LRR Energy, L.P.

Notes to Consolidated Condensed Financial Statements

(unaudited)

1. Description of Business

LRR Energy, L.P. (we, us, our, or the Partnership) is a Delaware limited partnership formed in April 2011 by Lime Rock Management LP (Lime Rock Management), an affiliate of Lime Rock Resources A, L.P. (LRR A), Lime Rock Resources B, L.P. (LRR B) and Lime Rock Resources C, L.P. (LRR C) to operate, acquire, exploit and develop producing oil and natural gas properties in North America with long-lived, predictable production profiles. As used herein, references to Fund I refer collectively to LRR A, LRR B and LRR C and references to Fund II refer collectively to Lime Rock Resources II-A, L.P. and Lime Rock Resources II-C, L.P. References to Lime Rock Resources refer collectively to Fund I and Fund II. Our properties are located in the Permian Basin region in West Texas and southeast New Mexico, the Mid-Continent region in Oklahoma and East Texas and the Gulf Coast region in Texas. We conduct our operations through our wholly owned subsidiary, LRE Operating, LLC (OLLC).

We own 100% of LRE Finance Corporation (LRE Finance). LRE Finance was organized for the purpose of co-issuing our debt securities and has no material assets or liabilities other than as co-issuer of our debt securities, if and when issued. Its activities are limited to co-issuing our debt securities and engaging in activities related thereto. As of March 31, 2013, LRE Finance did not co-issue any debt securities.

On January 3, 2013, we completed an acquisition from Fund I of certain oil and natural gas properties (the Transferred Properties) located in the Mid-Continent region in Oklahoma for \$21.0 million subject to customary purchase price adjustments (the Transaction) (Note 3).

2. Summary of Significant Accounting Policies

Our accounting policies are set forth in Note 2 of the audited consolidated/combined financial statements in our Annual Report on Form 10-K for the year ended December 31, 2012 (2012 Annual Report), and are supplemented by the notes to these unaudited consolidated condensed financial statements. There have been no significant changes to these policies, and these unaudited consolidated condensed financial statements should be read in conjunction with the audited consolidated/combined financial statements and notes in our 2012 Annual Report.

Basis of presentation

These interim financial statements are unaudited and have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) regarding interim financial reporting. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America (GAAP) for complete consolidated financial statements and should be

Edgar Filing: LRR Energy, L.P. - Form 10-Q

read in conjunction with the audited consolidated/combined financial statements in our 2012 Annual Report. While the year-end balance sheet data was derived from audited financial statements, this interim report does not include all disclosures required by GAAP for annual periods. These unaudited interim consolidated financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the periods presented.

The Partnership's historical financial statements previously filed with the SEC have been revised in this quarterly report on Form 10-Q to include the results attributable to the Transferred Properties as described in Note 3 and other acquisitions completed in 2012 that we considered to be between entities under common control.

Recent accounting pronouncements

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-11, Disclosures about Offsetting Assets and Liabilities. ASU No. 2011-11 required entities to disclose both gross information and net information about instruments and transactions eligible for offset in the statement of financial position and instruments and transactions subject to an agreement similar to a master netting

Table of Contents

arrangement. The objective of the disclosure is to facilitate comparison between those entities that prepare their financial statements on the basis of GAAP and those entities that prepare their financial statements on the basis of International Financial Reporting Standards. In January 2013, the FASB issued ASU 2013-01, *Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities* which clarified the scope of these disclosures to include bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset or subject to an enforceable master netting arrangement or similar agreement. We adopted this guidance effective January 1, 2013. This guidance did not have a material impact on our consolidated financial position, results of operations or cash flows.

3. Acquisitions

Acquisition between Entities under Common Control

On January 3, 2013, we completed the Transaction for a total purchase price of \$21.0 million, subject to customary purchase price adjustments. In addition, as part of the Transaction, we acquired in the money commodity hedge contracts valued at approximately \$1.7 million as of the closing of the Transaction. The Transaction was effective October 1, 2012, and we expect the post-closing adjustments to the purchase price for the acquisition to be finalized in the second quarter of 2013. We funded the Transaction with borrowings under our revolving credit facility (Note 7).

The following table presents the net assets conveyed by Fund I to us in the Transaction (in thousands):

Property and equipment, net	\$	23,998
Oil and natural gas commodity hedge contracts		1,742
Asset retirement obligations and other liabilities		(1,067)
Net assets	\$	24,673

Consistent with previous acquisitions from Fund I, the net assets were recorded using carryover book value of Fund I as the acquisition was a transaction between entities under common control. Our historical financial statements were revised to include the results attributable to previous acquisitions from Fund I as if we owned the properties for all periods presented in our consolidated condensed financial statements.

4. Fair Value Measurements

Our financial instruments, including cash and cash equivalents, accounts receivable and accounts payable, are carried at cost, which approximates fair value due to the short-term maturity of these instruments. All such financial instruments are considered Level 1 instruments. The carrying value of our senior secured revolving credit facility and term loan, including the current portion, approximates fair value, as interest rates are variable based on prevailing market rates and are therefore considered Level 1 instruments. Our financial and non-financial assets and liabilities that are measured on a recurring basis are measured and reported at fair value.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. GAAP establishes a three-tier fair value hierarchy, which prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of fair value hierarchy are as follows:

Level 1 Defined as inputs such as unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Defined as inputs other than quoted prices in active markets that are either directly or indirectly observable for the asset or liability.

Level 3 Defined as unobservable inputs for use when little or no market data exists, requiring an entity to develop its own assumptions for the asset or liability.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Table of Contents

We utilize the most observable inputs available for the valuation technique used. The financial assets and liabilities are classified in their entirety based on the lowest level of input that is of significance to the fair value measurement. The following table describes, by level within the hierarchy, the fair value of our financial assets and liabilities that were accounted for at fair value on a recurring basis (in thousands).

	Level 1	Level 2	Level 3	Total
March 31, 2013				
Assets:				
Commodity derivative instruments	\$	\$	27,719	\$ 27,719
Liabilities:				
Commodity derivative instruments		4,562		4,562
Interest rate derivative instruments		3,896		3,896
December 31, 2012				
Assets:				
Commodity derivative instruments	\$	\$	35,955	\$ 35,955
Liabilities:				
Commodity derivative instruments		2,545		2,545
Interest rate derivative instruments		4,185		4,185

All fair values reflected in the table above and on the consolidated balance sheets have been adjusted for non-performance risk. The following methods and assumptions were used to estimate the fair values of the assets and liabilities in the table above.

Commodity Derivative Instruments The fair value of the commodity derivative instruments is estimated using a combined income and market valuation methodology based upon forward commodity price and volatility curves. The curves are obtained from independent pricing services reflecting broker market quotes.

Interest Rate Derivative Instruments The fair value of the interest rate derivative instruments is estimated using a combined income and market valuation methodology based upon forward interest rates and volatility curves. The curves are obtained from independent pricing services reflecting broker market quotes.

5. Property and Equipment

The following table sets forth the components of property and equipment, net (in thousands):

	March 31, 2013	December 31, 2012
Oil and natural gas properties (successful efforts method)	\$ 806,860	\$ 799,042
Unproved properties	1,264	1,264
Other property and equipment	318	318
	808,442	800,624
Accumulated depletion, depreciation and impairment	(330,794)	(321,377)

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Total property and equipment, net	\$	477,648	\$	479,247
-----------------------------------	----	---------	----	---------

We recorded \$9.4 million and \$10.0 million of depletion and depreciation expense for the three months ended March 31, 2013 and 2012, respectively.

