**First quarter 2008
Earnings Release**

Portugal Telecom

Earnings Release

Lisbon, Portugal, 8 May 2008

Portugal Telecom announced today its results for the quarter ended 31 March 2008.

In 1Q08, consolidated operating revenues amounted to Euro 1,576 million, an increase of 7.9% y.o.y. Reported EBITDA increased by 4.3% y.o.y to Euro 595 million, equivalent to a margin of 37.8%, and income from operations decreased by 2.1% y.o.y to Euro 298 million. Reported net income for the period amounted to Euro 140 million, a decrease of 20.8% over the same period of last year. On a comparable basis, adjusting for exceptional items, net income would have decreased by 7.1% y.o.y in 1Q08. EBITDA minus Capex totalled Euro 453 million, an increase of 2.4% y.o.y. As at 31 March 2008, net debt amounted to Euro 4,767 million and after-tax unfunded post retirement benefit obligations totalled Euro 942 million. Diluted adjusted earnings per share increased by 10.9% y.o.y.

(1) EBITDA = income from operations + depreciation and amortisation. (2) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + net other costs (gains). (3) Net income adjusted for several exceptional items as described in table 5. (4) EBITDA margin = EBITDA / operating revenues. (5) Net debt divided by EBITDA. (6) Earnings per share computed using the net income, with and without the adjustments of the exceptional items, less the costs associated with the convertible bonds divided by the diluted number of shares (see table 6).

Financial Review

Income Statement

Consolidated operating revenues increased by 7.9% y.o.y in 1Q08, driven by growth at Vivo and TMN. Vivo's operating revenues increased by 22.0% y.o.y in Euros and by 14.8% y.o.y in Reais in 1Q08, primarily on the back of continued customer growth. TMN operating revenues increased by 7.1% y.o.y, underpinned by continued customer growth, particularly in postpaid and in wireless broadband. Wireline operating revenues decreased by 4.3% y.o.y in 1Q08, as a result of the negative impact of continued line loss and pricing pressure on retail revenues, notwithstanding the increasing positive contributions from TV business, wholesale and data & corporate revenues. Other revenues (including intra-group eliminations) decreased to Euro 43 million primarily due to lower revenues from the call centre business in Portugal.

(1) Considering a Euro/Real average exchange rate of 2.7635 in 1Q07 and 2.6012 in 1Q08. (2) EBITDA = income from operations + depreciation and amortisation. (3) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + net other costs (gains).

International assets have been gaining increased weight in overall revenues, up from 42.1% in 1Q07 to 46.9% in 1Q08, with Brazil being the main growth driver. Brazil already accounts for 43.5% of consolidated revenues.

Financial Review

Table 3 _ Contribution to consolidated revenues by region

Portugal	836.4	846.2	(1.2%)
Brazil (1)	685.1	562.0	21.9%

Total operating revenues	1,575.8	1,460.8	7.9%

(1) Considering a Euro/Real average exchange rate of 2.7635 in 1Q07 and 2.6012 in 1Q08. Includes mainly Vivo and Mobitel. (2) Includes only fully consolidated assets, namely MTC, CVT, CST and Timor Telecom. Excludes equity consolidated assets, namely Médi Télécom, Unitel, and CTM.

EBITDA increased by 4.3% y.o.y in 1Q08 to Euro 595 million, with margin at 37.8%. EBITDA improvement in the period was driven primarily by growth in the mobile divisions, Vivo and TMN. Vivo's EBITDA increased by 21.8% y.o.y (14.6% y.o.y in local currency), primarily on the back of the strong increase in revenues. As for TMN, EBITDA increased by 3.5% y.o.y, driven by robust customer and revenue growth, namely in wireless data, notwithstanding intense commercial activity (+23.0% increase in gross additions). Wireline EBITDA decreased by 7.1% y.o.y, as a result of the reduction in top line, as well as the increase in the costs associated with the launch of new products and services, namely in the pay-TV segment. Other EBITDA increased to Euro 22 million in 1Q08, mainly as a result of the performance of CVT and Mobitel and also due to a reduction in holding costs.

(1) Considering a Euro/Real average exchange rate of 2.7635 in 1Q07 and 2.6012 in 1Q08. (2) EBITDA = income from operations + depreciation and amortisation.

International assets have been gaining increased importance in terms of EBITDA, with Brazil already accounting for 31.2% in 1Q08 (26.8% in 1Q07). The EBITDA performance of the African assets in 1Q08 was penalised by MTC, due to the depreciation of the Namibian Dollar and higher commercial costs. Fully consolidated international assets contribute with 36.0% of consolidated EBITDA (up from 31.8% in 1Q07).

