## **CVRD's Norwegian ferro alloys plant starts up operations**

Rio de Janeiro, June 30, 2003 Companhia Vale do Rio Doce (CVRD) informs that its wholly owned subsidiary, Rio Doce Manganese Norway (RDMN), located in Mo I Rana, Norway, started its operations today.

RDMN, formerly Elkem Rana, was acquired by CVRD in February 2003 for US\$ 17.6 million. CVRD is investing US\$ 10 million in the conversion of its plant to produce ferro manganese alloys, including the revamping of one of its electrical furnaces, environmental protection and safety procedures. Modern equipment was installed in every phase of the industrial process in order to protect the environment. A comprehensive analysis of the environmental impact of the plant's operation was performed and the operation was fully approved by the Norwegian environmental protection authorities.

The RDMN plant production capacity is 110,000 tons per year of ferro alloys and it will produce ferro silicon manganese and ferro manganese high carbon alloys. RDMN is consuming manganese ore fines supplied by CVRD's Azul mine, located in the Carajás mineral province, state of Pará, Brazil.

CVRD is already one of the leading global players in the manganese and ferro alloys market and the operation of RDMN enhances its competitiveness and facilitates to meet client needs in Europe. Besides its manganese mines and ferro alloys plants in Brazil, CVRD already owns and operates a ferro alloys plant in Continental Europe, Rio Doce Manganese Europe, located in Dunkerque, France.

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward looking statements, please see CVRD's reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
