For the Year Ended December 31, 2004

Schedule XIV Notes to Financial Statements

Instructions:

The space below is provided for important notes regarding the financial statements or any account thereof. Furnish particulars as to any significant contingent assets or liabilities existing at the end of the year. Notes relating to financial statements shown elsewhere in this report may be indicated here by reference.

Note 1 Organization of the Company

LG&E Energy Services Inc., a Kentucky corporation (the Company or SERVCO), is a wholly-owned subsidiary of LG&E Energy LLC (LEL), a registered public utility holding company under the Public Utility Holding Company Act of 1935 (PUHCA). On December 30, 2003, LEL became the successor by assignment and subsequent merger, to all the assets and liabilities of the former LG&E Energy Corp. (LEC). Following the transaction, LEL, became a registered holding company under PUHCA. The Company was authorized to conduct business as a service company for LEC and its various subsidiaries by order of the Securities and Exchange Commission (SEC) dated December 6, 2000, and commenced operations January 1, 2001.

On July 1, 2002, E.ON AG (E.ON) completed its acquisition of Powergen plc, now Powergen Limited, which includes LEL, for approximately £5.1 billion (\$7.3 billion). Following the acquisition, E.ON became a registered holding company under PUHCA. As contemplated in their regulatory filings in connection with the E.ON acquisition, E.ON, Powergen and LG&E Energy completed an administrative reorganization to move the LG&E Energy group from an indirect Powergen subsidiary to an indirect E.ON subsidiary. This reorganization was effective in March 2003. In early 2004, LEL began direct reporting arrangements to E.ON.

The Company provides certain services to affiliated entities, including Louisville Gas and Electric Company (LG&E) and Kentucky Utilities Company (KU), at cost as required under PUHCA. On January 1, 2001, approximately 1,000 employees, mainly from LEC, LG&E and KU, were moved to the Company. The Company is organized along functional lines to accomplish its purpose of providing management, administrative, and technical services. These services are priced so that the Company operates on a break-even basis.

The Company follows the Uniform System of Accounts prescribed by the SEC, and maintains its accounts in accordance with PUHCA. The accounting policies of the Company conform to U.S. generally accepted accounting principles (GAAP).

Note 2 Summary of Significant Accounting Policies

A. Management's Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported assets and liabilities and disclosure of contingent items at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

B. Property

Property, plant and equipment includes property that is in use and under construction, and is reported at cost. Depreciation is computed on a straight-line basis. Office furniture is depreciated over 30 years and personal computers are depreciated over 3 years.

C. Income Taxes

The Company accounts for income taxes pursuant to Statement of Financial Accounting Standards No. 109 "Accounting For Income Taxes" (FAS 109). This standard requires that deferred income taxes be recorded for all temporary differences between the financial statement and tax basis of assets, liabilities and loss carryforwards. Deferred tax balances are based on enacted tax laws at tax rates that are expected to be in effect when the temporary differences reverse. Through December 31, 2004, the Company was part of the E.ON US Investments Corp. consolidated Federal income tax return, which includes LEL and all other eligible U.S. subsidiaries.

D. Pension and Other Post-retirement Benefits

The Company has both funded and unfunded noncontributory defined benefit pension plans that together cover substantially all of its employees. The plans provide defined benefits based on years of service and final average salary.

The Company also offers other post-retirement benefit plans to eligible employees. The post-retirement health care plan is contributory with participants' contributions adjusted annually. The plan includes a limit on the Company's share of costs for recent and future retirees with a fixed employer contribution. Postretirement life insurance is also offered and is noncontributory.

The Company uses December 31 as the measurement date for its plans.

Note 3 Common Stock

The Company is authorized to issue 1,000 shares of common stock, no par value per share. At December 31, 2004, there were 1,000 shares authorized and 100 shares issued and outstanding. LEL holds all of the Company's common stock.

Note 4 Related Party Transactions

A. Service Agreements

The Company engages in transactions in the normal course of business with other LEL subsidiaries. These transactions are primarily composed of services received and/or rendered. The Company has entered into Service Agreements and Service Level Agreements with affiliates that receive these services.

B. Money Pool

The Company operates the Utility Money Pool and the Non-Utility Money Pool, including recordkeeping and coordination of loans, to more effectively utilize cash resources and to reduce outside short-term borrowings. Both Money Pools are administered on an "at-cost" basis.

For the Year Ended December 31, 2004

METHODS OF ALLOCATION

Information Systems Chargeback Rates Rates for services, including but not limited to software, consulting, mainframe and personal computer services, are based on the costs of labor, materials and information services overheads related to the provision of each service. Such rates are applied based on the specific equipment employed and the measured usage of services by Client entities. These rates will be determined annually based on actual experience and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes.

Number of Customers Ratio A ratio based on the number of retail electric and/or gas customers. This ratio will be determined annually based on the actual number of customers at the end of the previous calendar year and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes. In some cases, the ratio may be calculated based on the type of customer class being served (i.e. Residential, Commercial or Industrial).

Number of Employees Ratio A ratio based on the number of employees benefiting from the performance of a service. This ratio will be determined annually based on actual counts of applicable employees at the end of the previous calendar year and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes. In some cases, a two-step assignment methodology is utilized to properly allocate SERVCO employee costs to the proper legal entity.

Departmental Charge Ratio A specific SERVCO department ratio based upon various factors such as labor hours, labor dollars, departmental or Client entity headcount, etc. The departmental charge ratio typically applies to indirectly attributable costs (defined in Section V, Cost Apportionment Methodology) such as departmental administrative, support, and/or material and supply costs that benefit more than one affiliate and that require allocation using general measures of cost causation. Methods for assignment are department-specific depending on the type of product or service being performed and are documented and monitored by the PUHCA Compliance Manager on a monthly basis to ensure consistent and proper application and periodic true-up, where necessary, for SERVCO billing purposes.

