering new and existing customers a single wholesale distributor capable of meeting their specialty and natural and organic product needs on a national or regional basis. Key elements of our strategy include:

Expanding Our Customer Base

As of August 3, 2013, we served more than 31,000 customer locations primarily in the United States and Canada. We plan to expand our coverage of the natural and organic and specialty products industry by cultivating new customer relationships within the industry and by further developing our existing channels of distribution, such as independent natural products retailers, conventional supermarkets, mass market outlets, institutional foodservice providers, buying clubs, restaurants and gourmet stores. With the coordinated distribution of our specialty products with our natural and organic products, we believe that we have the opportunity to continue gaining market share in the conventional supermarket channel as the result of our ability to offer an integrated and efficient distribution solution for our customers. We have gained new business from a number of conventional supermarket customers, including Giant-Landover, Giant Eagle, Shop-Rite, Kings and Safeway, partially as a result of our complementary product selection.

Increasing Our Market Share of Existing Customers' Business

We believe that we are the primary distributor of natural and organic products to the majority of our natural products customer base, including to Whole Foods Market, our largest customer. We intend to maintain our position as the primary supplier for a majority of our customers, and to add to the number of customers for which we serve as primary supplier by offering the broadest product selection in our industry at competitive prices. With the expansion of specialty product offerings, we believe that we have the ability to further meet our existing customers' needs for specialty foods and non-food products, representing an opportunity to continue to achieve our sales growth within the conventional supermarket, supernatural and independent channels.

Continuing to Improve the Efficiency of Our Nationwide Distribution Network

We have invested more than \$226 million in our distribution network and infrastructure over the past five fiscal years. We achieved a nationwide footprint in September 2010 with the opening of our facility in Lancaster, Texas. Our Lancaster facility

Table of Contents

was the first facility to use our national supply chain platform and warehouse management system, and our Ridgefield, Washington facility began using this system in July 2012. We plan to implement this system throughout our network by the end of fiscal 2017 which we believe will further enhance the efficiency of our network. Although our distribution network services all markets in the United States and Canada, we intend to continue to selectively evaluate opportunities to build or lease new facilities or to acquire distributors to better serve existing markets. We recently opened our new Aurora, Colorado distribution center, and have begun work on new distribution centers in Racine, Wisconsin in the village of Sturtevant and Hudson Valley, New York, in the town of Montgomery, with plans for a new distribution center in Northern California underway.

Further, we will strive to continue to maintain our focus on realizing efficiencies and economies of scale in purchasing, warehousing, transportation and general and administrative functions, which, combined with transportation expense savings and incremental fixed cost leverage, should lead to continued improvements in our operating margin.

Expanding into Other Distribution Channels and Geographic Markets

We believe that we will be successful in continuing to expand into the foodservice channel as well as further enhancing our presence outside of the United States and Canada. We will continue to seek to develop regional relationships and alliances with companies such as Aramark Corporation, the Compass Group North America, and Sodexo Inc. in the foodservice channel and seek other alliances outside the United States and Canada.

Continuing to Selectively Pursue Opportunistic Acquisitions

Throughout our history, we have successfully identified, consummated and integrated multiple acquisitions. Since fiscal 2000, we have successfully completed thirteen acquisitions of distributors, manufacturers and suppliers, two acquisitions of natural products retail stores and eleven acquisitions of branded product lines as of August 3, 2013. Subsequent to the end of the 2013 fiscal year, we completed one additional acquisition of a regional specialty distributor, which will be integrated with our existing operations. We intend to continue to selectively pursue opportunistic acquisitions to expand the breadth of our distribution network, increase our efficiency, procure beneficial customer relationships or add additional products and capabilities.

Continuing to Provide the Leading Distribution Solution

We believe that we provide a leading distribution solution to the natural, organic and specialty products industry through our national presence, regional preferences, focus on customer service and breadth of product offerings. Our service levels, which we believe to be the highest in our industry, are attributable to our experienced inventory planning and replenishment department and our sophisticated warehousing, inventory control and distribution systems. See "—Our Focus on Technology" below for more information regarding our use of technology in our warehousing, inventory control and distribution systems.

We also offer our customers a selection of inventory management, merchandising, marketing, promotional and event management services designed to increase sales and enhance customer satisfaction. These marketing services, which primarily are utilized by customers in our independently owned natural products retailers channel and many of which are co-sponsored with suppliers, include monthly and thematic circular programs, in-store signage and assistance in product display.

Our Customers

We maintain long-standing customer relationships with independently-owned natural products retailers, supernatural chains and supermarket chains. In addition, we emphasize our relationships with new customers, such as conventional supermarkets, mass market outlets and gourmet stores, which are continually increasing their natural product offerings. The following were included among our wholesale customers for fiscal 2013:

• Whole Foods Market, the largest supernatural chain in the United States and Canada; and
 conventional supermarket chains, including Safeway, Kroger, Wegmans, Stop & Shop, Giant-Landover, Giant Eagle, Hannaford, Food Lion, Bashas', Shop-Rite, Lowe's, Kings, Publix and Fred Meyer.

Whole Foods Market is our only customer that represented more than 10% of total net sales in fiscal 2013, and accounted for approximately 36% of our net sales. In 2010 we amended our distribution agreement with Whole Foods Market to extend the term of the agreement to September 25, 2020. Under the terms of the amended agreement, we now serve as the primary wholesale natural grocery distributor to Whole Foods Market in all of its regions in the

United States.

The following table lists the percentage of sales by customer type for the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011:

6

Table of Contents

Customer Type	Percentage of Net Sales			
	2013	2012	2011	
Independently owned natural products retailers	34	% 35	% 37	%
Supernatural chains	36	% 36	% 36	%
Conventional supermarkets and mass market chains	25	% 24	% 22	%
Other	5	% 5	% 5	%

We distribute natural, organic and specialty foods and non-food products to customers located in the United States and Canada, as well as to customers located in other foreign countries. Our total international sales, including those by UNFI Canada, represented approximately five percent of our business in both fiscal 2013 and 2012. We believe that our sales outside the United States, as a percentage of our total sales, will expand as we seek to continue to grow our Canadian operations.

Our Marketing Services

We offer a variety of marketing services designed to increase sales for our customers and suppliers, including consumer and trade marketing programs, as well as programs to support suppliers in understanding our markets. Trade and consumer marketing programs are supplier-sponsored programs which cater to a broad range of retail formats. These programs are designed to educate consumers, profile suppliers and increase sales for retailers, many of which do not have the resources necessary to conduct such marketing programs independently.

Our consumer marketing programs include:

multiple monthly, region-specific, consumer circular programs, which feature the logo and address of the participating retailer imprinted on a circular that advertises products sold by the retailer to its customers. The monthly circular programs are structured to pass through the benefit of our negotiated discounts and advertising allowances to the retailer, and also provide retailers with posters and shelf tags to coincide with each month's promotions. We also offer a web-based tool which retailers can use to produce highly customized circulars and other marketing materials for their stores.

quarterly coupon programs featuring supplier sponsored coupons, for display and distribution by participating retailers.

themed "Celebration" sales and educational brochures to drive sales and educate consumers. Brochures are imprinted with participating retailers' store logo and information.

- a truck advertising program that allows our suppliers to purchase ad space on the sides of our hundreds of trailers traveling throughout the United States and Canada, increasing brand exposure to consumers.

Our trade marketing programs include:

wholesale tri-annual catalogs, which serve as a primary reference guide and ordering tool for retailers.

- a website for retailers with category management tools, retail staff development resources and other resources designed to help our customers succeed.

a variety of programs designed to feature suppliers and generate volume sales.

monthly specials catalogs that highlight promotions and new product introductions.

specialized catalogs for holiday promotions and to serve other customer needs.

Our supplier marketing programs include:

ClearVue, an information sharing program designed to improve the transparency of information and drive efficiency within the supply chain. With the availability of in-depth data and tailored reporting tools, participants are able to reduce inventory balances with the elimination of forward buys, while improving service levels.

SIS, an information-sharing program that helps our suppliers better understand our customers' businesses, in order to generate mutually beneficial incremental sales in an efficient manner.

Growth Incentive programs, supplier-focused high-level sales and marketing support for selected brands, which foster our partnership by building incremental, mutually profitable sales for suppliers and us.

We keep current with the latest trends in the industry. Periodically, we conduct focus group sessions with certain key retailers and suppliers to ascertain their needs and allow us to better service them. We also:

- produce a quarterly report of trends in the natural and organic industry;
- provide product data information such as best seller lists, store usage reports and easy-to-use product catalogs;

provide assistance with store layout designs; new store design and equipment procurement;

7

Table of Contents

- provide planogramming, shelf and category management support;
- offer in-store signage and promotional materials, including shopping bags and end-cap displays;
- provide assistance with planning and setting up product displays;
- provide shelf tags for products; and
- provide a website on which retailers can access various individual retailer-specific reports and product information.

Our Products

Our extensive selection of high-quality natural, organic and specialty foods and non-food products enables us to provide a primary source of supply to a diverse base of customers whose product needs vary significantly. We offer more than 65,000 high-quality natural, organic and specialty foods and non-food products, consisting of national brand, regional brand, private label and master distribution products, in six product categories: grocery and general merchandise, produce, perishables and frozen foods, nutritional supplements and sports nutrition, bulk and food service products and personal care items. Our branded product lines address certain needs of our customers, including providing a lower-cost label known as Earth Day.

We continuously evaluate potential new products based on both existing and anticipated trends in consumer preferences and buying patterns. Our Retail Category Management and Supplier Relationship Management teams regularly attend regional and national natural, organic, specialty, ethnic and gourmet product shows to review the latest products that are likely to be of interest to retailers and consumers. We also utilize syndicated data as a compass to ensure that we are carrying the right mix of product in each of our distribution centers. We make the majority of our new product decisions at the regional level and look to carry those items through national distribution as we begin to spot an emerging trend or brand. We believe that our category review practices at the local distribution center level allow our supplier relationship managers to react quickly to changing consumer preferences and to evaluate new products and new product categories regionally. Additionally, as many of the new products that we offer are marketed on a regional basis or in our own natural products retail stores prior to being offered nationally, this enables us to evaluate consumer reaction to the products without incurring significant inventory risk. Furthermore, by exchanging regional product sales information between our regions, we are able to make more informed and timely new product decisions in each region.

We maintain a comprehensive quality assurance program. All of the products we sell that are represented as "organic" are required to be certified as such by an independent third-party agency. We maintain current certification affidavits on all organic commodities and produce in order to verify the authenticity of the product. All potential suppliers of organic products are required to provide such third-party certifications to us before they are approved as suppliers.

Our Suppliers

We purchase our products from more than 6,000 suppliers. The majority of our suppliers are based in the United States and Canada, but we also source products from suppliers throughout Europe, Asia, Central America, South America, Africa and Australia. We believe suppliers of natural and organic products seek to distribute their products through us because we provide access to a large and growing customer base across the United States and Canada, distribute the majority of the suppliers' products and offer a wide variety of marketing programs to our customers to help sell the suppliers' products. Substantially all product categories that we distribute are available from a number of suppliers and, therefore, we are not dependent on any single source of supply for any product category. In addition, although we have exclusive distribution arrangements and vendor support programs with several suppliers, none of our suppliers account for more than 10% of our total purchases in fiscal 2013. Our largest supplier, Hain Celestial Group, Inc. ("Hain"), accounted for approximately 5% of our total purchases in fiscal 2013. However, the product categories we purchase from Hain can be purchased from a number of other suppliers.

We have positioned ourselves as one of the largest purchasers of organically grown bulk products in the natural and organic products industry by centralizing our purchase of nuts, seeds, grains, flours and dried foods. As a result, we are able to negotiate purchases from suppliers on the basis of volume and other considerations that may include discounted pricing or prompt payment discounts. Furthermore, some of our purchase arrangements include the right of return to the supplier with respect to products that we do not sell in a certain period of time. As described under "Our Products" above, each region is responsible for placing its own orders and can select the products that it believes will most appeal to its customers, although each region is able to participate in our company-wide purchasing programs.

Our outstanding commitments for the purchase of inventory were approximately \$26.5 million as of August 3, 2013.
Our Distribution System

We have carefully chosen the sites for our distribution centers to provide direct access to our regional markets. This proximity allows us to reduce our transportation costs relative to those of our competitors that seek to service these customers from locations that are often several hundred miles away. The opening of our Lancaster, Texas distribution center significantly reduced the miles driven associated with servicing the customers of that facility as many of those customers were previously

Table of Contents

served from our Aurora, Colorado facility. We believe that we incur lower inbound freight expense than our regional competitors, because our scale allows us to buy full and partial truckloads of products. Products are delivered to our distribution centers primarily by our fleet of leased trucks, contract carriers and the suppliers themselves. When financially advantageous, we backhaul between vendors or satellite, staging facilities and our distribution centers using our own trucks. Additionally, we generally can redistribute overstocks and inventory imbalances between distribution centers if needed, which helps to reduce out of stocks and to sell perishable products prior to their expiration date.

We lease our trucks from national leasing companies such as Ryder Truck Leasing and Penske Truck Leasing, which in some cases maintain facilities on our premises for the maintenance and service of these vehicles. Other trucks are leased from regional firms that offer competitive services.

We ship certain orders for supplements or for items that are destined for areas outside of regular delivery routes through United Parcel Service and other independent carriers. Deliveries to areas outside the continental United States and Canada are typically shipped by ocean-going containers on a weekly basis.

Our Focus on Technology

We have made significant investments in distribution, financial, information and warehouse management systems. We continually evaluate and upgrade our management information systems at our regional operations based on the best practices in the distribution industry to make the systems more efficient, cost-effective and responsive to customer needs. These systems include functionality in radio frequency inventory control, pick-to-voice systems, pick-to-light systems, computer-assisted order processing and slot locator/retrieval assignment systems. At our receiving docks, warehouse associates attach computer-generated, preprinted locator tags to inbound products. These tags contain the expiration date, locations, quantity, lot number and other information about the products in bar code format. Customer returns are processed by scanning the UPC bar codes. We also employ a management information system that enables us to lower our inbound transportation costs by making optimum use of our own fleet of trucks or by consolidating deliveries into full truckloads. Orders from multiple suppliers and multiple distribution centers are consolidated into single truckloads for efficient use of available vehicle capacity and return-haul trips. In addition, we utilize route efficiency software that assists us in developing the most efficient routes for our outbound trucks. We will continue the roll-out of our new national supply chain platform and warehouse management system, which was first launched in our new Lancaster, Texas facility in September 2010 and in our Ridgefield, Washington facility in July 2012. We expect to complete the roll-out to all existing facilities by the end of fiscal 2017.

Intellectual Property

We do not own or have the right to use any patent, trademark, trade name, license, franchise, or concession which upon loss would have a material adverse effect on our results of operations or financial condition.

Competition

Our largest competition comes from direct distribution, whereby a customer reaches a product volume level that justifies distribution directly from the manufacturer in order to obtain a lower price. Our major wholesale distribution competitor in both the United States and Canada is KeHE Distributors, LLC ("Kehe"), which acquired Tree of Life Distribution, Inc. ("Tree of Life") in 2010. In addition to its natural and organic products, Kehe distributes specialty food products and markets its own private label program. Kehe's subsidiary, Tree of Life, has also earned QAI certification. We also compete in the United States and Canada with over 200 smaller regional and local distributors of natural, organic, ethnic, kosher, gourmet and other specialty foods that focus on niche or regional markets, and with national, regional and local distributors of conventional groceries and companies that distribute to their own retail facilities.

We believe that distributors in the natural and specialty products industries primarily compete on distribution service levels, product quality, depth of inventory selection, price and quality of customer service. We believe that we currently compete effectively with respect to each of these factors.

Our natural products retail stores compete against other natural products outlets, conventional supermarkets and specialty stores. We believe that retailers of natural products compete principally on product quality and selection, price, customer service, knowledge of personnel and convenience of location. We believe that we currently compete effectively with respect to each of these factors.

Government Regulation

9

Table of Contents

Our operations and many of the products that we distribute in the United States are subject to regulation by state and local health departments, the USDA and the United States Food and Drug Administration, which generally impose standards for product quality and sanitation and are responsible for the administration of bioterrorism legislation. In the United States, our facilities generally are inspected at least once annually by state or federal authorities.

The Surface Transportation Board and the Federal Highway Administration regulate our trucking operations. In addition, interstate motor carrier operations are subject to safety requirements prescribed by the United States Department of Transportation and other relevant federal and state agencies. Such matters as weight and dimension of equipment are also subject to federal and state regulations.

Our operations do not generally subject us to federal, provincial, state and local environmental laws and regulations. However, certain of our distribution centers have above-ground storage tanks for hydrogen fuel, diesel fuel and other petroleum products, which are subject to laws regulating such storage tanks.

We believe that we are in material compliance with all federal, provincial, state and local laws applicable to our operations.

Employees

As of August 3, 2013, we had approximately 7,300 full and part-time employees, 432 of whom (approximately 5.9%) are covered by collective bargaining agreements at our Edison, New Jersey, Leicester, Massachusetts, Iowa City, Iowa, Dayville, Connecticut and Auburn, Washington facilities. The Edison, New Jersey, Leicester, Massachusetts, Iowa City, Iowa, Dayville, Connecticut and Auburn, Washington agreements expire in June 2014, March 2014, June 2014, July 2014 and February 2017, respectively. During fiscal 2013, for the first time in the Company's history, we experienced a work stoppage by our unionized employees in Auburn Washington. However, we continue to believe that our relations with our employees are good.

Seasonality

Generally, we do not experience any material seasonality. However, our sales and operating results may vary significantly from quarter to quarter due to factors such as changes in our operating expenses, management's ability to execute our operating and growth strategies, personnel changes, demand for natural products, supply shortages and general economic conditions.

The contents of our website are not part of this Annual Report on Form 10-K, and our internet address is included in this document as an inactive textual reference only. We make our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and all amendments to those reports filed or furnished pursuant to

Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") available free of charge through our website as soon as reasonably practicable after we file such reports with, or furnish such reports to, the Securities and Exchange Commission.

We have adopted a code of conduct and ethics that applies to our Chief Executive Officer, Chief Financial Officer and employees within our finance operations, and sales departments. Our code of conduct and ethics is publicly available on our website at www.unfi.com and is available free of charge by writing to United Natural Foods, Inc., 313 Iron Horse Way, Providence, Rhode Island 02908, Attn: Investor Relations. We intend to make any legally required disclosures regarding amendments to, or waivers of, the provisions of the code of conduct and ethics on our website at www.unfi.com. Please note that our website address is provided as an inactive textual reference only.

Executive Officers of the Registrant

Our executive officers are elected on an annual basis and serve at the discretion of our Board of Directors. Our executive officers and their ages as of October 1, 2013 are listed below:

Table of Contents

Name	Age	Position
Steven L. Spinner	53	President and Chief Executive Officer
Mark E. Shamber	44	Senior Vice President, Chief Financial Officer and Treasurer
Joseph J. Traficanti	62	Senior Vice President, General Counsel, Chief Compliance Officer and Corporate Secretary
Sean F. Griffin	54	Senior Vice President, Group President
Eric A. Dorne	52	Senior Vice President, Chief Information Officer
Thomas A. Dziki	52	Senior Vice President, Chief Human Resource and Sustainability Officer
Craig H. Smith	54	Senior Vice President, National Sales and Service
Donald P. McIntyre	58	Senior Vice President, National Supply Chain and Strategy
David A. Matthews	48	Senior Vice President, National Sales, and President of UNFI International
Thomas J. Grillea	57	Division President
Christopher P. Testa	43	President, Woodstock Farms Manufacturing and Blue Marble Brands

Steven L. Spinner has served as our President and Chief Executive Officer and as a member of our Board of Directors since September 2008. Mr. Spinner served as the Interim President of our Eastern Region, after David Matthews became President of UNFI International in September 2010 and prior to the hiring of Craig H. Smith in December 2010. Prior to joining us in September 2008, Mr. Spinner served as a director and as Chief Executive Officer of Performance Food Group Company ("PFG") from October 2006 to May 2008, when PFG was acquired by affiliates of The Blackstone Group and Wellspring Capital Management. Mr. Spinner previously had served as PFG's President and Chief Operating Officer beginning in May 2005. Mr. Spinner served as PFG's Senior Vice President and Chief Executive Officer—Broadline Division from February 2002 to May 2005 and as PFG's Broadline Division President from August 2001 to February 2002.

Mark E. Shamber has served as Senior Vice President, Chief Financial Officer and Treasurer since October 2006. Mr. Shamber previously served as our Vice President, Chief Accounting Officer and Acting Chief Financial Officer and Treasurer from January 2006 until October 2006, as Vice President and Corporate Controller from August 2005 to October 2006 and as our Corporate Controller from June 2003 until August 2005. From February 1995 until June 2003, Mr. Shamber served in various positions of increasing responsibility up to and including senior manager within the assurance and advisory business systems practice at the international accounting firm of Ernst & Young LLP.

Joseph J. Traficanti has served as our Senior Vice President, General Counsel, Chief Compliance Officer and Corporate Secretary since April 2009. Prior to joining us, Mr. Traficanti served as Senior Vice President, General Counsel, Chief Compliance Officer and Corporate Secretary of PFG from November 2004 until April 2009.

Sean F. Griffin has served as our Senior Vice President, Group President since June 2012, and Mr. Griffin served as our Senior Vice President, National Distribution from January 2010 to June 2012. Prior to joining us, Mr. Griffin was East Region Broadline President of PFG. In this role he managed over ten divisions and \$2 billion in sales. Previously he served as President of PFG—Springfield, MA from 2003 until 2008. He began his career with Sysco Corporation in 1986 and has held various leadership positions in the foodservice distribution industry with U.S. Foodservice, Alliant Foodservice and Sysco Corporation.