We perform an impairment analysis of our oil and natural gas properties on a quarterly basis due to the volatility in commodity prices. We did not record any impairment charges in the three months ended March 31, 2013. For the three months ended March 31, 2012, we recorded a total non-cash impairment charge of approximately \$3.1 million to impair the value of our proved oil and natural gas properties in the Mid-Continent

Table of Contents

region. This non-cash charge is included in Impairment of oil and natural gas properties line item in the consolidated statements of operations.

This impairment of proved oil and natural gas properties was recorded because the net capitalized costs of the properties exceeded the fair value of the properties as measured by estimated cash flows reported in an internal reserve report. These reports are based upon future oil and natural gas prices, which are based on observable inputs adjusted for basis differentials. These observable inputs are classified as Level 3 measurements. The fair values of proved properties are measured using valuation techniques consistent with the income approach, converting future cash flows to a single discounted amount. Significant inputs used to determine the fair values of proved properties include estimates of: (i) reserves; (ii) future operating and development costs; (iii) future commodity prices; and (iv) a market-based weighted average cost of capital rate. The underlying commodity prices embedded in our estimated cash flows are the product of a process that begins with New York Mercantile Exchange (NYMEX) forward curve pricing, adjusted for estimated location and quality differentials, as well as other factors that management believes will impact realizable prices. Furthermore, significant assumptions in valuing the proved reserves included the reserve quantities, anticipated drilling and operating costs, anticipated production taxes, future expected natural gas prices and basis differentials, anticipated drilling schedules, anticipated production declines, and an appropriate discount rate commensurate with the risk of the underlying cash flow estimates. Cash flow estimates for the impairment testing excluded derivative instruments used to mitigate the risk of lower future natural gas prices. Significant assumptions in valuing the unproved reserves included the evaluation of the probable and possible reserves included in the reserve reports, future expected oil and natural gas prices and basis differentials, and anticipated drilling schedules.

This asset impairment had no impact on cash flows, liquidity positions, or debt covenants. If future oil or natural gas prices decline further, the estimated undiscounted future cash flows for the proved oil and natural gas properties may not exceed the net capitalized costs for our properties and a non-cash impairment charge may be required to be recognized in future periods.

6. Asset Retirement Obligations

The following is a summary of our asset retirement obligations as of and for the three months ended March 31, 2013 (in thousands):

Beginning of period	\$	33,115
Revisions to previous estimates		
Liabilities incurred		167
Liabilities settled		(84)
Accretion expense		457
End of period		33,655
Less: Current portion of asset retirement obligations		(423)
Asset retirement obligations non-current	\$	33,232

7. Long-Term Debt

Credit Agreement

Edgar Filing: LRR Energy, L.P. - Form 10-Q

In July 2011, subject to consummation of our initial public offering, we, as guarantor, and our wholly owned subsidiary, OLLC, as borrower, entered into a five-year, \$500 million senior secured revolving credit facility, as amended, (the Credit Agreement) that matures in July 2016. The Credit Agreement is reserve-based and we are permitted to borrow under our credit facility an amount up to the borrowing base, which was \$250 million as of March 31, 2013. Our borrowing base, which is primarily based on the estimated value of our oil and natural gas properties and our commodity derivative contracts, is subject to redetermination semi-annually by our lenders and once during the interim periods at their sole discretion. As of March 31, 2013, we were in compliance with all covenants contained in the Credit Agreement.

In April 2013, our borrowing base was reaffirmed by our lending group at \$250 million.

Table of Contents

Term Loan Agreement

On June 28, 2012, we, as parent guarantor, and our wholly owned subsidiary, OLLC, as borrower, entered into a Second Lien Credit Agreement (the Term Loan Agreement). The Term Loan Agreement provides for a \$50 million senior secured second lien term loan to OLLC. OLLC borrowed \$50 million under the Term Loan Agreement and used the borrowings to repay outstanding borrowings under the Credit Agreement. As of March 31, 2013, we were in compliance with all covenants contained in the Term Loan Agreement.

The obligations under the Term Loan Agreement and the Credit Agreement are governed by an Intercreditor Agreement with OLLC as borrower and the Partnership as parent guarantor, which (i) provides that any liens on the assets and properties of OLLC, the Partnership or any of their subsidiaries securing the indebtedness under the Term Loan Agreement are subordinate to liens on the assets and properties of OLLC, the Partnership or any of their subsidiaries securing indebtedness under the Credit Agreement and derivative contracts with lenders and their affiliates and (ii) sets forth the respective rights, obligations and remedies of the lenders under the Credit Agreement with respect to their first-priority liens and the lenders under the Term Loan Agreement with respect to their second-priority liens.

As of March 31, 2013, we had approximately \$235.0 million of outstanding debt and accrued interest was approximately \$0.2 million. As of December 31, 2012, we had approximately \$228.0 million of outstanding debt and accrued interest was approximately \$0.2 million.

Interest expense for the three months ended March 31, 2013 and 2012 was \$2.3 million and \$1.1 million, respectively. As of March 31, 2013 and December 31, 2012, our weighted average interest rate on our outstanding indebtedness was 3.44% and 3.47%, respectively. Please refer to Note 8 below for a discussion of our interest rate derivative contracts.

8. Derivatives

Objective and strategy

We are exposed to commodity price and interest rate risk and consider it prudent to periodically reduce our exposure to cash flow variability resulting from commodity price changes and interest rate fluctuations. Accordingly, we enter into derivative instruments to manage our exposure to commodity price fluctuations, locational differences between a published index and the NYMEX futures on natural gas or crude oil productions, and interest rate fluctuations.

Our open positions typically consist of contracts such as (i) crude oil and natural gas financial collar contracts, (ii) crude oil, natural gas liquids (NGLs) and natural gas financial swaps, (iii) crude oil and natural gas basis financial swaps, (iv) crude oil and natural gas puts and (v) interest rate swap agreements. Our derivative instruments are with the counterparties that are also lenders in our Credit Agreement.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Swaps and options are used to manage our exposure to commodity price risk and basis risk inherent in our oil and natural gas production. Commodity price swap agreements are used to fix the price of expected future oil and natural gas sales at major industry trading locations such as Henry Hub Louisiana (HH) for gas and Cushing Oklahoma (WTI) for oil. Basis swaps are used to fix the price differential between the product price at one location versus another. Options are used to establish a floor and a ceiling price (collar) for expected oil or gas sales. Interest rate swaps are used to fix interest rates on existing indebtedness.

Under commodity swap agreements, we exchange a stream of payments over time according to specified terms with another counterparty. Specifically for commodity price swap agreements, we agree to pay an adjustable or floating price tied to an agreed upon index for the commodity, either gas or oil, and in return receives a fixed price based on notional quantities. Under basis swap agreements, we agree to pay an adjustable or floating price tied to two agreed upon indices for gas and in return receive the differential between a floating index and fixed price based on notional quantities. A collar is a combination of a put purchased by us and a call option written by us. In a typical collar transaction, if the floating price based on a market index is below the floor price, we receive from the

Table of Contents

counterparty an amount equal to this difference multiplied by the specified volume, effectively a put option. If the floating price exceeds the floor price and is less than the ceiling price, no payment is required by either party. If the floating price exceeds the ceiling price, we must pay the counterparty an amount equal to the difference multiplied by the specific quantity, effectively a call option.