Electric Peak Load Ratio Based on the sum of the monthly electric maximum system demands for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company and the denominator of which is for all operating companies. This ratio will be determined annually, or at such time as may be required due to a significant change.

Revenue Ratio Based on the sum of the revenue at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes.

Payroll Ratio Based on the sum of the payroll at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes.

Total Assets Ratio Based on the total assets at year end for the preceding year, the numerator of which is for an operating company or affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes. In the event of joint ownership of a specific asset, asset ownership percentages will be utilized to assign costs.

Contract Ratio Based on the sum of the physical amount (i.e. tons of coal, cubic feet of natural gas) of the contract for both coal and natural gas at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to significant changes.

Shareholder Ratio Based on the average number of preferred shareholders at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company

or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined on an annual basis, or at such time as may be required due to significant changes.

Number of Meters Ratio Ratio based on the number or types of meters being utilized by all levels of customer classes within the system for the immediately preceding twelve consecutive calendar months. The numerator is equal to the number of meters for a specific Client entity and the denominator is equal to such expenditures for all applicable client entities. This ratio will be determined annually, or at such time as may be required due to significant change.

Number of Transactions Ratio Based on the sum of transactions occurring in the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected would affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined on a monthly basis, or at such time as may be required due to significant changes. For example, services with regard to Procurement and Major Contracts define a transaction as the number of contracts negotiated. Services pertaining to Materials Logistics would define the transaction as the number of items ordered, picked and disbursed out of the warehouse. Services pertaining to Accounts Payable would define the transaction as the number of invoices processed. Similar to the Departmental Charge Ratio, defined previously, the PUHCA Compliance Manager is responsible for maintaining and monitoring specific product/service methodology documentation and periodic true-up requirements for actual transactions related to SERVCO billings.

Retail Revenue Ratio Based on utility revenues, excluding energy marketing revenues, for the immediate preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to a significant change.

Energy Marketing Ratio Based on the absolute value of equivalent megawatt hours purchased or sold for the immediate preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affiliate and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined annually, or at such time as may be required due to a significant change.

Regulatory Mandate Ratios Based on Federal or state mandated percentage allocations based on regulatory proceedings and requirements. These ratios are typically developed in concert with regulatory authorities representing the results of merger or joint asset ownership negotiations and are supported by specific contracts regarding legal entity allocation requirements. Contract terms and periodic updates, if necessary, are maintained and monitored by the PUHCA Compliance Manager and SERVCO departmental management.

Project Ratio Based on the total costs for any departmental or affiliate project at the end of each month for the immediately preceding twelve consecutive calendar months, the numerator of which is for an operating company or an affected affiliate company and the denominator of which is for all operating companies and affected affiliate companies. This ratio will be determined on a monthly basis, or at such time as may be required due to significant changes.

Transportation Resource Management System Chargeback Rate Rates for use of transportation equipment are based on the costs associated with providing and operating transportation fleet for all affiliated companies including developing fleet policy, administering regulatory compliance programs, managing repair and maintenance of vehicles and procuring vehicles. Such rates are applied based on the specific equipment employment and the measured usage of services by Client entities. These rates will be determined annually based on actual experience and may be adjusted for any known and reasonably quantifiable events, or at such time as may be required due to significant changes.

Non-Fuel Material and Services Expenditures A ratio based on non-fuel material and services expenditures, net of reimbursements, for the immediately preceding twelve consecutive calendar months. The numerator is equal to such expenditures for a specific Client entity and/or line-of-business as appropriate and the denominator is equal to such expenditures for all applicable Client entities. This ratio will be determined annually, or at such time as may be required due to a significant change.

ANNUAL REPORT TO THE SEC OF LG&E ENERGY SERVICES INC.
For the Year Ended December 31, 2004

Supplemental Service Transactions among the E.ON System and LG&E Energy Group

Instructions:

As stated in the merger order.

Services rendered by members of the E.ON Group or the Powergen Group companies included the assessment and structural check on existing stack design; mercury testing; fan implosion studies; assessing of reheaters; PowerTube licenses and support; meetings to Alstom Baden; bio solids co-firing study; review of offer on renovation of hydro power station; strategy development for coal boilers and combustion turbines; various monitoring and specification and technical studies, acceptance, balance and catalyst performance testing; and training in assessing and preventing boiler tube failures at the LG&E Energy Group Plant facilities.

Further services included educational seminars for professional development of LG&E Energy Group employees and cost transfer of bank fees.

Costs incurred by E.ON AG on behalf of the LG&E Energy Group companies included software implementation, license and support fees; membership subscription fees, and excess liability insurance. These costs were passed through at cost with no mark-up.

In addition, several E.ON AG and/or E.ON UK plc (formerly Powergen UK plc) employees were assigned to work in the US for the LG&E Energy Group. These salaries and expenses of the expatriate employees were reimbursed to E.ON AG and E.ON UK plc. Individual job descriptions are listed below.

Services rendered by individual LG&E Energy Group companies were mainly labor and general expenses of individuals doing specialized work for the E.ON/Powergen system companies. This work included regulatory filings, engineering policy, best practices purchasing, auditing, human resources and investment/shareholder expenses. Also, several employees were assigned to work in Germany at E.ON AG, in Sweden at Sydkraft AB, and in UK at E.ON UK plc. Those salaries and expenses were reimbursed by E.ON AG, Sydkraft AB and E.ON UK plc. Several items were expenses of E.ON AG, Sydkraft AB and E.ON UK plc and were paid by the LG&E Energy Group companies, with reimbursement from each company.

Descriptions are on each line item below.

Description of Services	Amount	Service Performed By:	Service Received By:	LG&E Energy Group Employees Performing Service
