Notes to Unaudited Consolidated Financial Statements

(in thousands except share and per share data)

1. Basis of presentation

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for fiscal year end financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. For further information, refer to the financial statements and related footnotes included in our 2012 Form 10-K (Commission File No. 1-34728) filed with the Securities and Exchange Commission.

We operate as a single business unit.

Interim Consolidated Financial Information

The accompanying consolidated balance sheet as of March 31, 2013 and the consolidated statements of operations and comprehensive income (loss) for the three months ended March 31, 2013 and 2012 and cash flows for the three months ended March 31, 2013 and 2012 have been prepared by the Company and have not been audited.

The Company is a counterparty to an interest-rate swap agreement to hedge against the potential impact on earnings from increases in market interest rates. Under the interest rate swap agreement, effective as of July 18, 2011 the Company either receives or makes payments on a monthly basis based on the differential between 6.335% and LIBOR plus 4.25% (with a LIBOR floor of 1.5%). The negative fair value of the interest rate swap, net of tax, of (\$305) at March 31, 2013 is included in Accumulated other comprehensive loss on the balance sheet. This fair value was determined using Level 2 inputs as defined in Accounting Standards Codification Topic (ASC) 820. The interest rate swap contract on \$50,000 notional amount of the term loan expires in December 2014. The Company does not expect to record any unrecognized loss into earnings in the next twelve months. Additionally, other comprehensive income (loss) includes the net income (loss) of the Company plus the Company's adjustments for its defined benefit retirement plans based on the measurement date as of the Company's year-end. The Company did not have any items classified out of other comprehensive income (loss) in the three months ended March 31, 2013. Additionally, the decrease in accumulated other comprehensive income (loss) only relates to adjustments to the fair value of the Company's interest rate swap as discussed below in Note 5 to the Consolidated Financial Statements.

The Company's business is seasonal and consequently its results of operations and financial condition vary from quarter-to-quarter. Because of this seasonality, the Company's results of operations for any quarter may not be indicative of results of operations that may be achieved for a

subsequent quarter or the full year, and may not be similar to results of operations experienced in prior years. The Company attempts to manage the seasonal impact of snowfall on its revenues in part through its pre-season sales program. This pre-season sales program encourages the Company's distributors to re-stock their inventory during the second and third quarters in anticipation of the peak fourth quarter retail sales period by offering favorable pre-season pricing and payment deferral until the fourth quarter. Thus, the Company tends to generate its greatest volume of sales during the second and third quarters. By contrast, its revenue and operating results tend to be lowest during the first quarter, as management believes the Company's end-users prefer to wait until the beginning of a snow season to purchase new equipment and as the Company's distributors sell off inventory and wait for the pre-season sales incentive period to re-stock inventory. Fourth quarter sales vary from year-to-year as they are primarily driven by the level, timing and location of snowfall during the quarter. This is because most of the Company's fourth quarter sales and shipments consist of re-orders by distributors seeking to restock inventory to meet immediate customer needs caused by snowfall during the winter months.

2. Fair Value

Fair value is the price at which an asset could be exchanged in a current transaction between knowledgeable, willing parties. A liability's fair value is defined as the amount that would be paid to transfer the liability to a new obligor, not the amount that would be paid to settle the liability with the creditor. Fair value measurements are categorized into one of three levels based on the lowest level of significant input used: Level 1 (unadjusted quoted prices in active markets); Level 2 (observable market inputs available at the measurement date, other than quoted prices included in Level 1); and Level 3 (unobservable inputs that cannot be corroborated by observable market data).

Table of Contents

The following table presents financial assets and liabilities measured at fair value on a recurring basis and discloses the fair value of long-term debt:

	Fair Value at 3/31/2013	Fair Value at 12/31/2012
Assets:		
Other long-term assets (a)	\$ 1,035	\$ 491
Total Assets	\$ 1,035	\$ 491
Liabilities:		
Long term debt (b)	\$ 110,326	\$ 110,566
Other long-term liabilities- Interest rate swaps(c)	481	544
Total Liabilities	\$ 110,807	\$ 111,110

(a) Included in other assets is the cash surrender value of insurance policies on various individuals that are associated with the Company. The carrying amounts of these insurance policies approximates their fair value.

(b) The fair value of the Company's long-term debt, including current maturities, is estimated using discounted cash flows based on the Company's current incremental borrowing rates for similar types of borrowing arrangements, which is a Level 2 input for all periods presented. Meanwhile, long-term debt is recorded at carrying amount, net of discount, as disclosed on face of the balance sheet.

(c) Valuation models are calibrated to initial trade price. Subsequent valuations are based on observable inputs to the valuation model (e.g. interest rates and credit spreads). Model inputs are changed only when corroborated by market data. A credit risk adjustment is made on each swap using observable market credit spreads. Thus, inputs used to determine fair value of the interest rate swap are Level 2 inputs.

3. Inventories

Inventories consist of the following:

	March 31, 2013	December 31, 2012
Finished goods and work-in-process	\$ 43,985	\$ 29,119
Raw material and supplies	1,114	1,173
	\$ 45,099	\$ 30,292

4. Property, plant and equipment

Property, plant and equipment are summarized as follows:

	March 31, 2013	December 31, 2012
Land	\$ 960	\$ 960
Land improvements	1,777	1,768
Buildings	12,852	12,852
Machinery and equipment	24,314	24,286
Furniture and fixtures	7,492	7,465
Mobile equipment and other	1,201	1,138
Construction-in-process	1,004	351
Total property, plant and equipment	49,600	48,820
Less accumulated depreciation	(29,587)	(28,933)
Net property, plant and equipment	\$ 20,013	\$ 19,887

Table of Contents**5. Long-Term Debt**

Long-term debt is summarized below:

	March 31, 2013	December 31, 2012
Term Loan, net of debt discount of \$901 and \$946 at March 31, 2013 and December 31, 2012, respectively	\$ 111,723	\$ 111,966
Less current maturities	971	971
	\$ 110,752	\$ 110,995

