SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-K

✓ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2006

OR

o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-9025

VISTA GOLD CORP.

(Exact Name of Registrant as Specified in its Charter)

Yukon Territory

(State or other Jurisdiction of Incorporation or Organization)

None

(IRS Employer
Identification Number)

Suite 5, 7961 Shaffer Parkway

Littleton, Colorado

(Address of Principal Executive Offices)

80127

(Zip Code)

(720) 981-1185

(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class

Name of Each Exchange on Which Registered

Common shares without par value

American Stock Exchange
Toronto Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act: Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act: Yes No

Edgar Filing: VISTA GOLD CORP - Form 10-K

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports); and (2) has been subject to the filing requirements for the past 90 days: Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K:

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act: Large Accelerated Filer Accelerated Filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act): Yes No

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was last sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed second fiscal quarter:

As of June 30, 2006 being the last business day of the Registrant's most recently completed second fiscal quarter, the aggregate market value of outstanding Common Shares of the registrant held by non-affiliates was approximately \$257,000,000.

Outstanding Common Shares: As of March 13, 2007, 31,992,969 Common Shares of the registrant were outstanding.

Documents incorporated by reference: To the extent herein specifically referenced in Part III, portions of the registrant's definitive Proxy Statement for the 2007 Annual General Meeting of Shareholders. See Part III.

GLOSSARY

"*assay*" means to test ores or minerals by chemical or other methods for the purpose of determining the amount of valuable metals contained.

"*breccia*" means rock consisting of fragments, more or less angular, in a matrix of finer-grained material or of cementing material.

"*claim*" means a mining title giving its holder the right to prospect, explore for and exploit minerals within a defined area.

"*Common Shares*" means common shares without par value of Vista Gold.

"*Computershare*" means Vista Gold's registrar and transfer agent, Computershare Investor Services Inc.

"*Corporation*" means the consolidated group consisting of Vista Gold Corp. and its subsidiaries Hycroft Resources & Development, Inc., Hycroft Lewis Mine, Inc., Vista Gold Holdings Inc., Vista Gold U.S. Inc., Vista Nevada Corp., Vista Gold California, LLC, Allied Nevada Gold Corp., Allied Nevada Gold Holdings LLC, Granges Inc., Vista Gold (Antigua) Corp., Minera Paredones Amarillos S.A. de C.V., Compania Inversora Vista S.A., Minera Nueva Vista S.A., Compania Exploradora Vistex S.A., Idaho Gold Resources LLC, Victory Gold Inc., Victory Exploration Inc., Vista Gold (Barbados) Corp., Vista Minerals (Barbados) Corp., Vista Australia Pty Ltd., Salu Siwa Pty Ltd. and PT Masmindo Dwi.

"*cut-off grade*" means the grade below which mineralized material or ore will be considered waste.

"*deposit*" means an informal term for an accumulation of mineral ores.

"*diamond drill*" means a rotary type of rock drill that cuts a core of rock and is recovered in long cylindrical sections, two centimeters or more in diameter.

"*fault*" means a fracture in rock along which there has been displacement of the two sides parallel to the fracture.

"*heap leach*" means a gold extraction method that percolates a cyanide solution through ore heaped on an impervious pad or base.

"*Hycroft Inc.*" or "*HRDI*" means Hycroft Resources & Development, Inc.

"*Hycroft Lewis*" means Hycroft Lewis Mine, Inc.

"*mineralization*" means the concentration of metals within a body of rock.

"*mineralized material*" is a mineralized body which has been delineated by appropriately spaced drilling and/or underground sampling to support a sufficient tonnage and average grade of metal(s). Such a deposit does not qualify as a reserve, until a comprehensive evaluation based upon unit cost, grade, recoveries, and other material factors conclude legal and economic feasibility.

"*ore*" means material containing minerals that can be economically extracted.

"*oxide*" means mineralized rock in which some of the original minerals have been oxidized (*i.e.*, combined with oxygen). Oxidation tends to make the ore more porous and permits a more complete permeation of cyanide solutions so that minute particles of gold in the interior of the minerals will be more readily dissolved.

"*probable reserves*" means reserves for which quantity and grade and/or quality are computed from information similar to that used for proven reserves, but the sites for inspection, sampling and measurement are farther apart or are otherwise less adequately spaced. The degree of assurance, although lower than that for proven reserves, is high enough to assume continuity between points of observation.

Edgar Filing: VISTA GOLD CORP - Form 10-K

"*proven reserves*" means reserves for which (a) quantity is computed from dimensions revealed in outcrops, trenches, workings or drill holes; grade and/or quality are computed from the results of detailed sampling and (b) the sites for inspection, sampling and measurement are spaced so closely and the geologic character is so well defined that size, shape, depth, and mineral content of reserves are well-established.

"*recovery*" means that portion of the metal contained in the ore that is successfully extracted by processing, expressed as a percentage.

"*reserves*" or "*ore reserves*" mean that part of a mineral deposit, which could be economically and legally extracted or produced at the time of the reserve determination.

"*sampling*" means selecting a fractional, but representative, part of a mineral deposit for analysis.

"*sediment*" means solid material settled from suspension in a liquid.

"*stockwork*" means a rock mass interpenetrated by small veins of mineralization.

"*strike*", when used as a noun, means the direction, course or bearing of a vein or rock formation measured on a level surface and, when used as a verb, means to take such direction, course or bearing.

"*strike length*" means the longest horizontal dimension of an orebody or zone of mineralization.

"*stripping ratio*" means the ratio of waste to ore in an open pit mine.

"*sulfide*" means a compound of sulfur and some other element.

"*tailings*" means material rejected from a mill after most of the valuable minerals have been extracted.

"*vein*" means a fissure, fault or crack in a rock filled by minerals that have traveled upwards from some deep source.

"*volcaniclastic*" means derived by ejection of volcanic material from a volcanic vent.

"*waste*" means rock lacking sufficient grade and/or other characteristics of ore.

USE OF NAMES

In this report, the terms "we", "our", "Vista Gold" and the "Corporation" unless the context otherwise requires, refer to Vista Gold Corp. and its subsidiaries.

CURRENCY

Unless otherwise specified, all dollar amounts in this report are expressed in United States dollars.

UNCERTAINTY OF FORWARD-LOOKING STATEMENTS

This document, including any documents that are incorporated by reference as set forth on the face page under "Documents incorporated by reference", contains forward-looking statements within the meaning of the Securities Act of 1933 and Securities Exchange Act of 1934. All statements, other than statements of historical facts, included in this document, our other filings with the SEC and in press releases and public statements by our officers or representatives, that address activities, events or developments that we expect or anticipate will or may occur in the future, including such things as future business strategy, competitive strengths, goals, expansion and growth of our business, legal proceedings, estimated production, estimated completion dates, estimated exploration expenditures, operations, proven or probable reserves, mineralized material, current working capital, cash operating costs, plans and other such matters, as well as statements made concerning plans and anticipated effects of the proposed transfer of our Nevada-based mining properties and related assets into Allied Nevada Gold Corp. and the transfer by Carl and Janet Pescio to Allied Nevada of their interests in certain Nevada-based mining properties and related assets (see "Part I Item 1. Business Overview") are forward-looking statements. The words "estimate", "plan", "anticipate", "expect", "intend", "believe" and similar expressions are intended to identify forward-looking statements. These statements involve known and unknown risks, uncertainties, assumptions and other factors which may cause our actual results, performance or achievements, including anticipated consequences of the Arrangement (as defined in "Part I Item 1. Business Overview"), to be materially different from any results, performance or achievements expressed or implied by such forward-looking statements. These factors include, among others, risks related to the Arrangement, including the risk that the market price of our common shares could decrease following the Arrangement, and the risk that we may be subject to U.S. federal corporate income tax and Canadian income taxes in connection with our distribution of Allied Nevada shares. These also include other risks such as our likely status as a "passive foreign investment company" for U.S. federal tax purposes, and business risks including the risk that our acquisition, exploration and property advancement efforts will not be successful; risks relating to fluctuations in the price of gold; the inherently hazardous nature of mining-related activities; uncertainties concerning reserve and resource estimates; potential effects on our operations of environmental regulations in the countries in which we operate; intense competition in the mining industry; risks due to legal proceedings; uncertainty of being able to raise capital on favorable terms or at all; risks that some of our directors may have conflicts of interest as a result of involvement with other natural resource companies; possible challenges to title to our properties; risks from political and economic instability in the

countries in which we operate; and risks that may affect our ability to complete the proposed Arrangement including risks that we may be unable to obtain required third-party approvals. Please see "Part I Item 1A. Risk Factors" below for more information about these and other risks. Although we have attempted to identify important factors that could cause actual results to differ materially from those described in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that these statements will prove to be accurate as actual results and future events could differ materially from those anticipated in the statements. We assume no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

PART I

ITEM 1. BUSINESS.

Overview

Vista Gold is currently engaged in the evaluation, acquisition, exploration and advancement of gold exploration and potential development projects. Our approach to acquisitions of gold projects has generally been to seek projects within political jurisdictions with well established mining, land ownership and tax laws, which have adequate drilling and geological data to support the completion of a third-party review of the geological data and to complete an estimate of the mineralized material. In addition, we look for opportunities to improve the value of our gold projects through exploration drilling and/or introducing technological innovations. We expect that emphasis on gold project acquisition and improvement will continue in the future.

Currently our holdings include the Maverick Springs, Mountain View, Hasbrouck, Three Hills and Wildcat projects and the Hycroft mine, all in Nevada; the Long Valley project in California; the Yellow Pine project in Idaho; the Paredones Amarillos and Guadalupe de los Reyes projects in Mexico; the Amayapampa project in Bolivia; the Awak Mas project in Indonesia; the Mt. Todd gold mine in Australia; and the 53 F.W. Lewis, Inc. properties in Nevada and Colorado. Additional information about these projects is available in "Item 2. Properties".

As previously reported, on September 22, 2006, we entered into an Arrangement and Merger Agreement with Carl Pescio, Janet Pescio and our wholly-owned subsidiary, Allied Nevada Gold Corp. ("Allied Nevada"), pursuant to which the parties agreed to undertake a transaction that would result in our transfer of our Nevada-based mining properties and related assets into Allied Nevada and the Pescios' transfer to Allied Nevada of their interests in certain Nevada-based mining properties and related assets, all to be carried out pursuant to an arrangement under the provisions of the *Business Corporations Act* (Yukon Territory) (the "Arrangement"). In connection with these transfers, our shareholders will exchange each of their Vista Gold common shares and will receive, subject to applicable withholding taxes, (a) one of a newly created class of Vista Gold common shares, and (b) a *pro rata* portion of (i) the number of common shares of Allied Nevada ("Allied Nevada Shares") received by Vista Gold as part of the Arrangement less (ii) the number of Allied Nevada Shares retained by Vista Gold to facilitate the payment of any taxes payable in respect of the Arrangement. In addition, holders of options to acquire Vista Gold common shares will exchange their Vista Gold options for options to acquire Allied Nevada Shares and options to acquire newly created Vista Gold common shares and holders of warrants of Vista Gold will have their warrants adjusted in accordance with the terms of the warrants. Completion of the transaction remains subject to a number of conditions, including receipt of all required regulatory and third-party approvals and certain other customary conditions. See " Significant Developments in 2006 Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held by Pescios".

We do not produce gold in commercial quantities and do not currently generate operating earnings. Through fiscal 2006 and fiscal 2007 to date, funding to acquire gold properties, explore and to operate the Corporation has been acquired through equity financings consisting of private placements of equity units consisting of our Common Shares and warrants to purchase Common Shares, and a public offering of our Common Shares. We expect to continue to raise capital through the exercise of warrants and through additional equity financings.

Vista Gold Corp. was originally incorporated on November 28, 1983, under the name "Granges Exploration Ltd.". In November 1983, Granges Exploration Ltd. acquired all the mining interests of Granges AB in Canada. On June 28, 1985, Granges Exploration Ltd. and Pecos Resources Ltd. amalgamated under the name "Granges Exploration Ltd." and on June 9, 1989, Granges Exploration Ltd. changed its name to "Granges Inc.". On May 1, 1995, Granges and Hycroft Resources & Development

Edgar Filing: VISTA GOLD CORP - Form 10-K

Corporation were amalgamated under the name "Granges Inc.". Effective November 1, 1996, Granges Inc. and Da Capo Resources Ltd. amalgamated under the name "Vista Gold Corp.". Effective December 17, 1997, Vista Gold was continued from British Columbia to the Yukon Territory, Canada under the *Business Corporations Act* (Yukon Territory).

The current addresses, telephone and facsimile numbers of the offices of the Corporation are:

Executive Office

Suite 5 - 7961 Shaffer Parkway
Littleton, Colorado, USA 80127
Telephone: (720) 981-1185
Facsimile: (720) 981-1186

Registered and Records Office

200 - 204 Lambert Street
Whitehorse, Yukon Territory, Canada Y1A 3T2
Telephone: (867) 667-7600
Facsimile: (867) 667-7885

Employees

As of December 31, 2006, we had ten full-time employees, of whom three were employed at the Hycroft mine and seven were employed at our executive office in Littleton. We use consultants with specific skills to assist with various aspects of its project evaluation, due diligence, acquisition initiatives, corporate governance and property management.

Segment Information

Segment information is provided in the Consolidated Financial Statements Note 16.

Significant Developments in 2006

Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held by Pescios

As previously reported, on September 22, 2006, Vista Gold entered into an Arrangement and Merger Agreement (the "Arrangement Agreement") with Carl Pescio, Janet Pescio and Allied Nevada, pursuant to which the parties agreed to undertake a transaction that would result in the transfer of Vista Gold's Nevada-based mining properties and related assets into Allied Nevada and the Pescios' transfer to Allied Nevada of their interests in certain Nevada-based mining properties and related assets, all to be carried out pursuant to an arrangement under the provisions of the *Business Corporations Act* (Yukon Territory) (the "Arrangement").

Pursuant to the Arrangement Agreement, among other things:

We will reorganize our business to split certain Nevada mining properties and related assets (the "Vista Nevada Assets") from our other properties and related assets;

We will ensure that all of the Vista Nevada Assets are held by our wholly-owned subsidiary, Vista Gold Holdings Inc. ("Vista U.S.") or subsidiaries wholly-owned by Vista U.S. and subsequently transfer all issued and outstanding shares of Vista U.S. and \$25 million in cash to Allied Nevada in return for the number of common shares of Allied Nevada equal to 27,500,000 less the number of Option Shares (as defined in the Arrangement Agreement); and

The Pescios will transfer their interests in certain Nevada mining properties and related assets (the "Pescio Nevada Assets") to Allied Nevada Gold Holdings LLC, a limited liability company incorporated under the laws of Nevada with Allied Nevada as its sole member, in return for 12,000,000 common shares of Allied Nevada and \$15 million in cash from Allied Nevada.

In connection with these transfers, Vista Gold's shareholders will exchange each of their Vista Gold common shares and will receive, subject to applicable withholding taxes, (a) one share of a newly created class of Vista Gold common shares, and (b) a *pro rata* portion of (i) the number of common shares of

Edgar Filing: VISTA GOLD CORP - Form 10-K

Allied Nevada ("Allied Nevada Shares") received by Vista Gold as part of the Arrangement less (ii) the number of Allied Nevada Shares retained by Vista Gold to facilitate the payment of any taxes payable in respect of the Arrangement. In addition, holders of options to acquire Vista Gold common shares will exchange their Vista Gold options for options to acquire Allied Nevada Shares and options to acquire newly created Vista Gold common shares and holders of warrants of Vista Gold will have their warrants adjusted in accordance with the terms of the warrants.

Completion of the transaction is subject to a number of conditions, including receipt of all required securityholder, court, regulatory and third party approvals and certain other customary conditions. As discussed below, Vista Gold has received the required securityholder and court approvals. These conditions also include the requirement for Vista Gold to complete a public equity financing that raises proceeds of not less than \$25 million. This requirement has been met. On November 7, 2006 we completed a public equity financing that resulted in net cash proceeds to us of approximately \$29.4 million after payment of agents' fees and estimated offering expenses. See "Equity Financings November 2006 Public Offering" below, and Consolidated Financial Statements Note 8(m). Of the net proceeds from this offering, we plan to invest the first \$25 million in Allied Nevada Shares as described. Allied Nevada will use \$15 million of this investment as partial consideration for the purchase of the Pescio Nevada Assets. The remaining \$10 million, less costs and expenses or any amounts required to pay amounts owing to us (see discussion below) will be used by Allied Nevada to fund exploration and development projects and ongoing commitments.

In November 2006, we received the securityholder and court approvals required as conditions for completion of the transaction. Our securityholders approved the transaction by the required majorities at a special securityholders' meeting held on November 16, 2006. On November 29, 2006, the Supreme Court of the Yukon Territory granted its Final Order approving the Plan of Arrangement. It is expected that the transaction will close following the receipt of the remaining required approvals, as well as completion of the registration of Allied Nevada's common shares under the Securities Exchange Act of 1934.

Prior to the completion of the transaction, the immediate cash needs of Allied Nevada are being met by loans from Vista Gold pursuant to the Arrangement Agreement, which provides that, prior to the date of completion, Vista Gold may loan money to Vista U.S. in amounts sufficient to undertake certain activities for the benefit of the business Allied Nevada will operate after the completion of the transaction, including purchase of mineral properties or property interests, payment of amounts necessary to secure the services of a Chief Executive Officer, and purchase of office equipment, software and other miscellaneous items to enable Allied Nevada to commence operations immediately after the completion of the transaction. These loans will bear interest at the rate of 6% per annum and all principal and interest owing by Vista U.S. to Vista Gold in respect of such loans will be paid in full at the time of completion on behalf of Vista U.S. As of December 31, 2006 this loan amount was \$357,201 which included interest of \$3,308.

Equity Financings

February 2006 Private Placement

On February 2, 2006, we completed a private placement financing in which we sold and issued a total of 649,684 units (the "Units"), at a price of \$5.05 per Unit for aggregate gross proceeds of \$3,280,904. Each Unit consists of one Common Share and one Common Share purchase warrant entitling the holder to acquire an additional Common Share of Vista Gold Corp. at an exercise price of \$6.00 for a period of two years from the date of issue. We agreed in connection with this transaction to register for resale all shares issuable in the transaction including shares issuable upon exercise of warrants and we registered these shares with the SEC in a registration statement on Form S-3 that was declared effective by the SEC on June 23, 2006. Net cash proceeds to Vista Gold after costs to register the shares of \$66,112 and legal expenses of \$30,719 were \$3,184,073. See the Consolidated Financial Statements Note 8(l).

November 2006 Public Offering

On November 7, 2006, we completed a public offering of 3,668,100 of our Common Shares at a price to the public of \$8.50 per share for aggregate gross proceeds of \$31,178,850. Net cash proceeds to Vista Gold after payment of agents' fees of \$1,706,943 and other offering expenses of \$89,178 were \$29,382,729. Net proceeds after non-cash costs of \$530,819 for agents' warrants were \$28,851,910. All of the shares were offered on a best efforts agency basis pursuant to an effective shelf registration statement previously filed with the SEC. We had also previously filed a base shelf prospectus with the securities regulatory authorities in the provinces of British Columbia, Alberta, Manitoba and Ontario, Canada in connection with the public offering. See the Consolidated Financial Statements Note 8(m).

Warrant Exercises

During 2006 we received aggregate proceeds of \$22,746,467 from warrant exercises including an aggregate \$11,328,420 received in connection with our acceleration of the expiry dates of the February 2003 Warrants and the September 2004 Warrants as defined below.

On May 1, 2006, we announced that, in accordance with the terms of our outstanding common share purchase warrants (the "February 2003 Warrants") issued under a Warrant Indenture dated February 7, 2003 and the outstanding common share purchase warrants (the "September 2004 Warrants" and with the February 2003 Warrants, the "Warrants") issued under a Warrant Indenture dated September 29, 2004, we had elected to accelerate the expiry date of all such currently outstanding Warrants since the "Acceleration Event" described in the applicable warrant indentures had occurred. See the Consolidated Financial Statements Note 8(a) and Note 8(g).

Of the February 2003 Warrants, 751,000 were outstanding as of the date of acceleration, exercisable at \$4.28 per share of which all were exercised prior to the May 17, 2006 expiry date. Gross proceeds to the Corporation for the exercise of the 751,000 warrants were \$3,214,280 (Note 8(a)). Of the September 2004 Warrants, 1,720,740 were outstanding as of the date of acceleration, exercisable at \$4.75 per share of which 1,708,240 warrants were exercised prior to the May 19, 2006 expiry date and 12,500 warrants expired. Gross proceeds to the Corporation for the exercise of the 1,708,240 warrants were \$8,114,140 (Note 8(g)). All of these common shares issuable upon exercises of the Warrants have previously been registered with the SEC for resale under the Securities Act of 1933 on registration statements on Form S-3.

Payments on Properties

Through the use of cash and equity units, consisting of our Common Shares and warrants to purchase Common Shares, as consideration, we continued our effort to build a portfolio of gold projects through a strategy that includes evaluation, acquisition and exploration of gold exploration and potential development projects with the aim of adding value to the projects. In addition, we continued our efforts to improve the value of our gold projects through exploration drilling and reengineering the operating assumptions underlying previous engineering work. As discussed under "Item 2. Properties", we continued with remaining scheduled payments on gold projects acquired in 2003. These payments are described below. We are current with all our payment obligations.

Long Valley

We executed an option agreement on January 22, 2003, to acquire 100% of the Long Valley project from Standard Industrial Minerals, Inc. ("Standard"). Under the terms of the option agreement, we would pay Standard \$750,000 over five years in annual installments. As of December 31, 2006, we have paid the first, second and third installments of \$100,000 each and the fourth installment of \$200,000. The fifth and final installment of \$250,000 was paid in January 2007. Accordingly, as of January 2007, we acquired 100% of the Long Valley project.

Guadalupe de los Reyes

On August 1, 2003, we executed an agreement to acquire a 100% interest in the Guadalupe de los Reyes gold project in Sinaloa State, Mexico and a data package associated with the project and general area, for aggregate consideration of \$1.4 million and a 2% net smelter returns royalty. We paid \$300,000 as of August 1, 2003, and on August 2, 2004, we made a \$500,000 payment towards the purchase by issuing 138,428 Common Shares of Vista Gold. An additional \$500,000 in cash will be paid by way of \$100,000 payments on each of the second through sixth anniversaries of the signing of the formal agreement, with the outstanding balance becoming due upon commencement of commercial production. On August 1, 2005, the second anniversary of signing the formal agreement, we made the initial \$100,000 cash payment. On August 1, 2006, the third anniversary of signing the formal agreement, we made the second \$100,000 cash payment. We have the right to terminate the agreement at any time.

Yellow Pine

On November 7, 2003, Idaho Gold Resources LLC ("Idaho Gold"), an indirect, wholly-owned subsidiary of the Corporation, entered into an Option to Purchase Agreement with Bradley Mining Company for a nine year option to purchase 100% of the Yellow Pine project for \$1,000,000. Idaho Gold made an option payment of \$100,000 upon execution of the agreement, and three additional option payments of \$100,000 on November 7, 2004, 2005 and 2006. The agreement calls for Idaho Gold to make six more yearly payments of \$100,000 on or before each anniversary date of the agreement, for a total option payment price of \$1,000,000. If Idaho Gold exercises its option to purchase the project, all option payments shall be applied as a credit against the purchase price of \$1,000,000. Idaho Gold has the right to terminate the agreement at any time without penalty.

Acquisition of Mt. Todd Gold Mine, Northern Territory, Australia

Effective March 1, 2006, Vista Gold and its subsidiary Vista Gold Australia Pty Ltd. ("Vista Australia") entered into agreements with Ferrier Hodgson, the Deed Administrators for Pegasus Gold Australia Pty Ltd. ("Pegasus"), the government of the Northern Territory of Australia and the Jawoyn Association Aboriginal Corporation ("JAAC") and other parties named therein, subject to regulatory approvals, to purchase a 100% interest in the Mt. Todd gold mine (also known as the Yimuyn Manjerr gold mine) in the Northern Territory, Australia. Under these agreements, Vista Gold is the guarantor of the obligations of its subsidiary Vista Australia.

As part of the agreements, Vista Australia agreed to pay Pegasus, AU \$1.0 million (US \$739,600) and receive a transfer of the mineral leases and certain mine assets; and pay the Northern Territory's costs of management and operation of the Mt. Todd site up to a maximum of approximately AU \$375,000 (approximately US \$277,500) during the first year of the term (initial term is five years, subject to extensions), and assume site management and pay management and operation costs in following years. Additionally, Vista Gold agreed to issue Common Shares with a value of CDN \$1.0 million (amounting to 177,053 Common Shares valued at \$877,466) to the JAAC as consideration for the JAAC entering into the agreement and for rent for the use of the surface overlying the mineral leases until a decision is reached to begin production. During March 2006, the Corporation transferred \$1,021,322 to an escrow account. The amount represented the \$739,600 purchase price (AU \$1.0 million), the \$100,000 finder's fee that Vista Gold agreed to pay to Prime Corporate Finance Pty Limited in connection with the transaction, \$131,525 (AU \$177,837) in back rents and \$50,197 (AU \$69,048) for stamp duty assessments in order to register the title in Vista Australia's name. During June 2006, the transactions contemplated under the agreements were completed and the funds held in escrow were released to their ultimate vendors and the Common Shares were issued to the JAAC. See Consolidated Financial Statements Note 4.

Subsequent Event

Amayapampa

On March 13, 2007, we entered into an agreement with Luzon Minerals Ltd. pursuant to which Vista granted to Luzon (a) for a period ending September 14, 2008 (subject to Luzon's right to extend such date in certain circumstances), an exclusive option to purchase from Vista 90% of its interest in the Amayapampa project, and (b) subject to the exercise of such option to purchase, a right of first offer over Vista's remaining 10% interest in the Amayapampa project, on and subject to the terms of the agreement. This agreement replaces all prior agreements between Vista and Luzon with respect to the Amayapampa project. Luzon's ability to exercise the option to purchase is subject to Luzon satisfying a number of conditions set out in the agreement. Subject to Luzon's right to extend the term of the agreement in certain circumstances, this agreement will terminate on September 14, 2008 unless the option to purchase has been exercised by Luzon prior to such date.

Corporate Organization Chart

The name, place of incorporation, continuance or organization, and percent of voting securities owned or controlled by Vista Gold as of December 31, 2006, for each subsidiary of Vista Gold is set out below.

Property Interests and Mining Claims

In the United States, most of our exploration activities are conducted in the state of Nevada, with additional activities in California and Idaho. Mineral interests may be owned in these states by (a) the United States, (b) the state itself, or (c) private parties. Where prospective mineral properties are owned by private parties, or by the state, some type of property acquisition agreement is necessary in order for us to explore or develop such property. Generally, these agreements take the form of long term mineral leases under which we acquire the right to explore and develop the property in exchange for periodic cash payments during the exploration and development phase and a royalty, usually expressed as a percentage of gross production or net profits derived from the leased properties if and when mines on the properties are brought into production. Other forms of acquisition agreements are exploration agreements coupled with options to purchase and joint venture agreements. Where prospective mineral properties are held by the United States, mineral rights may be acquired through the location of unpatented mineral claims upon unappropriated federal land. If the statutory requirements for the location of a mining claim are met, the locator obtains a valid possessory right to develop and produce minerals from the claim. The right can be freely transferred and, provided that the locator is able to prove the discovery of locatable minerals on the claims, is protected against appropriation by the government without just compensation. The claim locator also acquires the right to obtain a patent or fee title to his claim from the federal government upon compliance with certain additional procedures.

Mining claims are subject to the same risk of defective title that is common to all real property interests. Additionally, mining claims are self-initiated and self-maintained and therefore, possess some unique vulnerabilities not associated with other types of property interests. It is impossible to ascertain the validity of unpatented mining claims solely from an examination of the public real estate records and, therefore, it can be difficult or impossible to confirm that all of the requisite steps have been followed for location and maintenance of a claim. If the validity of a patented mining claim is challenged by the U.S. Bureau of Land Management or the U.S. Forest Service on the grounds that mineralization has not been demonstrated, the claimant has the burden of proving the present economic feasibility of mining minerals located thereon. Such a challenge might be raised when a patent application is submitted or when the government seeks to include the land in an area to be dedicated to another use.

Reclamation

We generally are required to mitigate long-term environmental impacts by stabilizing, contouring, resloping and revegetating various portions of a site after mining and mineral processing operations are completed. These reclamation efforts are conducted in accordance with detailed plans, which must be reviewed and approved by the appropriate regulatory agencies.

Our principal reclamation liability is the Hycroft mine. A new bond was put in place on April 16, 2004, and payments aggregating \$6.6 million were made during 2004 which are expected to cover reclamation costs for the existing disturbance at the Hycroft mine.

During 2006, a revised reclamation and closure plan for the Hycroft mine was approved by the U.S. Bureau of Land Management, Nevada State Office. Under this plan the future estimated costs of reclamation and closure at Hycroft are \$7.5 million.

Government Regulation

Mining operations and exploration activities are subject to various national, state, provincial and local laws and regulations in the United States, Bolivia, Mexico, Indonesia, Australia and other jurisdictions, which govern prospecting, development, mining, production, exports, taxes, labor standards, occupational health, waste disposal, protection of the environment, mine safety, hazardous substances and other matters. We have obtained or have pending applications for those licenses, permits or other authorizations currently required to conduct our exploration and other programs. We believe that we are in compliance in all material respects with applicable mining, health, safety and environmental statutes and the regulations passed thereunder in the United States, Bolivia, Mexico, Indonesia, Australia and the other jurisdictions in which we operate. There are no current orders or directions relating to us with respect to the foregoing laws and regulations.

Environmental Regulation

Our gold projects are subject to various federal, state and local laws and regulations governing protection of the environment. These laws are continually changing and, in general, are becoming more restrictive. Our policy is to conduct business in a way that safeguards public health and the environment. We believe that our operations are conducted in material compliance with applicable laws and regulations.

Changes to current local, state or federal laws and regulations in the jurisdictions where we operate could require additional capital expenditures and increased operating and/or reclamation costs. Although we are unable to predict what additional legislation, if any, might be proposed or enacted, additional regulatory requirements could impact the economics of our projects.

During 2006, there were no material environmental incidents or non-compliance with any applicable environmental regulations. We estimate that we will not incur material capital expenditures for environmental control facilities during the current fiscal year.

Competition

We compete with other mining companies in connection with the acquisition of gold properties. There is competition for the limited number of gold acquisition opportunities, some of which is with other companies having substantially greater financial resources than we have. As a result, we may have difficulty acquiring attractive gold projects at reasonable prices.

We believe no single company has sufficient market power to affect the price or supply of gold in the world market.

ITEM 1A. RISK FACTORS.

An investment in our Common Shares involves a high degree of risk. The risks described below are not the only ones facing our company or otherwise associated with an investment in our Common Shares. Additional risks not presently known to us or which we currently consider immaterial may also adversely affect our business. We have attempted to identify the major factors that could cause differences between actual and planned or expected results, and have included all material risk factors. If any of the following risks actually happen, our business, financial condition and operating results could be materially adversely affected.

Risks Relating to the Arrangement

The market price of our common shares could decrease if we are unable to complete the Arrangement, or if we have to delay completion of the Arrangement.