The interest rate swap agreements effectively fix our interest rate on amounts borrowed under the credit facility. The purpose of these instruments is to mitigate our existing exposure to unfavorable interest rate changes. Under interest rate swap agreements, we pay a fixed interest rate payment on a notional amount in exchange for receiving a floating amount based on LIBOR on the same notional amount.

We elected not to designate any positions as cash flow hedges for accounting purposes and, accordingly, recorded the net change in the mark-to-market valuation of these derivative contracts in the statements of operations. We record our derivative activities on a mark-to-market or fair value basis. Fair values are based on pricing models that consider the time value of money and volatility and are comparable to values obtained from counterparties. Pursuant to the accounting standard that permits netting of assets, liabilities, and collateral where the right of offset exists, we present the fair value of derivative financial instruments on a net basis in the consolidated balance sheets.

At March 31, 2013, we had the following open commodity derivative contracts:

	Index	2013	2014	2015	2016	2017
Natural gas positions						
Price swaps (MMBTUs)	NYMEX-HH	5,642,670	6,077,016	5,500,236	5,433,888	5,045,760

Effect of Derivative Instruments Statement of Operations

The unrealized and realized gain or loss amounts and classification related to derivative instruments are as follows (in thousands):

	Three Months Ended March 31,			
	2013	2012		
Realized gains (losses):				
Commodity derivatives (revenue)	\$	4,105	\$	5,248
Interest rate derivatives (other income/expense)		(174)		(33)
Unrealized gains (losses):				
Commodity derivatives (revenue)		(10,029)		(271)
Interest rate derivatives (other income/expense)		289		805

Credit Risk

All of our derivative transactions have been carried out in the over-the-counter market. The use of derivative instruments involves the risk that the counterparties may be unable to meet the financial terms of the transactions. We monitor the creditworthiness of each of our counterparties and assess the possibility of whether each counterparty to the derivative contract would default by failing to make any contractually required payments as scheduled in the derivative instrument in determining the fair value. We also have netting arrangements in place with each counterparty to reduce credit exposure. The derivative transactions are placed with major financial institutions that present minimal credit risks to us. Additionally, we consider ourselves to be of substantial credit quality and have the financial resources and willingness to meet our potential repayment obligations associated with the derivative transactions.

9. Related Parties

Ownership of our General Partner by Lime Rock Management and its Affiliates

As of March 31, 2013, Lime Rock Management, an affiliate of Fund I, owned all of the Class A member interests in our general partner, Fund I owned all of the Class B member interests in our general partner and Fund II owned all of the Class C member interests in our general partner. In addition, Fund I owned an aggregate of approximately 9.5% of our outstanding common units and all of our subordinated units representing a 32.7% limited partner interests in us. As of March 31, 2013, our general partner owned an approximate 0.1% general partner interest in us, represented by 22,400 general partner units, and all of our incentive distribution rights.

Table of Contents

As more fully described in our 2012 Annual Report, three separate one-third tranches of the subordinated units may convert on the first business day after the distribution to unitholders in respect of any quarter ending on or after December 31, 2012, December 31, 2013 and December 31, 2014, respectively, provided that an aggregate amount equal to the minimum quarterly distribution payable with respect to all units that would be payable on four, eight or twelve consecutive quarters, as applicable, has been earned and paid prior to the applicable date, in each case provided there are no arrearages in the minimum quarterly distribution on our common units at that time. We do not expect one third of the subordinated units to convert pursuant to the provisions of our partnership agreement following our distribution for the first quarter of 2013 that will be paid on May 15, 2013. Each quarter, we will determine whether the test for conversion of the subordinated units has been met until the subordinated units convert pursuant to the provisions of our partnership agreement.

Contracts with our General Partner and its Affiliates

We have entered into various agreements with our general partner and its affiliates. For the three months ended March 31, 2013 and 2012, we paid Lime Rock Management approximately \$0.3 million and \$0.2 million, respectively, either directly or indirectly, related to these agreements.

In connection with the management of our business, Lime Rock Resources Operating Company, Inc. (ServCo), an affiliate of our general partner, provides services for invoicing and processing of payments to our vendors. Periodically, ServCo remits cash to us for the net working capital received on our behalf. Changes in the affiliates (payable)/receivable balances during the three months ended March 31, 2013 are included below (in thousands):

	ServCo	Lime Rock Resources	Total
Balance as of December 31, 2012	\$ (2,229)	\$ 252	\$ (1,977)
Expenditures	(15,432)	(51)	(15,483)
Cash paid for expenditures	18,929	48	18,977
Revenues and other	1,529	(246)	1,283
Balance as of March 31, 2013	\$ 2,797	\$ 3	\$ 2,800

Distributions of Available Cash to Our General Partner and Affiliates

We will generally make cash distributions to our unitholders and our general partner pro rata. As of March 31, 2013, our general partner and its affiliates held 1,849,600 of our common units, all of our subordinated units and 22,400 general partner units. On February 14, 2013, we paid a cash distribution for the fourth quarter of 2012 of \$0.4800 per outstanding unit, or \$1.92 on an annualized basis. The aggregate amount of the distribution was \$10.8 million. During the three months ended March 31, 2012, we paid a cash distribution to all unitholders of \$5.2 million, which represented a prorated amount of our minimum quarterly distribution of \$0.4750 per unit for the prorated period from the closing of our initial public offering to December 31, 2011.

We announced our first quarter 2013 distribution on April 17, 2013 as discussed in Note 14.

10. Unitholders Equity

Equity Offering

On March 22, 2013, we closed a public equity offering of 3,700,000 common units representing limited partner interests in the Partnership at a price to the public of \$16.84 per common unit, or \$16.1664 per common unit after payment of the underwriting discount. We received net proceeds from the sale of 3,700,000 newly issued common units of approximately \$59.6 million, after deducting underwriting discounts and commissions and estimated offering expenses of approximately \$0.2 million. We used the net proceeds of the offering to fund our acquisition discussed in Note 14 and repay borrowings outstanding on our Credit Agreement.

Table of Contents

Fund I sold 3,200,000 common units in the equity offering at a price to the public of \$16.84 per common unit, or \$16.1664 per common unit after payment of the underwriting discount. We did not receive any proceeds from the sale of common units by Fund I; however, the equity balance of Fund I was adjusted for its reduced ownership interest in us.

Units Outstanding

As of March 31, 2013, we had 19,448,539 common units, 6,720,000 subordinated units and 22,400 general partner units outstanding. As of March 31, 2012, Fund I owned 1,849,600 common units and all of our subordinated units, representing a 32.7% limited partner interest in us.

