BARCLAYS PLC
TRADING UPDATE

Barclays PLC ("Barclays") will host a conference call at 09.00 (BST) today. A recording of the conference call will be posted on the Investor Relations website.

Key trends set out below, unless stated otherwise, relate to the three months to 31st March 2004, and are compared to the corresponding three months of 2003.

Barclays re-organised its portfolio of businesses with effect from 1st January

Edgar Filing: BARCLAYS PLC - Form 6-K

2004. The 2003 results based on the new structure are set out in the Appendix.

Group Performance Commentary

Matthew W. Barrett, Group Chief Executive, commented: "Barclays has made a strong start to 2004, demonstrating continued success in implementing our growth strategy both in the UK and internationally."

Profit before tax increased significantly compared to the relatively weak first quarter of 2003 and was well ahead of the quarterly average for 2003.

The growth in profit before tax continued to be broadly based, with sustained income growth underpinning increased confidence to invest for the future.

Individual Business Commentary

UK Banking made a solid start to 2004. In UK Retail Banking, income increased modestly, driven by higher average assets and liabilities, although balances remained in line with end of 2003 levels. Costs remained well controlled. In UK Business Banking, income growth reflected good increases in average lending and deposit balances. Costs rose as a consequence of increased volumes.

Private Clients made a strong start to 2004 as a result of a good underlying performance, improving equity markets and the successful integration of the Charles Schwab Europe business which was acquired in the first quarter of 2003. The Gerrard business, which was acquired in December 2003 performed well in the first quarter. The closed life assurance activities continued to be affected by costs relating to redress for customers in respect of sales of endowment policies. International performed well during the first quarter with a good performance in Spain, driven in part by Banco Zaragozano which was acquired in the third quarter of 2003. The integration of Banco Zaragozano is ahead of plan.

Barclaycard had a good first quarter. Income growth resulted from higher average balances in both the credit card and consumer finance businesses. Higher average balances more than compensated for the modest margin pressure resulting from the increases in UK base rates. Extended credit balances in the UK at the end of the quarter were in line with end of 2003 levels. The international business continued to demonstrate good income and balance growth. Costs in Barclaycard increased, reflecting higher business volumes and increased strategic investment spend.

The Wholesale and Institutional businesses made a very strong start to 2004. Barclays Capital had an excellent quarter as a result of record levels of client activity and an improved market environment. Record levels of income were well spread, with both primary and secondary income growing very strongly. Costs increased in line with income growth as a result of increased business volumes, continued investment in the business and higher performance related costs. Barclays Global Investors performed very strongly reflecting the positive effect of increased funds under management, continued good investment performance in the active business and further growth in exchange traded funds (Global iShares).

Group Income

Operating income rose strongly, with net interest income, fees and commissions, and dealing profits all higher. Total operating income was higher than in any quarter of 2003. Income growth also reflected the inclusion, for the first time, of businesses which were acquired in 2003.

The Group net interest margin remained broadly stable; an increase in the international margin more than offset a small decline in the domestic margin.

Edgar Filing: BARCLAYS PLC - Form 6-K

Group Costs

Operating expenses increased broadly in line with income growth, reflecting accelerating investment, increased variable compensation due to strong profit performances, and higher business volumes. Cost growth also reflected the inclusion, for the first time, of businesses which were acquired in 2003.

Industry wide regulatory compliance programmes, such as new UK regulation of mortgages and general insurance, International Financial Reporting Standards, Sarbanes Oxley and Basel II, affected cost growth in the first quarter and will impact cost growth in 2004.

Risk Management

Asset quality remained strong; potential credit risk loan balances fell during the first quarter. Total provisions for bad and doubtful debts also fell.

In UK Retail Banking, UK Business Banking and Barclaycard, growth in average balances resulted in provisions rising in line with expectations. Arrears performance and early warning risk indicators in these businesses were stable.

Barclays Capital continued to benefit from the improved credit environment in the wholesale markets.

Capital Management

Capital ratios remained strong, and the generation of earnings exceeded the capital requirements in the business.

The share repurchase programme continues to be used as the balancing factor in capital management. In 2004 to date, Barclays has repurchased GBP600m of shares, 1.9% of issued share capital, for cancellation at a weighted average price of 495p per share.