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Depreciation and amortisation costs increased by 11.6% y.o.y. in 1Q08 to Euro 297 million, reflecting mainly higher contributions from: (1) Vivo, primarily explained by the appreciation of the Real and by higher depreciation rates for the TDMA network, following the acceleration of the GSM rollout; (2) TMN, mostly due to increased amortisation coming from the capitalisation in 4Q07 of the commitments towards the information society, and (3) the wireline business, mostly explained by the amortisation of television investments, namely in the IPTV platform and in the transponder satellite capacity for the DTH offer.

Curtailment costs amounted to Euro 15 million in 1Q08, as compared to Euro 53 million in the same period of last year, corresponding to a reduction of 62 employees in 1Q08 and 151 employees in 1Q07.

Financial Review

Net interest expenses remained broadly flat at Euro 50 million, with the increase in net interest expenses from domestic operations, primarily related to the increase in PT's average net debt due to the share buyback programme, being offset by the reduction in net interest expenses from Vivo, mainly explained by the decrease of the average net debt and of average cost of debt. Consolidated average cost of debt of PT was 4.4% in 1Q08. Excluding Brazil, the average cost of debt remained broadly flat at 3.9% in 1Q08.

Equity in earnings of affiliates in 1Q08 amounted to Euro 34 million, as compared to Euro 19 million in 1Q07. This item includes mainly PT's share in the earnings of: (1) Unitel (Euro 24 million in 1Q08 vs. Euro 19 million in 1Q07); (2) Médi Télécom (gain of Euro 3 million in 1Q08 vs. a loss of Euro 3 million in 1Q07); (3) CTM (Euro 4 million in 1Q08 vs. Euro 5 million in 1Q07), and (4) UOL (Euro 2 million in 1Q08 vs. Euro 3 million in 1Q07).

Net other financial losses amounted to Euro 26 million in 1Q08 (net gains of Euro 48 million in 1Q07). This item includes primarily: (1) net foreign currency losses of Euro 12 million in 1Q08, primarily explained by the depreciation of the US Dollar, as compared to net foreign currency gains of Euro 2 million in 1Q07; (2) the change in fair value of PT's free-standing cross currency derivatives (losses of Euro 10 million in 1Q08 vs. losses of Euro 1 million in 1Q07); (3) the change in fair value of equity swap contracts on PTM shares (gains of Euro 38 million in 1Q07), which were cash settled in 2Q07, and (4) the financial settlement of equity swap contracts on 9.3 million own shares in 1Q07 (gains of Euro 16 million).

Provision for income taxes amounted to Euro 79 million in 1Q08 (Euro 76 million in 1Q07), corresponding to an effective tax rate of 32% in 1Q08 (30% in 1Q07). The increase in the effective tax rate is primarily explained by the reversal of deferred tax liabilities of Euro 3 million in 1Q07 related with the taxation of capital gains.

Income attributable to minority interests remained flat at Euro 25 million in the 1Q08. The increase in income attributable to minority interests of Vivo (Euro 12 million in 1Q08 vs. Euro 6 million in 1Q07) and the income attributable to minority interests of Africatel in 1Q08 (Euro 4 million), following the sale of a 22% stake of this holding company in August 2007, were offset by the income attributable to minority interests related with discontinued operations in 1Q07 (Euro 10 million).

Net income amounted to Euro 140 million in the 1Q08, a decrease of 20.8% y.o.y, with the improvement in EBITDA and lower curtailment costs in 1Q08 being more than offset by an increase in depreciation and amortisation costs in 1Q08 and also by the exceptional financial gains related with equity swaps recorded in 1Q07 and by the income

attributable to discontinued operations. Adjusting for exceptional items, net income would have decreased by 7.1% y.o.y in 1Q08 to Euro 151 million (see table 5).

(1) EBITDA adjustments are related with the reversal of PIS/Cofins taxes in 1Q07.

Earnings per Share

The average number of shares outstanding decreased by 12.8% to 965 million in 1Q08, while the diluted average number of shares outstanding over the same period declined by 12.1% to 1,030 million. As at the end of 1Q08, the number of shares outstanding adjusting for the 20.64 million own shares recognised in the balance sheet was 922 million.

On a per share basis, diluted adjusted earnings increased by 10.9% y.o.y in 1Q08 to Euro 15 cents as the decrease in net income, adjusted for the costs associated with the exchangeable bond maturing in 2014, was more than offset by the decrease in the number of shares, resulting from the ongoing share buyback programme.

Diluted earnings are computed adjusting for the costs of convertible bonds.