The Company's senior credit facilities consist of a \$125,000 term loan facility and an \$80,000 revolving credit facility with a group of banks. The agreement for the term loan (the Term Loan Credit Agreement) provides for a senior secured term loan facility in the aggregate principal amount of \$125,000 and generally bears interest at (at the Company's election) either (i) 3.25% per annum plus the greatest of (a) the Prime Rate (as defined in the Term Loan Credit Agreement) in effect on such day, (b) the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers plus 0.50% and (c) 1.00% plus the greater of (1) the London Interbank Offered Rate for a one month interest period multiplied by the Statutory Reserve Rate (as defined in the Term Loan Credit Agreement) and (2) 1.50% or (ii) 4.25% per annum plus the greater of (a) the London Interbank Offered Rate for the applicable interest period multiplied by the Statutory Reserve Rate and (b) 1.50%. The revolving credit facility provides that the Company has the option to select whether borrowings will bear interest at either (i) 1.75% per annum plus the London Interbank Offered Rate for the applicable interest period multiplied by the Statutory Reserve Rate or (ii) 1.25% per annum plus the greatest of (a) the Prime Rate in effect on such day, (b) the weighted average of the rates on overnight Federal funds transactions with members of the Federal Reserve System arranged by Federal funds brokers plus 0.50% and (c) the London Interbank Offered Rate for a one month interest period multiplied by the Statutory Reserve Rate plus 1%. The maturity date for the Company's revolving credit facility is April 17, 2017, and the Company's term loan amortizes in nominal amounts quarterly with the balance payable on April 18, 2018.

The term loan was issued at a \$1,250 discount which is being amortized over the term of the term loan.

At March 31, 2013, the Company had no borrowings on the revolving credit facility and remaining borrowing availability of \$38,267.

The Company's senior credit facilities include certain negative and operating covenants, including restrictions on its ability to pay dividends, and other customary covenants, representations and warranties and events of default. The senior credit facilities entered into and recorded by the Company's subsidiaries significantly restrict its subsidiaries from paying dividends and otherwise transferring assets to Douglas Dynamics, Inc. The terms of the Company's revolving credit facility specifically restrict subsidiaries from paying dividends if a minimum availability under the revolving credit facility is not maintained, and both senior credit facilities restrict subsidiaries from paying dividends above certain levels or at all if an event of default has occurred. These restrictions would affect the Company indirectly since the Company relies principally on distributions from its subsidiaries to have funds available for the payment of dividends. In addition, the Company's revolving credit facility includes a requirement that, subject to certain exceptions, capital expenditures may not exceed \$10,000 in any calendar year and, if certain minimum availability under the revolving credit facility is not maintained, that the Company comply with a monthly minimum fixed charge coverage ratio test of 1.0:1.0. Compliance with the fixed charge coverage ratio test is subject to certain cure rights under the Company's

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

revolving credit facility. At March 31, 2013, the Company was in compliance with the respective covenants. The credit facilities are collateralized by substantially all assets of the Company.

In accordance with the senior credit facilities, the Company is required to make additional principal prepayments over the above scheduled payments under certain conditions. This includes, in the case of the term loan facility, 100% of the net cash proceeds of certain asset sales, certain insurance or condemnation events, certain debt issuances, and, within 150 days of the end of the fiscal year, 50% of excess cash flow, as defined, including a deduction for certain distributions (which percentage is reduced to 25% or 0% upon the achievement of certain leverage ratio thresholds), for any fiscal year. Excess cash flow is defined in the senior credit facilities as consolidated adjusted EBITDA (earnings before interest, taxes, depreciation and amortization) plus a working capital adjustment less the sum of repayments of debt and capital expenditures subject to certain adjustments, interest and taxes paid in cash, management fees and certain restricted payments (including dividends or distributions). Working capital adjustment is defined in the senior credit facilities as the change in working capital, defined as current assets excluding cash and cash equivalents less current liabilities excluding current portion of long term debt. As of March 31, 2013, the Company was not required to make an excess cash flow payment.

Table of Contents

Each of the senior secured facilities includes a hedge provision, which required the Company to enter into an interest rate hedge commencing 90 days after the closing date. The hedging provision requires the Company to hedge the interest rate on at least 25% of the aggregate outstanding principal amount of the term loans. The purpose of the interest rate swap is to reduce the Company's exposure to interest rate volatility. Effective June 20, 2011, the Company entered into an interest rate swap agreement with a notional amount of \$50,000. The interest rate swap negative fair value at March 31, 2013 of \$481 is included in other long-term liabilities on the Consolidated Balance Sheet. The Company has counterparty credit risk resulting from the interest rate swap, which it monitors on an on-going basis. This risk lies with one global financial institution. Under the interest rate swap agreement, effective as of July 18, 2011, the Company either receives or makes payments on a monthly basis based on the differential between 6.335% and LIBOR plus 4.25% (with a LIBOR floor of 1.5%). The interest rate swap contract on the term loan expires in December 2014.

6. Accrued Expenses and Other Liabilities

Accrued expenses and other liabilities are summarized as follows:

	March 31, 2013		December 31, 2012
Payroll and related costs	\$ 2,776	\$	1,429
Employee benefits	1,217		2,731
Accrued warranty	2,859		3,628
Other	1,834		2,541
	\$ 8,686	\$	10,329

7. Warranty Liability

The Company accrues for estimated warranty costs as sales are recognized and periodically assesses the adequacy of its recorded warranty liability and adjusts the amount as necessary. The Company's warranties generally provide, with respect to its snow and ice control equipment, that all material and workmanship will be free from defect for a period of two years after the date of purchase by the end-user, and with respect to its parts and accessories purchased separately, that such parts and accessories will be free from defect for a period of one year after the date of purchase by the end-user. Certain snowplows only provide for a one year warranty. The Company determines the amount of the estimated warranty costs (and its corresponding warranty reserve) based on the Company's prior five years of warranty history utilizing a formula driven by historical warranty expense and applying management's judgment. The Company adjusts its historical warranty costs to take into account unique factors such as the introduction of new products into the marketplace that do not provide a historical warranty record to assess. The warranty reserve is included in Accrued Expenses and Other Current Liabilities in the accompanying consolidated balance sheets.

