Table of Contents

**Texas Roadhouse, Inc. and Subsidiaries**

**Notes to Condensed Consolidated Financial Statements**

**(Tabular dollar amounts in thousands, except per share data)**

**(unaudited)**

**1) Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements include the accounts of Texas Roadhouse, Inc. (the Company, we and/or our), our wholly-owned subsidiaries and subsidiaries in which we own more than 50 percent interest, as of and for the 13 weeks ended March 27, 2012 and March 29, 2011. Our wholly-owned subsidiaries include: Texas Roadhouse Holdings LLC (Holdings), Texas Roadhouse Development Corporation (TRDC), Texas Roadhouse Management Corp. (Management Corp.) and Aspen Creek, LLC (Aspen Creek). We and our subsidiaries operate restaurants under the names Texas Roadhouse and Aspen Creek. Holdings also provides supervisory and administrative services for certain other franchise and license restaurants. TRDC sells franchise rights and collects the franchise royalties and fees. Management Corp. provides management services to the Company, Holdings, Aspen Creek and certain other license and franchise restaurants. All material balances and transactions between the consolidated entities have been eliminated.

As of March 27, 2012 and March 29, 2011, we owned 5.0% to 10.0% equity interest in 22 and 21 franchise restaurants, respectively. While we exercise significant control over these franchise restaurants, we do not consolidate their financial position, results of operations or cash flows as it is immaterial to our consolidated financial position, results of operations and/or cash flows. Our investment in these unconsolidated affiliates is included in Other assets in our condensed consolidated balance sheets and we record our percentage share of net income earned by these unconsolidated affiliates in our condensed consolidated statements of income and comprehensive income under Equity income from investments in unconsolidated affiliates.

We have made a number of estimates and assumptions relating to the reporting of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reporting of revenue and expenses during the period to prepare these condensed consolidated financial statements in conformity with U.S. generally accepted accounting principles (GAAP). Significant items subject to such estimates and assumptions include the carrying amount of property and equipment, goodwill, obligations related to insurance reserves, income taxes and share-based compensation expense. Actual results could differ from those estimates.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, consisting only of normal recurring adjustments, necessary to present fairly our financial position, results of operations and cash flows for the periods presented. The financial statements have been prepared in accordance with GAAP, except that certain information and footnotes have been condensed or omitted pursuant to rules and regulations of the Securities and Exchange Commission (SEC). Operating results for the 13 weeks ended March 27, 2012 are not necessarily indicative of the results that may be expected for the year ending December 25, 2012. The unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 27, 2011.

Our significant interim accounting policies include the recognition of income taxes using an estimated annual effective tax rate.

**(2) Share-based Compensation**

We may grant incentive and non-qualified stock options to purchase shares of common stock, stock bonus awards (restricted stock unit awards ( RSUs )) and restricted stock awards under the Texas Roadhouse, Inc. 2004 Equity Incentive Plan (the Plan ). Beginning in 2008, we changed the method by which we provide share-based compensation to our employees by eliminating stock option grants and, instead, granting RSUs as a form of share-based compensation. An RSU is the conditional right to receive one share of common stock upon satisfaction of the vesting requirement.

The following table summarizes the share-based compensation recorded in the accompanying condensed consolidated statements of income and comprehensive income:

	<b>13 Weeks Ended</b>	
	<b>March 27, 2012</b>	<b>March 29, 2011</b>
Labor expense	\$ 1,006	\$ 938
General and administrative expense	2,047	2,022
Total share-based compensation expense	\$ 3,053	\$ 2,960

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

### Table of Contents

A summary of share-based compensation activity by type of grant as of March 27, 2012 and changes during the period then ended is presented below.

#### *Summary Details for Plan Share Options*

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Outstanding at December 27, 2011	3,486,642	\$ 12.02		
Granted				
Forfeited	(37,023)	15.62		
Exercised	(479,591)	9.60		
Outstanding at March 27, 2012	2,970,028	\$ 12.36	3.41	\$ 13,818
Exercisable at March 27, 2012	2,955,584	\$ 12.36	3.40	\$ 13,752

The total intrinsic value of options exercised during the 13 weeks ended March 27, 2012 and March 29, 2011 was \$3.4 million and \$1.5 million, respectively. As of March 27, 2012, with respect to unvested stock options, there was an immaterial amount of unrecognized compensation cost that is expected to be recognized over a weighted-average period of less than a year. The total grant date fair value of stock options vested for the 13 week periods ended March 27, 2012 and March 29, 2011 was \$0.1 million and \$0.2 million, respectively.

#### *Summary Details for RSUs*

	Shares	Weighted-Average Grant Date Fair Value
Outstanding at December 27, 2011	1,186,480	\$ 13.71
Granted	930,614	15.45
Forfeited	(19,550)	13.63
Vested	(304,839)	12.30
Outstanding at March 27, 2012	1,792,705	\$ 14.86

As of March 27, 2012, with respect to unvested RSUs, there was \$18.2 million of unrecognized compensation cost that is expected to be recognized over a weighted-average period of 1.7 years. The vesting terms of the RSUs range from 1.0 to 5.0 years. The total grant date fair value of RSUs vested for the 13 week periods ended March 27, 2012 and March 29, 2011 was \$3.7 million and \$3.5 million, respectively.

### **(3) Long-term Debt and Obligations Under Capital Leases**

Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

Long-term debt and obligations under capital leases consisted of the following:

	<b>March 27, 2012</b>	<b>December 27, 2011</b>
Installment loans, due 2012 - 2020	\$ 1,629	\$ 1,679
Obligations under capital leases	203	226
Revolver	50,000	60,000
	51,832	61,905
Less current maturities	312	304
	\$ 51,520	\$ 61,601

Table of Contents

The weighted-average interest rate for installment loans outstanding was 10.57% at March 27, 2012 and December 27, 2011. The debt is secured by certain land and buildings.

On August 12, 2011, we entered into a new \$200.0 million five-year revolving credit facility with a syndicate of commercial lenders led by JPMorgan Chase Bank, N.A., PNC Bank, National Association, and Wells Fargo, National Association. This facility replaced our previous five-year revolving credit facility. The new facility expires on August 11, 2016. The terms of the facility require us to pay interest on outstanding borrowings at London Interbank Offered Rate ( LIBOR ) plus a margin of 0.875% to 1.875%, depending on our leverage ratio, or the Alternate Base Rate, which is the higher of the issuing bank's prime lending rate, the Federal Funds rate plus 0.50% or the Adjusted Eurodollar Rate for a one month interest period on such day plus 1.0%. We are also required to pay a commitment fee of 0.150% to 0.350% per year on any unused portion of the facility, depending on our leverage ratio. The weighted-average interest rate for the revolver at March 27, 2012 and December 27, 2011 was 4.09% and 3.20%, respectively, including the impact of interest rate swaps as discussed in note 4. At March 27, 2012, we had \$50.0 million outstanding under the credit facility and \$145.7 million of availability, net of \$4.3 million of outstanding letters of credit.

The lenders' obligation to extend credit under the facility depends on us maintaining certain financial covenants, including a minimum consolidated fixed charge coverage ratio of 2.00 to 1.00 and a maximum consolidated leverage ratio of 3.00 to 1.00. The credit facility permits us to incur additional secured or unsecured indebtedness outside the facility, except for the incurrence of secured indebtedness that in the aggregate exceeds 20% of our consolidated tangible net worth or circumstances where the incurrence of secured or unsecured indebtedness would prevent us from complying with our financial covenants. We were in compliance with all covenants as of March 27, 2012.

**(4) Derivative and Hedging Activities**

We enter into derivative instruments for risk management purposes only, including derivatives designated as hedging instruments under Financial Accounting Standards Board ( FASB ) Accounting Standards Codification ( ASC ) 815, *Derivatives and Hedging* ( ASC 815 ). We use interest rate-related derivative instruments to manage our exposure to fluctuations of interest rates. By using these instruments, we expose ourselves, from time to time, to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes us, which creates credit risk for us. We minimize the credit risk by entering into transactions with high-quality counterparties whose credit rating is evaluated on a quarterly basis. Our counterparty in the interest rate swaps is JPMorgan Chase Bank, N.A. Market risk is the adverse effect on the value of a financial instrument that results from a change in interest rates, commodity prices or the market price of our common stock. We minimize market risk by establishing and monitoring parameters that limit the types and degree of market risk that may be taken.