Pursuant to the Arrangement Agreement, we intend to transfer our Nevada-based mining properties and related assets into Allied Nevada concurrently with the Pescios' transfer to Allied Nevada of their interests in certain Nevada-based mining properties and related assets. Completion of the Arrangement is subject to a number of conditions including receipt of all required court, securityholder, regulatory and third party approvals and certain other customary conditions. If the transaction does not receive all of the required approvals, or if any of the other conditions to completion are not satisfied or waived, we will be unable to complete the Arrangement, which could negatively impact the market price of our common shares. If we experience delays in receiving any of the required approvals for the Arrangement, or do not have certain conditions satisfied or waived so that we may timely complete the Arrangement, any resulting delay in completing the Arrangement could also negatively impact the market price of our common shares.

We may be subject to U.S. federal corporate income tax and Canadian income taxes in connection with our distribution of Allied Nevada Shares.

The distribution of Allied Nevada Shares will be taxable to us for Canadian income tax purposes and U.S. federal income tax purposes under the U.S. Internal Revenue Code of 1986, as amended (the "Code"). The amount of our tax liability will depend on the amount of gain deemed realized on the distribution, which would be the difference between the fair market value of the Allied Nevada Shares distributed and our adjusted basis of those Allied Nevada Shares and other factors including, but not limited to, the other deductions or credits available to us such as loss carry forwards or foreign tax credits. We intend to retain an amount of Allied Nevada Shares which our management considers sufficient to fund an adequate reserve to pay these taxes. However, U.S. securities law restrictions would likely preclude us from selling these Allied Nevada Shares in a timely manner to fund the tax liability because the Allied Nevada Shares retained by us will be "restricted securities" as defined in Rule 144 under the Securities Act of 1933 and cannot be resold by us in the absence of registration under the Securities Act unless an exemption from registration is available. Accordingly, we may instead have to pay the tax out of our currently available cash. While it might be possible to effect a private resale of restricted securities, this would likely involve a significant discount to market price. If we choose to register the Allied Nevada Shares for resale or choose to rely on an exemption to resell the Allied Nevada Shares into the market,

either of these choices would require us to wait at least several months to a year before we could resell the Allied Nevada Shares. This is because registration of the Allied Nevada Shares under the Securities Act would take at least several months to complete; alternatively, the most commonly available exemption for resales, Rule 144 under the Securities Act, would require us to hold the Allied Nevada Shares for one year before commencing the resales. Further, any such sale is likely to result in gain or loss for U.S. and Canadian income tax purposes, which may result in tax liability.

Risks Related to the Business of Vista Gold

Vista Gold is a "passive foreign investment company" for U.S. tax purposes, which can have a materially adverse effect on a U.S. shareholder's economic return on investment in our common shares.

For U.S. federal income tax purposes, Vista Gold was classified as a passive foreign investment company ("PFIC") under section 1297 of the Code for our taxable year ended December 31, 2006, and likely will be a PFIC in subsequent taxable years until it has significant operating income. Classification of a corporation as a PFIC is a tax attribute which may have a material adverse effect on a U.S. shareholder's economic return. Whether, and to what extent, there will be a material adverse effect depends to a very large extent on whether a U.S. shareholder makes certain elections in timely fashion. These elections are discussed herein under "Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities - Certain U.S. Federal Income Tax Considerations". Each U.S. investor in our common shares is urged to review that discussion and consult an independent U.S. tax adviser, because the PFIC rules are complex, in connection with an investment in our common shares.

We cannot be certain that our acquisition, exploration and development activities will be commercially successful.

We currently have no properties that produce gold in commercial quantities. Our gold production has declined steadily since mining activities were suspended at the Hycroft mine in 1998, and gold production is incidental to solution recirculation on the heaps.

Substantial expenditures are required to acquire existing gold properties, to establish ore reserves through drilling and analysis, to develop metallurgical processes to extract metal from the ore and, in the case of new properties, to develop the mining and processing facilities and infrastructure at any site chosen for mining. We cannot assure you that any gold reserves or mineralized material acquired or discovered will be in sufficient quantities to justify commercial operations or that the funds required for development can be obtained on a timely basis.

The price of gold is subject to fluctuations, which could adversely affect the realizable value of our assets and potential future results of operations and cash flow.

Our principal assets are gold reserves and mineralized material. We intend to attempt to acquire additional properties containing gold reserves and mineralized material. The price that we pay to acquire these properties will be, in large part, influenced by the price of gold at the time of the acquisition. Our potential future revenues are expected to be, in large part, derived from the mining and sale of gold from these properties or from the outright sale or joint venture of some of these properties. The value of these gold reserves and mineralized material, and the value of any potential gold production therefrom, will vary in proportion to variations in gold prices. The price of gold has fluctuated widely, and is affected by numerous factors beyond our control including, but not limited to, international, economic and political trends, expectations of inflation, currency exchange fluctuations, central bank activities, interest rates, global or regional consumption patterns and speculative activities. The effect of these factors on the price of gold, and therefore the economic viability of any of our projects, cannot accurately be predicted. Any drop in the price of gold would adversely affect our asset values, cash flows, potential revenues and profits.

Mining exploration, development and operating activities are inherently hazardous.

Mineral exploration involves many risks that even a combination of experience, knowledge and careful evaluation may not be able to overcome. Operations in which we have direct or indirect interests will be subject to all the hazards and risks normally incidental to exploration, development and production of gold and other metals, any of which could result in work stoppages, damage to property and possible environmental damage. The nature of these risks is such that liabilities might exceed any liability insurance policy limits. It is also possible that the liabilities and hazards might not be insurable, or, we could elect not to be insured against such liabilities due to high premium costs or other reasons, in which event, we could incur significant costs that could have a material adverse effect on our financial condition.

Reserve calculations are estimates only, subject to uncertainty due to factors including metal prices, inherent variability of the ore, and recoverability of metal in the mining process.

There is a degree of uncertainty attributable to the calculation of reserves and corresponding grades dedicated to future production. Until reserves are actually mined and processed, the quantity of ore and grades must be considered as an estimate only. In addition, the quantity of reserves and ore may vary depending on metal prices. Any material change in the quantity of reserves, mineralization, grade or stripping ratio may affect the economic viability of our properties. In addition, there can be no assurance that gold recoveries or other metal recoveries in small-scale laboratory tests will be duplicated in larger scale tests under on-site conditions or during production.

Our exploration and development operations are subject to environmental regulations, which could result in our incurring additional costs and operational delays.

All phases of our operations are subject to environmental regulation. Environmental legislation is evolving in some countries or jurisdictions in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect our projects. We are currently subject to environmental regulations with respect to our properties in Nevada, California and Idaho in the United States, as well as Bolivia, Mexico, Indonesia and Australia.

The Hycroft mine in Nevada occupies private and public lands. The public lands include unpatented mining claims on lands administered by the U.S. Bureau of Land Management, Nevada State Office. These claims are governed by the laws and regulations of the U.S. federal government and the State of Nevada.

U.S. Federal Laws

The U.S. Bureau of Land Management requires that mining operations on lands subject to its regulation obtain an approved plan of operations subject to environmental impact evaluation under the National Environmental Policy Act. Any significant modifications to the plan of operations may require the completion of an environmental assessment or Environmental Impact Statement prior to approval. Mining companies must post a bond or other surety to guarantee the cost of post-mining reclamation. These requirements could add significant additional cost and delays to any mining project we undertake.

Under the U.S. Resource Conservation and Recovery Act, mining companies may incur costs for generating, transporting, treating, storing, or disposing of hazardous waste, as well as for closure and post-closure maintenance once they have completed mining activities on a property. Our mining operations may produce air emissions, including fugitive dust and other air pollutants, from stationary equipment, storage facilities, and the use of mobile sources such as trucks and heavy construction equipment which are subject to review, monitoring and/or control requirements under the Federal Clean

Air Act and state air quality laws. Permitting rules may impose limitations on our production levels or create additional capital expenditures in order to comply with the rules.

The U.S. Comprehensive Environmental Response Compensation and Liability Act of 1980, as amended ("CERCLA"), imposes strict, joint and several liability on parties associated with releases or threats of releases of hazardous substances. Those liable groups include, among others, the current owners and operators of facilities which release hazardous substances into the environment and past owners and operators of properties who owned such properties at the time the disposal of the hazardous substances occurred. This liability could include the cost of removal or remediation of the release and damages for injury to the surrounding property. We cannot predict the potential for future CERCLA liability with respect to our Nevada property or surrounding areas.

Nevada Laws

At the state level, mining operations in Nevada are also regulated by the Nevada Department of Conservation and Natural Resources, Division of Environmental Protection. Nevada state law requires the Hycroft mine to hold Nevada Water Pollution Control Permits, which dictate operating controls and closure and post-closure requirements directed at protecting surface and ground water. In addition, we are required to hold Nevada Reclamation Permits required under NRS 519A.010 through 519A.170. These permits mandate concurrent and post-mining reclamation of mines and require the posting of reclamation bonds sufficient to guarantee the cost of mine reclamation. Other Nevada regulations govern operating and design standards for the construction and operation of any source of air contamination, and landfill operations. Any changes to these laws and regulations could have an adverse impact on our financial performance and results of operations by, for example, required changes to operating constraints, technical criteria, fees or surety requirements.

California Laws

A new mining operation in California, such as the Long Valley project, which is on federal unpatented mining claims within a National Forest, would require obtaining various federal, state and local permits. Mining projects require the establishment and presentation of environmental baseline conditions for air, water, vegetation, wildlife, cultural, historical, geological, geotechnical, geochemical, soil, and socioeconomic parameters. An environmental impact statement ("EIS") would be required for any mining activities proposed on public lands. A Plan of Operations/Reclamation Plan would be required. Also required would be permits for waste-water discharge and wetland disturbance (dredge and fill); a county mining plan and reclamation plan; a county mining operations permit; special use permits from the U.S. Forest Service; and possibly others. In addition, compliance must be demonstrated with the Endangered Species Act and the National Historical Preservation Act consultation process. Possible county zoning and building permits and authorization may be required. Baseline environmental conditions are the basis by which direct and indirect project-related impacts are evaluated and by which potential mitigation measures are proposed. If our project is found to significantly adversely impact any of these baseline conditions, we could incur significant costs to correct the adverse impact, or delay the start of production. In addition, on December 12, 2002, California adopted a "backfilling law" requiring open-pit surface mining operations for metallic minerals to back-fill the mines. While we have determined that the geometry of our Long Valley project would lend itself to compliance with this law, future adverse changes to this law could have a corresponding adverse impact on our financial performance and results of operations, for example, by requiring changes to operating constraints, technical criteria, fees or surety requirements.

Idaho Laws

Permitting a mining operation, such as Yellow Pine, located on patented mining claims within a National Forest in Idaho would require obtaining various Federal, State and local permits under the coordination of

the Idaho joint review process. Mining projects require the establishment and presentation of environmental baseline conditions for air, water, vegetation, wildlife, cultural, historical, geological, geotechnical, geochemical, soil and socioeconomic parameters. An EIS would be required for any mining activities proposed on public lands. Permits would also be required for storm-water discharge; wetland disturbance (dredge and fill); surface mining; cyanide use, transport and storage; air quality; dam safety (for water storage and/or tailing storage); septic and sewage; water rights appropriation; and possibly others. In addition, compliance must be demonstrated with the Endangered Species Act and the National Historical Preservation Act consultation process. Possible county zoning and building permits and authorization may be required. Baseline environmental conditions are the basis by which direct and indirect project-related impacts are evaluated and by which potential mitigation measures are proposed. If our project is found to significantly adversely impact any of these baseline conditions, we could incur significant costs to correct the adverse impact, or might have to delay the start of production.

Bolivia Laws

We are required under Bolivian laws and regulations to acquire permits and other authorizations before we can develop and mine the Amayapampa project. In Bolivia there is relatively new comprehensive environmental legislation, and the permitting and authorization process may be less established and less predictable than in the United States. While we have all the necessary permits to place the Amayapampa project into production, when a production decision is reached, these permits will need to be re-affirmed and there can be no assurance that we will be able to acquire updates to necessary permits or authorizations on a timely basis. Delays in acquiring any permit or authorization update could increase the development cost of the Amayapampa project, or delay the start of production.

Under Bolivian regulations, the primary component of environmental compliance and permitting is the completion and approval of an environmental impact study known as estudio de evaluacion de impacto ambiental ("EEIA"), which we submitted in 1997 and was subsequently approved. The EEIA provides a description of the existing environment, both natural and socio-economic, at the project site and in the region; interprets and analyzes the nature and magnitude of potential environmental impacts that might result from project activities; and describes and evaluates the effectiveness of the operational measures planned to mitigate the environmental impacts. Baseline environmental conditions, including meteorology and air quality, hydrological resources and surface water, are the basis by which direct and indirect project-related impacts are evaluated and by which potential mitigation measures are proposed. If our project is found to significantly adversely impact any of these baseline conditions, we could incur significant costs to correct the adverse impact, or might have to delay the start of production.

Mexico Laws

We are required under Mexican laws and regulations to acquire permits and other authorizations before the Paredones Amarillos or Guadalupe de los Reyes projects can be developed and mined. Since the passage of Mexico's 1988 General Law on Ecological Equilibrium and Environmental Protection, a sophisticated system for environmental regulation has evolved. In addition, North American Free Trade Agreement requirements for regulatory standards in Mexico equivalent to those of the United States and Canada have obligated the Mexican government to continue further development of environmental regulation. Most regulatory programs are implemented by various divisions of the Secretariat of Environment and Natural Resources of Mexico ("SEMARNAT"). While we have the necessary permits to place the Paredones Amarillos project into production, there can be no assurance that we will be able to acquire updates to necessary permits or authorizations on a timely basis. Likewise, there can be no assurance that we will be able to acquire the necessary permits or authorizations on a timely basis to place the Guadalupe de los Reyes project into production. Delays in acquiring any permit, authorization or updates could increase the development cost of the Paredones Amarillos project or the Guadalupe de los Reyes project, or delay the start of production.

The most significant environmental permitting requirements, as they relate to the Paredones Amarillos and the Guadalupe de los Reyes projects are developing reports on environmental impacts; regulation and permitting of discharges to air, water and land; new source performance standards for specific air and water pollutant emitting sources; solid and hazardous waste management regulations; developing risk assessment reports; developing evacuation plans; and monitoring inventories of hazardous materials. If the Paredones Amarillos or the Guadalupe de los Reyes projects are found to not be in compliance with any of these requirements, we could incur significant compliance costs, or might have to delay the start of production.

Indonesia Laws

We are required under Indonesian laws and regulations to acquire permits and other authorizations before our current Indonesian mining project, the Awak Mas project, can be developed and mined. In Indonesia, environmental legislation plays a significant role in the mining industry. Various environmental documents such as the analysis of environmental impact ("AMDAL") concerning the Awak Mas project, covering studies on, *inter alia*, air, water, sand, pollution, hazardous and toxic wastes and reclamation of mining area, must be prepared and submitted to the Ministry of Environment for approval. In addition, we are also required to submit periodical environmental reports to the relevant environmental government agencies pursuant to the AMDAL and other required environmental licenses (e.g. license for tailing waste).

The preparation of AMDAL documents and other relevant environmental license documents involves incurrence of time and costs and there is no assurance that those approvals/licenses can be obtained in a timely manner. The Indonesian government also has administrative discretion not to approve AMDAL documents or grant the required environmental licenses (including any renewal or extensions of such documents). All these conditions may delay the production activity of the Awak Mas project.

Failure to meet all of the requirements with respect to the above environmental documents, licensing and report submissions could cause us to be subject to administrative and criminal sanctions as well as fines. In extreme cases, the administrative sanctions can also be imposed in the form of revocation of our business license and the contract of work that we have with the Indonesian government.

As well, from time to time the implementation of the regional autonomy law in Indonesia can cause uncertainty as to the existence and applicability of national and regional regulations (including in the environmental sector). Often regional regulations are in conflict with higher regulations that apply nationally. As a result we may incur cost and time to manage any issues which may arise and that could possibly affect the overall mining activity of the Awak Mas project.

Australia Laws

Mineral projects in the Northern Territory are subject to Northern Territory laws and regulations regarding environmental matters and the discharge of hazardous wastes and materials. As with all mining projects, the Mt. Todd gold mine would be expected to have a variety of environmental impacts should development proceed. We are required under Australian laws and regulations to acquire permits and other authorizations before the Mt. Todd gold mine can be developed and mined. In Australia, environmental legislation plays a significant role in the mining industry. Various environmental documents such as the EIS over the Mt. Todd gold mine, covering studies on, *inter alia*, air, water, pollution, hazardous and toxic wastes, reclamation of mining area, etc. must be prepared and submitted to the Mining and Petroleum Authorizations and Evaluation Division of the Department of Primary Industries, Fisheries and Mines of the Northern Territory government for approval.

The preparations of the EIS and related documents and other relevant environmental licenses would involve incurrence of time and costs and there is no assurance that those approvals/licenses can be obtained in a timely manner. The Northern Territory government also has administrative discretion not to

approve the EIS documents or grant the required environmental licenses (including any renewal or extensions of such documents). We have entered into an agreement with the Northern Territory relating to environmental and rehabilitation issues. We must also comply with Aboriginal heritage legislation requirements which require heritage survey work to be undertaken prior to the commencement of mining operations. All these conditions may delay the production activity of the Mt. Todd gold mine.

These conditions could frustrate investors seeking certainty in their investments, and as a result we may incur costs and time to manage any issues which may arise and that could possibly affect the overall mining activity of the Mt. Todd gold mine.

We face intense competition in the mining industry.

The mining industry is intensely competitive in all of its phases. As a result of this competition, some of which is with large established mining companies with substantial capabilities and with greater financial and technical resources than ours, we may be unable to acquire additional attractive mining claims or financing on terms we consider acceptable. We also compete with other mining companies in the recruitment and retention of qualified managerial and technical employees. If we are unable to successfully compete for qualified employees, our exploration and development programs may be slowed down or suspended. We compete with other gold companies for capital. If we are unable to raise sufficient capital, our exploration and development programs may be jeopardized or we may not be able to acquire, develop or operate gold projects.

We may be unable to raise additional capital on favorable terms.

The exploration and development of our development properties, specifically the construction of mining facilities and commencement of mining operations, may require substantial additional financing. Significant capital investment is required to achieve commercial production from each of our non-producing properties. We will have to raise additional funds from external sources in order to maintain and advance our existing property positions and to acquire new gold projects. There can be no assurance that additional financing will be available at all or on acceptable terms and, if additional financing is not available, we may have to substantially reduce or cease our operations.

Some of our directors may have conflicts of interest as a result of their involvement with other natural resource companies.

Some of our directors are directors or officers of other natural resource or mining-related companies. Robert A. Quartermain is President and Chief Executive Officer of Silver Standard Resources Inc., and is a director of Canplats Resources Corporation, Radiant Resources, Inc., IAMGold Corporation, Triumph Gold Corp. and Minco Silver Corporation. C. Thomas Ogryzlo is the President, Chief Executive Officer and a director of Polaris Geothermal Inc., and is a director of Tiomin Resources Inc., Birim Goldfields Inc. and Baja Mining Corp. Michael B. Richings, who is also our President and Chief Executive Officer, is a director of Allied Nevada Gold Corp., Triumph Gold Corp. (successor to IMC Ventures) and Zaruma Resources Inc., both of which hold interests in mining properties. John Clark is a director of Alberta Clipper Energy Inc. and Thunder Energy Trust (both Canadian oil and gas exploration and production companies) and Chief Financial Officer and a director of Polaris Geothermal Inc. W. Durand Eppler is Chief Executive Officer and a director of Coal International PLC, a director of Allied Nevada Gold Corp. and Augusta Resource Corporation. These associations may give rise to conflicts of interest from time to time. In the event that any such conflict of interest arises, a director who has such a conflict is required to disclose the conflict to a meeting of the directors of the company in question and to abstain from voting for or against approval of any matter in which such director may have a conflict. In appropriate cases, the company in question will establish a special committee of independent directors to review a matter in which several directors, or management, may have a conflict. In accordance with the laws of the Yukon

Territory, the directors of all Yukon Territory companies are required to act honestly, in good faith and in the best interests of a company for which they serve as a director.

There may be challenges to our title in our mineral properties.

There may be challenges to title to the mineral properties in which we hold a material interest. If there are title defects with respect to any of our properties, we might be required to compensate other persons or perhaps reduce our interest in the affected property. Also, in any such case, the investigation and resolution of title issues would divert management's time from ongoing exploration and development programs.

As discussed in our prior filings, and herein under "Part I Item 3. Legal Proceedings", a legal dispute was initiated in Bolivia in April 1998 by a Mr. Estanislao Radic Valderrama ("Radic"), who brought legal proceedings in the lower penal court and, in 1999, brought proceedings in civil court against Mr. Raul Garafulic and us, questioning the validity of Mr. Garafulic's ownership of the Amayapampa property.

In April 2005, Radic commenced a civil lawsuit in La Paz, Bolivia against Empresa Minera Nueva Vista S.A. ("Nueva Vista") and two of its predecessors in interest, seeking nullification of the public documents by which the mineral concessions comprising the "Grupo Minero Amayapampa" had been transferred to Nueva Vista. Nueva Vista and we did not learn of this lawsuit until the quarter ended June 30, 2006.

This is Radic's second civil lawsuit attempting to nullify the transfer of the mineral concession to Nueva Vista and its predecessors in interest. Radic's prior civil suit, initiated in Potosi, Bolivia in 1999 as noted above, ended in April 2004 with a declaration that his cause of action had lapsed. In the present action, Nueva Vista and the other defendants have raised the defenses, among others, of prior adjudication (res judicata) and expiration of the applicable statute of limitations.

We believe that Radic's contentions in the present suit are without merit and are taking appropriate legal action to confirm the validity of our interests in our holdings in Bolivia. Nueva Vista has asserted counterclaims against Radic for bad faith and recklessness in bringing the present action. While we do not anticipate that this lawsuit will result in any material adverse impact on Vista Gold or Nueva Vista or our holdings in Bolivia, we cannot assure that this will be the case.

Our property interests in Bolivia, Mexico, Indonesia and Australia are subject to risks from political and economic instability in those countries.

We have property interests in Bolivia, Mexico, Indonesia and Australia, which may be affected by risks associated with political or economic instability in those countries. The risks include, but are not limited to: military repression, extreme fluctuations in currency exchange rates, labor instability or militancy, mineral title irregularities and high rates of inflation. Changes in mining or investment policies or shifts in political attitude in Bolivia, Mexico, Indonesia or Australia may adversely affect our business. We may be affected in varying degrees by government regulation with respect to restrictions on production, price controls, export controls, income taxes, expropriation of property, maintenance of claims, environmental legislation, land use, land claims of local people, water use and mine safety. The effect of these factors cannot be accurately predicted.

Recent political developments in Bolivia may adversely affect our Amayapampa project. On May 1, 2006, President Evo Morales of Bolivia, who took office in January 2006, signed a decree which effectively nationalized Bolivia's hydrocarbon industry. President Morales and others in his administration have made public statements regarding their desire to exert greater state control over all natural resource production in Bolivia, including mining.

To date, there have been no formal proposals to nationalize the mining industry and it is not clear that such nationalization would take place. The government may, however, alter its current policies with respect to

the mining industry. If the Amayapampa project were nationalized, we might be unable to recover any significant portion of our investment in the project. The government could also substantially increase mining taxes or require significant royalty payments, which could have a material adverse effect on the profitability of the Amayapampa project.

Our financial position and results are subject to fluctuations in foreign currency values.

Because we have mining exploration and evaluation operations in North and South America and in Australia and Indonesia, we are subject to foreign currency fluctuations, which may materially affect our financial position and results. We do not engage in currency hedging to offset any risk of currency fluctuations.

We measure and report our financial results in U.S. dollars. We have mining projects in Bolivia, Mexico, Australia and Indonesia, and we are looking for other projects elsewhere in the world. Economic conditions and monetary policies in these countries can result in severe currency fluctuations.

Currently all our material transactions in Mexico, Bolivia, Australia and Indonesia are denominated in U.S. dollars. However, if we were to begin commercial operations in any of these or other countries, it is possible that material transactions incurred in the local currency, such as engagement of local contractors for major projects, will be settled at a U.S. dollar value that is different from the U.S. dollar value of the transaction at the time it was incurred. This could have the effect of undermining profits from operations in that country.

Future sales of our common shares in the public or private markets could adversely affect the trading price of our common shares and our ability to raise funds in new share offerings.

Future sales of substantial amounts of our common shares or equity-related securities in the public or private markets, or the perception that such sales could occur, could adversely affect prevailing trading prices of our common shares and could impair our ability to raise capital through future offerings of equity or equity-related securities. No prediction can be made as to the effect, if any, that future sales of common shares or the availability of common shares for future sale, will have on the trading price of our common shares.

It may be difficult to enforce judgments or bring actions outside the United States against us and certain of our directors and officers.

Vista Gold is a Canadian corporation and certain of its directors and officers are neither citizens nor residents of the United States. A substantial part of the assets of several of these persons, and of Vista Gold, are located outside the United States. As a result, it may be difficult or impossible for an investor:

to enforce in courts outside the United States judgments obtained in United States courts based upon the civil liability provisions of United States federal securities laws against these persons and Vista Gold; or

to bring in courts outside the United States an original action to enforce liabilities based upon United States federal securities laws against these persons and Vista Gold.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

Not applicable.

ITEM 2. PROPERTIES.

Detailed information is contained herein with respect to the Hycroft mine and the Paredones Amarillos, Mt. Todd, Awak Mas, Yellow Pine, Long Valley, Wildcat, Maverick Springs, Mountain View, Hasbrouck, Three Hills, Guadalupe de los Reyes and Amayapampa projects, and the properties acquired with the Corporation's December 2005 acquisition of F.W. Lewis, Inc. The Corporation holds the Hycroft mine through its indirect wholly-owned subsidiary, Hycroft Lewis Mine, Inc.; Paredones Amarillos and Guadalupe de los Reyes are held through its wholly-owned subsidiary, Minera Paredones Amarillos S.A. de C.V.; Mt. Todd is held through its wholly-owned subsidiary, Vista Gold Australia Pty Ltd., Awak Mas is held through its indirect wholly-owned subsidiary, PT Masmindo Dwi; the Yellow Pine project is held through its indirect wholly-owned subsidiary, Idaho Gold Resources LLC.; Long Valley is held through its indirect wholly-owned subsidiary Vista Gold California LLC; the Maverick Springs, Mountain View, Hasbrouck, Three Hills, and Wildcat projects are held through its indirect wholly-owned subsidiary, Vista Nevada Corp.; the properties acquired with the Corporation's acquisition of F.W. Lewis, Inc., are held through its indirect wholly-owned subsidiary, Victory Gold Inc.; and Amayapampa is held through its indirect wholly-owned subsidiary, Minera Nueva Vista S.A. Estimates of reserves and mineralization herein are subject to the effect of changes in metal prices, and to the risks inherent in mining and processing operations.

Hycroft Mine

The Hycroft mine and related facilities are located 54 miles west of Winnemucca, Nevada. We acquired the Lewis mine in early 1987 and completed construction of the adjacent Crofoot mine project in April 1988. Mining operations at the Hycroft mine were suspended in December 1998, and the site was placed on care and maintenance. Gold production, from continued leaching and rinsing of the heap leach pads, continued in 2000 and 2001. In 2002, 2003, 2004, 2005 and 2006, the amount of gold recovered was not material, as expected. The mine is currently on care and maintenance. From inception in 1987 until suspension of mining operations in December 1998, the Hycroft mine produced over 1 million ounces of gold.

On December 13, 2005, we purchased the leasehold interest in the Lewis property at Hycroft as part of the acquisition of F.W. Lewis, Inc. See " F.W. Lewis, Inc. Properties".

Operating Statistics

Operating statistics for the Hycroft mine for the period 2002 to 2006 were as follows:

	Years ended December 31				
	2006	2005	2004	2003	2002
Ore and waste material mined (000's of tons)	Nil	Nil	Nil	Nil	Nil
Strip ratio	Nil	Nil	Nil	Nil	Nil
Ore processed (000's of tons) ⁽¹⁾	Nil	Nil	Nil	Nil	Nil
Ore grade (oz. gold/ton)	N/A	N/A	N/A	N/A	N/A
Ounces of gold produced	Nil	Nil	Nil	Nil	Nil
Cash operating costs (\$/oz. of gold) ⁽²⁾	N/A	N/A	N/A	N/A	N/A

(1) Ore processed means ore placed on pads but not necessarily leached during the year.

(2) Cash operating costs are composed of all direct mining expenses including inventory changes, refining and transportation costs, less by-product silver credits.

Geology and Ore Reserves

The Hycroft mine is located on the western flank of the Kamma Mountains. The deposit is hosted in a volcanic eruptive breccia and conglomerates associated with the Tertiary Kamma Mountain volcanics. The

Edgar Filing: VISTA GOLD CORP - Form 10-K

volcanics are mainly acidic to intermediate tuffs, flows and coarse volcanoclastic rocks. Fragments of these units dominate the clasts in the eruptive breccia. Volcanic rocks have been block faulted by dominant north-trending structures, which have affected the distribution of alteration and mineralization. The Central Fault and East Fault control the distribution of mineralization and subsequent oxidation. A post-mineral range-front fault separates the orebody from the adjacent Pleistocene Lahontan Lake sediments in the Black Rock Desert. The geological events have created a physical setting ideally suited to the open-pit, heap-leach mining operation at the Hycroft mine. The heap leach method is widely used in the southwestern United States and allows the economical treatment of oxidized low-grade ore deposits in large volumes.

The known gold mineralization within the Crofoot and Lewis properties extends for a distance of three miles in a north-south direction by 1.5 miles in an east-west direction. Mineralization extends to a depth of less than 330 feet in the outcropping to near-outcropping portion of the deposit on the northwest side to over 990 feet in the Brimstone deposit in the east. Not all the mineralization is oxidized and the depth of oxide ore varies considerably over the area of mineralization.

The Crofoot and Lewis properties together comprise approximately 12,230 acres. The Crofoot property, originally held under two leases, is owned by Vista Gold subject to a 4% net profits interest retained by the former owners, and covers approximately 3,544 acres. The Lewis property, which virtually surrounds the Crofoot property, covers approximately 8,686 acres and was purchased by Vista Gold as part of the acquisition of F.W. Lewis, Inc. in December 2005. The mine is accessible by road and has access to adequate supplies of water and power.

Updated Feasibility Study

In January 2006, we announced results of an updated feasibility study for the possible restart of operations at the Hycroft Mine. The updated study was issued by Mine Development Associates ("MDA") of Reno, Nevada, a consulting firm, in accordance with Canadian National Instrument 43-101 guidelines. The study and verification of the data employed in the study was undertaken under the supervision of Mr. Neil Prenn, P. Eng., a qualified person independent of Vista Gold. The Hycroft resource estimate on which the feasibility study was based and which was used by MDA to calculate mineral reserves was prepared by Ore Reserves Engineering ("ORE") of Lakewood, Colorado, under the direction of Mr. Alan Noble, P. Eng., a qualified person independent of Vista Gold. The results of the ORE resource estimate, which was prepared in accordance with National Instrument 43-101 guidelines, showed the known Brimstone deposit at a cutoff grade of 0.005 ounces per ton cyanide-soluble gold contains an estimated 52.7 million tons of mineralized material at a grade of 0.019 ounces of gold per ton, and were previously reported by Vista Gold in a press release dated August 4, 2005.