The following is a rollforward of the Company's warranty liability:

Three months ended	
March 31, 2013	March 31, 2012

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

Balance at the beginning of the period	\$	3,628	\$	4,188
Warranty provision		125		130
Claims paid/settlements		(894)		(812)
Balance at the end of the period	\$	2,859	\$	3,506

Table of Contents**8. Employee Retirement Plans**

The components of net periodic pension cost consist of the following:

	Three months ended	
	March 31, 2013	March 31, 2012
Component of net periodic pension cost:		
Service cost	\$ 62	\$ 67
Interest cost	362	370
Expected return on plan assets	(352)	(318)
Amortization of net loss	301	192
Net periodic pension cost	\$ 373	\$ 311

The Company estimates its total required minimum contributions to its pension plans in 2013 will be \$827. Through March 31, 2013, the Company has made \$95 of cash contributions to the pension plans in 2013 versus \$347 through the same period in 2012.

Components of net periodic other postretirement benefit cost consist of the following:

	Three months ended	
	March 31, 2013	March 31, 2012
Components of net periodic other postretirement benefit cost		
Service cost	\$ 63	\$ 70
Interest cost	61	90
Amortization of net gain	(43)	(4)
Net periodic other postretirement benefit cost	\$ 81	\$ 156

9. Earnings per Share

Basic earnings per share of common stock is computed by dividing net income (loss) by the weighted average number of common shares outstanding during the period. Diluted earnings per share of common stock is computed by dividing net income (loss) by the weighted average number of common shares and common stock equivalents related to the assumed exercise of stock options, using the two-class method. Stock options for which the exercise price exceeds the average fair value have an anti-dilutive effect on earnings per share and are excluded from the calculation. There were 54,866 and 89,270 shares excluded from diluted earnings per share for the three months ended March 31, 2013 and 2012, respectively, as the shares would be anti-dilutive for those periods as the Company incurred a net loss.

As restricted shares and restricted stock units both participate in dividends, in accordance with ASC 260, the Company has calculated earnings per share pursuant to the two-class method, which is an earnings allocation formula that determines earnings per share for common stock and participating securities according to dividends declared and participation rights in undistributed earnings. Under this method, all earnings (distributed and undistributed) are allocated to common shares and participating securities based on their respective rights to receive dividends.

Table of Contents

	Three months ended	
	March 31, 2013	March 31, 2012
<i>Basic loss per common share</i>		
Net loss	\$ (3,404)	\$ (4,268)
Less loss allocated to participating securities	(43)	(54)

10. Employee Stock Plans***Amended and Restated 2004 Stock Incentive Plan***

As of March 31, 2013, 37,240 shares of common stock are reserved for issuance upon the exercise of outstanding options under the Company's Amended and Restated 2004 Stock Incentive Plan (the "A&R 2004 Plan"). All outstanding options are fully vested. All options expire 10 years from the date of grant. No further awards are permitted to be issued under the A&R 2004 Plan.

Stock Options

The following table summarizes information with respect to the Company's stock option activity under the A&R 2004 Plan for the three months ended March 31, 2013.

	Three months ended March 31, 2013
Stock options - beginning of period	37,240
Options exercised	
Stock options - end of period	37,240

2010 Stock Incentive Plan

In May 2010, the Company's Board of Directors and stockholders adopted the 2010 Stock Incentive Plan (the "2010 Plan"). The 2010 Plan provides for the issuance of nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock awards and restricted stock units, any of which may be performance-based, and for incentive bonuses, which may be paid in cash or stock or a combination of both, to eligible employees, officers, non-employee directors and other service providers to the Company and its subsidiaries. A maximum of 2,130,000 shares of common stock may be issued pursuant to all awards under the 2010 Plan.

Table of Contents**Restricted Stock Share Awards**

A summary of restricted stock activity for the three months ended March 31, 2013 is as follows:

	Shares (In thousands)	Weighted Average Grant Date Fair value	Weighted Average Remaining Contractual Term
Unvested at December 31, 2012	208,823	\$ 12.63	1.94 years
Granted	44,022	\$ 14.78	2.75 years
Vested	(41,325)	\$ 14.64	
Cancelled and forfeited			
Unvested at March 31, 2013	211,520	\$ 12.68	2.08 years
Expected to vest in the future at March 31, 2013	203,905	\$ 12.68	2.08 years

The fair value of the Company's restricted stock awards is the closing stock price on the date of grant. The Company recognized \$286 of compensation expense related to restricted stock awards granted for the three months ended March 31, 2013. The unrecognized compensation expense calculated under the fair value method for shares expected to vest as of March 31, 2013 was approximately \$2,012 and is expected to be recognized over a weighted average period of 2.08 years.

Performance Share Unit Awards

The Company granted performance share units as performance based awards under the 2010 Plan in the first quarter of 2013 that are subject to performance conditions. Upon meeting the prescribed performance conditions, in the first quarter of the year subsequent to grant, employees will be issued restricted stock units (RSUs) that will be subject to vesting over the two years following the end of the performance period. In accordance with ASC 718, such awards are being expensed over the vesting period from the date of grant through the requisite service period, based upon the most probable outcome. The fair value per share of the awards is the closing stock price on the date of grant, which was \$14.40. The Company recognized \$16 of compensation expense related to the awards in the three months ended March 31, 2013. The unrecognized compensation expense calculated under the fair value method for shares that were, as of March 31, 2013, expected to be earned through the requisite service period was approximately \$898 and is expected to be recognized through 2016.

Restricted Stock Unit Awards

RSUs are granted to both the non-employee directors and management. Prior to 2013, RSUs were only issued to directors, however, in 2013, the Company changed the timing and form of management's annual stock grants. For both management and non-employee directors, RSUs carry dividend equivalent rights but do not carry voting rights. Each RSU represents the right to receive one share of the Company's common stock and are subject to time based vesting restrictions. Participants are not required to pay any consideration to the Company at either the time

of grant of a RSU or upon vesting.

The Company's compensation committee approved a retirement provision for RSUs issued to management. The retirement provision provides that members of management who either (1) are age 65 or older or (2) have at least ten years of service and who are at least age 55 will continue to vest in unvested RSUs upon retirement. As the retirement provision does not qualify as a substantive service condition, the Company incurred \$261 in additional expense in the first quarter of 2013 as a result of accelerated stock based compensation expense for employees who meet the thresholds of the retirement provision. The Company's nominating and governance committee approved a retirement provision for the RSUs issued to non-employee directors that accelerates the vesting of such RSUs upon retirement. Such awards are fully expensed immediately upon grant in accordance with ASC 718, as the retirement provision eliminates substantive service conditions associated with the awards.