Eric A. Dorne has served as our Senior Vice President, Chief Information Officer since September 2011. Prior to joining us, Mr. Dorne was Senior Vice President and Chief Information Officer for The Great Atlantic & Pacific Tea Company, Inc., the parent company of the A&P, Pathmark, SuperFresh, Food Emporium and Waldbaum's supermarket chains located in the Eastern United States from January 2011 to August 2011, and Vice President and Chief Information Officer from August 2005 to January 2011. In his more than thirty years at The Great Atlantic & Pacific Tea Company, Mr. Dorne held various executive positions including Vice President of Enterprise IT Application Management and Development, Vice President of Store Operations Systems and Director of Retail Support Services.

Thomas A. Dziki has served as our Senior Vice President, Chief Human Resource and Sustainability Officer since August 2010. Prior to August 2010, Mr. Dziki served as our Senior Vice President of Sustainable Development since January 2010, as our Vice President of Sustainable Development since June 2009, and as National Vice President of Real Estate and Construction since August 2006. Prior to that time, Mr. Dziki had served as President of

Woodstock Farms Manufacturing and Select Nutrition from December 2004 until August 2006, Corporate Vice President of Special Projects from December 2003 to November 2004 and as our Manager of Special Projects from May 2002 to December 2003. Prior to joining us, Mr. Dziki served as a private consultant to our company, our subsidiaries, Woodstock Farms Manufacturing, Earth Origins, Albert's, and our predecessor company, Cornucopia Natural Foods, Inc., from 1995 to May 2002.

Table of Contents

Craig H. Smith has served as our Senior Vice, National Sales and Service since September 2013. From December 2010 to August 2013, Mr. Smith served as our President of the Eastern Region. Prior to joining us, Mr. Smith was Atlantic Region President of U.S. Foodservice, a leading broadline foodservice distributor of national, private label, and signature brand items in the United States from May 2008 to December 2010. In his seventeen years at U.S. Foodservice, Mr. Smith held various executive positions including SVP Street Sales, North Region Zone President, Detroit Market President and Boston Market President. Prior to U.S. Foodservice, Mr. Smith held several positions at food service industry manufacturer and distributor Rykoff-Sexton, Inc. from 1982 until 1993.

Donald P. McIntyre has served as our Senior Vice President, National Supply Chain and Strategy since September 2013. From July 2012 to August 2013, Mr. McIntyre served as our President of the Western Region. Prior to joining us, Mr. McIntyre served as President and CEO of Claridge Foods from March 2006 to January 2012. Mr. McIntyre also held several senior positions within subsidiaries of Sara Lee Corporation, including President and CEO of Sara Lee Coffee & Tea from April 2004 to March 2006, and CFO of Sara Lee Coffee & Tea from August 2002 to March 2004.

David A. Matthews has served as our Senior Vice President, National Sales, since July 2012, and President of UNFI International with responsibility for our Canadian and other international operations since September 2010. From June 2009 to September 2010 he was our President of the Eastern Region. Prior to joining us, Mr. Matthews served as President and CEO of Progressive Group Alliance ("ProGroup"), a wholly owned subsidiary of PFG from January 2007 to May 2009, as Chief Financial Officer of ProGroup from December 2004 to January 2007, and as Senior Vice President of Finance and Technology of ProGroup from July 2000 to December 2004.

Thomas J. Grillea has served as our President of Earth Origins Market since May 2008 and President of Select Nutrition Distributors since September 2007. Mr. Grillea also served as our President of Woodstock Farms Manufacturing from May 2009 to September 2012 and oversaw Blue Marble Brands from September 2010 to September 2012. Mr. Grillea served as our General Manager for Select Nutrition Distributors from September 2006 to September 2007. Prior to joining us, Mr. Grillea served in a management capacity for Whole Foods Market from 2004 through 2005, and in various management capacities for American Health and Diet Centers and the Vitamin Shoppe from 1998 through 2003.

Christopher P. Testa has served as our President, Woodstock Farms Manufacturing since September 2012 and President, Blue Marble Brands since August 2009. Prior to joining us, Mr. Testa served as Vice President of Marketing for Cadbury Schweppes Americas Beverages from August 2002 to May 2005 and as CEO of Wild Waters, Inc. from May 2005 to August 2009.

ITEM 1A. RISK FACTORS

Our business, financial condition and results of operations are subject to various risks and uncertainties, including those described below and elsewhere in this Annual Report on Form 10-K. This section discusses factors that, individually or in the aggregate, we think could cause our actual results to differ materially from expected and historical results. Our business, financial condition or results of operations could be materially adversely affected by any of these risks.

We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. You should understand that it is not possible to predict or identify all such factors. Consequently, you should not consider the following to be a complete discussion of all potential risks or uncertainties applicable to our business. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Forward-Looking Statements."

We depend heavily on our principal customer and our success is heavily dependent on our principal customer's ability to grow its business.

Whole Foods Market accounted for approximately 36% of our net sales in fiscal 2013. We serve as the primary distributor of natural, organic and specialty non-perishable products to Whole Foods Market in all of its regions in the United States under the terms of our amended distribution agreement which expires on September 25, 2020. Our ability to maintain a close mutually beneficial relationship with Whole Foods Market is an important element to our continued growth.

The loss or cancellation of business from Whole Foods Market, including from increased distribution to their own facilities or closures of stores, could materially and adversely affect our business, financial condition or results of operations. Similarly, if Whole Foods Market is not able to grow its business, including as a result of a reduction in the level of discretionary spending by its customers, our business, financial condition or results of operations may be materially and adversely affected.

Table of Contents

Our operations are sensitive to economic downturns.

The grocery industry is sensitive to national and regional economic conditions and the demand for the products that we distribute, particularly our specialty products, may be adversely affected from time to time by economic downturns that impact consumer spending, including discretionary spending. Future economic conditions such as employment levels, business conditions, interest rates, inflation rates, energy and fuel costs and tax rates could reduce consumer spending or change consumer purchasing habits. Among these changes could be a reduction in the number of natural and organic products that consumers purchase where there are non-organic, which we refer to as conventional, alternatives, given that many natural and organic products, and particularly natural and organic foods, often have higher retail prices than do their conventional counterparts.

Our business is a low margin business and our profit margins may decrease due to consolidation in the grocery industry and our increased focus on sales to the conventional supermarket channel.

The grocery distribution industry generally is characterized by relatively high volume of sales with relatively low profit margins. The continuing consolidation of retailers in the natural products industry and the growth of supernatural chains may reduce our profit margins in the future as more customers qualify for greater volume discounts, and we experience pricing pressures from suppliers and retailers. Over the last three fiscal years, we have increased our sales to our supernatural chain and conventional supermarket customers in relation to our total sales. In the fourth quarter of fiscal 2011, we announced that we had entered into a three-year distribution arrangement to supply Safeway with nonproprietary natural, organic and specialty products, which further increased the percentage of our total sales to conventional supermarkets. Sales to customers within our supernatural chain and conventional supermarket channels generate a lower gross margin than do sales to our independent customers. Many of these customers, including our largest customer, have agreements with us that include volume discounts. As the amounts these customers purchase from us increase, the price that they pay for the products they purchase is reduced, putting downward pressure on our gross margins on these sales. To compensate for these lower gross margins, we must reduce the expenses we incur to service these customers. If we are unable to reduce our expenses as a percentage of net sales, including our expenses related to servicing this lower gross margin business, our business, financial condition or results of operations could be adversely impacted.

Our business may be sensitive to inflationary and deflationary pressures.

Many of our sales are at prices that are based on our product cost plus a percentage markup. As a result, volatile food costs have a direct impact upon our profitability. Prolonged periods of product cost inflation may have a negative impact on our profit margins and results of operations to the extent that we are unable to pass on all or a portion of such product cost increases to our customers. In addition, product cost inflation may negatively impact the consumer discretionary spending trends of our customers' customers, which could adversely affect our sales. Conversely, because many of our sales are at prices that are based upon product cost plus a percentage markup, our profit levels may be negatively impacted during periods of product cost deflation even though our gross profit as a percentage of net sales may remain relatively constant. To compensate for lower gross margins, we, in turn, must reduce expenses that we incur to service our customers. If we are unable to reduce our expenses as a percentage of net sales, our business, financial condition or results of operations could be adversely impacted.

Our customers generally are not obligated to continue purchasing products from us.

Many of our customers buy from us under purchase orders, and we generally do not have agreements with or commitments from these customers for the purchase of products. We cannot assure you that our customers will maintain or increase their sales volumes or orders for the products supplied by us or that we will be able to maintain or add to our existing customer base. Decreases in our customers' sales volumes or orders for products supplied by us may have a material adverse effect on our business, financial condition or results of operations.

We have significant competition from a variety of sources.

We operate in competitive markets and our future success will be largely dependent on our ability to provide quality products and services at competitive prices. Bidding for contracts or arrangements with customers, particularly within the supernatural chain and conventional supermarket channels, is highly competitive and distributors may market their services to a particular customer over a long period of time before they are invited to bid. Our competition comes from a variety of sources, including other distributors of natural products as well as specialty grocery and mass market

grocery distributors and retail customers that have their own distribution channels. We cannot assure you that mass market grocery distributors will not increase their emphasis on natural products and more directly compete with us including through self-distribution of particular items or purchases of particular items directly from suppliers or that new competitors will not enter the market. These distributors may have been in business longer than we have, may have substantially greater financial and other resources than we have and may be better established in their markets. We cannot assure you that our current or potential competitors will not provide products or services comparable or superior to those provided by us or adapt more quickly than we do to evolving

Table of Contents

industry trends or changing market requirements. It is also possible that alliances among competitors may develop and rapidly acquire significant market share or that certain of our customers will increase distribution to their own retail facilities. Increased competition may result in price reductions, reduced gross margins and loss of market share, any of which could materially and adversely affect our business, financial condition or results of operations.

We cannot assure you that we will be able to compete effectively against current and future competitors.

Our investment in information technology may not result in the anticipated benefits.

Much of our sales growth is occurring in our lower gross margin supernatural and conventional supermarket channels. In our attempt to reduce operating expenses and increase operating efficiencies, we have aggressively invested in the development and implementation of new information technology. Following the start-up inefficiencies associated with the initial implementation of our technological initiatives in our Lancaster, Texas distribution center during fiscal 2011, we revised the timeline for the broader implementation of our proposed technological developments and now expect to complete the roll-out by the end of fiscal 2017. While we currently believe this revised timeline will be met, we may not be able to implement these technological changes in the time frame that we have planned and delays in implementation could negatively impact our business, financial condition or results of operations. In addition, the costs to make these changes may exceed our estimates and will exceed the benefits during the early stages of implementation. Even if we are able to implement the changes in accordance with our revised plans, and within our current cost estimates, we may not be able to achieve the expected efficiencies and cost savings from this investment, which could have an adverse effect on our business, financial condition or results of operations.

Failure by us to develop and operate a reliable technology platform could negatively impact our business.

Our ability to decrease costs and increase profits, as well as our ability to serve customers most effectively, depends on the reliability of our technology platform. We use software and other technology systems, among other things, to generate and select orders, to load and route trucks and to monitor and manage our business on a day-to-day basis.

Any disruption to these computer systems could adversely impact our customer service, decrease the volume of our business and result in increased costs negatively affecting our business, financial condition or results of operations.

We have experienced losses due to the uncollectability of accounts receivable in the past and could experience increases in such losses in the future if our customers are unable to timely pay their debts to us.

Certain of our customers have from time to time experienced bankruptcy, insolvency and/or an inability to pay their debts to us as they come due. If our customers suffer significant financial difficulty, they may be unable to pay their debts to us timely or at all, which could have a material adverse effect on our results of operations. It is possible that customers may reject their contractual obligations to us under bankruptcy laws or otherwise. Significant customer bankruptcies could further adversely affect our revenues and increase our operating expenses by requiring larger provisions for bad debt. In addition, even when our contracts with these customers are not rejected, if customers are unable to meet their obligations on a timely basis, it could adversely affect our ability to collect receivables. Further, we may have to negotiate significant discounts and/or extended financing terms with these customers in such a situation, each of which could have material adverse effect on our business, financial condition, results of operations or cash flows. During periods of economic weakness, small to medium-sized businesses, like many of our independently owned natural products retailer customers, may be impacted more severely and more quickly than larger businesses. Similarly, these smaller businesses may be more likely to be more severely impacted by events outside of their control, like significant weather events. Consequently, the ability of such businesses to repay their obligations to us may deteriorate, and in some cases this deterioration may occur quickly, which could adversely impact our business, financial condition or results of operations.

Our acquisition strategy may adversely affect our business.

A portion of our past growth has been achieved through acquisitions of, or mergers with, other distributors of natural, organic and specialty products. We also continually evaluate opportunities to acquire other companies. We believe that there are risks related to acquiring companies, including an inability to successfully identify suitable acquisition candidates or consummate such potential acquisitions. To the extent that our future growth includes acquisitions, we cannot assure you that we will not overpay for acquisitions, lose key employees of acquired companies, or fail to achieve potential synergies or expansion into new markets as a result of our acquisitions. Therefore, future acquisitions, if any, may have a material adverse effect on our results of operations, particularly in periods

immediately following the consummation of those transactions while the operations of the acquired business are being integrated with our operations. Achieving the benefits of acquisitions depends on timely, efficient and successful execution of a number of post-acquisition events, including, among other things:

- maintaining the customer and supplier base;
- optimizing delivery routes;
- coordinating administrative, distribution and finance functions; and

Table of Contents

integrating management information systems and personnel.

The integration process could divert the attention of management and any difficulties or problems encountered in the transition process could have a material adverse effect on our business, financial condition or results of operations. In particular, the integration process may temporarily redirect resources previously focused on reducing product cost and operating expenses, resulting in lower gross profits in relation to sales. In addition, the process of combining companies could cause the interruption of, or a loss of momentum and operating profits in, the activities of the respective businesses, which could have an adverse effect on their combined operations.

In connection with acquisitions of businesses in the future, if any, we may decide to consolidate the operations of any acquired business with our existing operations or make other changes with respect to the acquired business, which could result in special charges or other expenses. Our results of operations also may be adversely affected by expenses we incur in making acquisitions, by amortization of acquisition-related intangible assets with definite lives and by additional depreciation attributable to acquired assets. Any of the businesses we acquire may also have liabilities or adverse operating issues, including some that we fail to discover before the acquisition, and our indemnity for such liabilities may also be limited. Additionally, our ability to make any future acquisitions may depend upon obtaining additional financing. We may not be able to obtain additional financing on acceptable terms or at all. To the extent that we seek to acquire other businesses in exchange for our common stock, fluctuations in our stock price could have a material adverse effect on our ability to complete acquisitions.

We may have difficulty managing our growth.

The growth in the size of our business and operations has placed, and is expected to continue to place, a significant strain on our management. Our future growth may be limited by our inability to acquire new distribution centers or expand our existing distribution centers, make acquisitions, successfully integrate acquired entities or significant new customers, implement information systems initiatives or adequately manage our personnel. Our future growth is limited in part by the size and location of our distribution centers. As we near maximum utilization of a given facility or maximize our processing capacity, operations may be constrained and inefficiencies have been and may be created, which could adversely affect our results of operations unless the facility is expanded, volume is shifted to another facility or additional processing capacity is added. Conversely, as we add additional facilities or expand existing operations or facilities, excess capacity may be created. Any excess capacity may also create inefficiencies and adversely affect our results of operations. We cannot assure you that we will be able to successfully expand our existing distribution centers or open new distribution centers in new or existing markets as needed to accommodate or facilitate growth. Even if we are able to expand our distribution network, our ability to compete effectively and to manage future growth, if any, will depend on our ability to continue to implement and improve operational, financial and management information systems, including our warehouse management systems, on a timely basis and to expand, train, motivate and manage our work force. We cannot assure you that our existing personnel, systems, procedures and controls will be adequate to support the future growth of our operations. Our inability to manage our growth effectively could have a material adverse effect on our business, financial condition or results of operations. Increased fuel costs may adversely affect our results of operations.

Increased fuel costs may have a negative impact on our results of operations. The high cost of diesel fuel can increase the price we pay for products as well as the costs we incur to deliver products to our customers. These factors, in turn, may negatively impact our net sales, margins, operating expenses and operating results. To manage this risk, we have in the past periodically entered, and may in the future periodically enter, into heating oil derivative contracts to hedge a portion of our projected diesel fuel requirements. Heating crude oil prices have a highly correlated relationship to fuel prices, making these derivatives effective in offsetting changes in the cost of diesel fuel. We are not party to any commodity swap agreements and, as a result, our exposure to volatility in the price of diesel fuel has increased relative to our exposure to volatility in prior periods in which we had outstanding heating oil derivative contracts. We do not enter into fuel hedge contracts for speculative purposes. We have in the past, and may in the future, periodically enter into forward purchase commitments for a portion of our projected monthly diesel fuel requirements at fixed prices. As of August 3, 2013, we had no forward diesel fuel commitments. If fuel prices decrease significantly, these forward purchases may prove ineffective and result in us paying higher than the then market costs for a portion of our diesel fuel. We also maintain a fuel surcharge program which allows us to pass some of our higher fuel costs through to our

customers. We cannot guarantee that we will continue to be able to pass a comparable proportion or any of our higher fuel costs to our customers in the future, which may adversely affect our business, financial condition or results of operations.

Disruption of our distribution network could adversely affect our business.

Damage or disruption to our distribution capabilities due to weather, natural disaster, fire, terrorism, pandemic, strikes, the financial and/or operational instability of key suppliers, or other reasons could impair our ability to distribute our products. To the extent that we are unable, or it is not financially feasible, to mitigate the likelihood or potential impact of such events, or

Table of Contents

to manage effectively such events if they occur, there could be an adverse effect on our business financial condition or results of operations.

The cost of the capital available to us and any limitations on our ability to access additional capital may have a material adverse effect on our business, financial condition or results of operations.

In May 2012, we amended and restated our revolving credit facility pursuant to which we now have a \$500 million secured revolving credit facility which matures on May 24, 2017; of which up to \$450.0 million is available to our U.S. subsidiaries and up to \$50.0 million is available to UNFI Canada. The borrowings of the US portion of the credit facility accrue interest, at our option, at either (i) a base rate (generally defined as the highest of (x) the Bank of America Business Capital prime rate, (y) the average overnight federal funds effective rate plus one-half percent (0.50%) per annum and (z) one-month LIBOR plus one percent (1%) per annum plus an initial margin of 0.50%, or (ii) the London Interbank Offered Rate ("LIBOR") for one, two, three or six months or, if approved by all affected lenders, nine months plus an initial margin of 1.50%. The borrowings on the Canadian portion of the credit facility for Canadian swing-line loans, Canadian over advance loans or Canadian protective advances accrue interest, at our option, at either (i) a prime rate (generally defined as the highest of (x) 0.50% over 30-day Reuters Canadian Deposit Offering Rate for bankers' acceptances, (y) the prime rate of Bank of America, N.A.'s Canada branch, and (z) a bankers' acceptance equivalent rate for a one month interest period plus 1.00% plus an initial margin of 0.50%, or (ii) a bankers' acceptance equivalent rate of the rate of interest per annum equal to the annual rates applicable to Canadian Dollar bankers' acceptances on the "CDOR Page" of Reuter Monitor Money Rates Service, plus five basis points, and an initial margin of 1.50% (the "CDOR rate"). All other borrowings on the Canadian portion of the credit facility must exclusively accrue interest under the CDOR rate plus the applicable margin.

As of August 3, 2013, our borrowing base, based on accounts receivable and inventory levels and described more completely below under "Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Revenues," was \$484.5 million, with remaining availability of \$319.3 million. During fiscal 2012, we used borrowings under our amended and restated revolving credit facility to pay off our term loan and refinance existing indebtedness under our predecessor revolving credit facility.

In order to maintain our profit margins, we rely on strategic investment buying initiatives, such as discounted bulk purchases, which require spending significant amounts of working capital up front to purchase products that we will sell over a multi-month time period. In the event that our cost of capital increases, such as during a period in which we are not in compliance with the fixed charge coverage ratio covenants under our revolving credit facility, or our ability to borrow funds or raise equity capital is limited, we could suffer reduced profit margins and be unable to grow our business organically or through acquisitions, which could have a material adverse effect on our business, financial condition or results of operations.

Our debt agreements contain restrictive covenants that may limit our operating flexibility.

Our debt agreements contain financial covenants and other restrictions that limit our operating flexibility, limit our flexibility in planning for or reacting to changes in our business and make us more vulnerable to economic downturns and competitive pressures. Our indebtedness could have significant negative consequences, including:

- increasing our vulnerability to general adverse economic and industry conditions;
- limiting our ability to obtain additional financing;
- limiting our flexibility in planning for or reacting to changes in our business and the industry in which we compete; and
- placing us at a competitive disadvantage compared to competitors with less leverage or better access to capital resources.

In addition, our revolving credit facility requires that we comply with various financial tests and imposes certain restrictions on us, including among other things, restrictions on our ability to incur additional indebtedness, create liens on assets, make loans or investments or pay dividends. Failure to comply with these covenants could have an adverse effect on our business, financial condition or results of operations.

Our operating results are subject to significant fluctuations.

Our operating results may vary significantly from period to period due to:

- demand for our products; including as a result of seasonal fluctuations;

- changes in our operating expenses, including fuel and insurance expenses;
- management's ability to execute our business and growth strategies;
- changes in customer preferences, including levels of enthusiasm for health, fitness and environmental issues;
- public perception of the benefits of natural and organic products when compared to similar conventional products;

Table of Contents

fluctuation of natural product prices due to competitive pressures;
personnel changes;
general economic conditions including inflation;
supply shortages, including a lack of an adequate supply of high-quality agricultural products due to poor growing conditions, water shortages, natural disasters or otherwise;
volatility in prices of high-quality agricultural products resulting from poor growing conditions, water shortages, natural disasters or otherwise; and
future acquisitions, particularly in periods immediately following the consummation of such acquisition transactions while the operations of the acquired businesses are being integrated into our operations.