*Interest Rate Swaps*

On October 22, 2008, we entered into an interest rate swap, starting on November 7, 2008, with a notional amount of \$25.0 million to hedge a portion of the cash flows of our variable rate credit facility. We have designated the interest rate swap as a cash flow hedge of our exposure to variability in future cash flows attributable to interest payments on a \$25.0 million tranche of floating rate debt borrowed under our revolving credit facility. Under the terms of the swap, we pay a fixed rate of 3.83% on the \$25.0 million notional amount and receive payments from the counterparty based on the 1-month LIBOR rate for a term ending on November 7, 2015, effectively resulting in a fixed rate LIBOR component of the \$25.0 million notional amount.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

On January 7, 2009, we entered into an interest rate swap, starting on February 7, 2009, with a notional amount of \$25.0 million to hedge a portion of the cash flows of our variable rate credit facility. We have designated the interest rate swap as a cash flow hedge of our exposure to variability in future cash flows attributable to interest payments on a \$25.0 million tranche of floating rate debt borrowed under our revolving credit facility. Under the terms of the swap, we pay a fixed rate of 2.34% on the \$25.0 million notional amount and receive payments from the counterparty based on the 1-month LIBOR rate for a term ending on January 7, 2016, effectively resulting in a fixed rate LIBOR component of the \$25.0 million notional amount.

We entered into the above interest rate swaps with the objective of eliminating the variability of our interest cost that arises because of changes in the variable interest rate for the designated interest payments. Changes in the fair value of the interest rate swap will be reported as a component of accumulated other comprehensive income. We will reclassify any gain or loss from accumulated other comprehensive income ( AOCI ), net of tax, in our condensed consolidated balance sheet to interest expense in our condensed consolidated statement of income and comprehensive income when the interest rate swap expires or at the time we choose to terminate the swap. See note 9 for fair value discussion of these interest rate swaps.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

### Table of Contents

The following table summarizes the fair value and presentation in the condensed consolidated balance sheets for derivatives designated as hedging instruments under FASB ASC 815:

	Balance Sheet Location	Derivative Assets		Derivative Liabilities	
		March 27, 2012	December 27, 2011	March 27, 2012	December 27, 2011
Derivative Contracts Designated as Hedging Instruments under ASC 815	(1)				
Interest rate swaps		\$	\$	\$ 4,325	\$ 4,247
<b>Total Derivative Contracts</b>		<b>\$</b>	<b>\$</b>	<b>\$ 4,325</b>	<b>\$ 4,247</b>

(1) Derivative assets and liabilities are included in fair value of derivative financial instruments in the condensed consolidated balance sheets.

The following table summarizes the effect of derivative instruments in the condensed consolidated statements of income and comprehensive income for the 13 weeks ended March 27, 2012 and March 29, 2011:

	Amount of (Loss) Gain Recognized in AOCI (effective portion)		Location of Gain (Loss) Reclassified from AOCI to Income	Amount of Gain (Loss) Reclassified from AOCI to Income (effective portion)		Location of Gain (Loss) Recognized in Income (ineffective portion)	Amount of Gain (Loss) Recognized in Income (ineffective portion)	
	2012	2011		2012	2011		2012	2011
Interest rate swaps	\$ (41)	\$ 108	\$ 35	\$ 33	\$	\$		

### (5) Recent Accounting Pronouncements

#### *Comprehensive Income*

(ASU 2011-05)

In June 2011, the FASB issued ASU 2011-05, *Presentation of Comprehensive Income*. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity, which was our presentation, and also requires presentation of reclassification adjustments from other comprehensive income to net income on the face of the financial statements. In December 2011, the FASB issued ASU 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05*, to defer the effective date of the specific requirement to present items that are reclassified out of accumulated comprehensive income to net income alongside their respective components of net income and other comprehensive income. All other provisions of this update are effective for annual and interim reporting periods beginning after December 15, 2011 (our 2012 fiscal year). The adoption of this new guidance had no impact on our consolidated financial position, results of operations or

cash flows, though it changed our income statement presentation.

***Goodwill and Other Intangibles***

***(ASU 2011-08)***

In September 2011, the FASB issued ASU 2011-08, *Intangibles - Goodwill and Other, Testing Goodwill for Impairment*, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying value before applying the two-step goodwill impairment model that is currently in place. If it is determined through the qualitative assessment that a reporting unit's fair value is more likely than not greater than its carrying value, the remaining impairment steps would be unnecessary. The qualitative assessment is optional, allowing companies to go directly to the quantitative assessment. This update is effective for annual and interim goodwill impairment tests performed in fiscal years beginning after December 15, 2011 (our 2012 fiscal year). The adoption of this new guidance has no impact on the content of our financial statements or disclosures.

**(6) Commitments and Contingencies**

The estimated cost of completing capital project commitments at March 27, 2012 and December 27, 2011 was approximately \$57.9 million and \$58.6 million, respectively.

Table of Contents

We entered into real estate lease agreements for franchise restaurants located in Everett, MA, Longmont, CO, Montgomeryville, PA, Fargo, ND and Logan, UT before granting franchise rights for those restaurants. We have subsequently assigned the leases to the franchisees, but remain contingently liable if a franchisee defaults under the terms of a lease. The Longmont lease was assigned in October 2003 and expires in May 2014, the Everett lease was assigned in September 2002 and expires in February 2018, the Montgomeryville lease was assigned in October 2004 and expires in June 2021, the Fargo lease was assigned in February 2006 and expires in July 2016 and the Logan lease was assigned in January 2009 and expires in August 2019. As the fair value of the guarantees is not considered significant, no liability has been recorded. As discussed in note 7, the Everett, MA, Longmont, CO, and Fargo, ND restaurants are owned, in whole or part, by certain of our officers, directors or 5% shareholders.

We currently buy most of our beef from four suppliers. Although there are a limited number of beef suppliers, management believes that other suppliers could provide a similar product on comparable terms. A change in suppliers, however, could cause supply shortages and a possible loss of sales, which would affect operating results adversely. We have no material minimum purchase commitments with our vendors that extend beyond a year.

On September 30, 2011, the U.S. Equal Employment Opportunity Commission ( EEOC ) filed a lawsuit styled Equal Employment Opportunity Commission v. Texas Roadhouse, Inc., Texas Roadhouse Holdings LLC, Texas Roadhouse Management Corp. in the United States District Court, District of Massachusetts, Civil Action Number 1:11-cv-11732. The complaint alleges that applicants over the age of 40 were denied employment in our restaurants in bartender, host, server and server assistant positions due to their age. The EEOC is seeking injunctive relief, remedial actions, payment of damages to the applicants and costs. We believe we have meritorious defenses to the claims made by the EEOC, and we intend to vigorously defend against them. We have filed a response to the complaint. Based on the preliminary status of this matter, we cannot estimate the possible amount or range of loss, if any, associated with this matter.

On January 19, 2011, a Massachusetts putative class action was filed styled Jenna Crenshaw, Andrew Brickley, et al, and all others similarly situated v. Texas Roadhouse, Inc., Texas Roadhouse Holdings, LLC, Texas Roadhouse of Everett, LLC and Texas Roadhouse Management Corp., d/b/a Texas Roadhouse. The complaint is pending in the United States District Court, District of Massachusetts, Civil Action Number 1:11-cv-10549. The complaint alleges a failure to comply with Massachusetts wage laws specifically that we improperly shared pooled tips with ineligible employees. Currently, we operate nine restaurants in the state. The parties began mediation in late February 2012 and on April 30, 2012, filed a Settlement Agreement ( the Agreement ) seeking preliminary court approval to settle the lawsuit. Under the Agreement, the company agrees to pay \$5.0 million, which includes payment of the plaintiffs attorneys fees, payment of expenses to administer the settlement, and individual payments to resolve the claims of servers employed in Massachusetts restaurants from January 18, 2005 through the date of final court approval. The Agreement is subject to final approval of the court, which could take several months. A preliminary approval hearing will be held on May 3, 2012. As a result of the Agreement, we have recorded a \$5.0 million charge which is included in general and administrative expenses in our condensed consolidated statements of income and comprehensive income for the 13 weeks ended March 27, 2012.

We are involved in various other claims and legal actions arising in the normal course of business. In the opinion of management, the ultimate disposition of these matters will not have a material effect on our consolidated financial position, results of operations or cash flows.