Capex

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Total capex increased by 10.8% y.o.y in 1Q08 to Euro 143 million, equivalent to 9.0% of revenues, primarily driven by the increase in the capex of the mobile business. Wireline capex was broadly flat at Euro 49 million, with capex being primarily directed towards network upgrades to provide greater bandwidth, in part related to television services recently launched and client-related capex. TMN's capex increased by 14.3% y.o.y to Euro 32 million, driven mainly by the build up of network capacity, due to the substantial growth in wireless broadband, and 3G/3.5G coverage. Capex at Vivo reached Euro 48 million in 1Q08, an increase of 11.5% y.o.y (4.9% in local currency), and continued to be directed towards

Financial Review

network coverage and capacity, namely in GSM/EDGE. In 1Q08, other capex increased to Euro 15 million, as compared to Euro 11 million in 1Q07, mainly as a result of the growth in the activities of the various businesses.

(1) Considering a Euro/Real average exchange rate of 2.7635 in 1Q07 and 2.6012 in 1Q08.

Cash Flow

Operating cash flow amounted to Euro 304 million in 1Q08, an increase of 3.2% y.o.y, which is primarily explained by the higher EBITDA minus Capex in 1Q08.

Table 8 _ Free cash flow

	1Q08	1Q07	Euro million y.o.y
Operating cash flow	304.1	294.5	3.2%

Dividends received (1)	6.5	32.9	(80.1%)
Other cash movements	(1.5)	(2.9)	(49.9%)
Free cash flow	175.0	170.6	2.6%

(1) In 1Q07 this item included dividends received from Unitel of Euro 27 million related to 2005 earnings.

Free cash flow increased by 2.6% y.o.y to Euro 175 million in 1Q08, primarily due to: (1) the increase in operating cash-flow, and (2) the cash inflow related to the disposal of financial investments, which were partially offset by the decrease in the dividends received from associate companies.

Net disposals of financial investments in 1Q08 were related to the sale of the 34% stake in Banco BEST (Euro 16 million). Given that the transaction is still pending authorisation from the Portuguese Central Bank the resulting accounting capital gain of Euro 9 million was deferred pending approval.

The reduction in interest paid from Euro 86 million in 1Q07 to Euro 82 million in 1Q08 is explained mainly by the decrease in Vivo's interest payments resulting from the reduction in the cost of debt and the decrease in average net debt, which was partially offset by the increase in PT's interest payments primarily due to the increase in average net debt and the payment of the first semi-annual interest installment of exchangeable bonds issued in August 2007.

Financial Review

Consolidated Net Debt

Consolidated net debt amounted to Euro 4,767 million as at 31 March 2008, as compared to Euro 4,382 million as at 31 December 2007. The increase in net debt over the period is explained primarily by the share buyback currently under execution.

As at 31 March 2008, 82% of total debt was medium and long-term, and 66% of total debt was set in fixed rates. As at 31 March 2008, 86% of total debt was denominated in Euros and 14% in Brazilian Reais. The 50% share of Vivo's net debt, proportionally consolidated by PT, amounted to Euro 394 million as at 31 March 2008. At the end of March 2008, approximately 95% of Vivo's net debt was either Real-denominated or hedged into Reais.

Table 9 _ Change in net debt

	1Q08	1Q07

Net debt (final balance)	4,767.5	3,645.7
Change in net debt	385.6	(110.9)
Change in net debt (%)	8.8%	(3.0%)

(1) In 1Q08, PT contracted equity swaps over 68.6 million own shares under the share buyback programme currently being executed.

The total undrawn amount of PT's committed commercial paper lines and standby facilities stood at Euro 1,425 million as at 31 March 2008. The amount of available cash from the domestic operations plus the undrawn amount of PT's committed commercial paper lines and standby facilities totalled Euro 2,140 million at the end of March 2008.

In 1Q08, PT's average cost of debt and maturity was 4.4% and 6.0 years respectively. Excluding Brazil, PT's average cost of debt was 3.9% in 1Q08, with a maturity of 5.9 years at 31 March 2008. In 1Q08, the net debt to EBITDA ratio was 2.0x (1.6x in 1Q07) and EBITDA cover stood at 11.8x (11.6x in 1Q07).

Post Retirement Benefit Obligations

As at 31 December 2007, the projected benefit obligations (PBO) of PT's post retirement benefits amounted to Euro 4,203 million. The PBO was computed based on a discount rate of 5.25% for pension and healthcare obligations and 4.75% for salary obligations to pre-retired and suspended employees. PT's post-retirement benefit plans have been closed to new participants since 1994 for pensions and since 2000 for

healthcare.

Gross unfunded obligations decreased by Euro 22 million in 1Q08 to Euro 1,282 million, primarily as a result of: (1) contributions and payments made during the period (Euro 49 million), which are mainly related with payments to pre-retired and suspended employees; (2) PRB costs amounting to Euro 11 million, and (3) curtailment costs of Euro 15 million.