Proven and probable mineral reserves were determined within a design pit based on a US\$450 per ounce gold price employing a Lerchs-Grossman optimization. Gold recovery by heap leach is estimated at 57% for both proven and probable reserves. Drill spacing for proven reserves is 100 feet or less, and for probable reserves is between 100 and 200 feet. The results are summarized in the following table:

**Hycroft Mineral Reserve Estimate
(0.005 opt cyanide-soluble gold cutoff grade)**

Reserve Category	Short Tons (millions)	Fire Assay Gold Grade (opt)	Contained Gold Ounces	Estimated Recovery	Waste Tons (millions)	Strip Ratio (Waste:Ore)	Drill Hole Spacing (ft)
Proven	11.954	0.022	260,900	57%			≤100
Probable	21.366	0.019	401,900	57%			>100<200
Totals	33.320	0.020	662,800	57%	50.808	1.52	

22

Edgar Filing: VISTA GOLD CORP - Form 10-K

On August 14, 2006, MDA of Reno, Nevada, issued a technical report describing the work done by it previously.

Exploration

We believe there is significant potential to extend the oxide mineralization to the south, along strike, at both the Central Fault and Brimstone deposits, but the greatest upside lies in the largely unexplored sulfide mineralization below the Brimstone deposit, as well as higher grade intercepts along the Central Fault.

Current mineralized material at Brimstone is limited to the oxide cap of an apparently large but previously unexplored gold-bearing sulfide system. Two diamond drill holes, drilled in 1996 and earlier, intercepted mineralized sulfides averaging 0.023 ounces per ton gold and 0.5 ounces per ton silver over intervals exceeding 500 feet in thickness. In 1996, the Corporation also intercepted 30 feet of gold mineralization in drill hole 95-2728. This intercept assayed 0.155 ounces per ton gold at a true depth of 310 feet below surface. The hole terminated in this mineralization; the true width of the mineralization is not known.

Paredones Amarillos

Paredones Amarillos is located 40 miles southeast of the city of La Paz, in the Mexican state of Baja California Sur. The project area covers over 15,131 acres.

We acquired 100% of the project on August 29, 2002, from Viceroy Resource Corporation ("Viceroy"). To acquire the project, we paid cash of CDN \$1.0 million and issued 303,030 equity units to Viceroy, and on August 29, 2003, we paid Viceroy the remaining CDN \$0.5 million due pursuant to the acquisition contract (see also Consolidated Financial Statements Note 6).

The Paredones Amarillos project has been a significant exploration target since the 1980s. In 1997, Echo Bay Mines Ltd. ("EBM") completed a final feasibility study for an open pit mine on the project. As a result of the subsequent decline in gold prices, start-up was postponed. EBM holds a 2% net profits interest on certain concessions of the project, subject to a cap of \$2 million. Additionally, Minera Tepmin, S.A. de C.V., holds a 1% net smelter returns royalty on two concessions.

The project holds environmental authorizations for the purpose of the following: project development including access road, power line, telephone communications, and infrastructure to supply water; construction and operation of a tailings dam; disposal of tailings; construction of a mill; and installation of three pumping stations.

Geology

General geology consists of diorite roof pendants intruded by a granodiorite batholith with local low and high-angle fault zones. A north-east striking, south-east dipping low-angle fault zone is the main host of gold mineralization at Paredones Amarillos. Movement along this structure has been characterized as reverse, resulting from compression. Secondary, high-angle faulting is thought to control the higher-grade mineralization at the project.

The known gold mineralized material occupies an inverted U-shaped block with an approximate strike length of 3,600 feet east-west, a width of approximately 1,000 feet north-south, and a thickness of approximately 100 feet. The apex of the "U" is near the center of the proposed pit with the legs forming the east and west pit lobes.

Preliminary Feasibility Study

In September 2005, we announced the results of a preliminary feasibility study for the Paredones Amarillos project. A feasibility study was previously completed by EBM in 1997, and the new study was issued on

September 23, 2005, by MDA of Reno, Nevada, an independent consulting firm, in accordance with Canadian National Instrument 43-101 guidelines, under the supervision of Mr. Neil Prenn, P. Eng., a Qualified Person independent of Vista Gold. The new study was based in part on the EBM 1997 study. MDA was assisted in the effort by Resource Development Incorporated of Wheat Ridge, Colorado, in metallurgical testing and process redesign, and by WLR Consulting of Lakewood, Colorado, in mine design.

Proven and probable mineral reserves were determined within a proposed open pit mine, which was designed employing a Lerchs-Grossmann optimization technique based on U.S. \$400 per ounce gold price. The results are summarized in the following table:

Paredones Amarillos Mineral Reserve Estimate⁽¹⁾
(0.011 opt gold internal cutoff grade)

	Ore Tons (millions)	Gold Grade (opt)	Contained Gold Ounces	Waste Tons (millions)	Strip Ratio (Waste:Ore)
Proven	12.896	0.032	419,000		
Probable	41.058	0.028	1,158,000		
Totals	53.954	0.029	1,577,000	187.715	3.48

(1)

Cautionary Note to U.S. Investors concerning estimates of Proven and Probable Reserves: The estimates of mineral reserves shown in this table have been prepared in accordance with Canadian National Instrument 43-101. The definitions of proven and probable reserves used in NI 43-101 differ from the definitions in SEC Industry Guide 7. Accordingly, the disclosure of mineral reserves herein may not be comparable to information from U.S. companies subject to the SEC's reporting and disclosure requirements.

Based on guidelines provided by the SEC, since we have obtained a preliminary feasibility study but not a bankable feasibility study with respect to the above, we are reporting no reserves under U.S. SEC standards.

The mineralization model used to estimate the mineral reserves was reported by us in a press release dated August 29, 2002, based on an independent technical report prepared by Snowden Mining Industry Consultants of Vancouver, British Columbia, in compliance with Canadian National Instrument 43-101. According to the report, dated August 20, 2002, the mineralized material above 0.015 ounces of gold per ton cut-off grade was estimated to be 61.4 million tons at a grade of 0.031 ounces of gold per ton.

In late 2004 and in 2005, we conducted geologic mapping, soil and rock geochemistry and an induced polarization geophysical survey across the Tocopilla target 2.4 miles north of and on trend with the known Paredones Amarillos gold deposit. The results of the program outlined wide zones of weakly anomalous gold mineralization. We partially tested the target area with seven core drill holes in 2005, two of which intersected weak gold mineralization indicating the Paredones Amarillos mineralization extends into this area, but the discovery of economic gold mineralization is uncertain and more testing is warranted.

Mt. Todd

Effective March 1, 2006, we and our subsidiary Vista Gold Australia Pty Ltd. entered into agreements with Ferrier Hodgson, the Deed Administrators for Pegasus Gold Australia Pty Ltd. ("Pegasus"), the government of the Northern Territory of Australia and the JAAC and other parties named therein, subject to regulatory approvals, to purchase a 100% interest in the Mt. Todd gold mine (also known as the Yimuyn Manjerr gold mine) in the Northern Territory, Australia. Under these agreements, we are guarantor of the obligations of our subsidiary Vista Australia.

As part of the agreements, we agreed to pay Pegasus, AU\$1.0 million (\$739,600) and receive a transfer of the mineral leases and certain mine assets; and pay the Northern Territory's costs of management and

operation of the Mt. Todd site up to a maximum of approximately AU\$375,000 (approximately \$277,500) during the first year of the term (initial term is five years, subject to extensions), and assume site management and pay management and operation costs in following years. Additionally, we were to issue common shares with a value of CDN\$1.0 million (amounting to 177,053 common shares) to the JAAC as consideration for the JAAC entering into the agreement and for rent for the use of the surface overlying the mineral leases until a decision is reached to begin production. Other agreement terms provide that we will undertake a technical and economic review of the mine and possibly form one or more joint ventures with the JAAC. In June 2006, the transactions contemplated under the agreements were completed and effective, with funds held in escrow released to the ultimate vendors and the common shares issued to the JAAC.

Geology

The Mt. Todd project is located 50 kilometers northwest of Katherine, Northern Territory, Australia. The project area covers 13,257 acres. The Mt. Todd gold mine is situated within the southeastern portion of the Early Proterozoic Pine Creek Geosyncline. The Batman deposit geology consists of a sequence of hornfelsed interbedded greywackes and shales with minor thin beds of felsic tuff. Bedding consistently strikes at 325°, dipping 40° to 60° to the southwest. Northerly trended sheeted quartz sulfide veins and joints striking at 0° to 20° and dipping 60° to the east are the major location for mineralization in the Batman deposit. The veins are 0.04 to 4 inches in thickness with an average thickness of around 0.4 inches and occur in sheets with up to six veins per horizontal foot. These sheeted veins are the main source of gold mineralization in the Batman deposit. In general, the Batman deposit is 4,800 to 5,100 feet in length by 1,200 to 1,500 feet in true width and 1,500 to 1,800 feet in known down-dip extension (the deposit is open along strike and at depth).

Based on a review of project files, our management believes that approximately 27.1 million short tons grading 0.031 gold ounces per ton and containing 826,000 ounces of gold were extracted between 1996 and the termination of mining in 2000. Processing was by a combination of heap-leach production from oxide ore and cyanidation of sulfide ore. The remaining mineralization consists of sulfide mineralization lying below and along strike of the existing open pit.

On June 26, 2006, we announced that an analysis of mineralized material was completed for the Batman deposit at on June 26, 2006, by Gustavson Associates, LLC ("Gustavson") of Boulder, Colorado, in accordance with Canadian National Instrument 43-101 standards under the direction of Mr. John Rozelle, an independent Qualified Person, utilizing standard industry software and resource estimation methodology. The report includes the results of 91,225 assay intervals from 730 drill holes (225 core, 435 reserve circulation and 70 rotary drill holes) done by BHP Resources Pty Ltd., Zapopan NL and Pegasus with assaying by Australia Assay Laboratories in Pine Creek and Alice Springs, Classic Comlabs in Darwin and Pegasus' onsite lab. Pegasus mined part of the Batman deposit from 1993 to 1997, and a joint venture comprising Multiplex Resources Pty Ltd. and General Gold Resources Ltd. mined the deposit from 1999 to 2000.

The deposit has a drill hole spacing that varies from 80 feet by 80 feet to 260-330 feet by 260-330 feet and generally averages 160 feet by 160 feet. All assaying was fire assay on 50-gram charges. It is the opinion of Gustavson that quality control and quality assurance methods employed by the various companies working at Mt. Todd were standard at the time of the work, and the work including quality control and quality assurance methods has been audited several times by independent consultants.

Based on the report, the mineralized material for the Batman deposit, above a 0.015 ounces of gold per ton cut-off grade, was estimated to be 62.1 million tons at a grade of 0.028 ounces of gold per ton.

A preliminary assessment was completed on December 29, 2006, by Gustavson in accordance with Canadian National Instrument 43-101 standards under the direction of John W. Rozelle, P.G., an independent qualified person. In undertaking the preliminary assessment, Gustavson considered the

economic and technical parameters associated with development of the mineralized material by open-pit mining. The study included a conceptual process flowsheet developed by Resource Development Inc. of Wheat Ridge, Colorado, which is based on preliminary testwork and includes a flotation circuit to recover a bulk sulfide concentrate, and further flotation to separate a copper sulfide concentrate that would contain about one-half of the gold and which would be shipped to a smelter. A pyrite concentrate containing about one-half of the gold would also be produced and this concentrate would be cyanide leached to recover the gold. The cyanide in the sulfide residue would be neutralized, following which the residue would be filtered to dry it, and then placed on a lined pad. MWH Australia Pty Ltd ("MWH") designed conceptual tailing disposal facilities, including utilizing the existing tailing facility, and estimated capital costs for these facilities. MWH also completed a closure study and cost estimate for closing the mine and facilities following resumption of production.

In the preliminary assessment, Gustavson assumed a 33,000 short ton-per-day (11.7 million short tons-per-year) ore production rate, resulting in a ten-year operating life. Overall gold recovery is estimated at 87% and copper recovery at 70%.

Startup capital is estimated by Gustavson at \$264 million. Mining costs are estimated at \$1.21 per tonne of material mined, processing costs are estimated at \$6.48 per tonne of ore processed and general and administrative costs are estimated at \$0.14 per tonne processed. Based on these preliminary numbers, a review of the project economics indicates that the project continues to look favorable.

An infill core drilling program is planned for early 2007 to attempt to increase the mineralized material in areas where the drill spacing is too wide to have confidence in the presence and grade of mineralized material within the planned pit. Additionally, in 2006, we applied for exploration rights to tenements totaling about 2,900 acres adjoining the mining tenements. If the rights are granted, we plan to begin exploration efforts of these lands during 2007.

Awak Mas

On May 27, 2005, we completed our acquisition of the Awak Mas gold deposit in Sulawesi, Indonesia, for a purchase price of \$1.5 million. The acquisition of the Awak Mas Project involved the purchase, through the Corporation's wholly-owned subsidiary Vista Gold (Barbados) Corp. ("Vista Barbados"), of all of the outstanding shares of Salu Siwa Pty Ltd, an Australian company ("Salu Siwa") from the two owners of Salu Siwa: Weston Investments Pty Ltd., an Australian company ("Weston") and Organic Resource Technology Limited, an Australian company ("ORT"). Weston and ORT respectively owned 66% and 34% of the outstanding Salu Siwa shares. Salu Siwa in turn owns 99% of the outstanding shares of PT Masmino Dwi, an Indonesian company ("PT Masmino"), which is the direct holder of the Awak Mas Project. The remaining 1% of the outstanding PT Masmino shares is held by ORT. Transfer of this remaining 1% to Vista Barbados is subject to any approvals, consents or other statutory requirements of the Indonesian authorities that will be required to effect the completion of such share purchase. This Project is held by Vista Gold through a contract of work ("CoW") with the Indonesian government.

Geology

The Awak Mas property is situated on the southern side of the Central Sulawesi Metamorphic Belt within a 30-mile long, north-northeast trending fault bounded block of basement metamorphic rocks and younger sediments. The property covers approximately 221,530 acres. The western margin of this block is represented by an easterly dipping thrust, whereas the eastern margin is defined by a major basement structure. Imbricate faulting has complicated the internal morphology of the block. The property is dominated by the late Cretaceous Latimojong Formation, consisting of phyllites, slates, basic to intermediate volcanics, limestone and schist representing a platform and/or fore arc trough flysch sequence. The Latimojong Formation overlies basement metamorphic rocks dominated by phyllites and slates. Both sequences have been intruded by late-stage plugs and stocks of diorite, monzonite and syenite.

To the east of the metamorphic block, basic intermediate intrusives, pyroclastics and volcanogenic sediments comprising the Mesozoic Lamasi Ophiolite Complex appear to have been obducted into a position effectively overlying the younger flyschoid sequence and basement metamorphics during continental accretion.

Gold mineralization is distinctly mesothermal in character, atypical of the more ubiquitous low temperature or epithermal precious metal mineralization within many island arc environments in Indonesia. Gold is associated with sulphur-poor, sodic-rich fluids introduced at a relatively late stage in the tectonic history. Albite-pyrite-silica-carbonate alteration, which accompanies gold deposition, clearly overprints the ductile fabric associated with deformation and metamorphism in the older basement lithologies.

The majority of gold mineralization on the property, including the Awak Mas deposit, is predominantly hosted within the flysch sequence, which typically dips at between 15° and 50°, generally towards the north. The majority of gold mineralization is associated with abundant quartz veining and silica albite-pyrite alteration; however, the association of gold and quartz is not ubiquitous, with some vein zones appearing to be locally barren of mineralization.

Two main styles of mineralization are present. The first represents broad shallow dipping zones of sheeted and stockwork quartz veining and associated alteration that conform to the shear fabric, especially within the dark, graphitic mudstones. The other style consists of steeper dipping zones of quartz veining and breccias associated with high angle faults cutting both the flyschoid cover sequence and basement metamorphics.

Late-stage, north-northeast trending normal faults locally disrupt or offset mineralization. A surface layer of consolidated scree and colluvium averaging 1.8 to 2.4 feet (maximum 9 feet) in thickness veneers the deposit. The base of weak oxidation within the mineralized sequence typically is within 12 feet of surface.

In October 2004, RSG Global Pty Ltd of West Perth, Australia, an independent consultant, prepared an estimate of mineralized material for us based on the results of 85,030 assay intervals from 814 core and reverse circulation drill holes done by Battle Mountain Gold Company, Lone Star Exploration NL and Masmino Mining Corporation Limited from 1991 through 1997 with assaying by Inchcape Testing Services. The results of the study showed the known Awak Mas deposit, at a cutoff grade of 0.015 ounces gold per ton, contains an estimated 52.6 million tons of mineralized material at a grade of 0.032 ounces of gold per ton. The Corporation believes the potential to expand the mineralized material is good, based on the Corporation's analysis of preliminary exploration results of previous operators.

A final feasibility study was completed by independent consultants in 1997 for Lone Star supporting a mining scenario of 3 million metric tons per year of ore. Independent valuations of the project were completed in 2000 and 2003 as well. Over \$43 million has been spent on the project by previous operators.

During 2005, we initiated an exploration program designed to identify drill targets in outlying surface indications of gold mineralization. The program involved soil and rock geochemistry, drilling shallow test holes to obtain bedrock samples, geologic mapping and interpretation of results. In 2006, we completed a 13-hole diamond drill program totaling 8,440 feet that was designed to upgrade shows of mineralization into reportable amounts. We plan to prepare a new estimate of mineralized material, using an independent consultant, during 2007, as well as a feasibility study.

Yellow Pine

The Yellow Pine gold project is located in the Salmon River Mountains of central Idaho in an area of historical gold, antimony and tungsten mining known as the Stibnite or Yellow Pine Mining District. The district is located in Valley County about 60 miles east of McCall, Idaho, and 10 miles southeast of the small settlement of Yellow Pine, Idaho. The project consists of 17 patented mining claims covering about 304 acres.

On November 7, 2003, Vista Gold, through Idaho Gold Resources LLC ("Idaho Gold"), an indirect, wholly-owned subsidiary of Vista Gold, entered into an Option to Purchase Agreement with Bradley Mining Company for a nine year option to purchase 100% of Yellow Pine for \$1,000,000. Idaho Gold made an option payment of \$100,000 upon execution of the agreement. The agreement calls for Idaho Gold to make nine more yearly payments of \$100,000 on or before each anniversary date of the agreement, for a total option payment price of \$1,000,000, and annual payments of \$100,000 each were made in 2004, 2005 and 2006 (see Consolidated Financial Statements Note 5). If Idaho Gold exercises its option to purchase the project, all option payments shall be applied as a credit against the purchase price of \$1,000,000, Idaho Gold has the right to terminate the agreement at any time without penalty. Eleven of the claims are subject to an underlying 5% net smelter returns royalty.

Geology

The Yellow Pine Mining District is located within the Cretaceous age Idaho Batholith, near its eastern border and adjacent to the Meadow Creek fault zone. The gold deposits of the Yellow Pine district are hosted primarily in the quartz monzonites of the Idaho batholith and within the major shear and fault zones that transect the district. Ore deposits also occur in the metasediments of a large roof pendant within the granitic rocks. Historic mining of the Yellow Pine and the Homestake open pits on the Yellow Pine property has depleted the oxide gold mineralization, but significant sulfide gold mineralization remains unmined. Historically, the mine has produced about 700,000 ounces of gold from a combination of byproduct gold from tungsten and antimony mining and more recent heap-leach production from oxide ore.

Gold and antimony occur principally in veinlets, stockworks, fissure-fillings, and massive lenses. Gold appears to be associated with pyrite and arsenopyrite whereas silver is associated with antimony. The primary gold mineralization occurs within a zone of stockwork sulfide veinlets also containing stibnite, pyrite and arsenopyrite. The principal antimony mineral is stibnite. Tungsten occurs in the mineral scheelite. Deposits are characterized by argillic and sericitic alteration with some silicification.

The Meadow Creek fault and its subsidiary structures trend north and northeast across the district and are a major controlling factor on the regional mineralization. The Yellow Pine mine, the largest mineralized area, is located in the Meadow Creek fault hanging wall, where the fault strike changes from northerly to northeasterly and a zone of stockwork sulfide veining occurs. The mineralized zone is about 2,000 feet long by 700 feet wide with a vertical extent of up to about 1,000 feet. It is cone shaped with the narrower, bottom area of the cone indicating possible continuity of the mineralization at depth both down dip along the hanging wall of the Meadow Creek fault and to the northwest.

The Homestake area appears as a continuation to the northeast of the Yellow Pine zone. The two zones have some similarities as well as differences. The Homestake sulfide zone is also directly associated with the Meadow Creek fault. It appears however to have a somewhat different structural style from the Yellow Pine area. The mineralized zone is about 1,500 feet long by 600 feet wide and up to 350 feet vertically. It has an overall tabular shape with a true width of about 100 to 200 feet. Drill hole information indicates that the mineralization at Homestake is encountered in both the hanging wall of the Meadow Creek fault zone as well as the footwall. Gold grades tend to be quite a bit lower than at the Yellow Pine area. The Yellow Pine and Homestake sulfide zones may be interconnected.

Pincock, Allen & Holt ("PAH"), of Denver, Colorado, completed a third-party technical study for us on November 17, 2003. At an assay database for 538 drill holes totaling 120,922 feet of drilling was used to estimate mineralized material in the Yellow Pine and Homestake sulfide zones using a cutoff grade of 0.025 ounces of gold per ton. Mineralized material is estimated at 33.8 million tons averaging 0.066 ounces of gold per ton.

On November 30, 2006, PAH completed a preliminary assessment in accordance with Canadian National Instrument 43-101 standards under the direction of Richard Lambert, P.E. and Barton Stone, P.G., both

independent qualified persons. In undertaking the preliminary assessment, PAH considered the economic and technical parameters associated with development of the mineralization by open-pit mining. The study, based on PAH's review of previous technical studies and their own work, determined the best treatment approach would be an on-site plant to produce a flotation concentrate that would be refined off-site. The potential development would produce an estimated 1.9 million ounces of gold over a 10-year life. PAH estimated the total capital cost over the project life to be \$170 million and preproduction capital to be \$150 million.

Long Valley

The Long Valley gold project is located in the Inyo National Forest, about 7 miles east of the town of Mammoth Lakes, in Mono County, California. The property consists of 95 contiguous, unpatented mining claims that cover an area of approximately 1,800 acres.

We have an option to acquire 100% of the Long Valley project from Standard Industrial Minerals, Inc. ("Standard"). Under the terms of the option agreement, we would pay Standard \$750,000 over five years, with annual payments to be due as follows: \$100,000 due on each of January 15, 2003, 2004, and 2005; \$200,000 due on January 15, 2006, and \$250,000 due on January 15, 2007. We have made the payments for 2003 through 2006 (see Consolidated Financial Statements Note 6), and in January 2007, we made the final payment of \$250,000 and exercised our option to purchase the property, which will be held through Vista Gold California LLC, an indirect, wholly-owned subsidiary of Vista Gold.

During the period of 1994 through 1997, Royal Gold, Inc. ("Royal") drilled 615 reverse circulation and 10 core holes at the Long Valley property. During this time, Royal also completed metallurgical investigations, preliminary engineering studies, including resource estimations, and initiated baseline-type environmental studies of the biological, water and archeological resources of the area. We have acquired all related data from Royal in exchange for a 1% net smelter returns royalty to Royal. The database contains 896 drill holes, totaling 268,275 feet. The majority of holes were drilled using reverse circulation methods. Gold was primarily analyzed by fire assay, with grade determinations by atomic absorption.

Geology

The Long Valley project claims are contained entirely within the early Pleistocene-age Long Valley Caldera, which has been dated at about 760,000 years old. The caldera is an elongated east-west oval depression measuring some 10 miles by 20 miles and is related to eruption of the Bishop Tuff, which is covered by younger rocks within the caldera.

The Long Valley gold mineralization is located near the center of the caldera and is underlain by lithologic units related to the caldera formation and its subsequent resurgence. Associated with resurgent doming is a sequence of interbedded volcanoclastic sedimentary rocks which were deposited in a lacustrine setting within the caldera. These rocks consist of sediment (siltstones through conglomerates) and debris-flow deposits, with local deposits of intercalated silica sinter and rhyolite flows and dikes. All of these lithologies have been altered and/or mineralized to variable degrees. Intruding the generally flat-lying lake sediments are several rhyolite domes that have been dated from 200,000 to 300,000 years in age.

The north-south trending Hilton Creek fault zone appears to define the eastern limit of the resurgent dome within the central part of the Long Valley Caldera and extends outside the caldera to the south. Offset along this fault appears to be variable and suggests that fault activity along this zone may be episodic in nature.

Gold and silver mineralization at Long Valley appears to fall under the general classification of an epithermal, low sulfidation-type deposit. Several areas, termed the North, Central, South, Southeast and Hilton Creek zones, on the Long Valley property are mineralized with low grades of gold and silver. The mineralized zones are generally north-south trending, up to 8,000 feet in length with widths ranging from

500 feet to 1,500 feet. The tabular bodies are generally flat-lying or have a shallow easterly dip. Mineralization is typically from 50 to 200 feet thick and, in the South and Southeast zones, is exposed at or very near the surface. The top of the Hilton Creek zone is covered by 20 to 50 feet of alluvium. The majority of the mineralization discovered to date is located in the Hilton Creek zone.

Gold and silver mineralization is quite continuous throughout the zones and is well defined above a cut-off grade of 0.010 gold ounces per ton. Within the continuous zones of low-grade gold mineralization (above 0.010 gold ounces per ton) are numerous zones of higher grade mineralization above 0.050 gold ounces per ton, particularly in the Hilton Creek zone, which may relate to zones of enhanced structural preparation. Mineralized zones typically correlate with zones of more intense clay alteration or argillization and/or silicification.

Based on a third-party technical study completed February 20, 2003, by MDA of Reno, Nevada, the Long Valley project contains approximately 68.3 million tons of mineralized material with an average grade of 0.018 ounces of gold per ton at a cut-off grade of 0.010 ounces of gold per ton.

Wildcat

Wildcat is located about 35 miles northwest of Lovelock and 26 miles south of our Hycroft mine in Pershing County, Nevada. The project consists of 74 unpatented claims and 4 patented claims.

During September and October 2003, we concluded due diligence reviews and executed formal purchase agreements to acquire the Wildcat project and the associated exploration data in three separate transactions. On September 23, 2003, we purchased 71 unpatented mining claims from Monex Exploration, a partnership, for \$200,000 on signing and \$300,000 on August 11, 2004. On commencement of commercial production, we will make a one-time production payment in the amount of \$500,000. Thirteen of the claims are subject to an underlying 0.4% net smelter returns royalty, and the remaining 58 claims are subject to an underlying 1% net smelter returns royalty.

On October 12, 2003, we purchased a 100% interest in the Vernal unpatented mining claim from David C. Mough and Jody Ahlquist Mough for \$50,000 on signing and \$50,000 on October 1, 2004, for a total consideration of \$100,000.

On October 28, 2003, we purchased four patented mining claims and exploration data from Sagebrush Exploration, Inc. ("Sagebrush") for 50,000 Common Shares of Vista Gold issued and delivered to Sagebrush upon the closing of the transaction. The four patented claims are subject to an underlying net smelter returns royalty of 1% for gold production between 500,000 and 1,000,000 ounces, increasing to 2% on production in excess of 1,000,000 ounces.

Geology

Wildcat lies in the Seven Troughs Range which is underlain by Triassic and Jurassic sedimentary rocks and has been intruded by Cretaceous granodiorite. Volcanic domes and plugs of rhyolite, quartz latite, trachyte, and andesite have been emplaced by Tertiary volcanism. Tertiary flows of pyroclastic debris, and vitrophyres of rhyolite, quartz latite, trachyte, and andesite composition blanket much of the area. The property contains structurally controlled epithermal gold and silver mineralization identified in four areas: Hero/Tag, Main, Northeast and Knob 32. The four areas have generally similar geology and mineralization with precious metals mineralization spatially associated with the contact between granodiorite and overlying tuff. Gold mineralization occurs with low-temperature silica, chalcedony and pyrite. The Main, Northeast, and Knob 32 deposits appear to be part of the Hero/Tag deposit, though structurally displaced.

The principal low-grade zone that essentially encompassed all the mineralization is tabular and dips gently to the southeast. There appear to be two main styles of mineralization based on mapping, sampling, and statistics. There is a broad, low-grade zone surrounding higher-grade material. The principal host is the tuff in which the low-grade precious metal mineralization is represented by pervasive and intense

silicification. The underlying granodiorite also contains a low-grade disseminated style of mineralization with higher grade silicified breccias occurring generally as stockwork within it. Generally, the granodiorite has higher grade and is not silicified. Any silicification is restricted to adjacent veins and veinlets, occasionally being discrete veins as were exploited historically, but also resulting in a large-tonnage stockwork. All of the tuff was altered by epithermal solutions; however, much of the granodiorite is unaltered. High-grade material includes multi-episodic chalcidonic silica veins and breccias.

On November 11, 2003, MDA of Reno, Nevada completed a third-party technical study for Vista Gold. Using data from one underground channel sample, 245 reverse circulation drill holes and 11 diamond drill holes totaling 95,466 feet, mineralized material above a cut-off grade of 0.010 ounces of gold per ton was estimated at 38.1 million tons grading 0.018 ounces of gold per ton and 0.16 ounces of silver per ton.

On August 14, 2006, MDA of Reno, Nevada, issued a technical report describing the work done by it previously.

Maverick Springs

The Maverick Springs project is located in northeast Nevada at the southeast end of the Carlin Trend belt of gold-silver mineralization, approximately half-way between Elko and Ely, Nevada. The property consists of 86 claims with a total area of approximately 3,900 acres.

On October 7, 2002, we completed the acquisition of a 100% interest in the Maverick Springs gold and silver project from Newmont Mining Corporation ("Newmont") and the Mountain View gold project (described below) from Newmont's wholly-owned subsidiary Newmont Capital Limited ("Newmont Capital"). To acquire the interest in Maverick Springs, we paid cash of \$250,000 and issued 141,243 equity units to Newmont, each unit comprised of one common share and one two-year warrant. Newmont retained a 1.5% net smelter returns royalty, and on October 7, 2003, we issued to Newmont 122,923 Common Shares and 122,923 warrants to purchase Common Shares. In addition, pursuant to acquisition agreement terms we completed 34,060 feet of drilling as of October 7, 2004, and must complete an additional 15,940 feet of drilling before October 7, 2006. We may terminate this agreement at any time. After October 7, 2006, Newmont has a one-time right to acquire a 51% interest in the Maverick Springs project, by paying to us twice the amount that we have spent on the project, including acquisition costs. In the event that Newmont exercises this right, Newmont will relinquish its 1.5% net smelter returns royalty. This one-time right expired 60 days after receipt of data on the property from us, which data was required to be delivered within 30 days of October 7, 2006. In January 2007, Newmont informed us that it would not be exercising this right. (See also Consolidated Financial Statements Note 5).