Table of Contents

A summary of RSU activity for the three months ended March 31, 2013 is as follows:

	Shares (In thousands)	Weighted Average Grant Date Fair value	Weighted Average Remaining Contractual Term
Unvested at December 31, 2012	26,046	\$ 14.73	0.72 years
Granted	69,736	\$ 14.52	1.99 years
Vested	(53,022)	\$ 14.68	
Cancelled and forfeited			
Unvested at March 31, 2013	42,760	\$ 14.46	2.44 years
Expected to vest in the future at March 31, 2013	41,721	\$ 14.46	2.44 years

The Company recognized \$639 of compensation expense related to the RSU awards in the three months ended March 31, 2013. The unrecognized compensation expense, net of expected forfeitures, calculated under the fair value method for shares that were, as of March 31, 2013, expected to be earned through the requisite service period was approximately \$561 and is expected to be recognized through 2016.

Vested director RSUs are settled by the delivery to the participant or a designated brokerage firm of one share of common stock per vested RSU as soon as reasonably practicable following a termination of service of the participant that constitutes a separation from service, and in all events no later than the end of the calendar year in which such termination of service occurs or, if later, two and one-half months after such termination of service. Meanwhile, vested management RSUs are settled by the delivery to the participant or a designated brokerage firm of one share of common stock per vested RSU as soon as reasonably practicable following vesting.

11. Commitments and Contingencies

In the ordinary course of business, the Company is engaged in various litigation including product liability and intellectual property disputes. However, the Company does not believe that any pending litigation will have a material adverse effect on its consolidated financial position. In addition, the Company is not currently a party to any environmental-related claims or legal matters.

12. Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The largest item affecting deferred taxes is the difference between book and tax amortization of goodwill and other intangibles amortization. The Company estimates that the annual effective tax rate for 2013 will be approximately 37%. The Company's effective tax rate was 38.6% and 1.5% for the three months ended March 31, 2013 and 2012, respectively. The effective tax rate (benefit) for the three months ended March 31, 2013 was higher than the corresponding period in 2012 due

to the Company recognizing a lower net loss in the current period as compared to the corresponding period in the prior year. The effective tax rate (benefit) for the three months ended March 31, 2013 was higher than the estimated annual effective tax rate for the entire year of 2013, due to the Company's seasonal income cycle which results in a loss in the first quarter but overall projected income for the year 2013 being higher than 2012.

13. Impairment of Assets Held For Sale

During the first quarter of 2013, the Company lowered the asking price for its assets held for sale. The Company recorded assets held for sale on its balance sheet in conjunction with the closure of the Johnson City, Tennessee location in 2010. The land and building have been held for sale since the closure. In an effort to stimulate sales activity, the Company lowered the listed sale price which caused the Company to reassess the fair value of the assets held for sale. The Company valued the fair value of the assets held for sale based upon Level 2 market price inputs for similar assets. The Company used comparable properties sold and held for sale in the Johnson City, TN industrial real estate market to determine an appropriate fair value. Consequently, the Company incurred a \$647 loss recognized on the impairment of assets held for sale and is included in Impairment of assets held for sale on the Consolidated Statements of Operations and Comprehensive Income (Loss).

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our consolidated financial statements and related notes which are included in Item 1 of this Quarterly Report on Form 10-Q, as well as the information contained in our Form 10-K (Commission File No. 001-34728) filed with the Securities and Exchange Commission.

In this Quarterly Report on Form 10-Q, unless the context indicates otherwise: Douglas Dynamics, the Company, we, our, or us refer to Douglas Dynamics, Inc.

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). These statements include information relating to future events, product demand, the payment of dividends, future financial performance, strategies, expectations, competitive environment, regulation and availability of financial resources. These statements are often identified by use of words such as anticipate, believe, intend, estimate, expect, continue, should, could, may, plan, project, predict, will and similar expressions and include references to assumptions and relate to our future prospects, developments and business strategies. Such statements involve known and unknown risks, uncertainties and other factors that could cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by these forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to: (i) weather conditions, particularly lack of or reduced levels of snowfall and timing of such snowfall; (ii) a significant decline in economic conditions; (iii) our inability to maintain good relationships with our distributors; (iv) lack of available or favorable financing options for our end-users or distributors; (v) increases in the price of steel or other materials necessary for the production of our products that cannot be passed on to our distributors; (vi) increases in the price of fuel; (vii) the inability of our suppliers to meet our volume or quality requirements; (viii) inaccuracies in our estimates of future demand for our products; (ix) our inability to protect or continue to build our intellectual property portfolio; (x) the effects of laws and regulations and their interpretations on our business and financial condition; (xi) our inability to develop new products or improve upon existing products in response to end-user needs; (xii) losses due to lawsuits arising out of personal injuries associated with our products; (xiii) factors that could impact the future declaration and payment of dividends; and (xiv) our inability to compete effectively against our competitors, as well as those discussed in the sections entitled Risk Factors in Part II, Item 1A of this Quarterly Report on Form 10-Q, if any, or in our most recent Annual Report on Form 10-K. Given these risks and uncertainties, you should not place undue reliance on these forward-looking statements. In addition, the forward-looking statements in this Quarterly Report on Form 10-Q speak only as of the date hereof and we undertake no obligation, except as required by law, to update or release any revisions to any forward-looking statement, even if new information becomes available in the future.

Results of Operations

Overview

During the three months ended March 31, 2013 and 2012, we sold 2,120 and 1,614 units of snow and ice control equipment, respectively. The following table shows our sales of snow and ice control equipment and related parts and accessories as a percentage of net sales for the three

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

months ended March 31, 2013 and 2012.

	Three months ended	
	March 31, 2013	March 31, 2012
Equipment	57%	67%
Parts and accessories	43%	33%

The following table sets forth, for the three months ended March 31, 2013 and 2012, the consolidated statements of operations of Douglas Dynamics, Inc. and its subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. In the table below and throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations, consolidated statements of operations data for the three months ended March 31, 2013 and 2012 have been derived from our unaudited consolidated financial statements. The information contained in the table below should be read in conjunction with our consolidated financial statements and the related notes included elsewhere in this Quarterly Report on Form 10-Q.