**(7) Related Party Transactions**

The Longview, Texas restaurant, which was acquired by us in connection with the completion of our initial public offering, leases the land and restaurant building from an entity controlled by Steven L. Ortiz, our Chief Operating Officer. The lease term is 15 years and will terminate in November 2014. The lease can be renewed for two additional terms of five years each. Rent is approximately \$19,000 per month. The lease can

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

be terminated if the tenant fails to pay the rent on a timely basis, fails to maintain the insurance specified in the lease, fails to maintain the building or property or becomes insolvent. Total rent payments were approximately \$56,000 for each of the 13 week periods ending March 27, 2012 and March 29, 2011.

The Bossier City, Louisiana restaurant, of which Steven L. Ortiz beneficially owns 66.0% and we own 5.0%, leases the land and building from an entity owned by Mr. Ortiz. The lease term is 15 years and will terminate on March 31, 2020. Rent is approximately \$16,600 per month and escalates 10% each five year period during the term. The next rent escalation is in the second quarter of 2015. The lease can be terminated if the tenant fails to pay rent on a timely basis, fails to maintain insurance, abandons the property or becomes insolvent. Total rent payments were approximately \$50,000 for each of the 13 week periods ended March 27, 2012 and March 29, 2011.

Table of Contents

We have 15 franchise and license restaurants owned, in whole or part, by certain of our officers, directors or 5% shareholders as of March 27, 2012 and March 29, 2011. These entities paid us fees of approximately \$0.6 million and \$0.5 million during both of the 13 week periods ended March 27, 2012 and March 29, 2011, respectively. As disclosed in note 6, we are contingently liable on leases which are related to three of these restaurants.

**(8) Earnings Per Share**

The share and net income per share data for all periods presented are based on the historical weighted-average shares outstanding. The diluted earnings per share calculations show the effect of the weighted-average stock options, RSUs and restricted stock awards outstanding from our equity incentive plan as discussed in note 2.

The following table summarizes the options and nonvested stock that were outstanding but not included in the computation of diluted earnings per share because their inclusion would have had an anti-dilutive effect:

	13 Weeks Ended	
	March 27, 2012	March 29, 2011
Options	299,572	310,504
Nonvested stock	12,885	210
Total	312,457	310,714

The following table sets forth the calculation of weighted-average shares outstanding (in thousands) as presented in the accompanying condensed consolidated statements of income and comprehensive income:

	13 Weeks Ended	
	March 27, 2012	March 29, 2011
Net income attributable to Texas Roadhouse, Inc. and subsidiaries	\$ 18,869	\$ 19,793
Basic EPS:		
Weighted-average common shares outstanding	69,405	72,052
Basic EPS	\$ 0.27	\$ 0.27
Diluted EPS:		
Weighted-average common shares outstanding	69,405	72,052
Dilutive effect of stock options and restricted stock	1,425	1,675
Shares diluted	70,830	73,727

Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

Diluted EPS	\$	0.27	\$	0.27
-------------	----	------	----	------

Table of Contents

**(9) Fair Value Measurement**

ASC 820, *Fair Value Measurements and Disclosures* ( ASC 820 ), establishes a framework for measuring fair value and expands disclosures about fair value measurements. ASC 820 establishes a three-level hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs in measuring fair value. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability on the measurement date.

- Level 1      Inputs based on quoted prices in active markets for identical assets.
- Level 2      Inputs other than quoted prices included within Level 1 that are observable for the assets, either directly or indirectly.
- Level 3      Inputs that are unobservable for the asset.

There were no transfers among levels within the fair value hierarchy during the 13 week period ended March 27, 2012.

The following table presents the fair values for our financial assets and liabilities measured on a recurring basis:

	Level	Fair Value Measurements	
		March 27, 2012	December 27, 2011
Interest rate swaps	2	\$ (4,325)	\$ (4,247)
Deferred compensation plan - assets	1	7,545	6,748
Deferred compensation plan - liabilities	1	(7,539)	(6,714)
<b>Total</b>		<b>\$ (4,319)</b>	<b>\$ (4,213)</b>

The fair value of our interest rate swaps were determined based on the present value of expected future cash flows considering the risks involved, including nonperformance risk, and using discount rates appropriate for the duration. See note 4 for discussion of our interest rate swaps.

The Second Amended and Restated Deferred Compensation Plan of Texas Roadhouse Management Corp., as amended, (the Deferred Compensation Plan ) is a nonqualified deferred compensation plan which allows highly compensated employees to defer receipt of a portion of their compensation and contribute such amounts to one or more investment funds held in a rabbi trust. We report the accounts of the rabbi trust in our condensed consolidated financial statements. These investments are considered trading securities and are reported at fair value based on third-party broker statements. The realized and unrealized holding gains and losses related to these investments, as well as the offsetting compensation expense, are recorded in general and administrative expense in the condensed consolidated statements of income and comprehensive income.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

The following table presents the fair values for our financial assets and liabilities measured on a nonrecurring basis:

	Level	Fair Value Measurements	
		March 27, 2012	December 27, 2011
Long-lived assets held for sale	2	\$ 1,398	\$ 1,398
Long-lived assets held for use	2	992	1,017
Goodwill	3	992	992
Total		\$ 3,382	\$ 3,407

Long-lived assets held for sale include land and building and are valued using Level 2 inputs, primarily an independent third party appraisal. These assets are included in Property and equipment in our condensed consolidated balance sheets as we do not expect to sell these assets in the next 12 months. Costs to market and/or sell the assets are factored into the estimates of fair value.

Long-lived assets held for use include building, equipment and furniture and fixtures and are valued using Level 2 inputs, primarily independent third party appraisals. These assets are included in Property and equipment in our condensed consolidated balance sheets.

Goodwill in the table above relates to two underperforming restaurants in which the carrying value of the associated goodwill was reduced to fair value, based on their historical results and anticipated future trends of operations.

Table of Contents

At March 27, 2012 and December 27, 2011, the fair value of cash and cash equivalents, accounts receivable and accounts payable approximated their carrying value based on the short-term nature of these instruments. The fair value of our long-term debt is estimated based on the current rates offered to us for instruments of similar terms and maturities. The carrying amounts and related estimated fair values for our debt are as follows:

		March 27, 2012		December 27, 2011	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Installment loans	Level 2	\$ 1,629	\$ 1,972	\$ 1,679	\$ 2,044
Revolver	Level 1	50,000	50,000	60,000	60,000

**(10) Stock Repurchase Program**

On February 16, 2012, our Board of Directors approved a stock repurchase program under which it authorized us to repurchase up to \$100.0 million of our common stock. Historically, repurchases under our stock repurchase program are made through open market transactions. The timing and the amount of any repurchases will be determined by management under parameters established by our Board of Directors, based on its evaluation of our stock price, market conditions and other corporate considerations.

We did not repurchase any shares of our common stock during the 13 weeks ended March 27, 2012 through this authorized stock repurchase program. For the 13 weeks ended March 29, 2011, we paid approximately \$25.3 million to repurchase 1.5 million shares of our common stock at an average stock price of \$16.85 through a previously authorized stock repurchase program. These shares were recorded in Treasury stock in the condensed consolidated balance sheets at March 29, 2011. These shares were retired in the second quarter of 2011.

**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

**CAUTIONARY STATEMENT**

*This report contains forward-looking statements based on our current expectations, estimates and projections about our industry, management's beliefs, and certain assumptions made by us. Words such as anticipates, expects, intends, plans, believes, seeks, estimates, may, will and variations of these words or similar expressions are intended to identify forward-looking statements. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. Such statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Therefore, our actual results could differ materially and adversely from those expressed in any forward-looking statements as a result of various factors. The section entitled Risk Factors in our Annual Report on Form 10-K for the year ended December 27, 2011, and in our other Securities and Exchange Commission (SEC) filings, discusses some of the important risk factors that may affect our business, results of operations, or financial condition. You should carefully consider those risks, in addition to the other information in this report, and in our other filings with the SEC, before deciding to invest in our company or to maintain or increase your investment. We undertake no obligation to revise or update publicly any forward-looking statements for any reason. The information contained in this Form 10-Q is not a complete description of our business or the risks associated with an investment in our common stock. We urge you to carefully review and consider the various disclosures made by us in this report and in our other reports filed with the SEC that discuss our business in greater detail and advise interested parties of certain risks, uncertainties and other factors that may affect our business, results of operations or financial condition.*