Maverick Springs is subject to a lease agreement (the "Artemis lease"), between Newmont and Artemis Exploration Company. The lease was entered into on October 1, 2001, and the key terms include: payment of advanced minimum royalties of \$50,000 on October 1, 2003, (this has been paid) and advanced minimum royalties of \$100,000 on October 1, 2004, (this has been paid), \$100,000 on October 1, 2005 (this has been paid) and each year thereafter while the agreement is in effect; work commitments of 6,400 feet of exploration drilling, on or before October 1 in each of 2002 (extended by agreement to November 15, 2002), 2003 and 2004 (these commitments have been met), a preliminary economic evaluation to be conducted by October 1, 2004 which was extended to April 7, 2005 (this has been completed); and a net smelter returns royalty based on a sliding scale ranging from 2% to 6%, depending on gold and silver prices at the time of production.

On June 9, 2003, we entered into an agreement granting Silver Standard Resources Inc. ("SSRI") an option to acquire our interest in the silver mineralized material hosted in the Maverick Springs project. We will retain our 100% interest in the gold mineralized material. The agreement with SSRI is subject to the terms of the purchase agreement between Newmont and Vista Gold. Under the agreement, SSRI was to pay \$1.5 million over four years, of which \$949,823 was paid to us in 2003, \$428,481 in 2004 and \$144,285 in 2005, completing the \$1.5 million obligation. Since SSRI has satisfied the \$1.5 million obligation, all costs

incurred for Maverick Springs are now being shared by the two corporations as stated below. SSRI and Vista Gold have formed a committee to jointly manage exploration of the Maverick Springs project. We are the operator and have a 45% vote on the committee, and SSRI has a 55% vote. Since SSRI has completed its \$1.5 million in payments, future costs will be shared by the two corporations on the same ratio as established for operation of the management committee: Vista Gold 45% / SSRI 55%, subject to standard dilution provisions. (See also Consolidated Financial Statements Notes 6 and 21).

In November 2002, we completed a 7,020-foot drill program on the Maverick Springs project. The program consisted of seven vertical reverse circulation holes, stepped out 500 feet to 2,200 feet from previously identified mineralization. All seven holes encountered flat-lying mineralization, predominantly oxidized to depths of up to 900 feet. The program outlined continuous mineralization in a 2,200-foot by 1,200-foot area, immediately adjacent to known gold-silver mineralization. With additional in-fill drilling, this newly outlined mineralization has the potential to significantly increase the mineralized material.

In October 2003, we completed a 14-hole reverse circulation drill program totaling 14,020 feet, in October 2004, we completed a 13-hole reverse circulation drill program totaling 13,020 feet and August 2006, we completed a 18-hole reverse circulation drill program totaling approximately 16,000 feet. Intercepts indicate the potential for bulk-mineable gold-silver mineralization.

Geology

Maverick Springs can be classified as a Carlin-type or sediment/carbonate hosted disseminated silver-gold deposit. Sediment hosted deposits are common within northern Nevada, although the systems are usually gold dominated with relatively minor amounts of silver. Silver and gold mineralization at Maverick Springs has been interpreted as a roughly antiformal or arch-shaped zone with an axis that plunges shallowly to the south and seems to flatten to horizontal over the northern half of the deposit. The limbs of the arch dip shallowly to moderately at 10-30° to the east and west. Overall, the mineralized zone is elongate in the north-south direction with a length of over 6,000 feet, a width of up to 3,000 feet, and a thickness of commonly 100-300 feet.

Mineralization consists of micron-sized silver and gold with related pyrite, stibnite and arsenic sulfides. It is usually associated with intense fracturing and brecciation, with or without accompanying whole-rock silicification or stockwork quartz.

Alteration consists of pervasive decalcification, weak to intense silicification and weak alunitic argillization. Massive jasperoid is common in surface exposures and in drill core. Oxidation has affected all sulfides on surface and is pervasive to a depth of at least 400 feet, intermittent to 900 feet, and generally absent below 1,000 feet.

Based on a third-party technical study completed on April 13, 2004, by Snowden Mining Industry Consultants of Vancouver, British Columbia, the Maverick Springs project contains approximately 69.6 million tons of mineralized material with an average grade of 0.01 ounces of gold per ton and 1.0 ounce of silver per ton at a silver-equivalent cut-off grade of 1.0 ounce of silver per ton. A 16,000 foot drill program is planned for 2006.

On July 30, 2006, Snowden Mining Industry Consultants of Vancouver, British Columbia, issued a technical report describing the work done by it previously, and reporting drilling completed in 2004.

Mountain View

The Mountain View property is located in northwest Nevada near the Blackrock Desert. The property is approximately 15 miles northwest of Gerlach, Nevada in Washoe County; it straddles the boundary between the Squaw Valley and Banjo topographic quadrangles. The property currently consists of 127 claims with a total area of approximately 2,360 acres.

Our acquisition of the Mountain View property was completed along with that of the Maverick Springs property, as described above. To acquire the interest in the Mountain View property, we paid cash of \$50,000 and issued 56,497 equity units, each unit comprised of one common share and a two-year warrant, to Newmont Capital, and Newmont Capital retains a 1.5% net smelter returns royalty. In addition, we completed 8,055 feet of drilling before October 7, 2004, as required by the underlying agreement. We may terminate this agreement at any time. After October 7, 2006, Newmont Capital has a one-time right to acquire a 51% interest in the project, by paying to us twice the amount that we have spent on the project, including acquisition costs. In the event that Newmont Capital exercises this right, Newmont Capital will relinquish its 1.5% net smelter returns royalty. This one-time right expired 60 days after receipt of data on the property from us, which data was required to be delivered within 30 days of October 7, 2006. In January 2007, Newmont informed us that it would not be exercising this right. (see also Consolidated Financial Statements Note 6).

Newmont Capital's interest in the Mountain View property is subject to an underlying lease and two other royalty arrangements, the principal terms of which are: the underlying lease grants a 50% interest to Newmont in all claims, with a few exceptions where a 5% interest is granted; and the lessee may purchase the remaining interest in the claims for \$250,000 at any time. The lessee is obligated to purchase the remaining 50% for \$250,000 on achieving commercial production. Also, the lessee shall pay a 1% net smelter returns royalty during production, with advance minimum payments of \$25,000 per year. Advanced royalties are deductible from the net smelter returns royalty and cease upon purchase of the remaining interest of the underlying lease. A 1% net smelter returns royalty also applies to certain other claims.

We completed a five-hole reverse circulation program totaling 4,003 feet in November 2003. The results indicate the presence of a new zone of bulk mineralization approximately 200 feet east of the known core of mineralization. We completed 4,070 feet of reverse circulation drilling in 2004, and the results indicate potential bulk-mineable gold mineralization and the down-dip extension of higher-grade gold mineralization.

Geology

The dominant rock types in the area are Miocene volcanics and interbedded volcanoclastic sediments. Minor greenschist facies Permo-Triassic strata occur to the northeast and a large body of granodiorite makes up the bulk of the Granite Range to the east and south.

The Miocene lithologies consist of mafic tuffs, rhyolite tuffs and flows, volcanoclastic sediments and basalts. These units are separated from the Granite Range to the east by a range front normal fault that dips steeply to the southwest. The gold mineralization is hosted by a unit known as the Severance rhyolite that is sandwiched between the range front fault to the northeast and older Tertiary tuffs, flows and volcanoclastic sediments to the southwest.

Structure on the property is dominated by northwest and northeast trending faults. Major fault offsets occur along the range-front fault system and these are offset by the northeast trending structures. Recent alluvium is offset by the range front faults.

Based on a third-party technical study completed December 17, 2002, by Snowden Mining Industry Consultants of Vancouver, British Columbia, the Mountain View project contains approximately 23.2 million tons of mineralized material with an average grade of 0.013 ounces of gold per ton at a cut-off grade of 0.006 ounces of gold per ton.

On July 31, 2006, Snowden Mining Industry Consultants of Vancouver, British Columbia, issued a technical report describing the work done by it previously, and reporting drilling completed in 2003 and 2004.

Hasbrouck

The Hasbrouck property is located in southwestern Nevada about 5 miles south-southwest of the town of Tonopah in Esmeralda County, Nevada, adjacent to U.S. Highway 95 and approximately half-way between Reno and Las Vegas. The property consists of 22 patented lode mining claims and 61 unpatented lode claims that cover an area of approximately 1,300 acres.

On May 23, 2003, we executed a purchase agreement with Newmont Capital, which includes both the Hasbrouck property and the Three Hills property, which lies approximately 4.5 miles to the north-northwest. Terms of the purchase included a \$50,000 cash payment on signing and \$200,000 or, at our discretion, the equivalent in our Common Shares one year after signing. In June and July 2004, we issued to Newmont Capital an aggregate 50,475 Common Shares at a deemed per share price of \$3.96. The value of the Common Shares was based on the average AMEX closing price of the Common Shares over the ten-trading-day period ending one day before the first anniversary of the agreement. Newmont Capital, at its option, will retain either: (a) a 2% net smelter returns royalty in each project together with the right to a \$500,000 cash payment at the start of commercial production at either project and a further \$500,000 cash payment if, after the start of commercial production, the gold price averages \$400 per ounce or more for any three-month period; or (b) the right to acquire 51% of either or both projects. The latter right would be exercisable only after the later of four years or the time when we have incurred aggregate expenditures of \$1.0 million to acquire, explore and hold the projects and would include Newmont Capital paying to us cash equaling 200% of the expenditures made by us on the related property. In this event, Newmont Capital would become operator of a joint venture with us, and both parties would fund the project through to a production decision. Our contribution to the joint venture during this period is capped at \$5.0 million, \$3.0 million of which Newmont Capital would finance for us and recover, with interest, exclusively from related project cash flows. We would also grant Newmont Capital a right of first offer with respect to subsequent sale of the projects by Vista Gold. An additional 1.5% net smelter royalty on the Hasbrouck property is held by a private party.

Geology

The property is located on Hasbrouck Mountain, which is thought to lie along the western edge of a caldera. The mountain is underlain by gently dipping ash-flow, air-fall and waterlain tuffs and volcaniclastic sediments of the Miocene Siebert Formation. Several occurrences of chalcidonic sinter deposits occur near the summit of the mountain. Gold and silver mineralization in the Hasbrouck deposit appears to have formed relatively close to the paleo-surface in an epithermal, hot spring environment. The mineralization is concentrated in the Siebert Formation, in units stratigraphically below the chalcidonic sinter deposits that are exposed near the top of Hasbrouck Mountain. Two zones of mineralization are presently defined. The "Main" zone includes the bulk of mineralization at Hasbrouck, while the small "South Adit" zone lies 700 to 1000 feet to the south of the "Main" zone.

A third-party technical study was completed for us by MDA of Reno, Nevada on August 29, 2003. The Hasbrouck study was developed using data from 54,339 feet of drilling, principally comprised of 105 reverse circulation holes totaling 44,400 feet and 22 rotary drill holes totaling 8,980 feet. The drilling database was compiled from work performed by FMC Gold Co., Cordex Syndicate and Franco Nevada Inc. between 1974 and 1988. Based on this study, mineralized material above a cut-off of 0.010 ounces of gold per ton is 20.3 million tons with an average grade of 0.023 ounces of gold per ton and 0.32 ounces of silver per ton.

On August 14, 2006, MDA of Reno, Nevada, issued a technical report describing the work done by it previously.

Three Hills

Three Hills is located in southwestern Nevada about 1 mile west of the town of Tonopah in Esmeralda County, Nevada, and about 4.5 miles northwest of the Hasbrouck property described above. Three Hills consists of 15 unpatented lode claims totaling approximately 201 acres.

On May 23, 2003, we executed a purchase agreement with Newmont Capital, which included both the Hasbrouck and the Three Hills property. The terms of this agreement are detailed under the Hasbrouck description above.

Geology

Three Hills is located in the Walker Lane structural domain of the Basin and Range physiographic province. It is in an area of structural disruption resulting from a series of orogenic events occurring in Paleozoic, Mesozoic and Cenozoic times. Basin and Range high-angle normal faults control the mineralization at Three Hills, where they cut the Siebert Formation. Gold mineralization occurs in a zone of pervasive silicification and in the Siebert Formation and the upper 10 to 30 feet of the Fraction Tuff. The contact between these two units contains consistently higher grades of gold and is more commonly argillized than silicified.

MDA of Reno, Nevada, completed a third-party technical study for Vista Gold on August 29, 2003. The Three Hills study included data from 62,874 feet of drilling, comprised of 183 reverse circulation holes totaling 54,657 feet, 45 air-track and rotary holes totaling 6,320 feet and 9 diamond drill holes totaling 1,897 feet. The drilling was completed by Echo Bay Mines Ltd., Eastfield Resources, Saga Exploration and Cordex Syndicate between 1974 and 1996. Based on this study, mineralized material above a cut-off of 0.01 ounces of gold per ton was 5.7 million tons with an average grade of 0.023 ounces of gold per ton.

On August 14, 2006, MDA of Reno, Nevada, issued a technical report describing the work done by it previously.

Guadalupe de los Reyes

Guadalupe de los Reyes is located in the western foothills of the Sierra Madre Occidental mountain range, approximately 68 miles by air (124 miles by road) north of the coastal city of Mazatlán, and 19 miles by road southeast of the town of Cosalá in Sinaloa State, Mexico. The mineral concessions include two titled concessions for exploitation and three titled concessions for exploration, all covering about 1,475 acres.

On August 1, 2003, we executed an agreement to acquire a 100% interest in the Guadalupe de los Reyes gold project and a data package associated with the project and general area, for aggregate consideration of \$1.4 million and a 2% net smelter returns royalty. During a due diligence period leading up to the signing of the purchase agreement, we made payments to the owner, Sr. Enrique Gaitan Maumejean, totaling \$100,000, and upon exercising our option to complete the purchase, paid an additional \$200,000. On August 4, 2004, we issued 138,428 Common Shares to Sr. Gaitan in satisfaction of the scheduled payment of \$500,000, which could be made in cash or Common Shares at our discretion. An additional \$500,000 in cash will be paid by way of \$100,000 payments on each of the second through sixth anniversaries of the signing of the formal agreement, with the outstanding balance becoming due upon commencement of commercial production. Payments of \$100,000 were made in each of 2005 and 2006. A 2% net smelter returns royalty will be paid to the previous owner and may be acquired by us at any time for \$1.0 million. We retain the right to terminate the agreement at any time.

Geology

Guadalupe de los Reyes occurs in a late Cretaceous to Tertiary-age volcanic sequence of rocks. Gold and silver mineralization has been found along a series of northwesterly and west-northwesterly trending structural zones. Mineralization in these zones is typical of low sulfidation epithermal systems. Eight main

target areas have been identified along three major structural zones. Several of these targets have bulk tonnage potential which may be amenable to open-pit mining, including the El Zapote, San Miguel, Guadalupe Mine, Tahonitas, and Noche Buena zones. The El Zapote target occurs in the Mariposa-El Zapote-Tahonitas structural zone on the western side of the project area and has been mapped for a distance of 2 miles. The El Zapote deposit is one of three deposits found along this structural zone, with the inactive underground Mariposa Mine 0.6 miles to the northwest and the Tahonitas prospect 0.3 miles to the southeast. The Guadalupe zone occurs as the northwest extension of the mineralized structures that were developed by underground mining along approximately 3,280 feet of the veins and to some 1,300 feet deep. The Guadalupe zone is found in the northeast portion of the area and has produced the majority of precious metals within the district. The San Miguel and Noche Buena zones are enclosed by the same northwestern trending structure in between the El Zapote-Mariposa and the Guadalupe structures.

A third-party technical study was performed for Vista Gold and reported on July 17, 2003, by Pincock, Allen & Holt, of Denver, Colorado, using assay data from 381 reverse circulation drill holes totaling 118,633 feet. The drilling was performed by Northern Crown Mines Limited from 1993 to 1997. Based on this study, mineralized material above a cutoff grade of 0.016 ounces of gold per ton is 7.0 million tons averaging 0.040 ounces of gold per ton and 0.67 ounces of silver per ton.

F.W. Lewis, Inc. Properties

On December 13, 2005, our subsidiary Victory Gold Inc. ("Victory Gold"), acquired all of the outstanding shares of F.W. Lewis, Inc., the assets of which include 55 mineral properties in Nevada and Colorado. The acquisition was made by exercise of a purchase option originally held by Century Gold LLC ("Century Gold") of Spring Creek, Nevada. Century Gold assigned the option to Victory Gold pursuant to an assignment and assumption agreement effective December 9, 2005. Under the terms of the assignment agreement, we paid Century Gold \$150,000 in cash and also reimbursed Century Gold for the \$250,000 it paid the owners of F.W. Lewis, Inc. toward the option exercise price of \$5.1 million. In addition, we issued to Century Gold 250,000 Common Shares in Vista Gold valued at \$1.218 million. To complete the exercise of this option, we paid the owners of F.W. Lewis, Inc., the remaining \$4.85 million of the outstanding purchase price. Century Gold retained a 100% interest in two properties and a 50% interest in two other properties. The 53 properties retained by Vista Gold include a total of 9,280 acres of patented and 11,616 acres of unpatented mineral claims, the majority having gold, silver or copper discoveries or old mines located on the properties.

F.W. Lewis, Inc. (now owned by our subsidiary Victory Gold) owns a production royalty interest in the Hycroft Mine. The production royalty (applying to approximately 70% of the reported reserves) is 5% Net Smelter Return ("NSR") on gold and 7.5% NSR on other minerals, including silver. The production royalty on gold escalates on ore over 0.05 ounces per ton (opt) to a maximum of 10% NSR on ore grades over 0.14 opt. With the acquisition of F.W. Lewis, Inc., we are no longer subject to payment of this royalty to an outside party.

Included in the package (100% retained by us) is a property in the Battle Mountain, Nevada Mining District, adjacent to and on trend with Newmont's Phoenix-Fortitude property, although similar mineralization cannot be assured. This property is subject to pre-existing agreements with Madison Minerals Inc. (formerly Madison Enterprises Corp.) and Great American Minerals Exploration (Nevada) LLC. These agreements involve payments of \$3,000 per month minimum royalty payments to Victory Gold, minimum exploration commitments of \$250,000 per year, and an option to purchase the property for \$2.0 million payable by December 31, 2007, with a retained 5% gross royalty on gold and a 4% NSR royalty on other metals, and with annual advance minimum royalty payments of \$60,000 commencing on exercise of the purchase option. Madison and Great American also have an option to purchase the royalties from Victory Gold for \$4.0 million in the first year following the date of exercise of the purchase option and escalating by \$500,000 each year thereafter.

Amayapampa

The Amayapampa project is located 186 miles southeast of La Paz in the Chayanta Municipality, Bustillos Province, Department of Potosi, in southwestern Bolivia. Access is via 167 miles of paved road from La Paz to Machacamarca near Oruro, followed by 62 miles of gravel road to Lagunillas, then nine miles of dirt road to Amayapampa. The Amayapampa property is situated within the moderately rugged Eastern Cordilleran region of Bolivia with elevations at the property varying from 12,300 to 13,450 feet above sea level. Amayapampa consists of 24 mining concessions covering 1,989 acres plus an additional 16,803 acres in regional exploration and exploitation concessions. The project is currently on care and maintenance.

The Corporation acquired the Amayapampa gold project, in Bolivia, in 1996. On March 13, 2007, the Corporation entered into an agreement with Luzon Minerals Ltd. ("Luzon") to sell the Amayapampa project to Luzon. This agreement replaces all prior agreements between the Corporation and Luzon, as previously reported, with respect to the Amayapampa project. See "Subsequent Event" and "Management's Discussion and Analysis of Financial Condition and Results of Operations - Subsequent Event". The terms of the agreement with Luzon were amended in January, July and November of 2005.

Geology

The Amayapampa deposit underlies a north-northwest trending ridge approximately 0.3 miles east of the town of Amayapampa. The deposit is defined by about 48 diamond drill holes; 96 reverse-circulation drill holes; and 315 underground channel samples totaling 17,585 feet from more than 200 accessible cross-cuts in 43 different levels and sub-levels extending over a vertical distance of 682 feet. The deposit is approximately 1,970 feet in strike length, 98 to 230 feet in width and has an overall dip of the mineralized envelope of 80 to 90 degrees west. The depth extent of continuous mineralization is in excess of 656 feet to about the 12,795-foot elevation, although some mineralization is present below this depth. Gold occurs free and associated with sulfides in a structural zone in which quartz veins were emplaced then sheared prior to introduction of sulfides and gold mineralizing solutions.

The host rocks are composed of Ordovician black shales, sandstones, and siltstones, which were weakly metamorphosed to argillites, quartzites, and siltites, respectively. The Amayapampa project is located along the east flank of a north-south trending regional anticline near the top of the Ordovician sequence. Bedding dips are steep at 60 to 80 degrees west, with the east limb of the anticline being overturned and thus, also dipping steeply west.

The mineralized envelope is best described as a structural zone, in which quartz veins were emplaced along a preferential fracture direction.

Most faults, shears and fractures are north-northeast to north-northwest trending and steeply dipping, both east and west, at 60 to 90 degrees. Quartz veins predominantly dip east. Locally, within the zone of mineralization, flat, thrust-like faults are present, which have offset quartz veins to a minor extent. These flat faults, commonly west-dipping at 40 to 45 degrees, can not generally be mapped outside of the main structural zone that hosts the gold mineralization. A west dipping, 45-degree fault projects into the pit on the northeast side of the deposit and was intersected by two vertical, geotechnical core holes. The base of mineralization may also be slightly offset by a similar west-dipping, 45-degree fault.

Oxidation effects are pervasive from the surface to depths of 66 to 98 feet, with only partial oxidization below those depths. Hydrothermal alteration effects evident in fresh rock are minor, and occur as coarse sericite (muscovite) in thin (0.08 to 0.20 inch) selvages along some quartz veins. In addition, chlorite is present in and adjacent to some quartz veins, but this presence may be a product of low-grade metamorphism. Alteration effects are minimal overall, except for surface oxidization.

Mineralization is composed of quartz veins and sulfides and both constitute a visual guide to ore. Quartz veins are a locus for gold mineralization. Quartz veins are typically a few centimeters to two feet in width and commonly occur as sub-parallel vein sets. The strike extent can be 164 to 246 feet or more for any one

vein or vein set, but the dip extent is not as well established and probably ranges up to 66 to 98 feet. Multiple vein sets are present in the overall mineralized envelope and veins commonly pinch and swell along strike and down dip.

Sulfide mineralization, hosted by multiple fractures is composed of predominantly pyrite within and adjacent to quartz veins. The total sulfide concentration for the overall mineralized zone is estimated at 3% to 5%. Petrographic examination of the sulfide mineralization shows pyrite to dominate at over 95% of the total sulfides; arsenopyrite is also present, as are minor amounts of chalcopyrite, galena, sphalerite, stibnite and tetrahedrite. Gold is present as free gold in association with pyrite, on fractures within pyrite and attached to the surface of pyrite and is often visible as discrete grains on fractures in quartz and argillite. Gold grains exhibit a large size-range, with much of the gold being relatively coarse at 40 to 180 microns. All gold grains display irregular shapes with large surface areas. No gold was noted to be encapsulated in either quartz or sulfide. The content of gold grains was verified as over 97% gold by scanning-electron-microprobe analysis.

District-scale exploration potential exists for defining styles of gold mineralization similar to Amayapampa, which could be developed as satellite ore bodies. In addition, at least 15 drill holes beneath the planned Amayapampa pit suggest the presence of four higher-grade shoots.

An updated study containing an estimate of mineralization for the Amayapampa project was completed on September 21, 2006, by GR Technical Services Ltd. of Calgary, Alberta and Giroux Consultants Limited of Vancouver, British Columbia, independent consultants, in accordance with Canadian National Instrument 43-101. The resource estimate was completed in September 2005 for Luzon under the direction of Mr. G. H. Giroux, P.Eng., MA Sc., an independent qualified person, utilizing standard industry software and resource estimation methodology. The mineral resource data base contains 10,264 assay intervals from 45 core drill holes, 96 reverse circulation drill holes, and underground channel samples done by Da Capo Resources Ltd. and Vista between 1994 through 1997, with assaying by the Bondar Clegg laboratory in Oruro, Bolivia. The results of the study indicates that the known Amayapampa deposit, at a cutoff grade of 0.012 ounces gold per ton, contains an estimated 15,697,000 short tons at a grade of 0.042 gold ounces per ton.

Luzon continues to conduct technical studies to lead to the development of the project.

ITEM 3. LEGAL PROCEEDINGS.

Except as described below, we are not aware of any material pending or threatened litigation or of any proceedings known to be contemplated by governmental authorities which is, or would be, likely to have a material adverse effect upon us or our operations, taken as a whole.

Estanislao Radic

Please see "Part I Item 3. Legal Proceedings" as included in our Annual Report on Form 10-K for the year ended December 31, 2002, for information about a legal dispute initiated in Bolivia in April 1998 by a Mr. Estanislao Radic Valderrama ("Radic"), who brought legal proceedings in the lower penal court and, in 1999, brought proceedings in civil court against Mr. Raul Garafulic and us, questioning the validity of Mr. Garafulic's ownership of the Amayapampa property.

In April 2005, Radic commenced a civil lawsuit in La Paz, Bolivia against Empresa Minera Nueva Vista S.A. ("Nueva Vista") and two of its predecessors in interest, seeking nullification of the public documents by which the mineral concessions comprising the "Grupo Minero Amayapampa" had been transferred to Nueva Vista. Nueva Vista and we did not learn of this lawsuit until the quarter ended June 30, 2006.

This is Radic's second civil lawsuit attempting to nullify the transfer of the mineral concession to Nueva Vista and its predecessors in interest. Radic's prior civil suit, initiated in Potosi, Bolivia in 1999 as noted

above, ended in April 2004 with a declaration that his cause of action had lapsed. In the present action, Nueva Vista and the other defendants have raised the defenses, among others, of prior adjudication (res judicata) and expiration of the applicable statute of limitations.

We believe that Radic's contentions in the present suit are without merit. Nueva Vista has asserted counterclaims against Radic for bad faith and recklessness in bringing the present action. We do not anticipate that this lawsuit will result in any material adverse impact on Vista Gold or Nueva Vista or our holdings in Bolivia.

ITEM 4. SUBMISSION OF MATTERS TO VOTE OF SECURITY HOLDERS.

On November 16, 2006, at a special meeting of Vista's shareholders, optionholders and warrant holders (collectively, "Securityholders") held on that date, the Securityholders voted to approve the previously announced transaction which, if completed, will result in Vista transferring its existing Nevada properties into Allied Nevada, which will concurrently acquire the Nevada mineral assets of the Pescios. Under the proposed transaction, our shareholders will exchange their existing common shares of Vista and will receive, subject to applicable withholding taxes, new common shares of Vista and common shares of Allied Nevada. Our optionholders will exchange their options for options to acquire new common shares of Vista and options to acquire common shares of Allied Nevada. Finally, our warrant holders will have their warrants adjusted in accordance with the terms of the warrants. See "Item 1. Business Significant Developments 2006 Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held by Pescios." The results of the special meeting were previously reported in our Current Report on Form 8-K, filed with the Securities and Exchange Commission on November 17, 2006.

EXECUTIVE OFFICERS OF THE CORPORATION

As of December 31, 2006, we had four executive officers, namely Michael B. Richings, President and Chief Executive Officer, Gregory G. Marlier, Chief Financial Officer, Frederick H. Earnest, Senior Vice

Edgar Filing: VISTA GOLD CORP - Form 10-K

President Project Development and Howard M. Harlan, Vice President Business Development. Information as to Mr. Richings, Mr. Marlier, Mr. Earnest and Mr. Harlan is set forth below.

Name, Position and Age	Held Office Since	Business Experience During Past Five Years
Michael B. Richings <i>President, Chief Executive Officer and Director</i> Age 62	May 25, 2004	President and Chief Executive Officer of Vista Gold Corp. from May 25, 2004 to present; former President and Chief Executive Officer of Vista Gold Corp. from June 1995 to September 2000.
Gregory G. Marlier <i>Chief Financial Officer</i> Age 57	June 1, 2004	Chief Financial Officer of Vista Gold Corp. from June 1, 2004 to present; Chief Financial Officer of Pacific Western Technologies, Ltd. from 2000 to 2004.
Frederick H. Earnest <i>Senior Vice President, Project Development</i> Age 45	September 22, 2006	Senior Vice President, Project Development of Vista from September 22, 2006 to present; President of Pacific Rim Salvador, S.A. de C.V. from June 2004 to September 2006 and General Manager and Legal Representative of Compania Minera Dayton from April 1998 to June 2004.
Howard M. Harlan <i>Vice President, Business Development</i> Age 63	November 9, 2004	Vice President, Business Development of Vista Gold Corp. from November 9, 2004 to present; Manager of Corporate Administration of Vista Gold Corp. from September 2003 to November 2004; Land Manager of LaFarge West Inc. from February 2002 to September 2003; Consultant from March 2001 to February 2002; Business Analyst of Luzenac America Inc. from June 2000 to March 2001.

None of the above executive officers has entered into any arrangement or understanding with any other person pursuant to which he was or is to be appointed or elected as an executive officer of Vista Gold Corp. or a nominee of any other person.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.**Price Range of Common Shares**

The Common Shares of Vista Gold Corp. are listed on the American Stock Exchange and the Toronto Stock Exchange under the symbol VGZ. The following table sets out the reported high and low sale prices on the American Stock Exchange and on the Toronto Stock Exchange for the periods indicated as reported by the exchanges.

		American Stock Exchange (US\$)		The Toronto Stock Exchange (CDN\$)	
		High	Low	High	Low
2005	1st quarter	4.27	3.30	6.00	4.01
	2nd quarter	3.94	2.76	4.89	3.45
	3rd quarter	4.50	3.43	5.40	4.15
	4th quarter	5.35	3.90	6.25	4.36
2006	1st quarter	5.80	4.34	6.95	5.05
	2nd quarter	9.99	5.82	11.17	6.60
	3rd quarter	13.55	8.25	14.95	9.56
	4th quarter	10.40	7.67	11.86	8.70

On March 12, 2007, the last reported sale price of the Common Shares of Vista Gold on the American Stock Exchange was \$7.52 and on the Toronto Stock Exchange was CDN \$8.81. As at March 13, 2007, there were 31,992,969 Common Shares issued and outstanding, and we had 1,150 registered shareholders of record.

Dividends

We have never paid dividends. While any future dividends will be determined by our directors after consideration of our earnings, financial condition and other relevant factors, it is currently expected that available cash resources will be utilized in connection with the ongoing acquisition, exploration and evaluation programs of Vista Gold.

Securities Authorized for Issuance under Equity Compensation Plans

See "Part III Item 11. Executive Compensation" for information relating to our equity compensation plan.

Performance Graph

The following graph compares the yearly percentage change in the Corporation's cumulative total shareholder return on its Common Shares with the cumulative total return of the S&P/TSX Composite Index and the S&P/TSX Canadian Gold Index, assuming the reinvestment of dividends, for the last five financial years:

The Common Shares were consolidated on a 20:1 basis on June 19, 2002; values after that date have been adjusted to reflect the consolidation.

Exchange Controls

There are no governmental laws, decrees or regulations in Canada that restrict the export or import of capital, including foreign exchange controls, or that affect the remittance of dividends, interest or other payments to non-resident holders of the securities of Vista Gold, other than a Canadian withholding tax. See " Certain Canadian Income Tax Considerations for U.S. Residents," below.