Table of Contents

	Three Months Ended	
	March 31, 2013	March 31, 2012
	(unaudited) (in thousands)	
Net sales	\$ 14,141	\$ 8,560
Cost of sales	9,815	6,740
Gross profit	4,326	1,820
Selling, general, and administrative expense	5,910	4,631
Intangibles amortization	1,298	1,300
Impairment of assets held for sale	647	
Loss from operations	(3,529)	(4,111)
Interest expense, net	(1,983)	(2,046)
Other expense, net	(31)	(78)
Loss before taxes	(5,543)	(6,235)
Income tax benefit	(2,139)	(1,967)
Net loss	\$ (3,404)	\$ (4,268)

The following table sets forth for the three months ended March 31, 2013 and 2012, the percentage of certain items in our consolidated statement of operations, relative to net sales:

	Three Months Ended	
	March 31, 2013	March 31, 2012
	(unaudited)	
Net sales	100.0%	100.0%
Cost of sales	69.4%	78.7%
Gross profit	30.6%	21.3%
Selling, general, and administrative expense	41.8%	54.1%
Intangibles amortization	9.2%	15.2%
Impairment of assets held for sale	4.6%	0.0%
Loss from operations	(25.0)%	(48.0)%
Interest expense, net	(14.0)%	(23.9)%
Other expense, net	(0.2)%	(0.9)%
Loss before taxes	(39.2)%	(72.8)%
Income tax benefit	(15.1)%	(23.0)%
Net loss	(24.1)%	(49.8)%

Net Sales

Net sales were \$14.1 million for the three months ended March 31, 2013 compared to \$8.6 million in the three months ended March 31, 2012, an increase of \$5.5 million, or 64.0%. This increase was due to 31.4% higher sales unit volume of equipment units and an increase in parts and

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

accessories sales of \$3.2 million or 113.0%. During the three months ended March 31, 2013 and 2012, we sold 2,120 and 1,614 units of snow and ice control equipment, respectively. The increases in both parts and accessories and units were due to slightly higher than average snowfall in the October 2012 through March 2013 snow season in North America, compared to record low snowfall levels in the prior year. Snowfall levels across most of our core markets were higher in the first quarter of 2013 as compared to the first quarter of 2012.

Table of Contents

Cost of Sales

Cost of sales was \$9.8 million for the three months ended March 31, 2013 compared to \$6.7 million for the three months ended March 31, 2012, an increase of \$3.1 million, or 46.3%. The increase in cost of sales for the three months ended March 31, 2013 compared to the corresponding period in 2012 was driven by increases in volume as discussed above under Net Sales. In addition, the Company experienced lower cost of sales as a percentage of sales of 69.4% for the three months ended March 31, 2013 compared to 78.7% for the three-month period ended March 31, 2012. Decrease in cost of sales as a percentage of sales is due to lower unit costs resulting from higher sales volumes. As a percentage of cost of sales, fixed and variable costs were approximately 30% and 70%, respectively, for the three months ended March 31, 2013, while fixed and variable costs were approximately 31% and 69%, respectively for the three months ended March 31, 2012.

Gross Profit

Gross profit was \$4.3 million for the three months ended March 31, 2013 compared to \$1.8 million in the three months ended March 31, 2012, an increase of \$2.5 million, or 138.9%. Gross profit increased for the three month period due to an increase in units sold and lower cost of sales as a percentage of net sales. As a percentage of net sales, gross profit increased from 21.3% for the three months ended March 31, 2012 to 30.6% for the corresponding period in 2013.

Selling, General and Administrative Expense

Selling, general and administrative expenses, including intangibles amortization, were \$7.2 million for the three months ended March 31, 2013, compared to \$5.9 million for the three months ended March 31, 2012, an increase of \$1.3 million, or 27.6%. The Company increased spending on advertising and promotions by \$0.3 million in conjunction with launching a record number of new product development initiatives in 2013. Stock based compensation increased \$0.6 million primarily due to the implementation of retirement vesting provisions on restricted stock units granted in 2013. The remainder of the increase can be attributed to higher incentive based compensation due to more favorable forecasted results in 2013 compared to 2012 driven by increased snowfall.

Impairment of assets held for sale

In an effort to stimulate sales activity, the Company lowered the listed sale price which caused the Company to reassess the fair value of the assets held for sale. Consequently, the Company recorded an impairment charge of \$0.6 million in the three months ending March 31, 2013.

Interest Expense

Interest expense was \$2.0 million for both the three months ended March 31, 2013 and March 31, 2012.

Income Taxes

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The largest item affecting deferred taxes is the difference between book and tax amortization of goodwill and other intangibles amortization. The Company estimates that the annual effective tax rate for 2013 will be approximately 37%. The Company's effective tax rate was 38.6% and 1.5% for the three months ended March 31, 2013 and 2012, respectively. The effective tax rate (benefit) for the three months ended March 31, 2013 was higher than the corresponding period in 2012 due to the Company recognizing a lower net loss in the current period as compared to the corresponding period in the prior year. The effective tax rate (benefit) for the three months ended March 31, 2013 was higher than the estimated annual effective tax rate for the entire year of 2013, due to the Company's seasonal income cycle which results in a loss in the first quarter but overall projected income for the year 2013 being higher than 2012.

Net Loss

Net loss for the three months ended March 31, 2013 was \$3.4 million compared to net loss of \$4.3 million for the corresponding period in 2012, a decrease in net loss of \$0.9 million, or 20.9%. This decrease in net loss was driven by the factors described above under Net Sales, Cost of Net Sales, Selling, General and Administrative and Other Expense. As a percentage of net sales, net loss was (24.1%) for the three months ended March 31, 2013 compared to (49.8%) for the three months ended March 31, 2012.

Table of Contents

Adjusted EBITDA

Adjusted EBITDA for the three months ended March 31, 2013 was \$0.2 million compared to (\$1.8) million in the corresponding period in 2012, an increase of \$2.0 million. For the three-month period ended March 31, 2013 the increase in Adjusted EBITDA is primarily attributable to increased unit sales of snow and ice control equipment and parts and accessories.

Free Cash Flow

Free cash flow for the three months ended March 31, 2013 was (\$8.0) million compared to (\$10.5) million in the corresponding period in 2012, a decrease in cash used of \$2.5 million, or 23.8%. The increase in free cash flow is primarily a result of lower cash used in operating activities of \$2.9 million, as discussed below under Liquidity and Capital Resources. Slightly offsetting the decrease in cash used by operating activities was an increase in capital expenditures of \$0.4 million.