**OVERVIEW**

Texas Roadhouse is a growing, moderately priced, full-service restaurant chain. Our founder, chairman and chief executive officer, W. Kent Taylor, started the business in 1993 with the opening of the first Texas Roadhouse in Clarksville, Indiana. Since then, we have grown to 373 restaurants in 47 states. In addition, we opened our first international franchise-owned Texas Roadhouse in Dubai, UAE in 2011. Our mission statement is Legendary Food, Legendary Service®. Our operating strategy is designed to position each of our restaurants as the local hometown destination for a broad segment of consumers seeking high quality, affordable meals served with friendly, attentive service. As of March 27, 2012, our 374 restaurants included:

- 302 company restaurants, of which 290 were wholly-owned and 12 were majority-owned. The results of operations of company restaurants are included in our condensed consolidated statements of income and comprehensive income. The portion of income attributable to minority interests in company restaurants that are not wholly-owned is reflected in the line item entitled Net income attributable to noncontrolling interests in our condensed consolidated statements of income and comprehensive income.
- 72 franchise restaurants, of which 69 were franchise restaurants and three were license restaurants. We have a 5.0% to 10.0% ownership interest in 22 franchise restaurants. The income derived from our minority interests in these franchise restaurants is reported in the line item entitled Equity income from investments in unconsolidated affiliates in our condensed consolidated statements of income and comprehensive income. Additionally, we provide various management services to these franchise restaurants, as well as seven additional franchise restaurants in which we have no ownership interest.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

We have contractual arrangements which grant us the right to acquire at pre-determined valuation formulas (i) the remaining equity interests in ten of the 12 majority-owned company restaurants, and (ii) 65 of the franchise restaurants.

### **Presentation of Financial and Operating Data**

Throughout this report, the 13 weeks ended March 27, 2012 and March 29, 2011 are referred to as Q1 2012 and Q1 2011, respectively.

### **Long-term Strategies to Grow Earnings Per Share and Create Shareholder Value**

Our long-term strategies with respect to increasing net income and earnings per share, along with creating shareholder value, include the following:

*Expanding Our Restaurant Base.* We will continue to evaluate opportunities to develop Texas Roadhouse restaurants in existing and new domestic and international markets. Domestically, we will remain focused primarily on mid-sized markets where we believe a significant demand for our restaurants exists because of population size, income levels, the presence of shopping and entertainment centers and a significant employment base. Our ability to expand our restaurant base is influenced by many factors beyond our control and therefore we may not be able to achieve our anticipated growth.

Our average capital investment for Texas Roadhouse restaurants opened during 2011, including pre-opening expenses, was \$3.76 million. This average includes 10 times the annual base rent amount for restaurants where we do not own the land. We anticipate that

Table of Contents

our 2012 development costs will be fairly consistent with our 2011 costs. We continue to focus on driving sales and managing restaurant development costs in order to further increase our restaurant development in the future.

We may, at our discretion, add franchise restaurants, domestically and/or internationally, primarily with franchisees who have demonstrated prior success with the Texas Roadhouse or other restaurant concepts and in markets in which the franchisee demonstrates superior knowledge of the demographics and restaurant operating conditions. In conjunction with this strategy, we signed our first international franchise agreement in April 2010 for the development of Texas Roadhouse restaurants in eight countries in the Middle East over the next 10 years, the first of which opened in August 2011. Additionally, in 2010, we entered into a joint venture agreement with a casual dining restaurant operator in China for the minority ownership in three non-Texas Roadhouse restaurants, two of which were open as of the end of Q1 2012. We may also look to acquire franchise restaurants under terms favorable to us and our stockholders. Additionally, from time to time, we may evaluate potential mergers, acquisitions, joint ventures or other strategic initiatives to acquire or develop additional concepts. Of the 302 restaurants we owned and operated at March 27, 2012, 299 operated as Texas Roadhouse restaurants, while three operated under the name of Aspen Creek. We currently plan to open 25 restaurants in 2012, all of which will be company-owned Texas Roadhouse restaurants. In addition, our existing franchise partners will open 2 to 3 Texas Roadhouse restaurants in 2012.

*Maintaining and/or Improving Restaurant Level Profitability.* We plan to maintain, or possibly increase, restaurant level profitability through a combination of increased comparable restaurant sales and operating cost management. In Q1 2012, our average unit volumes and comparable restaurant sales increased 5.7% and 6.0%, respectively, for Texas Roadhouse restaurants. The growth in these measures was due to a combination of menu price increases taken throughout 2011 and 2012 and higher guest traffic counts. We believe the increased guest traffic counts is due to our continued focus on encouraging repeat visits by our guests through our continued commitment to operational standards relating to our quality of food and service, along with an improvement in the overall economy. We also continue to drive various localized marketing programs in order to attract new guests and increase the frequency of visits of our existing guests. In an effort to partially offset inflationary pressures, we have increased menu prices approximately 2.2% and 2.5% to 3.0% in 2012 and 2011, respectively. In general, we continue to maintain our conservative approach on pricing as we remain focused on the long-term success of Texas Roadhouse. This may create a challenge in terms of maintaining and/or increasing restaurant margins, as a percentage of sales, in any given year, depending on the level of inflation we experience. In addition to restaurant margin, as a percentage of sales, we also focus on restaurant margin growth per store week as a measure of restaurant level profitability.

*Leveraging Our Scalable Infrastructure.* To support our growth, we continue to make investments in our infrastructure. Over the past several years, we have made significant investments in our infrastructure, including information systems, real estate, human resources, legal, marketing and operations. Typically, general and administrative costs have increased at a slower growth rate than our revenue. Whether we are able to continue leveraging our infrastructure will depend, in part, on our new restaurant openings and our comparable restaurant sales growth rate going forward. In 2012, our general and administrative costs will increase at a faster growth rate than our revenue as a result of a legal settlement charge of \$5.0 million recorded in Q1 2012.

*Returning Capital to Shareholders.* We continue to look at opportunities to return capital to our shareholders, including repurchases of common stock and payment of dividends. On February 16, 2012, our Board of Directors approved a stock repurchase program under which we may repurchase up to \$100.0 million of our common stock. Any repurchases will be made through open market transactions. As of March 27, 2012, \$100.0 million remains authorized for repurchase. Since 2008, we have paid \$116.1 million to repurchase 10.5 million shares of our common stock at an average price per share of \$11.08 through our authorized stock repurchase programs.

On February 16, 2012, our Board of Directors authorized the payment of a cash dividend of \$0.09 per share of common stock. This payment of \$6.3 million was distributed on March 30, 2012, to shareholders of record at the close of business on March 14, 2012. The declaration and payment of cash dividends on our common stock is at the discretion of our Board of Directors, and any decision to declare a dividend will be

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

based on a number of factors, including, but not limited to, earnings, financial condition, applicable covenants under our credit facility and other contractual restrictions, or other factors deemed relevant. During 2011, we declared dividends of \$22.5 million, or \$0.32 per share of common stock.

### **Key Measures We Use to Evaluate Our Company**

Key measures we use to evaluate and assess our business include the following:

*Number of Restaurant Openings.* Number of restaurant openings reflects the number of restaurants opened during a particular fiscal period. For company restaurant openings we incur pre-opening costs, which are defined below, before the restaurant opens. Typically new restaurants open with an initial start-up period of higher than normalized sales volumes, which decrease to a steady level approximately three to six months after opening. However, although sales volumes are generally higher, so are initial costs, resulting in restaurant operating margins that are generally lower during the start-up period of operation and increase to a steady level approximately three to six months after opening.

*Comparable Restaurant Sales Growth.* Comparable restaurant sales growth reflects the change in year-over-year sales for the

Table of Contents

company restaurants in the comparable restaurant base. We define the comparable restaurant base to include those restaurants open for a full 18 months before the beginning of the current interim period excluding restaurants closed during the period. Comparable restaurant sales growth can be impacted by changes in guest traffic counts or by changes in the per person average check amount. Menu price changes and the mix of menu items sold can affect the per person average check amount.

*Average Unit Volume.* Average unit volume represents the average annual restaurant sales for company-owned Texas Roadhouse restaurants open for a full six months before the beginning of the period measured. Average unit volume excludes sales on restaurants closed during the period. Growth in average unit volumes in excess of comparable restaurant sales growth is generally an indication that newer restaurants are operating with sales levels in excess of the company average. Conversely, growth in average unit volumes less than growth in comparable restaurant sales growth is generally an indication that newer restaurants are operating with sales levels lower than the company average.

*Store Weeks.* Store weeks represent the number of weeks that our company restaurants were open during the reporting period.