11. Net Income (Loss) Per Limited Partner Unit

The following sets forth the calculation of net income (loss) per limited partner unit (in thousands, except per unit amounts):

	Three Months Ended	
	March 31, 2013	March 31, 2012
Net income (loss)	\$ (7,450)	\$ 5,318
Net income attributable to predecessor operations		(1,469)
Net income (loss) available to unitholders	(7,450)	3,849
Less: General partner's approximate 0.1% interest in net income (loss)	7	(4)
Limited partners' interest in net income (loss)	\$ (7,443)	\$ 3,845
Weighted average limited partner units outstanding:		
Common units	16,203	15,701
Subordinated units	6,720	6,720
Total	22,923	22,421
Net income (loss) per limited partner unit (basic and diluted)	\$ (0.32)	\$ 0.17

Our subordinated units and restricted unit awards are considered to be participating securities for purposes of calculating our net income per limited partner unit, and accordingly, are included in basic computation as such. Net income per limited partner unit is determined by dividing the net income available to the common unitholders, after deducting our general partner's approximate 0.1% interest in net income, by weighted average number of common units and subordinated units outstanding as of March 31, 2013 and 2012. The aggregate number of common units and subordinated units outstanding was 19,448,539 and 6,720,000, respectively, as of March 31, 2013. The aggregate number of common units and subordinated units outstanding was 15,708,474 and 6,720,000, respectively, as of March 31, 2012.

12. Equity-Based Compensation

Edgar Filing: LRR Energy, L.P. - Form 10-Q

On November 10, 2011, our general partner adopted a long-term incentive plan (2011 LTIP) for employees, consultants and directors of our general partner and its affiliates, including Lime Rock Management and ServCo, who perform services for us. The 2011 LTIP consists of unit options, restricted units, phantom units, unit appreciation rights, distribution equivalent rights, unit awards and other unit-based awards. The 2011 LTIP initially limits the number of units that may be delivered pursuant to vested awards to 1,500,000 common units. As of March 31, 2013, there were 1,409,061 units available for issuance under the 2011 LTIP. The 2011 LTIP is currently administered by our general partner s board of directors.

The fair value of restricted units is determined based on the fair market value of the units on the date of grant. The outstanding restricted units vest over three years in equal amounts (subject to rounding) on the date of grant and are entitled to receive quarterly distributions during the vesting period.

A summary of the status of the non-vested units as of March 31, 2013, is presented below:

Table of Contents

	Number of Non-vested Units	Weighted Average Grant-Date Fair Value
Non-vested restricted units at December 31, 2012	54,584	
Granted	22,197	\$ 17.12
Vested	(2,800)	20.89
Forfeited		
Non-vested units at March 31, 2013	73,981	

As of March 31, 2013, there was approximately \$1.2 million of unrecognized compensation cost related to non-vested restricted units. The cost is expected to be recognized over a weighted average period of approximately 2.3 years. There were 16,958 vested restricted units as of March 31, 2013.

13. Subsidiary Guarantors

We and LRE Finance, our 100 percent-owned subsidiary, filed a registration statement on Form S-3 with the SEC on December 10, 2012, and the SEC declared the registration statement effective on January 16, 2013. Securities that may be offered and sold include debt securities that are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933. LRE Finance may co-issue any debt securities issued by us pursuant to the registration statement. LRE Finance was formed solely for the purpose of co-issuing our debt securities and has no material assets or liabilities other than as co-issuer of our debt securities. OLLC, our 100 percent-owned subsidiary, may guarantee any debt securities issued by us and such guarantee will be full and unconditional, subject to customary release provisions. The guarantee will be released (i) automatically upon any sale, exchange or transfer of our equity interests in OLLC, (ii) automatically upon the liquidation and dissolution of OLLC, (iii) following delivery of notice to the trustee under the indenture related to the debt securities of the release of OLLC of its obligations under the Partnership's revolving credit facility, and (iv) upon legal or covenant defeasance or other satisfaction of the obligations under the related debt securities. Other than LRE Finance, OLLC is our sole subsidiary, and thus, no other subsidiary will guarantee our debt securities.

Furthermore, we have no assets or operations independent of OLLC, and there are no significant restrictions upon the ability of OLLC to distribute funds to us by dividend or loan. Finally, none of our assets or OLLC represents restricted net assets pursuant to Rule 4-08(e)(3) of Regulation S-X.

14. Subsequent Events

Acquisition between Entities under Common Control

On April 1, 2013, we completed the acquisition of oil and natural gas properties in the Mid-Continent region in Oklahoma and crude oil hedges from Fund II for a purchase price of \$38.2 million, subject to customary purchase price adjustments. We funded the acquisition with proceeds from our equity offering described in Note 10.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

As part of the transaction, we acquired the following crude oil hedges which were estimated to be valued at approximately \$0.4 million as of the close of the transaction:

	Index	2013	2014
Oil positions			
Price swaps (BBLs)	NYMEX-WTI	38,250	30,000
Weighted average price		\$ 102.75	\$ 98.20

Unit Distribution

On April 17, 2013, we announced that the board of directors of our general partner declared a cash distribution for the first quarter of 2013 of \$0.4825 per outstanding unit, or \$1.93 on an annualized basis. The distribution will be

Table of Contents

paid on May 15, 2013 to all unitholders of record as of the close of business on May 1, 2013. The aggregate amount of the distribution will be approximately \$12.6 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements that are subject to a number of risks and uncertainties, many of which are beyond our control, which may include statements about our:

- *business strategies;*
- *ability to replace the reserves we produce through drilling and property acquisitions;*
- *drilling locations;*
- *oil and natural gas reserves;*
- *technology;*
- *realized oil and natural gas prices;*
- *production volumes;*
- *lease operating expenses;*
- *general and administrative expenses;*
- *future operating results;*
- *cash flows and liquidity;*
- *availability of drilling and production equipment;*
- *general economic conditions;*
- *effectiveness of risk management activities; and*
- *plans, objectives, expectations and intentions.*

All statements, other than statements of historical fact, are forward-looking statements. These forward-looking statements can be identified by their use of terms and phrases such as may, predict, pursue, expect, estimate, project, plan, believe, intend, achievable, anti-continue, potential, should, could and similar terms and phrases. Although we believe that the expectations reflected in these forward-looking

Edgar Filing: LRR Energy, L.P. - Form 10-Q

statements are reasonable, they do involve certain assumptions, risks and uncertainties some of which are beyond our control. Actual results could differ materially from those anticipated in these forward-looking statements. One should consider carefully the risk factors described in Item 1A. Risk Factors of our Annual Report on Form 10-K for the year ended December 31, 2012 that describe factors that could cause our actual results to differ from those anticipated in the forward-looking statements, including, but not limited to, the following factors:

- *our ability to generate sufficient cash to pay the minimum quarterly distribution on our common units;*
- *our ability to replace the oil and natural gas reserves we produce;*
- *our substantial future capital expenditures, which may reduce our cash available for distribution and could materially affect our ability to make distributions on our common units;*
- *a decline in oil, natural gas or natural gas liquids (NGL) prices;*
- *the differential between the NYMEX or other benchmark prices of oil and natural gas and the wellhead price we receive for our production;*
- *the risk that our hedging strategy may be ineffective or may reduce our income;*
- *uncertainty inherent in estimating our reserves;*
- *the risks and uncertainties involved in developing and producing oil and natural gas;*
- *risks related to potential acquisitions, including our ability to make accretive acquisitions on economically acceptable terms or to integrate acquired properties;*
- *competition in the oil and natural gas industry;*
- *cash flows and liquidity;*
- *restrictions and financial covenants in our credit facility and term loan;*
- *the availability of pipelines, transportation and gathering systems and processing facilities owned by third parties;*
- *electronic, cyber, and physical security breaches;*
- *general economic conditions; and*

Table of Contents

- *legislation and governmental regulations, including climate change legislation and federal or state regulation of hydraulic fracturing.*

All forward-looking statements are expressly qualified in their entirety by the cautionary statements in this paragraph and elsewhere in this document and speak only as of the date of this report. Other than as required under the securities laws, we do not assume a duty to update these forward-looking statements, whether as a result of new information, subsequent events or circumstances, changes in expectations or otherwise.