(1) In 1Q08, the PRB cost recorded in the income statement amounted to Euro 11.0 million, including a gain of Euro 0.4 million related to the amortisation of prior years service gains of unvested rights. (2) This caption includes mainly payments of salaries to pre-retired and suspended employees and healthcare expenses.

Shareholders Equity

As at 31 March 2008, shareholders equity excluding minority interests amounted to Euro 172 million, a decrease of Euro 1,167 million in 1Q08. This decrease is mainly explained by the equity swaps contracted over PT's own shares in 1Q08 (Euro 576 million) and by the dividend, attributed to shareholders, related to fiscal year 2007 (Euro 533 million), notwithstanding the Euro 140 million net income generated in the period. The negative currency translation adjustments of Euro 194 million are explained by depreciation of the Euro/Real exchange rate, which declined to 2.7554 at the end of March 2008. As at 7 May 2008, this negative currency translation adjustment is broadly eliminated as the Euro / Real exchange rate increased to 2.57 (vs. 2.5963 as at 31 December 2007).

(3) In 1Q08, PT contracted equity swaps over 68.6 million own shares under the share buyback programme currently being executed, which were physically exercised on 20 March 2008.

Distributable reserves decreased by Euro 1,135 million to Euro 722 million as at the end of March 2008, with the net income generated in 1Q08 under Portuguese GAAP (Euro 113 million) being more than offset by the acquisition of treasury shares in 1Q08 (Euro 712 million) and by the dividends already attributed (Euro 533 million), following its approval at the AGM of 28 March 2008.

(1) In 1Q08, PT acquired 83.2 million own shares for a total amount of Euro 712 million, through the physical exercise, on 20 March 2008, of equity swaps contracted in 4Q07 and 1Q08 under the share buyback programme currently being executed. These shares were cancelled on 24 March 2008.

As approved at the Shareholders Meeting of 27 April 2007 and for the purposes of the execution of the share buyback programme, on 24 March 2008 PT reduced its share capital in the amount of Euro 2,496,144.69 through the cancellation of 83,204,823 treasury shares, corresponding to 8.11% of the share capital. As a result, PT's share capital is now equivalent to Euro 28,277,855.31 represented by 942,595,177 shares.

As part of the share buyback programme under execution, PT has acquired, until 31 March 2008, a total of 186,261,323 own shares, equivalent to 16.5% of PT's share capital at the time of the approval of the share buyback. Additionally, with reference to 31 March 2008, the total amount returned to shareholders, through the share buyback programme under execution totals Euro 1,762 million. As at 31 March 2008, PT had a total of 20,640,000 own shares held through equity swap contracts, which were contracted under the previous share buyback programme. The number of outstanding shares, adjusting for equity swaps on own shares recognised in the balance sheet, is 921,955,177.

Consolidated Balance Sheet

As at 31 March 2008, the net exposure (assets minus liabilities) to Brazil amounted to R\$ 7,542 million (Euro 2,737 million at the Euro/Real exchange rate of 31 March 2008). The assets denominated in Brazilian Reais in the balance sheet, as at 31 March 2008, amounted to Euro 5,071 million, equivalent to approximately 42% of total assets.

Operating Review

Wireline

Wireline operating revenues decreased by 4.3% y.o.y in 1Q08 to Euro 478 million, with the reduction in voice revenues more than offsetting the increase in pay-TV, wholesale and data & corporate revenues in the quarter.

Retail revenues fell by 8.3% y.o.y in 1Q08 on the back of continued competition from other fixed and cable operators as well as from mobile operators, both in voice and broadband. Voice revenues decreased by 10.2% y.o.y in 1Q08, as a result of line loss and increased pricing pressure, particularly in ULL and cable areas. Data and other retail revenues increased by 0.9% y.o.y on the back of the positive contribution of the pay-TV services.

Wholesale revenues increased by 3.1% y.o.y in 1Q08, primarily as a result of the growth in leased lines and, to a lesser extent, in unbundled local loop (ULL) on the back of increasing ULL accesses (+46.8% y.o.y).

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Data & corporate revenues increased by 2.1% y.o.y in 1Q08, as a result of the continued focus on providing the corporate market, which is becoming increasingly more sophisticated, with more advanced and customised solutions combining telecoms and IT. As a result of this trend, traditional voice and data services are being increasingly migrated to Ethernet and IP technologies. The growth in the quarter was

Operating Review

underpinned by the increase in revenues from network management, outsourcing & IT solutions (+4.1% y.o.y).