Due to the foregoing factors, we believe that period-to-period comparisons of our operating results may not necessarily be meaningful and that such comparisons cannot be relied upon as indicators of future performance.

Conditions beyond our control can interrupt our supplies and increase our product costs.

We offer more than 65,000 high-quality natural, organic and specialty foods and non-food products, which we purchase from more than 6,000 suppliers. The majority of our suppliers are based in the United States and Canada, but we also source products from suppliers throughout Europe, Asia, Central America, South America, Africa and Australia. For the most part, we do not have long-term contracts with our suppliers committing them to provide products to us. Although our purchasing volume can provide benefits when dealing with suppliers, suppliers may not provide the products needed by us in the quantities and at the prices requested. We are also subject to delays caused by interruption in production and increases in product costs based on conditions outside of our control. These conditions include work slowdowns, work interruptions, strikes or other job actions by employees of suppliers, short-term weather conditions or more prolonged climate change, crop conditions, product recalls, water shortages, transportation interruptions, unavailability of fuel or increases in fuel costs, competitive demands, raw material shortages and natural disasters or other catastrophic events (including, but not limited to food-borne illnesses). We experienced higher manufacturer out-of-stocks during fiscal 2013 causing us to incur higher operating expenses as we moved products around our distribution facilities as we sought to keep our service level high, and we cannot be sure when this trend will end or whether it will recur during future years. As the consumer demand for natural and organic products has increased, certain retailers and other producers have entered the market and attempted to buy certain raw materials directly, limiting their availability to be used in certain vendor products. Further, increased frequency or duration of extreme weather conditions could also impair production capabilities, disrupt our supply chain or impact demand for our products. In the summer months of 2012, certain agricultural areas of the United States and Mexico experienced severe drought. The impact of sustained droughts are uncertain and could result in volatile input costs. Input costs could increase at any point in time for a large portion of the products that we sell for a prolonged period. Our inability to obtain adequate products as a result of any of the foregoing factors or otherwise could mean that we could not fulfill our obligations to customers, and customers may turn to other distributors. In that case, our financial condition, results of operations and business could be adversely affected.

We are subject to significant governmental regulation.

Our business is highly regulated at the federal, state and local levels and our products and distribution operations require various licenses, permits and approvals. In particular:

- the products that we distribute in the United States are subject to inspection by the United States Food and Drug Administration;
- our warehouse and distribution centers are subject to inspection by the USDA and state health authorities; and
- the United States Department of Transportation and the United States Federal Highway Administration regulate our United States trucking operations.

Our Canadian operations are similarly subject to extensive regulation, including the English and French dual labeling requirements applicable to products that we distribute in Canada. The loss or revocation of any existing licenses, permits or approvals or the failure to obtain any additional licenses, permits or approvals in new jurisdictions where we intend to do business could have a material adverse effect on our business, financial condition or results of operations. In addition, as a distributor and manufacturer of natural, organic, and specialty foods, we are subject to increasing governmental scrutiny of and public awareness regarding food safety and the sale, packaging and

marketing of natural and organic products. Compliance with these laws may impose a significant burden on our operations. If we were to manufacture or distribute foods that are or are perceived to be contaminated, any resulting product recalls could have an adverse effect on our business, financial condition or results of operations. Additionally, concern over climate change, including the impact of global warming, has led to significant United States and international legislative and regulatory efforts to limit greenhouse gas emissions. Increased regulation regarding greenhouse gas emissions, especially diesel engine emissions, could impose substantial costs on us. These costs include an increase in the cost of the fuel and other energy we purchase and capital costs associated with updating or replacing our vehicles prematurely. Until the timing, scope and extent of such regulation becomes known, we cannot predict its effect on

Table of Contents

our results of operations. It is reasonably possible, however, that it could impose material costs on us which we may be unable to pass on to our customers.

Product liability claims could have an adverse effect on our business.

We face an inherent risk of exposure to product liability claims if the products we manufacture or sell cause injury or illness. We may be subject to liability, which could be substantial, because of actual or alleged contamination in products manufactured or sold by us, including products sold by companies before we acquired them. We have, and the companies we have acquired have had, liability insurance with respect to product liability claims. This insurance may not continue to be available at a reasonable cost or at all, and may not be adequate to cover product liability claims against us or against companies we have acquired. We generally seek contractual indemnification from manufacturers, but any such indemnification is limited, as a practical matter, to the creditworthiness of the indemnifying party. If we or any of our acquired companies do not have adequate insurance or contractual indemnification available, product liability claims and costs associated with product recalls, including a loss of business, could have a material adverse effect on our business, financial condition or results of operations.

We are dependent on a number of key executives.

Management of our business is substantially dependent upon the services of certain key management employees. Loss of the services of any officers or any other key management employee could have a material adverse effect on our business, financial condition or results of operations.

Union-organizing activities could cause labor relations difficulties.

As of August 3, 2013 we had approximately 7,300 full and part-time employees, 432 of whom (approximately 5.9%) are covered by collective bargaining agreements at our Edison, New Jersey, Auburn, Washington, Leicester, Massachusetts, Iowa City, Iowa, Dayville, Connecticut and Auburn, Washington facilities. The Edison, New Jersey, Leicester, Massachusetts, Iowa City, Iowa, Dayville, Connecticut and Auburn, Washington agreements expire in June 2014, March 2014, June 2014, July 2014, and February 2017, respectively. We have in the past been the focus of union-organizing efforts, and it is likely that we will be the focus of similar efforts in the future.

As we increase our employee base and broaden our distribution operations to new geographic markets, our increased visibility could result in increased or expanded union-organizing efforts. In the event we are unable to negotiate contract renewals with our union associates, we could be subject to work stoppages. In that event, it would be necessary for us to hire replacement workers to continue to meet our obligations to our customers. The costs to hire replacement workers would negatively impact the profitability of the facility, and depending on the length of time that we are required to employ replacement workers these costs could be significant and could have a material adverse effect on our business, financial condition or results of operations.

We may fail to establish sufficient insurance reserves and adequately estimate for future workers' compensation and automobile liabilities.

We are primarily self-insured for workers' compensation and automobile liability insurance. We believe that our workers' compensation and automobile insurance coverage is customary for businesses of our size and type. However, there are types of losses we may incur that cannot be insured against or that we believe are not commercially reasonable to insure. These losses, should they occur, could have a material and adverse effect on our business, financial condition or results of operations. In addition, the cost of workers' compensation insurance and automobile insurance fluctuates based upon our historical trends, market conditions and availability.

Any projection of losses concerning workers' compensation and automobile insurance is subject to a considerable degree of variability. Among the causes of this variability are unpredictable external factors affecting litigation trends, benefit level changes and claim settlement patterns. If actual losses incurred are greater than those anticipated, our reserves may be insufficient and additional costs could be recorded in our consolidated financial statements. If we suffer a substantial loss that is not covered by our self-insurance reserves, the loss and attendant expenses could harm our business and operating results. We have purchased stop loss coverage from third parties, which limits our exposure above the amounts we have self-insured.

The market price for our common stock may be volatile.

At times, there has been significant volatility in the market price of our common stock. In addition, the market price of our common stock could fluctuate substantially in the future in response to a number of factors, including the

following:

- our quarterly operating results or the operating results of other distributors of organic or natural food and non-food products and of supernatural chains and conventional supermarkets and other of our customers;

18

Table of Contents

• changes in general conditions in the economy, the financial markets or the organic or natural food and non-food product distribution industries;

• changes in financial estimates or recommendations by stock market analysts regarding us or our competitors;

• announcements by us or our competitors of significant acquisitions;

• increases in labor, energy, fuel costs or the costs of food products;

• natural disasters, severe weather conditions or other developments affecting us or our competitors;

• publication of research reports about us, the benefits of organic and natural products, or the organic or natural food and non-food product distribution industries generally;

• changes in market valuations of similar companies;

• additions or departures of key management personnel;

• actions by institutional stockholders; and

• speculation in the press or investment community.

In addition, in recent years the stock market has experienced extreme price and volume fluctuations. This volatility has had a significant effect on the market prices of securities issued by many companies for reasons unrelated to their operating performance. These broad market fluctuations may materially adversely affect our stock price, regardless of our operating results.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

We maintained twenty-seven distribution centers at August 3, 2013 which were utilized by our wholesale division. These facilities, including offsite storage space, consisted of an aggregate of approximately 6.5 million square feet of storage space, which we believe represents the largest capacity of any distributor within the United States in the natural, organic and specialty products industry. We are also constructing two new distribution centers in Racine, Wisconsin in the village of Sturtevant and Hudson Valley, New York in the town of Montgomery, with an additional distribution center planned for Northern California.

Set forth below for each of our distribution centers is its location and the expiration of leases as of August 3, 2013 for those distribution centers that we do not own.

Table of Contents

Location	Lease Expiration
Atlanta, Georgia	Owned
Auburn, California	Owned
Auburn, Washington	August 2019
Aurora, Colorado	July 2015
Aurora, Colorado	October 2033
Burnaby, British Columbia	October 2018
Charlotte, North Carolina	September 2019
Chesterfield, New Hampshire	Owned
Concord, Ontario	December 2021
Dayville, Connecticut	Owned
Greenwood, Indiana	Owned
Iowa City, Iowa	Owned
Lancaster, Texas	July 2025
Leicester, Massachusetts	November 2015
Logan Township, New Jersey	May 2028
Moreno Valley, California	July 2023
Mounds View, Minnesota	November 2015
New Oxford, Pennsylvania	Owned
Philadelphia, Pennsylvania	January 2014
Richmond, British Columbia	August 2022
Ridgefield, Washington	Owned
Rocklin, California	Owned
Sarasota, Florida	July 2017
Scotstown, Quebec	Owned
St. Laurent, Quebec	July 2017
Vernon, California	Owned
York, Pennsylvania	May 2020

We lease facilities to operate thirteen natural products retail stores through our Earth Origins division in Florida, Maryland and Massachusetts and one retail store through our UNFI Canada division, each with various lease expiration dates. We also lease a processing and manufacturing facility in Edison, New Jersey with a lease expiration date of March 31, 2018.

We lease office space in Santa Cruz, California, Chesterfield, New Hampshire, Uniondale, New York, Richmond, Virginia, and Providence, Rhode Island, the site of our corporate headquarters. Our leases have been entered into upon terms that we believe to be reasonable and customary.

We also lease a warehouse facility in Minneapolis, Minnesota that we acquired in connection with our acquisition of Roots & Fruits Produce Cooperative in 2005. This facility is currently being subleased under an agreement that expires concurrently with our lease termination in November 2016. We also lease offsite storage space near certain of our distribution facilities.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we are involved in routine litigation that arises in the ordinary course of our business. There are no pending material legal proceedings to which we are a party or to which our property is subject.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II.

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is traded on the Nasdaq Global Select Market® under the symbol "UNFI." Our common stock began trading on the Nasdaq Stock Market® on November 1, 1996.

The following table sets forth, for the fiscal periods indicated, the high and low sale prices per share of our common stock on the Nasdaq Global Select Market®:

Fiscal 2013	High	Low
First Quarter	\$61.26	\$52.72
Second Quarter	56.01	50.25
Third Quarter	56.45	47.20
Fourth Quarter	60.42	47.67
Fiscal 2012		
First Quarter	\$42.53	\$35.07
Second Quarter	44.68	32.83
Third Quarter	50.37	43.81
Fourth Quarter	55.86	47.98

On August 3, 2013, we had 82 stockholders of record. The number of record holders may not be representative of the number of beneficial holders of our common stock because depositories, brokers or other nominees hold many shares. We have never declared or paid any cash dividends on our capital stock. We anticipate that all of our earnings in the foreseeable future will be retained to finance the continued growth and development of our business, and we have no current intention to pay cash dividends. Our future dividend policy will depend on our earnings, capital requirements and financial condition, requirements of the financing agreements to which we are then a party and other factors considered relevant by our Board of Directors. Additionally, the terms of our existing revolving credit facility restrict us from making any cash dividends unless certain conditions and financial tests are met.

We did not repurchase any shares during the fourth quarter ended August 3, 2013.

Comparative Stock Performance

The graph below compares the cumulative total stockholder return on our common stock for the last five fiscal years with the cumulative total return on (i) an index of Food Service Distributors and Grocery Wholesalers and (ii) The NASDAQ Composite Index. The comparison assumes the investment of \$100 on August 2, 2008 in our common stock and in each of the indices and, in each case, assumes reinvestment of all dividends. The stock price performance shown below is not necessarily indicative of future performance.

The index of Food Distributors and Wholesalers (referred to below as the "Peer Group") includes Nash Finch Company, SuperValu, Inc. and SYSCO Corporation.

This performance graph shall not be deemed "soliciting material" or be deemed to be "filed" for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities under that Section and shall not be deemed to be incorporated by reference into any of our filings under the Securities Act of 1933, as amended (the "Securities Act"), or the Exchange Act.

Table of Contents

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our consolidated financial statements and the notes thereto appearing elsewhere in this Annual Report on Form 10-K.

Forward-Looking Statements

This Annual Report on Form 10-K and the documents incorporated by reference in this Annual Report on Form 10-K contain forward-looking statements within the meaning of Section 27A of the Securities Act, and Section 21E of the Exchange Act that involve substantial risks and uncertainties. In some cases you can identify these statements by forward-looking words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plans," "seek," "should," "will," and "would," or

Table of Contents

similar words. You should read statements that contain these words carefully because they discuss future expectations, contain projections of future results of operations or of financial positions or state other "forward-looking" information.

Forward-looking statements involve inherent uncertainty and may ultimately prove to be incorrect or false. You are cautioned not to place undue reliance on forward-looking statements. Except as otherwise may be required by law, we undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or actual operating results. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to:

- our dependence on principal customers;
- our sensitivity to general economic conditions, including the current economic environment, changes in disposable income levels and consumer spending trends;
- our ability to reduce our expenses in amounts sufficient to offset our increased focus on sales to conventional supermarkets and the resulting lower gross margins on these sales;
- our reliance on the continued growth in sales of natural and organic foods and non-food products in comparison to conventional products;
- our ability to timely and successfully deploy our new warehouse management system throughout our distribution centers and our transportation management system Company-wide;
- increased fuel costs;
- our sensitivity to inflationary and deflationary pressures;
- the relatively low margins and economic sensitivity of our business;
- the potential for disruptions in our supply chain by circumstances beyond our control;
- the ability to identify and successfully complete acquisitions of other natural, organic and specialty food and non-food products distributors; and
- management's allocation of capital and the timing of capital expenditures.

This list of risks and uncertainties, however, is only a summary of some of the most important factors and is not intended to be exhaustive. You should carefully review the risks described under "Part I. Item 1A. Risk Factors," as well as any other cautionary language in this Annual Report on Form 10-K, as the occurrence of any of these events could have an adverse effect on our business, results of operation and financial condition.

Overview

We believe we are a leading national distributor based on sales of natural, organic and specialty foods and non-food products in the United States and Canada and that our twenty-seven distribution centers, representing approximately 6.5 million square feet of warehouse space, provide us with the largest capacity of any North American-based distributor in the natural, organic and specialty products industry. We offer more than 65,000 high-quality natural, organic and specialty foods and non-food products, consisting of national brands, regional brands, private label and master distribution products, in six product categories: grocery and general merchandise, produce, perishables and frozen foods, nutritional supplements and sports nutrition, bulk and food service products and personal care items. We serve more than 31,000 customer locations primarily located across the United States and Canada, the majority of which can be classified into one of the following categories: independently owned natural products retailers, which include buying clubs; supernatural chains, which consist solely of Whole Foods Market; conventional supermarkets, which include mass market chains; and other which includes foodservice and international customers outside of Canada.

Our operations are comprised of three principal operating divisions. These operating divisions are:

- our wholesale division, which includes our broadline natural, organic and specialty distribution business in the United States, UNFI Canada, which is our natural, organic and specialty distribution business in Canada, Albert's, which is a leading distributor of organically grown produce and non-produce perishable items within the United States, and Select Nutrition, which distributes vitamins, minerals and supplements;
- our retail division, consisting of Earth Origins, which operates our thirteen natural products retail stores within the United States; and
-

our manufacturing division, consisting of Woodstock Farms Manufacturing, which specializes in the international importation, roasting, packaging and distribution of nuts, dried fruit, seeds, trail mixes, granola, natural and organic snack items, and confections, and our Blue Marble Brands product lines.

In recent years, our sales to existing and new customers have increased through the continued growth of the natural and organic products industry in general, increased market share as a result of our high quality service and a broader product selection, including specialty products, and the acquisition of, or merger with, natural and specialty products distributors, the expansion of our existing distribution centers; the construction of new distribution centers; the introduction of new products

Table of Contents

and the development of our own line of natural and organic branded products. Through these efforts, we believe that we have been able to broaden our geographic penetration, expand our customer base, enhance and diversify our product selections and increase our market share.

We have been the primary distributor to Whole Foods Market for more than fifteen years. Effective June 2010, we amended our distribution agreement with Whole Foods Market to extend the term of the agreement to September 25, 2020. Under the terms of the amended agreement, we will continue to serve as the primary wholesale natural grocery distributor to Whole Foods Market in its United States regions where we were serving as the primary distributor at the time of the amendment. In September and October 2010 respectively, we acquired certain assets of Whole Foods Distribution previously used for their self-distribution of non-perishables in their Rocky Mountain and Southwest regions. We now serve as the primary distributor to Whole Foods Market in all of its regions in the United States and have amended our distribution agreement with Whole Foods Market effective October 2010 to include these regions. Whole Foods Market accounted for approximately 36% of our net sales for the years ended August 3, 2013 and July 28, 2012.

In June 2010, we acquired the SDG assets of SunOpta through our wholly-owned subsidiary, UNFI Canada for cash consideration of \$65.8 million. With the acquisition, we became the largest distributor of natural, organic and specialty foods, including kosher foods, in Canada. This was a strategic acquisition as UNFI Canada provides us with an immediate platform for growth in the Canadian market. During fiscal 2012, we utilized our UNFI Canada platform to further expand in the Canadian market, including through our purchase of substantially all of the assets of a specialty food distribution business in the Ontario market in November 2011. During the first quarter of fiscal 2013, we also utilized this platform for our August 2012 acquisition of substantially all of the assets of a dairy distribution business in the central Canada market.

The ability to distribute specialty food items (including ethnic, kosher and gourmet) has accelerated our expansion into a number of high-growth business markets and allowed us to establish immediate market share in the fast-growing specialty foods market. We have now integrated specialty food products and natural and organic specialty non-food products into most of our broadline distribution centers across the United States and Canada. Due to our expansion into specialty foods, we were awarded new business with a number of conventional supermarkets over the past three fiscal years that we previously had not done business with because we did not distribute specialty products. We believe that distribution of these products enhances our conventional supermarket business channel and that our complementary product lines continue to present opportunities for cross-selling.

In June 2011, we entered into an asset purchase agreement with L&R Distributors pursuant to which we agreed to sell our conventional non-foods and general merchandise lines of business, including certain inventory related to these product lines. This divestiture was completed in the first quarter of fiscal 2012, and has allowed us to concentrate on our core business of the distribution of natural, organic, and specialty foods and non-food products.

To maintain our market leadership and improve our operating efficiencies, we seek to continually:

- expand our marketing and customer service programs across regions;
- expand our national purchasing opportunities;
- offer a broader product selection;
- offer operational excellence with high service levels and a higher percentage of on-time deliveries than our competitors;
- centralize general and administrative functions to reduce expenses;
- consolidate systems applications among physical locations and regions;
- increase our investment in people, facilities, equipment and technology;
- integrate administrative and accounting functions; and
- reduce the geographic overlap between regions.

Our continued growth has allowed us to expand our existing facilities and open new facilities in an effort to achieve increasing operating efficiencies. We have made significant capital expenditures and incurred considerable expenses in connection with the opening and expansion of our facilities. At August 3, 2013, our distribution capacity totaled approximately 6.5 million square feet. In September 2010, we began shipping products from our distribution center in Lancaster, Texas, which serves customers throughout the Southwestern United States, including Texas, Oklahoma,

New Mexico, Arkansas and Louisiana. In October 2010, in connection with the acquisition of the Rocky Mountain distribution business of Whole Foods Distribution, we took over the operations, including the assumption of an operating lease at a distribution center in Aurora,

Table of Contents

Colorado, augmenting our existing Aurora, Colorado distribution center, which was at capacity, in serving customers in Colorado, Utah, Arizona and New Mexico. In May 2013, we began operations at our new 540,000 square foot distribution center in Aurora, Colorado, replacing our existing two broadline distribution centers, an Albert's distribution center and an off-site storage location. In May 2013, we also began operations at our new Albert's distribution center in Logan, New Jersey. We have also announced a multi-year expansion project with additional distribution centers planned for the United States in Racine, Wisconsin in the village of Sturtevant, Hudson Valley, New York in the town of Montgomery as well as in Northern California.