*Restaurant Margins.* Restaurant margins represent restaurant sales less restaurant operating costs. Restaurant margins, as a percentage of restaurant sales, may fluctuate based on changes in average unit volumes, inflationary pressures, commodity costs and wage rates. We also focus on restaurant margin growth per store week as a measure of restaurant level profitability as it provides additional insight on operating performance.

**Other Key Definitions**

*Restaurant Sales.* Restaurant sales include gross food and beverage sales, net of promotions and discounts, for all company-owned restaurants. Sales taxes collected from customers and remitted to governmental authorities are accounted for on a net basis and therefore are excluded from restaurant sales in the condensed consolidated statements of income and comprehensive income.

*Franchise Royalties and Fees.* Domestic franchisees typically pay a \$40,000 initial franchise fee for each new restaurant. In addition, at each renewal period, we receive a fee equal to the greater of 30% of the then-current initial franchise fee or \$10,000 to \$15,000. Franchise royalties consist of royalties in an amount up to 4.0% of gross sales, as defined in our franchise agreement, paid to us by our domestic franchisees.

*Restaurant Cost of Sales.* Restaurant cost of sales consists of food and beverage costs.

*Restaurant Labor Expenses.* Restaurant labor expenses include all direct and indirect labor costs incurred in operations except for profit sharing incentive compensation expenses earned by our restaurant managers. These profit sharing expenses are reflected in restaurant other operating expenses. Restaurant labor expenses also include share-based compensation expense related to restaurant-level employees.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

*Restaurant Rent Expense.* Restaurant rent expense includes all rent associated with the leasing of real estate and includes base, percentage and straight-line rent expense.

*Restaurant Other Operating Expenses.* Restaurant other operating expenses consist of all other restaurant-level operating costs, the major components of which are utilities, supplies, advertising, repair and maintenance, property taxes, credit card fees and general liability insurance. Profit sharing allocations to managing partners and market partners are also included in restaurant other operating expenses.

*Pre-opening Expenses.* Pre-opening expenses, which are charged to operations as incurred, consist of expenses incurred before the opening of a new restaurant and are comprised principally of opening team and training salaries, travel expenses, rent, food, beverage and other initial supplies and expenses.

*Depreciation and Amortization Expenses.* Depreciation and amortization expenses ( D&A ) includes the depreciation of fixed assets and amortization of intangibles with definite lives.

*Impairment and closure costs.* Impairment and closure costs include any impairment of long-lived assets, including goodwill, associated with restaurants where the carrying amount of the asset is not recoverable and exceeds the fair value of the asset and expenses associated with the closure of a restaurant. Closure costs also include any gains or losses associated with the sale of a closed restaurant and/or assets held for sale.

*General and Administrative Expenses.* General and administrative expenses ( G&A ) are comprised of expenses associated with corporate and administrative functions that support development and restaurant operations and provide an infrastructure to support future growth. Supervision and accounting fees received from certain franchise restaurants and license restaurants are offset against G&A. G&A also includes share-based compensation expense related to executive officers, support center employees and area managers, including market partners.

Table of Contents

*Interest Expense, Net.* Interest expense includes the cost of our debt obligations including the amortization of loan fees, reduced by interest income and capitalized interest. Interest income includes earnings on cash and cash equivalents.

*Equity Income from Unconsolidated Affiliates.* As of March 27, 2012 and March 29, 2011, we owned a 5.0% to 10.0% equity interest in 22 franchise restaurants. Additionally, as of March 27, 2012, we owned a 40% equity interest in two non-Texas Roadhouse restaurants as part of a joint venture agreement with a casual dining restaurant operator in China. Equity income from unconsolidated affiliates represents our percentage share of net income earned by these unconsolidated affiliates.

*Net Income Attributable to Noncontrolling Interests.* Net income attributable to noncontrolling interests represents the portion of income attributable to the other owners of the majority-owned or controlled restaurants. Our consolidated subsidiaries at March 27, 2012 and March 29, 2011 included 12 and 11 majority-owned restaurants, respectively, all of which were open.

*Managing Partners and Market Partners.* Managing partners are single unit operators who have primary responsibility for the day-to-day operations of the entire restaurant and are responsible for maintaining the standards of quality and performance we establish. Market partners, generally, have supervisory responsibilities for up to 10 to 13 restaurants. In addition to supervising the operations of our restaurants, they are also responsible for the hiring and development of each restaurant's management team and assist in the new restaurant site selection process.

Table of Contents**Results of Operations**

(\$ in thousands)	March 27, 2012		13 Weeks Ended		March 29, 2011

**Reconciliation of GAAP and Non-GAAP Information**

(in thousands, except per share data)

In addition to the results provided in accordance with U.S. Generally Accepted Accounting Principles ( GAAP ) throughout this document, the Company has provided non-GAAP measurements which present operating results on a basis before the impact of a settlement of a legal matter. This item is described in further detail throughout this document.

The Company used earnings before the impact of the legal settlement as a key performance measure of results of operations for purposes of evaluating performance internally. This non-GAAP measurement is not intended to replace the presentation of our financial results in accordance with GAAP. Rather, the Company believes that the presentation of results before the impact of the legal settlement provides additional information to facilitate the comparison of past and present operations, excluding items that the Company does not believe are indicative of our ongoing operations in the quarter ended March 27, 2012.

	13 weeks ended	
	March 27, 2012	March 29, 2011
	\$	\$
Net income attributable to Texas Roadhouse, Inc. and subsidiaries, excluding settlement charge	21,931	19,793
Amount reserve for settlement of a legal matter, net of tax (1)	(3,062)	
Net income attributable to Texas Roadhouse, Inc. and subsidiaries	18,869	19,793
Weighted average diluted shares outstanding	70,830	73,727
Diluted earnings per share, excluding settlement charge	0.31	0.27
Impact of settlement charge on diluted earnings per share	(0.04)	
	0.27	0.27

(1) Amount reserved in Q1 2012 for the settlement of a legal matter was \$5.0 million before the statutory income tax rate. The settlement is included in general administrative costs in our condensed consolidated statements of income and comprehensive income.

Balance at March 27, 2012	302	72	374

Table of Contents**Q1 2012 (13 weeks) Compared to Q1 2011 (13 weeks)**

*Restaurant Sales.* Restaurant sales increased by 14.5% in Q1 2012 as compared to Q1 2011. These increases were primarily attributable to the opening of new restaurants and an increase in average unit volumes, primarily comparable restaurant sales.

The following table summarizes certain key drivers and/or attributes of restaurant sales at company restaurants for the periods presented.

	Q1 2012	Q1 2011
<b>Company Restaurants</b>		
Increase in store weeks	7.9%	4.6%
Increase in average unit volumes	5.4%	4.8%
Other (1)	1.2%	(0.1)%
Total increase in restaurant sales	14.5%	9.3%
Store weeks	3,851	3,568
Comparable restaurant sales growth	6.0%	4.6%
Texas Roadhouse restaurants only:		
Comparable restaurant sales growth	6.0%	4.6%
Average unit volume (in thousands)	\$ 1,081	\$ 1,022

(1) Includes the impact of the year-over-year change in sales volume of all Aspen Creek restaurants, along with Texas Roadhouse restaurants open less than six months before the beginning of the period measured and, if applicable, the impact of restaurants closed during the period.

The increases in store weeks for the periods presented above are attributable to the opening of new restaurants. Company restaurant count activity is shown in the restaurant unit activity table above.

The increase in average unit volumes for Q1 2012 compared to Q1 2011 was primarily driven by positive comparable restaurant sales, partially offset by lower year-over-year sales at newer restaurants. For Q1 2012 and Q1 2011, comparable restaurant sales increased 6.0% and 4.6%, respectively. The increase in Q1 2012 was generated by an increase in our per person average check and guest traffic counts. The increase in Q1 2011 was generated primarily by an increase in our guest traffic counts, along with a slight increase in per person average check.

The menu price increases we have taken throughout fiscal 2011 and in Q1 2012 are driving the increases in our per person average check in Q1 2012. We increased menu prices in Q1 2012 approximately 2.2%. In 2011, we increased menu prices approximately 2.5% to 3.0% with just over 1% during the first quarter of the year and the remaining during the third and fourth quarters of the year. These menu price increases were taken as a result of inflationary pressures, primarily commodities.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

In 2012, we plan to open 25 company restaurants, eight of which opened in Q1 2012. We have begun construction for all the remaining restaurants.