Certain Canadian Income Tax Considerations for U.S. Residents

The following is a general summary of certain Canadian federal income tax consequences of the ownership and disposition of Common Shares generally applicable to holders of Common Shares who are residents of the United States for the purposes of the Canada-United States Income Tax Convention (1980), as amended (the "Convention") and who, at all relevant times, for purposes of the Canadian Tax Act (as defined below), (i) are not resident or deemed to be resident in Canada, (ii) hold their Common Shares as capital property, (iii) deal at arm's length with and are not affiliated with Vista Gold, and (iv) do not use or hold, and are not deemed to use or hold, their Common Shares in a business carried on in Canada. In this summary, these holders of Common Shares are referred to as U.S. Residents. Generally, Common Shares will be considered to be capital property to a holder as long as the holder acquired the shares as a long-term investment, is not a trader or dealer in securities, did not acquire, hold or dispose of such shares in a transaction considered to be an adventure or concern in the nature of trade (i.e. speculations) and does not hold such shares as inventory in the course of carrying on a business. Special rules, which are not discussed below, may apply to a U.S. Resident which is an insurer that carries on business in Canada and elsewhere.

It is the Canada Revenue Agency's (the "CRA's") published policy that certain entities that are treated as being fiscally transparent for United States federal income tax purposes (including limited liability companies) will not qualify as residents of the United States under the provisions of the Convention.

This summary is based upon the current provisions of the *Income Tax Act* (Canada) and the regulations enacted thereunder (collectively referred to as the "Canadian Tax Act") and the Convention as in effect on the date hereof, all specific proposals (the "Tax Proposals") to amend the Canadian Tax Act publicly announced by or on behalf of the Minister of Finance (Canada) before the date hereof, and our understanding of the current published administrative and assessing policies of the CRA. This summary is not exhaustive of all possible Canadian federal income tax consequences and does not take into account provincial, territorial or foreign income tax considerations, and except for the Tax Proposals does not take into account or anticipate any changes in law, whether by judicial, governmental or legislative decision or action. No assurance can be given that the Tax Proposals will be enacted into law in the manner proposed, or at all.

This summary is of a general nature only and is not intended to be, nor should it be construed to be, legal or tax advice to any holder or prospective holder of Common Shares and no representations are made with respect to the Canadian federal income tax consequences to any particular holder or prospective holder of Common Shares. Accordingly, holders or prospective holders of Common Shares should consult their own tax advisors for advice with respect to their particular circumstances. The discussion below is qualified accordingly.

This summary does not address the Canadian Federal income tax consideration in respect of the transactions pursuant to the Arrangement whereby holders will exchange Common Shares and will receive, subject to applicable withholding taxes, (i) new common shares of Vista and (ii) common shares of Allied Nevada. Holders of Common Shares are referred to the Management Information and Proxy Circular of Vista dated October 11, 2006 for a summary of the tax consequences related to these transactions.

Disposition of Common Shares

A U.S. Resident will not be subject to tax under the Canadian Tax Act in respect of any capital gain realized by such U.S. Resident on a disposition of Common Shares unless the Common Shares constitute "taxable Canadian property" (as defined in the Canadian Tax Act) of the U.S. Resident at the time of disposition. As long as the Common Shares are listed on a prescribed stock exchange (which currently includes the Toronto Stock Exchange and American Stock Exchange), the Common Shares generally will not constitute taxable Canadian property of a U.S. Resident unless, at any time during the 60-month period immediately preceding the disposition, the U.S. Resident, persons with whom the U.S. Resident did not deal at arm's length, or the U.S. Resident together with all such persons, owned or was considered to own 25% of more of the issued shares of any class or series of shares of the capital stock of the Corporation.

If the Common Shares are taxable Canadian property to a U.S. Resident at the time of disposition, any capital gain realized on the disposition of such Common Shares will, according to the Convention, generally not be subject to Canadian federal income tax unless the value of the shares of the Corporation at the time of the disposition is derived principally from "real property situated in Canada" within the meaning set out in the Convention. A U.S. Resident whose Common Shares are taxable Canadian property should consult their own advisors.

Taxation of Dividends on Common Shares

Under the Canadian Tax Act, dividends on Common Shares paid or credited, or deemed to be paid or credited, to a U.S. Resident will be subject to Canadian withholding tax at a rate of 25% (subject to reduction under the provisions of the Convention) of the gross amount of the dividends. Currently, under the Convention, the rate of Canadian withholding tax generally applicable to dividends paid or credited to

a U.S. Resident is 15% of the gross amount of the dividends. In addition, under the Convention, dividends may be exempt from Canadian non-resident withholding tax if paid to certain U.S. Residents that are qualifying religious, scientific, literary, educational or charitable tax-exempt organizations and qualifying trusts, companies, organizations or arrangements operated exclusively to administer or provide pension, retirement or employee benefits that are exempt from tax in the United States and that have complied with specific administrative procedures.

Certain U.S. Federal Income Tax Considerations

NOTICE PURSUANT TO IRS CIRCULAR 230: NOTHING CONTAINED IN THIS SUMMARY CONCERNING ANY U.S. FEDERAL TAX ISSUE IS INTENDED OR WRITTEN TO BE USED, AND IT CANNOT BE USED, BY A U.S. HOLDER (AS DEFINED BELOW), FOR THE PURPOSE OF AVOIDING U.S. FEDERAL TAX PENALTIES UNDER THE CODE. THIS SUMMARY WAS WRITTEN TO SUPPORT THE PROMOTION OR MARKETING OF THE TRANSACTIONS OR MATTERS ADDRESSED BY THIS DOCUMENT. EACH U.S. HOLDER SHOULD SEEK U.S. FEDERAL TAX ADVICE, BASED ON SUCH U.S. HOLDER'S PARTICULAR CIRCUMSTANCES, FROM AN INDEPENDENT TAX ADVISOR.

The following is a discussion of the material U.S. federal income tax consequences to U.S. Holders, as defined below for purposes of this discussion of "Certain U.S. Federal Income Tax Considerations", of the holding and disposition of our common shares. The discussion is based on the U.S. Internal Revenue Code of 1986, as amended (the "Code"), U.S. Treasury regulations, judicial authorities, published positions of the Internal Revenue Service (the "IRS") and other applicable authorities, all as in effect on the date hereof and all of which are subject to change, possibly with retroactive effect.

A "U.S. Holder" is a beneficial owner of our common shares that is for U.S. federal income tax purposes (a) an individual U.S. citizen or resident alien; (b) a corporation, or other entity taxable as a corporation for U.S. federal income tax purposes, created or organized under the laws of the United States, the District of Columbia or any state in the United States; (c) an estate the income of which is subject to U.S. federal income taxation regardless of its source; or (d) a trust, if its administration is subject to the primary supervision of a U.S. court and one or more U.S. persons have the authority to control all substantial decisions of the trust, or if it has made a valid election under applicable U.S. Treasury regulations to be treated as a U.S. person.

This discussion only addresses U.S. Holders who hold our common shares as "capital assets" within the meaning of section 1221 of the Code. This discussion does not address all the tax consequences that might be relevant to U.S. Holders in light of their particular circumstances or the U.S. federal income tax consequences to U.S. Holders subject to special treatment under U.S. federal income tax laws, including but not limited to banks and other financial institutions, insurance companies, dealers in securities or foreign currency, traders that have elected mark-to-market accounting, tax-exempt organizations, certain former citizens or residents of the United States, persons that hold our common shares as part of a "straddle", "hedge", "conversion transaction" or other integrated investment, U.S. Holders who own, directly or indirectly, 10% or more of Vista Gold's common shares, or U.S. Holders that have a functional currency other than the U.S. dollar, all of whom may be subject to tax rules that differ significantly from those summarized below.

If a partnership, or other entity taxed as a partnership for U.S. federal income tax purposes, holds our common shares, the U.S. federal income tax treatment of a partner in the partnership will depend on the status of the partner and the activities of the partnership. Partnerships that hold our common shares, and partners in such partnerships, are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of holding our common shares.

Prospective investors are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of the holding and disposition of our common shares in their particular circumstances.

Passive Foreign Investment Company Rules

For U.S. federal income tax purposes, we were classified as a PFIC under section 1297 of the Code for our taxable year ended December 31, 2005, and likely will be a PFIC in subsequent taxable years until we have significant operating income. A non-U.S. corporation generally is classified as a PFIC for U.S. federal income tax purposes in any taxable year if, either (a) at least 75% of its gross income is "passive" income (the "income test"), or (b) on average at least 50% of the gross value of its assets is attributable to assets that produce passive income or are held for the production of passive income (the "asset test"). For purposes of the income test and the asset test, if a non-U.S. corporation owns directly or indirectly at least 25% (by value) of the stock of another corporation, the non-U.S. corporation will be treated as if it held its proportionate share of the assets of the latter corporation and received directly its proportionate share of the income of that latter corporation. Passive income generally includes dividends, interest, royalties and rents (other than rents and royalties derived in the active conduct of a trade or business and not derived from a related person).

For any taxable year in which we are a PFIC, U.S. Holders will be subject to U.S. federal income tax in respect of our common shares in accordance with the special rules applicable to investments in PFICs. Under the PFIC rules, as discussed further below in this section "Passive Foreign Investment Company Rules", the U.S. federal income tax consequences of the ownership of our common shares will be governed by the so-called "non-qualified fund" regime, unless either (a) a U.S. Holder elects to treat Vista Gold as a "qualifying electing fund" ("QEF"), and we annually supply our U.S. Holders with the information necessary for compliance with the QEF election, or (b) our common shares constitute "marketable stock", within the meaning of section 1296 of the Code, and the U.S. Holder elects to mark our common shares to market as of the end of each taxable year. U.S. Holders of shares of stock of a PFIC are subject to special annual tax reporting requirements.

U.S. HOLDERS ARE STRONGLY ADVISED TO CONSULT THEIR OWN TAX ADVISORS ABOUT THE POSSIBLE CHARACTERIZATION OF VISTA GOLD AS A PFIC AS WELL AS THE ADVISABILITY OF MAKING A QEF ELECTION OR A MARK-TO-MARKET ELECTION.

Non-Qualifying Fund

In general, if a QEF election or a mark-to-market election is not made by a U.S. Holder, any gain on a sale or other disposition of our common shares by such a U.S. Holder would be treated as ordinary income and would be subject to special tax rules. Under these special tax rules, (a) the amount of any such gain would be allocated ratably over the U.S. Holder's holding period for our common shares, (b) the amount of ordinary income allocated to years prior to the year of sale or other disposition would be subject to tax at the highest statutory rate applicable to such U.S. Holder for each such year (determined without regard to other income, losses or deductions of the U.S. Holder for such years), and (c) the tax for such prior years would be subject to an interest charge, computed at the rate applicable to underpayments of tax. Under proposed U.S. Treasury regulations, a "disposition" may include, under certain circumstances, transfers at death, gifts, pledges of shares and other transactions with respect to which gain is not ordinarily recognized. In addition, the adjustment ordinarily made to the tax basis of stock owned by a decedent may not be available with respect to our common shares. Rules similar to those applicable to dispositions will generally apply to distributions in respect of our common shares that exceed 125% of the average amount of distributions in respect of such shares during the preceding three years, or, if shorter, during the preceding years in the U.S. Holder's holding period ("excess distributions").

QEF Election

If a U.S. Holder makes a valid and timely-filed QEF election in connection with a purchase of our common shares, and provided that we annually supply the information necessary to comply with such election, then the electing U.S. Holder will be required each taxable year to recognize, as ordinary income,

a pro rata share of our earnings, and to recognize, as capital gain, a pro rata share of our net capital gain, in each case without regard to whether distributions are received with respect to our common shares for such year. The QEF election, once made, applies to all subsequent taxable years of the U.S. Holder in which it holds our common shares until we cease to be a PFIC. If we are again a PFIC in any taxable year following a year in which we were not treated as a PFIC, the original QEF election continues to be effective. For any taxable year in which we are a PFIC and do not have any net income or net capital gain, a U.S. Holder would not have any income or gain as a result of the QEF election. We will provide the information necessary for complying with the QEF election. Amounts included in a U.S. Holder's taxable income under the QEF regime would increase such U.S. Holder's tax basis in our common shares, and subsequent distributions by us would not be taxable to the U.S. Holder, and instead would reduce the U.S. Holder's tax basis in our common shares to the extent that the U.S. Holder could demonstrate that the distributions were attributable to previously-taxed income. A U.S. Holder generally would recognize capital gain or loss upon a disposition of our common shares that were subject to a QEF election at all times during such U.S. Holder's holding period. Special rules would apply if a U.S. Holder makes a QEF election later than the first taxable year in which our common shares are owned (which could result in the U.S. Holder remaining subject to the non-qualifying fund regime described above).

Mark-to-Market Election

If a U.S. Holder makes a valid and timely-filed mark-to-market election, and provided that our common shares constitute "marketable stock" within the meaning of Section 1296 of the Code, then in any year in which we are a PFIC the U.S. Holder annually would be required to report any unrealized gain with respect to its common shares as an item of ordinary income, and would be permitted to deduct any unrealized loss, as an ordinary loss, to the extent of previous inclusions of ordinary income. Any gain subsequently realized by such electing U.S. Holder upon a disposition of our common shares also would be treated as ordinary income, rather than capital gain, but such U.S. Holder would not be subject to an interest charge on the resulting tax liability as under the non-qualifying fund regime. A U.S. Holder who makes a mark-to-market election would still be taxed on distributions from us when received, as described under "Dividends".

For purposes of the mark-to-market election, marketable stock generally includes stock that is regularly traded on certain established securities markets within the United States, or on any exchange or other market that the IRS determines has trading, listing, financial disclosure, and other rules adequate to carry out the purposes of the mark-to-market election. The American Stock Exchange and the Toronto Stock Exchange may qualify as such an exchange. Each U.S. Holder should consult its own advisor as to whether the mark-to-market election is available with respect to our common shares. Special rules would apply to a U.S. Holder that held our common shares prior to the first taxable year for which the mark-to-market election was effective, which could result in an interest charge for such first taxable year, as under the non-qualifying fund regime described above.

Once made, a mark-to-market election would be effective for all subsequent taxable years of such U.S. Holder unless revoked with the consent of the Secretary of the Treasury or unless our common shares cease to be marketable.

Dividends

For purposes of this section "Dividends", it is assumed that we are a PFIC. To the extent that distributions paid on our common shares are not treated as excess distributions received by a non-electing U.S. Holder, and to the extent the distribution exceeds the previously-taxed income of a U.S. Holder that makes a QEF election, such distributions (before reduction for Canadian withholding taxes) will be taxable as dividends to the extent of our current or accumulated earnings and profits, as determined for U.S. federal income tax purposes, and will be includable in a U.S. Holder's ordinary income when received. Dividends on our

common shares will not be eligible for the dividends-received deduction generally allowed to U.S. corporations.

The amount of any dividend paid in Canadian dollars will equal the U.S. dollar value of the Canadian dollars received calculated by reference to the exchange rate in effect on the date the dividend is received by a U.S. Holder regardless of whether the Canadian dollars are converted into U.S. dollars. If the Canadian dollars received as a dividend are not converted into U.S. dollars at the date of receipt, a U.S. Holder will have a basis in the Canadian dollars equal to the U.S. dollar value on the date of receipt. Any gain or loss realized on a subsequent conversion or other disposition of the Canadian dollars will be treated as ordinary income or loss, and generally will be income or loss from sources within the United States for U.S. foreign tax credit purposes.

A U.S. Holder may be entitled to deduct, or claim a U.S. foreign tax credit for, Canadian taxes that are withheld on dividends received by a U.S. Holder, subject to applicable limitations in the Code. Dividends will be income from sources outside the United States and for tax years beginning before January 1, 2007, generally will be "passive income" or "financial services income", and for tax years beginning after December 31, 2006, generally will be "passive category income" or "general category income" for purposes of computing the U.S. foreign tax credit allowable to a U.S. Holder. The rules governing the U.S. foreign tax credit are complex, and investors are urged to consult their tax advisors regarding the availability of the U.S. foreign tax credit under their particular circumstances.

To the extent that the amount of any distribution exceeds our current and accumulated earnings and profits for a taxable year, the distribution will first be treated as a tax-free return of capital to the extent of a U.S. Holder's basis, and any excess will be treated as capital gain. Such capital gain would not give rise to income from sources outside the United States, and accordingly a U.S. Holder may need other non-U.S. source income in order to claim a tax credit for Canadian withholding taxes imposed on such distribution.

Disposition of Securities

For purposes of this section "Disposition of Securities", it is assumed that we are a PFIC. A U.S. Holder will recognize taxable gain or loss on any sale or other disposition of our common shares in an amount equal to the difference between the amount received (in cash or other property, valued at fair market value) for our common shares and the U.S. Holder's tax basis in our common shares. For U.S. Holders that use the cash method of accounting, and for U.S. Holders that use the accrual method of accounting and so elect, the U.S. dollar value of the cash received in Canadian dollars on the sale or other disposition of our common shares will be the U.S. dollar value determined on the basis of the spot rate on the settlement date of the sale. Subject to U.S. Holders that make a QEF election as described above, a U.S. Holder's tax basis in our common shares generally equals the U.S. dollar value of the price paid in Canadian dollars determined on the basis of the spot rate on the settlement date of the purchase. Such gain or loss will be income or loss from sources within the United States for U.S. foreign tax credit limitation purposes. For U.S. Holders that make a QEF election, such gain or loss will be a capital gain or loss. Capital gains of non-corporate taxpayers, including individuals, derived with respect to capital assets held for more than one year are eligible for reduced rates of U.S. federal income tax. The deductibility of capital losses is subject to limitations.

Information Reporting and Backup Withholding

In general, information reporting will apply to dividends on our common shares and the proceeds of the sale or other disposition of our common shares unless a U.S. Holder is an exempt recipient, such as a corporation. Backup withholding will apply to those payments if a U.S. Holder fails to provide a taxpayer identification number and comply with certain certification procedures or otherwise fails to establish an exemption from backup withholding. If backup withholding applies, the relevant intermediary must

Edgar Filing: VISTA GOLD CORP - Form 10-K

withhold U.S. federal income tax on those payments at a current rate of 28%. Any amount withheld under the backup withholding rules will be allowed as a refund or credit against a U.S. Holder's U.S. federal income tax liability, provided the required information is furnished to the IRS in a timely manner.

Unregistered Sales of Equity Securities

Our unregistered sales of equity securities during the year ended December 31, 2006, have previously been reported in reports filed with the Commission.

ITEM 6. SELECTED FINANCIAL DATA.

The selected financial data in the table below have been selected in part, from our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in Canada. The selected financial data should be read in conjunction with those financial statements and the notes thereto.

	Years ended December 31				
	2006	2005	2004	2003	2002
(U.S. \$000's, except loss per share)					
Results of operations					
Gold revenues	\$	\$	\$	\$	\$
Net loss before write-downs	4,171	4,584	4,924	2,745	2,775
Net loss	4,171	4,584	4,924	2,745	2,775
Basic and diluted loss per share	0.16	0.24	0.31	0.22	0.41

Financial position

Working capital	\$ 49,750	\$ 2,642	\$ 6,570	\$ 6,077	\$ 3,507
Total assets	92,731	37,999	32,788	26,280	20,688

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis should be read in conjunction with our consolidated financial statements for the three years ended December 31, 2006, and the related notes thereto, which have been prepared in accordance with generally accepted accounting principles ("GAAP") in Canada. Reference to Note 17 to the consolidated financial statements should be made for a discussion of differences between Canadian and United States GAAP and their effect on the financial statements. All amounts stated herein are in U.S. dollars, unless otherwise noted.

Overview

We are engaged in the evaluation, acquisition, exploration and advancement of gold exploration and potential development projects with the aim of adding value to the projects. Our approach to acquisitions of gold projects has generally been to seek projects within political jurisdictions with well-established mining, land ownership and tax laws, which have adequate drilling and geological data to support the completion of a third-party review of the geological data and to complete an estimate of the mineralized material. In addition, we look for opportunities to improve the value of our gold projects through exploration drilling or introducing technological innovations. We expect that emphasis on gold project acquisition and improvement will continue in the future.

Our holdings include the Maverick Springs, Mountain View, Hasbrouck, Three Hills and Wildcat projects and the Hycroft mine, all in Nevada; the Long Valley project in east central California; the Yellow Pine project in Idaho; the Paredones Amarillos and the Guadalupe de los Reyes projects in Mexico; the Amayapampa project in Bolivia; the Mt. Todd gold mine in Australia; the Awak Mas project in Indonesia; and the 53 F.W. Lewis, Inc. properties located in Nevada and Colorado. We also own approximately 25% of the shares of Zamora Gold Corp., a company exploring for gold in Ecuador.

In September 2006, we entered into the Arrangement Agreement with Carl Pescio, Janet Pescio and our wholly-owned subsidiary, Allied Nevada, pursuant to which the parties agreed to undertake a transaction that would result in our transfer of our Nevada-based mining properties and related assets into Allied Nevada and the Pescios' transfer to Allied Nevada of their interests in certain Nevada-based mining properties and related assets, all to be carried out pursuant to an Arrangement. See "Item 1. Business Significant Developments in 2006 Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held by Pescios".

Outlook

Gold prices started 2006 at \$521 per ounce and finished the year at \$636 per ounce as quoted on the London Exchange. This rise of approximately 22% during the year reflected factors such as rising oil prices, global instability, real and threatened terrorism activities, the war in Iraq, and the rise and demand for investment and jewelry. Current prices are at a 25-year high and no assurance can be given that such prices will be sustained.

At the end of 2006, we owned or controlled thirteen properties containing mineralized material. We expect that emphasis on gold project acquisition will continue in the future. In addition, through exploration drilling and engineering studies, we believe that additional value can be added to most of the projects by advancing them closer to a production decision.

We do not currently generate operating cash flows. Subject to sustained gold prices, we expect to generate revenues and cash flows in the future. We may generate revenues and cash flows from our portfolio of gold projects by several means, including but not limited to options or leases to third parties, joint venture arrangements with other gold producers, outright sales for cash and/or royalties, or project development and operation.

With respect to our current property holdings, aggregate expenditures for purchase installments, to maintain options and conduct exploration activities are currently anticipated being approximately \$677,600 in 2007 and \$427,600 in 2008 (including \$177,600 for both 2007 and 2008, with respect to our Nevada properties that we currently hold but anticipate transferring to Allied Nevada assuming completion of the Arrangement transaction described above). At present, we would anticipate raising funds to meet these long-term obligations through equity private placements, or joint venture efforts or sale of properties currently controlled. In subsequent years, we anticipate that we will need to raise additional capital to meet property purchase installment obligations and scheduled payments on those properties that we decide to retain under option. Further, additional capital would be necessary to acquire properties and conduct exploration drilling and re-engineering studies on current and newly acquired properties. However, there can be no assurance that we will be successful in efforts to raise additional capital.

Results from Operations

Summary

Our 2006 consolidated net loss was \$4.2 million or \$0.16 per share compared to the 2005 consolidated net loss of \$4.6 million or \$0.24 per share for a net decrease of \$0.4 million. The decrease of \$0.4 million in 2006 is primarily due to increased interest income of \$1.0 million resulting from an increase in interest earned on our liquid bank account and the Hycroft restricted cash account, partially offset by increased corporate administration and investor relations costs of \$0.6 million.

As compared to a consolidated net loss of \$4.9 million or \$0.31 per share in 2004, the 2005 consolidated net loss decreased by \$0.3 million. The decrease in 2005 is primarily due to decreased stock-based compensation expense of \$0.6 million resulting from fewer stock option grants during 2005 as compared to 2004 and increased interest income of \$0.2 million due to increased investment in our liquid savings account, partially offset by increased exploration and property evaluation costs of \$0.1 million and increased general and administrative costs of \$0.2 million.

Gold production and revenue

The Hycroft mine is on care and maintenance. Mining activities were suspended at Hycroft in 1998 and, as expected, gold production has ceased. Effective at the beginning of fiscal 2002, gold production was considered incidental to the activities at the Hycroft mine and reporting the associated sales proceeds as revenue was no longer warranted. Accordingly, gold revenues in 2006, 2005 and 2004 therefore were nil. Recorded 2006, 2005 and 2004 production costs are therefore nil.

Exploration, property evaluation and holding costs

Exploration, property evaluation and holding costs increased to \$1,908,000 during the year ended December 31, 2006, compared with \$1,836,000 for the same period in 2005. The principal variances from the 2005 year are as follows:

An increase in holding costs at the Hycroft mine of \$53,969;

An increase in holding costs at the Amayapampa mine of \$79,030;

An increase in holding costs for the Awak Mas Project of \$197,121;

A decrease in general development costs of \$325,044; and

A decrease in holding costs at the Paredones Amarillos Project of \$27,324.

As well, we incurred holding costs of \$44,961 and \$50,484, with respect to the Mt. Todd gold mine and the F.W. Lewis, Inc. properties, neither of which had any costs associated with them during 2005.

Edgar Filing: VISTA GOLD CORP - Form 10-K

Exploration, property evaluation and holding costs increased to \$1,836,000 during the year ended December 31, 2005, compared with \$1,707,000 for the same period in 2004. The principal variances from 2004 are as follows:

An increase in holding costs at the Paredones Amarillos Project of \$99,150;

An increase in general development costs of \$166,913;

A decrease in holding costs at the Hycroft mine of \$143,802; and

A decrease in holding costs at the Amayapampa mine of \$25,411.

As well, we incurred holding costs of \$32,165 with respect to the Awak Mas Project which was not among our property holdings in 2004.

Corporate administration and investor relations

Corporate administration and investor relations costs increased to \$2,892,000 during the year ended December 31, 2006, compared to \$2,345,000 in 2005. The principal variances pertaining to the comparative twelve-month period in 2005 are as follows:

During 2006, we paid \$241,154 to an outside consultant, to assist with our compliance with internal control over financial reporting and related requirements under Section 404 of the Sarbanes-Oxley Act of 2002.

During 2006, we expensed loan fees of \$79,781 that were held as prepaid items as of December 31, 2005. These loan fees were associated with the non-binding term sheet for a Bridge Credit Facility that we had entered into in December 2005.

During 2006, audit and tax fees increased \$85,166 as compared to 2005. The increase is mostly due to additional audit fees related to requirements under Section 404 of the Sarbanes-Oxley Act of 2002.

During 2006, compliance fees increased \$66,446 as compared to 2005. The increase is mostly due to increased regulatory filing fees due to increased regulatory filings throughout the year.

The remaining variance can be attributed to higher labor costs in 2006 as compared with 2005, which is partially offset by decreased investor relations costs in 2006 due to a mass mailing that was completed during 2005.

Corporate administration and investor relations costs increased to \$2,345,000 during the year ended December 31, 2005, compared to \$2,116,000 in 2004, representing an increase of \$229,000. This increase is primarily the result of a more comprehensive investor relations program that included a mass mailing campaign during 2005.

Depreciation and amortization

Depreciation and amortization was approximately \$241,000 in 2006, \$221,000 in 2005 and \$207,000 in 2004. In each case, there was no significant change in the depreciation and amortization costs from the previous year.

Stock-based compensation

Stock-based compensation increased to \$791,000 for the year ended December 31, 2006, compared to \$415,000 for the 2005. The increase of \$376,000 is mostly due to the following:

Edgar Filing: VISTA GOLD CORP - Form 10-K

During 2006, 230,000 stock options were issued to employees and directors of Vista Gold Corp. which resulted in an increase to stock compensation expense of \$534,229 for the immediately vested

Edgar Filing: VISTA GOLD CORP - Form 10-K

portion. During 2005, 85,000 stock options were issued to employees of Vista Gold Corp. which resulted in an increase to stock compensation expense of \$116,967 for the immediately vested portion.

During 2006, compensation expense associated with stock options issued in prior periods was \$261,673 as compared to \$302,280 for 2005.

Stock-based compensation decreased to \$415,000 for the year ended December 31, 2005, compared to \$1,019,000 for 2004. The decrease of \$604,000 is mostly due to granting of 85,000 stock options with a recorded fair-value expense of \$116,967 during 2005 as compared to the granting of 423,000 stock options with a recorded fair-value expense of \$805,904.

On January 1, 2004, we retroactively adopted, without restatement of prior years, the fair value method of accounting for stock-based compensation, CICA 3870. This standard requires that we record compensation expense on the granting of all stock-based compensation awards, including stock option grants to employees, calculated using the fair-value method. The adoption of the fair value method resulted in a cumulative increase of \$971,000 to the opening deficit at January 1, 2004 and increases of \$139,000 and \$832,000 to common share capital and stock options, respectively, at January 1, 2004. Previously we recorded only those expenses associated with stock options granted to non-employees based upon the fair value on the earlier date of completion of performance or vesting of the options granted. We did not record any compensation cost on grants of stock options to employees and directors prior to January 1, 2004.

Other Income and Expenses

Loss/Gain on disposal of marketable securities

In 2006, we realized a gain on disposal of marketable securities of \$190,000, compared to a gain of \$40,000 in 2005. In 2005, we realized a gain on disposal of marketable securities of \$40,000, compared to a loss of \$5,000 in 2004.

At December 31, 2006, we held marketable securities available for sale with a book value of \$790,885. We purchased the securities for investing purposes with the intent to hold the securities until such time that it would be advantageous to sell the securities at a gain. Although there can be no reasonable assurance that a gain will be realized from the sale of the securities, we monitor the market status of the securities consistently in order to mitigate the risk of loss on the investment.

Gain on disposal of assets

There were no gains from the disposal of assets recorded during 2006. Net gains of \$7,000 on disposal of assets were recorded in 2005 as compared to net gains of \$8,000 in 2004, in both cases resulting from the sale of equipment at the Hycroft mine.

Interest income and expense

During 2006, 2005, and 2004, we did not incur any interest expense as we had no commercial debt during these years.

During the respective years ended December 31, 2006, 2005 and 2004, we realized \$1,212,298, \$252,819 and \$80,247 in interest income. The increases are the result of an increase in interest earned on our liquid savings account and the Hycroft restricted cash account, as follows:

During the year ended December 31, 2006, interest earned on our liquid savings account was \$986,166 and interest earned on the Hycroft restricted cash account was \$223,251.

Edgar Filing: VISTA GOLD CORP - Form 10-K

During the year ended December 31, 2005, interest earned on our liquid savings account was \$118,597 and interest earned on the Hycroft restricted cash account was \$136,610.

During the year ended December 31, 2004, interest earned on our liquid savings account was \$47,312 and interest earned on the Hycroft restricted cash account was \$33,354.

For both 2006 and 2005, the increased interest earned on our liquid savings account can be attributed to higher cash balances that became available to be invested during the respective periods due to private placement financings and stock option and warrant exercises. For 2006, the increase in interest earned on the Hycroft restricted cash account is attributable to higher interest rates attained during 2006. For 2005, the increase is due to a higher cash balance throughout the year subject to interest as compared to 2004 when we were making payments to the account and less money was available to earn interest.

Financial Position, Liquidity and Capital Resources

Cash used in Operations

Net cash used in operating activities was level with \$3.4 million in 2006, 2005 and 2004. In each case, there was no significant change in the cash used in operations from the previous year.

Investing Activities

Net cash used in investing activities in 2006 was \$4.2 million compared to \$8.4 million in 2005 and \$6.1 million in 2004. The decrease of \$4.2 million in 2006 can be attributed to a decrease of \$5.6 million for the acquisitions of subsidiaries net of cash, reflecting the cash expended as partial consideration for the acquisition of the Mt. Todd gold mine for \$1.3 million in 2006 as compared to the acquisition of the Awak Mas project for \$1.6 million, and \$5.3 million cash expended as partial consideration for the acquisition of F. W. Lewis, Inc. properties in 2005. This decrease is offset by an increase in property expenditures during 2006 of \$1.1 million.