Overview

LRR Energy, L.P. (we, us, our, or the Partnership) is a Delaware limited partnership formed in April 2011 by Lime Rock Management LP (Lime Rock Management), an affiliate of Lime Rock Resources A, L.P. (LRR A), Lime Rock Resources B, L.P. (LRR B) and Lime Rock Resources C, L.P. (LRR C), to operate, acquire, exploit and develop producing oil and natural gas properties in North America with long-lived, predictable production profiles. LRR A, LRR B and LRR C were formed by Lime Rock Management in July 2005 for the purpose of acquiring mature, low-risk producing oil and natural gas properties with long-lived production profiles. As used herein, references to Fund I refer collectively to LRR A, LRR B and LRR C. Fund I is managed by Lime Rock Management.

Our properties are located in the Permian Basin region in West Texas and southeast New Mexico, the Mid-Continent region in Oklahoma and East Texas and the Gulf Coast region in Texas.

Contribution of Properties

On January 3, 2013, we completed an acquisition from Fund I of certain oil and natural gas properties (the Transferred Properties) located in the Mid-Continent region in Oklahoma for \$21.0 million, subject to customary purchase price adjustments (the Transaction). In addition, as part of the Transaction, we acquired in the money commodity hedge contracts valued at approximately \$1.7 million at the closing of the Transaction. The Transaction was effective October 1, 2012, and we expect the post closing adjustments to the purchase price for the Transaction to be finalized in the second quarter of 2013.

Results of Operations

Each acquisition from Fund I is considered a transfer of net assets between entities under common control. As a result, we are required to revise our financial statements to include the activities of such assets for all periods presented, similar to a pooling of interests, to include the financial position, results of operations and cash flows of the assets acquired and liabilities assumed. Please refer to Note 2 of our Annual Report on Form 10-K for the year ended December 31, 2012 (the 2012 Annual Report) regarding the recast of financial information for transactions between entities under common control. The table set forth below includes recast historical financial and operating information as if we owned all assets acquired from Fund I since November 16, 2011.

Sales price	\$ 3.36	\$ 2.71
Effect of realized commodity derivative instruments	1.99	2.46
Realized price	\$ 5.35	\$ 5.17
NGLs (per Bbl)		
Sales price	\$ 31.25	\$ 48.97
Effect of realized commodity derivative instruments	4.77	0.09
Realized price	\$ 36.02	\$ 49.06
Average unit cost per Boe:		
Lease operating expenses	\$ 11.71	\$ 11.03
Production and ad valorem taxes	3.19	2.90
Depletion and depreciation	17.74	16.83
General and administrative expenses	6.22	5.36

Our Results for the Three Months Ended March 31, 2013 Compared to the Three Months Ended March 31, 2012

We recorded a net loss of \$7.5 million for the three months ended March 31, 2013 compared to net income of \$5.3 million during the three months ended March 31, 2012, primarily related to \$10.0 million of unrealized losses on commodity derivative contracts and lower pricing and overall production volumes. The following discussion summarizes key components of the changes between periods.

Sales Revenues. A summary of increases (decreases) in our oil, natural gas and NGL revenues between March 31, 2012 and March 31, 2013 follows (in thousands):

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Table of Contents

Oil, natural gas and NGL revenues-prior period	\$	25,618
Increase (decrease)		
Price realization		
Oil		(2,714)
Natural gas		1,396
NGLs		(1,170)
Sales volumes		
Oil		(410)
Natural gas		(1,263)
NGLs		156
Oil, natural gas and NGL revenues-current period	\$	21,613

Sales revenues decreased from \$25.6 million for the three months ended March 31, 2012 to \$21.6 million for the three months ended March 31, 2013, primarily driven by oil and NGL price realizations and decreased oil and natural gas production, and offset by higher realized prices for natural gas. Sales revenues for the three months ended March 31, 2013 consisted of oil sales of \$13.4 million, natural gas sales of \$6.0 million and NGL sales of \$2.2 million. Sales revenues for the three months ended March 31, 2012 consisted of oil sales of \$16.6 million, natural gas sales of \$5.8 million and NGL sales of \$3.2 million.

Our production volumes for the three months ended March 31, 2013 included 235 MBbls of oil and NGLs and 1,774 MMcf of natural gas, or 2,611 Bbl/d of oil and NGLs and 19,711 Mcf/d of natural gas. On an equivalent basis, production for the period was 531 MBoe, or 5,900 Boe/d. Our production volumes for the three months ended March 31, 2012 included 235 MBbls of oil and NGLs and 2,150 MMcf of natural gas, or 2,582 Bbl/d of oil and NGLs and 23,626 Mcf/d of natural gas. On an equivalent basis, production for the period was 593 MBoe, or 6,516 Boe/d.

Our average daily production of 5,900 Boe/d for the quarter was negatively impacted by the following items which resulted in lower production of approximately 500 Boe/d. The actual timing and amount of resumed production related to the items below may differ from these estimates.

At our Red Lake field, our third party gas processor required us to flare approximately 75 Boe/d due to plant capacity constraints and compressor issues during the quarter. We are currently flaring approximately 60 Boe/d due to plant capacity limits and we expect that we will continue to flare at this level until the gas plant is expanded, which we expect will occur during the fourth quarter of 2013. Delays in our recompletion program at our Red Lake field during the quarter resulted in lower production of approximately 42 Boe/d. We expect the delayed projects to be completed during the second quarter.

Production at our Putnam field experienced weather related shut-ins of approximately 67 Boe/d for the quarter. The Putnam field has resumed normal operations.

Our Pecos Slope field was curtailed by approximately 1.8 MMcf/d (300 Boe/d) during the quarter due the previously disclosed high nitrogen content of our produced natural gas (1.0 MMcf/d or 167 Boe/d) and a compressor failure (0.8 MMcf/d or 133 Boe/d). The compressor resumed service on February 18, 2013. The current nitrogen content curtailment is approximately 1.0 MMcf/d (167 Boe/d) and we expect it to remain at this level until the field-wide nitrogen rejection facility is installed, which we expect will occur in late 2013. A well at our New Years Ridge field had a tubing failure resulting in curtailed production of approximately 150 Mcfe/d (25 Boe/d) during the quarter. The well is back in service.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Our average sales price per Bbl for oil and NGLs for the three months ended March 31, 2013, excluding the effect of commodity derivative contracts, was \$81.92 and \$31.25, respectively. Our average sales price per Mcf of natural gas for the three months ended March 31, 2013, excluding the effect of commodity derivative contracts, was \$3.36. Our average sales price per Bbl for oil and NGLs for the three months ended March 31, 2012, excluding the effect of commodity derivative contracts, was \$97.98 and \$48.97, respectively. Our average sales price per Mcf of natural gas for the three months ended March 31, 2012, excluding the effect of commodity derivative contracts, was \$2.71.