Our net sales consist primarily of sales of natural, organic and specialty products to retailers, adjusted for customer volume discounts, returns and allowances. Net sales also consist of amounts charged by us to customers for shipping and handling and fuel surcharges. The principal components of our cost of sales include the amounts paid to manufacturers and growers for product sold, plus the cost of transportation necessary to bring the product to our distribution centers. Cost of sales also includes amounts incurred by us at our manufacturing subsidiary, Woodstock Farms Manufacturing, for inbound transportation costs and depreciation for manufacturing equipment, offset by consideration received from suppliers in connection with the purchase or promotion of the suppliers' products. Our gross margin may not be comparable to other similar companies within our industry that may include all costs related to their distribution network in their costs of sales rather than as operating expenses. We include purchasing and outbound transportation expenses within our operating expenses rather than in our cost of sales. Total operating expenses include salaries and wages, employee benefits (including payments under our Employee Stock Ownership Plan), warehousing and delivery, selling, occupancy, insurance, administrative, share-based compensation, depreciation and amortization expense. Other expenses (income) include interest on our outstanding indebtedness, including the financing obligation related to our Aurora, Colorado distribution center, interest income and miscellaneous income and expenses. Fiscal year 2013 other expense also includes a pre-tax charge of \$4.9 million in the first quarter related to an agreement to settle a multi-state unclaimed property audit.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. The Securities and Exchange Commission has defined critical accounting policies as those that are both most important to the portrayal of our financial condition and results and require our most difficult, complex or subjective judgments or estimates. Based on this definition, we believe our critical accounting policies are:

(i) determining our allowance for doubtful accounts, (ii) determining our reserves for the self-insured portions of our workers' compensation and automobile liabilities and (iii) valuing goodwill and intangible assets. For all financial statement periods presented, there have been no material modifications to the application of these critical accounting policies.

Allowance for doubtful accounts

We analyze customer creditworthiness, accounts receivable balances, payment history, payment terms and historical bad debt levels when evaluating the adequacy of our allowance for doubtful accounts. In instances where a reserve has been recorded for a particular customer, future sales to the customer are conducted using either cash-on-delivery terms, or the account is closely monitored so that as agreed upon payments are received, orders are released; a failure to pay results in held or cancelled orders. Our accounts receivable balance was \$339.6 million and \$305.2 million, net of the allowance for doubtful accounts of \$9.3 million and \$6.2 million, as of August 3, 2013 and July 28, 2012, respectively. Our notes receivable balances were \$3.3 million and \$3.7 million, net of the allowance for doubtful accounts of \$0.8 million and \$0.7 million, as of August 3, 2013 and July 28, 2012, respectively.

Insurance reserves

We are primarily self-insured for workers' compensation, and general and automobile liability insurance. It is our policy to record the self-insured portions of our workers' compensation and automobile liabilities based upon actuarial methods of estimating the future cost of claims and related expenses that have been reported but not settled, and that have been incurred but not yet reported. Any projection of losses concerning workers' compensation and automobile liability is subject to a considerable degree of variability. Among the causes of this variability are unpredictable external factors affecting litigation trends, benefit level changes and claim settlement patterns. If actual claims

incurred are greater than those anticipated, our reserves may be insufficient and additional costs could be recorded in our consolidated financial statements. Accruals for workers' compensation and automobile liabilities totaled \$18.5 million and \$19.5 million as of August 3, 2013 and July 28, 2012, respectively.

Valuation of goodwill and intangible assets

Table of Contents

We are required to test goodwill for impairment at least annually, and between annual tests if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. We have elected to perform our annual tests for indications of goodwill impairment during the fourth quarter of each fiscal year. We test for goodwill impairment at the reporting unit level, which are at or one level below the operating segment level. Beginning in fiscal 2012, the first step in our annual assessment of each of our reporting units is a qualitative assessment as allowed under Accounting Standards Update ("ASU") No. 2011-08, Intangibles—Goodwill and Other (Topic 350): Testing Goodwill for Impairment ("ASU 2011-08"), unless we believe it is more likely than not that a reporting unit's fair value is less than the carrying value. In order to qualify for an exclusion from the quantitative two-step goodwill test, the thresholds used by the Company for this determination are that a reporting unit must (1) have passed its previous two-step test with a margin of calculated fair value versus carrying value of at least 20%, (2) have had no significant changes to its working capital structure, and (3) have current year income which is at least 85% of prior year amounts. For reporting units which do not meet this exclusion, the quantitative goodwill impairment analysis is a two-step test. The first step, used to identify potential impairment, involves comparing each reporting unit's estimated fair value to its carrying value, including goodwill. Each reporting unit regularly prepares discrete operating forecasts and uses these forecasts as the basis for the assumptions used in the discounted cash flow analysis. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is considered not to be impaired. If the carrying value exceeds estimated fair value, there is an indication of potential impairment and the second step is performed to measure the amount of impairment. If required, the second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated potential impairment. The implied fair value of goodwill is determined in a manner similar to the amount of goodwill calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit, as determined in the first step, over the aggregate estimated fair values of the individual assets, liabilities and identifiable intangibles as if the reporting unit was being acquired in a business combination. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess.

As of August 3, 2013, our annual assessment of each of our reporting units indicated that no impairment of goodwill existed. Approximately 91.2% of our goodwill is within our wholesale reporting unit. Total goodwill as of August 3, 2013 and July 28, 2012 was \$201.9 million and \$193.7 million, respectively.

Intangible assets with indefinite lives are tested for impairment at least annually and between annual tests if events occur or circumstances change that would indicate that the value of the asset may be impaired. In accordance with ASU No. 2012-02, Intangibles - Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment ("ASU No. 2012-02"), we analyzed several qualitative factors to determine whether it was more likely than not that an indefinite-lived intangible asset was impaired as a basis for determining whether it is necessary to perform the quantitative impairment test. Impairment would be measured as the difference between the fair value of the asset and its carrying value. During fiscal 2012, our long-term plans related to the trade name of a portion of our Canadian wholesale distribution business evolved, and we decided to phase out this trade name. As a result, we began amortizing this trade name over a period of ten years. As a result, our branded product line asset group is the only remaining indefinite lived intangible asset. As of our most recent annual impairment review, the branded product line asset group was determined not to be impaired. The qualitative factors used in the impairment assessment for the branded product line asset group included a review of the most recent quantitative impairment review through which we confirmed that fair value exceeded carrying value by at least 20% and that pre-tax operating income was at least 85% of the prior year. We believe these projections are reasonable based on our historical trends and expectation of future results. Total indefinite lived intangible assets as of August 3, 2013 and July 28, 2012 were \$28.3 million and \$28.2 million, respectively.

Intangible assets with finite lives are tested for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Cash flows expected to be generated by the related assets are estimated over the asset's useful life based on updated projections. If the evaluation indicates that the carrying amount of the asset may not be recoverable, the potential impairment is measured based on a projected discounted cash flow model.

During the fiscal year ended August 3, 2013, an impairment charge of \$1.6 million was recognized in connection with the termination of a long-term licensing agreement and the write-off of the associated intangible asset. Total finite-lived intangible assets as of August 3, 2013 and July 28, 2012 were \$21.3 million and \$24.3 million, respectively.

The assessment of the recoverability of goodwill and intangible assets will be impacted if estimated future cash flows are not achieved.

Results of Operations

The following table presents, for the periods indicated, certain income and expense items expressed as a percentage of net sales:

Table of Contents

	Fiscal year ended					
	August 3, 2013		July 28, 2012		July 30, 2011	
Net sales	100.0	%	100.0	%	100.0	%
Cost of sales	83.1	%	82.5	%	81.8	%

Fiscal year ended August 3, 2013 compared to fiscal year ended July 28, 2012

Net Sales

Our net sales for the fiscal year ended August 3, 2013 increased approximately 15.8%, or \$828 million, to a record \$6.06 billion from \$5.24 billion for the fiscal year ended July 28, 2012. This increase was primarily due to growth in our wholesale segment of \$821.8 million. Our organic growth (sales growth excluding the impact of acquisitions) of 14.8% is due to the continued growth of the natural and organic products industry in general, increased market share as a result of our focus on service and value added services, and a broader selection of products, including specialty foods. In addition to net sales growth attributable to our organic growth, we also benefited from the inclusion of \$53.8 million in incremental net sales related to our acquisitions of certain assets of three distributors completed during the first quarter of fiscal 2013. Our net sales for the fiscal year ended August 3, 2013 were also favorably impacted by approximately 2.2%, or \$118.7 million, due to the addition of an extra week in the fiscal year compared to fiscal 2012, and by moderate price inflation of approximately 2% during the year.

Our net sales by customer type for the years ended August 3, 2013 and July 28, 2012 were as follows (in millions):

Customer Type	2013	% of Total	2012	% of Total
	Net Sales	Net Sales	Net Sales	Net Sales
Independently owned natural products retailers	\$2,040	34	% \$1,847	35
Supernatural chains	2,207	36	% 1,883	36
Conventional supermarkets	1,501	25	% 1,246	24
Other	316	5	% 260	5
Total	\$6,064	100	% \$5,236	100

Net sales to our independent retailer channel increased by approximately \$193 million, or 10.4% during the year ended August 3, 2013 compared to the year ended July 28, 2012. While net sales in this channel have increased, they have grown at a slower rate than net sales in our supernatural and conventional supermarket channels, and therefore represent a lower percentage of our total net sales compared to the prior year.

Whole Foods Market is our only supernatural chain customer, and net sales to Whole Foods Market for the year ended August 3, 2013 increased by approximately \$324 million or 17.2% over the prior year and accounted for approximately 36% of our total net sales for each of the years ended August 3, 2013 and July 28, 2012. The increase in sales to Whole Foods Market is primarily due to the increases in same-store sales, and to a lesser extent, the

expanded primary distribution agreement noted above.

28

Table of Contents

Net sales to conventional supermarkets for the year ended August 3, 2013 increased by approximately \$255 million, or 20.5% from fiscal 2012 and represented approximately 25% of total net sales in fiscal 2013 compared to 24% in fiscal 2012. The increase in net sales to conventional supermarkets is due to increased demand for our products, conventional supermarkets expanding the breadth of products carried in their stores, and the additional two months of sales in fiscal 2013 versus the ten months of sales in fiscal 2012 to a large national customer which we began servicing during the first quarter of fiscal 2012.

Other net sales, which include sales to foodservice and sales from the United States to countries other than Canada, as well as sales through our retail division, manufacturing division, and our branded product lines, increased by approximately \$56 million or 21.5% during the fiscal year ended August 3, 2013 over the prior fiscal year and accounted for approximately 5% of total net sales in fiscal 2013 and fiscal 2012. The increase in other net sales was primarily driven by an increase in broadline distribution sales to foodservice customers.

As we continue to aggressively pursue new customers and as economic conditions continue to stabilize, we expect net sales for fiscal 2014 to grow over fiscal 2013. We believe that the integration of our specialty business into our national platform has allowed us to attract customers that we would not have been able to attract without that business and will continue to allow us to pursue a broader array of customers as many customers seek a single source for their natural, organic and specialty products. We believe that our projected sales growth will come from both sales to new customers and an increase in the number of products that we sell to existing customers. We expect that most of this sales growth will occur in our lower gross margin supernatural and conventional supermarket channels. Although sales to these customers typically generate lower gross margins than sales to customers within our independent retailer channel, they also typically carry a lower average cost to serve than sales to our independent customers. We also believe that food price inflation similar to the levels experienced in fiscal 2013 will contribute to our projected net sales growth in fiscal 2014.

Cost of Sales and Gross Profit

Our gross profit increased approximately 11.9%, or \$109.1 million, to \$1.03 billion for the year ended August 3, 2013, from \$916.0 million for the year ended July 28, 2012. Our gross profit as a percentage of net sales was 16.9% for the year ended August 3, 2013 and 17.5% for the year ended July 28, 2012. The decrease in gross profit as a percentage of net sales is primarily due to the continued change in the mix of net sales by channel that began during the second fiscal quarter of 2010, as well as a reduced number of promotional opportunities driven by higher supplier out of stocks and the increased sales of customers' private label brands, which carry a lower gross margin, combined with higher inbound freight costs. Our decision to maintain higher service levels despite greater supplier out of stocks also negatively impacted our gross margin in fiscal 2013 due to increased costs to move freight on an expedited basis and between our facilities.

Our gross profits are generally higher on net sales to independently owned retailers and lower on net sales in the conventional supermarket and the supernatural channels. For the year ended August 3, 2013 approximately \$579 million of our total net sales growth of \$828 million was from increased net sales in the conventional supermarket and supernatural channels. As a result, approximately 61% of our total net sales in fiscal 2013 were to the conventional supermarket and supernatural channels compared to approximately 60% in fiscal 2012. This change in sales mix from 2012 to 2013 resulted in lower gross profits as a percentage of net sales during fiscal 2013 than we experienced in fiscal 2012. We anticipate net sales growth in the conventional supermarket and supernatural channels will continue to outpace growth in the independent and other channels.

We expect that our growth with Whole Foods Market and our opportunities in the conventional supermarket channel will continue to generate lower gross profit percentages than our historical rates, particularly during the time period when we are on-boarding new business and incurring costs of hiring and training additional associates and increasing inventory levels before a new customer has reached expected purchasing levels. We will seek to fully offset these reductions in gross profit percentages by reducing our operating expenses as a percentage of net sales primarily through improved efficiencies in our supply chain and improvements to our information technology infrastructure.

Operating Expenses

Our total operating expenses increased approximately 10.3%, or \$78.7 million, to \$839.6 million for the year ended August 3, 2013, from \$760.8 million for the year ended July 28, 2012. The increase in total operating expenses for the

year ended August 3, 2013 was primarily due to higher sales volume, approximately \$6.3 million in labor action related costs at our Auburn, Washington facility and approximately \$1.6 million related to the termination of a licensing agreement and write-off of the associated intangible asset. Operating expenses for the year ended July 28, 2012 included \$5.1 million of severance and other restructuring expenses associated with the divestiture of our conventional non-food and general merchandise lines of business and \$1.6 million in start-up expenses incurred in connection with onboarding a large national conventional supermarket customer.

Total operating expenses for fiscal 2013 include share-based compensation expense of \$15.1 million, compared to \$11.4 million in fiscal 2012. Share-based compensation expense for the years ended August 3, 2013 and July 28, 2012 includes

Table of Contents

approximately \$1.5 million and \$1.7 million, respectively, in expense related to performance share-based awards granted to our Chief Executive Officer related to certain financial goals for those years ended August 3, 2013 and July 28, 2012. The Company recorded \$1.7 million and \$0.4 million for the years ended August 3, 2013 and July 28, 2012, respectively, related to performance-based equity compensation arrangements with a 2-year performance-based vesting component that was established for members of our executive leadership team. See Note 3 "Equity Plans" to our Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data" of this Annual Report on Form 10-K.

As a percentage of net sales, total operating expenses decreased to approximately 13.8% for the year ended August 3, 2013, from approximately 14.5% for the year ended July 28, 2012. The decrease in total operating expenses as a percentage of net sales was primarily attributable to the growth in the supernatural and conventional supermarket channels which in general have lower operating expenses and higher fixed cost coverage due to higher sales, as well as expense control programs across all of our divisions. Our operating expenses as a percentage of net sales for fiscal 2013 were negatively impacted by \$6.3 million in labor action related costs at our Auburn, Washington facility and approximately \$1.6 million related to the termination of a licensing agreement and write-off of the associated intangible asset. We were able to manage our fuel costs despite rising prices by locking in the price of a portion of our expected fuel usage, updating and revising existing routes to reduce miles traveled and optimize use of trailer space, reducing idle times and other similar measures. We expect that we will be able to continue to reduce our operating expenses as we continue the roll-out of our supply chain initiatives including a national warehouse management and procurement system, which was first launched in the Lancaster, Texas facility in September 2010, launched in the Ridgefield, Washington facility in July 2012 and is expected to be rolled out in all of our existing, broadline distribution centers by the end of fiscal 2017.

Operating Income

Operating income increased approximately 19.6%, or \$30.3 million, to \$185.5 million for the year ended August 3, 2013, from \$155.2 million for the year ended July 28, 2012. As a percentage of net sales, operating income was 3.1% for the year ended August 3, 2013 compared to 3.0% for the year ended July 28, 2012. The increase in operating income is primarily attributable to sales growth and lower operating expenses as a percentage of net sales during fiscal 2013 compared to fiscal 2012.

Other Expense (Income)

Other expense (income) increased \$7.0 million to \$11.4 million for the year ended August 3, 2013, from \$4.4 million for the year ended July 28, 2012. Other expense for the year ended August 3, 2013 includes a pre-tax charge of \$4.9 million related to an agreement to settle a multi-state unclaimed property audit. Interest expense for the year ended August 3, 2013 increased to \$5.9 million from \$4.7 million in the year ended July 28, 2012 primarily due to \$0.7 million of non-cash interest expense related to the Aurora, Colorado facility as we are accounting for this facility under the financing method due to our meeting the criteria for continuing involvement in this sale-leaseback transaction. Interest income for the year ended August 3, 2013 decreased to \$0.6 million from \$0.7 million in the year ended July 28, 2012.

Provision for Income Taxes

Our effective income tax rate was 38.1% and 39.4% for the years ended August 3, 2013 and July 28, 2012, respectively. The decrease in the effective income tax rate was impacted by a net benefit for the reversal of uncertain tax positions for the year ended August 3, 2013, and one time tax credits associated with a renewable energy project in Moreno Valley, California. Our effective income tax rate in both fiscal years was also affected by increased state taxes resulting from the states in which we operate.

Net Income

Reflecting the factors described in more detail above, net income increased \$16.5 million to \$107.9 million, or \$2.18 per diluted share, for the year ended August 3, 2013, compared to \$91.3 million, or \$1.86 per diluted share for the year ended July 28, 2012.

Fiscal year ended July 28, 2012 compared to fiscal year ended July 30, 2011

Net Sales

Our net sales for the fiscal year ended July 28, 2012 increased approximately 15.6%, or \$706 million, to \$5.2 billion from \$4.5 billion for the fiscal year ended July 30, 2011. This increase was primarily due to growth in our wholesale segment of \$702.8 million, which includes net sales from a national conventional supermarket customer that began shipping in October 2011 and the strong performance of our UNFI Canada division. Our organic growth (sales growth excluding the impact of acquisitions) was due to the continued growth of the natural and organic products industry in general, increased market share as a result of our

Table of Contents

focus on service and value added services, and a broader selection of products, including specialty foods. We believe that the integration of our specialty business has allowed us to attract customers that we would not have been able to attract without that business as many customers seek a single source for their natural, organic and specialty products. Our net sales for the fiscal year ended July 28, 2012 were also favorably impacted by moderate price inflation. In addition to net sales growth attributable to our organic growth, we also benefited from the inclusion of \$25.4 million in incremental net sales resulting from expanded distribution to Whole Foods Market during fiscal 2012 following the acquisition of the Southwest and Rocky Mountain distribution business of Whole Foods Distribution and expanded distribution agreement with Whole Foods Market in the first quarter of fiscal 2011 and approximately \$4.2 million in sales resulting from our acquisition of substantially all of the assets of a specialty food distribution business in the Ontario market in November 2011.

Our net sales by customer type for the years ended July 28, 2012 and July 30, 2011 were as follows (in millions):

Customer Type	2012 Net Sales	% of Total Net Sales	2011 Net Sales	% of Total Net Sales
Independently owned natural products retailers	\$1,847	35 %	\$1,693	37 %
Supernatural chains	1,883	36 %	1,627	36 %
Conventional supermarkets	1,246	24 %	991	22 %
Other	260	5 %	219	5 %
Total	\$5,236	100 %	\$4,530	100 %

Net sales to our independent retailer channel increased by approximately \$154 million, or 9.1% during the year ended July 28, 2012 compared to the year ended July 30, 2011. While net sales in this channel have increased, they have grown at a slower rate than net sales in our supernatural and conventional supermarket channels, and therefore represent a lower percentage of our total net sales in fiscal 2012 compared to the prior year.

Whole Foods Market is our only supernatural chain customer, and net sales to Whole Foods Market for the year ended July 28, 2012 increased by approximately \$256 million or 15.8% over the prior year and accounted for approximately 36% of our total net sales for the years ended July 28, 2012 and July 30, 2011. The increase in sales to Whole Foods Market is primarily due to the increases in same-store sales, and to a lesser extent, the expanded primary distribution agreement noted above.

Net sales to conventional supermarkets for the year ended July 28, 2012 increased by approximately \$255 million, or 25.7% from fiscal 2011 and represented approximately 24% of total net sales in fiscal 2012 compared to 22% in fiscal 2011. The increase in net sales to conventional supermarkets was primarily due to a large national customer which we began servicing during the first quarter of fiscal 2012, as part of our strategy to be the sole supplier of natural, organic and specialty products to our conventional supermarket customers.

Other net sales, which include sales to foodservice and sales from the United States to countries other than Canada, as well as sales through our retail division, manufacturing division, and our branded product lines, increased by approximately \$41 million or 18.7% during the fiscal year ended July 28, 2012 over the prior fiscal year and accounted for approximately 5% of total net sales in fiscal 2012 and fiscal 2011.

Cost of Sales and Gross Profit

Our gross profit increased approximately 11.1%, or \$91.2 million, to \$916.0 million for the year ended July 28, 2012, from \$824.8 million for the year ended July 30, 2011. Our gross profit as a percentage of net sales was 17.5% for the year ended July 28, 2012 and 18.2% for the year ended July 30, 2011. The change in gross profit as a percentage of net sales is primarily due to the change in the mix of net sales by channel that began during the second quarter of fiscal 2010 as well as higher inventory shrink related to perishable items and improper storage of products in certain categories, and use of third parties for inbound freight during fiscal 2012, partially offset by higher fuel surcharge revenue during the year ended July 28, 2012.

Our gross profits are generally higher on net sales to independently owned retailers and lower on net sales in the conventional supermarket and the supernatural channels. For the year ended July 28, 2012 approximately \$512 million of our total net sales growth of \$706 million was from increased net sales in the conventional supermarket and

supernatural channels. As a result, approximately 60% of our total net sales in fiscal 2012 were to the conventional supermarket and supernatural channels compared to approximately 58% in fiscal 2011. This change in sales mix from 2011 to 2012 resulted in lower gross profits as a percentage of sales during fiscal 2012. We anticipate net sales growth in the conventional supermarket and supernatural channels

Table of Contents

will continue to outpace growth in the independent and other channels.