The increase of \$2.3 million in 2005 can be attributed primarily to an increase of \$6.9 million for the acquisitions of subsidiaries net of cash, reflecting the acquisition of the Awak Mas project for \$1.6 million, and \$5.3 million cash expended as partial consideration for the acquisition of F.W. Lewis, Inc. properties in 2005, which was offset by a decrease of \$3.1 million due to expenditures for the restricted cash account that was established in 2004 and a decrease of \$1.5 million due to a premium payment in 2004 for the Hycroft reclamation bond.

Financing Activities

We received net cash from financing activities of \$54.3 million in 2006 compared to net cash provided from financing activities of \$7.9 million in 2005 and \$9.8 million in 2004.

The increase of \$1.8 million for prepaid acquisition costs in 2006 as compared to 2005 and 2004 is due to costs incurred in connection with the proposed Arrangement (see "Other Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held By Pescios"). Once the Arrangement is completed, these costs will offset any gain that we realize.

In February 2006, we completed a \$3.3 million private placement consisting of 649,684 equity units, each priced at \$5.05. Each equity unit consisted of one common share and one warrant (see Consolidated Financial Statements Note 8). These gross proceeds were offset by costs to register the shares of \$66,112 and legal expenses of \$30,719 for net proceeds of \$3.2 million.

In November 2006, we completed a \$31.2 million public offering of 3,668,100 common shares priced at \$8.50 per share. These gross proceeds were offset by an agents' commission of \$1,558,943 (representing 5% of gross proceeds), agents' fees of \$148,000, other offering expenses of \$89,178 for net cash proceeds of

\$29.4 million. We also issued compensation warrants to two agents. The value of the warrants issued, using the Black-Scholes method, is \$531,000. Net proceeds after non-cash costs were \$28.9 million.

In September 2005, we completed a \$7.8 million private placement financing consisting of 2,168,812 equity units, each priced at \$3.60. Each equity unit consisted of one common share and one warrant (See Consolidated Financial Statements Note 8(j)). These gross proceeds were offset by a 6% cash finder's fee totaling \$468,463 paid in connection with the private placement. We also issued as a finder's fee 216,881 warrants, that number being 10% of the number of units issued in the private placement. The value of the warrants issued as a finder's fee, using the Black-Scholes method, is \$401,000. We also paid direct costs connected with this private placement of \$175,457, for net proceeds of \$7.2 million.

In September 2004, we completed a \$6.5 million private placement financing consisting of 1,966,456 equity units, each priced at \$3.30. Each equity unit consisted of one common share and one warrant (See Consolidated Financial Statements Note 8(f)). These gross proceeds were offset by a 5% cash finder's commission totaling \$324,465 paid in connection with the private placement and direct costs connected with this private placement of \$131,535, for net proceeds of \$6.1 million.

Warrants exercised during 2006 produced cash proceeds of \$22,745,000 as compared to \$750,000 in 2005 and \$3,080,000 in 2004. During 2006, \$7,231,000 in cash proceeds was from exercises of the September 2005 private placement warrants. There were no exercises of the September 2005 warrants during 2005 or 2004. Also, during 2006, \$9,281,000 in cash proceeds was from exercises of the September 2004 private placement warrants. There were no exercises of these warrants during 2005 or 2004. During 2006, the remaining February 2003 private placement warrants were exercised for cash proceeds of \$3,982,000 as compared to \$286,000 in 2005 and \$601,000 in 2004. Also during 2006, \$2,251,000 in cash proceeds was from exercises of the February 2002 private placement warrants as compared to \$464,000 in 2005 and \$628,000 in 2004. During 2004, the remaining December 2002 private placement warrants were exercised for cash proceeds of \$287,000 and in 2003 warrant exercises from this private placement produced cash of \$2.8 million. Also in 2004, exercises of warrants issued by the Corporation as partial consideration for the acquisition of Minera Paredones Amarillos resulted in cash proceeds of \$1.6 million. (See Consolidated Financial Statements Notes 8 and 9).

The exercise of stock options produced cash of \$808,000 during 2006 as compared to \$25,000 during 2005 and \$734,000 in 2004. (See Consolidated Financial Statements Note 8).

Liquidity and Capital Resources

At December 31, 2006, our total assets were \$92.7 million as compared to \$38.0 million and \$32.8 million for 2005 and 2004, respectively. Long-term liabilities as of December 31, 2006, totaled \$4.7 million as compared to \$4.1 million in 2005 and \$4.2 million in 2004. At the same date in 2006, we had working capital of \$49.8 million compared to \$2.6 million in 2005 and a \$6.6 million in 2004.

Our working capital of \$49.8 million as of December 31, 2006, increased from 2005 by \$47.2 million as compared to a decrease from 2004 to 2005 of \$4.0 million. The principal component of working capital for both 2006 and 2005 is cash and cash equivalents of \$48.7 million and \$2.0 million, respectively. Other components include marketable securities (2006 \$791,000; 2005 \$468,000), notes and accounts receivable (2006 \$748,000; 2006 \$68,000) and other liquid assets (2006 \$406,000; 2005 \$531,000). The increase of \$47.2 million in working capital from 2006 to 2005 relates to cash proceeds received from the February 2006 private placement, cash proceeds received from the November 2006 public offering of Common Shares and cash proceeds from the exercises of warrants and stock options. At December 31, 2006, we held no debt with banks or financial institutions. Remaining amounts for liabilities at year-end 2006 are related to trade and corporate administration.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements required to be disclosed in this Annual Report on Form 10-K.

Contractual Obligations

With respect to contractual obligations, we have commitments relating to our leasehold obligations totaling \$76,758 over three years (2006 \$56,198; 2007 \$59,064; 2008 \$47,220).

Major cash commitments and discretionary expenses in 2006 are related to exploration, property evaluation, holding costs, corporate administration and investor relations costs of approximately \$4.8 million, capitalized property options and expenditure commitments and acquisitions of properties of approximately \$3.9 million, for an aggregate cash usage of approximately \$8.7 million.

As of December 31, 2006, warrants outstanding to purchase Common Shares of Vista Gold totaled 1,552,434 with a weighted average exercise price of \$4.82 and potential gross proceeds of \$7.5 million.

Summary of Quarterly Results and 4th Quarter Review

(U.S. dollars in thousands, except per share data)

2006	4th Quarter	3rd Quarter	2nd Quarter	1st Quarter

Basic and diluted price per share	(0.02)	(0.05)	(0.04)	(0.05)
2005	4th Quarter	3rd Quarter	2nd Quarter	1st Quarter
Revenue	\$	\$	\$	\$
Net loss	\$ (1,206)	\$ (970)	\$ (1,450)	\$ (958)
Basic and diluted price per share	(0.06)	(0.05)	(0.08)	(0.05)

Transactions with Related Parties*Maverick Springs*

On June 9, 2003, we entered into an agreement granting Silver Standard Resources Inc. ("SSRI") an option to acquire our interest in the silver mineralized material hosted in the Maverick Springs project. We will retain our 100% interest in the gold mineralized material. The agreement with SSRI is subject to the terms of the purchase agreement between Newmont Mining Corporation and us. Under the agreement, SSRI was to pay \$1.5 million over four years, of which \$949,823 was paid to us in 2003, \$428,481 in 2004 and \$144,285 in 2005, completing the \$1.5 million obligation. Since SSRI has satisfied the \$1.5 million obligation, all costs incurred for Maverick Springs are now being shared by the two corporations as stated below. SSRI and Vista Gold have formed a committee to jointly manage exploration of the Maverick Springs project. We are the operator and have a 45% vote on the committee, and SSRI has a 55% vote. Since SSRI has completed its \$1.5 million in payments, future costs will be shared by the two corporations on the same ratio as established for operation of the management committee: Vista Gold 45% / SSRI 55%, subject to standard dilution provisions. (See also Consolidated Financial Statements Notes 5 and 18).

Amayapampa

In December 2006, we announced that, subject to a number of conditions, we had agreed to loan up to \$200,000 by way of a 90-day term loan, bearing interest at a rate of 12% per annum, to Luzon for Luzon to pay down debts already incurred and ongoing expenses in connection with the Amayapampa Project and Luzon's Lipichi project both located in Bolivia. The loan is to be secured by a general security agreement in favor of Vista. In addition, Vista recently entered into a letter of understanding with Luzon and

Republic Gold Limited (Luzon's strategic partner) to reconstitute the affairs of Luzon to ensure that Luzon's strategic development is advanced in the best interest of its shareholders.

Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held by Pescios

As previously reported, on September 22, 2006, we entered into an Arrangement and Merger Agreement (the "Arrangement Agreement") with Carl Pescio, Janet Pescio and Allied Nevada pursuant to which the parties agreed to undertake a transaction that would result in the transfer of our Nevada-based mining properties and related assets into Allied Nevada and the Pescios' transfer to Allied Nevada of their interests in certain Nevada-based mining properties and related assets, all to be carried out pursuant to an arrangement under the provisions of the *Business Corporations Act* (Yukon Territory) (the "Arrangement").

Pursuant to the Arrangement Agreement, among other things:

We will reorganize our business to split certain Nevada mining properties and related assets (the "Vista Nevada Assets") from our other properties and related assets;

We will ensure that all of the Vista Nevada Assets are held by our wholly-owned subsidiary, Vista Gold Holdings Inc. ("Vista U.S.") or subsidiaries wholly-owned by Vista U.S. and subsequently transfer all issued and outstanding shares of Vista U.S. and \$25 million in cash to Allied Nevada in return for the number of common shares of Allied Nevada equal to 27,500,000 less the number of Option Shares (as defined in the Arrangement Agreement); and

The Pescios will transfer their interests in certain Nevada mining properties and related assets (the "Pescio Nevada Assets") to Allied Nevada Gold Holdings LLC, a limited liability company incorporated under the laws of Nevada with Allied Nevada as its sole member, in return for 12,000,000 common shares of Allied Nevada and \$15 million in cash from Allied Nevada.

In connection with these transfers, our shareholders will exchange each of their Vista Gold common shares and will receive, subject to applicable withholding taxes, (a) one share of a newly created class of Vista Gold common shares, and (b) a *pro rata* portion of (i) the number of common shares of Allied Nevada ("Allied Nevada Shares") received by Vista Gold as part of the Arrangement less (ii) the number of Allied Nevada Shares retained by Vista Gold to facilitate the payment of any taxes payable in respect of the Arrangement. In addition, holders of options to acquire Vista Gold common shares will exchange their Vista Gold options for options to acquire Allied Nevada Shares and options to acquire newly created Vista Gold common shares and holders of warrants of Vista Gold will have their warrants adjusted in accordance with the terms of the warrants.

Completion of the transaction is subject to a number of conditions, including receipt of all required securityholder, court, regulatory and third party approvals and certain other customary conditions. As discussed below, Vista Gold has received the required securityholder and court approvals. These conditions also include the requirement for us to complete a public equity financing that raises proceeds of not less than \$25 million. This requirement has been met. On November 7, 2006 we completed a public equity issuance that resulted in net cash proceeds to us of approximately \$29.4 million after payment of agents' fees and offering expenses. See "Financial Position, Liquidity and Capital Resources Liquidity and Capital Resources" above, and Consolidated Financial Statements 8(m). Of the net proceeds from this offering, we plan to invest the first \$25 million in Allied Nevada Shares as described. Allied Nevada will use \$15 million of this investment as partial consideration for the purchase of the Pescio Nevada Assets. The remaining \$10 million, less costs and expenses or any amounts required to pay amounts owing to us (see discussion below) will be used by Allied Nevada to fund exploration and development projects and ongoing commitments.

In November 2006, we received the securityholder and court approvals required as conditions for completion of the transaction. Our securityholders approved the transaction by the required majorities at a special securityholders' meeting held on November 16, 2006. On November 29, 2006, the Supreme Court of the Yukon Territory granted its Final Order approving the Plan of Arrangement. It is expected that the transaction will close following the receipt of the remaining required approvals, as well as completion of the registration of Allied Nevada's common shares under the Securities Exchange Act of 1934.

Prior to the completion of the transaction, the immediate cash needs of Allied Nevada are being met by loans from Vista Gold pursuant to the Arrangement Agreement, which provides that, prior to the date of completion, we may loan money to Vista U.S. in amounts sufficient to undertake certain activities for the benefit of the business Allied Nevada will operate after the completion of the transaction, including purchase of mineral properties or property interests, payment of amounts necessary to secure the services of a Chief Executive Officer, and purchase of office equipment, software and other miscellaneous items to enable Allied Nevada to commence operations immediately after the completion of the transaction. These loans will bear interest at the rate of 6% per annum and all principal and interest owing by Vista U.S. to us in respect of such loans will be paid in full at the time of completion on behalf of Vista U.S. As of December 31, 2006 this loan amount was \$357,201 which included interest of \$3,308.

Subsequent Event

Amayapampa

On March 13, 2007, we entered into an agreement with Luzon Minerals Ltd. pursuant to which Vista granted to Luzon (a) for a period ending September 14, 2008 (subject to Luzon's right to extend such date in certain circumstances), an exclusive option to purchase from Vista 90% of its interest in the Amayapampa project, and (b) subject to the exercise of such option to purchase, a right of first offer over Vista's remaining 10% interest in the Amayapampa project, on and subject to the terms of the agreement. This agreement replaces all prior agreements between Vista and Luzon with respect to the Amayapampa project. Luzon's ability to exercise the option to purchase is subject to Luzon satisfying a number of conditions set out in the agreement. Subject to Luzon's right to extend the term of the agreement in certain circumstances, this agreement will terminate on September 14, 2008 unless the option to purchase has been exercised by Luzon prior to such date.

Significant Accounting Policies and Changes in Accounting Policies

Use of estimates

The preparation of consolidated financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the consolidated financial statements and the reported amount of revenues and expenses during the reporting period. Significant areas requiring the use of estimates include mine closure and reclamation obligations, useful lives for asset depreciation purposes, impairment of mineral properties and stock-based compensation. Actual results could differ from these estimates.

Mineral properties

Mineral property acquisition costs and exploration costs are recorded at cost and are deferred until the viability of the property is determined. General overhead, administrative and holding costs to maintain a property on a care and maintenance basis are expensed in the period they are incurred. If a project would be put into production, capitalized costs would be depleted on the unit of production basis.

Option payments and reimbursements received are treated as a recovery of mineral property costs. Option payments are at the discretion of the optionee and accordingly are accounted for on a cash basis or when receipt is reasonably assured.

Our management regularly reviews the net carrying value of each mineral property. Where information and conditions suggest impairment, estimated future cash flows are calculated using estimated future prices, proven and probable reserves, weighted probable outcomes and operating capital and reclamation costs on an undiscounted basis. If it is determined that the future cash flows are less than the carrying value, a write-down to the estimated fair value is made with a charge to loss for the period. Where estimates of future net cash flows are not available and where other conditions suggest impairment, management assesses if carrying values can be recovered.

Asset retirement obligation and closure costs

The fair value of a liability for our legal obligations associated with the retirement of long-lived assets is recognized in the period in which it is incurred. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived asset unless the asset has been previously written-off, in which case the amount is expensed. The fair value of the legal obligation for asset retirement is assessed at the end of each reporting period.

Where we have an insurance policy in place to cover changes in the legal obligations associated with the retirement of long-lived assets which have previously been expensed, increases to the fair value of such obligations are recognized at the end of the period with a corresponding amount recorded as an amount recoverable from the insurance company.

Stock-based compensation and other stock-based payments

On January 1, 2004, the Corporation retroactively adopted, without restatement of prior years, the fair value method of accounting for stock-based compensation, CICA 3870. This standard requires that the Corporation record compensation expense on the granting of all stock-based compensation awards, including stock options grants to employees, calculated using the fair-value method. The adoption of the fair-value method resulted in a cumulative increase of \$971,000 to the opening deficit at January 1, 2004, and increases of \$139,000 and \$832,000 to common share capital and stock options, respectively, at January 1, 2004. Previously, the Corporation recorded only those expenses associated with stock options granted to non-employees and directors prior to January 1, 2004. When an employee or non-employee exercises stock options, then the fair-value of the options on the date of the grant is transferred to common stock. When options are forfeited then the vested fair-value balance of the stock options is transferred to contributed surplus, while any unvested portions are reversed out accordingly. When options expire, the related fair-value is transferred to contributed surplus.

Deferred Stripping Costs

In October 2005, the CICA Emerging Issues Committee (EIC) issued for comment a draft abstract, EIC D56 "Accounting for Deferred Stripping Costs in the Mining Industry". If adopted, this EIC would require stripping costs to be accounted for as variable production costs to be included in inventory unless the stripping activity can be shown to be a betterment of the mineral property, in which case the stripping costs would be capitalized. A betterment occurs when stripping activity increases future output of the mine by providing access to additional sources of reserves. Capitalized stripping costs would be amortized on a units-of-production basis over the proven and probable reserves to which they relate.

As of December 31, 2005 we did not have any deferred stripping costs. Should EIC D56 be adopted, we will continue to defer stripping costs of major mine expansions which allow us to mine reserves not previously included in the reserve base. In 2006, we do not expect to defer any costs associated with mine expansion.

Non-Monetary Transactions

CICA Handbook Section 3831 "Non-Monetary Transactions" will be applicable to us commencing with the 2006 financial year. Reporting of the Corporation's results is not expected to be materially effected by this standard.

Derivative Instruments

In January 2005, the Canadian Institute of Chartered Accountants ("CICA") issued three new standards relating to financial instruments. These standards are applicable for fiscal years beginning on or after October 1, 2006. The Corporation is currently reviewing the impact of these new standards. These standards are as follows:

1. *Financial Instruments Recognition and Measurement, Section 3855*
This standard prescribes when a financial asset, financial liability, or non-financial derivative is to be recognized on the balance sheet and whether fair value or cost-based measures are used. It also specifies how financial instrument gains and losses are to be presented.
2. *Hedges, Section 3865*
This standard is applicable when a company chooses to designate a hedging relationship for accounting purposes. It builds on the existing Accounting Guideline AcG-13 "Hedging Relationships," and Section 1650 "Foreign Currency Translation," by specifying how hedge accounting is applied and what disclosures are necessary when it is applied.
3. *Comprehensive Income, Section 1530*
This standard introduces new rules for the reporting and display of comprehensive income. Comprehensive income, which is currently reported under U.S. GAAP, is the change in shareholders' equity (net assets) of an enterprise during a reporting period from transactions and other events and circumstances from non-owner sources. It includes changes in equity during a period except those resulting from investments by owners and distributions to owners. These items include minimum pension liability adjustments, holding gains and losses on certain investments, gains and losses on certain derivative instruments and foreign currency gains and losses related to self-sustaining foreign operations (cumulative translation adjustment).

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are engaged in the acquisition of gold projects and related activities including exploration engineering, permitting and the preparation of feasibility studies. The value of our properties is related to gold price and changes in the price of gold could affect our ability to generate revenue from our portfolio of gold projects.

Gold prices may fluctuate widely from time to time and are affected by numerous factors, including the following: expectations with respect to the rate of inflation, exchange rates, interest rates, global and regional political and economic circumstances and governmental policies, including those with respect to gold holdings by central banks. The demand for, and supply of, gold affect gold prices, but not necessarily in the same manner as demand and supply affect the prices of other commodities. The supply of gold consists of a combination of new mine production and existing stocks of bullion and fabricated gold held by governments, public and private financial institutions, industrial organizations and private individuals. The demand for gold primarily consists of jewelry and investments. Additionally, hedging activities by producers, consumers, financial institutions and individuals can affect gold supply and demand. While gold can be readily sold on numerous markets throughout the world, its market value cannot be predicted for any particular time.

Because we have several exploration operations in North America and South America, Australia and in Asia, we are subject to foreign currency fluctuations. We do not engage in currency hedging to offset any

risk of currency fluctuations as insignificant monetary amounts are held for immaterial land holding costs related to the properties owned.

We have no debt outstanding, nor do we have any investment in debt instruments other than highly liquid short-term investments. Accordingly, we consider our interest rate risk exposure to be insignificant at this time.

ITEM 8. CONSOLIDATED FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

Management's Responsibility for Financial Information

To the Shareholders of Vista Gold Corp.

The consolidated financial statements are the responsibility of the Board of Directors and management. The accompanying consolidated financial statements of the Corporation have been prepared by management based on information available through March 16, 2007; these consolidated financial statements are in accordance with Canadian generally accepted accounting principles, and have been reconciled to United States generally accepted accounting principles as presented in Note 17.

A system of internal accounting and administrative controls is maintained by management in order to provide reasonable assurance that financial information is accurate and reliable, and that the Corporation's assets are safeguarded. Limitations exist in all cost-effective systems of internal controls. The Corporation's systems have been designed to provide reasonable but not absolute assurance that financial records are adequate to allow for the completion of reliable financial information and the safeguarding of its assets. The Corporation believes that the systems are adequate to achieve the stated objectives.

The Audit Committee of the Board of Directors is comprised of three outside directors, meets regularly with management to ensure that management is maintaining adequate internal controls and systems and meets regularly with the independent auditors prior to recommending to the Board of Directors approval of the annual and quarterly consolidated financial statements of the Corporation.

The consolidated financial statements have been audited by PricewaterhouseCoopers LLP, Chartered Accountants, who were appointed by the shareholders. The auditors' report outlines the scope of their examination and their opinion on the consolidated financial statements.

**Independent Auditors' Report
To the Shareholders of Vista Gold Corp.**

We have completed an integrated audit of the consolidated financial statements and internal control over financial reporting of Vista Gold Corp. as of December 31, 2006 and audits of the Company's December 31, 2005 and December 31, 2004 consolidated financial statements. Our opinions, based on our audits, are presented below.

Consolidated financial statements

We have audited the accompanying consolidated balance sheets of Vista Gold Corp. as at December 31, 2006 and December 31, 2005, and the related consolidated statements of loss and deficit and cash flows for each of the three years in the period ended December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits of the Company's financial statements as at December 31, 2006 and 2005 and for the three years in the period ended December 31, 2006 in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. A financial statement audit also includes assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as at December 31, 2006 and December 31, 2005 and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2006 in accordance with Canadian generally accepted accounting principles.

Internal control over financial reporting

We have also audited management's assessment, included in Management's Report on Internal Control over Financial Reporting, that the Company maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit.

Edgar Filing: VISTA GOLD CORP - Form 10-K

We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of the unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as at December 31, 2006 is fairly stated, in all material respects, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006 based on criteria established in *Internal Control - Integrated Framework* issued by the COSO.

Supplemental disclosure with respect to Cash Flow Note 13

The accompanying notes are an integral part of these consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The tabular information set out below is in thousands of United States dollars, except as otherwise stated.

1. Nature of operations

The Corporation evaluates, acquires and explores gold exploration and potential development projects. As such, the Corporation is considered an Exploration Stage Enterprise. The Corporation's approach to acquisitions of gold projects has generally been to seek projects within political jurisdictions with well established mining, land ownership and tax laws, which have adequate drilling and geological data to support the completion of a third-party review of the geological data and to complete an estimate of the gold mineralization. In addition, the Corporation looks for opportunities to improve the value of its gold projects through exploration drilling, and/or reengineering the operating assumptions underlying previous engineering work.

Gold production has gradually declined since mining activities were suspended at the Hycroft mine in 1998. Effective January 1, 2002, gold production is considered incidental and the Corporation no longer reports the associated sales proceeds as revenue. Based on that, management of the Corporation decided during 2003 that the Corporation was an exploration-stage enterprise. For financial reporting purposes, commencing with the Corporation's financial statements for the year ended December 31, 2003, the Corporation was characterized as an exploration-stage enterprise and its consolidated statements of loss, deficit and cash flows include columns showing cumulative amounts during the exploration stage (i.e., from January 1, 2002, the effective date when gold production was considered incidental).

Although the Corporation has reviewed and is satisfied with the title for all mineral properties in which it has a material interest, there is no guarantee that title to such concessions will not be challenged or impugned.

2. Significant accounting policies

- (a) *Generally accepted accounting principles*

The consolidated financial statements of the Corporation and its subsidiaries have been prepared in accordance with accounting principles generally accepted in Canada. For the purposes of these financial statements, these principles conform, in all material respects, with generally accepted accounting principles in the United States, except as described in Note 17.

Edgar Filing: VISTA GOLD CORP - Form 10-K

(b)

Principles of consolidation

The consolidated financial statements include the accounts of the Corporation and its subsidiaries. All material intercompany transactions and balances have been eliminated. The Corporation's subsidiaries and percentage ownership in these entities as of December 31, 2006 are:

	Ownership
Vista Gold Holdings, Inc. and its wholly-owned subsidiaries	100%
Hycroft Resources & Development, Inc. and its wholly-owned subsidiary Hycroft Lewis Mine, Inc.	
Vista Gold U.S., Inc.	
Vista California, LLC	
Vista Nevada Corp.	
Idaho Gold Resources LLC	
Victory Gold Inc. and its wholly-owned subsidiary Victory Gold Exploration Inc.	
Allied Nevada Gold Corp. and its wholly-owned subsidiary	100%
Allied Nevada Gold Holdings LLC	
Granges Inc. (previously called Granges (Canada) Inc.)	100%
Minera Paredones Amarillos S.A. de C.V.	100%
Vista Gold (Antigua) Corp. and its wholly-owned subsidiary	100%
Compania Inversora Vista S.A. and its wholly-owned subsidiaries	
Minera Nueva Vista S.A.	
Compania Exploradora Vistex S.A.	
Vista Gold (Barbados) Corp. and its wholly-owned subsidiary	100%
Salu Siwa Pty. Ltd and its wholly-owned subsidiary	
PT Masmindo Dwi	
Vista Minerals (Barbados) Corp. and its wholly-owned subsidiary	100%
Vista Australia Pty Ltd.	

(c)

Use of estimates

The preparation of consolidated financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the consolidated financial statements and the reported amount of revenues and expenses during the reporting period. Significant areas requiring the use of estimates include mine closure and reclamation obligations, useful lives for asset depreciation purposes, impairment of mineral properties and the calculation of stock-based compensation. Actual results could differ from these estimates.

(d)

Foreign currency translation

The Corporation's executive office is located in Littleton, Colorado and the U.S. dollar is the functional currency of the Corporation's business. Accordingly, all amounts in these consolidated financial statements of the Corporation are expressed in U.S. dollars, unless otherwise stated.

The accounts of integrated foreign operations are translated using the temporal method. Under this method, monetary assets and liabilities are translated at the year-end rate of exchange, non-monetary assets and liabilities are translated at the rates prevailing at the respective transaction dates, and revenue and expenses, except for depreciation, are translated at the average rate of exchange during the year. Translation gains and losses are reflected in the loss for the year.

(e)

Revenue recognition

Gold production has gradually declined since mining activities were suspended at the Hycroft mine in 1998. Effective at the beginning of fiscal 2002, gold production is considered incidental to the activities at the Hycroft mine, and reporting the associated sales proceeds as revenue is no longer warranted. Accordingly, proceeds from gold sales are netted against costs.

(f)

Cash and cash equivalents

Cash and cash equivalents are considered to include cash on hand, demand balances held with banks, and certificates of deposit all with maturities of three months or less when purchased.

(g)

Inventories

Materials and supplies inventories are carried at the lower of average cost and net realizable value.

(h)

Marketable securities

Marketable securities are carried at the lower of cost or quoted market value.

(i)

Mineral properties

Mineral property acquisition costs and exploration and development expenditures are recorded at cost and are deferred until the viability of the property is determined. No properties have reached the development stage at this time. General overhead, administrative and holding costs to maintain a property on a care and maintenance basis are expensed in the period they are incurred. If a project is put into production, capitalized costs are depleted on the unit of production basis.

Option payments and reimbursements received are treated as a recovery of mineral property costs. Option payments are at the discretion of the optionee and accordingly are accounted for on a cash basis or when receipt is reasonably assured.

Management of the Corporation regularly reviews the net carrying value of each mineral property. Where information and conditions suggest impairment, estimated future net cash flows from each property are calculated using estimated future prices, proven and probable reserves and value beyond proven and probable reserves, and operating, capital and reclamation costs on an undiscounted basis. If it is determined that the future cash flows are less than the carrying value, a write-down to the estimated fair value is made with a charge to loss for the period. Where estimates of future net cash flows are not available and where other conditions suggest impairment, management assesses if the carrying value can be recovered.

Management's estimates of gold prices, recoverable proven and probable reserves, probable outcomes, operating capital and reclamation costs are subject to risks and uncertainties that may affect the recoverability of mineral property costs. Although management has made its best estimate of these factors based on current conditions, it is possible that changes could occur in the near term that could adversely affect management's estimate of net cash flows expected to be generated and the need for possible asset impairment write-downs.

Although the Corporation has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Corporation's title. Such properties may be subject to prior undetected agreements or transfers and title may be affected by such defects.

(j) *Plant and equipment*

Plant and equipment are recorded at cost. Depreciation is computed using the straight-line method over the estimated useful lives, ranging primarily from three to ten years. Significant expenditures, which increase the life of an asset, are capitalized and depreciated over the remaining estimated useful life of the asset. Upon sale or retirement of assets, the costs and related accumulated depreciation or amortization are eliminated from the respective accounts and any resulting gains or losses are reflected in operations.

(k) *Asset retirement obligation and closure costs*

The fair value of a liability for the Corporation's legal obligations associated with the retirement of long-lived assets is recognized in the period in which it is incurred. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived asset unless the asset has been previously written off, in which case the amount is expensed. The fair value of the legal obligation for asset retirement is assessed at the end of each reporting period.

Where the Corporation has an insurance policy in place to cover changes in the legal obligations associated with the retirement of long-lived assets which have previously been expensed, increases to the fair value of such obligations are recognized at the end of the period with a corresponding amount recorded as an amount recoverable from the insurance company.

(l) *Loss per share*

Loss per share is calculated by dividing the period's loss by the weighted average number of Common Shares outstanding during the year. The effect of potential issuances of common share equivalents under options and warrants would be anti-dilutive and therefore, the basic and diluted losses per share are the same. Information regarding securities that could potentially dilute earnings per share in the future is presented in Notes 9, 10 and 11.

(m) *Stock-based compensation*

On January 1, 2004, the Corporation retroactively adopted, without restatement of prior years, the fair value method of accounting for stock-based compensation, CICA 3870. This standard requires that the Corporation record compensation expense on the granting of all stock-based compensation awards, including stock options grants to employees, calculated using the fair-value method. The Corporation uses the Black-Scholes method of determining the fair value of the option on the date of the grant. The adoption of the fair value method resulted in a cumulative increase of \$971,000 to the opening deficit at January 1, 2004 and increases of \$139,000 and \$832,000 to common share capital and stock options, respectively, at January 1, 2004. Previously, the Corporation recorded only those expenses associated with stock options granted to non-employees based upon the fair value on the earlier date of completion of performance or vesting of the options granted. The Corporation did not record any compensation cost on grants of stock options to employees and directors prior to January 1, 2004.