Non-GAAP Financial Measures

This Quarterly Report on Form 10-Q contains financial information calculated other than in accordance with U.S. generally accepted accounting principles (GAAP).

These non-GAAP measures include:

- Free cash flow;
- Adjusted net loss; and
- Adjusted EBITDA.

These non-GAAP disclosures should not be construed as an alternative to the reported results determined in accordance with GAAP.

Free cash flow is a non-GAAP financial measure which we define as net cash provided by operating activities less capital expenditures. Free cash flow should be evaluated in addition to, and not considered a substitute for, other financial measures such as net income and cash flow provided by operations. We believe that free cash flow represents our ability to generate additional cash flow from our business operations.

Edgar Filing: DOUGLAS DYNAMICS, INC - Form 10-Q

The following table reconciles net cash provided by operating activities, a GAAP measure, to free cash flow, a non-GAAP measure.

	Three months ended	
	2013	2012
	(In Thousands)	
Net cash used in operating activities	\$ (7,148)	\$ (10,029)
Acquisition of property and equipment	(843)	(437)
Free cash flow	\$ (7,991)	\$ (10,466)

Adjusted net loss represents net income as determined under GAAP, excluding a loss recognized on impairment of assets held for sale. We believe that the presentation of adjusted net loss for the three months ended March 31, 2013 and March 31, 2012 allows investors to make meaningful comparisons of our operating performance between periods and to view our business from the same perspective as our management. Because the excluded item is not predictable or consistent, management does not consider it when evaluating our performance or when making decisions regarding allocation of resources.

Table of Contents

The following table presents a reconciliation of net loss, the most comparable GAAP financial measure, to adjusted net loss for the three months ended March 31, 2013 and March 31, 2012.

(in millions)	Three months ended	
	March 31, 2013	March 31, 2012
Net loss - (GAAP)	\$ (3.4)	\$ (4.3)
Addback expenses, net of tax at 37.0% for 2013:		
-Loss recognized on impairment of assets held for sale	0.4	
Adjusted net loss - (Non-GAAP)	\$ (3.0)	\$ (4.3)

Adjusted EBITDA represents net loss before interest, taxes, depreciation and amortization, as further adjusted for certain charges related to certain unrelated legal fees and consulting fees, impairment on assets held for sale and stock based compensation. We use, and we believe our investors benefit from the presentation of Adjusted EBITDA in evaluating our operating performance because it provides us and our investors with additional tools to compare our operating performance on a consistent basis by removing the impact of certain items that management believes do not directly reflect our core operations. In addition, we believe that Adjusted EBITDA is useful to investors and other external users of our consolidated financial statements in evaluating our operating performance as compared to that of other companies, because it allows them to measure a company's operating performance without regard to items such as interest expense, taxes, depreciation and amortization, which can vary substantially from company to company depending upon accounting methods and book value of assets and liabilities, capital structure and the method by which assets were acquired. Our management also uses Adjusted EBITDA for planning purposes, including the preparation of our annual operating budget and financial projections. Management also uses Adjusted EBITDA to evaluate our ability to make certain payments, including dividends, in compliance with our senior credit facilities, which is determined based on a calculation of Consolidated Adjusted EBITDA that is substantially similar to Adjusted EBITDA.

Adjusted EBITDA has limitations as an analytical tool. As a result, you should not consider it in isolation, or as a substitute for net income, operating income, cash flow from operating activities or any other measure of financial performance or liquidity presented in accordance with GAAP. Some of these limitations are:

- Adjusted EBITDA does not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;
- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our indebtedness;
- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will often have to be replaced in the future, and Adjusted EBITDA does not reflect any cash requirements for such replacements;
- Other companies, including other companies in our industry, may calculate Adjusted EBITDA differently than we do, limiting its usefulness as a comparative measure; and
- Adjusted EBITDA does not reflect tax obligations whether current or deferred.

Table of Contents

The following table presents a reconciliation of net loss, the most comparable GAAP financial measure, to Adjusted EBITDA as well as the resulting calculation of Adjusted EBITDA for the three months ended March 31, 2013 and 2012:

	Three months ended	
	March 31, 2013	March 31, 2012
Net Loss	\$ (3,404)	\$ (4,268)
Interest Expense - Net	1,983	2,046
Income Taxes	(2,139)	(1,967)
Depreciation Expense	717	701
Amortization	1,298	1,300
EBITDA	(1,545)	(2,188)
Stock Based Compensation	935	365
Other charges (1)	846	13
Adjusted EBITDA	\$ 236	\$ (1,810)

(1) Reflects expenses of \$199 and \$13 for one time, unrelated legal and consulting fees for the three months ended March 31, 2013 and March 31, 2012, respectively. Includes write down of asset held for sale of \$647 for the three months ended March 31, 2013.

Discussion of Critical Accounting Policies

For a discussion of our critical accounting policies, please see the disclosure included in our Form 10-K (Commission File No. 001-34728) filed with the Securities and Exchange Commission, under the heading Management's Discussion and Analysis of Financial Condition and Results of Operation Critical Accounting Policies.

New Accounting Pronouncements

For the three months ended March 31, 2013, the Company did not adopt any new accounting pronouncements that had a significant impact to the Company's consolidated financial statements.

Liquidity and Capital Resources

Our principal sources of cash have been and we expect will continue to be cash from operations and borrowings under our senior credit facilities.

Our primary uses of cash are to provide working capital, meet debt service requirements, finance capital expenditures, pay dividends under our dividend policy and support our growth, including through potential acquisitions, and for other general corporate purposes. For a description of the seasonality of our working capital rates see Seasonality and Year-To-Year Variability.

Our Board of Directors has adopted a dividend policy that reflects an intention to distribute to our stockholders a regular quarterly cash dividend. The declaration and payment of these dividends to holders of our common stock is at the discretion of our Board of Directors and depends upon many factors, including our financial condition and earnings, legal requirements, taxes and other factors our Board of Directors may deem to be relevant. The terms of our indebtedness may also restrict us from paying cash dividends on our common stock under certain circumstances. As a result of this dividend policy, we may not have significant cash available to meet any large unanticipated liquidity requirements. As a result, we may not retain a sufficient amount of cash to fund our operations or to finance unanticipated capital expenditures or growth opportunities, including acquisitions. Our Board of Directors may, however, amend, revoke or suspend our dividend policy at any time and for any reason.