Operating Expenses

Our total operating expenses increased approximately 9.5%, or \$65.7 million, to \$760.8 million for the year ended July 28, 2012, from \$695.1 million for the year ended July 30, 2011. The increase in total operating expenses for the year ended July 28, 2012 was primarily due to higher sales volume, \$5.1 million of severance and other restructuring expenses associated with the divestiture of our conventional non-food and general merchandise lines of business and \$1.6 million in start-up expenses incurred in connection with onboarding a large national conventional supermarket customer. Operating expenses for the year ended July 30, 2011 included \$6.3 million in restructuring and asset impairment charges associated with the divestiture of our conventional non-foods and general merchandise lines of business.

Total operating expenses for fiscal 2012 include share-based compensation expense of \$11.4 million, compared to \$9.2 million in fiscal 2011. Share-based compensation expense for the years ended July 28, 2012 and July 30, 2011 includes approximately \$1.7 million and \$0.7 million, respectively, in expense related to performance share-based awards granted to our Chief Executive Officer related to certain financial goals for those various periods ended July 28, 2012 and July 30, 2011. During fiscal 2012, \$0.4 million was recognized related to a new performance-based equity compensation arrangement with a 2-year performance-based vesting component that was established for members of our executive leadership team. See Note 3 "Equity Plans" to our Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data" of this Annual Report on Form 10-K.

As a percentage of net sales, total operating expenses decreased to approximately 14.5% for the year ended July 28, 2012, from approximately 15.3% for the year ended July 30, 2011. The decrease in total operating expenses as a percentage of net sales was primarily attributable to the growth in the supernatural and conventional supermarket channels which in general have lower operating expenses, higher fixed cost coverage due to higher sales, as well as expense control programs across all of our divisions. We were able to manage our fuel costs despite rising prices by locking in the price of a portion of our expected fuel usage, updating and revising existing routes to reduce miles traveled, reducing idle times and other similar measures. Our expansion into Lancaster, Texas, where our facility began servicing customers in late September 2010, has helped to further reduce our fuel costs as a percentage of net sales as we are able to reduce the number of miles traveled to serve our customers in Texas, Oklahoma, New Mexico, Arkansas and Louisiana who were previously primarily served from our facility in Denver, Colorado. These improvements in our operating expenses were offset in part by higher health insurance costs, higher workers' compensation costs and the above described higher share-based compensation costs.

Operating Income

Operating income increased approximately 19.7%, or \$25.5 million, to \$155.2 million for the year ended July 28, 2012, from \$129.7 million for the year ended July 30, 2011. As a percentage of net sales, operating income was 3.0% for the year ended July 28, 2012 compared to 2.9% for the year ended July 30, 2011. The increase in operating income was primarily attributable to sales growth and lower operating expenses as a percentage of net sales during fiscal 2012 compared to fiscal 2011.

Other Expense (Income)

Other expense (income) increased \$1.2 million to \$4.4 million for the year ended July 28, 2012, from \$3.2 million for the year ended July 30, 2011. Interest expense for the year ended July 28, 2012 decreased to \$4.7 million from \$5.0 million in the year ended July 30, 2011, but was negatively impacted by \$0.3 million related to the settlement in the fourth quarter of fiscal 2012 of the interest rate swap that we entered into in July 2005 in connection with our term loan that we paid off in May 2012. The decrease in interest expense was due primarily to lower average debt levels during the year. Interest income for the year ended July 28, 2012 decreased to \$0.7 million from \$1.2 million in the year ended July 30, 2011, primarily as a result of lower average cash balances during the year.

Provision for Income Taxes

Our effective income tax rate was 39.4% for the years ended July 28, 2012 and July 30, 2011. Our effective income tax rate in both fiscal years was primarily affected by state taxes in the states in which we operate. Certain incentive

stock option expenses are not deductible for tax purposes unless a disqualifying disposition occurs. A disqualifying disposition occurs when the option holder sells shares within one year of exercising an incentive stock option and within two years of original grant. We receive a tax benefit in the period that the disqualifying disposition occurs. Our effective income tax rate will continue to be effected by the tax impact related to incentive stock options and the timing of tax benefits related to disqualifying dispositions, however we expect this impact to diminish as in recent years we have granted non-qualified stock options in lieu of incentive stock options.

Net Income

Table of Contents

Reflecting the factors described in more detail above, net income increased \$14.7 million to \$91.3 million, or \$1.86 per diluted share, for the year ended July 28, 2012, compared to \$76.7 million, or \$1.60 per diluted share on a lower share base, for the year ended July 30, 2011.

Liquidity and Capital Resources

We finance our day to day operations and growth primarily with cash flows from operations, borrowings under our credit facility, operating leases, trade payables and bank indebtedness. In addition, from time to time, we may issue equity and debt securities to finance our operations and acquisitions. We believe that our cash on hand and available credit through our amended and restated revolving credit facility as discussed below is sufficient for our operations and planned capital expenditures over the next twelve months. We expect to generate an average of \$50 million to \$100 million in cash flow from operations per year for the 2014 and 2015 fiscal years. We intend to continue to utilize this cash generated from operations to fund acquisitions, fund investment in working capital and capital expenditure needs, including expansion of our distribution facilities, and reduce our debt levels. We intend to manage capital expenditures to approximately 1.4% of net sales for fiscal 2014, reflecting an increase over levels experienced in fiscal 2012 and fiscal 2013 as we construct new distribution centers in New York and Wisconsin in fiscal 2014. We expect to finance these requirements with cash generated from operations and borrowings under our amended and restated revolving credit facility. Our planned capital projects will provide both new and expanded facilities as well as technology that we believe will provide us with increased efficiency and the capacity to continue to support the growth of our customer base. Future investments and acquisitions may be financed through equity, long-term debt negotiated at the time of the potential acquisition or borrowings under our amended and restated revolving credit facility.

In May 2012, we amended and restated our revolving credit facility, pursuant to which we now have a \$500 million revolving credit facility which matures on May 24, 2017, of which up to \$450.0 million is available to our U.S. subsidiaries and up to \$50.0 million is available to UNFI Canada. This credit facility also provides a one-time option, subject to approval by the lenders under the revolving credit facility, to increase the borrowing base by up to an additional \$100 million. The borrowings of the US portion of the credit facility accrue interest, at our option, at either (i) a base rate (generally defined as the highest of (x) the Bank of America Business Capital prime rate, (y) the average overnight federal funds effective rate plus one-half percent (0.50%) per annum and (z) one-month LIBOR plus one percent (1%) per annum plus an initial margin of 0.50%, or (ii) LIBOR for one, two, three or six months or, if approved by all affected lenders, nine months plus an initial margin of 1.50%. The borrowings on the Canadian portion of the credit facility for Canadian swing-line loans, Canadian overadvance loans or Canadian protective advances accrue interest, at our option, at either (i) a prime rate (generally defined as the highest of (x) 0.50% over 30-day Reuters Canadian Deposit Offering Rate for bankers' acceptances, (y) the prime rate of Bank of America, N.A.'s Canada branch, and (z) a bankers' acceptance equivalent rate for a one month interest period plus 1.00% plus an initial margin of 0.50%, or (ii) the CDOR rate, and an initial margin of 1.50%. All other borrowings on the Canadian portion of the credit facility must exclusively accrue interest under the CDOR rate plus the applicable margin. The revolving credit facility supports our working capital requirements in the ordinary course of business and provides capital to grow our business organically or through acquisitions. Our borrowing base is determined as the lesser of (1) \$500 million or (2) the fixed percentages of our previous fiscal month-end eligible accounts receivable and inventory levels. As of August 3, 2013, our borrowing base, based on eligible accounts receivable and inventory levels, was \$484.5 million. As of August 3, 2013, the Company had \$130.6 million outstanding under our credit facility, \$31.8 million in letter of credit commitments and \$2.9 million in reserves which generally reduces our available borrowing capacity under its revolving credit facility on a dollar for dollar basis. Our resulting remaining availability was \$319.3 million as of August 3, 2013. The revolving credit facility, as amended and restated, subjects us to a springing minimum fixed charge coverage ratio (as defined in the underlying credit agreement) of 1.0 to 1.0 calculated at the end of each of our fiscal quarters on a rolling four quarter basis when aggregate availability (as defined in the underlying credit agreement) is less than the greater of (i) \$35.0 million and (ii) 10% of the aggregate borrowing base. We were not subject to fixed charge coverage ratio covenants as of the fiscal year ended August 3, 2013.

Our amended and restated revolving credit facility includes borrowing rates that are approximately 50 to 100 basis points higher than our prior revolving credit facility, depending on remaining availability. However, we do not expect our overall interest expense to increase significantly if rates remain relatively stable as we have terminated our higher fixed rate interest rate swap, which covered our term loan.

In connection with amending and restating our revolving credit facility, we used a portion of our availability to pay off our term loan agreement, which was to mature on July 28, 2012. At that time, our interest rate swap entered into in July 2005 was settled concurrently with a payment of \$0.3 million which is reflected within interest expense during the fiscal year ended July 28, 2012.

Our capital expenditures for the 2013 fiscal year were \$66.6 million, compared to \$31.5 million for fiscal 2012, primarily driven by construction of our new Aurora, Colorado distribution center. We believe that our capital requirements for fiscal 2014

Table of Contents

will be between \$80 and \$95 million. We expect to finance these requirements with cash generated from operations and borrowings under our revolving credit facility. Our planned capital projects will provide both additional warehouse space (including through the build out of our new Racine, Wisconsin distribution facility in the village of Sturtevant and our Hudson Valley, New York distribution facility in the town of Montgomery) and technology that we believe will provide us with increased efficiency and the capacity to continue to support the growth of our customer base. We believe that our future capital requirements after fiscal 2014 will be marginally lower than our anticipated fiscal 2014 requirements, as a percentage of net sales, although we plan to continue to invest in technology and expand our facilities. Future investments and acquisitions will be financed through our revolving credit facility, or with the issuance of equity or long-term debt, negotiated at the time of the potential acquisition.

Net cash provided by operations was \$44.3 million for the year ended August 3, 2013, a decrease of \$21.9 million from the \$66.2 million provided by operations for the year ended July 28, 2012. The primary reasons for the decrease in cash flows from operations for the year ended August 3, 2013 were an increase in inventories of \$123.9 million in part as a response to higher supplier out of stocks, and an increase in accounts receivable of \$37.3 million due to our sales growth during the year, partially offset by net income of \$107.9 million. Net cash provided by operations of \$49.8 million for the year ended July 30, 2011 was primarily the result of an increase in net income, partially offset by changes in working capital. Days in inventory was 52 days at August 3, 2013, compared to 50 days at July 28, 2012. The increase in inventory is due in part to efforts to stabilize service levels. Days sales outstanding decreased from 22 at July 28, 2012 to 21 days at August 3, 2013. Working capital increased by \$104.3 million, or 17.0%, to \$717.0 million at August 3, 2013, compared to working capital of \$612.7 million at July 28, 2012, primarily as a result of the increase in our inventory balances.

Net cash used in investing activities increased \$37.9 million to \$72.3 million for the year ended August 3, 2013, compared to \$34.5 million for the year ended July 28, 2012. The increase from the fiscal year ended July 28, 2012 was primarily due to an increase in capital spending associated with our Logan, New Jersey distribution center coupled with the acquisition of certain assets of three distribution companies during the first quarter of fiscal 2013.

Net cash used in investing activities of \$62.7 million for the year ended July 30, 2011 was primarily due to the purchase of the Rocky Mountain and Southwest distribution business of Whole Foods Distribution, a wholly owned subsidiary of Whole Foods Market, during the year ended July 30, 2011.

Net cash provided by financing activities was \$22.3 million for the year ended August 3, 2013, primarily due to borrowings, net of repayments, under our amended and restated revolving credit facility of \$15.9 million. Net cash used in financing activities was \$32.8 million for the year ended July 28, 2012, primarily due to repayments on long-term debt of \$47.4 million as we paid off our term loan with availability under our amended and restated revolving credit facility. Net cash provided by financing activities was \$16.3 million for the year ended July 30, 2011, primarily due to net proceeds from our secondary equity offering of \$138.3 million, partially offset by net repayments on borrowings on notes payable of \$127.6 million.

We may from time to time enter into commodity swap agreements to reduce price risk associated with our anticipated purchases of diesel fuel. These commodity swap agreements hedge a portion of our expected fuel usage for the periods set forth in the agreements. We monitor the commodity (NYMEX #2 Heating oil) used in our swap agreements to determine that the correlation between the commodity and diesel fuel is deemed to be "highly effective." During the fiscal years ended August 3, 2013 and July 28, 2012, we had no outstanding commodity swap agreements.

In addition to the previously discussed interest rate and commodity swap agreements, from time-to-time we enter into fixed price fuel supply agreements. As of August 3, 2013, we are not a party to any agreements which required us to purchase diesel fuel. As of July 28, 2012, we had entered into agreements which required us to purchase a total of approximately 4.3 million gallons of diesel fuel at prices ranging from \$3.33 to \$3.91 per gallon through July 2013. These fixed price fuel agreements qualified for the "normal purchase" exception under ASC 815, Derivatives and Hedging as physical deliveries will occur rather than net settlements, therefore the fuel purchases under these contracts will be expensed as incurred and included within operating expenses.

Commitments and Contingencies

The following schedule summarizes our contractual obligations and commercial commitments as of August 3, 2013:

Table of Contents

	Payments Due by Period				
	Total	Less than One Year	1–3 Years	3–5 Years	Thereafter
	(in thousands)				
Inventory purchase commitments	\$26,478	\$26,478			
Notes payable (1)	130,594	—	—	130,594	
Long-term debt (2)	34,110	1,019	2,194	2,391	28,506
Deferred compensation	12,287	1,163	2,640	2,227	6,257
Long-term non-capitalized leases	327,639	44,140	82,432	64,396	136,671
Total	\$531,108	\$72,800	\$87,266	\$199,608	\$171,434

(1) The notes payable obligations shown reflect the expiration of the credit facility, not necessarily the underlying individual borrowings. Notes payable does not include outstanding letters of credit of approximately \$31.8 million at August 3, 2013 nor approximately \$13.2 million in interest payments (including unused lines fees) projected to be due in future years (less than 1 year – \$3.4 million; 1–3 years – \$6.9 million; and 3-5 years \$2.8 million) based on the variable rates in effect at August 3, 2013. Variable rates, as well as outstanding principal balances, could change in future periods. See "Liquidity and Capital Resources" above and Note 6 "Notes Payable" to our Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data" of this Annual Report on Form 10-K for a discussion of our credit facility.

(2) Long-term debt does not include approximately \$26.2 million in interest payments projected to be due in future years (less than 1 year - \$1.9 million; 1-3 years - \$4.8 million; 3-5 years - \$4.5 million; thereafter - \$15.0 million). See Note 7 "Long-Term Debt" to our Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data" of this Annual Report on Form 10-K for a discussion of our long-term debt.

Included in other liabilities in the consolidated balance sheets at August 3, 2013, the Company has a liability, including potential interest and penalties, of \$1.4 million for uncertain tax positions that have been taken or are expected to be taken in various income tax returns. The Company does not know the ultimate resolution of these uncertain tax positions and as such, does not know the ultimate timing of payments related to this liability.

Accordingly, these amounts are not included in the table above.

Seasonality

Generally, we do not experience any material seasonality. However, our sales and operating results may vary significantly from quarter to quarter due to factors such as changes in our operating expenses, management's ability to execute our operating and growth strategies, personnel changes, demand for natural products, supply shortages and general economic conditions.

Recently Issued Financial Accounting Standards

In February 2013, the Financial Accounting Standards Board issued ASU No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income ("ASU No. 2013-02"). This update supersedes the presentation requirements for reclassifications out of accumulated other comprehensive income in ASU No. 2011-05, Presentation of Comprehensive Income, and ASU No. 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassification of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. ASU No. 2013-02 requires an entity to provide information about amounts reclassified out of accumulated other comprehensive income by component and to present, either on the face of the financial statements or in a single note, any significant amount reclassified out of accumulated other comprehensive income in its entirety in the period, and the income statement line item affected by the reclassification. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. ASU No. 2013-02 is effective for annual reporting periods that begin after December 15, 2012, which will be the first quarter of our fiscal year ending August 2, 2014. The adoption of ASU No. 2013-02 is not expected to have a material impact on the presentation of our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to interest rate fluctuations on our borrowings. As more fully described in Note 8 "Fair Value Measurements" to the Consolidated Financial Statements included in "Item 8. Financial Statements and Supplementary Data" of this Annual Report on Form 10-K, we have used interest rate swap agreements to modify variable rate obligations to fixed rate obligations.

Table of Contents

During the fiscal year ended July 28, 2012, we were a party to an interest rate swap agreement entered into in July 2005 (the "2005 swap"), which was set to expire in July 2012 concurrent with the maturity of our term loan. The 2005 swap was terminated in connection with our repayment of all borrowings under the term loan during the fourth quarter of fiscal 2012. The 2005 swap had an initial notional principal amount of \$50 million and provided for us to pay interest for a seven-year period at a fixed rate of 4.70% while receiving interest for the same period at one-month LIBOR on the same notional principal amount. The 2005 swap had an amortizing notional amount which adjusted down on the dates payments were due on the underlying term loan. The 2005 swap had been entered into as a hedge against LIBOR movements on current variable rate indebtedness at one-month LIBOR plus 1.00%, thereby fixing our effective rate on the notional amount at 5.70%. We accounted for the 2005 swap using hedge accounting treatment because the derivative was determined to be highly effective in achieving offsetting changes in cash flows of the hedged item. Under this method of accounting, we had recorded a liability of \$1.3 million representing the fair value of the swap as of July 30, 2011. There was no liability recorded as of July 28, 2012 due to the settlement of the swap in conjunction with the payoff of the underlying term loan in May 2012. We do not enter into derivative agreements for trading purposes.

At August 3, 2013, we had long-term floating rate debt under our amended and restated revolving credit facility of \$130.6 million and long-term fixed rate debt of \$0.6 million, representing 99.5% and 0.5%, respectively, of our long-term borrowings. At July 28, 2012, we had long-term floating rate debt under our amended and restated revolving credit facility of \$115.0 million and long-term fixed rate debt of \$1.0 million, representing 99.1% and 0.9%, respectively, of our long-term borrowings. Holding other debt levels constant, a 25 basis point decrease in interest rates would change the unrealized fair market value of the fixed rate debt by approximately \$0.6 million and \$3,000 at August 3, 2013 and July 28, 2012, respectively. The increase from the prior year is due to the financing obligation recorded related to our Aurora, Colorado facility.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

United Natural Foods, Inc.:

We have audited the accompanying consolidated balance sheets of United Natural Foods, Inc. and subsidiaries as of August 3, 2013 and July 28, 2012, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the fiscal years in the three-year period ended August 3, 2013. We also have audited United Natural Foods, Inc.'s internal control over financial reporting as of August 3, 2013, based on criteria established in the Internal Control-Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). United Natural Foods, Inc.'s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of United Natural Foods, Inc. and subsidiaries as of August 3, 2013 and July 28, 2012, and the results of their operations and their cash flows for each of the fiscal years in the three-year period ended August 3,

2013, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of August 3, 2013, based on criteria established in Internal Control-Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

UNITED NATURAL FOODS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Nature of Business

United Natural Foods, Inc. and subsidiaries (the "Company") is a leading distributor and retailer of natural, organic and specialty products. The Company sells its products primarily throughout the United States and Canada.

(b) Basis of Presentation

The accompanying financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. Certain prior year amounts have been reclassified to conform to the current year's presentation.

The fiscal year of the Company ends on the Saturday closest to July 31. Fiscal 2013, 2012 and 2011 ended on August 3, 2013, July 28, 2012 and July 30, 2011, respectively. Fiscal year 2013 contained 53 weeks and fiscal years 2012 and 2011 each contained 52 weeks. Each of the Company's interim quarters consisted of 13 weeks except for the fourth quarter of fiscal year 2013 which contained 14 weeks.

Net sales consists primarily of sales of natural, organic and specialty products to retailers, adjusted for customer volume discounts, returns and allowances. Net sales also includes amounts charged by the Company to customers for shipping and handling, and fuel surcharges. The principal components of cost of sales include the amount paid to manufacturers and growers for product sold, plus the cost of transportation necessary to bring the product to the Company's distribution centers. Cost of sales also includes amounts incurred by the Company's manufacturing subsidiary, United Natural Trading Co., which does business as Woodstock Farms Manufacturing, for inbound transportation costs and depreciation for manufacturing equipment offset by consideration received from suppliers in connection with the purchase or promotion of the suppliers' products. Operating expenses include salaries and wages, employee benefits (including payments under the Company's Employee Stock Ownership Plan), warehousing and delivery, selling, occupancy, insurance, administrative, share-based compensation and amortization expense. Operating expenses also include depreciation expense related to the wholesale and retail divisions. Other expense (income) includes interest on outstanding indebtedness, interest income and miscellaneous income and expenses. The consolidated statements of cash flows for the fiscal years ended July 28, 2012 and July 30, 2011 have been adjusted to properly present proceeds and borrowings related to the Company's revolving credit facility on a gross basis. These amounts were previously presented on a net basis. The revisions were not material to the Company's consolidated financial statements as a whole.

(c) Cash Equivalents

Cash equivalents consist of highly liquid investments with original maturities of three months or less.

(d) Inventories and Cost of Sales

Inventories consist primarily of finished goods and are stated at the lower of cost or market, with cost being determined using the first-in, first-out (FIFO) method. Allowances received from suppliers are recorded as reductions in cost of sales upon the sale of the related products.