*Franchise Royalties and Fees.* Franchise royalties and fees increased by \$0.4 million, or by 15.9% in Q1 2012 from Q1 2011. These increases were primarily attributable to an increase in average unit volumes and increasing royalty rates in conjunction with the renewal of certain franchise agreements.

*Restaurant Cost of Sales.* Restaurant cost of sales, as a percentage of restaurant sales, increased to 34.1% in Q1 2012 from 33.3% in Q1 2011. This increase was primarily attributable to commodity inflation of approximately 7.5%. Inflation has been driven by higher food costs on items such as pork and beef, partially offset by lower costs for certain produce items, specifically potatoes, tomatoes and lettuce. For the remainder of 2012, we have fixed price contracts for approximately 70% of our overall food costs with the remainder subject to fluctuating market prices. We expect commodity cost inflation of approximately 7.0% to 7.5% for full year 2012.

*Restaurant Labor Expenses.* Restaurant labor expenses, as a percentage of restaurant sales, decreased to 29.0% in Q1 2012 compared to 29.4% in Q1 2011. The decrease was primarily driven by an increase in comparable restaurant sales and was partially offset by labor inefficiencies associated with newer restaurants and higher average wage rates. Typically newer restaurants open with an initial start-up period of higher than normalized sales volumes and higher than normalized labor costs, as a percentage of restaurant sales. These inefficiencies tend to normalize approximately three to six months after opening.

Table of Contents

In 2012, we anticipate our labor costs will be pressured by inflation due to state-mandated increases in minimum and tip wage rates. We expect these increases in costs will be offset by menu pricing actions taken in Q1 2012, along with guest traffic growth.

*Restaurant Rent Expense.* Restaurant rent expense, as a percentage of restaurant sales, decreased to 1.9% in Q1 2012 compared to 2.0% in Q1 2011. The benefit from an increase in average unit volumes was partially offset by the impact of leasing more land and buildings than we have in the past.

*Restaurant Other Operating Expenses.* Restaurant other operating expenses, as a percentage of restaurant sales, decreased to 15.9% in Q1 2012 from 16.1% in Q1 2011. This decrease was primarily attributable to an increase in average unit volumes and lower utility costs and credit card fees, partially offset by higher general liability insurance costs and higher managing partner and market partner bonus expense. Utility costs were lower primarily due to lower electricity and natural gas prices. In addition, we continue to experience lower credit card fees due to regulatory changes related to debit card interchange fees that took effect in October 2011. General liability insurance costs were higher in Q1 2012 due to unfavorable claims experience as we self-insure a significant portion of expected losses under our insurance programs.

*Restaurant Pre-opening Expenses.* Pre-opening expenses increased to \$3.6 million in Q1 2012 from \$1.9 million in Q1 2011. This increase was primarily attributable to opening more restaurants in Q1 2012 compared to Q1 2011, along with having more restaurants in the development pipeline in Q1 2012. We opened eight restaurants in Q1 2012 compared to two restaurants in Q1 2011 and we plan to open 25 company restaurants in 2012 compared to 20 company restaurants in 2011. Pre-opening costs will fluctuate from period to period based on the number and timing of restaurant openings and the number and timing of restaurant managers hired. Based on our increased restaurant development plans, we expect pre-opening expenses to be higher in 2012.

*Depreciation and Amortization Expense ( D&A ).* D&A, as a percentage of total revenue, decreased to 3.5% in Q1 2012 from 3.7% in Q1 2011. This decrease was primarily attributable to an increase in average unit volumes. In addition, lower depreciation expense, as a percentage of revenue, on short-lived assets in older restaurants was partially offset by higher depreciation expense, as a percentage of revenue, on the same type of assets in newer restaurants.

*General and Administrative Expenses ( G&A ).* G&A, as a percentage of total revenue, increased to 6.2% in Q1 2012 from 4.9% in Q1 2011. In 2012, we recorded a one-time, pre-tax charge of \$5.0 million (\$3.1 million after-tax), or 1.5%, as a percentage of total revenue, related to the settlement of a previously disclosed legal matter, subject to court approval. This charge had a \$0.04 impact on diluted earnings per share in Q1 2012.

Excluding this charge, G&A decreased to 4.6% in Q1 2012 from 4.9% in Q1 2011. This decrease was primarily attributable to an increase in average unit volumes and lower share-based compensation costs, as a percentage of revenue, partially offset by higher costs associated with legal fees. Share-based compensation costs were higher in Q1 2011 due to a one-time charge of \$0.5 million recorded in Q1 2011 related to restricted stock units granted in 2010.

We expect share-based compensation costs to be approximately \$1.8 million higher in 2012 compared to 2011 primarily driven by a higher stock price associated with a grant of restricted stock units on January 7, 2012 in conjunction with the execution of certain executive employment contracts at the beginning of 2012. Overall, in 2012, we expect total G&A costs, excluding the legal settlement charge, to increase at a slower

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

growth rate than our revenue.

*Interest Expense, Net.* Interest expense remained relatively flat at \$0.6 million in Q1 2012 compared to Q1 2011. The increase in expense attributable to higher interest rates was offset by an increase in capitalized interest.

*Income Tax Expense.* Our effective tax rate increased to 32.5% in Q1 2012 from 31.9% in Q1 2011. The increase in Q1 2012 was primarily attributable to the loss of the HIRE Retention tax credit, partially offset by higher FICA tip credits, as a percentage of pre-tax income.

The HIRE Retention tax credit was a 2011 federal tax credit enacted to encourage the retention of new hires for 52 weeks and ended after 2011.

We expect the tax rate to increase to 32.5% to 33.0% for fiscal 2012 due to lower federal tax credits and an expected increase in non-deductible officer s compensation.

Table of Contents**Liquidity and Capital Resources**

The following table presents a summary of our net cash provided by (used in) operating, investing and financing activities:

	<b>13 Weeks Ended</b>	
	<b>March 27, 2012</b>	<b>March 29, 2011</b>
Net cash provided by operating activities	\$ 38,760	\$ 32,136
Net cash used in investing activities	(22,741)	(12,409)
Net cash used in financing activities	(12,428)	(24,522)
Net increase (decrease) in cash and cash equivalents	\$ 3,591	\$ (4,795)

Net cash provided by operating activities was \$38.8 million in Q1 2012 compared to \$32.1 million in Q1 2011. This increase was primarily due to an increase in net income, excluding a \$5.0 million accrual relating to the settlement of a previously disclosed legal matter, along with other changes in working capital. The continued opening of new restaurants and an increase in comparable restaurant sales drove growth in net income prior to the charge.

Our operations have not required significant working capital and we have been able to operate with negative working capital in the past. Sales are primarily for cash, and restaurant operations do not require significant inventories or receivables. In addition, we receive trade credit for the purchase of food, beverages and supplies, thereby reducing the need for incremental working capital to support growth.

Net cash used in investing activities was \$22.7 million in Q1 2012 compared to \$12.4 million in Q1 2011. This increase was primarily due to spending on capital expenditures as a result of more restaurant openings in Q1 2012 compared to Q1 2011 and more planned openings in 2012 than in 2011.

We require capital principally for the development of new company restaurants and the refurbishment of existing restaurants. We either lease our restaurant site locations under operating leases for periods of five to 30 years (including renewal periods) or purchase the land where it is cost effective. As of March 27, 2012, 122 of the 302 company restaurants had been developed on land which we own.

The following table presents a summary of capital expenditures related to the development of new restaurants, the refurbishment of existing restaurants and the acquisition of franchise restaurants:

<b>(in 000 s)</b>	<b>Q1 2012</b>	<b>Q1 2011</b>
New company restaurants	\$ 16,714	\$ 8,589
Refurbishment of existing restaurants (1)	6,125	3,869
Total capital expenditures	\$ 22,839	\$ 12,458

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

Restaurant-related repairs and maintenance expense (2)	\$	3,625	\$	2,852
--	----	-------	----	-------

---

(1) Includes minimal capital expenditures related to support center office.

(2) These amounts were recorded as an expense in the income statement as incurred.