Table of Contents

In addition to lower realized production, our financial results for the quarter were materially impacted by a higher Midland to Cushing oil differential. The differential averaged \$7.88 per barrel for the quarter compared to the full year 2011 and 2012 average differential of \$2.30 per barrel. We estimate the impact of the higher differential (compared to the 2011 and 2012 average differential) on revenue for the quarter was approximately \$0.8 million. In February 2013, we executed Midland to Cushing oil basis swaps for March 2013 through December 2014 on the majority of our expected production that we expect will be impacted by the differential. The average hedged differential per barrel prices are \$1.25 and \$1.00 for 2013 and 2014, respectively. The differential for May 2013 settled at \$0.17 per barrel.

Effects of Commodity Derivative Contracts. Due to changes in oil and natural gas prices, we recorded a net loss from our commodity hedging program for the three months ended March 31, 2013 of approximately \$5.9 million, which is comprised of a realized gain of approximately \$4.1 million and an unrealized loss of approximately \$10.0 million. For the three months ended March 31, 2012, we recorded a net gain from our commodity hedging program of approximately \$5.0 million, which is comprised of a realized gain of approximately \$5.2 million and an unrealized loss of approximately \$0.2 million. Volatility in commodity prices has had a significant impact on our realized and unrealized gains and losses on commodity derivative contracts.

Lease Operating Expenses. Our lease operating expenses were approximately \$6.2 million, or \$11.71 per Boe, for the three months ended March 31, 2013 compared to approximately \$6.5 million, or \$11.03 per Boe, for the three months ended March 31, 2012. The increase in the per Boe amounts over the first quarter of 2012 was driven by the overall lower production volumes in the first quarter of 2013.

Production and Ad Valorem Taxes. Our production and ad valorem taxes were approximately \$1.7 million, or \$3.19 per Boe, for the three months ended March 31, 2013 compared to approximately \$1.7 million, or \$2.90 per Boe, for the three months ended March 31, 2012. Production taxes accounted for approximately \$1.5 million and ad valorem taxes for \$0.2 million of the total taxes recorded during the three months ended March 31, 2013. Production taxes accounted for approximately \$1.5 million and ad valorem taxes for \$0.2 million of the total taxes recorded during the three months ended March 31, 2012. The increase in the per Boe amounts over the first quarter of 2012 was driven by the overall lower production volumes in the first quarter of 2013.

Depletion and Depreciation. Our depletion and depreciation expense was approximately \$9.4 million, or \$17.74 per Boe, for the three months ended March 31, 2013 compared to approximately \$10.0 million, or \$16.83 per Boe, for the three months ended March 31, 2012. The increase in the per Boe amounts over the first quarter of 2012 was due to higher capitalized costs in the first quarter of 2013.

Impairment of Oil and Natural Gas Properties. We did not record an impairment charge in the three months ended March 31, 2013. We recorded an impairment of approximately \$3.1 million for the three months ended March 31, 2012 on our proved properties during the period. If future oil or natural gas prices decline, the estimated undiscounted future cash flows for our proved oil and natural gas properties may not exceed the net capitalized costs for such properties and a non-cash impairment charge may be required to be recognized in future periods. As of May 3, 2013, the NYMEX-WTI oil spot price was \$95.61 per Bbl and the NYMEX-Henry Hub natural gas spot price was \$3.96 per MMBtu.

General and Administration Expenses. Our general and administrative expenses were approximately \$3.3 million, or \$6.22 per Boe, for the three months ended March 31, 2013 compared to approximately \$3.2 million, or \$5.36 per Boe, for the three months ended March 31, 2012. The increase in the per Boe amounts over the first quarter of 2012 was driven by the overall lower production volumes in the first quarter of 2013.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Interest Expenses. Our interest expense is comprised of interest on our credit facility and term loan, amortization of debt issuance costs and realized gains (losses) on our interest rate derivative instruments. Interest expense was approximately \$2.4 million and \$1.2 million for the three months ended March 31, 2013 and 2012, respectively. The increase in interest expense was primarily due to the increased debt level at the end of the first quarter of 2013. Unrealized gains on interest rate derivative contracts were approximately \$0.3 million and \$0.8 million for the three months ended March 31, 2013 and 2012, respectively.

Table of Contents

Non-GAAP Financial Measures

Below we disclose the non-GAAP financial measures Adjusted EBITDA and Distributable Cash Flow for the periods presented and provide reconciliations of these items to net income (loss), our most directly comparable financial performance measure calculated and presented in accordance with GAAP. We define Adjusted EBITDA as net income (loss):

- *Plus:*

- Income tax expense (benefit);
- Interest expense-net, including realized and unrealized losses on interest rate derivative contracts;
- Depletion and depreciation;
- Accretion of asset retirement obligations;
- Amortization of equity awards;
- Gain (loss) on settlement of asset retirement obligations;
- Unrealized gains (losses) on commodity derivative contracts;
- Amortization of derivative contracts;
- Impairment of oil and natural gas properties; and
- Other non-recurring items that we deem appropriate.

- *Less:*

- Interest income;
- Unrealized gains on commodity derivative contracts; and
- Other non-recurring items that we deem appropriate.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

We define Distributable Cash Flow as Adjusted EBITDA less income tax expense, cash interest expense and estimated maintenance capital expenditures.

Adjusted EBITDA and Distributable Cash Flow are used as supplemental financial measures by our management and by external users of our financial statements, such as investors, commercial banks and others, to assess:

- our operating performance as compared to that of other companies and partnerships in our industry, without regard to financing methods, capital structure or historical cost basis; and
- the ability of our assets to generate sufficient cash flow to make distributions to our unitholders.

Our management believes that both Adjusted EBITDA and Distributable Cash Flow are useful to investors because these measures are used by many partnerships in the industry as measures of operating and financial performance and are commonly employed by financial analysts and others to evaluate the operating and financial performance of the Partnership from period to period and to compare it with the performance of other publicly traded partnerships within the industry. Adjusted EBITDA and Distributable Cash Flow should not be considered alternatives to net income, operating income, or any other measures of financial performance presented in accordance with GAAP. Our Adjusted EBITDA and Distributable Cash Flow may not be comparable to similarly titled measures of another company because all companies may not calculate Adjusted EBITDA and Distributable Cash Flow in the same manner.

Our Adjusted EBITDA for the three months ended March 31, 2013 and 2012 was approximately \$14.9 million and \$19.5 million, respectively.

Our Distributable Cash Flow for the three months ended March 31, 2013 and 2012 was approximately \$8.0 million and \$13.2 million, respectively.

Reconciliation of Adjusted EBITDA to Net Income

The following table presents a reconciliation of Adjusted EBITDA to net income, our most directly comparable GAAP financial performance measure, for each of the periods indicated.

Table of Contents

(in thousands)	Three Months Ended March 31,	
	2013	2012
Net income (loss)	\$ (7,450)	\$ 5,318
Income tax expense	5	126
Interest expense-net, including realized and unrealized losses on interest rate derivative instruments	2,150	356
Depletion and depreciation	9,416	9,983
Accretion of asset retirement obligations	457	373
Amortization of equity awards	115	69
Gain on settlement of asset retirement obligations	(25)	(98)
Unrealized losses on commodity derivative instruments	10,029	271
Amortization of derivative contracts	247	
Impairment of oil and natural gas properties		3,093
Interest income		
Unrealized gain on commodity derivative instruments		
Adjusted EBITDA	\$ 14,944	\$ 19,491

Distributable Cash Flow

The following table presents a reconciliation of Distributable Cash Flow to Adjusted EBITDA for each of the periods presented. Adjusted EBITDA is reconciled to net income, our most directly comparable GAAP performance measure, above.