(e) Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. Equipment under capital leases is stated at the lower of the present value of minimum lease payments at the inception of the lease or the fair value of the asset. As of August 3, 2013, property and equipment includes the Company's non-cash capital expenditures made by the landlord for our Aurora, Colorado distribution center and related accumulated depreciation. Refer to Note 7, Long-Term Debt, for additional information regarding this transaction. Depreciation and amortization of property and equipment is computed on a straight-line basis, over the estimated useful lives of the assets or, when applicable, the life of the lease, whichever is shorter.

Applicable interest charges incurred during the construction of new facilities may be capitalized as one of the elements of cost and amortized over the assets' estimated useful lives. There was no interest capitalized during the fiscal years ended August 3, 2013, July 28, 2012 or July 30, 2011.

Property and equipment consisted of the following at August 3, 2013 and July 28, 2012:

Table of Contents

	Original Estimated Useful Lives (Years) (In thousands, except years)	2013	2012
Land		\$12,950	\$13,311
Buildings and improvements	20-40	192,837	160,940
Leasehold improvements	5-20	97,749	85,648
Warehouse equipment	3-30	117,999	104,310
Office equipment	3-10	74,003	68,674
Computer software	3-7	63,333	50,998
Motor vehicles	3-7	4,461	4,562
Construction in progress		23,298	12,072
		586,630	500,515
Less accumulated depreciation and amortization		248,036	222,060
Net property and equipment		\$338,594	\$278,455

Depreciation expense amounted to \$37.6 million, \$35.2 million and \$31.1 million for the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively.

(f) Income Taxes

The Company accounts for income taxes under the asset and liability method. Under the asset and liability method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The Company recognizes interest and penalties related to income taxes as a component of income tax expense.

(g) Long-Lived Assets

Management reviews long-lived assets, including finite-lived intangible assets, for indicators of impairment whenever events or changes in circumstances indicate that the carrying value of the assets may not be recoverable. Cash flows expected to be generated by the related assets are estimated over the assets' useful lives based on updated projections. If the evaluation indicates that the carrying amount of an asset may not be recoverable, the potential impairment is measured based on a projected discounted cash flow model.

(h) Goodwill and Intangible Assets

Goodwill represents the excess of cost over the fair value of net assets acquired in a business combination. Goodwill and other intangible assets with indefinite lives are not amortized. Intangible assets with definite lives are amortized on a straight-line basis over the following lives:

Customer relationships	7-10 years
Trademarks and tradenames	4-10 years

Goodwill is assigned to the reporting units that are expected to benefit from the synergies of the business combination. The Company is required to test goodwill for impairment at least annually, and between annual tests if events occur or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. The Company has elected to perform its annual tests for indications of goodwill impairment during the fourth quarter of each fiscal year.

The Company's reporting units are at or one level below the operating segment level. Approximately 91.2% of the Company's goodwill is within its wholesale reporting unit. In accordance with Accounting Standards Update ("ASU") No. 2011-08, Intangibles- Goodwill and Other (Topic 350): Testing Goodwill for Impairment ("ASU 2011-08"), the Company is allowed to perform a qualitative assessment for goodwill impairment unless it believes it is more likely than not that a reporting

Table of Contents

unit's fair value is less than the carrying value. The thresholds used by the Company for this determination in fiscal 2013 were for any reporting units that (1) have passed their previous two-step test with a margin of calculated fair value versus carrying value of at least 20%, (2) have had no significant changes to their working capital structure, and (3) have current year income which is at least 85% of prior year amounts. Based on the qualitative assessment performed for fiscal 2013, all of the Company's reporting units met these thresholds. As each reporting unit's net income has not decreased more than 15% and their working capital requirements have not increased significantly, no quantitative testing was performed in fiscal 2013.

If a reporting unit did not meet the thresholds above, the Company would have performed a two-step goodwill impairment analysis. The first step to identify potential impairment, involves comparing each reporting unit's estimated fair value to its carrying value, including goodwill. Each reporting unit regularly prepares discrete operating forecasts and uses these forecasts as the basis for the assumptions used in the discounted cash flow analysis. If the estimated fair value of a reporting unit exceeds its carrying value, goodwill is considered not to be impaired. If the carrying value exceeds estimated fair value, there is an indication of potential impairment and the second step is performed to measure the amount of impairment. If required, the second step involves calculating an implied fair value of goodwill for each reporting unit for which the first step indicated potential impairment. The implied fair value of goodwill is determined in a manner similar to the amount of goodwill calculated in a business combination, by measuring the excess of the estimated fair value of the reporting unit, as determined in the first step, over the aggregate estimated fair values of the individual assets, liabilities and identifiable. If the implied fair value of goodwill exceeds the carrying value of goodwill assigned to the reporting unit, there is no impairment. If the carrying value of goodwill assigned to a reporting unit exceeds the implied fair value of the goodwill, an impairment charge is recorded for the excess.

Intangible assets with indefinite lives are tested for impairment at least annually during the fourth quarter and any affected intangible asset is reviewed if events occur or circumstances change that would indicate that the value of the asset may be impaired. Impairment is measured as the difference between the fair value of the asset and its carrying value. In the first quarter of fiscal 2013, the Company entered into an agreement to terminate its licensing agreement with the former owners of an acquired business. In connection with this termination agreement, during the three months ended October 27, 2012, the Company recognized an impairment of \$1.6 million representing the remaining unamortized balance of the intangible asset. In accordance with ASU No. 2012-02, Intangibles- Goodwill and Other (Topic 350): Testing Indefinite Lived Intangible Assets for Impairment ("ASU 2012-02"), the Company is allowed to perform a qualitative assessment for intangible asset impairment unless it believes it is more likely than not that an intangible asset's fair value is less than the carrying value. The thresholds used by the Company for this determination in the fourth quarter of fiscal 2013 were for any intangible assets (or groups of assets) that (1) have passed their previous two-step test with a margin of calculated fair value versus carrying value of at least 20% and (2) have current year income which is at least 85% of prior year amounts. The Company's only indefinite lived intangible assets are the branded product line asset group. As of August 3, 2013, the Company's annual assessment of its indefinite lived intangible assets indicated that no impairment existed.

The changes in the carrying amount of goodwill and the amount allocated by reportable segment for the years presented are as follows (in thousands):

	Wholesale	Other	Total
Goodwill as of July 30, 2011	\$174,612	\$17,331	\$191,943
Goodwill adjustment for prior year business combinations	2,857	200	3,057
Change in foreign exchange rates	(1,259)) —	(1,259)
Goodwill as of July 28, 2012	\$176,210	\$17,531	\$193,741
Goodwill from current year business combinations	8,979	—	8,979
Contingent consideration for prior year business combinations	—	200	200
Change in foreign exchange rates	(1,046)) —	(1,046)
Goodwill as of August 3, 2013	\$184,143	\$17,731	\$201,874

Table of Contents

The following table presents the detail of the Company's other intangible assets (in thousands):

	August 3, 2013			July 28, 2012		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
Amortizing intangible assets:						
Customer relationships	\$34,704	\$14,136	\$20,568	\$32,120	\$10,286	\$21,834
Trademarks and tradenames	771	78	693	3,030	523	2,507
Total amortizing intangible assets	35,475	14,214	21,261	35,150	10,809	24,341
Indefinite lived intangible assets:						
Trademarks and tradenames	28,279	—	28,279	28,155	—	28,155
Total	\$63,754	\$14,214	\$49,540	\$63,305	\$10,809	\$52,496

Amortization expense was \$4.8 million, \$4.3 million and \$3.5 million for the years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively. The estimated future amortization expense for the next five fiscal years on finite lived intangible assets existing as of August 3, 2013 is shown below:

Fiscal Year:	(In thousands)
2014	\$3,973
2015	3,973
2016	2,941
2017	2,632
2018	2,175
2019 and thereafter	5,567
	\$21,261

(i) Revenue Recognition and Concentration of Credit Risk

The Company records revenue upon delivery of products. Revenues are recorded net of applicable sales discounts and estimated sales returns. Sales incentives provided to customers are accounted for as reductions in revenue as the related revenue is recorded. The Company's sales are primarily to customers located throughout the United States and Canada.

Whole Foods Market, Inc. was the Company's largest customer in each fiscal year presented. Whole Foods Market, Inc. accounted for approximately 36% of the Company's net sales for the years ended August 3, 2013, July 28, 2012 and July 30, 2011. There were no other customers that individually generated 10% or more of the Company's net sales.

The Company analyzes customer creditworthiness, accounts receivable balances, payment history, payment terms and historical bad debt levels when evaluating the adequacy of its allowance for doubtful accounts. In instances where a reserve has been recorded for a particular customer, future sales to the customer are conducted using either cash-on-delivery terms, or the account is closely monitored so that as agreed upon payments are received, orders are released; a failure to pay results in held or cancelled orders.

(j) Fair Value of Financial Instruments

The carrying amounts of the Company's financial instruments including cash, accounts receivable, accounts payable and certain accrued expenses approximate fair value due to the short-term nature of these instruments.

The following estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. Refer to Note 8, Fair Value Measurements, for additional information regarding the fair value hierarchy. The fair value of notes payable and long-term debt are based on the instruments' interest rate, terms, maturity date and collateral, if any, in comparison to the Company's incremental

borrowing rate for similar financial instruments. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realize in a current market exchange.

Table of Contents

	August 3, 2013		July 28, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(In thousands)			
Assets:				
Cash and cash equivalents	\$11,111	\$11,111	\$16,122	\$16,122
Accounts receivable	339,590	339,590	305,177	305,177
Notes receivable	3,315	3,315	3,703	3,703
Liabilities:				
Accounts payable	283,851	283,851	242,179	242,179
Notes payable	130,594	130,594	115,000	115,000
Long-term debt, including current portion	34,110	36,230	985	988

(k) Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect amounts reported therein. Due to the inherent uncertainty involved in making estimates, actual results reported in future periods may be based on amounts that differ from those estimates.

(l) Notes Receivable, Trade

The Company issues trade notes receivable to certain customers under two basic circumstances; inventory purchases for initial store openings and overdue accounts receivable. Notes issued in connection with store openings are generally receivable over a period not to exceed thirty-six months. Notes issued in connection with overdue accounts receivable may extend for periods greater than one year. All notes are issued at a market interest rate and contain certain guarantees and collateral assignments in favor of the Company.

(m) Share-Based Compensation

The Company adopted Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 718, Stock Compensation ("ASC 718") effective August 1, 2005. ASC 718 requires the recognition of the fair value of share-based compensation in net income. The Company has four share-based employee compensation plans, which are described more fully in Note 3. Share-based compensation consists of stock options, restricted stock awards, restricted stock units, performance shares and performance units. Stock options are granted to employees and directors at exercise prices equal to the fair market value of the Company's stock at the dates of grant. Generally, stock options, restricted stock awards and restricted stock units granted to employees vest ratably over 4 years from the grant date and grants to members of the Company's Board of Directors vest ratably over 2 years with one third vesting immediately. Beginning in fiscal 2008, the Company's President and Chief Executive Officer has been granted performance shares and performance units which have vested in accordance with the terms of the related Performance Share and Performance Unit agreements. During fiscal 2013 and fiscal 2012, the Company granted performance-based stock units to its executive officers that will vest if the Company achieves certain performance metrics as of and for the years ended August 2, 2014 and August 3, 2013, respectively. The Company recognizes share-based compensation expense on a straight-line basis over the requisite service period of the individual grants, which generally equals the vesting period.

ASC 718 also requires that compensation expense be recognized for only the portion of share-based awards that are expected to vest. Therefore, we apply estimated forfeiture rates that are derived from historical employee and director termination activity to reduce the amount of compensation expense recognized. If the actual forfeitures differ from the estimate, additional adjustments to compensation expense may be required in future periods.

The Company receives an income tax deduction for restricted stock awards and restricted stock units when they vest and for non-qualified stock options exercised by employees equal to the excess of the fair market value of its common stock on the vesting or exercise date over the exercised price. Excess tax benefits (tax benefits resulting from tax deductions in excess of compensation cost recognized) are presented as a cash inflow provided by financing activities in the accompanying consolidated statement of cash flows.

Table of Contents**(n) Earnings Per Share**

Basic earnings per share is calculated by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share is calculated by adding the dilutive potential common shares to the weighted average number of common shares that were outstanding during the period. For purposes of the diluted earnings per share calculation, outstanding stock options, restricted stock awards, restricted stock units and performance-based awards, if applicable, are considered common stock equivalents, using the treasury stock method. A reconciliation of the weighted average number of shares outstanding used in the computation of the basic and diluted earnings per share for all periods presented follows:

	Fiscal year ended		
	August 3, 2013	July 28, 2012	July 30, 2011
	(In thousands)		
Basic weighted average shares outstanding	49,217	48,766	47,459
Net effect of dilutive common stock equivalents based upon the treasury stock method	292	334	356
Diluted weighted average shares outstanding	49,509	49,100	47,815
Potential anti-dilutive share-based payment awards excluded from the computation above	121	88	99

(o) Comprehensive Income (Loss)

Comprehensive income (loss) is reported in accordance with ASU No. 2011-05, Presentation of Comprehensive Income, and includes net income and the change in other comprehensive income (loss). Other comprehensive income (loss) is comprised of the net change in fair value of derivative instruments designated as cash flow hedges, as well as foreign currency translation related to the translation of UNFI Canada, Inc. ("UNFI Canada") from the functional currency of Canadian dollars to U.S. dollar reporting currency. For all periods presented, the Company displays comprehensive income (loss) and its components in the consolidated statements of comprehensive income.

(p) Derivative Financial Instruments

The Company is exposed to market risks arising from changes in interest rates, fuel costs, and with the creation and operation of UNFI Canada, foreign currency exchange rates. The Company uses derivatives principally in the management of interest rate and fuel price exposure. From time to time the Company may use foreign contracts to hedge transactions in foreign currency. The Company does not utilize derivatives that contain leverage features. For derivative transactions accounted for as hedges, on the date the Company enters into the derivative transaction, the exposure is identified. The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking the hedge transaction. In this documentation, the Company specifically identifies the asset, liability, firm commitment, forecasted transaction, or net investment that has been designated as the hedged item and states how the hedging instrument is expected to reduce the risks related to the hedged item. The Company measures effectiveness of its hedging relationships both at hedge inception and on an ongoing basis as needed. As of August 3, 2013, the Company was not a party to any derivative financial instruments.

(q) Shipping and Handling Fees and Costs

The Company includes shipping and handling fees billed to customers in net sales. Shipping and handling costs associated with inbound freight are generally recorded in cost of sales, whereas shipping and handling costs for selecting, quality assurance, and outbound transportation are recorded in operating expenses. Outbound shipping and handling costs, totaled \$358.8 million, \$295.5 million and \$266.7 million for the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively. The Company began allocating employee benefit expenses to shipping and handling fees and costs in fiscal 2013. Outbound shipping and handling costs for fiscal 2012 and 2011 exclude employee benefit expenses.

Table of Contents

(r) Reserves for Self-Insurance

The Company is primarily self-insured for workers' compensation, and general and automobile liability insurance. It is the Company's policy to record the self-insured portion of workers' compensation and automobile liabilities based upon actuarial methods to estimate the future cost of claims and related expenses that have been reported but not settled, and that have been incurred but not yet reported. Any projection of losses concerning workers' compensation and automobile liability is subject to a considerable degree of variability. Among the causes of this variability are unpredictable external factors affecting litigation trends, benefit level changes and claim settlement patterns.

(s) Operating Lease Expenses

The Company records lease expense via the straight-line method. For leases with step rent provisions whereby the rental payments increase over the life of the lease, and for leases where the Company receives rent-free periods, the Company recognizes expense based on a straight-line basis based on the total minimum lease payments to be made over the expected lease term.

(t) Recently Issued Accounting Pronouncements

In February 2013, the FASB issued ASU No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income ("ASU 2013-02"). This update supersedes the presentation requirements for reclassifications out of accumulated other comprehensive income in ASU No. 2011-05, Presentation of Comprehensive Income, and ASU No. 2011-12, Deferral of the Effective Date for Amendments to the Presentation of Reclassification of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. ASU 2013-02 requires an entity to provide information about amounts reclassified out of accumulated other comprehensive income by component and to present, either on the face of the financial statements or in a single note, any significant amount reclassified out of accumulated other comprehensive income in its entirety in the period, and the income statement line item affected by the reclassification. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under U.S. GAAP that provide additional detail about those amounts. ASU No. 2013-02 is effective for annual reporting periods that begin after December 15, 2012, which will be the first quarter of the Company's fiscal year ending August 2, 2014. The adoption of ASU No. 2013-02 is not expected to have a material impact on the presentation of the Company's consolidated financial statements.

2. ACQUISITIONS

Wholesale Segment

Broadline Distribution Acquisitions. During the first quarter of fiscal 2013, the Company completed three business combinations related to the acquisition of certain assets of three distribution companies. The total consideration related to these acquisitions was approximately \$9.2 million, including cash consideration (net of cash acquired) of \$8.1 million. In addition, certain of the asset purchase agreements related to these acquisitions provide for future contingent consideration payments of up to \$3.7 million through February 2017. Furthermore, in connection with one of the acquisitions, the Company granted restricted stock units which have pro-rata time-based vesting over four years similar to the structure of the majority of the awards of restricted stock units granted to employees, but for which the vesting may be fully accelerated after two years if net sales of the acquired business, as defined in the applicable asset purchase agreement, meets or exceeds a targeted amount in either of the first two years following consummation of the Company's acquisition of the business. The preliminary fair value of the identifiable intangible assets acquired in the three acquisitions was determined by using an income approach. The identifiable intangible assets recorded based on the provisional valuations include customer lists of \$3.1 million, which are being amortized on a straight-line basis over estimated useful lives of approximately 5 - 10 years. Significant assumptions utilized in the income approach were based on company-specific information and projections, which are not observable in the market and are considered Level 3 measurements as defined by authoritative guidance. The Company recorded a total of \$9.0 million of goodwill as a result of these acquisitions. These three acquisitions were financed through borrowings under the Company's amended and restated revolving credit facility. The Company is still completing the final valuations of the acquired intangibles for these acquisitions and therefore the Company's estimates and assumptions are subject to change within the measurement period. Acquisition costs related to these purchases were insignificant, have been expensed as incurred and are included within "Operating Expenses" in the Consolidated Statements of Income. Each of

these businesses were absorbed by the operations of the Company's broadline distribution business, therefore the Company does not record the expenses for these businesses separately from the rest of the broadline distribution business and it is not possible to provide complete financial results for each acquisition separately or in total. Net sales resulting from these three acquisitions totaled approximately \$53.8 million for the fiscal year ended August 3, 2013.

Table of Contents

Canadian expansion. During the second quarter of fiscal 2012, through its wholly-owned subsidiary, UNFI Canada, the Company acquired substantially all of the assets of a private specialty food distribution business located in Ontario, Canada. Total cash consideration paid in connection with this acquisition was \$3.0 million. In addition, the asset purchase agreement provides for potential earn-outs of up to \$1.95 million from November 2011 through November 2014. This acquisition was financed through borrowings under the Company's then existing revolving credit facility. The fair value assigned to an identifiable intangible asset acquired was determined by using an income approach. The identifiable intangible asset recorded based on the provisional valuation includes a customer list of \$0.8 million, which is being amortized on a straight-line basis over an estimated useful life of approximately 9.7 years. Significant assumptions utilized in the income approach were based on company-specific information and projections, which are not observable in the market and are considered Level 3 measurements as defined by authoritative guidance. Acquisition costs related to this purchase were insignificant, and have been expensed as incurred and are included within "Operating Expenses" in the Consolidated Statements of Income. Net sales resulting from the acquisition have been included in the Company's results since November 15, 2011, however, neither these sales nor the increase in total assets related to this acquisition were significant compared to the Company's consolidated amounts.

Whole Foods Distribution. During the first quarter of fiscal 2012, the Company finalized its valuation of the customer relationship intangible asset related to the first quarter fiscal 2011 acquisition of the Rocky Mountain and Southwest distribution business of Whole Foods Market Distribution, Inc. ("Whole Foods Distribution"), a wholly owned subsidiary of Whole Foods Market, Inc., whereby the Company (i) acquired inventory at Whole Foods Distribution's Aurora, Colorado and Austin, Texas distribution centers; (ii) acquired substantially all of Whole Foods Distribution's assets, other than the inventory, at the Aurora, Colorado distribution center; (iii) assumed Whole Foods Distribution's obligations under the existing lease agreement related to the Aurora, Colorado distribution center; and (iv) hired substantially all of Whole Foods Distribution's employees working at the Aurora, Colorado distribution center. In connection with the transaction, we also amended our distribution agreement in the first quarter of fiscal 2011 to become the primary distributor to Whole Foods Market, Inc. in those regions. Net sales resulting from the transaction totaled approximately \$131.6 million for the year ended July 30, 2011. For the year ended July 28, 2012, net sales resulting from the transaction in the first two months of the fiscal year, which correspond to when we had not yet begun primary distribution in those regions during the prior year, totaled approximately \$25.4 million. The Company does not record the expenses for this business separately from the rest of its broadline distribution business, and therefore it is impracticable for the Company to provide complete financial results for this business.

The following table summarizes the consideration paid for the acquisition and the amounts of assets acquired and liabilities assumed recognized at the acquisition date:

	(In thousands)
Inventory	\$6,911
Property & equipment	1,500
Customer relationships and other intangible assets	7,900
Goodwill	5,600
Total assets	\$21,911
Liabilities	—
Cash consideration paid	\$21,911
Other Segment	

The Company recorded an increase of \$0.1 million to its intangible assets during the years ended August 3, 2013 and July 28, 2012 in recognition of ongoing contingent consideration payments in the form of royalties ranging between 2%- 4% of net sales (as defined in the applicable purchase agreement) related to two of its acquisitions of assets of branded product companies during fiscal 2009. The acquisition of assets of a third branded product company during fiscal 2009 requires ongoing contingent consideration payments in the form of earn-outs over a period of 5 years from the acquisition date of November 2008. These earn-outs are based on tiers of net sales for the trailing 12 months, and \$0.2 million was paid during the year ended August 3, 2013.