As of March 31, 2013, we had \$49.4 million of total liquidity, comprised of \$11.1 million in cash and cash equivalents and borrowing availability of \$38.3 million under our revolving credit facility. Borrowing availability under our revolving credit facility is governed by a borrowing base, the calculation of which includes cash on hand. Accordingly, use of cash on hand may also result in a reduction in the amount available for borrowing under our revolving credit facility. Furthermore, our revolving credit facility requires us to maintain at least \$10.5 million of borrowing availability and 15% of the aggregate revolving commitments at the time of determination. We expect that cash on hand and cash we generate from operations, as well as available credit under our senior credit facilities will provide adequate funds for the purposes described above for at least the next 12 months.

Table of Contents

The following table shows our cash and cash equivalents and inventories in thousands at March 31, 2013, December 31, 2012 and March 31, 2012.

	March 31, 2013	As of December 31, 2012	March 31, 2012
Cash and cash equivalents	\$ 11,073	\$ 24,136	\$ 14,212
Inventories	45,099	30,292	46,741

We had cash and cash equivalents of \$11.1 million at March 31, 2013 compared to cash and cash equivalents of \$24.1 million and \$14.2 million at December 31, 2012 and March 31, 2012, respectively. The table below sets forth a summary of the significant sources and uses of cash for the periods presented in thousands.

Net cash used in operating activities	\$ (7,148)	\$ (10,029)	\$ 2,881	(28.7)%
Net cash used in financing activities	(5,072)	(14,831)	9,759	(65.8)%
Decrease in cash	\$ (13,063)	\$ (25,220)	\$ 12,157	(48.2)%

Net cash used in operating activities decreased \$2.9 million from the three months ended March 31, 2012 to the three months ended March 31, 2013. The decrease in cash used in operating activities was primarily due to a \$1.9 million increase in net income adjusted for reconciling items. The remaining increase is attributable to working capital changes.

Net cash used in investing activities increased \$0.5 million for the three months ended March 31, 2013, compared to the corresponding period in 2012. This increase was primarily due to higher capital expenditures in 2013 compared to 2012.

Net cash used in financing activities decreased \$9.8 million for the three months ended March 31, 2013 compared to the corresponding period in 2012. The decrease in cash used was primarily a result of making a voluntary payment on long term debt of \$10.0 million in the three month period March 31, 2012.

Contractual Obligations

There have been no material changes to our contractual obligations in the three months ended March 31, 2013.

Off-Balance Sheet Arrangements

We are not party to any off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on our financial condition, changes in financial condition, revenues, expenses, results of operations, liquidity, capital expenditures or capital resources.

Seasonality and Year-to-Year Variability

Our business is seasonal and also varies from year-to-year. Consequently, our results of operations and financial condition vary from quarter-to-quarter and from year-to-year as well. In addition, because of this seasonality and variability, our results of operations for any quarter may not be indicative of results of operations that may be achieved for a subsequent quarter or the full year, and may not be similar to results of operations experienced in prior years. That being the case, while snowfall levels vary within a given year and from year-to-year, snowfall, and the corresponding replacement cycle of snow and ice control equipment, is relatively consistent over multi-year periods.

Sales of our products are significantly impacted by the level, timing and location of snowfall, with sales in any given year and region most heavily influenced by snowfall levels in the prior snow season (which we consider to begin in October and end in March) in that region. This is due to the fact that end-user demand for our products is driven primarily by the condition of their snow and ice control equipment, and in the case of professional snowplowers, by their financial ability to purchase new or replacement snow and ice control equipment, both of which are significantly affected by snowfall levels. Heavy snowfall during a given winter causes usage of our products to increase, resulting in greater wear and tear to our products and a shortening of their life cycles, thereby

Table of Contents

creating a need for replacement snow and ice control equipment and related parts and accessories. In addition, when there is a heavy snowfall in a given winter, the increased income our professional snowplowers generate from their professional snowplow activities provides them with increased purchasing power to purchase replacement snow and ice control equipment prior to the following winter. To a lesser extent, sales of our products are influenced by the timing of snowfall in a given winter. Because an early snowfall can be viewed as a sign of a heavy upcoming snow season, our end-users may respond to an early snowfall by purchasing replacement snow and ice control equipment during the current season rather than delaying purchases until after the season is over when most purchases are typically made by end-users.

We attempt to manage the seasonal impact of snowfall on our revenues in part through our pre-season sales program, which involves actively soliciting and encouraging pre-season distributor orders in the second and third quarters by offering our distributors a combination of pricing, payment and freight incentives during this period. These pre-season sales incentives encourage our distributors to re-stock their inventory during the second and third quarters in anticipation of the peak fourth quarter retail sales period by offering pre-season pricing and payment deferral until the fourth quarter. As a result, we tend to generate our greatest volume of sales (an average of over two-thirds over the last ten years) during the second and third quarters, providing us with manufacturing visibility for the remainder of the year. By contrast, our revenue and operating results tend to be lowest during the first quarter, as management believes our end-users prefer to wait until the beginning of a snow season to purchase new equipment and as our distributors sell off inventory and wait for our pre-season sales incentive period to re-stock inventory. Fourth quarter sales vary from year-to-year as they are primarily driven by the level, timing and location of snowfall during the quarter. This is because most of our fourth quarter sales and shipments consist of re-orders by distributors seeking to restock inventory to meet immediate customer needs caused by snowfall during the winter months.

Because of the seasonality of our sales, we experience seasonality in our working capital needs as well. In the first quarter, we typically require capital as we are generally required to build our inventory in anticipation of our second and third quarter pre-season sales. During the second and third quarters, our working capital requirements rise as our accounts receivable increase as a result of the sale and shipment of products ordered through our pre-season sales program and we continue to build inventory. Working capital requirements peak towards the end of the third quarter and then begin to decline through the fourth quarter through a reduction in accounts receivable when we receive the majority of the payments for pre-season shipped products.