(in thousands)	Three Months Ended March 31,	
	2013	2012
Adjusted EBITDA	\$ 14,944	\$ 19,491
Income tax expense	(5)	(126)
Cash interest expense	(2,129)	(1,410)
Estimated maintenance capital (1)	(4,800)	(4,800)
Distributable Cash Flow	\$ 8,010	\$ 13,155

(1) Amount represents pro-rated capital for the period.

Liquidity and Capital Resources

Our ability to finance our operations, including funding capital expenditures and acquisitions, to meet our indebtedness obligations, to refinance our indebtedness or to meet our collateral requirements will depend on our ability to generate cash. Our ability to generate cash is subject to a number of factors, some of which are beyond our control, including commodity prices, particularly for oil and natural gas, weather and our ongoing efforts to manage operating costs and maintenance capital expenditures, as well as general economic, financial, competitive, legislative, regulatory and other factors.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Our primary sources of liquidity and capital resources are cash flows generated by operating activities, borrowings under our credit facility and term loan and equity offerings. We may issue additional equity and debt as needed.

We enter into hedging arrangements to reduce the impact of commodity price volatility on our cash flow from operations. Under this strategy, we enter into commodity derivative contracts at times and on terms desired to maintain a portfolio of commodity derivative contracts covering approximately 65% to 85% of our estimated production from total proved developed producing reserves over a three-to-five year period at a given point in time, although we may from time to time hedge more or less than this approximate range.

Table of Contents

Our partnership agreement requires that we distribute all of our available cash (as defined in the partnership agreement) to our unitholders and our general partner. In making cash distributions, our general partner attempts to avoid large variations in the amount we distribute from quarter to quarter. In order to facilitate this, our partnership agreement permits our general partner to establish cash reserves to be used to pay distributions for any one or more of the next four quarters. In addition, our partnership agreement allows our general partner to borrow funds to make distributions.

We may borrow to make distributions to our unitholders, for example, in circumstances where we believe that the distribution level is sustainable over the long-term, but short-term factors have caused available cash from operations to be insufficient to sustain our level of distributions. In addition, a significant portion of our production is hedged. We are generally required to settle our commodity hedge derivatives within five days of the end of the month. As is typical in the oil and gas industry, we generally do not receive the proceeds from the sale of our hedged production until 45 to 60 days following the end of the month. As a result, when commodity prices increase above the fixed price in the derivative contracts, we are required to pay the derivative counterparty the difference between the fixed price in the derivative contract and the market price before we receive the proceeds from the sale of the hedged production. If this occurs, we may make working capital borrowings to fund our distributions. Because we distribute all of our available cash, we will not have those amounts available to reinvest in our business to increase our proved reserves and production and as a result, we may not grow as quickly as other oil and gas entities or at all.

We are committed to reinvesting a sufficient amount of our cash flow to fund our exploitation and development capital expenditures in order to maintain our production, and we use, and intend to use in the future, primarily external financing sources, including commercial bank borrowings and the issuance of debt and equity interests, rather than cash reserves established by our general partner, to make acquisitions to further increase our production and proved reserves. Because our proved reserves and production decline continually over time and because we do not own any significant undeveloped properties or leasehold acreage, we will need to make acquisitions to sustain our level of distributions to unitholders over time.

If cash flow from operations does not meet our expectations, we may reduce our expected level of capital expenditures, reduce distributions to unitholders, and/or fund a portion of our capital expenditures using borrowings under our credit facility or term loan, issuances of debt and equity securities or from other sources, such as asset sales. Our ability to raise funds through the incurrence of additional indebtedness could be limited by the covenants in our credit facility and term loan. If we are unable to obtain funds when needed or on acceptable terms, we may not be able to complete acquisitions that may be favorable to us or finance the capital expenditures necessary to maintain our production or proved reserves.

As of March 31, 2013, we had borrowing capacity of \$65.0 million under our \$500 million revolving credit facility (\$250 million borrowing base less \$185.0 million of outstanding borrowings) and \$43.2 million of cash on hand. A portion of our cash on hand was used to fund our East Velma Acquisition, which closed on April 1, 2013, from Lime Rock Resources II-A, L.P. and Lime Rock Resources II-C, L.P., collectively referred to as Fund II, for a purchase price of approximately \$38.2 million. As of March 31, 2013, we had no available borrowing capacity under our \$50 million term loan.

Based upon current oil and natural gas price expectations and our commodity derivatives positions for the period ended March 31, 2013, which cover 88% of our remaining 2013 estimated production from total proved developed producing reserves, we anticipate that our cash on hand, cash flow from operations and available borrowing capacity under our revolving credit facility will provide us sufficient working capital to meet our planned 2013 capital expenditure and minimum distribution requirements as described under Outlook below.

Credit Agreement

Edgar Filing: LRR Energy, L.P. - Form 10-Q

In July 2011, subject to consummation of our initial public offering, we, as guarantor, and our wholly owned subsidiary, LRE Operating, LLC (OLLC), as borrower, entered into a five-year, \$500 million senior secured revolving credit facility, as amended, (the Credit Agreement) that matures in July 2016. The Credit Agreement is reserve-based and we are permitted to borrow under our credit facility an amount up to the borrowing base, which was \$250 million as of March 31, 2013. Our borrowing base, which is primarily based on the estimated value of our

Table of Contents

oil and natural gas properties and our commodity derivative contracts, is subject to redetermination semi-annually by our lenders and once during the interim periods at their sole discretion.

A future decline in commodity prices could result in a redetermination that lowers our borrowing base in the future and, in such case, we could be required to repay any indebtedness in excess of the borrowing base, or we could be required to pledge other oil and natural gas properties as additional collateral. We do not anticipate having any substantial unpledged properties, and we may not have the financial resources in the future to make any mandatory principal prepayments required under our credit facility. Additionally, we will not be able to pay distributions to our unitholders in any such quarter in the event there exists a borrowing base deficiency or an event of default either before or after giving effect to such distribution or we are not in pro forma compliance with the credit facility after giving effect to such distribution.

If we fail to perform our obligations under the covenants described in our 2012 Annual Report, the revolving credit commitments could be terminated and any outstanding indebtedness under the credit facility, together with accrued interest, could be declared immediately due and payable. As of March 31, 2013, we were in compliance with our covenants.

At March 31, 2013, we had approximately \$185.0 million of outstanding borrowings under our credit facility and available borrowing capacity of approximately \$65.0 million.

Our borrowing base was reaffirmed by our lending group in April 2013 at \$250 million. We do not expect the latest borrowing base redetermination to impact our operations, capital program, or ability to make quarterly cash distributions to our unitholders at currently anticipated levels.

Term Loan Agreement

On June 28, 2012, we, as parent guarantor, and our wholly owned subsidiary, OLLC, as borrower, entered into a Second Lien Credit Agreement (the Term Loan Agreement). The Term Loan Agreement provides for a \$50 million senior secured second lien term loan to OLLC. OLLC borrowed \$50 million under the Term Loan Agreement and used the borrowings to repay outstanding borrowings under the Credit Agreement.

