### **MANAGEMENT'S COMMENTS ON 2Q07 RESULTS**

For the second quarter, Copa Holdings experienced a 22.9% or US\$43.8 million year-over-year increase in operating revenues, driven mainly by a 19.4% or US\$29.9 million increase in Copa Airlines operating revenues and a 39.4% or US\$14.7 million increase in Aero Republica operating revenues. Revenues per available seat mile increased 6.6% year-over-year, benefiting from higher consolidated yields and load factors.

Copa Airlines continued to be the main driver of capacity growth, increasing by 20%, while load factors increased 0.7 percentage points year-over-year to 76.7% during its low-season quarter. Aero Republica also recorded a 2.2 percentage point increase in load factor on a 0.7% increase in capacity.

On a consolidated level, yields increased 4.1% year-over-year. The main driver of these yield gains came from Aero Republica where the strength of the Colombian Peso, revenue management initiatives and increased yield-enhancing international flights delivered a 29.4% increase in yields. Copa Airlines yields experienced a 1.0% year-over-year decline as a result of a longer length of haul as well as competitive pressures in some markets. However, on a length of haul adjusted basis, Copa Airlines yields increased 1% year-over-year.

Operating costs for the quarter increased 20.4% or US\$33.3 million, driven mostly as a result of increased capacity and the impact of a stronger Colombian currency against the US dollar. Total unit cost, as measured by operating cost per available seat mile, increased 4.5% to 10.4 cents. Excluding fuel expense, unit costs increased 8.0% to 7.3 cents, mostly driven by Aero Republica, where ex-fuel unit costs increased by 28.3%, primarily as a result of a stronger Colombian currency.

Consolidated earnings before interest, taxes, depreciation, amortization and rents ("EBITDAR") rose 33.7% to US\$61.7 million from US\$46.1 million in 2Q06. EBITDAR margins increased by 2.1 percentage points to 26.2%. Operating income rose 37.0% to US\$39.0 million in 2Q07 from US\$28.5 million in 2Q06, while operating margins increased 1.7 percentage points to 16.6%.

The Company maintains a strong liquidity position, ending the quarter with US\$272.0 million in cash, cash equivalents, short-term and long-term investments, as well as approximately US\$34.5 million in committed credit lines. Total debt amounted to US\$724.2 million, which relates for the most part to aircraft and equipment financing.

Looking forward to the remainder of 2007, we expect healthy demand to continue into both Copa Airlines' and Aero Republica's seasonally strong second half of the year. This is evidenced by the recently released July traffic figures, where consolidated load factors registered a 1.8 percentage point increase on a 17% capacity increase. We expect Copa Airlines to continue experiencing increased yield pressure in the second half of the year as a result of introductory fares to promote new destinations as well as a more competitive fare environment. Nevertheless, we will continue to focus on maximizing unit revenues and capitalizing on the competitive advantages of having the most extensive and convenient intra-Latin American network.

On the operational front, continued global demand for pilots presents a challenge with respect to the hiring and retention of the necessary crews to support planned capacity deployment. This will result in more moderate growth for Copa Airlines in 2007 where, as a result of operational changes, full year capacity growth will be reduced from the originally forecasted 25% to approximately 21%. Additionally, Aero Republica's full year capacity growth is expected to be in the range of 3%, down from the previously forecasted 5%, mainly due to operational changes resulting from the loss of an EMBRAER-190 aircraft in the month of July.

During the third quarter, Copa Airlines added to its network four of the new markets planned for 2007, in addition to increased frequencies to key markets. These new destinations and frequencies, along with capacity added during the second half of 2006, will drive Copa Airlines' full year capacity growth. To carry on this growth, Copa Airlines has already received three of the seven aircraft scheduled for delivery in 2007.

For 2Q07, Aero Republica recorded operating income of US\$2.8 million, a significant improvement over the US\$4.8 million operating loss it recorded in 2Q06. Despite the short term setback regarding the loss of one of its new EMBRAER-190 aircraft, the airline continues on track in the execution of their transition plan and will be receiving an additional four EMBRAER-190s during the second half of 2007, to end the year with a fleet of seven EMBRAER-190's and six MD-80's.

Additionally, Aero Republica continues to increase its international connectivity with Copa Airlines' Hub of the Americas. Aero Republica now feeds Copa Airlines' Hub from four of Colombia's most important cities, recently

adding a second daily flight from Bogota. Aero Republica will further increase connectivity into Copa Airlines' hub in October when it begins new service from the city of Bucaramanga, Colombia.

---

During the second half of 2007, we expect to face some challenges with respect to pilot recruitment that have moderately tempered our capacity growth plans for 2007. This issue, along with some added competition that is pressuring yields has led us to revise slightly downward our full year 2007 guidance. Nevertheless, we anticipate continued strength in demand for travel in the region, enhanced by the growing preference of our network and product as the preferred choice for intra-Latin American travel. Copa Airlines will maintain its focus on setting the stage for sustained growth and profitability through rational fleet and network expansion, with emphasis on cost-control and delivering a world-class product.