Our future capital requirements will primarily depend on the number of new restaurants we open and the timing of those openings and the restaurant prototype developed in a given fiscal year. These requirements will include costs directly related to opening new restaurants and may also include costs necessary to ensure that our infrastructure is able to support a larger restaurant base. In fiscal 2012, we expect our capital expenditures to be \$80.0 to \$85.0 million, the majority of which will relate to planned restaurant openings, including 25 restaurant openings in 2012. This amount excludes any cash used for franchise acquisitions. We intend to satisfy our capital requirements over the next 12 months with cash on hand, net cash provided by operating activities and, if needed, funds available under our credit facility. For 2012, we anticipate net cash provided by operating activities will exceed capital expenditures. We currently plan to use this excess to repurchase common stock, pay dividends (as approved by our Board of Directors), and/or repay borrowings under our credit facility.

Net cash used in financing activities was \$12.4 million in Q1 2012 as compared to \$24.5 million in Q1 2011. This decrease was primarily due to no repurchases of shares of common stock in Q1 2012 compared to \$25.3 million of repurchases in Q1 2011 partially offset by increased payments on borrowings under our credit facility in Q1 2012 and dividends paid.

On February 16, 2012, our Board of Directors approved a stock repurchase program under which we may repurchase up to \$100

Table of Contents

million of our common stock. Historically, repurchases under our stock repurchase program are made through open market transactions. The timing and the amount of any repurchases will be determined by management under parameters established by the Board of Directors, based on its evaluation of our stock price, market conditions and other corporate considerations. We did not repurchase any shares of our common stock during Q1 2012 through our stock repurchase program.

We paid cash dividends of \$5.5 million in Q1 2012 related to dividends declared in November 2011. Additionally, on February 16, 2012, our Board of Directors authorized the payment of a cash dividend of \$0.09 per share of common stock. This payment of \$6.3 million was distributed on March 30, 2012 to shareholders of record at the close of business on March 14, 2012. The declared dividends are included as a liability in our condensed consolidated balance sheet as of March 27, 2012.

In Q1 2012, we paid distributions of \$0.8 million to equity holders of 11 of our majority-owned company restaurants. In Q1 2011, we paid distributions of \$0.6 million to equity holders of 10 of our majority-owned company restaurants.

On August 12, 2011, we entered into a new \$200.0 million five-year revolving credit facility with a syndicate of commercial lenders led by JPMorgan Chase Bank, N.A., PNC Bank, National Association, and Wells Fargo, National Association. This facility replaced our previous five-year revolving credit facility. The new facility expires on August 11, 2016. The terms of the facility require us to pay interest on outstanding borrowings at London Interbank Offering Rate ( LIBOR ) plus a margin of 0.875% to 1.875%, depending on our leverage ratio, or the Alternate Base Rate, which is the higher of the issuing bank's prime lending rate, the Federal Funds rate plus 0.50% or the Adjusted Eurodollar Rate for a one month interest period on such day plus 1.0%. We are also required to pay a commitment fee of 0.150% to 0.350% per year on any unused portion of the facility, depending on our leverage ratio. The weighted-average interest rate for the revolver at March 27, 2012 and December 27, 2011 was 4.09% and 3.20%, respectively, including the impact of interest rate swaps discussed below. At March 27, 2012, we had \$50.0 million outstanding under the credit facility and \$145.7 million of availability, net of \$4.3 million of outstanding letters of credit.

The lenders' obligation to extend credit under the facility depends on us maintaining certain financial covenants, including a minimum consolidated fixed charge coverage ratio of 2.00 to 1.00 and a maximum consolidated leverage ratio of 3.00 to 1.00. The credit facility permits us to incur additional secured or unsecured indebtedness outside the facility, except for the incurrence of secured indebtedness that in the aggregate exceeds 20% of our consolidated tangible net worth or circumstances where the incurrence of secured or unsecured indebtedness would prevent us from complying with our financial covenants. We were in compliance with all covenants as of March 27, 2012.

At March 27, 2012, in addition to the amounts outstanding on our credit facility, we had various other notes payable totaling \$1.6 million with interest rates ranging from 10.46% to 10.80%. Each of these notes related to the financing of specific restaurants. Our total weighted-average effective interest rate at March 27, 2012 was 4.29%, including the impact of interest rate swaps discussed below.

On October 22, 2008, we entered into an interest rate swap, starting on November 7, 2008, with a notional amount of \$25.0 million to hedge a portion of the cash flows of our variable rate credit facility. We have designated the interest rate swap as a cash flow hedge of our exposure to variability in future cash flows attributable to interest payments on a \$25.0 million tranche of floating rate debt borrowed under our revolving credit facility. Under the terms of the swap, we pay a fixed rate of 3.83% on the \$25.0 million notional amount and receive payments from the counterparty based on the 1-month LIBOR rate for a term ending on November 7, 2015, effectively resulting in a fixed rate LIBOR component of the \$25.0 million notional amount. Our counterparty in this interest rate swap is JPMorgan Chase Bank, N.A.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

On January 7, 2009, we entered into another interest rate swap, starting on February 7, 2009, with a notional amount of \$25.0 million to hedge a portion of the cash flows of our variable rate credit facility. We have designated the interest rate swap as a cash flow hedge of our exposure to variability in future cash flows attributable to interest payments on a \$25.0 million tranche of floating rate debt borrowed under our revolving credit facility. Under the terms of the swap, we pay a fixed rate of 2.34% on the \$25.0 million notional amount and receive payments from the counterparty based on the 1-month LIBOR rate for a term ending on January 7, 2016, effectively resulting in a fixed rate LIBOR component of the \$25.0 million notional amount. Our counterparty in this interest rate swap is JPMorgan Chase Bank, N.A.

Table of Contents**Contractual Obligations**

The following table summarizes the amount of payments due under specified contractual obligations as of March 27, 2012:

	Total	Payments Due by Period			
		Less than 1 year	1-3 Years (in thousands)	3-5 Years	More than 5 years
Long-term debt obligations	\$ 51,629	\$ 211	\$ 496	\$ 50,410	\$ 512
Capital lease obligations	203	101	102		
Interest (1)	11,236	1,971	3,841	3,730	1,694
Operating lease obligations	206,040	23,909	46,268	39,401	96,462
Capital obligations	57,863	57,863			
Total contractual obligations	\$ 326,971	\$ 84,055	\$ 50,707	\$ 93,541	\$ 98,668

(1) Assumes constant rate until maturity for our fixed and variable rate debt and capital lease obligations.

Uses interest rates as of March 27, 2012 for our variable rate debt. Interest payments on our variable-rate revolving credit facility balance at March 27, 2012 are calculated based on the assumption that debt relating to the interest rate swaps covering notional amounts totaling \$50.0 million remains outstanding until the expiration of the respective swap arrangements. The interest rates used in determining interest payments to be made under the interest rate swap agreements were determined by taking the applicable fixed rate of each swap plus the 0.50% margin, which was in effect as of March 27, 2012.

We have no material minimum purchase commitments with our vendors that extend beyond a year. See note 6 to the condensed consolidated financial statements for details of contractual obligations.

**Off-Balance Sheet Arrangements**

Except for operating leases (primarily restaurant leases), we do not have any off-balance sheet arrangements.

**Guarantees**

We entered into real estate lease agreements for franchise restaurants located in Everett, MA, Longmont, CO, Montgomeryville, PA, Fargo, ND and Logan, UT prior to our granting franchise rights for those restaurants. We have subsequently assigned the leases to the franchisees, but we remain contingently liable if a franchisee defaults under the terms of a lease. The Longmont lease expires in May 2014, the Everett lease expires

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

in February 2018, the Montgomeryville lease expires in June 2021, the Fargo lease expires in July 2016 and the Logan lease expires in August 2019. As the fair value of these guarantees is not considered significant, no liability value has been recorded.

### Recently Issued Accounting Standards

#### *Comprehensive Income*

*(ASU 2011-05)*

In June 2011, the FASB issued ASU 2011-05, *Presentation of Comprehensive Income*. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity, which was our presentation, and also requires presentation of reclassification adjustments from other comprehensive income to net income on the face of the financial statements. In December 2011, the FASB issued ASU 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05*, to defer the effective date of the specific requirement to present items that are reclassified out of accumulated comprehensive income to net income alongside their respective components of net income and other comprehensive income. All other provisions of this update are effective for annual and interim reporting periods beginning after December 15, 2011 (our 2012 fiscal year). The adoption of this new guidance has no impact on our consolidated financial position, results of operations or cash flows, though it did change our income statement presentation.