Our Term Loan Agreement contains various covenants and restrictive provisions as described in our 2012 Annual Report. As of March 31, 2013, we were in compliance with all covenants contained in the Term Loan Agreement.

Commodity Derivative Contracts

The following table summarizes, for the periods presented, the weighted average price and notional volumes of our oil, NGL and natural gas swaps and collars in place as of March 31, 2013. The weighted average price is based on the swap price for oil, NGL and natural gas swaps and

Edgar Filing: LRR Energy, L.P. - Form 10-Q

the floor price of oil and natural gas collars. We use swaps and collars as a mechanism for managing commodity price risks whereby we pay the counterparty floating prices and receive fixed prices from the counterparty. By entering into the hedge agreements, we mitigate the effect on our cash flows of changes in the prices we receive for our oil, NGL and natural gas production. These transactions are settled based upon the NYMEX-WTI price of oil and the NYMEX-Henry Hub price of natural gas on the average of the three final trading days of the month, with settlement occurring on the fifth day of the production month.

Edgar Filing: LRR Energy, L.P. - Form 10-Q

Table of Contents

Term	Oil (NYMEX-WTI) Weighted Average		NGL (NYMEX-WTI) Weighted Average		Natural Gas (NYMEX-Henry Hub) Weighted Average	
	\$/Bbl	Bbls/d	\$/Bbl	Bbls/d	\$/Mmbtu	Mmbtu/d
2013	\$ 95.20	1,804	\$ 41.95	609	\$ 5.04	20,965
2014	\$ 95.81	1,508	\$ 35.35	288	\$ 5.53	16,649
2015	\$ 94.72	1,152			\$ 5.72	15,069
2015	\$ 86.02	1,089			\$ 4.29	14,887
2016	\$ 85.75	545			\$ 4.61	13,824

The following table summarizes, for the periods presented, our natural gas basis swaps in place as of March 31, 2013. These contracts are designed to effectively fix a price differential between the NYMEX-Henry Hub price and the index price at which the physical natural gas is sold.

Term	Centerpoint East		Houston Ship Channel		WAHA		TEXOK	
	\$/Mmbtu	Mmbtu/d	\$/Mmbtu	Mmbtu/d	\$/Mmbtu	Mmbtu/d	\$/Mmbtu	Mmbtu/d

2016	\$		\$ (0.0810)	2,691	\$ (0.1326)	4,408	\$ (0.0975)	784

The following table summarizes, for the periods presented, our oil basis swaps in place as of March 31, 2013. These contracts are designed to effectively fix a price differential between the NYMEX-WTI price and the index price at which the physical oil is sold.

Term	Midland-Cushing	
	\$/Bbl	Bbl/d
2013	\$ (1.2500)	1,355
2014	\$ (1.0000)	1,124

Cash Flows

Cash flows provided (used) by type of activity were as follows for the periods indicated (in thousands):

	Three Months Ended March 31,	
	2013	2012
Net cash provided by (used in):		
Operating activities	\$ 9,854	\$ 20,293
Investing activities	(3,824)	(6,387)
Financing activities	33,712	(8,616)

Operating Activities.

Net cash provided by operating activities was approximately \$9.9 million and \$20.3 million for the three months ended March 31, 2013 and 2012, respectively. Revenues fluctuate due to the volatility of commodity prices, and therefore our cash provided by operating activities is impacted by the prices received for oil and natural gas sales, as well as levels of production volumes and operating expenses.

Our working capital totaled \$50.2 million and \$19.0 million at March 31, 2013 and December 31, 2012, respectively. Our collection of receivables has historically been timely, and losses associated with uncollectible

Table of Contents

receivables have historically not been significant. Our cash balances totaled \$43.2 million and \$3.5 million at March 31, 2013 and December 31, 2012, respectively. A portion of our cash on hand at March 31, 2013 was used to fund our East Velma Acquisition from Fund II, which closed on April 1, 2013, for a purchase price of approximately \$38.2 million.

Investing Activities.

Net cash used in investing activities was approximately \$3.8 million and \$6.4 million for the three months ended March 31, 2013 and 2012, respectively, which primarily represented additions to our property and equipment balances during the period.

Financing Activities.

Net cash provided by financing activities was approximately \$33.7 million for the three months ended March 31, 2013, consisting of net proceeds received from an equity offering of approximately \$59.6 million, borrowings under the Credit Agreement of \$29.0 million offset by payments on the Credit Agreement of \$22.0 million, distributions to Fund I associated with acquisitions of \$22.1 million and distributions to unitholders of \$10.8 million.

Net cash used in financing activities was approximately \$8.6 million for the three months ended March 31, 2012 and represented distributions and contributions to our unitholders and Fund I during the period.

Outlook

We expect to spend approximately \$30.0 million in total capital expenditures in 2013, of which approximately \$20.3 million represents maintenance capital expenditures, on the development of our oil and natural gas properties.

We intend to make cash distributions to our unitholders and our general partner at least at the minimum quarterly distribution rate of \$0.4750 per unit per quarter (\$1.90 per unit on an annualized basis). Based on the number of common units, subordinated units and general partner units outstanding as of May 3, 2013, quarterly distributions to all of our unitholders at the minimum quarterly distribution rate would total approximately \$12.4 million. We recently announced an increase to our quarterly distribution for the first quarter of 2013. Our current distribution is \$0.4825 per unit (\$1.93 per unit on an annualized basis), or \$12.6 million in aggregate. Our board of directors determines our distribution each quarter and there is no guarantee that the board will maintain or increase our current quarterly distribution in future periods.

We intend to pursue acquisitions of long-lived, low-risk producing oil and natural gas properties with reserve exploitation potential. We would expect to finance any significant acquisition of oil and natural gas properties in 2013 through external financing sources, including borrowings under our revolving credit facility and the issuance of debt and equity securities.

Off-Balance Sheet Arrangements

As of March 31, 2013, we had no off-balance sheet arrangements.

Critical Accounting Policies and Estimates

There have been no material changes to our critical accounting policies from those described in our 2012 Annual Report.

Recently Issued Accounting Pronouncements

Refer to Note 2 of the consolidated condensed financial statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes to the commodity price risk, interest rate risk and counterparty and customer credit risk discussed in our Annual Report on Form 10-K for the year ended December 31, 2012 under the caption Management's Discussion and Analysis or Financial Condition and Results of Operations Quantitative and Qualitative Disclosure About Market Risk.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) of the Securities Exchange Act, as amended (the Exchange Act), we have evaluated, under the supervision and with the participation of our management, including our principal executive officers and principal financial officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officers and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Our principal executive officers and principal financial officer, with the participation of management, have concluded that our disclosure controls and procedures were effective at the reasonable assurance level as of March 31, 2013.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended March 31, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

Although we may, from time to time, be involved in litigation and claims arising out of our operations in the normal course of business, neither we nor our general partner is currently a party to any material legal proceedings. In addition, we are not aware of any significant legal or governmental proceedings against us or our general partner, or contemplated to be brought against us or our general partner, under the various environmental protection statutes to which we or our general partner is subject.

Item 1A. Risk Factors.

There have been no material changes to the risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2012.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Mine Safety Disclosures.

Not applicable.