Other revenues decreased by 8.9% y.o.y in 1Q08, with the decrease in directories and equipment sales more than offsetting the growth in portal revenues (+62.3% y.o.y).

EBITDA amounted to Euro 223 million in 1Q08, decreasing 7.1% y.o.y. EBITDA margin declined by 1.4pp y.o.y, as a result of (1) the continued revenue loss (Euro 22 million in 1Q08, when compared with 1Q07), and (2) the launch of new services, namely pay-TV, which increased programming costs (included in direct costs) and commercial costs, notwithstanding the continued reduction in wages and salaries (-10.3% y.o.y) and other operating costs (-2.3% y.o.y). In 1Q08, the number of employees declined by 10.5% y.o.y to 6,305. The net reduction in headcount in 1Q08 reached 49 employees, thus improving the efficiency ratio to 659 lines per employee.

Capex amounted to Euro 49 million in 1Q08, equivalent to 10.2% of operating revenues. Capex was directed mainly towards: (1) network upgrades to provide greater bandwidth to customers; (2) network capacity to provide pay-TV services, and (3) client-related capex as a result of investments in TV terminal equipment (set-top boxes) for both residential and corporate clients. EBITDA minus Capex amounted to Euro 174 million in 1Q08.

(1) 1Q08 reflects a database cleanup of 103 thousand customers (related to inactive prepaid broadband customers), undertaken at the end of 4Q07. (2) Retail accesses per PSTN/ISDN line

In 1Q08, voice lines fell by 8.2% y.o.y to 2,948 thousand in 1Q08, as a result of 34 thousand net disconnections of traffic-generating lines and 28 thousand net disconnections of carrier pre-selection lines. In terms of competitors' lines, voice-only lines (carrier pre-selection + wholesale line rental) decreased by 47 thousand in 1Q08, while ULL lines increased by 29 thousand in 1Q08. Line loss remained broadly flat. Nevertheless, competitive pressure has been increasing with the continued presence of GSM-based fixed offers and wireless broadband that has contributed further to fixed-mobile migration, and with increased price aggressiveness of triple play offerings by cable operators. ADSL retail accesses increased by 5 thousand to 657 thousand driven by a 14 thousand increase in the flat-fee segment that was partially offset by a net decrease of 9 thousand in the pay-as-you-go segment.

In terms of triple-play services, PT continued to market Meo, its television offer, which is showing significantly increased acceptance levels. Until the end of 1Q08, Meo was offered through the IPTV platform over ADSL 2+, with over 100 channels, despite not having been yet advertised above the line during the quarter. This service includes advanced features such as digital recording, pause-TV, video-on-demand, HD (high definition) channels and flexibility in the choice of the channels subscribed. At the end of 1Q08, PT had a total base of 47 thousand

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

pay-TV customers, having added 26 thousand subscribers during the quarter, more than doubling its customer base as at the end of 4Q07. The take-up of the TV

Operating Review

service has accelerated throughout the quarter, with net additions of 7, 8 and 11 thousand customers in January, February and March respectively.

On 2 April 2008, PT announced the launch in record time of its nationwide TV offer through satellite (DTH – direct to home), as a means to complement the existing IPTV offer. Meo will be PT's TV brand across the various platforms, namely at home (through the IPTV and satellite), in the mobile handset (through Meo Mobile) or in a computer (through the horizontal Sapo content platform). This DTH service will allow for nationwide coverage through the Hispasat satellite, the same as its competitors, offering in excess of 70 channels. PT will be using a full high-definition solution based on MPEG4 and Nagra's latest generation conditional access technology, which will allow for a number of advanced TV features, such as interactive EPG, multi-room and advanced PVR functionalities.

As part of the Pay-TV launch, PT has significantly revamped its television offer with the introduction of new content like Sony Entertainment, Animax, Fox Next and Fox News. PT also reinforced the distribution network and the installation workforce for both the IPTV and the satellite services. From 2 April onwards, PT launched an extensive campaign, present in traditional means, like TV, radio and press, but also using non-conventional means like viral marketing. The first ad commercial of the Meo campaign, broadcasted in the main three free-to-air channels, was viewed by 2.5 million people, with an audience share of 81%. The reaction to the campaign has been very positive: three weeks after the launch of the campaign spontaneous ad recall reached 53% in April (up from 12% before the campaign) and proved ad recall reached 49%.

The launch of the nationwide TV offer strengthens PT's value proposition to its residential customers. This should allow for PT to enhance average revenue per user, through the up-selling of additional services, whilst contributing to increased retention through an attractive service offer at competitive triple-play prices.