When an employee or non-employee is granted stock options, the fair value of the immediately vested portion is expensed and included within the stock options balance within equity. As to the options vesting, the fair-value is amortized using the straight-line method over the vesting period and expensed on a monthly basis. When an employee or non-employee exercises stock options, then the fair-value of the options on the date of the grant is transferred to common stock. When options are cancelled, the vested fair-value balance of the stock options is transferred to contributed surplus. When stock options are

forfeited prior to becoming fully vested, any expense and fair-value previously recorded are reversed out accordingly. When options expire, the related fair-value is transferred to contributed surplus.

(n)
Warrants

Warrants issued as consideration for mineral properties and services rendered are recorded at fair value.

(o)
Variable Interest Entities

Effective January 1, 2005, the Corporation adopted Accounting Guidelines AcG-15, Consolidation of Variable Interest Entities, which requires consolidation of entities in which the Corporation has a controlling financial interest. The Corporation has determined that it has no variable interest entities.

3. Restricted Cash

The Corporation has pledged cash as collateral totaling \$5.3 million (2005 \$5.1 million) to the U.S. Bureau of Land Management, Nevada State Office, to cover increased reclamation cost estimates at the Hycroft mine (Note 7 Asset retirement obligation and closure costs).

4. Acquisition of Mineral Properties

Mt. Todd Gold Mine, Northern Territory, Australia

Effective March 1, 2006, the Corporation and its subsidiary Vista Gold Australia Pty Ltd. ("Vista Australia") entered into agreements with Ferrier Hodgson, the Deed Administrators for Pegasus Gold Australia Pty Ltd. ("Pegasus"), the government of the Northern Territory of Australia and the Jawoyn Association Aboriginal Corporation ("JAAC") and other parties named therein, subject to regulatory approvals, to purchase a 100% interest in the Mt. Todd gold mine (also known as the Yimuyn Manjerr gold mine) in the Northern Territory, Australia. Under these agreements, the Corporation is guarantor of the obligations of its subsidiary Vista Australia.

As part of the agreements, Vista Australia agreed to pay Pegasus, AU \$1.0 million (USD \$739,600) and receive a transfer of the mineral leases and certain mine assets; and pay the Northern Territory's costs of management and operation of the Mt. Todd site up to a maximum of approximately AU \$375,000 (approximately \$277,500) during the first year of the term (initial term is five years, subject to extensions), and assume site management and pay management and operation costs in following years. Additionally, the Corporation agreed to issue common shares with a value of CDN \$1.0 million (amounting to 177,053 common shares valued at \$877,466) to the JAAC as consideration for the JAAC entering into the agreement and for rent for the use of the surface overlying the mineral leases until a decision is reached to begin production. During March 2006, the Corporation transferred \$1,021,322 to an escrow account. The amount represented the \$739,600 purchase price (AU \$1.0 million), the \$100,000 finder's fee that the Corporation agreed to pay to Prime Corporate Finance Pty Limited in connection with the transaction, \$131,525 (AU \$177,837) in back rents and \$50,197 (AU \$69,048) for stamp duty assessments in order to register the title in Vista Australia's name. During June 2006, the transactions contemplated under the agreements were completed and the funds held in escrow were released to the ultimate vendors and the common shares were issued to the JAAC.

Edgar Filing: VISTA GOLD CORP - Form 10-K

As the acquisition of the Mt. Todd gold mine did not meet the definition of a business under the Emerging Issues Committee Abstract No. 124, "Definition of a Business," the Corporation has accounted for the acquisition as a purchase of net assets with the consideration issued assigned as follows:

Purchase Price:	
Cash	\$ 739,600
Common stock	877,466
Acquisition costs	528,600
	\$ 2,145,666
Assets acquired:	
Mineral properties	\$ 2,145,666
	\$ 2,145,666
Net assets acquired	\$ 2,145,666

As of December 31, 2006, the consolidated capitalized mineral property costs for the Mt. Todd gold mine were \$2,875,415.

PT Masmindo Dwi (Awak Mas Project)

On May 27, 2005, the Corporation completed the acquisition of the Awak Mas gold deposit in Sulawesi, Indonesia, pursuant to the exercise of its option to purchase the deposit for a purchase price of \$1.5 million. Under the terms of the option agreement, the Corporation had a six-month option period in which to conduct due diligence while paying the owners \$15,000 per month. The monthly option payments, as well as costs of up to \$150,000 expended to correct any deficiencies in asset standing, were to be credited towards the purchase price. On May 12, 2005, the Corporation transferred \$1.2 million to an escrow account. These funds were released to the ultimate vendors of the Awak Mas deposit, Weston and ORT (as defined below), upon completion of the final transaction documents. The amount of \$1.2 million represented the \$1.5 million purchase price less: the \$150,000 deposit the Corporation previously paid (which included \$75,000 in aggregate option payments); and \$150,000 paid by the Corporation to correct deficiencies in asset standing.

The acquisition of the Awak Mas Project involved the Corporation's purchase, through its wholly-owned subsidiary Vista Gold (Barbados) Corp. ("Vista Barbados"), of all of the outstanding shares of Salu Siwa Pty Ltd, an Australian company ("Salu Siwa") from the two owners of Salu Siwa: Weston Investments Pty Ltd., an Australian company ("Weston") and Organic Resource Technology Limited, an Australian company ("ORT"). Weston and ORT respectively owned 66% and 34% of the outstanding Salu Siwa shares. Salu Siwa in turn owns 99% of the outstanding shares of PT Masmindo Dwi, an Indonesian company ("PT Masmindo"), which is the direct holder of the Awak Mas Project. The remaining 1% of the outstanding PT Masmindo shares is held by ORT. Transfer of this remaining 1% to Vista Barbados is subject to any approvals, consents or other statutory requirements of the Indonesian authorities that will be required to effect the completion of such share purchase. On August 16, 2006, the transfer of the remaining 1% was completed.

Also in connection with this acquisition, certain creditors of PT Masmindo agreed to assign to Vista Gold Corp. (parent) an aggregate of \$857,973 of notes payable owed by PT Masmindo to the creditors, as follows: ORT Limited (of Australia) (previously known as Masmindo Mining Corp.) \$612,555; PT

Edgar Filing: VISTA GOLD CORP - Form 10-K

Masmindo Eka Sakti (of Indonesia) \$217,469; and Continental Goldfields Limited (of Western Australia) \$27,948.

As PT Masmindo did not meet the definition of a business, the Corporation has accounted for the acquisition as a purchase of net assets with the consideration issued assigned as follows:

Purchase Price:	
Cash	\$ 1,500
Acquisition Costs	113
	\$ 1,613
Assets Acquired:	
Cash	\$ 2
Current Assets	25
Mineral Properties	1,586
	\$ 1,613
Net Assets Acquired	\$ 1,613

F.W. Lewis, Inc. Properties

In December 2005, the Corporation's subsidiary Victory Gold Inc. ("Victory Gold") acquired all of the outstanding shares of F.W. Lewis, Inc., the assets of which include 55 mineral properties in Nevada and Colorado and the Hycroft production royalty. The acquisition was made by exercise of a purchase option originally held by Century Gold LLC ("Century Gold") of Spring Creek, Nevada. Century Gold assigned the option to the Corporation's subsidiary, Victory Gold, pursuant to an assignment and assumption agreement effective December 9, 2005. Under the terms of the assignment agreement, the Corporation paid Century Gold \$150,000 in cash and also reimbursed Century Gold for the \$250,000 it paid the owners of F.W. Lewis, Inc. toward the option exercise price of \$5.1 million. In addition, the Corporation issued to Century Gold 250,000 Common Shares of the Corporation valued at \$1.218 million. To complete the exercise of this option, the Corporation paid the owners of F.W. Lewis, Inc., the remaining \$4.85 million of the outstanding purchase price. Century Gold retained a 100% interest in two properties and a 50% interest in two other properties. The 53 properties retained by the Corporation include a total of 9,280 acres of patented and 11,616 acres of unpatented mineral claims, the majority having gold, silver or copper discoveries or old mines located on the properties.

F.W. Lewis, Inc. (now owned by the Corporation's subsidiary Victory Gold) owns a production royalty interest in the Hycroft Mine. The production royalty (applying to approximately 70% of the reported reserves) is 5% Net Smelter Return ("NSR") on gold and 7.5% NSR on other minerals, including silver. The production royalty on gold escalates on ore over 0.05 ounces per ton (opt) to a maximum of 10% NSR on ore grades over 0.14 opt. With the acquisition of F.W. Lewis, Inc., the Corporation is no longer subject to payment of this royalty to an outside party.

Included in the package (100% retained by the Corporation) is a property in the Battle Mountain, Nevada Mining District. This property is subject to pre-existing agreements with Madison Minerals Inc. (formerly Madison Enterprises Corp.) ("Madison") and Great American Minerals Exploration (Nevada) LLC ("Great American"). These agreements involve payments of \$3,000 per month minimum royalty payments to Victory Gold, minimum exploration commitments of \$250,000 per year, and an option to purchase the property for \$2.0 million payable by December 31, 2007, with a retained 5% gross royalty on gold and a 4% NSR royalty on other metals, and with annual advance minimum royalty payments of \$60,000 commencing

Edgar Filing: VISTA GOLD CORP - Form 10-K

on exercise of the purchase option. Madison and Great American also have an option to purchase the royalties from Victory Gold for \$4.0 million in the first year following the date of exercise of the purchase option and escalating by \$500,000 each year thereafter.

As F.W. Lewis, Inc. did not meet the definition of a business, the Corporation has accounted for the acquisition as a purchase of net assets with the consideration issued assigned as follows:

Purchase price:	
Cash	\$ 5,250
Common stock	1,218
Acquisition costs	74
	<u>6,542</u>
	\$ 6,542
Assets acquired:

On July 21, 2006, the Corporation and Nevgold, formerly Hatton Capital Corporation ("Hatton") entered into a letter of intent dated July 20, 2006 pursuant to which Hatton would acquire three of the Corporation's fully amortized mineral exploration properties located in Manitoba and Ontario, Canada, for consideration of 1,000,000 Hatton common shares to be issued at a deemed price of CDN \$0.375 per share for an aggregate value of CDN \$375,000 (approximately \$328,515). On September 11, 2006, the Corporation completed the transaction. On October 6, 2006, 100,000 shares were issued to the Corporation. Pursuant to the agreement with Hatton, the remaining 900,000 shares are held in escrow and 15% of the remaining share balance will be issued every six months over a three year period. The fair value of the CDN \$337,500 shares outstanding is \$260,391, of which \$94,290 is included in current receivables and \$166,101 as other long-term receivables.

(a) *Maverick Springs*

The Maverick Springs gold and silver project, southeast of Elko, Nevada, was acquired on October 7, 2002, from Newmont Mining Corporation ("Newmont"). The total cost for the Maverick Springs project included a cash payment of \$250,000; the issuance of 141,243 equity units, each unit comprised of one common share and a two year warrant, valued at \$405,000 and \$95,000, respectively (Notes 8(g) and 10); and the issuance of 122,923 equity units on October 7, 2003, each unit comprised of one common share and a two year warrant, valued at \$500,000 and \$111,058, respectively (Notes 8(g) and 10). Newmont

Edgar Filing: VISTA GOLD CORP - Form 10-K

retained a 1.5% net smelter returns royalty or the right to acquire 51% of the project after four years by paying the Corporation cash equaling 200% of the aggregate expenditures made by the Corporation on the project. In January 2007, Newmont informed the Corporation that it would not be exercising this right.

Maverick Springs is subject to a lease agreement (the "Artemis lease"), between Newmont and Artemis Exploration Company. The Artemis lease was entered into on October 1, 2001, and the key terms include: payment of advanced minimum royalties of \$50,000 on October 1, 2003 (which was paid), and advanced minimum royalties of \$100,000 on October 1, 2004 (which was paid), \$100,000 on October 1, 2005 (which was paid), \$100,000 on October 1, 2006 (which was paid) and each year thereafter while the agreement is in effect; work commitments of 6,400 feet of exploration drilling, on or before November 15, 2002, October 1, 2003 and October 1, 2004 (these commitments have been met), a preliminary economic evaluation to be conducted by October 1, 2004 which was extended to April 7, 2005 (this has been completed); and a net smelter returns royalty based on a sliding scale ranging from 2% to 6%, depending on gold and silver prices at the time of production.

On June 9, 2003, the Corporation entered into an agreement granting Silver Standard Resources Inc. ("SSRI") an option to acquire the Corporation's interest in the silver mineralized material hosted in the Maverick Springs project. The Corporation is the operator, retains its 100% interest in the gold mineralized material and maintain a 45% vote as a participant in a joint committee formed between the Corporation and SSRI, who maintains a corresponding 55% vote, to manage the exploration of the Maverick Springs project. The agreement with SSRI is subject to the terms of the purchase agreement between Newmont and the Corporation. Under the agreement, SSRI was to pay \$1.5 million over four years including a payment of \$300,000 made upon execution of the option agreement. The remaining \$1.2 million was used by the Corporation to fund exploration programs, land holding costs and option payments. During 2005, SSRI satisfied the \$1.5 million obligation and all costs incurred for Maverick Springs are now being shared by the two companies on the same ratio as established for operation of the joint management committee.

During the years ended December 31, 2006 and 2005, the Corporation recorded \$342,308 and \$144,285 in recoveries from SSRI, of which \$96,420 is included in accounts receivable (See also Note 18). The total recoveries to date from SSRI are \$1,864,569.

(b)

Mountain View

The Mountain View gold project, located west of the Hycroft mine, was acquired on October 7, 2002, from Newmont Capital Limited ("Newmont Capital"). The total cost for the Mountain View project included cash payments of \$50,000, and the issuance of 56,497 equity units, each unit comprised of one common share and a two year warrant, valued at \$200,000 (Notes 8 and 9). Newmont Capital retained a 1.5% net smelter returns royalty or the right to acquire 51% of the project after four years by paying the Corporation cash equaling 200% of the aggregate expenditures made by the Corporation on the project. In January 2007, Newmont informed the Corporation that it would not be exercising this right.

(c)

Long Valley

The Corporation entered into an option agreement on January 22, 2003, with Standard Industrial Minerals, Inc. ("Standard"), to acquire Standard's 100% interest in the Long Valley gold project in east central California, for an aggregate purchase price of \$750,000 which was paid over a five-year period, with annual payments paid as follows: \$100,000 paid on each of January 15, 2003, 2004, and 2005; \$200,000 paid on January 22, 2006, and \$250,000 paid on January 22, 2007. Accordingly as of January 2007, the Corporation

acquired 100% of the Long Valley project, which is held through the Corporation's indirect wholly-owned subsidiary, Vista Gold California, LLC. Royal Gold, Inc. has a 1% net smelter returns royalty on the project.

(d)

Wildcat

The Corporation executed formal purchase agreements during the fourth quarter of 2003 to acquire the Wildcat project, located in Pershing County, Nevada, in three separate transactions.

On September 23, 2003, the Corporation purchased 71 unpatented mining claims for \$200,000 upon signing and \$300,000 on August 11, 2004. On commencement of commercial production, the Corporation will make a one-time production payment in the amount of \$500,000. Thirteen of the claims are subject to an underlying 0.4% net smelter returns royalty, and the remaining 58 claims are subject to an underlying 1% net smelter returns royalty.

On October 12, 2003, the Corporation purchased a 100% interest in the Vernal unpatented mining claim for \$50,000 on signing and \$50,000 on October 1, 2004, for a total consideration of \$100,000.

On October 28, 2003, the Corporation purchased four patented mining claims and exploration data for 50,000 Common Shares of the Corporation valued at \$211,500. The patented claims are subject to an underlying net smelter returns royalty of 1% for gold production between 500,000 and 1,000,000 ounces, increasing to 2% on production in excess of 1,000,000 ounces.

(e)

Hasbrouck/Three Hills

On May 23, 2003, the Corporation executed a purchase agreement with Newmont Capital, a subsidiary of Newmont, which includes the Hasbrouck property and the Three Hills property, which lies approximately 4.5 miles to the north-northwest. The total cost for the Hasbrouck/Three Hills project included cash payments of \$50,000 and the issuance of 50,475 Common Shares valued at \$200,000. Newmont Capital, at its option, would retain either: (a) a 2% net smelter returns royalty in each project together with the right to a \$500,000 cash payment at the start of commercial production at either project and a further \$500,000 cash payment if, after the start of commercial production, the gold price averages \$400 per ounce or more for any three-month period; or (b) the right to acquire 51% of either or both projects. The latter right would be exercisable only after the later of four years or the time when the Corporation has incurred aggregate cash expenditures of \$1,000,000 on either or both properties. The Corporation's contribution to the joint venture during this period is capped at \$5.0 million, \$3.0 million of which Newmont Capital would finance for the Corporation and recover, with interest, exclusively from related project cash flows. The Corporation would also grant Newmont Capital a right of first offer with respect to subsequent sale of the projects by the Corporation. An additional 1.5% net smelter royalty on the Hasbrouck property is held by a private party.

(f)

Yellow Pine

On November 7, 2003, Idaho Gold Resources LLC ("Idaho Gold"), an indirect, wholly-owned subsidiary of the Corporation entered into an Option to Purchase Agreement for a nine year option to purchase 100% of the Yellow Pine gold project for \$1.0 million. Idaho Gold made an option payment of \$100,000 upon execution of the agreement, an option payment of \$100,000 on each of the first, second and third anniversary dates of the agreement. The agreement calls for Idaho Gold to make six more yearly payments of \$100,000 on or before each anniversary date of the agreement, for a total option payment price of \$1.0 million. If Idaho Gold exercises its option to purchase the project, all option payments shall be applied as a credit against the purchase

Edgar Filing: VISTA GOLD CORP - Form 10-K

price of \$1.0 million. Idaho Gold has the right to terminate the agreement at any time without penalty. Eleven of the seventeen claims are subject to an underlying 5% net smelter returns royalty.

(g)

Paredones Amarillos

The Corporation acquired 100% of the Paredones Amarillos gold project in Mexico from Viceroy Resource Corporation on August 29, 2002. The total cost of this project included cash payments of \$786,000 for acquisition and related costs, the issuance of 303,030 equity units with a fair value of \$1,212,000 (Notes 8(g) and 9) and a cash payment of \$320,000 on August 29, 2003.

Certain concessions on the Paredones Amarillos project are subject to a 2% net profits interest retained by a former owner.

(h)

Guadalupe de los Reyes

On August 1, 2003, the Corporation executed an agreement to acquire a 100% interest in the Guadalupe de los Reyes gold project in Sinaloa State, Mexico and a data package associated with the project and general area, for aggregate consideration of \$1.4 million and a 2% net smelter returns royalty. During a due diligence period leading up to the signing of the purchase agreement, the Corporation made payments to the owner totaling \$100,000, and upon exercising its option to complete the purchase, paid an additional \$200,000. On August 4, 2004, the Corporation issued 138,428 Common Shares valued at \$500,000. An additional \$500,000 in cash will be paid by way of \$100,000 payments on each of the second through sixth anniversaries of the signing of the formal agreement, with the outstanding balance becoming due upon commencement of commercial production. The Corporation has made the first and second \$100,000 payments under the agreement. A 2% net smelter returns royalty is held by the previous owner and may be acquired by the Corporation at any time for \$1.0 million.

(i)

Amayapampa

The Corporation acquired the Amayapampa gold project, in Bolivia, in 1996. The project is being held on care and maintenance and holding costs are expensed. On March 13, 2007, the Corporation entered into an agreement with Luzon Minerals Ltd. ("Luzon") to sell the Amayapampa project to Luzon. This agreement replaces all prior agreements between the Corporation and Luzon, as previously reported, with respect to the Amayapampa project. See Notes 18 and 19.

Measurement uncertainty

The carrying value of the Amayapampa gold project was \$10.3 million as at December 31, 2006. The valuation of this asset is highly dependent on the sale to Luzon going ahead and on assumptions regarding the price of gold and Luzon shares in the future. As at December 31, 2006, the impairment analysis incorporated the following key assumptions:

Gold prices per ounce of \$515 per ounce

Expected reserves of 440,000 ounces to be mined from the property commencing in 2009 based on a feasibility study carried out in February, 2000.

Using these assumptions, the Amayapampa project was not considered to be impaired based on the projected undiscounted cash flows.

(j)

Hycroft mine and Royalty

The Corporation acquired the Hycroft gold mine, west of Winnemucca, Nevada, in 1987. Mining activities at the Hycroft mine were suspended in 1998. The mine is being held on care and maintenance and holding costs are expensed.

The Crofoot property at the Hycroft mine is subject to a 4% net profits royalty and the Lewis property was subject to a 5% net smelter royalty. In December 2005, the Corporation's subsidiary Victory Gold Inc. acquired F.W. Lewis, Inc., the holder of the 5% royalty on the Lewis property. In consequence, the Corporation is no longer subject to a royalty payment to an outside party with respect to the Lewis property.

(k)

F.W. Lewis, Inc. Properties

On December 13, 2005, the Corporation's subsidiary Victory Gold Inc. ("Victory Gold") acquired all of the outstanding shares of F.W. Lewis, Inc., the assets of which include 55 mineral properties in Nevada and Colorado as well as the royalty discussed above. The acquisition was made by exercise of a purchase option originally held by Century Gold LLC ("Century Gold") of Spring Creek, Nevada. Century Gold assigned the option to the Corporation pursuant to an assignment and assumption agreement effective December 9, 2005. Under the terms of the assignment agreement, the Corporation paid Century Gold \$150,000 in cash and also reimbursed Century Gold for the \$250,000 it paid the owners of F.W. Lewis, Inc. toward the option exercise price of \$5.1 million. In addition, the Corporation issued to Century Gold 250,000 Common Shares of the Corporation valued at \$1.218 million. To complete the exercise of this option, the Corporation paid the owners of F.W. Lewis, Inc., the remaining \$4.85 million of the outstanding purchase price. Century Gold retained a 100% interest in two properties and a 50% interest in two other properties.

(l)

Awak Mas

On May 27, 2005, the Corporation completed its acquisition of the Awak Mas gold deposit in Sulawesi, Indonesia, pursuant to the exercise of its option to purchase the deposit for a purchase price of \$1.5 million. Under the terms of the option agreement, the Corporation had a six-month option period in which to conduct due diligence while paying the owners \$15,000 per month. The monthly option payments, as well as costs of up to \$150,000 expended to correct any deficiencies in asset standing, were to be credited towards the purchase price. On May 12, 2005, the Corporation transferred \$1.2 million to an escrow account. These funds were released to the ultimate vendors of the Awak Mas deposit, Weston and ORT, upon completion of the final transaction documents. The amount of \$1.2 million represented the \$1.5 million purchase price less: the \$150,000 deposit that the Corporation previously paid (which included \$75,000 in aggregate option payments); and \$150,000 expended by the Corporation to correct deficiencies in asset standing.

(m)

Mt. Todd

Effective March 1, 2006, the Corporation and its subsidiary Vista Gold Australia Pty Ltd. entered into agreements with Ferrier Hodgson, the Deed Administrators for Pegasus Gold Australia Pty Ltd. ("Pegasus"), the government of the Northern Territory of Australia and the JAAC and other parties named therein, subject to regulatory approvals, to purchase a 100% interest in the Mt. Todd gold mine (also known as the Yimuyn Manjerr gold mine) in the Northern Territory, Australia. Under these agreements, the Corporation is guarantor of the obligations of its subsidiary Vista Australia.

Edgar Filing: VISTA GOLD CORP - Form 10-K

As part of the agreements, the Corporation agreed to pay Pegasus, AU\$1.0 million (\$739,600) and receive a transfer of the mineral leases and certain mine assets; and pay the Northern Territory's costs of management and operation of the Mt. Todd site up to a maximum of approximately AU\$375,000 (approximately \$277,500) during the first year of the term (initial term is five years, subject to extensions), and assume site management and pay management and operation costs in following years. Additionally, the Corporation was to issue common shares with a value of CDN\$1.0 million (amounting to 177,053 common shares) to the JAAC as consideration for the JAAC entering into the agreement and for rent for the use of the surface overlying the mineral leases until a decision is reached to begin production. Other agreement terms provide that the Corporation will undertake a technical and economic review of the mine and possibly form one or more joint ventures with the JAAC. In June 2006, the transactions contemplated under the agreements were completed and effective, with funds held in escrow released to the ultimate vendors and the common shares issued to the JAAC. See also Note 4 Acquisition of Mt. Todd gold mine, Northern Territory, Australia.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

The tabular information set out below is in thousands of United States dollars, except as otherwise stated.

7. Asset retirement obligation and closure costs

At December 31, 2006, the Corporation has accrued for estimated reclamation and closure costs of \$4.7 million (2005 \$4.1 million). Substantially the entire estimate relates to the final reclamation and closure of the Hycroft mine.

During the year ended December 31, 2006, a revised reclamation and closure plan for the Hycroft mine was approved by the U.S. Bureau of Land Management, Nevada State Office ("BLM"). Under this plan the future estimated costs of reclamation and closure at Hycroft are \$7.5 million.

The Corporation estimates that the related asset retirement expenditures will commence approximately five years after the start-up of the Hycroft mine (an event not yet scheduled) and continue for several years after that time. Using a credit adjusted rate of 7.75%, the fair value of the estimated \$7.5 million obligation as of December 31, 2006 is \$4.7 million.

The following provides a reconciliation of the Corporation's beginning and ending carrying values for its asset retirement obligations:

(U.S. dollars in thousands)

Balance, December 31, 2004	\$ 4,188
	<hr/>
Accrued severance pay reclassified to current liabilities	(78)
Balance, December 31, 2005	4,110
	<hr/>
Additional reclamation accrued resulting from revised plan	578
	<hr/>
Balance, December 31, 2006	\$ 4,688
	<hr/>

The BLM has required the Corporation to provide a total surety amount of \$7.5 million for the approved Hycroft mine reclamation plan. In 2004, the Corporation reached an agreement for a new bond package.

The Corporation has placed \$5.3 million (includes \$0.4 million in accrued interest) in a restricted cash account to pay for future reclamation obligations at the Hycroft mine (see Note 3). Additionally, the Corporation paid \$1.7 million (including \$0.4 million of amortization) for an insurance policy to an insurance company to cover potential over-runs on the reclamation liability which is included in reclamation premium costs and other assets on the Corporation's balance sheet. This balance also includes the additional reclamation \$578,000 recognized during 2006. The Corporation believes it has provided for any present disturbance obligations associated with the property.

It is reasonably possible that the Corporation's estimates of its ultimate reclamation liability could change as a result of changes in regulations or cost estimates. The effect of changes, which could be material, would be recognized on a prospective basis.

(a) Warrants exercised from February 2003 private placement

On February 7, 2003, the Corporation completed a \$3.4 million private placement financing. The gross proceeds were placed in escrow pending shareholder approval. On February 27, 2003, at a Special General Meeting of the shareholders, shareholders voted in favor of the financing and on February 28, 2003, the gross proceeds were released to the Corporation from escrow. The private placement consisted of the sale

of 1.4 million special warrants, each priced at \$2.43. The special warrants were automatically converted into equity units upon shareholder approval. Each equity unit consisted of one common share and a warrant, exercisable over a four-year period, to purchase one common share for \$3.14 during the first year, \$3.56 during the second year, \$3.92 during the third year and \$4.28 during the fourth year.

During the twelve months ended December 31, 2006, 2005 and 2004, 947,000, 73,000 and 190,000 of the warrants issued in the February 2003 private placement have been exercised for total gross proceeds of \$3,982,600, \$286,160 and \$600,800 (Note 9).

On May 1, 2006, the Corporation announced that, in accordance with the terms of its outstanding common share purchase warrants (the "February 2003 Warrants"), it had elected to accelerate the expiry date of all such currently outstanding Warrants since the "Acceleration Event" described in the applicable warrant indentures had occurred.

The Acceleration Event occurred on April 26, 2006 because the closing price of the Corporation's common shares on the American Stock Exchange exceeded 150% of the current exercise price of the warrants (\$4.28) for the 15 consecutive trading days prior to that date.

The new expiry date for the February 2003 Warrants was May 17, 2006. Of the February 2003 Warrants, 751,000 were outstanding as of the date of acceleration, exercisable at \$4.28 per share of which all were exercised prior to the May 17, 2006 expiry date. Gross proceeds to the Corporation for the exercise of the 751,000 warrants were \$3,214,280.

(b) Warrants exercised from February-March 2002 private placement

The Corporation effected a two-step private placement financing in February and March 2002. In the first step of the private placement, completed in February, the Corporation issued 1,000,000 units at a price of \$1.026 per unit for an aggregate purchase price of \$1,026,000. Each unit consisted of one common share and one share purchase warrant exercisable for one additional common share at \$1.50, until February 1, 2007. The Corporation also issued 80,000 units to an agent as consideration for its services in connection with the unit offering. In the second step of the private placement, completed in March, the Corporation issued \$2,774,000 aggregate principal amount of convertible debentures. The debentures were convertible into debenture units at a price of \$1.026 per debenture unit, each consisting of one common share and one 5-year warrant entitling the holder to purchase one common share at a price of \$1.50 until March 18, 2007, with the common share component representing substantially all of the unit value. The Corporation issued to an agent special warrants exercisable for 216,296 units, with each unit consisting of one common share and one warrant with the same terms as the share and warrant components, respectively, of the debenture units.

During the twelve months ended December 31, 2006, 2005 and 2004, 1,500,631, 309,002 and 418,400 of the warrants issued in the February-March 2002 private placement (Note 8(b)) have been exercised for total gross proceeds of \$2,250,947, \$463,503 and \$627,600, respectively (Note 9).

(c) Warrants exercised from December 2002 private placement

On December 27, 2002, the Corporation completed a private placement financing in which the Corporation issued 1,000,000 equity units at a price of \$2.35 per unit, for an aggregate purchase price of \$2,350,000. Each equity unit consisted of one common share and one warrant, exercisable over a two-year

Edgar Filing: VISTA GOLD CORP - Form 10-K

period from the issuance date, to purchase one common share for \$3.04 during the first year and \$3.45 during the second year.

During the twelve months ended December 31, 2004 the remaining 83,327 outstanding warrants issued in the December 2002 private placement were exercised for total gross proceeds of \$287,478 (Note 9).

(d) Common Shares issued for acquisition of gold properties, net

On June 29, 2006, the Corporation issued 177,053 Common Shares valued at \$877,466, to the JAAC as consideration for the JAAC entering into the purchase agreement of the Mt. Todd gold mine and for rent for the use of the surface overlying the mineral leases until a decision is reached to begin production (Note 4).

On December 9, 2005, the Corporation agreed to issue 250,000 Common Shares valued at \$1,217,500 as partial payment towards the purchase of an option to purchase the outstanding shares of F.W. Lewis, Inc. (Note 5(k)).

On August 4, 2004, the Corporation issued 138,428 Common Shares valued at \$500,000, as a scheduled payment for the purchase of the Guadalupe de los Reyes project in Mexico (Note 5(h)).

During June and July 2004, the Corporation issued 50,475 Common Shares valued at \$200,000, as the final scheduled payment in the purchase of the Hasbrouck/Three Hills projects.

(e) Common Shares issued for services, net

Pursuant to an agreement executed May 5, 2006, with Quest Capital Corp. ("Quest"), Quest is to provide advisory services to the Corporation for a monthly fee of \$10,000 and 10,000 Common Shares in the Corporation. The 10,000 Common Shares were issued on October 10, 2006 and were valued at \$10.76 per Common Share for total consideration of \$107,600.