#### *Goodwill and Other Intangibles*

*(ASU 2011-08)*

In September 2011, the FASB issued ASU 2011-08, *Intangibles - Goodwill and Other, Testing Goodwill for Impairment*, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying value before applying the two-step goodwill impairment model that is currently in place. If it is determined through the qualitative assessment that a reporting unit's fair value is more likely than not greater than its carrying value, the remaining impairment steps would be unnecessary. The qualitative assessment is optional, allowing companies to go directly to the quantitative assessment. This update is effective for annual and interim goodwill impairment tests performed in fiscal years beginning after

Table of Contents

December 15, 2011 (our 2012 fiscal year). The adoption of this new guidance has no impact on our consolidated financial position, results of operations, cash flows or disclosures.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to market risk from changes in interest rates on debt and changes in commodity prices. Our exposure to interest rate fluctuations is limited to our outstanding bank debt and dependent on the interest rate option we choose to utilize under our revolving line of credit. Our options for the rate are the Alternate Base Rate, which is the higher of the issuing bank's prime lending rate, the Federal Funds rate plus 0.50%, or the Adjusted Eurodollar Rate for a one month interest period on such day plus 1.0% or the LIBOR plus an applicable margin. At March 27, 2012 there was \$50.0 million outstanding under our revolving line of credit which bears interest at approximately 87.5 to 187.5 basis points (depending on our leverage ratios) over LIBOR. Our various other notes payable totaled \$1.6 million at March 27, 2012 and had fixed rates ranging from 10.46% to 10.80%.

On October 22, 2008, we entered into an interest rate swap, starting on November 7, 2008, with a notional amount of \$25.0 million to hedge a portion of the cash flows of our variable rate borrowings. We have designated the interest rate swap as a cash flow hedge of our exposure to variability in future cash flows attributable to interest payments on a \$25.0 million tranche of floating rate debt borrowed under our revolving credit facility. Under the terms of the swap, we pay a fixed rate of 3.83% on the \$25.0 million notional amount and receive payments from the counterparty based on the 1-month LIBOR rate for a term ending on November 7, 2015, effectively resulting in a fixed rate on the LIBOR component of the \$25.0 million notional amount.

On January 7, 2009, we entered into another interest rate swap, starting February 7, 2009, with a notional amount of \$25.0 million to hedge a portion of the cash flows of our variable rate credit facility. We have designated the interest rate swap as a cash flow hedge of our exposure to variability in future cash flows attributable to interest payments on a \$25.0 million tranche of floating rate debt borrowed under our revolving credit facility. Under the terms of the swap, we pay a fixed rate of 2.34% on the \$25.0 million notional amount and receive payments from the counterparty based on the 1-month LIBOR rate for a term ending on January 7, 2016, effectively resulting in a fixed rate LIBOR component of the \$25.0 million notional amount.

By using derivative instruments to hedge exposures to changes in interest rates, we expose ourselves to credit risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. We minimize the credit risk by entering into transactions with high-quality counterparties whose credit rating is evaluated on a quarterly basis. Our counterparty in the interest rate swaps is JPMorgan Chase Bank, N.A.

Many of the ingredients used in the products sold in our restaurants are commodities that are subject to unpredictable price volatility. Currently, we do not utilize fixed price contracts for certain commodities such as produce and cheese, therefore, we are subject to prevailing market conditions when purchasing those types of commodities. For other commodities, we employ various purchasing and pricing contract techniques in an effort to minimize volatility, including fixed price contracts for terms of generally one year or less and negotiating prices with vendors with reference to fluctuating market prices. We currently do not use financial instruments to hedge commodity prices, but we will continue to evaluate their effectiveness. Extreme and/or long term increases in commodity prices could adversely affect our future results, especially if we are unable, primarily due to competitive reasons, to increase menu prices. Additionally, if there is a time lag between the increasing commodity prices and our ability to increase menu prices or if we believe the commodity price increase to be short in duration and we choose not to pass on the cost increases, our short-term financial results could be negatively affected.

## Edgar Filing: Texas Roadhouse, Inc. - Form 10-Q

We are subject to business risk as our beef supply is highly dependent upon four vendors. If these vendors were unable to fulfill their obligations under their contracts, we may encounter supply shortages and incur higher costs to secure adequate supplies, any of which would harm our business.

Table of Contents

**ITEM 4. CONTROLS AND PROCEDURES**

**Evaluation of disclosure controls and procedures**

We have evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to, and as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) as of the end of the period covered by this report. Based on the evaluation, performed under the supervision and with the participation of our management, including the Chief Executive Officer (the CEO ) and the Chief Financial Officer (the CFO ), our management, including the CEO and CFO, concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

**Changes in internal control**

During the period covered by this report, there were no changes with respect to our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II OTHER INFORMATION**

**ITEM 1. LEGAL PROCEEDINGS**

Occasionally, we are a defendant in litigation arising in the ordinary course of our business, including slip and fall accidents, employment related claims and claims from guests or employees alleging illness, injury or food quality, health or operational concerns. None of these types of litigation, most of which are covered by insurance, has had a material effect on us and, as of the date of this report, we are not party to any litigation that we believe could have a material adverse effect on our business other than the litigation discussed below.

On September 30, 2011, the U.S. Equal Employment Opportunity Commission ( EEOC ) filed a lawsuit styled Equal Employment Opportunity Commission v. Texas Roadhouse, Inc., Texas Roadhouse Holdings LLC, Texas Roadhouse Management Corp. in the United States District Court, District of Massachusetts, Civil Action Number 1:11-cv-11732. The complaint alleges that applicants over the age of 40 were denied employment in our restaurants in bartender, host, server and server assistant positions due to their age. The EEOC is seeking injunctive relief, remedial actions, payment of damages to the applicants and costs. We believe we have meritorious defenses to the claims made by the EEOC, and we intend to vigorously defend against them. We have filed a response to the complaint. Based on the preliminary status of this matter, we cannot estimate the possible amount or range of loss, if any, associated with this matter.

On January 19, 2011, a Massachusetts putative class action was filed styled Jenna Crenshaw, Andrew Brickley, et al, and all others similarly situated v. Texas Roadhouse, Inc., Texas Roadhouse Holdings, LLC, Texas Roadhouse of Everett, LLC and Texas Roadhouse Management Corp., d/b/a Texas Roadhouse. The complaint is pending in the United States District Court, District of Massachusetts, Civil Action Number 1:11-cv-10549. The complaint alleges a failure to comply with Massachusetts wage laws specifically that we improperly shared pooled tips with ineligible employees. Currently, we operate nine restaurants in the state. The parties began mediation in late February 2012 and on April 30, 2012, filed a Settlement Agreement seeking preliminary court approval to settle the lawsuit. Under the Agreement, the company agrees to pay \$5.0 million, which includes payment of the plaintiffs attorneys fees, payment of expenses to administer the settlement, and individual payments to resolve the claims of servers employed in Massachusetts restaurants from January 18, 2005 through the date of final court approval. The Agreement is subject to final approval of the court, which could take several months. A preliminary approval hearing will be held on May 3, 2012. As a result of the Agreement, we have recorded a \$5.0 million charge which is included in general and administrative expenses in our condensed consolidated statements of income and comprehensive income for the 13 weeks ended March 27, 2012.

**ITEM 1A. RISK FACTORS**

Information regarding risk factors appears in our Annual Report on Form 10-K for the year ended December 27, 2011, under the heading Special Note Regarding Forward-looking Statements and in the Form 10-K Part I, Item 1A, Risk Factors. There have been no material changes from the risk factors previously disclosed in our Form 10-K.

**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

On February 16, 2012, our Board of Directors approved a stock repurchase program under which it authorized us to repurchase up to \$100.0 million of our common stock. Historically, repurchases under our authorized stock repurchase program are made through open market transactions. The timing and the amount of any repurchases through this program will be determined by management under parameters established by our Board of Directors, based on its evaluation of our stock price, market conditions and other corporate considerations. This authorization replaced an existing stock repurchase program, which had no expiration date and \$40.9 million remaining as of the cancellation date.

The following table includes information regarding purchases of our common stock made by us during the 13 weeks ended March 27, 2012:

<b>Period</b>	<b>Total Number of Shares Purchased</b>	<b>Average Price Paid per Share</b>	<b>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</b>	<b>Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs</b>
December 28 to January 24				\$ 40,932,770
January 25 to February 21				\$ 100,000,000
February 22 to March 27				\$ 100,000,000
<b>Total</b>				

**ITEM 3. DEFAULTS UPON SENIOR SECURITIES**

None.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

**ITEM 5. OTHER INFORMATION.**

None.