It is worth highlighting that the number of RGU per access, measured by the number of retail accesses per PSTN/ISDN line, continues to increase with the rollout of the TV offer (1.24 and 1.22 revenue generating units per line, as at the end of 1Q08 and 4Q07 respectively), notwithstanding the database cleanup undertaken at the end of 4Q07, related with inactive prepaid ADSL broadband accesses. In order to arrest line loss, the sale of TV and broadband services is critical to the strategy of the wireline business. The new triple-play strategy is proving to be a successful means of growing new customers, as 40% of the new customers did not subscribe to any service from PT.

Blended ARPU decreased by 1.0% y.o.y in 1Q08 to Euro 29.8 as the decline in the subscription and voice ARPU (-4.0%) more than offset the growth in data ARPU, which increased by 11.8% y.o.y and was driven by the increased penetration of new services, such as pay-TV.

Although retail traffic fell by 5.5% y.o.y. in 1Q08, as a result of line loss, retail MOU remained broadly flat at 159 minutes per month, reflecting the positive impact of the rollout of flat-rate pricing plans.

Operating Review

Domestic Mobile

Operating revenues increased by 7.1% y.o.y in 1Q08 to Euro 389 million, supported by the growth of service revenues (+5.9% y.o.y), as a result of the growth in data revenues, which increased 40.9% y.o.y, and equipment sales (+21.4% y.o.y).

Customer revenues increased by 6.7% y.o.y to Euro 282 million on the back of strong customer growth, particularly in postpaid and wireless broadband, and showing an acceleration over previous quarters. Worth highlighting that this marks the fifth consecutive quarter of growth in customer revenues at TMN.

Interconnection revenues increased by 5.6% y.o.y in 1Q08 to Euro 62 million. A final decision concerning the draft proposal issued by the regulator on mobile termination rates (MTR), which aims to bring tariffs down to Euro 6.5 cents, as of 1 October 2008 from the current value of Euro 11 cents, is still pending.

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

EBITDA increased by 3.5% y.o.y to Euro 167 million in 1Q08, notwithstanding: (1) significantly higher commercial activity (+23.0% increase in gross additions) with an increased focus on prepaid to postpaid migration and wireless broadband sales; (2) the adverse impact of roaming pricing cuts, and (3) higher support costs, related with the provision of increasingly more complex data services. The ongoing SARC reduction supported margins, in spite of the strong pick up in commercial activity. EBITDA margin stood at 42.8% in 1Q08.

Capex increased from Euro 28 million in 1Q07 to Euro 31 million in 1Q08 and was directed primarily towards network capacity, as a result of increased voice and data usage, and 3G/3.5G coverage (approximately 65% of network capex). EBITDA minus Capex in 1Q08 amounted to Euro 135 million, an increase of 1.3% y.o.y.

Operating Review

Total customers increased by 11.4% y.o.y to 6,365 thousand with net additions in 1Q08 reaching 103 thousand, as a result of the successful Easter campaign both for voice and data offers, including the strong take-up of wireless broadband. TMN continued to focus on postpaid, particularly on the corporate segment, and on prepaid to postpaid migration. As a result, more than 100% of net additions in the period were postpaid, more than offsetting the loss of prepaid customers. As at the end of 1Q08, postpaid customers accounted for 25.5% of total customers, up from 20.5% in 1Q07.

TMN launched several initiatives during the quarter aimed at stimulating usage, namely (1) Triplicar Páscoa 2008 , which triples a Euro 15 recharge during the Easter period, and (2) Páscoa Roaming , which offers a 50% discount over the normal pricing after the third minute of a roaming call. In terms of handsets, TMN continued to focus on having a balanced and broad portfolio, with an important component of exclusive handsets, which allows for greater pricing flexibility and thus a better control of SARC.

Wireless broadband remained a key priority during the quarter. In order to increase the competitiveness of its offerings, TMN increased the access speed of its broadband products, while maintaining prices stable. TMN launched a Test Drive campaign, which allows customers to test the broadband products for free during one month. Additionally, TMN continued to strengthen its position in the market by further investing in HSDPA coverage and capacity.

On 2 April, as part of PT's pay-TV multiplatform strategy, TMN re-launched its mobile TV offer. Meo Mobile offers in excess of 30 channels through a mobile handset. During April, TMN introduced a mobile handset specifically designed for Meo Mobile, further enhancing PT's fixed-mobile and multimedia convergent services.

