Notes to Schedule of Portfolio Investments (Unaudited):**Security Valuation**

Edgar Filing: FOXBY CORP. - Form N-Q

Securities traded on a U.S. national securities exchange ("USNSE") are valued at the last reported sales price on the day the valuations are made. Securities traded primarily on the Nasdaq Stock Market ("Nasdaq") are normally valued by the Fund at the Nasdaq Official Closing Price ("NOCP") provided by Nasdaq each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., ET, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, Nasdaq will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. Securities that are not traded on a particular day and securities traded in foreign and over the counter markets that are not also traded on a USNSE or Nasdaq, are valued at the mean between the last bid and asked prices. Certain of the securities in which the Fund invests are priced through pricing services that may utilize a matrix pricing system which takes into consideration factors such as yields, prices, maturities, call features, and ratings on comparable securities. Bonds may be valued according to prices quoted by a dealer in bonds that offers pricing services. Open end investment companies are valued at their net asset value. Foreign securities markets may be open on days when the U.S. markets are closed. For this reason, the value of any foreign securities owned by the Fund could change on a day when stockholders cannot buy or sell shares of the Fund. Securities for which market quotations are not readily available or reliable and other assets may be valued as determined in good faith by the Investment Manager under the direction of or pursuant to procedures established by the Fund's Board of Directors. Due to the inherent uncertainty of valuation, these values may differ from the values that would have been used had a readily available market for the securities existed. These differences in valuation could be material. A security's valuation may differ depending on the method used for determining value. The use of fair value pricing by the Fund may cause the net asset value of its shares to differ from the net asset value that would be calculated using market prices.

Fair Value Measurements

Fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The Fund uses a three level hierarchy for fair value measurements based on the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available under the circumstances. The Fund's investment in its entirety is assigned a level based upon the inputs which are significant to the overall valuation. The hierarchy of inputs is summarized below.

- Level 1 - quoted prices in active markets for identical investments.
- Level 2 - other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining fair value of investments).

The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of March 31, 2009 in valuing the Fund's assets and liabilities carried at fair value:

Valuation Inputs

Level 1

Investments in Securities

\$ 3,760,870

Edgar Filing: FOXBY CORP. - Form N-Q

| | |
|---------|--------------|
| Level 2 | - |
| Level 3 | 167,944 |
| | \$ 3,928,814 |

The following is a reconciliation of the Fund's investments that were valued using Level 3 inputs for the period:

| | Investments In Securities |
|--|----------------------------------|
| Balance, December 31, 2008 | \$ 395,573 |
| Net purchases (sales) | 4,498 |
| Change in unrealized appreciation (depreciation) | (232,127) |
| Transfers in and / or out of Level 3 | - |
| Balance, March 31, 2009 | \$167,944 |

Cost for Federal Income Tax Purposes

The cost of investments for federal income tax purposes is \$6,945,833 and net unrealized depreciation is \$3,017,019, comprised of aggregate gross unrealized appreciation and depreciation of \$14,357 and \$3,031,376, respectively.

Illiquid and Restricted Securities

The Fund owns securities which have a limited trading market and/or certain restrictions on trading and, therefore, may be illiquid and/or restricted. Such securities have been valued at fair value in accordance with the procedures described above. Due to the uncertainty of valuation, these values may differ from the values that would have been used had a ready market for these securities existed and these differences could be material. Illiquid and/or restricted securities owned at March 31, 2009, were as follows:

| Security | Acquisition Date | Cost | Value |