3. EQUITY PLANS

The Company recognized total share-based compensation expense of \$15.1 million for the fiscal year ended August 3, 2013, compared to share-based compensation expense of \$11.4 million and \$9.2 million for the fiscal years ended July 28, 2012 and July 30, 2011, respectively. The share-based compensation expense related to performance-based share awards,

Table of Contents

including the 2-year long-term incentive awards granted during fiscal 2012 and 2013, was \$3.3 million, \$2.1 million and \$0.7 million for the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively. As of August 3, 2013, there was \$18.0 million of total unrecognized compensation cost related to outstanding share-based compensation arrangements (including stock options, restricted stock, restricted stock units and performance-based restricted shares and units). This cost is expected to be recognized over a weighted-average period of 2.5 years.

For stock options, the fair value of each grant was estimated at the date of grant using the Black-Scholes option pricing model. Black-Scholes utilizes assumptions related to volatility, the risk-free interest rate, the dividend yield and expected life. Expected volatilities utilized in the model are based on the historical volatility of the Company's stock price. The risk-free interest rate is derived from the U.S. Treasury yield curve in effect at the time of grant. The model incorporates exercise and post-vesting forfeiture assumptions based on an analysis of historical data. The expected term is derived from historical information and other factors. The fair value of restricted stock awards, restricted stock units, and performance share units are determined based on the number of shares or units, as applicable, granted and the quoted price of the Company's common stock as of the grant date.

The following summary presents the weighted average assumptions used for stock options granted in fiscal 2013, 2012 and 2011:

	Fiscal year ended				
	August 3, 2013	July 28, 2012	July 30, 2011		
Expected volatility	29.8	% 39.3	% 44.7	%	
Dividend yield	—	% —	% —	%	
Risk free interest rate	0.3	% 0.4	% 0.9	%	
Expected term (in years)	3.0	3.0	3.0		

The Company has four equity incentive plans that provide for the issuance of stock options: the 1996 Stock Option Plan (the "1996 Plan"), the 2002 Stock Incentive Plan (the "2002 Plan"), the 2004 Equity Incentive Plan, as amended (the "2004 Plan"), and the 2012 Equity Incentive Plan (the "2012 Plan") (collectively, the "Plans"). The Plans provide for grants of stock options to employees, officers, directors and others. Since fiscal 2010, the Company has not granted stock options intended to qualify as incentive stock options within the meaning of Section 422 of the Internal Revenue Code. Vesting requirements for awards under the Plans are at the discretion of the Company's Board of Directors, or Compensation Committee of the Board of Directors. Typically options granted to employees vest ratably over 4 years, while options granted to non-employee directors vest one third immediately with the remainder vesting ratably over 2 years. The maximum term of all incentive and non-statutory stock options granted under the Plans is 10 years. There were 9,050,000 shares authorized for grant under the 1996 Plan, 2002 Plan and 2012 Plan. There were 1,054,267 remaining shares authorized for grant under the 2004 Plan as of December 16, 2010, the effective date when the 2004 Plan was amended to allow for the award of stock options. These shares may be used to issue stock options, restricted stock, restricted stock units or performance based awards. As of August 3, 2013, 302,006 and 1,250,000 shares were available for grant under the 2004 Plan and 2012 Plan, respectively, and the authorization for new grants under the 1996 Plan and 2002 Plan has expired. No shares were issued under the 2012 Plan during fiscal 2013. During fiscal 2010 and fiscal 2012, the Company issued shares from treasury in addition to issuing new shares to satisfy stock option exercises and restricted stock vestings.

The following summary presents the weighted-average remaining contractual term of options outstanding at August 3, 2013 by range of exercise prices:

Exercise Price Range	Number of Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Number of Shares Exercisable	Weighted Average Exercise Price
\$12.00 - \$24.00	3,500	\$15.37	3.3	3,500	\$15.37
\$24.01 - \$34.00	234,212	\$28.04	5.2	178,739	\$27.48

Edgar Filing: UNITED NATURAL FOODS INC - Form 10-K

\$34.01 - \$44.00	133,265	\$37.44	6.4	69,243	\$37.06
\$44.01 - \$60.00	103,260	\$58.62	9.1	1,773	\$46.77
	474,237	\$37.25	6.4	253,255	\$30.07

52

Table of Contents

The following summary presents information regarding outstanding stock options as of August 3, 2013 and changes during the fiscal year then ended with regard to options under the Plans:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at beginning of year	440,832	\$31.24		
Granted	101,600	\$58.93		
Exercised	(62,683)	\$30.82		
Forfeited	(2,500)	\$17.71		
Cancelled	(3,012)	\$28.28		
Outstanding at end of year	474,237	\$37.25	6.4 years	\$10,937,491
Exercisable at end of year	253,255	\$30.07	4.8 years	\$7,659,585

The weighted average grant-date fair value of options granted during the fiscal years ended August 3, 2013, July 28, 2012, and July 30, 2011 was \$12.21, \$10.27 and \$10.64, respectively. The aggregate intrinsic value of options exercised during the fiscal years ended August 3, 2013, July 28, 2012, and July 30, 2011, was \$1.6 million, \$5.2 million and \$3.9 million, respectively.

The 2004 Plan was amended during fiscal 2009 to provide for the issuance of up to 2,500,000 equity-based compensation awards, and during fiscal 2011 was further amended to provide for the issuance of stock options in addition to restricted shares and units, performance shares and units, bonus shares and stock appreciation rights.

Vesting requirements for the awards under the 2004 Plan are at the discretion of the Company's Board of Directors, or the Compensation Committee thereof, and are typically four equal annual installments for employees and three equal annual installments with one third vesting immediately for non-employee directors. The performance units granted to the Company's President and Chief Executive Officer upon hire during fiscal 2009 vested as of July 31, 2010, those granted during March 2011 vested as of July 30, 2011 and those granted during September 2011 vested as of July 28, 2012, each in accordance with the terms of the related Performance Unit and Performance Share agreements.

The following summary presents information regarding restricted stock awards, restricted stock units, performance shares and performance units under the 2004 Plan as of August 3, 2013 and changes during the fiscal year then ended:

	Number of Shares	Weighted Average Grant-Date Fair Value
Outstanding at July 28, 2012	743,991	\$34.59
Granted	340,333	\$57.84
Vested	(331,576)	\$37.51
Forfeited	(87,478)	\$42.40
Outstanding at August 3, 2013	665,270	\$44.00

The total intrinsic value of restricted stock awards and restricted stock units vested was \$16.7 million, \$14.2 million and \$9.1 million during the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively. The total intrinsic value of performance share awards and performance units vested was \$1.6 million, \$1.7 million and \$0.7 million during the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively.

During the year ended August 3, 2013, 25,000 performance shares and 5,123 performance units were granted (in each case subject to the issuance of an additional 25,000 shares and 5,123 units if the Company's performance exceeded specified targeted levels) to the Company's President and CEO, the vesting of which was contingent on the attainment of specific levels of earnings before interest and taxes and return on invested capital. The per share grant-date fair value of these grants was \$52.00. Effective August 3, 2013, an additional 695 units were granted and a total of 30,818 performance share and units vested with a corresponding intrinsic value and fair value of \$1.6 million and \$1.9 million, respectively.

During the year ended July 28, 2012, 25,000 performance shares and 12,500 performance units were granted (in each case subject to the issuance of an additional 25,000 shares and 12,500 units if the Company's performance exceeded specified targeted levels) to the Company's President and CEO, the vesting of which was contingent on the attainment of specific levels

Table of Contents

of earnings before interest and taxes and return on invested capital. The per share grant-date fair value of these grants was \$37.82. Effective July 28, 2012, an additional 6,610 units were granted and a total of 44,110 performance shares and units vested with a corresponding intrinsic value and fair value of \$1.7 million and \$2.4 million, respectively. During the year ended July 28, 2012, the Company created a new performance-based equity compensation arrangement with a 2-year performance-based vesting component that was established for members of the Company's executive leadership team. Under this arrangement, the executives are eligible for performance-based stock units equal to a grant-date fair value of approximately 33% of the sum of 125% of their annual base salary and 50% of their cash-based performance award for fiscal 2012. Similar to the performance awards granted to the Company's President and CEO, if the Company's performance exceeds specified targeted levels, the grants may be increased up to an additional 100%. Effective August 3, 2013, the Company issued an aggregate of 23,882 shares to the executive leadership team upon the vesting of an equal number of performance share units based on the final results of the 2-year performance period.

During the year ended July 30, 2011, 25,000 performance shares and 12,500 performance units were granted (in each case subject to the issuance of an additional 25,000 shares and 12,500 units if the Company's performance exceeded specified targeted levels) to the Company's President and CEO, the vesting of which was contingent on the attainment of specific levels of earnings before interest and taxes and return on invested capital. The per share grant-date fair value of these grants was \$42.03. Effective July 30, 2011, 18,924 performance shares vested with a corresponding intrinsic value and fair value of \$0.8 million. The remainder of the performance shares were forfeited, and no shares were issued for the performance units.

4. ALLOWANCE FOR DOUBTFUL ACCOUNTS AND NOTES RECEIVABLE

The allowance for doubtful accounts and notes receivable consists of the following:

	Fiscal year ended		
	August 3, 2013	July 28, 2012	July 30, 2011
	(In thousands)		
Balance at beginning of year	\$6,956	\$5,854	\$7,692
Additions charged to costs and expenses	4,227	3,532	635
Deductions	(1,157) (2,430) (2,473
Balance at end of year	\$10,026	\$6,956	\$5,854

5. RESTRUCTURING ACTIVITIES

Divestiture of conventional non-foods and general merchandise lines of business

In June 2011, the Company entered into an asset purchase agreement with L&R Distributors, Inc. ("L&R Distributors"), a leading national distributor of non-food products and general merchandise, to divest the Company's conventional non-foods and general merchandise lines of business. The Company entered the conventional non-foods and general merchandise businesses, which includes cosmetics, seasonal products, conventional health & beauty products and hard goods, as part of its acquisition of Distribution Holdings, Inc. in November 2007. This strategic transaction will allow the Company to concentrate on its core business of the distribution of natural, organic, and specialty foods and products.

In connection with this divestiture, the Company planned to cease operations at its Harrison, Arkansas distribution center and during the fourth quarter of fiscal 2011, the Company recognized a non-cash impairment charge on long-lived assets including land, building and equipment of \$5.8 million. In addition, the Company incurred \$0.5 million during the fourth quarter of fiscal 2011 to transition the specialty food line of business into the Company's other distribution centers. Upon the closure of the Harrison, Arkansas distribution center during the first quarter of fiscal 2012, the carrying value of \$2.6 million in long-term property and equipment was reclassified to assets held for sale. During the first quarter of fiscal 2012, the Company recognized \$5.1 million in severance and other expenses related to the completion of the divestiture. During the fourth quarter of fiscal 2012, the land, buildings and equipment was sold to a third party, resulting in a nominal gain.

Table of Contents

Impairment of an intangible asset

During fiscal 2007, the Company made several asset acquisitions under its Blue Marble Brands division, one of which included a licensing agreement under which the Company was permitted to sell products under the seller's existing trademark in exchange for royalty payments. The fair value of the intangible asset at the time of acquisition was \$2.1 million, and was being amortized over a life of 27 years, the maximum life of the licensing agreement including renewal periods. In October 2012, the Company entered into an agreement to terminate its licensing agreement with the former owners. In connection with this termination agreement, during the first quarter of 2013 the Company recognized an impairment of \$1.6 million representing the remaining unamortized balance of the intangible asset.

6. NOTES PAYABLE

In May 2012, the Company amended and restated its revolving credit facility, pursuant to which the Company has a \$500 million secured revolving credit facility which now matures on May 24, 2017, of which up to \$450.0 million is available to the Company's U.S. subsidiaries and up to \$50.0 million is available to UNFI Canada. This credit facility also provides a one-time option, subject to approval by the lenders under the revolving credit facility, to increase the borrowing base by up to an additional \$100 million. The borrowings of the US portion of the credit facility accrue interest, at the Company's option, at either (i) a base rate (generally defined as the highest of (x) the Bank of America Business Capital prime rate, (y) the average overnight federal funds effective rate plus one-half percent (0.50%) per annum and (z) one-month LIBOR plus one percent (1%) per annum) plus an initial margin of 0.50%, or (ii) the London Interbank Offered Rate ("LIBOR") for one, two, three or six months or, if approved by all affected lenders, nine months plus an initial margin of 1.50%. The borrowings on the Canadian portion of the credit facility for Canadian swing-line loans, Canadian overadvance loans or Canadian protective advances accrue interest, at the Company's option, at either (i) a prime rate (generally defined as the highest of (x) 0.50% over 30-day Reuters Canadian Deposit Offering Rate for bankers' acceptances, (y) the prime rate of Bank of America, N.A.'s Canada branch, and (z) a bankers' acceptance equivalent rate for a one month interest period plus 1.00%) plus an initial margin of 0.50%, or (ii) a bankers' acceptance equivalent rate of the rate of interest per annum equal to the annual rates applicable to Canadian Dollar bankers' acceptances on the "CDOR Page" of Reuter Monitor Money Rates Service, plus five basis points (the "CDOR rate"), and an initial margin of 1.50%. All other borrowings on the Canadian portion of the credit facility must exclusively accrue interest under the CDOR rate plus the applicable margin. An annual commitment fee in the amount of 0.30% if the average daily balance of amounts actually used (other than swing-line loans) is less than 40% of the aggregate commitments, or 0.25% if such average daily balance is 40% or more of the aggregate commitments.

As of August 3, 2013, the Company's borrowing base, based on eligible accounts receivable and inventory levels, was \$484.5 million. As of August 3, 2013, the Company had \$130.6 million outstanding under the Company's credit facility, \$31.8 million in letter of credit commitments and \$2.9 million in reserves which generally reduces the Company's available borrowing capacity under its revolving credit facility on a dollar for dollar basis. The Company's resulting remaining availability was \$319.3 million as of August 3, 2013. During fiscal 2012, the Company used borrowings under the revolving credit facility to pay off its term loan.

The revolving credit facility, as amended and restated, subjects the Company to a springing minimum fixed charge coverage ratio (as defined in the underlying credit agreement) of 1.0 to 1.0 calculated at the end of each of its fiscal quarters on a rolling four quarter basis when aggregate availability (as defined in the underlying credit agreement) is less than the greater of (i) \$35.0 million and (ii) 10% of the aggregate borrowing base. The Company was not subject to the fixed charge coverage ratio covenants as of the fiscal year ended August 3, 2013.

The credit facility also allows for the lenders thereunder to syndicate the credit facility to other banks and lending institutions. The Company has pledged the majority of its accounts receivable and inventory for its obligations under the amended and restated credit facility.

7. LONG-TERM DEBT

During the fiscal year ended July 28, 2012, the Company entered into a lease agreement for a new distribution facility in Aurora, Colorado. As of August 3, 2013, actual construction costs exceeded the construction allowance as defined by the lease agreement, and therefore, the Company has determined it has met the criteria for continuing involvement

pursuant to ASC 840, Leases, and has applied the financing method to account for this transaction. Under the financing method, the book value of the distribution facility and related accumulated depreciation remains on the balance sheet. The construction allowance is recorded as a financing obligation in long-term debt. A portion of each lease payment will reduce the amount of the financing obligation, and a portion will be recorded as interest expense at an effective rate of approximately 7.32%.

Table of Contents

During the year ended July 28, 2012, the Company used the availability under its amended and restated revolving credit facility to pay off its term loan agreement which accrued interest at 30 day LIBOR plus 1.0% and was to mature in July 2012.

As of August 3, 2013 and July 28, 2012, the Company's long-term debt consisted of the following:

	August 3, 2013	July 28, 2012
	(In thousands)	
Financing obligation, due monthly, and maturing in October 2028 at an effective interest rate of 7.32%	\$33,477	\$—
Real estate and equipment term loans payable to bank, secured by building and other assets, due monthly and maturing in June 2015, at an interest rate of 8.60%	409	598
Term loan for employee stock ownership plan, secured by common stock of the Company, due monthly and maturing in May 2015, at an interest rate of 1.33%	224	387
	\$34,110	\$985
Less: current installments	1,019	350
Long-term debt, excluding current installments	\$33,091	\$635
Aggregate maturities of long-term debt for the next five years and thereafter are as follows at August 3, 2013:		
Year		(In thousands)
2014		\$1,019
2015		1,194
2016		1,000
2017		1,141
2018		1,250
2019 and thereafter		28,506
		\$34,110

8. FAIR VALUE MEASUREMENTS

As of August 2, 2009, the Company had fully adopted ASC 820, Fair Value Measurements and Disclosures ("ASC 820"), for financial assets and liabilities and for non-financial assets and liabilities that are recognized or disclosed at fair value on at least an annual basis. ASC 820 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance. ASC 820 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 establishes three levels of inputs that may be used to measure fair value:

Level 1 Inputs—Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Inputs—Inputs other than quoted prices included in Level 1 that are either directly or indirectly observable through correlation with market data. These include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and inputs to valuation models or other pricing methodologies that do not require significant judgment because the inputs used in the model, such as interest rates and volatility, can be corroborated by readily observable market data.

Level 3 Inputs—One or more significant inputs that are unobservable and supported by little or no market activity, and that reflect the use of significant management judgment. Level 3 assets and liabilities include those whose fair value measurements are determined using pricing models, discounted cash flow methodologies or similar valuation techniques, and significant management judgment or estimation.

Interest Rate Swap Agreement

On August 1, 2005, the Company entered into an interest rate swap agreement effective July 29, 2005. The agreement provided for the Company to pay interest for a seven-year period at a fixed rate of 4.70% on an initial amortizing

notional principal amount of \$50.0 million while receiving interest for the same period at the one-month London Interbank Offered Rate

Table of Contents

(LIBOR) on the same notional principal amount. The swap was entered into as a hedge against LIBOR movements on current variable rate indebtedness at one-month LIBOR plus 1.00%, thereby fixing its effective rate on the notional amount at 5.70%. The swap agreement qualified as an "effective" hedge under FASB ASC 815, Derivatives and Hedging ("ASC 815"). Concurrent with the payoff of the underlying term loan, this swap was settled during the fourth quarter of fiscal 2012, with a payment of \$0.3 million included within interest expense.

Interest rate swap agreements are entered into for periods consistent with related underlying exposures and do not constitute positions independent of those exposures. The Company's interest rate swap agreement was designated as a cash flow hedge at July 30, 2011 and at that date was reflected at fair value in the Company's consolidated balance sheet as a component of other long-term liabilities. The related gains or losses on this contract were generally deferred in stockholders' equity as a component of other comprehensive income. However, to the extent that the swap agreement was not considered to be effective in offsetting the change in the value of the item being hedged, any change in fair value relating to the ineffective portion of the swap agreement is immediately recognized in income. For the periods presented, the Company did not have any ineffectiveness requiring current income recognition.

Fuel Supply Agreements

From time to time the Company is a party to fixed price fuel supply agreements. During the years ended August 3, 2013 and July 28, 2012, the Company entered into several agreements which required it to purchase a portion of its diesel fuel each month at fixed prices through July 2013 and 2012, respectively. These fixed price fuel agreements qualify for the "normal purchase" exception under ASC 815; therefore, the fuel purchases under these contracts are expensed as incurred and included within operating expenses.

Exchange Rate Forward Contract

With the settlement of the interest rate swap during fiscal 2012, there were no financial assets and liabilities measured on a recurring basis as of the fiscal year ended August 3, 2013 and July 28, 2012.

The Company's determination of the fair value of its interest rate swap was calculated using a discounted cash flow analysis based on the terms of the swap contract and the observable interest rate curve. The Company does not enter into derivative agreements for trading purposes.

The fair value of the Company's other financial instruments including cash, cash equivalents, accounts receivable, notes receivable, accounts payable and certain accrued expenses are derived using Level 2 inputs and approximate carrying amounts due to the short-term nature of these instruments. The fair value of notes payable approximate carrying amounts as they are variable rate instruments.

The following estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies taking into account the instruments' interest rate, terms, maturity date and collateral, if any, in comparison to the Company's incremental borrowing rate for similar financial instruments and are therefore deemed Level 2 inputs. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realize in a current market exchange.

	August 3, 2013		July 28, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
	(In thousands)			

Liabilities

Long term debt, including current portion	\$34,110	\$36,230	\$985	\$988
---	----------	----------	-------	-------

The following table provides the fair value hierarchy for non-financial assets and liabilities measured on a nonrecurring basis for fiscal 2013. There were no non-financial assets and liabilities measured on a non-recurring basis as of the end of fiscal 2012.

Table of Contents

Description	Fair Value at August 3, 2013			Total Losses
	Level 1	Level 2	Level 3	
	(In thousands)			
Fair value of intangible assets subject to write-down	\$—	\$—	\$—	\$1,629
In accordance with the provisions of ASC 360-10, Impairment and Disposal of Long-Lived Assets, an impairment charge of \$1.6 million was recognized in connection with the termination of a long-term licensing agreement and the write-off of the associated intangible asset during the fiscal year ended August 3, 2013. Long-lived assets held and used with a carrying amount of \$290.9 million were written down to their fair value of \$285.2 million, resulting in an impairment charge of \$5.8 million included in earnings for the fiscal year ended July 30, 2011. The assets which corresponded to the impairment during fiscal 2011 were sold during fiscal 2012.				
In accordance with the provisions ASC 350-30, Intangibles- Goodwill and Other, indefinite lived intangible assets with a carrying amount of \$58.5 million were written down to their fair value of \$58.3 million, resulting in an impairment charge of \$0.2 million included in earnings for the fiscal year ended July 30, 2011. There were no impairments recognized on indefinite lived intangible assets during fiscal 2013 or fiscal 2012.				