ARPU decreased by 4.0% y.o.y in 1Q08 to Euro 18.4, mainly as a result of the strong subscriber growth, increased penetration in lower segments of the market, growing number of users with multiple SIM cards and lower roaming prices. Nevertheless, the growth in the average customer base more than offset the dilution in ARPU, allowing service revenues to grow by 5.9% y.o.y in 1Q08. ARPU also reflected the EU-imposed changes to wholesale roaming prices, which came into effect as of 1 September 2007, although the price effects were mitigated, to a certain extent, by increased volumes. Blended MOU decreased by 1.5% y.o.y in 1Q08 to 114 minutes, primarily explained by growth in the

customer base (+11.4% y.o.y, EoP).

Operating Review

Data services continued to contribute strongly to top line growth, with data revenues having increased by 40.9% y.o.y in 1Q08 and already accounting for 18.6% of service revenues, up from 14.0% last year. The increase in data service revenues is primarily based on non-SMS data revenues, which more than doubled on an annual basis and already accounted for 47.0% of total data revenues in 1Q08. This growth in non-SMS data was driven by a strong performance in terms of wireless broadband. Data usage, measured in kilobytes, increased by more than five times in 1Q08 when compared to last year.

Brazilian Mobile

Vivo's operating revenues, as stated in Brazilian Reais and in accordance with IFRS, increased by 14.8% y.o.y in 1Q08 to R\$ 3,468 million, primarily as a result of the growth in service revenues (+9.2% y.o.y), which was underpinned by growth in data revenues and in customers. Equipment sales increased by 160.0% y.o.y in 1Q08 to R\$ 298 million as a result of increased commercial activity (gross additions in 1Q08 increased by 55.9% y.o.y).

EBITDA increased by 14.6% y.o.y to R\$ 956 million in 1Q08, as a result of the increase in revenues. Excluding exceptional items, EBITDA would have increased by 16.7% y.o.y. Unitary SARC, which includes marketing, handset subsidies and commissions, fell by 10.8% y.o.y in

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

1Q08 notwithstanding the higher commercial activity. As a result of the measures implemented over the past year, the provision for doubtful receivables in 1Q08 fell to 4% of operating revenues. EBITDA margin has remained flat in 1Q08 at 27.6%, whereas, adjusting for exceptional items, EBITDA margin increased by 0.4pp to 27.6%, notwithstanding the strong customer growth and its impact on both acquisition costs and upfront FISTEL fees.

Operating Review

Capex increased by 4.9% y.o.y to R\$ 247 million in 1Q08 and was mainly directed to network coverage, capacity and quality, namely in the GSM/EDGE technology, to new customer service and front office systems and to adaptation to the Number Portability project. The GSM/EDGE network overlay was implemented in record time and already covers 2,324 municipalities, already exceeding the number of municipalities served by CDMA network.

(1) Operating data calculated using Brazilian GAAP.

Vivo's customer base increased by 18.2% y.o.y to 34,323 thousand, with net additions reaching 839 thousand in 1Q08 on the back of significantly higher commercial activity when compared with the same period of last year. Gross additions increased by 55.9% y.o.y in the quarter. Vivo has the biggest handset distribution network, with more than 8,800 points of sale, and more than 412 thousand recharge points. GSM accounted for approximately 83% of total gross additions in 1Q08, bringing the total number of GSM customers to 14.7 million at the end of 1Q08, equivalent to 42.8% of total customers.

Vivo's blended MOU has remained flat y.o.y in 1Q08 at 75 minutes, despite strong customer growth, as a result of successful campaigns aimed at increasing consumption in the prepaid segment. Vivo's blended ARPU reached R\$ 29.8 in 1Q08, a slight decrease of 0.7% y.o.y. Customer ARPU increased by 3.1% y.o.y on the back of higher penetration of data services. Data revenues increased by 47.7% y.o.y in 1Q08, representing 10.4% (+2.3pp y.o.y) of service revenues. In terms of data services, the main reasons for this growth were: (1) the strong increase in service revenue from Play, Java, SMS, as well as the increase in the customer base of Zap, Flash/Desk Modem, Black Berry and Smart Mail customers; (2) the increase in the use of person-to-person SMS, as a consequence of the increase of recharges with services and activations of post-paid plans with data advantages; (3) incentive promotion for the usage of SMS Contents (interactivity actions on the TV and other media), and (4) new partnerships with contents providers.

On 3 April 2008, Vivo concluded the acquisition of Telemig Celular and Tele Norte Celular. Additionally, Vivo sold Tele Norte Celular to Telemar Norte Leste as per Vivo's press release on 20 December 2007. Additionally, on 8 April, Vivo launched the voluntary tender offer over up to one third of preferred shares of Telemig Celular and Telemig Participações.