On December 7, 2005, the Corporation entered into a non-binding term sheet for a Bridge Credit Facility (the "facility") with Quest Capital Corporation. A non-refundable loan fee of 15,000 Common Shares valued at \$73,050 in the capital of the Corporation was payable for providing the facility. In January 2006, the Corporation decided not to proceed with this facility.

(f) Private placement September 2004, net

On September 29, 2004, the Corporation completed a private placement financing in which it sold and issued a total of 1,966,456 units, at a price of \$3.30 per unit for aggregate gross proceeds of \$6,489,304. Net proceeds to the Corporation were approximately \$6,033,000. Each unit consists of one common share and one warrant to acquire an additional common share of the Corporation at an exercise price of \$4.75.

Commencing July 7, 2005, if the closing price of the Corporation's Common Shares on the American Stock Exchange is \$5.50 or more for a period of 20 consecutive trading days, then for 15 business days the Corporation will have the option to request that the warrants be exercised. If the warrants are not exercised within 15 business days following the request, they will be cancelled.

A commission of \$324,465 (representing 5% of gross proceeds) was paid to Global Resource Investments Ltd. in conjunction with the private placement. Also, Global Resource Investments Ltd. was reimbursed \$18,757 for legal fees in connection with the private placement.

(g) Warrants exercised from September 2004 private placement

During the twelve months ended December 31, 2006, 1,953,956 warrants issued in the September 2004 private placement have been exercised for gross proceeds of \$9,281,291.

On May 1, 2006, the Corporation announced that, in accordance with the terms of its outstanding common share purchase warrants (the "September 2004 Warrants") issued under a Warrant Indenture dated September 29, 2004, it had elected to accelerate the expiry date of all such currently outstanding September 2004 Warrants since the "Acceleration Event" described in the applicable warrant indentures had occurred.

The new expiry date of the September 2004 Warrants was May 19, 2006. Of the September 2004 Warrants, 1,720,740 were outstanding as of the date of acceleration, exercisable at \$4.75 per share of which 1,708,240 warrants were exercised prior to the May 19, 2006 expiry date and 12,500 warrants expired. Gross proceeds to the Corporation from the exercise of the 1,708,240 warrants were \$8,114,140.

(h) Warrants exercised from acquisition of gold properties, cash

During the twelve months ended, December 31, 2004, all 303,030 warrants issued to Viceroy Resource Corporation for acquisition of Minera Paredones Amarillos were exercised for total proceeds of \$1.6 million.

(i) Warrants exercised from acquisition of gold properties, fair value.

During the twelve months ended, December 31, 2004, all 303,030 warrants issued to Viceroy Resource Corporation for acquisition of Minera Paredones Amarillos were exercised. Previously, these warrants had been recorded at a fair value amount of \$250,000 in Warrants (Note 9) and when they were exercised the fair value associated with them was recorded as Common Stock.

(j) Private Placement September 2005, net

On September 23, 2005, the Corporation completed a private placement financing in which it sold and issued a total of 2,168,812 units, at a price of \$3.60 per unit for aggregate gross proceeds of \$7,807,723. Net cash proceeds to the Corporation after a finder's fee of \$468,463, costs to register the shares of \$69,146, and legal expenses of \$106,279 were approximately \$7,163,835. Net proceeds after non-cash cost of broker warrants of \$401,241 were approximately \$6,762,594. Each unit consists of one common share and one warrant to acquire an additional common share of Vista Gold Corp. at an exercise price of \$4.10.

On December 1, 2005, the United States Securities and Exchange Commission declared effective a registration statement on Form S-3 filed under the United States Securities Act of 1933 for registration for resale of 4,554,505 Common Shares, including the Common Shares issued, as well as those to be issued on exercise of warrants, in connection with the private placement.

Starting six months after the share registration is declared effective, if the Corporation's closing common share price on the American Stock Exchange is \$5.40 or more for 20 consecutive trading days, then for 15 business days, the Corporation will have the option to request that the warrants be exercised. Any warrants not exercised within 15 business days following this request would be deemed canceled.

Edgar Filing: VISTA GOLD CORP - Form 10-K

A cash finder's fee of \$468,463 (representing 6% of gross proceeds) was paid to one of two advisors to the Corporation in conjunction with the private placement. As a finder's fee for the other advisor, the Corporation issued to that advisor 216,881 warrants (representing 10% of the number of units issued) valued, using the Black-Scholes method, at \$401,241 (see Note 10).

(k) Warrants exercised from September 2005 private placement

During the twelve months ended December 31, 2006, 1,763,812 warrants issued in the September 2005 private placement have been exercised for gross proceeds of \$7,231,629.

(l) Private Placement February 2006, net

On February 2, 2006, the Corporation completed a private placement financing in which it sold and issued a total of 649,684 units (the "Units"), at a price of \$5.05 per Unit for aggregate gross proceeds of \$3,280,904. Each Unit consists of one common share and one common share purchase warrant entitling the holder to acquire an additional common share of Vista Gold Corp. at an exercise price of \$6.00 for a period of two years from the date of issue. The Corporation agreed in connection with this transaction to register for resale all shares issuable in the transaction including shares issuable upon exercise of warrants. Net cash proceeds to the Corporation after costs to register the shares of \$66,112 and legal expenses of \$30,719 were \$3,184,073.

On June 23, 2006, the United States Securities and Exchange Commission (the "SEC") declared effective a registration statement on Form S-3 filed under the United State Securities Act of 1933 for registration for resale of 1,091,737 common shares, including the common shares issued, as well as those to be issued on exercise of warrants, in connection with the private placement.

(m) Public Offering November 2006, net

On November 7, 2006, the Corporation completed a public offering of 3,668,100 of its Common Shares at a price to the public of \$8.50 per share for aggregate gross proceeds of \$31,178,850. Net cash proceeds to the Corporation after payment of agents' fees of \$1,706,943 and other offering expenses of \$89,178 were \$29,382,729. Net proceeds after non-cash costs of \$530,819 for agents' warrants were \$28,851,910. All of the shares were offered on a best efforts agency basis pursuant to an effective shelf registration statement previously filed with the U.S. Securities and Exchange Commission. The Corporation had also previously filed a base shelf prospectus with the securities regulatory authorities in the provinces of British Columbia, Alberta, Manitoba and Ontario, Canada in connection with the public offering.

A commission of \$1,558,943 (representing 5% of gross proceeds) was paid to one of two agents to the Corporation in conjunction with the public offering. The Corporation also issued, as additional consideration to the agents, compensation warrants entitling the agents to purchase an aggregate of 183,405 Common Shares of the Corporation at a price of \$8.50 for a period of two years following the closing date.

Edgar Filing: VISTA GOLD CORP - Form 10-K

9. Warrants

Further to Note 8, warrants granted and outstanding are summarized in the following table:

	Warrants granted ^{1,5}	Valuation (\$000's)	Warrants exercised	Warrants expired	Warrants outstanding	Weighted average exercise prices (U.S. \$)	Expiry date	Weighted average remaining life (yrs)

(4)

The exercise price increases to \$4.28 in February 2006

(6)

The value of all warrants issued in conjunction with private placements is allocated to common stock

During the year 2005, all 122,923 warrants issued October 7, 2003 for the acquisition of Maverick Springs and Mountain View expired on October 7, 2005. The recorded fair-value from the expiration of these warrants of \$111,000 has been reclassified to contributed surplus.

During the year 2004, all 303,030 warrants issued for the acquisition of Minera Paredones Amarillos were exercised (Note 8). Also during 2004, 197,740 warrants issued October 9, 2002 for the acquisition of Maverick Springs and Mountain View expired on October 9, 2004. The recorded fair-value from the expiration of these warrants of \$95,000 has been reclassified to contributed surplus.

10. Options to purchase Common Shares

Under the Corporation's Stock Option Plan (the "Plan"), the Corporation may grant options to directors, officers, employees and consultants of the Corporation. The maximum number of Common Shares of the Corporation that may be reserved for issuance under the Plan is a variable number equal to 10% of the issued and outstanding common shares on a non-diluted basis. Under the Plan, the exercise price of each option shall not be less than the market price of the Corporation's stock on the date preceding the date of grant, and an option's maximum term is 10 years or such other shorter term as stipulated in a stock option agreement between the Corporation and the optionee. Options under the Plan are granted from time to time at the discretion of the Board of Directors, with vesting periods and other terms as determined by the Board.

The fair value of stock options granted to employees and directors was estimated at the grant date using the Black-Scholes option pricing model, using the following weighted average assumptions:

	Years Ended December 31,					
	2006		2005		2004	
Expected volatility	60%		80%		80%	
Risk-free interest rate	4.55%	4.91%	3.51%	3.95%	1.50%	3.51%
Expected lives (years)	5		5 years		3 to 5 years	
Dividend yield	N/A		N/A		N/A	

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Expected price volatility is based on the historical volatility of the Corporation's stock. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore, the existing models do not necessarily provide a reliable measure of the fair value of the Corporation's stock options. The expected term of the options granted is derived from the output of the option pricing model and represents the period of time that the options granted are expected to be outstanding. The risk-free rate for the periods within the contractual term of the option is based on the U.S. Treasury yield curve in effect at the date of grant.

Edgar Filing: VISTA GOLD CORP - Form 10-K

A summary of option activity under the Plan as of December 31, 2006, and changes during the period then ended is set forth in the following table:

	Number of Shares	Weighted Average Exercise Price (\$ USD)	Weighted- Average Remaining Contractual Term	Average Intrinsic Value (\$000's)

Forfeited	(21)
Expired	(5)
Expensed	261
	2,239
As of December 31, 2006	\$ 2,239

The total number of options outstanding at December 31, 2006 is 944,000 with exercise prices ranging from approximately \$1.96 to \$9.73 and remaining lives of 0.10 to 4.73 years. The total number of options outstanding represents 3.0% of issued capital.

Compensation expense with a fair value of \$261,673 was recognized during the twelve months ended December 31, 2006, for options previously granted and vesting over time. During the twelve month periods in 2005 and 2004, compensation expense with fair values of \$302,280 and \$253,728, respectively, was recognized for options previously granted and vesting over time.

Under the Plan, 230,000 stock options, of which 60,000 will vest over a period of three years (20,000 in each year) and 170,000 will vest over a period of two years (85,000 in each year), were granted to employees and directors of the Corporation during the twelve months ended December 31, 2006. The fair value of the 105,000 options immediately vested has been recorded as a non-cash compensation expense of \$534,230. The weighted-average grant date fair value of the 230,000 options granted during the twelve months ended December 31, 2006 was \$5.20.

Under the Plan, 85,000 stock options vesting over a period of two years (42,500 in each year) were granted to employees of the Corporation during the twelve months ended December 31, 2005. The fair value of the

Edgar Filing: VISTA GOLD CORP - Form 10-K

42,500 options immediately vested has been recorded as a non-cash compensation expense of \$116,967. The weighted-average grant date fair value of the 85,000 options granted during the twelve months ended December 31, 2005 was \$2.75.

Under the Plan, 115,000 stock options, of which 15,000 will vest immediately and 100,000 will vest over a period of two years (50,000 in each year), were granted to consultants of the Corporation during the twelve months ended December 31, 2004. Also during the twelve months ended December 31, 2004, 308,000 stock options, of which 50,000 will vest immediately and 258,000 will vest over a period of two years (129,000 in each year), were granted to officers, directors and employees of the Corporation. The fair value of the 115,000 stock options granted to consultants has been recorded as a non-cash compensation expense of \$328,760. The Corporation's accounting policy is to fully expense the fair value of stock options granted to consultants for services previously provided. The fair value of the 179,000 options granted to officers, directors and employees immediately vested has been recorded as a non-cash compensation expense of \$477,114. The weighted-average grant date fair value of the 423,000 options granted during the twelve months ended December 31, 2005 was \$2.71.

During the respective twelve months ended December 31, 2006, 2005 and 2004, 219,125, 7,858 and 249,642 options were exercised with aggregate intrinsic values of \$1,083,193, \$14,659 and \$217,174.

As set forth in the above table, 10,000 options expired during the twelve-month period ended December 31, 2006. Included in the 10,000 options that expired were 7,500 options that were granted in November 2005 to an employee of the Corporation and had a recorded fair-value of \$21,264 which was reclassified to contributed surplus following expiration and 2,500 options that were granted in March 1999 and that did not have a fair-value associated with them as they were granted prior to 2002.

During 2005, 5,000 options granted to employees in November 2004 expired during the twelve-month period ended December 31, 2005. The 5,000 options had a recorded fair-value of \$13,845 which was reclassified to contributed surplus following expiration. During 2004, no options expired.

As to the 7,500, 5,000 and 25,000 stock options that were forfeited in the twelve-month periods ended December 31, 2006, 2005 and 2004, \$5,316, \$4,615 and \$41,220, respectively, had originally been recorded as an expense and an addition to stock options and with these cancellations, these entries have been reversed, accordingly.

Edgar Filing: VISTA GOLD CORP - Form 10-K

A summary of the status of the Corporation's unvested stock options as of December 31, 2006, and changes during the period then ended, is set forth below:

	Number of Shares	Weighted- Average Grant Date Fair Value (\$ USD)
Unvested December 31, 2003	95,000	\$ 2.79
Granted	334,000	2.77
Vested	(70,000)	2.86
Forfeited	(25,000)	2.59
Unvested December 31, 2004	334,000	\$ 2.77
Granted	42,500	2.75
Vested	(329,000)	2.77
Forfeited	(5,000)	2.77
Unvested December 31, 2005	42,500	\$ 2.75
Granted	125,000	5.22
Vested	(35,000)	2.73
Forfeited	(7,500)	3.98
Unvested December 31, 2006	125,000	\$ 5.22

As of December 31, 2006, there was \$449,475 of unrecognized compensation expense related to the unvested portion of options outstanding. This expense is expected to be recognized over a weighted-average period of 0.4 years.

11. Commitments and contingencies

The Corporation is required to provide financial assurance of \$7.5 million in respect of reclamation and site closure obligations at the Hycroft mine (Note 7). The Corporation has been requested to pledge collateral to provide this bonding. During 2004, the Corporation reached an agreement for a new bond package.

Refer also to Note 5 for commitments in connection with acquisitions of mineral properties.

12. Financial instruments

The recorded value of the Corporation's cash and cash equivalents, accounts receivable and accounts payable and accrued liabilities and other, approximate their fair-market values due to the relatively short periods to maturity. At December 31, 2006, marketable securities are carried at a cost of \$790,885, with a quoted market value of \$1,322,358.

13. Supplemental cash flow disclosure and material non-cash transactions

As of December 31, 2006, 2005 and 2004 all of the Corporation's cash was held in liquid bank deposits.

Material non-cash transactions (\$000's)	Non-cash consideration given/(received) during 2006

14. Income taxes

(a) A reconciliation of the combined Canadian federal and provincial income taxes at statutory rates and the Corporation's effective income tax expenses (recovery) is as follows:

	Years ended December 31		
	2006	2005	2004
Income taxes at statutory rates	\$ (1,418)	\$ (1,706)	\$ (1,827)
Increase (decrease) in taxes from:			
Permanent differences	(21)	2	308
Differences in foreign tax rates	6	97	122
Change in effective tax rate	987		
Other	(231)		
Benefit of loss not recognized	677	1,607	1,398
	\$	\$	\$

(b) Future income taxes reflect the net effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The significant components of the company's future tax assets as at December 31 are as follows:

Future income tax assets	December 31	
	2006	2005
Excess tax value over carrying value of property, plant and equipment	\$ 7,223	\$ 8,072
Operating and capital loss carryforwards	14,985	14,197

2016	1,140		1,140
2019		5,302	5,302
2020		1,725	1,725
2021		1,965	1,965
2022		1,726	1,726
2023		1,991	1,991
2024		3,409	3,409
2025		3,814	3,814
2026		2,185	2,185
	\$ 5,073	\$ 37,037	\$ 42,110

15. Retirement plan

The Corporation sponsors a qualified tax-deferred savings plan in accordance with the provisions of Section 401(k) of the U.S. Internal Revenue Code, which is available to permanent U.S. employees. The Corporation makes contributions of up to 4% of eligible employees' salaries. The Corporation's contributions were as follows: 2006 \$32,161, 2005 \$29,051; and 2004 \$19,470.

16. Segment information

The Corporation evaluates, acquires and explores gold exploration and potential development projects. These activities are focused principally in North America, South America, Australia and Indonesia. Substantially all related costs are incurred in the United States. The Corporation reported no revenues in 2006, 2005 and 2004. Geographic segmentation of mineral properties and plant and equipment is provided in Notes 5 and 6.

17. Differences between Canadian and United States generally accepted accounting principles

The significant measurement differences between generally accepted accounting principles ("GAAP") in Canada and in the United States, as they relate to these financial statements are as follows:

- (a) Under Canadian corporate law, the Corporation underwent a capital reduction in connection with the amalgamation of Granges, Inc. ("Granges") and Hycroft Resources &

Edgar Filing: VISTA GOLD CORP - Form 10-K

Development, Inc. whereby share capital and contributed surplus were reduced to eliminate the consolidated accumulated deficit of Granges as of December 31, 1994, after giving effect to the estimated costs of the amalgamation. Under U.S. corporate law, no such transaction is available and accordingly is not allowed under U.S. GAAP.

- (b) In 2000, the carrying values of certain long-lived assets exceeded their respective undiscounted cash flows. Following Canadian GAAP at that time, the carrying values were written down using the undiscounted cash flow method. Under U.S. GAAP, the carrying values were written down to their fair values using the discounted cash flow method, giving rise to a difference in the amounts written down.
- (c) In accordance with U.S. GAAP (SFAS No. 115), marketable securities considered to be available-for-sale are to be measured at a fair value at the balance sheet date and related unrealized gains and losses are required to be shown separately in comprehensive income.
- (d) Special warrants issued to the agent as compensation for its services in connection with the March 2002 Debenture Offering (note 8(b)) are valued and included as a financing cost of the related debentures. The conversion feature of the Debenture Offering (the Beneficial Conversion Feature) was in the money at the date of issue. The debentures were fully converted on September 19, 2002 (note 8(b)); accordingly the fair value of the Beneficial Conversion Feature is recognized as a charge to net loss and as an addition to contributed surplus.
- (e) In accordance with U.S. GAAP, exploration, mineral property evaluation, holding costs, option payments and related acquisition costs for mineral properties acquired under an option agreement are expensed as incurred. When proven and probable reserves are determined for a property and a bankable feasibility study is completed, then subsequent exploration and development costs on the property would be capitalized. Total capitalized cost of such properties is measured periodically for recoverability of carrying value under SFAS No. 144. Under Canadian GAAP, all such costs are permitted to be capitalized.
- (f) In accordance with U.S. GAAP (SFAS No. 123R), the fair value of all options granted after January 1, 2006 is calculated at the date of grant and expensed over the expected vesting period. On transition to this new standard, the unvested portion of options granted to employees before January 1, 2006 is expensed over the remaining vesting period using the fair value on the date of grant. Prior to January 1, 2006, the Corporation did not record any compensation cost on the granting of stock options to employees and directors as the exercise price was equal to or greater than the market price at the date of grants for U.S. GAAP purposes under APB Opinion No. 25. SFAS No. 123R essentially aligns U.S. GAAP with Canadian GAAP for accounting for stock based compensation.

Edgar Filing: VISTA GOLD CORP - Form 10-K

The significant measurement differences in the consolidated statements of loss relative to U.S. GAAP were:

Consolidated Statements of Loss

Edgar Filing: VISTA GOLD CORP - Form 10-K

Prior to January 1, 2006, the Corporation applied Accounting Principles Board Opinion No. 25 and related interpretations in accounting for its stock-based compensation plans in its U.S. GAAP presentations. If compensation cost for the Corporation's stock-based compensation plan had been determined based on the fair value at the grant dates for awards under the plans consistent with the method described in SFAS No. 123R, the Corporation would have recorded additional compensation expense of \$415,000 and \$690,000 in 2005 and 2004, respectively. Accordingly, the consolidated net loss and loss per share under U.S. GAAP would have increased to the pro-forma amounts indicated below:

	Year ended December 31,	
	2005	2004
Net Loss as reported (000's)	\$ (5,353)	\$ (5,897)
Net Loss pro forma (000's)	(5,768)	(6,587)
Loss per share as reported	\$ (0.26)	\$ (0.37)
Loss per share pro forma	(0.31)	(0.41)
<i>Impact of recently issued accounting standards</i>		

In July 2006, the FASB issued interpretation ("FIN") No. 48 "Accounting for Uncertainty in Income Taxes - An Interpretation of FASB Statement No. 109" regarding accounting for, and disclosure of, uncertain tax positions. This Interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, "Accounting for Income Taxes" and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Interpretation is effective for fiscal years beginning after December 15, 2006. The Corporation is currently evaluating the impact this Interpretation will have on its results and financial position.

In September 2006, the FASB issued Statement of Financial Accounting Standard ("SFAS") No. 157, "Fair Value Measurements." This statement defines fair value, establishes a fair value hierarchy to be used in generally accepted accounting principles and expands disclosures about fair value measurements. Although this statement does not require any new fair value measurements, the application could change current practice. The statement is effective for fiscal years beginning after November 15, 2007. The Corporation is currently evaluating the impact of this statement to its financial position and results of operations.

18. Related party transactions

Maverick Springs

In June 2003, the Corporation formalized an agreement to grant to Silver Standard Resources Inc., ("SSRI") an option to acquire the Corporation's interest in the silver mineralized material hosted in the Maverick Springs project in Nevada. The Corporation and SSRI have a common director. Under the terms of the agreement, the Corporation will retain its 100% interest in the gold mineralized material, and SSRI was to pay the Corporation \$1.5 million over four years including a cash payment of \$300,000 at closing. The remaining \$1.2 million would be used by the Corporation to fund exploration programs, land holding costs and option payments on the Maverick Springs project. At the time the transaction was completed, SSRI had paid the Corporation \$488,891, comprised of the required \$300,000 payment due at closing plus \$188,891 in exploration costs incurred through December 31, 2002. As of December 31, 2006, included in current assets is a receivable amount due from SSRI in the amount of \$96,420 (2005 \$11,964) to reimburse the Corporation for exploration expenditures incurred on the Maverick Springs project.

Amayapampa

In December 2006, we announced that, subject to a number of conditions, we had agreed to loan up to \$200,000 by way of a 90-day term loan, bearing interest at a rate of 12% per annum, to Luzon for Luzon to pay down debts already incurred and ongoing expenses in connection with the Amayapampa Project and Luzon's Lipichi project both located in Bolivia. The loan is to be secured by a general security agreement in favor of Vista. In addition, Vista recently entered into a letter of understanding with Luzon and Republic Gold Limited (Luzon's strategic partner) to reconstitute the affairs of Luzon to ensure that Luzon's strategic development is advanced in the best interest of its shareholders.

Entry into Arrangement and Merger Agreement for Proposed Transfer of Nevada Assets and Concurrent Acquisition of Nevada Assets Held by Pescios

As previously reported, on September 22, 2006, the Corporation entered into an Arrangement and Merger Agreement (the "Arrangement Agreement") with Carl Pescio, Janet Pescio and Allied Nevada pursuant to which the parties agreed to undertake a transaction that would result in the transfer of the Corporation's Nevada-based mining properties and related assets into Allied Nevada and the Pescios' transfer to Allied Nevada of their interests in certain Nevada-based mining properties and related assets, all to be carried out pursuant to an arrangement under the provisions of the *Business Corporations Act* (Yukon Territory) (the "Arrangement").

Pursuant to the Arrangement Agreement, among other things:

The Corporation will reorganize its business to split certain Nevada mining properties and related assets (the "Vista Nevada Assets") from its other properties and related assets;

The Corporation will ensure that all of the Vista Nevada Assets are held by its wholly-owned subsidiary, Vista Gold Holdings Inc. ("Vista U.S.") or subsidiaries wholly-owned by Vista U.S. and subsequently transfer all issued and outstanding shares of Vista U.S. and \$25 million in cash to Allied Nevada in return for the number of common shares of Allied Nevada equal to 27,500,000 less the number of Option Shares (as defined in the Arrangement Agreement); and

The Pescios will transfer their interests in certain Nevada mining properties and related assets (the "Pescio Nevada Assets") to Allied Nevada Gold Holdings LLC, a limited liability company incorporated under the laws of Nevada with Allied Nevada as its sole member, in return for 12,000,000 common shares of Allied Nevada and \$15 million in cash from Allied Nevada.

In connection with these transfers, the Corporation's shareholders will exchange each of their Vista Gold common shares and will receive, subject to applicable withholding taxes, (a) one of a newly created class of Vista Gold common shares, and (b) a *pro rata* portion of (i) the number of common shares of Allied Nevada ("Allied Nevada Shares") received by the Corporation as part of the Arrangement less (ii) the number of Allied Nevada Shares retained by the Corporation to facilitate the payment of any taxes payable in respect of the Arrangement. In addition, holders of options to acquire Vista Gold common shares will exchange their Vista Gold options for options to acquire Allied Nevada Shares and options to acquire newly created Vista Gold common shares and holders of warrants of Vista Gold will have their warrants adjusted in accordance with the terms of the warrants.

Completion of the transaction is subject to a number of conditions, including receipt of all required securityholder, court, regulatory and third party approvals and certain other customary conditions. As discussed below, the Corporation has received the required securityholder and court approvals. These conditions also include the requirement for the Corporation to complete a public equity financing that

raises proceeds of not less than \$25 million. This requirement has been met. On November 7, 2006 the Corporation completed a public equity issuance that resulted in net cash proceeds to the Corporation of approximately \$29.4 million (see Note 8(m)) after payment of agents' fees and offering expenses. Of the net proceeds from this offering, the Corporation plans to invest the first \$25 million in Allied Nevada Shares as described. Allied Nevada will use \$15 million of this investment as partial consideration for the purchase of the Pescio Nevada Assets. The remaining \$10 million, less costs and expenses or any amounts required to pay amounts owing to the Corporation (see discussion below) will be used by Allied Nevada to fund exploration and development projects and ongoing commitments.

In November 2006, the Corporation received the securityholder and court approvals required as conditions for completion of the transaction. The Corporation's securityholders approved the transaction by the required majorities at a special securityholders' meeting held on November 16, 2006. On November 29, 2006, the Supreme Court of the Yukon Territory granted its Final Order approving the Plan of Arrangement. Subject to receipt of the remaining required approvals, as well as completion of the registration of Allied Nevada's common shares under the Securities Exchange Act of 1934, the transaction is currently expected to close in the first quarter of 2007.

Prior to the completion of the transaction, the immediate cash needs of Allied Nevada are being met by loans from the Corporation pursuant to the Arrangement Agreement, which provides that, prior to the date of completion, the Corporation may loan money to Vista U.S. in amounts sufficient to undertake certain activities for the benefit of the business Allied Nevada will operate after the completion of the transaction, including purchase of mineral properties or property interests, payment of amounts necessary to secure the services of a Chief Executive Officer, and purchase of office equipment, software and other miscellaneous items to enable Allied Nevada to commence operations immediately after the completion of the transaction. These loans will bear interest at the rate of 6% per annum and all principal and interest owing by Vista U.S. to the Corporation in respect of such loans will be paid in full at the time of completion on behalf of Vista U.S. As of December 31, 2006 this loan amount was \$357,201 which included interest of \$3,308.

19. Subsequent Event

Amayapampa

On March 13, 2007, we entered into an agreement with Luzon Minerals Ltd. pursuant to which Vista granted to Luzon (a) for a period ending September 14, 2008 (subject to Luzon's right to extend such date in certain circumstances), an exclusive option to purchase from Vista 90% of its interest in the Amayapampa project, and (b) subject to the exercise of such option to purchase, a right of first offer over Vista's remaining 10% interest in the Amayapampa project, on and subject to the terms of the agreement. This agreement replaces all prior agreements between Vista and Luzon with respect to the Amayapampa project. Luzon's ability to exercise the option to purchase is subject to Luzon satisfying a number of conditions set out in the agreement. Subject to Luzon's right to extend the term of the agreement in certain circumstances, this agreement will terminate on September 14, 2008 unless the option to purchase has been exercised by Luzon prior to such date.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT.

Information concerning Vista Gold Corp.'s directors will be contained in Vista Gold Corp.'s definitive Proxy Statement to be filed pursuant to Regulation 14A promulgated under the United States *Securities Exchange Act of 1934* for the 2007 Annual General Meeting of Shareholders (the "Proxy Statement") under the caption "Particulars of Matters to be Acted Upon Election of Directors" and is incorporated herein by reference.

Information concerning Vista Gold Corp.'s executive officers is furnished following Item 4 of Part I hereof under the caption "Executive Officers of the Corporation".

Information concerning Vista Gold Corp.'s audit committee, including designation of the "Audit Committee Financial Expert" under applicable Securities and Exchange Commission rules, will be contained in the Proxy Statement under the captions "Corporate Governance Committees of the Board of Directors and Meetings" and " Audit Committee Report" and is incorporated herein by reference.

Information concerning certain filing obligations under the federal securities laws applicable to Vista Gold Corp.'s directors and executive officers, and holders of more than 10% of our Common Shares, will be contained in the Proxy Statement under the caption "Ownership of the Corporation's Common Shares" and is incorporated herein by reference.

The Corporation has adopted a code of ethics that applies to all its directors, officers and employees. This code is publicly available on the Corporation's website at www.vistagold.com and on SEDAR at www.sedar.com. Amendments to the code of ethics and any grant of a waiver from a provision of the code requiring disclosure under applicable United States Securities and Exchange Commission rules will be disclosed on the Corporation's website.

ITEM 11. EXECUTIVE COMPENSATION.

Information concerning this item will be contained in the Proxy Statement under the caption "Executive Compensation" and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

Except as to the information concerning securities authorized for issuance under equity compensation plans, which is furnished in Item 5 of Part II hereof under the caption "Equity Compensation Plan Information", the information concerning this item will be contained in the Proxy Statement under the caption "Compensation Committee Report on Executive Compensation Stock Option Plan" and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS.

Information concerning this item will be contained in the Proxy Statement under the captions "Interest of Certain Persons in Material Transactions and Matters to be Acted Upon" and "Indebtedness of Directors and Senior Officers" and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Information concerning this item will be contained in the Proxy Statement under the caption "Particulars of Matters to be Acted Upon Appointment of Auditors" and " Fees Paid to Auditors and their Independence from the Corporation" and is incorporated herein by reference.

PART IV**ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES.****Documents Filed as Part of Report***Financial Statements*

The following Consolidated Financial Statements of the Corporation are filed as part of this report:

1. Report of Independent Accountants dated March 15, 2007.
2. Consolidated Balance Sheets At December 31, 2006 and 2005.
3. Consolidated Statements of Loss Years ended December 31, 2006, 2005, and 2004.
4. Consolidated Statements of Deficit Years ended December 31, 2006, 2005 and 2004.
5. Consolidated Statements of Cash Flows Years ended December 31, 2006, 2005, and 2004.
6. Notes to Consolidated Financial Statements.

See "Item 8. Consolidated Financial Statements and Supplementary Data".

Financial Statement Schedules

No financial statement schedules are filed as part of this report because such schedules are not applicable or the required information is shown in the Consolidated Financial Statements or notes thereto. See "Item 8. Consolidated Financial Statements and Supplementary Data".

CERTIFICATION

I, Michael B. Richings, certify that:

1. I have reviewed this annual report on Form 10-K of Vista Gold Corp.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