9. TREASURY STOCK

On December 1, 2004, the Company's Board of Directors authorized the repurchase of up to \$50 million of common stock through February 2008 in the open market or in privately negotiated transactions. As part of the stock repurchase program, the Company purchased 228,800 shares of its common stock for its treasury during the year ended July 29, 2006 at an aggregate cost of approximately \$6.1 million. All shares were purchased at prevailing market prices. There were no other purchases made during the authorization period.

The Company, in an effort to reduce the treasury share balance, decided in the fourth quarter of fiscal 2010 to issue treasury shares to satisfy certain share requirements related to exercises of stock options and vesting of restricted stock units and awards under its equity incentive plans. The Company issued 201,814 and 26,986 treasury shares during fiscal 2010 and 2012, respectively, related to stock option exercises and the vesting of restricted stock units and awards.

**10. SECONDARY COMMON STOCK
OFFERING**

During the first quarter of fiscal 2011, the Company completed a secondary common stock offering. This offering resulted in an issuance of 4,427,500 shares of common stock, including shares issued to cover the underwriters' overallotment option, at a price of \$33.00 per share. The net proceeds of approximately \$138.3 million were used to repay a portion of the Company's outstanding borrowings under its revolving credit facility. The Company also utilized a portion of the additional borrowing capacity under its revolving credit facility resulting from the common stock offering to fund its acquisition of the Rocky Mountain and Southwest distribution businesses of Whole Foods Distribution.

11. COMMITMENTS AND CONTINGENCIES

The Company leases various facilities and equipment under operating lease agreements with varying terms. Most of the leases contain renewal options and purchase options at several specific dates throughout the terms of the leases. Rent and other lease expense for the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011 totaled approximately \$59.5 million, \$56.4 million and \$48.4 million, respectively.

Future minimum annual fixed payments required under non-cancelable operating leases having an original term of more than one year as of August 3, 2013 are as follows:

Table of Contents

Fiscal Year	(In thousands)
2014	\$44,140
2015	42,653
2016	39,779
2017	35,461
2018	28,935
2019 and thereafter	136,671
	\$327,639

As of August 3, 2013, outstanding commitments for the purchase of inventory were approximately \$26.5 million. The Company had outstanding letters of credit of approximately \$31.8 million at August 3, 2013.

As of August 3, 2013, there were no outstanding commitments for the purchase of diesel fuel.

Assets mortgaged at August 3, 2013 and July 28, 2012 were not material.

The Company may from time to time be involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, amounts accrued, as well as the total amount of reasonably possible losses with respect to such matters, individually and in the aggregate, are not deemed to be material to the Company's consolidated financial position or results of operations. Legal expenses incurred in connection with claims and legal actions are expensed as incurred.

12. RETIREMENT PLANS

Retirement Plan

The Company has a defined contribution retirement plan under Section 401(k) of the Internal Revenue Code, the United Natural Foods, Inc. Retirement Plan (the "Retirement Plan"). In order to become a participant in the Retirement Plan, employees must meet certain eligibility requirements as described in the Retirement Plan document. In addition to amounts contributed to the Retirement Plan by employees, the Company makes contributions to the Retirement Plan on behalf of the employees. The Company also has the Millbrook Distribution Services Union Retirement Plan, which was assumed as part of an acquisition during fiscal 2008. The Company's contributions to these plans were approximately \$5.2 million, \$4.4 million, and \$3.9 million for the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, respectively.

Deferred Compensation and Supplemental Retirement Plans

The Company's non-employee directors and certain of its employees are eligible to participate in the United Natural Foods Deferred Compensation Plan and the United Natural Foods Deferred Stock Plan (collectively the "Deferral Plans"). The Deferral Plans are nonqualified deferred compensation plans which are administered by the Company's Compensation Committee of the Board of Directors. The Deferral Plans were established to provide participants with the opportunity to defer the receipt of all or a portion of their compensation to a non-qualified retirement plan in amounts greater than the amount permitted to be deferred under the Company's 401(k) Plan. The Company believes that this is an appropriate benefit because (i) it operates to place employees and non-employee directors in the same position as other employees who are not affected by Internal Revenue Code limits placed on plans such as the Company's 401(k) Plan; (ii) does not substantially increase the Company's financial obligations to its employees and directors (there are no employer matching contributions, only a crediting of deemed earnings); and (iii) provides additional incentives to the Company's employees and directors, since amounts set aside by the employees and directors are subject to the claims of the Company's creditors until paid. Under the Deferral Plans, only the payment of the compensation earned by the participant is deferred and there is no deferral of the expense in the Company's financial statements related to the participants' earnings; the Company records the related compensation expense in the year in which the compensation is earned by the participants.

Under the Deferred Stock Plan, which was frozen to new deferrals effective January 1, 2007, each eligible participant could elect to defer between 0% and 100% of restricted stock awards granted during the election calendar year.

Effective January 1, 2007, each participant may elect to defer up to 100% of their restricted share unit awards, performance shares and performance units under the Deferred Compensation Plan. Under the Deferred Compensation Plan, each participant may also elect to defer a minimum of \$1,000 and a maximum of 90% of base salary and 100%

of director fees, employee bonuses and commissions, as applicable, earned by the participants for the calendar year. From January 1, 2009 to July 31, 2010, participants' cash-derived deferrals under the Deferred Compensation Plan earned interest at the 5-year certificate of deposit annual yield taken from the Wall Street Journal Market Data Center (as captured on the first and last business date of each calendar quarter and averaged) plus 3% credited and compounded quarterly. Beginning August 1, 2010, participants' cash-

Table of Contents

derived deferrals accrue earnings and appreciation based on the performance of mutual funds selected by the participant. The value of equity-based awards deferred under the Deferred Compensation and Deferred Stock Plans are based upon the performance of the Company's common stock.

The Millbrook Deferred Compensation Plan and the Millbrook Supplemental Retirement Plan were assumed by the Company as part of an acquisition during fiscal 2008. Deferred compensation relates to a compensation arrangement implemented in 1984 by a predecessor of the acquired company in the form of a non-qualified defined benefit plan and a supplemental retirement plan which permitted former officers and certain management employees, at the time, to defer portions of their compensation to earn specified maximum benefits upon retirement. The future obligations, which are fixed in accordance with the plans, have been recorded at a discount rate of 5.7%. These plans do not allow new participants, and there are no active employees subject to these plans.

In an effort to provide for the benefits associated with these plans, the acquired company's predecessor purchased whole-life insurance contracts on the plan participants. The cash surrender value of these policies included in Other Assets in the Consolidated Balance Sheet was \$10.7 million and \$10.1 million at August 3, 2013 and July 28, 2012, respectively. At August 3, 2013, total future obligations including interest, assuming commencement of payments at an individual's retirement age, as defined under the deferred compensation arrangement, were as follows:

Fiscal Year	(In thousands)
2014	\$1,163
2015	1,324
2016	1,316
2017	1,204
2018	1,023
2019 and thereafter	6,257
	\$12,287

13.EMPLOYEE STOCK OWNERSHIP PLAN

The Company adopted the UNFI Employee Stock Ownership Plan (the "ESOP") for the purpose of acquiring outstanding shares of the Company for the benefit of eligible employees. The ESOP was effective as of November 1, 1988 and has received notice of qualification by the Internal Revenue Service.

In connection with the adoption of the ESOP, a Trust was established to hold the shares acquired. On November 1, 1988, the Trust purchased 40% of the then outstanding common stock of the Company at a price of \$4.1 million. The trustees funded this purchase by issuing promissory notes to the initial stockholders, with the Trust shares pledged as collateral. These notes bear interest at 1.33% as of August 3, 2013 and July 28, 2012, and are payable through May 2015. As the debt is repaid, shares are released from collateral and allocated to active employees, based on the proportion of principal and interest paid in the year.

All shares held by the ESOP were purchased prior to December 31, 1992. As a result, the Company considers unreleased shares of the ESOP to be outstanding for purposes of calculating both basic and diluted earnings per share, whether or not the shares have been committed to be released. The debt of the ESOP is recorded as debt and the shares pledged as collateral are reported as unearned ESOP shares in the consolidated balance sheets. During the fiscal years ended August 3, 2013, July 28, 2012, and July 30, 2011, contributions totaling approximately \$0.2 million each fiscal year were made to the Trust. Of these contributions, less than \$0.1 million in each fiscal year represented interest.

The ESOP shares were classified as follows:

	August 3, 2013	July 28, 2012
	(In thousands)	
Total ESOP shares—beginning of year	2,053	2,199
Shares distributed to employees	(220)	(146)
Total ESOP shares—end of year	1,833	2,053
Allocated shares	1,777	1,955
Unreleased shares	56	98
Total ESOP shares	1,833	2,053

Table of Contents

During the fiscal years ended August 3, 2013 and July 28, 2012, 41,630 and 42,171 shares were released for allocation based on note payments, respectively. During fiscal 2012, the Company also allocated 402,285 shares to correct an operational error in prior years as elected in a Voluntary Correction Program filed with the IRS. In connection with this allocation, the Company recorded compensation expense of approximately \$0.3 million during the fourth quarter of fiscal 2012. The fair value of unreleased shares was approximately \$3.4 million and \$5.3 million at August 3, 2013 and July 28, 2012, respectively.

14. INCOME TAXES

For the fiscal year ended August 3, 2013, income before income taxes consists of \$166.7 million from U.S. operations and \$7.4 million from foreign operations. For the fiscal year ended July 28, 2012, income before income taxes consists of \$142.2 million from U.S. operations and \$8.6 million from foreign operations. For the fiscal year ended July 30, 2011, income before income taxes consists of \$118.5 million from U.S. operations and \$7.9 million from foreign operations.

Total federal and state income tax (benefit) expense consists of the following:

	Current (In thousands)	Deferred	Total
Fiscal year ended August 3, 2013			
U.S. Federal	\$44,095	\$7,029	\$51,124
State & Local	13,366	(364)) \$13,002
Foreign	2,021	115	\$2,136
	\$59,482	\$6,780	\$66,262
Fiscal year ended July 28, 2012			
U.S. Federal	\$55,083	\$(7,506)) \$47,577
State & Local	9,002	462	9,464
Foreign	1,471	929	2,400
	\$65,556	\$(6,115)) \$59,441
Fiscal year ended July 30, 2011			
U.S. Federal	\$24,971	\$14,273	\$39,244
State & Local	7,091	1,207	8,298
Foreign	2,180	40	2,220
	\$34,242	\$15,520	\$49,762

Total income tax expense (benefit) was different than the amounts computed using the United States statutory income tax rate (35)% applied to income before income taxes as a result of the following:

	Fiscal year ended		
	August 3, 2013	July 28, 2012	July 30, 2011
	(In thousands)		
Computed "expected" tax expense	\$60,940	\$52,774	\$44,252
State and local income tax, net of Federal income tax benefit	7,501	6,152	5,394
Non-deductible expenses	1,516	1,260	1,111
Tax effect of share-based compensation	134	(140)) (440)
General business credits	(1,374)) (231)) (1,021)
Other, net	(2,455)) (374)) 466
Total income tax expense	\$66,262	\$59,441	\$49,762

Total income tax expense (benefit) for the years ended August 3, 2013, July 28, 2012 and July 30, 2011 was allocated as follows:

Table of Contents

	August 3, 2013 (In thousands)	July 28, 2012	July 30, 2011
Income tax expense	\$66,262	\$59,441	\$49,762
Stockholders' equity, difference between compensation expense for tax purposes and amounts recognized for financial statement purposes	(1,952)	(2,804)	(1,545)
Other comprehensive income	—	495	502
	\$64,310	\$57,132	\$48,719

The tax effects of temporary differences that give rise to significant portions of the net deferred tax assets and deferred tax liabilities at August 3, 2013 and July 28, 2012 are presented below:

	2013 (In thousands)	2012
Deferred tax assets:		
Inventories, principally due to additional costs inventoried for tax purposes	\$6,906	\$6,431
Compensation and benefits related	21,224	18,471
Accounts receivable, principally due to allowances for uncollectible accounts	3,861	2,817
Accrued expenses	8,914	8,294
Net operating loss carryforwards	2,374	2,778
Other deferred tax assets	179	221
Total gross deferred tax assets	43,458	39,012
Less valuation allowance	819	990
Net deferred tax assets	\$42,639	\$38,022
Deferred tax liabilities:		
Plant and equipment, principally due to differences in depreciation	\$34,222	\$23,828
Intangible assets	25,766	24,825
Other	303	276
Total deferred tax liabilities	60,291	48,929
Net deferred tax liabilities	\$(17,652)	\$(10,907)
Current deferred income tax assets	\$23,822	\$25,353
Non-current deferred income tax liabilities	(41,474)	(36,260)
	\$(17,652)	\$(10,907)

The net increase (decrease) in total valuation allowance in fiscal year 2013, 2012, and 2011 was \$(171), \$(4,081) and \$19, respectively. The net decrease in fiscal 2013 did not have an impact on net income as it relates to expired unutilized tax attributes for which a valuation allowance was previously recorded in prior fiscal years.

At August 3, 2013, the Company had net operating loss carryforwards of approximately \$4.0 million for federal income tax purposes. The federal carryforwards are subject to an annual limitation of approximately \$0.3 million under Internal Revenue Code Section 382. The carryforwards expire at various times between fiscal years 2017 and 2027. In addition, the Company had net operating loss carryforwards of approximately \$21.8 million for state income tax purposes that expire in fiscal years 2014 through 2031.

In assessing the recoverability of deferred tax assets, the Company considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. Due to the fact that the Company has sufficient taxable income in the federal carryback period and anticipates sufficient future taxable income over the periods in which the deferred tax assets are deductible, the ultimate realization of deferred tax assets for federal and state tax purposes appears more likely than not at August 3, 2013, with the exception of certain state deferred tax assets.

Valuation allowances were established against approximately \$0.8 million of state deferred tax assets. The subsequent release of this valuation allowance, if such release occurs, will reduce income tax expense.

Table of Contents

The Company and its subsidiaries file income tax returns in the United States federal jurisdiction and in various state jurisdictions. UNFI Canada files income tax returns in Canada and certain of its provinces. U.S. federal income tax examination years prior to 2012 have either statutorily or administratively been closed with the Internal Revenue Service, and with limited exception, the fiscal tax years that remain subject to examination by state jurisdictions range from the Company's fiscal 2009 to fiscal 2012.

The Company records interest and penalties related to unrecognized tax benefits as a component of income tax expense. For the fiscal year ended August 3, 2013, the Company recognized net tax benefits of approximately \$4.4 million in its consolidated statement of income related to tax examinations closed during the fiscal year. For the fiscal years ended August 3, 2013, July 28, 2012 and July 30, 2011, the Company did not have any significant unrecognized tax benefits and thus, no significant interest and penalties related to unrecognized tax benefits were recognized.

The undistributed earnings of the Company's non-U.S. subsidiaries approximated \$7.4 million at August 3, 2013. We consider the undistributed earnings to be indefinitely reinvested; therefore, we have not provided a deferred tax liability for any residual U.S. tax that may be due upon repatriation of these earnings. Because of the effect of U.S. foreign tax credits, it is not practicable to estimate the amount of tax that might be payable on these earnings in the event they no longer are indefinitely reinvested.

15. BUSINESS SEGMENTS

The Company has several operating divisions aggregated under the wholesale segment, which is the Company's only reportable segment. These operating divisions have similar products and services, customer channels, distribution methods and historical margins. The wholesale segment is engaged in national distribution of natural, organic and specialty foods, produce and related products in the United States and Canada. The Company has additional operating divisions that do not meet the quantitative thresholds for reportable segments and are therefore aggregated under the caption of "Other". "Other" includes a retail division, which engages in the sale of natural foods and related products to the general public through retail storefronts on the east coast of the United States, a manufacturing division, which engages in importing, roasting and packaging of nuts, seeds, dried fruit and snack items, and the Company's branded product lines. "Other" also includes certain corporate operating expenses that are not allocated to operating divisions, which consist of depreciation, salaries, retainers, and other related expenses of officers, directors, corporate finance (including professional services), information technology, governance, legal, human resources and internal audit that are necessary to operate the Company's headquarters located in Providence, Rhode Island. As the Company continues to expand its business and serve its customers through a new national platform, these corporate expense amounts have increased, which is the primary driver behind the increasing operating losses within the "Other" category below.

Non-operating expenses that are not allocated to the operating divisions are under the caption of "Unallocated Expenses". The Company does not record its revenues for financial reporting purposes by product group, and it is therefore impracticable for the Company to report them accordingly.

Following is business segment information for the periods indicated:

Table of Contents

	Wholesale	Other	Eliminations	Unallocated Expenses	Consolidated

17. SUBSEQUENT EVENTS

Subsequent to the fiscal year ended August 3, 2013, the Company entered into a definitive agreement to acquire all of the equity interests of Trudeau Foods, LLC ("Trudeau Foods") from Trudeau Holdings, LLC, a portfolio company of Arbor Investments II, LP. Trudeau Foods is the largest Minnesota-based distributor of natural, organic and specialty food products and serves over 600 customer locations, including chain and independent grocers, wholesalers and meat markets in Minnesota, North Dakota, Wisconsin and Michigan's Upper Peninsula. Trudeau Foods carries a full range of fine-quality and specialty gourmet meats, frozen foods, dairy, bakery, deli, seafood and dry grocery items under a wide breadth of national, regional and private label brands.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures.

We carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act as of the end of the period covered by this Annual Report on Form 10-K (the "Evaluation Date"). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as of the Evaluation Date, our disclosure controls and procedures are effective.

Management's Annual Report on Internal Control Over Financial Reporting.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) or 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;

- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial

- statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and

- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, including our Chief Executive Officer and Chief Financial Officer, assessed the effectiveness of our internal control over financial reporting as of August 3, 2013. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in the Internal Control-Integrated Framework (1992 framework). Based on its assessment, our management concluded that, as of August 3, 2013, our internal control over financial reporting was effective based on those criteria at the reasonable assurance level.

Report of the Independent Registered Public Accounting Firm.

The effectiveness of our internal control over financial reporting as of August 3, 2013 has been audited by KPMG LLP, an independent registered public accounting firm, as stated in its attestation report which is included in "Item 8. Financial Statements and Supplementary Data" of this Annual Report on Form 10-K.

Changes in Internal Controls Over Financial Reporting

No change in our internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f) or 15d-15(f)) occurred during the fiscal quarter ended August 3, 2013 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

Table of Contents

PART III.

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this item will be contained, in part, in our Definitive Proxy Statement on Schedule 14A for our Annual Meeting of Stockholders to be held on December 18, 2013 (the "2013 Proxy Statement") under the captions "Directors and Nominees for Director," "Section 16(a) Beneficial Ownership Reporting Compliance," and "Committees of the Board of Directors—Audit Committee" and is incorporated herein by this reference. Pursuant to Item 401(b) of Regulation S-K, our executive officers are reported under the caption "Executive Officers of the Registrant" in Part I, Item I of this Annual Report on Form 10-K.

We have adopted a code of conduct and ethics that applies to our Chief Executive Officer, Chief Financial Officer, and employees within our finance, operations, and sales departments. Our code of conduct and ethics is publicly available on our website at www.unfi.com and is available free of charge by writing to United Natural Foods, Inc., 313 Iron Horse Way, Providence, Rhode Island 02908, Attn: Investor Relations. We intend to make any legally required disclosures regarding amendments to, or waivers of, the provisions of the code of conduct and ethics on our website at www.unfi.com. Please note that our website address is provided as an inactive textual reference only.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item will be contained in the 2013 Proxy Statement under the captions "Non-employee Director Compensation," "Executive Compensation", "Compensation Discussion and Analysis", "Compensation Committee Interlocks and Insider Participation" and "Report of the Compensation Committee" and is incorporated herein by this reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item will be contained, in part, in the 2013 Proxy Statement under the caption "Stock Ownership of Certain Beneficial Owners and Management", and is incorporated herein by this reference.

The following table provides certain information with respect to equity awards under our equity compensation plans as of August 3, 2013.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in the second column)	
Plans approved by stockholders	1,156,806	(1)\$37.25	(1)1,552,006	(2)
Plans not approved by stockholders	129,627	(3)—	(3)—	
Total	1,286,433	\$37.25	1,552,006	

- Includes 620,816 restricted stock units under the 2004 Equity Incentive Plan (the "2004 Plan"), 61,753 performance-based restricted stock units outstanding under the 2004 Plan, 116,794 stock options under the 2004 Plan, 338,143 stock options under the 2002 Stock Incentive Plan (the "2002 Plan") and 19,300 stock options under (1) the 1996 Stock Option Plan (the "1996 Plan"). Restricted stock units and performance stock units do not have an exercise price because their value is dependent upon continued employment over a period of time or the achievement of certain performance goals, and are to be settled for shares of common stock. Accordingly, they have been disregarded for purposes of computing the weighted-average exercise price.
- (2) Of these shares, 302,006 shares were available for issuance under the 2004 Plan and 1,250,000 shares were available for issuance under the 2012 Plan. The 2004 Plan and 2012 Plan authorize grants in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units or a combination thereof. The number of shares remaining available for future issuances assumes that, with respect to

outstanding performance-based restricted stock units, the vesting criteria will be achieved at the target level.

Consists of 129,627 phantom stock units outstanding under the United Natural Foods Inc. Deferred Compensation (3) Plan. Phantom stock units do not have an exercise price because the units may be settled only for shares of common stock on a one-for-one basis at a future date as outlined in the plan.