Médi Télécom revenues increased by 3.8% y.o.y in 1Q08 to MAD 1,220 million, while EBITDA increased by 7.4% y.o.y to MAD 508 million. The mobile customer base increased by 20.9% y.o.y to 6,808 thousand, with net additions in 1Q08 totalling 143 thousand. MOU decreased by 3.0% y.o.y in 1Q08 to 51 minutes. ARPU totalled MAD 58 in 1Q08, a decrease of 20.6% over the same period of last year, mainly due to the significant growth of the customer base, the increasing proportion of lower ARPU customers, the decrease of interconnection tariffs and the increased competition in the market.

Unitel's revenues and EBITDA increased by 44.8% and 35.7% y.o.y respectively in 1Q08, underpinned by strong customer growth, both in Luanda and in the main districts of the country. EBITDA margin reached 60% in 1Q08. Net additions totalled 290 thousand in 1Q08, with the total customer base reaching 3,597 thousand at the end of March 2008, an increase of 55% over the same period of last year. In 1Q08, Unitel's MOU decreased by 14.7% y.o.y to 104 minutes. ARPU totalled USD 24 in 1Q08, a decrease of 9.8% over the same period of last year, as a result of the strong growth in the customer base.

MTC's revenues and EBITDA increased by 10.1% and 1.4% y.o.y respectively in 1Q08. The EBITDA evolution was impacted by the increase in commercial costs, as a result of the increasing competition and the increasing network costs, related to network rollout. Net additions totalled 38 thousand in 1Q08, with total customers reaching 838 thousand at the end of March 2008, an increase of 30.9% over the same period of last year. Postpaid customers increased by 35.2% y.o.y, representing 9% of total customer base. ARPU totalled NAD 118 in 1Q08, a decrease of 15.8% y.o.y, primarily as a result of the growth in the customer base in the period.

Subsequent Events

Launch of nationwide TV offer

2 April 2008 _ PT announced the launch of its nationwide TV offer through satellite (DTH – direct to home), which will complement the existing IPTV offer. Meo will be PT's TV brand across the various platforms, namely at home (through the IPTV and satellite), in the mobile handset (through Meo Mobile) or in a computer (through the horizontal Sapo content platform). The launch of the nationwide TV offer strengthens PT's value proposition to its residential customers. This should allow PT to enhance average revenue per user, through the up-selling of additional services, whilst contributing to increased retention through an attractive triple-play service offer at competitive prices.

Dividend for fiscal year 2007

3 April 2008 _ Portugal Telecom announced that the payment of a Euro 0.575 gross dividend per share (ex-right date on 21 April 2008 and payment date on 24 April 2008), pursuant to the terms of the resolution of the General Meeting of Shareholders held on 28 March 2008.

Acquisition of Telemig

4 April 2008 _ PT announced that Vivo had concluded the acquisition of the shareholder control of Telemig Participações and of Tele Norte Celular. Additionally, Vivo sold, for the same price of the acquisition, Tele Norte Celular to Telemar Norte Leste, in accordance with the disclosure presented by Vivo on 20 December 2007. The acquisition of the controlling stake in Telemig Participações, which corresponds to 22.72% of total capital (53.90% of ordinary shares and 4.27% of preferred shares) amounted to a total consideration of R\$1.16 billion. Additionally, Vivo acquired certain subscription rights for R\$ 70.5 million.

8 April 2008 _ PT announced that Vivo had launched a voluntary public tender offer (VTO) for the acquisition of up to 1/3 of the preferred shares of Telemig Celular and Telemig Celular Participações outstanding in the market. In the case of Telemig Participações, the VTO will be extended to holders of preferred shares underlying ADSs. Assuming full acceptance, the maximum amount involved in the VTO will reach R\$0.53 billion.

Agreement for Digital Terrestrial Television contest

22 April 2008 _ PT announced that it reached an agreement with the three free-to-air (FTA) operators RTP, SIC and TVI in connection with PT's bid in the upcoming Digital Terrestrial Television (DTT) contest. The three FTA operators signed a memorandum of understanding (MOU) with PT agreeing to the terms and conditions under which the transmission of the FTA signal for the four channels will be

delivered during the simulcast period as well as the digital transmission up to the end of the licence period. This agreement will allow for the maximisation of synergies between these two networks, as well as the IPTV and Satellite platforms of PT, whilst ensuring that future investments will be directed towards the development of new services that will be critical for the future success of DTT in Portugal.

23 April 2008 _ Portugal Telecom delivered two bids to participate in the DTT contest. This contest is organised in two separate parts: Mux A – transport of the free-to-air (FTA) signal (4 existing FTA channels plus a fifth FTA channel to be attributed in 2009), and Muxes B to F – five frequencies for a Pay-TV operator (two nationwide and three regional). The 15-year licences attributed for Mux A and Muxes B to F will run until the end of September 2023. PT was the sole bidder in the Mux A contest.