We also attempt to manage the impact of seasonality and year-to-year variability on our business costs through the effective management of our assets. Our asset management and profit focus strategies include:

- the employment of a highly variable cost structure facilitated by a core group of workers that we supplement with a temporary workforce as sales volumes dictate, which allows us to adjust costs on an as-needed basis in response to changing demand;
- our enterprise-wide lean concept, which allows us to adjust production levels up or down to meet demand;
- the pre-season order program described above, which incentivizes distributors to place orders prior to the retail selling season; and
- a vertically integrated business model.

These asset management and profit focus strategies, among other management tools, allow us to adjust fixed overhead and sales, general and administrative expenditures to account for the year-to-year variability of our sales volumes.

Additionally, although modest, our annual capital expenditure requirements can be temporarily reduced by up to approximately 40% in response to actual or anticipated decreases in sales volumes. If we are unsuccessful in our asset management initiatives, the seasonality and year-to-year variability effects on our business may be compounded and in turn our results of operations and financial condition may suffer.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk*

We do not use financial instruments for speculative trading purposes, and do not hold any derivative financial instruments that could expose us to significant market risk. Our primary market risk exposures are changes in interest rates and steel price fluctuations.

Interest Rate Risk

We are exposed to market risk primarily from changes in interest rates. Our borrowings, including our term loan and any revolving borrowings under our senior credit facilities, are at variable rates of interest and expose us to interest rate risk. A portion of our interest rate risk associated with our term loan is mitigated through an interest rate swap as discussed in Note 5 to the Consolidated Financial Statements, above. In addition, the interest rate on any revolving borrowings is subject to an increase in the interest rate based on our average daily availability under our revolving credit facility.

Table of Contents

As of March 31, 2013, we had outstanding borrowings under our term loan of \$111.7 million. A hypothetical interest rate change of 1%, 1.5% and 2% on our term loan would have changed interest incurred for the three months ended March 31, 2013 by \$0.0 million, \$0.1 million and \$0.1 million, respectively. We have entered into an interest rate swap, which became effective beginning July 2011 and matures December 2014, to hedge the variability in future cash flows associated with our variable-rate term loans. The swap fixes the adjusting rate on \$50.0 million of our term loan to an interest rate of 2.085%. As of March 31, 2013, we had no outstanding borrowings under our revolving credit facility.

Commodity Price Risk

In the normal course of business, we are exposed to market risk related to our purchase of steel, the primary commodity upon which our manufacturing depends. Our steel purchases as a percentage of revenue were 38.6% and 88.3% for the three months ended March 31, 2013 and 2012, respectively. While steel is typically available from numerous suppliers, the price of steel is a commodity subject to fluctuations that apply across broad spectrums of the steel market. We do not use any derivative or hedging instruments to manage steel price risk. If the price of steel increases, our variable costs could also increase. While historically we have successfully mitigated these increased costs through the implementation of either permanent price increases and/or temporary invoice surcharges, in the future we may not be able to successfully mitigate these costs, which could cause our gross margins to decline. If our costs for steel were to increase by \$1.00 in a period where we are not able to pass any of this increase onto our distributors, our gross margins would decline by \$1.00 in the period in which such inventory was sold.

Item 4. Controls And Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of the end of the period covered by this Quarterly Report our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and include controls and procedures designed to ensure that the information required to be disclosed by us in such reports is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. *Legal Proceedings*

In the ordinary course of business, we are engaged in various litigation primarily including product liability and intellectual property disputes. However, management does not believe that any current litigation is material to our operations or financial position. In addition, we are not currently party to any environmental-related claims or legal matters.

Item 1A. *Risk Factors*

There have been no significant changes in our risk factors from those described in our Annual Report on Form 10-K for the year ended December 31, 2012.

Table of Contents

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds*

Unregistered Sales of Equity Securities

During the three months ended March 31, 2013, the Company sold no securities that were not registered under the Securities Act of 1933, as amended.

Purchases of Equity Securities

In January 2013 and March of 2013, the Company withheld approximately 6,844 and 2,502 shares, respectively, of the Company's common stock from employees to satisfy minimum tax withholding obligations that arose upon vesting of restricted stock granted pursuant to the Company's shareholder-approved equity incentive plan.

Dividend Payment Restrictions

The Company's senior credit facilities include certain restrictions on its ability to pay dividends. The senior credit facilities also restrict the Company's subsidiaries from paying dividends and otherwise transferring assets to Douglas Dynamics, Inc. For additional detail regarding these restrictions, see Note 5 to the notes to the consolidated financial statements.

Item 3. *Defaults Upon Senior Securities*

None.

Item 4. *Mine Safety Disclosures*

None.

Item 5. *Other Information*

None.

Table of Contents**Item 6. Exhibits**

The following documents are filed as Exhibits to this Quarterly Report on Form 10-Q:

Exhibit Numbers	Description
10.1	Form of Restricted Stock Unit Agreement under Douglas Dynamics, Inc. 2010 Stock Incentive Plan [Incorporated by reference to Exhibit 10.36 to Douglas Dynamics, Inc. s Annual Report on Form 10-K for the year ended December 31, 2012 (File No. 001-34728)].
10.2	Form of Performance Share Unit Agreement under Douglas Dynamics, Inc. 2010 Stock Incentive Plan [Incorporated by reference to Exhibit 10.37 to Douglas Dynamics, Inc. s Annual Report on Form 10-K for the year ended December 31, 2012 (File No. 001-34728)].
10.3	Douglas Dynamics, Inc. 2013 Annual Incentive Plan [Incorporated by reference to Exhibit 10.38 to Douglas Dynamics, Inc. s Annual Report on Form 10-K for the year ended December 31, 2012 (File No. 001-34728)].
10.4*	Form of Nonemployee Director Restricted Stock Unit Grant Notice and Standard Terms and Conditions under Douglas Dynamics, Inc. 2010 Stock Incentive Plan.
31.1*	Certification of the Company s Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2*	Certification of the Company s Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32.1*	Certification of the Company s Chief Executive Officer and Chief Financial Officer pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
101*	Financial statements from the quarterly report on Form 10-Q of Douglas Dynamics, Inc. for the quarter ended March 31, 2013, filed on May 7, 2013, formatted in XBRL: (i) the Consolidated Balance Sheets; (ii) the Consolidated Statements of Operations and Comprehensive Income; (iii) the Consolidated Statements of Cash Flows; and (iv) the Notes to the Consolidated Financial Statements

* Filed herewith.
